3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.	
			13/11/2014	DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015.	
			20/11/2014	AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.	
			27/11/2014	DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	
3104	PMI 312 -	ADULT & CHILDREN'S HOSPITAL - COLD WATER STORAGE TANKS	17/11/2014	Please replace the installed hollow lid supports with solid supports.	
			20/11/2014	In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on 19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks. GW advised that he would confirm the costs to the NHS asap. Thereafter CE to be issued by the NHS.	

			<p>20/11/2014</p> <p>27/11/2014</p>	<p>Provide storage bags as noted in Schindler quotation (also attached).</p> <p>Please confirm total cost incl of OHP and confirm these items will be added to the Group 1 equipment list.</p> <p>GW noted that JBaillie will deal with the costs later that day. DH suggested that there was already a fixed costs provided for the works.</p> <p>GW advised that BMCL were obtaining firm costs. AF noted that the instruction had been issued to Schindler.</p>	
3138	PMI 316	Proposed alteration to AAW-170 Auto Dispense Room	01/12/2014	<p>The Board requests a quotation to alter room no. AAW-170 Auto Dispense in accordance with the attached mark-up omitting the following:</p> <p>a) COU8037 - reception counter (part installed)</p> <p>b) CAL001 - fit with blank plate to existing back box</p> <p>b) CAL036</p> <p>d) STF290L</p> <p>Board supplied items:</p> <p>a) COMP1000</p> <p>b) CHA004</p> <p>will not be provided</p> <p>The following services:</p> <p>a) DATA1000 are to be installed in the surface trunking as per attached sketch.</p> <p>It is proposed that these works are to be undertaken post completion and are to be completed by Thursday 12th March 2015.</p>	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	<p>12/09/2014</p> <p>25/09/2014</p>	<p>Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289.</p> <p>Agreed item to be closed</p> <p>PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell</p>	
13780	CE 067	Neurosurgical Block - Overclad Works Planning Application	03/12/2014	You are instructed to prepare and submit as soon as possible, a full application for planning consent for the above project. Please undertake any associated surveys.	

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) **DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014

Meeting organized on 31/10/2014 to discuss (30/10/2014) PM advised that the CMB was under consideration and requested that AFe confirm the number of BMCL which require to be accommodated. AFe confirmed that the preference was for BMCL to be on the ground floor. Afe suggested that the office block could remain on site until May – cabins to be removed June. PM suggested that the NHS floor would be closed in February (13/10/2014) PM advised that he had passed a draft paper to DLoudon. PM would provide a copy of the paper to AF asap. The proposed area that the NHS are moving into will need to be deep cleaned and decorated and IT installed. PM would liaise with DL to ascertain when the paper would be discussed with RC.

- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014) DP advised that he was setting up a meeting with Air Products, I Sandford, I Powrie, NHS and BMCL. GW advised that in the meantime BMCL have instructed WSP to do survey works. (09/10/2014) Further meeting next Tuesday there will require a 1 day down time to transfer over EW may be required but this will be decided after meeting 23/10/2014. Noted that Air Products are to provide information re revised base so WSP can design slab/base. BMCL will need to divert Oxygen main in that area. GW enquired what BMCL should do about the costs incurred as the slab is now a lot bigger than what was agreed. AFe suggested that BMCL should firstly ascertain if a piling solution will be required. DH noted that this is a timing issue re patient safety. (30/10/2014) GW advised that he would raise an EW as these works will fall outwith the completion period. DP advised that he had received the drawing and would issue this to the NHS for review. GW agreed to raise an EW regarding this matter. (19/11/2014) DS noted that the SI had been completed. Once the SI report has been received then the design of the slab will be commenced. (20/11/2014) DP agreed to provide GW with the wording to transfer this item into an EW. (27/11/2014)
- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014. DH advised that he had discussed this and it was thought that a PMI is not necessary (30/10/2014) GW to provide information to DH as DH had suggested that there has been a significant increase to the cost for the 3 small hatches. (13/11/2014) DH advised that he had the information re cost for changes and would discuss these with FW and confirm the NHS requirements asap thereafter (20/11/2014) DH advised that a manual interlock instead of electrical interlock was being suggested in order to reduce the cost. GW advised that AKerr is checking this out (27/11/2014)
- Pharmacy Roller Shutter - changes required? 23/10/2014 DP advised that he is awaiting info from FW re change to be made (30/10/2014) DH noted that there was an omission to the small shutter to the vending in AAU. PM agreed to review on site and confirm way forward to BMCL (13/11/2014) It was noted that it had been previously agreed that the shutter should be left in place. It was agreed that the NHS would review this on site to check that this will not foul with the vending machines.(20/11/14) PM advised that the roller shutter should remain as is (27/11/2014)
- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014) DP advised that the 1<sup>st</sup> panel is due to be on site on 14<sup>th</sup> November 2014. DP would organize for ISandford to confirm that he is ok with the set-up. Confirmation of panel demonstration is awaited (13/11/2014) AF noted that the panel hadn't arrived however DP was progressing the delivery of the panel (20/11/2014) DP advised that the panel was now due to be onsite on 28/11/2014. This would then be fitted urgently and it was proposed that a demonstration to provide a demonstration early w/c 01/12/2014. Corresponding deliveries will take place through December and into January 2015. (27/11/2014)
- Swisslog – DH noted that the NHS needed confirmation of what is included in the Swisslog Maintenance contract and GW agreed to investigate (20/11/2014) DH requested confirmation of what was included in the contract (27/11/2014)

- VIE/Turning circle – it was noted that the NHS Had thought that BMCL were going to speak to WSP re how they had done the swept path analysis – it was established on site that there was an issue with a manhole cover which meant that the lorry delivering to the VIE could not use this area. The man-hole cover has now been replaced and the lorry driver is to come back and check he is now ok to use the full area. (20/11/2014) PM noted that the NHS have had 3 deliveries and on each occasion the lorry needed to be reversed into situ. Keen to understand the design intent and swept path analysis. GW advised that DS and WSP should be able to provide this info to PM. It is understood that there may be a simple resolution to the issue and this was confirmed. PM advised that the lorry was coming back on Monday to redo the traffic movement. (27/11/2014)
- Walls at front entrance – PM advised that he should be able to confirm the way forward on 28/11/2014 – PM advised that he would still like to see a drawing asap. PM acknowledged that Gillespies are awaiting information to conclude the drawing. GW agreed to liaise with GB. (27/11/2014)
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014)
- Final sweep-up: Quality of corner welds – remediation works will be undertaken. Pull cords – a 'hybrid' location has been agreed to the 3 outstanding rooms. AF noted that JW is now pre-checking areas before JR goes in to do checks. Glazed screens – DH advised that on each floor as you exit cores A&B there is 2 glazed screens which are fitted the wrong round. Police room windows – PM advised that the blind mechanism to the police rooms still needs to be concluded (27/11/2014)
- Xmas plans – AFe advised that BMCL will be working up to the 24<sup>th</sup> December and that the site would most likely shut early on the 24<sup>th</sup> (perhaps lunchtime). The 28<sup>th</sup>, 29<sup>th</sup> and 30<sup>th</sup> will be business as usual and the site would likely shut early on the 31<sup>st</sup> December. On the 2<sup>nd</sup> of January there would be 2 BMCL reps on duty to check the site only. It is expected that the site will reopen fully on the 5<sup>th</sup> January 2015. AF agreed to provide an Emergency Contact Sheet however noted that the first point of contact would be AF, DP and GW. (27/11/2014)
- Transom covers – PM noted that the cover plate to the transom fixings at MRI/Imaging is unsightly. GW agreed to liaise with TDSL regarding this. (27/11/2014)
- MR Rooms – AF advised that he would like to look at the works re taking down the wall/taking the internal skin of the break out panel as is on the fire line. Risk is damage to the copper. DH noted that a discussion re how to put the wall back to create fire separation – suggestion is having a shaft wall at the break out panel location. (27/11/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1113

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 10/12/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23504	BMCE-EWN-000149	AGV Lift Segregation	21/011/2014  27/11/2014  04/12/2014	<p>Following the recent Swisslog AGV TCMS2 software simulation, we have been advised by Swisslog the current Clean &amp; Dirty lift segregation is detrimentally affecting their delivery systems and matrix times. Therefore, currently as the project stands, the AGV system is non-compliant with NHS ER's.</p> <p>Swisslog propose remove AGV Clean &amp; Dirty lift segregation to allowing all AGV's to use any AGV lift. NHS Infection Control Procedures for AGV Lifts Core C, D, F, H &amp; K to be reviewed.</p> <p>GW advised that the way forward had been agreed between KConnelly and CGrindlay. DH advised that essentially are not separating the clean and dirty or the vertical – PMI to be provided to BMCL to confirm acceptance of change from ERs.</p> <p>DH to provide form of words to close this item out</p>	
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p>	
		Link Bridge at Neuro and impact on INS Entrance	04/12/2014	<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p> <p>AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme.</p>	

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
22802	NHS EW 053	Curtain Tracks	26/09/2014  09/10/2014 24/10/2014  30/10/2014  13/11/2014 20/11/2014 27/11/2014  04/12/2014	<p>The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p> <p>PM advised that he would discuss this internally and report back.</p> <p>A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between two curtains when pulled fully closed - sub-contractor will be asked to review and amend the track if required.</p> <p>DH advised that he had undertaken a site visit with IHamilton and a solution to conclude the matter in A&amp;E and CC resus bays had been identified. DH would provide information to BMCL re variance in curtain track heights at half wall.</p> <p>DH and AFe had previously discussed this item and it had been agreed that IHamilton is going to arrange a sample for NHS review.</p> <p>AF noted that the sample is awaited and the NHS will be advised asap when the sample is available – will be a shortened sample.</p> <p>DH advised that he had seen a sample and was content with the sample however would want a certain piece cut out (middle leg to support). FMcCluskey had also been asked to review the sample. DH would provide an instruction later that day.</p> <p>DH advised that FW had authorized the works to IHamilton. It was agreed this item could be closed.</p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 10/12/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014         10/07/2014	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p>	

A51679245

			<p>24/07/2014 PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>31/07/2014 DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>14/08/2014 GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>21/08/2014 AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>28/08/2014 It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>11/09/2014 DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>25/09/2014 Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p> <p>02/10/2014 DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&amp;B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up &amp; down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overclad design review could be carried out in the same meeting.</p> <p>PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and BMCL should have highlighted all the risks. BMCL were in the process of identifying a panel carrier system which can be retrofitted. AFe advised that the programme to achieve a finished clad building in time for the royal opening is difficult noting that the timescale for the works is indicated as circa 36 weeks. PM noted that the NHS would be unable to signoff the proposals until the Planning permission is granted.</p>	
--	--	--	--	--

			09/10/2014	AFe advised that BMCL had met with CladUK who had subsequently provided an indicative price based on a standard panel. CladUK advised that the standard panel they use does not provide thermal gain as it is a vented system (top and bottom) however a formal response is awaited. BMCL anticipate obtaining a firmed up price for the works after the school holiday period. Once BMCL ensure that the price is in the NHS cost range then will apply for planning permission. DR requested that BMCL provide a programme for the cladding works in order that the NHS can identify and plan for when areas/offices, etc need to be vacated. AFe proposed that BMCL would mark-up a drawing to show the corridor works and ward/clinical area works noting that the corridor works will be quicker to do. It was noted that BMCL are seeking a fixed price for the works from CladUK. AFe noted that the cladding and window works sit separately. DR noted that it would be helpful if BMCL could reduce the price as the current price was close to the NHS budget for the works and this would assist to achieve approval of the INS Entrance works funding.
			23/10/2014	A sample board of the cladding to be provided to show options. AFe noted that the cost was not hugely different. A review of the risks required for window replacement activities. The area of elevation for the ICE building abutment now removed from the costs and repricing is completed. It was agreed that BMCE and NHS to meet next week to review. The next stage once agreed is to engage planning and project a start on site date - anticipated to be around March 2015. Design and warrants plus SER take around 12-14 weeks but BMCE will push to shorten this time. Cashflow - progress design up to Christmas and place order for all materials in order to maximize spend within current financial year.
			30/10/2014	GW noted that a further conversation with Clad UK had taken place and proposal repriced on the basis of these discussions. BMCL would be discussing with D&B Facades in due course. GW enquired about the drop dead date for NHS approval and DR confirmed that BMCL were to progress Planning as Planning is the driver for approval as is being dealt with through the Board's Capital Plan.
			13/11/2014	DS advised that he had made a couple of enquiries which had identified that a) the building could be overclad without insulating, b) building too hot as is so insulating c) Building Standards Division advised that should insulate, d) Building Control indicated that they could only decide on basis of application. DS was due to meet with RBarlow on 19/11 and he would raise the subject with RBarlow at this meeting. DS noted that if there is no requirement to insulate then the way forward was known. If the building did need to be insulated then the NHS would need to deal with the cooling of the building. DS suggested that it would be beneficial if a survey of the building environmental was undertaken. AFe advised that he was getting the drawings updated for review by the NHS. DL noted that it was disappointing that only now being advised of the Building Regulations and that the cost of the overclad project was getting close to being above the NHS financial envelope. If the NHS require to do anything re infrastructure to the building then the project may not go ahead. DL enquired if there was any opportunity to get the project through as the windows will improve the heat loss. PM advised that Glasgow University had just overclad a building without needing to insulate it. AFe advised that it was D&B Facades who had only recently suggested that insulation may be required. DL noted that it was only to be an aesthetic treatment to the building. DH suggested that the NHS have to achieve the cashflow. AFe noted that the cost provided to the NHS is for an insulated building. DR agreed to contact Glasgow University for information about their recent overclad project. PM agreed to contact DNimmo to advise that BMCL will be contacting him. DR advised that JMurray had previously been provided with a copy of the

			20/11/2014	feasibility study. DL advised that Robert Kilpatrick was the engineer and may be a good point of contact. DR noted that DNimmo may be the best person to speak to.	
			27/11/2014	PM advised that he had emailed RKilpatrick the previous week. DS noted that Building Control have advised that the panels do not need to be insulated. DL noted that the way forward re the cavity barrier would need to be agreed. It was noted that BMCL need to provide the programme as the NHS have cashflow to achieve. DS noted that there had been a previous discussion regarding the vesting of materials. AF agreed to provide the programme asap. DL enquired whether a staged warrant was required and DS advised that the overclad is a single application and the entrance works is in 6 stages. AF noted that BMCL were checking for any savings which could be obtained as insulated panel now required.	
			04/12/2014	AFe advised that revised prices had been received from CladUK and that D&B Facades would provide prices (excluding the insulation) later that day. BMCL were proposing to instruct the contract based on the previous proposals. PM advised that the NHS required drawings and a confirmed price based on insulated panels so can sign-off the proposals whilst awaiting formal confirmation from BMCL that they will accept the use of non-insulated panels. GW advised that PHeath is awaiting a price from D&B Facades for the non-insulated panel. It was noted that there had been an agreement to overpaint some of the panels at the rear of the building. PM advised that he would want to be able to close this item out by cop 28/11/2014. <b>PM advised that CE 067 had been issued to allow BMCL to proceed with the design. Agreed this item could be closed</b>	
3040	PMI 309	Langlands Drive Bus Lay- by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.	
			23/10/2014	Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.	
			30/10/2014	IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.	
			13/11/2014	All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works. PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded. DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out. DP advised that SGN were due on site later that day to inspect the pipe and advise on any work	

			20/11/2014	required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			27/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			04/12/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation. <b>AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</b>	
3061	PMI 310	ADAPTATIONS TO BUILDING SERVICES FOR IMAGING EQUIPMENT INSTALL	27/10/2014	Please proceed with the attached amendments to services/equipment as per the attached schedule. Costs for same to be incorporated in the Group1 equipment list.  The Board request that alterations to 13no. General X-Ray rooms, as listed on the attached schedule, are undertaken to facilitate the installation of Samsung Digital X-Ray equipment by MIS Ltd. The alterations are limited to:  <ul style="list-style-type: none"> <li>- removal of temporary/permanent containment at desk locations</li> <li>- relocation of sprinkler heads</li> <li>- removal of RAC1020 pigeon hole units</li> <li>- relocation of wireless access points</li> <li>- removal of emergency stop buttons in 3 locations</li> <li>- Relocation of nurse call/reset panel in 2 locations</li> <li>- Relocation of lead apron rack.</li> </ul>	
			13/11/2014	Works to include, where necessary, making good of lead lining and finishes. DH noted that the works are ongoing. DH was being advised that the works are not being carried out quick enough. DP noted that resources are being diverted to carry out the adaptations when it was possible to do so as BMCL were ensuring no impact to other works.	
			20/11/2014	DH noted that the majority of works have been carried out. GW advised that he would provide tge cost info asap.	
			27/11/2014	DH noted that the alterations are work in progress. Costs are needed asap. GW reported that Mercury have advised that they will provide the costs later that day.	
			04/12/2014	<b>DH advised that the costs had been agreed for incorporation in the Group1 equipment list. Agreed item could be closed.</b>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the</li> </ol>	

			<p>room to the vacant arm on the surgeon's panel/pendant side of the table.</p> <p>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</p> <p>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</p> <p>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</p> <p>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228for connection of 'stacks' to the pendant.</p> <p>13/11/2014 DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p> <p>20/11/2014 AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015.DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</p> <p>27/11/2014 DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26<sup>th</sup> January 2015 however the light needs to be moved asap.</p> <p>04/12/2014 DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.</p>	
3104	PMI 312 -	ADULT & CHILDREN'S HOSPITAL - COLD WATER STORAGE TANKS	<p>17/11/2014 Please replace the installed hollow lid supports with solid supports.</p> <p>In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on 19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks.</p> <p>20/11/2014 GW advised that he would confirm the costs to the NHS asap. Thereafter CE to be issued by the NHS.</p> <p>27/11/2014 GW advised that he had received costs. Identifying what works need to be done. In discussion with Mercury with some queries.</p> <p>04/12/2014 DH advised that the costs had been agreed. DP advised that the instruction had been issued to Mercury.</p>	
3105	PMI 313 -	MRI Room Services	<p>17/11/2014 The following items require to be addressed to allow co-ordination with the Siemens installations within the 4no. MRI suites, in the following order to follow the installation programme.</p> <p>RCG -064 (MRI Scanner): Waste pipework from drip tray beneath SWVP to be re-routed away from vent ductwork and connected to drainage</p> <p>RCG-065 (Technical Room): Existing PAN013 to be replaced with isolator to allow installation of supplier switchgear</p>	

			<p>20/11/2014</p> <p>27/11/2014</p> <p>04/12/2014</p>	<p>RAG - 123 (Technical Room): Electrical switchgear currently located on wall backing on to RAG-112 to be relocated on to wall backing on to MIL-007/MIL-004 set out min 2.5m from original wall, all to allow installation of penetration panel and equipment cabinets</p> <p>RAG-109 (MRI Room): Quench pipe entering from RAG-110 to be raised to above Faraday Cage level(exact requirement to be confirmed) and existing support to be modified to eliminate likelihood of damage/corrosion due to contact between different metals</p> <p>RAG-110 (Technical Room): Review cooling requirements, and if acceptable, remove 1no. Airedale downflow unit backing on to RAG-111. Relocate switchgear from current position to location vacated by downflow unit including replacing PAN 013 with isolator switch</p> <p>RCF - 042: Remove existing PAN-013 and locate new isolator to RHS of door leaving space for supplier switchgear</p> <p>AFe advised this PMI needed to be discussed. DH noted that the revised works to RCG 064 needs to be complete by Monday 24<sup>th</sup> November 2014 as the Group 5 supplier commences their works on 24/11/2014.</p> <p>GW advised that he had received costs the previous night. DH requested the costs from GW asap.</p> <p>DH advised that this had been agreed. An overarching PMI would be provided to BMCL asap. These items were all contained within the equipment list. DH thanked BMCL for their efforts to resolve.</p>	
3106	PMI 314 -	Fluoroscopy Equipment Co-ordination	<p>17/11/2014</p> <p>04/12/2014</p>	<p>The Board request that the wall mounted IPS control panel in the Endoscopy room (RAF-009) is relocated to allow positioning of the equipment generators.</p> <p>It is proposed that, subject to size/depth of the panel, it is relocated onto the control desk trunking/power pole being installed by Phillips as part of the Group 5 installation.</p> <p>DH noted that this item had all been agreed</p>	
3112	PMI 315	ADULT & CHILDREN'S HOSPITALS - PROTECTIVE CURTAINS FOR LIFTS	<p>19/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p>	<p>Please order and install hanging studs and protective fabric drapes as detailed in the attached drawing and specification.</p> <p>Please proceed and have stud fixings for hanging protective drapes in lift cars installed in 8 No. lifts cars as detailed on the attached drawing.</p> <p>Please provide 6 sets of protective lift drapes as detailed on the attached schedule, sized for the specific lifts noted. Note some lifts will share 1 set of drapes.</p> <p>Provide storage bags as noted in Schindler quotation (also attached).</p> <p>Please confirm total cost incl of OHP and confirm these items will be added to the Group 1 equipment list.</p> <p>GW noted that JBaillie will deal with the costs later that day. DH suggested that there was already a fixed costs provided for the works.</p> <p>GW advised that BMCL were obtaining firm costs. AF noted that the instruction had been issued to</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014  25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	
13780	CE 067	Neurosurgical Block - Overclad Works Planning Application	03/12/2014  04/12/2014	You are instructed to prepare and submit as soon as possible, a full application for planning consent for the above project. Please undertake any associated surveys. AFe advised that he has instructed the survey works – potentially 8/9 <sup>th</sup> December. BMCL understood that the vesting of material is not possible. It was agreed this item could be closed.	BMCL to input costs on Sypro
13835	CE 068	ADULT & CHILDREN'S HOSPITALS - COLD WATER STORAGE TANK LID SUPPORTS	10/12/2014	In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on 19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks. Agreed price including OH&P is £31,896.00 ex VAT.	BMCL to input costs on Sypro

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) **DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014 Meeting organized on 31/10/2014 to discuss (30/10/2014) PM advised that the CMB was under consideration and requested that AFe confirm the number of BMCL which require to be accommodated. AFe confirmed that the preference was for BMCL to be on the ground floor. AFe suggested that the office block could remain on site until May –

cabins to be removed June. PM suggested that the NHS floor would be closed in February (13/10/2014) PM advised that he had passed a draft paper to DL and PM would provide a copy of the paper to AF asap. The proposed area that the NHS are moving into will need to be deep cleaned and decorated and IT installed. PM would liaise with DL to ascertain when the paper would be discussed with RC. (27/11/2014) **PM advised that he is awaiting feedback from DL/RC conversation (04/12/2014).**

- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014. DH advised that he had discussed this and it was thought that a PMI is not necessary (30/10/2014) GW to provide information to DH as DH had suggested that there has been a significant increase to the cost for the 3 small hatches. (13/11/2014) DH advised that he had the information re cost for changes and would discuss these with FW and confirm the NHS requirements asap thereafter (20/11/2014) DH advised that a manual interlock instead of electrical interlock was being suggested in order to reduce the cost. GW advised that AKerr is checking this out (27/11/2014) **DH advised he was awaiting cost info from AKerr (04/12/2014)**
- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014) DP advised that the 1<sup>st</sup> panel is due to be on site on 14<sup>th</sup> November 2014. DP would organize for ISandford to confirm that he is ok with the set-up. Confirmation of panel demonstration is awaited (13/11/2014) AF noted that the panel hadn't arrived however DP was progressing the delivery of the panel (20/11/2014) DP advised that the panel was now due to be onsite on 28/11/2014. This would then be fitted urgently and it was proposed that a demonstration to provide a demonstration early w/c 01/12/2014. Corresponding deliveries will take place through December and into January 2015. (27/11/2014) **DP advised that ISandford went to MMPL (supplier of the alarms) and witnessed the test and is comfortable with what he witnessed. It was understood that the inducer was due to arrive on site later that day. (04/12/2014)**
- Swisslog – DH noted that the NHS needed confirmation of what is included in the Swisslog Maintenance contract and GW agreed to investigate (20/11/2014) **DH requested confirmation of what was included in the contract (27/11/2014)**
- VIE/Turning circle – it was noted that the NHS Had thought that BMCL were going to speak to WSP re how they had done the swept path analysis – it was established on site that there was an issue with a manhole cover which meant that the lorry delivering to the VIE could not use this area. The man-hole cover has now been replaced and the lorry driver is to come back and check he is now ok to use the full area. (20/11/2014) PM noted that the NHS have had 3 deliveries and on each occasion the lorry needed to be reversed into situ. Keen to understand the design intent and swept path analysis. GW advised that DS and WSP should be able to provide this info to PM. It is understood that there may be a simple resolution to the issue and this was confirmed. PM advised that the lorry was coming back on Monday to redo the traffic movement. (27/11/2014) **PM advised that there had been a meeting with the Lead Driver onsite on Monday and the turning circle didn't work. WSP carrying out redesign to resolve the issue. (04/12/2014)**
- Walls at front entrance – PM advised that he should be able to confirm the way forward on 28/11/2014 – PM advised that he would still like to see a drawing asap. PM acknowledged that Gillespies are awaiting information to conclude the drawing. GW agreed to liaise with GB. (27/11/2014) **PM advised that he had met with GB and AKerr and he now only needed to see the drawings. PM would provide a PMI to confirm the way forward asap. Item can then be closed. (04/12/2014)**
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) **AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014)**
- Final sweep-up: Quality of corner welds – remediation works will be undertaken. Pull cords – a 'hybrid' location has been agreed to the 3 outstanding rooms. AF noted that JW is now pre-checking areas before JR goes in to do checks. Glazed screens – DH advised that on each floor as you exit cores A&B there is 2 glazed screens which are fitted the wrong round. Police room windows – PM advised that the blind mechanism to the police rooms still needs to be concluded (27/11/2014) **AF advised that the Peterborough Project had suggested that there was some fire stopping and fire dampers which may not have been left as they should have been. AF had brought in a team to review all the fire stopping. (04/12/2014)**
- Xmas plans – AFe advised that BMCL will be working up to the 24<sup>th</sup> December and that the site would most likely shut early on the 24<sup>th</sup> (perhaps lunchtime). The 28<sup>th</sup>, 29<sup>th</sup> and 30<sup>th</sup> will be business as usual and the site would likely shut early on the 31<sup>st</sup> December. On the 2<sup>nd</sup> of January there would be 2 BMCL reps on duty to check the site only.

It is expected that the site will reopen fully on the 5<sup>th</sup> January 2015. AF agreed to provide an Emergency Contact Sheet however noted that the first point of contact would be AF, DP and GW. (27/11/2014) DP advised that this should already have been issued by PBeauchamp. DH advised that he had received the information and had passed onto the Group 5 contractors. (04/12/2014)

- Transom covers – PM noted that the cover plate to the transom fixings at MRI/Imaging is unsightly. GW agreed to liaise with TDSL regarding this. (27/11/2014) It was agreed this item could be closed DH noted that the door at Nuclear Medicine (A&C Shared room) should have had a removable panel – this item had been previously raised a while back.
- MR Rooms – AF advised that he would like to look at the works re taking down the wall/taking the internal skin of the break out panel as is on the fire line. Risk is damage to the copper. DH noted that a discussion re how to put the wall back to create fire separation – suggestion is having a shaft wall at the break out panel location. (27/11/2014) DH advised that the cages had been put up however these would need to be carefully taken down in January 2015.
- Crane lift for chillers – AF noted that the preference is for a Sunday crane lift as there is still a lot of deliveries to the site. DH will confirm back to the company that the lift needs to take place on the 14<sup>th</sup> December 2014. AF requested that DH confirms what support will be required from BMCL that day. DR advised that the Method Statement would need to be checked – it is important to ensure that insurances are in place. AF advised that the contact to assist the NHS with the crane move is Steven Docherty. (04/12/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1125

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 07/01/2015:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
23504	BMCE-EWN-000149	AGV Lift Segregation	21/01/2014          27/11/2014          04/12/2014 11/12/2014	<p>Following the recent Swisslog AGV TCMS2 software simulation, we have been advised by Swisslog the current Clean &amp; Dirty lift segregation is detrimentally affecting their delivery systems and matrix times. Therefore, currently as the project stands, the AGV system is non-compliant with NHS ER's.</p> <p>Swisslog propose remove AGV Clean &amp; Dirty lift segregation to allowing all AGV's to use any AGV lift. NHS Infection Control Procedures for AGV Lifts Core C, D, F, H &amp; K to be reviewed.</p> <p>GW advised that the way forward had been agreed between KConnelly and CGrindlay. DH advised that essentially are not separating the clean and dirty or the vertical – PMI to be provided to BMCL to confirm acceptance of change from ERs.</p> <p>DH to provide form of words to close this item out  <b>DH advised that he had drafted working and would issue a PMI later that day</b></p>			
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014          04/12/2014	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p><b>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</b></p>			
		Link Bridge at Neuro and impact on INS Entrance	04/12/2014          11/12/2014	<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p> <p>AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme.</p> <p><b>DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut.</b></p>

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 10/12/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later	

			04/12/2014  11/12/2014	that day to discuss public/pedestrian separation. AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri). DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014          13/11/2014  20/11/2014  27/11/2014  04/12/2014  11/12/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant. DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015. AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday. DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap. DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS. DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.	
3104	PMI 312 -	ADULT & CHILDREN'S HOSPITAL - COLD WATER STORAGE TANKS	17/11/2014	Please replace the installed hollow lid supports with solid supports.  In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on	

			<p>20/11/2014</p> <p>27/11/2014</p> <p>04/12/2014</p> <p>11/12/2014</p>	<p>19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks.</p> <p>GW advised that he would confirm the costs to the NHS asap. Thereafter CE to be issued by the NHS.</p> <p>GW advised that he had received costs. Identifying what works need to be done. In discussion with Mercury with some queries.</p> <p>DH advised that the costs had been agreed. DP advised that the instruction had been issued to Mercury.</p> <p>CE issued therefore item closed</p>	
3105	PMI 313 -	MRI Room Services	<p>17/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p> <p>04/12/2014</p> <p>11/12/2014</p>	<p>The following items require to be addressed to allow co-ordination with the Siemens installations within the 4no. MRI suites, in the following order to follow the installation programme.</p> <p>RCG -064 (MRI Scanner): Waste pipework from drip tray beneath SWVP to be re-routed away from vent ductwork and connected to drainage</p> <p>RCG-065 (Technical Room): Existing PAN013 to be replaced with isolator to allow installation of supplier switchgear</p> <p>RAG - 123 (Technical Room): Electrical switchgear currently located on wall backing on to RAG-112 to be relocated on to wall backing on to MIL-007/MIL-004 set out min 2.5m from original wall, all to allow installation of penetration panel and equipment cabinets</p> <p>RAG-109 (MRI Room): Quench pipe entering from RAG-110 to be raised to above Faraday Cage level(exact requirement to be confirmed) and existing support to be modified to eliminate likelihood of damage/corrosion due to contact between different metals</p> <p>RAG-110 (Technical Room): Review cooling requirements, and if acceptable, remove 1no. Airedale downflow unit backing on to RAG-111. Relocate switchgear from current position to location vacated by downflow unit including replacing PAN 013 with isolator switch</p> <p>RCF - 042: Remove existing PAN-013 and locate new isolator to RHS of door leaving space for supplier switchgear</p> <p>AFe advised this PMI needed to be discussed. DH noted that the revised works to RCG 064 needs to be complete by Monday 24<sup>th</sup> November 2014 as the Group 5 supplier commences their works on 24/11/2014.</p> <p>GW advised that he had received costs the previous night. DH requested the costs from GW asap.</p> <p>DH advised that this had been agreed. An overarching PMI would be provided to BMCL asap. These items were all contained within the equipment list. DH thanked BMCL for their efforts to resolve.</p> <p>DH advised this is WIP</p>	

3106	PMI 314 -	Fluoroscopy Equipment Co-ordination	17/11/2014  04/12/2014 11/12/2014	The Board request that the wall mounted IPS control panel in the Endoscopy room (RAF-009) is relocated to allow positioning of the equipment generators. It is proposed that, subject to size/depth of the panel, it is relocated onto the control desk trunking/power pole being installed by Phillips as part of the Group 5 installation. DH noted that this item had all been agreed <b>DH noted that this is an equipment list item therefore could be closed.</b>	
3112	PMI 315	ADULT & CHILDREN'S HOSPITALS - PROTECTIVE CURTAINS FOR LIFTS	19/11/2014    20/11/2014 27/11/2014 04/12/2014 11/12/2014	Please order and install hanging studs and protective fabric drapes as detailed in the attached drawing and specification.  Please proceed and have stud fixings for hanging protective drapes in lift cars installed in 8 No. lifts cars as detailed on the attached drawing.  Please provide 6 sets of protective lift drapes as detailed on the attached schedule, sized for the specific lifts noted. Note some lifts will share 1 set of drapes.  Provide storage bags as noted in Schindler quotation (also attached).  Please confirm total cost incl of OHP and confirm these items will be added to the Group 1 equipment list. GW noted that JBaillie will deal with the costs later that day. DH suggested that there was already a fixed costs provided for the works. GW advised that BMCL were obtaining firm costs. AF noted that the instruction had been issued to Schindler. Costs to be confirmed by BMCL <b>DH noted that this is an equipment list item therefore could be closed.</b>	
3138	PMI 316	Proposed alteration to AAW-170 Auto Dispense Room	01/12/2014    04/12/2014 11/12/2014	The Board requests a quotation to alter room no. AAW-170 Auto Dispense in accordance with the attached mark-up omitting the following: a) COU8037 - reception counter (part installed) b) CAL001 - fit with blank plate to existing back box b) CAL036 d) STF290L Board supplied items: a) COMP1000 b) CHA004 will not be provided The following services: a) DATA1000 are to be installed in the surface trunking as per attached sketch. It is proposed that these works are to be undertaken post completion and are to be completed by Thursday 12th March 2015. AF enquired where the NHS would want to store any units that are to be taken out. PM agreed to confirm the location. <b>DH advised that there is an allowance for Mercury however as there is another contractor involved in may be a case that can only allocate to 1 supplier. PM agreed to discuss with KC.</b>	

Page 1130

3203	PMI 317	A&C HOSPITALS - AGV LIFT SEPARATION	11/12/2014	<p>Revised requirements for AGV's re lift segregation.</p> <p>The Board acknowledge that within the design the horizontal delivery (clean) and collection (dirty) routes for goods are shared, with infection control issues in relation to segregation addressed by the use of sealed containers/bags.</p> <p>For this reason, and to enhance resilience it is agreed that vertical travel (lifts) will be similarly shared and that all FM lifts in cores C, D, F, H, &amp; K will be categorised as goods and housekeeping lifts.</p>																							
3204	PMI 318	A&C Hospitals - Anti-static Vinyl Flooring	11/12/2014	<p>In 13 No general X-Ray Rooms.</p> <p>The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.</p> <p>The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed.</p>

				Omit the shielding screens and reuse existing screens from current dental x-ray room. Reconfigure operators area (2No seated spaces) to allow straight reviewing through screen. Omit 50% of storage cupboards.	
3239	PMI 320	PHASE 3A - ADDITIONAL DEMOLITION WORKS & TEMPORARY CAR PARK	24/12/2014	The Board confirm the additional works to be undertaken during Stage 3A as follows:- <ul style="list-style-type: none"> <li>Demolition of buildings within existing accident &amp; emergency / outpatients / therapy complex comprising buildings AG, AK, AI, DH</li> <li>Construction of surface car parking (approximately 330 nr spaces) within the available site following demolitions</li> </ul>	
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres.	
3252	PMI 322 -	LTHW system	07/01/2015	The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-up of inhibitor in July 2015.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014 25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	
13780	CE 067	Neurosurgical Block - Overclad Works Planning Application	03/12/2014 04/12/2014	You are instructed to prepare and submit as soon as possible, a full application for planning consent for the above project. Please undertake any associated surveys. AFe advised that he has instructed the survey works – potentially 8/9 <sup>th</sup> December. BMCL understood that the vesting of material is not possible. It was agreed this item could be closed.	BMCL to input costs on Sypro
13835	CE 068	ADULT & CHILDREN'S HOSPITALS - COLD	10/12/2014	In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on	BMCL to input costs on Sypro

		WATER STORAGE TANK LID SUPPORTS	19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks. Agreed price including OH&P is £31,896.00 ex VAT.	
--	--	------------------------------------	--	--

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014) **DH noted that there is an open point in the ring and JB advised that he needed to discuss this with RJohnson. JB had been requested to liaise with RJohnson asap and DH would chase JB up later that morning to check for a final response. (11/12/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as

services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014 Meeting organized on 31/10/2014 to discuss (30/10/2014) PM advised that the CMB was under consideration and requested that AFe confirm the number of BMCL which require to be accommodated. AFe confirmed that the preference was for BMCL to be on the ground floor. Afe suggested that the office block could remain on site until May – cabins to be removed June. PM suggested that the NHS floor would be closed in February (13/10/2014) PM advised that he had passed a draft paper to DLoudon. PM would provide a copy of the paper to AF asap. The proposed area that the NHS are moving into will need to be deep cleaned and decorated and IT installed. PM would liaise with DL to ascertain when the paper would be discussed with RC. (27/11/2014) **PM advised that he is awaiting feedback from DL/RC conversation (04/12/2014).**

- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014) DP advised that the 1<sup>st</sup> panel is due to be on site on 14<sup>th</sup> November 2014. DP would organize for ISandford to confirm that he is ok with the set-up. Confirmation of panel demonstration is awaited (13/11/2014) AF noted that the panel hadn't arrived however DP was progressing the delivery of the panel (20/11/2014) DP advised that the panel was now due to be onsite on 28/11/2014. This would then be fitted urgently and it was proposed that a demonstration to provide a demonstration early w/c 01/12/2014. Corresponding deliveries will take place through December and into January 2015. (27/11/2014) **DP advised that ISandford went to MMPL (supplier of the alarms) and witnessed the test and is comfortable with what he witnessed. It was understood that the inducer was due to arrive on site later that day. (04/12/2014) DP advised that the testing had been done and was in a satisfactory position – awaiting delivery so can be swapped in. BMCL have a plan for the works – circa 180 in total.**
- VIE/Turning circle – it was noted that the NHS Had thought that BMCL were going to speak to WSP re how they had done the swept path analysis – it was established on site that there was an issue with a manhole cover which meant that the lorry delivering to the VIE could not use this area. The man-hole cover has now been replaced and the lorry driver is to come back and check he is now ok to use the full area. (20/11/2014) PM noted that the NHS have had 3 deliveries and on each occasion the lorry needed to be reversed into situ. Keen to understand the design intent and swept path analysis. GW advised that DS and WSP should be able to provide this info to PM. It is understood that there may be a simple resolution to the issue and this was confirmed. PM advised that the lorry was coming back on Monday to redo the traffic movement. (27/11/2014) PM advised that there had been a meeting with the Lead Driver onsite on Monday and the turning circle didn't work. WSP carrying out redesign to resolve the issue. (04/12/2014) **PM advised that he had received the drawing and IP had forwarded it onto Air Products . Air Products had subsequently forwarded it onto Wincanton and feedback is awaited. PM would ask the response chased up. (11/12/2014)**
- Walls at front entrance – PM advised that he should be able to confirm the way forward on 28/11/2014 – PM advised that he would still like to see a drawing asap. PM acknowledged that Gillespies are awaiting information to conclude the drawing. GW agreed to liaise with GB. (27/11/2014) PM advised that he had met with GB and AKerr and he now only needed to see the drawings. PM would provide a PMI to confirm the say forward asap. Item can then be closed. (04/12/2014) **PM advised that he was still awaiting the drawing. PM acknowledged that the walls will not be complete by 26<sup>th</sup> January 2015. (11/12/2014)**
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) **DP advised that he would liaise with AF for an update (11/12/2014)**
- Final sweep-up: Quality of corner welds – remediation works will be undertaken. Pull cords – a 'hybrid' location has been agreed to the 3 outstanding rooms. AF noted that JW is now pre-checking areas before JR goes in to do checks. Glazed screens – DH advised that on each floor as you exit cores A&B there is 2 glazed screens which are fitted the wrong round. Police room windows – PM advised that the blind mechanism to the police rooms still needs to be concluded (27/11/2014) AF advised that the Peterborough Project had suggested that there was some fire stopping and fire dampers which may not have been left as they should have been. AF had brought in a team to review all the fire stopping. (04/12/2014) **It was noted that this item could be closed and any big ticket items would be raised separately. (11/12/2014)**
- Xmas plans – AFe advised that BMCL will be working up to the 24<sup>th</sup> December and that the site would most likely shut early on the 24<sup>th</sup> (perhaps lunchtime). The 28<sup>th</sup>, 29<sup>th</sup> and 30<sup>th</sup> will be business as usual and the site would likely shut early on the 31<sup>st</sup> December. On the 2<sup>nd</sup> of January there would be 2 BMCL reps on duty to check the site only. It is expected that the site will reopen fully on the 5<sup>th</sup> January 2015. AF agreed to provide an Emergency Contact Sheet however noted that the first point of contact would be

AF, DP and GW. (27/11/2014) DP advised that this should already have been issued by PBeauchamp. DH advised that he had received the information and had passed onto the Group 5 contractors. (04/12/2014) DH advised this is WIP. DP noted that BMCL had provided a spreadsheet identifying the Xmas cover. DH advised that a response was awaited from IDM (MIS and Siemens) as to whether they expected to be on site over the festive period – DH was hoping to receive confirmation later that day. (11/12/2014)

- Crane lift for chillers – AF noted that the preference is for a Sunday crane lift as there is still a lot of deliveries to the site. DH will confirm back to the company that the lift needs to take place on the 14<sup>th</sup> December 2014. AF requested that DH confirms what support will be required from BMCL that day. DR advised that the Method Statement would need to be checked – it is important to ensure that insurances are in place. AF advised that the contact to assist the NHS with the crane move is Steven Docherty. (04/12/2014) DH advised that the works are planned for Saturday subject to satisfactory weather conditions – dilapidation walkround was still to be undertaken and this would be carried out in due course. (11/12/2014)
- Vinyl repair to CT room – it was noted that the vinyl had de-bonded. (11/12/2014)
- Omega earth bonding under vinyl in general xray room. DH had been advised that if want AC Flooring to carry out works then a PMI to BMCL would be required so that BMCL can instruct the works. It was suggested that the works cannot be carried out before the 5<sup>th</sup> January 2015 which impacts on the works to be carried out to that room (11/12/2014)
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014)
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1135

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 14/01/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23504	BMCE-EWN-000149	AGV Lift Segregation	<p>21/01/2014</p> <p>27/11/2014</p> <p>04/12/2014 11/12/2014 08/01/2015</p>	<p>Following the recent Swisslog AGV TCMS2 software simulation, we have been advised by Swisslog the current Clean &amp; Dirty lift segregation is detrimentally affecting their delivery systems and matrix times. Therefore, currently as the project stands, the AGV system is non-compliant with NHS ER's.</p> <p>Swisslog propose remove AGV Clean &amp; Dirty lift segregation to allowing all AGV's to use any AGV lift. NHS Infection Control Procedures for AGV Lifts Core C, D, F, H &amp; K to be reviewed.</p> <p>GW advised that the way forward had been agreed between KConnelly and CGrindlay. DH advised that essentially are not separating the clean and dirty or the vertical – PMI to be provided to BMCL to confirm acceptance of change from ERs.</p> <p>DH to provide form of words to close this item out DH advised that he had drafted working and would issue a PMI later that day <b>Item closed as PMI 317 issued</b></p>	
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p><b>DP advised that WSP ongoing with the design to establish if any additional cost from initial cost estimate.</b></p>	
		Link Bridge at Neuro and impact on INS Entrance	<p>04/12/2014</p> <p>11/12/2014</p> <p>08/01/2015</p>	<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p> <p>AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme. DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut.</p> <p><b>AF advised that BMCL expected to be in a good place in next couple of weeks. DP noted that possession by BMCL was on 12<sup>th</sup> Jan 2015. AF noted that BMCL had not received acceptance of the programme as yet.</b></p>

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 14/01/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later	

			04/12/2014	that day to discuss public/pedestrian separation. AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.	
			13/11/2014	DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015.	
			20/11/2014	AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.	
			27/11/2014	DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	
			04/12/2014	DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.	
			11/12/2014	DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.	
			08/01/2015	DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.	

3105	PMI 313 -	MRI Room Services	17/11/2014	<p>The following items require to be addressed to allow co-ordination with the Siemens installations within the 4no. MRI suites, in the following order to follow the installation programme.</p> <p>RCG -064 (MRI Scanner): Waste pipework from drip tray beneath SWVP to be re-routed away from vent ductwork and connected to drainage</p> <p>RCG-065 (Technical Room): Existing PAN013 to be replaced with isolator to allow installation of supplier switchgear</p> <p>RAG - 123 (Technical Room): Electrical switchgear currently located on wall backing on to RAG-112 to be relocated on to wall backing on to MIL-007/MIL-004 set out min 2.5m from original wall, all to allow installation of penetration panel and equipment cabinets</p> <p>RAG-109 (MRI Room): Quench pipe entering from RAG-110 to be raised to above Faraday Cage level(exact requirement to be confirmed) and existing support to be modified to eliminate likelihood of damage/corrosion due to contact between different metals</p> <p>RAG-110 (Technical Room): Review cooling requirements, and if acceptable, remove 1no. Airedale downflow unit backing on to RAG-111. Relocate switchgear from current position to location vacated by downflow unit including replacing PAN 013 with isolator switch</p> <p>RCF - 042: Remove existing PAN-013 and locate new isolator to RHS of door leaving space for supplier switchgear</p>	08/01/2015
			20/11/2014	<p>AFe advised this PMI needed to be discussed. DH noted that the revised works to RCG 064 needs to be complete by Monday 24<sup>th</sup> November 2014 as the Group 5 supplier commences their works on 24/11/2014.</p>	
			27/11/2014	<p>GW advised that he had received costs the previous night. DH requested the costs from GW asap.</p>	
			04/12/2014	<p>DH advised that this had been agreed. An overarching PMI would be provided to BMCL asap. These items were all contained within the equipment list. DH thanked BMCL for their efforts to resolve.</p>	
			11/12/2014	<p>DH advised this is WIP</p>	
			08/01/2015	<p>DP advised that the works had been carried out. DH noted that this is an Equipment list item so could be closed.</p>	
3138	PMI 316	Proposed alteration to AAW-170 Auto Dispense Room	01/12/2014	<p>The Board requests a quotation to alter room no. AAW-170 Auto Dispense in accordance with the attached mark-up omitting the following:</p> <ul style="list-style-type: none"> <li>a) COU8037 - reception counter (part installed)</li> <li>b) CAL001 - fit with blank plate to existing back box</li> <li>b) CAL036</li> <li>d) STF290L</li> </ul> <p>Board supplied items:</p> <ul style="list-style-type: none"> <li>a) COMP1000</li> <li>b) CHA004</li> </ul>	

Page 1139

			04/12/2014 11/12/2014 08/01/2015	<p>will not be provided The following services: a) DATA1000 are to be installed in the surface trunking as per attached sketch. It is proposed that these works are to be undertaken post completion and are to be completed by Thursday 12th March 2015. AF enquired where the NHS would want to store any units that are to be taken out. PM agreed to confirm the location. DH advised that there is an allowance for Mercury however as there is another contractor involved in may be a case that can only allocate to 1 supplier. PM agreed to discuss with KC. PM advised that he a walkround and identified a room (core A) however as it was locked he was unable to check it. DP advised that he had met with KC who has identified a room. BMCL will vacate the large room and move across to the smaller room opposite. DS noted that consideration needed to be given to the storage requirements for the Building Control boxed information. It was agreed this item could be closed.</p>							
3203	PMI 317	A&C HOSPITALS - AGV LIFT SEPARATION	11/12/2014  08/01/2015	<p>Revised requirements for AGV's re lift segregation.</p> <p>The Board acknowledge that within the design the horizontal delivery (clean) and collection (dirty) routes for goods are shared, with infection control issues in relation to segregation addressed by the use of sealed containers/bags.</p> <p>For this reason, and to enhance resilience it is agreed that vertical travel (lifts) will be similarly shared and that all FM lifts in cores C, D, F, H, &amp; K will be categorised as goods and houskeeping lifts.</p> <p>It was noted that this PMI had been accepted by BMCL. Item can be closed.</p>							
3204	PMI 318	A&C Hospitals - Anti-static Vinyl Flooring	11/12/2014  08/01/2015	<p>In 13 No general X-Ray Rooms.</p> <p>The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.</p> <p>The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed.</p> <p>It was noted that BMCL had accepted the PMI on 07/01/2015 and had instructed AC Flooring to carry out the works. DH requested BMCL to confirm that the flooring materials are available. AF advised that the availability of the materials would be confirmed later that morning.</p>							
3225	PMI 319 -	Neurosurgery Entrance - Amendments to room layouts	18/12/2014	<p>Following a review of the room layouts the Board request the amendments as detailed in the attached document.</p> <table><tr><td>Status B Drwgs</td><td></td></tr><tr><td>023 / 02</td><td>Omit Magnet Whiteboard Omit units SMC001 and allow provision for Mailbox All as per email of 6<sup>th</sup> November 2014</td></tr><tr><td>011 / 02</td><td>Show provision of underdesk storage / pedestal units – Grp 3 Equipment. Review area where x-ray machines are located for clash of equipment swing arms. Omit the shielding screens and reuse existing screens from current dental x-ray room. Reconfigure operators area (2No seated spaces) to allow straight reviewing through screen. Omit 50% of storage cupboards.</div>	
			08/01/2015	DP advised that the queries are being worked through	
3239	PMI 320	PHASE 3A - ADDITIONAL DEMOLITION WORKS & TEMPORARY CAR PARK	24/12/2014	<p>The Board confirm the additional works to be undertaken during Stage 3A as follows:-</p> <ul style="list-style-type: none"> <li>Demolition of buildings within existing accident &amp; emergency / outpatients / therapy complex comprising buildings AG, AK, AI, DH</li> <li>Construction of surface car parking (approximately 330 nr spaces) within the available site following demolitions</li> </ul> <p>08/01/2015 AFe advised that everything is in place and BMCL now only need the Compensation Event to cover the PMI</p>	
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres.	
3252	PMI 322 -	LTHW system	07/01/2015	<p>The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-up of inhibitor in July 2013.</p> <p>08/01/2015 DP advised that he had received an early indication that the PMI was due to be issued so plans are in place to progress this matter.</p>	

3267	PMI 323	A&C HOSPITALS - MRI COLD WATER 'TOP UP' SUPPLY PLANTROOM 31	12/01/2015	Please provide cold water top-up supply to the MRI chillers, the Board request that Brookfield provide an insulated 15mm cold water supply in plant room 31 extended out to the chiller area.	
3268	PMI 324	Reconfiguration of software on Static Systems Nurse Call	12/01/2015	The Board request a quotation for the reconfiguration of software on Static Systems nurse call system to ensure that the room number is on line 1 (top) of pop-up. An indication of cost implications for having bespoke software on future upgrades/patches should also be provided	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
14019	CE 069 -	A&C Hospitals - Anti-static Vinyl Flooring (cross ref PMI 318)	14/01/2015	<p>The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.</p> <p>The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed.</p> <p>The Board have received a quotation in the amount of [REDACTED] (inclusive of OH&amp;P) for these works.</p>	

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for

review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26/09/2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014) DH noted that there is an open point in the ring and JB advised that he needed to discuss this with RJohnson. JB had been requested to liaise with RJohnson asap and DH would chase JB up later that morning to check for a final response. (11/12/2014) **DH advised that he had written to JBushfield and advised that he needs the report by w/e 16/01/2015 (08/01/2015)**

- VIE/Turning circle – it was noted that the NHS Had thought that BMCL were going to speak to WSP re how they had done the swept path analysis – it was established on site that there was an issue with a manhole cover which meant that the lorry delivering to the VIE could not use this area. The man-hole cover has now been replaced and the lorry driver is to come back and check he is now ok to use the full area. (20/11/2014) PM noted that the NHS have had 3 deliveries and on each occasion the lorry needed to be reversed into situ. Keen to understand the design intent and swept path analysis. GW advised that DS and WSP should be able to provide this info to PM. It is understood that there may be a simple resolution to the issue and this was confirmed. PM advised that the lorry was coming back on Monday to redo the traffic movement. (27/11/2014) PM advised that there had been a meeting with the Lead Driver onsite on Monday and the turning circle didn't work. WSP carrying out redesign to resolve the issue. (04/12/2014) PM advised that he had received the drawing and IP had forwarded it onto Air Products . Air Products had subsequently forwarded it onto Wincanton and feedback is awaited. PM would ask to the response chased up. (11/12/2014) **It was advised that DS is meeting with the WSP Senior Team. DS has had a conference call with a WSP Senior Rep yesterday. Drawing expected to be received by BMCL by 16/01/2015 (08/01/2015)**
- Walls at front entrance – PM advised that he should be able to confirm the way forward on 28/11/2014 – PM advised that he would still like to see a drawing asap. PM acknowledged that Gillespies are awaiting information to conclude the drawing. GW agreed to liaise with GB. (27/11/2014) PM advised that he had met with GB and AKerr and he now only needed to see the drawings. PM would provide a PMI to confirm the way forward asap. Item can then be closed. (04/12/2014) **PM advised that he was still awaiting the drawing. PM acknowledged that the walls will not be complete by 26<sup>th</sup> January 2015. (11/12/2014) DP confirmed that the Planning Application for the front walls has been submitted. (08/01/2015)**
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) **DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015)**
- Crane lift for chillers – AF noted that the preference is for a Sunday crane lift as there is still a lot of deliveries to the site. DH will confirm back to the company that the lift needs to take place on the 14<sup>th</sup> December 2014. AF requested that DH confirms what support will be required from BMCL that day. DR advised that the Method Statement would need to be checked – it is important to ensure that insurances are in place. AF advised that the contact to assist the NHS with the crane move is Steven Docherty. (04/12/2014) DH advised that the works are planned for Saturday subject to satisfactory weather conditions – dilapidation walkround was still to be undertaken and this would be carried out in due course. (11/12/2014) It was agreed this item could be closed. **DH noted that the next xmas lift is 19<sup>th</sup> Jan 2015. AF advised that the crane lift was being reviewed by BMCL as BMCL are mindful that high winds are being forecasted. (08/01/2015)**

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. AF advised that he had a drawing to be provided to the NHS (08/01/2015)
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014) DP noted that there are 2 rooms that may need alterations carried out and BMCL were in dialogue with WWhittle regarding this matter. DH advised that a response is required asap as is an understanding of timescales for the works and what the works will be. (08/01/2015)
- Pop-ups at Nurse Call bases – DH advised that a PMI would be issued later that day for a cost for the works as it is understood that Mercury will not provide a cost without being instructed via a PMI. (08/01/2015)
- Last air tests for whole job on Friday – Air permeability tests – AF noted that all tests had been passed to date. The final calculation will be undertaken post after the final tests on 09/01/2015 and information passed to NHS asap thereafter (08/01/2015)
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015)
- Building Control – AF advised that BC had undertaken a walkround and BC were extremely positive about the job. There are no issues foreseen re temporary habitation certificate BMCL were planning to carry out a further check of all the above ceilings – this would be undertaken out of hours. DL suggested that a dictat would need to be put out to all workers coming into the building to advise them not to cut any holes (08/01/2015)
- Overclad project – AF advised that he expected the drawings to be in w/c 12/01/2015 and these would be provided to the NHS asap thereafter. All elements are currently being progressed in the correct direction. (08/01/2015).

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1144

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 21/01/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014  08/01/2015 15/01/2015	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.</p> <p>AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p>	
		Link Bridge at Neuro and impact on INS Entrance	04/12/2014  11/12/2014  08/01/2015  15/01/2015	<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p> <p>AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme.</p> <p>DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut.</p> <p>AF advised that BMCL expected to be in a good place in next couple of weeks. DP noted that possession by BMCL was on 12<sup>th</sup> Jan 2015. AF noted that BMCL had not received acceptance of the programme as yet.</p> <p>DP advised that the Heras fencing is up and BMCL have secured a bit of ground for a compound. Delivery of materials is due to commence. The steel will be moved in off the footpath.</p>	

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
		Bus Stop at North East corner	TO BE RAISED	PM advised that he would provide a PMI to BMCL to stop the construction of bus stop at North East corner as is in the wrong place. PM had spoken to Paul McG on site and PMcG had advised there are other matters which has already stopped the works. The Bus Stop will be transferred into the Phase 3a works.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 21/01/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	

			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed.	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.	
			13/11/2014	DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015.	
			20/11/2014	AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.	
			27/11/2014	DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	
			04/12/2014	DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.	

Page 1147

			11/12/2014	DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.																							
			08/01/2015	DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.																							
			15/01/2015	DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.																							
3204	PMI 318	A&C Hospitals - Anti-static Vinyl Flooring	11/12/2014	In 13 No general X-Ray Rooms.																							
			08/01/2015	The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.  The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed. It was noted that BMCL had accepted the PMI on 07/01/2015 and had instructed AC Flooring to carry out the works. DH requested BMCL to confirm that the flooring materials are available. AF advised that the availability of the materials would be confirmed later that morning.																							
			15/01/2015	It was noted that this item could be closed as CEN had been raised.																							
3225	PMI 319 -	Neurosurgery Entrance - Amendments to room layouts	18/12/2014	Following a review of the room layouts the Board request the amendments as detailed in the attached document.

				<p>Review area where x-ray machines are located for clash of equipment swing arms. Omit the shielding screens and reuse existing screens from current dental x-ray room. Reconfigure operators area (2No seated spaces) to allow straight reviewing through screen. Omit 50% of storage cupboards.</p>	
			<p>08/01/2015 15/01/2015</p>	<p>DP advised that the queries are being worked through DMF advised that the costs would be provided to the NHS asap.</p>	
3239	PMI 320	PHASE 3A - ADDITIONAL DEMOLITION WORKS & TEMPORARY CAR PARK	<p>24/12/2014</p> <p>08/01/2015 15/01/2015</p>	<p>The Board confirm the additional works to be undertaken during Stage 3A as follows:-</p> <ul style="list-style-type: none"> <li>Demolition of buildings within existing accident &amp; emergency / outpatients / therapy complex comprising buildings AG, AK, AI, DH</li> <li>Construction of surface car parking (approximately 330 nr spaces) within the available site following demolitions</li> </ul> <p>AFe advised that everything is in place and BMCL now only need the Compensation Event to cover the PMI</p> <p>DL advised that the NHS were looking for surety of planning consent which BMCL are to progress. PM advised that the NHS were scheduled to meet with GCC w/ 19/01/2015. DL advised that in terms of progress it makes sense for the application to be undertaken by BMCL. DH suggested that BMCL should make the planning application and BMCL should proceed on basis of ensuring that information is submitted timeously and if so then the timing risk would lie with the Board. The NHS will cover the fees for the design and planning elements. This should be progressed on the same principles as other works.</p>	
3251	PMI 321	NCH Theatres 109 & 114	<p>07/01/2015</p> <p>15/01/2015</p>	<p>The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 &amp; 114. The cabling should match that previously installed to all other theatres.</p> <p>DP advised that James is working on providing the costs to the NHS</p>	
3252	PMI 322 -	LTHW system	<p>07/01/2015</p> <p>08/01/2015 15/01/2015</p>	<p>The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-up of inhibitor in July 2013.</p> <p>DP advised that he had received an early indication that the PMI was due to be issued so plans are in place to progress this matter.</p> <p>DP advised that this work is ongoing. DH enquired if BMCL were co-ordinating with IP re access to the labs &amp; valves and DP confirmed that BMCL are liaising with IP.</p>	
3267	PMI 323	A&C HOSPITALS - MRI COLD WATER 'TOP UP' SUPPLY PLANTROOM 31	<p>12/01/2015</p> <p>15/01/2015</p>	<p>Please provide cold water top-up supply to the MRI chillers, the Board request that Brookfield provide an insulated 15mm cold water supply in plant room 31 extended out to the chiller area.</p> <p>DH advised that he understood that the water supply is being installed this over the weekend and the equipment is coming onto site w/c 19/01/2015. DMF advised that James</p>	

				is pursuing review of costs.	
3268	PMI 324	Reconfiguration of software on Static Systems Nurse Call	12/01/2015  15/01/2015	The Board request a quotation for the reconfiguration of software on Static Systems nurse call system to ensure that the room number is on line 1 (top) of pop-up. An indication of cost implications for having bespoke software on future upgrades/patches should also be provided DMF advised that the cost was due to be provided by Mercury later that day.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015  15/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above

14019	CE 069 -	A&C Hospitals - Anti-static Vinyl Flooring (cross ref PMI 318)	14/01/2015	<p>The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.</p> <p>The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed.</p> <p>The Board have received a quotation in the amount of [REDACTED] (inclusive of OH&amp;P) for these works.</p>	

Other items that require discussion:

A51679245

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014) DH noted that there is an open point in the ring and JB advised that he needed to discuss this with RJohnson. JB had been requested to liaise with RJohnson asap and DH would chase JB up later that morning to check for a final response. (11/12/2014) DH advised that he had written to JBushfield and advised that he needs the report by w/e 16/01/2015 (08/01/2015) **DH advised that he had spoken to JBushfield who had advised that he had an outstanding clarification with RJ to be concluded. DH had asked JBushfield to come into the site offices and liaise with RJ and that JBushfield needs to provide the report by cop 16/01/2015. ( 15/01/2015)**
- Walls at front entrance – PM advised that he should be able to confirm the way forward on 28/11/2014 – PM advised that he would still like to see a drawing asap. PM acknowledged that Gillespies are awaiting information to conclude the drawing. GW agreed to liaise with GB. (27/11/2014) PM advised that he had met with GB and AKerr and he now only needed to see the drawings. PM would provide a PMI to confirm the way forward asap. Item can then be closed. (04/12/2014) **PM advised that he was still awaiting the drawing. PM acknowledged that the walls will not be complete by 26<sup>th</sup> January 2015. (11/12/2014) DP confirmed that the Planning Application for the front walls has been submitted. (08/01/2015) It was agreed that this item could be closed as matter being progressed (15/01/2015)**
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) **AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015)**
- Crane lift for chillers – AF noted that the preference is for a Sunday crane lift as there is still a lot of deliveries to the site. DH will confirm back to the company that the lift needs to take place on the 14<sup>th</sup> December 2014. AF requested that DH confirms what support will be required from BMCL that day. DR advised that the Method Statement would need to be checked – it is important to ensure that insurances are in place. AF advised that the contact to assist the NHS with the crane move is Steven Docherty. (04/12/2014) DH advised that the works are planned for Saturday subject to satisfactory weather conditions – dilapidation walkround was still to be undertaken and this would be carried out in due course. (11/12/2014) It was agreed this item could be closed. DH noted that the next xmas lift is 19<sup>th</sup> Jan 2015. AF advised that the crane lift was being reviewed by BMCL as BMCL are mindful that high winds are being forecasted. (08/01/2015) **DH advised that Siemens are onsite today and it was proposed to have a last run through of the works later that morning. The only concern is the potential for the weather to become unsuitable for crane lifts. DH advised that he would check if there is any issue re gas depletion. AF noted that BMCL were getting the over panels sorted out and the wall taken down (15/01/2015)**

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. AF advised that he had a drawing to be provided to the NHS (08/01/2015)
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014) DP noted that there are 2 rooms that may need alterations carried out and BMCL were in dialogue with WWhittle regarding this matter. DH advised that a response is required asap as is an understanding of timescales for the works and what the works will be. (08/01/2015) DP advised that Mercury are progressing this matter however confirmation of timescales was required. DH agreed to provide the timescale information. (15/01/2015)
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015)
- Building Control – AF advised that BC had undertaken a walkround and BC were extremely positive about the job. There are no issues foreseen re temporary habitation certificate BMCL were planning to carry out a further check of all the above ceilings – this would be undertaken out of hours. DL suggested that a dictat would need to be put out to all workers coming into the building to advise them not to cut any holes (08/01/2015) AF advised that BMCL have marked up a set of drawings in case Building Control requests drawings. BControl had expressed an interest in the Group 5 rooms. All the group 5 rooms had been marked up on drawings. The group 5 rooms had been discussed and consideration was being given to making the Group 5 rooms as construction zones/rooms. BControl are scheduled to be onsite on 15<sup>th</sup> & 16<sup>th</sup> & 20<sup>th</sup> Jan. S advised that once BControl are satisfied with what they see on site then it takes 3 days for the certification to be provided. (15/01/2015)
- Overclad project – AF advised that he expected the drawings to be in w/c 12/01/2015 and these would be provided to the NHS asap thereafter. All elements are currently being progressed in the correct direction. (08/01/2015). GB to provide the programme to the NHS (15/01/2015)
- Snagging/Defects – AF advised that the process needed to be agreed. AF proposed that notification of defect is provided to Elaine Robertson who will co-ordinate the notification process between the User, BMCL and the Project Team. DH advised that this may be beneficial as the NHS do not have access to the IDMS. AF agreed to provide a proposal for discussion at the completion criteria meeting scheduled to take place on 16/01/2015. BMCL would also be providing colour coded drawings as to how they proposed to close out defects.
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015)
- Blackstart – DH requested details of the blackstart i.e. that BMCL need to remove the generator doing the labs on 26<sup>th</sup> Jan. DP advised that if haven't completed final test then works can be classed as commissioning therefore Labs doesn't need to be taken of the generator. IP should discuss this with SEPA and that SEPA would agree with this approach as long as carefully proposed to them. DH advised that IP is not keen on delaying taking the Labs off the generator. DP advised that if do all the blackstart then this would mean that not everything is tested i.e. Group 5 and therefore the risk would sit with the Board. DL suggested that DP, DH and IP should meet to discuss. (15/01/2015) .

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1152

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 28/01/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015 15/01/2015</p> <p>22/01/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p>	
		Link Bridge at Neuro and impact on INS Entrance	<p>04/12/2014</p> <p>11/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p>	<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p> <p>AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme. DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut.</p> <p>AF advised that BMCL expected to be in a good place in next couple of weeks. DP noted that possession by BMCL was on 12<sup>th</sup> Jan 2015. AF noted that BMCL had not received acceptance of the programme as yet.</p> <p>DP advised that the Heras fencing is up and BMCL have secured a bit of ground for a compound. Delivery of materials is due to commence. The steel will be moved in off the footpath.</p> <p>AF advised that BMCL would be starting works as soon as possible. A discussion re the traffic flow/management was required. GArmstrong is having a look at the interface with BAM. DH noted that GF has a suggestion to conclude and was meeting with BMCL and BAM later that morning.</p>	

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
23959	NHS EWN 054	- External Works Phase 3 Central Park East Bus Stop	22/01/2015	The Board confirm that construction of the bus stop on the east side of Central Park should be stopped and the works transferred to Stage 3A. It is further confirmed that the location of the bus stop is likely to move north along the Langlands Road kerb line. The final position will be confirmed post receipt of planning consent for Car Park 3, which is anticipated to be made in March 2015.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 28/01/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDerment to agree extend of works. All as discussed Paul McGuinness / Hugh McDerment. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDerment to agree the scope of works. PM advised that once the pipe is	

			<p>27/11/2014</p> <p>04/12/2014</p> <p>11/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p>	<p>exposed then there would be a site visit to agree the way forward.</p> <p>AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p><b>AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</b></p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	<p>10/11/2014</p> <p>13/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p>	<p>The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</li> </ol> <p>DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p> <p>AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</p> <p>DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26<sup>th</sup> January 2015</p>	

Page 1155

			<div>04/12/2014</div> <div>11/12/2014</div> <div>08/01/2015</div> <div>15/01/2015</div> <div>22/01/2015</div>	<div>however the light needs to be moved asap.</div> <div>DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.</div> <div>DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.</div> <div>DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.</div> <div>DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.</div> <div>DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.</div>																							
3225	PMI 319 -	Neurosurgery Entrance - Amendments to room layouts	<div>18/12/2014</div>	<div>Following a review of the room layouts the Board request the amendments as detailed in the attached document.</div> <table><tr><td>Status B Drwgs</td><td></td></tr><tr><td>023 / 02</td><td>Omit Magnet Whiteboard Omit units SMC001 and allow provision for Mailbox All as per email of 6<sup>th</sup> November 2014</td></tr><tr><td>011 / 02</td><td>Show provision of underdesk storage / pedestal units – Grp 3 Equipment. 			08/01/2015 15/01/2015 22/01/2015	DP advised that the queries are being worked through DMF advised that the costs would be provided to the NHS asap. AF advised that BMCL have the costs and would provide these to the NHS asap.	
3239	PMI 320	PHASE 3A - ADDITIONAL DEMOLITION WORKS & TEMPORARY CAR PARK	24/12/2014  08/01/2015 15/01/2015  22/01/2015	The Board confirm the additional works to be undertaken during Stage 3A as follows:-  <ul style="list-style-type: none"> <li>Demolition of buildings within existing accident &amp; emergency / outpatients / therapy complex comprising buildings AG, AK, AI, DH</li> <li>Construction of surface car parking (approximately 330 nr spaces) within the available site following demolitions</li> </ul> AFe advised that everything is in place and BMCL now only need the Compensation Event to cover the PMI DL advised that the NHS were looking for surety of planning consent which BMCL are to progress. PM advised that the NHS were scheduled to meet with GCC w/ 19/01/2015. DL advised that in terms of progress it makes sense for the application to be undertaken by BMCL. DH suggested that BMCL should make the planning application and BMCL should proceed on basis of ensuring that information is submitted timeously and if so then the timing risk would lie with the Board. The NHS will cover the fees for the design and planning elements. This should be progressed on the same principles as other works. AF advised that he will provide information later that afternoon. DH noted a query re 'temporary' in that there are different levels of flood risk assessments to be done depending on the permission being sought. DS requested that the NHS confirm the strategy whether temporary or permanent to BMCL i.e. different drainage solution. DL agreed to confirm the way forward to BMCL. DH advised that he had asked Andy to include for in the costs.	
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015  15/01/2015 22/01/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres. DP advised that James is working on providing the costs to the NHS AF advised that he had spoken to EMcl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties.	
3252	PMI 322 -	LTHW system	07/01/2015  08/01/2015 15/01/2015 22/01/2015	The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-up of inhibitor in July 2013. DP advised that he had received an early indication that the PMI was due to be issued so plans are in place to progress this matter. DP advised that this work is ongoing. DH enquired if BMCL were co-ordinating with IP re access to the labs & valves and DP confirmed that BMCL are liaising with IP. DP suggested that there would be another couple of weekend working as progress hadn't been as desired.	

3267	PMI 323	A&C HOSPITALS - MRI COLD WATER 'TOP UP' SUPPLY PLANTROOM 31	12/01/2015 15/01/2015 22/01/2015	Please provide cold water top-up supply to the MRI chillers, the Board request that Brookfield provide an insulated 15mm cold water supply in plant room 31 extended out to the chiller area. DH advised that he understood that the water supply is being installed this over the weekend and the equipment is coming onto site w/c 19/01/2015. DMF advised that James is pursuing review of costs. DH noted that access to a temp supply is in situ. James and DH to discuss costs. DMF requested that a PMI be issued requesting a quotation. It was noted that the supply chain are less engaged to provide quotes.	
3268	PMI 324	Reconfiguration of software on Static Systems Nurse Call	12/01/2015 15/01/2015 22/01/2015	The Board request a quotation for the reconfiguration of software on Static Systems nurse call system to ensure that the room number is on line 1 (top) of pop-up. An indication of cost implications for having bespoke software on future upgrades/patches should also be provided DMF advised that the cost was due to be provided by Mercury later that day. DMF advised that BMCL have a price however had not uploaded any quote to Sypro at this time due to checking if there is any cost re maintenance. The cost for the reconfiguration would be provided asap.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015 15/01/2015 22/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening. DMF advised this matter is going through the process.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015 15/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14019	CE 069 -	A&C Hospitals - Anti-static Vinyl Flooring (cross ref PMI 318)	14/01/2015	<p>The Board request that repairs to Omex flooring are undertaken in 13 No. general X-ray rooms where floor tracks have been cut to retrofit cable trunking to new equipment positions.</p> <p>The works are to be undertaken in two separate visits with the majority completed as soon as possible, and those rooms currently occupied by equipment, on a second visit. Exact programme to be agreed.</p> <p>The Board have received a quotation in the amount of [REDACTED] (inclusive of OH&amp;P) for these works.</p>	28/01/2015
14087	CEN 070	A&C HOSPITALS LIFT INSTALLATION - PROTECTIVE CURTAINS AND FIXINGS	22/01/2015	<p>Confirmation of Board PMI 315. Please proceed and have stud fixings for hanging protective drapes in lift cars installed in 8 No. lifts cars as detailed on drawing attached to PMI 315. Please provide 6 sets of protective lift drapes as detailed on the attached schedule, sized for the specific lifts noted. Note some lifts will share 1 set of drapes.</p> <p>Provide storage bags as noted in Schindler quotation (also attached).</p> <p>Quotation received and agreed in amount of [REDACTED] inclusive of OH+P but excluding VAT.</p>	28/01/2015

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the

report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014) DH noted that there is an open point in the ring and JB advised that he needed to discuss this with RJohnson. JB had been requested to liaise with RJohnson asap and DH would chase JB up later that morning to check for a final response. (11/12/2014) DH advised that he had written to JBushfield and advised that he needs the report by w/e 16/01/2015 (08/01/2015) DH advised that he had spoken to JBushfield who had advised that he had an outstanding clarification with RJ to be concluded. DH had asked JBushfield to come into the site offices and liaise with RJ and that JBushfield needs to provide the report by cop 16/01/2015. (15/01/2015) **DP advised that the report and recommendations had been issued to BMCL and DP would review this asap. DH advised that there were 4 recommendations for BMCL to agree but that he did not think there was any showstoppers (22/01/2015)**

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) **AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) **AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015)**
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014) DP noted that there are 2 rooms that may need alterations carried out and BMCL were in dialogue with WWhittle regarding this matter. DH advised that a response is required asap as is an understanding of timescales for the works and what the works will be. (08/01/2015) **DP advised that Mercury are progressing this matter however confirmation of timescales was required. DH agreed to provide the timescale information. (15/01/2015). DH advised that the blood fridges were due to be delivered 23<sup>rd</sup> Feb and he needed to know if the vent matter would be concluded before this time. DH also needed some switch spurs changed to non –spurs (22/01/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) **DH agreed to liaise with A Brennan (22/01/2015)**
- Building Control – AF advised that BC had undertaken a walkround and BC were extremely positive about the job. There are no issues foreseen re temporary habitation certificate BMCL were planning to carry out a further check of all the above ceilings – this would be undertaken out of hours. DL suggested that a dictat would need to be put out to all workers coming into the building to advise them not to cut any holes (08/01/2015) AF advised that BMCL have marked up a set of drawings in case Building Control requests drawings. BControl had expressed an interest in the Group 5 rooms. All the group 5 rooms had been marked up on drawings. The group 5 rooms had been discussed and consideration was being given to making the Group 5 rooms as construction zones/rooms. BControl are scheduled to be onsite on 15<sup>th</sup> & 16<sup>th</sup> & 20<sup>th</sup> Jan. S advised that once BControl are satisfied with what they see on site then it takes 3 days for the certification to be provided. (15/01/2015) **AF advised that Building Control had visited the internals and were satisfied however they had made some comments regarding the externals. A page turn would be carried out with JW later that week. BControl are due back on site on 26<sup>th</sup> Jan for a walkround. (22/01/2015)**
- Overclad project – AF advised that he expected the drawings to be in w/c 12/01/2015 and these would be provided to the NHS asap thereafter. All elements are currently being progressed in the correct direction. (08/01/2015). GB to provide the programme to the NHS (15/01/2015) DS noted that GB was organizing a workshop w/c 2<sup>nd</sup> Feb 2015 (22/01/2015)

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015)
- Blackstart – DH requested details of the blackstart i.e. that BMCL need to remove the generator doing the labs on 26<sup>th</sup> Jan. DP advised that if haven't completed final test then works can be classed as commissioning therefore Labs doesn't need to be taken off the generator. IP should discuss this with SEPA and that SEPA would agree with this approach as long as carefully proposed to them. DH advised that IP is not keen on delaying taking the Labs off the generator. DP advised that if do all the blackstart then this would mean that not everything is tested i.e. Group 5 and therefore the risk would sit with the Board. DL suggested that DP, DH and IP should meet to discuss. (15/01/2015). It was noted that the blackstart test on Monday 19<sup>th</sup> January 2015 had gone well. IP is keen to get the Labs gens off site by early February 2015. DP advised this would be possible as long as BMCL have a few days notice so that they can ensure a smooth transition. IP would be doing his own blackstart test and then put the Labs back on the morning of 2<sup>nd</sup> Feb 2015. (22/01/2015)
- Wardview – DH advised that the information had been provided to DP and JBailey. DH had been through his spreadsheet with FW on her return from leave and there was only 2 items missed which are in relation the Science Centre works (22/01/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1161

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 04/02/2015:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014  08/01/2015 15/01/2015  22/01/2015  29/01/2015	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date. DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost. DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products. DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok. GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
		Link Bridge at Neuro and impact on INS Entrance	04/12/2014 11/12/2014 08/01/2015 15/01/2015 22/01/2015 29/01/2015	To be raised. Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works. AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme. DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut. AF advised that BMCL expected to be in a good place in next couple of weeks. DP noted that possession by BMCL was on 12 <sup>th</sup> Jan 2015. AF noted that BMCL had not received acceptance of the programme as yet. DP advised that the Heras fencing is up and BMCL have secured a bit of ground for a compound. Delivery of materials is due to commence. The steel will be moved in off the footpath. AF advised that BMCL would be starting works as soon as possible. A discussion re the traffic flow/management was required. GArmstrong is having a look at the interface with BAM. DH noted that GF has a suggestion to conclude and was meeting with BMCL and BAM later that morning. AF advised that the 2 <sup>nd</sup> Feb would be the start date. PM advised that once BMCL have hoardings up then he	

A51679245

proposes to look at the pavement arrangement. AF agreed to review the pavement arrangement as well. DP noted that the oxygen connect is needed so that the oxygen connections can be done at this end – this was indicated as being done March. AF advised that he would send dates – BMCL need to do temporary works which will be priced up and provided to NHS. The programme for the bridge is being looked at.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 04/02/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
23959	NHS EWN 054	- External Works Phase 3 Central Park East Bus Stop	22/01/2015  29/01/2015	The Board confirm that construction of the bus stop on the east side of Central Park should be stopped and the works transferred to Stage 3A. It is further confirmed that the location of the bus stop is likely to move north along the Langlands Road kerb line. The final position will be confirmed post receipt of planning consent for Car Park 3, which is anticipated to be made in March 2015. GW requested that the NHS provide a PMI for this matter.	Cross ref PMI 334

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/02/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014  23/10/2014 30/10/2014 13/11/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works. PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded. DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out. DP advised that SGN were due on site later that day to inspect the pipe and advise on any work	

A51679245

			<p>20/11/2014 required. DP noted that the water pipe was an NHS pipe so is easier to deal with. DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 <b>AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</b></p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	<p>10/11/2014 The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228for connection of 'stacks' to the pendant.</li> </ol> <p>13/11/2014 DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall</p>	

Page 1164

			<div>20/11/2014</div> <div>27/11/2014</div> <div>04/12/2014</div> <div>11/12/2014</div> <div>08/01/2015</div> <div>15/01/2015</div> <div>22/01/2015</div> <div>29/01/2015</div>	<div>out of the 26<sup>th</sup> January 2015. AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</div> <div>DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26<sup>th</sup> January 2015 however the light needs to be moved asap.</div> <div>DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.</div> <div>DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.</div> <div>DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.</div> <div>DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.</div> <div>DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.</div> <div>DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.</div>

			08/01/2015 15/01/2015 22/01/2015 29/01/2015	DP advised that the queries are being worked through DMF advised that the costs would be provided to the NHS asap. AF advised that BMCL have the costs and would provide these to the NHS asap. GW advised that costs would be provided later that day.	
3239	PMI 320	PHASE 3A - ADDITIONAL DEMOLITION WORKS & TEMPORARY CAR PARK	24/12/2014   08/01/2015 15/01/2015  22/01/2015  29/01/2015	The Board confirm the additional works to be undertaken during Stage 3A as follows:- <ul style="list-style-type: none"> <li>Demolition of buildings within existing accident &amp; emergency / outpatients / therapy complex comprising buildings AG, AK, AI, DH</li> <li>Construction of surface car parking (approximately 330 nr spaces) within the available site following demolitions</li> </ul> AFe advised that everything is in place and BMCL now only need the Compensation Event to cover the PMI DL advised that the NHS were looking for surety of planning consent which BMCL are to progress. PM advised that the NHS were scheduled to meet with GCC w/ 19/01/2015. DL advised that in terms of progress it makes sense for the application to be undertaken by BMCL. DH suggested that BMCL should make the planning application and BMCL should proceed on basis of ensuring that information is submitted timeously and if so then the timing risk would lie with the Board. The NHS will cover the fees for the design and planning elements. This should be progressed on the same principles as other works. AF advised that he will provide information later that afternoon. DH noted a query re 'temporary' in that there are different levels of flood risk assessments to be done depending on the permission being sought. DS requested that the NHS confirm the strategy whether temporary or permanent to BMCL i.e. different drainage solution. DL agreed to confirm the way forward to BMCL. DH advised that he had asked Andy to include for in the costs. PM advised that he would provide a CE to BMCL, the drainage impact and floor risk assessments are excluded. Revised costs to be provided as the costs provided do not include the BMCL profit margin.	Cross ref CEN 072 raised 29/01/2015
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015  15/01/2015 22/01/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres. DP advised that James is working on providing the costs to the NHS AF advised that he had spoken to EMcl re timeous provision of info to BMCL. AF noted that	

			29/01/2015	the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties. GW advised that the cost had been uploaded to Sypro on 28/01	
3252	PMI 322 -	LTHW system	07/01/2015  08/01/2015 15/01/2015 22/01/2015 29/01/2015	The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-up of inhibitor in July 2013. DP advised that he had received an early indication that the PMI was due to be issued so plans are in place to progress this matter. DP advised that this work is ongoing. DH enquired if BMCL were co-ordinating with IP re access to the labs & valves and DP confirmed that BMCL are liaising with IP. DP suggested that there would be another couple of weekend working as progress hadn't been as desired. GW advised that the cost had been uploaded to Sypro on 28/01	
3267	PMI 323	A&C HOSPITALS - MRI COLD WATER 'TOP UP' SUPPLY PLANTROOM 31	12/01/2015 15/01/2015 22/01/2015 29/01/2015	Please provide cold water top-up supply to the MRI chillers, the Board request that Brookfield provide an insulated 15mm cold water supply in plant room 31 extended out to the chiller area. DH advised that he understood that the water supply is being installed this over the weekend and the equipment is coming onto site w/c 19/01/2015. DMF advised that James is pursuing review of costs. DH noted that access to a temp supply is in situ. James and DH to discuss costs. DMF requested that a PMI be issued requesting a quotation. It was noted that the supply chain are less engaged to provide quotes. GW advised that the cost had been uploaded to Sypro on 26/01. DH advised that the way forward had been agreed. PM advised that he would provide a CE for this item.	Cross ref CEN 072 raised 29/01/2015
3268	PMI 324	Reconfiguration of software on Static Systems Nurse Call	12/01/2015 15/01/2015 22/01/2015 29/01/2015	The Board request a quotation for the reconfiguration of software on Static Systems nurse call system to ensure that the room number is on line 1 (top) of pop-up. An indication of cost implications for having bespoke software on future upgrades/patches should also be provided DMF advised that the cost was due to be provided by Mercury later that day. DMF advised that BMCL have a price however had not uploaded any quote to Sypro at this time due to checking if there is any cost re maintenance. The cost for the reconfiguration would be provided asap. GW advised that the cost had been uploaded to Sypro on 28/01. DH advised that he was awaiting the 2 <sup>nd</sup> part of the cost re maintenance.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply	

			15/01/2015  22/01/2015 29/01/2015	<p>2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening. DMF advised this matter is going through the process. GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.</p>	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015      15/01/2015	<p>Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above</p>	
3303	PMI 327 -	Omission of padded wall covering	23/01/2015   29/01/2015	<p>The Board request that, as agreed, the padded wall covering to the following rooms is omitted and that the associated cost saving is provided: DCFP - 050 GW3 – 049 GW advised that this would leave BMCL with DCFP 051 which is situated next to DCFP 050 therefore it made more sense for the NHS to do this room as well. GW advised that he is awaiting confirmation from MMacleod regarding this. GW suggested that the NHS contractor should provide a quote for the room. AF advised that BMCL will liaise with Rhino re getting a survey done way forward and will confirm outcome once available.</p>	
3304	PMI 328 -	Additional/Altered Power and Data	23/01/2015  29/01/2015	<p>The Board request a quotation for additional/altered power &amp; data in a variety of locations as noted in the attached spreadsheet (Requirements v4) GW advised this is WIP</p>	
3313	PMI 329	ROOM ACCESS SWIPE CARD SOFTWARE	27/01/2015  29/01/2015	<p>Provide additional software license. Please purchase and pass to Facilities Management an additional software license for the swipe card access software. AF suggested that a meeting should be arranged to discuss this.</p>	
3321	PMI 330 -	Anaesthetic Pendant RNM-037	28/01/2015	<p>The Board request a quotation to reposition the anaesthetic pendant within RNM-037 (Shared Image room) as per the attached GA &amp; RCP extracts to eliminate a clash between a monitor arm and the pendant. The cost should include for the re-commissioning activities albeit that QC tests have not been carried out in this area.</p>	

3330	PMI 331 -	ARRIVAL SQUARE - 4 No. BUS STANCES	30/01/2015	<p>Provision of as fitted information.</p> <p>Please provide a drawing (or link to existing drawing) that shows the position of the following in relation to the saw tooth road kerb for each of the 4 stances;</p> <p>a) Foundation for bus shelter - dimensions and depth.</p> <p>b) Position and layout of underground purple flexible ducts, including all links.</p> <p>c) Inspection chambers.</p> <p>d) Details of RS sockets and foundation as installed for RTPI poles</p> <p>e) Confirmation if power cables have been installed.</p> <p>This information is required by 13 February 2015.</p>	
3331	PMI 332	IT Hub Room Cabinets	30/01/2015	<p>Please make amendments to hub room cabinets as described below.</p> <p>The Board confirm the requirement to remove 1 No. vertical cable management tray from those IT cabinets in hub rooms containing single or double chassis where the vertical cabling restricts through access horizontally for future/imminent cabling. (As discussed D. Wilson / D.Hall).</p>	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	<p>Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.</p> <p>The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.</p> <p>Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.</p>	
3333	PMI 334 -	External Works - Bus Stop Central Park East	30/01/2015	<p>Transfer of Bus Stop from Stage 3 to Stage 3A</p> <p>Due to the revise layout of Car Park 3, the slip and exit junctions are likely to change. This will impact on the current location and will require to move. The final position will be confirmed post receipt of planning consent for CP3, expected sometime in March 2015. Hold all works in this area.</p>	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
14176	CEN 071	Car Park 4 - Planning Application for Ground Based Car Park (c.329 spaces)	29/01/2015	Please proceed and develop design and submit full planning application for a permanent ground based car park on the site of the former OPD, Therapies and A&E buildings and secure consent. To include activities costed under PMI 320, excluding at this stage the FRA and DIA assessments.	04/02/2015
14177	CE 072	MRI COLD WATER 'TOP-	29/01/2015	Confirmation of works as set out in PMI 323 to provide top up CW supply to MRI equipment.	04/02/2015

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014) DH advised that he had received the draft report from JBushfield and would review this asap. The report is in draft form as JBushfield has 1 query to be concluded. (27/11/2014) DH advised that he had reviewed the report and is content with the report. There is one JB query to be concluded. DP advised that he had provided information to JB in response to his query (04/12/2014) DH noted that there is an open point in the ring and JB advised that he needed to discuss this with RJohnson. JB had been requested to liaise with RJohnson asap and DH would chase JB up later that morning to check for a final response. (11/12/2014) DH advised that he had written to JBushfield and advised that he needs the report by w/e 16/01/2015 (08/01/2015) DH advised that he had spoken to JBushfield who had advised that he had an outstanding clarification with RJ to be concluded. DH had asked JBushfield to come into the site offices and liaise with RJ and that JBushfield needs to provide the report by cop 16/01/2015. (15/01/2015) DP advised that the report and recommendations had been issued to BMCL and DP would review this asap. DH advised that there were 4 recommendations for BMCL to agree but that he did not think there was any showstoppers (22/01/2015) **DH advised that he had spoken to JB and the report has an anomaly (29/01/2015)**
- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMCL so that costs could be provided from Mercury (22/01/2015) **AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) **AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015)**
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014) DP noted that there are 2 rooms that may need alterations carried out and BMCL were in dialogue with

WWhittle regarding this matter. DH advised that a response is required asap as is an understanding of timescales for the works and what the works will be. (08/01/2015) DP advised that Mercury are progressing this matter however confirmation of timescales was required. DH agreed to provide the timescale information. (15/01/2015). DH advised that the blood fridges were due to be delivered 23<sup>rd</sup> Feb and he needed to know if the vent matter would be concluded before this time. DH also needed some switch spurs changed to non –spurs (22/01/2015) DH advised that the vent and power needed to be completed by 16<sup>th</sup> Feb 2015. (29/01/2015)

- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015)
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015)
- Fire door hold opens – DH advised this is a change request from the imaging dept. DH advised that he would progress the request through the Change Control Process. DS enquired if this change should go to Building Control. DH provided an overview of the changes noting that he did not consider that the change needed to go to Building Control. A PMI would be provided to BMCL in due course (29/01/2015)
- Telephone lines – GW advised that the cost is extra over but he understood that DH has a query that is more than just extra over. DH advised that a discussion needs to be had re no of telephone lines as there is a difference of opinion. DH would meet with DW and JBailey. DH noted that the lines for the Teaching & Learning will be needed soon. (29/01/2015)
- DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door & half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015)
- Snow clearance – AF advised that KC had asked to get snow cleared from the building that morning and BMCL had assisted however going forward this would be for the NHS to deal with. DH noted that IP was looking at extending the Board's current Land Engineering contract. AF noted that BMCL will continue to grit from the car park to the fence line. (29/01/2015)
- Project Lead – AF advised that Fergus Shaw will become the Project Lead soon. BMCL will be having discussions re which BMCL staff remain on site. (29/01/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 11/02/2015:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014  08/01/2015 15/01/2015  22/01/2015  29/01/2015  05/02/2015	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.  DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.  DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.  DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.  GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.  <b>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</b>	
		Link Bridge at Neuro and impact on INS Entrance	04/12/2014 11/12/2014 08/01/2015 15/01/2015 22/01/2015	To be raised. Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works. AFe advised that it was proposed to try and put the split legs in before do the VIE or carrier system. BMCL proposed to do the internal wall removal in stages. BMCL would try to minimise the impact to the programme. DP advised this is WIP. The structural integrity of the carrier is being looked at. BMCL would leave both legs live until the needed to be cut. AF advised that BMCL expected to be in a good place in next couple of weeks. DP noted that possession by BMCL was on 12 <sup>th</sup> Jan 2015. AF noted that BMCL had not received acceptance of the programme as yet. DP advised that the Heras fencing is up and BMCL have secured a bit of ground for a compound. Delivery of materials is due to commence. The steel will be moved in off the footpath. AF advised that BMCL would be starting works as soon as possible. A discussion re the traffic flow/management was required. GArmstrong is having a look at the interface with BAM. DH noted that GF has a suggestion to conclude and was meeting with BMCL and BAM later that morning.	05/02/2015

A51679245

			29/01/2015	AF advised that the 2 <sup>nd</sup> Feb would be the start date. PM advised that once BMCL have hoardings up then he proposes to look at the pavement arrangement. AF agreed to review the pavement arrangement as well. DH noted that the oxygen connect is needed so that the oxygen connections can be done at this end – this was indicated as being done March. AF advised that he would send dates – BMCL need to do temporary works which will be priced up and provided to NHS. The programme for the bridge is being looked at.	
			05/02/2015	AF advised that works have commenced. The traffic system is in operation and working well. The works to the link will commence in 2 weeks. BMCL have concern that BAM took down some of the BMCL heras fencing to store some of the BAM ducting however they did not replace the heras thereby the site was left open to the public and this is not acceptable. AF understood that GF had spoken to BAM about this matter. PM suggested that this is Paul Fairie's project. DL agreed to find out what has happened and why and get this stopped from happening again. It was agreed this item could be closed.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/02/2015

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/02/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDerment to agree extend of works. All as discussed Paul McGuinness / Hugh McDerment. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to	

A51679245

			<p>13/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p> <p>04/12/2014</p> <p>11/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p>	<p>confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out. DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.</p> <p>DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	<p>The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> </ol>	

Page 1174

			<div>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</div> <div>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</div> <div>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</div> <div>13/11/2014</div> <div>DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</div> <div>20/11/2014</div> <div>AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</div> <div>27/11/2014</div> <div>DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26<sup>th</sup> January 2015 however the light needs to be moved asap.</div> <div>04/12/2014</div> <div>DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.</div> <div>11/12/2014</div> <div>DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.</div> <div>08/01/2015</div> <div>DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.</div> <div>15/01/2015</div> <div>DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.</div> <div>22/01/2015</div> <div>DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.</div> <div>29/01/2015</div> <div>DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.</div> <div>05/02/2015</div> <div>DH advised this is WIP. Items had been removed, room photographed and sent to Toshiba. Toshiba have asked to get the holes filled in and it was not expected that the hole or the light would need to be filled in as the light would need to be reinstalled. GW advised this is an equipment list item.</div>					
3225	PMI 319 -	Neurosurgery Entrance - Amendments to room layouts	<div>18/12/2014</div> <div>Following a review of the room layouts the Board request the amendments as detailed in the attached document.</div> <table><tr><td>Status B Drwgs</td><td></td></tr><tr><td>023 / 02</td><td>Omit Magnet Whiteboard Omit units SMC001 and allow provision for Mailbox</td></tr></table>	Status B Drwgs		023 / 02	Omit Magnet Whiteboard Omit units SMC001 and allow provision for Mailbox

Reconfigure operators area (2No seated spaces) to allow straight reviewing through screen. Omit 50% of storage cupboards.</div> </div>	
			08/01/2015 15/01/2015 22/01/2015 29/01/2015 05/02/2015	DP advised that the queries are being worked through DMF advised that the costs would be provided to the NHS asap. AF advised that BMCL have the costs and would provide these to the NHS asap. GW advised that costs would be provided later that day. PM advised that a cost had been provided. DL advised that the cost would be internally discussed in the first instance.	
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015  15/01/2015 22/01/2015  29/01/2015 05/02/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres. DP advised that James is working on providing the costs to the NHS AF advised that he had spoken to EMCL re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties. GW advised that the cost had been uploaded to Sypro on 28/01 DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status.	
3252	PMI 322 -	LTHW system	07/01/2015	The Board confirm that, due to the results of chemical analysis on the closed LTHW systems within the laboratories, Brookfield Multiplex should proceed with the flushing and treatment prior to opening up the Primary LTHW feed from the Energy Centre. Brookfield Multiplex to provide copies of test results at building handover and following top-	Cross ref CE 072

			08/01/2015 15/01/2015 22/01/2015 29/01/2015 05/02/2015	<p>up of inhibitor in July 2013.</p> <p>DP advised that he had received an early indication that the PMI was due to be issued so plans are in place to progress this matter.</p> <p>DP advised that this work is ongoing. DH enquired if BMCL were co-ordinating with IP re access to the labs &amp; valves and DP confirmed that BMCL are liaising with IP.</p> <p>DP suggested that there would be another couple of weekend working as progress hadn't been as desired.</p> <p>GW advised that the cost had been uploaded to Sypro on 28/01</p> <p>DP advised that works are being progressed over the weekends. GW noted that the costs haven't been accepted by the NHS as yet. DL advised that would not be a problem. PM agreed to provide a CE.</p>	
3268	PMI 324	Reconfiguration of software on Static Systems Nurse Call	12/01/2015 15/01/2015 22/01/2015 29/01/2015 05/02/2015	<p>The Board request a quotation for the reconfiguration of software on Static Systems nurse call system to ensure that the room number is on line 1 (top) of pop-up.</p> <p>An indication of cost implications for having bespoke software on future upgrades/patches should also be provided</p> <p>DMF advised that the cost was due to be provided by Mercury later that day.</p> <p>DMF advised that BMCL have a price however had not uploaded any quote to Sypro at this time due to checking if there is any cost re maintenance. The cost for the reconfiguration would be provided asap.</p> <p>GW advised that the cost had been uploaded to Sypro on 28/01. DH advised that he was awaiting the 2<sup>nd</sup> part of the cost re maintenance.</p> <p>AF suggested that the NHS were to consider whether this goes ahead due to the cost if any changes in the future. DH advised that it is only a 1 off cost until do software upgrades. AF advised that he would advise the NHS not to progress this as the NHS would be left with a non-standard system at a cost of [REDACTED] to carry out the changes and then circa [REDACTED] for license changes. DL agreed to liaise with FM.</p>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015 15/01/2015 22/01/2015 29/01/2015 05/02/2015	<p>Grocery Storage Unit</p> <p>Please provide quotation for the installation of the following:</p> <ol style="list-style-type: none"> <li>1. 63amp three phase electrical supply</li> <li>2. a ventilation stub</li> <li>3. a sprinkler supply</li> </ol> <p>As per locations indicated on attached plan.</p> <p>It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.</p> <p>DMF advised this matter is going through the process.</p> <p>GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.</p> <p>PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.</p>	

3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above	
3303	PMI 327 -	Omission of padded wall covering	23/01/2015  29/01/2015  05/02/2015	The Board request that, as agreed, the padded wall covering to the following rooms is omitted and that the associated cost saving is provided: DCFP - 050 GW3 – 049 GW advised that this would leave BMCL with DCFP 051 which is situated next to DCFP 050 therefore it made more sense for the NHS to do this room as well. GW advised that he is awaiting confirmation from MMacleod regarding this. GW suggested that the NHS contractor should provide a quote for the room. AF advised that BMCL will liaise with Rhino re getting a survey done way forward and will confirm outcome once available. It was agreed this item could be closed. PMI accepted.	
3304	PMI 328 -	Additional/Altered Power and Data	23/01/2015  29/01/2015 05/02/2015	The Board request a quotation for additional/altered power & data in a variety of locations as noted in the attached spreadsheet (Requirements v4) GW advised this is WIP GW advised this is being worked on and should be provided to the NHS on 06/02/2015. AF suggested that there should be a meeting to prioritise the items and order of works.	
3313	PMI 329	ROOM ACCESS SWIPE CARD SOFTWARE	27/01/2015  05/02/2015	Provide additional software license. Please purchase and pass to Facilities Management an additional software license for the swipe card access software. Cost info to be provided to NHS.	
3321	PMI 330 -	Anaesthetic Pendant RNM-037	28/01/2015  05/02/2015	The Board request a quotation to reposition the anaesthetic pendant within RNM-037 (Shared Image room) as per the attached GA & RCP extracts to eliminate a clash between a monitor arm and the pendant. The cost should include for the re-commissioning activities albeit that QC tests have not been carried out in this area. GW advised this is WIP.	
3330	PMI 331 -	ARRIVAL SQUARE - 4 No. BUS STANCES	30/01/2015	Provision of as fitted information.  Please provide a drawing (or link to existing drawing) that shows the position of the following in relation to the saw tooth road kerb for each of the 4 stances; a) Foundation for bus shelter - dimensions and depth. b) Position and layout of underground purple flexible ducts, including all links. c) Inspection chambers. d) Details of RS sockets and foundation as installed for RTP1 poles e) Confirmation if power cables have been installed.	

			05/02/2015	This information is required by 13 February 2015. PM acknowledged receiving info from J.Bailey. Agreed this item could be closed.	
3331	PMI 332	IT Hub Room Cabinets	30/01/2015	Please make amendments to hub room cabinets as described below.  The Board confirm the requirement to remove 1 No. vertical cable management tray from those IT cabinets in hub rooms containing single or double chassis where the vertical cabling restricts through access horizontally for future/imminent cabling. (As discussed D. Wilson / D.Hall). 05/02/2015 DH advised this is WIP and the principle of the cost had been established. Work in ongoing.	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. 05/02/2015 GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
3333	PMI 334 -	External Works - Bus Stop Central Park East	30/01/2015	Transfer of Bus Stop from Stage 3 to Stage 3A  Due to the revise layout of Car Park 3, the slip and exit junctions are likely to change. This will impact on the current location and will require to move. The final position will be confirmed post receipt of planning consent for CP3, expected sometime in March 2015. Hold all works in this area.	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	09/02/2015	Relocate lighting column to avoid bus stop.  The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.	
3357	PMI 336	Supply and Install of Schneider Control boxes	09/02/2015	The Board request a cost for the supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF - 024	
3358	PMI 337 -	Pull down beds in NCH	09/02/2015	The Board request a quotation for enabling works to facilitate the installation of pull down beds throughout ward areas in the NCH. The work scope, as set out in the attached table, varies by location and involves three items: * Removal of wall mounted parent light, including isolating wiring and making good the wall (98no) * Relocation of switched fuse spur for hoist (14 no)	

				* Installation of pattressing to support fold-down beds in locations previously not strengthened. This can be surface fixed as the bed has a back panel which will conceal the pattress (14 no)	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A. Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building.	
3361	PMI 339 -	Energy Centre - Test sockets	10/02/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase.	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015	<p>The Board request a quotation to undertake the following works:</p> <p><b>HOW-002: Interview/Sitting Room</b></p> <p>Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).</p> <p><b>HOW-028: Charge Nurse Office</b></p> <p>Hot and cold water supplies (or cold only) to proposed sink.</p> <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> <p>Fit-out will be undertaken by others including electrical and mechanical installation but final connections/commissioning will be subject to BMCE checks/approval.</p> <p>Please provide a programme for the works.</p>	
3364	PMI 341 -	Blood fridges	11/02/2015	<p>The Board request a quotation for the following works to the blood fridges (they require a shelf and a digit lock as follows):</p> <ul style="list-style-type: none"> <li>• Critical Care blood fridge – CCW 132 – cost of installation of a digi lock on door to secure room.</li> <li>• Level 11 store- WS11-032- cost of putting in a shelf 300 by 900 next to the blood fridge REF1011.</li> </ul>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14266	CE 073 -	Equipment List - Groups 1 & 2	09/02/2015	The Board confirm their updated requirements in connection with Group 1 & 2 as per the attached list. The list has been generated from the drawings and Room Data Sheets. Agreed manual adjustments are noted and these are to be captured in the updated Drawings and Room Data Sheets as the 'as built' are issued. No cost update required at this stage.	11/02/2015

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) **GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) **AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015)**
- Blood fridges –walkround with the blood fridge specialist who had mentioned that the ventilation is not appropriate and suggesting the will need to change vent in a couple of areas. This matter will be raised if it becomes an issue. (11/12/2014) DP noted that there are 2 rooms that may need alterations carried out and BMCL were in dialogue with WWhittle regarding this matter. DH advised that a response is required asap as is an understanding of timescales for the works and what the works will be. (08/01/2015) DP advised that Mercury are progressing this matter however confirmation of timescales was required. DH agreed to provide the timescale information. (15/01/2015). DH advised that the blood fridges were due to be delivered 23<sup>rd</sup> Feb and he needed to know if the vent matter would be concluded before this time. DH also needed some switch spurs changed to non –spurs (22/01/2015) DH advised that the vent and power needed to be completed by 16<sup>th</sup> Feb 2015. (29/01/2015) **DH advised that this matter would be discussed at the same meeting as the additional data & power. DP advised that the materials are on site (05/02/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) **AF noted that the doors are expected by end Feb 2015. (05/02/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) **DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015)**

- Fire door hold opens – DH advised this is a change request from the imaging dept. DH advised that he would progress the request through the Change Control Process. DS enquired if this change should go to Building Control. DH provided an overview of the changes noting that he did not consider that the change needed to go to Building Control. A PMI would be provided to BMCL in due course (29/01/2015) DH advised that he will formalize the change control. Cost is circa [REDACTED]. A MacLennan supports the change. DL agreed to liaise with A MacLennan. (05/02/2015)
- Telephone lines – GW advised that the cost is extra over but he understood that DH has a query that is more than just extra over. DH advised that a discussion needs to be had re no of telephone lines as there is a difference of opinion. DH would meet with DW and J Bailey. DH noted that the lines for the Teaching & Learning will be needed soon. (29/01/2015) DH to meet with JB and DW (05/02/2015)
- DCFP – AF advised that he had discussed with M Macleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door & half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015)
- Minor Leaks on site – AF advised that BMCL are not concerned but want to mitigate the risk of leaks happening again on site so will change the 6000/7000 hoses over. This will be done as part of the IDM clear off works. (05/02/2015)
- Gas Meter Reading – meeting to be scheduled for w/c 09/02/2015 – ASm, GW and PM. GW requested that the NHS asks JKennan to stop sending reminders for a bill he hasn't received. (05/02/2015)
- Renal Water – DH noted that the programme had been received the previous week and shared with FW. There will be a need to keep on top of the programme/works. Some advice had been received from HFS which needed to be worked through. (05/02/2015)
- Car Park – BCM will be opening up level 4 for the NHS orientations, etc. BMCL will put up more signage. (05/02/2015)
- Big bike shelter – AF noted that BMCL suggested that there should be a larger gap between bottom of shelter and ground however Ginkgo advised that the gap needs to be 20mm / as per signed off drawing. BMCL suggest that having the smaller gap will mean that rubbish is collected in the shelter and a larger gap should be used. PM agreed to confirm the way forward. (05/02/2015)
- Adult Theatre – scrub rooms – AF requested that the Board confirm that they are happy with the shelves and BMCL think they may be too wide (05/02/2015)
- Pen holders – Noted that BMCL should remove these as they do not work (05/02/2015)
- Group 5 areas – AF suggested that there should be a meeting to discuss the handover of the group 5 rooms/areas.
- Principal contractor role – AF advised that BMCL needed an understanding of when works are taking place – concern at some of the works which have been observed. BMCL would be keen to get a programme of works. (05/02/2015)
- Access to building – AF suggested that spot checks should be carried out to check that people have been inducted. AF suggested that a card could be worn to signify this so that access can be controlled as the hospitals are open to people just going in. BMCL proposed to increase security and put a gate back onto the road from Hardgate Road. It was proposed that BMCL should meet with KC and IP (05/02/2015) There was a query raised regarding the use of pallets/palletised trucks in the building and AF advised that there was no concern must pallets must be removed from the building asap and not allowed to build up. If pallets are being stored then these need to be kept tidy in a locked room. AF suggested that BMCL insurers should be asked to visit (05/02/2015)

- Machaire – DH advised that LMorrison had asked for the IQ and AQ. DP advised that he thought that everyone was working to 11/02/2015. (05/02/2015)
- Phase 3A – PM advised that there had been a good meeting with the Planners on 04/02/2015 and that they now expect to receive a full application for the Car Park.
- Patient/Public movements – AF requested that the NHS provide an indication of when patient/public movements will commence in the new hospitals so that they can understand this in relation to the asbestos removal works to be undertaken. (05/02/2015)
- Additional demolitions – GW requested a CE for the additional demolition. (05/02/2015)
- Clock tower – PM advised that he would organize a visit to the clock tower for AF in the next couple of weeks (05/02/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1183

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 04/03/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p>	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation.</p> <p>We are still awaiting official notification but we are putting together contingency plans never the less. This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex.</p> <p>DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be</p>	

A51679245

				identified. BMCL were mitigating risks in order to keep the programme on track.	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	26/02/2015	The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours. Please confirm how you wish us to proceed.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 25/02/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24156	NHS EW 055	AAW Rooms 126 & 127 Flood	11/02/2015 12/02/2015  19/02/2015  26/02/2015	<p>Please provide report and plan to re-instate rooms affected by flood. Please also provide plan to rectify this defect. Also refer attached documents.</p> <p>DP advised that he had a meeting with EMcl the previous day. This matter is a no1 priority for Mercury now. There hadn't been any instances prior to handover. Mercury subsequently identified that there could be an issue if the push fit is not straight so Mercury will expedite the works to replace the 6000/7000 hoses and this would no longer be carried out as part of the IDMS clear off works Mercury have been asked to provide a marked-up drawing of works already undertaken and to provide a programme of works. BMCL will provide a written report on the matter. GW advised that he had asked Andy to notify their insurers. Approximately 4,500 of 6,500 hoses replaced, pressure in system has also been reduced, to lower risk of future burst until replacement works complete. Brookfield's damage report awaited. Capita to inspect partitions and finishes affected.</p> <p>DP advised that there has been circa 4500 hoses replaced to date. Delivery of remaining hoses was awaited however once received the replacement works would be continued. DP noted that the pressure is put back up in zones once the hoses in that zone have been replaced. PM enquired if a report on the damage had been prepared and FS advised that they have a note of the damaged floor covering circa 1000m<sup>2</sup> and ACFlooring are to confirm when they will get on site. FS had spoken to KC. The remedial works programme would be discussed with KC, PM and DL once available. DL advised that the colouring needed to be matched in. FS advised that there is still one partition to be opened up (area at courtyard 7).</p>	
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015  26/02/2015	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/03/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p>	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
			15/01/2015		

A51679245

			<p>22/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>29/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>05/02/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>12/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>19/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>26/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	<p>10/11/2014 The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</li> </ol> <p>13/11/2014 DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p> <p>20/11/2014 AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015. DH advised</p>	

			27/11/2014	that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday. DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	
			04/12/2014	DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.	
			11/12/2014	DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.	
			08/01/2015	DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.	
			15/01/2015	DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephen.	
			22/01/2015	DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.	
			29/01/2015	DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.	
			05/02/2015	DH advised this is WIP. Items had been removed, room photographed and sent to Toshiba. Toshiba have asked to get the holes filled in and it was not expected that the hole or the light would need to be filled in as the light would need to be reinstalled. GW advised this is an equipment list item.	
			12/02/2015	DH advised that there had been a concern raised that in the drilling of the holes that the machine could be damaged and that the hole drilling was to be put back 3 weeks. AStephen had been trying to get Hole Master who were on site to carry out the works while they were on site. DH enquired if Starkstrom were lined up to come in with the extended arms. The acceptance testing is due in March 2015. AF advised that BMCL will review the works and check that the process for drilling the hole is appropriate i.e. they could use “vacuum mounted” drilling to minimize the dust. DH advised that it is only 4 holes for a bracket and there was no reason to delay the works as the machine is not being moved so holes just needs to be done. DP advised that BMCL would need to carry out a final pressure test as everything was online.	
			19/02/2015	Starkstrom extended arms due on site w/c 23 February, reinstall of light to be programmed around Toshiba works.	
			26/02/2015	DP confirmed that the pendant arms are on site and that he would confirm the fitting date asap.	
3251	PMI 321	NCH Theatres 109 & 114	07/01/2015	The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 & 114. The cabling should match that previously installed to all other theatres.	
			15/01/2015	DP advised that James is working on providing the costs to the NHS	
			22/01/2015	AF advised that he had spoken to EMcl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the	

			29/01/2015 05/02/2015 19/02/2015 26/02/2015	alternate solution and impact on warranties. GW advised that the cost had been uploaded to Sypro on 28/01 DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status. <b>PM advised that the Project Team were still waiting on the Board to confirm the way forward. DL advised that there is a meeting with the Users planned in March 2015.</b>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015  15/01/2015  22/01/2015 29/01/2015  05/02/2015  12/02/2015  19/02/2015 26/02/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening. DMF advised this matter is going through the process. GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response. PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees. GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED] PMI 342 issued to take design forward for costing. <b>GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12<sup>th</sup> March 2015.</b>	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015 19/02/2015 26/02/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. <b>As above</b>	
3321	PMI 330 -	Anaesthetic Pendant RNM-037	28/01/2015  05/02/2015 12/02/2015	The Board request a quotation to reposition the anaesthetic pendant within RNM-037 (Shared Image room) as per the attached GA & RCP extracts to eliminate a clash between a monitor arm and the pendant. The cost should include for the re-commissioning activities albeit that QC tests have not been carried out in this area. GW advised this is WIP. GW advised that Andy has the Starkstrom cost however is waiting on other associated costs. DH	Cross reference PMI 351

3357	PMI 336	Supply and Install of Schneider Control boxes	09/02/2015  12/02/2015 19/02/2015 26/02/2015	The Board request a cost for the supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF – 024 GW advised that costs are awaited from Schneider via Mercury. DH advised that this is an MRI related matter and that the magnets are getting ramped up 20/02/2015. Cost awaited, now extremely urgent. GW advised that the cost had been uploaded to Sypro on 24/02/2015. PM agreed to liaise with DH urgently.	
3358	PMI 337 -	Pull down beds in NCH	09/02/2015  12/02/2015 19/02/2015 26/02/2015	The Board request a quotation for enabling works to facilitate the installation of pull down beds throughout ward areas in the NCH. The work scope, as set out in the attached table, varies by location and involves three items: * Removal of wall mounted parent light, including isolating wiring and making good the wall (98no) * Relocation of switched fuse spur for hoist (14 no) * Installation of pattressing to support fold-down beds in locations previously not strengthened. This can be surface fixed as the bed has a back panel which will conceal the pattress (14 no) GW advised that this item is being priced up. Pricing ongoing. GW advised that he would formalise the costs later that day	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015 26/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building. GW advised this is WIP to obtain costs. Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution. GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL requested that the programme be discussed with KC.	
3361	PMI 339 -	Energy Centre - Test sockets	10/02/2015  12/02/2015 19/02/2015 26/02/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. DP advised this is WIP and acknowledged that there is a need to close out the PPC permit. Information has been issued to Mercury and flue manufacturer, now urgent. (19/02/2015). GW advised that he would formalise the costs later that day	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015	The Board request a quotation to undertake the following works:  <b>HOW-002: Interview/Sitting Room</b>  Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).	

				<p><b>HOW-028: Charge Nurse Office</b></p> <p>Hot and cold water supplies (or cold only) to proposed sink.</p> <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> <p>Fit-out will be undertaken by others including electrical and mechanical installation but final connections/commissioning will be subject to BMCE checks/approval.</p> <p>Please provide a programme for the works. GW advised costs will be provided asap. Cost still being prepared by BM, expected 24/02/2015. <b>GW advised that the cost had been uploaded to Sypro on 24/02/2015. Board to confirm the way forward.</b></p>	
3364	PMI 341 –	Blood fridges	<p>11/02/2015</p> <p>12/02/2015 19/02/2015 26/02/2015</p>	<p>The Board request a quotation for the following works to the blood fridges (they require a shelf and a digit lock as follows):</p> <ul style="list-style-type: none"> <li>• Critical Care blood fridge – CCW 132 – cost of installation of a digi lock on door to secure room.</li> <li>• Level 11 store- WS11-032- cost of putting in a shelf 300 by 900 next to the blood fridge REF1011.</li> </ul> <p>GW advised costs will be provided asap. <b>GW advised that the costs had been uploaded to Sypro. BMCL have proceeded with the works. BMCL are awaiting the CE for the works.</b></p>	Cross ref with PMI 350
3370	PMI 342	Wallace Whittle Design Fees for PMI 325, 326 & 338	<p>12/02/2015</p> <p>19/02/2015 26/02/2015</p>	<p>Please proceed with detailed design and confirm all costs for PMI 325, 326 &amp; 338. The vdesign fees including BMCE OH+P are [REDACTED] (325/326) and [REDACTED] (338). Work in progress. <b>CE to be provided to BMCL</b></p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 19/02.2015</p> <p>26/02/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward. <b>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</b></p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015</p> <p>19/02/2015</p>	<p>Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015. <b>Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</b></p>	

			26/02/2015	It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31 <sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31 <sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31 <sup>st</sup> March deadline will be achieved.	
3391	PMI 345	4 @ MRI Control Rooms IPS Outlets	17/02/2015  26/02/2015	The Board request a cost for the provision o 2@twin IPS rated OUT010 outlets in each of the 4 rooms, and 1@ IPS rated OUT010 in corridor adjacent to the Wave Guide. GW advised that costs are awaited from Mercury.	
3392	PMI 346	Starkstrom Pendants – accessories and DVI sockets	17/02/2015  19/02/2105  26/02/2015	The Board require the immediate installation of all pendant accessories and completion of wiring to DVI sockets for all Starkstrom pendants. Delivery commences 20/02/2015 and next week, all works should be complete by early March 2015. DP advised that the delivery had been received and work ongoing and fitting out the pendant has been started. It was noted that JMc has advised that some of the users what the pendants kitted out differently. DP suggested that there should be a joint meeting with Strakstrom. PM advised that instructions should only be provided to BMCL from PM /DH. DP advised that BMCL were trying to accommodate the change to save on double working. PM agreed to liaise with JMcG in the first instance.	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	19/02/2015  26/02/2015	The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010. DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015    26/02/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015. GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.	

3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015  26/02/2015	<p>Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.</p> <p>GW noted that costs are ongoing.</p>	
3407	PMI 350	BLOOD FRIDGES	19/02/2015 26/02/2015	<p>Please proceed with works as set out in PMI 341.</p> <p>CE to be issued.</p>	
3408	PMI 351	NUCLEAR MEDICINE DEPARTMENT - ROOM RNM 037	19/02/2015 26/02/2015	<p>Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330.</p> <p>Costs uploaded to PMI 330 – CE to be issued.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14529	CE 077	ANAESTHETIC PENDANT RNW-037	04/03/2015	Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330 & 351.	
14531	CE 078	Blood Fridges	04/03/2015	Installation of digiloks and shelves as set out in PMI 341 / 350.	

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). **DP advised that IP has gone through and stripped more items out. IP is revising the activities and feedback is awaited. Looking at programme commencing March so can spread the 6 monthly activities. (26/02/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). **Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). FS advised that works are currently on programme for 9<sup>th</sup> March 2015 start. (26/02/2015).**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). **FS advised that doors had been fitted. There are a couple of other items to be concluded before ABrennan is requested to visit (26/02/2015) DP noted that AB has asked for a preliminary visit. (26/02/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). **DP advised that he thought that everything had gone satisfactorily – DP would review and confirm if item can be closed. (26/02/2015).**

- Fire door hold opens – DH advised this is a change request from the imaging dept. DH advised that he would progress the request through the Change Control Process. DS enquired if this change should go to Building Control. DH provided an overview of the changes noting that he did not consider that the change needed to go to Building Control. A PMI would be provided to BMCL in due course (29/01/2015) DH advised that he will formalize the change control. Cost is circa [REDACTED]. A MacLennan supports the change. DL agreed to liaise with A MacLennan. (19/02/2015). **DL advised that this item would be dealt with later this week (26/02/2015)**
- DCFP – AF advised that he had discussed with M Macleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door & half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). **It was noted that there is a meeting scheduled to take place on 27<sup>th</sup> Feb 2015. (26/02/2015)**
- Gas Meter Reading – meeting to be scheduled for w/c 09/02/2015 – ASm, GW and PM. GW requested that the NHS asks JKennan to stop sending reminders for a bill he hasn't received. (05/02/2015) Meeting took place 17/02/2015 PM GW and AS, solution thought to be achieved but further meeting required post receipt of additional information from gas provider. (19/02/2015). **PM suggested that a further meeting should be scheduled in order to conclude the discussions. It was understood that SG have issued a higher correction factor. GW, DP, PM and AS to meet. (26/02/2015)**
- Renal Water – DH noted that the programme had been received the previous week and shared with FW. There will be a need to keep on top of the programme/works. Some advice had been received from HFS which needed to be worked through. (05/02/2015). Programme agreed, samples to be taken 24/02/2015, 4 week proving period to follow receipt of tests results. (19/02/2015). **DP advised that this matter is progressing in the correct direction. PM advised that it was thought that Microbiology want to see sample test results and DH agreed to organize this. (26/02/2015)**
- Patient/Public movements – AF requested that the NHS provide an indication of when patient/public movements will commence in the new hospitals so that they can understand this in relation to the asbestos removal works to be undertaken. (05/02/2015) PM to issue Stage 3 migration programme to BMCE. (19/02/2015). **PM advised that programmes for stages 2 and 3 had been issued via Aconex to BMCL (26/02/2015)**
- Additional demolitions – GW requested a CE for the additional demolition. (05/02/2015). Ongoing. (19/02/2015). **PM advised that he had issued the design cost for the car park. GW advised that he is looking for a CE for the demolitions. This is needed by BMCL in order that he can issue demolition contract. PM and DL to discuss. (26/02/2015)**
- Clock tower – PM advised that he would organize a visit to the clock tower for AF in the next couple of weeks (05/02/2015) Ongoing (19/02/2015). **It was noted that ASmith has gone across and done survey of who is in the building. There is an FM element still in the building and this will be discussed with DL – it was suggested that the FM staff may be able to remain in the building. Medical devices will be moving out. FW requested a walkround so that the infrastructure requirements. PM suggested that the areas should only be painted. (26/02/2015)**
- Helipad – BM to complete the installation of the bird deterrent sounder as supplied by the Board, and also complete the cleaning of the helipad structure. (19/02/2015). **DP advised that BMCL had cleaned up the debris and walkway. Rentokill were onsite the previous day to identify a bird deterrent solution. (26/02/2015)**
- Fire extinguishers – Board to confirm date for removal of Brookfield fire extinguishers. (19/02/2015). **FS advised that it is understood that KC is awaiting confirmation of her delivery (26/02/2015)**
- Ultimate Internal Clean – further discussion required on timing and scope. (19/02/2015). **DL advised that there is still areas in public spaces which may not have been fully cleaned. FS advised that BMCL Had offered KC a reclean of the atrium. FS had met with KC and IP to discuss where BMCL have cleaned. DL noted that it was understood that BMCL would deal with the grey dust and NHS will deal with the white dust. (26/02/2015)**

- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue to the columns to BAM and that he would provide a PMI to advise. (26/02/2015)
- Fire Alarm (BMCE/BAM) interface – DH to speak to Graham Forsyth re interface of Main Build / T&LC / Office systems. (19/02/2015). PM advised that he would discuss this with GForsyth. (26/02/2015)
- Nurse Call – Board to confirm if there is a need to change the ward names on the system. (19/02/2015). DP advised that there is potentially implications as Fire Alarms named in line with the Nurse Call. IP has advised that this needs to be resolved. DP noted that the software programming would have commenced 3 years past for the Fire Alarm so accept that this may not be in line with the final configuration . (26/02/2015)
- Schiehallion – padded floor colour To be raised by BMCE. GW advised that FW has advised that the colour of the flooring is wrong however the colour is as the signed off finishes schedule. DH advised that his understanding is that the flooring is to be thicker. GW noted that it is a padded floor. DH suggested that there is a drawing which is bubbled advising that this is subject to agreement of a sample. (12/02/2015) Board to confirm colours and extent. (MMcL/FW). (19/02/2015). DP advised that the specialist had confirmed that can fit to the floor directly which would make thicker. NHS to confirm if ok and confirm colour. Also, the ceiling is white – please confirm way forward. (26/02/2015)
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1197

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 11/03/2015:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p>	
24309	BMCE-EWN-000151	Mach Aire Limted Liquidation	24/02/2015	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation.</p> <p>We are still awaiting official notification but we are putting together contingency plans never the less.</p> <p>This plan will be communicated to the board in due course.</p>	

A51679245

			26/02/2015  05/03/2015	<p>The board are to wait on further information and contingency planning from Brookfield Multiplex. DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with Validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the Validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p>	
2434 6	BMCE-EWN-000152	Hai Scribe INS Partition Works	26/02/2015  05/03/2015	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours. Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/03/2015

							
SypriD	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
24156	NHS EW 055	AAW Rooms 126 & 127 Flood	11/02/2015  12/02/2015   19/02/2015  26/02/2015	<p>Please provide report and plan to re-instate rooms affected by flood. Please also provide plan to rectify this defect. Also refer attached documents.</p> <p>DP advised that he had a meeting with EMcl the previous day. This matter is a no1 priority for Mercury now. There hadn't been any instances prior to handover. Mercury subsequently identified that there could be an issue if the push fit is not straight so Mercury will expedite the works to replace the 6000/7000 hoses and this would no longer be carried out as part of the IDMS clear off works Mercury have been asked to provide a marked-up drawing of works already undertaken and to provide a programme of works. BMCL will provide a written report on the matter. GW advised that he had asked Andy to notify their insurers.</p> <p>Approximately 4,500 of 6,500 hoses replaced, pressure in system has also been reduced, to lower risk of future burst until replacement works complete. Brookfield's damage report awaited. Capita to inspect partitions and finishes affected.</p> <p>DP advised that there has been circa 4500 hoses replaced to date. Delivery of remaining hoses was awaited however once received the replacement works would be continued. DP noted that the pressure is put back up in zones once the hoses in that zone have been replaced. PM enquired if a report on the damage had been prepared and FS advised that they have a note of the damaged floor covering circa 1000m<sup>2</sup> and ACFlooring are to confirm when they will get on site. FS had spoken to KC. The remedial works programme would be discussed with KC, PM and DL once available. DL advised that the colouring needed to be matched in. FS advised that there is still one partition to be opened up (area at courtyard 7).</p>			

A51679245

			05/03/2015	DP advised that the hose replacement works are 50% complete (levels 1 to 7 completed, 8 to 11 underway and nearing completion. BMCL were awaiting the delivery of hoses to site in order to complete the works. Once all the hoses in a zone had been completed the pressure had been put on and there had been no issues identified.	
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015  26/02/2015  05/03/2015	The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.  FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .  PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/03/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDerment to agree extend of works. All as discussed Paul McGuinness / Hugh McDerment.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and agree extend of works.</p>	

A51679245

			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed	
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.	
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.	
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.	
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.	
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project	

			26/02/2015  05/03/2015	<p>commences 23 February 2015.</p> <p>DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	<p>10/11/2014</p> <p>13/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p> <p>04/12/2014</p> <p>11/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p>	<p>The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</li> </ol> <p>DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p> <p>AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</p> <p>DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26<sup>th</sup> January 2015 however the light needs to be moved asap.</p> <p>DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.</p> <p>DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.</p> <p>DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.</p> <p>DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.</p>	

			<p>29/01/2015</p> <p>05/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.</p> <p>DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.</p> <p>DH advised this is WIP. Items had been removed, room photographed and sent to Toshiba. Toshiba have asked to get the holes filled in and it was not expected that the hole or the light would need to be filled in as the light would need to be reinstalled. GW advised this is an equipment list item.</p> <p>DH advised that there had been a concern raised that in the drilling of the holes that the machine could be damaged and that the hole drilling was to be put back 3 weeks. AStephen had been trying to get Hole Master who were on site to carry out the works while they were on site. DH enquired if Starkstrom were lined up to come in with the extended arms. The acceptance testing is due in March 2015. AF advised that BMCL will review the works and check that the process for drilling the hole is appropriate i.e. they could use "vacuum mounted" drilling to minimize the dust. DH advised that it is only 4 holes for a bracket and there was no reason to delay the works as the machine is not being moved so holes just needs to be done. DP advised that BMCL would need to carry out a final pressure test as everything was online.</p> <p>Starkstrom extended arms due on site w/c 23 February, reinstall of light to be programmed around Toshiba works.</p> <p>DP confirmed that the pendant arms are on site and that he would confirm the fitting date asap.</p> <p>DP advised that the arms have been installed however still need to pull cables to the lights. DH enquired if there had been any access issues and DP agreed to check and confirm.</p>	
3251	PMI 321	NCH Theatres 109 & 114	<p>07/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 &amp; 114.</p> <p>The cabling should match that previously installed to all other theatres.</p> <p>DP advised that James is working on providing the costs to the NHS</p> <p>AF advised that he had spoken to EMCl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties.</p> <p>GW advised that the cost had been uploaded to Sypro on 28/01</p> <p>DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status.</p> <p>PM advised that the Project Team were still waiting on the Board to confirm the way forward. DL advised that there is a meeting with the Users planned in March 2015.</p> <p>NHS to confirm way forward. GW advised that cost had been uploaded to Sypro. DP advised that Starkstrom currently have people on site therefore it would be beneficial to instruct this work asap before they finish up on site.</p>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	<p>Grocery Storage Unit</p> <p>Please provide quotation for the installation of the following:</p> <ol style="list-style-type: none"> <li>63amp three phase electrical supply</li> <li>a ventilation stub</li> <li>a sprinkler supply</li> </ol>	

			15/01/2015	As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
			22/01/2015	DMF advised this matter is going through the process.	
			29/01/2015	GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.	
			05/02/2015	PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.	
			12/02/2015	GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12 <sup>th</sup> March 2015.	
			05/03/2015	GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	See above	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	As above	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.	
			05/02/2015	Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
			12/02/2015	PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP	

			<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.</p> <p>PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.</p> <p>PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015</p> <p>PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p>	
3357	PMI 336	Supply and Install of Schneider Control boxes	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>The Board request a cost for the supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations:</p> <p>RAG - 109</p> <p>RAG - 112</p> <p>RCG - 064</p> <p>RCF – 024</p> <p>GW advised that costs are awaited from Schneider via Mercury. DH advised that this is an MRI related matter and that the magnets are getting ramped up 20/02/2015.</p> <p>Cost awaited, now extremely urgent.</p> <p>GW advised that the cost had been uploaded to Sypro on 24/02/2015. PM agreed to liaise with DH urgently.</p> <p>PM advised that he would provide a CE. This item was an equipment list charge.</p>	
3358	PMI 337 -	Pull down beds in NCH	<p>09/02/2015</p>	<p>The Board request a quotation for enabling works to facilitate the installation of pull down beds throughout ward areas in the NCH.</p> <p>The work scope, as set out in the attached table, varies by location and involves three items:</p> <ul style="list-style-type: none"> <li>* Removal of wall mounted parent light, including isolating wiring and making good the wall (98no)</li> <li>* Relocation of switched fuse spur for hoist (14 no)</li> <li>* Installation of pattressing to support fold-down beds in locations previously not strengthened. This</li> </ul>	

			12/02/2015 19/02/2015 26/02/2015 05/03/2015	can be surface fixed as the bed has a back panel which will conceal the mattress (14 no) GW advised that this item is being priced up. Pricing ongoing. GW advised that he would formalise the costs later that day <b>GW advised that the cost had been uploaded on 27/02. DH advised that resource is currently available and he would liaise with MM to progress.</b>	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015 26/02/2015  05/03/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building. GW advised this is WIP to obtain costs. Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution. <b>GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</b> <b>DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS).</b> <b>GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.</b>	
3361	PMI 339 -	Energy Centre - Test sockets	10/02/2015  12/02/2015 19/02/2015 26/02/2015 05/03/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. DP advised this is WIP and acknowledged that there is a need to close out the PPC permit. Information has been issued to Mercury and flue manufacturer, now urgent. (19/02/2015). GW advised that he would formalise the costs later that day <b>DH advised that this matter was due to the PPC change to guidance. PM agreed to provide a CE.</b>	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015	The Board request a quotation to undertake the following works:  <b>HOW-002: Interview/Sitting Room</b>  Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).  <b>HOW-028: Charge Nurse Office</b>  Hot and cold water supplies (or cold only) to proposed sink.  <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> Fit-out will be undertaken by others including electrical and mechanical installation but final	

			<p>connections/commissioning will be subject to BMCE checks/approval.</p> <p>12/02/2015 19/02/2015 26/02/2015</p> <p>05/03/2015</p> <p>Please provide a programme for the works. GW advised costs will be provided asap. Cost still being prepared by BM, expected 24/02/2015. GW advised that the cost had been uploaded to Sypro on 24/02/2015. Board to confirm the way forward. PM agreed to liaise with HG. DP advised that HG had enquired about the timescales and that the info provided was only indicative.</p>	
3364	PMI 341 –	Blood fridges	<p>11/02/2015</p> <p>12/02/2015 26/02/2015</p> <p>05/03/2015</p> <p>The Board request a quotation for the following works to the blood fridges (they require a shelf and a digit lock as follows):</p> <ul style="list-style-type: none"> <li>• Critical Care blood fridge – CCW 132 – cost of installation of a digi lock on door to secure room.</li> <li>• Level 11 store- WS11-032- cost of putting in a shelf 300 by 900 next to the blood fridge REF1011.</li> </ul> <p>GW advised costs will be provided asap. GW advised that the costs had been uploaded to Sypro. BMCL have proceeded with the works. BMCL are awaiting the CE for the works. CE provided therefore item can be closed. Cross ref CE 078</p>	Cross ref with PMI 350
3370	PMI 342	Wallace Whittle Design Fees for PMI 325, 326 & 338	<p>12/02/2015 19/02/2015 26/02/2015</p> <p>05/03/2015</p> <p>Please proceed with detailed design and confirm all costs for PMI 325, 326 &amp; 338. The design fees including BMCE OH+P are [REDACTED] (325/326) and [REDACTED] (338). Work in progress. CE to be provided to BMCL CE provided therefore item can be closed.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 19/02.2015 26/02/2015</p> <p>05/03/2015</p> <p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015 19/02/2015 26/02/2015</p> <p>Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015. Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued. It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for</p>	

			05/03/2015	<p>wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p>	
3391	PMI 345	4 @ MRI Control Rooms IPS Outlets	17/02/2015 26/02/2015 05/03/2015	<p>The Board request a cost for the provision o 2@twin IPS rated OUT010 outlets in each of the 4 rooms, and 1@ IPS rated OUT010 in corridor adjacent to the Wave Guide.</p> <p>GW advised that costs are awaited from Mercury.</p> <p>GW advised that the cost had been uploaded on 02/03/2015. DH noted that this is an MR equipment related CE. DH advised that access to the rooms would need to be organized.</p>	
3392	PMI 346	Starkstrom Pendants – accessories and DVI sockets	17/02/2015 19/02/2105 26/02/2015  05/03/2015	<p>The Board require the immediate installation of all pendant accessories and completion of wiring to DVI sockets for all Starkstrom pendants.</p> <p>Delivery commences 20/02/2015 and next week, all works should be complete by early March 2015.</p> <p>DP advised that the delivery had been received and work ongoing and fitting out the pendant has been started. It was noted that JMc has advised that some of the users what the pendants kitted out differently. DP suggested that there should be a joint meeting with Strakstrom. PM advised that instructions should only be provided to BMCL from PM /DH. DP advised that BMCL were trying to accommodate the change to save on double working. PM agreed to liaise with JMcG in the first instance.</p> <p>PM noted that a meeting had been scheduled to take place on 10/03/2015. JMc would provide the 'wish list' for discussion/agreement. PM would provide a PMI to confirm the way forward.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	19/02/2015 26/02/2015  05/03/2015	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p>	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p>	

			26/02/2015  05/03/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.  PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015       26/02/2015 05/03/2015	Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.  The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works. GW noted that costs are ongoing. GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time . GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though..	
3407	PMI 350	BLOOD FRIDGES	19/02/2015 26/02/2015 05/03/2015	Please proceed with works as set out in PMI 341. CE to be issued. CE issued. Item closed. Cross ref CE 078	
3408	PMI 351	NUCLEAR MEDICINE DEPARTMENT - ROOM RNM 037	19/02/2015 26/02/2015 05/03/2015	Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330. Costs uploaded to PMI 330 – CE to be issued. CE issued. Item closed. Cross ref CE 079	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015   05/03/2015	The Board confirm that the additional electrical works required for the Paragon installation to NCH ED & Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328 DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.  This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.	

			05/03/2015	<p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap.</p>

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14529	CE 077	ANAESTHETIC PENDANT RNW-037	04/03/2015	Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330 & 351.	
14531	CE 078	Blood Fridges	04/03/2015	Installation of digiloks and shelves as set out in PMI 341 / 350.	
14533	CE 079	DESIGN FEES FOR WALLACE WHITTLE	04/03/2015	Confirmation on payment of design fees for works set out in PMI's 325, 326 and 338 and confirmed in PMI 342.	
14546	CE 080	SUPPLY & INSTALL SCHNEIDER CONTROL BOXES IN 4 MRI ROOMS	05/03/2015	<p>Supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF - 024</p> <p>All as per PMI 336. Funded from Gp 5 equipment budget.</p>	
14547	CE 081	ENERGY CENTRE - TEST SOCKETS	05/03/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. All as per PMI 339.	
14548	CE 082	4 @ MRI CONTROL ROOMS - IPS OUTLETS	05/03/2015	The Board confirm the requirement for and installation of 2 @ twin IPS rated OUT010 outlets in each MRI Control Room (4 No.) and 1 @ twin IPS rated OUT010 in corridor adjacent to the Wave Guide. Works as priced under PMI345. Funded from Group 5 equipment budget.	

Other items that require discussion:

A51679245

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). **It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). **Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015).**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). **FS advised that he proposed to contact AB imminently (05/03/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). **DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015)**
- Fire door hold opens – DH advised this is a change request from the imaging dept. DH advised that he would progress the request through the Change Control Process. DS enquired if this change should go to Building Control. DH provided an overview of the changes noting that he did not consider that the change needed to go to Building Control. A PMI would be provided to BMCL in due course (29/01/2015) DH advised that he will formalize the change control. Cost is circa [REDACTED]. AMacLennan supports the change. DL agreed to liaise with AMacLennan. (19/02/2015). **DL to confirm way forward (05/03/2015)**
- DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door & half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMcl to action meeting with user group. (19/02/2015). **FS advised that the**

requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted at contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)

- Gas Meter Reading – meeting to be scheduled for w/c 09/02/2015 – ASm, GW and PM. GW requested that the NHS asks JKennan to stop sending reminders for a bill he hasn't received. (05/02/2015) Meeting took place 17/02/2015 PM GW and AS, solution thought to be achieved but further meeting required post receipt of additional information from gas provider. (19/02/2015). PM advised that he understood that JKennan is to provide a bill based on the agreed uplift value, no standing charge and as per agreed readings. GW advised that he needed the new bill to be issued and the old bill to be cancelled. (05/03/2015)
- Renal Water –DH noted that the programme had been received the previous week and shared with FW. There will be a need to keep on top of the programme/works. Some advice had been received from HFS which needed to be worked through. (05/02/2015). Programme agreed, samples to be taken 24/02/2015, 4 week proving period to follow receipt of tests results. (19/02/2015). DH advised that he had received a series of emails the previous evening which were suggesting that the NCH could not be moved into as planned. DH understood that there may be a failure which is getting re-sterilised and retested. (05/03/2015)
- Patient/Public movements – AF requested that the NHS provide an indication of when patient/public movements will commence in the new hospitals so that they can understand this in relation to the asbestos removal works to be undertaken. (05/02/2015) PM to issue Stage 3 migration programme to BMCE. (19/02/2015). It was agreed this item was closed (05/03/2015)
- Additional demolitions – GW requested a CE for the additional demolition. (05/02/2015). Ongoing. (19/02/2015). PM advised that DL has a reluctance to issue the CE. GW advised that BMCL were requesting the 'additional' demolitions so that BMCL and let the demolition contract. GW agreed to check the end date in the tender document (05/03/2015)
- Clock tower – PM advised that he would organize a visit to the clock tower for AF in the next couple of weeks (05/02/2015) Ongoing (19/02/2015). PM advised this is WIP (05/03/2015)
- Helipad – BM to complete the installation of the bird deterrent sounder as supplied by the Board, and also complete the cleaning of the helipad structure. (19/02/2015). DP advised that the sounders were currently being fitted and acknowledged that the helipad would need to be cleaned again (05/03/2015)
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015)
- Fire Alarm (BMCE/BAM) interface – DH to speak to Graham Forsyth re interface of Main Build / T&LC / Office systems. (19/02/2015). PM advised that he would discuss this with GF. (26/02/2015) FS advised that this matter is ongoing. The break in had been undertaken and the Method Statement in. WIP (05/03/2015)
- Nurse Call – Board to confirm if there is a need to change the ward names on the system. (19/02/2015). DP advised that there is potentially implications as Fire Alarms named in line with the Nurse Call. IP had advised that this needs to be resolved. DP noted that the software programming for the fire alarms would have commenced 3years past and it was accepted that the naming may not be in line with the final configuration. (26/02/2015) DP requested a summarization of what the Board wants so cost can be provided. PM to provide PMI (05/03/2015)
- DCFP – padded floor colour To be raised by BMCE. GW advised that FW has advised that the colour of the flooring is wrong however the colour is as the signed off finishes schedule. DH advised that his understanding is that the flooring is to be thicker. GW noted that it is a padded floor. DH suggested that there is a drawing which is bubbled advising that this is subject to agreement of a sample. (12/02/2015) Board to confirm colours and extent. (MMcL/FW). (19/02/2015). DP advised that the specialist had confirmed that can fit to the floor directly which would make thicker. NHS to confirm if ok and confirm colour. Also, the ceiling is white – please confirm way forward. (26/02/2015) PM advised GB was to provide the colour. It was noted that Andy had advised that everything had been ordered. FW advised that the reps had been on site the previous day. (05/03/2015)

- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015)
- Renal water leak – it was noted that there had to be an emergency opening up of walls. Advised that there may be some drips (05/03/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1213

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 18/03/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p>	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	24/02/2015	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation.</p> <p>We are still awaiting official notification but we are putting together contingency plans never the less.</p>	

A51679245

			26/02/2015  05/03/2015  12/03/2015	<p>This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex.</p> <p>DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p><b>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works.</b></p>	
2434 6	BMCE-EWN-000152	Hai Scribe INS Partition Works	26/02/2015  05/03/2015  12/03/2015	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours.</p> <p>Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p><b>PM advised that cost is awaited so CE can be issued.</b></p>	
2448 4	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	<p>BMCE have recieved numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.</p> <p><i>Text from prev Notes:</i></p> <p><i>DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). <b>FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted as contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)</b></i></p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p>	

2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	17/03/2015	Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20th March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23rd April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021	
-----------	----------------	--	------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 18/03/2015

					
SypriD	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24156	NHS EW 055	AAW Rooms 126 & 127 Flood	11/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015	<p>Please provide report and plan to re-instate rooms affected by flood. Please also provide plan to rectify this defect. Also refer attached documents.</p> <p>DP advised that he had a meeting with EMcl the previous day. This matter is a no1 priority for Mercury now. There hadn't been any instances prior to handover. Mercury subsequently identified that there could be an issue if the push fit is not straight so Mercury will expedite the works to replace the 6000/7000 hoses and this would no longer be carried out as part of the IDMS clear off works Mercury have been asked to provide a marked-up drawing of works already undertaken and to provide a programme of works. BMCL will provide a written report on the matter. GW advised that he had asked Andy to notify their insurers. Approximately 4,500 of 6,500 hoses replaced, pressure in system has also been reduced, to lower risk of future burst until replacement works complete. Brookfield's damage report awaited. Capita to inspect partitions and finishes affected.</p> <p>DP advised that there has been circa 4500 hoses replaced to date. Delivery of remaining hoses was awaited however once received the replacement works would be continued. DP noted that the pressure is put back up in zones once the hoses in that zone have been replaced. PM enquired if a report on the damage had been prepared and FS advised that they have a note of the damaged floor covering circa 1000m<sup>2</sup> and ACFlooring are to confirm when they will get on site. FS had spoken to KC. The remedial works programme would be discussed with KC, PM and DL once available. DL advised that the colouring needed to be matched in. FS advised that there is still one partition to be opened up (area at courtyard 7). DP advised that the hose replacement works are 50% complete (levels 1 to 7 completed, 8 to 11 underway and nearing completion. BMCL were awaiting the delivery of hoses to site in order to complete the works. Once all the hoses in a zone had been completed the pressure had been put on and there had been no issues identified.</p> <p>DP advised that the works to replace the hoses were 70% complete. There were some remaining on levels 0, 10 and 11. FS noted that the partition had been opened up and no issues were observed. DH noted that access to the MR rooms would need to be co-ordinated. It was agreed that this item could be closed. BMCL would continue to monitor and advise of any issues should they occur.</p>	
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015	The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.	

A51679245

			26/02/2015	FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .	
			05/03/2015	PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .	
			12/03/2015	FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 18/03/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDerment to agree extend of works. All as discussed Paul McGuiness / Hugh McDerment.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p>	

A51679245

			<p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p> <p>23/10/2014 PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.</p> <p>30/10/2014 DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.</p> <p>13/11/2014 DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.</p> <p>20/11/2014 DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p>	
--	--	--	--	--

			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.	
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.	
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.	
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.	
			13/11/2014	DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015.	
			20/11/2014	AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.	
			27/11/2014	DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	
			04/12/2014	DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.	
			11/12/2014	DH advised that confirmation re timing was required and getting the floors cored and light moved in	

			<p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p>	<p>1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.</p> <p>DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.</p> <p>DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.</p> <p>DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.</p> <p>DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.</p> <p>DH advised this is WIP. Items had been removed, room photographed and sent to Toshiba. Toshiba have asked to get the holes filled in and it was not expected that the hole or the light would need to be filled in as the light would need to be reinstalled. GW advised this is an equipment list item.</p> <p>DH advised that there had been a concern raised that in the drilling of the holes that the machine could be damaged and that the hole drilling was to be put back 3 weeks. AStephen had been trying to get Hole Master who were on site to carry out the works while they were on site. DH enquired if Starkstrom were lined up to come in with the extended arms. The acceptance testing is due in March 2015. AF advised that BMCL will review the works and check that the process for drilling the hole is appropriate i.e. they could use “vacuum mounted” drilling to minimize the dust. DH advised that it is only 4 holes for a bracket and there was no reason to delay the works as the machine is not being moved so holes just needs to be done. DP advised that BMCL would need to carry out a final pressure test as everything was online.</p> <p>Starkstrom extended arms due on site w/c 23 February, reinstall of light to be programmed around Toshiba works.</p> <p>DP confirmed that the pendant arms are on site and that he would confirm the fitting date asap.</p> <p>DP advised that the arms have been installed however still need to pull cables to the lights. DH enquired if there had been any access issues and DP agreed to check and confirm.</p> <p>DP advised that he understood that the cable pulling works had been completed. DH advised that he had a meeting with the Users shortly and that there would be a discussion re the PACS screens and may request some BMCL assistance. DP noted that Starkstrom are currently on site. AF enquired about the training schedule. DP advised that a rebalance and sweep had been scheduled. IP and DWilson generally link regarding any training. AF requested that the NHS confirm any training requirements.</p>	
3251	PMI 321	NCH Theatres 109 & 114	<p>07/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p>	<p>The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 &amp; 114.</p> <p>The cabling should match that previously installed to all other theatres.</p> <p>DP advised that James is working on providing the costs to the NHS</p> <p>AF advised that he had spoken to EMCl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties.</p>	

			<p>29/01/2015 05/02/2015 19/02/2015 26/02/2015  05/03/2015  12/03/2015</p>	<p>GW advised that the cost had been uploaded to Sypro on 28/01 DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status. PM advised that the Project Team were still waiting on the Board to confirm the way forward. DL advised that there is a meeting with the Users planned in March 2015. NHS to confirm way forward. GW advised that cost had been uploaded to Sypro. DP advised that Starkstrom currently have people on site therefore it would be beneficial to instruct this work asap before they finish up on site. DH advised that the NHS were awaiting formal confirmation that YCF will fund the greater works /OR1 and that the NHS were unlikely to go ahead with this item.</p>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	<p>14/01/2015   15/01/2015  22/01/2015 29/01/2015 05/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015</p>	<p>Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening. DMF advised this matter is going through the process. GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response. PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees. GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED] PMI 342 issued to take design forward for costing. GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12<sup>th</sup> March 2015. GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up. DH noted that the retailer is doing their own warrant applications.</p>	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	<p>14/01/2015  15/01/2015 19/02/2015 26/02/2015</p>	<p>Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. As above</p>	

3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.	
			05/02/2015	GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
			12/02/2015	PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.	
			19/02/2015	PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.	
			26/02/2015	PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015	
			05/03/2015	PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.	
			12/03/2015	PM advised that he had informally heard that the shelters will be available from April.	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	09/02/2015	Relocate lighting column to avoid bus stop.  The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.	
			12/02/2015	PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.	
			19/02/2015	PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.	
			26/02/2015	PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.	
			05/03/2015	PM advised that the pole will need to be moved and requested a copy of the signed off drawing	

			12/03/2015	which GW agreed to provide. PM advised that an amendment would be advised via a separate PMI.	
3357	PMI 336	Supply and Install of Schneider Control boxes	09/02/2015  12/02/2015 19/02/2015 26/02/2015  05/03/2015 12/03/2015	The Board request a cost for the supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF - 024 GW advised that costs are awaited from Schneider via Mercury. DH advised that this is an MRI related matter and that the magnets are getting ramped up 20/02/2015. Cost awaited, now extremely urgent. GW advised that the cost had been uploaded to Sypro on 24/02/2015. PM agreed to liaise with DH urgently. PM advised that he would provide a CE. This item was an equipment list charge. CE 080 issued there item can be closed.	12/03/2015
3358	PMI 337 -	Pull down beds in NCH	09/02/2015  12/02/2015 19/02/2015 26/02/2015 05/03/2015  12/3/2015	The Board request a quotation for enabling works to facilitate the installation of pull down beds throughout ward areas in the NCH. The work scope, as set out in the attached table, varies by location and involves three items: * Removal of wall mounted parent light, including isolating wiring and making good the wall (98no) * Relocation of switched fuse spur for hoist (14 no) * Installation of pattressing to support fold-down beds in locations previously not strengthened. This can be surface fixed as the bed has a back panel which will conceal the pattress (14 no) GW advised that this item is being priced up. Pricing ongoing. GW advised that he would formalise the costs later that day GW advised that the cost had been uploaded on 27/02. DH advised that resource is currently available and he would liaise with MM to progress. DH agreed to progress this item	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015  26/02/2015  05/03/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building. GW advised this is WIP to obtain costs. Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution. GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL requested that the programme be discussed with KC. DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The	

			12/03/2015	design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.	
3361	PMI 339 -	Energy Centre - Test sockets	10/02/2015  12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. DP advised this is WIP and acknowledged that there is a need to close out the PPC permit. Information has been issued to Mercury and flue manufacturer, now urgent. (19/02/2015). GW advised that he would formalise the costs later that day DH advised that this matter was due to the PPC change to guidance. PM agreed to provide a CE. CE 081 issued	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015       12/02/2015 19/02/2015 26/02/2015  05/03/2015  12/03/2015	The Board request a quotation to undertake the following works:  <b>HOW-002: Interview/Sitting Room</b>  Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).  <b>HOW-028: Charge Nurse Office</b>  Hot and cold water supplies (or cold only) to proposed sink.  <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> Fit-out will be undertaken by others including electrical and mechanical installation but final connections/commissioning will be subject to BMCE checks/approval.  Please provide a programme for the works. GW advised costs will be provided asap. Cost still being prepared by BM, expected 24/02/2015. GW advised that the cost had been uploaded to Sypro on 24/02/2015. Board to confirm the way forward. PM agreed to liaise with HG. DP advised that HG had enquired about the timescales and that the info provided was only indicative. DH advised that there had been a meeting on site with CGrindlay and the mechanical aspects had been reviewed. CG suggested that could deal with changes fairly easily. HG is in discussion with the Cancer Trust to get confirmation that they will fund the changes.	

3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015  12/03/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p>	
3390	PMI 344	Additional Power & Data	17/02/2015 19/02/2015 26/02/2015   05/03/2015  12/03/2015	<p>Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015.</p> <p>Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</p> <p>It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p> <p>It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31<sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31<sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.</p>	
3391	PMI 345	4 @ MRI Control Rooms IPS Outlets	17/02/2015 26/02/2015 05/03/2015	<p>The Board request a cost for the provision o 2@twin IPS rated OUT010 outlets in each of the 4 rooms, and 1@ IPS rated OUT010 in corridor adjacent to the Wave Guide.</p> <p>GW advised that costs are awaited from Mercury.</p> <p>GW advised that the cost had been uploaded on 02/03/2015. DH noted that this is an MR</p>	

			12/03/2015	equipment related CE. DH advised that access to the rooms would need to be organized. Item closed – CE 082 issued	
3392	PMI 346	Starkstrom Pendants – accessories and DVI sockets	17/02/2015 19/02/2105 26/02/2015  05/03/2015 12/03/2015	The Board require the immediate installation of all pendant accessories and completion of wiring to DVI sockets for all Starkstrom pendants. Delivery commences 20/02/2015 and next week, all works should be complete by early March 2015. DP advised that the delivery had been received and work ongoing and fitting out the pendant has been started. It was noted that JMc has advised that some of the users what the pendants kitted out differently. DP suggested that there should be a joint meeting with Strakstrom. PM advised that instructions should only be provided to BMCL from PM /DH. DP advised that BMCL were trying to accommodate the change to save on double working. PM agreed to liaise with JMcG in the first instance. PM noted that a meeting had been scheduled to take place on 10/03/2015. JMc would provide the 'wish list' for discussion/agreement. PM would provide a PMI to confirm the way forward. DP advised that BMCL have clarity about what JMcG is asking for but JMcG needs to be asked to place the items so that Mercury can do the wiring. Starkstrom are to confirm some items i.e. hanging of Vacsac	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	19/02/2015 26/02/2015 05/03/2015 12/03/2015	The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010. DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list. GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost. DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015  26/02/2015 05/03/2015  12/03/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015. GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer. PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. . GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised	

				to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015  26/02/2015 05/03/2015  12/03/2015	<p>Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works. GW noted that costs are ongoing. GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time . GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter &amp; Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015  05/03/2015  12/03/2015	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328 DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon. DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb)</p>	

			05/03/2015	<p>plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p><b>GW advised that he would upload the costs asap.</b></p>	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	05/03/2015	Please provide cost to change names on fire alarm and nurse call from those bcurrently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc.	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	10/03/2015	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul>	
3482	PMI 356 -	Omission of padded wall covering	10/03/2015	The Board request that, as agreed, the padded wall covering to the following rooms is omitted and that the associated cost saving is provided: DCFP – 051	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	10/03/2015	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement during heat sanitisation of the main level 4 loop.</p>	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed.	

3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.  Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002)	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.  Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
14529	CE 077	ANAESTHETIC PENDANT RNW-037	04/03/2015	Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330 & 351.	
14531	CE 078	Blood Fridges	04/03/2015	Installation of digiloks and shelves as set out in PMI 341 / 350.	
14533	CE 079	DESIGN FEES FOR WALLACE WHITTLE	04/03/2015	Confirmation on payment of design fees for works set out in PMI's 325, 326 and 338 and confirmed in PMI 342.	
14546	CE 080	SUPPLY & INSTALL SCHNEIDER CONTROL BOXES IN 4 MRI ROOMS	05/03/2015	Supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF - 024  All as per PMI 336. Funded from Gp 5 equipment budget.	
14547	CE 081	ENERGY CENTRE - TEST SOCKETS	05/03/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. All as per PMI 339.

Works as priced under PMI345. Funded from Group 5 equipment budget.	
14652	CE 083	CHILDREN'S HOSPITAL - PULL DOWN BEDS	13/03/2015	Please proceed immediately with works as described in PMI 337.	
14653	CE 084	PHASE 3A DEMOLITION WORKS - ADDITIONAL BUILDINGS	13/03/2015	Please demolish and remove from site the additional buildings as part of your demolition contract; a) out-patients, b) therapies and c) accident and emergency and all associated sundry structures and immediate hard landscaping, all as priced.	

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) **DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). **GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). **FS advised that he proposed to contact AB imminently (05/03/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) **DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015)**

- Renal Water –DH noted that the programme had been received the previous week and shared with FW. There will be a need to keep on top of the programme/works. Some advice had been received from HFS which needed to be worked through. (05/02/2015). Programme agreed, samples to be taken 24/02/2015, 4 week proving period to follow receipt of tests results. (19/02/2015). DH advised that he had received a series of emails the previous evening which were suggesting that the NCH could not be moved into as planned. DH understood that there may be a failure which is getting re-sterilised and retested. (05/03/2015) DP noted that there had been a high count at NCH therefore retest carried out and at Labs. DP noted that 1 outlet had also been changed. DH advised that he understood that the outlet was having remedial works which was concerning and that the NHS needed to understand what works are being done retesting, etc. (12/03/2015)
- Additional demolitions – GW requested a CE for the additional demolition. (05/02/2015). Ongoing. (19/02/2015). PM advised that DL has a reluctance to issue the CE. GW advised that BMCL were requesting the 'additional' demolitions so that BMCL and let the demolition contract. GW agreed to check the end date in the tender document (05/03/2015) PM agreed to provide a CE (12/03/2015)
- Helipad – BM to complete the installation of the bird deterrent sounder as supplied by the Board, and also complete the cleaning of the helipad structure. (19/02/2015). DP advised that the sounders were currently being fitted and acknowledged that the helipad would need to be cleaned again (05/03/2015) DP noted that the sounder install was complete and initial low level clean down undertaken. Abseil clean will be progressed in due course (12/03/2015)
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015)
- DCFP – padded floor colour To be raised by BMCE. GW advised that FW has advised that the colour of the flooring is wrong however the colour is as the signed off finishes schedule. DH advised that his understanding is that the flooring is to be thicker. GW noted that it is a padded floor. DH suggested that there is a drawing which is bubbled advising that this is subject to agreement of a sample. (12/02/2015) Board to confirm colours and extent. (MMcL/FW). (19/02/2015). DP advised that the specialist had confirmed that can fit to the floor directly which would make thicker. NHS to confirm if ok and confirm colour. Also, the ceiling is white – please confirm way forward. (26/02/2015) PM advised GB was to provide the colour. It was noted that Andy had advised that everything had been ordered. FW advised that the reps had been on site the previous day. (05/03/2015) It was agreed that this item was closed (12/03/2015)
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015)
- Warrant applications – AF suggested that a meeting is held with Building Control so can agree how to deal with warrant applications going forward i.e. needed for additional data & power, laundry, retail units, workshop, etc. Pre-meet with BMCL and NHS to be organized so can identify all the potential warrants (12/03/2015)
- Endoscopy washers – DH advised that he had been advised that there are leaks under the machines (RO water). BMCL agreed to investigate. (12/03/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1232

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 25/03/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p>	

A51679245

24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation.</p> <p>We are still awaiting official notification but we are putting together contingency plans never the less.</p> <p>This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex.</p> <p>DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works.</p> <p><b>DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</b></p>	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p>	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours.</p> <p>Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p>PM advised that cost is awaited so CE can be issued.</p> <p><b>GW advised that the costs would be provided later that day.</b></p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	<p>BMCE have recieved numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.</p> <p><i>Text from prev Notes:</i></p> <p><i>DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMcl to action meeting with user group. (19/02/2015). FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted at contracted to do so. DH enquired if there had been a legislation</i></p>	

			19/03/2015	<p>change. PM agreed to raise an EW (05/03/2015)</p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p> <p>GW advised that he had uploaded all the documentation to Sypro. BMCL are awaiting confirmation as to way forward/what works have to be carried out. FS noted that there will be items that will be difficult to obtain by 24<sup>th</sup> April i.e. doors. PM agreed to discuss with DL.</p>	
2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	17/03/2015  19/03/2015	<p>Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20th March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23rd April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021</p> <p>GW advised that BMCL are awaiting confirmation from the NHS re the way forward. AF suggested that BMCL should carry out trial digs so it can be identified if there is anything of consequence.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 18/03/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015  26/02/2015  05/03/2015  12/03/2015	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p> <p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish</p>	

			19/03/2015	<p>the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.</p> <p>FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works.FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 25/03/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDerment to agree extend of works. All as discussed Paul McGuiness / Hugh McDerment.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p>	

A51679245

			<p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p> <p>23/10/2014 PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.</p> <p>30/10/2014 DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.</p> <p>13/11/2014 DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.</p> <p>20/11/2014 DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p>	
--	--	--	--	--

			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.	
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.	
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.	
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.	
			19/03/2015	GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below: 1) To carry out a further core in each theatre set-out as per the attached drawings 2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor 3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table. 4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm 5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres 6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02) 7) to alter the av cabling & electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.	
			13/11/2014	DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26 <sup>th</sup> January 2015.	
			20/11/2014	AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26 <sup>th</sup> January 2015. DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.	
			27/11/2014	DH advised that costs are awaited. GW noted that costs had been received the previous night from Mercury. The programme implications will need to be identified – information is awaited from Starkstrom. DH noted that there is less concern if the arm works take place post 26 <sup>th</sup> January 2015 however the light needs to be moved asap.	

			04/12/2014	DH advised this is all agreed. AF advised that BMCL have not confirmed can do all the works in the NHS timescale. DH advised that the light alteration is the biggest issue for the NHS.	
			11/12/2014	DH advised that confirmation re timing was required and getting the floors cored and light moved in 1 room is the priority as this impacts on the ability of Toshiba to carry out their works. DP advised that he thought the light was sorted and that BMCL reps are looking at the coring. DP agreed to provide an update later that day.	
			08/01/2015	DP advised that the cores are to be done w/c 12/01/2015. The lighting will potentially be carried out w/c 19/01/2015. A Stephen will provide an update at 10am meeting.	
			15/01/2015	DH advised that the cores had been formed. DH needed confirmation of when the light could be moved as this was stopping other works on site – DH advised he would liaise with AStephens.	
			22/01/2015	DH advised that he needed a date for the relocation of the light so the Toshiba programme of works can be concluded. DH was satisfied if BMCL take down the light at this time and relocate at a later date in order not to delay the Toshiba works.	
			29/01/2015	DH advised that it is urgent to get the works done as have delayed Toshiba work. DH has discussed with DP the removal works which needs to be done by the end of next week. AF advised he will liaise with DP.	
			05/02/2015	DH advised this is WIP. Items had been removed, room photographed and sent to Toshiba. Toshiba have asked to get the holes filled in and it was not expected that the hole or the light would need to be filled in as the light would need to be reinstalled. GW advised this is an equipment list item.	
			12/02/2015	DH advised that there had been a concern raised that in the drilling of the holes that the machine could be damaged and that the hole drilling was to be put back 3 weeks. AStephen had been trying to get Hole Master who were on site to carry out the works while they were on site. DH enquired if Starkstrom were lined up to come in with the extended arms. The acceptance testing is due in March 2015. AF advised that BMCL will review the works and check that the process for drilling the hole is appropriate i.e. they could use “vacuum mounted” drilling to minimize the dust. DH advised that it is only 4 holes for a bracket and there was no reason to delay the works as the machine is not being moved so holes just needs to be done. DP advised that BMCL would need to carry out a final pressure test as everything was online.	
			19/02/2015	Starkstrom extended arms due on site w/c 23 February, reinstall of light to be programmed around Toshiba works.	
			26/02/2015	DP confirmed that the pendant arms are on site and that he would confirm the fitting date asap.	
			05/03/2015	DP advised that the arms have been installed however still need to pull cables to the lights. DH enquired if there had been any access issues and DP agreed to check and confirm.	
			12/03/2015	DP advised that he understood that the cable pulling works had been completed. DH advised that he had a meeting with the Users shortly and that there would be a discussion re the PACS screens and may request some BMCL assistance. DP noted that Starkstrom are currently on site. AF enquired about the training schedule. DP advised that a rebalance and sweep had been scheduled. IP and DWilson generally link regarding any training. AF requested that the NHS confirm any training requirements.	
			19/03/2015	DH noted that he had asked for the spring arm to be adjusted. There is further work for Toshiba to carry out in the Hybrid theatres re monitors. A PMI would be raised to change the pendants about as the anaesthetic machine will clash. It was agreed this item could be closed and any additional matters raised under the separate PMI.	

3251	PMI 321	NCH Theatres 109 & 114	<p>07/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 &amp; 114. The cabling should match that previously installed to all other theatres.</p> <p>DP advised that James is working on providing the costs to the NHS</p> <p>AF advised that he had spoken to EMcl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties.</p> <p>GW advised that the cost had been uploaded to Sypro on 28/01</p> <p>DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status.</p> <p>PM advised that the Project Team were still waiting on the Board to confirm the way forward. DL advised that there is a meeting with the Users planned in March 2015. NHS to confirm way forward. GW advised that cost had been uploaded to Sypro. DP advised that Starkstrom currently have people on site therefore it would be beneficial to instruct this work asap before they finish up on site.</p> <p>DH advised that the NHS were awaiting formal confirmation that YCF will fund the greater works /OR1 and that the NHS were unlikely to go ahead with this item.</p> <p>DH noted that this matter needed to be formally closed. DL is awaiting confirmation from YCC that they will be funding the greater works/OR1 and when confirmed that NHS will cancel this PMI.</p>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	<p>14/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Grocery Storage Unit</p> <p>Please provide quotation for the installation of the following:</p> <ol style="list-style-type: none"> <li>1. 63amp three phase electrical supply</li> <li>2. a ventilation stub</li> <li>3. a sprinkler supply</li> </ol> <p>As per locations indicated on attached plan.</p> <p>It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.</p> <p>DMF advised this matter is going through the process.</p> <p>GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.</p> <p>PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.</p> <p>GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]</p> <p>PMI 342 issued to take design forward for costing.</p> <p>GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12<sup>th</sup> March 2015.</p> <p>GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.</p>	

			12/03/2015 19/03/2015	DH noted that the retailer is doing their own warrant applications. GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015 19/02/2015 26/02/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. As above	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015  05/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works. PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters. PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss. PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed. PM advised that he had informally heard that the shelters will be available from April. PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.	

3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	09/02/2015	Relocate lighting column to avoid bus stop.  The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.	
			12/02/2015	PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.	
			19/02/2015	PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.	
			26/02/2015	PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.	
			05/03/2015	PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.	
			12/03/2015	PM advised that an amendment would be advised via a separate PMI.	
			19/03/2015	It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.	
3358	PMI 337 -	Pull down beds in NCH	09/02/2015	The Board request a quotation for enabling works to facilitate the installation of pull down beds throughout ward areas in the NCH. The work scope, as set out in the attached table, varies by location and involves three items: * Removal of wall mounted parent light, including isolating wiring and making good the wall (98no) * Relocation of switched fuse spur for hoist (14 no) * Installation of pattressing to support fold-down beds in locations previously not strengthened. This can be surface fixed as the bed has a back panel which will conceal the pattress (14 no)	
			12/02/2015	GW advised that this item is being priced up.	
			19/02/2015	Pricing ongoing.	
			26/02/2015	GW advised that he would formalise the costs later that day	
			05/03/2015	GW advised that the cost had been uploaded on 27/02. DH advised that resource is currently available and he would liaise with MM to progress.	
			12/3/2015	DH agreed to progress this item	
			19/03/2015	Agreed this item should be closed as covered under CE 083	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building.	
			12/02/2015	GW advised this is WIP to obtain costs.	
			19/02/2015	Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution.	

			26/02/2015	GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL requested that the programme be discussed with KC.	
			05/03/2015	DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.	
			12/03/2015	DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.	
			19/03/2015	It was noted that costs are awaited.	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015	<p>The Board request a quotation to undertake the following works:</p> <p><b>HOW-002: Interview/Sitting Room</b></p> <p>Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).</p> <p><b>HOW-028: Charge Nurse Office</b></p> <p>Hot and cold water supplies (or cold only) to proposed sink.</p> <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> <p>Fit-out will be undertaken by others including electrical and mechanical installation but final connections/commissioning will be subject to BMCE checks/approval.</p>	
			12/02/2015	Please provide a programme for the works.	
			19/02/2015	GW advised costs will be provided asap.	
			26/02/2015	Cost still being prepared by BM, expected 24/02/2015.	
				GW advised that the cost had been uploaded to Sypro on 24/02/2015. Board to confirm the way forward.	
			05/03/2015	PM agreed to liaise with HG. DP advised that HG had enquired about the timescales and that the info provided was only indicative.	
			12/03/2015	DH advised that there had been a meeting on site with CGrindlay and the mechanical aspects had been reviewed. CG suggested that could deal with changes fairly easily. HG is in discussion with the Cancer Trust to get confirmation that they will fund the changes.	
			19/03/2015	GW noted that a Building Warrant will be required for these works. GW noted that revised costs had been uploaded. DH noted that there was no requirement for a water heater as both hot and cold water was to be installed.	

3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015.</p> <p>Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</p> <p>It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p> <p>It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31<sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31<sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.</p> <p>DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.</p>	

3392	PMI 346	Starkstrom Pendants – accessories and DVI sockets	<p>17/02/2015</p> <p>19/02/2105</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>The Board require the immediate installation of all pendant accessories and completion of wiring to DVI sockets for all Starkstrom pendants.</p> <p>Delivery commences 20/02/2015 and next week, all works should be complete by early March 2015.</p> <p>DP advised that the delivery had been received and work ongoing and fitting out the pendant has been started. It was noted that JMc has advised that some of the users what the pendants kitted out differently. DP suggested that there should be a joint meeting with Strakstrom. PM advised that instructions should only be provided to BMCL from PM /DH. DP advised that BMCL were trying to accommodate the change to save on double working. PM agreed to liaise with JMcG in the first instance.</p> <p>PM noted that a meeting had been scheduled to take place on 10/03/2015. JMc would provide the 'wish list' for discussion/agreement. PM would provide a PMI to confirm the way forward.</p> <p>DP advised that BMCL have clarity about what JMcG is asking for but JMcG needs to be asked to place the items so that Mercury can do the wiring. Starkstrom are to confirm some items i.e. hanging of Vacsac</p> <p>Item was agreed this item was closed. Cross reference PMI 361.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p>	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p>	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with</p>	

			19/03/2015	NHS re number of lines is required. GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015  26/02/2015 05/03/2015  12/03/2015  19/03/2015	<p>Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works. GW noted that costs are ongoing. GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter &amp; Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.</p> <p>DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24<sup>th</sup> March 2015. GW agreed to liaise with DR.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015  05/03/2015  12/03/2015  19/03/2015	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p> <p>DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon. DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p> <p>DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p>	

			05/03/2015 19/03/2015	<p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul.</p>	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	05/03/2015 19/03/2015	<p>Please provide cost to change names on fire alarm and nurse call from those currently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc.</p> <p>DP advised that Mercury have some queries on this which are being progressed.</p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	10/03/2015 19/03/2015	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury.</p>	
3482	PMI 356 -	Omission of padded wall covering	10/03/2015 19/03/2015	<p>The Board request that, as agreed, the padded wall covering to the following rooms is omitted and that the associated cost saving is provided: DCFP – 051</p> <p>It was agreed that this item was closed.</p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	10/03/2015 19/03/2015	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement during heat sanitisation of the main level 4 loop.</p> <p>DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building</p>	

				Warrant. DH advised that this matter relates to Patient Safety.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015 19/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed. GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015 19/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.  Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002. GW advised that costs awaited from Mercury	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015 19/03/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002) GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently.	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015 19/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.  Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015. DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on 20/03/2015.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal.	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works.	

3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.	
3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms.	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos.	
3559	PMI 368 -	REVISED ACCESS ROUTE TO ADULT HOSPITAL FROM EXISTING HOSPITAL	24/03/2015	Proposed new pedestrian access route to Adult Hospital main entrance from the existing hospital, to be operational from 7am Monday 30th March 2015. Please open up pedestrian route linking the existing estate to the new main entrance for the Adult Hospital, to be operational from 07.00hrs 30th March 2015. Please complete works to form crossing at A on attached sketch, and complete hoarding along route to north.	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.  In parallel provide cost and timescale, desired completion by end of April 2015.	
3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use.	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14529	CE 077	ANAESTHETIC PENDANT RNW-037	04/03/2015	Please proceed with works to reposition the anaesthetic pendant as set out in PMI 330 & 351.	20/03/2015
14531	CE 078	Blood Fridges	04/03/2015	Installation of digiloks and shelves as set out in PMI 341 / 350.	20/03/2015
14533	CE 079	DESIGN FEES FOR WALLACE WHITTLE	04/03/2015	Confirmation on payment of design fees for works set out in PMI's 325, 326 and 338 and confirmed in PMI 342.	20/03/2015
14546	CE 080	SUPPLY & INSTALL SCHNEIDER CONTROL BOXES IN 4 MRI ROOMS	05/03/2015	Supply and installation of Schneider control boxes to switch/dim the MRI Room lights in the following locations: RAG - 109 RAG - 112 RCG - 064 RCF - 024  All as per PMI 336. Funded from Gp 5 equipment budget.	20/03/2015
14547	CE 081	ENERGY CENTRE - TEST SOCKETS	05/03/2015  19/03/2015	The Board request the installation of test sockets within combustion plant flues in the Energy Centre to allow commissioning tests in compliance with the PPC regulations as amended post contract to include permit compliance in the commissioning phase. All as per PMI 339. DP suggested that a CE may be required to cover the boilers as SEPA have moved requirements. Needs to cover generators.	20/03/2015
14548	CE 082	4 @ MRI CONTROL ROOMS - IPS OUTLETS	05/03/2015	The Board confirm the requirement for and installation of 2 @ twin IPS rated OUT010 outlets in each MRI Control Room (4 No.) and 1 @ twin IPS rated OUT010 in corridor adjacent to the Wave Guide. Works as priced under PMI345. Funded from Group 5 equipment budget.	20/03/2015
14652	CE 083	CHILDREN'S HOSPITAL - PULL DOWN BEDS	13/03/2015 19/03/2015	Please proceed immediately with works as described in PMI 337. FS advised that BMCL will progress the works however noted that BMCL will have to pull their electrical resource of other matters to remove the lights.	20/03/2015
14653	CE 084	PHASE 3A DEMOLITION WORKS - ADDITIONAL BUILDINGS	13/03/2015  19/03/2015	Please demolish and remove from site the additional buildings as part of your demolition contract; a) out-patients, b) therapies and c) accident and emergency and all associated sundry structures and immediate hard landscaping, all as priced. GW requested confirmation as to how the information is to be uploaded. GW has emailed DR and confirmation is awaited.	23/03/2015
14714	CE 085	NSGH Basement - Estates Workshop Fit-out Design costs	24/03/2015	Confirmation of design fees for the works as established through PMI 343. The agreed costs are [REDACTED] inclusive of OH+P but excluding VAT.	25/03/2015
14721	CE 086	ADULT HOSPITAL LEVEL 4 - ADD SERVICES ROOM HOW-208	25/03/2015	Confirm proceed with works to install services and drainage connections as priced with amendments in PMI 340  Quotation confirmed as [REDACTED] inclusive of OH+P but excluding VAT.	25/03/2015

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMCL so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) **DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) **DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) **FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan.(19/03/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) **DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015.(19/03/2015)**

- Renal Water –DH noted that the programme had been received the previous week and shared with FW. There will be a need to keep on top of the programme/works. Some advice had been received from HFS which needed to be worked through. (05/02/2015). Programme agreed, samples to be taken 24/02/2015, 4 week proving period to follow receipt of tests results. (19/02/2015). DH advised that he had received a series of emails the previous evening which were suggesting that the NCH could not be moved into as planned. DH understood that there may be a failure which is getting re-sterilised and retested. (05/03/2015) DP noted that there had been a high count at NCH therefore retest carried out and at Labs. DP noted that 1 outlet had also been changed. DH advised that he understood that the outlet was having remedial works which was concerning and that the NHS needed to understand what works are being done retesting, etc. (12/03/2015) DHG advised that everything appeared to be ongoing. There had been some remedial works to panel 691 as there had been some leaking of joints. There was now a suggestion that a four week proving period needed to be restarted. DP advised that he had checked the regs which advised that works can be carried out during validation with no need to restart the four week proving period. (19/03/2015)
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015)
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015)
- Warrant applications – AF suggested that a meeting is held with Building Control so can agree how to deal with warrant applications going forward i.e. needed for additional data & power, laundry, retail units, workshop, etc. Pre-meet with BMCL and NHS to be organized so can identify all the potential warrants (12/03/2015) DP advised that GB has prepared a list of the required Building Warrants. PM was requested to confirm that there are no additions to the GB list. PM to provide BMCL with a PMI for the Building Warrant applications. BMCL to keep progressing with the works in the interim (19/03/2015).
- Decontamination washers – DH advised that there may be an issue re the electrical install and may need some BMCL assistance. (19/03/2015)
- Blood fridges – DH noted that reps are looking for a proving of the temp and that DW is assisting with this matter (19/03/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1252

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 01/04/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW. PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p> <p>DL and PM to discuss</p>	

A51679245

24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p> <p>26/03/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation.</p> <p>We are still awaiting official notification but we are putting together contingency plans never the less.</p> <p>This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex.</p> <p>DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works.</p> <p>DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</p> <p>DP advised that works are progressing ok. LM and JM are both advising that things are working ok and both appear to be working together to overcome any issues.</p>	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015 26/03/2015</p>	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours.</p> <p>Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p>PM advised that cost is awaited so CE can be issued.</p> <p>GW advised that the costs would be provided later that day.</p> <p>GW noted that Andy had advised that he had discussed this matter with PM. GW to follow-up discussion with Andy.</p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	<p>BMCE have recieved numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.</p> <p><i>Text from prev Notes:</i></p> <p><i>DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and</i></p>	

being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 01/04/2015

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015	The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.	
			26/02/2015	FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .	
			05/03/2015	PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .	
			12/03/2015	FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.	
			19/03/2015	FS suggested that there was a clearer understanding of the matter on the basis of the survey results for	

A51679245

			26/03/2015	<p>levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level 1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p> <p>FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7<sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattressing issue and PM would provide this to DR for discussion with GW.</p>

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 01/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p>	

A51679245

				<p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p>	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed	
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.	
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.	
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.	
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.	
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be	

			<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.</p> <p>GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.</p> <p>PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.</p>	
3251	PMI 321	NCH Theatres 109 & 114	<p>07/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>The Board request a quotation to retrospectively, post handover, install infrastructure cabling and associated hardware for image viewing in NCH Theatres 109 &amp; 114. The cabling should match that previously installed to all other theatres.</p> <p>DP advised that James is working on providing the costs to the NHS</p> <p>AF advised that he had spoken to EMcl re timeous provision of info to BMCL. AF noted that the areas where work was to be carried out had been undertaken. DL enquired about the alternate solution and impact on warranties.</p> <p>GW advised that the cost had been uploaded to Sypro on 28/01</p> <p>DL advised that a decision is anticipated at the beginning of March – DL provided an overview of the current status.</p> <p>PM advised that the Project Team were still waiting on the Board to confirm the way forward. DL advised that there is a meeting with the Users planned in March 2015. NHS to confirm way forward. GW advised that cost had been uploaded to Sypro. DP advised that Starkstrom currently have people on site therefore it would be beneficial to instruct this work asap before they finish up on site.</p> <p>DH advised that the NHS were awaiting formal confirmation that YCF will fund the greater works /OR1 and that the NHS were unlikely to go ahead with this item.</p> <p>DH noted that this matter needed to be formally closed. DL is awaiting confirmation from YCC that they will be funding the greater works/OR1 and when confirmed that NHS will cancel this PMI.</p> <p>It was noted that this PMI is to be cancelled as YCC have agreed to fund OR1.</p>	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	<p>14/01/2015</p>	<p>Grocery Storage Unit</p> <p>Please provide quotation for the installation of the following:</p> <ol style="list-style-type: none"> <li>63amp three phase electrical supply</li> <li>a ventilation stub</li> <li>a sprinkler supply</li> </ol> <p>As per locations indicated on attached plan.</p>	

			<p>15/01/2015 It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.</p> <p>22/01/2015 DMF advised this matter is going through the process.</p> <p>29/01/2015 GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.</p> <p>05/02/2015 PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.</p> <p>12/02/2015 GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]</p> <p>19/02/2015 PMI 342 issued to take design forward for costing.</p> <p>26/02/2015 GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12<sup>th</sup> March 2015.</p> <p>05/03/2015 GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.</p> <p>12/03/2015 DH noted that the retailer is doing their own warrant applications.</p> <p>19/03/2015 GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.</p> <p>26/03/2015 GW advised that he had received the drawing for the mop wash. PM suggested that this item had been on the tracker a long time. GW advised that GB had some queries to resolve before drawing could be prepared. The design didn't start until 19<sup>th</sup> Feb 2015. Design has been marked up by CGrindlay &amp; Mercury. Final design expected 27/03/2015 and thereafter BMCL will cost up. GW noted that BMCL no longer have designers that they can use freely as designers moved onto to other projects.</p>	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	<p>14/01/2015 Newsagent Storage Unit Please provide quotation for the installation of the following:</p> <ol style="list-style-type: none"> <li>1. 63amp single phase electrical supply</li> <li>2. a ventilation stub</li> <li>3. a sprinkler supply</li> </ol> <p>As per locations indicated on attached plan.</p> <p>15/01/2015 See above</p> <p>19/02/2015 PMI 342 issued to take design forward for costing.</p> <p>26/02/2015 As above</p>	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	<p>30/01/2015 Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.</p> <p>The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.</p>	

			<p>05/02/2015 Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.</p> <p>12/02/2015 GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.</p> <p>19/02/2015 PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.</p> <p>26/02/2015 PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.</p> <p>05/03/2015 PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015</p> <p>12/03/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.</p> <p>19/03/2015 PM advised that he had informally heard that the shelters will be available from April.</p> <p>PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.</p> <p>26/03/2015 PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015 Relocate lighting column to avoid bus stop.</p> <p>12/02/2015 The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>19/02/2015 PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>26/02/2015 PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>05/03/2015 PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>12/03/2015 PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>19/03/2015 PM advised that an amendment would be advised via a separate PMI.</p> <p>It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a</p>	

			26/03/2015	<p>further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p>	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015  26/02/2015  05/03/2015  12/03/2015  19/03/2015 26/03/2015	<p>The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p> <p>GW advised this is WIP to obtain costs.</p> <p>Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution.</p> <p>GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</p> <p>DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>It was noted that costs are awaited.</p> <p>GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p>	
3362	PMI 340 -	Changes to HOW-002 and HOW-028	10/02/2015	<p>The Board request a quotation to undertake the following works:</p> <p><b>HOW-002: Interview/Sitting Room</b></p> <p>Provide electrical supply for downlighters within fixed shelving unit (not to be linked to BMS).</p> <p><b>HOW-028: Charge Nurse Office</b></p> <p>Hot and cold water supplies (or cold only) to proposed sink.</p> <ul style="list-style-type: none"> <li>• Drainage connection to proposed sink</li> <li>• Power supply to instantaneous water heater (if cold water only supplied)</li> <li>• Connection for additional small power</li> <li>• Connection for additional downlighter within fixed shelving unit</li> </ul> <p>Fit-out will be undertaken by others including electrical and mechanical installation but final</p>	

			<p>connections/commissioning will be subject to BMCE checks/approval.</p> <p>12/02/2015 19/02/2015 26/02/2015</p> <p>05/03/2015 12/03/2015 19/03/2015 26/03/2015</p>	<p>Please provide a programme for the works. GW advised costs will be provided asap. Cost still being prepared by BM, expected 24/02/2015. GW advised that the cost had been uploaded to Sypro on 24/02/2015. Board to confirm the way forward. PM agreed to liaise with HG. DP advised that HG had enquired about the timescales and that the info provided was only indicative. DH advised that there had been a meeting on site with CGrindlay and the mechanical aspects had been reviewed. CG suggested that could deal with changes fairly easily. HG is in discussion with the Cancer Trust to get confirmation that they will fund the changes. GW noted that a Building Warrant will be required for these works. GW noted that revised costs had been uploaded. DH noted that there was no requirement for a water heater as both hot and cold water was to be installed.</p> <p><b>It was agreed this item could be closed as is covered by a CEN. (CE 086)</b></p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p><b>DP advised that the design is due to be provided imminently.</b></p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015 19/02/2015 26/02/2015</p>	<p>Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015. Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued. It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must</p>	

			05/03/2015	guarantee that the 31 <sup>st</sup> March deadline will be achieved. GW advised that the original costs were based on BMCL aiming for 31 <sup>st</sup> March completion not guaranteeing 31 <sup>st</sup> March completion. A guaranteed 31 <sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.	
			12/03/2015	It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31 <sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31 <sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.	
			19/03/2015	DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.	
			26/03/2015	DP advised that some issues had been overcome/resolved.	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	19/02/2015	The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.	
			26/02/2015	DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.	
			05/03/2015	GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.	
			12/03/2015	DH advised that he understood the works were being carried out. BMCL was to identify any “additional” works which are attributed to the NHS.	
			19/03/2015	GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.	
			26/03/2015	DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.	
			26/02/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.	
			05/03/2015	PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the “base number” i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .	
			12/03/2015	GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of ‘additional’ lines is unchanged and discussion/agreement with NHS re number of lines is required.	

			19/03/2015	GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.	
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015	Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.	
			26/02/2015	The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.	
			05/03/2015	GW noted that costs are ongoing. GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though	
			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015	The Board confirm that the additional electrical works required for the Paragon installation to NCH ED & Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328	
			05/03/2015	DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.	
			12/03/2015	DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.	
			19/03/2015	DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for	

Page 1265

			26/03/2015	this item. DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015   		

			19/03/2015  26/03/2015	<p>* RENW - 026 * RENW - 030 * RENW - 032</p> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement during heat sanitisation of the main level 4 loop.</p> <p>DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety.</p> <p>DP advised that he would get the works progressed. DH advised that cost info is still to be provided.</p>	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015 19/03/2015  26/03/2015	<p>The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 &amp; 102) to allow 1000mm servers to be installed.</p> <p>GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.</p> <p>DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury.</p>	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015  19/03/2015 26/03/2015	<p>Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 &amp; 2.</p> <p>Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.</p> <p>GW advised that costs awaited from Mercury</p> <p>FS advised that the light removal is due to commence 27/03/2015</p>	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015  19/03/2015  26/03/2015	<p>The Board request a quotation and high level programme for the M&amp;E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings.</p> <p>Works to include:</p> <ul style="list-style-type: none"> <li>* Additional data, power and HDMI outlets to multiple rooms and additional domestic hot &amp; cold water supplies and drainage connections in:</li> <li>- Patent (school) room (SCH-077)</li> <li>- Recreation Lounge (SCH - 002)</li> </ul> <p>GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently.</p> <p>DH suggested visiting the site with MRoss. A further review had been carried out and it was appreciated that the TCT contractor has undertaken works in 1 room. DH will provide feedback and amend the scope as necessary.</p>	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	<p>Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.</p> <p>Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.</p>	

			19/03/2015 26/03/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on 20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015. Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015 26/03/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal. DH noted that he had been advised that the works have been done.	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015 26/03/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install. DP advised that Starkstrom are working this up – Starkstrom have been advised to finish works in 361 before commencing any other works.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015 26/03/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works. DH advised that Toshiba are to receive confirmation from Japan re 56" monitor and reinstall of heads. Cost awaited from Starkstrom to change pendants. DH suggested that the theatre could be used as a hybrid in the interim but it couldn't be used as a general theatre however he suspected that the users would not agree with this. DH suggested that there may be a work-round by using an alternate theatre. DH was requested to provide DL with the contact details for the Toshiba MD. DP advised that in relation to Starkstrom a cost for the delivery and installation of every pendant was anticipated to be received later that day. A programme for the install works is awaited. DL advised that the Board needed to take form a position on 27/03/2015 and that DL needed to know the implications for that area before cop that day (26/03/2015).	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015 26/03/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works.	
3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015 26/03/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms. It was noted that an indication of the timescale was to be identified. GB and PM to have a site visit. PM to liaise with MM re when service is to start.	

3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015	<p>Please replace broken window to this room.</p> <p>The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos.</p> <p>FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off.</p>	
3559	PMI 368 -	REVISED ACCESS ROUTE TO ADULT HOSPITAL FROM EXISTING HOSPITAL	24/03/2015  26/03/2015	<p>Proposed new pedestrian access route to Adult Hospital main entrance from the existing hospital, to be operational from 7am Monday 30th March 2015.</p> <p>Please open up pedestrian route linking the existing estate to the new main entrance for the Adult Hospital, to be operational from 07.00hrs 30th March 2015. Please complete works to form crossing at A on attached sketch, and complete hoarding along route to north.</p> <p>FS advised that he had received feedback from WSP that it is a non-commissioned crossing so only tactile paving is required.</p>	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015	<p>Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings.</p> <p>Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.</p>	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015	<p>Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.</p> <p>In parallel provide cost and timescale, desired completion by end of April 2015.</p>	
3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015	<p>Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use.</p> <p>It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design.</p>	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
		NONE			

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMCL so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) **GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) **FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015)**

- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursor low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DH advised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015) FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan. (19/03/2015) **It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) **DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) **FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015)**
- Decontamination washers – DP agreed to progress the remedial works to the 'drips' at the washers. (26/03/2015)
- Langlands Drive – PM advised that the roadway is to be scrapped as previously discussed. Any issues that are discovered should be flagged to PM immediately who will visit the area asap thereafter. GW suggested that PMcG was concerned that the levels don't work therefore when scrape issues would be identified. (26/03/2015)
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015)

- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as a record of the works that BMCL needed to undertake. (26/03/2015)
- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1272

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 08/04/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p> <p>DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation. We are still awaiting official notification but we are putting together contingency plans never the less. This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex. DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works. DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</p> <p>DP advised that works are progressing ok. LM and JM are both advising that things are working ok and both appear to be working together to overcome any issues.</p> <p>DP advised that currently there were no issues. BMCL have been doing short orders. A short order would now need to be done to FNS and GW advised this had been done. DP suggested that this item should remain open until the training has been provided. DH noted that LM is working through the IQ and Sign-off.</p>	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015 26/03/2015</p> <p>02/04/2015</p>	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours. Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p>PM advised that cost is awaited so CE can be issued.</p> <p>GW advised that the costs would be provided later that day.</p> <p>GW noted that Andy had advised that he had discussed this matter with PM. GW to follow-up discussion with Andy.</p> <p>GW noted that the cost was circa [REDACTED]. GW advised that this item could be closed.</p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	BMCE have received numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.	

			<p>Text from prev Notes:  DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted as contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)</p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p> <p>GW advised that he had uploaded all the documentation to Sypro. BMCL are awaiting confirmation as to way forward/what works have to be carried out. FS noted that there will be items that will be difficult to obtain by 24<sup>th</sup> April i.e. doors. PM agreed to discuss with DL.</p> <p>PM advised that a meeting is being arranged and it had been agreed to filter out superfluous items. In general it is thought that the primary issues are in the ensuites.</p> <p>GB advised that a meeting to discuss the User comments had been held, case had been put forward, noted that visit to Skye House had been undertaken and brief prepared. A PMI was then received which instructed the way forward and install is as per PMI. Since this time users have come and requested further changes. BMCL have looked at easy fixes. Predominantly the en-suites need to be anti-lig. It had been agreed to disagree re the background. The PMI did not refer to the RFI and BMCL followed the PMI. PM advised that he proposed to confirm the NHS requirements. GB advised that MM had suggested that the dept cannot open until the works are finished and that the NCH patients are due to move in June. AF advised that BMCL would prepare a programme for the works so that BMCL can understand if can guarantee that the works can be complete before the NCH moves.</p>	
2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	<p>17/03/2015</p> <p>Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20<sup>th</sup> March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23<sup>rd</sup> April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021</p> <p>19/03/2015</p> <p>GW advised that BMCL are awaiting confirmation from the NHS re the way forward. AF suggested that BMCL should carry out trial digs so it can be identified if there is anything of consequence.</p> <p>02/04/2015</p> <p>Agreed this item should be closed as PMI 365 issued.</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p>	

Page 1275

				<p>PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>26/03/2015</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>02/04/2015</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
24650	BMCE-EWN-000155	Anticipated completion date of works on PMI 347 Radio Nuclide drainage	03/04/2015	Following receipt of the programme from Crawford plumbing, works are due to commence Tuesday 7th April for 6 weeks. Therefore works will not be complete until w/c 18th May 15	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 08/04/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	<p>19/02/2015</p> <p>26/02/2015</p>	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the patress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-</p>	

A51679245

			05/03/2015	<p>off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p>
			12/03/2015	<p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.</p>
			19/03/2015	<p>FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p>
			26/03/2015	<p>FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7<sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattressing issue and PM would provide this to DR for discussion with GW.</p>

			02/04/2015	FS advised that further fittings had been agreed and were due on site on 03/04/2015 – FS would double check that there was no delay to the delivery. PM advised that Lincor is back on site and he understood that progress is ongoing. Lincor have their own PM looking after the works on site. PM advised that it would be useful to understand how the laminate will be fixed to the stud. GW advised that he had not received any Lincor cost information nor had a discussion with DR. PM advised that he would provide the cost info asap.	
24641	NHS EW 057	ADULT HOSPITAL STRUCTURAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 08/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re	

A51679245

			<p>services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermott to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>19/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work</p>	
--	--	--	--	--

			19/03/2015	content and what is being done. GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.	
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.	
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
			22/01/2015	DMF advised this matter is going through the process.	
			29/01/2015	GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.	
			05/02/2015	PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.	
			12/02/2015	GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12 <sup>th</sup> March 2015.	
			05/03/2015	GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.	
			12/03/2015	DH noted that the retailer is doing their own warrant applications.	
			19/03/2015	GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.	
			26/03/2015	GW advised that he had received the drawing for the mop wash. PM suggested that this item had been on the tracker a long time. GW advised that GB had some queries to resolve before drawing could be prepared. The design didn't start until 19 <sup>th</sup> Feb 2015. Design has been marked up by CGrindlay & Mercury. Final design expected 27/03/2015 and thereafter BMCL will cost up. GW noted that BMCL no longer have designers that they can use freely as designers moved onto to other projects.	
			02/04/2015	GB advised that the design had been done and is out for costing. DP suggested that the cost would be available soon. The works should be more straight forward than the likes of	

				pharmacy.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015 19/02/2015 26/02/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. As above	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015  05/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works. PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters. PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss. PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed. PM advised that he had informally heard that the shelters will be available from April. PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now. PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.	

			<p>05/03/2015 requested that the programme be discussed with KC.</p> <p>12/03/2015 DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>19/03/2015 It was noted that costs are awaited.</p> <p>26/03/2015 GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>02/04/2015 GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>19/02.2015 Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>26/02/2015 GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>05/03/2015 GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>12/03/2015 DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>19/03/2015 DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>26/03/2015 DP advised that the design is due to be provided imminently.</p> <p>02/04/2015 DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015 Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015.</p> <p>19/02/2015 Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</p> <p>26/02/2015 It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not</p>	

			<p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p> <p>It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31<sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31<sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.</p> <p>DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.</p> <p>DP advised that some issues had been overcome/resolved.</p> <p>FS advised that he had provided a note the previous night with an update on the survey works for wardview. FS did not see any reason why the data/power works for the wardview could not be completed by the target date. DH noted that there is an issue re pharmacy i.e. they need to bring drugs on site early to test the robot however cant test the robot as there is no power. There was a Mercury/BMCL debate re whether needs a new distribution board. DP acknowledged that there had been a breakdown in progressing this but works are now underway to get the sketch signed off by WW and the distribution board purchased and delivered to site. It had been advised that there is a requirement for 14 additional data and 10 double powersockets which are not on the PMI. DP advised that Mercury had been advised to order up what was required and agreement re the additional items can be reached thereafter.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p> <p>DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.</p> <p>GW advised that he had a cost for the works. The costs had been split into NHS and non NHS works – the NHS works cost was circa [REDACTED]. DP advised that BMCL are continuing to progress with a programme which stays ahead of the ABrennan programme. FS advised that Crawford had noted</p>	Cross ref PMI 376

				that there is 4 weeks of work. DH advised that 4 weeks of works presents a problem. DP suggested that BMCL and NHS meet w/c 06/04/2015 so can identify if works can be done to enable to disruption to the dept opening – agree sequence of works. DP advised that BMCL will identify if any materials need to be ordered which may have a long lead time.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015  26/02/2015  05/03/2015  12/03/2015  19/03/2015  26/03/2015  02/04/2015	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the “base number” i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of ‘additional’ lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the ‘extra’ lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p>	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015  26/02/2015 05/03/2015	<p>Completion of Group 5 rooms in main Imaging Departments.</p> <p>The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.</p> <p>GW noted that costs are ongoing.</p> <p>GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though</p>	

			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
			02/05/2015	DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would need to be asked to confirm what works he had done.	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015	The Board confirm that the additional electrical works required for the Paragon installation to NCH ED & Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328	
			05/03/2015	DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.	
			12/03/2015	DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.	
			19/03/2015	DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.	
			26/03/2015	DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.	
			02/04/2015	DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.	
				This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p>	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>Please provide cost to change names on fire alarm and nurse call from those currently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc.</p> <p>DP advised that Mercury have some queries on this which are being progressed.</p> <p>GW advised that BMCL had a preliminary cost from Mercury of [REDACTED]. GW would review this costs and confirm to the NHS asap.</p> <p>PM noted that this matter would likely become a CE.</p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	<p>10/03/2015  19/03/2015 26/03/2015 02/04/2015</p>	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury. GW noted that cost awaited from Mercury.</p> <p>DP advised that he would discuss with EMCL in order to push on the availability of the cost info.</p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	<p>10/03/2015</p>	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement</p>	

			19/03/2015	during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety.	
			26/03/2015	DP advised that he would get the works progressed. DH advised that cost info is still to be provided.	
			02/04/2015	DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed.	
			19/03/2015	GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.	
			26/03/2015	DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.	
				Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.	
			19/03/2015	GW advised that costs awaited from Mercury	
			26/03/2015	FS advised that the light removal is due to commence 27/03/2015	
			02/04/2015	FS advised that the light removal works was 50% complete however would be fully complete by cop 03/04/2015.	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002)	
			19/03/2015	GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently.	
			26/03/2015	DH suggested visiting the site with MRoss. A further review had been carried out and it was appreciated that the TCT contractor has undertaken works in 1 room. DH will provide feedback and amend the scope as necessary.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.	
				Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	
			19/03/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on	

			26/03/2015  02/04/2015	20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015. Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015. GW advised that the cost had been uploaded to Sypro earlier that day. PM agreed to provide a CE. DP advised that he had asked Starkstrom to provide regular updates for DP and DP would forward these to PM. PM advised that Starkstrom should ignore any instruction(s) from Users, etc and to flag up any issues asap.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015  26/03/2015 02/04/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal. DH noted that he had been advised that the works have been done. It was agreed this item could be closed	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015  26/03/2015 02/04/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install. DP advised that Starkstrom are working this up – Starkstrom have been advised to finish works in 361 before commencing any other works. GW noted that costs are awaited.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015  26/03/2015  02/04/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works. DH advised that Toshiba are to receive confirmation from Japan re 56" monitor and reinstall of heads. Cost awaited from Starkstrom to change pendants. DH suggested that the theatr could be used as a hybrid in the interim but it couldn't be used as a general theatre however he suspected that the users would not agree with this. DH suggested that there may be a work-round by using an alternate theatre. DH was requested to provide DL with the contact details for the Toshiba MD. DP advised that in relation to Starkstrom a cost for the delivery and installation of every pendant was anticipated to be received later that day. A programme for the install works is awaited. DL advised that the Board needed to take form a position on 27/03/2015 and that DL needed to know the implications for that area before cop that day (26/03/2015). GW noted that costs are awaited.	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015  26/03/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works.	

3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015  26/03/2015  02/04/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms. It was noted that an indication of the timescale was to be identified. GB and PM to have a site visit. PM to liaise with MM re when service is to start.  GB advised that further to a visit to site to review the proposed works the costs are now being prepared.	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off.  FS advised that the rep has confirmed to be on site w/c 13/04/2015	
3559	PMI 368 -	REVISED ACCESS ROUTE TO ADULT HOSPITAL FROM EXISTING HOSPITAL	24/03/2015  26/03/2015  02/04/2015	Proposed new pedestrian access route to Adult Hospital main entrance from the existing hospital, to be operational from 7am Monday 30th March 2015. Please open up pedestrian route linking the existing estate to the new main entrance for the Adult Hospital, to be operational from 07.00hrs 30th March 2015. Please complete works to form crossing at A on attached sketch, and complete hoarding along route to north. FS advised that he had received feedback from WSP that it is a non-commissioned crossing so only tactile paving is required.  It was agreed this item could be closed	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.  Cross ref PMI 333	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015    02/04/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.  In parallel provide cost and timescale, desired completion by end of April 2015.  It was noted that it is WIP to price the works	

3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015  02/04/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use. It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design. GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type.	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres.	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015	Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.  Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.	
3609	PMI 374	ADULT HOSPITAL OUT PATIENTS DEPT LEVEL 1 - CONSULTING ROOM 063	07/04/2015	Please carefully remove CUP 1008 from room and make all finishes good.  Please carefully remove CUP 1008 from room and make all finishes good. CUP 1008 to be placed in basement storage room for spare materials. Please confirm cost for removal prior to 20th April 2015. Refere attached drawing.	
3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015	Please proceed and prepare base for 2 No ATM's as per attached drawing.  Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015	Proceed with works identified under PMI 347.  The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
		NONE			

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) **PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) **FS advised that the tank was due on site that day (02/04/2015)**

- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DH advised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015) FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan. (19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) **It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) **DP Advised that he understood that all the works had been carried out (02/04/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) **FS agreed to provide an update to PM later that day (02/04/2015)**
- Decontamination washers – DP agreed to progress the remedial works to the 'drips' at the washers. (26/03/2015) **DP advised that he understood the drips had all been fixed. (02/04/2015)**

- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015)
- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as a record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015)
- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015)
- Panel (which had come loose) – PM advised that the NHS have had to do a datix report on the incident. AF advised that there is an operative onsite to check panels – the weather conditions the previous day had not allowed for checks – the works need to be carried out from a chair and it had been too windy. AF provided an overview of the panel make-up/fixing. AF noted that the extent of the issue was not known at this time and all the panels would be checked as a matter of urgency. AF had asked the French manufacturer to look at the panels. There are no marks on the face of the panel. AF would provide a schedule identifying the order of the checks. DH suggested that the initial focus should be on the faces which sustain the brunt of the weather and which ones have an interface with members of the public. AF noted that a metal panel had also been damaged and a glazed panel PM suggested that the panel is only used in 2 locations (02/04/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015)
- . PAC Screen layout – DP advised that he had got this back (02/04/2015)
- Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015)
- Ultra clean – query has been raised re pressure in that they think it should be balanced and not 35/25.
- Outward opening doors – it was noted that correspondence could not be found which advised that the doors should have been changed and it was acknowledged that it appeared odd. GB noted that the drawing had been signed off as outward facing doors and the doors had been fitted as per drawing. FS agreed to liaise with TDSL to progress this matter – 2 instances are Plaster room adult hospital and 2<sup>nd</sup> floor NCH ARU . (02/04/2015)
- EWD – DH advised that users want to fill basin and cant as there is no way to fit a plug. It was suggested that the sink was as per SHTM. DH was requested to provide the sanitary ware code and BCML would check if the grating could be changed (02/04/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1294

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 15/04/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW. PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works. DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation. We are still awaiting official notification but we are putting together contingency plans never the less. This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex. DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works. DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</p> <p>DP advised that works are progressing ok. LM and JM are both advising that things are working ok and both appear to be working together to overcome any issues.</p> <p>DP advised that currently there were no issues. BMCL have been doing short orders. A short order would now need to be done to FNS and GW advised this had been done. DP suggested that this item should remain open until the training has been provided. DH noted that LM is working through the IQ and Sign-off.</p>	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015 26/03/2015</p> <p>02/04/2015</p>	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours. Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p>PM advised that cost is awaited so CE can be issued.</p> <p>GW advised that the costs would be provided later that day.</p> <p>GW noted that Andy had advised that he had discussed this matter with PM. GW to follow-up discussion with Andy.</p> <p>GW noted that the cost was circa [REDACTED]. GW advised that this item could be closed.</p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	BMCE have received numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.	

			<p>Text from prev Notes:  DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted as contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)</p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p> <p>GW advised that he had uploaded all the documentation to Sypro. BMCL are awaiting confirmation as to way forward/what works have to be carried out. FS noted that there will be items that will be difficult to obtain by 24<sup>th</sup> April i.e. doors. PM agreed to discuss with DL.</p> <p>PM advised that a meeting is being arranged and it had been agreed to filter out superfluous items. In general it is thought that the primary issues are in the ensuites.</p> <p>GB advised that a meeting to discuss the User comments had been held, case had been put forward, noted that visit to Skye House had been undertaken and brief prepared. A PMI was then received which instructed the way forward and install is as per PMI. Since this time users have come and requested further changes. BMCL have looked at easy fixes. Predominantly the en-suites need to be anti-lig. It had been agreed to disagree re the background. The PMI did not refer to the RFI and BMCL followed the PMI. PM advised that he proposed to confirm the NHS requirements. GB advised that MM had suggested that the dept cannot open until the works are finished and that the NCH patients are due to move in June. AF advised that BMCL would prepare a programme for the works so that BMCL can understand if can guarantee that the works can be complete before the NCH moves.</p>	
2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	<p>17/03/2015</p> <p>Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20<sup>th</sup> March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23<sup>rd</sup> April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021</p> <p>19/03/2015</p> <p>GW advised that BMCL are awaiting confirmation from the NHS re the way forward. AF suggested that BMCL should carry out trial digs so it can be identified if there is anything of consequence.</p> <p>02/04/2015</p> <p>Agreed this item should be closed as PMI 365 issued.</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p>	

				<div> <div> PMI 343 – fit out  PMI 347 – Change of materials  PMI 352 – additional electrical sockets  PMI 357 – additional water supplies  PMI 360 – additional power, water and drainage connections </div> <div> Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.   Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360. </div> <div> 26/03/2015  &lt;</div></div>
--	--	--	--	---

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 08/04/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	<p>19/02/2015</p> <p>26/02/2015</p>	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the patress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-</p>	

A51679245

			05/03/2015	<p>off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p>
			12/03/2015	<p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.</p>
			19/03/2015	<p>FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p>
			26/03/2015	<p>FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7<sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattressing issue and PM would provide this to DR for discussion with GW.</p>

			02/04/2015	FS advised that further fittings had been agreed and were due on site on 03/04/2015 – FS would double check that there was no delay to the delivery. PM advised that Lincor is back on site and he understood that progress is ongoing. Lincor have their own PM looking after the works on site. PM advised that it would be useful to understand how the laminate will be fixed to the stud. GW advised that he had not received any Lincor cost information nor had a discussion with DR. PM advised that he would provide the cost info asap.	
24641	NHS EW 057	ADULT HOSPITAL STRUCTURAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 15/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re	

A51679245

			<p>services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermott to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>19/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work</p>	
--	--	--	--	--

			19/03/2015	content and what is being done. GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.	
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.	
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
			22/01/2015	DMF advised this matter is going through the process.	
			29/01/2015	GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.	
			05/02/2015	PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.	
			12/02/2015	GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12 <sup>th</sup> March 2015.	
			05/03/2015	GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.	
			12/03/2015	DH noted that the retailer is doing their own warrant applications.	
			19/03/2015	GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.	
			26/03/2015	GW advised that he had received the drawing for the mop wash. PM suggested that this item had been on the tracker a long time. GW advised that GB had some queries to resolve before drawing could be prepared. The design didn't start until 19 <sup>th</sup> Feb 2015. Design has been marked up by CGrindlay & Mercury. Final design expected 27/03/2015 and thereafter BMCL will cost up. GW noted that BMCL no longer have designers that they can use freely as designers moved onto to other projects.	
			02/04/2015	GB advised that the design had been done and is out for costing. DP suggested that the cost would be available soon. The works should be more straight forward than the likes of	

				pharmacy.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015 19/02/2015 26/02/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. As above	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015  05/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works. PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters. PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss. PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed. PM advised that he had informally heard that the shelters will be available from April. PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now. PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.	

			<p>05/03/2015 requested that the programme be discussed with KC.</p> <p>12/03/2015 DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>19/03/2015 It was noted that costs are awaited.</p> <p>26/03/2015 GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>02/04/2015 GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>19/02.2015 Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>26/02/2015 GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>05/03/2015 GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>12/03/2015 DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>19/03/2015 DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>26/03/2015 DP advised that the design is due to be provided imminently.</p> <p>02/04/2015 DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015 Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015.</p> <p>19/02/2015 Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</p> <p>26/02/2015 It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not</p>	

			<p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p> <p>It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31<sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31<sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.</p> <p>DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.</p> <p>DP advised that some issues had been overcome/resolved.</p> <p>FS advised that he had provided a note the previous night with an update on the survey works for wardview. FS did not see any reason why the data/power works for the wardview could not be completed by the target date. DH noted that there is an issue re pharmacy i.e. they need to bring drugs on site early to test the robot however cant test the robot as there is no power. There was a Mercury/BMCL debate re whether needs a new distribution board. DP acknowledged that there had been a breakdown in progressing this but works are now underway to get the sketch signed off by WW and the distribution board purchased and delivered to site. It had been advised that there is a requirement for 14 additional data and 10 double powersockets which are not on the PMI. DP advised that Mercury had been advised to order up what was required and agreement re the additional items can be reached thereafter.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p> <p>DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.</p> <p>GW advised that he had a cost for the works. The costs had been split into NHS and non NHS works – the NHS works cost was circa [REDACTED]. DP advised that BMCL are continuing to progress with a programme which stays ahead of the ABrennan programme. FS advised that Crawford had noted</p>	Cross ref PMI 376

				that there is 4 weeks of work. DH advised that 4 weeks of works presents a problem. DP suggested that BMCL and NHS meet w/c 06/04/2015 so can identify if works can be done to enable to disruption to the dept opening – agree sequence of works. DP advised that BMCL will identify if any materials need to be ordered which may have a long lead time.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the “base number” i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of ‘additional’ lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the ‘extra’ lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p>	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Completion of Group 5 rooms in main Imaging Departments.</p> <p>The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.</p> <p>GW noted that costs are ongoing.</p> <p>GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though</p>	

			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
			02/05/2015	DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would need to be asked to confirm what works he had done.	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015	The Board confirm that the additional electrical works required for the Paragon installation to NCH ED & Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328	
			05/03/2015	DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.	
			12/03/2015	DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.	
			19/03/2015	DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.	
			26/03/2015	DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.	
			02/04/2015	DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.	
				This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p>	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>Please provide cost to change names on fire alarm and nurse call from those currently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc.</p> <p>DP advised that Mercury have some queries on this which are being progressed.</p> <p>GW advised that BMCL had a preliminary cost from Mercury of [REDACTED]. GW would review this costs and confirm to the NHS asap.</p> <p>PM noted that this matter would likely become a CE.</p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	<p>10/03/2015  19/03/2015 26/03/2015 02/04/2015</p>	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury. GW noted that cost awaited from Mercury.</p> <p>DP advised that he would discuss with EMCL in order to push on the availability of the cost info.</p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	<p>10/03/2015</p>	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement</p>	

			19/03/2015	during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety.	
			26/03/2015	DP advised that he would get the works progressed. DH advised that cost info is still to be provided.	
			02/04/2015	DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed.	
			19/03/2015	GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.	
			26/03/2015	DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.	
				Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.	
			19/03/2015	GW advised that costs awaited from Mercury	
			26/03/2015	FS advised that the light removal is due to commence 27/03/2015	
			02/04/2015	FS advised that the light removal works was 50% complete however would be fully complete by cop 03/04/2015.	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002)	
			19/03/2015	GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently.	
			26/03/2015	DH suggested visiting the site with MRoss. A further review had been carried out and it was appreciated that the TCT contractor has undertaken works in 1 room. DH will provide feedback and amend the scope as necessary.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.	
				Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	
			19/03/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on	

			26/03/2015  02/04/2015	20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015. Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015.  GW advised that the cost had been uploaded to Sypro earlier that day. PM agreed to provide a CE. DP advised that he had asked Starkstrom to provide regular updates for DP and DP would forward these to PM. PM advised that Starkstrom should ignore any instruction(s) from Users, etc and to flag up any issues asap.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015  26/03/2015 02/04/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal. DH noted that he had been advised that the works have been done. It was agreed this item could be closed	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015  26/03/2015 02/04/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install. DP advised that Starkstrom are working this up – Starkstrom have been advised to finish works in 361 before commencing any other works. GW noted that costs are awaited.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015  26/03/2015  02/04/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works. DH advised that Toshiba are to receive confirmation from Japan re 56" monitor and reinstall of heads. Cost awaited from Starkstrom to change pendants. DH suggested that the theatr could be used as a hybrid in the interim but it couldn't be used as a general theatre however he suspected that the users would not agree with this. DH suggested that there may be a work-round by using an alternate theatre. DH was requested to provide DL with the contact details for the Toshiba MD. DP advised that in relation to Starkstrom a cost for the delivery and installation of every pendant was anticipated to be received later that day. A programme for the install works is awaited. DL advised that the Board needed to take form a position on 27/03/2015 and that DL needed to know the implications for that area before cop that day (26/03/2015). GW noted that costs are awaited.	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015  26/03/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works.	

3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015  26/03/2015  02/04/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms. It was noted that an indication of the timescale was to be identified. GB and PM to have a site visit. PM to liaise with MM re when service is to start.  GB advised that further to a visit to site to review the proposed works the costs are now being prepared.	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off.  FS advised that the rep has confirmed to be on site w/c 13/04/2015	
3559	PMI 368 -	REVISED ACCESS ROUTE TO ADULT HOSPITAL FROM EXISTING HOSPITAL	24/03/2015  26/03/2015  02/04/2015	Proposed new pedestrian access route to Adult Hospital main entrance from the existing hospital, to be operational from 7am Monday 30th March 2015. Please open up pedestrian route linking the existing estate to the new main entrance for the Adult Hospital, to be operational from 07.00hrs 30th March 2015. Please complete works to form crossing at A on attached sketch, and complete hoarding along route to north. FS advised that he had received feedback from WSP that it is a non-commissioned crossing so only tactile paving is required.  It was agreed this item could be closed	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.  Cross ref PMI 333	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015    02/04/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.  In parallel provide cost and timescale, desired completion by end of April 2015.  It was noted that it is WIP to price the works	

3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015  02/04/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use. It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design. GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type.	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres.	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015	Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.  Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.	
3609	PMI 374	ADULT HOSPITAL OUT PATIENTS DEPT LEVEL 1 - CONSULTING ROOM 063	07/04/2015	Please carefully remove CUP 1008 from room and make all finishes good.  Please carefully remove CUP 1008 from room and make all finishes good. CUP 1008 to be placed in basement storage room for spare materials. Please confirm cost for removal prior to 20th April 2015. Refere attached drawing.	
3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015	Please proceed and prepare base for 2 No ATM's as per attached drawing.  Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015	Proceed with works identified under PMI 347.  The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14808	CE 087	FIRE ALARM AND NURSE CALL SYSTEM NAME CHANGES	02/04/2015	Please proceed with works set out in PMI 354 to update the new names of wards on the above systems.  The cost of works confirmed as [REDACTED] inclusive of OH+P but exclusive of VAT.	
14869	CE 088	ADULT HOSPITAL THEATRES 5 & 6	13/04/2015	The Board confirm that Brookfield Multiplex should proceed with the works to alter lights and monitoring in THE-120 and THE-124 as set out in PMI 363. Please confirm programme.	
14870	CE 089	HYBRID THEATRE THE-228	13/04/2015	The Board confirm that Brookfield Multiplex should proceed with works to reconfigure pendants in the hybrid theatre as per PMI No. 364.	
14872	CE 090	CHILDREN'S HOSPITAL - GP OUT OF HOURS SERVICE RELOCATION	13/04/2015	The Board confirm Brookfield Multiplex should proceed with the works set out in PMI 366.  Agreed cost of [REDACTED] including OH+P but excluding VAT.	
14873	CE 091	INSTITUTE OVERCLADDING - BUILDING WARRANT & DETAILED DESIGN	13/04/2015	Please proceed with the next stage of work to develop the detailed design for the project and submit and secure a building warrant consent from Glasgow City Council for all the works. Work to include the construction of a sample panel for approval by the Board, location of panel to be confirmed.  Cost confirmed as [REDACTED] inclusive of OH+P but excluding VAT.	
14887	CE 092	THEATRE PENDANT ASSESSORIES	14/04/2015	The Board confirm that Brookfield Multiplex should proceed and install pendant assessories as set out and costed under PMI 361.  Agreed cost [REDACTED] inclusive of OH+P but excluding VAT.	

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) **PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) **FS advised that the tank was due on site that day (02/04/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan.(19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) **It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) **DP Advised that he understood that all the works had been carried out (02/04/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) **FS agreed to provide an update to PM later that day (02/04/2015)**
- Decontamination washers – DP agreed to progress the remedial works to the 'drips' at the washers. (26/03/2015) **DP advised that he understood the drips had all been fixed. (02/04/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) **JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015)**
- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as as record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015)

- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015)
- Panel (which had come loose) – PM advised that the NHS have had to do a datix report on the incident. AF advised that there is an operative onsite to check panels – the weather conditions the previous day had not allowed for checks – the works need to be carried out from a chair and it had been too windy. AF provided an overview of the panel make-up/fixing. AF noted that the extent of the issue was not known at this time and all the panels would be checked as a matter of urgency. AF had asked the French manufacturer to look at the panels. There are no marks on the face of the panel. AF would provide a schedule identifying the order of the checks. DH suggested that the initial focus should be on the faces which sustain the brunt of the weather and which ones have an interface with members of the public. AF noted that a metal panel had also been damaged and a glazed panel PM suggested that the panel is only used in 2 locations (02/04/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015)
- . PAC Screen layout – DP advised that he had got this back (02/04/2015)
- Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015)
- Ultra clean – query has been raised re pressure in that they think it should be balanced and not 35/25.
- Outward opening doors – it was noted that correspondence could not be found which advised that the doors should have been changed and it was acknowledged that it appeared odd. GB noted that the drawing had been signed off as outward facing doors and the doors had been fitted as per drawing. FS agreed to liaise with TDSL to progress this matter – 2 instances are Plaster room adult hospital and 2<sup>nd</sup> floor NCH ARU . (02/04/2015)
- EWD – DH advised that users want to fill basin and cant as there is no way to fit a plug. It was suggested that the sink was as per SHTM. DH was requested to provide the sanitary ware code and BCML would check if the grating could be changed (02/04/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 22/04/2015:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014  08/01/2015 15/01/2015  22/01/2015  29/01/2015  05/02/2015 19/02/2015  26/02/2015  05/03/2015  12/03/2015 19/03/2015  26/03/2015 02/04/2015	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW. PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works. DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation. We are still awaiting official notification but we are putting together contingency plans never the less. This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex. DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works. DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</p> <p>DP advised that works are progressing ok. LM and JM are both advising that things are working ok and both appear to be working together to overcome any issues.</p> <p>DP advised that currently there were no issues. BMCL have been doing short orders. A short order would now need to be done to FNS and GW advised this had been done. DP suggested that this item should remain open until the training has been provided. DH noted that LM is working through the IQ and Sign-off.</p>	
24346	BMCE-EWN-000152	Hai Scribe INS Partition Works	<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015 26/03/2015</p> <p>02/04/2015</p>	<p>The NHS Project Manager for INS and the final user have requested that the works to form the INS Hai-scribe partitions are to be done outwith normal working hours. Please confirm how you wish us to proceed.</p> <p>DP advised that BMCL have carried out the works and now require a CE. PM requested that the cost for the works be provided.</p> <p>PM advised that cost is awaited so CE can be issued.</p> <p>GW advised that the costs would be provided later that day.</p> <p>GW noted that Andy had advised that he had discussed this matter with PM. GW to follow-up discussion with Andy.</p> <p>GW noted that the cost was circa [REDACTED]. GW advised that this item could be closed.</p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	BMCE have received numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.	

			<p>Text from prev Notes:  DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted as contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)</p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p> <p>GW advised that he had uploaded all the documentation to Sypro. BMCL are awaiting confirmation as to way forward/what works have to be carried out. FS noted that there will be items that will be difficult to obtain by 24<sup>th</sup> April i.e. doors. PM agreed to discuss with DL.</p> <p>PM advised that a meeting is being arranged and it had been agreed to filter out superfluous items. In general it is thought that the primary issues are in the ensuites.</p> <p>GB advised that a meeting to discuss the User comments had been held, case had been put forward, noted that visit to Skye House had been undertaken and brief prepared. A PMI was then received which instructed the way forward and install is as per PMI. Since this time users have come and requested further changes. BMCL have looked at easy fixes. Predominantly the en-suites need to be anti-lig. It had been agreed to disagree re the background. The PMI did not refer to the RFI and BMCL followed the PMI. PM advised that he proposed to confirm the NHS requirements. GB advised that MM had suggested that the dept cannot open until the works are finished and that the NCH patients are due to move in June. AF advised that BMCL would prepare a programme for the works so that BMCL can understand if can guarantee that the works can be complete before the NCH moves.</p>	
2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	<p>17/03/2015</p> <p>Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20<sup>th</sup> March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23<sup>rd</sup> April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021</p> <p>19/03/2015</p> <p>GW advised that BMCL are awaiting confirmation from the NHS re the way forward. AF suggested that BMCL should carry out trial digs so it can be identified if there is anything of consequence.</p> <p>02/04/2015</p> <p>Agreed this item should be closed as PMI 365 issued.</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p>	

Page 1320

				<p>PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>26/03/2015</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>02/04/2015</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
24650	BMCE-EWN-000155	Anticipated completion date of works on PMI 347 Radio Nuclide drainage	03/04/2015	Following receipt of the programme from Crawford plumbing, works are due to commence Tuesday 7th April for 6 weeks. Therefore works will not be complete until w/c 18th May 15	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 22/04/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	<p>19/02/2015</p> <p>26/02/2015</p>	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the patress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-</p>	

A51679245

			05/03/2015	<p>off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p>	
			12/03/2015	<p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.</p>	
			19/03/2015	<p>FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p>	
			26/03/2015	<p>FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7<sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattressing issue and PM would provide this to DR for discussion with GW.</p>	

			02/04/2015	FS advised that further fittings had been agreed and were due on site on 03/04/2015 – FS would double check that there was no delay to the delivery. PM advised that Lincor is back on site and he understood that progress is ongoing. Lincor have their own PM looking after the works on site. PM advised that it would be useful to understand how the laminate will be fixed to the stud. GW advised that he had not received any Lincor cost information nor had a discussion with DR. PM advised that he would provide the cost info asap.	
24641	NHS EW 057	ADULT HOSPITAL STRUCTURAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 22/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re	

A51679245

			<p>services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermott to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>19/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work</p>	
--	--	--	--	--

			19/03/2015	content and what is being done. GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.	
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.	
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
			22/01/2015	DMF advised this matter is going through the process.	
			29/01/2015	GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.	
			05/02/2015	PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.	
			12/02/2015	GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12 <sup>th</sup> March 2015.	
			05/03/2015	GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.	
			12/03/2015	DH noted that the retailer is doing their own warrant applications.	
			19/03/2015	GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.	
			26/03/2015	GW advised that he had received the drawing for the mop wash. PM suggested that this item had been on the tracker a long time. GW advised that GB had some queries to resolve before drawing could be prepared. The design didn't start until 19 <sup>th</sup> Feb 2015. Design has been marked up by CGrindlay & Mercury. Final design expected 27/03/2015 and thereafter BMCL will cost up. GW noted that BMCL no longer have designers that they can use freely as designers moved onto to other projects.	
			02/04/2015	GB advised that the design had been done and is out for costing. DP suggested that the cost would be available soon. The works should be more straight forward than the likes of	

				pharmacy.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015  15/01/2015 19/02/2015 26/02/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan. See above PMI 342 issued to take design forward for costing. As above	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015  05/02/2015 12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.  Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works. PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters. PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss. PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed. PM advised that he had informally heard that the shelters will be available from April. PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now. PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.	

			02/04/2015	PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CE for the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW suggested that the masterplan would need to be updated and there would be a design cost incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised that the stances do not work without the kicked out section and a drawing should be issued to GCC telling them what has been done.	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	09/02/2015  12/02/2015  19/02/2015  26/02/2015  05/03/2015  12/03/2015 19/03/2015  26/03/2015	Relocate lighting column to avoid bus stop.  The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing. PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works. PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move. PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works. PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide. PM advised that an amendment would be advised via a separate PMI. It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested. PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015  26/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building. GW advised this is WIP to obtain costs. Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution. GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL	

			<p>05/03/2015 requested that the programme be discussed with KC.</p> <p>12/03/2015 DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>19/03/2015 It was noted that costs are awaited.</p> <p>26/03/2015 GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>02/04/2015 GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>19/02.2015 Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>26/02/2015 GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>05/03/2015 GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>12/03/2015 DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>19/03/2015 DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>26/03/2015 DP advised that the design is due to be provided imminently.</p> <p>02/04/2015 DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p>	
3390	PMI 344	Additional Power & Data	<p>17/02/2015 Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31<sup>st</sup> March 2015.</p> <p>19/02/2015 Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.</p> <p>26/02/2015 It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31<sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not</p>	

			<p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>costed for the works on the basis of completing the works by 31<sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31<sup>st</sup> March deadline will be achieved.</p> <p>GW advised that the original costs were based on BMCL aiming for 31<sup>st</sup> March completion not guaranteeing 31<sup>st</sup> March completion. A guaranteed 31<sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.</p> <p>It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31<sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31<sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.</p> <p>DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.</p> <p>DP advised that some issues had been overcome/resolved.</p> <p>FS advised that he had provided a note the previous night with an update on the survey works for wardview. FS did not see any reason why the data/power works for the wardview could not be completed by the target date. DH noted that there is an issue re pharmacy i.e. they need to bring drugs on site early to test the robot however cant test the robot as there is no power. There was a Mercury/BMCL debate re whether needs a new distribution board. DP acknowledged that there had been a breakdown in progressing this but works are now underway to get the sketch signed off by WW and the distribution board purchased and delivered to site. It had been advised that there is a requirement for 14 additional data and 10 double powersockets which are not on the PMI. DP advised that Mercury had been advised to order up what was required and agreement re the additional items can be reached thereafter.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p> <p>DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.</p> <p>GW advised that he had a cost for the works. The costs had been split into NHS and non NHS works – the NHS works cost was circa [REDACTED]. DP advised that BMCL are continuing to progress with a programme which stays ahead of the ABrennan programme. FS advised that Crawford had noted</p>	Cross ref PMI 376

				that there is 4 weeks of work. DH advised that 4 weeks of works presents a problem. DP suggested that BMCL and NHS meet w/c 06/04/2015 so can identify if works can be done to enable to disruption to the dept opening – agree sequence of works. DP advised that BMCL will identify if any materials need to be ordered which may have a long lead time.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the “base number” i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of ‘additional’ lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the ‘extra’ lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p>	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Completion of Group 5 rooms in main Imaging Departments.</p> <p>The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.</p> <p>GW noted that costs are ongoing.</p> <p>GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though</p>	

			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
			02/05/2015	DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would need to be asked to confirm what works he had done.	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015	The Board confirm that the additional electrical works required for the Paragon installation to NCH ED & Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328	
			05/03/2015	DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.	
			12/03/2015	DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.	
			19/03/2015	DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.	
			26/03/2015	DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.	
			02/04/2015	DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.	
				This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p>	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p>	<p>Please provide cost to change names on fire alarm and nurse call from those currently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc.</p> <p>DP advised that Mercury have some queries on this which are being progressed.</p> <p>GW advised that BMCL had a preliminary cost from Mercury of [REDACTED]. GW would review this costs and confirm to the NHS asap.</p> <p>PM noted that this matter would likely become a CE.</p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	<p>10/03/2015  19/03/2015 26/03/2015 02/04/2015</p>	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury. GW noted that cost awaited from Mercury.</p> <p>DP advised that he would discuss with EMCL in order to push on the availability of the cost info.</p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	<p>10/03/2015</p>	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement</p>	

			19/03/2015	during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety.	
			26/03/2015	DP advised that he would get the works progressed. DH advised that cost info is still to be provided.	
			02/04/2015	DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed.	
			19/03/2015	GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.	
			26/03/2015	DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.	
				Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.	
			19/03/2015	GW advised that costs awaited from Mercury	
			26/03/2015	FS advised that the light removal is due to commence 27/03/2015	
			02/04/2015	FS advised that the light removal works was 50% complete however would be fully complete by cop 03/04/2015.	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002)	
			19/03/2015	GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently.	
			26/03/2015	DH suggested visiting the site with MRoss. A further review had been carried out and it was appreciated that the TCT contractor has undertaken works in 1 room. DH will provide feedback and amend the scope as necessary.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.	
				Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	
			19/03/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on	

			26/03/2015  02/04/2015	20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015. Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015.  GW advised that the cost had been uploaded to Sypro earlier that day. PM agreed to provide a CE. DP advised that he had asked Starkstrom to provide regular updates for DP and DP would forward these to PM. PM advised that Starkstrom should ignore any instruction(s) from Users, etc and to flag up any issues asap.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015  26/03/2015 02/04/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal. DH noted that he had been advised that the works have been done. It was agreed this item could be closed	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015  26/03/2015 02/04/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install. DP advised that Starkstrom are working this up – Starkstrom have been advised to finish works in 361 before commencing any other works. GW noted that costs are awaited.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015  26/03/2015  02/04/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works. DH advised that Toshiba are to receive confirmation from Japan re 56" monitor and reinstall of heads. Cost awaited from Starkstrom to change pendants. DH suggested that the theatr could be used as a hybrid in the interim but it couldn't be used as a general theatre however he suspected that the users would not agree with this. DH suggested that there may be a work-round by using an alternate theatre. DH was requested to provide DL with the contact details for the Toshiba MD. DP advised that in relation to Starkstrom a cost for the delivery and installation of every pendant was anticipated to be received later that day. A programme for the install works is awaited. DL advised that the Board needed to take form a position on 27/03/2015 and that DL needed to know the implications for that area before cop that day (26/03/2015). GW noted that costs are awaited.	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015  26/03/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works.	

3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015  26/03/2015  02/04/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms. It was noted that an indication of the timescale was to be identified. GB and PM to have a site visit. PM to liaise with MM re when service is to start.  GB advised that further to a visit to site to review the proposed works the costs are now being prepared.	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off.  FS advised that the rep has confirmed to be on site w/c 13/04/2015	
3559	PMI 368 -	REVISED ACCESS ROUTE TO ADULT HOSPITAL FROM EXISTING HOSPITAL	24/03/2015  26/03/2015  02/04/2015	Proposed new pedestrian access route to Adult Hospital main entrance from the existing hospital, to be operational from 7am Monday 30th March 2015. Please open up pedestrian route linking the existing estate to the new main entrance for the Adult Hospital, to be operational from 07.00hrs 30th March 2015. Please complete works to form crossing at A on attached sketch, and complete hoarding along route to north. FS advised that he had received feedback from WSP that it is a non-commissioned crossing so only tactile paving is required.  It was agreed this item could be closed	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.  Cross ref PMI 333	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015    02/04/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.  In parallel provide cost and timescale, desired completion by end of April 2015.  It was noted that it is WIP to price the works	

3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015  02/04/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use. It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design. GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type.	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres.	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015	Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.  Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.	
3609	PMI 374	ADULT HOSPITAL OUT PATIENTS DEPT LEVEL 1 - CONSULTING ROOM 063	07/04/2015	Please carefully remove CUP 1008 from room and make all finishes good.  Please carefully remove CUP 1008 from room and make all finishes good. CUP 1008 to be placed in basement storage room for spare materials. Please confirm cost for removal prior to 20th April 2015. Refere attached drawing.	
3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015	Please proceed and prepare base for 2 No ATM's as per attached drawing.  Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015	Proceed with works identified under PMI 347.  The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.	

3654	PMI 377	RAG 032/RCG 082 - Additional OUT131	16/04/2015	The Board request an additional OUT131 to the control desk trunking adjacent to wall end in each of the following rooms for connection of OPT XRay equipment: RAG - 032 RCG - 082 Cost to be allocated to the contingency of PMI 328.	
3662	PMI 378 -	Steel Frame Supports - CT rooms	20/04/2015	Please provide 2no. steel frame supports for injectors in ground floor CT Rooms installed with fixing plates 100mm above suspended ceiling	
3663	PMI 379	ENERGY CENTRE - FLUE GAS EMISSIONS MONITORING	20/04/2015	Please proceed and accept quotation from TUV SUD - NEL to install emissions monitoring sensors as detailed in quotation reference NEL - 11851.  Additional instruction 22/4/15 - Supply and install sockets within 7 @ boiler flues and 3 @ CHP flues to facilitate emissions testing.	
3667	PMI 380	ADDITIONAL POWER & DATA PART 2	21/04/2015	The Board confirm that Brookfield Multiplex should supply and install the undernoted items to be in part associated with PMI 328.  Ref J Bailey email to C&B 14.04.15 - confirm removal of light fittings contained within PMI 328. In conjunction with install of Pharmacy robot - relocate 3 No sprinkler heads and 1 No radiant panel. Also in Pharmacy per discussion with Malcolm Ross and P Moir 21.04.15 install section of pharmacy worktop 2m long by standard width, with 2m of plastic dado trunking linked to power pole from floor to ceiling. Worktop to accommodate 4 work stations, each work station to have 2@ twin 13a socket outlets and 1@ double data outlet, mounted on the plastic dado trunking.  In summary a total number of sockets are; Data - 4@double data Power - 8@twin 13am socket outlets  Dado trunking and worktop to be sealed all round with white silicone, worktop to sit on white metal lab style legs.  Please proceed with works as quickly as possible.	
3679	PMI 381	ARRIVAL SQUARE - 4 No. BUS CAGES (WHITE LINING)	22/04/2015	BMCE are instructed to mark out 4 bus cages as per the attached drawing, to include the names bus stance and individual bus cages.	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015	Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.  Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head,	

				articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) **PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) **FS advised that the tank was due on site that day (02/04/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan.(19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) **It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) **DP Advised that he understood that all the works had been carried out (02/04/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) **FS agreed to provide an update to PM later that day (02/04/2015)**
- Decontamination washers – DP agreed to progress the remedial works to the 'drips' at the washers. (26/03/2015) **DP advised that he understood the drips had all been fixed. (02/04/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) **JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015)**
- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as as record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015)

- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015)
- Panel (which had come loose) – PM advised that the NHS have had to do a datix report on the incident. AF advised that there is an operative onsite to check panels – the weather conditions the previous day had not allowed for checks – the works need to be carried out from a chair and it had been too windy. AF provided an overview of the panel make-up/fixing. AF noted that the extent of the issue was not known at this time and all the panels would be checked as a matter of urgency. AF had asked the French manufacturer to look at the panels. There are no marks on the face of the panel. AF would provide a schedule identifying the order of the checks. DH suggested that the initial focus should be on the faces which sustain the brunt of the weather and which ones have an interface with members of the public. AF noted that a metal panel had also been damaged and a glazed panel PM suggested that the panel is only used in 2 locations (02/04/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015)
- . PAC Screen layout – DP advised that he had got this back (02/04/2015)
- Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015)
- Ultra clean – query has been raised re pressure in that they think it should be balanced and not 35/25.
- Outward opening doors – it was noted that correspondence could not be found which advised that the doors should have been changed and it was acknowledged that it appeared odd. GB noted that the drawing had been signed off as outward facing doors and the doors had been fitted as per drawing. FS agreed to liaise with TDSL to progress this matter – 2 instances are Plaster room adult hospital and 2<sup>nd</sup> floor NCH ARU . (02/04/2015)
- EWD – DH advised that users want to fill basin and cant as there is no way to fit a plug. It was suggested that the sink was as per SHTM. DH was requested to provide the sanitary ware code and BCML would check if the grating could be changed (02/04/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1341

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 29/04/2015:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW. PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works. DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
24309	BMCE-EWN-000151	Mach Aire Limited Liquidation	<p>24/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p>	<p>It has come to our attention that Mach-Aire Limited, the company sub-contracted to Brookfield Multiplex to provide the aseptic suite, has gone into liquidation. We are still awaiting official notification but we are putting together contingency plans never the less. This plan will be communicated to the board in due course.</p> <p>The board are to wait on further information and contingency planning from Brookfield Multiplex. DP advised that there had been a joint meeting. JMiller had provided an updated list of works to be completed and DP would provide a copy to PM. BMCL will continue to work together to keep LM satisfied. The list shows the outstanding works, action plan for works, timescales and includes what BMCL have ordered, etc. Alternate routes to contractors had been used. A route/mechanism to get info currently with validair required to be identified. BMCL were mitigating risks in order to keep the programme on track.</p> <p>DP advised that the H&amp;V items have been progressed and are on route to be fitted. Validair are still working away but it was expected that there will become a point when they enquire about getting paid. BMCL trying to identify a mechanism for BMCL to contract with/pay Validair. GW is going to check what BMCL still have in their budget for payment to Machaire and use this money to cover the validair works. BMCL can identify what is left after any payment due to the liquidator. Validair would need to contract with the NHS re maintenance therefore it may be necessary to ask the NHS to contract with Validair for the completion of the Validair works. It was thought that the cabinet training could be resolved. GW noted that BMCL could do short orders as long as BMCL can contract with the company.</p> <p>DP advised that BMCL proposed to raise short orders for works so as not to cause any delay to the works. DP advised that JMiller and LMorrison continue to work together. BMCL are doing short work orders to keep the works progressing. There needs to be a short work order done with Validair. GW suggested that the short work order with validair is in the process of being done.</p> <p>DP advised that works are progressing ok. LM and JM are both advising that things are working ok and both appear to be working together to overcome any issues.</p> <p>DP advised that currently there were no issues. BMCL have been doing short orders. A short order would now need to be done to FNS and GW advised this had been done. DP suggested that this item should remain open until the training has been provided. DH noted that LM is working through the IQ and Sign-off.</p> <p><b>It was agreed that this item could be closed.</b></p>	
24484	BMCE-EWN-000153	DCFP user requested changes	11/03/2015	<p>BMCE have received numerous requested changes to the installed works to the DCFP area which are contrary to the signed off RDD drawing works. The last iteration of change following DCFP user visit on 27th Feb 15 is captured on the attached document. BMCE comments are also attached, per room, to this document.</p> <p><i>Text from prev Notes:</i>  DCFP – AF advised that he had discussed with MMacleod the matters in the report. Covers would be put on the nurse call, the turn buttons would be changed. AF noted that one of the doors needs to change from a single door to door &amp; half so can get a bed in. DH advised that this relates to a ward. AF noted that the doors were all signed off and that he would need to check the drawings. AF advised that he would check if there is a set of doors on site. AF advised that he had no issues re the changes listed on the understanding that the list does not grow. (29/01/2015) FS advised that some work is significant and that MM was going to organize a meeting with the Users. The list appears to be a cross match of anti-lig and</p>	

			<p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p>	<p><i>non anti-lig items. (05/02/2015) No further progress MMCL to action meeting with user group. (19/02/2015). FS advised that the requirements have been changed again i.e now asked for fully lig in bathroom. FS acknowledged that the taps in the ensuite are an issue and would need to be changed however everything else was fitted at contracted to do so. DH enquired if there had been a legislation change. PM agreed to raise an EW (05/03/2015)</i></p> <p>Noted that there have been a number of iterations in the fir-out of DCFP however GB is adamant that everything has been fitted as contracted to do so. Users want changes and there are no quick fixes. FS, DH GB and PM to discuss. FS acknowledged that there are legislation changes however it would appear that the users are trying to get their new changes also done.</p> <p>GW advised that he had uploaded all the documentation to Sypro. BMCL are awaiting confirmation as to way forward/what works have to be carried out. FS noted that there will be items that will be difficult to obtain by 24<sup>th</sup> April i.e. doors. PM agreed to discuss with DL.</p> <p>PM advised that a meeting is being arranged and it had been agreed to filter out superfluous items. In general it is thought that the primary issues are in the ensuites.</p> <p>GB advised that a meeting to discuss the User comments had been held, case had been put forward, noted that visit to Skye House had been undertaken and brief prepared. A PMI was then received which instructed the way forward and install is as per PMI. .Since this time users have come and requested further changes. BMCL have looked at easy fixes. Predominantly the en-suites need to be anti-lig. It had been agreed to disagree re the background. The PMI did not refer to the RFI and BMCL followed the PMI. PM advised that he proposed to confirm the NHS requirements. GB advised that MM had suggested that thedept cannot open until the works are finished and that the NCH patients are due to move in June. AF advised that BMCL would prepare a programme for the worksso that BMCL can understand if can guarantee that the works can be complete before the NCH moves.</p> <p><b>It was agreed this item could be closed as dealt with under PMI 373</b></p>	
2452 1	BMC-EWN-000154	INS - Relocation of Underground Services	<p>17/03/2015</p> <p>19/03/2015</p> <p>02/04/2015</p>	<p>Please confirm intent to issue PMI to cover works relating to the relocation of underground services to allow the piling / substructure works for the INS entrance to proceed. This PMI requires to be issued by Friday 20th March 2015 if the current programme is to be maintained. If these works are to be carried out by another party we will vacate the site from 23rd April for a period of 4 weeks as shown on programme BM-GS4-TN02-0021</p> <p>GW advised that BMCL are awaiting confirmation from the NHS re the way forward. AF suggested that BMCL should carry out trial digs so it can be identified if there is anything of consequence.</p> <p><b>Agreed this item should be closed as PMI 365 issued.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have</p>	

			<p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p>	<p>been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
24650	BMCE-EWN-000155	Anticipated completion date of works on PMI 347 Radio Nuclide drainage	<p>03/04/2015</p> <p>23/4/2015</p>	<p>Following receipt of the programme from Crawford plumbing, works are due to commence Tuesday 7th April for 6 weeks. Therefore works will not be complete until w/c 18th May 15</p> <p>FS advised that the works are ongoing. DL noted that SEPA are scheduled to visit the site early w/c 27/04 and this was an area that they would look at. FS suggested that it would take circa 2 weeks to complete this area once the materials are onsite.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 29/04/2015

							
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are</p>			

A51679245

			<p>12/03/2015</p> <p>happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p> <p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft when he will be onsite and will link in with FS.</p> <p>19/03/2015</p> <p>FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level1 &amp; 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&amp;power larger and this will be covered by a shroud in any case.</p> <p>26/03/2015</p> <p>FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7<sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattressing issue and PM would provide this to DR for discussion with GW.</p> <p>02/04/2015</p> <p>FS advised that further fittings had been agreed and were due on site on 03/04/2015 – FS would double check that there was no delay to the delivery. PM advised that Lincor is back on site and he understood that progress is ongoing. Lincor have their own PM looking after the works on site. PM advised that it</p>	
--	--	--	---	--

			23/4/2015	would be useful to understand how the laminate will be fixed to the stud. GW advised that he had not received any Lincor cost information nor had a discussion with DR. PM advised that he would provide the cost info asap. PM advised that the Lincor Project Manager is advising that they are to due complete the following day 24/04/2015.	
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established. AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 29/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014  23/10/2014 30/10/2014 13/11/2014 20/11/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p> <p>PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.</p> <p>DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.</p> <p>DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.</p> <p>DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re</p>	

A51679245

			<p>services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermott to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p>27/11/2014 AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</p> <p>04/12/2014 AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).</p> <p>11/12/2014 DH advised that there had been a suspicion of there being a 2<sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.</p> <p>08/01/2015 DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>19/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work</p>	
--	--	--	--	--

			19/03/2015	content and what is being done. GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.	
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.	
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.	
			23/4/2015	PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.	
3276	PMI 325 -	Retail Fit out - Additional M&E Services - M&S	14/01/2015	Grocery Storage Unit Please provide quotation for the installation of the following: 1. 63amp three phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	It was enquired if the works were to the storage bases into the unit. DL advised that GF needs to formally confirm that the costs will be charged to the companies. AF enquired about the timescale for the works and DL advised that the units need to be operational for the hospitals opening.	
			22/01/2015	DMF advised this matter is going through the process.	
			29/01/2015	GW advised that he had asked WW for an indication of design so can provide a cost. BMCL are chasing WW for a response.	
			05/02/2015	PM advised that GF is picking up BMCL RFI queries. DL noted that he has advised that charges should be paid by the retailers. PM acknowledged receiving the information re WW design fees.	
			12/02/2015	GW advised that price has been provided for design fees and way forward to be confirmed so that can instruct design. PM agreed to confirm the way forward. GW noted that the design fee was circa [REDACTED]	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	GW advised that that design is due back in w/c 02/03/2015. DP noted that he thought that the NHS wanted the space cleared by 12 <sup>th</sup> March 2015.	
			05/03/2015	GW advised that the design is due to be received back to BMCL by cop 06/03/2015. Once received BMCL would cost up.	
			12/03/2015	DH noted that the retailer is doing their own warrant applications.	
			19/03/2015	GW advised that BMCL have sent queries to WW. DP noted that CGrindlay is trying to push on the costing.	
			26/03/2015	GW advised that he had received the drawing for the mop wash. PM suggested that this item had been on the tracker a long time. GW advised that GB had some queries to resolve before drawing could be prepared. The design didn't start until 19 <sup>th</sup> Feb 2015. Design has been marked up by CGrindlay & Mercury. Final design expected 27/03/2015 and thereafter BMCL will cost up. GW noted that BMCL no longer have designers that they can use freely	

			02/04/2015	as designers moved onto to other projects. GB advised that the design had been done and is out for costing. DP suggested that the cost would be available soon. The works should be more straight forward than the likes of pharmacy.	
			22/04/2015	It was agreed that this item could be closed as CE 093 deals with this item.	
3277	PMI 326	Retail Fit out - additional M&E services - WHS	14/01/2015	Newsagent Storage Unit Please provide quotation for the installation of the following: 1. 63amp single phase electrical supply 2. a ventilation stub 3. a sprinkler supply As per locations indicated on attached plan.	
			15/01/2015	See above	
			19/02/2015	PMI 342 issued to take design forward for costing.	
			26/02/2015	As above	
			22/04/2015	It was agreed that this item could be closed as CE 093 deals with this item.	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.  The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.	
			05/02/2015	Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
			12/02/2015	PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.	
			19/02/2015	PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.	
			26/02/2015	PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015	
			05/03/2015	PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.	
			12/03/2015	PM advised that he had informally heard that the shelters will be available from April.	
			19/03/2015	PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then	

			<p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p>	<p>PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.</p> <p>PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.</p> <p>PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CE for the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW suggested that the masterplan would need to be updated and there would be a design cost incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised that the stances do not work without the kicked out section and a drawing should be issued to GCC telling them what has been done.</p> <p>PM advised that he had met on site the previous day with Trueform. An alternate plan is being worked through which would mean that there may be less granite to be lifted. PM is liaising with PMc and PMc is liaising with Land Eng. GW npted that BMCL would need to do a revised Land Eng cost PM advised that different stances would need different amounts of granite lifted – some less/some more and suggested that the cost be left as is for now and once the works are complete final cost can be identified. The costs for the sharks fin and light column were to be rolled into one CE.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>PM advised that an amendment would be advised via a separate PMI.</p> <p>It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p>	

3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p>	<p>The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A. Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p> <p>GW advised this is WIP to obtain costs.</p> <p>Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution.</p> <p>GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</p> <p>DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.</p> <p>DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>It was noted that costs are awaited.</p> <p>GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p> <p>FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p>	

			12/03/2015	DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.	
			19/03/2015	DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015	
			26/03/2015	DP advised that the design is due to be provided imminently.	
			02/04/2015	DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.	
			22/04/2015	PM and DL to discuss/agree the way forward asap.	
3390	PMI 344	Additional Power & Data	17/02/2015	Please proceed with works to install additional power and data outlets as set out in PMI 328, works to be complete by 31 <sup>st</sup> March 2015.	
			19/02/2015	Discussed under PMI 328. PMI 328 will be closed and any issues discussed under PMI 344 before CE issued.	
			26/02/2015	It was noted that DH has agreed an order of priority and DH to lead for NHS re order. PM enquired about the programme noting that it is still on programme but was understood that programme is tight. DP advised that BMCL are endeavoring to get all done by 31 <sup>st</sup> March 2015 however a discussion with the NHS would need to be had. DL advised that the points for wardview is of particular concern. DL noted that the NHS need to ensure that they achieve cashflow. PM advised that he would be happy to formalize the list if required and this was requested. DL advised that this is a key piece of work as the wards won't work without wardview. GW noted that the PMI had not costed for the works on the basis of completing the works by 31 <sup>st</sup> March 2015 and to achieve this date would require weekend/extended working/additional resource which was an additional cost. DL advised that if the NHS are to cover the additional cost of extended working then BMCL must guarantee that the 31 <sup>st</sup> March deadline will be achieved.	
			05/03/2015	GW advised that the original costs were based on BMCL aiming for 31 <sup>st</sup> March completion not guaranteeing 31 <sup>st</sup> March completion. A guaranteed 31 <sup>st</sup> March completion would need to be resourced differently. DP agreed to identify the current status. PM agreed to liaise with MR. GW noted that he had been advised of clashes on site and areas that access is difficult.	
			12/03/2015	It was noted that Building Warrant is needed. GW suggested that the PMI remains on the tracker and BMCL will advise when the programme requires weekend working. AFD suggested that the weekend working for the joiner should be instructed. DH suggested that ops on site were advising that completion of the works before 31 <sup>st</sup> March will not be an issue. FS suggested that achieving completion of the works by 31 <sup>st</sup> March 2015 will be tight. AF advised that weekend working should be instructed.	
			19/03/2015	DP noted that so far the works are progressing satisfactorily. DP will provide an update w/c 23/03/2015. GW advised that GB is looking at BW – been advised that BW is not needed for data but is needed for power.	
			26/03/2015	DP advised that some issues had been overcome/resolved.	
			02/04/2015	FS advised that he had provided a note the previous night with an update on the survey works for wardview. FS did not see any reason why the data/power works for the wardview could not be completed by the target date. DH noted that there is an issue re pharmacy i.e. they need to bring drugs on site early to test the robot however cant test the robot as there is no power. There was a Mercury/BMCL debate re whether needs a new distribution board. DP acknowledged that there had been a breakdown in progressing this but works are now underway to get the sketchsigned off by WW and the distribution board purchased and delivered to site. It had been advised that there is a	

			22/04/2015	<p>requirement for 14 additional data and 10 double power sockets which are not on the PMI. DP advised that Mercury had been advised to order up what was required and agreement re the additional items can be reached thereafter.</p> <p>GW noted that the PMI could be closed. BMCL were working in line with the order of the NHS requirements. There had been no claims as yet for additional/weekend working. Item closed.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p>	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p> <p>DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.</p> <p>GW advised that he had a cost for the works. The costs had been split into NHS and non NHS works – the NHS works cost was circa [REDACTED]. DP advised that BMCL are continuing to progress with a programme which stays ahead of the ABrennan programme. FS advised that Crawford had noted that there is 4 weeks of work. DH advised that 4 weeks of works presents a problem. DP suggested that BMCL and NHS meet w/c 06/04/2015 so can identify if works can be done to enable to disruption to the dept opening – agree sequence of works. DP advised that BMCL will identify if any materials need to be ordered which may have a long lead time.</p> <p>PM advised that this would be concluded once DH returned from leave. GW advised that for the BMCL accounting system ideally this needed to be concluded by tomorrow. PM agreed to issue a CE to the value of [REDACTED].</p>	Cross ref PMI 376
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p>	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with</p>	

			19/03/2015	NHS re number of lines is required. GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.	
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.	
			02/04/2015	DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.	
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015	Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.	
			26/02/2015	The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.	
			05/03/2015	GW noted that costs are ongoing. GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though	
			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
			02/05/2015	DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would	

			22/04/2015	<p>need to be asked to confirm what works he had done.</p> <p>GW advised that the painting information had been rechecked as being correct. Tge flooring information was to be revised circa [REDACTED] to be reduced to [REDACTED]. GW suggested that a CE to the value of [REDACTED] should be provided. PM agreed to liaise with DH on his return from leave and to issue the CE on 27/28<sup>th</sup> April.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	<p>04/03/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p>	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p> <p>DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.</p> <p>DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p> <p>DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.</p> <p>DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.</p> <p>DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.</p> <p>FS advised that the power was in however he would need to check about the data. GW noted that this was being financed through the contingency sum and that he was not expecting a CE for this item.</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff</p>	

			05/03/2015 19/03/2015 26/03/2015 02/04/2015  22/04/2015	working on the other side of these walls. GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc. GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap. PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel.	
3469	PMI 354	ADULT & CHILDREN'S HOSPITAL WARD NAMES ON SYSTEMS	05/03/2015  19/03/2015 26/03/2015  02/04/2015 22/04/2015	Please provide cost to change names on fire alarm and nurse call from those currently on systems based on Nightingale drawings, to actual ward names e.g. Ward 4A; Ward 4B etc. DP advised that Mercury have some queries on this which are being progressed. GW advised that BMCL had a preliminary cost from Mercury of [REDACTED]. GW would review this costs and confirm to the NHS asap. PM noted that this matter would likely become a CE. It was agreed this item could be closed – cross reference CE 087. FS advised that works had started and would take circa 2 weeks.	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	10/03/2015   19/03/2015 26/03/2015 02/04/2015 22/04/2015	The Board request a quotation for the following elements of work associated with the Fire Suppression System. • Drain down of system to allow connection of Tenants' system and associated refilling. • Final commissioning of the Tenants Fire Suppression system into the main Hospital network. GW noted that cost awaited from Mercury. GW noted that cost awaited from Mercury. DP advised that he would discuss with EMCI in order to push on the availability of the cost info. GW advised that costs had been uploaded to Sypro the previous day. PM advised that he would issue a CE asap.	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	10/03/2015          19/03/2015  26/03/2015	The Board request a quotation & programme (high level) to provide (renal quality) mains cold water supplies & outlets suitable for direct connection of single RO Units in the following rooms: * RENW - 019 * RENW - 021 * RENW - 025 * RENW - 026 * RENW - 030 * RENW - 032 The supplies should be located so that other related services such as power & earth connections can be used in conjunction.  These water supplies are intended to act as contingency in the event of urgent dialysis requirement during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety. DP advised that he would get the works progressed. DH advised that cost info is still to be	

			02/04/2015 22/04/2015	provided. DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap. FS advised that there is a VE option that is complaint and a cost is awaited for this.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed. GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works. DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury. GW advised that the cost had been uploaded to Sypro earlier that day. PM advised that the PMI to be cancelled as NHS not proceeding with this item.	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.  Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002. GW advised that costs awaited from Mercury FS advised that the light removal is due to commence 27/03/2015 FS advised that the light removal works was 50% complete however would be fully complete by cop 03/04/2015. It was agreed this item could be closed. Lights being installed to the correct height. GW advised that there are areas where it would not have mattered the lights had been fitted as they would now have clashed with the patient entertainment.	
3517	PMI 360 -	M&E Services Alterations to TCT within Schiehallion	16/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015	The Board request a quotation and high level programme for the M&E services alterations within the Teenage Cancer Trust area of the Schiehallion Ward as per the attached drawings. Works to include: * Additional data, power and HDMI outlets to multiple rooms and additional domestic hot & cold water supplies and drainage connections in: - Patent (school) room (SCH-077) - Recreation Lounge (SCH - 002) GW noted that this matter would require a Building Warrant. GW suggested that there is quite a lot of work involved in this matter. DH acknowledged that it was a shell with a drainage tail. It was noted that the cost information is required urgently. DH suggested visiting the site with MRoss. A further review had been carried out and it was appreciated that the TCT contractor has undertaken works in 1 room. DH will provide feedback and amend the scope as necessary. GW advised that the cost had been uploaded to Sypro earlier that day. Item closed – cross reference with CE 092	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.  Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	

			19/03/2015  26/03/2015  02/04/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on 20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015. Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015. GW advised that the cost had been uploaded to Sypro earlier that day. PM agreed to provide a CE. DP advised that he had asked Starkstrom to provide regular updates for DP and DP would forward these to PM. PM advised that Starkstrom should ignore any instruction(s) from Users, etc and to flag up any issues asap.	
3530	PMI 362	Removal of Upper Storage Unit- OPD1 - 048	18/03/2015  26/03/2015 02/04/2015 22/04/2015	The Board request a quotation for the removal of 1 x STF 270L wall mounted storage unit in OPD1 - 048. Wall finishes to be made good following removal. DH noted that he had been advised that the works have been done. It was agreed this item could be closed It was noted that the works are being carried out.	
3540	PMI 363	ADULT HOSPITAL - THEATRES 5 & 6	20/03/2015  26/03/2015  02/04/2015 22/04/2015	Please provide cost and timescale to undertake the following adaptations to the lights in both theatres. The Board request a quotation for alteration of theatre surgical lights/monitoring in THE-120 and THE-124 where the existing single operating light (LIG-1001) should be replaced with the standard LIG-1010 arrangement (triple arm) made up of 2 No. surgeons lights and 1 No. monitor. The AV wiring related to this alteration is instructed previously. Please confirm timescale to procure and install. DP advised that Starkstrom are working this up – Starkstrom have been advised to finish works in 361 before commencing any other works. GW noted that costs are awaited. It was agreed this item could be closed – cross reference CE 088. FS advised that Mercury had been instructed to carry out the works.	
3541	PMI 364	HYBRID THEATRE THE-228	20/03/2015  26/03/2015  02/04/2015 22/04/2015	Please provide a cost to swap the position of pendants and the removal of a monitor arm. The Board request a quotation for the swapping of anaesthetic and surgical pendants in 'hybrid' theatre THE-228 including the removal of the monitor arm from the surgical pendant. The quotation should include all associated works to medical gas systems, electrical and data installations and if necessary, fabric alterations. Please also provide a timescale for the proposed works. DH advised that Toshiba are to receive confirmation from Japan re 56" monitor and reinstall of heads. Cost awaited from Starkstrom to change pendants. DH suggested that the theatre could be used as a hybrid in the interim but it couldn't be used as a general theatre however he suspected that the users would not agree with this. DH suggested that there may be a work-round by using an alternate theatre. DH was requested to provide DL with the contact details for the Toshiba MD. DP advised that in relation to Starkstrom a cost for the delivery and installation of every pendant was anticipated to be received later that day. A programme for the install works is awaited. DL advised that the Board needed to take form a position on 27/03/2015 and that DL needed to know the implications for that area before cop that day (26/03/2015). GW noted that costs are awaited. It was agreed this item could be closed – cross reference CE 089. FS advised that Mercury had	

				been instructed to carry out the works.	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015  26/03/2015 22/04/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works. GW advised that the costs would be discussed on the basis of the actual works carried out.	
3552	PMI 366	CHILDREN'S HOSPITAL - PROPOSED RELOCATION OF GP OOH SERVICE	23/03/2015  26/03/2015  02/04/2015  22/04/2015	Please provide a cost and timescale to undertake the works on the attached documentation. Please provide cost and timescale to undertake the works to relocate the GP Out of Hours service from Clinic 4 to Clinic 1. The work involves the construction of a stud wall and provision of a single leaf door to a reception area and the provision of additional power and data sockets in 7 rooms. It was noted that an indication of the timescale was to be identified. GB and PM to have a site visit. PM to liaise with MM re when service is to start. GB advised that further to a visit to site to review the proposed works the costs are now being prepared. It was agreed this item could be closed – cross reference CE 090. FS noted that power and data may be an issue. The partition and door will hopefully be completed by the end of the following week.	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015 22/04/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off. FS advised that the rep has confirmed to be on site w/c 13/04/2015 FS advised that the glass had been replaced. GW noted that the costs are awaited from Henshaw.	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015 22/04/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance. Cross ref PMI 333 PM noted that the works had been done.	

3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015  02/04/2015 22/04/2015	<p>Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.</p> <p>In parallel provide cost and timescale, desired completion by end of April 2015.</p> <p>It was noted that it is WIP to price the works</p> <p>GB advised that there was a query re power sockets on the floor i.e. do you expect BMCL to core the floor. PM requested that GB discusses with PM separately and brings the drawing.</p>	
3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015  02/04/2015  22/04/2015	<p>Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use.</p> <p>It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design.</p> <p>GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type.</p> <p>It was noted that works are ongoing and BMCL are finalizing the costs.</p>	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015    22/04/2015	<p>Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.</p> <p>Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres.</p> <p>PM advised that the works are complete and costs are awaited.</p>	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015   22/04/2015	<p>Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.</p> <p>Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.</p> <p>FS advised that it is WIP to source the fixings/fittings. AF enquired if it would be possible to get sign-off from the service before BMCL carry out the works and this was agreed.</p>	
3609	PMI 374	ADULT HOSPITAL OUT PATIENTS DEPT LEVEL 1 - CONSULTING ROOM 063	07/04/2015   22/04/2015	<p>Please carefully remove CUP 1008 from room and make all finishes good.</p> <p>Please carefully remove CUP 1008 from room and make all finishes good. CUP 1008 to be placed in basement storage room for spare materials. Please confirm cost for removal prior to 20th April 2015. Refer attached drawing.</p> <p>FS advised that the works had been carried out. GW advised that BMCL are not pursuing the cost.</p>	

3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015  22/04/2015	<p>Please proceed and prepare base for 2 No ATM's as per attached drawing.</p> <p>Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.</p> <p>PM noted that there were operatives on site to carry out the works. FS agreed to check with HGallagher re progress.</p>	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015	<p>Proceed with works identified under PMI 347.</p> <p>The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.</p>	
3654	PMI 377	RAG 032/RCG 082 - Additional OUT131	16/04/2015	<p>The Board request an additional OUT131 to the control desk trunking adjacent to wall end in each of the following rooms for connection of OPT XRay equipment:</p> <p>RAG - 032 RCG - 082</p> <p>Cost to be allocated to the contingency of PMI 328.</p>	
3662	PMI 378 -	Steel Frame Supports - CT rooms	20/04/2015 22/04/2015	<p>Please provide 2no. steel frame supports for injectors in ground floor CT Rooms installed with fixing plates 100mm above suspended ceiling</p> <p>FS noted that the works had been carried out. PM to review the costs.</p>	
3663	PMI 379	ENERGY CENTRE - FLUE GAS EMISSIONS MONITORING	20/04/2015 22/04/2015	<p>Please proceed and accept quotation from TUV SUD - NEL to install emissions monitoring sensors as detailed in quotation reference NEL - 11851.</p> <p>Additional instruction 22/4/15 - Supply and install sockets within 7 @ boiler flues and 3 @ CHP flues to facilitate emissions testing.</p> <p>It was agreed this item could be closed – cross reference CE 081</p>	
3667	PMI 380	ADDITIONAL POWER & DATA PART 2	21/04/2015	<p>The Board confirm that Brookfield Multiplex should supply and install the undernoted items to be in part associated with PMI 328.</p> <p>Ref J Bailey email to C&amp;B 14.04.15 - confirm removal of light fittings contained within PMI 328. In conjunction with install of Pharmacy robot - relocate 3 No sprinkler heads and 1 No radiant panel. Also in Pharmacy per discussion with Malcolm Ross and P Moir 21.04.15 install section of pharmacy worktop 2m long by standard width, with 2m of plastic dado trunking linked to power pole from floor to ceiling. Worktop to accommodate 4 work stations, each work station to have 2@ twin 13a socket outlets and 1@ double data outlet, mounted on the plastic dado trunking.</p> <p>In summary a total number of sockets are; Data - 4@double data Power - 8@twin 13am socket outlets</p>	

				<p>Dado trunking and worktop to be sealed all round with white silicone, worktop to sit on white metal lab style legs.</p> <p>Please proceed with works as quickly as possible.</p>	
3679	PMI 381	ARRIVAL SQUARE - 4 No. BUS CAGES (WHITE LINING)	<p>22/04/2015</p> <p>22/04/2015</p>	<p>BMCE are instructed to mark out 4 bus cages as per the attached drawing, to include the names bus stance and individual bus cages.</p> <p>PM noted that the works had been completed.</p>	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	<p>22/04/2015</p> <p>22/04/2015</p>	<p>Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.</p> <p>Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.</p> <p>PM noted that this is priority work</p>	
3685	PMI 383 -	ADULT THEATRES LEVEL 2 - MAIN ACCESS DOORSET D-02-THE-005	<p>23/04/2015</p>	<p>Brookfield are instructed to supply and fit electronic locks wired to the existing swipe card reader and disengage white proximity 'hand swipe' switch. Completed installation should match those installed on bridgelink re-gen kitchens.</p> <p>This double doorset has been fitted with an DORMA overdoor automatic door system, a card reader and keypad (outside), a green push button for operation (in department), and outside a hand swipe proximity switch.</p> <p>Please supply electronic locks as per re-gen kitchens on adult ward floors, so that operation of doors is automatic and operated by card from outside and push button from inside department. Please disconnect white proximity swipe switch, remove and cover over with proprietary stainless steel plate. Proceed with works as quickly a possible.</p> <p>Note the bulk of the system is installed bar the electronic locks.</p>	
3700	PMI 384 -	ADULT & CHILDRENS HOSPITAL - SIGNAGE FOR BABY FEEDING	<p>27/04/2015</p>	<p>In both hospitals please replace baby feeding signs, by replacing 'bottle' sign with 'nursing mother' sign.</p> <p>In both hospitals please replace signs, by replacing 'bottle' sign with 'nursing mother' sign. Basic costs provided to date are Glasgow Signs - [REDACTED]; Signbrand - [REDACTED] (for updating interactive way finding templates).</p>	

3701	PMI 385 -	Aseptic Suite - Add to BMS	27/04/2015	Please provide a cost to connect 2no. cold rooms located within the Aseptic Suite to the BMS for monitoring temperature and providing alarms for out of specification conditions.	
3710	PMI 386 -	NEW HOSPITALS - GOVAN ROAD WHITE LINING	28/04/2015	Please install additional white road markings as per the attached drawing from Glasgow City Council.	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time.	
3714	PMI 388 -	CHILDREN'S HOSPITAL - TEENAGE CANCER TRUST ROOM TCT 002	29/04/2015	Please proceed to supply and fit HW F&R, CW feed and drainage to TCT 002 from adjacent room.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
14984	CE 093	ADULT HOSPITAL - RETAIL FIT OUT ADDITIONAL SERVICES (M&S + WHS)	22/04/2015	BMCE are instructed to proceed with the M&E services associated with the Board's retail fit out, as set out and priced in PMI 325 & 326.	
15004	CE 094	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	23/04/2015	Proceed with works to adapt drainage system. Cross reference 347	29/04/2015
15005	CE 095	NEW HOSPITALS - 300 ADDITIONAL TELEPHONE LINES	23/04/2015	The Board confirm Brookfield should proceed with the provision of 300 additional telephone lines.	

### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) **PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) **FS advised that the tank was due on site that day (02/04/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan.(19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) **It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) **DP Advised that he understood that all the works had been carried out (02/04/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) **FS agreed to provide an update to PM later that day (02/04/2015)**
- Decontamination washers – DP agreed to progress the remedial works to the 'drips' at the washers. (26/03/2015) **DP advised that he understood the drips had all been fixed. (02/04/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) **JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015)**
- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as as record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015)

- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015)
- Panel (which had come loose) – PM advised that the NHS have had to do a datix report on the incident. AF advised that there is an operative onsite to check panels – the weather conditions the previous day had not allowed for checks – the works need to be carried out from a chair and it had been too windy. AF provided an overview of the panel make-up/fixing. AF noted that the extent of the issue was not known at this time and all the panels would be checked as a matter of urgency. AF had asked the French manufacturer to look at the panels. There are no marks on the face of the panel. AF would provide a schedule identifying the order of the checks. DH suggested that the initial focus should be on the faces which sustain the brunt of the weather and which ones have an interface with members of the public. AF noted that a metal panel had also been damaged and a glazed panel PM suggested that the panel is only used in 2 locations (02/04/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015)
- . PAC Screen layout – DP advised that he had got this back (02/04/2015)
- Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015)
- Ultra clean – query has been raised re pressure in that they think it should be balanced and not 35/25.
- Outward opening doors – it was noted that correspondence could not be found which advised that the doors should have been changed and it was acknowledged that it appeared odd. GB noted that the drawing had been signed off as outward facing doors and the doors had been fitted as per drawing. FS agreed to liaise with TDSL to progress this matter – 2 instances are Plaster room adult hospital and 2<sup>nd</sup> floor NCH ARU . (02/04/2015)
- EWD – DH advised that users want to fill basin and cant as there is no way to fit a plug. It was suggested that the sink was as per SHTM. DH was requested to provide the sanitary ware code and BCML would check if the grating could be changed (02/04/2015)
- Fire-stopping – GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. (22/04/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1367

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 29/04/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p> <p>DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
2465 0	BMCE-EWN-000155	Anticipated completion date of works on PMI 347 Radio Nuclide drainage	03/04/2015	Following receipt of the programme from Crawford plumbing, works are due to commence Tuesday 7th April for 6 weeks. Therefore works will not be complete until w/c 18th May 15	
			23/4/2015	FS advised that the works are ongoing. DL noted that SEPA are scheduled to visit the site early w/c 27/04 and this was an area that they would look at. FS suggested that it would take circa 2 weeks to complete this area once the materials are onsite.	
			30/04/2015	DH advised that testing was programmed to be carried out on Friday . FS noted that the works in this area would be completed by 8 <sup>th</sup> May 2015.	

2494 5	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015	Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works	
2495 7	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 29/04/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24260	NHS EW 056	ADULT HOSPITAL - PATRESSING FOR PATIENT ENTERTAINMENT SYSTEM	19/02/2015  26/02/2015  05/03/2015  12/03/2015	<p>The installation of the Board's patient entertainment system is currently underway in the adult hospital. It has been established that in some areas, patressing has not been installed as per the agreed general arrangement drawing through the main contract. Please establish extent of the problem at all levels and provide the Board with options to rectify while maintaining programme and hence reducing potential disruption for the Board's direct sub contractor.</p> <p>FS advised that fixings have been sourced. A Stephen had rigged up an arm for load testing and testing with 2x25kg weights had been successful and provide reassurance re proof of concept. The NHS are requested to confirm if the alternate solution is acceptable. DL noted that the pattress is only to support a TV and BMCL have proved that it passes the weight test. BMCL were requested to liaise with PM for sign-off. .</p> <p>PM advised he understood that the pattress matter was being resolved. PM had provided a list of rooms via email to FS which have issues. Lincor are happy to assist as long as there is a solution. NHS are happy to go with the Gripit solution but need to get Astins to do calculation for them to be comfortable. PM has also sent a drawing showing their mounting bracket – solution needs to take a load of 50kg spread over the 4 fixings. BMCL need to determine where the top of the pattress is. FS advised that he had liaised with JFlynn to progress identifying the top of the pattress. .</p> <p>FW advised that a survey of levels 9, 10 and 11 was ongoing. Thus far the survey of level 10 had identified only 3 instances where the plywood had been incorrectly fitted. PM requested a copy of the survey results. FS enquired how much further the NHS would want the survey works undertaken as BMCL were conscious that the ultimate clean to level 6 was ongoing. GW suggested that the NHS needed to establish the reason why the Patient Entertainment Contractor had identified issues as the checks are identifying that only 3 out of those identified by the contractor have an issue. FS noted that the is a 75% success rate on all the partitions checked (25% raised as having an issue and only 3 identified from the sample. AF requested that FS does a pilot hole 10mm down from the initial survey hole (50mm down). PM suggested that all the walls which patient entertainment is to be fitted on should be checked to prove no issues so that there can be no question marks in the future. DH concurred that the patient entertainment contractor should be asked to confirm that their pattress issue(s). AF advised that he would want the a rep from the patient entertainment contractor to be present when BMCL are carrying out the survey. AF advised that BMCL would check all the floors over the coming weekend. PM advised that he would check with DShaft</p>	

A51679245

			19/03/2015	when he will be onsite and will link in with FS. FS suggested that there was a clearer understanding of the matter on the basis of the survey results for levels 4 to 11. It was acknowledged that Gripit is a solution. PM advised that he had obtained agreement from Lincor to use Gripit. Lincor are expecting BMCL to purchase the Gripit. There are a large number of rooms that Lincor can progress with and the NHS are awaiting a programme for the works. FS advised that BMCL have some Gripit on site however needed to understand how many bags Lincor would be needing. PM suggested that 4 bags per area would perhaps be needed. PM noted that the solution for Level 1 & 2 still needed to be concluded. FS noted that it was proposed that laminate faced plywood would be installed (installed onto the stud). The light would however need to be moved and it was proposed to install the light and the patient entertainment onto the laminate. The laminate could be provided in different colours. PM and FS agreed to discuss colours. PM noted that Lincor have raised concern about additional costs being incurred to their contract. FS advised that the plywood is on a 2 week supply time. BMCL would move the lights in the interim. PM noted that he had advised Lincor to go ahead and fit their data and power. FS noted that BMCL had observed that on occasion the data and power has not been fitted flush with the face of the plasterboard finish and PM suggested that BMCL should make the hole for the data&power larger and this will be covered by a shroud in any case.	
			26/03/2015	FS advised that the fixings for the tower area had arrived the previous day. The surveys had been completed. Circa 1000 of each item on site. The podium wrapped ply is ordered and delivery expected no later than 7 <sup>th</sup> April however BMCL are trying to improve this date. The removal of the light fittings will commence on 27/03/2015 in the order as advised by the NHS. PM suggested that he may need to request more fittings. FS advised that is assumed that Lincor will do their first fix after the light removal so that the wall is ready for the laminate install. BMCL could potentially drill holes for Lincor. PM advised that Lincor had indicated a cost incurred due to the pattrassing issue and PM would provide this to DR for discussion with GW.	
			02/04/2015	FS advised that further fittings had been agreed and were due on site on 03/04/2015 – FS would double check that there was no delay to the delivery. PM advised that Lincor is back on site and he understood that progress is ongoing. Lincor have their own PM looking after the works on site. PM advised that it would be useful to understand how the laminate will be fixed to the stud. GW advised that he had not received any Lincor cost information nor had a discussion with DR. PM advised that he would provide the cost info asap.	
			23/4/2015	PM advised that the Lincor Project Manager is advising that they are to due complete the following day 24/04/2015.	
			30/04/2015	It was agreed this item could be closed.	
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 29/04/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p>	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	

A51679245

			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.
			19/03/2015	GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.

			23/4/2015	PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.	
			30/04/2015	GW noted that a CE was required urgently for this item.	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.	
				The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.	
				Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.	
			05/02/2015	GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
			12/02/2015	PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.	
			19/02/2015	PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.	
			26/02/2015	PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015	
			05/03/2015	PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.	
			12/03/2015	PM advised that he had informally heard that the shelters will be available from April.	
			19/03/2015	PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.	
			26/03/2015	PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.	
			02/04/2015	PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CEfor the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW suggested that the masterplan would need to be updated and there would be a design cost	

			<p>23/04/2015</p> <p>30/04/2015</p>	<p>incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised that the stances do not work without the kicked out section and a drawing should be issued to GCC telling them what has been done.</p> <p>PM advised that he had met on site the previous day with Trueform. An alternate plan is being worked through which would mean that there may be less granite to be lifted. PM is liaising with PMc and PMc is liaising with Land Eng. GW npted that BMCL would need to do a revised Land Eng cost PM advised that different stances would need different amounts of granite lifted – some less/some more and suggested that the cost be left as is for now and once the works are complete final cost can be identified. The costs for the sharks fin and light column were to be rolled into one CE.</p> <p>GW advised that the costs had been provided for this item the previous day along with costs for PMI 355 and PMI 359. PM to advise where costs are to be uploaded to. PM advised that it would be a single CE covering the 3 PMIs and he would liaise with AKerr.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>PM advised that an amendment would be advised via a separate PMI.</p> <p>It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p>	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015	<p>The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers.</p> <p>The works required are outlined on the attached drawing no 13/02103 Rev A</p> <p>Supply and installation of washers/dryers will be by others.</p> <p>The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p>	

			<p>12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015</p>	<p>GW advised this is WIP to obtain costs. Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution. GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC. DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up. DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution. It was noted that costs are awaited. GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap. GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works. FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED]. <b>PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.</b></p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p>	

			26/03/2015 02/04/2015  22/04/2015 30/04/2015	<p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p>	
3404	PMI 347	NEW HOSPITALS - RADIO NUCLIDE DRAINAGE	19/02/2015  26/02/2015  05/03/2015  12/03/2015  19/03/2015  26/03/2015  02/04/2015   22/04/2015  30/04/2015	<p>The Board confirm that the provision of drainage to RNM/SCH areas should be in accordance with the Radiation Compliance Advice Schedule dated October 2010.</p> <p>DP advised that there had been a positive meeting with Radiation reps. Are a couple of tweaks to be made in Schiehallion. In Nuclear Medicine there are easy tweaks and substantial tweaks. BMCL will continue to progress works. BMCL are checking out when BMCL received 2010 list.</p> <p>GW advised that the Mercury matters had been concluded. ZBP incorrect design has been resolved. BMCL had identified what works are attributed and will identify the cost.</p> <p>DH advised that he understood the works were being carried out. BMCL was to identify any "additional" works which are attributed to the NHS.</p> <p>GW advised that the information was with Mercury and the cost awaited. BMCL had been advised that these works will require a Building Warrant. The materials are on order for the works.</p> <p>DP Advised that the materials for the works should now be onsite. DH requested an update later that day so that he could provide feedback to users and DP agreed to provide.</p> <p>GW advised that he had a cost for the works. The costs had been split into NHS and non NHS works – the NHS works cost was circa [REDACTED]. DP advised that BMCL are continuing to progress with a programme which stays ahead of the ABrennan programme. FS advised that Crawford had noted that there is 4 weeks of work. DH advised that 4 weeks of works presents a problem. DP suggested that BMCL and NHS meet w/c 06/04/2015 so can identify if works can be done to enable to disruption to the dept opening – agree sequence of works. DP advised that BMCL will identify if any materials need to be ordered which may have a long lead time.</p> <p>PM advised that this would be concluded once DH returned from leave. GW advised that for the BMCL accounting system ideally this needed to be concluded by tomorrow. PM agreed to issue a CE to the value of [REDACTED].</p> <p>It was noted that this item could be closed as CE 094 issued.</p>	Cross ref PMI 376
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015  26/02/2015  05/03/2015	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive</p>	

			<p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p>	<p>certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p><b>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</b></p>	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>Completion of Group 5 rooms in main Imaging Departments.</p> <p>The Board request costs for the reinstatement and completion of finishes, M&amp;E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.</p> <p>The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works.</p> <p>GW noted that costs are ongoing.</p> <p>GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though</p> <p>GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter &amp; Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.</p> <p>DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24<sup>th</sup> March 2015. GW agreed to liaise with DR.</p> <p>GW advised that he understood that the NHS were having a debate. DH noted that he was</p>	

			02/05/2015  22/04/2015  30/04/2015	<p>comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.</p> <p>DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would need to be asked to confirm what works he had done.</p> <p>GW advised that the painting information had been rechecked as being correct. Tge flooring information was to be revised circa [REDACTED] to be reduced to [REDACTED]. GW suggested that a CE to the value of [REDACTED] should be provided. PM agreed to liaise with DH on his return from leave and to issue the CE on 27/28<sup>th</sup> April.</p> <p>GW advised that costs had been uploaded and that BMCL needed a CE for this item urgently.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015  05/03/2015  12/03/2015  19/03/2015  26/03/2015  02/04/2015  22/04/2015  30/04/2015	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p> <p>DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.</p> <p>DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p> <p>DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.</p> <p>DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.</p> <p>DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.</p> <p>FS advised that the power was in however he would need to check about the data. GW noted that this was being financed through the contingency sum and that he was not expecting a CE for this item.</p> <p>FS confirmed that the data works had been concluded. GW noted that he would need to budget transfer from PMI 328 (circa 17k). PM agreed to check with MMacleod and check that the works are complete.</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to</p>	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015  22/04/2015 29/04/2015</p>	<p>provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc. GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap. PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel. <b>GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc.</b></p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	<p>10/03/2015   19/03/2015 26/03/2015 02/04/2015 22/04/2015  30/04/2015</p>	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury. GW noted that cost awaited from Mercury. DP advised that he would discuss with EMcl in order to push on the availability of the cost info. GW advised that costs had been uploaded to Sypro the previous day. PM advised that he would issue a CE asap. <b>GW advised that cost is circa [REDACTED] and PM agreed to provide a CE asap.</b></p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	<p>10/03/2015</p>	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections</p>	

			19/03/2015	can be used in conjunction.  These water supplies are intended to act as contingency in the event of urgent dialysis requirement during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety.	
			26/03/2015	DP advised that he would get the works progressed. DH advised that cost info is still to be provided.	
			02/04/2015	DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap.	
			22/04/2015	FS advised that there is a VE option that is complaint and a cost is awaited for this.	
			30/04/2015	FS advised that LJamieson is chasing up costs. DH noted that a revised quote had been uploaded the previous day. DH advised that the works needed to be instructed asap. PM advised that he would provide a CE asap.	
3484	PMI 358 -	Relocation of brackets (Comp 101 & 102)	10/03/2015	The Board request a quotation to relocate the rear brackets and PDU's of 34 server cabinets (located in COMP 101 & 102) to allow 1000mm servers to be installed.	
			19/03/2015	GW advised that costs awaited from Mercury. DH was requested to provide a timeframe for the works.	
			26/03/2015	DP advised that he would liaise with DW to get an indication of the works involved/timeframe for the works. GW advised that cost awaited from Mercury.	
			02/04/2015	GW advised that the cost had been uploaded to Sypro earlier that day.	
			23/04/2015	PM advised that the PMI to be cancelled as NHS not proceeding with this item.	
			30/04/2015	PM noted that this item had been cancelled. Item closed	
3509	PMI 359	ADULT HOSPITAL - LEVELS 1 & 2 BEDHEAD LIGHT FITMENT	13/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached drawings for Level 1 & 2.	
			19/03/2015	Reposition bedhead light fitment in rooms with green dot as per attached plans. Height to centre line of fitment to be 1800mm AFL as per NA XX XX SC 400 002.	
			26/03/2015	GW advised that costs awaited from Mercury	
			02/04/2015	FS advised that the light removal is due to commence 27/03/2015	
			22/04/2015	FS advised that the light removal works was 50% complete however would be fully complete by cop 03/04/2015.	
			30/04/2015	It was agreed this item could be closed. Lights being installed to the correct height. GW advised that there are areas where it would not have mattered the lights had been fitted as they would now have clashed with the patient entertainment. As previous discussion it was agreed that this item was closed.	
3529	PMI 361	PENDANT ACCESSORIES - PROPOSED ADAPTATIONS	17/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings.	
			19/03/2015	Please proceed and cost proposed amendments to the Starkstrom pendant supply schedules and drawings. Please supply on or before next meeting on 24th March 2015.	
			26/03/2015	DP noted that this matter is WIP by Starkstrom. Information is expected from Starkstrom on 20/03/2015. DP noted that updated had been provided at the meeting with Starkstrom on 24/03/2015.	

			02/04/2015  30/04/2015	Endoscopy works are due to conclude on 7 <sup>th</sup> April and the client demo has been arranged to take place on 9 <sup>th</sup> April 2015. GW advised that the cost had been uploaded to Sypro earlier that day. PM agreed to provide a CE. DP advised that he had asked Starkstrom to provide regular updates for DP and DP would forward these to PM. PM advised that Starkstrom should ignore any instruction(s) from Users, etc and to flag up any issues asap. <b>It was agreed this item was closed as CE 092 issued.</b>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015  26/03/2015 22/04/2015 30/04/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works. GW advised that the costs would be discussed on the basis of the actual works carried out. <b>GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme.</b>	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015 22/04/2015 30/04/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off. FS advised that the rep has confirmed to be on site w/c 13/04/2015 FS advised that the glass had been replaced. GW noted that the costs are awaited from Henshaw. <b>PM advised that a CE would be provided once the costs were known.</b>	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015 23/04/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance. Cross ref PMI 333 <b>PM noted that the works had been done.</b>	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.	

			02/04/2015 23/04/2015  30/04/2015	In parallel provide cost and timescale, desired completion by end of April 2015. It was noted that it is WIP to price the works GB advised that there was a query re power sockets on the floor i.e. do you expect BMCL to core the floor. PM requested that GB discusses with PM separately and brings the drawing. <b>PM advised that he understood what works are going to be done. GW noted that the costs had been uploaded to Sypro. PM agreed to provide a CE asap.</b>	
3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015  02/04/2015  23/04/2015 30/04/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use. It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design. GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type. It was noted that works are ongoing and BMCL are finalizing the costs. <b>DH noted that he had been advised the previous day that the works had been completed. PM advised he was awaiting the cost info.</b>	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015      23/04/2015 30/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres. PM advised that the works are complete and costs are awaited. <b>DH requested that BMCL confirm that the works had been completed as there was 1 room in interventional which did not appear to be completed.</b>	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015   23/04/2015  30/04/2015	Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.  Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015. FS advised that it is WIP to source the fixings/fittings. AF enquired if it would be possible to get sign-off from the service before BMCL carry out the works and this was agreed. <b>GB advised that samples being prepared. BMCL Have a query re the toilet/toilet seat. GB to liaise with GW re Mercury.</b>	
3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015	Please proceed and prepare base for 2 No ATM's as per attached drawing.  Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.	

			23/04/2015 30/04/2015	PM noted that there were operatives on site to carry out the works. FS agreed to check with HGallagher re progress. PM noted that this item is to be cancelled.	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015	Proceed with works identified under PMI 347.  The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.	
3654	PMI 377	RAG 032/RCG 082 - Additional OUT131	16/04/2015 30/04/2015	The Board request an additional OUT131 to the control desk trunking adjacent to wall end in each of the following rooms for connection of OPT XRay equipment: RAG - 032 RCG - 082 Cost to be allocated to the contingency of PMI 328. GW noted that the costs had been uploaded on 27 <sup>th</sup> . It was agreed this item was closed.	
3662	PMI 378 -	Steel Frame Supports - CT rooms	20/04/2015 23/04/2015 30/04/2015	Please provide 2no. steel frame supports for injectors in ground floor CT Rooms installed with fixing plates 100mm above suspended ceiling FS noted that the works had been carried out. PM to review the costs. GW noted that cost is circa [REDACTED]. DH to confirm where costs to be allocated.	
3667	PMI 380	ADDITIONAL POWER & DATA PART 2	21/04/2015 30/04/2015	The Board confirm that Brookfield Multiplex should supply and install the undernoted items to be in part associated with PMI 328.  Ref J Bailey email to C&B 14.04.15 - confirm removal of light fittings contained within PMI 328. In conjunction with install of Pharmacy robot - relocate 3 No sprinkler heads and 1 No radiant panel. Also in Pharmacy per discussion with Malcolm Ross and P Moir 21.04.15 install section of pharmacy worktop 2m long by standard width, with 2m of plastic dado trunking linked to power pole from floor to ceiling. Worktop to accommodate 4 work stations, each work station to have 2@ twin 13a socket outlets and 1@ double data outlet, mounted on the plastic dado trunking.  In summary a total number of sockets are; Data - 4@double data Power - 8@twin 13am socket outlets  Dado trunking and worktop to be sealed all round with white silicone, worktop to sit on white metal lab style legs.  Please proceed with works as quickly as possible. GW advised that costs had been uploaded ([REDACTED]). Costs will be allocated to contingency.	
3679	PMI 381	ARRIVAL SQUARE - 4 No. BUS CAGES (WHITE LINING)	22/04/2015 22/04/2015	BMCE are instructed to mark out 4 bus cages as per the attached drawing, to include the names bus stance and individual bus cages. PM noted that the works had been completed.	

3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015  22/04/2015 30/04/2015	<p>Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.</p> <p>Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.</p> <p>PM noted that this is priority work</p> <p>DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be removed.</p>	
3685	PMI 383 -	ADULT THEATRES LEVEL 2 - MAIN ACCESS DOORSET D-02-THE-005	23/04/2015        30/04/2015	<p>Brookfield are instructed to supply and fit electronic locks wired to the existing swipe card reader and disengage white proximity 'hand swipe' switch. Completed installation should match those installed on bridgelink re-gen kitchens.</p> <p>This double doorset has been fitted with an DORMA overdoor automatic door system, a card reader and keypad (outside), a green push button for operation (in department), and outside a hand swipe proximity switch.</p> <p>Please supply electronic locks as per re-gen kitchens on adult ward floors, so that operation of doors is automatic and operated by card from outside and push button from inside department. Please disconnect white proximity swipe switch, remove and cover over with proprietary stainless steel plate. Proceed with works as quickly a possible.</p> <p>Note the bulk of the system is installed bar the electronic locks.</p> <p>DH noted that a bolt/grabber arrangement needs to be put on the door (similar to that on the regen kitchen) so that it stops the public going straight into the recovery area. GW advised that the cost information had been uploaded earlier that day.</p>	
3700	PMI 384 -	ADULT & CHILDRENS HOSPITAL - SIGNAGE FOR BABY FEEDING	27/04/2015   30/04/2015	<p>In both hospitals please replace baby feeding signs, by replacing 'bottle' sign with 'nursing mother' sign.</p> <p>In both hospitals please replace signs, by replacing 'bottle' sign with 'nursing mother' sign. Basic costs provided to date are Glasgow Signs - [REDACTED]; Signbrand - [REDACTED] (for updating interactive way finding templates).</p> <p>PM agreed to provide a PMI to confirm the way forward.</p>	

3701	PMI 385 -	Aseptic Suite - Add to BMS	27/04/2015 30/04/2015	Please provide a cost to connect 2no. cold rooms located within the Aseptic Suite to the BMS for monitoring temperature and providing alarms for out of specification conditions. DW advised that this matter was currently with Mercury.	
3710	PMI 386 -	NEW HOSPITALS - GOVAN ROAD WHITE LINING	28/04/2015 30/04/2015	Please install additional white road markings as per the attached drawing from Glasgow City Council. GW noted that the works had been completed the previous day	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time.	
3714	PMI 388 -	CHILDREN'S HOSPITAL - TEENAGE CANCER TRUST ROOM TCT 002	29/04/2015 30/04/2015	Please proceed to supply and fit HW F&R, CW feed and drainage to TCT 002 from adjacent room. PM noted that he understood the works were being progressed.	
3723	PMI 389 -	NEW HOSPITALS EXTERNAL SIGNAGE - ADDITIONAL TEMPORARY SIGNS	01/05/2015	Please procure and install the signage as per the attached sketch drawings.  Please procure and install the signage as per the attached sketch drawings. Signs to be plastic, white background with dark blue lettering to match typeface of signs installed by Glasgow Signs. Sign in grass area off Langlands Drive to have support posts to be driven into ground, eg not metal with concrete foundation. These signs are temporary until the new signage system beds down. Note remove NHS and Scot Gov signs on fence to Phase 3A compound.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15075	CE 096	Group 5 Installation - Dilapidation Works	30/04/2015	Please proceed with works as established under PMI 349 to complete decoration of rooms post completion of Gp 5 equipment installation works.	
15076	CE 097	ADULT HOSPITAL RETAIL UNITS - SPRINKLER COMMISSIONING	30/04/2015	Works identified under PMI 355 to drain down and re fill sprinkler systems within the two retail units for M&S and WH Smith.

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) **GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) **FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015)**
- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursor low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DHadvised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015)FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed

then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan. (19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015) **FS advised that the Schiehallion tests had been completed. FS would need to check if ABrennan had been asked to return to site to carry of the hatches at nuclear medicine. (30/04/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) **DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) **FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) **FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL**

are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015)

- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as a record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015)
- Dental pendant – FS enquired about the height of the dental pendant and enquired if it was too low. DH enquired if it had been fitted as per the signed off drawing and FS agreed to double check this (26/03/2015) GB noted that there had been a discussion a while past about the height. It was agreed this item could be closed. (30/04/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015) PM noted that DH is going to get a C&B Rep to provide an overview of the new regs. The Plan is to prepare process of who does what, etc. GB. FS and DW to attend the session for BMCL being organized by DH. (30/04/2015)
- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015)
- Outward opening doors – it was noted that correspondence could not be found which advised that the doors should have been changed and it was acknowledged that it appeared odd. GB noted that the drawing had been signed off as outward facing doors and the doors had been fitted as per drawing. FS agreed to liaise with TDSL to progress this matter – 2 instances are Plaster room adult hospital and 2<sup>nd</sup> floor NCH ARU . (02/04/2015) Item closed (30/04/2015)
- HAI Scribe theatres – PMI to be provided. Partition to be constructed - doors and vents to be taped up, etc. (30/04/2015)
- RAG Cooling – DH noted that BMCL were reviewing the cooling arrangements (30/04/2015)
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015)
- Compound area on ground floor Car Park – AF requested that the compound area be moved asap. (30/04/2015)
- Signage at Main door – AF advised that he expected this to be onsite w/c 04/05/2015. GW to liaise with Land Eng who are procuring the sign. PM advised that he needed the external and road signage concluded asap. GB noted that Land Eng were to have their works completed by 04/05/2015. PM advised that Natasha had carried out a walkround and had identified that there is signage missing. Natasha has prepared a report regarding the missing signage. Norsigns to be asked to confirm that they think they have completed all their signage. DH noted that a sign at Labs 1/CT Room (Interventional) needed to be swapped over (30/04/2015)
- Pharmacy – Road Crossing – PM enquired if BMCL could splay the hoarding so that the sight lines are better and this was confirmed.

- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof.
- Link to neonatal – it was acknowledged that the link is ready for use but that the flashings were to be completed. DW was requested to liaise with IP. DH noted that the swipe card access needed to be swapped over as Maternity gets locked down at night. There was a query re 2 means of escape and it had been requested that the break glass be left in. (30/04/2015)
- VIE turning circle – FS agreed to check the status of the works and feedback to PM.
- Doors/Door hinges – It was advised that BMCL had witnessed doors within the hospitals being badly treated and that there is damages occurring. BMCL can carry out the repairs however do the NHS want BMCL to do and keep a note off so can recoup costs. PM requested that any damage door notifications be provided to PM so that the NHS can decide who does any remediation works. BMCL continue to deal with defects. FS showed a damaged door hinge. FS advised that he would liaise with TDSL re the door hinges. (30/04/2015)
- Office Moves – AF noted that it had been proposed to vacate the cabins by end of May and for everyone to move across to Ward 20. Further to seeing the area available for use by BMCL it was considered to be too small to accommodate all the BMCL personnel who will be moving off site. BMCL would be putting a small office/couple of portacabins onto the site – Gillon Armstrong and Paul McGuinness would use these offices. PM agreed to consider the way forward for the NHS staff who need to relocate. (30/04/2015)
- Surface Car Park – it was noted that a few comments had been made by GCC Planners i.e. reposition of entrance road, some more soft landscaping – Land Eng will be requested to update drawings and thereafter BMCL would discuss with PM (30/04/2015)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 13/05/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p> <p>DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
2465 0	BMCE-EWN-000155	Anticipated completion date of works on PMI 347 Radio Nuclide drainage	03/04/2015	Following receipt of the programme from Crawford plumbing, works are due to commence Tuesday 7th April for 6 weeks. Therefore works will not be complete until w/c 18th May 15	
			23/4/2015	FS advised that the works are ongoing. DL noted that SEPA are scheduled to visit the site early w/c 27/04 and this was an area that they would look at. FS suggested that it would take circa 2 weeks to complete this area once the materials are onsite.	
			30/04/2015	DH advised that testing was programmed to be carried out on Friday . FS noted that the works in this area	

			07/05//2015	would be completed by 8 <sup>th</sup> May 2015. FS advised that the works had been completed – he would check the decor asap. It was agreed this item could be closed.	
2494 5	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015 07/05//2015	Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works GB advised that GArmstrong is liaising with GForsyth. BMCL are awaiting a PMI to confirm the way forward.	
2495 7	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015 07/05//2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed GB advised that GArmstrong is liaising with GForsyth and further pipe had been discovered and it was thought that it may be a gas pipe.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 13/05/2015

							
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p>			

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 13/05/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	
			15/01/2015		

A51679245

			<p>22/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>29/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>05/02/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>12/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>19/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>26/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>05/03/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>12/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>19/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.</p> <p>26/03/2015 GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.</p> <p>02/04/2015 PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.</p> <p>23/4/2015 PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.</p> <p>30/04/2015 PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.</p> <p>07/05/2015 GW noted that a CE was required urgently for this item. PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review</p>
--	--	--	--

				asap.	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	<p>Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.</p> <p>The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.</p> <p>Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.</p> <p>05/02/2015 GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.</p> <p>12/02/2015 PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.</p> <p>19/02/2015 PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.</p> <p>26/02/2015 PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015</p> <p>05/03/2015 PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.</p> <p>12/03/2015 PM advised that he had informally heard that the shelters will be available from April.</p> <p>19/03/2015 PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.</p> <p>26/03/2015 PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.</p> <p>02/04/2015 PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CEfor the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW suggested that the masterplan would need to be updated and there would be a design cost incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised</p>	

			<p>23/04/2015</p> <p>30/04/2015</p> <p>07/05/2015</p>	<p>that the stances do not work without the kicked out section and a drawing should be issued to tell them what has been done.</p> <p>PM advised that he had met on site the previous day with Trueform. An alternate plan is being worked through which would mean that there may be less granite to be lifted. PM is liaising with PMc and PMc is liaising with Land Eng. GW npted that BMCL would need to do a revised Land Eng cost PM advised that different stances would need different amounts of granite lifted – some less/some more and suggested that the cost be left as is for now and once the works are complete final cost can be identified. The costs for the sharks fin and light column were to be rolled into one CE.</p> <p>GW advised that the costs had been provided for this item the previous day along with costs for PMI 355 and PMI 359. PM to advise where costs are to be uploaded to. PM advised that it would be a single CE covering the 3 PMIs and he would liaise with AKerr.</p> <p>PM advised that he would be meeting with AKerr w/c 11/05/2015 to plan/agree the CE.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>07/05/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>PM advised that an amendment would be advised via a separate PMI.</p> <p>It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p> <p>PM advised that the core cutting was ongoing and that the shelters were due to arrive w/c 11<sup>th</sup> May 2015.</p>	

3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A. Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building.	
			12/02/2015	GW advised this is WIP to obtain costs.	
			19/02/2015	Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution.	
			26/02/2015	GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL requested that the programme be discussed with KC.	
			05/03/2015	DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.	
			12/03/2015	DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.	
			19/03/2015	It was noted that costs are awaited.	
			26/03/2015	GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.	
			02/04/2015	GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.	
			22/04/2015	FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].	
			30/04/2015	PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.	
			07/05/2015	PM advised that the costs did not appear to be value for money and DR has subsequently reviewed the costs and would discuss with GW.	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.	
			19/02/2015	Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward.	
			26/02/2015	GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses	

			<p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>07/05/2015</p>	<p>to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p>	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p>	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be</p>	

			02/04/2015	organized in due course. DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.	
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.	
			30/04/2015	PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.	
3406	PMI 349	NEW HOSPITALS GROUP 5 INSTALLATION - DILAPIDATION WORKS	19/02/2015	Completion of Group 5 rooms in main Imaging Departments. The Board request costs for the reinstatement and completion of finishes, M&E and associated works to ground and first floor Imaging areas following completion of the Group 5 equipment installation.	
			26/02/2015	The scope of the works is as set out in the attached Dilapidation Review which reflects current status and records both additional and deferred works. GW noted that costs are ongoing.	
			05/03/2015	GW advised he would upload costs later that day – these were currently being double checked and were circa [REDACTED] – GW has a detailed breakdown. DH enquired if the works could be completed in the time. GW advised that the works could be completed in time as long as BMCL can get access to rooms – it would be tight though	
			12/03/2015	GW advised that works have been commenced and costs uploaded for NHS. DH advised that the costs needed to be ratified. GW noted that the Seeka(?) paint in a non-standard colour has a long lead time. AF noted that Baxter & Gillespie should be advised to order the paint so as there is no impact to programme. AStephen had been requested to provide a programme for the imaging works. AF suggested that AStephen should meet with DH.	
			19/03/2015	DH advised that he had met with AStephen. Dates had been identified and provided to FW for review. GW advised that a CE to cover these works was required asap. GW noted that the BMCL year end is 24 <sup>th</sup> March 2015. GW agreed to liaise with DR.	
			26/03/2015	GW advised that he understood that the NHS were having a debate. DH noted that he was comfortable with the costs for the access control rooms, corridors, etc but he did not accept the costs for toilets, offices, etc. DH acknowledged that the works in these areas may not have been able to be finalized so there may be an out of sequence working cost but not a redecoration cost. GW advised that he has double checked the pricing and BMCL are satisfied with the pricing. AStephen to be requested to advise DH why redecoration is required to toilets, etc. DH noted that re flooring – there would need to be a re-measure of the works they actually do.	
			02/05/2015	DH noted that he had some queries regarding the quote. GW advised that he had an independent check carried out on the decoration and it was thought to be correct. The AC Flooring rep would need to be asked to confirm what works he had done.	
			22/04/2015	GW advised that the painting information had been rechecked as being correct. Tge flooring information was to be revised circa [REDACTED] to be reduced to [REDACTED]. GW suggested that a CE to the value of [REDACTED] should be provided. PM agreed to liaise with DH on his return from leave and to issue the CE on 27/28 <sup>th</sup> April.	

			30/04/2015 07/05/2015	GW advised that costs had been uploaded and that BMCL needed a CE for this item urgently. It was noted that this item was closed. CE 096 issued.	
3457	PMI 352	NCH ED & Radiology Power PMI	04/03/2015  05/03/2015  12/03/2015  19/03/2015  26/03/2015  02/04/2015  22/04/2015  30/04/2015  07/05/2015	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p> <p>DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.</p> <p>DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p> <p>DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.</p> <p>DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.</p> <p>DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.</p> <p>FS advised that the power was in however he would need to check about the data. GW noted that this was being financed through the contingency sum and that he was not expecting a CE for this item.</p> <p>FS confirmed that the data works had been concluded. GW noted that he would need to budget transfer from PMI 328 (circa 17k). PM agreed to check with MMacleod and check that the works are complete.</p> <p>PM noted that he had discussed this with DL and PM proposed to issue a CE for [REDACTED] (cross ref CE 100 )</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows:</p>	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015  22/04/2015 29/04/2015  07/05/2015</p>	<p>The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap.</p> <p>GW advised that this is under review by Paul.</p> <p>It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p> <p>PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel.</p> <p>GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc.</p> <p>PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions.</p>	
3480	PMI 355 -	Retail Units - Sprinkler Commissioning	<p>10/03/2015   19/03/2015 26/03/2015 02/04/2015 22/04/2015  30/04/2015 07/05/2015</p>	<p>The Board request a quotation for the following elements of work associated with the Fire Suppression System.</p> <ul style="list-style-type: none"> <li>• Drain down of system to allow connection of Tenants' system and associated refilling.</li> <li>• Final commissioning of the Tenants Fire Suppression system into the main Hospital network.</li> </ul> <p>GW noted that cost awaited from Mercury.</p> <p>GW noted that cost awaited from Mercury.</p> <p>DP advised that he would discuss with EMcl in order to push on the availability of the cost info.</p> <p>GW advised that costs had been uploaded to Sypro the previous day. PM advised that he would issue a CE asap.</p> <p>GW advised that cost is circa [REDACTED] and PM agreed to provide a CE asap.</p> <p>It was agreed this item could be closed as CE 097 issued.</p>	
3483	PMI 357 -	Cold Water Supplies and Outlets - Renal	<p>10/03/2015</p>	<p>The Board request a quotation &amp; programme (high level) to provide (renal quality) mains cold water supplies &amp; outlets suitable for direct connection of single RO Units in the following rooms:</p> <ul style="list-style-type: none"> <li>* RENW - 019</li> <li>* RENW - 021</li> <li>* RENW - 025</li> <li>* RENW - 026</li> <li>* RENW - 030</li> <li>* RENW - 032</li> </ul> <p>The supplies should be located so that other related services such as power &amp; earth connections can be used in conjunction.</p> <p>These water supplies are intended to act as contingency in the event of urgent dialysis requirement</p>	

			19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015	during heat sanitisation of the main level 4 loop. DH advised that CG had been party to discussions. GW advised that costs awaited from Mercury. DH provided an overview of the suggested works. GW noted that this item would require a Building Warrant. DH advised that this matter relates to Patient Safety. DP advised that he would get the works progressed. DH advised that cost info is still to be provided. DP advised that this was being priced up. GW advised that he would upload the cost to Syro asap. FS advised that there is a VE option that is complaint and a cost is awaited for this. FS advised that LJamieson is chasing up costs. DH noted that a revised quote had been uploaded the previous day. DH advised that the works needed to be instructed asap. PM advised that he would provide a CE asap. It was agreed this item could be closed as CE 098 issued.	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015 26/03/2015 22/04/2015 30/04/2015 07/05/2015	Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action. It was noted that an instruction had been issued the previous Friday to commence the works. GW advised that the costs would be discussed on the basis of the actual works carried out. GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme. PM noted that cost information was awaited	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off. FS advised that the rep has confirmed to be on site w/c 13/04/2015 FS advised that the glass had been replaced. GW noted that the costs are awaited from Henshaw. PM advised that a CE would be provided once the costs were known. PM noted that cost information was awaited so that the CE could be issued. It was suggested that the cost may now be on the system and PM agreed to check.	

3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015  02/04/2015 23/04/2015 07/05/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance. Cross ref PMI 333 PM noted that the works had been done. PM agreed to provide the CE	
3565	PMI 370	CHILDREN'S HOSPITAL - 2 No. SENSORY ROOMS DCFP-050 & GW3-049	24/03/2015  02/04/2015 23/04/2015 30/04/2015 07/05/2015	Please proceed and install additional power outlets and trunking as indicated on the attached drawings, YR1E/01/14 Rev.5 and YR2CWE/06/14 Rev.4 dated 20th March 2015.  In parallel provide cost and timescale, desired completion by end of April 2015. It was noted that it is WIP to price the works GB advised that there was a query re power sockets on the floor i.e. do you expect BMCL to core the floor. PM requested that GB discusses with PM separately and brings the drawing. PM advised that he understood what works are going to be done. GW noted that the costs had been uploaded to Sypro. PM agreed to provide a CE asap. It was agreed that this item could be closed – CE 099 issued. DW noted that the works had commenced.	
3566	PMI 371 -	REGENERATION KITCHENS - COMMANDO SOCKETS	24/03/2015  26/03/2015 02/04/2015 23/04/2015 30/04/2015 07/05/2015	Please provide 16A supply outlets for all regeneration food trolleys in these rooms (nom 80 tbc). The Board confirm that 16A commando sockets are required in Regeneration Kitchens, at each regeneration trolley location and that these should be installed on pattress mount to avoid damage from repetitive use. It was noted that BMCL have been advised that new breakers will be required and that PMI with Mercury for preparation of design. GB advised that design awaited and fee from WW. DP advised that MR is looking at a potential 'workround' to this request – there is a query re breaker type. It was noted that works are ongoing and BMCL are finalizing the costs. DH noted that he had been advised the previous day that the works had been completed. PM advised he was awaiting the cost info. PM noted that cost information was awaited. GB suggested that the cost may now have been uploaded and PM agreed to check. (Cross ref CE101)	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult	

			23/04/2015 30/04/2015  07/05/2015	<p>theatres first followed by Children's theatres.</p> <p>PM advised that the works are complete and costs are awaited.</p> <p>DH requested that BMCL confirm that the works had been completed as there was 1 room in interventional which did not appear to be completed.</p> <p>PM noted that cost information was awaited. GB suggested that the cost may now have been uploaded and PM agreed to check.</p>	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015  23/04/2015 30/04/2015  07/05/2015	<p>Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.</p> <p>Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.</p> <p>FS advised that it is WIP to source the fixings/fittings. AF enquired if it would be possible to get sign-off from the service before BMCL carry out the works and this was agreed.</p> <p>GB advised that samples being prepared. BMCL Have a query re the toilet/toilet seat. GB to liaise with GW re Mercury.</p> <p>PM advised that he would agree the WC. GB noted that he thought the WC had been agreed. PM advised that BMCL should change the WC.</p>	
3610	PMI 375	CHILDREN'S HOSPITAL ENTRANCE VESTIBULE - ATM MACHINE BASE	07/04/2015  23/04/2015 30/04/2015 07/05/2015	<p>Please proceed and prepare base for 2 No ATM's as per attached drawing.</p> <p>Please provide a quotation and proceed with the works for the removal of a section of matwell 1380 x 710mm as indicated on the attached sketch. The resultant void to be filled with painted (black) plywood board with brushed aluminium trim. Plywood to be level with surrounding mat well. The section of matwell that has been CAREFULLY removed should be handed over to the Board (Karen Connelly) for safe storage.</p> <p>PM noted that there were operatives on site to carry out the works. FS agreed to check with HGallagher re progress.</p> <p>PM noted that this item is to be cancelled.</p> <p>PM noted that this item had been cancelled.</p>	
3612	PMI 376 -	ADULT & CHILDREN'S HOSPITAL RADIO NUCLIDE DRAINAGE	07/04/2015  07/05/2015	<p>Proceed with works identified under PMI 347.</p> <p>The Board confirm the requirement to alter the drainage to RNM/SCH areas in accordance with the Radiation Compliance Advice Schedule dated October 2010, and as set out in BMCE Action Tracker dated 24th February 2015 noting that the action responsibility is not agreed liability.</p> <p>As PMI 347 – Item closed. Cross ref CE 094</p>	
3662	PMI 378 -	Steel Frame Supports - CT rooms	20/04/2015 23/04/2015 30/04/2015	<p>Please provide 2no. steel frame supports for injectors in ground floor CT Rooms installed with fixing plates 100mm above suspended ceiling</p> <p>FS noted that the works had been carried out. PM to review the costs.</p> <p>GW noted that cost is circa [REDACTED]. DH to confirm where costs to be allocated.</p>	

			07/05/2015	PM advised that he would liaise with DH re allocation of costs (cross ref CE 107 )	
3679	PMI 381	ARRIVAL SQUARE - 4 No. BUS CAGES (WHITE LINING)	22/04/2015 22/04/2015 07/05/2015	BMCE are instructed to mark out 4 bus cages as per the attached drawing, to include the names bus stance and individual bus cages. PM noted that the works had been completed. PM advised that he would include this item in the arrival square CE. (cross ref CE 105 )	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015  22/04/2015 30/04/2015  07/05/2015	Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.  Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel. PM noted that this is priority work DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be removed. PM advised that he is awaiting confirmation of the costs. PM suggested that Starkstrom have taken the pendant away.	
3685	PMI 383 -	ADULT THEATRES LEVEL 2 - MAIN ACCESS DOORSET D-02-THE-005	23/04/2015   30/04/2015  07/05/2015	Brookfield are instructed to supply and fit electronic locks wired to the existing swipe card reader and disengage white proximity 'hand swipe' switch. Completed installation should match those installed on bridgelink re-gen kitchens.  This double doorset has been fitted with an DORMA overdoor automatic door system, a card reader and keypad (outside), a green push button for operation (in department), and outside a hand swipe proximity switch.  Please supply electronic locks as per re-gen kitchens on adult ward floors, so that operation of doors is automatic and operated by card from outside and push button from inside department. Please disconnect white proximity swipe switch, remove and cover over with proprietary stainless steel plate. Proceed with works as quickly a possible.  Note the bulk of the system is installed bar the electronic locks. DH noted that a bolt/grabber arrangement needs to be put on the door (similar to that on the regen kitchen) so that it stops the public going straight into the recovery area. GW advised that the cost information had been uploaded earlier that day. PM noted that the works had been concluded. FS noted that the part had been taken of the regen kitchen fixing on level 7 and BMCL would replace this asap. (Cross ref CE 102 )	

3700	PMI 384 -	ADULT & CHILDRENS HOSPITAL - SIGNAGE FOR BABY FEEDING	27/04/2015  30/04/2015 07/05/2015	In both hospitals please replace baby feeding signs, by replacing 'bottle' sign with 'nursing mother' sign.  In both hospitals please replace signs, by replacing 'bottle' sign with 'nursing mother' sign. Basic costs provided to date are Glasgow Signs - [REDACTED]; Signbrand - [REDACTED] (for updating interactive way finding templates). PM agreed to provide a PMI to confirm the way forward. PM advised that he would provide a CE asap (cross ref CE 103)	
3701	PMI 385 -	Aseptic Suite - Add to BMS	27/04/2015  30/04/2015 07/05/2015	Please provide a cost to connect 2no. cold rooms located within the Aseptic Suite to the BMS for monitoring temperature and providing alarms for out of specification conditions. DW advised that this matter was currently with Mercury. DW noted that he would chase Mercury up for the costs. (Cross ref CE 106 )	
3710	PMI 386 -	NEW HOSPITALS - GOVAN ROAD WHITE LINING	28/04/2015  30/04/2015 07/05/2015	Please install additional white road markings as per the attached drawing from Glasgow City Council. GW noted that the works had been completed the previous day PM advised that he would include this item in the arrival square CE. (Cross ref CE 105 )	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015  07/05/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time. DW advised that the works had been carried out. PM advised that the costs are awaited	
3714	PMI 388 -	CHILDREN'S HOSPITAL - TEENAGE CANCER TRUST ROOM TCT 002	29/04/2015 30/04/2015 07/05/2015	Please proceed to supply and fit HW F&R, CW feed and drainage to TCT 002 from adjacent room. PM noted that he understood the works were being progressed. It was noted that works would be commencing that day (cross ref CE 104 )	
3723	PMI 389 -	NEW HOSPITALS EXTERNAL SIGNAGE - ADDITIONAL TEMPORARY SIGNS	01/05/2015  07/05/2015	Please procure and install the signage as per the attached sketch drawings.  Please procure and install the signage as per the attached sketch drawings. Signs to be plastic, white background with dark blue lettering to match typeface of signs installed by Glasgow Signs. Sign in grass area off Langlands Drive to have support posts to be driven into ground, eg not metal with concrete foundation. These signs are temporary until the new signage system beds down. Note remove NHS and Scot Gov signs on fence to Phase 3A compound. PM advised that he would check the temp signage.	
3731	PMI 390	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	06/05/2015	As part of the reprogramming process (room numbering) currently underway by Static Systems please include for the silencing of the noise alarm link from the CD Cupboards to the nurse call system, but retain the warning light link. Please issue this instruction immediately.	

3740	PMI 391	CHILDREN'S THEATRES - ADDITIONAL POWER OUTLETS IN 5 ROOMS	07/05/2015	<p>Brookfield Multiplex are instructed to proceed and procure and install additional 13A switched power outlets as set out on the attached drawings and schedule.</p> <p>These sockets are located in the following rooms THE-085, THE-092, THE-098, THE-109 and THE-114. The sockets are located either above ceiling level or on existing wall trunking at desk level, the additional sockets are for additional monitors. Access to ceiling void either via Starkstrom pendant shroud or through ceiling light fittings, in both location mount sockets close to these access points. Starkstrom will be involved in the installation and it is recommended that a co-ordination meeting is held on site to discuss prior to install of sockets proceeding. The sockets require to be installed as quickly as possible no later than 29th May 2015.</p>	
3752	PMI 392	- INS / NEUROSURGICAL ENTRANCE WORKS - ASBESTOS PIPE	12/05/2015	<p>On discovery of unidentified Asbestos pipe provide quotation for the following:</p> <ul style="list-style-type: none"> <li>• Provision of detailed safe system of work for review</li> <li>• Removal of cement based pipe by Licensed Contractor</li> </ul> <p>The post removal monitoring and testing will be arranged by Board</p> <p>Please proceed with the works to remove the section of pipe as quickly as possible.</p>	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p>	
3754	PMI 394	- ADULT HOSPITAL THEATRES - HAI SCRIBE TEMPORARY PARTITION	12/05/2015	<p>In order to complete the works to the two hybrid theatres (THE-228 &amp; THE 232) the Board request the construction of a temporary partition within the 'live' theatre corridor to segregate construction and clinical activity.</p> <p>This follows a review with clinical users and infection control. Works to include remedials to floors, walls and ceilings as required.</p>	
3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015	<p>Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 1/2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings.</p>	
3764	PMI 396 -	Sprinkler Head RCI-013	13/05/2015	<p>The Board request the relocation of 1no. sprinkler head in RCI-013, Interventional Radiology Lab, currently located between the Toshiba gantry rails and likely to incur damage upon movement of the gantry carriage.</p>	

3767	PMI 397 -	Door Access Control & Fire Escape - Conflict - Confirmation	13/05/2015	Following the identification of a conflict between door access control and fire escape the Board clarify that the fire escape should take preference at the door between RNM-017 and RAF -117 and that the swipe/exit break glass should be swapped to allow fire exit from Nuclear Medicine to Radiology as signed.	
3768	PMI 398	Isolation and removal of exit buttons	13/05/2015	The Board request the isolation and removal of exit buttons from the access control doors at the interconnection between: a) RNM 017 and RAF 117 b) RNM 001 and THE 075 in order to eliminate the risk of accidental/unmonitored access to the Nuclear Medicine Dept. Break glass door release units to be retained and covers to be fitted to reduce accidental damage.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15075	CE 096	Group 5 Installation - Dilapidation Works	30/04/2015	Please proceed with works as established under PMI 349 to complete decoration of rooms post completion of Gp 5 equipment installation works.	
15076	CE 097	ADULT HOSPITAL RETAIL UNITS - SPRINKLER COMMISSIONING	30/04/2015	Works identified under PMI 355 to drain down and re fill sprinkler systems within the two retail units for M&S and WH Smith.	
15077	CE 098	Renal Services - Cold Water Supplies and Outlets	30/04/2015	Please supply and install additional CW outlets for emergency use when main system is being run through the heat sanitisation process.	
15078	CE 099	CHILDREN'S HOSPITAL - SENSORY ROOMS ADDITIONAL POWER OUTLETS	30/04/2015	Please proceed with PMI 370 and install additional power outlets as indicated on drawings provided.	
15184	CE 100	CHILDREN'S HOSPITAL - PROVISION OF POWER SOCKETS FOR PARAGON INSTALLATION	12/05/2015	Acceptance of PMI 352 to supply and install additional power outlets in NCH ED and Radiology departments. Funded from YCC. Agreed cost [REDACTED] incl OH+P but excluding VAT.	
15185	CE 101	ADULT & CHILDRENS HOSPITAL - REGENERATION TROLLEY POWER OUTLETS	12/05/2015	Supply and install 16 A commando style outlets for all regeneration food trolley locations (nom 80 No.) as set out in PMI 371. Proceed and install. Agreed cost [REDACTED] incl OH+P but excluding VAT.	
15186	CE 102	ADULT THEATRES - MAIN ENTRANCE DOORSET D-02-THE-005	12/05/2015	Supply and install exlectronic lock (2No.) to existing door security installation as set out in PMI 383. Dsconnect white proximity switch. Agreed cost [REDACTED] incl OH+P but excluding VAT.	
15187	CE 103	ADULT & CHILDRENS HOSPITALS - SIGNAGE FOR BABY FEEDING	12/05/2015	Proceed with work to change signs as set out in PMI 384.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
15188	CE 104	CHILDRENS HOSPITAL -	12/05/2015	Proceed and install water and drainage services to rooms as set out in PMI 388.	

A51679245

		WORK TO ROOMS TCT 002 & SCH 077		Agreed cost [REDACTED] incl OH+P but excl VAT.	
15189	CE 105	ARRIVAL SQUARE & GOVAN ROAD - ADDITIONAL WHITE LINING	12/05/2015	<p>Proceed with works included in PMI 381 4 No Bus Cages and PMI 386 GCC changes to Govan Rd white lining.</p> <p>Agreed costs  PMI 381 - [REDACTED] incl OH+P but excluding VAT  PMI 386 - [REDACTED] incl OH+P but excluding VAT  Total - [REDACTED] ex VAT</p>	
15190	CE 106	ASEPTIC SUITE 2 @ COLD ROOMS - CONNECTION TO BUILDING MANAGEMENT SYSTEM	12/05/2015	<p>Please proceed and connect 2 No. cold rooms in the aseptic suite to the BMS.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	
15192	CE 107	GROUND FLOOR CT ROOMS	12/05/2015	<p>Proceed with works set out in PMI 378 to provide steel support plates for CT injectors 100mm above ceilings as directed.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMCL so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) **GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is

expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) **It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015)**

- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DH advised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015) FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan. (19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015) FS advised that the Schiehallion tests had been completed. FS would need to check if ABrennan had been asked to return to site to carry of the hatches at nuclear medicine. (30/04/2015) **FS advised that AB (team) is due back on site on 12/05/2015 to conclude checking (07/05/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) **DW advised that he would seek a status update (07/05/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) **DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the

previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015) DW advised that BMCL are chasing up electrician visit to site (07/05/2015)

- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015)
- Ceiling tiles – it was noted that BMCL had carried out a survey post completion re damaged/dirty tiles/decoration and that BMCL are now concerned about who has responsibility for cleaning up/installing tiles damaged by the NHS contractors. PM advised that BMCL should upload the ceiling tile survey to Aconex as as record of the works that BMCL needed to undertake. (26/03/2015) AF advised that he had noticed that there were more ceiling tiles out. FS advised that he was still doing the ultimate sweep on the ground floor. (02/04/2015) FS advised that he was of the understanding that BMCL were not to replace ceiling tiles as this is now an NHS matter (07/05/2015)
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015) PM noted that DH is going to get a C&B Rep to provide an overview of the new regs. The Plan is to prepare process of who does what, etc. GB. FS and DW to attend the session for BMCL being organized by DH. (30/04/2015) PM noted that a meeting had taken place. The process for RAMS/CDMC was being written up. FS advised that BMCL had given back all their access cards (07/05/2015)
- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015)
- HAI Scribe theatres – PMI to be provided. Partition to be constructed - doors and vents to be taped up, etc. (30/04/2015) Item closed however PMI to be provided. (07/05/2015)

- RAG Cooling – DH noted that BMCL were reviewing the cooling arrangements (30/04/2015) DW advised that there is still a cooling issue on level 1. The scanner installed is different to what the design is based upon. WIP to conclude (07/05/2015)
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015)
- Compound area on ground floor Car Park – AF requested that the compound area be moved asap. (30/04/2015) FS advised that this is WIP to remove and would be concluded over the weekend (07/05/2015)
- Signage at Main door – AF advised that he expected this to be onsite w/c 04/05/2015. GW to liaise with Land Eng who are procuring the sign. PM advised that he needed the external and road signage concluded asap. GB noted that Land Eng were to have their works completed by 04/05/2015. PM advised that Natasha had carried out a walkround and had identified that there is signage missing. Natasha has prepared a report regarding the missing signage. Norsigns to be asked to confirm that they think they have completed all their signage. DH noted that a sign at Labs 1/CT Room (Interventional) needed to be swapped over (30/04/2015) FS advised that he will get the signage at the front door checked (07/05/2015)
- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof. (30/04/2015) GB noted that proposals had been received and was with Ginkgo. GB would provide information to the NHS once proposal is finalized (07/05/2015)
- Link to neonatal – it was acknowledged that the link is ready for use but that the flashings were to be completed. DW was requested to liaise with IP. DH noted that the swipe card access needed to be swapped over as Maternity gets locked down at night. There was a query re 2 means of escape and it had been requested that the break glass be left in. (30/04/2015) PM noted that there is a gap in the ceiling tile finishes. FS agreed to review and remediate. FS advised that he had met with IP and been advised of the light issue. DW will check if the lights have a PIR sensor (07/05/2015)
- VIE turning circle – FS agreed to check the status of the works and feedback to PM. (30/04/2015) FS advised that there is a street light column in the way and that the works would be complete the following week. (07/05/2015)
- Office Moves – AF noted that it had been proposed to vacate the cabins by end of May and for everyone to move across to Ward 20. Further to seeing the area available for use by BMCL it was considered to be too small to accommodate all the BMCL personnel who will be moving off site. BMCL would be putting a small office/couple of portacabins onto the site – Gillon Armstrong and Paul McGuinness would use these offices. PM agreed to consider the way forward for the NHS staff who need to relocate. (30/04/2015) PM suggested that the NHS Team would be moving to the Management Building (07/05/2015)
- Surface Car Park – it was noted that a few comments had been made by GCC Planners i.e. reposition of entrance road, some more soft landscaping – Land Eng will be requested to update drawings and thereafter BMCL would discuss with PM (30/04/2015) GB advised that he had fed back to Land Eng and that Land Eng are progressing with the updated drawings. GB would chase up the return of the docs. (07/05/2015)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 13/05/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works.</p> <p>DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05//2015 14/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p> <p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
2494 5	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015  07/05//2015	<p>Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works</p> <p>GB advised that GArmstrong is liaising with GForsyth. BMCL are awaiting a PMI to confirm the way forward.</p>	

24957	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015 07/05/2015 14/05/2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed GB advised that GArmstrong is liaising with GForsyth and further pipe had been discovered and it was thought that it may be a gas pipe. FS noted that more underground services had been discovered.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 13/05/2015

					
SypriD	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p>	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015	The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 13/05/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p>	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	

A51679245

			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.
			19/03/2015	GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.
			23/4/2015	PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.
			30/04/2015	GW noted that a CE was required urgently for this item.
			07/05/2015	PM requested that GB issued the drawings is PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review

			14/05/2015	<p>asap.</p> <p>PM noted that he had received the drawings in autocad and would try to locate software to open them.</p>	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	<p>30/01/2015</p> <p>05/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.</p> <p>The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.</p> <p>Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council.</p> <p>GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.</p> <p>PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.</p> <p>PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.</p> <p>PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015</p> <p>PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.</p> <p>PM advised that he had informally heard that the shelters will be available from April.</p> <p>PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.</p> <p>PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.</p> <p>PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CE for the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW suggested that the masterplan would need to be updated and there would be a design cost incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised</p>	

			<p>23/04/2015 that the stances do not work without the kicked out section and a drawing should be issued to tell them what has been done.</p> <p>30/04/2015 PM advised that he had met on site the previous day with Trueform. An alternate plan is being worked through which would mean that there may be less granite to be lifted. PM is liaising with PMc and PMc is liaising with Land Eng. GW npted that BMCL would need to do a revised Land Eng cost PM advised that different stances would need different amounts of granite lifted – some less/some more and suggested that the cost be left as is for now and once the works are complete final cost can be identified. The costs for the sharks fin and light column were to be rolled into one CE.</p> <p>07/05/2015 GW advised that the costs had been provided for this item the previous day along with costs for PMI 355 and PMI 359. PM to advise where costs are to be uploaded to. PM advised that it would be a single CE covering the 3 PMIs and he would liaise with AKerr.</p> <p>14/05/2015 PM advised that he would be meeting with AKerr w/c 11/05/2015 to plan/agree the CE. PM advised that he would provide a CE asap</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015 Relocate lighting column to avoid bus stop.</p> <p>12/02/2015 The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>19/02/2015 PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>26/02/2015 PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>05/03/2015 PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>12/03/2015 PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>19/03/2015 PM advised that an amendment would be advised via a separate PMI.</p> <p>26/03/2015 It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>07/05/2015 PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p> <p>14/05/2015 PM advised that the core cutting was ongoing and that the shelters were due to arrive w/c 11<sup>th</sup> May 2015. PM noted that works are ongoing</p>	

3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p>	<p>The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A. Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p> <p>GW advised this is WIP to obtain costs.</p> <p>Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution.</p> <p>GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</p> <p>DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.</p> <p>DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>It was noted that costs are awaited.</p> <p>GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p> <p>FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].</p> <p>PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.</p> <p>PM advised that the costs did not appear to be value for money and DR has subsequently reviewed the costs and would discuss with GW.</p> <p>DH advised that DR and GW have discussed at GW is reviewing the scope of works and the associated costs. DH suggested that it would be beneficial for DH, CG and GW to discuss the</p>	

				scope of works. The engineers had advised that the drainage isn't big enough if all the machines are running and discharging at the same time. GB noted he had previous experience of this situation in another project and that an attenuation drain had to be built in.	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015 14/05/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31 <sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015 DP advised that the design is due to be provided imminently. DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap. PM and DL to discuss/agree the way forward asap. PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly. PM advised that the information is with IP for review. DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015 26/02/2015 05/03/2015 12/03/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015. GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer. PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. . GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however	

			<p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>14/05/2015</p>	<p>BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</p> <p>DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.</p>	
3457	PMI 352	NCH ED & Radiology Power PMI	<p>04/03/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p>	<p>The Board confirm that the additional electrical works required for the Paragon installation to NCH ED &amp; Radiology are to be undertaken in accordance with the attached drawings and are to be included within the costs allocated to PMI 328</p> <p>DP enquired if there had been any discussion re what wiring is wanted. DH advised that he understood that MRoss has discussed this with MMacleod and Paragon.</p> <p>DP advised that it was understood what is to be done. DH advised that the Charity would be paying for these works.</p> <p>DH advised that this matter is being funded separately by the charity therefore once the costs have been provided then a CE could be provided. GW noted that a Building Warrant was required for this item.</p> <p>DH advised that these works need to be completed by 30/03/2015. DP noted that he understood the works were currently being done. GW noted that he would provide the cost asap. DP advised that GW would instruct the works and he would follow-up the instruction with a phone call.</p> <p>DH noted that the Paragon works had been agreed between BMCL and Mercury and are trying to get the materials on site asap. Mercury have advised that to complete the works by Tuesday is not possible. Mercury advised that need to push on these works. GW advised that the cost had been uploaded to Sypro the previous day.</p> <p>FS advised that the power was in however he would need to check about the data. GW noted that this was being financed through the contingency sum and that he was not expecting a CE for this item.</p> <p>FS confirmed that the data works had been concluded. GW noted that he would need to budget transfer from PMI 328 (circa 17k). PM agreed to check with MMacleod and check that the works are complete.</p>	

			07/05/2015	PM noted that he had discussed this with DL and PM proposed to issue a CE for (cross ref)	
			14/05/2015	It was agreed that this item was closed.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>05/03/2015 GW advised that he would upload the costs asap. 19/03/2015 GW advised that this is under review by Paul. 26/03/2015 It was noted that GB is awaiting info re design fees, etc. 02/04/2015 GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap. 22/04/2015 PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel. 29/04/2015 GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc. 07/05/2015 PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions.</p> <p>14/05/2015 GB advised that the design strategy and fire strategy checks. The information was back with Paul.</p>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	20/03/2015	<p>Undertake trial digs to investigate unknown underground services.</p> <p>Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.</p> <p>26/03/2015 It was noted that an instruction had been issued the previous Friday to commence the works. 22/04/2015 GW advised that the costs would be discussed on the basis of the actual works carried out. 30/04/2015 GB suggested that investigative works were ongoing and that an asbestos pipe had been</p>	

			07/05/2015 14/05/2015	discovered. GW noted that BMCL would need to review the programme. PM noted that cost information was awaited FS noted that investigation works are ongoing	
3557	PMI 367	ADULT HOSPITAL - LEVEL 10 ROOM WS10-006	23/03/2015  26/03/2015  02/04/2015 22/04/2015 30/04/2015 07/05/2015  14/05/2015	Please replace broken window to this room. The window to this room (nom. 2m x 1m) has been found to be shattered with glass remaining in place. The room has been locked off, and the atrium at Level 0 has been cordoned off. Please discuss and develop with the installer a safe method of removal of the glass and as quickly as possible procure a replacement and have installed. Note the panel is a single pain. Please also establish with the installer the likely cause of the breakage. Refer attached photos. FS noted that he had been advised that it will be 2 weeks to get the glass on site. BMCL will keep the area barriered off and access to the room locked off. FS advised that the rep has confirmed to be on site w/c 13/04/2015 FS advised that the glass had been replaced. GW noted that the costs are awaited from Henshaw. PM advised that a CE would be provided once the costs were known. PM noted that cost information was awaited so that the CE could be issued. It was suggested that the cost may now be on the system and PM agreed to check. FS advised that this item could be closed.	(CE 108 )
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015    02/04/2015 23/04/2015 07/05/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance. Cross ref PMI 333 PM noted that the works had been done. PM agreed to provide the CE	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015   23/04/2015 30/04/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres. PM advised that the works are complete and costs are awaited. DH requested that BMCL confirm that the works had been completed as there was 1 room in interventional which did not appear to be completed.	

			07/05/2015 14/05/2015	PM noted that cost information was awaited. GB suggested that the cost may now have been uploaded and PM agreed to check. Sypro to be checked for the cost information.	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015  23/04/2015 30/04/2015 07/05/2015 14/05/2015	Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.  Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015. FS advised that it is WIP to source the fixings/fittings. AF enquired if it would be possible to get sign-off from the service before BMCL carry out the works and this was agreed. GB advised that samples being prepared. BMCL Have a query re the toilet/toilet seat. GB to liaise with GW re Mercury. PM advised that he would agree the WC. GB noted that he thought the WC had been agreed. PM advised that BMCL should change the WC. GB advised that these works were being progressed. FS noted that HGallagher is progressing the works.	(CE 109 )
3662	PMI 378 -	Steel Frame Supports - CT rooms	20/04/2015 23/04/2015 30/04/2015 07/05/2015 14/05/2015	Please provide 2no. steel frame supports for injectors in ground floor CT Rooms installed with fixing plates 100mm above suspended ceiling FS noted that the works had been carried out. PM to review the costs. GW noted that cost is circa [REDACTED]. DH to confirm where costs to be allocated. PM advised that he would liaise with DH re allocation of costs Agreed item could be closed(cross ref CE 107 )	
3679	PMI 381	ARRIVAL SQUARE - 4 No. BUS CAGES (WHITE LINING)	22/04/2015 22/04/2015 07/05/2015 14/05/2015	BMCE are instructed to mark out 4 bus cages as per the attached drawing, to include the names bus stance and individual bus cages. PM noted that the works had been completed. PM advised that he would include this item in the arrival square CE. Agreed item could be closed(cross ref CE 105 )	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF- 080	22/04/2015    22/04/2015 30/04/2015	Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.  Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel. PM noted that this is priority work DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be	

			07/05/2015 14/05/2015	removed. PM advised that he is awaiting confirmation of the costs. PM suggested that Starkstrom have taken the pendant away. PM noted that he is awaiting the cost for the isolation, etc.	
3685	PMI 383 -	ADULT THEATRES LEVEL 2 - MAIN ACCESS DOORSET D-02-THE-005	23/04/2015          30/04/2015   07/05/2015 14/05/2015	<p>Brookfield are instructed to supply and fit electronic locks wired to the existing swipe card reader and disengage white proximity 'hand swipe' switch. Completed installation should match those installed on bridgelink re-gen kitchens.</p> <p>This double doorset has been fitted with an DORMA overdoor automatic door system, a card reader and keypad (outside), a green push button for operation (in department), and outside a hand swipe proximity switch.</p> <p>Please supply electronic locks as per re-gen kitchens on adult ward floors, so that operation of doors is automatic and operated by card from outside and push button from inside department. Please disconnect white proximity swipe switch, remove and cover over with proprietary stainless steel plate. Proceed with works as quickly a possible.</p> <p>Note the bulk of the system is installed bar the electronic locks.</p> <p>DH noted that a bolt/grabber arrangement needs to be put on the door (similar to that on the regen kitchen) so that it stops the public going straight into the recovery area. GW advised that the cost information had been uploaded earlier that day.</p> <p>PM noted that the works had been concluded. FS noted that the part had been taken of the regen kitchen fixing on level 7 and BMCL would replace this asap.</p> <p>FS noted that the replacement part had been fitted. Agreed item could be closed(Cross ref CE 102 )</p>	
3700	PMI 384 -	ADULT & CHILDRENS HOSPITAL - SIGNAGE FOR BABY FEEDING	27/04/2015    30/04/2015 07/05/2015 14/05/2015	<p>In both hospitals please replace baby feeding signs, by replacing 'bottle' sign with 'nursing mother' sign.</p> <p>In both hospitals please replace signs, by replacing 'bottle' sign with 'nursing mother' sign. Basic costs provided to date are Glasgow Signs - [REDACTED]; Signbrand - [REDACTED] (for updating interactive way finding templates).</p> <p>PM agreed to provide a PMI to confirm the way forward.</p> <p>PM advised that he would provide a CE asap</p> <p>Agreed item could be closed (cross ref CE 103)</p>	
3701	PMI 385 -	Aseptic Suite - Add to BMS	27/04/2015  30/04/2015 07/05/2015	<p>Please provide a cost to connect 2no. cold rooms located within the Aseptic Suite to the BMS for monitoring temperature and providing alarms for out of specification conditions.</p> <p>DW advised that this matter was currently with Mercury.</p> <p>DW noted that he would chase Mercury up for the costs. (Cross ref CE 106 )</p>	

3710	PMI 386 -	NEW HOSPITALS - GOVAN ROAD WHITE LINING	28/04/2015 30/04/2015 07/05/2015	Please install additional white road markings as per the attached drawing from Glasgow City Council. GW noted that the works had been completed the previous day PM advised that he would include this item in the arrival square CE. (Cross ref CE 105 )	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015 07/05/2015 14/05/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time. DW advised that the works had been carried out. PM advised that the costs are awaited Noted that costs are awaited	
3714	PMI 388 -	CHILDREN'S HOSPITAL - TEENAGE CANCER TRUST ROOM TCT 002	29/04/2015 30/04/2015 07/05/2015 14/05/2015	Please proceed to supply and fit HW F&R, CW feed and drainage to TCT 002 from adjacent room. PM noted that he understood the works were being progressed. It was noted that works would be commencing that day Agreed item could be closed (cross ref CE 104 )	
3723	PMI 389 -	NEW HOSPITALS EXTERNAL SIGNAGE - ADDITIONAL TEMPORARY SIGNS	01/05/2015 07/05/2015 14/05/2015	Please procure and install the signage as per the attached sketch drawings.  Please procure and install the signage as per the attached sketch drawings. Signs to be plastic, white background with dark blue lettering to match typeface of signs installed by Glasgow Signs. Sign in grass area off Langlands Drive to have support posts to be driven into ground, eg not metal with concrete foundation. These signs are temporary until the new signage system beds down. Note remove NHS and Scot Gov signs on fence to Phase 3A compound. PM advised that he would check the temp signage. PM noted that 4 signs had been put up.	
3731	PMI 390	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	06/05/2015 14/05/2015	As part of the reprogramming process (room numbering) currently underway by Static Systems please include for the silencing of the noise alarm link from the CD Cupboards to the nurse call system, but retain the warning light link. Please issue this instruction immediately. Pm noted that cost is awaited. DW advised that CI had been issued to Mercury by BMCL.	
3740	PMI 391	CHILDREN'S THEATRES - ADDITIONAL POWER OUTLETS IN 5 ROOMS	07/05/2015	Brookfield Multiplex are instructed to proceed and procure and install additional 13A switched power outlets as set out on the attached drawings and schedule.  These sockets are located in the following rooms THE-085, THE-092, THE-098, THE-109 and THE-114. The sockets are located either above ceiling level or on existing wall trunking at desk level, the additional sockets are for additional monitors. Access to ceiling void either via Stakstrom pendant shroud or through ceiling light fiments, in both location mount sockets close to these access points. Starkstrom will be involved in the installation and it is recommended that a co-ordination meeting is held on site to discuss prior to install of sockets proceeding. The sockets require to be installed as quickly as possible no later than 29th May 2015.	
3752	PMI 392	- INS / NEUROSURGICAL ENTRANCE WORKS - ASBESTOS PIPE	12/05/2015	On discovery of unidentified Asbestos pipe provide quotation for the following: <ul style="list-style-type: none"> <li>Provision of detailed safe system of work for review</li> <li>Removal of cement based pipe by Licensed Contractor</li> </ul> The post removal monitoring and testing will be arranged by Board	

3768	PMI 398	Isolation and removal of exit buttons	13/05/2015	The Board request the isolation and removal of exit buttons from the access control doors at the interconnection between: a) RNM 017 and RAF 117 b) RNM 001 and THE 075 in order to eliminate the risk of accidental/unmonitored access to the Nuclear Medicine Dept. Break glass door release units to be retained and covers to be fitted to reduce accidental damage. <b>DW noted that he would get this item progressed asap.</b>	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015	Please supply and install additional turfing to areas A & B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.  In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.  At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015	Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure.	
3781	PMI 402	CPS -004	19/05/2015	The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.  Costs to be allocated to PMI 328 contingency sum.

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMCL so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) **It was noted that a meeting is being organized (14/05/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and

will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) **DW noted that the switch for the valve is awaited (14/05/2015)**

- RPA – all tests will be done before the 26<sup>th</sup> January 2015 as planned. Schiehallion was always programmed to be after handover and will be included in the schedule. Cursory low grade check carried out and everything passed with exception of glass which was known about (08/01/2015) DH advised that HGallagher is liaising with ABrennan re glass thickness. (15/01/2015) DH agreed to liaise with A Brennan (22/01/2015) AF noted that the doors are expected by end Feb 2015. (05/02/2015) FS advised that FW has queried the glass, BMCL have not taken the glass out. FW has also queried the blind as this shouldn't be there. FS is checking out the blind query. Once the doors are installed then testing can be undertaken (12/02/2015). Door delivery planned for 20/02/2015. BM to contact Andy Brennan once works complete. (19/02/2015). FS advised that he proposed to contact AB imminently (05/03/2015) FS advised that testing is taking place in the dental room and Schiehallion. FS had liaised with FW. BMCL awaiting confirmation that can do the other 2 rooms. DH agreed to liaise with ABrennan. (19/03/2015) It was noted that ABrennan had been organized to be on site on 10<sup>th</sup> & 13<sup>th</sup> April to carry out checks on Schiehallion and Dental. FS will check the resource for the week prior. (26/03/2015) It was noted that the works are progressing positively. Screens are due on site on 13<sup>th</sup> April and pass through hatches work due to be undertaken w/c 6/04/2015 (02/04/2015) FS advised that the Schiehallion tests had been completed. FS would need to check if ABrennan had been asked to return to site to carry of the hatches at nuclear medicine. (30/04/2015) FS advised that AB (team) is due back on site on 12/05/2015 to conclude checking (07/05/2015) **FS advised that AB had completed all his checks the previous day. DH to check what report AB provides. Agreed item could be closed (14/05/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) **DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) **PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other

area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) + 13 advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015) DW advised that BMCL are chasing up electrician visit to site (07/05/2015) **DW advised that he had received confirmation that the Vectorfoiltec electrician will be here in the next 3 weeks – BMCL have advised that this timescales isn't good enough (14/05/2015)**

- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) **FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015)**
- 24<sup>th</sup> April 2015 – AF enquired what happens from 24<sup>th</sup> April i.e. how do BMCL approach the building. AF suggested that there should be an agreement in principle as to how to approach things. FS noted that BMCL have a meeting with the BMCL contractors on 17<sup>th</sup> April and it would be good if this information could be shared with the contractors at this meeting (02/04/2015) AF enquired about the principal contractor role from 24<sup>th</sup> April - i.e. public being in the building – this is a major risk for BMCL. (02/04/2015) PM noted that DH is going to get a C&B Rep to provide an overview of the new regs. The Plan is to prepare process of who does what, etc. GB. FS and DW to attend the session for BMCL being organized by DH. (30/04/2015) PM noted that a meeting had taken place. The process for RAMS/CDMC was being written up. FS advised that BMCL had given back all their access cards (07/05/2015) **DH agreed to circulate the note of the meeting (14/05/2015)**
- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015) **DW advised that the blue socket is not on the signed off drawings. DH agreed to check the bedhead drawings (14/05/2015)**
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015) **FS advised that BMCL were not providing a drawing however the planting as discussed would be carried out. (14/05/2015)**

- Signage at Main door – AF advised that he expected this to be onsite w/c 04/05/2015. GW to liaise with Land Eng who are procuring the sign. PM advised that he needed the external and road signage concluded asap. GB noted that Land Eng were to have their works completed by 04/05/2015. PM advised that Natasha had carried out a walkround and had identified that there is signage missing. Natasha has prepared a report regarding the missing signage. Norsigns to be asked to confirm that they think they have completed all their signage. DH noted that a sign at Labs 1/CT Room (Interventional) needed to be swapped over (30/04/2015) **FS advised that he will get the signage at the front door checked (07/05/2015) GB advised that Sheila has a solution from Natasha however there is one query. Sheila is progressing. PM noted that he had query about the external signage. (14/05/2015)**
- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof. (30/04/2015) GB noted that proposals had been received and was with Ginkgo. GB would provide information to the NHS once proposal is finalized (07/05/2015) **GB advised that BMCL were pushing Ginkgo to finalise their proposals (15/5/2015)**
- Link to neonatal – it was acknowledged that the link is ready for use but that the flashings were to be completed. DW was requested to liaise with IP. DH noted that the swipe card access needed to be swapped over as Maternity gets locked down at night. There was a query re 2 means of escape and it had been requested that the break glass be left in. (30/04/2015) **PM noted that there is a gap in the ceiling tile finishes . FS agreed to review and remediate. FS advised that he had met with IP and been advised of the light issue. DW will check if the lights have a PIR sensor (07/05/2015)**
- VIE turning circle – FS agreed to check the status of the works and feedback to PM. (30/04/2015) FS advised that there is a street light column in the way and that the works would be complete the following week. (07/05/2015) **Pm noted that works have been commenced (14/05/2015)**
- Surface Car Park – it was noted that a few comments had been made by GCC Planners i.e. reposition of entrance road, some more soft landscaping – Land Eng will be requested to update drawings and thereafter BMCL would discuss with PM (30/04/2015) GB advised that he had fed back to Land Eng and that Land Eng are progressing with the updated drawings. GB would chase up the return of the docs. (07/05/2015) **GB advised that he had received feedback form Land Eng. GB would get info from Land Eng re proposals and would provide to PM asap. (14/05/2015)**
- Hydrotherapy pool – to be raised as a EW by BMCL. FS advised that BMCL have carried out alterations at the request of the users. The rails going in need to go in on the basis on steps being there and now being told that there needs to be handrails plus steps. BMCL require confirmation of the way forward. PM agreed to liaise with MMacleod. GB noted that the existing recessed steps will remain. (14/05/2015)
- Helipad – GB advised that he is going through the folder and pulling out all the relevant info. PM advised that he would want all the info put on Zutec. DW noted that BMCL would have all the info for the helipad and it would have been given to the CAA (14/05/2015)
- Power in THE 228 to drying cabinet – noted that being advised that the power isn't live. (14/05/2015)
- Consultants – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 27/05/2015:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting. Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW. PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the works. DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW</p>	

A51679245

				advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>GB noted that collation of the Building Warrants is WIP</p> <p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	

2494 5	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015 07/05/2015 21/05/2015	Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works GB advised that GArmstrong is liaising with GForsyth. BMCL are awaiting a PMI to confirm the way forward. FS advised that BMCL are aware that there is asbestos and it is being dealt with.	
2495 7	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015 07/05/2015 14/05/2015 21/05/2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed GB advised that GArmstrong is liaising with GForsyth and further pipe had been discovered and it was thought that it may be a gas pipe. FS noted that more underground services had been discovered. FS advised that he has provided a full copy of the survey – probed all the areas	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 27/05/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established. AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL. FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works. FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks. FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015  21/05/2015	The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015. FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 27/05/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p>	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4	

A51679245

			<p>weeks post handover. An old gas main had been located so operatives are being careful working in that area.</p> <p>15/01/2015 DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed</p> <p>22/01/2015 AF suggested that there would be 4 weeks work post 26<sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.</p> <p>29/01/2015 AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.</p> <p>05/02/2015 GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31<sup>st</sup> March 2015 as is Capital Plan funded.</p> <p>12/02/2015 GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.</p> <p>19/02/2015 Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.</p> <p>19/03/2015 GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.</p> <p>26/03/2015 PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.</p> <p>02/04/2015 PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.</p> <p>23/4/2015 PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.</p> <p>30/04/2015 GW noted that a CE was required urgently for this item.</p>	
--	--	--	--	--

			07/05/2015	PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review asap.	
			14/05/2015	PM noted that he had received the drawings in autocad and would try to locate software to open them.	
3332	PMI 333	ARRIVAL SQUARE - ATTENDANCE FOR INSTALLATION OF 4 No. SHELTERS BY TRUEFORM	30/01/2015	Provide attendance by Land Engineering and BMCE Site Manager during installation, date to be agreed but expected late February or early March 2015.	
				The Board require attendance by Land Engineering to assist with the installation of 4 No. stainless steel bus shelters by Trueform Ltd. Trueform will be contracted by others. Work involves the removal granite setts for main shelter supports, cutting of blocks around legs and re-instatement to provide level surface. There may also be a requirement to lay in an additional 6m length of duct below the granite at 50mm dia, this to be confirmed.	
			05/02/2015	Initially, please provide indicative budget cost for the work to allow Board to budget for these works with Glasgow City Council. GW advised that Andy has a price from Land Eng and he wants to meet with PM to go through. PM advised that he would need a meeting with Land Eng and Truform in due course. PM does not currently have a programme for the works.	
			12/02/2015	PM advised that he had ball park figure and accepted that the Board needed to run with it. As fitted drawings had been received. Confirmation awaited from GCC when works to be programmed. DP noted that the power cables are into the manholes – generally a power point and data point at each of the shelters.	
			19/02/2015	PM confirmed date of works still outstanding following t'com with GCC on 18/02/2015. GW noted some costs still to be firmed up, further meeting to discuss.	
			26/02/2015	PM advised that feedback is awaited from GCC. GW advised that cost had been uploaded to Sypro on 25/2/2015	
			05/03/2015	PM advised that he is awaiting confirmation that the shelters are available for fitting. GW advised that the NHS could instruct BMCL to do the works so that BMCL could instruct LEng therefore holding the price with a note saying the date for the works to be confirmed. PM advised that he will organise to have a meeting with LEng when this matter can be progressed.	
			12/03/2015	PM advised that he had informally heard that the shelters will be available from April.	
			19/03/2015	PM requested that BMCL provide an indication of how long it would take to lift some granite. PM is currently in dialogue to obtain buy-in from Tru-form. Once the go-ahead has been confirmed then PM will organise for PMcGuinness to attend the Land Eng/Tru-form meeting. PM suggested that BMCL should hold off lifting any granite for now.	
			26/03/2015	PM advised that he would organise a meeting with Land Eng and Trueform shortly so a feel for he works to be undertaken can be understood i.e. what needs to be done, what are the preparation works, etc.	
			02/04/2015	PM advised that he was still not able to confirm when the NHS can get the shelters however he needed to be in a position to get the works done asap. PM advised that he would provide a PMI /CE for the column, dock and for exposure for bus shelters. AF noted that BMCL would not be keen to leave the ducts not back-filled. PM noted that GCC do all the lining at bus stances, etc. GW	

			<p>23/04/2015 suggested that the masterplan would need to be updated and there would be a design cost incurred with this. GB suggested that the RCC would potentially need to be updated. PM advised that the stances do not work without the kicked out section and a drawing should be issued to GCC telling them what has been done.</p> <p>30/04/2015 PM advised that he had met on site the previous day with Trueform. An alternate plan is being worked through which would mean that there may be less granite to be lifted. PM is liaising with PMc and PMc is liaising with Land Eng. GW npted that BMCL would need to do a revised Land Eng cost PM advised that different stances would need different amounts of granite lifted – some less/some more and suggested that the cost be left as is for now and once the works are complete final cost can be identified. The costs for the sharks fin and light column were to be rolled into one CE.</p> <p>07/05/2015 GW advised that the costs had been provided for this item the previous day along with costs for PMI 355 and PMI 359. PM to advise where costs are to be uploaded to. PM advised that it would be a single CE covering the 3 PMIs and he would liaise with AKerr.</p> <p>14/05/2015 PM advised that he would be meeting with AKerr w/c 11/05/2015 to plan/agree the CE.</p> <p>21/05/2015 PM advised that he would provide a CE asap</p> <p>PM advised that he would issue a CE covering PMI 333 and PMI 335 later that day.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015 Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>12/02/2015 PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>19/02/2015 PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>26/02/2015 PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>05/03/2015 PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>12/03/2015 PM advised that an amendment would be advised via a separate PMI.</p> <p>19/03/2015 It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>26/03/2015 PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p> <p>07/05/2015 PM advised that the core cutting was ongoing and that the shelters were due to arrive w/c 11<sup>th</sup> May</p>	

			14/05/2015 21/05/2015	2015. PM noted that works are ongoing PM noted that the column still needs to be moved.	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015  12/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015  22/04/2015  30/04/2015 07/05/2015 14/05/2015	<p>The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p> <p>GW advised this is WIP to obtain costs.</p> <p>Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution.</p> <p>GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</p> <p>DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.</p> <p>DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>It was noted that costs are awaited.</p> <p>GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p> <p>FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].</p> <p>PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.</p> <p>PM advised that the costs did not appear to be value for money and DR has subsequently reviewed the costs and would discuss with GW.</p> <p>DH advised that DR and GW have discussed at GW is reviewing the scope of works and the associated costs. DH suggested that it would be beneficial for DH, CG and GW to discuss the</p>	

				scope of works. The engineers had advised that the drainage isn't big enough if all the machines are running and discharging at the same time. GB noted he had previous experience of this situation in another project and that an attenuation drain had to be built in.	
			21/05/2015	SF to organise meeting	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015  07/05/2015 14/05/2015 21/05/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31 <sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015 DP advised that the design is due to be provided imminently. DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap. PM and DL to discuss/agree the way forward asap. PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly. PM advised that the information is with IP for review. DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately. SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015 26/02/2015 05/03/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015. GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer. PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant	

			<p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>14/05/2015</p> <p>21/05/2015</p>	<p>that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</p> <p>DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.</p> <p>SF to organize meeting</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and</p>	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015</p> <p>22/04/2015 29/04/2015</p> <p>07/05/2015</p> <p>14/05/2015 21/05/2015</p>	<p>plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap.</p> <p>GW advised that this is under review by Paul.</p> <p>It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p> <p>PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel.</p> <p>GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc.</p> <p>PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions.</p> <p>GB advised that the design strategy and fire strategy checks. The information was back with Paul.</p> <p>GW noted that the costs had been uploaded for NHS review on th 15/05/2015. PM agreed to review asap.</p>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	<p>20/03/2015</p> <p>26/03/2015 22/04/2015 30/04/2015</p> <p>07/05/2015 14/05/2015</p>	<p>Undertake trial digs to investigate unknown underground services.</p> <p>Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.</p> <p>It was noted that an instruction had been issued the previous Friday to commence the works.</p> <p>GW advised that the costs would be discussed on the basis of the actual works carried out.</p> <p>GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme.</p> <p>PM noted that cost information was awaited</p> <p>FS noted that investigation works are ongoing</p>	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	<p>24/03/2015</p> <p>02/04/2015 23/04/2015 07/05/2015 21/05/2015</p>	<p>Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings.</p> <p>Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance.</p> <p>Cross ref PMI 333</p> <p>PM noted that the works had been done.</p> <p>PM agreed to provide the CE</p> <p>PM advised that this would be included in the CE being raised for PMI 333.</p>	

3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015  23/04/2015 30/04/2015  07/05/2015  14/05/2015 21/05/2015	<p>Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.</p> <p>Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres.</p> <p>PM advised that the works are complete and costs are awaited.</p> <p>DH requested that BMCL confirm that the works had been completed as there was 1 room in interventional which did not appear to be completed.</p> <p>PM noted that cost information was awaited. GB suggested that the cost may now have been uploaded and PM agreed to check.</p> <p>Sypro to be checked for the cost information.</p> <p><b>PM advised that the cost info had been uploaded to Sypro on 14/05/2015 for NHS review.</b></p>	
3606	PMI 373	CHILDRENS HOSPITAL DCFP - ANTI-LIG REVIEW	02/04/2015  23/04/2015 30/04/2015 07/05/2015 14/05/2015 21/05/2015	<p>Please investigate the attached schedule and confirm costs as noted, to DCFP Level 4.</p> <p>Please investigate the attached schedule and confirm costs as noted, works to be complete no later than 5th June 2015.</p> <p>FS advised that it is WIP to source the fixings/fittings. AF enquired if it would be possible to get sign-off from the service before BMCL carry out the works and this was agreed.</p> <p>GB advised that samples being prepared. BMCL Have a query re the toilet/toilet seat. GB to liaise with GW re Mercury.</p> <p>PM advised that he would agree the WC. GB noted that he thought the WC had been agreed. PM advised that BMCL should change the WC.</p> <p>GB advised that these works were being progressed. FS noted that HGallagher is progressing the works.</p> <p><b>Agreed PMI to close and discussion to be progressed under CE 109</b></p>	(CE 109 )
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015  22/04/2015 30/04/2015	<p>Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.</p> <p>Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.</p> <p>PM noted that this is priority work</p> <p>DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be</p>	

			07/05/2015 14/05/2015 21/05/2015	removed. PM advised that he is awaiting confirmation of the costs. PM suggested that Starkstrom have taken the pendant away. PM noted that he is awaiting the cost for the isolation, etc. GW advised that the cost had been uploaded the previous day – he would recheck the quote for the inclusion of any Starkstrom costs as these are not to be included.	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015  07/05/2015 14/05/2015 21/05/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time. DW advised that the works had been carried out. PM advised that the costs are awaited Noted that costs are awaited GW advised that the costs had been uploaded the previous day.	
3723	PMI 389 -	NEW HOSPITALS EXTERNAL SIGNAGE - ADDITIONAL TEMPORARY SIGNS	01/05/2015    07/05/2015 14/05/2015 21/05/2015	Please procure and install the signage as per the attached sketch drawings.  Please procure and install the signage as per the attached sketch drawings. Signs to be plastic, white background with dark blue lettering to match typeface of signs installed by Glasgow Signs. Sign in grass area off Langlands Drive to have support posts to be driven into ground, eg not metal with concrete foundation. These signs are temporary until the new signage system beds down. Note remove NHS and Scot Gov signs on fence to Phase 3A compound. PM advised that he would check the temp signage. PM noted that 4 signs had been put up. GW advised that the costs had been uploaded the previous day.	
3731	PMI 390	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	06/05/2015  14/05/2015 21/05/2015	As part of the reprogramming process (room numbering) currently underway by Static Systems please include for the silencing of the noise alarm link from the CD Cupboards to the nurse call system, but retain the warning light link. Please issue this instruction immediately. Pm noted that cost is awaited. DW advised that CI had been issued to Mercury by BMCL. GW advised that the costs had been uploaded on 12/05	
3740	PMI 391	CHILDREN'S THEATRES - ADDITIONAL POWER OUTLETS IN 5 ROOMS	07/05/2015   21/05/2015	Brookfield Multiplex are instructed to proceed and procure and install additional 13A switched power outlets as set out on the attached drawings and schedule.  These sockets are located in the following rooms THE-085, THE-092, THE-098, THE-109 and THE-114. The sockets are located either above ceiling level or on existing wall trunking at desk level, the additional sockets are for additional monitors. Access to ceiling void either via Starkstrom pendant shroud or through ceiling light fiments, in both location mount sockets close to these access points. Starkstrom will be involved in the installation and it is recommended that a co-ordination meeting is held on site to discuss prior to install of sockets proceeding. The sockets require to be installed as quickly as possible no later than 29th May 2015. GW advised that the costs had been uploaded the previous day. DW noted that the timescales are becoming tight	

3752	PMI 392	- INS / NEUROSURGICAL ENTRANCE WORKS - ASBESTOS PIPE	12/05/2015	On discovery of unidentified Asbestos pipe provide quotation for the following: <ul style="list-style-type: none"> <li>Provision of detailed safe system of work for review</li> <li>Removal of cement based pipe by Licensed Contractor</li> </ul> The post removal monitoring and testing will be arranged by Board  Please proceed with the works to remove the section of pipe as quickly as possible.	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015       14/05/2015 21/05/2015	Please provide a cost to install the additional access infrastructure as detail on the attached drawing.  Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.  Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.  With the cost please provide a timescale to order materials and complete the installation. DW advised that Mercury are currently pricing. GW noted that this item was currently being priced	
3754	PMI 394	- ADULT HOSPITAL THEATRES - HAI SCRIBE TEMPORARY PARTITION	12/05/2015      21/05/2015	In order to complete the works to the two hybrid theatres (THE-228 & THE 232) the Board request the construction of a temporary partition within the 'live' theatre corridor to segregate construction and clinical activity.  This follows a review with clinical users and infection control. Works to include remedials to floors, walls and ceilings as required. GW advised that the costs had been uploaded on 12/05	
3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015  14/05/2015  21/05/2015	Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 /2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings. PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by. PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed.	
3764	PMI 396 -	Sprinkler Head RCI-013	13/05/2015  21/05/2015	The Board request the relocation of 1no. sprinkler head in RCI-013, Interventional Radiology Lab, currently located between the Toshiba gantry rails and likely to incur damage upon movement of the gantry carriage. DW noted that this item was being reviewed the previous day. Cost info will be provided asap.	

3767	PMI 397 -	Door Access Control & Fire Escape - Conflict - Confirmation	13/05/2015 14/05/2015 21/05/2015	Following the identification of a conflict between door access control and fire escape the Board clarify that the fire escape should take preference at the door between RNM-017 and RAF -117 and that the swipe/exit break glass should be swapped to allow fire exit from Nuclear Medicine to Radiology as signed. DW noted that he had asked Mercury to do the work – CI had been issued to Mercury. DW noted that agreement re what is to be done to be reached	
3768	PMI 398	Isolation and removal of exit buttons	13/05/2015 14/05/2015 21/05/2015	The Board request the isolation and removal of exit buttons from the access control doors at the interconnection between: a) RNM 017 and RAF 117 b) RNM 001 and THE 075 in order to eliminate the risk of accidental/unmonitored access to the Nuclear Medicine Dept. Break glass door release units to be retained and covers to be fitted to reduce accidental damage. DW noted that he would get this item progressed asap. DW noted that the isolation had been undertaken	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015 21/05/2015	Please supply and install additional turfing to areas A & B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.  In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest. PM noted that cost info awaited	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015 21/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.  At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage. It was agreed that BMCL will liaise with Siemens	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015 21/05/2015	Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure. GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails.	

3781	PMI 402	CPS -004 (Child Protection Unit) – Wall Mounted colposcope	19/05/2015  21/05/2015	The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.  Costs to be allocated to PMI 328 contingency sum. PM enquired if this could be installed on a surface pattress and FS agreed. BMCL to progress with pattress with chamfered edge and to paint to make surface wipeable.	
3788	PMI 403 -	Provision of interlocked switch socket in OPD-183	25/05/2015	The Board request the provision of 1no. 32A 2P&E Interlocked switched socket in OPD-183 NCH Out-patients treatment room for a V-beam Pulsed Pye Laser supply to be located above bedhead services trunking alongside vertical dropper. Costs to be allocated to PMI 328 contingency	
3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015	The Board request a cost for the installation of power and data within ceiling voids in the following locations - GW3-036, - GW3 - 039 - GW3 - 042 In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room.	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015	The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait.	
3814	PMI 406 -	Enabling and facilitation works - MRI Transfer - NCH	26/05/2015	The Board request a cost to provide enabling and and facilitating works associated with the delivery and installation of MRI transferring from Yorkhill to RHSC Level 1. Works to include temporary hoardings, ramps, downtakings at external wall and MRI and subsequent reinstatements.	
3819	PMI 407 -	Installation of Vestibular Hook - REH 049	26/05/2015	The Board request a cost for the installation of a vestibular hook within room no. REH-049 including support framework fixed to underside of structural slab as required.	
3821	PMI 408 -	Install 2no fused spurs - SCH - 021	26/5/2015	The Board request the installation of 2no. fused spurs at 2.0m above FFL in SCH-021 for 2no. chemo fridges. 2no. MSC-002 units to be removed to accommodate the fridges. Costs to be allocated to PMI 328 contingency.	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15190	CE 106	ASEPTIC SUITE 2 @ COLD ROOMS - CONNECTION TO BUILDING MANAGEMENT SYSTEM	12/05/2015	Please proceed and connect 2 No. cold rooms in the aseptic suite to the BMS.  Agreed cost [REDACTED] incl OH+P but excl VAT.	Need cost info added to acceptance box
15221	CE 108	ADULT HOSPITAL STAIR CORE A LEVEL 10 - REPLACE WINDOW	14/05/2015	Replace broken pane of glass to waiting room WS 10-006, all as set out in PMI 367.	
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015	Please proceed with works set out in PMI 373.  PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE	
15283	CE 110	ARRIVAL SQUARE - S75 ASSOCIATED WORKS BUS STANCES	21/05/2015	Proceed with works associated PMI's 333, 335 & 369 within Arrival Square to complete the installation of bus shelters and stances.  Agreed cost is [REDACTED] incl. OH+P but excl. VAT.	27/05/2015
15284	CE 111	ADULT & CHILDRENS THEATRES - SCRUB UP AREA IPS PANELS	21/05/2015	Carry out repairs as directed in PMI 372 to fill approximately 700 screw holes and make all finishes good.  Cost agreed as [REDACTED] incl. OH+P but excl. VAT.	27/05/2015
15285	CE 112	ENDOSCOPY SUITE - REBALANCE AIR HANDLING POST INSTALL OF DRYERS	21/05/2015	Proceed and re-balance dryer area as per PMI 387.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	27/05/2015
15286	CE 113 -	EXTERNAL WORKS - ADDITIONAL SIGNAGE	21/05/2015	Provide and install additional external directional signage as set out in PMI 389.  Agreed cost [REDACTED] incl. OH+P excl. VAT.	27/05/2015
15827	CE 114	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	21/05/2015	Please remove audible link to NC system as set out in PMI 390.  Agreed cost [REDACTED]	27/05/2015

15288	CE 115	ADULT HOSPITAL HYBRID THEATRE WORKS - TEMP. HAI-SCRIBE SCREEN	21/05/2015	Prior to commencing works in theatres erect a temporary dust screen across main theatre corridor all as set out in PMI 394. Dismantle on completion of works and make good all finishes.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	27/05/2015

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) **It was noted that a meeting is being organized (14/05/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) **DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that

DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) **DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015)**

- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) **PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015) DW advised that BMCL are chasing up electrician visit to site (07/05/2015) DW advised that he had received confirmation that the Vectorfoiltec electrician will be here in the next 3 weeks – BMCL have advised that this timescales isn't good enough (14/05/2015) **DW noted that the electrician would be on site on the 26<sup>th</sup> May 2015 (21/05/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS

advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015) **FS advised that checked were being carried out on level 10 and level 11 would be checked w/c 25/05/2015 (21/05/2015)**

- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015) DW advised that the blue socket is not on the signed off drawings. DH agreed to check the bedhead drawings (14/05/2015) **DH agreed to check the drawings asap (21/05/2015)**
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015) FS advised that BMCL were not providing a drawing however the planting as discussed would be carried out. (14/05/2015) **PM advised that he undertaken a walkround with PMc re hoarding. GW advised that the NHS had agreed the hoarding proposal and suggested that there may be a need to put more metal hoarding up. PM noted that PMcG would provide a drawing to the NHS for review. PM to advise where he would prefer to have the 'better' fencing installed (21/05/2015)**
- Signage at Main door – AF advised that he expected this to be onsite w/c 04/05/2015. GW to liaise with Land Eng who are procuring the sign. PM advised that he needed the external and road signage concluded asap. GB noted that Land Eng were to have their works completed by 04/05/2015. PM advised that Natatsha had carried out a walkround and had identified that there is signage missing. Natasha has prepared a report regarding the missing signage. Norsigns to be asked to confirm that they think they have completed all their signage. DH noted that a sign at Labs 1/CT Room (Interventional) needed to be swapped over (30/04/2015) FS advised that he will get the signage at the front door checked (07/05/2015) GB advised that Sheila has a solution from Natasha however there is one query. Sheila is progressing. PM noted that he had query about the external signage. (14/05/2015) **PM advised that the main door signs at the front of the hospitalswer being installed. PM noted that there were very few site signs now missing (21/05/2015)**
- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof. (30/04/2015) GB noted that proposals had been received and was with Ginkgo. GB would provide information to the NHS once proposal is finalized (07/05/2015) GB advised that BMCL were pushing Ginkgo to finalise their proposals (15/5/2015) **PM noted that he had received a proposal to fill the roof with stones so that the water could not be seen – this proposal would not be accepted by the NHS. PM suggested that a drain outlet to the drain the water off should be installed. (21/05/2015)**
- Helipad – GB advised that he is going through the folder and pulling out all the relevant info. PM advised that he would want all the info put on Zutec. DW noted that BMCL would have all the info for the helipad and it would have been given to the CAA (14/05/2015) **FS advised that he had information to provide to PM asap. The information would be contained in the CAA pack (21/05/2015)**
- Power in THE 228 to drying cabinet – noted that being advised that the power isn't live. (14/05/2015) **DH advised this had been disconnected as part of the pendant move. Agreed item to be closed (21/05/2015)**
- Consultants – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) **FS advised that the consultants were on site on Monday (21/05/2015)**
- Link Bridge completion post MRI delivery – DH suggested that there was a need to work out programme of works. The MRI will be delivered n the 21<sup>st</sup> and Ainsclough will be onsite. BMCL to consider what they need. JD Pierce to be lined up for 22<sup>nd</sup> June. Link bridge needs to be closed up for as short a period as possible (21/05/2015)

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. <b>Meeting being organised for 04/06/2015. Invite to be sent to FS.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015 14/05/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>GB noted that collation of the Building Warrants is WIP GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	

			21/05/2015 28/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
2494 5	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015 07/05/2015 21/05/2015 28/05/2015	Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works GB advised that GArmstrong is liaising with GForsyth. BMCL are awaiting a PMI to confirm the way forward. FS advised that BMCL are aware that there is asbestos and it is being dealt with. GA noted that asbestos removal certificate had been received and removal works completed. GA will provide the certification to GF.	
2495 7	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015 07/05/2015 14/05/2015 21/05/2015 28/05/2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed GB advised that GArmstrong is liaising with GForsyth and further pipe had been discovered and it was thought that it may be a gas pipe. FS noted that more underground services had been discovered. FS advised that he has provided a full copy of the survey – probed all the areas GF noted that investigative works had commenced. There is a gas line which needs to be confirmed as being live or dead. There are a couple of other pipes which need to be identified as to what they are. GA advised that BMCL need to understand what the pipes are so that controls can be put in place before the pipes are checked out. GA noted that the gas pipe is for the old cafe but it was not known if this was dead/live. DW noted that there is no easy way to deal with unknown pipes. DH enquired if the pipe could be followed out to the path and check if there is a toby, etc. DW suggested that it would be better to identify the end of the pipe inside the building. GA noted that there is potentially gas at the imaging entrance, old steam pipe and drain from old fountain. DW suggested that the digging should be progressed towards the building. DH agreed this was the best course of action at this time and GA was asked to liaise with Land Eng.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 03/06/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established. AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	

A51679245

			30/04/2015 07/05/2015 14/05/2015 21/05/2015 28/05/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL. FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works. FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks. FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015. FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015  21/05/2015 28/05/2015	The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015. FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel. FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 27/05/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liase with Hugh McDerment to agree extend of works. All as discussed Paul McGuinness / Hugh McDerment.</p> <p>SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and agree extend of works.</p>	

A51679245

			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have Cl gas pipe terminated. Boards fencing and car park project

			<p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>28/05/2015</p>	<p>commences 23 February 2015.</p> <p>DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.</p> <p>GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.</p> <p>PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.</p> <p>PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.</p> <p>PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.</p> <p>GW noted that a CE was required urgently for this item.</p> <p>PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review asap.</p> <p>PM noted that he had received the drawings in autocad and would try to locate software to open them.</p> <p>GW advised that he needed a CE urgently – the works have been carried out.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p>	

			<p>05/03/2015 PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>12/03/2015 PM advised that an amendment would be advised via a separate PMI.</p> <p>19/03/2015 It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>26/03/2015 PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p> <p>07/05/2015 PM advised that the core cutting was ongoing and that the shelters were due to arrive w/c 11<sup>th</sup> May 2015.</p> <p>14/05/2015 PM noted that works are ongoing</p> <p>21/05/2015 PM noted that the column still needs to be moved.</p> <p>28/05/2015 FS noted that he proposed to check that the column had been removed.</p>	
3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	<p>09/02/2015 The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories &amp; FM building.</p> <p>12/02/2015 GW advised this is WIP to obtain costs.</p> <p>19/02/2015 Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31<sup>st</sup> March 2015. BM to push for early design resolution.</p> <p>26/02/2015 GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31<sup>st</sup> March however the works would be completed by 24<sup>th</sup> April 2015. DL requested that the programme be discussed with KC.</p> <p>05/03/2015 DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.</p> <p>12/03/2015 DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.</p> <p>19/03/2015 It was noted that costs are awaited.</p> <p>26/03/2015 GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.</p> <p>02/04/2015 GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.</p> <p>22/04/2015 FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the</p>	

			<p>30/04/2015 information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].</p> <p>07/05/2015 PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.</p> <p>14/05/2015 PM advised that the costs did not appear to be value for money and DR has subsequently reviewed the costs and would discuss with GW.</p> <p>DH advised that DR and GW have discussed at GW is reviewing the scope of works and the associated costs. DH suggested that it would be beneficial for DH, CG and GW to discuss the scope of works. The engineers had advised that the drainage isn't big enough if all the machines are running and discharging at the same time. GB noted he had previous experience of this situation in another project and that an attenuation drain had to be built in.</p> <p>21/05/2015 SF to organise meeting</p> <p>28/05/2015 Meeting being organised to take place later that day.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>19/02.2015 Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>26/02/2015 GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>05/03/2015 GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>12/03/2015 DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>19/03/2015 DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>26/03/2015 DP advised that the design is due to be provided imminently.</p> <p>02/04/2015 DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>22/04/2015 PM and DL to discuss/agree the way forward asap.</p> <p>30/04/2015 PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>07/05/2015 PM advised that the information is with IP for review.</p> <p>14/05/2015 DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>21/05/2015 SF to organise meeting. PM suggested that misinformation about the vent system had been</p>	

				received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 14/05/2015 21/05/2015 28/05/2015	<p>The Board require the undernoted quantity of telephone lines.</p> <p>The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the “base number” i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of ‘additional’ lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the ‘extra’ lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</p> <p>DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.</p> <p>SF to organize meeting</p> <p>Meeting being organized for 04/06/2015</p>	

3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	<p>04/03/2015</p> <p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>05/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 29/04/2015 07/05/2015 14/05/2015 21/05/2015</p> <p>GW advised that he would upload the costs asap. GW advised that this is under review by Paul. It was noted that GB is awaiting info re design fees, etc. GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap. PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel. GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc. PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions. GB advised that the design strategy and fire strategy checks. The information was back with Paul. <b>GW noted that the costs had been uploaded for NHS review on th 15/05/2015. PM agreed to review asap.</b></p>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	<p>20/03/2015</p> <p>Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.</p> <p>26/03/2015 22/04/2015 30/04/2015 07/05/2015</p> <p>It was noted that an instruction had been issued the previous Friday to commence the works. GW advised that the costs would be discussed on the basis of the actual works carried out. GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme. PM noted that cost information was awaited</p>	

			14/05/2015 28/05/2015	FS noted that investigation works are ongoing Already discussed under BMCL-EWN-157	
3561	PMI 369	ARRIVAL SQUARE - EAST BUS STANCE	24/03/2015  02/04/2015 23/04/2015 07/05/2015 21/05/2015 28/05/2015	Proceed and undertake works to adapt the layout of the Kassel Kerb as indicated on the attached drawings. Please proceed and undertake the works as indicated on the attached sketch drawings to extend the stance into the bus lay up space over a length of 5 metres. Install foundation, lift existing Kassel kerbs for re-use where possible, cut and repair tarmac and road build up, provide and install additional granite over the triangular space of 4.5m x 1.5m (see drawing). Please proceed with works, do not wait for RDD process. Please provide in parallel costs for works. Also do not undertake any road marking to this stance nor the curved bus lay over space to the NE of this stance. Cross ref PMI 333 PM noted that the works had been done. PM agreed to provide the CE PM advised that this would be included in the CE being raised for PMI 333. FS noted that this matter had been dealt with. Item closed as covered by CE 110	
3601	PMI 372	ADULT & CHILDRENS THEATRES - SCRUB UP AREAS	02/04/2015  23/04/2015 30/04/2015  07/05/2015  14/05/2015 21/05/2015 28/05/2015	Please fill approx. 700 3mm drilled holes in IPS panels and make finish good.  Mounting positions for dispensers on the grey solid laminate IPS panels above the scrub trough in each room require to be amended. As a result the board require approximately 24 drilled holes in 29 rooms to be filled and finish made good to restore an easy clean surface. Please proceed and carry out repairs, in parallel please provide price for same. Please undertake works in Adult theatres first followed by Children's theatres. PM advised that the works are complete and costs are awaited. DH requested that BMCL confirm that the works had been completed as there was 1 room in interventional which did not appear to be completed. PM noted that cost information was awaited. GB suggested that the cost may now have been uploaded and PM agreed to check. Sypro to be checked for the cost information. PM advised that the cost info had been uploaded to Sypro on 14/05/2015 for NHS review. Item closed as covered by CE 111	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015	Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.  Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.	

			22/04/2015 30/04/2015  07/05/2015 14/05/2015 21/05/2015 28/05/2015	PM noted that this is priority work DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be removed. PM advised that he is awaiting confirmation of the costs. PM suggested that Starkstrom have taken the pendant away. PM noted that he is awaiting the cost for the isolation, etc. GW advised that the cost had been uploaded the previous day – he would recheck the quote for the inclusion of any Starkstrom costs as these are not to be included. GW to confirm that there have been no Starkstrom costs included.	
3711	PMI 387 -	NEW HOSPITALS - ENDOSCOPY SUITE	28/04/2015  07/05/2015 14/05/2015 21/05/2015 28/05/2015	The Board request that the ventilation to the Endoscopy Decontamination suite is checked / re-balanced following the construction of the separating wall and installation of endoscopy washer dryers by Getinge. It is understood that this work should take around 1/2 day of H&V time. DW advised that the works had been carried out. PM advised that the costs are awaited Noted that costs are awaited GW advised that the costs had been uploaded the previous day. Item closed as covered by CE 112	
3723	PMI 389 -	NEW HOSPITALS EXTERNAL SIGNAGE - ADDITIONAL TEMPORARY SIGNS	01/05/2015  07/05/2015 14/05/2015 21/05/2015 28/05/2015	Please procure and install the signage as per the attached sketch drawings.  Please procure and install the signage as per the attached sketch drawings. Signs to be plastic, white background with dark blue lettering to match typeface of signs installed by Glasgow Signs. Sign in grass area off Langlands Drive to have support posts to be driven into ground, eg not metal with concrete foundation. These signs are temporary until the new signage system beds down. Note remove NHS and Scot Gov signs on fence to Phase 3A compound. PM advised that he would check the temp signage. PM noted that 4 signs had been put up. GW advised that the costs had been uploaded the previous day. Item closed as covered by CE 113	
3731	PMI 390	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	06/05/2015  14/05/2015 21/05/2015 28/05/2015	As part of the reprogramming process (room numbering) currently underway by Static Systems please include for the silencing of the noise alarm link from the CD Cupboards to the nurse call system, but retain the warning light link. Please issue this instruction immediately. Pm noted that cost is awaited. DW advised that CI had been issued to Mercury by BMCL. GW advised that the costs had been uploaded on 12/05 Item closed as covered by CE 114. DW advised that works are ongoing. 19 <sup>th</sup> June completion date. DH enquired if an alarm when it is full. DW advised this would be possible but that there would likely be a cost associated with it. DH requested that DW check that NCH will be completed before YH moves in.	

3740	PMI 391	CHILDREN'S THEATRES - ADDITIONAL POWER OUTLETS IN 5 ROOMS	07/05/2015  21/05/2015  28/05/2015	<p>Brookfield Multiplex are instructed to proceed and procure and install additional 13A switched power outlets as set out on the attached drawings and schedule.</p> <p>These sockets are located in the following rooms THE-085, THE-092, THE-098, THE-109 and THE-114. The sockets are located either above ceiling level or on existing wall trunking at desk level, the additional sockets are for additional monitors. Access to ceiling void either via Starkstrom pendant shroud or through ceiling light fittings, in both location mount sockets close to these access points. Starkstrom will be involved in the installation and it is recommended that a co-ordination meeting is held on site to discuss prior to install of sockets proceeding. The sockets require to be installed as quickly as possible no later than 29th May 2015.</p> <p>GW advised that the costs had been uploaded the previous day. DW noted that the timescales are becoming tight</p> <p><b>DW advised that works are ongoing and it was unlikely that the works would be completed by 29/05/2015</b></p>	
3752	PMI 392	- INS / NEUROSURGICAL ENTRANCE WORKS - ASBESTOS PIPE	12/05/2015   28/05/2015	<p>On discovery of unidentified Asbestos pipe provide quotation for the following:</p> <ul style="list-style-type: none"> <li>• Provision of detailed safe system of work for review</li> <li>• Removal of cement based pipe by Licensed Contractor</li> </ul> <p>The post removal monitoring and testing will be arranged by Board</p> <p>Please proceed with the works to remove the section of pipe as quickly as possible.</p> <p><b>Previously discussed under BMCL-EWN-156</b></p>	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015   14/05/2015 21/05/2015 28/05/2015	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p><b>DW advised that a cost is awaited from Mercury.</b></p>	
3754	PMI 394	- ADULT HOSPITAL THEATRES - HAI SCRIBE TEMPORARY PARTITION	12/05/2015   21/05/2015 28/05/2015	<p>In order to complete the works to the two hybrid theatres (THE-228 &amp; THE 232) the Board request the construction of a temporary partition within the 'live' theatre corridor to segregate construction and clinical activity.</p> <p>This follows a review with clinical users and infection control. Works to include remedials to floors, walls and ceilings as required.</p> <p>GW advised that the costs had been uploaded on 12/05</p> <p><b>It was agreed this item would be closed as CE 115 covers.</b></p>	

3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015  14/05/2015  21/05/2015  28/05/2015	Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 1/2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings. PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by. PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed. FS advised that Astins are onsite on 29/05/2015. BMCL have a door set and the door works would be carried out over the weekend. DH advised that he would confirm this with DL.	
3764	PMI 396 -	Sprinkler Head RCI-013	13/05/2015  21/05/2015 28/05/2015	The Board request the relocation of 1no. sprinkler head in RCI-013, Interventional Radiology Lab, currently located between the Toshiba gantry rails and likely to incur damage upon movement of the gantry carriage. DW noted that this item was being reviewed the previous day. Cost info will be provided asap. It was noted that this item was closed.	
3767	PMI 397 -	Door Access Control & Fire Escape - Conflict - Confirmation	13/05/2015  14/05/2015 21/05/2015 28/05/2015	Following the identification of a conflict between door access control and fire escape the Board clarify that the fire escape should take preference at the door between RNM-017 and RAF -117 and that the swipe/exit break glass should be swapped to allow fire exit from Nuclear Medicine to Radiology as signed. DW noted that he had asked Mercury to do the work – CI had been issued to Mercury. DW noted that agreement re what is to be done to be reached DW noted that cost is awaited from mercury. GW requested that Mercury be asked to progress.	
3768	PMI 398	Isolation and removal of exit buttons	13/05/2015  14/05/2015 21/05/2015 28/05/2015	The Board request the isolation and removal of exit buttons from the access control doors at the interconnection between: a) RNM 017 and RAF 117 b) RNM 001 and THE 075 in order to eliminate the risk of accidental/unmonitored access to the Nuclear Medicine Dept. Break glass door release units to be retained and covers to be fitted to reduce accidental damage. DW noted that he would get this item progressed asap. DW noted that the isolation had been undertaken DW noted that this work had been completed. It was agreed this item could be closed.	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015    21/05/2015	Please supply and install additional turfing to areas A & B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.  In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest. PM noted that cost info awaited	

			28/05/2015	GW agreed to provide the cost asap	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015       21/05/2015 28/05/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p>	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015   21/05/2015  28/05/2015	<p>Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure.</p> <p>GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails.</p> <p>FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works.</p> <p>FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool. It was noted that MMacleod was liaising with Physio for confirmation.</p>	
3781	PMI 402	CPS -004 (Child Protection Unit) – Wall Mounted colposcope	19/05/2015   21/05/2015	<p>The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.</p> <p>Costs to be allocated to PMI 328 contingency sum.</p> <p>PM enquired if this could be installed on a surface pattress and FS agreed. BMCL to progress with pattress with chamfered edge and to paint to make surface wipeable.</p>	
3788	PMI 403 -	Provision of interlocked switch socket in OPD-183	25/05/2015   28/05/2015	<p>The Board request the provision of 1no. 32A 2P&amp;E Interlocked switched socket in OPD-183 NCH Out-patients treatment room for a V-beam Pulsed Pye Laser supply to be located above bedhead services trunking alongside vertical dropper.</p> <p>Costs to be allocated to PMI 328 contingency</p> <p>DW advised that CI had been issued to Mercury to carry out the works.</p>	

3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015  28/05/2015	<p>The Board request a cost for the installation of power and data within ceiling voids in the following locations</p> <ul style="list-style-type: none"> <li>- GW3-036,</li> <li>- GW3 - 039</li> <li>- GW3 - 042</li> </ul> <p>In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room.</p> <p>GW advised that AK has been on leave and the cost info would be provided asap. DH suggest will be a couple of months. FS advised that BMCL did not want to be doing works when Yorkhill are moving into the hospitals. DH requested that BMCL look and see if there is sockets there and it just needs longer RJ45 cables. DH requested that BMCL identify any potential disturbance to the room.</p>	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015  28/05/2015	<p>The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH &amp; NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait.</p> <p>DW noted that the CI had been issued to Mercury. Mercury to provide the cost and the timescale.</p>	
3814	PMI 406 -	Enabling and facilitation works - MRI Transfer - NCH	26/05/2015  28/05/2015	<p>The Board request a cost to provide enabling and and facilitating works associated with the delivery and installation of MRI transferring from Yorkhill to RHSC Level 1.</p> <p>Works to include temporary hoardings, ramps, downtakings at external wall and MRI and subsequent reinstatements.</p> <p>FS noted that BMCL have a programme and understand the scope of works. FS will liaise with JD Peirce to ensure they have got the panel and to get them to site.</p>	
3819	PMI 407 -	Installation of Vestibular Hook - REH 049	26/05/2015  28/05/2015	<p>The Board request a cost for the installation of a vestibular hook within room no. REH-049 including support framework fixed to underside of structural slab as required.</p> <p>FS advised that he had sent the previous drawing to M&amp;S to obtain a price. These works will not be achieved prior to Yorkhill moving in.</p>	
3821	PMI 408 -	Install 2no fused spurs - SCH - 021	26/5/2015  28/05/2015	<p>The Board request the installation of 2no. fused spurs at 2.0m above FFL in SCH-021 for 2no. chemo fridges. 2no. MSC-002 units to be removed to accommodate the fridges.</p> <p>Costs to be allocated to PMI 328 contingency.</p> <p>DH noted that these works are more urgent. JMiller has been progressing. DW advised that Mercury have been instructed to carry out the work.</p>	
3846	PMI 409 -	Changes to the Pneumatic Tube System	27/05/2015	<p>The Board request the following changes be made to the Pneumatic Tube System:</p> <ol style="list-style-type: none"> <li>1.Change the operation of the system so all Green Pharmacy carriers can be returned to the Pharmacy from any station in the hospital.</li> <li>2. Change the operation of the system so that all Leak Proof carriers can only be sent to microbiology and pathology.</li> <li>3. Change the current program from the agreed issued naming structure so it matches the actual hospital departments.</li> <li>4. Add time schedule control for selected lab stations and pharmacy to close stations out with normal operating hours complete with message stating "Department closed" as detailed below</li> </ol> <p>o For all Pathology samples, the PTS will operate between 9am and 7pm on weekdays and on Saturdays from 8am until 12:00 noon.</p>	

				<p>o For all Cytology samples, the PTS will operate between 9am and 5pm on weekdays and on Saturdays from 8am until 12:00 noon.</p> <p>o For all Genetics samples, the PTS will operate between 9am and 5pm on weekdays.</p> <p>o For all Pharmacy samples, the PTS will operate between 08:30 and 16:30 on week days, Saturdays 09:00 and 11:45 and Sundays from 10:00 to 11:30.</p> <p>5. As part of the re-commissioning process, carry out and record full address validation for submission with the full commissioning documentation to the Laboratory CPA auditors for Laboratory accreditation.</p>	
3880	PMI-410	CHILDREN'S HOSPITAL THEATRE DEPT - WC ROOM THE-013 DAMAGED WHB	03/06/2015	Please supply and install new hand rinse whb to replace broken whb. Make all finishes good.	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed infront of door where this opens onto grass or other area.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15221	CE 108	ADULT HOSPITAL STAIR CORE A LEVEL 10 - REPLACE WINDOW	14/05/2015	Replace broken pane of glass to waiting room WS 10-006, all as set out in PMI 367.	
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015  28/05/2015	Please proceed with works set out in PMI 373.  PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE DH advised that he would liaise with DR.	
15451	CE 116	ADULT HOSPITAL IMAGING ROOM RAF-080 REMOVAL OF 1 No. STARKSTROM PENDANT	28/05/2015	Isolation of services to pendant prior to removal by Starkstrom at no cost, make finishes good.  Agreed cost [REDACTED] incl OH+P but excl. VAT.	

## Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being

unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) **It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015)**

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) **DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) **DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015) **PM to confirm the way forward (28/05/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to

be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfoiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015) DW advised that BMCL are chasing up electrician visit to site (07/05/2015) DW advised that he had received confirmation that the Vectorfoiltec electrician will be here in the next 3 weeks – BMCL have advised that this timescales isn't good enough (14/05/2015) DW noted that the electrician would be on site on the 26<sup>th</sup> May 2015 (21/05/2015) **DW advised that the ops had been on site the previous day – 19 of the 20 roof burns offs have an issue at the pillows (internal wiring to the pillows). DW has forwarded on the report to Vectorfoiltec and requested that they provide a response. DH advised that an urgent response was required as from a fire perspective the roof does not work It was agreed that GW would raise this item as an EW. (28/05/2015)**

- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015) FS advised that checked were being carried out on level 10 and level 11 would be checked w/c 25/05/2015 (21/05/2015) **FS advised that BMCL checks had been completed to level 11 and were now started in the basement. Mercury are replacing any missing bags. A marked up drawing would be provided via Aconex. PMI awaited from NHS (28/05/2015)**
- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015) DW advised that the blue socket is not on the signed off drawings. DH agreed to check the bedhead drawings (14/05/2015) **DH agreed to check the drawings asap (21/05/2015)**
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015) FS advised that BMCL were not providing a drawing however the planting as discussed would be carried out. (14/05/2015) PM advised that he undertaken a walkround with PMc re hoarding. GW advised that the NHS had agreed the hoarding proposal and suggested that there may be a need to put more metal hoarding up. PM noted that PMcG would provide a drawing to the NHS for review. PM to advise where he would prefer to have the 'better' fencing installed (21/05/2015) **GA advised that PMc has a marked up drawing which had**

been discussed with Townhill. GW advised that BMCL needed to understand what happens to the other side of the road once demo done at the car park. DH requested a copy of the marked-up drawing (28/05/2015)

- Signage at Main door – AF advised that he expected this to be onsite w/c 04/05/2015. GW to liaise with Land Eng who are procuring the sign. PM advised that he needed the external and road signage concluded asap. GB noted that Land Eng were to have their works completed by 04/05/2015. PM advised that Natatsha had carried out a walkround and had identified that there is signage missing. Natasha has prepared a report regarding the missing signage. Norsigns to be asked to confirm that they think they have completed all their signage. DH noted that a sign at Labs 1/CT Room (Interventional) needed to be swapped over (30/04/2015) FS advised that he will get the signage at the front door checked (07/05/2015) GB advised that Sheila has a solution from Natasha however there is one query. Sheila is progressing. PM noted that he had query about the external signage. (14/05/2015) PM advised that the main door signs at the front of the hospitals lower being installed. PM noted that there were very few site signs now missing (21/05/2015) FS advised that he understood that 'sick' is being removed from the name PM to confirm the name for the NCH signage. (28/05/2015)
- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof. (30/04/2015) GB noted that proposals had been received and was with Ginkgo. GB would provide information to the NHS once proposal is finalized (07/05/2015) GB advised that BMCL were pushing Ginkgo to finalise their proposals (15/5/2015) PM noted that he had received a proposal to fill the roof with stones so that the water could not be seen – this proposal would not be accepted by the NHS. PM suggested that a drain outlet to the drain the water off should be installed. (21/05/2015) It was noted that GB has liaised with Ginkgo – will be doing a level survey and are looking a installing drainage (28/05/2015)
- Helipad – GB advised that he is going through the folder and pulling out all the relevant info. PM advised that he would want all the info put on Zutec. DW noted that BMCL would have all the info for the helipad and it would have been given to the CAA (14/05/2015) FS advised that he had information to provide to PM asap. The information would be contained in the CAA pack (21/05/2015) FS advised that it is WIP to locate the CAA pack of info. (28/05/2015)
- Consultants – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015)
- Link Bridge completion post MRI delivery – DH suggested that there was a need to work out programme of works. The MRI will be delivered n the 21<sup>st</sup> and Ainsclough will be onsite. BMCL to consider what they need. JD Pierce to be lined up for 22<sup>nd</sup> June. Link bridge needs to be closed up for as short a period as possible (21/05/2015)
- SVD report issue – CE awaited (is a sub-division of WSP) (28/05/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1476

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 10/06/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 16/06/2016:

<div> <div>Brookfield MULTIPLEX</div> <div>BM</div> </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. <b>Meeting being organised for 04/06/2015. Invite to be sent to FS.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015 14/05/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>GB noted that collation of the Building Warrants is WIP GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	

			21/05/2015 28/05/2015 04/06/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS. FS advised that GB is liaising with Mercury	
24945	BMCL-EWN-156	Suspected Asbestos material located in substructure excavation at INS	05/05/2015 07/05/2015 21/05/2015 28/05/2015 04/06/2015	Asbestos requires to be removed to enable the INS excavations to commence. We would note that depending on the extent and nature of the asbestos discovered this event may impact on the start date of the piling works GB advised that GArmstrong is liaising with GForsyth. BMCL are awaiting a PMI to confirm the way forward. FS advised that BMCL are aware that there is asbestos and it is being dealt with. GA noted that asbestos removal certificate had been received and removal works completed. GA will provide the certification to GF. It was agreed this item could be closed as covered by PMI 392 and costs attributed to PMI 365	
24957	BMCL-EWN-157	Unidentified Services in INS Footprint	05/05/2015 07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015	Underground Service identified which clashes with pile location 2. Please confirm how you wish us to proceed GB advised that GArmstrong is liaising with GForsyth and further pipe had been discovered and it was thought that it may be a gas pipe. FS noted that more underground services had been discovered. FS advised that he has provided a full copy of the survey – probed all the areas GF noted that investigative works had commenced. There is a gas line which needs to be confirmed as being live or dead. There are a couple of other pipes which need to be identified as to what they are. GA advised that BMCL need to understand what the pipes are so that controls can be put in place before the pipes are checked out. GA noted that the gas pipe is for the old cafe but it was not known if this was dead/live. DW noted that there is no easy way to deal with unknown pipes. DH enquired if the pipe could be followed out to the path and check if there is a toby, etc. DW suggested that it would be better to identify the end of the pipe inside the building. GA noted that there is potentially gas at the imaging entrance, old steam pipe and drain from old fountain. DW suggested that the digging should be progressed towards the building. DH agreed this was the best course of action at this time and GA was asked to liaise with Land Eng. Covered under PMI 365	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 10/06/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p><b>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</b></p>	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015  21/05/2015  28/05/2015  04/06/2015	<p>The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.</p> <p>FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.</p> <p>FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.</p> <p><b>FS advised that on the previous occasion of rain he had investigated and it was thought that it was now identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter.</b></p>	
25494	NHS EW 059	ADULT HOSPITAL -	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing	

		VECTOR FOILTEC BURN OFF SYSTEM		burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 10/06/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	

A51679245

			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.
			19/03/2015	GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.

			<p>23/4/2015 30/04/2015 07/05/2015</p> <p>14/05/2015</p> <p>28/05/2015 04/06/2015</p>	<p>PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.</p> <p>GW noted that a CE was required urgently for this item.</p> <p>PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review asap.</p> <p>PM noted that he had received the drawings in autocad and would try to locate software to open them.</p> <p>GW advised that he needed a CE urgently – the works have been carried out.</p> <p>PM advised that he was reviewing the drawings so can identify the additional services discovered against the costs to remove.</p>	
3356	PMI 335	ARRIVAL SQUARE - LIGHTING COLUMN OPPOSITE ADULT ENTRANCE	<p>09/02/2015</p> <p>12/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015 19/03/2015</p> <p>26/03/2015</p> <p>07/05/2015</p> <p>14/05/2015 21/05/2015 28/05/2015 04/06/2015</p>	<p>Relocate lighting column to avoid bus stop.</p> <p>The lighting column currently sits immediately in front of the alighting area for passengers from buses at the bus stance. Please confirm new location with Board Project Team and reposition. Refer attached drawing.</p> <p>PM advised that he had spoken to PMcG. Plans were being put in place for a bus test next Friday which would involve the buses coming in at the Govan Road entrance and testing the turnround routes and that everything works.</p> <p>PM has agreed with PMcG that retain position until bus test complete on 20/02/2015. GW to establish cost to move.</p> <p>PM advised that a bus test had been carried out and it had identified that the column is in the wrong place. GW advised that he had indicative costs for moving and pulling the cable and lifting and replacing the column. Cost is circa [REDACTED]. BMCL will provide dwg. PM suggested that the works should be carried out when carrying out the bus shelter works.</p> <p>PM advised that the pole will need to be moved and requested a copy of the signed off drawing which GW agreed to provide.</p> <p>PM advised that an amendment would be advised via a separate PMI.</p> <p>It was noted that the costs for this matter should be wrapped up into PMI 333. PM noted that a further bus test had taken place which had indicated that a stance does not work as planned and the NHS have been asked to move the full stance. The NHS will not be moving the full stance. Remedial works may be requested.</p> <p>PM enquired if WSP is going to propose an alternate position for the column and it was assumed the column would be moved when doing the granite removal works. GW agreed to liaise with PMcGuinness and WSP re lighting level implications.</p> <p>PM advised that the core cutting was ongoing and that the shelters were due to arrive w/c 11<sup>th</sup> May 2015.</p> <p>PM noted that works are ongoing</p> <p>PM noted that the column still needs to be moved.</p> <p>FS noted that he proposed to check that the column had been removed.</p> <p>It was noted that this item was closed – CE 110</p>	

3359	PMI 338 -	Enabling works for install of Tumble dryers and High Spin Washers	09/02/2015	The Board request a quotation and programme for the enabling works required to accommodate 4no. JLA SD 80 (80lb) tumble dryers and 4no. JLA HD 305 (65lb) High Spin Washers. The works required are outlined on the attached drawing no 13/02103 Rev A Supply and installation of washers/dryers will be by others. The facility is to be located in the large store at the north-west corner of the Laboratories & FM building.
			12/02/2015	GW advised this is WIP to obtain costs.
			19/02/2015	Post issue of PMI 342 design work is ongoing to prepare cost. DL noted that this work must be completed by 31 <sup>st</sup> March 2015. BM to push for early design resolution.
			26/02/2015	GW advised that the design was due back w/c 2/03/2015. DP advised that BMCL would struggle to complete the works by 31 <sup>st</sup> March however the works would be completed by 24 <sup>th</sup> April 2015. DL requested that the programme be discussed with KC.
			05/03/2015	DH noted that a meeting to discuss was scheduled to take place the following day (DH, IP, FS). GW suggested that this may be costly and that the Board may not wish to progress this. The design was due to be received by BMCL on 06/03/2015 and once received BMCL would cost up.
			12/03/2015	DH advised that a meeting with the designers had taken place and DH had raised with IP that there will be a challenge to complete this request before patients move into the hospitals. The NHS will need to identify an interim solution.
			19/03/2015	It was noted that costs are awaited.
			26/03/2015	GW noted that the WW drawing had just been received and that BMCL were awaiting info from BMJ. GW would send the WW drawing to Mercury asap.
			02/04/2015	GB advised that BMJ had been instructed to do the elevations. When the design is received from WSP then will get the costs to the NHS asap. DP advised that there is more work involved in this request than first thought. GW advised that BMJ cost (circa [REDACTED]) and WSP knows that the info is coming. GB noted that there is lintels required, gas diversions, brickwork/blockwork. DH enquired if the NHS can get the electrics and gas works done. DP advised that these works are being started asap. AF advised that BMCL would provide the NHS with a programme for the works.
			22/04/2015	FS advised that he was awaiting an update from CGrindlay. GW advised that LJ is obtaining the information. PM advised that he had liaised with LJ who had asked if PM would want a ball-park figure. GW advised that LJ was receiving the information in a lot slower than would have wanted hence the suggestion of providing a ball-park figure – LJ is pursuing the info as much as she can. DL advised that this matter needed to be moved on quickly as the interim solution for the NHS is very costly. GW advised that BMCL could provide the information as the receive it – GW suggested that a ball park figure was circa [REDACTED].
			30/04/2015	PM acknowledged receiving the costs and advised that he would request approval from DL. It was agreed that a meeting should be arranged – attendees FS, DW, DH and PM.
			07/05/2015	PM advised that the costs did not appear to be value for money and DR has subsequently reviewed the costs and would discuss with GW.
			14/05/2015	DH advised that DR and GW have discussed at GW is reviewing the scope of works and the associated costs. DH suggested that it would be beneficial for DH, CG and GW to discuss the scope of works. The engineers had advised that the drainage isn't big enough if all the machines are running and discharging at the same time. GB noted he had previous experience of this situation in another project and that an attenuation drain had to be built in.
			21/05/2015	SF to organise meeting

			28/05/2015 04/06/2015	Meeting being organised to take place later that day. DH advised that he is awaiting revised costs. DW noted that he would chase the costs up.	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015  07/05/2015 14/05/2015  21/05/2015  04/06/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31 <sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015 DP advised that the design is due to be provided imminently. DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap. PM and DL to discuss/agree the way forward asap. PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly. PM advised that the information is with IP for review. DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately. SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015  26/02/2015  05/03/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015. GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer. PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant	

			<p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p>	<p>that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</p> <p>DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.</p> <p>SF to organize meeting</p> <p>Meeting being organized for 04/06/2015</p>	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	<p>The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.</p> <p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient.</p>	

			<p>05/03/2015 19/03/2015 26/03/2015 02/04/2015  22/04/2015 29/04/2015  07/05/2015  14/05/2015 21/05/2015  04/06/2015</p>	<p>However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>GW advised that he would upload the costs asap.</p> <p>GW advised that this is under review by Paul.</p> <p>It was noted that GB is awaiting info re design fees, etc.</p> <p>GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap.</p> <p>PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel.</p> <p>GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc.</p> <p>PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions.</p> <p>GB advised that the design strategy and fire strategy checks. The information was back with Paul.</p> <p>GW noted that the costs had been uploaded for NHS review on the 15/05/2015. PM agreed to review asap.</p> <p><b>PM advised that he would review the costs and confirm the way forward.</b></p>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	<p>20/03/2015  26/03/2015 22/04/2015 30/04/2015  07/05/2015 14/05/2015 28/05/2015  04/06/2015</p>	<p>Undertake trial digs to investigate unknown underground services.</p> <p>Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.</p> <p>It was noted that an instruction had been issued the previous Friday to commence the works.</p> <p>GW advised that the costs would be discussed on the basis of the actual works carried out.</p> <p>GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme.</p> <p>PM noted that cost information was awaited</p> <p>FS noted that investigation works are ongoing</p> <p>FS advised that he has provided a full copy of the survey – probed all the areas</p> <p>GF noted that investigative works had commenced. There is a gas line which needs to be confirmed as being live or dead. There are a couple of other pipes which need to be identified as to what they are. GA advised that BMCL need to understand what the pipes are so that controls can be put in place before the pipes are checked out. GA noted that the gas pipe is for the old cafe but it was not known if this was dead/live. DW noted that there is no easy way to deal with unknown pipes. DH enquired if the pipe could be followed out to the path and check if there is a toby, etc. DW suggested that it would be better to identify the end of the pipe inside the building. GA noted that there is potentially gas at the imaging entrance, old steam pipe and drain from old fountain. DW suggested that the digging should be progressed towards the building. DH agreed this was the best course of action at this time and GA was asked to liaise with Land Eng.</p> <p><b>FS advised that it is work in progress to identify unknown services – services have been exposed into the building. PM noted that the fountain pipe has been discounted. The Gas pipe was to be checked going into the building. PM had advised that a small hole should be drilled into the top of the black marley pipe to check if this is running. FS noted that GA and GF continue to liaise about</b></p>	

				the services. PM advised that he had asked GF to get Estates Reps over to resolve the gas pipe issue asap.	
3680	PMI 382	ADULT HOSPITAL IMAGING - ROOM RAF-080	22/04/2015  22/04/2015 30/04/2015  07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015	<p>Brookfield are instructed to decommission and remove 1 No articulated pendant as per attached drawing in room RAF-080. Make all finishes good.</p> <p>Brookfield are instructed to isolate and disconnect all services to the articulated pendant marked on the attached sketch and photographs. Services include power, vacuum, air x2, ACGS, N2O, services to be safely terminated above ceiling level. Carefully dismantle and remove pendant head, articulated arm and ceiling mount and hand over to Board for storage within basement level. Repair plasterboard ceiling and redecorate. This work is extremely urgent and the Board wish to investigate the opportunity to commence almost immediately. Brookfield to review and confirm. Cost required to be developed in parallel.</p> <p>PM noted that this is priority work</p> <p>DW suggested that the works were completed. PM suggested that Starkstrom are carrying out remedial works in lieu of retaining the pendant. DH advise that BMCL should not patch the ceiling as Starkstrom will be lowering the ceiling. It was agreed that DW would speak to the Starkstrom rep regarding the remedial works. DH requested that the rep be reminded that the light needed to be removed.</p> <p>PM advised that he is awaiting confirmation of the costs. PM suggested that Starkstrom have taken the pendant away.</p> <p>PM noted that he is awaiting the cost for the isolation, etc.</p> <p>GW advised that the cost had been uploaded the previous day – he would recheck the quote for the inclusion of any Starkstrom costs as these are not to be included.</p> <p>GW to confirm that there have been no Starkstrom costs included.</p> <p>It was noted that this item was now covered by CE 116.</p>	
3731	PMI 390	NURSE CALL SYSTEM - AUDIBLE LINK TO CONTROLLED DRUGS CUPBOARDS	06/05/2015  14/05/2015 21/05/2015 28/05/2015  04/06/2015	<p>As part of the reprogramming process (room numbering) currently underway by Static Systems please include for the silencing of the noise alarm link from the CD Cupboards to the nurse call system, but retain the warning light link.</p> <p>Please issue this instruction immediately.</p> <p>Pm noted that cost is awaited. DW advised that CI had been issued to Mercury by BMCL.</p> <p>GW advised that the costs had been uploaded on 12/05</p> <p>Item closed as covered by CE 114. DW advised that works are ongoing. 19<sup>th</sup> June completion date.</p> <p>DH enquired if an alarm when it is full. DW advised this would be possible but that there would likely be a cost associated with it. DH requested that DW check that NCH will be completed before YH moves in.</p> <p>DW advised that the software upload is WIP</p>	
3740	PMI 391	CHILDREN'S THEATRES - ADDITIONAL POWER OUTLETS IN 5 ROOMS	07/05/2015	<p>Brookfield Multiplex are instructed to proceed and procure and install additional 13A switched power outlets as set out on the attached drawings and schedule.</p> <p>These sockets are located in the following rooms THE-085, THE-092, THE-098, THE-109 and THE-114. The sockets are located either above ceiling level or on existing wall trunking at desk</p>	

			<p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>level, the additional sockets are for additional monitors. Access to ceiling void either via Starkstrom pendant shroud or through ceiling light fiments, in both location mount sockets close to these access points. Starkstrom will be involved in the installation and it is recommended that a co-ordination meeting is held on site to discuss prior to install of sockets proceeding. The sockets require to be installed as quickly as possible no later than 29th May 2015.</p> <p>GW advised that the costs had been uploaded the previous day. DW noted that the timescales are becoming tight</p> <p>DW advised that works are ongoing and it was unlikely that the works would be completed by 29/05/2015</p> <p><b>It was noted that this item was closed as covered by CE 119</b></p>	
3752	PMI 392	- INS / NEUROSURGICAL ENTRANCE WORKS - ASBESTOS PIPE	<p>12/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>On discovery of unidentified Asbestos pipe provide quotation for the following:</p> <ul style="list-style-type: none"> <li>• Provision of detailed safe system of work for review</li> <li>• Removal of cement based pipe by Licensed Contractor</li> </ul> <p>The post removal monitoring and testing will be arranged by Board</p> <p>Please proceed with the works to remove the section of pipe as quickly as possible.</p> <p>Previously discussed under BMCL-EWN-156</p> <p><b>PM noted that he would issue a CE for this item. GW noted that the cost is circa [REDACTED]</b></p>	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	<p>12/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p>DW advised that a cost is awaited from Mercury.</p> <p><b>GW advised that he was checking the costs before providing to the NHS</b></p>	
3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	<p>12/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p>	<p>Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 /2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings.</p> <p>PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by.</p> <p>PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed.</p> <p><b>FS advised that Astins are onsite on 29/05/2015. BMCL have a door set and the door works would</b></p>	

				be carried out over the weekend. DH advised that he would confirm this with DL.	
3764	PMI 396 -	Sprinkler Head RCI-013	13/05/2015  21/05/2015 28/05/2015	The Board request the relocation of 1no. sprinkler head in RCI-013, Interventional Radiology Lab, currently located between the Toshiba gantry rails and likely to incur damage upon movement of the gantry carriage. DW noted that this item was being reviewed the previous day. Cost info will be provided asap. It was noted that this item was closed.	
3767	PMI 397 -	Door Access Control & Fire Escape - Conflict - Confirmation	13/05/2015  14/05/2015 21/05/2015 28/05/2015 04/06/2015	Following the identification of a conflict between door access control and fire escape the Board clarify that the fire escape should take preference at the door between RNM-017 and RAF -117 and that the swipe/exit break glass should be swapped to allow fire exit from Nuclear Medicine to Radiology as signed. DW noted that he had asked Mercury to do the work – CI had been issued to Mercury. DW noted that agreement re what is to be done to be reached DW noted that cost is awaited from mercury. GW requested that Mercury be asked to progress. It was noted that this item was closed. CE 118 covers	
3768	PMI 398	Isolation and removal of exit buttons	13/05/2015  14/05/2015 21/05/2015 28/05/2015	The Board request the isolation and removal of exit buttons from the access control doors at the interconnection between: a) RNM 017 and RAF 117 b) RNM 001 and THE 075 in order to eliminate the risk of accidental/unmonitored access to the Nuclear Medicine Dept. Break glass door release units to be retained and covers to be fitted to reduce accidental damage. DW noted that he would get this item progressed asap. DW noted that the isolation had been undertaken DW noted that this work had been completed. It was agreed this item could be closed.	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015  21/05/2015 28/05/2015	Please supply and install additional turfing to areas A & B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.  In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest. PM noted that cost info awaited GW agreed to provide the cost asap	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.	

			<p>21/05/2015 28/05/2015 04/06/2015</p>	<p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p>	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	<p>19/05/2015  21/05/2015 28/05/2015  04/06/2015</p>	<p>Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure.</p> <p>GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails.</p> <p>FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works.</p> <p>FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool. It was noted that MMacleod was liaising with Physio for confirmation.</p> <p>It was noted that CE 0117 covered this item. FS advised that he had spoken to MMacL the previous day who had advised that the stretcher is not suitable (would not pass infection control) and it was suggested that a wheelchair option would be preferable. DH advised that he recalled that there had been an original drawing signed off however after this BMCL had changed their supplier to World Leisure. DH requested that BMCL provide the extra over cost. FS agreed to obtain the cost for the wheelchair and to check if WorldLeisure would take the stretcher back.</p>	
3781	PMI 402	CPS -004 (Child Protection Unit) – Wall Mounted colposcope	<p>19/05/2015  21/05/2015 04/06/2015</p>	<p>The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.</p> <p>Costs to be allocated to PMI 328 contingency sum.</p> <p>PM enquired if this could be installed on a surface pattress and FS agreed. BMCL to progress with pattress with chamfered edge and to paint to make surface wipeable.</p> <p>FS advised that the builders works have been carried out. DW noted that the electrical works were likely to be carried out over the coming week. DH enquired if BMCL could fit the fixings for the monitor bracket.</p>	

3788	PMI 403 -	Provision of interlocked switch socket in OPD-183	25/05/2015  28/05/2015 04/06/2015	The Board request the provision of 1no. 32A 2P&E Interlocked switched socket in OPD-183 NCH Out-patients treatment room for a V-beam Pulsed Pye Laser supply to be located above bedhead services trunking alongside vertical dropper. Costs to be allocated to PMI 328 contingency DW advised that CI had been issued to Mercury to carry out the works. DW advised that delivery of a switch socket was awaited. DH noted that the door is leaf and half – the gasket doesn't reach the door. This is a laser room and there are concerned about laser penetrating through the gaps. BMCL were asked to investigate if a larger blade could be fitted.	
3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015  28/05/2015  04/06/2015	The Board request a cost for the installation of power and data within ceiling voids in the following locations - GW3-036, - GW3 - 039 - GW3 - 042 In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room. GW advised that AK has been on leave and the cost info would be provided asap. DH suggest will be a couple of months. FS advised that BMCL did not want to be doing works when Yorkhill are moving into the hospitals. DH requested that BMCL look and see if there is sockets there and it just needs longer RJ45 cables. DH requested that BMCL identify any potential disturbance to the room. DW noted that BMCL may struggle to get Boston back on site but would continue to try.	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015  28/05/2015 04/06/2015	The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait. DW noted that the CI had been issued to Mercury. Mercury to provide the cost and the timescale. BMCL will provide costs asap	
3814	PMI 406 -	Enabling and facilitation works - MRI Transfer - NCH	26/05/2015  28/05/2015  04/06/2015	The Board request a cost to provide enabling and and facilitating works associated with the delivery and installation of MRI transferring from Yorkhill to RHSC Level 1. Works to include temporary hoardings, ramps, downtakings at external wall and MRI and subsequent reinstatements. FS noted that BMCL have a programme and understand the scope of works. FS will liaise with JD Peirce to ensure they have got the panel and to get them to site. FS advised that BMCL had an internal meeting and AStephen will be the contact for this item. DH advised that the NHS were awaiting the scaffold plan.	
3819	PMI 407 -	Installation of Vestibular Hook - REH 049	26/05/2015  28/05/2015  04/06/2015	The Board request a cost for the installation of a vestibular hook within room no. REH-049 including support framework fixed to underside of structural slab as required. FS advised that he had sent the previous drawing to M&S to obtain a price. These works will not be achieved prior to Yorkhill moving in. GW advised that SMonk is being chased for a cost by LJamieson.	

				<p>circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p>	
3883	PMI 412	NCH Rehab workshop and machine room - Changes to Supply (single phase to 3 phase)	04/06/2015	<p>The Board request that the supplies to NCH Rehab workshop and machine room are to be as per the attached which alters 4no. supplies (Router x 2, Band Finisher and Band Saw) from single phase to 3 phase.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15221	CE 108	ADULT HOSPITAL STAIR CORE A LEVEL 10 - REPLACE WINDOW	14/05/2015	Replace broken pane of glass to waiting room WS 10-006, all as set out in PMI 367.	
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015  28/05/2015	Please proceed with works set out in PMI 373.  PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE DH advised that he would liaise with DR.	
15451	CE 116	ADULT HOSPITAL IMAGING ROOM RAF-080 REMOVAL OF 1 No. STARKSTROM PENDANT	28/05/2015  04/06/2015	Isolation of services to pendant prior to removal by Starkstrom at no cost, make finishes good.  Agreed cost [REDACTED] incl OH+P but excl. VAT.  DH noted that there had been an issue raised the previous day. Philips have lowered the ceiling by 300mm and there is now 1 sprinkler head which will not reach the ceiling. DW agreed to investigate. PM noted that he had checked the cost build-up and there were no costs included for Starkstrom.	
15452	CE 117	CHILDREN'S HOSPITAL - HYDROTHERAPY POOL STEPS	03/06/2015	Please supply and install two sets of stainless steel steps as set out in PMI 401.	
15454	CE 118	DOOR ACCESS CONTROL ROOMS RNM-017 & RAF-117	03/06/2015	Please undertake work to rectify conflict with door access control between rooms RNM-017 and RAF-117 as set out in PMI 397.	
15455	CE 119	CHILDRENS HOSPITAL OR1 THEATRES - ADDITIONAL POWER AND DATA SOCKETS	03/06/2015	Please proceed and install additional power and data sockets in 5 No theatres for the OR1 / Richard Wolf installation all as set out in PMI 391.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	
15459	CE120	INSTITUTE NEW ENTRANCE - ASBESTOS REMOVAL	04/06/2015	The Board confirm their instruction under PMI 392 to inspect, test and remove asbestos pipe found during ground works for new entrance.  Agreed cost [REDACTED] incl OH+P but excluding VAT.	

### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015) **GW advised that there had been a meeting with DL. BMCL had been requested to list out all the staff time on the project (04/06/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) **DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) **DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015)**
- BMCE/BAM street lighting columns – PMI to be issued by Board to clarify free issue columns and works omitted from BMCE works. (19/02/2015). PM confirmed that BMCL should free issue the columns to BAM and that he would provide a PMI to confirm (26/02/2015) DP advised that BMCL are awaiting confirmation from GCC. GCC advising that they are leaving their installs in situ and these impact on the BMCL ability to install the 3 BMCL lights. BMCL are chasing GCC for a response and may need assistance from the NHS to progress this matter. PM agreed to check for contact details of the Project Street Lighting contact. (12/03/2015) DP advised that GCC have now contacted BMCL so dialogue being progressed. (19/03/2015) DP noted that discussions had progressed however GCC were to discuss the proximity of the overhead cables to the new column (26/03/2015) PM advised that he understood that there may not be as many light fittings required in phase 3a works. DP suggested that the street lights had already all been purchased (02/04/2015) **PM to confirm the way forward (28/05/2015)**
- ETFE roof – NHS will raise this as an EW. FS advised that the supplier were onsite the previous day and it had been identified that there was an issue with the relay at the 2<sup>nd</sup> motor which has subsequently been replaced and BMCL will review. Feedback regarding the reason why the 1<sup>st</sup> motor dropped out is awaited. PM noted that there appeared to be water in one of the cells and FS advised that the water was to be removed and BMCL would review this. (26/02/2015) It was noted that vectorfoiltec had been on site the previous. The relay had been replaced. Confirmation is awaited as to why the 1<sup>st</sup> motor had dropped out. The water ingress had been resolved – small tear sorted. The other area to be remediated was in relation to the interface between Vectorfoiltec and Prater panels and the panels would need to be taken off to resolve this matter (05/03/2015) FS advised that he had emailed Vectorfoiltec and was awaiting a response. FS had met with Prater and have organized for abseilers to take off panels so can remediate interface issue (12/03/2015) PM noted that the NHS were awaiting a report. AF noted that Vectorfoiltec have failed to respond to BMCL. BMCL will escalate the matter with the London office. BMCL will check their contract with Vectorfiltec. (19/03/2015) FS advised that a 7 day notification had been issued on 25/03/2015 (26/03/2015) FS agreed to provide an update to PM later that day (02/04/2015) FS advised that he had not received any further information to date. Sheila had been checking and there had been no further leaks since the fix to the Fatra had been carried out. PM noted that he had witnessed drips on the Tuesday/Wednesday. DW suggested that there may be a fault in the burn-off and to check this out an electrician would need to check the boxes via rope access. AF advised that he had written to the MD. The Customer Services Rep advised that they are not aware of the issues. PM suggested that the issues needed to be resolved and he did not want public to be accessing the building/area when there is leaks/drips. (30/04/2015) DW advised that BMCL are chasing up electrician visit to site (07/05/2015) DW advised that he had received confirmation that the Vectorfoiltec electrician will be here in the next 3 weeks – BMCL have advised that this timescales isn't good enough (14/05/2015) DW noted that the electrician would be on site on the 26<sup>th</sup> May 2015 (21/05/2015) DW advised that the ops had been on site the previous day – 19 of the 20 roof burns offs have an issue at the pillows (internal wiring to the pillows). DW has forwarded on the report to Vectorfoiltec and requested that they provide a response. DH advised that an urgent response was required as from a fire perspective the roof does not work It was agreed that GW would raise this item as an EW. (28/05/2015) **DW noted the following update from the previous day. It was proposed to strip down one of the hot wires in order to identify the issue. BMCL were continuing to push to get the issue resolved. The NHS had asked about contingency and there is no contingency. PM advised that he would raise the hot wire issue as an EW (04/06/2015) Cross reference NHS 059**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was

suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015) FS advised that checks were being carried out on level 10 and level 11 would be checked w/c 25/05/2015 (21/05/2015) FS advised that BMCL checks had been completed to level 11 and were now started in the basement. Mercury are replacing any missing bags. A marked up drawing would be provided via Aconex. PMI awaited from NHS (28/05/2015) **FS advised that Astins had completed their survey the previous day. Mercury have fire bag drawings and everything had been reinstated. GW advised that there needed to be a discussion re costs and BMCL did not consider these to be BMCL costs (circa [REDACTED] (04/06/2015)**

- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015) DW advised that the blue socket is not on the signed off drawings. DH agreed to check the bedhead drawings (14/05/2015) **DH agreed to check the drawings asap (21/05/2015)**
- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015) FS advised that BMCL were not providing a drawing however the planting as discussed would be carried out. (14/05/2015) PM advised that he undertaken a walkround with PMc re hoarding. GW advised that the NHS had agreed the hoarding proposal and suggested that there may be a need to put more metal hoarding up. PM noted that PMcG would provide a drawing to the NHS for review. PM to advise where he would prefer to have the 'better' fencing installed (21/05/2015) **GA advised that PMc has a marked up drawing which had been discussed with Townhill. GW advised that BMCL needed to understand what happens to the other side of the road once demo done at the car park. DH requested a copy of the marked-up drawing (28/05/2015) PM advised that he had walked the line of the fence and a drawing had been prepared. In principle PM was ok with the fencing however he would need to understand the boulevard fencing i.e. does it have debris netting. PM noted that the invisibly splay at the pedestrian crossing could be improved upon. PM advised that he could mark up the visibility splay. Agreed this item could be closed as matters are WIP. (04/06/2015)**
- Cycling shelters – GB advised that these were being reviewed and acknowledged that there was works to be done i.e. sort the ponding on the roof. (30/04/2015) GB noted that proposals had been received and was with Ginkgo. GB would provide information to the NHS once proposal is finalized (07/05/2015) GB advised that BMCL were pushing Ginkgo to finalise their proposals (15/5/2015) PM noted that he had received a proposal to fill the roof with stones so that the water could not be seen – this proposal would not be accepted by the NHS. PM suggested that a drain outlet to the drain the water off should be installed. (21/05/2015) It was noted that GB has liaised with Ginkgo – will be doing a level survey and are looking a installing drainage (28/05/2015) **PM advised that he had been shown a proposal for the roof and in principle had approved the proposal. It was agreed this item could be closed (04/06/2015)**
- Helipad – GB advised that he is going through the folder and pulling out all the relevant info. PM advised that he would want all the info put on Zutec. DW noted that BMCL would have all the info for the helipad and it would have been given to the CAA (14/05/2015) FS advised that he had information to provide to PM asap. The information would be contained in the CAA pack (21/05/2015) FS advised that it is WIP to locate the CAA pack of info. (28/05/2015) **PM advised that he would raise this topic as an EW (04/06/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015)
- TUV SUD report issue (Emission testing - SEPA )– Cross ref PMI 339 and PMI 379. CE awaited (28/05/2015)
- Hepa filters – It was noted that there had been a discussion about the filters being missing from the NCH Isolation rooms – BMCL were awaiting confirmation of the delivery of filters. It was thought that there may be a timing issue to complete in time to allow the NHS to do their testing. BMCL would provide a timescale for the supply of the filters. (06/04/2015)
- Nuclear Medicine – It was noted that there was one room in Nuclear Medicine that still had cabinets to be installed and this had been raised with Jordan. FS agreed to liaise with Jordan (04/06/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 24/06/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 27/03/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			26/03/2015 02/04/2015	works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.	
			28/05/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS.	
2457 6	BMCE-EWN- 000154	Retrospective Building Warrants for PMI's	25/03/2015	Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections  Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.  Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05//2015 14/05/2015	GB noted that collation of the Building Warrants is WIP GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	

			21/05/2015 28/05/2015 04/06/2015 11/06/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS. FS advised that GB is liaising with Mercury GB advised that this would be progressed once the works completed in the summer	
2556 2	BMCL-EWN-000158	Proximity of Govan Road feature wall to incoming gas main	10/06/2015	SGN have recently raised concerns over the proximity to their incoming gas main to the new feature wall which is being constructed at Govan Road in front of the gas housing (see attached sketch). They are concerned that they will not have unrestricted access to the whole pipe which passes under and runs along the back of the feature wall base, should they need to carry out urgent repairs. We had previously discussed the pipe passing below and are working to a bridging detail - but the position of the pipe at the back only became evident during the install of the RC base. Further discussion with SGN will continue this week.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 24/06/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTURAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainbond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed</p>	

A51679245

			11/06/2015	therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards. FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015  21/05/2015 28/05/2015 04/06/2015 11/06/2015	The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015. FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel. FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening. FS advised that on the previous occasion of rain he had investigated and it was thought that it was now identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter. FS noted that a repair had been carried out on Thursday and he understood that there had been water ingress on Saturday. FS would review the roof later that day and proposed to test out using a hose. PM suggested that he would want to be present when the testing was being carried out.	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015  11/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer. DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 24/06/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liase with Hugh McDermont to agree extend of works. All as discussed Paul McGuiness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.	
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).	
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.	
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.	

			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is thought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on.
			19/02/2015	Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed. BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.
			26/02/2015	DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.
			05/03/2015	PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.
			12/03/2015	DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.
			19/03/2015	GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.
			26/03/2015	PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.
			02/04/2015	PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.
			23/4/2015	PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.
			30/04/2015	GW noted that a CE was required urgently for this item.
			07/05/2015	PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review

			14/05/2015	reviewed the costs and would discuss with GW. DH advised that DR and GW have discussed at GW is reviewing the scope of works and the associated costs. DH suggested that it would be beneficial for DH, CG and GW to discuss the scope of works. The engineers had advised that the drainage isn't big enough if all the machines are running and discharging at the same time. GB noted he had previous experience of this situation in another project and that an attenuation drain had to be built in.	
			21/05/2015	SF to organise meeting	
			28/05/2015	Meeting being organised to take place later that day.	
			04/06/2015	DH advised that he is awaiting revised costs. DW noted that he would chase the costs up.	
			11/06/2015	GW advised that he was meeting with Mercury later that day. BMCL Have been pursuing Mercury for costs.	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.	
			19/02.2015	Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward.	
			26/02/2015	GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31 <sup>st</sup> March completion date is doubtful.	
			05/03/2015	GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.	
			12/03/2015	DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.	
			19/03/2015	DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015	
			26/03/2015	DP advised that the design is due to be provided imminently.	
			02/04/2015	DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.	
			22/04/2015	PM and DL to discuss/agree the way forward asap.	
			30/04/2015	PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.	
			07/05/2015	PM advised that the information is with IP for review.	
			14/05/2015	DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.	
			21/05/2015	SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board	
			04/06/2015	DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.	
			11/06/2015	GW advised that he had rechecked the costs and he thinks that the costs are correct.	

3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	The Board require the undemoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.	
			26/02/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.	
			05/03/2015	PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .	
			12/03/2015	GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.	
			19/03/2015	GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.	
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.	
			02/04/2015	DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.	
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.	
			30/04/2015	PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.	
			14/05/2015	DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.	
			21/05/2015	SF to organize meeting	
			28/05/2015	Meeting being organized for 04/06/2015	
			11/06/2015	GW advised that CE is awaited. Revised costs are on Sypro ([REDACTED]). NHS requested to review asap.	
3458	PMI 353	Neurosurgery Entrance - Bin Store, IT Server and Tube Room relocation	04/03/2015	The Board request a cost for the relocation of the Bin Store, Pneumatic Tube and IT Server Rooms from proposed position within the existing building to the area intended for the Dental X-Ray room as per the attached sketch.	Cross ref CE 124

			<p>This will negate the need to alter the existing dental x-ray room to accommodate the Store, Pneumatic Tube and IT Server Rooms within the new construction works. There will be no need to provide radiation protection within this space but shielding between existing and new spaces will be required.</p> <p>The access to the bin store needs to be located as close as possible to the main North South corridor.</p> <p>Radiation Protection to be as follows: The windows should be overlapped including frames with code 4 lead (1.8 mm Pb) plasterboard.</p> <p>If the existing 'external' walls are brick or concrete in construction then this will be sufficient. However if it is a steel outer (unknown thickness) only with cladding and insulation and plasterboard to inside then once these external walls become internal to the building then code 4 lead (1.8 mm Pb) plasterboard will be required from floor to 2 m height to protect public and staff working on the other side of these walls.</p> <p>05/03/2015 GW advised that he would upload the costs asap. 19/03/2015 GW advised that this is under review by Paul. 26/03/2015 It was noted that GB is awaiting info re design fees, etc. 02/04/2015 GB advised that the fees from Nightingale and Mercury are awaited. Work is ongoing. GB suggested that there may be fire issues and these would be flagged to the NHS asap. 22/04/2015 PM advised that GF and PHeath are looking at alternate plan so as not to move a pre-cast panel. 29/04/2015 GB noted that Heath has had some further discussion with GF. Liaison is ongoing with WSP re fire escape, etc. 07/05/2015 PM noted that PH, GF and GA laising. GB advised that agreement had been received regarding the proposals tabled at the INS Progress meeting – the cost changes were still to be agreed – primarily a couple of partitions. 14/05/2015 GB advised that the design strategy and fire strategy checks. The information was back with Paul. 21/05/2015 GW noted that the costs had been uploaded for NHS review on the 15/05/2015. PM agreed to review asap. 04/06/2015 PM advised that he would review the costs and confirm the way forward.</p>	
3542	PMI 365	INS NEW ENTRANCE - INVESTIGATION WORKS	<p>20/03/2015 Undertake trial digs to investigate unknown underground services. Please undertake trial pit digs to investigate unknown underground services at locations close to piles P21 and P21A as per attached drawing. Once exposed notify the Board's Project Manager to inspect and agree course of action.</p> <p>26/03/2015 It was noted that an instruction had been issued the previous Friday to commence the works. 22/04/2015 GW advised that the costs would be discussed on the basis of the actual works carried out. 30/04/2015 GB suggested that investigative works were ongoing and that an asbestos pipe had been discovered. GW noted that BMCL would need to review the programme. 07/05/2015 PM noted that cost information was awaited 14/05/2015 FS noted that investigation works are ongoing 28/05/2015 FS advised that he has provided a full copy of the survey – probed all the areas GF noted that investigative works had commenced. There is a gas line which needs to be</p>	Cross ref CE 125

			04/06/2015	confirmed as being live or dead. There are a couple of other pipes which need to be identified as to what they are. GA advised that BMCL need to understand what the pipes are so that controls can be put in place before the pipes are checked out. GA noted that the gas pipe is for the old cafe but it was not known if this was dead/live. DW noted that there is no easy way to deal with unknown pipes. DH enquired if the pipe could be followed out to the path and check if there is a toby, etc. DW suggested that it would be better to identify the end of the pipe inside the building. GA noted that there is potentially gas at the imaging entrance, old steam pipe and drain from old fountain. DW suggested that the digging should be progressed towards the building. DH agreed this was the best course of action at this time and GA was asked to liaise with Land Eng.	
			11/06/2015	FS advised that it is work in progress to identify unknown services – services have been exposed into the building. PM noted that the fountain pipe has been discounted. The Gas pipe was to be checked going into the building. PM had advised that a small hole should be drilled into the top of the black marley pipe to check if this is running. FS noted that GA and GF continue to liaise about the services. PM advised that he had asked GF to get Estates Reps over to resolve the gas pipe issue asap. GA advised that the Gas board had been on site and had advised that it is their pipe. The gas board had shown the length of pipe on a drawing and suggested that the leg of steel pipe is redundant however they will need to come back out and open up a valve to ensure is redundant. Once the pipe has been proved as being redundant then BMCL/NHS can cut the steel pipe. There had been no timescales given for the return to site of the Gas board. GA would chase up the Gas Board on Monday (15/06/2015). GW noted that the costs for the investigative works had been uploaded and requested a CE for the investigative works.	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015	Please provide a cost to install the additional access infrastructure as detail on the attached drawing.  Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.  Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.  With the cost please provide a timescale to order materials and complete the installation.	
			14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015	DW advised that Mercury are currently pricing. GW noted that this item was currently being priced DW advised that a cost is awaited from Mercury. GW advised that he was checking the costs before providing to the NHS PM advised that he had received the cost and he would need to get confirmation from the Users that they are prepared to cover the cost from their internal budget.	
3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015  14/05/2015	Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 /2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings. PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work	

			<p>21/05/2015</p> <p>28/05/2015</p> <p>11/06/2015</p>	<p>redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by.</p> <p>PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed.</p> <p>FS advised that Astins are onsite on 29/05/2015. BMCL have a door set and the door works would be carried out over the weekend. DH advised that he would confirm this with DL.</p> <p>FS advised that the doors are due to arrive on site later that day and he would link with the Theatre Manager to arrange a time to fit – it was thought it was likely to be Friday night.</p>	
3764	PMI 396 -	Sprinkler Head RCI-013	<p>13/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>The Board request the relocation of 1no. sprinkler head in RCI-013, Interventional Radiology Lab, currently located between the Toshiba gantry rails and likely to incur damage upon movement of the gantry carriage.</p> <p>DW noted that this item was being reviewed the previous day. Cost info will be provided asap.</p> <p>It was noted that this item was closed.</p> <p>DH noted that this is a Group 5 equipment list item – CE to be provided.</p>	Cross ref CE 128
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	<p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>11/06/2015</p>	<p>Please supply and install additional turfing to areas A &amp; B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.</p> <p>In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.</p> <p>PM noted that cost info awaited</p> <p>GW agreed to provide the cost asap</p> <p>PM noted that Land Eng had already planted out 1 area and there was no benefit in ripping the planting back out. Only the 2 small areas require to be priced now.</p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	<p>18/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the</p>	

			11/06/2015	lights. PMI 411 had been raised to cover these items. GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015  21/05/2015 28/05/2015  04/06/2015  11/06/2015	Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure. GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails. FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works. FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool It was noted that MMacleod was liaising with Physio for confirmation. It was noted that CE 0117 covered this item. FS advised that he had spoken to MMaCl the previous day who had advised that the stretcher is not suitable (would not pass infection control) and it was suggested that a wheelchair option would be preferable. DH advised that he recalled that there had been an original drawing signed off however after this BMCL had changed their supplier to World Leisure. DH requested that BMCL provide the extra over cost. FS agreed to obtain the cost for the wheelchair and to check if WorldLeisure would take the stretcher back. FS advised that he had received the quote for the wheelchair adaptor the previous day (circa [REDACTED]). BMCL were awaiting confirmation from World Leisure that they will give credit back for the stretcher.	
3781	PMI 402	CPS -004 (Child Protection Unit) – Wall Mounted colposcope	19/05/2015  21/05/2015 04/06/2015  11/06/2015	The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.  Costs to be allocated to PMI 328 contingency sum. PM enquired if this could be installed on a surface pattress and FS agreed. BMCL to progress with pattress with chamfered edge and to paint to make surface wipeable. FS advised that the builders works have been carried out. DW noted that the electrical works were likely to carried out over the coming week. DH enquired if BMCL could fit the fixings for the monitor bracket. GW noted that the cost was circa [REDACTED]. DW noted that the electrical works were getting done later that day. It was noted that the costs are to be allocated to PMI 328.	
3788	PMI 403 -	Provision of interlocked switch socket in OPD-183	25/05/2015  28/05/2015	The Board request the provision of 1no. 32A 2P&E Interlocked switched socket in OPD-183 NCH Out-patients treatment room for a V-beam Pulsed Pye Laser supply to be located above bedhead services trunking alongside vertical dropper. Costs to be allocated to PMI 328 contingency DW advised that CI had been issued to Mercury to carry out the works.	

			04/06/2015  11/06/2015	DW advised that delivery of a switch socket was awaited. DH noted that the door is leaf and half the gasket doesn't reach the door. This is a laser room and there are concerned about laser penetrating through the gaps. BMCL were asked to investigate if a larger blade could be fitted. DW noted that the delivery of the socket is awaited and BMCL are chasing this up. DW would confirm the date for the works asap. FS agreed to check the door blade.	
3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015  28/05/2015  04/06/2015 11/06/2015	The Board request a cost for the installation of power and data within ceiling voids in the following locations - GW3-036, - GW3 - 039 - GW3 - 042 In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room. GW advised that AK has been on leave and the cost info would be provided asap. DH suggest will be a couple of months. FS advised that BMCL did not want to be doing works when Yorkhill are moving into the hospitals. DH requested that BMCL look and see if there is sockets there and it just needs longer RJ45 cables. DH requested that BMCL identify any potential disturbance to the room. DW noted that BMCL may struggle to get Boston back on site but would continue to try. GW noted that the Mercury cost had been received (circa 8k). LJamieson is in the process of reviewing the costs. DW advised that he would resend his comments to GW in LJ's absence.	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015  28/05/2015 04/06/2015 11/06/2015	The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait. DW noted that the CI had been issued to Mercury. Mercury to provide the cost and the timescale. BMCL will provide costs asap DH advised that these works were getting urgent (circa [REDACTED]). DW advised that he would resend his comments to GW in LJ's absence.	
3814	PMI 406 -	Enabling and facilitation works - MRI Transfer - NCH	26/05/2015  28/05/2015  04/06/2015 11/06/2015	The Board request a cost to provide enabling and and facilitating works associated with the delivery and installation of MRI transferring from Yorkhill to RHSC Level 1. Works to include temporary hoardings, ramps, downtakings at external wall and MRI and subsequent reinstatements. FS noted that BMCL have a programme and understand the scope of works. FS will liaise with JD Peirce to ensure they have got the panel and to get them to site. FS advised that BMCL had an internal meeting and AStephen will be the contact for this item. DH advised that the NHS were awaiting the scaffold plan. PM noted a cost of circa [REDACTED]. DH advised that he is chasing the scaffolding design.	Cross ref CE 121
3819	PMI 407 -	Installation of Vestibular Hook - REH 049	26/05/2015  28/05/2015  04/06/2015 11/06/2015	The Board request a cost for the installation of a vestibular hook within room no. REH-049 including support framework fixed to underside of structural slab as required. FS advised that he had sent the previous drawing to M&S to obtain a price. These works will not be achieved prior to Yorkhill moving in. GW advised that SMonk is being chased for a cost by LJamieson. FS advised that the cost was to be received later that week. DW advised that he would be checking out the room for services.	

				<p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p>	
3883	PMI 412	NCH Rehab workshop and machine room - Changes to Supply (single phase to 3 phase)	04/06/2015	The Board request that the supplies to NCH Rehab workshop and machine room are to be as per the attached which alters 4no. supplies (Router x 2, Band Finisher and Band Saw) from single phase to 3 phase.	Cross Ref CE 129
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	11/06/2015	<p>Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.</p> <p>The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.</p> <p>Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on Sketch B.</p> <p>To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman).</p>	
3922	PMI 414	CHILDREN'S HOSPITAL EMERGENCY DEPT - VIDEO ENTRY SYSTEM	15/06/2015	Please provide a cost to relocate ambulance video entry system base from desk in area OBW-002 Staff / Enquiry to Staff Base in Chilren's ED area code EMC 061. External call point to remain in current location. Refer attached sketch.	
3923	PMI 415	- Additional IPS Sockets	15/06/2015	<p>The Board request a cost for the installation of 4no. IPS twin socket outlets (medical) in trunking in RCG-071 and 2no. IPS twin sockets on trunking in RCG-069.</p> <p>Please cost RCG-071 as standalone &amp; RCG 069 as complimentary as the former may proceed without the latter but not vice versa.</p> <p>If the quantities exceed capacities on the existing IPS Unit please advise prior to pricing.</p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul>	

3925	PMI 417 -	Excavation around existing gas main - Neurosurgery entrance	15/06/2015	The Board request the provision of quotation for the excavation around existing abandoned Gas Main outwith extension building line. Once excavated cut the pipe and plug with concrete as per discussions with SGN.	
3926	PMI 418 -	Additional investigative excavations - Neurosurgery Entrance	15/06/2015	The Board instruct the additional investigative excavations to confirm the extent of unknown services identified during the pile cap excavations. These services are detailed within the summary report INS Entrance -Trail Pit Photos and Services Clash Report (Dated 27th May 2015).	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fore doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users.</p>	
3936	PMI 420 -	CHILDRENS HOSPITAL - MRI INSTALLATION ADDITIONAL WORKS	17/06/2015	Amend works set out in PMI 406 as follows. Omit single direction ramp at gradient of 1:12 at change in level outside Neo-natal Unit. Add ramp with top landing 1220x1500mm with ramp 1220mm wide on grade 1:12, ramp to have guard rail to stop trolley falling off edge. Ramp to be constructed from regularised timber and 18mm plywood.	
3937	PMI 421	ADULT HOSPITAL OPD GROUND FLOOR ROOM ORT-014 - WALL BARS	17/06/2015	<p>Please proceed and fit 2 sets of timber wall bars in room ORT 014. Wall bars are each nominally 2400mm high by 860mm wide and are fixed to the wall with angle brackets provided. Wall bars come flat pack and require to be put together, all fixings supplied. Also provide a finished surface mounted patress top and bottom as per instructions, screw fix pattress to background studs to allow for reasonable load as discussed PMoir/FShaw/User 17/6/15. make all finishes good.</p> <p>Refere attached sketch for location.</p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p>	

				<p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p>	
3960	PMI 423	CHILDRENS HOSPITAL - MEDICINEMA	23/06/2015	<p>Please complete defects to two sets of doors as quickly as possible. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.</p> <p>Please complete defects to two sets of doors as quickly as possible, these have been on defects list for sometime and as Medicinema coming into use shortly these defects require to be completed. Door manufacturer to confirm integrity of 1 hour fire doors maintained following change of ironmongery to one set of doors and to the other damage to door following replacement of glass panel. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.</p>	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015   28/05/2015 11/06/2015	<p>Please proceed with works set out in PMI 373.</p> <p>PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&amp;B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE</p> <p>DH advised that he would liaise with DR.</p> <p>FS advised that all the works had been completed with the exception of anti-lig knobs which were to be fitted later that day. BMCL were aware that the light switches did not have tamper proof screws. DH suggested that BMCL should try to obtain the tamper proof screws asap. DH agreed to chase DR for a response to the cost information</p>	Cross ref CE 126?
15451	CE 116	ADULT HOSPITAL IMAGING	28/05/2015	Isolation of services to pendant prior to removal by Starkstrom at no cost, make finishes good.	

		ROOM RAF-080 REMOVAL OF 1 No. STARKSTROM PENDANT	04/06/2015  11/06/2015	Agreed cost [REDACTED] incl OH+P but excl. VAT.  DH noted that there had been an issue raised the previous day. Philips have lowered the ceiling by 300mm and there is now 1 sprinkler head which will not reach the ceiling. DW agreed to investigate. PM noted that he had checked the cost build-up and there were no costs included for Starkstrom.  It was agreed this CE could be closed. Separate PMI to be issued re sprinkler head – flexi hose proposal does not work.	
15560	CE 121	CHILDRENS HOSPITAL - MRI TRANSFER REINSTATEMENT WORKS	12/06/2015	Please proceed and provide attendance and reinstatement works associated by the delivery of a MRI transferred from Yorkhill Hospital and as set out in PMI 406.	24/06/2015
15593	CE 122	FACILITIES - ENABLING WORKS FOR MOP WASHER/DRYERS	17/06/2015	Please proceed and install M&E services and carry out minor building works to enable the installation of tumble dryers and high spin washers in the Laboratory & Facilities Block ground floor.	24/06/2015
15595	CE 123	CHILDRENS HOSPITAL GW3 - INSTALL OF POWER & DATA IN CEILINGS	17/06/2015	Proceed with works set out in PMI 404 to provide additional power and data in rooms GW3-036; GW30039 and GW3-042.	24/06/2015
15608	CE 124	Neurosurgical Block Entrance Works - Amendments to First Floor Layout	17/06/2015	Proceed with works to reconfigure the first floor plan to retain the dental X-Ray room in existing position.	24/06/2015
15609	CE 125	Neurosurgical Block Entrance Works - Investigation of and removal underground services	18/06/2015	Undertake investigation to establish position and type of uncharted services, hand dig around, establish if live or redundant, terminate and remove.	24/06/2015
15610	CE 126	CHILDREN'S HOSPITAL - DCFP WARD ADDITIONAL ANTI-LIG WORKS	18/06/2015	Proceed with works as set out in PMI 373, for two high risk en suite shower and WC rooms, and to nurse call system.	24/06/2015
15611	CE 127	ENERGY CENTRE - FLUE GAS EMISSIONS MONITORING	18/06/2015	To meet requirements of SEPA, supply and install flue gas testing sockets to 7 No boiler flues and 3 No CHP flues.	24/06/2015
15612	CE 128	CHILDREN'S HOSPITAL IMAGING ROOM RCI-013	18/06/2015	As a result of a clash between the head track for Group 5 imaging equipment a sprinkler head require to be isolated, repositioned and re energised, please proceed with works as set out in PMI 396.	24/06/2015
15665	CE 129	CHILDREN'S HOSPITAL REHAB DEPT - WORKSHOP POWER SUPPLIES	22/06/2015	Please proceed with works as set out in PMI 412 to uprate 5 No power supplies in the workshop area.	24/06/2015
15669	CE 130	PNEUMATIC TUBE SYSTEM - ADAPTATIONS TO PROGRAMMING FOR DIAGNOSTIC SERVICES	23/06/2015	Please proceed and make programming changes to the pneumatic tube system as set out in PMI 409.	24/06/2015
15681	CE 131	EXTERNAL WORKS - LANGLANDS DRIVE LAY-BY SERVICES DIVERSIONS	23/06/2015	Confirmation of works undertaken under PMI 309 to divert and lay new ducts for IT cables that were uncharted and not recorded on external services drawings issued by the Board at tender stage. Costs for hand dig and lowering of 6 No ducts in addition to diversion.	24/06/2015

### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015) **GW advised that there had been a meeting with DL. BMCL had been requested to list out all the staff time on the project (04/06/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) **DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015)
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015) FS advised that checked were being carried out on level 10 and level 11 would be checked w/c 25/05/2015 (21/05/2015) FS advised that BMCL checks had been completed to level 11 and were now started in the basement. Mercury are replacing any missing bags. A marked up drawing would be provided via Aconex. PMI awaited from NHS (28/05/2015) FS advised that Astins had completed their survey the previous day. Mercury have fire bag drawings and everything had been reinstated. GW advised that there needed to be a discussion re costs and BMCL did not consider these to be BMCL costs (circa [REDACTED] (04/06/2015) FS advised that Mercury have replaced all the missing bags. BMCL would upload all the info to Zutec. GW noted that a PMI and a discussion about the works was required (11/06/2015)
- MRI/Anaesthetic Prep rooms – blue socket – DP agreed to discuss this with DW (02/04/2015) DH advised that query is why don't have any blue sockets. DW advised that he understood the area had been built as per signed off drawing. (30/04/2015) DW advised that the blue socket is not on the signed off drawings. DH agreed to check the bedhead drawings (14/05/2015) DH agreed to check the drawings asap (21/05/2015) DH advised that he had looked at the rooms. The NHS would not have asked for blue sockets to prep room as users had subsequently changed the use of the prep room. The second room was a previous change. DH and DW to review the trunking onsite. DH agreed to issue a PMI (11/06/2015)

- External works – AF advised that he would want to go over the landscape drawing and understand what the expectation is for official opening. AF was meeting with DL the next day (30/4/2015) FS advised that turf is going into areas – an over marked drawing will be provided. PM will provide a PMI once drawings received. (07/05/2015) FS advised that BMCL were not providing a drawing however the planting as discussed would be carried out. (14/05/2015) PM advised that he undertaken a walkround with PMc re hoarding. GW advised that the NHS had agreed the hoarding proposal and suggested that there may be a need to put more metal hoarding up. PM noted that PMcG would provide a drawing to the NHS for review. PM to advise where he would prefer to have the 'better' fencing installed (21/05/2015) GA advised that PMc has a marked up drawing which had been discussed with Townhill. GW advised that BMCL needed to understand what happens to the other side of the road once demo done at the car park. DH requested a copy of the marked-up drawing (28/05/2015) PM advised that he had walked the line of the fence and a drawing had been prepared. In principle PM was ok with the fencing however he would need to understand the boulevard fencing i.e. does it have debris netting. PM noted that the invisibly splay at the pedestrian crossing could be improved upon. PM advised that he could mark up the visibility splay. Agreed this item could be closed as matters are WIP. (04/06/2015) **PM advised that he wished to see a drawing re the fence and that he would provide information regarding the splay (11/06/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) **GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015)**
- TUV SUD report issue (Emission testing - SEPA) – Cross ref PMI 339 and PMI 379. CE awaited (28/05/2015) **GW advised that costs had been received from Mercury for the install of sockets. DW advised that the costs include for the install of the Bosch TUV. Designed scaffold was also required. GW advised that he would provide the costs via Sypro. GW to provide TUV report to GW (11/06/2015)**
- Nuclear Medicine – It was noted that there was one room in Nuclear Medicine that still had cabinets to be installed and this had been raised with Jordan. FS agreed to liaise with Jordan (04/06/2015) **FS advised that the cabinets are due on site on 25/06/2015. There may be an issue obtaining the worktop however. (11/06/2015)**
- Patient Entertainment System – DH noted that he had been advised that there is a problem with the screens in schiehallion – the screen is pixilated. He had been advised that this is a Board issue. IT are however advising that it is an Airwave issue. DW noted that Airwave problem based on type of network and he would check this out (11/06/2015)
- IPS Repairs – FW noted that there was an issue re type of dispenser fitted as they don't cover the existing holes (11/06/2015)
- Demo works – It was noted that PMc has identified some matters requiring discussion i.e. more car parking spaces to be lost, services trenches, services disconnections, etc. (11/06/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1521

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 22/07/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. <b>PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing</p>	

			07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015 25/06/2015	update/design fees. GB noted that collation of the Building Warrants is WIP GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS. FS advised that GB is liaising with Mercury GB advised that this would be progressed once the works completed in the summer GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
25562	BMCL-EWN-000158	Proximity of govan road feature wall to incoming gas main	10/06/2015 25/06/2015	SGN have recently raised concerns over the proximity to their incoming gas main to the new feature wall which is being constructed at Govan Road in front of the gas housing (see attached sketch). They are concerned that they will not have unrestricted access to the whole pipe which passes under and runs along the back of the feature wall base, should they need to carry out urgent repairs. We had previously discussed the pipe passing below and are working to a bridging detail - but the position of the pipe at the back only became evident during the install of the RC base. Further discussion with SGN will continue this week. FS noted that the feature wall was starting to be constructed and the heras would be taken down that day with the ivy being on site to be placed. It was agreed that the planters were to be placed at the main door the following morning. PM enquired about the heras fencing and GA advised that BMCL had been awaiting the construction of solid fencing which would be completed that day and the blue hoarding would be tidied up as well. It was agreed this item could be closed.	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	22/07/2015	Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.  The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.  Board to issue PMI/ CE covering the works.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 21/07/2015

						
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status	
24641	NHS EW 057 A51679245	ADULT HOSPITAL	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that		

		STRUCTURAL SYSTEM	<p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p>	<p>occured on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p>	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	<p>18/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p>	<p>The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.</p> <p>FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.</p> <p>FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.</p> <p>FS advised that on the previous occasion of rain he had investigated and it was thought that it was now identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter.</p> <p>FS noted that a repair had been carried out on Thursday and he understood that there had been water ingress on Saturday. FS would review the roof later that day and proposed to test out using a hose. PM</p>	

			25/06/2015	suggested that he would want to be present when the testing was being carried out. FS noted that the sill flashing and extrusion had been redone and no issue had been identified since these works had been carried out.	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015  11/06/2015  25/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer. DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue. FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 21/07/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liase with Hugh McDerment to agree extend of works. All as discussed Paul McGuiness / Hugh McDerment. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and	

A51679245

			23/10/2014	agree extend of works. PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.
			27/11/2014	AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.
			04/12/2014	AF advised that works have been started, the wall had been taken down and the trees were to be taken down the next day (Fri).
			11/12/2014	DH advised that there had been a suspicion of there being a 2 <sup>nd</sup> gas pipe. DP advised that SGN have inspected as if it is a live pip and confirmed that there is plenty of coverage on it. BMCL are liaising with SGN.
			08/01/2015	DP advised that BMCL are working with SGH and it was thought the works would be complete 3-4 weeks post handover. An old gas main had been located so operatives are being careful working in that area.
			15/01/2015	DP advised that work is ongoing. A further rogue gas pipe had been identified and BMCL were working with SGN however it was thought that the pipe is at a sufficient depth to allow the BMCL works to be progressed
			22/01/2015	AF suggested that there would be 4 weeks work post 26 <sup>th</sup> January to conclude and this matter would be added to the schedule with a completion date of end Feb 2015.
			29/01/2015	AF advised that BMCL were still targeting the end Feb for completion of these works. PM advised he will discuss with AF the alternate proposal to the blue proposed shelter and requested that BMCL do not fit in the blue bus stop. GW advised that he would provide cost info.
			05/02/2015	GW advised that PMcG, HMcD and Land Eng are going to open up some services – further details will be available on 09/02/2015. PM advised that he had walked round with PMcG and that it is ithought that the bus stop may be constrained. PMcG Had agreed to get a drawing of the bus layby. There is potential impacts on the fence line works which need to be completed by 31 <sup>st</sup> March 2015 as is Capital Plan funded.
			12/02/2015	GW advised that the trial holes were currently being dug with a view to getting HMc to review on 13/02/2015. AF advised that he is of the view that progress not being achieved quick enough therefore he had asked for works to be pushed on. Site visit 18/02/2015 (PM, HMcD, PMcG, JP) agreed black ducts at east end of bus stop deep enough to remain with perhaps some localised dig to drop, at west end ducts will require to be dropped by further dig. Number of ducts to be rationalised as some empty and can be removed.

			<p>19/02/2015 BM to contact SGN and have CI gas pipe terminated. Boards fencing and car park project commences 23 February 2015.</p> <p>26/02/2015 DP advised that there is 2 BMCL working – 1 squad is working on the ducts and the other the block. GW advised that the costs had been uploaded to Sypro.</p> <p>05/03/2015 PM advised that he had received the price. GW advised that BMCL are ongoing with the work so require a CE. PM suggested that BMCL could excavate and drop the 3 live ducts and remove the ducts that are not live. PM needs an understanding of the quotation (circa [REDACTED]) before the CE can be issued.</p> <p>12/03/2015 DP advised that reps are working on and DP would tie in with the reps later that day. PM advised that he will discuss with DR the [REDACTED] cost and that he needed to understand the original work content and what is being done.</p> <p>19/03/2015 GW advised that he had further reviewed the costs and they look satisfactory. PM agreed to progress the CE noting that he just wanted to understand the costs and understand what was agreed in the scope of works.</p> <p>26/03/2015 PM advised that he has the workings to review and needed to check out the existing agreed services drawing in advance of providing feedback.</p> <p>02/04/2015 PM advised that he had not had an opportunity to review the existing services drawing. AF suggested that the works were being done/been completed. GW advised that the only thing outstanding is CE.</p> <p>23/4/2015 PM advised that he would progress this item asap. GW enquired if there was anything that BMCL could do to assist. PM needed to review the drawing. GW advised that he would liaise with PMcG for a copy of the drawing.</p> <p>30/04/2015 GW noted that a CE was required urgently for this item.</p> <p>07/05/2015 PM requested that GB issued the drawings in PDF format. GB suggested that the drawings had been issued in PDF format. PM agreed to check he had received the drawings in PDF and review asap.</p> <p>14/05/2015 PM noted that he had received the drawings in autocad and would try to locate software to open them.</p> <p>28/05/2015 GW advised that he needed a CE urgently – the works have been carried out.</p> <p>11/06/2015 PM advised that he has a NHS CAD multi-layer drawing which shows the services. PM wanted the BMCL copy of this drawing as this is what BMCL refer to. PM agreed to liaise with PMcG.</p> <p>25/06/2015 Agreed item can be closed. Cross reference CE 131.</p>	
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015 Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>19/02/2015 Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>26/02/2015 GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>05/03/2015 GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>12/03/2015 DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p>	

			<p>19/03/2015 DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>26/03/2015 DP advised that the design is due to be provided imminently.</p> <p>02/04/2015 DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>22/04/2015 PM and DL to discuss/agree the way forward asap.</p> <p>30/04/2015 PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>07/05/2015 PM advised that the information is with IP for review.</p> <p>14/05/2015 DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>21/05/2015 SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>04/06/2015 DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>11/06/2015 GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>25/06/2015 DW noted that minimal works have been commenced.</p>	
3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	<p>19/02/2015 The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.</p> <p>26/02/2015 GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.</p> <p>05/03/2015 PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .</p> <p>12/03/2015 GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.</p> <p>19/03/2015 GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the</p>	

			<p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>11/06/2015</p> <p>25/06/2015</p>	<p>lines are going in so that he can provide feedback to the telecoms reps.</p> <p>PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.</p> <p>DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.</p> <p>PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.</p> <p>PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.</p> <p>DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.</p> <p>SF to organize meeting</p> <p>Meeting being organized for 04/06/2015</p> <p>GW advised that CE is awaited. Revised costs are on Sypro ([REDACTED]). NHS requested to review asap.</p> <p>DH noted that it is WIP to check back previous documentation.</p>	
3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	<p>12/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p>	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p>DW advised that a cost is awaited from Mercury.</p> <p>GW advised that he was checking the costs before providing to the NHS</p> <p>PM advised that he had received the cost and he would need to get confirmation from the Users that they are prepared to cover the cost from their internal budget.</p> <p>PM noted that this is WIP to progress with the Users</p>	

3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015  14/05/2015  21/05/2015 28/05/2015 11/006/2015  25/06/2015	<p>Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 /2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings.</p> <p>PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by.</p> <p>PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed.</p> <p>FS advised that Astins are onsite on 29/05/2015. BMCL have a door set and the door works would be carried out over the weekend. DH advised that he would confirm this with DL.</p> <p>FS advised that the doors are due to arrive on site later that day and he would link with the Theatre Manager to arrange a time to fit – it was thought it was likely to be Friday night.</p> <p>FS noted that the decor was to be finished on Saturday. PM agreed to issue a CE. FS advised that he would check that the costs had been put on Sypro.</p>	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015    21/05/2015 28/05/2015 11/06/2015  25/06/2015	<p>Please supply and install additional turfing to areas A &amp; B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.</p> <p>In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.</p> <p>PM noted that cost info awaited</p> <p>GW agreed to provide the cost asap</p> <p>PM noted that Land Eng had already planted out 1 area and there was no benefit in ripping the planting back out. Only the 2 small areas require to be priced now.</p> <p>PM advised he would provide a CE</p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015       21/05/2015 28/05/2015 04/06/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the</p>	

			11/06/2015 25/06/2015	lights. PMI 411 had been raised to cover these items. GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect. PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015  21/05/2015 28/05/2015  04/06/2015  11/06/2015 25/06/2015	Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure. GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails. FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works. FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool. It was noted that MMacleod was liaising with Physio for confirmation. It was noted that CE 0117 covered this item. FS advised that he had spoken to MMaCL the previous day who had advised that the stretcher is not suitable (would not pass infection control) and it was suggested that a wheelchair option would be preferable. DH advised that he recalled that there had been an original drawing signed off however after this BMCL had changed their supplier to World Leisure. DH requested that BMCL provide the extra over cost. FS agreed to obtain the cost for the wheelchair and to check if WorldLeisure would take the stretcher back. FS advised that he had received the quote for the wheelchair adaptor the previous day (circa [REDACTED]). BMCL were awaiting confirmation from World Leisure that they will give credit back for the stretcher. FS advised that WorldLeisure will not give any credit back for the stretcher so if the NHS want a wheelchair adaptor it would cost a further [REDACTED].	
3781	PMI 402	CPS -004 (Child Protection Unit) – Wall Mounted colposcope	19/05/2015  21/05/2015 04/06/2015 11/06/2015	The Board request wall strengthening, fixing of support plate, additional twin 13A socket (allowance already in ceiling for pendant) and containment for AV cabling as per the attached sketch.  Costs to be allocated to PMI 328 contingency sum. PM enquired if this could be installed on a surface pattress and FS agreed. BMCL to progress with pattress with chamfered edge and to paint to make surface wipeable. FS advised that the builders works have been carried out. DW noted that the electrical works were likely to be carried out over the coming week. DH enquired if BMCL could fit the fixings for the monitor bracket. GW noted that the cost was circa [REDACTED]. DW noted that the electrical works were getting done later that day. It was noted that the costs are to be allocated to PMI 328.	

			25/06/2015	DH advised that the works had been done. PM noted that the costs were to be allocated to PMI 328. It was agreed this item could be closed	
3788	PMI 403 -	Provision of interlocked switch socket in OPD-183	25/05/2015  28/05/2015 04/06/2015  11/06/2015  25/06/2015	The Board request the provision of 1no. 32A 2P&E Interlocked switched socket in OPD-183 NCH Out-patients treatment room for a V-beam Pulsed Pye Laser supply to be located above bedhead services trunking alongside vertical dropper. Costs to be allocated to PMI 328 contingency DW advised that CI had been issued to Mercury to carry out the works. DW advised that delivery of a switch socket was awaited. DH noted that the door is leaf and half – the gasket doesn't reach the door. This is a laser room and there are concerned about laser penetrating through the gaps. BMCL were asked to investigate if a larger blade could be fitted. DW noted that the delivery of the socket is awaited and BMCL are chasing this up. DW would confirm the date for the works asap. FS agreed to check the door blade. FS advised that a joiner had now fixed the gasket. It was agreed that this item could be closed.	
3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015  28/05/2015  04/06/2015 11/06/2015  25/06/2015	The Board request a cost for the installation of power and data within ceiling voids in the following locations - GW3-036, - GW3 - 039 - GW3 - 042 In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room. GW advised that AK has been on leave and the cost info would be provided asap. DH suggest will be a couple of months. FS advised that BMCL did not want to be doing works when Yorkhill are moving into the hospitals. DH requested that BMCL look and see if there is sockets there and it just needs longer RJ45 cables. DH requested that BMCL identify any potential disturbance to the room. DW noted that BMCL may struggle to get Boston back on site but would continue to try. GW noted that the Mercury cost had been received (circa 8k). LJamieson is in the process of reviewing the costs. DW advised that he would resend his comments to GW in LJ's absence. DW noted that BMCL had encountered access difficulties and were proceeding with works as they get access. PM advised that he would speak to the GM for GW3.	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015  28/05/2015 04/06/2015 11/06/2015  25/06/2015	The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait. DW noted that the CI had been issued to Mercury. Mercury to provide the cost and the timescale. BMCL will provide costs asap DH advised that these works were getting urgent (circa [REDACTED]). DW advised that he would resend his comments to GW in LJ's absence. DW advised that it was hoped to commence on 6 <sup>th</sup> June 2015.	

3819	PMI 407 -	Installation of Vestibular Hook - REH 049	26/05/2015 28/05/2015 04/06/2015 11/06/2015  25/06/2015	The Board request a cost for the installation of a vestibular hook within room no. REH-049 including support framework fixed to underside of structural slab as required. FS advised that he had sent the previous drawing to M&S to obtain a price. These works will not be achieved prior to Yorkhill moving in. GW advised that SMonk is being chased for a cost by LJamieson. FS advised that the cost was to be received later that week. DW advised that he would be checking out the room for services.  Agreed that item can be closed as couldn't be progressed due to conflicts with existing ductwork.	
3821	PMI 408 -	Install 2no fused spurs - SCH - 021	26/5/2015 28/05/2015 04/06/2015 11/06/2015 25/06/2015	The Board request the installation of 2no. fused spurs at 2.0m above FFL in SCH-021 for 2no. chemo fridges. 2no. MSC-002 units to be removed to accommodate the fridges. Costs to be allocated to PMI 328 contingency. DH noted that these works are more urgent. JMiller has been progressing. DW advised that Mercury have been instructed to carry out the work. DW advised that he was trying to get Mercury to progress this asap. FS advised that the fused spurs had been done.  Item closed	
3880	PMI-410	CHILDREN'S HOSPITAL THEATRE DEPT - WC ROOM THE-013 DAMAGED WHB	03/06/2015 11/06/2015 25/06/2015	Please supply and install new hand rinse whb to replace broken whb. Make all finishes good.  FS noted that the works had been carried out the previous day. GW advised that he would upload the cost asap.  PM agreed to check Sypro for cost info	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015       25/06/2015	Please re-configure installed arrangement as follows.  Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC. Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs. Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.  PM advised that he would liaise with JPhillips re doing the works at the weekend.	
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	11/06/2015	Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.  The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.  Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on	

			25/06/2015	<p>Sketch B.</p> <p>To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman).</p> <p>FS advised that he would check this with JMiller</p>	
3922	PMI 414	CHILDREN'S HOSPITAL EMERGENCY DEPT - VIDEO ENTRY SYSTEM	15/06/2015  25/06/2015	<p>Please provide a cost to relocate ambulance video entry system base from desk in area OBW-002 Staff / Enquiry to Staff Base in Chilren's ED area code EMC 061. External call point to remain in current location. Refer attached sketch.</p> <p>DW suggested that the cost info had been issued and PM agreed to check</p>	
3923	PMI 415	- Additional IPS Sockets	15/06/2015  25/06/2015	<p>The Board request a cost for the installation of 4no. IPS twin socket outlets (medical) in trunking in RCG-071 and 2no. IPS twin sockets on trunking in RCG-069.</p> <p>Please cost RCG-071 as standalone &amp; RCG 069 as complimentary as the former may proceed without the latter but not vice versa.</p> <p>If the quantities exceed capacities on the existing IPS Unit please advise prior to pricing.</p> <p>DW suggested that the cost info had been issued and PM agreed to check</p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015  25/06/2015	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul> <p>DW advised that the cost had been received from Mercury and BMCL have queried the cost</p>	
3925	PMI 417 -	Excavation around existing gas main - Neurosurgery entrance	15/06/2015  25/06/2015	<p>The Board request the provision of quotation for the excavation around existing abandoned Gas Main outwith extension building line. Once excavated cut the pipe and plug with concrete as per discussions with SGN.</p> <p>GA noted that the works had been completed. PM agreed to check Sypro for cost info</p>	
3926	PMI 418 -	Additional investigative excavations - Neurosurgery Entrance	15/06/2015	<p>The Board instruct the additional investigative excavations to confirm the extent of unknown services identified during the pile cap excavations. These services are detailed within the summary report INS Entrance -Trail Pit Photos and Services Clash Report (Dated 27th May 2015).</p>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p>	

				Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.  The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users.  25/06/2015 It was agreed that a separate meeting would take place at 9.30am the following day.	
3936	PMI 420 -	CHILDRENS HOSPITAL - MRI INSTALLATION ADDITIONAL WORKS	17/06/2015  25/06/2015	Amend works set out in PMI 406 as follows. Omit single direction ramp at gradient of 1:12 at change in level outside Neo-natal Unit. Add ramp with top landing 1220x1500mm with ramp 1220mm wide on grade 1:12, ramp to have guard rail to stop trolley falling off edge. Ramp to be constructed from regularised timber and 18mm plywood. FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.	
3937	PMI 421	ADULT HOSPITAL OPD GROUND FLOOR ROOM ORT-014 - WALL BARS	17/06/2015  25/06/2015	Please proceed and fit 2 sets of timber wall bars in room ORT 014. Wall bars are each nominally 2400mm high by 860mm wide and are fixed to the wall with angle brackets provided. Wall bars come flat pack and require to be put together, all fixings supplied. Also provide a finished surface mounted patress top and bottom as per instructions, screw fix pattress to background studs to allow for reasonable load as discussed PMoir/FSHaw/User 17/6/15. make all finishes good.  Refer attached sketch for location. FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015  25/06/2015	Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.  Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.  Proceed and install blinds as discussed a meeting 17 June 2015.  Works not to include provision of finger guards.  23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users. FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30 <sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.	
3960	PMI 423	CHILDRENS HOSPITAL - MEDICINEMA	23/06/2015	Please complete defects to two sets of doors as quickly as possible. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.	

			25/06/2015	<p>Please complete defects to two sets of doors as quickly as possible, these have been on defects list for sometime and as Medicinema coming into use shortly these defects require to be completed. Door manufacturer to confirm integrity of 1 hour fire doors maintained following change of ironmongery to one set of doors and to the other damage to door following replacement of glass panel. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.</p> <p>FS agreed to check out progress to date and provide feedback.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and</p>	

				<p>information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p>	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015	<p>The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.</p>	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015   28/05/2015 11/06/2015	Please proceed with works set out in PMI 373.  PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE DH advised that he would liaise with DR. FS advised that all the works had been completed with the exception of anti-lig knobs which were to be fitted later that day. BMCL were aware that the light switches did not have tamper proof screws. DH suggested that BMCL should try to obtain the tamper proof screws asap. DH agreed to chase DR for a response to the cost information	Cross ref CE 126?
15451	CE 116	ADULT HOSPITAL IMAGING ROOM RAF-080 REMOVAL OF 1 No. STARKSTROM PENDANT	28/05/2015  04/06/2015  11/06/2015	Isolation of services to pendant prior to removal by Starkstrom at no cost, make finishes good.  Agreed cost [REDACTED] incl OH+P but excl. VAT.  DH noted that there had been an issue raised the previous day. Philips have lowered the ceiling by 300mm and there is now 1 sprinkler head which will not reach the ceiling. DW agreed to investigate. PM noted that he had checked the cost build-up and there were no costs included for Starkstrom. It was agreed this CE could be closed. Separate PMI to be issued re sprinkler head – flexi hose proposal does not work.	
15788	CE 132	CHILDRENS HOSPITAL THEATRE DEPT - CARDIAC BY-PASS ROOM THE 052	03/07/2015	Please enlarge doorway to theatre exit lobby from single door to 1 1/2 door to include partition floor and decoration works. Comply with general requirements of PMI 395 but note change of door opening to be enlarged.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
15791	CE 133	CHILDREN'S HOSPITAL EMERGENCY DEPARTMENT - LOCATION OF VIDEO ENTRY SYSTEM	03/07/2015	Please proceed with works under cover of PMI 133 to relocate the video entry system base from OBW-002 to Staff Base in Childrens ED room code EMC 061. Agree new location of unit with users in NCH ED before moving, and agree suitable time.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
15819	CE 134	MRI SUITES - RELOCATION OF DOOR ACCESS PANELS	07/07/2015	Relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms, all as set out in PMI 405.	

				Agreed cost [REDACTED] incl OH+P but excl VAT.	
16009	CE 135	INSTITUTE OF NEUROLOGICAL SCIENCE - OVER CLADDING PROJECT	20/07/2015	Please proceed with the project to over clad the INS Building on campus as per the attached documents	
				Agreed cost [REDACTED] ex VAT. (Design costs sit within CE 067 and 091).	

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015) GW advised that there had been a meeting with DL. BMCL had been requested to list out all the staff time on the project (04/06/2015) **DH noted that costs have been submitted and are with DL (25/06/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer

diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) **DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) **DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015)**
- Fire stopping reinstatement – It was noted that BMCL had observed instances where the fire stopping had not been re-instated by NHS contractor. BMCL were concerned that they have had Capita and Building Control carrying out above ceiling sign-off and BMCL cannot now guarantee that there may be areas where fire stopping is missing. It was suggested that the NHS should reconsider their contractor works for those who have been on site and for those still to come on site. (26/03/2015) JR has advised NHS that thorough walkround had been done with Capita and Building Control. BMCL should not get involved in this NHS review. DH advised that he had spoken to IP re a couple of different contractors and ensuring that fire stopping is reinstated. DH has also spoken to Group 5 suppliers who had been back on site (02/04/2015) FS noted that level 1 and level 2 have been checked. The ground floor would be checked over that day, 23/04/2015. MCL would need to discuss with Mercury re missing bags. DW advised that BMCL are adamant that there are a few areas that BMCL have not been back in to and suggest that EE may have accessed these areas. PM agreed to liaise with DL. DW noted that BMCL had a couple of instances that an issue with lighting had been discovered and if had been identified that the KNX had been disturbed. FS noted that there had also been instances where the IPS/Spur was found to be off and suggested that a check of the tower could be left for now and there is not much compartmentalization. AF suggested that in a couple of months time that a 2 man squad be tasked with carrying out rechecking. AF suggested that a view of the way forward re rechecking should be taken in 4 weeks time. GW enquired if the NHS could raise a PMI for this item and that the costs could be debated at a later date. PM to provide PMI before closing item. ((30/04/2015) FS advised that levels 1, 2 and 3 had been completed and that he didn't expect that the tower checks would take a lot of time. BMCL would provide marked up drawings asap (07/05/2015) FS advised that BMCL had carried checks up to level 7. Some areas on the ground floor need to be done and these are being carried out at weekend. Check of level 6 identified only 1 bag missing. BMCL would also need to retrospectively check the risers in the tower. (14/05/2015) FS advised that checked were being carried out on level 10 and level 11 would be checked w/c 25/05/2015 (21/05/2015) FS advised that BMCL checks had been completed to level 11 and were now started in the basement. Mercury are replacing any missing bags. A marked up drawing would be provided via Aconex. PMI awaited from NHS (28/05/2015) FS advised that Astins had completed their survey the previous day. Mercury have fire bag drawings and everything had been reinstated. GW advised that there needed to be a discussion re costs and BMCL did not consider these to be BMCL costs (circa [REDACTED] (04/06/2015) FS advised that Mercury have replaced all the missing bags. BMCL would upload all the info to Zutec. GW noted that a PMI and a discussion about the works was required (11/06/2015) **FS advised that all the survey reinstatement works info had been uploaded to Zutec. GW is awaiting a PMI for survey (25/06/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015)
- Nuclear Medicine – It was noted that there was one room in Nuclear Medicine that still had cabinets to be installed and this had been raised with Jordan. FS agreed to liaise with Jordan (04/06/2015) FS advised that the cabinets are due on site on 25/06/2015. There may be an issue obtaining the worktop however. (11/06/2015) FS agreed to check this out (25/06/2015)
- IPS Panel Repairs – FW noted that there was an issue re type of dispenser fitted as they don't cover the existing holes (11/06/2015) It was noted that panels have been coming off the walls – it was suspected that someone maybe pulling open the dispensers to fill them rather than use the buttons on the dispenser to release the front cover. (25/06/2015)
- Tree grilles which are slippery – FS advised that he has written to JWalker who had replied saying that the grilles being slippery were not her experience of them. FS proposed to get JWalker onto site to review the grilles. DH suggested that the grilles could be covered with an anti-slip paint rather than putting up a fence around them (25/05/2015)
- Children's Canopy – FS advised that BMCL have gon back to Fraser with 3 options – 1 solution is a remake of 1 section to have an upstand. (25/05/2015)
- Baby feed signage (PMI 384) – PM noted that there are still a few signs to be changed (25/05/2015)
- Haemato-oncology – DW advised that he had revisited the area the previous night. There is a breaker which keeps tripping out as is rated for the current set-up and not the increased air change set-up. The pentamidine room will never achieve 10 pascal – suggest perhaps 1 or 2 pascal. PM suggested that WW should be asked to comment as this requirement was part of the CoS. DW noted that there is currently negative pressure and that a light fitting would also need to be changed from RO1 to RO2. GB noted that at user group meetings they never changed the ceiling plans. DH suggested that the Users expected the rooms to be as per CoS. DH suggested that the bioguard tiles should be mentioned and that the option of clipping and taping should be looked at. DW noted that the issue is that the AHU serves the full ward.(25/06/2015)
- Schiehallion diffusers – DH noted that these needed to be pushed on and DW advised that he was currently pushing this on and was trying to identify diffuser.(25/06/2015)
- Shower floor finishes selection – FS advised that it was proposed to put a bump in the floor and confirmation as to whether to progress with this was awaited. DH advised that PM and DH have reviewed on site and BMCL should progress (25/06/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1542

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 29/07/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. <b>PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing</p>	

			07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015 25/06/2015	update/design fees. GB noted that collation of the Building Warrants is WIP GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS. FS advised that GB is liaising with Mercury GB advised that this would be progressed once the works completed in the summer GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	22/07/2015    23/07/2015	Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.  The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.  Board to issue PMI/ CE covering the works. FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 29/07/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established. AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS	

A51679245

			<p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p>	<p>would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.</p> <p>FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the want then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p>	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	<p>18/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p>	<p>The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.</p> <p>FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.</p> <p>FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.</p> <p>FS advised that on the previous occasion of rain he had investigated and it was thought that it was now</p>	

			<p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p>	<p>identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter. FS noted that a repair had been carried out on Thursday and he understood that there had been water ingress on Saturday. FS would review the roof later that day and proposed to test out using a hose. PM suggested that he would want to be present when the testing was being carried out.</p> <p>FS noted that the sill flashing and extrusion had been redone and no issue had been identified since these works had been carried out.</p> <p>FS advised that he had been up with Vectorfoiltec and they had checked the drainage channel, had tried flooding the drainage channel and no issues were identified. Prater have been back on site to strip and refit the flashes and had put the membrane on. FS had rechecked the leak issue on return from leave and no leak was detected. FS noted that he would recheck on the next wet day. PM suggested that the leak issue was apparent when it was driving rain.</p>	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	<p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p>	<p>The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.</p> <p>DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire &amp; Rescue.</p> <p>FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.</p> <p>FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 29/07/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015  07/05/2015 14/05/2015  21/05/2015  04/06/2015  11/06/2015 25/06/2015	Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31 <sup>st</sup> March 2015, BMCE to take forward. GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31 <sup>st</sup> March completion date is doubtful. GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP. DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased. DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015 DP advised that the design is due to be provided imminently. DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap. PM and DL to discuss/agree the way forward asap. PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly. PM advised that the information is with IP for review. DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately. SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress. GW advised that he had rechecked the costs and he thinks that the costs are correct. DW noted that minimal works have been commenced.	

3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.
			26/02/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.
			05/03/2015	PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .
			12/03/2015	GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.
			19/03/2015	GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.
			02/04/2015	DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.
			30/04/2015	PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.
			14/05/2015	DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.
			21/05/2015	SF to organize meeting
			28/05/2015	Meeting being organized for 04/06/2015
			11/06/2015	GW advised that CE is awaited. Revised costs are on Sypro ([REDACTED]). NHS requested to review asap.
			25/06/2015	DH noted that it is WIP to check back previous documentation.

3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015          14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015  25/06/2015	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p>DW advised that a cost is awaited from Mercury.</p> <p>GW advised that he was checking the costs before providing to the NHS</p> <p>PM advised that he had received the cost and he would need to get confirmation from the Users that they are prepared to cover the cost from their internal budget.</p> <p><b>PM noted that this is WIP to progress with the Users</b></p>	
3757	PMI 395 -	CHILDREN'S HOSPITAL - CARDIAC THEATRE THE-054 DOOR TO BY PASS ROOM	12/05/2015       14/05/2015    21/05/2015 28/05/2015 11/06/2015  25/06/2015	<p>Please enlarge the door opening between rooms THE-054 Cardiac Theatre and THE-052 By Pass Prep Room. The door opening to be enlarged from a single doorset to a 1 1/2 doorset by the introduction of a small blank leaf nom. 380mm wide, fully encapsulated, 1 /2 pairs of hinges, slip bolts, latch keeper and new frame. All as per attached drawings.</p> <p>PM requested that BMCL please fit asap. FS noted that BMCL needed to get the lead work redone/rechecked. BMCL to review what works are required. PM noted that deadline for the work to be completed by.</p> <p>PM advised that he had received a picto-gram and advised BMCL to put back together an NHS will cover the costs. PM to amend note to advise that this item is not being progressed.</p> <p>FS advised that Astins are onsite on 29/05/2015. BMCL have a door set and the door works would be carried out over the weekend. DH advised that he would confirm this with DL.</p> <p>FS advised that the doors are due to arrive on site later that day and he would link with the Theatre Manager to arrange a time to fit – it was thought it was likely to be Friday night.</p> <p><b>FS noted that the decor was to be finished on Saturday. PM agreed to issue a CE. FS advised that he would check that the costs had been put on Sypro.</b></p>	Cross ref CE 132
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015       21/05/2015 28/05/2015 11/06/2015	<p>Please supply and install additional turfing to areas A &amp; B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.</p> <p>In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.</p> <p>PM noted that cost info awaited</p> <p>GW agreed to provide the cost asap</p> <p>PM noted that Land Eng had already planted out 1 area and there was no benefit in ripping the planting back out. Only the 2 small areas require to be priced now.</p>	

			25/06/2015 23/07/2015	PM advised he would provide a CE GW agreed to provide a note of the cost	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015    21/05/2015 28/05/2015 04/06/2015  11/06/2015 25/06/2015  23/07/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p>	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	19/05/2015  21/05/2015 28/05/2015	<p>Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure.</p> <p>GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails.</p> <p>FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works.</p> <p>FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting</p>	

			04/06/2015	clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool It was noted that MMacleod was liaising with Physio for confirmation. It was noted that CE 0117 covered this item. FS advised that he had spoken to MMaCL the previous day who had advised that the stretcher is not suitable (would not pass infection control) and it was suggested that a wheelchair option would be preferable. DH advised that he recalled that there had been an original drawing signed off however after this BMCL had changed their supplier to World Leisure. DH requested that BMCL provide the extra over cost. FS agreed to obtain the cost for the wheelchair and to check if WorldLeisure would take the stretcher back.	
			11/06/2015	FS advised that he had received the quote for the wheelchair adaptor the previous day (circa [REDACTED]). BMCL were awaiting confirmation from World Leisure that they will give credit back for the stretcher.	
			25/06/2015	FS advised that WorldLeisure will not give any credit back for the stretcher so if the NHS want a wheelchair adaptor it would cost a further [REDACTED].	
			23/07/2015	GW noted that the rails are not on the PMI. FS noted that the rails have been completed. GW noted that the cost for the rails is circa [REDACTED]. PM agreed to discuss the rails with MMacleod. GB noted that the rail is some someone in the pool can hold on round the pool.	
3787	PMI 404 -	Installation of power & data within ceiling voids (GW3-036, GW3 - 039 & GW3 - 042)	25/05/2015	The Board request a cost for the installation of power and data within ceiling voids in the following locations - GW3-036, - GW3 - 039 - GW3 - 042 In each location 2 x twin 13A and 1 double data outlets with each twin 13A to be fed via a fused isolation, switch with neon indicator located at high level in the room.	
			28/05/2015	GW advised that AK has been on leave and the cost info would be provided asap. DH suggest will be a couple of months. FS advised that BMCL did not want to be doing works when Yorkhill are moving into the hospitals. DH requested that BMCL look and see if there is sockets there and it just needs longer RJ45 cables. DH requested that BMCL identify any potential disturbance to the room.	
			04/06/2015	DW noted that BMCL may struggle to get Boston back on site but would continue to try.	
			11/06/2015	GW noted that the Mercury cost had been received  (circa 8k). LJamieson is in the process of reviewing the costs. DW advised that he would resend his comments to GW in LJ's absence.	
			25/06/2015	DW noted that BMCL had encountered access difficulties and were proceeding with works as they get access. PM advised that he would speak to the GM for GW3.	
			23/07/2015	Item closed. Costs allocated to PMI 328	
3813	PMI 405 -	Relocation of door access panels - MRI Suites	26/05/2015	The Board request a cost to relocate door access panels at the 2no. ground floor MRI suites (NCH & NSGH) from their existing locations, at reception desks to the respective MRI Control rooms. In the NSGH location please allow for installing 1 no. 'push to exit' button in lieu of 'swipe to exit' on secure side of the door between MRI suite and reception/wait.	Cross ref CE 134
			28/05/2015	DW noted that the CI had been issued to Mercury. Mercury to provide the cost and the timescale.	
			04/06/2015	BMCL will provide costs asap	
			11/06/2015	DH advised that these works were getting urgent (circa [REDACTED]). DW advised that he would resend his comments to GW in LJ's absence.	
			25/06/2015	DW advised that it was hoped to commence on 6 <sup>th</sup> June 2015.	

			23/07/2015	DW agreed to confirm that the works have started. GW noted that CE 134 had been issued for this item. Item to be closed.	
3880	PMI-410	CHILDREN'S HOSPITAL THEATRE DEPT - WC ROOM THE-013 DAMAGED WHB	03/06/2015  11/06/2015  25/06/2015 23/07/2015	Please supply and install new hand rinse whb to replace broken whb. Make all finishes good.  FS noted that the works had been carried out the previous day. GW advised that he would upload the cost asap. PM agreed to check Sypro for cost info PM advised that the cost advised it too expensive and cost needs to be discussed.	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015       25/06/2015 23/07/2015	Please re-configure installed arrangement as follows.  Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC. Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs. Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area. PM advised that he would liaise with JPhillips re doing the works at the weekend. GW advised that BMCL were preparing pricing.	
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	11/06/2015       25/06/2015 23/07/2015	Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.  The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.  Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on Sketch B.  To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman). FS advised that he would check this with JMiller FS advised he would check that Magicman had been on site. PM noted that cost was required. GW advised that he had uploaded the cost.	

3922	PMI 414	CHILDREN'S HOSPITAL EMERGENCY DEPT - VIDEO ENTRY SYSTEM	15/06/2015  25/06/2015 23/07/2015	Please provide a cost to relocate ambulance video entry system base from desk in area OBW-062 Staff / Enquiry to Staff Base in Children's ED area code EMC 061. External call point to remain in current location. Refer attached sketch. DW suggested that the cost info had been issued and PM agreed to check <b>It was noted that CE 133 had been issued for this item therefore item to be closed</b>	
3923	PMI 415	- Additional IPS Sockets	15/06/2015  25/06/2015 23/07/2015	The Board request a cost for the installation of 4no. IPS twin socket outlets (medical) in trunking in RCG-071 and 2no. IPS twin sockets on trunking in RCG-069. Please cost RCG-071 as standalone & RCG 069 as complimentary as the former may proceed without the latter but not vice versa. If the quantities exceed capacities on the existing IPS Unit please advise prior to pricing. DW suggested that the cost info had been issued and PM agreed to check	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015  25/06/2015 23/07/2015	Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include; - 2no. 13A Sockets fitted 450mm FFL. - 1no. cold water supply fitted at 300mm FFL - 1no. hot water supply fitted at 300mm FFL - 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections - All connections to kit by others (NHS FM). - Sterilisation of CWS & HWS by BMCE. DW advised that the cost had been received from Mercury and BMCL have queried the cost <b>GW advised that costs had been uploaded to sypro for NHS review</b>	
3925	PMI 417 -	Excavation around existing gas main - Neurosurgery entrance	15/06/2015  25/06/2015 23/07/2015	The Board request the provision of quotation for the excavation around existing abandoned Gas Main outwith extension building line. Once excavated cut the pipe and plug with concrete as per discussions with SGN. GA noted that the works had been completed. PM agreed to check Sypro for cost info <b>GW advised that the costs were to be uploaded by BMCL</b>	
3926	PMI 418 -	Additional investigative excavations - Neurosurgery Entrance	15/06/2015  23/07/2015	The Board instruct the additional investigative excavations to confirm the extent of unknown services identified during the pile cap excavations. These services are detailed within the summary report INS Entrance -Trail Pit Photos and Services Clash Report (Dated 27th May 2015). <b>GW advised that the costs were to be uploaded by BMCL</b>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015	Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A & B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users  Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.  Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.	

			25/06/2015 23/07/2015	<p>The Board are open to alternate solutions that achieve improved barrier free access for unattended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p>	
3936	PMI 420 -	CHILDRENS HOSPITAL - MRI INSTALLATION ADDITIONAL WORKS	17/06/2015  25/06/2015  23/07/2015	<p>Amend works set out in PMI 406 as follows. Omit single direction ramp at gradient of 1:12 at change in level outside Neo-natal Unit. Add ramp with top landing 1220x1500mm with ramp 1220mm wide on grade 1:12, ramp to have guard rail to stop trolley falling off edge. Ramp to be constructed from regularised timber and 18mm plywood.</p> <p>FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.</p> <p>GW advised that costs had been uploaded on 06/07. Works have been completed.</p>	
3937	PMI 421	ADULT HOSPITAL OPD GROUND FLOOR ROOM ORT-014 - WALL BARS	17/06/2015  25/06/2015  23/07/2015	<p>Please proceed and fit 2 sets of timber wall bars in room ORT 014. Wall bars are each nominally 2400mm high by 860mm wide and are fixed to the wall with angle brackets provided. Wall bars come flat pack and require to be put together, all fixings supplied. Also provide a finished surface mounted patress top and bottom as per instructions, screw fix pattress to background studs to allow for reasonable load as discussed PMoir/FSHaw/User 17/6/15. make all finishes good.</p> <p>Refer attached sketch for location.</p> <p>FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.</p> <p>GW advised that costs had been uploaded on 16/07 for NHS review and provision of CE</p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015    25/06/2015	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the</p>	

			23/07/2015	balancing. FS advised that the operatives are back on site on 27 <sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015	
3960	PMI 423	CHILDRENS HOSPITAL - MEDICINEMA	23/06/2015  25/06/2015 23/07/2015	<p>Please complete defects to two sets of doors as quickly as possible. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.</p> <p>Please complete defects to two sets of doors as quickly as possible, these have been on defects list for sometime and as Medicinema coming into use shortly these defects require to be completed. Door manufacturer to confirm integrity of 1 hour fire doors maintained following change of ironmongery to one set of doors and to the other damage to door following replacement of glass panel. Please attend site and commission two sets of automatic doors installed by BM through the contract, all connections have been made, push plates now installed but operating gear needs commissioned.</p> <p>FS agreed to check out progress to date and provide feedback. FS advised that the works have been done. Item closed.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>• 10-12 air changes hour</i></li> <li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li> <li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	

				Refer attached sketch.	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015	The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p><b>23/07/2015</b> <b>GB advised that BMCL would put an instruction to Land Eng.</b></p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location.</p>	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015	<p>Please proceed with works set out in PMI 373.</p> <p>PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&amp;B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about</p>	Cross ref CE 126?

			28/05/2015 11/06/2015	<p>doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE</p> <p>DH advised that he would liaise with DR.</p> <p>FS advised that all the works had been completed with the exception of anti-lig knobs which were to be fitted later that day. BMCL were aware that the light switches did not have tamper proof screws. DH suggested that BMCL should try to obtain the tamper proof screws asap. DH agreed to chase DR for a response to the cost information</p>	
15451	CE 116	ADULT HOSPITAL IMAGING ROOM RAF-080 REMOVAL OF 1 No. STARKSTROM PENDANT	28/05/2015  04/06/2015  11/06/2015	<p>Isolation of services to pendant prior to removal by Starkstrom at no cost, make finishes good.</p> <p>Agreed cost [REDACTED] incl OH+P but excl. VAT.</p> <p>DH noted that there had been an issue raised the previous day. Philips have lowered the ceiling by 300mm and there is now 1 sprinkler head which will not reach the ceiling. DW agreed to investigate. PM noted that he had checked the cost build-up and there were no costs included for Starkstrom.</p> <p>It was agreed this CE could be closed. Separate PMI to be issued re sprinkler head – flexi hose proposal does not work.</p>	29/072015
15788	CE 132	CHILDRENS HOSPITAL THEATRE DEPT - CARDIAC BY-PASS ROOM THE 052	03/07/2015	<p>Please enlarge doorway to theatre exit lobby from single door to 1 1/2 door to include partition floor and decoration works. Comply with general requirements of PMI 395 but note change of door opening to be enlarged.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	29/072015
15791	CE 133	CHILDREN'S HOSPITAL EMERGENCY DEPARTMENT - LOCATION OF VIDEO ENTRY SYSTEM	03/07/2015	<p>Please proceed with works under cover of PMI 133 to relocate the video entry system base from OBW-002 to Staff Base in Childrens ED room code EMC 061. Agree new location of unit with users in NCH ED before moving, and agree suitable time.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	29/072015
15819	CE 134	MRI SUITES - RELOCATION OF DOOR ACCESS PANELS	07/07/2015	<p>Relocate door access panels at the 2no. ground floor MRI suites (NCH &amp; NSGH) from their existing locations, at reception desks to the respective MRI Control rooms, all as set out in PMI 405.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	29/072015
16009	CE 135	INSTITUTE OF NEUROLOGICAL SCIENCE - OVER CLADDING PROJECT	20/07/2015	<p>Please proceed with the project to over clad the INS Building on campus as per the attached documents</p> <p>Agreed cost [REDACTED] ex VAT. (Design costs sit within CE 067 and 091).</p>	29/072015

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015) GW advised that there had been a meeting with DL. BMCL had been requested to list out all the staff time on the project (04/06/2015) DH noted that costs have been submitted and are with DL (25/06/2015) **DH noted that the costs are with DL, DL will be asked to confirm (23/07/2015)**
- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) **DW advised that the panel is due to be delivered before the end of the current week (23/07/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) **DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) **GB advised that the survey report is awaited (25/06/2015)**
- Nuclear Medicine – It was noted that there was one room in Nuclear Medicine that still had cabinets to be installed and this had been raised with Jordan. FS agreed to liaise with Jordan (04/06/2015) FS advised that the cabinets are due on site on 25/06/2015. There may be an issue obtaining the worktop however. (11/06/2015) FS agreed to check this out (25/06/2015) **FS advised that JTC are due back on site on 27/07/2015 (23/07/2015)**
- Children's Canopy – FS advised that BMCL have gon back to Fraser with 3 options – 1 solution is a remake of 1 section to have an upstand. (25/05/2015) **FS advised that Fraser Gray have advised optimal solution. Previous gutter was extended beyond the glass and was changed. The glass could be tilted up however there would be a charge for this (23/07/2015)**
- Baby feed signage (PMI 384) – PM noted that there are still a few signs to be changed (25/05/2015) **FS advised that he would check that the signs have been changed (23/07/2015)**
- Shower floor finishes selection – FS advised that it was proposed to put a bump in the floor and confirmation as to whether to progress with this was awaited. DH advised that PM and DH have reviewed on site and BMCL should progress (25/06/2015)
- Mop wash (wiring to gas solenoid valves taken out) – IP has requested that the wiring be connected. PM requested that DW provide sufficient info to enable PM to provide a PMI (23/07/2015)
- Energy Centre works – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015)
- Structal Blinds – BMCL to raise an EW regarding this

- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015)
- Theatre/Blinds/Doors – it was noted that the laser blinds are being picked up by the sensor so the doors won't shut – the doors have now been switched off.
- NCH - Rooms requiring white rock - BMCL noted that there is 2 rooms where it is not possible to fit white rock and that the beds would need to be removed – PM suggested that BMCL could use a larger section of white rock and slide it into the gap (23/07/2015)
- Schindler lift maintenance – GW advised that BMCL had received bills from Schindler for items outwith the scope of the maintenance contract – BMCL did not have any information as to why the NHS had called out an engineer and that there needed to be a process of informing BMCL put in place. DH advised that contractually the NHS only have a way to pay through the contract. GW accepted this to be the case however there was concern that the maintenance contract is between the BMCL and Schindler for 2 years. DH suggested that it may be possible for the NHS to set-up a call out contract for non maintenance call outs – this would need to be investigated. GW advised that as a minimum there needed to be a process for logging any call-outs. (23/07/2015)
- INS Linkbridge – PM noted that he had seen an email from Susan Walker. GA advised that it had been planned to remove the barriers however this had not been done as a VLAN for the access control was required. PM advised that he would liaise with FCarnie (23/07/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1562

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 05/08/2015:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	

A51679245

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. <b>PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the</p>	

			<p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>30/07/2015</p>	<p>Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>GB noted that collation of the Building Warrants is WIP</p> <p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>FS advised that GB is liaising with Mercury</p> <p>GB advised that this would be progressed once the works completed in the summer</p> <p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Strucal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	18/05/2015  21/05/2015  28/05/2015  04/06/2015  11/06/2015  25/06/2015  23/07/2015  30/07/2015	<p>The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.</p> <p>FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.</p> <p>FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.</p> <p>FS advised that on the previous occasion of rain he had investigated and it was thought that it was now identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter.</p> <p>FS noted that a repair had been carried out on Thursday and he understood that there had been water ingress on Saturday. FS would review the roof later that day and proposed to test out using a hose. PM suggested that he would want to be present when the testing was being carried out.</p> <p>FS noted that the sill flashing and extrusion had been redone and no issue had been identified since these works had been carried out.</p> <p>FS advised that he had been up with Vectorfoiltex and they had checked the drainage channel, had tried flooding the drainage channel and no issues were identified. Prater have been back on site to strip and refit the flashes and had put the membrane on. FS had rechecked the leak issue on return from leave and no leak was detected. FS noted that he would recheck on the next wet day. PM suggested that the leak issue was apparent when it was driving rain.</p> <p>FS advised that he had been checking everyday for any sign of a leak and no evidence of water ingress had been witnessed. FS would continue to monitor for signs of any water ingress.</p>	

25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.
			11/06/2015	DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.
			25/06/2015	FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.
			23/07/2015	FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.
			30/07/2015	FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing.

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 05/08/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015  07/05/2015 14/05/2015  21/05/2015  04/06/2015  11/06/2015 25/06/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>DW noted that minimal works have been commenced.</p>	

A51679245

3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.
			26/02/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.
			05/03/2015	PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .
			12/03/2015	GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.
			19/03/2015	GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.
			02/04/2015	DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.
			30/04/2015	PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.
			14/05/2015	DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.
			21/05/2015	SF to organize meeting
			28/05/2015	Meeting being organized for 04/06/2015
			11/06/2015	GW advised that CE is awaited. Revised costs are on Sypro ([REDACTED]). NHS requested to review asap.
			25/06/2015	DH noted that it is WIP to check back previous documentation.
			30/07/2015	GW advised that further information was being identified.

3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015          14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015  25/06/2015 30/07/2015	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p>DW advised that a cost is awaited from Mercury.</p> <p>GW advised that he was checking the costs before providing to the NHS</p> <p>PM advised that he had received the cost and he would need to get confirmation from the Users that they are prepared to cover the cost from their internal budget.</p> <p>PM noted that this is WIP to progress with the Users</p> <p>PM noted Users to confirm way forward – PMI on hold</p>	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015       21/05/2015 28/05/2015 11/06/2015  25/06/2015 23/07/2015 30/07/2015	<p>Please supply and install additional turfing to areas A &amp; B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.</p> <p>In both locations, trees and shrubs already planted are to be left in position and the turf should be laid close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.</p> <p>PM noted that cost info awaited</p> <p>GW agreed to provide the cost asap</p> <p>PM noted that Land Eng had already planted out 1 area and there was no benefit in ripping the planting back out. Only the 2 small areas require to be priced now.</p> <p>PM advised he would provide a CE</p> <p>GW agreed to provide a note of the cost</p> <p>PM agreed to provide a CE for this item</p>	Cross ref CE141
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width</p>	

			<p>21/05/2015 28/05/2015 04/06/2015</p> <p>11/06/2015 25/06/2015 23/07/2015 30/07/2015</p>	<p>between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p>	
3780	PMI 401	CHILDREN'S HOSPITAL HYDROTHERAPY POOL - 2 SETS OF STEPS	<p>19/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015</p>	<p>Please proceed and remove two sets of handrails at current location and provide free standing stainless steel 'ladder style' steps with hooped top rail fixed to pool surround. All as discussed and agreed with user group. Refer to attached picture but note base of ladder to sit on rubber sucker type feet. Steps to be rigid fix and secure.</p> <p>GW advised that the cost had been uploaded the previous day. FS noted that he had been advised that the treads are too far apart. It was noted that MMac had confirmed that 2 rails.</p> <p>FS noted that the correct steps had been organised. FS noted that there is still a debate re the sling and size of seat. BMCL need to know if it is an 18inch or 22inch seat – there is a 2 week order date. DH suggested that this should wait until PM returned from leave. GW requested that a CE be provided for the steps works.</p> <p>FS noted that there had been a comment that the stretcher is not fit for purpose. Awaiting clarification of what stretcher is required. FS noted that World Leisure have supplied everything in and around the pool. It was noted that MMacleod was liaising with Physio for confirmation.</p> <p>It was noted that CE 0117 covered this item. FS advised that he had spoken to MMaCl the previous day who had advised that the stretcher is not suitable (would not pass infection control) and it was suggested that a wheelchair option would be preferable. DH advised that he recalled that there had been an original drawing signed off however after this BMCL had changed their supplier to World Leisure. DH requested that BMCL provide the extra over cost. FS agreed to obtain the cost for the wheelchair and to check if WorldLeisure would take the stretcher back.</p> <p>FS advised that he had received the quote for the wheelchair adaptor the previous day (circa [REDACTED]). BMCL were awaiting confirmation from World Leisure that they will give credit back for the stretcher.</p>	

			25/06/2015 23/07/2015 30/07/2015	FS advised that WorldLeisure will not give any credit back for the stretcher so if the NHS want a wheelchair adaptor it would cost a further [REDACTED]. GW noted that the rails are not on the PMI. FS noted that the rails have been completed. GW noted that the cost for the rails is circa [REDACTED]. PM agreed to discuss the rails with MMacleod. GB noted that the rail is some someone in the pool can hold on round the pool. <i>It was suggested that this PMI could be closed as it is only the install of the grab rail to be concluded. GB advised that there was never any grab rails included in drawings. It was noted that MMacleod had requested that grab rail. FS agreed to check through correspondence. It was agreed this item could be closed.</i>	
3880	PMI-410	CHILDREN'S HOSPITAL THEATRE DEPT - WC ROOM THE-013 DAMAGED WHB	03/06/2015 11/06/2015 25/06/2015 23/07/2015	Please supply and install new hand rinse whb to replace broken whb. Make all finishes good.  FS noted that the works had been carried out the previous day. GW advised that he would upload the cost asap. PM agreed to check Sypro for cost info <i>PM advised that the cost advised it too expensive and cost needs to be discussed.</i>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015      25/06/2015 23/07/2015 30/07/2015	Please re-configure installed arrangement as follows.  Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC. Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs. Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area. PM advised that he would liaise with JPhillips re doing the works at the weekend. GW advised that BMCL were preparing pricing. <i>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</i>	
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	11/06/2015	Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.  The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.  Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on Sketch B.  To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and	

			25/06/2015 23/07/2015  30/07/2015	Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman). FS advised that he would check this with JMiller FS advised he would check that Magicman had been on site. PM noted that cost was required. GW advised that he had uploaded the cost.  FS noted that he had spoken to Martin Muirhead the previous day who had advised that he is still trying to get magicman on site. No further update was available at this time.	
3923	PMI 415	- Additional IPS Sockets	15/06/2015   25/06/2015 30/07/2015	The Board request a cost for the installation of 4no. IPS twin socket outlets (medical) in trunking in RCG-071 and 2no. IPS twin sockets on trunking in RCG-069. Please cost RCG-071 as standalone & RCG 069 as complimentary as the former may proceed without the latter but not vice versa. If the quantities exceed capacities on the existing IPS Unit please advise prior to pricing. DW suggested that the cost info had been issued and PM agreed to check DH advised that the NHS would want to proceed with RCG 071 only – RCG 069 no longer required. Costs to be reviewed.	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015   25/06/2015 23/07/2015 30/07/2015	Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include; - 2no. 13A Sockets fitted 450mm FFL. - 1no. cold water supply fitted at 300mm FFL - 1no. hot water supply fitted at 300mm FFL - 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections - All connections to kit by others (NHS FM). - Sterilisation of CWS & HWS by BMCE. DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review It was noted that this item is on hold for now	
3925	PMI 417 -	Excavation around existing gas main - Neurosurgery entrance	15/06/2015  25/06/2015 23/07/2015 30/07/2015	The Board request the provision of quotation for the excavation around existing abandoned Gas Main outwith extension building line. Once excavated cut the pipe and plug with concrete as per discussions with SGN. GA noted that the works had been completed. PM agreed to check Sypro for cost info GW advised that the costs were to be uploaded by BMCL It was agreed this item could be closed. Costs included in PMI 418.	
3926	PMI 418 -	Additional investigative excavations - Neurosurgery Entrance	15/06/2015  23/07/2015 30/07/2015	The Board instruct the additional investigative excavations to confirm the extent of unknown services identified during the pile cap excavations. These services are detailed within the summary report INS Entrance -Trail Pit Photos and Services Clash Report (Dated 27th May 2015). GW advised that the costs were to be uploaded by BMCL PM advised that he would issue a CE later that day (circa [REDACTED])	Cross Ref CE 137.

3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015      25/06/2015 23/07/2015  30/07/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p><b>GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</b></p>	
3936	PMI 420 -	CHILDRENS HOSPITAL - MRI INSTALLATION ADDITIONAL WORKS	17/06/2015   25/06/2015  23/07/2015 30/07/2015	<p>Amend works set out in PMI 406 as follows. Omit single direction ramp at gradient of 1:12 at change in level outside Neo-natal Unit. Add ramp with top landing 1220x1500mm with ramp 1220mm wide on grade 1:12, ramp to have guard rail to stop trolley falling off edge. Ramp to be constructed from regularised timber and 18mm plywood.</p> <p>FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.</p> <p>GW advised that costs had been uploaded on 06/07. Works have been completed.</p> <p><b>PM advised that he would provide a CE asap.</b></p>	Cross ref CE 138
3937	PMI 421	ADULT HOSPITAL OPD GROUND FLOOR ROOM ORT-014 - WALL BARS	17/06/2015   25/06/2015  23/07/2015 30/07/2015	<p>Please proceed and fit 2 sets of timber wall bars in room ORT 014. Wall bars are each nominally 2400mm high by 860mm wide and are fixed to the wall with angle brackets provided. Wall bars come flat pack and require to be put together, all fixings supplied. Also provide a finished surface mounted patress top and bottom as per instructions, screw fix pattress to background studs to allow for reasonable load as discussed PMoir/FSHaw/User 17/6/15. make all finishes good.</p> <p>Refer attached sketch for location.</p> <p>FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.</p> <p>GW advised that costs had been uploaded on 16/07 for NHS review and provision of CE</p> <p><b>PM advised that he would provide a CE asap</b></p>	Cross Ref CE 136
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p>	

			<p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>25/06/2015 FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.</p> <p>23/07/2015 FS advised that the operatives are back on site on 27<sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015</p> <p>30/07/2015 <b>PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded</b></p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015 Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p>Please organise an preliminary meeting with design team and Board to establish scope in more detail.</p>	

			23/07/2015	(Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)	
			30/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p> <p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p>	
			23/07/2015	<p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p>	
			30/07/2015	<p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal.</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUIH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p>	

				<p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p> <p>30/07/2015 GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p>	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	<p>20/07/2015</p> <p>30/07/2015</p>	<p>The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.</p> <p>DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.</p>	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	<p>21/07/2015</p> <p>23/07/2015 30/07/2015</p>	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals</p>	

			30/07/2015	for 5 minutes, alarm can sound at room or at a central location. DW noted that there is a lot of design work involved in this PMI and DW would provide info re programme impacts the following day.	
4201	PMI 431 -	ADDITIONAL IPS SOCKETS ROOM RCG-071	30/07/2015	Please proceed with works as set out and costed in PMI-415, but to room RCG-071 only, confirm no works to be undertaken in room RCG-069. Cost agreed with Grant Wallace on 30th July 2015 as [REDACTED] incl OHP but excluding VAT.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
15222	CE 109	CHILDREN'S HOSPITAL - DCFP ANTI LIGATURE WORKS	14/05/2015  21/05/2015  28/05/2015 11/06/2015  30/07/2015	Please proceed with works set out in PMI 373.  PM advised that he had looked at the door with Hugh and advised Hugh to progress. The rest of the kit in the room is ready to be progressed. C&B Had been asked to look at a couple of the prices in the cost info. GW advised that he had gone back to Andy and the Static and Crawford sub-contractor costs. GW would get these uploaded to Sypro asap. BMCL had concern about doing the work as at risk of not having a confirmed cost. FS noted that as BMCL did not know the final sink type then it had now become apparent that the IPS would need to be changed, floor will need repaired, ect. PM agreed to review on site. DW advised that there is now an issue re relocation of TRV – BMCL are trying to identify a solution - TRV is not anti-lig. Alternative would be to remove the TRV/isolate and remove the radiant panel. PMI to be discussed under CE DH advised that he would liaise with DR. FS advised that all the works had been completed with the exception of anti-lig knobs which were to be fitted later that day. BMCL were aware that the light switches did not have tamper proof screws. DH suggested that BMCL should try to obtain the tamper proof screws asap. DH agreed to chase DR for a response to the cost information It was noted that this CE was to have 'zero' value input as CE 126 covers this item.	Cross ref CE 126
16153	CE 136	ADULT HOSPITAL OUTPATIENT DEPT LEVEL 0 - ROOM ORT-014	30/07/2015	Install Group 3 wall bars in gym as supplied by NHS Board. Charge to Gp 3 equipment list.	
16156	CE 137	INSTITUTE OF NEUROSCIENCES - NEW ENTRANCE ADDITIONAL SITE INVESTIGATIONS	30/07/2015	The Board confirm the works instructed under PMI 417 & 418 to undertake additional site investigations to establish location, confirm if live, and terminate water, gas and drainage services not located as part of original Board commissioned site investigation and enabling works. Agreed cost [REDACTED] incl. of OH+P but excl VAT.	
16158	CE 138	CHILDRENS HOSPITAL L1 - INSTALL OF TRANSFER GROUP 5 EQUIPMENT (MRI)	30/07/2015	Proceed and provide sundry ramps and ballustrading as per PMI 420 and PMI 406.  Agreed cost [REDACTED] incl OH+P but ex VAT.	
16206	CE 139	TRANSITIONAL MANAGEMENT SUPPORT DURING BOARD COMMISSIONING PERIOD	04/08/2015	The Board confirms agreement to costs arising from the continued management and support from Brookfield Multiplex throughout the commissioning and migration period to bring the buildings into full operation, in particular, transitional support to manage and maintain the Building Services systems and the extended management support in connection with disruption to commencement	

A51679245

				<p>of INS Entrance.</p> <p>The agreement covers costs incurred by Brookfield Multiplex and their supply chain for the period from completion to the 31st July 2015.</p> <p>This agreement brings to an end all additional ongoing transitional support.</p> <p>Agreed gross cost [REDACTED]</p>	
16207	CE 140	CHILDRENS HOSPITAL THEATRE DEPARTMENT REPLACEMENT WHB	04/08/2015	<p>Board confirm acceptance of costs to replace damaged hand rinse basin in room THE-013.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	
16208	CE 141	EXTERNAL WORKS - ADDITIONAL GRASS TURFING ADJACENT TO CAR PARK 1	04/08/2015	<p>The Board confirm works provided under PMI 399 for two areas of turfing adjacent to the existing car park.</p> <p>Agreed cost [REDACTED] incl OH+P but excluding VAT.</p>	

#### Other items that require discussion:

- Soft landing costs – GW advised this is work in progress to colour code. GW have given indicative cost and will provide an explanation of the costs w/c 01/12/2014 (27/11/2014) AF advised that GW has given DL the cost. Mercury costs still to be advised. Feedback awaited from DL (04/12/2014) DP advised that he would liaise with AF for an update (11/12/2014) This matter will be progressed at the meeting taking place at 2pm on 08/01/2015 (08/01/2015) AF advised that costs are being identified. AF had spoken to KC and IP. IP had suggested some other items. The IP requested items would be identified separately when BMCL provide the costs to NHS for review (15/01/2015) DL noted that these were still awaited. AF advised that soft landing costs were to be discussed with EMcl so that costs could be provided from Mercury (22/01/2015) AF advised that the Mercury cost had been provided to BMCL however BMCL want to discuss this with Mercury prior to providing to the NHS (29/01/2015) GW advised that JB and DW have gone through the Mercury costs with DP. BMCL will have an internal discussion before meet with NHS. Cost will be provided to the NHS early w/c 09/02/2015 (05/02/2015) AF advised that a meeting to discuss the costs had been arranged for 3pm later that day. (12/02/2015). Meeting 19/02/2015 to discuss. (19/02/2015). It was noted that DL and AF are having discussions. DP advised that BMCL were trying to give a spread therefore need to know quickly so can retain Mercury resource on site. IP and DP have gone through the list. GW noted that BMCL still have staff costs to be covered as BMCL are doing the principal contractor role, RAMS, inductions, additional security, beneficial use lift staffing, etc. PM agreed to discuss with DL (05/03/2015) DP advised that BMCL have a timing concern and getting the paperwork in place. Workload does not justify the Mercury resource previously identified. BMCL had advised Schindler that all lifts to be re-commissioned by 17<sup>th</sup> April 2015. KC had been advised that the beneficial use lifts would be taken off use at end of March. BMCL have a proposal regarding the lifts, confirmation awaited from Schindler. Programme will initially be discussed with DH. (12/03/2015) GW noted that a decision from DL was required very soon. DP noted that timing now is getting close to being unable to have the admin put in place. DP reported that he had spoken to KC re taking down the beneficial lifts on 3<sup>rd</sup> April and these will be handed back on 7<sup>th</sup> April 2015. (26/03/2015) PM noted that DP had advised that in a place to take forward. Advised that in previous discussions with AF that AF was to have a rethink about the management cost element (02/04/2015) GW advised that he had spoken with DL and DL had confirmed that he would organize a meeting. AF requested that SF checks with AHirst if meeting is being arranged (30/04/2015) It was noted that a meeting is being organized (14/05/2015) It was noted that a meeting had been arranged to take place on 29/05/2015 (28/05/2015) GW advised that there had been a meeting with DL. BMCL had been requested to list out all the staff time on the project (04/06/2015) DH noted that costs have been submitted and are with DL (25/06/2015) DH noted that the costs are with DL, DL will be asked to confirm (23/07/2015) **PM advised that he had spoken to DL about this item. GW advised that if BMCL do not get acceptance soon then BMCL would be tempted to say that BMCL will do no further work. This item has been ongoing since November 2014. DH agreed to discuss with DR. (30/07/2015)**

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) **DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) **DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey

report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015)

- Children's Canopy – FS advised that BMCL have gone back to Fraser with 3 options – 1 solution is a remake of 1 section to have an upstand. (25/05/2015) FS advised that Fraser Gray have advised optimal solution. Previous gutter was extended beyond the glass and was changed. The glass could be tilted up however there would be a charge for this (23/07/2015) FS advised that Gray & Dick has been instructed to jack up the glass. GW suggested that it was Jim Murray who had removed the gutter. (30/07/2015)
- Mop wash (wiring to gas solenoid valves taken out) – IP has requested that the wiring be connected. PM requested that DW provide sufficient info to enable PM to provide a PMI (23/07/2015) It was agreed that PM would issue an PMI for the solenoid valve. GB advised that BMCL were struggling to get the wall make-up information from BMJ and this was holding up progressing the lintel design. PM agreed to send RDeb an email to request the info be provided asap. (30/07/2015)
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015)
- Structural Blinds – BMCL to raise an EW regarding this
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015)
- NCH - Rooms requiring white rock - BMCL noted that there is 2 rooms where it is not possible to fit white rock and that the beds would need to be removed – PM suggested that BMCL could use a larger section of white rock and slide it into the gap (23/07/2015)
- Schindler lift maintenance – GW advised that BMCL had received bills from Schindler for items outwith the scope of the maintenance contract – BMCL did not have any information as to why the NHS had called out an engineer and that there needed to be a process of informing BMCL put in place. DH advised that contractually the NHS only have a way to pay through the contract. GW accepted this to be the case however there was concern that the maintenance contract is between the BMCL and Schindler for 2 years. DH suggested that it may be possible for the NHS to set-up a call out contract for non maintenance call outs – this would need to be investigated. GW advised that as a minimum there needed to be a process for logging any call-outs. (23/07/2015) PM advised that he would discuss this matter with A Gallagher on 03/08/2015 (30/07/2015)
- INS Linkbridge – PM noted that he had seen an email from Susan Walker. GA advised that it had been planned to remove the barriers however this had not been done as a VLAN for the access control was required. PM advised that he would liaise with FCarnie (23/07/2015) PM noted that BMCL are awaiting the NHS installing a data link in order that BMCL can complete their swipe card works. (30/07/2015)
- Ward 4B – ward permeability tests – It was noted that PM would check with Gary Jenkins if these were wanted. PM enquired about the cost. DW suggested would potentially be [REDACTED]. (30/07/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1582

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 12/08/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 12/06/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. <b>GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get</p>	

			<p>23/4/2015 approval and the design process does not get delayed. FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>30/04/2015 GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>07/05/2015 GB noted that collation of the Building Warrants is WIP</p> <p>14/05/2015 GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>21/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015 Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>23/07/2015 Board to issue PMI/ CE covering the works. FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>30/07/2015 PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>05/08/2015 GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is</p>	

				based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.	
26405	BMCL-EWN-160	Delays to piling at VIE2	10/08/2015	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 12/08/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p>	

A51679245

			<p>28/05/2015 04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p>	<p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.</p> <p>FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p> <p>FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11<sup>th</sup> and 4<sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
25234	NHS EW 058	CHILDRENS HOSPITAL ETFE ROOF - CORE K	<p>18/05/2015</p> <p>21/05/2015</p> <p>28/05/2015</p>	<p>The leak in the ETFE roof has been ongoing since 2014. This leak has been recorded as a defect through the Capita defect reporting system. Today's rainfall again confirmed that the source of the leak has not been fixed and the Board require this matter to receive BMCE urgent attention. Occupation of the Children's Hospital is only 2 weeks away, this defect must be rectified in short term to ensure there is no water ingress post occupation. BMCE are to arrange a meeting on site with the Project Manager and prepare and submit a plan of works by 12 noon Friday 22nd May 2015.</p> <p>FS advised that he had been assured that the leak had been resolved – it is an issue with the Fatra + the tail up underneath the cladding panel.</p> <p>FS advised that the repair work had been carried out the previous Thursday. Prater have confirmed that</p>	06/08/2015

			<p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p>	<p>the repair is a permanent repair. FS proposed to check that the repair had worked as there had been heavy rain the previous evening.</p> <p>FS advised that on the previous occasion of rain he had investigated and it was thought that it was now identified where the rain is coming in. PM noted that he would raise an EW regarding the hot wire matter.</p> <p>FS noted that a repair had been carried out on Thursday and he understood that there had been water ingress on Saturday. FS would review the roof later that day and proposed to test out using a hose. PM suggested that he would want to be present when the testing was being carried out.</p> <p>FS noted that the sill flashing and extrusion had been redone and no issue had been identified since these works had been carried out.</p> <p>FS advised that he had been up with Vectorfoiltec and they had checked the drainage channel, had tried flooding the drainage channel and no issues were identified. Prater have been back on site to strip and refit the flashes and had put the membrane on. FS had rechecked the leak issue on return from leave and no leak was detected. FS noted that he would recheck on the next wet day. PM suggested that the leak issue was apparent when it was driving rain.</p> <p>FS advised that he had been checking everyday for any sign of a leak and no evidence of water ingress had been witnessed. FS would continue to monitor for signs of any water ingress.</p> <p>FS advised that there were no further signs of water ingress and it is thought that it may be a particular issue relating to wind direction. PM suggested that the EW could be closed out however water ingress should continue to be monitored.</p>	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	<p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p>	<p>The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.</p> <p>DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire &amp; Rescue.</p> <p>FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.</p> <p>FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.</p> <p>FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the</p>	

			06/08/2015	weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing. FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 12/08/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	<p>16/02/2015</p> <p>19/02.2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>22/04/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p> <p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>06/08/2015</p>	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>DW noted that minimal works have been commenced.</p> <p>DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).</p>	

3405	PMI 348	NEW HOSPITALS - TELEPHONE LINES	19/02/2015	The Board require the undernoted quantity of telephone lines. The Board confirm the requirement for 900 (pairs) copper back-up lines connected to Node 12 at the rear of the Central Medical Block via existing ductwork. The exact ductwork route and length and any intermediate distribution frame will be confirmed by close of play 20th February 2015.	06/08/2015
			26/02/2015	GW advised that cost information is expected the following day. The route had now been agreed. GW noted that the agreed route is now longer.	
			05/03/2015	PM noted that the cost had been provided the previous day. DH noted that the Board and BMCL needed to agree the "base number" i.e. 600 or 900 lines as was to be for 10% of the lines GW noted that he was being advised that you do not count for mobiles and that Mercury are adamant that they only ever included for 300. Mercury would not go ahead with the work until they receive certainty that they will get paid for the 900 lines. BMCL cannot instruct the works until the baseline number has been agreed. DH and DR to discuss. .	
			12/03/2015	GW advised that he would instruct the works. AF and GW to discuss. Instruction will be raised to Mercury so that the works will be undertaken so as not to impact on the programme however BMCL position re the number of 'additional' lines is unchanged and discussion/agreement with NHS re number of lines is required.	
			19/03/2015	GW advised that a CE had been issued to Mercury. DH acknowledged that this matter re baseline no. of lines needed to be concluded. DH requested that BMCL provide a delivery date for when the lines are going in so that he can provide feedback to the telecoms reps.	
			26/03/2015	PM advised that he proposed to issue a CE for 300 lines in order not to delay any works. PM noted that the remainder of the lines needed to be debated. DP advised that he understood the works had commenced the previous day. GW suggested that this matter needed to be bottomed out before the end of April 2015. It was agreed that a meeting to discuss the 'extra' lines should be organized in due course.	
			02/04/2015	DP advised that the lines should have been installed and tested the previous night. DH enquired if Dennis knew this had taken place and it was agreed to check this out. GW advised that he would want the BMCL/NHS discussion re the 300 to 900/600 to 900 lines prior to the NHS issuing any CE. GW requested that a meeting be arranged w/c 06/04/2015.	
			22/04/2015	PM suggested that he could provide a CE for [REDACTED] in the interim whilst the baseline discussions were to be concluded.	
			30/04/2015	PM noted that CE 095 had been for the additional 300 lines. Baseline discussion to be organized.	
			14/05/2015	DH enquired if a meeting was being arranged to discuss the baseline number of lines and SF agreed to check.	
			21/05/2015	SF to organize meeting	
			28/05/2015	Meeting being organized for 04/06/2015	
			11/06/2015	GW advised that CE is awaited. Revised costs are on Sypro ([REDACTED]). NHS requested to review asap.	
			25/06/2015	DH noted that it is WIP to check back previous documentation.	
			30/07/2015	GW advised that further information was being identified.	
			06/08/2015	GW advised that BMCL were no longer pursuing this item therefore the item could be closed. .	

3753	PMI 393 -	ADULT HOSPITAL CRITICAL CARE - ADDITIONAL DOOR ENTRY BUZZERS & SWIPE CARD ENTRY	12/05/2015          14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015  25/06/2015 30/07/2015 06/08/2015	<p>Please provide a cost to install the additional access infrastructure as detail on the attached drawing.</p> <p>Please provide a costs to extend the existing door entry system in three locations as shown on the attached drawing, system to have same functionality in all locations.</p> <p>Also in two locations provide swipe card door entry functionality to two doorsets, again as shown on the attached drawing.</p> <p>With the cost please provide a timescale to order materials and complete the installation.</p> <p>DW advised that Mercury are currently pricing.</p> <p>GW noted that this item was currently being priced</p> <p>DW advised that a cost is awaited from Mercury.</p> <p>GW advised that he was checking the costs before providing to the NHS</p> <p>PM advised that he had received the cost and he would need to get confirmation from the Users that they are prepared to cover the cost from their internal budget.</p> <p>PM noted that this is WIP to progress with the Users</p> <p>PM noted Users to confirm way forward – PMI on hold</p> <p>PM advised this item should be closed as NHS not pursuing this change at moment. .</p>	
3772	PMI 399	EXTERNAL WORKS - ADDITIONAL TURFING	14/05/2015       21/05/2015 28/05/2015 11/06/2015  25/06/2015 23/07/2015 30/07/2015 06/08/2015	<p>Please supply and install additional turfing to areas A &amp; B indicated on attached drawing titled 'turfing at CP1'. Also please provide a cost for turfing the area indicated on the attached drawing titled Sketch 15000.</p> <p>In both locations, trees and shrubs already planted are to be left in position and the turf should be layed close to their base defined by a ring of bark mulch. Works to be complete by end of June latest.</p> <p>PM noted that cost info awaited</p> <p>GW agreed to provide the cost asap</p> <p>PM noted that Land Eng had already planted out 1 area and there was no benefit in ripping the planting back out. Only the 2 small areas require to be priced now.</p> <p>PM advised he would provide a CE</p> <p>GW agreed to provide a note of the cost</p> <p>PM agreed to provide a CE for this item</p> <p>Item closed – cross reference CE141</p>	Cross ref CE141
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p>	

			<p>21/05/2015 28/05/2015 04/06/2015</p> <p>11/06/2015 25/06/2015 23/07/2015 30/07/2015 06/08/2015</p>	<p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p>	
3880	PMI-410	CHILDREN'S HOSPITAL THEATRE DEPT - WC ROOM THE-013 DAMAGED WHB	<p>03/06/2015 11/06/2015 25/06/2015 23/07/2015 06/08/2015</p>	<p>Please supply and install new hand rinse whb to replace broken whb. Make all finishes good.</p> <p>FS noted that the works had been carried out the previous day. GW advised that he would upload the cost asap.</p> <p>PM agreed to check Sypro for cost info</p> <p>PM advised that the cost advised it too expensive and cost needs to be discussed.</p> <p>It was noted that this item had been discussed and costs agreed. Cross reference CE 140</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) - Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p>	

			<p>25/06/2015 23/07/2015 30/07/2015</p> <p>06/08/2015</p>	<p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>GW noted this is WIP.</p>	
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	<p>11/06/2015</p> <p>25/06/2015 23/07/2015 30/07/2015</p> <p>06/08/2015</p>	<p>Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.</p> <p>The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.</p> <p>Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on Sketch B.</p> <p>To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman).</p> <p>FS advised that he would check this with JMiller</p> <p>FS advised he would check that Magicman had been on site. PM noted that cost was required. GW advised that he had uploaded the cost.</p> <p>FS noted that he had spoken to Martin Muirhead the previous day who had advised that he is still trying to get magicman on site. No further update was available at this time.</p> <p>PM noted that he would review the costs</p>	
3923	PMI 415	- Additional IPS Sockets	<p>15/06/2015</p> <p>25/06/2015 30/07/2015</p> <p>06/08/2015</p>	<p>The Board request a cost for the installation of 4no. IPS twin socket outlets (medical) in trunking in RCG-071 and 2no. IPS twin sockets on trunking in RCG-069.</p> <p>Please cost RCG-071 as standalone &amp; RCG 069 as complimentary as the former may proceed without the latter but not vice versa.</p> <p>If the quantities exceed capacities on the existing IPS Unit please advise prior to pricing.</p> <p>DW suggested that the cost info had been issued and PM agreed to check</p> <p>DH advised that the NHS would want to proceed with RCG 071 only – RCG 069 no longer required. Costs to be reviewed.</p> <p>It was noted that this item could be closed. PMI 431 confirms the way forward.</p>	Cross ref PMI 431
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	<p>15/06/2015</p>	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> </ul>	

Page 1594

			25/06/2015 23/07/2015 30/07/2015	- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections - All connections to kit by others (NHS FM). - Sterilisation of CWS & HWS by BMCE. DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review <b>It was noted that this item is on hold for now</b>	
3926	PMI 418 -	Additional investigative excavations - Neurosurgery Entrance	15/06/2015  23/07/2015 30/07/2015 06/08/2015	The Board instruct the additional investigative excavations to confirm the extent of unknown services identified during the pile cap excavations. These services are detailed within the summary report INS Entrance -Trail Pit Photos and Services Clash Report (Dated 27th May 2015). GW advised that the costs were to be uploaded by BMCL PM advised that he would issue a CE later that day (circa [REDACTED]) <b>It was agreed this PMI could be closed as CE 137 issued.</b>	Cross Ref CE 137.
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015      25/06/2015 23/07/2015 30/07/2015 06/08/2015	Please provide a cost for the introduction of hold open stays to the single sets of self closing fore doors in Cores A & B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users  Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.  Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.  The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users. It was agreed that a separate meeting would take place at 9.30am the following day. GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328 GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency. <b>GW advised that the costs would be uploaded asap</b>	
3936	PMI 420 -	CHILDRENS HOSPITAL - MRI INSTALLATION ADDITIONAL WORKS	17/06/2015  25/06/2015  23/07/2015 30/07/2015 06/08/2015	Amend works set out in PMI 406 as follows. Omit single direction ramp at gradient of 1:12 at change in level outside Neo-natal Unit. Add ramp with top landing 1220x1500mm with ramp 1220mm wide on grade 1:12, ramp to have guard rail to stop trolley falling off edge. Ramp to be constructed from regularised timber and 18mm plywood. FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE. GW advised that costs had been uploaded on 06/07. Works have been completed. PM advised that he would provide a CE asap. <b>It was agreed this PMI could be closed as CE 138 issued.</b>	Cross ref CE 138

3937	PMI 421	ADULT HOSPITAL OPD GROUND FLOOR ROOM ORT-014 - WALL BARS	17/06/2015	Please proceed and fit 2 sets of timber wall bars in room ORT 014. Wall bars are each nominally 2400mm high by 860mm wide and are fixed to the wall with angle brackets provided. Wall bars come flat pack and require to be put together, all fixings supplied. Also provide a finished surface mounted patress top and bottom as per instructions, screw fix patress to background studs to allow for reasonable load as discussed PMoir/FSHaw/User 17/6/15. make all finishes good.	Cross Ref CE 136
			25/06/2015	Refer attached sketch for location. FS advised that the works had been done. PM agreed to check Sypro for cost info and thereafter issue a CE.	
			23/07/2015	GW advised that costs had been uploaded on 16/07 for NHS review and provision of CE	
			30/07/2015	PM advised that he would provide a CE asap	
			06/08/2015	It was agreed this PMI could be closed as CE 136 issued.	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015	Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.  Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.  Proceed and install blinds as discussed a meeting 17 June 2015.  Works not to include provision of finger guards.  23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.	
			25/06/2015	FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30 <sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.	
			23/07/2015	FS advised that the operatives are back on site on 27 <sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015	
			30/07/2015	PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded	
			06/08/2015	PM noted that it was understood that the works are now complete. BMCL to provide cost for data socket/outlet works.	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.  Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.	

Page 1596

			<p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"><li><i>• 10-12 air changes hour</i></li><li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li><li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li><li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li></ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
		23/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
		30/07/2015	<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p>	
		06/08/2015	<p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p>	

4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p>	
			23/07/2015	<p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p>	
			30/07/2015 06/08/2015	<p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p>	
			30/07/2015 06/08/2015	<p>Refer attached sketch.</p> <p>GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design. Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p>	

4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015  30/07/2015	The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.  DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015    23/07/2015 30/07/2015 06/08/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.  The names for the new hospitals are;  The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow  Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated. GB advised that BMCL would put an instruction to Land Eng. GB noted that he had asked Gillespies to update their drawings. <b>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</b>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015	The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.  Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015   30/07/2015  06/08/2015	Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.  Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location. DW noted that there is a lot of design work involved in this PMI and DW would provide info re programme impacts the following day. <b>PM advised that information had been added to the 'notes' section on Sypro.</b>	
4201	PMI 431 -	ADDITIONAL IPS SOCKETS ROOM RCG-071	30/07/2015	Please proceed with works as set out and costed in PMI-415, but to room RCG-071 only, confirm no works to be undertaken in room RCG-069. Cost agreed with Grant Wallace on 30th July 2015 as [REDACTED] incl OHP but excluding VAT.	

4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	11/08/2015	Please provide proposals and a cost for the following; a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing. b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.	
4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system.	
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16153	CE 136	ADULT HOSPITAL OUTPATIENT DEPT LEVEL 0 - ROOM ORT-014	30/07/2015	Install Group 3 wall bars in gym as supplied by NHS Board. Charge to Gp 3 equipment list.	
16156	CE 137	INSTITUTE OF NEUROSCIENCES - NEW ENTRANCE ADDITIONAL SITE INVESTIGATIONS	30/07/2015	The Board confirm the works instructed under PMI 417 & 418 to undertake additional site investigations to establish location, confirm if live, and terminate water, gas and drainage services not located as part of original Board commissioned site investigation and enabling works. Agreed cost [REDACTED] incl. of OH+P but excl VAT.	
16158	CE 138	CHILDRENS HOSPITAL L1 - INSTALL OF TRANSFER GROUP 5 EQUIPMENT (MRI)	30/07/2015	Proceed and provide sundry ramps and ballustrading as per PMI 420 and PMI 406.  Agreed cost [REDACTED] incl OH+P but ex VAT.	
16206	CE 139	TRANSITIONAL MANAGEMENT SUPPORT DURING BOARD COMMISSIONING PERIOD	04/08/2015	The Board confirms agreement to costs arising from the continued management and support from Brookfield Multiplex throughout the commissioning and migration period to bring the buildings into full operation, in particular, transitional support to manage and maintain the Building Services systems and the extended management support in connection with disruption to commencement of INS Entrance. The agreement covers costs incurred by Brookfield Multiplex and their supply chain for the period from completion to the 31st July 2015. This agreement brings to an end all additional ongoing transitional support.  Agreed gross cost [REDACTED]	
16207	CE 140	CHILDRENS HOSPITAL THEATRE DEPARTMENT REPLACEMENT WHB	04/08/2015	Board confirm acceptance of costs to replace damaged hand rinse basin in room THE-013.  Agreed cost [REDACTED] incl OH+P but excl VAT.	

A51679245

16208	CE 141	EXTERNAL WORKS - ADDITIONAL GRASS TURFING ADJACENT TO CAR PARK 1	04/08/2015	The Board confirm works provided under PMI 399 for two areas of turfing adjacent to the existing car park.  Agreed cost [REDACTED] incl OH+P but excluding VAT.	
-------	--------	---	------------	---	--

#### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). **GA advised that he would provide an update asap as there was no update available at this time (06/08/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push.

(04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015)

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015)
- Children's Canopy – FS advised that BMCL have gon back to Fraser with 3 options – 1 solution is a remake of 1 section to have an upstand. (25/05/2015) FS advised that Fraser Gray have advised optimal solution. Previous gutter was extended beyond the glass and was changed. The glass could be tilted up however there would be a charge for this (23/07/2015) FS advised that Gray & Dick has been instructed to jack up the glass. GW suggested that it was Jim Murray who had removed the gutter. (30/07/2015) FS advised that he had issued a CI to Gray & Dick – FS suggested the works would be undertaken in 1-2 weeks time (06/08/2015)
- Mop wash (wiring to gas solenoid valves taken out) – IP has requested that the wiring be connected. PM requested that DW provide sufficient info to enable PM to provide a PMI (23/07/2015) It was agreed that PM would issue an PMI for the solenoid valve. GB advised that BMCL were struggling to get the wall make-up information from BMJ and this was holding up progressing the lintel design. PM agreed to send RDeb an email to request the info be provided asap. (30/07/2015) PM advised that he had emailed RDeb requesting assistance (06/08/2015)
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015)
- Structural Blinds – BMCL to raise an EW regarding this. Discussed under NHS EW 057 (06/08/2015)
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015)
- NCH - Rooms requiring white rock - BMCL noted that there is 2 rooms where it is not possible to fit white rock and that the beds would need to be removed – PM suggested that BMCL could use a larger section of white rock and slide it into the gap (23/07/2015) GA advised that 1 room in zone B had been completed (06/08/2015)
- Schindler lift maintenance – GW advised that BMCL had received bills from Schindler for items outwith the scope of the maintenance contract – BMCL did not have any information as to why the NHS had called out an engineer and that there needed to be a process of informing BMCL put in place. DH advised that contractually the NHS only have a way to pay through the contract. GW accepted this to be the case however there was concern that the maintenance contract is between the BMCL and Schindler for 2 years. DH suggested that it may be possible for the NHS to set-up a call out contract for non maintenance call outs – this would need to be investigated. GW advised that as a minimum there needed to be a process for logging any call-outs. (23/07/2015) PM advised that he would discuss this mater with AGallagher on 03/08/2015 (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015)

- INS Linkbridge – PM noted that he had seen an email from Susan Walker. GA advised that it had been planned to remove the barriers however this had not been done as a VLAN for the access control was required. PM advised that he would liaise with FCarnie (23/07/2015) PM noted that BMCL are awaiting the NHS installing a data link in order that BMCL can complete their swipe card works. (30/07/2015) GA advised that the VLAN supply is in and Mercury are working on the access control now – GA suggested it would be mid w/c 10/08/2015 for the works to be completed (06/08/2015)
- Ward 4B – ward permeability tests – It was noted that PM would check with Gary Jenkins if these were wanted. PM enquired about the cost. DW suggested would potentially be [REDACTED]. (30/07/2015) PM advised that he will issue a PMI for the testing (06/08/2015)
- INS Fire Strategy documents – It was noted that these drawings had been provided to the NHS for RDD and that BMCL needed these returned asap. BMCL are progressing on basis of the RDD document. (06/08/2015)

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed</p>	

			02/04/2015	to use the Mercury as fitted drawings rather than getting the WW dwg updated. GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
			21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	

26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting ght emitting pillows back in.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p> <p>13/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 13/08/2015

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015  11/06/2015  25/06/2015  23/07/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.</p> <p>FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need</p>	

A51679245

			30/07/2015	to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structural. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structural were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.	
			11/06/2015	DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.	
			25/06/2015	FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.	
			23/07/2015	FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.	
			30/07/2015	FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing.	

			06/08/2015	FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.	
			13/08/2015	GA advised that Delta T engineer is back on site on Monday. Declan (Mercury) will speak to rep regarding a date for the return to site to carry out the connections.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 12/08/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015 14/05/2015 21/05/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop.</p> <p>Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCL to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been</p>	

A51679245

3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015  25/06/2015 23/07/2015 30/07/2015  06/08/2015 13/08/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective. GW noted this is WIP.</p> <p><b>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</b></p>	
3911	PMI 413	NCH THEATRES 1-3 LASER PROTECTION	11/06/2015  25/06/2015 23/07/2015 30/07/2015  06/08/2015 13/08/2015	<p>Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite.</p> <p>The Board confirm that to meet laser protection requirements in Theatres 1-3 (THE-109/114/122) and Theatre 5 (THE-092) door vision panel flaps are required to all doors and therefore 2 No. additional flaps are required in each theatre as highlighted on the attached Sketch B.</p> <p>Additionally where ironmongery has been installed with thumb-turn to inside of shared dirty utility in lieu of key lock these should be swapped to have the thumb-turn on the theatre side. Also noted on Sketch B.</p> <p>To obtain vision panel flaps, these are to be removed from NCH cardiac cath lab RCI-005 and Interventional Radiology Lab RCI-013 as indicated on Sketch A. Holes left after removal to be made good (Magicman).</p> <p>FS advised that he would check this with JMiller</p> <p>FS advised he would check that Magicman had been on site. PM noted that cost was required. GW advised that he had uploaded the cost.</p> <p>FS noted that he had spoken to Martin Muirhead the previous day who had advised that he is still trying to get magicman on site. No further update was available at this time.</p> <p>PM noted that he would review the costs</p> <p><b>It was agreed that this item could be closed noting that Magicman would be onsite on 17/08/2015 which would complete the works</b></p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> </ul>	

			<p>25/06/2015 23/07/2015 30/07/2015</p>	<ul style="list-style-type: none"> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul> <p>DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review <b>It was noted that this item is on hold for now</b></p>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	<p>16/06/2015</p> <p>25/06/2015 23/07/2015 30/07/2015 06/08/2015 13/08/2015</p>	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fore doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p>GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</p> <p><b>GW advised that the costs would be uploaded asap</b> <b>GB advised that TDSL have responded with their cost. LJ has chased up Mercury for their</b></p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	<p>19/06/2015</p> <p>25/06/2015</p>	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p>	<p>it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p> <p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted. PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p> <p>PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p> <p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had</p>	

			<p>23/07/2015 30/07/2015 06/08/2015</p> <p>13/08/2015</p>	<p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping sone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	<p>27/07/2015</p> <p>13/08/2015</p>	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p> <p>GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	<p>27/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p>	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location.</p> <p>DW noted that there is a lot of design work involved in this PMI and DW would provide info re programme impacts the following day.</p> <p>PM advised that information had been added to the 'notes' section on Sypro.</p> <p>GW advised that this was currently being priced and PH was chasing this up.</p>	
4201	PMI 431 -	ADDITIONAL IPS SOCKETS ROOM RCG- 071	<p>30/07/2015</p> <p>13/08/2015</p>	<p>Please proceed with works as set out and costed in PMI-415, but to room RCG-071 only, confirm no works to be undertaken in room RCG-069. Cost agreed with Grant Wallace on 30th July 2015 as [REDACTED] incl OHP but excluding VAT.</p> <p>Agreed this item could be closed.</p>	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p>	

4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system.	
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150	
4366	PMI 435 -	Escape Door Set - Core E - level 2 - Swipe Card	13/08/2015	This escape door set has been fitted with maglocks but no swipe card operation panel. The Board request a cost to complete the installation with swipe card reader on stairwell side of door and maglock disengage on energisation of full fire alarm. (See attached drawing for specific location)	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
----------	------------	------	---------------------------	---------	---------------------------

None

### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015)

A51679245

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) **GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) **GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015)**
- Children's Canopy – FS advised that BMCL have gon back to Fraser with 3 options – 1 solution is a remake of 1 section to have an upstand. (25/05/2015) FS advised that Fraser Gray have advised optimal solution. Previous gutter was extended beyond the glass and was changed. The glass could be tilted up however there would be a charge for this (23/07/2015) FS advised that Gray & Dick has been instructed to jack up the glass. GW suggested that it was Jim Murray who had removed the gutter. (30/07/2015) FS advised that he had issued a CI to Gray & Dick – FS suggested the works would be undertaken in 1-2 weeks time (06/08/2015) **GA advised that the works would be commenced 22/08 and that he would liaise with IP (13/08/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) **GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015)**
- Structal Blinds – BMCL to raise an EW regarding this. **Discussed under NHS EW 057 (06/08/2015)**

- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015)
- NCH - Rooms requiring white rock - BMCL noted that there is 2 rooms where it is not possible to fit white rock and that the beds would need to be removed – PM suggested that BMCL could use a larger section of white rock and slide it into the gap (23/07/2015) GA advised that 1 room in zone B had been completed (06/08/2015) GA advised that the works were complete. GA advised that the pressure tests had been going slowly due to access difficulties however were continuing to link in with the users to get access to rooms as and when they can. Starkstrom are still looking at a solution to the pendant head. PM requested that GA provide a list of what rooms had been tested by the end of week/21/08/2015 (13/08/2015)
- Schindler lift maintenance – GW advised that BMCL had received bills from Schindler for items outwith the scope of the maintenance contract – BMCL did not have any information as to why the NHS had called out an engineer and that there needed to be a process of informing BMCL put in place. DH advised that contractually the NHS only have a way to pay through the contract. GW accepted this to be the case however there was concern that the maintenance contract is between the BMCL and Schindler for 2 years. DH suggested that it may be possible for the NHS to set-up a call out contract for non maintenance call outs – this would need to be investigated. GW advised that as a minimum there needed to be a process for logging any call-outs. (23/07/2015) PM advised that he would discuss this mater with AGallagher on 03/08/2015 (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) PM suggested that GW could write to PM highlighting the issue so that PM could deal with it. GW advised that it wasn't a big issue but that a process should be agreed to deal with calls Schindler. (13/08/2015)
- INS Linkbridge – PM noted that he had seen an email from Susan Walker. GA advised that it had been planned to remove the barriers however this had not been done as a VLAN for the access control was required. PM advised that he would liaise with FCarnie (23/07/2015) PM noted that BMCL are awaiting the NHS installing a data link in order that BMCL can complete their swipe card works. (30/07/2015) GA advised that the VLAN supply is in and Mercury are working on the access control now – GA suggested it would be mid w/c 10/08/2015 for the works to be completed (06/08/2015) It was noted that GF has provided equipment to transfer the POE to POE + supply. JM is liaising with Mercury for installation. Suggested that install would be w/c 17/0/2015 (13/08/2015)
- Ward 4B – ward permeability tests – It was noted that PM would check with Gary Jenkins if these were wanted. PM enquired about the cost. DW suggested would potentially be [REDACTED]. (30/07/2015) PM advised that he will issue a PMI for the testing (06/08/2015) PM advised that he would provide a PMI however requested that BMCL progress tests asap noting that it was understood that BMCL are still working in some rooms (13/08/2015)
- INS Fire Strategy documents – It was noted that these drawings had been provided to the NHS for RDD and that BMCL needed these returned asap. BMCL are progressing on basis of the RDD document. (06/08/2015) GA advised that he is meeting with GDonnelly the next day and he would get the drawings marked up and signed off. There was a discussion ongoing re having a different arrangement (Anso?) or to change the area into a vending machine only area. (13/08/2015)
- Access & Maintenance Strategy for A&C – GB advised that this RDD doc needed to be returned as it was very overdue. GF advised that he had spoken to DH the previous week and that he would follow up the discussion (13/08/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1620

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 26/08/2015:

Brookfield MULTIPLEX BM					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
			A51679245		

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was</p>	

			<p>not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>02/04/2015 GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>23/4/2015 FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>30/04/2015 GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>07/05/2015 GB noted that collation of the Building Warrants is WIP</p> <p>14/05/2015 GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>21/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>13/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>27/08/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p>	
--	--	--	---	--

26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings . PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3<sup>rd</sup>. PM noted that this item would not be able to be sorted in the next couple of weeks.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p>	

			13/08/2015 27/08/2015	<ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p>	
--	--	--	--------------------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 13/08/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015  11/06/2015  25/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p>	

A51679245

			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
			30/07/2015	FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structural. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structural were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.	
			11/06/2015	DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.	

			25/06/2015	FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.	
			23/07/2015	FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.	
			30/07/2015	FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing.	
			06/08/2015	FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.	
			13/08/2015	GA advised that Delta T engineer is back on site on Monday. Declan (Mercury) will speak to rep regarding a date for the return to site to carry out the connections.	
			27/08/2015	GA advised that Delta T are onsite on 31/08 & 01/09 and that will conclude the works to wire the connections. BMCL will ensure that NHS reps witness the final commissioning.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 03/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p>	

A51679245

			<p>22/04/2015 30/04/2015</p> <p>07/05/2015 14/05/2015</p> <p>21/05/2015</p> <p>04/06/2015</p> <p>11/06/2015 25/06/2015 06/08/2015</p>	<p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>DW noted that minimal works have been commenced.</p> <p>DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).</p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	<p>18/05/2015</p> <p>21/05/2015 28/05/2015 04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p>	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>GW noted this is WIP.</p> <p>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>GW noted that costs had been uploaded for NHS review.</p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	<p>15/06/2015</p>	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul>	

			25/06/2015 23/07/2015 30/07/2015	DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review <b>It was noted that this item is on hold for now</b>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015    25/06/2015 23/07/2015 30/07/2015 06/08/2015 13/08/2015 27/08/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for unattended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p>GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</p> <p>GW advised that the costs would be uploaded asap</p> <p>GB advised that TDSL have responded with their cost. LJ has chased up Mercury for their cost</p> <p><b>GW advised that he will check that BMCL Have received all the cost info. GB suggested that costs had been received from TDSL and Mercury.</b></p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015         25/06/2015	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to</p>	

			<p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.</p> <p>FS advised that the operatives are back on site on 27<sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015</p> <p>PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded</p> <p>PM noted that it was understood that the works are now complete. BMCL to provide cost for data socket/outlet works.</p> <p>GA advised that he had spoken to DG who would liaise with Richard asap – there had been difficulty contacting Richard. Allaway are also considering installing soft close closers.</p> <p>GW advised that the costs had been uploaded for NHS review. GA advised that the soft closers and latches remedial works had been completed earlier that day.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p> <p>23/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p> <p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p> <p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p> <p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p> <p>PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p> <p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p> <p>23/07/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p>	

			30/07/2015 06/08/2015  13/08/2015 27/08/2015	<p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>GA advised that the installation is due to commence the following week.</p> <p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015          30/07/2015 06/08/2015 13/08/2015 27/08/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p> <p>GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p> <p>Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p>	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015  30/07/2015  13/08/2015 27/08/2015	<p>The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.</p> <p>DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.</p> <p>GA advised that the contractor is due on site w/c 10/08/2015</p> <p>DW advised that the operative was meant to be currently onsite. The part had been provided to IDM as free issue for them to fit. PM agreed to provide a CE. GW noted that the costs had been</p>	

				uploaded.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015      23/07/2015 30/07/2015 06/08/2015  13/08/2015   27/08/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015      13/08/2015  27/08/2015	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p> <p>GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.</p> <p>GW advised that he will get costs asap. GA advised that he would request that TDSL progress the works asap.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015      30/07/2015	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location.</p> <p>DW noted that there is a lot of design work involved in this PMI and DW would provide info re</p>	Cross ref CE 142

			06/08/2015 13/08/2015 27/08/2015	programme impacts the following day. PM advised that information had been added to the 'notes' section on Sypro. GW advised that this was currently being priced and PH was chasing this up. GW advised that the costs had been uploaded and noted that the cost of the actual gauges was expensive.	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	11/08/2015   27/08/2015	Please provide proposals and a cost for the following; a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing. b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch. GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.	
4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015  27/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system. PM advised that he would provide a CE once the costs are known	
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015 27/08/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150 Costs uploaded, cross ref BMCL EWN 0150	
4366	PMI 435 -	Escape Door Set - Core E - level 2 - Swipe Card	13/08/2015  27/08/2015	This escape door set has been fitted with maglocks but no swipe card operation panel. The Board request a cost to complete the installation with swipe card reader on stairwell side of door and maglock disengage on energisation of full fire alarm. (See attached drawing for specific location) GB advised that he would check the door drawings	
4455	PMI 436	ADULT HOSPITAL LEVEL 4 WARD B HAEMATO ONCOLOGY - AIR PERMEABILITY TEST	28/08/2015	Proceed and undertake air permeability tests to 24 rooms and en suites in this ward and provide formal report prior to final handover to Board. Please provide cost for same.

#### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) **GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015)

DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference of opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) **GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) **GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) **GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015)**
- Structural Blinds – BMCL to raise an EW regarding this. **Discussed under NHS EW 057 (06/08/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015)**
- INS Fire Strategy documents – It was noted that these drawings had been provided to the NHS for RDD and that BMCL needed these returned asap. BMCL are progressing on basis of the RDD document. (06/08/2015) GA advised that he is meeting with GDonnelly the next day and he would get the drawings marked up and signed off. There was a discussion ongoing re having a different arrangement (Anso?) or to change the area into a vending machine only area. (13/08/2015) **GF advised that he was scheduled to meet with GD the following day and the drawings would be returned asap thereafter (27/08/2015)**

- Access & Maintenance Strategy for A&C – GB advised that this RDD doc needed to be returned as it was very overdue. GF advised that he had spoken to DH the previous week and that he would follow up the discussion (13/08/2015) GF agreed to liaise with DH re review and return of documents (27/08/2015)
- Overcladding works – GF noted that window film may need to be applied to windows at INS to allow patient dignity to be retained during the works. GF to draft a PMI for issue (27/08/2015)
- PMI 423 - CHILDRENS HOSPITAL – MEDICINEMA. GW noted that this had been closed and removed from the tracker however GW had costs associated with this item. PM advised that as they doors had never been commissioned that there were no costs attributable to the NHS (27/08/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1638

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 26/08/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. <b>GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was</p>	

			<p>not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>02/04/2015 GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>23/4/2015 FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>30/04/2015 GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>07/05/2015 GB noted that collation of the Building Warrants is WIP</p> <p>14/05/2015 GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>21/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>13/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>27/08/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p>	
--	--	--	---	--

26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3<sup>rd</sup>. PM noted that this item would not be able to be sorted in the next couple of weeks.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p>	

			13/08/2015 27/08/2015	<ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p>	
--	--	--	--------------------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 13/08/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015  11/06/2015  25/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p>	

A51679245

			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
			30/07/2015	FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.	
			11/06/2015	DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.	

			25/06/2015	FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.	
			23/07/2015	FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.	
			30/07/2015	FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing.	
			06/08/2015	FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.	
			13/08/2015	GA advised that Delta T engineer is back on site on Monday. Declan (Mercury) will speak to rep regarding a date for the return to site to carry out the connections.	
			27/08/2015	GA advised that Delta T are onsite on 31/08 & 01/09 and that will conclude the works to wire the connections. BMCL will ensure that NHS reps witness the final commissioning.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 03/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p>	

A51679245

			<p>22/04/2015 30/04/2015</p> <p>07/05/2015 14/05/2015</p> <p>21/05/2015</p> <p>04/06/2015</p> <p>11/06/2015 25/06/2015 06/08/2015</p>	<p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>DW noted that minimal works have been commenced.</p> <p>DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).</p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	<p>18/05/2015</p> <p>21/05/2015 28/05/2015 04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p>	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>GW noted this is WIP.</p> <p>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>GW noted that costs had been uploaded for NHS review.</p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul>	

			25/06/2015 23/07/2015 30/07/2015	DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review <b>It was noted that this item is on hold for now</b>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015    25/06/2015 23/07/2015 30/07/2015 06/08/2015 13/08/2015 27/08/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for unattended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p>GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</p> <p>GW advised that the costs would be uploaded asap</p> <p>GB advised that TDSL have responded with their cost. LJ has chased up Mercury for their cost</p> <p><b>GW advised that he will check that BMCL Have received all the cost info. GB suggested that costs had been received from TDSL and Mercury.</b></p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	19/06/2015          25/06/2015	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to</p>	

			<p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.</p> <p>FS advised that the operatives are back on site on 27<sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015</p> <p>PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded</p> <p>PM noted that it was understood that the works are now complete. BMCL to provide cost for data socket/outlet works.</p> <p>GA advised that he had spoken to DG who would liaise with Richard asap – there had been difficulty contacting Richard. Allaway are also considering installing soft close closers.</p> <p>GW advised that the costs had been uploaded for NHS review. GA advised that the soft closers and latches remedial works had been completed earlier that day.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p> <p>23/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p> <p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p> <p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted. PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required. PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p> <p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p> <p>23/07/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p>	

			30/07/2015 06/08/2015  13/08/2015 27/08/2015	<p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>GA advised that the installation is due to commence the following week.</p> <p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015       30/07/2015 06/08/2015 13/08/2015 27/08/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p> <p>GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p> <p>Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p>	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015  30/07/2015  13/08/2015 27/08/2015	<p>The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.</p> <p>DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.</p> <p>GA advised that the contractor is due on site w/c 10/08/2015</p> <p>DW advised that the operative was meant to be currently onsite. The part had been provided to IDM as free issue for them to fit. PM agreed to provide a CE. GW noted that the costs had been</p>	

				uploaded.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015      23/07/2015 30/07/2015 06/08/2015  13/08/2015   27/08/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015      13/08/2015  27/08/2015	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p> <p>GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.</p> <p>GW advised that he will get costs asap. GA advised that he would request that TDSL progress the works asap.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015      30/07/2015	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location.</p> <p>DW noted that there is a lot of design work involved in this PMI and DW would provide info re</p>	Cross ref CE 142

			06/08/2015 13/08/2015 27/08/2015	programme impacts the following day. PM advised that information had been added to the 'notes' section on Sypro. GW advised that this was currently being priced and PH was chasing this up. GW advised that the costs had been uploaded and noted that the cost of the actual gauges was expensive.	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	11/08/2015   27/08/2015	Please provide proposals and a cost for the following; a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing. b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch. GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.	
4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015  27/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system. PM advised that he would provide a CE once the costs are known	
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015 27/08/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150 Costs uploaded, cross ref BMCL EWN 0150	
4366	PMI 435 -	Escape Door Set - Core E - level 2 - Swipe Card	13/08/2015  27/08/2015	This escape door set has been fitted with maglocks but no swipe card operation panel. The Board request a cost to complete the installation with swipe card reader on stairwell side of door and maglock disengage on energisation of full fire alarm. (See attached drawing for specific location) GB advised that he would check the door drawings	
4455	PMI 436	ADULT HOSPITAL LEVEL 4 WARD B HAEMATO ONCOLOGY - AIR PERMEABILITY TEST	28/08/2015	Proceed and undertake air permeability tests to 24 rooms and en suites in this ward and provide formal report prior to final handover to Board. Please provide cost for same.

#### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) **GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015)

DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference of opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) **GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) **GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) **GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015)**
- Structural Blinds – BMCL to raise an EW regarding this. **Discussed under NHS EW 057 (06/08/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015)**
- INS Fire Strategy documents – It was noted that these drawings had been provided to the NHS for RDD and that BMCL needed these returned asap. BMCL are progressing on basis of the RDD document. (06/08/2015) GA advised that he is meeting with GDonnelly the next day and he would get the drawings marked up and signed off. There was a discussion ongoing re having a different arrangement (Anso?) or to change the area into a vending machine only area. (13/08/2015) **GF advised that he was scheduled to meet with GD the following day and the drawings would be returned asap thereafter (27/08/2015)**

- Access & Maintenance Strategy for A&C – GB advised that this RDD doc needed to be returned as it was very overdue. GF advised that he had spoken to DH the previous week and that he would follow up the discussion (13/08/2015) GF agreed to liaise with DH re review and return of documents (27/08/2015)
- Overcladding works – GF noted that window film may need to be applied to windows at INS to allow patient dignity to be retained during the works. GF to draft a PMI for issue (27/08/2015)
- PMI 423 - CHILDRENS HOSPITAL – MEDICINEMA. GW noted that this had been closed and removed from the tracker however GW had costs associated with this item. PM advised that as they doors had never been commissioned that there were no costs attributable to the NHS (27/08/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1656

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 15/09/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. <b>GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was</p>	

			<p>not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>02/04/2015 GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>23/4/2015 FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>30/04/2015 GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>07/05/2015 GB noted that collation of the Building Warrants is WIP</p> <p>14/05/2015 GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>21/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>13/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>27/08/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p>

26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3<sup>rd</sup>. PM noted that this item would not be able to be sorted in the next couple of weeks.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p>	

			13/08/2015 27/08/2015	<ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p>	
26745	BMCL-EWN-161	HV connection	07/09/2015	<p>We have been trying for the last 2 weeks to arrange for the termination of the temporary HV connections to our old welfare area.</p> <p>The NHS HV appointed person we have been told to liaise with is Paul McAllister who is on night shift and will not be available until next Friday.</p> <p>Without the HV termination Land Engineering will be prevented from completing the SUDS tank below the Children's Park.</p> <p>As per their current programme we needed the isolation by Friday (04-09-15) which was not achieved. Although this will not stop all the works in the area it will prevent the SUDS completion as planned.</p> <p>We require an alternative appointed person who can deal with this as a matter of urgency.</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p>	
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p>	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Strucal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p><b>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</b></p>	
25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	<p>04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p>	<p>The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.</p> <p>DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire &amp; Rescue.</p> <p>FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.</p> <p>FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.</p> <p>FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7<sup>th</sup> August was being targeted for completion of the</p>	

			06/08/2015	works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing. FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.	
			13/08/2015	GA advised that Delta T engineer is back on site on Monday. Declan (Mercury) will speak to rep regarding a date for the return to site to carry out the connections.	
			27/08/2015	GA advised that Delta T are onsite on 31/08 & 01/09 and that will conclude the works to wire the connections. BMCL will ensure that NHS reps witness the final commissioning.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 15/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02/2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015 14/05/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been</p>	

A51679245

			<p>21/05/2015 placed against this item. DH noted that the costs needed to be attributed appropriately. SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>04/06/2015 DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.</p> <p>11/06/2015 GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>25/06/2015 DW noted that minimal works have been commenced.</p> <p>06/08/2015 <b>DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).</b></p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	<p>18/05/2015 Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>21/05/2015 It was agreed that BMCL will liaise with Siemens</p> <p>28/05/2015 FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>04/06/2015 FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>11/06/2015 GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>25/06/2015 PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>23/07/2015 FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>30/07/2015 PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>06/08/2015 GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should</p>	

			13/08/2015 27/08/2015	<p>identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015        25/06/2015 23/07/2015 30/07/2015  06/08/2015 13/08/2015  27/08/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>GW noted this is WIP.</p> <p>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>GW noted that costs had been uploaded for NHS review.</p>	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015       25/06/2015 23/07/2015 30/07/2015	<p>Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include;</p> <ul style="list-style-type: none"> <li>- 2no. 13A Sockets fitted 450mm FFL.</li> <li>- 1no. cold water supply fitted at 300mm FFL</li> <li>- 1no. hot water supply fitted at 300mm FFL</li> <li>- 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections</li> <li>- All connections to kit by others (NHS FM).</li> <li>- Sterilisation of CWS &amp; HWS by BMCE.</li> </ul> <p>DW advised that the cost had been received from Mercury and BMCL have queried the cost</p> <p>GW advised that costs had been uploaded to sypro for NHS review</p> <p>It was noted that this item is on hold for now</p>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	16/06/2015	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free</p>	

			<p>access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for un attended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>25/06/2015 GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p>23/07/2015 GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</p> <p>30/07/2015 GW advised that the costs would be uploaded asap</p> <p>06/08/2015 GB advised that TDSL have responded with their cost. LJ has chased up Mercury for their cost</p> <p>13/08/2015 <b>GW advised that he will check that BMCL Have received all the cost info. GB suggested that costs had been received from TDSL and Mercury.</b></p> <p>27/08/2015</p>	
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	<p>19/06/2015 Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>25/06/2015 FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.</p> <p>23/07/2015 FS advised that the operatives are back on site on 27<sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015</p> <p>30/07/2015 PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded</p> <p>06/08/2015 PM noted that it was understood that the works are now complete. BMCL to provide cost for data socket/outlet works.</p> <p>13/08/2015 GA advised that he had spoken to DG who would liaise with Richard asap – there had been difficulty contacting Richard. Allaway are also considering installing soft close closers.</p>	

			27/08/2015	GW advised that the costs had been uploaded for NHS review. GA advised that the soft closers and latches remedial works had been completed earlier that day.	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>• 10-12 air changes hour</i></li> <li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li> <li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
			23/07/2015	PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27 <sup>th</sup> May 2010 was a significant date.	
			30/07/2015	DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will	

			06/08/2015	be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted. PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1 <sup>st</sup> element being due to the NHS and the 2 <sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.	
			13/08/2015	PM noted that there had been a few additions to this item (PMI 429 & PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.	
			27/08/2015	PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.  Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.  Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.  Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a>	
			23/07/2015	Notify Board team once sample prepared for review. FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.	
			30/07/2015	PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal.	
			06/08/2015	It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.	
			13/08/2015	GA advised that the installation is due to commence the following week.	
			27/08/2015	GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been	

				complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p>	
			30/07/2015	Refer attached sketch.	
			06/08/2015	GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.	
			13/08/2015	Consideration being given to options for infill panels. Positioning of bike stands under consideration.	
			27/08/2015	GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.	
				PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	20/07/2015	The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.	
			30/07/2015	DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.	
			13/08/2015	GA advised that the contractor is due on site w/c 10/08/2015	
			27/08/2015	DW advised that the operative was meant to be currently onsite. The part had been provided to IDM as free issue for them to fit. PM agreed to provide a CE. GW noted that the costs had been uploaded.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p>	

			<p>23/07/2015 30/07/2015 06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping sone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCaldenwood.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	<p>27/07/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p> <p>GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.</p> <p>GW advised that he will get costs asap. GA advised that he would request that TDSL progress the works asap.</p>	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	<p>27/07/2015</p> <p>30/07/2015</p> <p>06/08/2015 13/08/2015 27/08/2015</p>	<p>Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.</p> <p>Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location.</p> <p>DW noted that there is a lot of design work involved in this PMI and DW would provide info re programme impacts the following day.</p> <p>PM advised that information had been added to the 'notes' section on Sypro.</p> <p>GW advised that this was currently being priced and PH was chasing this up.</p> <p>GW advised that the costs had been uploaded and noted that the cost of the actual gauges was expensive.</p>	Cross ref CE 142
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light</p>	

			27/08/2015	coloured net with mesh size between 75 and 100mm. Refer attached sketch. GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.	
4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015 27/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system. PM advised that he would provide a CE once the costs are known	
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015 27/08/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150 Costs uploaded, cross ref BMCL EWN 0150	
4366	PMI 435 -	Escape Door Set - Core E - level 2 - Swipe Card	13/08/2015 27/08/2015	This escape door set has been fitted with maglocks but no swipe card operation panel. The Board request a cost to complete the installation with swipe card reader on stairwell side of door and maglock disengage on energisation of full fire alarm. (See attached drawing for specific location) GB advised that he would check the door drawings	
4455	PMI 436	ADULT HOSPITAL LEVEL 4 WARD B HAEMATO ONCOLOGY - AIR PERMEABILITY TEST	28/08/2015	Proceed and undertake air permeability tests to 24 rooms and en suites in this ward and provide formal report prior to final handover to Board. Please provide cost for same.	
4467	PMI 437 -	Mop wash floor - painting	03/09/2015	The Board request a price for the painting of the Mop Wash floor as a result of works carried out und PMI 433 (Power Supply for Gas Solenoid Valve and request from Infection Control to have a sealed floor.)	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16610	CE 142	ADULT HOSPITAL LEVEL 4 WARD B - HAEMATO ONCOLOGY - DIGITAL GAUGES	28/08/2015	Please proceed and install digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location. All as priced under PMI 430. NOTE PMI 430 REFERS MAGNAHELIC GAUGES CONFIRM THESE HAVE DIGITAL READ OUT AND ALARM BEFORE PROCEEDING.  Agreed cost [REDACTED] incl OH+P but excl VAT.	09/09/2015
16611	CE 143	RHC IMAGING ROOM RCG-055 BONE DENSITOMETRY	28/08/2015	Supply and install additional contactor and interim switching arrangements for Group 5 item of equipment.  Agreed cost [REDACTED] incl. OH+P but excluding VAT.	09/09/2015

16612	CE 144	NCH Cath Lab Suite – Laser flaps to doors	28/08/2015	Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite	Value to be placed in box
				Agreed cost [REDACTED] incl OH+P but excl VAT	

#### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) **GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push.

(04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) **GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) **GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) **GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015)**
- Structural Blinds – BMCL to raise an EW regarding this. **Discussed under NHS EW 057 (06/08/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015)**
- INS Fire Strategy documents – It was noted that these drawings had been provided to the NHS for RDD and that BMCL needed these returned asap. BMCL are progressing on basis of the RDD document. (06/08/2015) GA advised that he is meeting with GDonnelly the next day and he would get the drawings marked up and signed off. There was a discussion ongoing re having a different arrangement (Anso?) or to change the area into a vending machine only area. (13/08/2015) **GF advised that he was scheduled to meet with GD the following day and the drawings would be returned asap thereafter (27/08/2015)**
- Access & Maintenance Strategy for A&C – GB advised that this RDD doc needed to be returned as it was very overdue. GF advised that he had spoken to DH the previous week and that he would follow up the discussion (13/08/2015) **GF agreed to liaise with DH re review and return of documents (27/08/2015)**
- Overcladding works – GF noted that window film may need to be applied to windows at INS to allow patient dignity to be retained during the works. GF to draft a PMI for issue (27/08/2015)

- PMI 423 - CHILDRENS HOSPITAL – MEDICINEMA. GW noted that this had been closed and removed from the tracker however GW had costs associated with this item. PM advised that as they doors had never been commissioned that there were no costs attributable to the NHS (27/08/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1675

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 23/09/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. <b>GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for</p>	

			PMI's after PMI 360.	
		26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
		02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
		23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
		07/05/2015	GB noted that collation of the Building Warrants is WIP	
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
		04/06/2015	FS advised that GB is liaising with Mercury	
		11/06/2015	GB advised that this would be progressed once the works completed in the summer	
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
		05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
		13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
		27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
		17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	

26026	BMCL-EWN-159	Fire Stopping Reinstatement	22/07/2015	Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.
				The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.
			23/07/2015	Board to issue PMI/ CE covering the works. FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)
			30/07/2015	PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.
			05/08/2015	GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.
			13/08/2015	GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.
			27/08/2015	GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3rd. PM noted that this item would not be able to be sorted in the next couple of weeks.
			17/09/2015	PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26th January is not a line in the sand as at 26th January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26th January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3rd for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information

				uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.	
26405	BMCL-EWN-160	Delays to piling at VIE2	10/08/2015  13/08/2015  27/08/2015 17/09/2015	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p> <p>GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.</p>	
26745	BMCL-EWN-161	HV connection	07/09/2015       17/09/2015	<p>We have been trying for the last 2 weeks to arrange for the termination of the temporary HV connections to our old welfare area.</p> <p>The NHS HV appointed person we have been told to liaise with is Paul McAllister who is on night shift and will not be available until next Friday.</p> <p>Without the HV termination Land Engineering will be prevented from completing the SUDS tank below the Children's Park.</p> <p>As per their current programme we needed the isolation by Friday (04-09-15) which was not achieved. Although this will not stop all the works in the area it will prevent the SUDS completion as planned.</p> <p>We require an alternative appointed person who can deal with this as a matter of urgency.</p> <p>GA noted that there had been a meeting to discuss held the previous day and the isolations and disconnections had now been scheduled to take place on 30<sup>th</sup> September 2015. There is potentially time delay costs.</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  17/09/2015	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA noted that soft ground conditions had delayed the works i.e. it had taken over 1 week to do 4 piles and there had also been a failed test which meant that the test crew had to remobilised. The retest had confirmed that there was no issue with the pile and the test equipment had been faulty. GA noted that the programme had been rescheduled and re-issued.</p>	

26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme.
