			<p>NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>07/11/2013 DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>14/11/2013 DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>21/11/2013 DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>28/11/2013 DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>12/12/2013 DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>19/12/2013 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>09/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>16/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>23/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>30/01/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>06/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>13/02/2014 DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>20/02/2014 DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p>

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014 06/02/2014 13/02/2014 20/02/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B	
-------	--------------	--	--	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 26/02/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable</p>	

A51679245

			19/12/2013 09/01/2014 16/01/2014 23/01/2014	<p>and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>Meeting to be scheduled to review some aspects of the work</p> <p>Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p><b>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014   16/01/2014  23/01/2014   30/01/2014  13/02/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p><b>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</b></p> <p><b>DP expected to be able to provide a response to the NHS in the next 7-10 days.</b></p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 26/02/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.	
			12/12/2013	DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.	
			19/12/2013	DS confirmed that response still awaited from Building Control	
			09/01/2014	DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.	
			23/01/2014	DS was scheduled to meet with Raymond Barlow.	
			30/01/2014	DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
			13/02/2014	DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.	
			20/02/2014	DS advised that he had written to RBarlow on the 13 <sup>th</sup> and 20 <sup>th</sup> Feb specifically on this item and was awaiting a response.	

2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013  17/10/2013  24/10/2013  31/10/2013 07/11/2013 23/01/2013  28/01/2013  30/01/2014 13/02/2014 20/02/2014	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed. DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top. Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish. Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss. GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH. <b>Instruction will be amended as requested by BMCL. GW to advise the cost.</b>	07/11/2013
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	12/02/2014  13/02/2014 20/2/2014	Amendment to existing PMI raised 13/11/2013: The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE – 092 GW advised that BMCL would review the implications of the amendment. <b>BMCL are pulling together the cost. DH noted that the costs should reflect the saving process previously followed. GW noted that BMCL needed to understand what had been finished in the room.</b>	

2317	PMI 254 A51679245	Alterations to Arrival	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with	
------	----------------------	------------------------	------------	---	--

		Square		<p>SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p>	
			07/11/2013	Noted that BMCL will review the PMI and provide feedback.	
			14/11/2013	PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.	
			21/11/2013	WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.	
			28/11/2013	DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
			12/12/2013	DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.	
			19/12/2013	DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.	
			09/01/2014	Meeting arranged for 27 <sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held	

			16/01/2014	DH noted that an earlier meeting was not possible therefore the 27 <sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.	
			23/01/2014	DH noted that there were meetings scheduled for 27 <sup>th</sup> Jan and 5 <sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.	
			30/01/2014	DH noted this is wip and there is a meeting with SPT on the 5 <sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.	
			06/02/2014	PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.	
			13/02/2014	PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GCC and the road designers in order to get a consensus view. PM advised he would issue a PMI to confirm the way forward i.e. take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan. It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC had taken place regarding the 3 sets of traffic lights and feedback was awaited. GW and DR to agree costs.	
			20/02/2014	DH noted that a meeting had been scheduled with Alan Anderson at GCC. PM advised that the NHS Reps are meeting with the design reps from LES. DS noted that BMCL are in the process of finalising the order for the 3 sets of traffic lights and were not in a position to order lights for the full requirements. GW noted that he had received a quote from GCC but he was not sure this adequately covered the requirements. DH advised that BMCL should omit only those sets of traffic controls which segregated bus types and that those separating buses from general traffic should remain.. GW noted that GCC appeared to have obtained drawings and have priced for the lights as per the mark-up previously issued by DH. BMCL were scheduled to meet with GCC on 24/02/2014 and requested NHS attendance at this meeting. GW enquired who would contract with Scottish Power as he did not think it was for BMCL to contract with Scottish Power. DH suggested that	

				<p>GCC would liaise direct with Scottish Power for the lights outside the site however the internal lights will be part of the internal lights &amp; infrastructure contract. GW noted that he was trying to get GCC into a position where they confirm what needs to be done as he did not want any liability to be on BMCL for continued power. DS suggested that GCC would satisfy themselves as to where the power comes from and the lights being metered. DH advised that he would liaise with GThomson who has the most recent experience of dealing with traffic light matters at other projects.. DS enquired when the NHS would be meeting with LES and DH advised that the meeting was currently being scheduled for either 25/02, 4/03 or 05/03. DS enquired if BMCL should proceed as is. DH enquired if the information was required before the 6<sup>th</sup> March 2014 and DS advised that BMCL want to order up the lights asap. GW suggested that BMCL could deal with the 3 sets of lights in the first instance and then the transport hub separately. AK enquired about the lead time required and GW advised that Siemens had been instructed to get geared up for the Commonwealth Games work so they will have no-one available to do the lights works in the run-up to the games. DH and PM agreed to discuss and confirm if BMCL should proceed as is.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p> <p>DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.</p> <p>DR advised that he had provided comment back to GW – DR and GW to discuss.</p>	

		Level 6 upwards	06/02/2014 13/02/2014 20/02/2014	1165mm from the bedhead wall, providing consistency of location across the rooms on these levels. DP noted that there had been a major exercise done re sprinkler locations. DH advised that he had discussed the matter with GB – only moving the tracks 100mm and only 3 brackets installed so far and nothing else installed. DS advised that BMCL have reviewed and issued to the designers and Arjo to check that there are no issues. DS advised that Arjo had completed their co-ordination survey which will be provided to Mercury and then Mercury will provide so provide information to NHS for sign-off.	
2427	PMI 268 -	Bus Timetable Information Screens	06/02/2014 13/02/2014 20/02/2014	The Board request a cost for the provision of power and data to 3no. bus timetable information screens. one twin (OUT010) 13A socket and one twin data (OUT131) to be provided at each location as shown on the attached mark-ups. Allowance to be included, where necessary, for pattressing to support large 54"/70" monitors as noted. GW noted that BMCL had requested a cost for the works and there was concern re location for the adult screens (i.e. no wall) DH advised that it was the intention to fit the TVs to the edge of the slab with brackets and the fitting of the TVs was a Board issue. DP suggested that there had been concern that it is a plasterboard ceiling in that area which may already be up. DP noted that he was comfortable that the cables could be run to the point indicated on the drawings. The NHS will need to consider how they will fit the brackets to the face of the mezzanine level as there is no soffit.	
2428	PMI 269	EMC-129 - Additional Power & Data	06/02/2014 13/02/2014 20/02/2014	The Board request the provision of additional power & data (DATA1000) to the second desk position in room EMC-129 (office) within Adult Emergency Dept. The provision will include an additional length of TRU1000 in order to provide the outlets at the correct location. Costs to be agreed in advance of the works and allocated to the Group 1 Equipment List. GW noted that BMCL had requested a cost for the works noting that this was a finished room. GW to provide cost	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER & DATA	07/02/2014 13/02/2014 20/02/2014	Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for the works PM advised that he would provide the CE once it had been through the ASSB approval process – circa 20/03/2014	
2432	PMI 271	ADULT HOSPITAL LEVEL 2 ENTRANCE DOOR TO THEATRE SUITE	07/02/2014 13/02/2014	At entrance door from atrium walkway to theatre suite (to corridor THE-005) reposition cable to existing OUT-131 outlet in Room THE-004 to adjacent to entrance door on atrium side, connect to OUT121 outlet plate. Refer attached sketch, outlet to be set at standard height for wall phone. Point to be picked up on Group 1 equipment list. GW noted that BMCL had requested a cost for the works	

2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014 13/02/2014 20/02/2014	<p>Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap.</p> <p>DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info.</p>	
2449	PMI 273	Neurosciences Building	21/02/2014	<p>The Board have undertaken an initial feasibility study into a potential extension to the main entrance of the Neurosciences building. The initial scheme incorporates sections of the new link bridge constructed. A copy of the initial feasibility plans attached to this PMI.</p> <p>BMCE are instructed to submit a price activity schedule to undertake the development of the Board requirements to RIBA Plan of Work 2013 Stage 2 – “Prepare <b>Concept Design</b>, including outline proposals for structural design, building services systems, outline specifications and preliminary <b>Cost Information</b> along with relevant <b>Project Strategies</b> in accordance with <b>Design Programme</b>. Agree alterations to brief and issue <b>Final Project Brief</b>.”</p> <p>The key deliverables will be:-</p> <ol style="list-style-type: none"> <li>1. Agreed client brief</li> <li>2. Floor plans drawings (1:200 scale)</li> <li>3. Elevation drawings (1:200 scale)</li> <li>4. 3D visuals of interior and exterior images</li> <li>5. Outline structural drawings (foundations / frame)</li> <li>6. Outline building services schematics</li> <li>7. Design &amp; construction programme</li> <li>8. Input to cost plan for proposed work (prepared by Currie &amp; Brown)</li> <li>9. Priced Activity Schedule to develop project to RIBA Plan of Work 2013 Stage 4 (agree Compensation Event target Price Adjustment).</li> </ol> <p>The works to RIBA Plan of Work 2013 Stage 2 should be completed within one month of approval to proceed.</p> <p>The scheme has to be developed within a £2,000,000 excluding VAT design and construction budget.</p>	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014) .
- Specialist Fit out areas – item to remain on tracker until equipment delivered (31<sup>st</sup> March 2014). Discussions ongoing with BMCL re storage of equipment. (20/02/2014)
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014)
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014) It was noted that there was a meeting scheduled to take place on the 20<sup>th</sup> Feb to discuss and sign-off the size of the tanks and that BMCL wanted to progress the shed and cladding works and get the pipes across the road. PM advised that there was concern that there is no drain point(s) and water inevitably gets into ducts. AK advised that he would review this. AK noted that where the duct comes across the ambulance bay the duct covers will be concrete. PM noted that he was comfortable with the principles being adopted. (13/02/2014) DH noted that the duct matter had been sorted and

the tank sizing meeting in order to place the order was later that day. AK advised in relation to water getting into the duct that he was considering running any water to the SUDS. (20/2/14)

- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014) GW noted that GW and DH had jointly discussed the equipment list and agreed the list and cost. DH and FW to confirm that they have nothing else to be included. (13/02/2014) GW advised that a further review had been undertaken by BMCL and the equipment list should be issued to the NHS by cop 21/02/2014. (20/02/2014)
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014)
- Hoists/Slings/Charging points – DH and BMCL to discuss (30/01/2014) – DH and GW having ongoing discussions. Feedback from meeting with Cameron Raeburn awaited (13/02/2014). DH advised that Cameron Raeburn had been unable to attend site as arranged and an alternative visit would be arranged. (20/02/2014)
- AK noted that BAM are connecting into the BMCL fire main and will need to make a drain connection. The road traffic management will need to start to be co-ordinated and it was anticipated that this would be through the interface meetings. (13/02/2014) AK advised that he had raised this matter at the Interface meeting. BMCL needed to get more info from BAM i.e. need to know when BAM propose to commission the fire main and make surface drain connection. PM to discuss with PF (20/02/2014)
- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. The Board have concern that the outlets are prone to being broken. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14)
- Finishes – PM noted that in the offices the trunking is nicely sealed to the wall however in the theatres there is gaps between the grilles and wall and ducting not sealed. DP noted that the light fittings and grilles had not been sealed as yet but would be sealed in due course. PM acknowledged that he hadn't seen the schedule of exceptions. (13/02/2014) AK advised that he would check if there had been a reason that the mastic work had not been carried out (20/02/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 05/03/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			<p>08/01/14</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>26/02/2014</p>	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p> <p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p> <p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p> <p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p> <p>It was noted that there was no drawings currently overdue</p> <p>It was noted that there was no drawings currently overdue</p> <p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p> <p>Timber cladding will be returned by Hugh McDermott at the end of the week</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the</p>	

			<p>actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>07/11/2013 DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>14/11/2013 DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>21/11/2013 DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>28/11/2013 DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>12/12/2013 DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>19/12/2013 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>09/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>16/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>23/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>30/01/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>06/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>13/02/2014 DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>20/02/2014 DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p>

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B <b>DR has to make recommendations on information provided from BMCL</b>	
-------	--------------	--	--	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 26/02/2014

					
SypriD	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013  19/09/2013  26/09/2013  03/10/2013  10/10/2013 17/10/2013  24/10/2012  07/11/2013  21/11/2013  12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be</p>	

			<p>19/12/2013 09/01/2014 16/01/2014 23/01/2014</p> <p>27/02/2014</p>	<p>considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>Meeting to be scheduled to review some aspects of the work</p> <p>Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p> <p>27/02/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 26/02/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.	
			12/12/2013	DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.	
			19/12/2013	DS confirmed that response still awaited from Building Control	
			09/01/2014	DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.	
			23/01/2014	DS was scheduled to meet with Raymond Barlow.	
			30/01/2014	DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
			13/02/2014	DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.	
			20/02/2014	DS advised that he had written to RBarlow on the 13 <sup>th</sup> and 20 <sup>th</sup> Feb specifically on this item and was awaiting a response.	
			27/02/2014	response is anticipated imminently.	

2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.	07/11/2013
			17/10/2013	PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works.	
			24/10/2013	Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity	
			31/10/2013	DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill.	
			07/11/2013	It was agreed this item was now closed.	
			23/01/2013	DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.	
			28/01/2013	Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.	
			30/01/2014	Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.	
			13/02/2014	GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH.	
			20/02/2014	Instruction will be amended as requested by BMCL. GW to advise the cost.	
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	27/02/2014	<b>Costs awaited</b>	
			12/02/2014	Amendment to existing PMI raised 13/11/2013: The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE - 092	
			13/02/2014	GW advised that BMCL would review the implications of the amendment.	
			20/2/2014	BMCL are pulling together the cost. DH noted that the costs should reflect the saving process previously followed. GW noted that BMCL needed to understand what had been finished in the room.	
			27/02/2014	<b>Costs awaited</b>	

2317	PMI 254	Alterations to Arrival Square	06/11/2013	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p>	
			07/11/2013	Please provide comments on the revised proposals and updated costs to amend the external works as shown.	
			14/11/2013	Noted that BMCL will review the PMI and provide feedback.	
				PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.	
			21/11/2013	WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.	
			28/11/2013	DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
			12/12/2013	DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.	
			19/12/2013	DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising	

			09/01/2014	with Jim Fleming. Meeting arranged for 27 <sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held
			16/01/2014	DH noted that an earlier meeting was not possible therefore the 27 <sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.
			23/01/2014	DH noted that there were meetings scheduled for 27 <sup>th</sup> Jan and 5 <sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded.DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.
			30/01/2014	DH noted this is wip and there is a meeting with SPT on the 5 <sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.
			06/02/2014	PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.
			13/02/2014	PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GGC and the road designers in order to get a consensus view . PM advised he would issue a PMI to confirm the way forward i.e.take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan.
			20/02/2014	It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC had taken place regarding the 3 sets of traffic lights and feedback was awaited. GW and DR to agree costs. DH noted that a meeting had been scheduled with Alan Anderson at GCC. PM advised that the NHS Reps are meeting with the design reps from LES. DS noted that BMCL are in the process of finalising the order for the 3 sets of traffic lights and were not in a position to order lights for the full requirements. GW noted that he had received a quote from GCC but he was not sure this adequately covered the requirements. DH advised that BMCL should omit only those sets of traffic controls which segregated bus types and that those separating buses from general traffic should remain.. GW noted that GCC appeared to have obtained drawings and have priced for the lights as

			27/02/2014	<p>per the mark-up previously issued by DH. BMCL were scheduled to meet with GCC on 24/02/2014 and requested NHS attendance at this meeting. GW enquired who would contract with Scottish Power as he did not think it was for BMCL to contract with Scottish Power. DH suggested that GCC would liaise direct with Scottish Power for the lights outside the site however the internal lights will be part of the internal lights &amp; infrastructure contract. GW noted that he was trying to get GCC into a position where they confirm what needs to be done as he did not want any liability to be on BMCL for continued power. DS suggested that GCC would satisfy themselves as to where the power comes from and the lights being metered. DH advised that he would liaise with GThomson who has the most recent experience of dealing with traffic light matters at other projects.. DS enquired when the NHS would be meeting with LES and DH advised that the meeting was currently being scheduled for either 25/02, 4/03 or 05/03. DS enquired if BMCL should proceed as is. DH enquired if the information was required before the 6<sup>th</sup> March 2014 and DS advised that BMCL want to order up the lights asap. GW suggested that BMCL could deal with the 3 sets of lights in the first instance and then the transport hub separately. AK enquired about the lead time required and GW advised that Siemens had been instructed to get geared up for the Commonwealth Games work so they will have no-one available to do the lights works in the run-up to the games. DH and PM agreed to discuss and confirm if BMCL should proceed as is.</p> <p>Meetings, technical and operational, to discuss arrival square scheduled to take place on 4<sup>th</sup> and 6<sup>th</sup> March respectively with SPT and GCC. WSP drawings will be used to discuss the best way forward. Drawings are not yet in the system and DS agreed to progress this and forward a CAD copy of the drawing to DH</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS</p>	

			<p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p>	<p>point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p> <p>DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.</p> <p>DR advised that he had provided comment back to GW – DR and GW to discuss.</p> <p>PM advised that the Board did not wish the works to be taken forward at this time. DH noted that BMCL are to review the proposed route and associated costs. DH and GW will work on a simplified route to minimize costs. AK raised concern regarding the purchase of the pipes and PM advised that it was ok for BMCL to purchase the pipes as the works would need to be carried out at some point. AK and GW to discuss the works and programme.</p> <p>AK noted that there was difficulty in putting both the O<sub>2</sub> and the MTHW pipes in the same trench. GW provided a hard copy of the costs to DH for review by DR.</p> <p>Costs have been submitted and DR to conclude evaluation of costs. DH agreed to update later today</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	<p>29/01/2014</p> <p>20/02/2014</p> <p>27/02/2014</p>	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p> <p>NSGH Critical Care - 1 indicator panel.</p> <p>NCH Workshop - 2 mimic panels.</p> <p>NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.</p> <p>NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p> <p>DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>DP agreed to pursue with Mercury</p>	
2424	PMI 266	Clock (CLO003) Connection	<p>05/02/2014</p> <p>06/02/2014</p>	<p>The Board wish to confirm that there is no requirement to connect the clocks (CLO003) in NCH Anaesthetic rooms to the Theatre Suite central clock system.</p> <p>CLO003 is a group 2 item and will be provided by the Board</p> <p>The panels should be indicated on the 400 series drawings/ as built drawings as CLO001. DS agreed to check this with Nightingale before being closed off.</p>	

			13/02/2014 20/02/2014 27/02/2014	DS requested that this item remains on the tracker until feedback from Nightingale had been obtained noting that the RDS would need to be amended. DS noted that in general terms the RDS was being updated to the as-builts. In terms of the clocks it was thought that this would be part of the process however confirmation from Nightingale awaited. <b>Information captured in "As BUILTs" – item can now be closed</b>	
2425	PMI 267	Hoist tracks - Wards - Level 6 upwards	05/02/2014 06/02/2014 13/02/2014 20/02/2014 27/02/2014	The Board confirm that hoist tracks in wards from level 6 upwards should be set a minimum of 1165mm from the bedhead wall, providing consistency of location across the rooms on these levels. DP noted that there had been a major exercise done re sprinkler locations. DH advised that he had discussed the matter with GB – only moving the tracks 100mm and only 3 brackets installed so far and nothing else installed. DS advised that BMCL have reviewed and issued to the designers and Arjo to check that there are no issues. DS advised that Arjo had completed their co-ordination survey which will be provided to Mercury and then Mercury will provide so provide information to NHS for sign-off. <b>DH reported that 1 room has been noted as not fitted as per setting out on the drawing – DH asked GB to check – level 4 Zone H. Users would like opportunity to review a completed installed hoist in situ. DH will formally request</b>	
2427	PMI 268 -	Bus Timetable Information Screens	06/02/2014 13/02/2014 20/02/2014 27/02/2014	The Board request a cost for the provision of power and data to 3no. bus timetable information screens. one twin (OUT010) 13A socket and one twin data (OUT131) to be provided at each location as shown on the attached mark-ups. Allowance to be included, where necessary, for pattressing to support large 54"/70" monitors as noted. GW noted that BMCL had requested a cost for the works and there was concern re location for the adult screens (i.e. no wall) DH advised that it was the intention to fit the TVs to the edge of the slab with brackets and the fitting of the TVs was a Board issue. DP suggested that there had been concern that it is a plasterboard ceiling in that area which may already be up. DP noted that he was comfortable that the cables could be run to the point indicated on the drawings. The NHS will need to consider how they will fit the brackets to the face of the mezzanine level as there is no soffit. <b>The screens and brackets will come under Group 3 – cost for data and power is awaited</b>	
2428	PMI 269	EMC-129 - Additional Power & Data	06/02/2014 13/02/2014 20/02/2014	The Board request the provision of additional power & data (DATA1000) to the second desk position in room EMC-129 (office) within Adult Emergency Dept. The provision will include an additional length of TRU1000 in order to provide the outlets at the correct location. Costs to be agreed in advance of the works and allocated to the Group 1 Equipment List. GW noted that BMCL had requested a cost for the works noting that this was a finished room. GW to provide cost	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER &	07/02/2014 13/02/2014	Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for the works	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014).  
 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). **PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that seperation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required.**
- Specialist Fit out areas – item to remain on tracker until equipment delivered (31<sup>st</sup> March 2014). Discussions ongoing with BMCL re storage of equipment. (20/02/2014). **27/02/2014 – additional meeting now required with clinicians and this will take time to organize and therefore delay information return to BMCL. It was hoped for a meeting next week but not confirmed**
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from

Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate

- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014) It was noted that there was a meeting scheduled to take place on the 20<sup>th</sup> Feb to discuss and sign-off the size of the tanks and that BMCL wanted to progress the shed and cladding works and get the pipes across the road. PM advised that there was concern that there is no drain point(s) and water inevitably gets into ducts. AK advised that he would review this. AK noted that where the duct comes across the ambulance bay the duct covers will be concrete. PM noted that he was comfortable with the principles being adopted. (13/02/2014) DH noted that the duct matter had been sorted and the tank sizing meeting in order to place the order was later that day. AK advised in relation to water getting into the duct that he was considering running any water to the SUDS. (20/2/14). 27/02/2014 – DH confirmed that Air Products have appropriate tanks readily available. A query was raised regarding certification for lifting and DP confirmed that standard certification is sufficient. DH to advise Ian Powrie in order that quote can be obtained from Air Products and order placed asap. Duct drawing has been reviewed and all are satisfied. Programme in preparation for road crossing works.
- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014) GW noted that GW and DH had jointly discussed the equipment list and agreed the list and cost. DH and FW to confirm that they have nothing else to be included. (13/02/2014) GW advised that a further review had been undertaken by BMCL and the equipment list should be issued to the NHS by cop 21/02/2014. (20/02/2014). GW to finalise list and forward asap.
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker.
- AK noted that BAM are connecting into the BMCL fire main and will need to make a drain connection. The road traffic management will need to start to be co-ordinated and it was anticipated that this would be through the interface meetings. (13/02/2014) AK advised that he had raised this matter at the Interface meeting. BMCL needed to get more info from BAM i.e. need to know when BAM propose to commission the fire main and make surface drain connection. PM to discuss with PF (20/02/2014)
- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn’t been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements

checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMLC and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off.

- Finishes – PM noted that in the offices the trunking is nicely sealed to the wall however in the theatres there is gaps between the grilles and wall and ducting not sealed. DP noted that the light fittings and grilles had not been sealed as yet but would be sealed in due course. PM acknowledged that he hadn't seen the schedule of exceptions (13/02/2014) AK advised that he would check if there had been a reason that the mastic work had not been carried out (20/02/2014). 27/02/2014 On-going works – checking during inspections and remove as necessary
- 27/02/2014 Dignified spaces – no removal of equipment from group 3 to 1 and will be resolved by PM

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 12/03/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			<p>08/01/14</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>26/02/2014</p> <p>06/03/2014</p>	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p> <p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p> <p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p> <p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p> <p>It was noted that there was no drawings currently overdue</p> <p>It was noted that there was no drawings currently overdue</p> <p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p> <p>Timber cladding will be returned by Hugh McDerment at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3</p> <p>3.15 Node ICT server room cooling</p> <p>3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p>	

		31/10/2013	DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m <sup>2</sup> . BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.
		07/11/2013	DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.
		14/11/2013	DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.
		21/11/2013	DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.
		28/11/2013	DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.
		12/12/2013	DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2 <sup>nd</sup> PDU which would need to be supplied by Capita.
		19/12/2013	DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.
		09/01/2014	Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie
		16/01/2014	DP advised that the hub room cooling proposal would be provided to the DH & FC later that day.
		23/01/2014	DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.
		30/01/2014	DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.
		06/02/2014	DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014
		13/02/2014	DP noted that the heat loads had changed and BMCL & WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.
		20/02/2014	DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014
		06/03/2014	Information is now with Wallace Whittle for final review

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL <b>DR now has costs from BMCL to review and will revert back to BMCL</b>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 12/03/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013  19/09/2013  26/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this. WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.	

A51679245

			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.	
			10/10/2013	WIP by BMCL	
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.	
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.	
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.	
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.	
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.	
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.	
			09/01/2014	Meeting to be scheduled to review some aspects of the work	
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.	
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.	
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting	
			06/03/2014	AK noted that programme review was nearing completion	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are	

			16/01/2014	indeed hollow pipes as described and therefore corrective action is required.	
			23/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			30/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			13/02/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
			27/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.	
			06/03/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days. Report anticipated shortly DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 12/03/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response	

A51679245

			<p>12/12/2013 requested asap.</p> <p>19/12/2013 DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>09/01/2014 DS confirmed that response still awaited from Building Control</p> <p>23/01/2014 DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p>30/01/2014 DS was scheduled to meet with Raymond Barlow.</p> <p>13/02/2014 DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</p> <p>20/02/2014 DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.</p> <p>27/02/2014 DS advised that he had written to RBarlow on the 13<sup>th</sup> and 20<sup>th</sup> Feb specifically on this item and was awaiting a response.</p> <p>06/03/2014 response is anticipated imminently.</p> <p>DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.</p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>11/10/2013 Confirmation of requirements for floor screeds to 3 rooms.</p> <p>17/10/2013 Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p> <p>24/10/2013 PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works.</p> <p>31/10/2013 Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>07/11/2013 DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill.</p> <p>23/01/2013 It was agreed this item was now closed.</p> <p>28/01/2013 DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and</p>	07/11/2013

			<p>30/01/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p>	<p>by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.</p> <p>Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.</p> <p>GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH.</p> <p>Instruction will be amended as requested by BMCL. GW to advise the cost.</p> <p>Costs awaited</p> <p>GW agreed to process today</p>	
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	<p>12/02/2014</p> <p>13/02/2014</p> <p>20/2/2014</p> <p>27/02/2014</p> <p>06/03/2014</p>	<p>Amendment to existing PMI raised 13/11/2013:</p> <p>The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE - 092</p> <p>GW advised that BMCL would review the implications of the amendment.</p> <p>BMCL are pulling together the cost. DH noted that the costs should reflect the saving process previously followed. GW noted that BMCL needed to understand what had been finished in the room.</p> <p>Costs awaited</p> <p>GW agreed to progress today</p>	
2317	PMI 254	Alterations to Arrival Square	<p>06/11/2013</p> <p>07/11/2013</p> <p>14/11/2013</p>	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there</p>	

			<p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p> <p>DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p> <p>DH noted this is wip and there is a meeting with SPT on the 5<sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.</p> <p>PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.</p> <p>PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GGC and the road designers in order to get a consensus view. PM advised he would issue a PMI to confirm the way forward i.e. take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC</p> <p>PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus</p>	
--	--	--	---	--	--

			<p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p>	<p>info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan.</p> <p>It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC had taken place regarding the 3 sets of traffic lights and feedback was awaited. GW and DR to agree costs.</p> <p>DH noted that a meeting had been scheduled with Alan Anderson at GCC. PM advised that the NHS Reps are meeting with the design reps from LES. DS noted that BMCL are in the process of finalising the order for the 3 sets of traffic lights and were not in a position to order lights for the full requirements. GW noted that he had received a quote from GCC but he was not sure this adequately covered the requirements. DH advised that BMCL should omit only those sets of traffic controls which segregated bus types and that those separating buses from general traffic should remain.. GW noted that GCC appeared to have obtained drawings and have priced for the lights as per the mark-up previously issued by DH. BMCL were scheduled to meet with GCC on 24/02/2014 and requested NHS attendance at this meeting. GW enquired who would contract with Scottish Power as he did not think it was for BMCL to contract with Scottish Power. DH suggested that GCC would liaise direct with Scottish Power for the lights outside the site however the internal lights will be part of the internal lights &amp; infrastructure contract. GW noted that he was trying to get GCC into a position where they confirm what needs to be done as he did not want any liability to be on BMCL for continued power. DS suggested that GCC would satisfy themselves as to where the power comes from and the lights being metered. DH advised that he would liaise with GThomson who has the most recent experience of dealing with traffic light matters at other projects.. DS enquired when the NHS would be meeting with LES and DH advised that the meeting was currently being scheduled for either 25/02, 4/03 or 05/03. DS enquired if BMCL should proceed as is. DH enquired if the information was required before the 6<sup>th</sup> March 2014 and DS advised that BMCL want to order up the lights asap. GW suggested that BMCL could deal with the 3 sets of lights in the first instance and then the transport hub separately. AK enquired about the lead time required and GW advised that Siemens had been instructed to get geared up for the Commonwealth Games work so they will have no-one available to do the lights works in the run-up to the games. DH and PM agreed to discuss and confirm if BMCL should proceed as is.</p> <p>Meetings, technical and operational, to discuss arrival square scheduled to take place on 4<sup>th</sup> and 6<sup>th</sup> March respectively with SPT and GCC. WSP drawings will be used to discuss the best way forward. Drawings are not yet in the system and DS agreed to progress this and forward a CAD copy of the drawing to DH</p> <p>Further drawings issued with final proposal in place. Turning circles etc to be checked and confirmed by WSP. DS confirmed that WSP now have the drawing but noted that a further safety audit will be required. DH asked that the works to be confirmed in principal to progress and conclude with GCC. DS agreed to speak to D Campbell and confirm details before the end of the week</p>	
2330	PMI 257	MTHW System – Site Ring	20/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the</p>	

			<p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>069/03/2014</p>	<p>current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p> <p>DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.</p> <p>DR advised that he had provided comment back to GW – DR and GW to discuss.</p> <p>PM advised that the Board did not wish the works to be taken forward at this time. DH noted that BMCL are to review the proposed route and associated costs. DH and GW will work on a simplified route to minimize costs. AK raised concern regarding the purchase of the pipes and PM advised that it was ok for BMCL to purchase the pipes as the works would need to be carried out at some point. AK and GW to discuss the works and programme.</p> <p>AK noted that there was difficulty in putting both the O<sub>2</sub> and the MTHW pipes in the same trench.</p> <p>GW provided a hard copy of the costs to DH for review by DR.</p> <p>Costs have been submitted and DR to conclude evaluation of costs. DH agreed to update later today</p> <p>DH reported that costs were now agreed. It was agreed that no further PMI will be required but an amendment to the current</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p>	

			20/02/2014  27/02/2014 06/03/2014	<p>NSGH Critical Care - 1 indicator panel. NCH Workshop - 2 mimic panels. NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011. NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms. DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels. DP agreed to pursue with Mercury</p> <p><b>No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</b></p>	
2427	PMI 268 -	Bus Timetable Information Screens	06/02/2014  13/02/2014 20/02/2014  27/02/2014 06/03/2014	<p>The Board request a cost for the provision of power and data to 3no. bus timetable information screens. one twin (OUT010) 13A socket and one twin data (OUT131) to be provided at each location as shown on the attached mark-ups. Allowance to be included, where necessary, for pattressing to support large 54"/70" monitors as noted.</p> <p>GW noted that BMCL had requested a cost for the works and there was concern re location for the adult screens (i.e. no wall) DH advised that it was the intention to fit the TVs to the edge of the slab with brackets and the fitting of the TVs was a Board issue. DP suggested that there had been concern that it is a plasterboard ceiling in that area which may already be up. DP noted that he was comfortable that the cables could be run to the point indicated on the drawings. The NHS will need to consider how they will fit the brackets to the face of the mezzanine level as there is no soffit. The screens and brackets will come under Group 3 – cost for data and power is awaited</p> <p><b>Cost have been received and now under review and discussion</b></p>	
2428	PMI 269	EMC-129 - Additional Power & Data	06/02/2014  13/02/2014 20/02/2014	<p>The Board request the provision of additional power &amp; data (DATA1000) to the second desk position in room EMC-129 (office) within Adult Emergency Dept. The provision will include an additional length of TRU1000 in order to provide the outlets at the correct location. Costs to be agreed in advance of the works and allocated to the Group 1 Equipment List. GW noted that BMCL had requested a cost for the works noting that this was a finished room. GW to provide cost</p>	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1	07/02/2014 13/02/2014	<p>Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for</p>	

		ADDITIONAL POWER & DATA	20/02/2014	the works PM advised that he would provide the CE once it had been through the ASSB approval process – circa 20/03/2014	
2432	PMI 271	ADULT HOSPITAL LEVEL 2 ENTRANCE DOOR TO THEATRE SUITE	07/02/2014  13/02/2014	At entrance door from atrium walkway to theatre suite (to corridor THE-005) reposition cable to existing OUT-131 outlet in Room THE-004 to adjacent to entrance door on atrium side, connect to OUT121 outlet plate. Refer attached sketch, outlet to be set at standard height for wall phone. Point to be picked up on Group 1 equipment list. GW noted that BMCL had requested a cost for the works	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014  13/02/2014 20/02/2014  27/02/2014 06/03/2014	Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap. DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info. Sketches with Board early next week and then costs will follow asap thereafter. <b>DS advised that the initial proposals sketched up by Nightingales did not fully address the brief and that further sketches had been requested – BMCL to chase up</b>	
2449	PMI 273	Neurosciences Building	21/02/2014	The Board have undertaken an initial feasibility study into a potential extension to the main entrance of the Neurosciences building. The initial scheme incorporates sections of the new link bridge constructed. A copy of the initial feasibility plans attached to this PMI.  BMCE are instructed to submit a price activity schedule to undertake the development of the Board requirements to RIBA Plan of Work 2013 Stage 2 – “Prepare <b>Concept Design</b> , including outline proposals for structural design, building services systems, outline specifications and preliminary <b>Cost Information</b> along with relevant <b>Project Strategies</b> in accordance with <b>Design Programme</b> . Agree alterations to brief and issue <b>Final Project Brief</b> .”  The key deliverables will be:- <ol style="list-style-type: none"> <li>1. Agreed client brief</li> <li>2. Floor plans drawings (1:200 scale)</li> <li>3. Elevation drawings (1:200 scale)</li> <li>4. 3D visuals of interior and exterior images</li> <li>5. Outline structural drawings (foundations / frame)</li> <li>6. Outline building services schematics</li> <li>7. Design &amp; construction programme</li> <li>8. Input to cost plan for proposed work (prepared by Currie &amp; Brown)</li> <li>9. Priced Activity Schedule to develop project to RIBA Plan of Work 2013 Stage 4 (agree Compensation Event target Price Adjustment).</li> </ol> The works to RIBA Plan of Work 2013 Stage 2 should be completed within one month of approval to proceed. The scheme has to be developed within a £2,000,000 excluding VAT design and construction budget. DS met with consultants to commence feasibility study and hopes to have costs at the end of the	

			27/02/2014	week. Nightingales producing drawings to show at meeting with users and then to present to CEO at the end of March. Agreed to use RDS for rooms, RFI to push process forward and inform users if an when access is required – via Graham Forsyth <b>Information being pulled together by BMCL and will be forwarded to the Board later today</b>	
			06/03/2014		
2462	PMI 274	ADULT & CHILDREN'S HOSPITALS PROVISION OF MGPS IN ADL KITCHENS	03/3/2014	Confirmation of removal of MGPS in ADL Kitchens. Confirmation of deletion of oxygen outlet (OUT470) from Acute Receiving department ADL kitchen (NSGH-00-AAW-043) in line with advice received from the Board's Fire Officer and MGPS Authorising Engineer.  1:50 layouts for the ADL Kitchens listed below have been reviewed (for both hospitals) and note that no installation has been briefed in these rooms and therefore no change in these rooms.  NCH-00-REH-053; NSGH-05-WS5-017; NSGH-08-WS8-033.	
2476	PMI 275	ADULT AND CHILDREN'S HOSPITALS - WIRELESS ACCESS POINTS		The Board propose to substitute approximately 550 @ 2600 WAP's (Contract purchase) with 4G WAP's (Board purchase) to be installed in locations where WAP's have still to be installed. Exact quantity and locations to be identified by Board.  The Board propose to issue 4G compatible WAP's (Model No. 3700) to be installed in circa 1 in 5 locations where WAP's have not yet been installed. BMCE to provide an equivalent number of 2600 WAP's contract purchase) to the Board for use elsewhere.  Warranty implications for the 4G 3700 WAP's will remain with NHS GG&C and similarly warranties for the 2600 WAP's will remain with BMCE.  A meeting is to be convened as soon as possible to agree the basis for selecting locations for the 4G 3700 WAP's and also confirm final quantities.	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	07/03/2014	The Board request costs for the proposed enhancements noted below. The Board request costs for the additional resilience of MGPS systems as follows;  1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar. 2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar. 3) Oxygen loop within Adult Hospital tower. 4) Oxygen loop within Children's Hospital (M32 - M38). 5) Vacuum loop within Adult Hospital tower. 6) Vacuum loop within Children's Hospital (M32 - M38).  The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits.	
2479	PMI 277	NEUROSCIENCES BUILDING - MAIN ENTRANCE FEASIBILITY STUDY RIBA STAGE 2 (PMI 273)	11/03/2014	Please proceed with feasibility study as set out in PMI 273 based on fees provided by Brookfield Multiplex and summarised below.  Please proceed with feasibility study based on fees provided by Brookfield Multiplex and summarised below.	

				PMI 273 Neurosciences Building-Feasibility Study Entrance Area Fees for Design Services RIBA 2013 Stage 2	
				Discipline                      Amount	
				Architect-Nightingale	16,400.00
				Building Services-Wallace Whittle	4,200.00
				Structural Engineer-WSP	6,000.00
				Planning Adviser-Ironside Farrar	1,500.00
					28,100.00
				OHP @ 6.32%	1,775.92
				Total	29,875.92
					Allowance

CE for Ground Water monitoring to be concluded

**Other items that require discussion:**

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. **Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the

additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may be an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. **Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014)**

- Specialist Fit out areas – item to remain on tracker until equipment delivered (31<sup>st</sup> March 2014). Discussions ongoing with BMCL re storage of equipment. (20/02/2014). 27/02/2014 – additional meeting now required with clinicians and this will take time to organize and therefore delay information return to BMCL. It was hoped for a meeting next week but not confirmed. **First deliveries are scheduled for 17<sup>th</sup> March – BMCL are prepared for these – details have been discussed with AF and FWraith. General xray rooms desks and screens require to be fitted and tested but not installed – DH will review details with DP and will revert back (06/03/2014)**
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. **IPowrie is in discussion with HFS on the way forward (06/03/2014)**
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that

the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014) It was noted that there was a meeting scheduled to take place on the 20th Feb to discuss and sign-off the size of the tanks and that BMCL wanted to progress the shed and cladding works and get the pipes across the road. PM advised that there was concern that there is no drain point(s) and water inevitably gets into ducts. AK advised that he would review this. AK noted that where the duct comes across the ambulance bay the duct covers will be concrete. PM noted that he was comfortable with the principles being adopted. (13/02/2014) DH noted that the duct matter had been sorted and the tank sizing meeting in order to place the order was later that day. AK advised in relation to water getting into the duct that he was considering running any water to the SUDS. (20/2/14). 27/02/2014 – DH confirmed that Air Products have appropriate tanks readily available. A query was raised regarding certification for lifting and DP confirmed that standard certification is sufficient. DH to advise Ian Powrie in order that quote can be obtained from Air Products and order placed asap. Duct drawing has been reviewed and all are satisfied. Programme in preparation for road crossing works. **Air Products quote is awaited for vessels – a method statement is required and BMCL/Land Engineering to prepare for delivery. Ducting work to commence in around 2 weeks but the tie in will be held off until works completed on Langlands Drive (06/03/2014)**

- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014) GW noted that GW and DH had jointly discussed the equipment list and agreed the list and cost. DH and FW to confirm that they have nothing else to be included. (13/02/2014) GW advised that a further review had been undertaken by BMCL and the equipment list should be issued to the NHS by cop 21/02/2014. (20/02/2014). GW to finalise list and forward asap. **GW agreed to conclude this today and forward to the Board (06/03/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. **Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS noted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014)**
- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn’t been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMCL and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. **DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014)**

- Finishes – PM noted that in the offices the trunking is nicely sealed to the wall however in the theatres there is gaps between the grilles and wall and ducting not sealed. DP noted that the light fittings and grilles had not been sealed as yet but would be sealed in due course. PM acknowledged that he hadn't seen the schedule of exceptions (13/02/2014) AK advised that he would check if there had been a reason that the mastic work had not been carried out (20/02/2014). 27/02/2014 On-going works – checking during inspections and remove as necessary. **This item can now be removed from action points (06/03/2014)**
- 27/02/2014 Dignified spaces – no removal of equipment from group 3 to 1 and will be resolved by PM. **This item requires further discussion. Design company require colour matches. PM asked for further details in order to progress this to conclusion. GW noted that if this moves to Group1 from 3 then this would incur a contractual change and therefore needs to be further discussed before decision taken (06/03/2014)**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014)
- Car Park 1 – revised programme indicates completion now on 20<sup>th</sup> July. AK noted that he hopes to better this by bringing in a 2<sup>nd</sup> team of painters for the deck works. The Board are asked for their opinion on acceptance with phased completion. Several suggestions of use – use as a contractors only car park thereby negating the need for a segregated escape route as contractors will be site inducted and can leave site safely, use as a temporary car park for staff being brought on to install, deliver or be inducted for the building – this will require an escape/holding area to be introduced. DS asked for an update from GCC Planning Department. PM noted that no decision on the possible early use of the car park and therefore not contacted the Council until decision was clear. PM agreed to respond to RFI and DL agreed to review options and revert back (06/03/2014)
- DH noted that on review of 2 theatres it was identified that the UCV canopy was out of alignment with the floor markings. It will now be necessary to check all UCV theatres to ensure they are correct with design and reflect the agreed drawings (06/03/2014)
- AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and DS will further review (06/03/2014)
- Clarity on the neuro link is required in order that works can be programmed to allow the break through into adults hospital. It was noted that the first section, from neuro, up to and including the corner may alter but remainder of the link will remain the same – further discussion will be undertaken before any works commence (06/03/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 26/03/2014:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDermont at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	

20082	BMCL-EWN-139	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3  3.15 Node ICT server room cooling  3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p>	
			31/10/2013	<p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p>	
			07/11/2013	<p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p>	
			14/11/2013	<p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p>	
			21/11/2013	<p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p>	
			28/11/2013	<p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p>	
			12/12/2013	<p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p>	
			19/12/2013	<p>DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p>	
			09/01/2014	<p>Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p>	
			16/01/2014	<p>DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p>	
			23/01/2014	<p>DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p>	
			30/01/2014	<p>DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the</p>	

			<p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>proposals asap.</p> <p>DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p> <p>Information is now with Wallace Whittle for final review</p> <p>DP reported that Wallace Whittle had information and also with FC for final check. This is anticipated to be returned next week and then this item can be closed</p> <p>DH advised that there had been a recount of the points and there is an increase in the number of points therefore potential impact on switches (circa 400 extra). DP noted that Schneider had initially provided an inaccurate point count and the recheck identified additional requirements. It had been expected that the initial point count would have included an allowance and that the overall number predicted a while ago was reasonably accurate however it is the locations which have caused the issue. DH suggested that there may be a requirement for additional stackable switches/additional modules. DP reported that the NHS order to Capita is very specific. DH noted that a further check re cooling would need to be undertaken once the work done to confirm the point count had been concluded.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	<p>10/03/2014</p>	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p>	

			13/03/2014	Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.	
			20/03/2014	GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.	
20982	BMCL-EWN-000144	Increased Height of NDC Cart	19/03/2014	Information recently received by BM indicates an overall height increase in the size of the NDC cart from that previously advised. BM have based our minimum door clearance height on a worst case cart height of 1690mm, as advised by K Connelly to BM in her email dated 22nd March 2010, attached and as per the original cart supplied by the Board. There was no information contained in the AGV / Cart compatibility schedule for the NDC cart contained in the FBC Appendix K document, also attached. BM understand that the cart now proposed by the Board for use by NDC is 1725mm which will prove unworkable in all AGV routes as it would give an out-turn height of 2140mm not 2105mm within a designed signed off door strategy opening of 2150mm, therefore not allowing adequate clearance, as per attached door clearance document.  <i>Text lifted from Notes Section:</i> <i>AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and DS will further review (06/03/2014). There appears to be some confusion on the carts that could possibly be affected by the door clearance issues. And that these lower tolerances would only be on the NDC carts (1725). DP has asked Swisslog for information on reducing heights and a clear understanding of the areas affected (13/04/2014) Cross reference with EW</i>	
			20/03/2014	GW advised that there was concern that the NDC cart did not work with the BMCL design – doesn't work with the sub-base solution. DP advised that the sub-base had been redesigned and will not be greater than 390mm. DH enquired if there was any option to modify the AGV lift and DP confirmed this was not an	

option. DH suggested that there were circa 24 doors which were impacted on (AGV needs to pass through). GW advised that NHollowell had been requested to confirm the impact to other doors which the NDC cart needs to be manually put through. It was noted that it was not proposed that circa 700 doors would be changed. It was proposed to discuss with KC and identify potential to make the NDC cart deliveries work at the drop of points. It would be beneficial to get an actual measure of the height of the circa 24 doors. GW advised that he had asked NHollowell to mark-up a drawing and would get the floor plans marked up indicating the heights of the doors so can establish the issue.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 26/03/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable</p>	

A51679245

			<p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 <b>AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</b></p>	<p>and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014 An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>16/01/2014 An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>23/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>30/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>13/02/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>27/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>06/03/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p>		

			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
--	--	--	------------	--	--

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 26/03/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.	
			12/12/2013	DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.	
			19/12/2013	DS confirmed that response still awaited from Building Control	
			09/01/2014	DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.	
			23/01/2014	DS was scheduled to meet with Raymond Barlow.	
			30/01/2014	DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
			13/02/2014	DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.	
			20/02/2014	DS advised that he had written to RBarlow on the 13 <sup>th</sup> and 20 <sup>th</sup> Feb specifically on this item and	

A51679245

			27/02/2014 06/03/2014	was awaiting a response. response is anticipated imminently. DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.	
			13/03/2014 20/03/2014	Confirmation required when "view" application will be submitted – DP agreed to progress <b>DP advised that he would liaise with JMurray re date for submission of the 'view'.</b>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013     17/10/2013  24/10/2013  31/10/2013 07/11/2013 23/01/2013  28/01/2013   30/01/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/04/2014	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed. DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top. Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish. Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss. GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH. Instruction will be amended as requested by BMCL. GW to advise the cost. Costs awaited GW agreed to process today GW agreed to progress – PMI has been amended to correct product and removed "concrete" – GW to provide costs	07/11/2013

			20/03/2014	GW advised that he had reviewed and would discuss with DH.	
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	12/02/2014  13/02/2014 20/2/2014  27/02/2014 06/03/2014 13/04/2014	Amendment to existing PMI raised 13/11/2013: The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE - 092 GW advised that BMCL would review the implications of the amendment. BMCL are pulling together the cost. DH noted that the costs should reflect the saving process previously followed. GW noted that BMCL needed to understand what had been finished in the room. Costs awaited GW agreed to progress today GW reported that costs have been chased and awaiting response. DH requested to have these by Friday (tomorrow) or he will progress using previous costs	
2317	PMI 254	Alterations to Arrival Square	06/11/2013          07/11/2013 14/11/2013   21/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.  The key features are now: * omission of signals to prioritise Fastlink over other buses (6 columns) * omission of raised pedestrian crossing and replacement with drop-kerbs and road markings * Omission of lay-by immediately outside Adult entrance and infill with granite to match * Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT * Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs * Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping * Altered road markings  GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.  Please provide comments on the revised proposals and updated costs to amend the external works as shown. Noted that BMCL will review the PMI and provide feedback. PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit. WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-	

			28/11/2013	up drawing. DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
			12/12/2013	DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.	
			19/12/2013	DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.	
			09/01/2014	Meeting arranged for 27 <sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held	
			16/01/2014	DH noted that an earlier meeting was not possible therefore the 27 <sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.	
			23/01/2014	DH noted that there were meetings scheduled for 27 <sup>th</sup> Jan and 5 <sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.	
			30/01/2014	DH noted this is wip and there is a meeting with SPT on the 5 <sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.	
			06/02/2014	PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.	
			13/02/2014	PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GGC and the road designers in order to get a consensus view. PM advised he would issue a PMI to confirm the way forward i.e. take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that	

			<p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>20/03/2014</p>	<p>GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan.</p> <p>It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC had taken place regarding the 3 sets of traffic lights and feedback was awaited. GW and DR to agree costs.</p> <p>DH noted that a meeting had been scheduled with Alan Anderson at GCC. PM advised that the NHS Reps are meeting with the design reps from LES. DS noted that BMCL are in the process of finalising the order for the 3 sets of traffic lights and were not in a position to order lights for the full requirements. GW noted that he had received a quote from GCC but he was not sure this adequately covered the requirements. DH advised that BMCL should omit only those sets of traffic controls which segregated bus types and that those separating buses from general traffic should remain.. GW noted that GCC appeared to have obtained drawings and have priced for the lights as per the mark-up previously issued by DH. BMCL were scheduled to meet with GCC on 24/02/2014 and requested NHS attendance at this meeting. GW enquired who would contract with Scottish Power as he did not think it was for BMCL to contract with Scottish Power. DH suggested that GCC would liaise direct with Scottish Power for the lights outside the site however the internal lights will be part of the internal lights &amp; infrastructure contract. GW noted that he was trying to get GCC into a position where they confirm what needs to be done as he did not want any liability to be on BMCL for continued power. DS suggested that GCC would satisfy themselves as to where the power comes from and the lights being metered. DH advised that he would liaise with GThomson who has the most recent experience of dealing with traffic light matters at other projects.. DS enquired when the NHS would be meeting with LES and DH advised that the meeting was currently being scheduled for either 25/02, 4/03 or 05/03. DS enquired if BMCL should proceed as is. DH enquired if the information was required before the 6<sup>th</sup> March 2014 and DS advised that BMCL want to order up the lights asap. GW suggested that BMCL could deal with the 3 sets of lights in the first instance and then the transport hub separately. AK enquired about the lead time required and GW advised that Siemens had been instructed to get geared up for the Commonwealth Games work so they will have no-one available to do the lights works in the run-up to the games. DH and PM agreed to discuss and confirm if BMCL should proceed as is.</p> <p>Meetings, technical and operational, to discuss arrival square scheduled to take place on 4<sup>th</sup> and 6<sup>th</sup> March respectively with SPT and GCC. WSP drawings will be used to discuss the best way forward. Drawings are not yet in the system and DS agreed to progress this and forward a CAD copy of the drawing to DH</p> <p>Further drawings issued with final proposal in place. Turning circles etc to be checked and confirmed by WSP. DS confirmed that WSP now have the drawing but noted that a further safety audit will be required. DH asked that the works to be confirmed in principal to progress and conclude with GCC. DS agreed to speak to D Campbell and confirm details before the end of the week</p> <p>Cross ref with discussion noted against BMCL EW 143</p>	
2330	PMI 257	MTHW System – Site Ring	20/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along</p>	

			<p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/04/2014</p> <p>20/04/2013</p>	<p>the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p> <p>DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.</p> <p>DR advised that he had provided comment back to GW – DR and GW to discuss.</p> <p>PM advised that the Board did not wish the works to be taken forward at this time. DH noted that BMCL are to review the proposed route and associated costs. DH and GW will work on a simplified route to minimize costs. AK raised concern regarding the purchase of the pipes and PM advised that it was ok for BMCL to purchase the pipes as the works would need to be carried out at some point. AK and GW to discuss the works and programme.</p> <p>AK noted that there was difficulty in putting both the O<sub>2</sub> and the MTHW pipes in the same trench.</p> <p>GW provided a hard copy of the costs to DH for review by DR.</p> <p>Costs have been submitted and DR to conclude evaluation of costs. DH agreed to update later today</p> <p>DH reported that costs were now agreed. It was agreed that no further PMI will be required but an amendment to the current</p> <p>PM agreed to write up CE</p> <p><b>PM to provide CE. PM to provide PMI to confirm that BMCL should carry out the works.</b></p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	<p>29/01/2014</p>	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p>	

			20/02/2014          27/02/2014 06/03/2014  26/03/2014	<p>NSGH OPD Nurses Base - 2 mimic panels. NSGH Critical Care - 1 indicator panel. NCH Workshop - 2 mimic panels. NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011. NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms. DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels. DP agreed to pursue with Mercury No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting. <b>GW proposed that GW and DP and DH have a discussion re costs</b></p>	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER & DATA	07/02/2014  13/02/2014  20/02/2014  13/04/2014 20/04/2014	<p>Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for the works PM advised that he would provide the CE once it had been through the ASSB approval process – circa 20/03/2014 Approved at ASSB on 10<sup>th</sup> March – PM to write up CE <b>GW to progress. Cross ref CE 052 CHILDREN'S HOSPITAL-SCIENCE CENTRE INSTALLATION YCF1 - ADDITIONAL POWER/DATA</b></p>	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014  13/02/2014 20/02/2014   27/02/2014 06/03/2014  13/04/2014  20/04/2014	<p>Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap. DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info. Sketches with Board early next week and then costs will follow asap thereafter. DS advised that the initial proposals sketched up by Nightingales did not fully address the brief and that further sketches had been requested – BMCL to chase up Drawing received and returned with comments relating to the trolley size. Revised drawing awaited in order that this can be progressed, <b>DH suggested that the drawing had been issued the previous day and would progress asap.</b></p>	
2462	PMI 274	ADULT & CHILDREN'S	03/3/2014	Confirmation of removal of MGPS in ADL Kitchens.	

		HOSPITALS PROVISION OF MGPS IN ADL KITCHENS		<p>Confirmation of deletion of oxygen outlet (OUT470) from Acute Receiving department ADL kitchen (NSGH-00-AAW-043) in line with advice received from the Board's Fire Officer and MGPS Authorising Engineer.</p> <p>1:50 layouts for the ADL Kitchens listed below have been reviewed (for both hospitals) and note that no installation has been briefed in these rooms and therefore no change in these rooms.</p> <p>NCH-00-REH-053; NSGH-05-WS5-017; NSGH-08-WS8-033.</p> <p><b>Costs are minimal and work to be carried out</b></p>	
2476	PMI 275	ADULT AND CHILDREN'S HOSPITALS - WIRELESS ACCESS POINTS	<p>13/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>The Board propose to substitute approximately 550 @ 2600 WAP's (Contract purchase) with 4G WAP's (Board purchase) to be installed in locations where WAP's have still to be installed. Exact quantity and locations to be identified by Board.</p> <p>The Board propose to issue 4G compatible WAP's (Model No. 3700) to be installed in circa 1 in 5 locations where WAP's have not yet been installed. BMCE to provide an equivalent number of 2600 WAP's contract purchase) to the Board for use elsewhere.</p> <p>Warranty implications for the 4G 3700 WAP's will remain with NHS GG&amp;C and similarly warranties for the 2600 WAP's will remain with BMCE.</p> <p>A meeting is to be convened as soon as possible to agree the basis for selecting locations for the 4G 3700 WAP's and also confirm final quantities.</p> <p>NHS to provide 550 and BMCE to provide 550 back. A meeting is arranged for Friday to clarify positions and numbers</p> <p><b>DH noted that a swap arrangement was not as simple as first thought. Boston will be required to provide a high level cost. The positions for the 4G WAP need to be identified.</b></p>	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	<p>07/03/2014</p> <p>20/03/2014</p>	<p>The Board request costs for the proposed enhancements noted below.</p> <p>The Board request costs for the additional resilience of MGPS systems as follows;</p> <ol style="list-style-type: none"> <li>1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>3) Oxygen loop within Adult Hospital tower.</li> <li>4) Oxygen loop within Children's Hospital (M32 - M38).</li> <li>5) Vacuum loop within Adult Hospital tower.</li> <li>6) Vacuum loop within Children's Hospital (M32 - M38).</li> </ol> <p>The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits.</p> <p><b>DH advised this was WIP</b></p>	
2479	PMI 277	NEUROSCIENCES BUILDING - MAIN ENTRANCE FEASIBILITY STUDY RIBA STAGE 2 (PMI 273)	11/03/2014	<p>Please proceed with feasibility study as set out in PMI 273 based on fees provided by Brookfield Multiplex and summarised below.</p> <p>Please proceed with feasibility study based on fees provided by Brookfield Multiplex and summarized below.</p> <p>PMI 273 Neurosciences Building-Feasibility Study Entrance Area</p>

				Total	29,875.92			
			13/03/2014	Feasibility study carried out				
			20/03/2014	DH noted that the drawing for initial review had been received and would be progressed asap.				

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
11765	CE 052	CHILDREN'S HOSPITAL- SCIENCE CENTRE INSTALLATION YCF1 - ADDITIONAL POWER/DATA	13/03/2014	Proceed and install additional power and data points as set out in PMI 270, all as requested by Science Centre, Glasgow (designers for YCF). Board to cross charge YCF same amount. Agreed cost of £12,333.12 inclusive of overhead and profit, but excludes VAT.  GW to input cost to Sypro	
11880	CE 053	NEUROSURGICAL BUILDING ENTRANCE FEASIBILITY (WITH LINK BRIDGE)	26/03/2014	The Board confirm acceptance of PMI 273 and 277 to proceed and undertake a design and cost study to extend the entrance to neurosurgery and incorporate the new link bridge from the main build site. Study to be complete by 1st week April 2014, and is to include costs for the works.	

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) **DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014)**
- Specialist Fit out areas – item to remain on tracker until equipment delivered (31<sup>st</sup> March 2014). Discussions ongoing with BMCL re storage of equipment. (20/02/2014). 27/02/2014 – additional meeting now required with clinicians and this will take time to organize and therefore delay information return to BMCL. It was hoped for a meeting next week but not confirmed. First deliveries are scheduled for 17<sup>th</sup> March – BMCL are prepared for these – details have been discussed with AF and FWraith. General xray rooms desks and screens require to be fitted and tested but not installed – DH will review details with DP and will revert back (06/03/2014). **It was agreed that Mercury will complete the electrical connection to desk in the most cost effective manner. DH asked for details of the work proposed (13/03/2014)**

- Pseudomonas in taps. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) **DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014)**
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014) It was noted that there was a meeting scheduled to take place on the 20<sup>th</sup> Feb to discuss and sign-off the size of the tanks and that BMCL wanted to progress the shed and cladding works and get the pipes across the road. PM advised that there was concern that there is no drain point(s) and water inevitably gets into ducts. AK advised that he would review this. AK noted that where the duct comes across the ambulance bay the duct covers will be concrete. PM noted that he was comfortable with the principles being adopted. (13/02/2014) DH noted that the duct matter had been sorted and the tank sizing meeting in order to place the order was later that day. AK advised in relation to water getting into the duct that he was considering running any water to the SUDS. (20/2/14). 27/02/2014 – DH confirmed that Air Products have appropriate tanks readily available. A query was raised regarding certification for lifting and DP confirmed that standard certification is sufficient. DH to advise Ian Powrie in order that quote can be obtained from Air Products and order placed asap. Duct drawing has been reviewed and all are satisfied. Programme in preparation for road crossing works. Air Products quote is awaited for vessels – a method statement is required and BMCL/Land Engineering to prepare for delivery. Ducting work to commence in around 2 weeks but the tie in will be held off until works completed on Langlands Drive (06/03/2014). **DH chasing up Air Products quote to ensure delivery. DP asked for plans of the ground floor and first floor of INS – PM to provide (13/03/2014) AK noted that consideration was being given to the Luddon work and road crossing, etc. The traffic management has been shifted to the 31<sup>st</sup> March start date. BMCL need to understand the tank delivery date. DP noted that he had been advised that the tank delivery is end March however BMCL will require risk assessments and method statements. It was noted that Air Products in to meet with BMCL w/c 24/03/2014 (20/03/2014)**
- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014) GW noted that GW and DH had jointly discussed the equipment list and agreed the list and cost. DH and FW to confirm that they have nothing else to be included. (13/02/2014) GW advised that a further review had been undertaken by BMCL and the equipment list should be issued to the NHS by cop 21/02/2014. (20/02/2014). GW to finalise list and forward asap. GW agreed to conclude this today and forward to the Board (06/03/2014). **Equipment list now received. Pivot table has been requested but due to the level of work involved it will take approximately 1 week to produce. In order to incorporate the manual adjustments to lines. It was noted that this was particularly useful for procurement. It was agreed that FW/AK will discuss options (13/03/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS

acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start reducing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS noted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) **AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing.(20/03/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMLC and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). **DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014).**
- 27/02/2014 Dignified spaces – no removal of equipment from group 3 to 1 and will be resolved by PM. This item requires further discussion. Design company require colour matches. PM asked for further details in order to progress this to conclusion. GW noted that if this moves to Group1 from 3 then this would incur a contractual change and therefore needs to be further discussed before decision taken (06/03/2014). PM agreed to discuss with RStewart on how best to progress. A process is required to ensure payment can be progressed possibly by moving funding within the equipment list (13/03/2014) **GW noted that feedback from PM was awaited (20/03/2014)**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) **It was noted that the costs were awaited (20/03/2014)**
- Car Park 1 – revised programme indicates completion now on 20<sup>th</sup> July. AK noted that he hopes to better this by bringing in a 2<sup>nd</sup> team of painters for the deck works. The Board are asked for their opinion on acceptance with phased completion. Several suggestions of use – use as a contractors only car park thereby negating the need for a segregated escape route as contractors will be site inducted and can leave site safely, use as a temporary car park for staff being brought on to install, deliver or be inducted for the building – this will require an escape/holding area to be introduced. DS asked for an update from GCC Planning Department. PM noted that no decision on the possible early use of the car park and therefore not contacted the Council until decision was clear. PM agreed to respond to RFI and DL agreed to review options and revert back (06/03/2014). It was agreed that no conversation with the Council required as it is unlikely that the Board will take the CP early. PM to check that IFT have commenced work (13/03/2014) **It was noted that the Car Park handover had been confirmed as 26<sup>th</sup> January 2015. (20/03/2014)**

- DH noted that on review of 2 theatres it was identified that the UCV canopy was out of alignment with the floor markings. It will now be necessary to check all UCV theatres to ensure they are correct with design and reflect the agreed drawings (06/03/2014). DH has reviewed and no others noted (13/04/2014) It was agreed this item could be closed (20/03/2014)
- Other works outwith the redline – GW asked for clarity on the works that are outwith discussions with GCC. DH noted that a clear drawing from WSP required to show work to be carried out by BMCE as part of their works. Concern that BMCE will be asked to carry out works on the opposite side of Hardgate Road and therefore clarity required. PM asked for the drawings so that a review of these by project team can be carried out – GW will progress (13/03/2014)
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014)
- Operational signage – this matter needs to be discussed with DH. BMCL do not consider that 'Please wash your hands' signage is a BMCL item as has never been a part of wayfinding before. DH noted that the operational signage is advised in the NHS Guidance document. GW acknowledged that the signage was included in the NHS document however this was a guidance doc only (20/03/2014)
- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for SPT to supply and fit the TVs.

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 09/04/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDerment at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

				<p>holiday but that she would chase this up.</p> <ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul> <p>DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>03/04/2014</p> <p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p>	

			<p>19/12/2013 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>09/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>16/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>23/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>30/01/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>06/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>13/02/2014 DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>20/02/2014 DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p> <p>06/03/2014 Information is now with Wallace Whittle for final review</p> <p>13/03/2014 DP reported that Wallace Whittle had information and also with FC for final check. This is anticipated to be returned next week and then this item can be closed</p> <p>20/03/2014 DH advised that there had been a recount of the points and there is an increase in the number of points therefore potential impact on switches (circa 400 extra). DP noted that Schneider had initially provided an inaccurate point count and the recheck identified additional requirements. It had been expected that the initial point count would have included an allowance and that the overall number predicted a while ago was reasonably accurate however it is the locations which have caused the issue. DH suggested that there may be a requirement for additional stackable switches/additional modules. DP reported that the NHS order to Capita is very specific. DH noted that a further check re cooling would need to be undertaken once the work done to confirm the point count had been concluded.</p> <p>27/03/2014 DP noted that the design had been provided by WW. A proper point count was under review to check for any impact – information to be provided to DH later that day.</p> <p>02/04/2014 GW advised that DP had suggested that this is in an ok position.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>20/03/2014 GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>27/03/2014 DR advised that he would conclude the information for provision to DL.</p> <p>03/04/2014 DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p>	

20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS	

			03/04/2014	<p>enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then they are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p>	
20982	BMCL-EWN-000144	Increased Height of NDC Cart	<p>19/03/2014</p> <p>20/03/2014</p>	<p>Information recently received by BM indicates an overall height increase in the size of the NDC cart from that previously advised. BM have based our minimum door clearance height on a worst case cart height of 1690mm, as advised by K Connelly to BM in her email dated 22nd March 2010, attached and as per the original cart supplied by the Board. There was no information contained in the AGV / Cart compatibility schedule for the NDC cart contained in the FBC Appendix K document, also attached. BM understand that the cart now proposed by the Board for use by NDC is 1725mm which will prove unworkable in all AGV routes as it would give an out-turn height of 2140mm not 2105mm within a designed signed off door strategy opening of 2150mm, therefore not allowing adequate clearance, as per attached door clearance document.</p> <p><i>Text lifted from Notes Section:</i>  AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and DS will further review (06/03/2014). There appears to be some confusion on the carts that could possibly be affected by the door clearance issues. And that these lower tolerances would only be on the NDC carts (1725). DP has asked Swisslog for information on reducing heights and a clear understanding of the areas affected (13/04/2014) Cross reference with EW</p> <p>GW advised that there was concern that the NDC cart did not work with the BMCL design – doesn't work with the sub-base solution. DP advised that the sub-base had been redesigned and will not be greater than 390mm. DH enquired if there was any option to modify the AGV lift and DP confirmed this was not an option. DH suggested that there were circa 24 doors which were impacted on (AGV needs to pass through). GW advised that NHollowell had been requested to confirm the impact to other doors which the</p>	

			27/03/2014	NDC cart needs to be manually put through. It was noted that it was not proposed that circa 700 doors would be changed. It was proposed to discuss with KC and identify potential to make the NDC cart deliveries work at the drop of points. It would be beneficial to get an actual measure of the height of the circa 24 doors. GW advised that he had asked NHollowell to mark-up a drawing and would get the floor plans marked up indicating the heights of the doors so can establish the issue.	
			03/04/2014	DH advised that RS had confirmed that the cart height is 1725 and this is a special NHS cart. RS is organizing a meeting with NDC & KC.to discuss the potential of only using the 1680 carts for the new south hospitals. DS suggested that it would be beneficial to get the cart which is actually to be used so it can be trialed. DS advised that he understood that RS was meeting with NDC w/c 07/04/2014. DR enquired about the 13 basement doors which may need to be changed if the height of the cart goes to 1725mm. GW advised that there were 3 doors in the Labs which may need to be changed however NHollowell had carried out a lot of work reviewing the door impacts and a marked up drawing had been prepared of the impacted doors.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 09/04/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.</p> <p>AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs</p>	

A51679245

			<p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p>	<p>under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014 An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>16/01/2014 An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required. DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>23/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided</p>	

			30/01/2014	as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			13/02/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
			27/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.	
			06/03/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days. Report anticipated shortly	
			20/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			27/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
				DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 09/04/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	

A51679245

			<p>21/11/2013 28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>23/01/2014 30/01/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014 06/03/2014</p> <p>13/03/2014 20/03/2014 27/03/2014</p>	<p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p>DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p>DS was scheduled to meet with Raymond Barlow.</p> <p>DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</p> <p>DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.</p> <p>DS advised that he had written to RBarlow on the 13<sup>th</sup> and 20<sup>th</sup> Feb specifically on this item and was awaiting a response.</p> <p>response is anticipated imminently.</p> <p>DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.</p> <p>Confirmation required when "view" application will be submitted – DP agreed to progress</p> <p>DP advised that he would liaise with JMurray re date for submission of the 'view'.</p> <p>DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues.</p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>11/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013</p>	<p>Confirmation of requirements for floor screeds to 3 rooms.</p> <p>Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p> <p>PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works.</p> <p>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill.</p>	07/11/2013

			07/11/2013 23/01/2013  28/01/2013  30/01/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/04/2014  20/03/2014 27/03/2014	<p>It was agreed this item was now closed.</p> <p>DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows:</p> <p>The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.</p> <p>Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.</p> <p>GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH.</p> <p>Instruction will be amended as requested by BMCL. GW to advise the cost.</p> <p>Costs awaited</p> <p>GW agreed to process today</p> <p>GW agreed to progress – PMI has been amended to correct product and removed “concrete” – GW to provide costs</p> <p>GW advised that he had reviewed and would discuss with DH.</p> <p><b>GW and DH to meet to conclude</b></p>	
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	12/02/2014  13/02/2014 20/2/2014  27/02/2014 06/03/2014 13/03/2014  27/03/2014  04/04/2014	<p>Amendment to existing PMI raised 13/11/2013:</p> <p>The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE – 092</p> <p>GW advised that BMCL would review the implications of the amendment.</p> <p>BMCL are pulling together the cost. DH noted that the costs should reflect the saving process previously followed. GW noted that BMCL needed to understand what had been finished in the room.</p> <p>Costs awaited</p> <p>GW agreed to progress today</p> <p>GW reported that costs have been chased and awaiting response. DH requested to have these by Friday (tomorrow) or he will progress using previous costs</p> <p>DH advised that he would carry out his own assessment of the works. GW advised that he would chase up the sub-contractor(s) for information. DS suggested that GW should advise the supply chain what they will be getting in order to get a speedier response.</p> <p><b>It was noted that this item was closed – equipment list item.</b></p>	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <p>* omission of signals to prioritise Fastlink over other buses (6 columns)</p>	

			<ul style="list-style-type: none"> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>07/11/2013 Noted that BMCL will review the PMI and provide feedback.</p> <p>14/11/2013 PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>21/11/2013 WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p> <p>28/11/2013 DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>12/12/2013 DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>19/12/2013 DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>09/01/2014 Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>16/01/2014 DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>23/01/2014 DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p> <p>30/01/2014 DH noted this is wip and there is a meeting with SPT on the 5<sup>th</sup> Feb 2014. GW sought confirmation</p>
--	--	--	--

			06/02/2014	that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.	
			13/02/2014	PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.	
			20/02/2014	PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GGC and the road designers in order to get a consensus view. PM advised he would issue a PMI to confirm the way forward i.e. take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan. It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC had taken place regarding the 3 sets of traffic lights and feedback was awaited. GW and DR to agree costs. DH noted that a meeting had been scheduled with Alan Anderson at GCC. PM advised that the NHS Reps are meeting with the design reps from LES. DS noted that BMCL are in the process of finalising the order for the 3 sets of traffic lights and were not in a position to order lights for the full requirements. GW noted that he had received a quote from GCC but he was not sure this adequately covered the requirements. DH advised that BMCL should omit only those sets of traffic controls which segregated bus types and that those separating buses from general traffic should remain.. GW noted that GCC appeared to have obtained drawings and have priced for the lights as per the mark-up previously issued by DH. BMCL were scheduled to meet with GCC on 24/02/2014 and requested NHS attendance at this meeting. GW enquired who would contract with Scottish Power as he did not think it was for BMCL to contract with Scottish Power. DH suggested that GCC would liaise direct with Scottish Power for the lights outside the site however the internal lights will be part of the internal lights & infrastructure contract. GW noted that he was trying to get GCC into a position where they confirm what needs to be done as he did not want any liability to be on BMCL for continued power. DS suggested that GCC would satisfy themselves as to where the power comes from and the lights being metered. DH advised that he would liaise with GThomson who has the most recent experience of dealing with traffic light matters at other projects.. DS enquired when the NHS would be meeting with LES and DH advised that the meeting was currently being scheduled for either 25/02, 4/03 or 05/03. DS enquired if BMCL should	

			<p>27/02/2014</p> <p>06/03/2014</p> <p>20/03/2014 04/04/2014</p>	<p>proceed as is. DH enquired if the information was required before the 6<sup>th</sup> March 2014 and DS advised that BMCL want to order up the lights asap. GW suggested that BMCL could deal with the 3 sets of lights in the first instance and then the transport hub separately. AK enquired about the lead time required and GW advised that Siemens had been instructed to get geared up for the Commonwealth Games work so they will have no-one available to do the lights works in the run-up to the games. DH and PM agreed to discuss and confirm if BMCL should proceed as is. Meetings, technical and operational, to discuss arrival square scheduled to take place on 4<sup>th</sup> and 6<sup>th</sup> March respectively with SPT and GCC. WSP drawings will be used to discuss the best way forward. Drawings are not yet in the system and DS agreed to progress this and forward a CAD copy of the drawing to DH</p> <p>Further drawings issued with final proposal in place. Turning circles etc to be checked and confirmed by WSP. DS confirmed that WSP now have the drawing but noted that a further safety audit will be required. DH asked that the works to be confirmed in principal to progress and conclude with GCC. DS agreed to speak to D Campbell and confirm details before the end of the week</p> <p>Cross ref with discussion noted against BMCL EW 143</p> <p><b>It was noted that this item should be closed and discussions noted against PMI 278</b></p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	<p>29/01/2014</p> <p>20/02/2014</p> <p>27/02/2014 06/03/2014</p> <p>27/03/2014</p>	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations: NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH. NSGH OPD Nurses Base - 2 mimic panels. NSGH Critical Care - 1 indicator panel. NCH Workshop - 2 mimic panels. NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011. NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p> <p>DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>DP agreed to pursue with Mercury</p> <p>No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</p> <p>GW suggested that the costs had been provided however he would recheck and reissue asap if</p>	

			04/04/2014	required. GW, DH and DP to meet to discuss. GW advised that he had a cost which he was debating with Mercury therefore the cost had not yet been sent to the NHS.	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER & DATA	07/02/2014 13/02/2014 20/02/2014 13/03/2014 20/03/2014 27/03/2014	Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for the works PM advised that he would provide the CE once it had been through the ASSB approval process – circa 20/03/2014 Approved at ASSB on 10 <sup>th</sup> March – PM to write up CE GW to progress. Cross ref CE 052 CHILDREN'S HOSPITAL-SCIENCE CENTRE INSTALLATION YCF1 - ADDITIONAL POWER/DATA CE issued therefore item can be closed. Cross ref 052.	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014 13/02/2014 20/02/2014  27/02/2014 06/03/2014  13/03/2014  20/03/2014 27/03/2014 04/04/2014	Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap. DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info. Sketches with Board early next week and then costs will follow asap thereafter. DS advised that the initial proposals sketched up by Nightingales did not fully address the brief and that further sketches had been requested – BMCL to chase up Drawing received and returned with comments relating to the trolley size. Revised drawing awaited in order that this can be progressed, DH suggested that the drawing had been issued the previous day and would progress asap. GW advised that PHealth was pursuing the cost information. PM advised that the NHS Had received a drawing on 03/04/2014 which would be reviewed asap. It was noted that BMCL would review the pricing on the basis of the drawing. DS enquired if the drawing was to be put through as formal RDD and this was confirmed.	
2462	PMI 274	ADULT & CHILDREN'S HOSPITALS PROVISION OF MGPS IN ADL KITCHENS	03/3/2014       13/03/2014 27/03/2014 04/04/2014	Confirmation of removal of MGPS in ADL Kitchens. Confirmation of deletion of oxygen outlet (OUT470) from Acute Receiving department ADL kitchen (NSGH-00-AAW-043) in line with advice received from the Board's Fire Officer and MGPS Authorising Engineer.  1:50 layouts for the ADL Kitchens listed below have been reviewed (for both hospitals) and note that no installation has been briefed in these rooms and therefore no change in these rooms.  NCH-00-REH-053; NSGH-05-WS5-017; NSGH-08-WS8-033. Costs are minimal and work to be carried out GW advised that 1 has already been installed and tested – indicative costs are £990. DH advised that he would review the costs. GW advised that he was awaiting feedback from DH. DR noted that it had been agreed this would	

				be dealt with through the equipment list therefore the item could be closed (3 x £990).	
2476	PMI 275	ADULT AND CHILDREN'S HOSPITALS - WIRELESS ACCESS POINTS	<p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p>	<p>The Board propose to substitute approximately 550 @ 2600 WAP's (Contract purchase) with 4G WAP's (Board purchase) to be installed in locations where WAP's have still to be installed. Exact quantity and locations to be identified by Board.</p> <p>The Board propose to issue 4G compatible WAP's (Model No. 3700) to be installed in circa 1 in 5 locations where WAP's have not yet been installed. BMCE to provide an equivalent number of 2600 WAP's contract purchase) to the Board for use elsewhere.</p> <p>Warranty implications for the 4G 3700 WAP's will remain with NHS GG&amp;C and similarly warranties for the 2600 WAP's will remain with BMCE.</p> <p>A meeting is to be convened as soon as possible to agree the basis for selecting locations for the 4G 3700 WAP's and also confirm final quantities.</p> <p>NHS to provide 550 and BMCE to provide 550 back. A meeting is arranged for Friday to clarify positions and numbers</p> <p>DH noted that a swap arrangement was not as simple as first thought. Boston will be required to provide a high level cost. The positions for the 4G WAP need to be identified.</p> <p>DH noted that he had received costs and had forwarded these costs to IT to ask how they propose to pay for the required i.e. survey to identify the positioning of the WAPs.</p> <p>GW noted that the costs had been provided to the NHS and PM advised that he would review. It was noted that there had been discussion re NHS Getting Boston to do the design and BCL to procure Boston to install. BMCL not comfortable the proposal for BMCL to procure the design.</p>	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	<p>07/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p>	<p>The Board request costs for the proposed enhancements noted below.</p> <p>The Board request costs for the additional resilience of MGPS systems as follows;</p> <ol style="list-style-type: none"> <li>1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>3) Oxygen loop within Adult Hospital tower.</li> <li>4) Oxygen loop within Children's Hospital (M32 - M38).</li> <li>5) Vacuum loop within Adult Hospital tower.</li> <li>6) Vacuum loop within Children's Hospital (M32 - M38).</li> </ol> <p>The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits.</p> <p>DH advised this was WIP</p> <p>DH advised that he was awaiting a breakdown of the costs for each heading.</p> <p>GW noted that Mercury have advised that some of the above is already in their scope of works.</p>	
2499	PMI 278 -	Alterations to Arrival Square - Alteration to PMI 254	24/03/2014	<p>The Board confirm that, on the basis of the on-going discussions with Glasgow City Council &amp; SPT which are at an advanced stage, BMCL should proceed with the traffic signals procurement on the basis of the layout shown on WSP-EW-XX-SK-771-111 Rev 1. Additional cost to be agreed for the global revision.</p> <p>The Board confirm that, on the basis of the on-going discussions with Glasgow City Council &amp; SPT</p>	

				<p>which are at an advanced stage, BMCL should proceed with the traffic signals procurement on the basis of the layout shown on WSP-EW-XX-SK-771-111 Rev 1. Additional cost to be agreed for the global revision.</p> <p>GCC have intimated that the only items under review are:</p> <ul style="list-style-type: none"> <li>a) Width of road crossing between A&amp;C and Laboratories</li> <li>b) Provision of 'zig-zag' line markings on dedicated bus lanes at pedestrian crossing</li> <li>c) Precise locations of bus shelters/halts</li> <li>d) Exact locations of Kassel &amp; dropped kerbs</li> </ul> <p>These items will be shown on a drawing, to follow, which GCC are preparing.</p>	
2513	PMI 280	PMI 280 NEW SOUTH GLASGOW HOSPITALS - ARRIVAL SQUARE	31/03/2014	<p>Confirmation of area in abbeyance, and area where work can proceed.</p> <p>As the Board are continuing with discussions on the exact arrangements for the bus halts and lay-up areas, and to minimise the impact upon design/construction of the arrival square area we instruct Brookfield Multiplex to proceed with the altered design as set out in WSP-EW-XX-SK-771-111 Rev 01 to those areas highlighted on the attached marked up sketch.</p> <p>The areas not highlighted are the kerb line on the south edge of the road (hospital frontage) and the pedestrian crossing to the Laboratory Block. Access to the patient transport drop off area is to be via dropped kerbs at entrance and exit to avoid re-visitation of the TRO.</p>	
2549	PMI 281 -	CAMPUS MASTERPLAN DRAWING	07/04/2014	<p>Please provide quotation to update campus masterplan drawing, per attached documentation. Provide quotation by noon Friday 11th April 2014 based on attached information.</p>	
2552	PMI 282	ARTS PROJECT DIGNIFIED SPACES EQUIPMENT IN 21 ROOMS	07/04/2014	<p>The Board confirm the transfer of Group 3 furniture to Group1 in 21 rooms as part of the Dignified Spaces project.</p> <p>The Board confirm the transfer of the equipment listed on the attached schedule from Group 3 to Group 1. This equipment will now be supplied and installed by Brookfield Multiplex, to include bespoke printed fabrics to chairs, sofas all as per arts strategy. Group1 equipment list to be updated and associated costs included within the list.</p>	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p> <p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p>

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) **DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014).**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/23014) It was noted that the

neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) **GW, DS and PM to meet as GW has the drawings for review (04/04/2014)**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application "duly made" and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need

to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) **It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014)**

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) **DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the) storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing.(20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) **DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMCL and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014). DH acknowledged that a revised set of drawings had appeared on his desk for review. FW was concluding the bedhead issue with BRooney. (27/03/2014) **DP noted that it was understood that DH, FW, KH and BR had agreed the technical aspects of the bedheads. DP would prepare a schedule for issuing via RDD. Pm advised he would liaise with DH (04/04/2014)**

Dignified spaces – no removal of equipment from group 3 to 1 and will be resolved by PM. This item requires further discussion. Design company require colour matches. PM asked for further details in order to progress this to conclusion. GW noted that if this moves to Group1 from 3 then this would incur a contractual change and therefore needs to be further discussed before decision taken (06/03/2014). PM agreed to discuss with RStewart on how best to progress. A process is required to ensure payment can be progressed possibly by moving funding within the equipment list (13/03/2014) GW noted that feedback from PM was awaited (20/03/2014) PM noted that he is in discussion with RStewart re transfer of money from the Equipment Budget to BMCL for the purchase of basic chairs so BMCL can then cover the chairs with the bespoke fabric. (27/03/2014) **PM to provide as PMI – Item to be removed once PMI raised (04/04/2014)**

- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) It was noted that the costs were awaited (20/03/2014) DH advised that the spec for the RO plant needed to be written into the spec for the decontamination washers. The change control process needed to be concluded. There had been a change to practice since the ERs had been written. BMCL asked to provide the spec asap as tender for the washer/dryers 31<sup>st</sup> May 2014. **DP advised that the spec would be provided to DH and PM asap (04/04/2014)**
- Other works outwith the redline – GW asked for clarity on the works that are outwith discussions with GCC. DH noted that a clear drawing from WSP required to show work to be carried out by BMCE as part of their works. Concern that BMCE will be asked to carry out works on the opposite side of Hardgate Road and therefore clarity required. DH asked for the drawings so that a review of these by project team can be carried out – GW will progress (13/03/2014) It was noted that BMCL will progress the mark-up identifying the works within and outwith BMCL scope on the basis of the WSP drawing (27/03/2014) **GW noted that he had a drawing from WSP and suggested that BMCL and NHS meet once he had initially reviewed the drawing (04/04/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) **DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in due course (04/04/2014)**
- Operational signage – this matter needs to be discussed with DH. BMCL do not consider that 'Please wash your hands' signage is a BMCL item as has never been a part of wayfinding before. DH noted that the operational signage is advised in the NHS Guidance document. GW acknowledged that the signage was included in the NHS document however this was a guidance doc only (20/03/2014) It was noted that the operational signage was to be discussed internally. DL advised that RCaldерwood is interested in the principles of the signage (24/03/2014) **DH to confirm back to BMCL that there is no issue and item is to be closed (04/04/2014)**

- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for the Board/Solus to supply and fit the TVs. (20/03/2014) **DH advised that he would meet with MM and FW to identify the positioning of the TV, Directory notice board, etc. (27/03/2014)**
- Link bridge break-in – AFe advised that there was to be a meeting held with BAM. AFe queried who would be responsible for the removal of panels as if it is BAM then they need to take over the ownership off/warranty. AFe acknowledged that it is a knock-out panel. PM agreed to consider (04/04/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 16/04/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDerment at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

			<p>19/12/2013 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>09/01/2014 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>16/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>23/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>30/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>06/02/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>13/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>20/02/2014 DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>06/03/2014 DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p> <p>13/03/2014 Information is now with Wallace Whittle for final review</p> <p>20/03/2014 DP reported that Wallace Whittle had information and also with FC for final check. This is anticipated to be returned next week and then this item can be closed</p> <p>27/03/2014 DH advised that there had been a recount of the points and there is an increase in the number of points therefore potential impact on switches (circa 400 extra). DP noted that Schneider had initially provided an inaccurate point count and the recheck identified additional requirements. It had been expected that the initial point count would have included an allowance and that the overall number predicted a while ago was reasonably accurate however it is the locations which have caused the issue. DH suggested that there may be a requirement for additional stackable switches/additional modules. DP reported that the NHS order to Capita is very specific. DH noted that a further check re cooling would need to be undertaken once the work done to confirm the point count had been concluded.</p> <p>02/04/2014 DP noted that the design had been provided by WW. A proper point count was under review to check for any impact – information to be provided to DH later that day.</p> <p>10/04/2014 GW advised that DP had suggested that this is in an ok position.</p> <p>GW noted that the NHS were to check with FC that he has the same view as DP. PM noted that FC is happy with the BMCL position. DH noted that this would need to be covered by a derogation and a PMI should be issued to confirm way forward.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p>	

			13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014	DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. <b>Noted that DR was to meet with DL.</b>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. <b>GW to provide back-up information</b> <b>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</b>	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing	

			03/04/2014	<p>GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then they are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p>	
			10/04/2014	<p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystallises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p>	
20982	BMCL-EWN-000144	Increased Height of NDC Cart	19/03/2014	<p>Information recently received by BM indicates an overall height increase in the size of the NDC cart from that previously advised. BM have based our minimum door clearance height on a worst case cart height of 1690mm, as advised by K Connelly to BM in her email dated 22nd March 2010, attached and as per the original cart supplied by the Board. There was no information contained in the AGV / Cart compatibility schedule for the NDC cart contained in the FBC Appendix K document, also attached. BM understand that the cart now proposed by the Board for use by NDC is 1725mm which will prove unworkable in all AGV routes as it would give an out-turn height of 2140mm not 2105mm within a designed signed off door strategy opening of 2150mm, therefore not allowing adequate clearance, as per attached door clearance document.</p> <p><i>Text lifted from Notes Section:</i>  AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and</p>	

			20/03/2014	<p>DS will further review (06/03/2014). There appears to be some confusion on the carts that could possibly be affected by the door clearance issues. And that these lower tolerances would only be on the NDC carts (1725). DP has asked Swisslog for information on reducing heights and a clear understanding of the areas affected (13/04/2014) Cross reference with EW</p> <p>GW advised that there was concern that the NDC cart did not work with the BMCL design – doesn't work with the sub-base solution. DP advised that the sub-base had been redesigned and will not be greater than 390mm. DH enquired if there was any option to modify the AGV lift and DP confirmed this was not an option. DH suggested that there were circa 24 doors which were impacted on (AGV needs to pass through). GW advised that NHollowell had been requested to confirm the impact to other doors which the NDC cart needs to be manually put through. It was noted that it was not proposed that circa 700 doors would be changed. It was proposed to discuss with KC and identify potential to make the NDC cart deliveries work at the drop of points. It would be beneficial to get an actual measure of the height of the circa 24 doors. GW advised that he had asked NHollowell to mark-up a drawing and would get the floor plans marked up indicating the heights of the doors so can establish the issue.</p>	
			27/03/2014	DH advised that RS had confirmed that the cart height is 1725 and this is a special NHS cart. RS is organizing a meeting with NDC & KC to discuss the potential of only using the 1680 carts for the new south hospitals. DS suggested that it would be beneficial to get the cart which is actually to be used so it can be trialed.	
			03/04/2014	DS advised that he understood that RS was meeting with NDC w/c 07/04/2014. DR enquired about the 13 basement doors which may need to be changed if the height of the cart goes to 1725mm. GW advised that there were 3 doors in the Labs which may need to be changed however NHollowell had carried out a lot of work reviewing the door impacts and a marked up drawing had been prepared of the impacted doors.	
			10/04/2014	DH noted that there was a meeting later that day with NDC. DS requested that feedback be provided asap.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 16/04/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p>	
			19/09/2013		
			26/09/2013		
			03/10/2013		

A51679245

			10/10/2013	WIP by BMCL
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over

			10/04/2014	<p>the weekend to prepare the scope of works so can put out to tender.</p> <p>GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014  23/01/2014  30/01/2014  13/02/2014  27/02/2014 06/03/2014  20/03/2014  27/03/2014  04/04/2014  10/04/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 16/04/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status

			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.	
			12/12/2013	DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.	
			19/12/2013	DS confirmed that response still awaited from Building Control	
			09/01/2014	DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.	
			23/01/2014	DS was scheduled to meet with Raymond Barlow.	
			30/01/2014	DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
			13/02/2014	DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.	
			20/02/2014	DS advised that he had written to RBarlow on the 13 <sup>th</sup> and 20 <sup>th</sup> Feb specifically on this item and was awaiting a response.	
			27/02/2014	response is anticipated imminently.	
			06/03/2014	DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a “view”. This requires an application to be made and BMCE are progressing this.	

A51679245

			13/03/2014 20/03/2014 27/03/2014  10/04/2014	Confirmation required when "view" application will be submitted – DP agreed to progress DP advised that he would liaise with JMurray re date for submission of the 'view'. DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues.  DS advised that RBarlow is currently on leave and he would chase up asap. DH noted that Building Control had thought that there was no previous omissions from aseptic. DH had advised Jim Munro that the additional spaces were small and explained the criticality of the spaces. JMunro had advised that he would liaise with Brian Tierney.	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013    17/10/2013  24/10/2013  31/10/2013 07/11/2013 23/01/2013  28/01/2013   30/01/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/04/2014	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed. DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top. Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish. Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss. GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH. Instruction will be amended as requested by BMCL. GW to advise the cost. Costs awaited GW agreed to process today GW agreed to progress – PMI has been amended to correct product and removed "concrete" – GW to provide costs	07/11/2013

			20/03/2014 27/03/2014 04/04/2014  10/04/2014	<p>DH suggested that the drawing had been issued the previous day and would progress asap.</p> <p>GW advised that PHealth was pursuing the cost information.</p> <p>PM advised that the NHS Had received a drawing on 03/04/2014 which would be reviewed asap. It was noted that BMCL would review the pricing on the basis of the drawing. DS enquired if the drawing was to be put through as formal RDD and this was confirmed.</p> <p>DS advised that he would take the PMI as instructed and will catch the drawing as as-builts and record on the RDD schedule. PM confirmed that updating the drawing as part of the as-builts was satisfactory. PM would email GBurnett to confirm that he was satisfied with the most recent layout provided by BMCL.</p>	
2476	PMI 275	ADULT AND CHILDREN'S HOSPITALS - WIRELESS ACCESS POINTS	13/03/2014 20/03/2014 27/03/2014 04/04/2014  10/04/2014	<p>The Board propose to substitute approximately 550 @ 2600 WAP's (Contract purchase) with 4G WAP's (Board purchase) to be installed in locations where WAP's have still to be installed. Exact quantity and locations to be identified by Board.</p> <p>The Board propose to issue 4G compatible WAP's (Model No. 3700) to be installed in circa 1 in 5 locations where WAP's have not yet been installed. BMCE to provide an equivalent number of 2600 WAP's contract purchase) to the Board for use elsewhere.</p> <p>Warranty implications for the 4G 3700 WAP's will remain with NHS GG&amp;C and similarly warranties for the 2600 WAP's will remain with BMCE.</p> <p>A meeting is to be convened as soon as possible to agree the basis for selecting locations for the 4G 3700 WAP's and also confirm final quantities.</p> <p>NHS to provide 550 and BMCE to provide 550 back. A meeting is arranged for Friday to clarify positions and numbers</p> <p>DH noted that a swap arrangement was not as simple as first thought. Boston will be required to provide a high level cost. The positions for the 4G WAP need to be identified.</p> <p>DH noted that he had received costs and had forwarded these costs to IT to ask how they propose to pay for the required i.e. survey to identify the positioning of the WAPs.</p> <p>GW noted that the costs had been provided to the NHS and PM advised that he would review. It was noted that there had been discussion re NHS Getting Boston to do the design and BCL to procure Boston to install.</p> <p>DH noted that the NHS were proceeding on the basis that it is a direct instruction. GW noted that BMCL would want the works to be carried out post PC. DH advised that carrying out the works would mean that there is abortive work and there is no liability on BMCL as is a Boston design and is only a substation of the WAPs not a relocation of WAPs.</p>	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	07/03/2014	<p>The Board request costs for the proposed enhancements noted below.</p> <p>The Board request costs for the additional resilience of MGPS systems as follows;</p> <ol style="list-style-type: none"> <li>1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>3) Oxygen loop within Adult Hospital tower.</li> <li>4) Oxygen loop within Children's Hospital (M32 - M38).</li> <li>5) Vacuum loop within Adult Hospital tower.</li> <li>6) Vacuum loop within Children's Hospital (M32 - M38).</li> </ol>	

2549	PMI 281 -	CAMPUS MASTERPLAN DRAWING	07/04/2014  10/04/2014  16/04/2014	<p>Please provide quotation to update campus masterplan drawing, per attached documentation. Provide quotation by noon Friday 11th April 2014 based on attached information.</p> <p>DS advised he would liaise with Gillespies regarding quote for updating the masterplan drawing. DL suggested that a meeting to go over the masterplan would be beneficial and DS agreed to organize a meeting for w/c 14/04/2014</p> <p>Additional Notes added 16/04/2014</p> <p>Please proceed with preparation of the masterplan drawing in line with meeting on 15<sup>th</sup> April 2014, and attached quotation in amount of £10,713.87 ex VAT. Interim meeting planned for Thursday 8<sup>th</sup> May 2014, time to be confirmed.</p>	
2552	PMI 282	ARTS PROJECT DIGNIFIED SPACES EQUIPMENT IN 21 ROOMS	07/04/2014   10/04/2014	<p>The Board confirm the transfer of Group 3 furniture to Group1 in 21 rooms as part of the Dignified Spaces project.</p> <p>The Board confirm the transfer of the equipment listed on the attached schedule from Group 3 to Group 1. This equipment will now be supplied and installed by Brookfield Multiplex, to include bespoke printed fabrics to chairs, sofas all as per arts strategy. Group1 equipment list to be updated and associated costs included within the list.</p> <p>Item closed – equipment list changed</p>	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014   10/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p> <p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p>	
2556	PMI 284	Provision of Interface on East Rd Fire Main for connection to TLF & Offices	10/04/2014	<p>The Board request that to allow future connection of the TLF &amp; Offices fire hydrants to the site wide ring main, the following are incorporated in the location identified on the sketch below: 1. 1 x 250mm x150mm Branch Tee 2. 1 x 150mm isolation valve 3. 2 x 250mm Stub Flanges 4. 3 x 150mm stub Flanges 5. 1 x Short tail 150mm 6. 1 x set of Valve chambers and cover For clarity, the pipe sizes noted above are internal and the TLF &amp; Offices connection pipe work has an external diameter of 180mm</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
NONE					

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) **DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014).**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/23014) It was noted that the

neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) **GW, DS and PM to meet as GW has the drawings for review (04/04/2014)** PM advised that he was awaiting the updated Neo-natl drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water

drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advise had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) **DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014)**

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) **DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the) storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to

undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) **DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMCL and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014). DH acknowledged that a revised set of drawings had appeared on his desk for review. FW was concluding the bedhead issue with BRooney. (27/03/2014) DP noted that it was understood that DH, FW, KH and BR had agreed the technical aspects of the bedheads. DP would prepare a schedule for issuing via RDD. PM advised he would liaise with DH (04/04/2014) **DH noted that the revised drawing had been issued. The additional points will be captured on the equipment list. DH to liaise with DP as the schedule is signed-off so there should be no need for a PMI. (10/04/2014)**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) It was noted that the costs were awaited (20/03/2014) DH advised that the spec for the RO plant needed to be written into the spec for the decontamination washers. The change control process needed to be concluded. There had been a change to practice since the ERs had been written. BMCL asked to provide the spec asap as tender for the washer/dryers 31<sup>st</sup> May 2014. **DP advised that the spec would be provided to DH and PM asap (04/04/2014) DH to confirm if this is an equipment list item and provide feedback. (10/04/2014)**
- Other works outwith the redline – GW asked for clarity on the works that are outwith discussions with GCC. DH noted that a clear drawing from WSP required to show work to be carried out by BMCE as part of their works. Concern that BMCE will be asked to carry out works on the opposite side of Hardgate Road and therefore clarity required. DH asked for the drawings so that a review of these by project team can be carried out – GW will progress (13/03/2014) It was noted that BMCL will progress the mark-up identifying the works within and outwith BMCL scope on the basis of the WSP drawing (27/03/2014) GW noted that he had a drawing from WSP and suggested that BMCL and NHS meet once he had initially reviewed the drawing (04/04/2014) **GW advised that he now had a drawing and proposed to mark-up the BMCL scope onto the drawing and then liaise with the NHS re any other bits. PM requested that BMCL issue the drawing via Aconex asap. (10/04/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) **DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014)**

- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for the Board/Solus to supply and fit the TVs. (20/03/2014) DH advised that he would meet with MM and FW to identify the positioning of the TV, Directory notice board, etc. (27/03/2014) DH and advised that the NCH was to be resolved and he would liaise with GBurnett (10/04/2014)
- Link bridge break-in – AFe advised that there was to be a meeting held with BAM. AFe queried who would be responsible for the removal of panels as if it is BAM then they need to take over the ownership off/warranty. AFe acknowledged that it is a knock-out panel. PM agreed to consider (04/04/2014) AFe noted that BMCL may not need to take out panel for BAM as their steelwork sits slightly back from the link bridge. (10/04/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 23/04/2014:

<div style="float: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDerment at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

			<p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	<p>holiday but that she would chase this up.</p> <ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul> <p>DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve</p>	

			<p>any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>12/12/2013 DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>19/12/2013 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>09/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>16/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>23/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>30/01/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>06/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p> <p>13/02/2014 DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p> <p>20/02/2014 DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014</p> <p>06/03/2014 Information is now with Wallace Whittle for final review</p> <p>13/03/2014 DP reported that Wallace Whittle had information and also with FC for final check. This is anticipated to be returned next week and then this item can be closed</p> <p>20/03/2014 DH advised that there had been a recount of the points and there is an increase in the number of points therefore potential impact on switches (circa 400 extra). DP noted that Schneider had initially provided an inaccurate point count and the recheck identified additional requirements. It had been expected that the initial point count would have included an allowance and that the overall number predicted a while ago was reasonably accurate however it is the locations which have caused the issue. DH suggested that there may be a requirement for additional stackable switches/additional modules. DP reported that the NHS order to Capita is very specific. DH noted that a further check re cooling would need to be undertaken once the work done to confirm the point count had been concluded.</p> <p>27/03/2014 DP noted that the design had been provided by WW. A proper point count was under review to check for any impact – information to be provided to DH later that day.</p> <p>02/04/2014 GW advised that DP had suggested that this is in an ok position.</p> <p>10/04/2014 GW noted that the NHS were to check with FC that he has the same view as DP. PM noted that FC is happy with the BMCL position. DH noted that this would need to be covered by a derogation and a PMI should be issued to confirm way forward.</p> <p>17/04/2014 DH advised confirmation will be provided via PMI including the Rev 05 schedule</p>	
--	--	--	--	--

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014</p> <p>27/03/2014 03/04/2014</p> <p>10/04/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014 27/03/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	<p>10/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p> <p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p> <p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the</p>	

			<p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	<p>number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking. The traffic lights reps at GCC have suggested that the traffic arrangements are not appropriate. A set of notes is awaited to identify what has been previously been discussed which AFe will obtain the notes. DS stressed that BMCL feel that the changes need to be resisted.</p>

20982	BMCL-EWN-A51679245	Increased Height of NDC	19/03/2014	Information recently received by BM indicates an overall height increase in the size of the NDC cart from	
-------	--------------------	-------------------------	------------	---	--

000144	Cart		<p>that previously advised. BM have based our minimum door clearance height on a worst case cart height of 1690mm, as advised by K Connelly to BM in her email dated 22nd March 2010, attached and as per the original cart supplied by the Board. There was no information contained in the AGV / Cart compatibility schedule for the NDC cart contained in the FBC Appendix K document, also attached. BM understand that the cart now proposed by the Board for use by NDC is 1725mm which will prove unworkable in all AGV routes as it would give an out-turn height of 2140mm not 2105mm within a designed signed off door strategy opening of 2150mm, therefore not allowing adequate clearance, as per attached door clearance document.</p> <p><i>Text lifted from Notes Section:</i>  AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and DS will further review (06/03/2014). There appears to be some confusion on the carts that could possibly be affected by the door clearance issues. And that these lower tolerances would only be on the NDC carts (1725). DP has asked Swisslog for information on reducing heights and a clear understanding of the areas affected (13/04/2014) Cross reference with EW</p> <p>20/03/2014 GW advised that there was concern that the NDC cart did not work with the BMCL design – doesn't work with the sub-base solution. DP advised that the sub-base had been redesigned and will not be greater than 390mm. DH enquired if there was any option to modify the AGV lift and DP confirmed this was not an option. DH suggested that there were circa 24 doors which were impacted on (AGV needs to pass through). GW advised that NHollowell had been requested to confirm the impact to other doors which the NDC cart needs to be manually put through. It was noted that it was not proposed that circa 700 doors would be changed. It was proposed to discuss with KC and identify potential to make the NDC cart deliveries work at the drop of points. It would be beneficial to get an actual measure of the height of the circa 24 doors. GW advised that he had asked NHollowell to mark-up a drawing and would get the floor plans marked up indicating the heights of the doors so can establish the issue.</p> <p>27/03/2014 DH advised that RS had confirmed that the cart height is 1725 and this is a special NHS cart. RS is organizing a meeting with NDC &amp; KC to discuss the potential of only using the 1680 carts for the new south hospitals. DS suggested that it would be beneficial to get the cart which is actually to be used so it can be trialed.</p> <p>03/04/2014 DS advised that he understood that RS was meeting with NDC w/c 07/04/2014. DR enquired about the 13 basement doors which may need to be changed if the height of the cart goes to 1725mm. GW advised that there were 3 doors in the Labs which may need to be changed however NHollowell had carried out a lot of work reviewing the door impacts and a marked up drawing had been prepared of the impacted doors.</p> <p>10/04/2014 DH noted that there was a meeting later that day with NDC. DS requested that feedback be provided asap.</p> <p>17/04/2014 <b>Item closed. DP confirmed that have 2150mm clear to work within. DS advised that he had a schedule of the doors impacted upon i.e. circa 3 in the labs and 14 in the basement which the AGV goes through. AFe agreed to check the door heights later that day.</b></p>

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2012</p> <p>07/11/2013</p> <p>21/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

			<p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 <b>PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014 An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>16/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>23/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>30/01/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>13/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is</p>	

			27/02/2014 06/03/2014  20/03/2014 27/03/2014  04/04/2014 10/04/2014  17/04/2014	<p>awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days. Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p>

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 23/04/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013   19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>PM noted this was WIP.</p> <p>DS advised that confirmation was awaited from Building Control re the sprinkler omission.</p> <p>Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</p> <p>Response awaited from Building Control</p>	

A51679245

			<p>21/11/2013 28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>23/01/2014 30/01/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014 06/03/2014</p> <p>13/03/2014 20/03/2014 27/03/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	<p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p>DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p>DS was scheduled to meet with Raymond Barlow.</p> <p>DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</p> <p>DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.</p> <p>DS advised that he had written to RBarlow on the 13<sup>th</sup> and 20<sup>th</sup> Feb specifically on this item and was awaiting a response.</p> <p>response is anticipated imminently.</p> <p>DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.</p> <p>Confirmation required when "view" application will be submitted – DP agreed to progress</p> <p>DP advised that he would liaise with JMurray re date for submission of the 'view'.</p> <p>DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues.</p> <p>DS advised that RBarlow is currently on leave and he would chase up asap. DH noted that Building Control had thought that there was no previous omissions from aseptic. DH had advised Jim Munro that the additional spaces were small and explained the criticality of the spaces. JMunro had advised that he would liaise with Brian Tierney.</p> <p>DS advised that he was scheduled to meet with RBarlow on 23/04/2014</p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>11/10/2013</p> <p>17/10/2013</p>	<p>Confirmation of requirements for floor screeds to 3 rooms.</p> <p>Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p> <p>PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that</p>	07/11/2013

			<p>24/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>23/01/2013</p> <p>28/01/2013</p> <p>30/01/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/04/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>17/04/2014</p>	<p>ACFlooring will carry-out the works.</p> <p>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed.</p> <p>DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows:</p> <p>The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.</p> <p>Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.</p> <p>GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH.</p> <p>Instruction will be amended as requested by BMCL. GW to advise the cost.</p> <p>Costs awaited</p> <p>GW agreed to process today</p> <p>GW agreed to progress – PMI has been amended to correct product and removed “concrete” – GW to provide costs</p> <p>GW advised that he had reviewed and would discuss with DH.</p> <p>GW and DH to meet to conclude</p> <p>DH advised this item had been concluded as an equipment list item. Agreed item could be closed.</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	<p>29/01/2014</p>	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p> <p>NSGH Critical Care - 1 indicator panel.</p> <p>NCH Workshop - 2 mimic panels.</p> <p>NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.</p> <p>NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p>	

			<p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	<p>DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>DP agreed to pursue with Mercury</p> <p>No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</p> <p>GW suggested that the costs had been provided however he would recheck and reissue asap if required. GW, DH and DP to meet to discuss.</p> <p>GW advised that he had a cost which he was debating with Mercury therefore the cost had not yet been sent to the NHS.</p> <p>GW advised that he had the cost information and needed to discuss 1 query with JBailey and thereafter would provide the information to the NHS asap</p> <p>DH agreed to discuss with GW and JB on return from GW's leave.</p>	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	<p>10/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	<p>Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification.</p> <p>PM advised that he would provide trolley dimensions to GB and DS asap.</p> <p>DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info.</p> <p>Sketches with Board early next week and then costs will follow asap thereafter.</p> <p>DS advised that the initial proposals sketched up by Nightingales did not fully address the brief and that further sketches had been requested – BMCL to chase up</p> <p>Drawing received and returned with comments relating to the trolley size. Revised drawing awaited in order that this can be progressed,</p> <p>DH suggested that the drawing had been issued the previous day and would progress asap.</p> <p>GW advised that PHealth was pursuing the cost information.</p> <p>PM advised that the NHS Had received a drawing on 03/04/2014 which would be reviewed asap. It was noted that BMCL would review the pricing on the basis of the drawing. DS enquired if the drawing was to be put through as formal RDD and this was confirmed.</p> <p>DS advised that he would take the PMI as instructed and will catch the drawing as as-builts and record on the RDD schedule. PM confirmed that updating the drawing as part of the as-builts was satisfactory. PM would email GBurnett to confirm that he was satisfied with the most recent layout provided by BMCL.</p> <p>PM advised that he had received drawings through RDD and will return back by COP that day.</p>	
2476	PMI 275	ADULT AND CHILDREN'S HOSPITALS - WIRELESS ACCESS POINTS		<p>The Board propose to substitute approximately 550 @ 2600 WAP's (Contract purchase) with 4G WAP's (Board purchase) to be installed in locations where WAP's have still to be installed. Exact quantity and locations to be identified by Board.</p> <p>The Board propose to issue 4G compatible WAP's (Model No. 3700) to be installed in circa 1 in 5 locations where WAP's have not yet been installed. BMCE to provide an equivalent number of</p>	

			<p>2600 WAP's contract purchase) to the Board for use elsewhere.</p> <p>Warranty implications for the 4G 3700 WAP's will remain with NHS GG&amp;C and similarly warranties for the 2600 WAP's will remain with BMCE.</p> <p>A meeting is to be convened as soon as possible to agree the basis for selecting locations for the 4G 3700 WAP's and also confirm final quantities.</p> <p>NHS to provide 550 and BMCE to provide 550 back. A meeting is arranged for Friday to clarify positions and numbers</p> <p>DH noted that a swap arrangement was not as simple as first thought. Boston will be required to provide a high level cost. The positions for the 4G WAP need to be identified.</p> <p>DH noted that he had received costs and had forwarded these costs to IT to ask how they propose to pay for the required i.e. survey to identify the positioning of the WAPs.</p> <p>GW noted that the costs had been provided to the NHS and PM advised that he would review. It was noted that there had been discussion re NHS Getting Boston to do the design and BCL to procure Boston to install.</p> <p>DH noted that the NHS were proceeding on the basis that it is a direct instruction. GW noted that BMCL would want the works to be carried out post PC. DH advised that carrying out the works would mean that there is abortive work and there is no liability on BMCL as is a Boston design and is only a substation of the WAPs not a relocation of WAPs.</p> <p>DH advised that the item can be closed. NHS IT to liaise directly with Boston. DH agreed to check with FC.</p>	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	<p>07/03/2014</p> <p>The Board request costs for the proposed enhancements noted below.</p> <p>The Board request costs for the additional resilience of MGPS systems as follows;</p> <p>1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar.</p> <p>2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar.</p> <p>3) Oxygen loop within Adult Hospital tower.</p> <p>4) Oxygen loop within Children's Hospital (M32 - M38).</p> <p>5) Vacuum loop within Adult Hospital tower.</p> <p>6) Vacuum loop within Children's Hospital (M32 - M38).</p> <p>The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits.</p> <p>DH advised this was WIP</p> <p>DH advised that he was awaiting a breakdown of the costs for each heading.</p> <p>GW noted that Mercury have advised that some of the above is already in their scope of works.</p> <p>DH advised that the costs had been provided and the review of the information suggests that HPI and Mercury have over-redesigned. A meeting has been scheduled to take place on 14<sup>th</sup> April with Mercury and HPI to discuss.</p> <p>DH advised that the meeting on 14<sup>th</sup> April had been a positive meeting. A VE exercise had been undertaken and report awaited.</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p>	

2511	PMI 279	Children's Hospital L3 - Medicinema Sprinkler Installation	28/03/2014  17/04/2014	Please supply and install 100mm isolation valve in sprinkler system supply pipe in Room space GWS-055 as per attached sketch.  DP agreed to progress	
2549	PMI 281 -	CAMPUS MASTERPLAN DRAWING	07/04/2014 10/04/2014  16/04/2014	Please provide quotation to update campus masterplan drawing, per attached documentation. Provide quotation by noon Friday 11th April 2014 based on attached information. DS advised he would liaise with Gillespies regarding quote for updating the masterplan drawing. DL suggested that a meeting to go over the masterplan would be beneficial and DS agreed to organize a meeting for w/c 14/04/2014  Additional Notes added 16/04/2014 Please proceed with preparation of the masterplan drawing in line with meeting on 15 <sup>th</sup> April 2014, and attached quotation in amount of £10,713.87 ex VAT. Interim meeting planned for Thursday 8 <sup>th</sup> May 2014, time to be confirmed.	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014  10/04/2014  17/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.  Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras. DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing.	
2556	PMI 284	Provision of Interface on East Rd Fire Main for connection to TLF & Offices	10/04/2014  17/04/2014	The Board request that to allow future connection of the TLF & Offices fire hydrants to the site wide ring main, the following are incorporated in the location identified on the sketch below: 1. 1 x 250mm x150mm Branch Tee 2. 1 x 150mm isolation valve 3. 2 x 250mm Stub Flanges 4. 3 x 150mm stub Flanges 5. 1 x Short tail 150mm 6. 1 x set of Valve chambers and cover For clarity, the pipe sizes noted above are internal and the TLF & Offices connection pipe work has an external diameter of 180mm AFe advised that the works had been done. DH noted that a CE needed to be agreed.	

2561	PMI 285 -	Hub room cooling - Cross ref BMCL-EWN-139	17/04/2014	The Board confirm that in order to support the Energy Targets the cooling loads for the IT Hub rooms should reflect the design as developed rather than the original loads set-out in Vol2/1 Appendix M+E 3 clause 3.15. The installation should therefore provide cooling capacity in accordance with FCU Schedule 05 Mar 14 R5.	
2562	PMI 286 -	Interventional Hybrid Theatres (THE228 & THE232)	17/04/2014	Further to the final selection of equipment supplier and development of final layout for the above rooms please position 150mm diameter cores through the floor slab in each set-out as per NSGH THE-INFx-8000H SK02 attached	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
NONE					

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). **WIP (17/0/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start

work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RC Calderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RC Calderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RC Calderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) **Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014)**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk

to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene’s perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) **DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014)**

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve’s paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) **DP noted that meeting is awaited with Horne (17/04/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was

new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS noted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) **DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMCL and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014). DH acknowledged that a revised set of drawings had appeared on his desk for review. FW was concluding the bedhead issue with BRooney. (27/03/2014) DP noted that it was understood that DH, FW, KH and BR had agreed the technical aspects of the bedheads. DP would prepare a schedule for issuing via RDD. PM advised he would liaise with DH (04/04/2014) DH noted that the revised drawing had been issued. The additional points will be captured on the equipment list. DH to liaise with DP as the schedule is signed-off so there should be no need for a PMI. (10/04/2014) **DP noted that DH and DP had met to discuss and an outline way forward. Once costs are identified will meet with the NHS to discuss. (17/04/2014).**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) It was noted that the costs were awaited (20/03/2014) DH advised that the spec for the RO plant needed to be written into the spec for the decontamination washers. The change control process needed to be concluded. There had been a change to practice since the ERs had been written. BMCL asked to provide the spec asap as tender for the washer/dryers 31<sup>st</sup> May 2014. DP advised that the spec would be provided to DH and PM asap (04/04/2014) **DH to confirm if this is an equipment list item and provide feedback. (10/04/2014) DH noted that this due to a change in practice and have got a budget for (17/04/2014)**

- Other works outwith the redline – GW asked for clarity on the works that are outwith discussions with GCC. DH noted that a clear drawing from WSP required to show work to be carried out by BMCE as part of their works. Concern that BMCE will be asked to carry out works on the opposite side of Hardgate Road and therefore clarity required. DH asked for the drawings so that a review of these by project team can be carried out – GW will progress (13/03/2014) It was noted that BMCL will progress the mark-up identifying the works within and outwith BMCL scope on the basis of the WSP drawing (27/03/2014) GW noted that he had a drawing from WSP and suggested that BMCL and NHS meet once he had initially reviewed the drawing (04/04/2014) GW advised that he now had a drawing and proposed to mark-up the BMCL scope onto the drawing and then liaise with the NHS re any other bits. PM requested that BMCL issue the drawing via Aconex asap. (10/04/2014) **DH advised that he had clarified the way forward with a marked up drawing. Cost information awaited. Noted that the Traffic lights at Hardgate Road are top fed. (17/04/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) **DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014)**
- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for the Board/Solus to supply and fit the TVs. (20/03/2014) DH advised that he would meet with MM and FW to identify the positioning of the TV, Directory notice board, etc. (27/03/2014) DH and advised that the NCH was to be resolved and he would liaise with GBurnett (10/04/2014) **DH advised that he had confirmed positioning to GB and GB is working on the design for that area. AFe advised he would check if pattress is fitted. (17/04/2014)**
- Link bridge break-in – AFe advised that there was to be a meeting held with BAM. AFe queried who would be responsible for the removal of panels as if it is BAM then they need to take over the ownership off/warranty. AFe acknowledged that it is a knock-out panel. PM agreed to consider (04/04/2014) AFe noted that BMCL may not need to take out panel for BAM as their steelwork sits slightly back from the link bridge. (10/04/2014) **AFe noted that a document re logistics to NHS. (17/04/2014)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 30/04/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDerment at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

			<p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p>	<p>holiday but that she would chase this up.</p> <ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul> <p>DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI</p>	

			28/11/2013	the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH. DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.	
			12/12/2013	DP advised that WWWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2 <sup>nd</sup> PDU which would need to be supplied by Capita.	
			19/12/2013	DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.	
			09/01/2014	Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie	
			16/01/2014	DP advised that the hub room cooling proposal would be provided to the DH & FC later that day.	
			23/01/2014	DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.	
			30/01/2014	DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.	
			06/02/2014	DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014	
			13/02/2014	DP noted that the heat loads had changed and BMCL & WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.	
			20/02/2014	DP advised that he had met with Wallace Whittle and reviewed the final proposal and planned to meet with the NHS Reps w/c 24/02/2014	
			06/03/2014	Information is now with Wallace Whittle for final review	
			13/03/2014	DP reported that Wallace Whittle had information and also with FC for final check. This is anticipated to be returned next week and then this item can be closed	
			20/03/2014	DH advised that there had been a recount of the points and there is an increase in the number of points therefore potential impact on switches (circa 400 extra). DP noted that Schneider had initially provided an inaccurate point count and the recheck identified additional requirements. It had been expected that the initial point count would have included an allowance and that the overall number predicted a while ago was reasonably accurate however it is the locations which have caused the issue. DH suggested that there may be a requirement for additional stackable switches/additional modules. DP reported that the NHS order to Capita is very specific. DH noted that a further check re cooling would need to be undertaken once the work done to confirm the point count had been concluded.	
			27/03/2014	DP noted that the design had been provided by WW. A proper point count was under review to check for any impact – information to be provided to DH later that day.	
			02/04/2014	GW advised that DP had suggested that this is in an ok position.	
			10/04/2014	GW noted that the NHS were to check with FC that he has the same view as DP. PM noted that FC is happy with the BMCL position. DH noted that this would need to be covered by a derogation and a PMI should be issued to confirm way forward.	
			17/04/2014	DH advised confirmation will be provided via PMI including the Rev 05 schedule	
			30/04/2014	Noted that PMI had been issued therefore item could be closed. Cross ref PMI 285	

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014</p> <p>27/03/2014 03/04/2014</p> <p>10/04/2014 24/04/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p><b>DL noted that DR would discuss with GW asap</b></p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014 27/03/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p><b>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</b></p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	<p>10/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p> <p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p> <p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC</p>	

			<p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p>	<p>were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were</p>	
--	--	--	---	--	--

				happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
20982	BMCL-EWN-000144	Increased Height of NDC Cart	19/03/2014	<p>Information recently received by BM indicates an overall height increase in the size of the NDC cart from that previously advised. BM have based our minimum door clearance height on a worst case cart height of 1690mm, as advised by K Connelly to BM in her email dated 22nd March 2010, attached and as per the original cart supplied by the Board. There was no information contained in the AGV / Cart compatibility schedule for the NDC cart contained in the FBC Appendix K document, also attached. BM understand that the cart now proposed by the Board for use by NDC is 1725mm which will prove unworkable in all AGV routes as it would give an out-turn height of 2140mm not 2105mm within a designed signed off door strategy opening of 2150mm, therefore not allowing adequate clearance, as per attached door clearance document.</p> <p><i>Text lifted from Notes Section:</i>  AGV cage heights – Heights were noted as being reduced in some areas that the cages are required to enter – BMCL will rectify this matter. Cages used by NDC for deliveries are noted to be higher than originally thought. It was agreed that the lift clearance was the first area to check as this is not changeable. Further review is required to ensure the cages will fit through areas required and KC/DH and DS will further review (06/03/2014). There appears to be some confusion on the carts that could possibly be affected by the door clearance issues. And that these lower tolerances would only be on the NDC carts (1725). DP has asked Swisslog for information on reducing heights and a clear understanding of the areas affected (13/04/2014) Cross reference with EW</p>	
			20/03/2014	<p>GW advised that there was concern that the NDC cart did not work with the BMCL design – doesn't work with the sub-base solution. DP advised that the sub-base had been redesigned and will not be greater than 390mm. DH enquired if there was any option to modify the AGV lift and DP confirmed this was not an option. DH suggested that there were circa 24 doors which were impacted on (AGV needs to pass through). GW advised that NHollowell had been requested to confirm the impact to other doors which the NDC cart needs to be manually put through. It was noted that it was not proposed that circa 700 doors would be changed. It was proposed to discuss with KC and identify potential to make the NDC cart deliveries work at the drop of points. It would be beneficial to get an actual measure of the height of the circa 24 doors. GW advised that he had asked NHollowell to mark-up a drawing and would get the floor plans marked up indicating the heights of the doors so can establish the issue.</p>	
			27/03/2014	<p>DH advised that RS had confirmed that the cart height is 1725 and this is a special NHS cart. RS is organizing a meeting with NDC &amp; KC to discuss the potential of only using the 1680 carts for the new south hospitals. DS suggested that it would be beneficial to get the cart which is actually to be used so it can be trialed.</p>	
			03/04/2014	<p>DS advised that he understood that RS was meeting with NDC w/c 07/04/2014. DR enquired about the 13 basement doors which may need to be changed if the height of the cart goes to 1725mm. GW advised that there were 3 doors in the Labs which may need to be changed however NHollowell had carried out a lot of work reviewing the door impacts and a marked up drawing had been prepared of the impacted doors.</p>	
			10/04/2014	<p>DH noted that there was a meeting later that day with NDC. DS requested that feedback be provided</p>	

		17/04/2014	asap. Item closed. DP confirmed that have 2150mm clear to work within. DS advised that he had a schedule of the doors impacted upon i.e. circa 3 in the labs and 14 in the basement which the AGV goes through. AFe agreed to check the door heights later that day.	
		24/04/2014	Item closed. DH requested that BMCL advise which doors that the cart on the sub-base will not go through. DS advised that the schedule indicates the doors of concern.DS, DH and KC to discuss.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 30/04/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates</p>	

A51679245

			<p>19/12/2013 09/01/2014 16/01/2014 23/01/2014</p> <p>27/02/2014 06/03/2014 13/03/2014 20/03/2014</p> <p>27/03/2014 04/04/2014 10/04/2014</p> <p>17/04/2014 24/04/2014</p>	<p>provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>Meeting to be scheduled to review some aspects of the work</p> <p>Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>AK noted that programme review was nearing completion</p> <p>AK was unable to attend and the information will be ready for discussion next week</p> <p>AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p>	

			<p>16/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>23/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>30/01/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>13/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>27/02/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>06/03/2014 Report anticipated shortly</p> <p>20/03/2014 DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>27/03/2014 DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>04/04/2014 DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>10/04/2014 GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>17/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>24/04/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p>	
21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	<p>29/04/2014 Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters;</p> <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul> <p>The Board request the submission of this report prior to the commencement of any remedial works.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 30/04/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.	
			12/12/2013	DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.	
			19/12/2013	DS confirmed that response still awaited from Building Control	
			09/01/2014	DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.	
			23/01/2014	DS was scheduled to meet with Raymond Barlow.	
			30/01/2014	DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
			13/02/2014	DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.	
			20/02/2014	DS advised that he had written to RBarlow on the 13 <sup>th</sup> and 20 <sup>th</sup> Feb specifically on this item and was awaiting a response.	
			27/02/2014	response is anticipated imminently.	
			06/03/2014	DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have	

			<p>13/03/2014 20/03/2014 27/03/2014</p> <p>10/04/2014</p> <p>17/04/2014 24/04/2014</p>	<p>now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.</p> <p>Confirmation required when "view" application will be submitted – DP agreed to progress</p> <p>DP advised that he would liaise with JMurray re date for submission of the 'view'.</p> <p>DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues.</p> <p>DS advised that RBarlow is currently on leave and he would chase up asap. DH noted that Building Control had thought that there was no previous omissions from aseptic. DH had advised Jim Munro that the additional spaces were small and explained the criticality of the spaces. JMunro had advised that he would liaise with Brian Tierney.</p> <p>DS advised that he was scheduled to meet with RBarlow on 23/04/2014</p> <p>DS advised that he had met with RBarlow the previous day and RB had said that he will get the paperwork through to BMCL asap and that he has no issue with the sprinkler omission.</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	<p>29/01/2014</p> <p>20/02/2014</p> <p>27/02/2014 06/03/2014</p> <p>27/03/2014</p> <p>04/04/2014</p> <p>10/04/2014</p>	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p> <p>NSGH Critical Care - 1 indicator panel.</p> <p>NCH Workshop - 2 mimic panels.</p> <p>NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.</p> <p>NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p> <p>DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>DP agreed to pursue with Mercury</p> <p>No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</p> <p>GW suggested that the costs had been provided however he would recheck and reissue asap if required. GW, DH and DP to meet to discuss.</p> <p>GW advised that he had a cost which he was debating with Mercury therefore the cost had not yet been sent to the NHS.</p> <p>GW advised that he had the cost information and needed to discuss 1 query with JBailey and thereafter would provide the information to the NHS asap</p>	

			17/04/2014 24/04/2015	DH agreed to discuss with GW and JB on return from GW's leave. DH advised that he wanted to discuss the panels with GW and there was a meeting later that day. DH did not agree with some of the items i.e. number of panels which was required for the 4 <sup>th</sup> floor. GW advised that he would organize for Jack to attend the meeting.	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014 13/02/2014 20/02/2014  27/02/2014 06/03/2014  13/03/2014  20/03/2014 27/03/2014 04/04/2014  10/04/2014  17/04/2014 24/04/2014	Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap. DS advised that he was awaiting the dimension of the trolley. PM noted that this had been issued the previous week but that he would check how the trolley dimension had been issued. DS agreed to check with GBurnett if he had received the dimension info. Sketches with Board early next week and then costs will follow asap thereafter. DS advised that the initial proposals sketched up by Nightingales did not fully address the brief and that further sketches had been requested – BMCL to chase up Drawing received and returned with comments relating to the trolley size. Revised drawing awaited in order that this can be progressed, DH suggested that the drawing had been issued the previous day and would progress asap. GW advised that PHealth was pursuing the cost information. PM advised that the NHS Had received a drawing on 03/04/2014 which would be reviewed asap. It was noted that BMCL would review the pricing on the basis of the drawing. DS enquired if the drawing was to be put through as formal RDD and this was confirmed. DS advised that he would take the PMI as instructed and will catch the drawing as as-builts and record on the RDD schedule. PM confirmed that updating the drawing as part of the as-builts was satisfactory. PM would email GBurnett to confirm that he was satisfied with the most recent layout provided by BMCL. PM advised that he had received drawings through RDD and will return back by COP that day. GW advised that the information had been uploaded earlier that day. PM noted that the drawings had been returned. GW noted that Paul had confirmed that the costs were based on the Nightingale drawings. PM noted that this would be an equipment list item.	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	07/03/2014          20/03/2014 27/03/2014 04/04/2014	The Board request costs for the proposed enhancements noted below. The Board request costs for the additional resilience of MGPS systems as follows;  1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar. 2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar. 3) Oxygen loop within Adult Hospital tower. 4) Oxygen loop within Children's Hospital (M32 - M38). 5) Vacuum loop within Adult Hospital tower. 6) Vacuum loop within Children's Hospital (M32 - M38).  The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits. DH advised this was WIP DH advised that he was awaiting a breakdown of the costs for each heading. GW noted that Mercury have advised that some of the above is already in their scope of works.	

			10/04/2014	DH advised that the costs had been provided and the review of the information suggests that HPI and Mercury have over-redesigned. A meeting has been scheduled to take place on 14 <sup>th</sup> April with Mercury and HPI to discuss.	
			17/04/2014	DH advised that the meeting on 14 <sup>th</sup> April had been a positive meeting. A VE exercise had been undertaken and report awaited.	
			24/04/2014	DH advised that there were some queries and he would liaise with ISandford. DP suggested that a meeting between HPI and IS was required.	
2511	PMI 279	Children's Hospital L3 - Medicinema Sprinkler Installation	28/03/2014	Please supply and install 100mm isolation valve in sprinkler system supply pipe in Room space GWS-055 as per attached sketch.	
			17/04/2014	DP agreed to progress	
			24/04/2014	It was agreed this item could be closed	
2549	PMI 281 -	CAMPUS MASTERPLAN DRAWING	07/04/2014	Please provide quotation to update campus masterplan drawing, per attached documentation. Provide quotation by noon Friday 11 <sup>th</sup> April 2014 based on attached information.	
			10/04/2014	DS advised he would liaise with Gillespies regarding quote for updating the masterplan drawing. DL suggested that a meeting to go over the masterplan would be beneficial and DS agreed to organize a meeting for w/c 14/04/2014	
			16/04/2014	Additional Notes added 16/04/2014 Please proceed with preparation of the masterplan drawing in line with meeting on 15 <sup>th</sup> April 2014, and attached quotation in amount of £10,713.87 ex VAT. Interim meeting planned for Thursday 8 <sup>th</sup> May 2014, time to be confirmed.	
			24/04/2014	DS suggested that a date/time for the meeting needed to be identified – AHirst to organise. DS enquired if there is any further drawings to be provided to BMCL for updating the masterplan. PM hoped to be able to provide further information later that day.	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9 <sup>th</sup> April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.	
			10/04/2014	Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.	

			17/04/2014 24/04/2014	DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations. PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.	
2556	PMI 284	Provision of Interface on East Rd Fire Main for connection to TLF & Offices	10/04/2014 17/04/2014 24/04/2014	The Board request that to allow future connection of the TLF & Offices fire hydrants to the site wide ring main, the following are incorporated in the location identified on the sketch below: 1. 1 x 250mm x150mm Branch Tee 2. 1 x 150mm isolation valve 3. 2 x 250mm Stub Flanges 4. 3 x 150mm stub Flanges 5. 1 x Short tail 150mm 6. 1 x set of Valve chambers and cover For clarity, the pipe sizes noted above are internal and the TLF & Offices connection pipe work has an external diameter of 180mm AFe advised that the works had been done. DH noted that a CE needed to be agreed. GW advised that he had received a quote from Land Engineering and a quote from mercury was awaited.	
2561	PMI 285 -	Hub room cooling - Cross ref BMCL-EWN-139	17/04/2014 24/04/2014	The Board confirm that in order to support the Energy Targets the cooling loads for the IT Hub rooms should reflect the design as developed rather than the original loads set-out in Vol2/1 Appendix M+E 3 clause 3.15. The installation should therefore provide cooling capacity in accordance with FCU Schedule 05 Mar 14 R5. It was agreed this item should be closed.	
2562	PMI 286 -	Interventional Hybrid Theatres (THE228 & THE232)	17/04/2014 24/04/2014	Further to the final selection of equipment supplier and development of final layout for the above rooms please position 150mm diameter cores through the floor slab in each set-out as per NSGH THE-INFx-8000H SK02 attached It was agreed this item should be closed.	
2564	PMI 287	ADULT HOSPITAL EMERGENCY DEPARTMENT 10 BAYS (PMI 272)	24/04/014	The Board confirm that BMCE should proceed with PMI 272.

# Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/23014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works.

PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water

drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advise had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) **DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014)**

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) **PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014.**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and "head" from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the) storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank

would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the refill point of the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014) **DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMLC and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014). DH acknowledged that a revised set of drawings had appeared on his desk for review. FW was concluding the bedhead issue with BRooney. (27/03/2014) DP noted that it was understood that DH, FW, KH and BR had agreed the technical aspects of the bedheads. DP would prepare a schedule for issuing via RDD. PM advised he would liaise with DH (04/04/2014) DH noted that the revised drawing had been issued. The additional points will be captured on the equipment list. DH to liaise with DP as the schedule is signed-off so there should be no need for a PMI. (10/04/2014) DP noted that DH and DP had met to discuss and an outline way forward. Once costs are identified will meet with the NHS to discuss. (17/04/2014). **DP advised that he had information from Mercury to be internally reviewed before discussion with the NHS (24/04/2014)**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) It was noted that the costs were awaited (20/03/2014) DH advised that the spec for the RO plant needed to be written into the spec for the decontamination washers. The change control process needed to be concluded. There had been a change to practice since the ERs had been written. BMCL asked to provide the spec asap as tender for the washer/dryers 31<sup>st</sup> May 2014. DP advised that the spec would be provided to DH and PM asap (04/04/2014) DH to confirm if this is an equipment list item and provide feedback. (10/04/2014) DH noted that this due to a change in practice and have got a budget for (17/04/2014) **DH advised that a PMI would be provided as the NHS would proceed with. Noted that this is an equipment list item. Renal to change from 160 to 168. (24/04/2014).**
- Other works outwith the redline – GW asked for clarity on the works that are outwith discussions with GCC. DH noted that a clear drawing from WSP required to show work to be carried out by BMCE as part of their works. Concern that BMCE will be asked to carry out works on the opposite side of Hardgate Road and therefore clarity required. DH asked for the drawings so that a review of these by project team can be carried out – GW will progress (13/03/2014) It was noted that BMCL will progress the mark-up identifying the works within and outwith BMCL scope on the basis of the WSP drawing (27/03/2014) GW noted that he had a drawing from WSP and suggested that BMCL and NHS meet once he had initially reviewed the drawing (04/04/2014) GW advised that he now had a drawing and proposed to mark-up the BMCL scope onto the drawing and then liaise with the NHS re any other bits. PM requested that BMCL issue the drawing via Aconex asap. (10/04/2014) DH advised that he had clarified the way forward

with a marked up drawing. Cost information awaited. Noted that the Traffic lights at Hardgate Road are top fed. (17/04/2014) DH advised that he had provided a clarification sketch to confirm the areas to GW. GW noted that he had asked Mercury to provide cost for lighting and would obtain a cost for the resurfacing works. (24/04/2014)

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014)
- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for the Board/Solus to supply and fit the TVs. (20/03/2014) DH advised that he would meet with MM and FW to identify the positioning of the TV, Directory notice board, etc. (27/03/2014) DH and advised that the NCH was to be resolved and he would liaise with GBurnett (10/04/2014) DH advised that he had confirmed positioning to GB and GB is working on the design for that area. AFe advised he would check if pattress is fitted for the NSCH Bus Information screens.. (17/04/2014)
- Link bridge break-in – AFe advised that there was to be a meeting held with BAM. AFe queried who would be responsible for the removal of panels as if it is BAM then they need to take over the ownership off/warranty. AFe acknowledged that it is a knock-out panel. PM agreed to consider (04/04/2014) AFe noted that BMCL may not need to take out panel for BAM as their steelwork sits slightly back from the link bridge. (10/04/2014) AFe noted that a document re logistics to NHS re works to be done re traffic management for cladding to the link bridge works. (17/04/2014)
- The traffic lights reps at GCC have suggested that the traffic arrangements are not appropriate. A set of notes is awaited to identify what has been previously been discussed which AFe will obtain the notes. DS stressed that BMCL feel that the changes need to be resisted. (17/04/2014) DS noted that there is a meeting organized to discuss w/c 28/04/2014 (24/04/2014)
- DS advised that GCC are asking for changes to other junctions and BMCL would raise an EW regarding this. (24/04/2014)
- DH advised that Multi-tone appear to be waiting on an instruction from Mercury. DP advised that costs are being and negotiated. DH suggested that the Project Team should discuss this with KMacSweeney. (24/04/2014)
- Curtain track measurements – DH advised that the NHS needed to know the curtain track measurements so that the NHS can raise an order for curtains. GW advised that he had asked Nightingale to provide this information however they were not keen to carry out this work. Paul is investigating how to identify the curtain track lengths. PM noted that a discussion was required. (24/04/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 14/05/2014:

<div style="float: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDermont at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

			<p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>08/05/2014</p>	<p>holiday but that she would chase this up.</p> <ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul> <p>DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p>	

20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the	

			<p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>30/04/2014</p> <p>08/05/2014</p>	<p>NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystallises the information which BMCL can progress on. DS would find out what the consultant expenses were to date.and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p> <p>Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.</p> <p><b>** Cross reference with PMI **</b></p>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	<p>07/05/2014</p> <p>08/05/2014</p>	<p>Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard</p> <p><b>DS noted that he had written to GCC and BMCL were proceeding on the basis of signed-off drawings</b></p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2012</p> <p>07/11/2013</p> <p>21/11/2013</p> <p>12/12/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

			09/01/2014 16/01/2014 23/01/2014	Meeting to be scheduled to review some aspects of the work Noted that AK and PM were meeting later that day to discuss BMCL queries. Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.	
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting	
			06/03/2014	AK noted that programme review was nearing completion	
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week	
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.	
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.	
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.	
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.	
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.	
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.	
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.	

20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.
			16/01/2014	An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.
			23/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.
			30/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.
			13/02/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.
			27/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.
			06/03/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days.
			20/03/2014	Report anticipated shortly
			27/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.
			04/04/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.
			10/04/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.
			17/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.
			24/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.
			08/05/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.

DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.

DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.

21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	29/04/2014	<p>Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters;</p> <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul>	
			01/05/2014.	<p>The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoitec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.</p>	
			08/05/2014	<p>PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.</p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 14/05/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p>	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	
			10/10/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission.	
			24/10/2013	Building Control information is awaited	
			07/11/2013	DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.	
			14/11/2013	Response awaited from Building Control	
			21/11/2013	Noted that Jim Murray had been asked to chase up a response from BControl.	
			28/11/2013	DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl	

A51679245

			<p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>08/05/2014</p>	<p>providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p>DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p>DS was scheduled to meet with Raymond Barlow.</p> <p>DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</p> <p>DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.</p> <p>DS advised that he had written to RBarlow on the 13<sup>th</sup> and 20<sup>th</sup> Feb specifically on this item and was awaiting a response.</p> <p>response is anticipated imminently.</p> <p>DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this.</p> <p>Confirmation required when "view" application will be submitted – DP agreed to progress</p> <p>DP advised that he would liaise with JMurray re date for submission of the 'view'.</p> <p>DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues.</p> <p>DS advised that RBarlow is currently on leave and he would chase up asap. DH noted that Building Control had thought that there was no previous omissions from aseptic. DH had advised Jim Munro that the additional spaces were small and explained the criticality of the spaces. JMunro had advised that he would liaise with Brian Tierney.</p> <p>DS advised that he was scheduled to meet with RBarlow on 23/04/2014</p> <p>DS advised that he had met with RBarlow the previous day and RB had said that he will get the paperwork through to BMCL asap and that he has no issue with the sprinkler omission.</p> <p>DS advised that RBarlow was meeting with BTierney on 29/04/2014 to progress movement on the other items.</p> <p>DH advised that it had been confirmed by JMunro at the recent Building Control meeting that all views are satisfactory – no issues – paperwork only to be progressed.</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p> <p>NSGH Critical Care - 1 indicator panel.</p> <p>NCH Workshop - 2 mimic panels.</p> <p>NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator</p>	

			<p>panels in touchdown base GW1-011.</p> <p>NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p> <p>20/02/2014 DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>27/02/2014 DP agreed to pursue with Mercury</p> <p>06/03/2014 No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</p> <p>27/03/2014 GW suggested that the costs had been provided however he would recheck and reissue asap if required. GW, DH and DP to meet to discuss.</p> <p>04/04/2014 GW advised that he had a cost which he was debating with Mercury therefore the cost had not yet been sent to the NHS.</p> <p>10/04/2014 GW advised that he had the cost information and needed to discuss 1 query with JBailey and thereafter would provide the information to the NHS asap</p> <p>17/04/2014 DH agreed to discuss with GW and JB on return from GW's leave.</p> <p>24/04/2015 DH advised that he wanted to discuss the panels with GW and there was a meeting later that day. DH did not agree with some of the items i.e. number of panels which was required for the 4<sup>th</sup> floor. GW advised that he would organize for Jack to attend the meeting.</p> <p>01/05/2014 DP advised that a meeting for later that day was being arranged.</p> <p>08/05/2014 <b>DH noted that feedback is awaited on the basis of the recent discussions with Mercury. This matter would be concluded soon.</b></p>	
2477	PMI 276	ADULT & CHILDREN'S HOSPITALS - MEDICAL GAS PIPELINE SYSTEM	<p>07/03/2014 The Board request costs for the proposed enhancements noted below.</p> <p>The Board request costs for the additional resilience of MGPS systems as follows;</p> <ol style="list-style-type: none"> <li>1) External manifold room; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>2) Children's Hospital to Adult's Hospital; a) Medical air 4 bar; b) Surgical air 7 bar.</li> <li>3) Oxygen loop within Adult Hospital tower.</li> <li>4) Oxygen loop within Children's Hospital (M32 - M38).</li> <li>5) Vacuum loop within Adult Hospital tower.</li> <li>6) Vacuum loop within Children's Hospital (M32 - M38).</li> </ol> <p>The technical issues relating to these enhancements have been discussed and the MGPS Progress Meetings and costs are required to allow assessment of benefits.</p> <p>20/03/2014 DH advised this was WIP</p> <p>27/03/2014 DH advised that he was awaiting a breakdown of the costs for each heading.</p> <p>04/04/2014 GW noted that Mercury have advised that some of the above is already in their scope of works.</p>	

			10/04/2014	DH advised that the costs had been provided and the review of the information suggests that HPI and Mercury have over-redesigned. A meeting has been scheduled to take place on 14 <sup>th</sup> April with Mercury and HPI to discuss.	
			17/04/2014	DH advised that the meeting on 14 <sup>th</sup> April had been a positive meeting. A VE exercise had been undertaken and report awaited.	
			24/04/2014	DH advised that there were some queries and he would liaise with ISandford. DP suggested that a meeting between HPI and IS was required.	
			01/05/2014	DH advised that ISandford is on site 01/05/2014 so would be able to conclude discussions and would provide a PMI later that day to confirm the way forward re pipes going across the level 4 link bridge.	
			08/05/2014	It was agreed this item could be closed. Cross reference PMI 288	
2549	PMI 281 -	CAMPUS MASTERPLAN DRAWING	07/04/2014	Please provide quotation to update campus masterplan drawing, per attached documentation. Provide quotation by noon Friday 11 <sup>th</sup> April 2014 based on attached information.	
			10/04/2014	DS advised he would liaise with Gillespies regarding quote for updating the masterplan drawing. DL suggested that a meeting to go over the masterplan would be beneficial and DS agreed to organize a meeting for w/c 14/04/2014	
			16/04/2014	Additional Notes added 16/04/2014 Please proceed with preparation of the masterplan drawing in line with meeting on 15 <sup>th</sup> April 2014, and attached quotation in amount of £10,713.87 ex VAT. Interim meeting planned for Thursday 8 <sup>th</sup> May 2014, time to be confirmed.	
			24/04/2014	DS suggested that a date/time for the meeting needed to be identified – AHirst to organise. DS enquired if there is any further drawings to be provided to BMCL for updating the masterplan. PM hoped to be able to provide further information later that day.	
			01/05/2014	PM noted that there is a meeting scheduled to take place on 8 <sup>th</sup> May to discuss/progress. It was agreed this item could be closed and CE to be issued in due course.	
			08/05/2014	It was agreed this item could be closed. Cross reference CE 055	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9 <sup>th</sup> April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.	
			10/04/2014	Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and	

			17/04/2014  24/04/2014          01/05/2014  08/05/2014	<p>camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p> <p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p> <p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p> <p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.</p> <p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p>	
2569	PMI 288	MGPS Resilience	06/05/2014          08/05/2014	<p>In order to enhance the currently compliant MGPS design to provide a greater level of resilience and flexibility, for future adaption and maintenance, the Board wish to proceed with the following works as part of the group 1 equipment installation:</p> <ol style="list-style-type: none"> <li>1. To link the Oxygen &amp; Vacuum lines across the link bridge at level 4 and to link the Oxygen line across the link bridge at level 11 in accordance with the scope of works outlined on the variation cost proposal dated 2<sup>nd</sup> May 2014.</li> <li>2. To link the respective MA4 and MA7 plants in Adult's and Children's hospitals at level 2 in accordance with the scope of works outlined on the variation cost proposal dated 2<sup>nd</sup> May 2014.</li> </ol> <p>The agreed cost variation will be reflected in the Group 1 equipment list. It was agreed this item could be closed as is an Equipment list item</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent</p>	

				areas in both locations.	
2583	PMI 290	RO Water Installation	08/05/2014	<p>The Board request that the Endoscopy Washer RO water installation is modified to provide thermal disinfection capability to align with recent best practice guidance. This option was included within the specification and is to be taken up.</p> <p>The cost implications are to be reflected within the enabling works items on the Group 1 equipment list.</p>	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014	The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
12103	CE 055	CAMPUS MASTERPLAN DRAWING – PMI 281	06/05/2014  08/05/2014	<p>The Board confirm acceptance of PMI 281 to update the Campus Masterplan drawing.</p> <p>Cost agreed - £10,718.87 inclusive of OH&amp;P, exclusive of VAT</p> <p>Meeting to discuss later that day.</p>	

# Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works.

PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) **PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014)**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to

SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application "duly made" and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advise had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) **DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014)**

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) **DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps

however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS noted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) **DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014)**

- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. DP noted that the NHS have taken out dual circuitry. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014) DP advised that there is single circuitry and FW has been asked to confirm back if dual circuitry is needed/additional gas points. The SHTM only asks for single circuitry. BMCL propose doing nothing at this time. FW has advised that there is a need for an additional 3 outlets and will obtain feedback from the users re dual circuitry. DP advised that there were 2 issues a) twin outlets and b) dual circuits. (20/2/14). 27/02/2014 SHTM requirements checked and query raised with Authorising Engineer (Medical Gas), both confirm that dual circuits are not required. Review undertaken by Board and BMCL and mercury and 3 additional outlets are required and it will be potentially be possible to add on rather than add a further length below. No PMI required as the change was the original requirement as signed off. DH noted that a meeting is set for later this morning to conclude and DH will feedback (06/03/2014). DH has reviewed drawings shown extensions and is now awaiting Mercury confirming number of locations that extension piece cannot be added. It was noted that interpretation of drawings and information had thought to be the cause of the issues (13/04/2014) DP advised that this matter was on the schedule for discussion later that day. DP noted that a PMI to progress the NHS requirements will be needed and suggested that thereafter the commercial implications could be agreed (20/03/2014). DH acknowledged that a revised set of drawings had appeared on his desk for review. FW was concluding the bedhead issue with BRooney. (27/03/2014) DP noted that it was understood that DH, FW, KH and BR had agreed the technical aspects of the bedheads. DP would prepare a schedule for issuing via RDD. PM advised he would liaise with DH (04/04/2014) DH noted that the revised drawing had been issued. The additional points will be captured on the equipment list. DH to liaise with DP as the schedule is signed-off so there should be no need for a PMI. (10/04/2014) DP noted that DH and DP had met to discuss and an outline way forward. Once costs are identified will meet with the NHS to discuss. (17/04/2014). DP advised that he had information from Mercury to be internally reviewed before discussion with the NHS (24/04/2014) **DP advised he had met with Mercury to resolve. Theatres – single trunking to be extended, Interventional – to be double banked. (08/05/2014)**
- DH noted decontamination RO water change to practice has come to light. And there will be implications to the project. DP noted that it may be possible to retro fit and he will check the scale of works and the potential costs to the project (06+/03/2014). WIP – cost issue – now sitting with DP to conclude (13/04/2014) It was noted that the costs were awaited (20/03/2014) DH advised that the spec for the RO plant needed to be written into the spec for the decontamination washers. The change control process needed to be concluded. There had been a change to practice since the ERs had been written. BMCL asked to provide the spec asap as tender for the washer/dryers 31<sup>st</sup> May 2014. DP advised that the spec would be provided to DH and PM asap (04/04/2014) DH to confirm if this is an equipment list item and provide feedback.

(10/04/2014) DH noted that this due to a change in practice and have got a budget for (17/04/2014) DH advised that a PMI would be provided as the NHS would proceed with. Noted that this is an equipment list item. Renal to change from 160 to 168. (24/04/2014). **DH advised that a PMI had been drafted for issue later that day (08/05/2014)**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) **DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014)**
- PMI 268 - GW noted that he had provided costs and needs confirmation that the costs are acceptable. DH noted that the number had been agreed at that James was to update the equipment list. AF queried the size of the TV as he has concern re the fitting of the TV and BMCL wanted to capture the install of any pattress/support/hangers that could be installed at this time. DH advised that it is for the Board/Solus to supply and fit the TVs. (20/03/2014) DH advised that he would meet with MM and FW to identify the positioning of the TV, Directory notice board, etc. (27/03/2014) DH and advised that the NCH was to be resolved and he would liaise with GBurnett (10/04/2014) DH advised that he had confirmed positioning to GB and GB is working on the design for that area. AFe advised he would check if pattress is fitted for the NCH Bus Information screens.. (17/04/2014) **PM noted that the NHS would deal with the fitting post completion (08/05/2014)**
- Link bridge break-in – AFe advised that there was to be a meeting held with BAM. AFe queried who would be responsible for the removal of panels as if it is BAM then they need to take over the ownership off/warranty. AFe acknowledged that it is a knock-out panel. PM agreed to consider (04/04/2014) AFe noted that BMCL may not need to take out panel for BAM as their steelwork sits slightly back from the link bridge. (10/04/2014) AFe noted that a document re logistics to NHS re works to be done re traffic management for cladding to the link bridge works. (17/04/2014) AFe advised that there were no issues to date (08/05/2014)
- DH advised that Multi-tone appear to be waiting on an instruction from Mercury. DP advised that costs are being and negotiated. DH suggested that the Project Team should discuss this with KMcSweeney. (24/04/2014) **DP advised that he had a report for review and Multi-tone will be contracted with at an appropriate time. (08/05/2014)**
- Curtain track measurements – DH advised that the NHS needed to know the curtain track measurements so that the NHS can raise an order for curtains. GW advised that he had asked Nightingale to provide this information however they were not keen to carry out this work. Paul is investigating how to identify the curtain track lengths. PM noted that a discussion was required. (24/04/2014) **PM noted that this item could be closed as is a Board issue. DH agreed to provide an extract from the equipment list for the rooms with curtain tracks. (08/05/2014)**
- DS noted that there were samples to be signed off and PM agreed to progress this (08/05/2014)
- DP noted that there was a plan being put into place for HV testing – currently forecasted to be between 4-8<sup>th</sup> June. BMCL would need to get dilapidation surveys. DP would liaise with IP and ASm. Need to discuss ownership of the meter at Hardgate Road. DP would issue an email to organize the meeting (08/05/2014)
- RCC/Fastlink – DH noted that there is a conflict between the drawings (08/05/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 21/05/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			20/02/2014	<p>It was noted that there was no drawings currently overdue</p>	
			26/02/2014	<p>Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3<sup>rd</sup> March 2014</p>	
			06/03/2014	<p>Timber cladding will be returned by Hugh McDermott at the end of the week</p> <p>Lead Lining information awaited for revision and return, Aseptic information awaited for review and return</p> <p>FW and DH meeting Ken Hall &amp; Brendan Rooney later today to finalise the bedhead information</p>	
			13/03/2014	<p>DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up</p>	
			20/03/2014	<p>DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.</p>	
			27/03/2014	<p>DH provided the following update:</p> <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on</li> </ul>	

			<p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>08/05/2014</p> <p>15/05/2014</p>	<p>holiday but that she would chase this up.</p> <ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul> <p>DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p>	

20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he	

			03/04/2014	<p>would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then they are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p>	
			10/04/2014	DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystallises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.	
			17/04/2014	DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.	
			24/04/2014	DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
			30/04/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.	
			08/05/2014	<b>** Cross reference with PMI **</b>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014	Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard	
			08/05/2014	<b>DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2012</p> <p>07/11/2013</p> <p>21/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc

20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.	
			16/01/2014	An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.	
			23/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			30/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			13/02/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
				DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.	
			27/02/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days.	
			06/03/2014	Report anticipated shortly	
				DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	

21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	29/04/2014	Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters; <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul>	
			01/05/2014.	The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoiltec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.	
			08/05/2014	PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.	
			15/05/2014	180 bolt fixings in total to be remediated. 35 nylon points been replaced to date.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 21/05/2014

			<div>14/11/2013 21/11/2013 28/11/2013  12/12/2013 19/12/2013 09/01/2014  23/01/2014 30/01/2014  13/02/2014 20/02/2014 27/02/2014 06/03/2014  13/03/2014 20/03/2014 27/03/2014  10/04/2014  17/04/2014 24/04/2014  01/05/2014  08/05/2014  15/05/2014</div>	<div>untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap. DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded. DS confirmed that response still awaited from Building Control DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised. DS was scheduled to meet with Raymond Barlow. DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval. DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon. DS advised that he had written to RBarlow on the 13<sup>th</sup> and 20<sup>th</sup> Feb specifically on this item and was awaiting a response. response is anticipated imminently. DS noted a change in GCC Building Control stance in relation to this matter. Previously the omission of sprinklers in this area had been treated as a simple amendment, however, they have now requested that the further revision be submitted formally for a "view". This requires an application to be made and BMCE are progressing this. Confirmation required when "view" application will be submitted – DP agreed to progress DP advised that he would liaise with JMurray re date for submission of the 'view'. DS advised that he was pursuing RBarlow for a response and he would contact RBarlow again. DS advised that he had not been advised of any issues. DS advised that RBarlow is currently on leave and he would chase up asap. DH noted that Building Control had thought that there was no previous omissions from aseptic. DH had advised Jim Munro that the additional spaces were small and explained the criticality of the spaces. JMunro had advised that he would liaise with Brian Tierney. DS advised that he was scheduled to meet with RBarlow on 23/04/2014 DS advised that he had met with RBarlow the previous day and RB had said that he will get the paperwork through to BMCL asap and that he has no issue with the sprinkler omission. DS advised that RBarlow was meeting with BTierney on 29/04/2014 to progress movement on the other items. DH advised that it had been confirmed by JMunro at the recent Building Control meeting that all views are satisfactory – no issues – paperwork only to be progressed. Item closed. Letter awaited. Any issues will be raised as a separate item</div>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	Clarification of Requirements for Renal Installation Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.	

			<p>Panel locations:  NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.  NSGH OPD Nurses Base - 2 mimic panels.  NSGH Critical Care - 1 indicator panel.  NCH Workshop - 2 mimic panels.  NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.  NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p> <p>20/02/2014 DP advised that he thought there was a few extra panels but as yet Mercury hadn't raised any issue. GW advised that Mercury had suggested that they proposed to do a check. DH advised that the mimic panels are part of the controls and infrastructure. DP advised that he had asked Mercury to confirm that their scheme is adequate but they have been unable to do this. It was noted that the issue was only for 4 mimic panels.</p> <p>27/02/2014 DP agreed to pursue with Mercury</p> <p>06/03/2014 No costs have been submitted by Mercury and it is therefore assumed that this issue can be closed. DP to confirm not later than next meeting.</p> <p>27/03/2014 GW suggested that the costs had been provided however he would recheck and reissue asap if required. GW, DH and DP to meet to discuss.</p> <p>04/04/2014 GW advised that he had a cost which he was debating with Mercury therefore the cost had not yet been sent to the NHS.</p> <p>10/04/2014 GW advised that he had the cost information and needed to discuss 1 query with JBailey and thereafter would provide the information to the NHS asap</p> <p>17/04/2014 DH agreed to discuss with GW and JB on return from GW's leave.</p> <p>24/04/2014 DH advised that he wanted to discuss the panels with GW and there was a meeting later that day. DH did not agree with some of the items i.e. number of panels which was required for the 4<sup>th</sup> floor. GW advised that he would organize for Jack to attend the meeting.</p> <p>01/05/2014 DP advised that a meeting for later that day was being arranged.</p> <p>08/05/2014 DH noted that feedback is awaited on the basis of the recent discussions with Mercury. This matter would be concluded soon.</p> <p>15/05/2014 <b>GW advised that he had told Jamie to liaise with mercury and as far as he is concerned this had been done.</b></p>	
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	<p>09/04/2014 This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p> <p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances,</p>	

			<p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>08/05/2014</p> <p>15/05/2014</p>	<p>patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p> <p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p> <p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p> <p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.</p> <p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p> <p>DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27<sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation.</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and</p>	

			15/05/2014	recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations. GW noted this is WIP	
2583	PMI 290	RO Water Installation	08/05/2014  15/05/2014	The Board request that the Endoscopy Washer RO water installation is modified to provide thermal disinfection capability to align with recent best practice guidance. This option was included within the specification and is to be taken up.  The cost implications are to be reflected within the enabling works items on the Group 1 equipment list. DH noted that he needed the revised spec urgently as will be holding up the tender documentation. Needed by tomorrow.	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014  15/05/2014	The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064. DP agreed to investigate and DH agreed to have a look at the bedhead.	
2616	PMI 292	LIG 053 (GENW24-001 & GENW24 - 004)	19/05/2014	The Board confirm, as discussed at an M&E review workshop on 16th May 2014, that the LIG053 are not required in: GENW24 - 001 GENW24 - 004  This accords with the LIG schedule as agreed, but needs to be reflected in both the as built layouts and group 1 equipment list.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
12103	CE 055	CAMPUS MASTERPLAN DRAWING – PMI 281	06/05/2014  08/05/2014	The Board confirm acceptance of PMI 281 to update the Campus Masterplan drawing.  Cost agreed - £10,718.87 inclusive of OH&P, exclusive of VAT Meeting to discuss later that day.	

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). **WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments.(13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works.

PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward

with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene’s perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) **DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c19/05/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014)**

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPS an HFS and there is a couple of queries re Steve’s paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) **DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014)**

- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS noted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014) **DS noted that RN will review the Nightingale drawings in advance of issue to the NHS (15/05/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) **DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014)**
- DP noted that there was a plan being put into place for HV testing – currently forecasted to be between 4-8<sup>th</sup> June. BMCL would need to get dilapidation surveys. DP would liaise with IP and ASm. Need to discuss ownership of the meter at Hardgate Road. DP would issue an email to organize the meeting (08/05/2014) **Meeting organized to discuss. BMCL are getting into a position to take the a-side back 4-8<sup>th</sup> June 2014. Will need paperwork from a commissioning perspective. DR suggested that BMCL could operate under a permit to work (15/05/2014)**
- RCC/Fastlink (parking bays at the front of the houses on Govan Road – DH noted that there is a conflict between the drawings (08/05/2014) DH advised that approval through RCC to remove bays. Works to be progressed as approved RCC. Agreed item could be closed. (15/05/2014)**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 28/05/2014:

<div style="text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p> <p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that</p>	

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDerment at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

			<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			<p>03/04/2014 DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>10/04/2014 DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>17/04/2014 DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>24/04/2014 DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>01/05/2014 DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>08/05/2014 DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>15/05/2014 DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p> <p>22/05/2014 DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>20/03/2014 GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>27/03/2014 DR advised that he would conclude the information for provision to DL.</p> <p>03/04/2014 DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>10/04/2014 Noted that DR was to meet with DL.</p> <p>24/04/2014 DL noted that DR would discuss with GW asap</p> <p>01/05/2014 Ongoing</p>	

20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH	

			03/04/2014	<p>noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then they are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p>	
			10/04/2014	DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystallises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.	
			17/04/2014	DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.	
			24/04/2014	DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
			30/04/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.	
			08/05/2014	<b>** Cross reference with PMI 283**</b>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014	Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard	
			08/05/2014	DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings	

22/05/2014

Meeting scheduled for Tuesday 27/05 to finalise arrival square

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 28/05/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them.</p>	

A51679245

			<p>19/12/2013 PM reported that there is a requirement for a full listed building demolition consent application and a SHED test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>09/01/2014 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>16/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>23/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposed. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p>	
--	--	--	--	--

			15/05/2014 22/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc <b>Walkabout scheduled or 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</b>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014 23/01/2014  30/01/2014 13/02/2014  27/02/2014 06/03/2014  20/03/2014 27/03/2014  04/04/2014 10/04/2014 17/04/2014 24/04/2014  08/05/2014 15/05/2014 22/05/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>DP advised that he was continuing to pursue the formal report.</p> <p><b>DP to progress</b></p>	

21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	29/04/2014	<p>Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters;</p> <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul>	
			01/05/2014.	<p>The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoiltec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.</p>	
			08/05/2014	<p>PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.</p>	
			15/05/2014 22/05/2014	<p>180 bolt fixings in total to be remediated. 35 nylon points been replaced to date.</p> <p>On-going – work being carried out during night shift – 7-8 weeks to completion. GW noted that insurance claim progressed, approved and costs agreed</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 28/05/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p>	
			10/04/2014	<p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p>	
			17/04/2014	<p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p>	
			24/04/2014	<p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p>	
			01/05/2014	<p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.</p>	
			08/05/2014	<p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p>	

			15/05/2014	<p>DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27<sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation.</p> <p>DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	<p>08/05/2014</p> <p>15/05/2014 22/05/2014</p>	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections of roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 52 remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p>	
2583	PMI 290	RO Water Installation	<p>08/05/2014</p> <p>15/05/2014 22/05/2014</p>	<p>The Board request that the Endoscopy Washer RO water installation is modified to provide thermal disinfection capability to align with recent best practice guidance. This option was included within the specification and is to be taken up.</p> <p>The cost implications are to be reflected within the enabling works items on the Group 1 equipment list.</p> <p>DH noted that he needed the revised spec urgently as will be holding up the tender documentation. Needed by tomorrow.</p> <p>Required as a priority – DP to progress</p>	
2595	PMI 291	NCH Radiology - MRI Patient Prep	<p>12/05/2014</p> <p>15/05/2014 22/05/2014</p>	<p>The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.</p> <p>DP agreed to investigate and DH agreed to have a look at the bedhead.</p>	

2616	PMI 292	LIG 053 (GENW24-001 & GENW24 - 004)	19/05/2014	<p>The Board confirm, as discussed at an M&amp;E review workshop on 16th May 2014, that the LIG053 are not required in: GENW24 - 001 GENW24 - 004</p> <p>This accords with the LIG schedule as agreed, but needs to be reflected in both the as built layouts and group 1 equipment list.</p>	
------	---------	-------------------------------------	------------	---	--

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
12103	CE 055	CAMPUS MASTERPLAN DRAWING – PMI 281	06/05/2014  08/05/2014	<p>The Board confirm acceptance of PMI 281 to update the Campus Masterplan drawing.</p> <p>Cost agreed - £10,718.87 inclusive of OH&amp;P, exclusive of VAT Meeting to discuss later that day.</p>	28.08.2014

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the

bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014)

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the

retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may be an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft

document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c 19/05/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014)

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014)
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing.(20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal

discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014) DS noted that RN will review the Nightingale drawings in advance of issue to the NHS (15/05/2014)

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014)
- DP noted that there was a plan being put into place for HV testing – currently forecasted to be between 4-8<sup>th</sup> June. BMCL would need to get dilapidation surveys. DP would liaise with IP and ASm. Need to discuss ownership of the meter at Hardgate Road. DP would issue an email to organize the meeting (08/05/2014) Meeting organized to discuss. BMCL are getting into a position to take the a-side back 4-8<sup>th</sup> June 2014. Will need paperwork from a commissioning perspective. DR suggested that BMCL could operate under a permit to work (15/05/2014)
- RCC/Fastlink (parking bays at the front of the houses on Govan Road – DH noted that there is a conflict between the drawings (08/05/2014) DH advised that approval through RCC to remove bays. Works to be progressed as approved RCC. Agreed item could be closed. (15/05/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 783

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 04/06/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol>			
			21/11/2013	PM advised that: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

A51679245

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI	
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.	
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.	
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.	
			13/02/2014	It was noted that there was no drawings currently overdue	
			20/02/2014	It was noted that there was no drawings currently overdue	
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014	
			06/03/2014	Timber cladding will be returned by Hugh McDermont at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information	
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up	
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.	
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>	

			<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			<p>03/04/2014 DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>10/04/2014 DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>17/04/2014 DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>24/04/2014 DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>01/05/2014 DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>08/05/2014 DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>15/05/2014 DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p> <p>22/05/2014 DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process</p> <p>29/05/2014 DS noted that there was 52 items overdue – mainly M&amp;E – nothing that is causing grief. It was noted that FW is reviewing the bedheads however it was thought that these were being issued for info only as per previous discussions.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>20/03/2014 GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>27/03/2014 DR advised that he would conclude the information for provision to DL.</p> <p>03/04/2014 DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>10/04/2014 Noted that DR was to meet with DL.</p>	

			24/04/2014 01/05/2014	DL noted that DR would discuss with GW asap Ongoing	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH	

			03/04/2014	<p>noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then they are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p>	
			10/04/2014	DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystallises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.	
			17/04/2014	DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.	
			24/04/2014	DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
			30/04/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.	
			08/05/2014	<b>** Cross reference with PMI 283**</b>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014	Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard	
			08/05/2014	DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings	

			22/05/2014 29/05/2014	Meeting scheduled for Tuesday 27/05 to finalise arrival square DS advised that this matter had been touched on at the PMG meeting. BMCL are progressing on the basis of the RCC. GW advised that 2 out of 3 of the ducts has been pulled across the road and works on the 3 <sup>rd</sup> duct is due to commence 2 <sup>nd</sup> June 2014. PM advised that he had written to GCC on 28/05/2014 and advised to install the upgrade of the junction at Govan Road as per section 56. Potential issue re traffic assessment identified as this was based on a 4 carriageway road.	
--	--	--	--------------------------	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 04/06/2014

						
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates</p>		

A51679245

			<p>provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL</p>	
--	--	--	--	--

			17/04/2014	to the NHS GG&C Estates Dept. DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	
			22/05/2014	DP to progress	

21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	29/04/2014	Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters; <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul>	
			01/05/2014.	The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoiltec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.	
			08/05/2014	PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.	
			15/05/2014	180 bolt fixings in total to be remediated. 35 nylon points been replaced to date.	
			22/05/2014	On-going – work being carried out during night shift – 7-8 weeks to completion. GW noted that insurance claim progressed, approved and costs agreed	
			29/05/2014	It was noted that works are ongoing and expected to be another 3-4 weeks to complete. The operatives are working night-shift and John Curry is supervising the works at night.	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/06/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.	
			10/04/2014	Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.	
			17/04/2014	DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.	
			24/04/2014	PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.	
			01/05/2014	PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.	
			08/05/2014	PM advised that a meeting with SPT had been scheduled to take place on 14 <sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information & cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.	
			15/05/2014	DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27 <sup>th</sup>	

A51679245

			29/05/2014	<p>May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p> <p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	<p>08/05/2014</p> <p>15/05/2014 22/05/2014</p> <p>29/05/2014</p>	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the</p>	

				road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.	
2583	PMI 290	RO Water Installation	08/05/2014  15/05/2014 22/05/2014 29/05/2014	<p>The Board request that the Endoscopy Washer RO water installation is modified to provide thermal disinfection capability to align with recent best practice guidance. This option was included within the specification and is to be taken up.</p> <p>The cost implications are to be reflected within the enabling works items on the Group 1 equipment list.</p> <p>DH noted that he needed the revised spec urgently as will be holding up the tender documentation. Needed by tomorrow.</p> <p>Required as a priority – DP to progress</p> <p>GW advised this item had been agreed – Equipment List item. DP advised that he had provided the revised spec to DH.</p>	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014  15/05/2014 29/05/2014	<p>The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.</p> <p>DP agreed to investigate and DH agreed to have a look at the bedhead.</p> <p>GW noted that BMCL had received costs from Mercury and would provide this to the NHS asap. PM enquired if this item would be an equipment list item and GW confirmed it could be an equipment list if wanted.</p>	
2616	PMI 292	LIG 053 (GENW24-001 & GENW24 - 004)	19/05/2014  29/05/2014	<p>The Board confirm, as discussed at an M&amp;E review workshop on 16th May 2014, that the LIG053 are not required in:</p> <p>GENW24 - 001 GENW24 - 004</p> <p>This accords with the LIG schedule as agreed, but needs to be reflected in both the as built layouts and group 1 equipment list.</p> <p>GW advised that Mercury have been asked to confirm if anything already fitted in order that any omissions can be identified.</p>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol>	

2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.  Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
----------	------------	------	---------------------------	---------	---------------------------

NONE

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) **DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start

A51679245

work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014) **GW noted that he had received the next iteration of the drawings for review the previous night. DP advised that it was proposed to bubble the drawings for those areas in INS that need to be considered re asbestos checks. (29/05/2014).**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that

there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advise had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c19/05/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014) **PM noted that the PPC reps would be onsite later that day. DS advised that a paper had been prepared to pre-empt the queries from SEPA. IP had provided comments however it was thought that these comments were NHS Management responsibility not for BMCL. IP Had further asked queries that BMCL do not intend to answer. (29/05/2014)**

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014) **It was noted that HPS/HFS meeting to be held. DS noted that it was his view that this should not impact on PC. PM advised that this matter was a Board issue so should not impact on PC (29/05/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the) storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing.(20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to

chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014) DS noted that RN will review the Nightingale drawings in advance of issue to the NHS (15/05/2014) **DP advised that DH had sent the drawings back with minor comments. From BMCL perspective the matter is closed. DH to confirm. (29/05/2014)**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) **Interim meeting held and proposals being worked up (29/05/2014)**
- RCC/Fastlink (parking bays at the front of the houses on Govan Road – DH noted that there is a conflict between the drawings (08/05/2014) DH advised that approval through RCC to remove bays. Works to be progressed as approved RCC. Agreed item could be closed however to be left on and see how develops). (15/05/2014)
- **Equipment List – GW noted that he is awaiting issue of the Equipment List by PMI as the 'line in the sand'. BMCL are progressing on the basis of manual amendments due to PMIs. FW has issued the equipment list back to BMCL with further amendments marked up. PM advised that he understood that there were 12 cameras to come off the list. DS raised concern that Nightingale may need to redo drawings. DS and GW to discuss. (29/05/2014)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 800

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 11/06/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol>			
			21/11/2013	PM advised that: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

A51679245

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDermont at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

			<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			<p>03/04/2014 DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>10/04/2014 DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>17/04/2014 DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>24/04/2014 DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>01/05/2014 DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>08/05/2014 DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>15/05/2014 DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p> <p>22/05/2014 DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process</p> <p>29/05/2014 DS noted that there was 52 items overdue – mainly M&amp;E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>20/03/2014 GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>27/03/2014 DR advised that he would conclude the information for provision to DL.</p> <p>03/04/2014 DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>10/04/2014 Noted that DR was to meet with DL.</p>	

			24/04/2014 01/05/2014 05/06/2014	DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014  27/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP. DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised	

			<p>03/04/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>30/04/2014</p> <p>08/05/2014</p>	<p>that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date.and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p> <p>Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.</p> <p><b>** Cross reference with PMI 283**</b></p>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014	<p>Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard</p>	

		08/05/2014 22/05/2014 29/05/2014  05/06/2014	DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings Meeting scheduled for Tuesday 27/05 to finalise arrival square DS advised that this matter had been touched on at the PMG meeting. BMCL are progressing on the basis of the RCC. GW advised that 2 out of 3 of the ducts has been pulled across the road and works on the 3 <sup>rd</sup> duct is due to commence 2 <sup>nd</sup> June 2014. PM advised that he had written to GCC on 28/05/2014 and advised to install the upgrade of the junction at Govan Road as per section 56. Potential issue re traffic assessment identified as this was based on a 4 carriageway road.  GW noted no change to this item	
--	--	--	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/06/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed.</p>	

A51679245

			<p>PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM</p>	
--	--	--	---	--

			<p>15/05/2014 22/05/2014 29/05/2014  05/06/2014</p>	<p>suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>GW and AFe to do walkround early w/c 19/05 with HMc</p> <p>Walkabout scheduled or 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</p> <p>PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>PM to confirm if ok with BMCL demolition list</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014  16/01/2014 23/01/2014  30/01/2014 13/02/2014  27/02/2014 06/03/2014  20/03/2014 27/03/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than ‘colander’ style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works</p>	

			<p>04/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>08/05/2014</p> <p>15/05/2014</p> <p>22/05/2014</p>	<p>cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>DP advised that he was continuing to pursue the formal report.</p> <p>DP to progress</p>	
21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	<p>29/04/2014</p> <p>01/05/2014.</p> <p>08/05/2014</p> <p>15/05/2014</p> <p>22/05/2014</p> <p>29/05/2014</p> <p>05/06/2014</p>	<p>Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters;</p> <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul> <p>The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoiltec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.</p> <p>PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.</p> <p>180 bolt fixings in total to be remediated. 35 nylon points been replaced to date.</p> <p>On-going – work being carried out during night shift – 7-8 weeks to completion. GW noted that insurance claim progressed, approved and costs agreed</p> <p>It was noted that works are ongoing and expected to be another 3-4 weeks to complete. The operatives are working night-shift and John Curry is supervising the works at night.</p> <p>GW suggested that the works may have been completed.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/06/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.	
			10/04/2014	Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.	
			17/04/2014	DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.	
			24/04/2014	PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.	
			01/05/2014	PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.	
			08/05/2014	PM advised that a meeting with SPT had been scheduled to take place on 14 <sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information & cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.	
			15/05/2014	DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27 <sup>th</sup>	

A51679245

			29/05/2014	<p>May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p> <p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p>	
			05/06/2014	<p>GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	Please provide a cost to incorporate the undernoted works into the contract.	
			15/05/2014 22/05/2014	<p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with</p>	

			29/05/2014  05/06/2014	<p>GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p>	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014  15/05/2014 29/05/2014  05/06/2014	<p>The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.</p> <p>DP agreed to investigate and DH agreed to have a look at the bedhead.</p> <p>GW noted that BMCL had received costs from Mercury and would provide this to the NHS asap. PM enquired if this item would be an equipment list item and GW confirmed it could be an equipment list if wanted.</p> <p>GW advised he was waiting confirmation from DP if any other works</p>	
2616	PMI 292	LIG 053 (GENW24-001 & GENW24 - 004)	19/05/2014   29/05/2014  05/06/2014	<p>The Board confirm, as discussed at an M&amp;E review workshop on 16th May 2014, that the LIG053 are not required in:</p> <p>GENW24 - 001 GENW24 - 004</p> <p>This accords with the LIG schedule as agreed, but needs to be reflected in both the as built layouts and group 1 equipment list.</p> <p>GW advised that Mercury have been asked to confirm if anything already fitted in order that any omissions can be identified.</p> <p>Awaiting costs from Mercury</p>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol>	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p>	

			05/06/2014	GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
--	--	--	------------	--	--

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
----------	------------	------	---------------------------	---------	---------------------------

NONE

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) **DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start

A51679245

work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014) **GW noted that he had received the next iteration of the drawings for review the previous night. DP advised that it was proposed to bubble the drawings for those areas in INS that need to be considered re asbestos checks. (29/05/2014).**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that

there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advise had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c190/5/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014) **PM noted that the PPC reps would be onsite later that day. DS advised that a paper had been prepared to pre-empt the queries from SEPA. IP had provided comments however it was thought that these comments were NHS Management responsibility not for BMCL. IP Had further asked queries that BMCL do not intend to answer. (29/05/2014)**

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014) **It was noted that HPS/HFS meeting to be held. DS noted that it was his view that this should not impact on PC. PM advised that this matter was a Board issue so should not impact on PC (29/05/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower lever to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the) storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing.(20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to

chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014) DS noted that RN will review the Nightingale drawings in advance of issue to the NHS (15/05/2014) **DP advised that DH had sent the drawings back with minor comments. From BMCL perspective the matter is closed. DH to confirm. (29/05/2014)**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) **Interim meeting held and proposals being worked up (29/05/2014)**
- RCC/Fastlink (parking bays at the front of the houses on Govan Road – DH noted that there is a conflict between the drawings (08/05/2014) DH advised that approval through RCC to remove bays. Works to be progressed as approved RCC. Agreed item could be closed however to be left on and see how develops). (15/05/2014)
- Equipment List – GW noted that he is awaiting issue of the Equipment List by PMI as the 'line in the sand'. BMCL are progressing on the basis of manual amendments due to PMIs. FW has issued the equipment list back to BMCL with further amendments marked up. PM advised that he understood that there were 12 cameras to come off the list. DS raised concern that Nightingale may need to redo drawings. DS and GW to discuss. (29/05/2014) . **GW noted that he is still in the process of getting confirmation from Mercury as to what (cameras) had already been procured. (05/06/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 817

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 19/06/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol>			
			21/11/2013	PM advised that: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

A51679245

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDermott at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>• he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

			<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			<p>03/04/2014 DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>10/04/2014 DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>17/04/2014 DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>24/04/2014 DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>01/05/2014 DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>08/05/2014 DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>15/05/2014 DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p> <p>22/05/2014 DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process</p> <p>29/05/2014 DS noted that there was 52 items overdue – mainly M&amp;E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.</p> <p>12/06/14 Board have requested the withdrawl of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>20/03/2014 GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>27/03/2014 DR advised that he would conclude the information for provision to DL.</p>	

			03/04/2014 10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/14	DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing.	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing.	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014	With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.	

			27/03/2014	DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.	
			03/04/2014	DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.	
			10/04/2014	DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.	
			17/04/2014	DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.	
			24/04/2014	DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
			30/04/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.	
			08/05/2014	<b>** Cross reference with PMI 283**</b>	

21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014	Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard
			08/05/2014 22/05/2014 29/05/2014	DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings Meeting scheduled for Tuesday 27/05 to finalise arrival square DS advised that this matter had been touched on at the PMG meeting. BMCL are progressing on the basis of the RCC. GW advised that 2 out of 3 of the ducts has been pulled across the road and works on the 3 <sup>rd</sup> duct is due to commence 2 <sup>nd</sup> June 2014. PM advised that he had written to GCC on 28/05/2014 and advised to install the upgrade of the junction at Govan Road as per section 56. Potential issue re traffic assessment identified as this was based on a 4 carriageway road. GW noted no change to this item.
			05/06/2014 12/06/14	Recent dialogue with Glasgow City Council confirms they have approved two different layouts, the Board's Section 56 in 2010 and a Fastlink plan in 2013. Key difference is the provision of a lay-by on the Fastlink drawing outside the private houses on Govan Road, providing a disabled parking bay for one of the residents. Board to supply BMCL with GCC CAD layout and then arrange meeting with Council to discuss way ahead, to avoid potential press issue.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/06/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p>	

A51679245

			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.
			12/12/2013	AK advised that he was getting a programme plotted for discussion. AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos

			<p>24/04/2014 removal.</p> <p>08/05/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>15/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>22/05/2014 GW and AFe to do walkround early w/c 19/05 with HMc</p> <p>29/05/2014 Walkabout scheduled or 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</p> <p>05/06/2014 PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>12/06/14 PM to confirm if ok with BMCL demolition list.  Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&amp;E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014 An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>16/01/2014 An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>23/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>30/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>13/02/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p>	

			<p>27/02/2014 06/03/2014</p> <p>20/03/2014 27/03/2014</p> <p>04/04/2014 10/04/2014 17/04/2014 24/04/2014</p> <p>08/05/2014 15/05/2014 22/05/2014 12/06/14</p>	<p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days. Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>DP advised that he was continuing to pursue the formal report.</p> <p>DP to progress.</p> <p>Work in progress, action on DP.</p>	
21225	NHS EW 052 -	ADULT ATRIUM – ETFE SUPPORT STEELWORK	<p>29/04/2014</p> <p>01/05/2014.</p> <p>08/05/2014</p> <p>15/05/2014</p> <p>22/05/2014</p>	<p>Further to the failure of a connector (beam and strut connection) in late March 2014 the Board request that Brookfield Multiplex provide a comprehensive report covering the following matters;</p> <ul style="list-style-type: none"> <li>• Adult Hospital – structural solution as installed, and how it works.</li> <li>• Detail of connector failure and likely cause.</li> <li>• Proposed remedial works and details of the new connector and how it will prevent similar occurrence.</li> <li>• Children's Hospital – checks undertaken and plans remedial works if any.</li> </ul> <p>The Board request the submission of this report prior to the commencement of any remedial works. Report awaited. WSP/Vectorfoitec reviewing in 1-2 weeks. Methodology agreed by WSP. Update on detail to be reviewed by Capita prior to works commencing. In manufacture – Board to review. AFe noted that BMCL are trying to identify the best way to present the information to the NHS.</p> <p>PM acknowledged receiving the report. AFe noted that the bolt replacement works would commence later that night. A sample had been undertaken. If the works that evening go to plan then the works will be continued for the next 6 – 10 nights. BMCL were still receiving reports/surveys. AFe noted that the rubber washers had caused the failure of the connection/fixing.</p> <p>180 bolt fixings in total to be remediated. 35 nylon points been replaced to date.</p> <p>On-going – work being carried out during night shift – 7-8 weeks to completion. GW noted that insurance</p>	

			29/05/2014 05/06/2014 12/06/2014	claim progressed, approved and costs agreed It was noted that works are ongoing and expected to be another 3-4 weeks to complete. The operatives are working night-shift and John Curry is supervising the works at night. GW suggested that the works may have been completed. Works to replace connectors now complete. PM confirmed the Board will require design certificate or similar for revised detail, this should be included in the H&S File on Zutec. PM confirmed report had been received and reviewed by the Board team.

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/06/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.	
			10/04/2014	Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings. PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.	
			17/04/2014	DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.	
			24/04/2014	PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.	
			01/05/2014	PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.	
			08/05/2014	PM advised that a meeting with SPT had been scheduled to take place on 14 <sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information & cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.	
			15/05/2014	DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27 <sup>th</sup>	

A51679245

			29/05/2014	<p>May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p> <p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p>	
			05/06/2014	<p>GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.</p>	
			12/06/2014	<p><b>BMCL pricing revised layout and await costs from Land Engineering. GW to follow up on order for signal replacement.</b></p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p>	
			15/05/2014	<p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p>	

			22/05/2014	WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC	
			29/05/2014	DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.	
			05/06/2014 12/06/2014	GW advised that price awaited back from Mercury and Land Engineering. <b>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</b>	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014	The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.	
			15/05/2014	DP agreed to investigate and DH agreed to have a look at the bedhead.	
			29/05/2014	GW noted that BMCL had received costs from Mercury and would provide this to the NHS asap. PM enquired if this item would be an equipment list item and GW confirmed it could be an equipment list if wanted.	
			05/06/2014 12/06/2014	GW advised he was waiting confirmation from DP if any other works <b>BMCL to proceed with these works, convert to equipment list.</b>	
2616	PMI 292	LIG 053 (GENW24-001 & GENW24 - 004)	19/05/2014	The Board confirm, as discussed at an M&E review workshop on 16th May 2014, that the LIG053 are not required in: GENW24 - 001 GENW24 - 004	
			29/05/2014	This accords with the LIG schedule as agreed, but needs to be reflected in both the as built layouts and group 1 equipment list. GW advised that Mercury have been asked to confirm if anything already fitted in order that any omissions can be identified.	
			05/06/2014	<b>Awaiting costs from Mercury</b>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.  The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.  Information confirmed as; 1) Narrative. 2) WSP Drg: WSP EW XX SK 771 117 Rev 03. 3) Bus shelter data sheet.	

				4) Bus shelter foundation detail.	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014  05/06/2014  12/06/2014	Upgrade and extension to main entrance area at ground and first floor level.  Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team. <b>Fees and programme to be provided by 16<sup>th</sup> June 2014.</b>	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status

NONE

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). **Work on going to conclude by end of June 2015. (12/06/2014).**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both

neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014) GW noted that he had received the next iteration of the drawings for review the previous night. DP advised that it was proposed to bubble the drawings for those areas in INS that need to be considered re asbestos checks. (29/05/2014). **Asbestos survey work out to tender based on drawings supplied by BMCL (12/06/2014).**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application

had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey of the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may be an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene's perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft

document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c 19/05/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014) PM noted that the PPC reps would be onsite later that day. DS advised that a paper had been prepared to pre-empt the queries from SEPA. IP had provided comments however it was thought that these comments were NHS Management responsibility not for BMCL. IP Had further asked queries that BMCL do not intend to answer. (29/05/2014). **SEPA preparing draft permit for publication by end of June 14 followed by a 28 consultation period. There are 3 outstanding matters, two have been dealt with and concern the extending of a concrete kerb for containment purposes in the yard, the specification of sealant between the yard concrete and adjoining walls, there is a final issue regarding the height of a baffle wall in the SUDS scheme and this will be dealt with, probably through an enforcement notice post issue of the permit. (12/06/2014).**

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPS an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014) It was noted that HPS/HFS meeting to be held. DS noted that it was his view that this should not impact on PC. PM advised that this matter was a Board issue so should not impact on PC (29/05/2014) **Following a meeting with HFS the tap issue appears resolved, although the Board will need to draft and implement a management process for the maintenance of the taps in critical care areas. Board to secure a letter from HFS confirming agreement or secure minutes of meeting. (12/06/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) DH to check tank deliveries (13/02/2014) DH advised that the hoses on the current lorries are 6m long. He had liaised with RNethery and had suggested that the ramps could be reversed. DS suggested that another point would need to be identified. DH noted that BMCL are responsible for the operational design and Board responsible for the clinical design. DS reported that the information re the 6m hose lengths was new information to BMCL and that all the drawings have been signed off. GW advised that he believed that you can currently pump to 25m. DH advised that the norm was that lorries have 6m hoses however some lorries can have 10m hoses but if go for a solution requiring the 10m hoses then this restricts the vehicles that can come to site. DS acknowledged that a solution needed to be identified and enquired if there is another renal provider that can do the length currently required before BMCL start redoing ramps however BMCL would review the design. DH advised that it is a national contract for renal not an NHS GG&C contract/supplier. The current supplier has advised that the norm is 6m and at a push can do 10m long hoses. Consideration had been given to moving the lay-by closer to the outlet. DH advised that he had difficulty locating the signed off drawings and requested that a copy of the drawing signing off the fill point/lay-by be provided. (20/02/2014). 27/02/2014 – DS has now provided the sign-off information for DH. Proposals to be submitted to resolve the issue of distance from vehicle parking and “head” from tanker. Fill point now at lower level to assist gravity feed. Feedback received from renal acid suppliers now noting this is not close enough for the tankers that fill. DH reported he has suggested a solution and DS n/oted that this is a

change to the design. It is an issue for the tanker to get close enough and the hoses carried cannot stretch to the fill point. The number of deliveries and capacity of the storage tank to determine the solution. Further discussion is required (06/03/2014). DH noted that information received indicated that the refilling frequency of the tank would be around 7-10 days not a couple of times a year. The issue on position of the refill point is still to be debated. Drawing pack received does not indicate the fill point or the lay by. BMCL require to progress this matter. DH will review ERs and DP agreed to locate drawing believed to be signed off (13/03/2014) AK advised that the feasibility had been carried out and potential minor issues identified i.e. goes past consulting rooms/visibility into consulting rooms, etc. Query – move layby or extend and DH reported that the layby should be extended. AK queried the crossing noting that it was proposed to try to have this as a straight crossing and BMCL proposed to instruct WSP to undertake the design works. GW suggested that there may be a need to put in a railing. (20/03/2014) DS advised the design was being progressed however there may be a need to rebut some of the live drainage already in place. (27/03/2014) DS noted that he had met with DH and that the renal pipe could be taken across the top of the renal discharge past the consult room which would allow the vehicle to get within 10m of the bay. Drawings of this proposal were being prepared. (04/04/2014) DS advised that he had met with DH to discuss the proposal and had met with the consultant to progress the drawing. (10/04/2014) DH advised that revised drawing awaited. DS agreed to chase up (17/04/2014) DS advised that a meeting had been held the previous day and drawings expected potentially 9<sup>th</sup> May. DS agreed to confirm that date for the provision of the drawings. (24/04/2014) DS advised that the WSP drawings had been received and DS would check for the Nightingale drawings and provide to NHS by cop 09/05/2014 (08/05/2014) DS noted that RN will review the Nightingale drawings in advance of issue to the NHS (15/05/2014) **DP advised that DH had sent the drawings back with minor comments. From BMCL perspective the matter is closed. DH to confirm. (29/05/2014).**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). **Updated drawings awaited from BMCL. (12/06/2014).**
- Equipment List – GW noted that he is awaiting issue of the Equipment List by PMI as the 'line in the sand'. BMCL are progressing on the basis of manual amendments due to PMIs. FW has issued the equipment list back to BMCL with further amendments marked up. PM advised that he understood that there were 12 cameras to come off the list. DS raised concern that Nightingale may need to redo drawings. DS and GW to discuss. (29/05/2014) . GW noted that he is still in the process of getting confirmation from Mercury as to what (cameras) had already been procured. (05/06/2014) **BMCL to confirm if cameras have, or have not been purchased. (12/06/2014).**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). **GW to follow up with Council. (12/06/2014).**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 02/07/2014:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 02/07/2017:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<div>05/04/2012</div> <div>07/11/2013</div> <div>17/11/2013</div> <div>21/11/2013</div> <div>28/11/2013</div> <div>12/12/2013</div> <div>19/12/2013</div>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p> <p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that</p>	

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDermont at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

			<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			<p>03/04/2014 DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.</p> <p>10/04/2014 DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)</p> <p>17/04/2014 DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&amp;E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.</p> <p>24/04/2014 DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&amp;E batch of drawings was WIP.</p> <p>01/05/2014 DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.</p> <p>08/05/2014 DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.</p> <p>15/05/2014 DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return</p> <p>22/05/2014 DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process</p> <p>29/05/2014 DS noted that there was 52 items overdue – mainly M&amp;E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.</p> <p>12/06/14 Board have requested the withdrawal of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.</p> <p>19.6.2014 2 minor items; Car Park 1 stat signage and lead details. DH agreed to follow up.</p> <p>26.6.2014 <b>Lead details returned in week, statutory signage ongoing, DH to chase. Adult entrance plasterboard details highlighted but Board no knowledge of receipt, GW to check in system.</b></p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014 In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>06/02/2014 It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>13/02/2014 GW to discuss info with DR</p> <p>20/02/2014 GW tables costs and supporting information for review by C&amp;B</p> <p>27/02/2014 DR has to make recommendations on information provided from BMCL</p> <p>06/03/2014 DR now has costs from BMCL to review and will revert back to BMCL</p> <p>13/03/2014 DR reported that he had the report and was to review with DWL and then discuss with GW</p>	

			<p>20/03/2014 27/03/2014 03/04/2014 10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014</p>	<p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&amp;B to contact GW to discuss.</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014 13/03/2014 20/03/2014 27/03/2014 01/05/2014 26/06/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&amp;B to contact GW to discuss.</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	<p>10/03/2014 13/03/2014 20/03/2014</p>	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage. As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc. Board requested to meet with BMCL Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue. GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings</p>	

			<p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p>	<p>may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p>	
--	--	--	---	--	--

			30/04/2014 08/05/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.  ** Cross reference with PMI 283**	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014  08/05/2014 22/05/2014 29/05/2014  05/06/2014 12/06/2014  26.06.2014	Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings Meeting scheduled for Tuesday 27/05 to finalise arrival square DS advised that this matter had been touched on at the PMG meeting. BMCL are progressing on the basis of the RCC. GW advised that 2 out of 3 of the ducts has been pulled across the road and works on the 3 <sup>rd</sup> duct is due to commence 2 <sup>nd</sup> June 2014. PM advised that he had written to GCC on 28/05/2014 and advised to install the upgrade of the junction at Govan Road as per section 56. Potential issue re traffic assessment identified as this was based on a 4 carriageway road. GW noted no change to this item. Recent dialogue with Glasgow City Council confirms they have approved two different layouts, the Board's Section 56 in 2010 and a Fastlink plan in 2013. Key difference is the provision of a lay-by on the Fastlink drawing outside the private houses on Govan Road, providing a disabled parking bay for one of the residents. Board to supply BMCL with GCC CAD layout and then arrange meeting with Council to discuss way ahead, to avoid potential press issue. Meeting arranged with Glasgow City Council to discuss Section 56/1 and disabled parking on 27 <sup>th</sup> June 2014.	
21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.  Board to issue PMI to instruct additional monitoring and measuring	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26 <sup>th</sup> of January 2015 and the contract completion date of 28 <sup>th</sup> February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7 <sup>th</sup> August 2014 with commissioning activities allowed to commence from the 21 <sup>st</sup> of August.  Board to confirm acceptance	

21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014	Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie & Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.	
-------	-------------------	--	------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 02/07/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed.</p>	

A51679245

			<p>PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM</p>	
--	--	--	---	--

			<p>15/05/2014 22/05/2014 29/5/2014 05/06/2014 12/06/2014 26/06/2014</p>	<p>suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>GW and AFe to do walkround early w/c 19/05 with HMc</p> <p>Walkabout scheduled or 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</p> <p>PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>PM to confirm if ok with BMCL demolition list.</p> <p>Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&amp;E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.</p> <p><b>Tenders issued w/c 23 June 2014, with 4 week tender period.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014 16/01/2014 23/01/2014 30/01/2014 13/02/2014 27/02/2014 06/03/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p>	

			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	
			22/05/2014	DP to progress.	
			12/06/2014	Work in progress, action on DP.	
			26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 02/07/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p> <p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can</p>	
			10/04/2014		

A51679245

			<p>17/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>08/05/2014</p> <p>15/05/2014</p> <p>29/05/2014</p>	<p>provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p> <p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p> <p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p> <p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.</p> <p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p> <p>DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27<sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p> <p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a</p>	
--	--	--	---	--	--

			05/06/2014  12/06/2014 26/06/2014	<p>legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p> <p>GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.</p> <p>BMCL pricing revised layout and await costs from Land Engineering. GW to follow up on order for signal replacement.</p> <p>Await costs from BMCE.</p>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014  15/05/2014 22/05/2014  29/05/2014  05/06/2014 12/06/2014  26/06/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections of roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p> <p>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</p> <p>Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still outstanding and this element forms part of these works which are due to commence in the autumn.</p>	

2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <p>1) Narrative.</p> <p>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</p> <p>3) Bus shelter data sheet.</p> <p>4) Bus shelter foundation detail.</p>	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p>	
2696	PMI 295	ADULT & CHILDREN'S HOSPITAL - AMENDMENTS TO THE EQUIPMENT LIST	26/06/2014	<p>The Board confirm changes and amendments to the main equipment list as listed in the attachments to this PMI.</p> <p>Proceed and implement changes as listed.</p>	
2711	PMI 296	NSGH - SECTION 56/1 ROADWORKS – PROPOSED ALTERATIONS	01/07/2014	<p>Proposed amendment to south kerb line outside private dwelling houses on Govan Road.</p> <p>Following the meeting held on 27<sup>th</sup> June 2014, with Glasgow City Council, to discuss their proposed alterations to the approved Section 56/1 road layout on Govan Road the Board instruct Brookfield Multiplex to proceed with the following work. Redesign the road layout to match the GCC Fastlink layout (see attached); meet with GCC Land Engineering Services and agree to secure amendment to Section 56/1 approvals. Establish costs for all re-design work, construction works and factor in any omissions such as the middle island at the old hospital entrance.</p> <p>Refer attached drawings and narrative. Provide costs as noted above by 15<sup>th</sup> July 2014.</p>	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
A51679245				Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out	

current position.

**Other items that require discussion:**

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). **BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance

works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014) GW noted that he had received the next iteration of the drawings for review the previous night. DP advised that it was proposed to bubble the drawings for those areas in INS that need to be considered re asbestos checks. (29/05/2014). Asbestos survey work out to tender based on drawings supplied by BMCL (12/06/2014). Further meeting 25 June 14 between Board and BMCE to identify any further areas for asbestos survey, and potential impacts to building operation from pile positions. (26/06/14).

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage.

DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014) DH advised this was work in progress. The draft application was to be submitted by cop tomorrow and the final application was to be submitted by the end of the month. BMCL are preparing the management plan/processes for the commissioning period. URS have advised that in their opinion that fuel storage regulations are not being met (PPG3) and they suggest that a separator is required. If put in a separator then can drain to the SUDS. The size of the separator would need to be discussed. Risk to project that may delay provision of the permit if put in the current scheme. DP suggested that the application should be submitted as is and if there is any enforcement/delay then this is dealt with at the time. The time now could be used to agree the size of the tanks. DH noted that BMCL and the NHS would need to be quick to react to any feedback from SEPA. PM enquired if the separator could be put in later in the job or would have to be put in now and DH suggested that it would have to be put in now (20/02/2014). PPC application – DH reported as being 98% complete – clarity on 1 or 2 items – drainage etc on what is being put in place. DS requested a meeting to review how any run off pollution could be controlled in the high risk areas. It was noted that to submit no comment to SEPA could result in issues later. DH noted that separation was required in his opinion as there would be oil and storage refills nearby. DS noted that WSP will use PPG3 document to justify the reasons for the design being completed as is, and that this, in their opinion should substantiate the reasons behind this. Drawing is being prepared, showing potential separator location, to forward with submission if required. Noise calculations from flues – it was noted that this was not possible to provide. Accoustic Logic has previously provided information on how noise was received from receptors in relation to nearest houses (difficult to provide noise levels from flues as no permit to run). DH agreed to liaise with URS to further define the information required. Feedback received from SEPA – signatures required by authorized signatories and RC will be asked to sign later today and this to be returned to SEPA early next week. Technical review underway by SEPA and to date no issues to report. Consultation period with residents to begin shortly via the placing of advertisements in national and local press supported by an article in the newsletter. DH agreed to forward full submission to BMCL for their information (06/03/2014). Confirmation from SEPA that application “duly made” and advertising can now commence. SEPA have specified that any spillage cannot be released into the surface water drainage but must flow into foul drain. DH has forwarded information to JB re above. It was noted that there was no foul drain in the vicinity. DH to forward information to GW (13/03/2014) DH noted that there was a query about the foul drainage and AK advised that WSP had been asked to look at the drainage. DH noted that all parties need to work together to resolve. It is agreed that this needed to be confirmed as a change of regs and therefore a risk register item. DH noted that it would be helpful if WSP could assist to provide the 2008 regs (20/03/2014) DH noted that the adverts were due to be placed on 28/03/2014 –Evening Times and Edinburgh Gazette. Residents newsletter has been issued. Advice had been received from the case officer to the effect that if an amendment is not submitted re interceptor then the permit will not be provided. DS advised that he is in dialogue with PDunbar. (27/03/2014) It was noted that a meeting with DH and IP to discuss options re interceptor had taken place however Irene’s perception needs to be identified. There are 4 potential options to resolve. (04/04/2014) DH advised that a meeting with Irene Anders (IA) had been held. IA is the ground water specialist but not the drainage specialist. IA is liaising with drainage colleagues. DS noted that there are alternate options. (11/04/2014) DH advised that WSP are preparing a robust case for the preferred option. DS advised that he had provided a response by email to DH. (17/04/2014) DH advised that guidance had been received from SEPA re connection to foul or surface. Options were being progressed on the basis of guidance. Schedule of questions regarding the application awaited from SEPA. Meeting scheduled for 02/05/2014 to discuss robust response re connecting to surface/foul. No delays to permit application. (24/04/2014) DH noted that the 28 day consultation period was now concluded. The case officer has advised that there were no objections from the public received. SEPA had received 3 responses from Statutory Consultees of which was NHS GG&C. The Project Team were trying to identify who had responded on behalf of NHS had responded and what the response had been. DH advised that the schedule 4 questions were being chased up IP. DH advised that there had been a query regarding used fire water. (01/05/2014) DH noted that the SEPA query related to why is the connection to the surface and not foul drainage and BMCL/NHS have a justification for the surface connection (08/05/2014) DH noted that draft document prepared. Will finish comments and provide back to BMCL asap. Section 4 questions expected w/c19/05/2014. Meeting with SEPA rep scheduled to take place on 29<sup>th</sup>. IP progressing discussions. (15/05/2014) PM noted that the PPC reps would be onsite later that day. DS advised that a paper had been prepared to pre-empt the queries from SEPA. IP had provided comments however it was thought that these comments were NHS Management responsibility not for BMCL. IP Had further asked queries that BMCL do not intend to answer. (29/05/2014). SEPA preparing draft permit for publication by end of June 14 followed by a 28 consultation period. There are 3 outstanding matters, two have been dealt with and concern the extending of a concrete kerb for containment purposes in the yard, the specification of sealant between the yard concrete and adjoining walls, there is a final issue regarding the height of a baffle wall in the SUDS scheme and this will be dealt with, probably through an enforcement notice post issue of the permit. (12/06/2014). Further meetings to conclude baffle wall in SUDS area 7/7/14, WSP drawing requires to be reviewed and approved by all. SEPA committee meet 2<sup>nd</sup> wk July to sign off draft permit, draft permit issued 7<sup>th</sup> August with 14 day standstill period prior to full permit. (26/06/14).

- Pseudomonas in taps – Retrospective guidance post BMCL Contract Guidance. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) DP advised that he is awaiting a response from Horne (13/02/2014) WIP – awaiting feedback from Horne (20/02/2014). 27/02/2014 – Response from Horne noted that taps were compliant and it was a maintenance issue to ensure these are kept clean – IP to contact HFS if appropriate. IPowrie is in discussion with HFS on the way forward (06/03/2014). DP agreed to forward information to IPowrie – looking at a pressure reducer installation – WIP (13/03/2014) DP advised that he had spoken to Steve on 19/03/2014 and Steve has prepared a paper and has scheduled a meeting with Horne. It is suggested that it is not a straightener issue but a moisture issue and that it would be better to retain the straightener so that there is a maintainable part (20/03/2014) DP advised that IP is liaising with HPs an HFS and there is a couple of queries re Steve's paper. DH acknowledged that this is not a contractual issue at the moment. It would be helpful if BMCL could provide the as fitted detail of the Horne taps. (27/03/2014) DP advised that Horne had responded and IP Had raised a couple of queries with Steve (04/04/2014) DL noted that there had been a review undertaken by Health Protection Scotland and there was a meeting scheduled later that day to discuss the HPS review. (10/04/2014) DP noted that meeting is awaited with Horne (17/04/2014) PM noted that there was a meeting being arranged to discuss. Target date 1<sup>st</sup> May 2014. (24/05/2014) DP advised that the meeting had been held. The next step is for a meeting with HPS through HFS. PM acknowledged that DL Had been in contact with HFS to organize the meeting (08/05/2014) DH advised that a meeting had been set up with HPS, HFS and Horne so that Horne can present their case. IP will attend this meeting as an observer. DP advised that he would also like to attend this meeting as adviser. DS noted that this matter was being driven by HPS and HFS – is not a BMCL/NHS issue. DH noted that it is not a contract issue for BMCL at the moment acknowledging that this matter is due to retrospective guidance (15/05/2014) It was noted that HPS/HFS meeting to be held. DS noted that it was his view that this should not impact on PC. PM advised that this matter was a Board issue so should not impact on PC (29/05/2014) Following a meeting with HFS the tap issue appears resolved, although the Board will need to draft and implement a management process for the maintenance of the taps in critical care areas. Board to secure a letter from HFS confirming agreement or secure minutes of meeting. (12/06/2014). **A meeting convened by HFS on the 5<sup>th</sup> June 2014 reviewed the issues in relation to their earlier guidance and agreed the following in respect of the NSGH;**

- The South Glasgow Hospital:** it was unanimously agreed that as the taps installed within the new build development had complied with guidance current at the time of its specification and briefing and that the hospital was in the process of being commissioned, it should be regarded as being in the “retrospective” category, not “new build”. There was no need to apply additional flow control facilities or remove flow straighteners and any residual perceived or potential risks would form part of the routine management process.

**It is confirmed that no further action is required by BMCE, this item is now closed.**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). **Revised drawings received from BMCE on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14).**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). **GW still trying to progress with Siemens – WIP. (26/06/2014).**

- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14).
- Cable & Wireless Works – Govan Road – these works had been delayed, DH to establish reason with GT. (26.06.14).

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 09/07/2014:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 06/07/2017.						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"><li>One group of M&amp;E information which was to be returned later that day.</li><li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li><li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li></ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li><li>c) Pharmacy Cupboard – PM progressing</li></ul>			
			21/11/2013	PM advised that: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li></ul>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDermott at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

				<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			03/04/2014	DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.	
			10/04/2014	DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)	
			17/04/2014	DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.	
			24/04/2014	DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&E batch of drawings was WIP.	
			01/05/2014	DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.	
			08/05/2014	DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.	
			15/05/2014	DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return	
			22/05/2014	DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process	
			29/05/2014	DS noted that there was 52 items overdue – mainly M&E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.	
			12/06/14	Board have requested the withdrawal of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.	
			19.6.2014	2 minor items; Car Park 1 stat signage and lead details. DH agreed to follow up.	
			26.6.2014	Lead details returned in week, statutory signage ongoing, DH to chase. Adult entrance plasterboard details highlighted but Board no knowledge of receipt, GW to check in system.	
			03/07/2014	5 documents listed on tracker. A) 3 docs relate to 1 transmittal re wayfinding - these had been returned back to the NHS as the front sheet had not been signed off – these would be returned back to BMCL later that day. B) The column cladding drawing had been returned to BMCL on 30 <sup>th</sup> May 2014. C) description states for CP1 in error as dwg relates to Hazard signage for A&C – the necessary approvals to achieve sign-off is being progressed.	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.	

			06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014	<p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p> <p>GW advised this is to be wrapped up in the INS entrance works.</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014  13/03/2014  20/03/2014	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p> <p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p> <p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4</p>	

			<p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p>	<p>bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so</p>	
--	--	--	---	--	--

			30/04/2014 08/05/2014	<p>BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p> <p>Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.</p> <p><b>** Cross reference with PMI 283**</b></p>	
21296	BMCL-EWN-000145	Road Junction changes requested by Glasgow City Council	07/05/2014 08/05/2014 22/05/2014 29/05/2014  05/06/2014 12/06/2014  26.06.2014  03/07/2014	<p>Following meetings held with GCC we confirm that the council have requested changes to the external junctions from those detailed previously on the relevant, previously accepted RCC and S56 approvals all as detailed on the two number attached marked up drawings. Junction 1 Govan rd / Langlands Drive, Junction 2 Renfrew Rd / Boulevard</p> <p>DS noted that BMCL had written to GCC and BMCL were proceeding on the basis of signed-off drawings</p> <p>Meeting scheduled for Tuesday 27/05 to finalise arrival square</p> <p>DS advised that this matter had been touched on at the PMG meeting. BMCL are progressing on the basis of the RCC. GW advised that 2 out of 3 of the ducts has been pulled across the road and works on the 3<sup>rd</sup> duct is due to commence 2<sup>nd</sup> June 2014. PM advised that he had written to GCC on 28/05/2014 and advised to install the upgrade of the junction at Govan Road as per section 56. Potential issue re traffic assessment identified as this was based on a 4 carriageway road.</p> <p>GW noted no change to this item.</p> <p>Recent dialogue with Glasgow City Council confirms they have approved two different layouts, the Board's Section 56 in 2010 and a Fastlink plan in 2013. Key difference is the provision of a lay-by on the Fastlink drawing outside the private houses on Govan Road, providing a disabled parking bay for one of the residents. Board to supply BMCL with GCC CAD layout and then arrange meeting with Council to discuss way ahead, to avoid potential press issue.</p> <p>Meeting arranged with Glasgow City Council to discuss Section 56/1 and disabled parking on 27<sup>th</sup> June 2014.</p> <p><b>Agreed item to be closed. Cross reference to PMI 296</b></p>	
21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014          03/07/2014	<p>The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre.</p> <p>The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.</p> <p>Board to issue PMI to instruct additional monitoring and measuring</p> <p><b>DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.</b></p>	

21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August. Board to confirm acceptance	
			03/07/2014	PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014	Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie & Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.	
			03/07/2014	GW noted that BMCL should have been progressing the kerbing under the LE contract. DH advised that NMCL and NHS should not be accepting any charges from GCC as it is GCC that made the embargo which started in April. GW noted that there had also been a fault in the cable.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 09/07/2014

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this. WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works. AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.	

A51679245

			10/10/2013	WIP by BMCL
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over

			10/04/2014	the weekend to prepare the scope of works so can put out to tender. GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.

Page 862

20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p>
			16/01/2014	<p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p>
			23/01/2014	<p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p>
			30/01/2014	<p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p>
			13/02/2014	<p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p>
			27/02/2014	<p>Report anticipated shortly</p>
			06/03/2014	<p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p>
			20/03/2014	<p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p>
			27/03/2014	<p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p>
			04/04/2014	<p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p>
			10/04/2014	<p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p>
			17/04/2014	<p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p>
			24/04/2014	<p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p>
			08/05/2014	<p>DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p>
			15/05/2014	<p>DP advised that he was continuing to pursue the formal report.</p>
			22/05/2014	<p>DP to progress.</p>
			12/06/2014	<p>Work in progress, action on DP.</p>
			26.06.2014	<p>This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p>

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 09/07/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p>	
			10/04/2014	<p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p>	
			17/04/2014	DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.	
			24/04/2014	<p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p>	
			01/05/2014	PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.	
			08/05/2014	<p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is</p>	

A51679245

			<p>15/05/2014</p> <p>29/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p>	<p>any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p> <p>DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27<sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.</p> <p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p> <p>GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.</p> <p>BMCL pricing revised layout and await costs from Land Engineering. GW to follow up on order for signal replacement.</p> <p>Await costs from BMCE.</p> <p>GW advised this is work in progress as awaiting information from Mercury (costs associated with the ducting works). DH advised that there may be a tweak to the location of the lights on the traffic island. PM advised that the NHS wanted to get cost info asap so can conclude. GW agreed to progress.</p>	
--	--	--	---	--	--

2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>15/05/2014 22/05/2014</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>29/05/2014</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>05/06/2014 12/06/2014</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p> <p>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</p> <p>26/06/2014</p> <p>Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still outstanding and this element forms part of these works which are due to commence in the autumn.</p> <p>03/07/2014</p> <p>GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.</p>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p>	

				Information confirmed as; 1) Narrative. 2) WSP Drg: WSP EW XX SK 771 117 Rev 03. 3) Bus shelter data sheet. 4) Bus shelter foundation detail.	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014  05/06/2014 12/06/2014 26/06/2014  03/07/2014	Upgrade and extension to main entrance area at ground and first floor level.  Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team. Fees and programme to be provided by 16 <sup>th</sup> June 2014. Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014. AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	
2696	PMI 295	ADULT & CHILDREN'S HOSPITAL - AMENDMENTS TO THE EQUIPMENT LIST	26/06/2014  03/07/2014	The Board confirm changes and amendments to the main equipment list as listed in the attachments to this PMI.  Proceed and implement changes as listed. Item to be closed and CE to be issued	
2711	PMI 296	NSGH - SECTION 56/1 ROADWORKS – PROPOSED ALTERATIONS	01/07/2014  03/07/2014	Proposed amendment to south kerb line outside private dwelling houses on Govan Road.  Following the meeting held on 27 <sup>th</sup> June 2014, with Glasgow City Council, to discuss their proposed alterations to the approved Section 56/1 road layout on Govan Road the Board instruct Brookfield Multiplex to proceed with the following work. Redesign the road layout to match the GCC Fastlink layout (see attached); meet with GCC Land Engineering Services and agree to secure amendment to Section 56/1 approvals. Establish costs for all re-design work, construction works and factor in any omissions such as the middle island at the old hospital entrance.  Refer attached drawings and narrative. Provide costs as noted above by 15 <sup>th</sup> July 2014. GW advised he would provide the information to DCampbell however think he DCampbell will have safety concerns.	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
				Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position.	

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). **BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some

thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014) Subsequent to the meeting on the 17<sup>th</sup> Feb with RCalderwood the go-ahead had been given to BMCL for the Neo-natal link bridge. BMCL have been given the opportunity to include works to the Neuro-sciences building entrance subject to feasibility. DS advised that he was awaiting a PMI for the Neuro entrance works. PM agreed to discuss with DL. DS noted that he would need to check if the Nightingale amendments impacts in any way to the bridge link connections. (20/02/2014). 27/02/2014 – RDD drawing and fly through to JD Pierce for programme and costs before taking to Board. Neuro drawings are awaited. Drawings are with Board – question raised on block sections. DS agreed to check and will feedback to PM later today. Neuro link will be reviewed later today by the Board (06/03/2014). Neo-natal drawings are required, along with final proposal. Clarity on knock out panel at maternity building and the coordination of these works on MTHW and drainage programme. Users will need to be informed of the works - noted that neo-natal link breaks into the stairwell so there should be minimal impact on the departments. (13/03/2014) It was noted that the neo-natal link bridge drawings were expected to be received from Nightingale by 21/03/2014. AK noted that BMCL were proceeding with the link to the main hospital. At the intersection point it appears to have sprung up. BMCL want to get the panels installed asap so that the pneumatic tube can be installed. AK noted that the steel has a drop down section into the build. It was suggested that AK should meet with PM w/c 24/03/2014. (20/03/2014) PM noted that the NS were awaiting a programme for the works and method statement. Neonatal – revised drawing to be provided to the NHS for sign-off. It was noted that there had been an error regarding the MRI access which needs to be relocated as per non-rendered panel replacement proposal. Neuro – T3 GA drawing – 3<sup>rd</sup> leg in abeyance due to potential changes to the INS entrance. PM noted that if the INS entrance does not go ahead then PM would want to re-view and sign-off. DS noted that BMCL wanted to identify drawings to allow BMCL to progress with works. PM requested that BMCL re-provide the drawing for re-signing. DS proposed that the drawing should be discussed and agreed. (27/03/2014) GW, DS and PM to meet as GW has the drawings for review (04/04/2014) PM advised that he was awaiting the updated Neo-natal drawings. AFe advised it was proposed to provide a scope of works for the Neo-natal link bridge works to the NHS. It was noted that it is circa 12 weeks away from carrying out the Neuro works. DL noted that MSharples had confirmed that the NHS will have the cost plan and plans for the neuro entrance works for a meeting w/c 14/04/2014. (10/04/2014) Noted that the neo-natal link bridge drawings had been received and would be reviewed and returned by COP that day. Neuro link bridge – meeting held the previous day. Cost discussion - there was a number of queries for both parties. (17/04/2014) GW advised that the neonatal link bridge drawings have been signed off and sent back to WSP as there are some queries. JMurray sent the drawings back on 23/04/2014. PM noted that for the Neuro Link bridge the 2 legs should be ok. PM had seen the latest drawing re what BMCL are pricing up. PM advised that the mezzanine was under consideration. PM advised that potential works was to be discussed with the building users. GW advised that PF was getting a quote for cladding. DS enquired that should neuro proposals not go ahead whether there was sufficient sign-off of drawings to allow BMCL to proceed. PM advised that the last leg is in abeyance. PM would be happy to sign off a drawing for the fall back position. GW noted that MS has advised that 15<sup>th</sup> May is date to be concluded. (24/04/2014) PM advised that he could sign-off the Neuro drawings for the fall back position should the neuro entrance works not go ahead. DS agreed to liaise with JMurray and provide the drawing. PM advised that he had received the drawing re neonatal and returned this back to BMCL. PM noted that the drawings had not been provided in colour therefore as long as the colours are the same as present then this was ok. (01/05/2014) PM acknowledged that he had a drawing on his desk for review/sign-off. (08/05/2014) Agreed this item could be closed as all construction info has been signed off. DH noted that the NHS needed to understand the programme so can liaise with the building users. DP noted that the medical gas drawing had been issued. DH noted that HMc was to check the routes into Neuro. AFe suggested that HMc was not aware of any drawing and DH agreed to liaise with HMc. (15/05/2014) GW noted that he had received the next iteration of the drawings for review the previous night. DP advised that it was proposed to bubble the drawings for those areas in INS that need to be considered re asbestos checks. (29/05/2014). Asbestos survey work out to tender based on drawings supplied by BMCL (12/06/2014). Further meeting 25 June 14 between Board and BMCE to identify any further areas for asbestos survey, and potential impacts to building operation from pile positions. (26/06/14). **Agreed item to be closed. Link bridges being progressed in other for a. INS bridge – BMCL proposing delaying the traffic restrictions/works on the road as looking to tie in the bridge works with other works. GW noted that the neo-natal costs have increased from JDPierce and Henshaw. AFe advised that he would need to discuss with the NHS the way forward re the fitting of the large window (03/07/2014)**

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and

discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014). DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCE on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14).

- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014)
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014)
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014)
- Equipment relocation to another area – AFe enquired when the Group 5 equipment was going to be relocated and DH agreed to liaise with FW and confirm back. (03/07/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 870

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 16/07/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol>			
			21/11/2013	PM advised that: <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

A51679245

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.
			13/02/2014	It was noted that there was no drawings currently overdue
			20/02/2014	It was noted that there was no drawings currently overdue
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014
			06/03/2014	Timber cladding will be returned by Hugh McDermont at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>

				<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			03/04/2014	DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.	
			10/04/2014	DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)	
			17/04/2014	DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.	
			24/04/2014	DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&E batch of drawings was WIP.	
			01/05/2014	DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.	
			08/05/2014	DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.	
			15/05/2014	DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return	
			22/05/2014	DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process	
			29/05/2014	DS noted that there was 52 items overdue – mainly M&E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.	
			12/06/14	Board have requested the withdrawal of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.	
			19.6.2014	2 minor items; Car Park 1 stat signage and lead details. DH agreed to follow up.	
			26.6.2014	Lead details returned in week, statutory signage ongoing, DH to chase. Adult entrance plasterboard details highlighted but Board no knowledge of receipt, GW to check in system.	
			03/07/2014	5 documents listed on tracker. A) 3 docs relate to 1 transmittal re wayfinding - these had been returned back to the NHS as the front sheet had not been signed off – these would be returned back to BMCL later that day. B) The column cladding drawing had been returned to BMCL on 30 <sup>th</sup> May 2014. C) description states for CP1 in error as dwg relates to Hazard signage for A&C – the necessary approvals to achieve sign-off is being progressed.	
			10/07/2014	DH noted that there had been no schedule issued on 9/07 however he thought that the only item to be returned to BMCL is the hazard signage.	

20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014</p> <p>27/03/2014 03/04/2014</p> <p>10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p> <p>GW advised this is to be wrapped up in the INS entrance works.</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014 27/03/2014 01/05/2014 26/06/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	<p>10/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p>	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p> <p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p> <p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design</p>	

				<p>works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>27/03/2014 DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>03/04/2014 DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights . BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>10/04/2014 DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>17/04/2014 DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being</p>	
--	--	--	--	---	--

			24/04/2014	prepared. There are some queries to be discussed i.e. kerb tracking. DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.	
			30/04/2014	Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.	
			08/05/2014	<b>** Cross reference with PMI 283**</b>	
21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	<b>DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.</b>	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August. Board to confirm acceptance	
			03/07/2014	PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	<b>DH advised that the draft permit was published in accordance with the timeline (7<sup>th</sup>).</b>	

21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014	Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie & Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.	
			03/07/2014	GW noted that BMCL should have been progressing the kerbing under the LE contract. DH advised that NMCL and NHS should not be accepting any charges from GGC as it is GCC that made the embargo which started in April. GW noted that there had also been a fault in the cable.	
			10/07/2014	DH advised that he will provide feedback to DP asap.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 16/07/2014

							
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.			
			19/09/2013				
			26/09/2013	WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.			
			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.			
			10/10/2013	WIP by BMCL			
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.			
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.			
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.			
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.			
			12/12/2013	AK advised that he was getting a programme plotted for discussion.			
				AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs			

A51679245

				<p>under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.	
			09/01/2014	Meeting to be scheduled to review some aspects of the work	
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.	
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.	
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting	
			06/03/2014	AK noted that programme review was nearing completion	
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week	
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.	
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.	
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.	
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.	
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.	
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that	

			08/05/2014	<p>HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p>	
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc	
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available	
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.	
			05/06/2014	PM to confirm if ok with BMCL demolition list.	
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.	
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.	
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.	
			10/07/2014	PM noted that he understood the tenders had been issued.	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p>	
			16/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			23/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			30/01/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the	

		13/02/2014	previous day. DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.
		27/02/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days.
		06/03/2014	Report anticipated shortly DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.
		20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.
		27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.
		04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.
		10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.
		17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.
		24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.
		08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.
		15/05/2014	DP advised that he was continuing to pursue the formal report.
		22/05/2014	DP to progress.
		12/06/2014	Work in progress, action on DP.
		26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.
		03/07/2014	DP advised he would push on the write up of the proposed option.
		10/07/2014	DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014.

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 16/07/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p>	
			10/04/2014	<p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p>	
			17/04/2014	<p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p>	
			24/04/2014	<p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p>	
			01/05/2014	<p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the best option but will require some tweaks so can discuss with GGC.</p>	
			08/05/2014	<p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. AFe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p>	

			15/05/2014	DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27 <sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27 <sup>th</sup> . GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL.	
			29/05/2014	PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.	
			05/06/2014	GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.	
			12/06/2014	BMCL pricing revised layout and await costs from Land Engineering. GW to follow up on order for signal replacement.	
			26/06/2014	Await costs from BMCE.	
			03/07/2014	GW advised this is work in progress as awaiting information from Mercury (costs associated with the ducting works). DH advised that there may be a tweak to the location of the street lights on the traffic island. PM advised that the NHS wanted to get cost info asap so can conclude. GW agreed to progress.	
			10/07/2014	PM noted that costs are awaited. DP advised that cost from mercury is awaited and he would progress this in GW's absence.	

2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	Please provide a cost to incorporate the undernoted works into the contract.	
			15/05/2014	Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.	
			22/05/2014	GW noted this is WIP	
			29/05/2014	WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC	
			05/06/2014	DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.	
			12/06/2014	GW advised that price awaited back from Mercury and Land Engineering.	
			26/06/2014	Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.	
			03/07/2014	Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still outstanding and this element forms part of these works which are due to commence in the autumn. GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.	
			10/07/2014	DP advised that BMCL have had internal discussions and drawing being prepared re Hardgate Road/Car Park area for GCC.	

2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014  15/05/2014 22/05/2014  16/07/2014	<p>The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064.</p> <p>DP agreed to investigate and DH agreed to have a look at the bedhead.</p> <p>TRU1001 – should be capable of accommodating – costs being prepared and assessed if trunking can accommodate. Feedback to NHS</p> <p><b>Instruction Added to Sypro 16/07/2014</b>  <b>The Board confirm that BMCL should proceed with the change as outlined. Costs to be allocated to Group 1 Equipment.</b></p>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014          10/07/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;  1) Narrative.  2) WSP Drg: WSP EW XX SK 771 117 Rev 03.  3) Bus shelter data sheet.  4) Bus shelter foundation detail.</p> <p><b>PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.</b></p>	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014  05/06/2014  12/06/2014 26/06/2014  03/07/2014    10/07/2014	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p><b>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if</b></p>	

				any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.	
2696	PMI 295	ADULT & CHILDREN'S HOSPITAL - AMENDMENTS TO THE EQUIPMENT LIST	26/06/2014  03/07/2014	The Board confirm changes and amendments to the main equipment list as listed in the attachments to this PMI.  Proceed and implement changes as listed. Item to be closed and CE to be issued	
2711	PMI 296	NSGH - SECTION 56/1 ROADWORKS – PROPOSED ALTERATIONS	01/07/2014  03/07/2014 10/07/2014	Proposed amendment to south kerb line outside private dwelling houses on Govan Road.  Following the meeting held on 27th June 2014, with Glasgow City Council, to discuss their proposed alterations to the approved Section 56/1 road layout on Govan Road the Board instruct Brookfield Multiplex to proceed with the following work. Redesign the road layout to match the GCC Fastlink layout (see attached); meet with GCC Land Engineering Services and agree to secure amendment to Section 56/1 approvals. Establish costs for all re-design work, construction works and factor in any omissions such as the middle island at the old hospital entrance.  Refer attached drawings and narrative. Provide costs as noted above by 15th July 2014. GW advised he would provide the information to DCampbell however think he DCampbell will have safety concerns. Update to be provided to the NHS asap.	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014  10/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.  PM advised that he was awaiting cost for the feasibility study.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
		Equipment List	10/07/2014	Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position. PM noted that there was a query re 2 items on the list (a – cost for MA4 but no breakdown and b – public telephone cost).	

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) **DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCE on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14). **PM requested that an update of the drawings is provided by 24/07/2014 (10/07/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) **DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014)**
- Neo-natal link bridge drawings – AFe to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) **DH noted that WR had seen a response on Aconex and has raised a query. TGReen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) **PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014)**
- Equipment relocation to another area – AFe enquired when the Group 5 equipment was going to be relocated and DH agreed to liaise with FW and confirm back. (03/07/2014) **DH noted that he had spoken with FW the previous day who had advised that FW has received a method statement and will discuss this with AStephen asap. (10/07/2014)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 886

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 30/07/2014:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 06/07/2017.						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"><li>One group of M&amp;E information which was to be returned later that day.</li><li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li><li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li></ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li><li>c) Pharmacy Cupboard – PM progressing</li></ul>			
			21/11/2013	PM advised that: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li></ul>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

A51679245

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI	
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.	
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.	
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.	
			13/02/2014	It was noted that there was no drawings currently overdue	
			20/02/2014	It was noted that there was no drawings currently overdue	
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014	
			06/03/2014	Timber cladding will be returned by Hugh McDerment at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information	
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up	
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.	
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>	

				<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			03/04/2014	DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.	
			10/04/2014	DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)	
			17/04/2014	DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.	
			24/04/2014	DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&E batch of drawings was WIP.	
			01/05/2014	DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.	
			08/05/2014	DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.	
			15/05/2014	DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return	
			22/05/2014	DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process	
			29/05/2014	DS noted that there was 52 items overdue – mainly M&E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.	
			12/06/14	Board have requested the withdrawal of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.	
			19.6.2014	2 minor items; Car Park 1 stat signage and lead details. DH agreed to follow up.	
			26.6.2014	Lead details returned in week, statutory signage ongoing, DH to chase. Adult entrance plasterboard details highlighted but Board no knowledge of receipt, GW to check in system.	
			03/07/2014	5 documents listed on tracker. A) 3 docs relate to 1 transmittal re wayfinding - these had been returned back to the NHS as the front sheet had not been signed off – these would be returned back to BMCL later that day. B) The column cladding drawing had been returned to BMCL on 30 <sup>th</sup> May 2014. C) description states for CP1 in error as dwg relates to Hazard signage for A&C – the necessary approvals to achieve sign-off is being progressed.	
			10/07/2014	DH noted that there had been no schedule issued on 9/07 however he thought that the only item to be returned to BMCL is the hazard signage.	
			24/07/2014	DH noted that 2 docs had been returned the previous day at C status, wayfinding docs would be returned asap.	

				<p>AFe noted that TDSL were awaiting sign-off of the doors for Schiehallion – propping 2 x 6mm panes. DR noted that there was concern regarding the double doors into the isolation rooms and the double doors into the ensuite. AFe advised that TDSL were providing a review of all the doors and are preparing a mark-up of all the 'holes in the walls'.</p> <p>AFe advised that he was getting the BMCL reps to check everything is ok re the dental chairs.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>24/07/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p> <p>GW advised this is to be wrapped up in the INS entrance works.</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p> <p>DR and GW in discussion re way forward</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>01/05/2014</p> <p>26/06/2014</p> <p>24/07/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p> <p>DR and GW in discussion re way forward</p>	
20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board.</p> <p>We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter.</p>	

			<p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>03/04/2014</p>	<p>BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p> <p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p> <p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p> <p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p> <p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c</p>	
--	--	--	---	--	--

			<p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>30/04/2014</p> <p>08/05/2014</p>	<p>07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p> <p>Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.</p> <p><b>** Cross reference with PMI 283**</b></p>	
21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p>	<p>The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre.</p> <p>The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.</p> <p>Board to issue PMI to instruct additional monitoring and measuring</p> <p>DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.</p> <p>DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.</p> <p><b>DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.</b></p>	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	<p>01/07/2014</p>	<p>The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015.</p> <p>The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to</p>	

			03/07/2014  10/07/2014 24/07/2014	SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August. Board to confirm acceptance  PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA. DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ). DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014    03/07/2014  10/07/2014 24/07/2014	Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie & Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.  GW noted that BMCL should have been progressing the kerbing under the LE contract. DH advised that NMCL and NHS should not be accepting any charges from GGC as it is GCC that made the embargo which started in April. GW noted that there had also been a fault in the cable. DH advised that he will provide feedback to DP asap. DH noted that the Virgin works were 100% complete however it was proving difficult to get communication with C&W which is apparently not uncommon. A potential solution had been identified and was being checked out in relation to RCC implications. GW noted that the only work that can be undertaken in that area at the moment is take down the wall however BMCL were reluctant to start/stop works.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 30/07/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013  19/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.	

A51679245

			26/09/2013	WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.
			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.
			10/10/2013	WIP by BMCL
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.

			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had

			10/07/2014 24/07/2014	spoken to PM the previous day. GW agreed to check whether the tenders had gone out. PM noted that he understood the tenders had been issued. <b>It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 1<sup>st</sup> August 2014.</b>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014 23/01/2014  30/01/2014 13/02/2014  27/02/2014 06/03/2014  20/03/2014 27/03/2014  04/04/2014 10/04/2014 17/04/2014 24/04/2014  08/05/2014 15/05/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required. DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS. DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics. DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day. DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days. Report anticipated shortly DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case. DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support. DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course. GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up. DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept. DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap. DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS. DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting. DP advised that he was continuing to pursue the formal report.	

			22/05/2014 12/06/2014 26.06.2014  03/07/2014 10/07/2014 24/07/2014	DP to progress. Work in progress, action on DP. This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested. DP advised he would push on the write up of the proposed option. DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014. DP advised this is WIP to conclude

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 30/07/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2555	PMI 283	NEW SOUTH GLASGOW HOSPITALS - ADAPTATIONS TO ARRIVAL SQUARE DESIGN	09/04/2014          10/04/2014    17/04/2014  24/04/2014       01/05/2014	<p>This instruction cancels PMI 254, 278 and 280. Please proceed and adapt the signed off design for arrival square based on meeting on 9th April 2014 and the attached documentation. Work on 3 phase process; Phase 1 - Prepare design layout for review and agreement with NHS/SPT and GCC. Phase 2 - for tender and approvals. Phase 3 for construction.</p> <p>Please proceed and adapt current approved arrival square layout based on the attached drawings and specification. The initial drawing should show revised kerb along the arrival dock, bus stances, patient drop off area, road geometry, swept path for bus stances and road signal arrangements. Once this design has been approved in principle with NHS/SPT and GCC proceed to price design and construction works and then prepare construction drawings.</p> <p>PM advised that meeting held with GCC and SPT. Have generally agreement re dock edge and patient transport drop off area. This should allow WSP to prepare the drawing which will be jointly discussed with SPT and GCC to get sign-off/approval. Once approval received then BMCL can provide cost. SPT and GCC have been advised that the NHS are proceeding at risk to ensure that the BMCL construction programme is not impacted. DS advised that BMCL needed bus stop and camera locations information. DH advised that it was proposed that containment be installed for the cameras.</p> <p>DS enquired if there had been any feedback from GCC/SPT. DH agreed to chase up GCC/SPT for the drawing re bus stop details and spec and real time ducts and bus lane enforcement camera locations.</p> <p>PM advised that he had met with DH and DS and was awaiting the WSP for review. DS queried the junction amendments. PM advised that there is a meeting organized to discuss the arrival square however the junction is a separate issue. David Campbell to be asked for a view on how the junctions work and to position bus stops on the basis of the London Bus Guide. DS advised that he would ask WSP to progress the kerb saw layouts and bus positioning. DP advised that BMCL need to know 'where to and where from' for the install of the ducts.</p> <p>PM advised that he had received a drawing the previous day with the 4 options. The option 3 is the</p>	Item to be closed as being dealt with under PMI 293

A51679245

			08/05/2014	<p>best option but will require some tweaks so can discuss with GGC.</p> <p>PM advised that a meeting with SPT had been scheduled to take place on 14<sup>th</sup> May 2014. Agreement re the kerb logs, positioning of the bus stops and ducting for real time information &amp; cameras will be obtained. The way forward would be confirmed to BMCL asap thereafter. DH noted that the NHS needed the updated drawing from BMCL asap. Afe advised that consideration needed to be given to any BMCL procurement implication on programming. DH enquired if there is any benefit in getting BMCL to proceed with the below ground services work as BMCL will need to do co-ordination works and the NHS will confirm the to/from positions - DH and PM agreed to discuss.</p>	
			15/05/2014	<p>DH noted that the geometry is agreed as per drawing so design can be finalized. Asked for further meeting to discuss. Asked for a further meeting to discuss signals – meeting scheduled for 27<sup>th</sup> May @ 3pm. GW advised that there is a potential lead in time required for the lights. PM advised that he was happy for the BMCL reps to attend the meeting on the 27<sup>th</sup>. GW proposed that GW and DS should attend for BMCL. DH suggested that a meeting should be held with D Campbell to finalise the detail of the signs. There had been a request for the detail of the traffic islands. PM was marking up a drawing and would provide this to BMCL later that day noting that the bus stops are deeper. DH noted that GCC are issuing a duct drawing and sketch drawing of the foundation. DH updated that meeting had taken place with GCC with outcome of that feed back to BMCL and WSP via a drawing. Completed drawing anticipated by Thursday/Friday this week. Further meeting to review bus stops with DH/PM and David Gowans of Trueform. DH noted that drawings indicated larger bus stops and included ducting – not clear where the ducting come out of building and this to be checked with BMCL</p>	
			29/05/2014	<p>PM advised that he had met with GCC and written to GCC and advised to progress on basis of the WSP drawing. Concern had been raised regarding the road markings and it was understood that DCampbell will submit an amendment to the RCC. PM would issue a PMI to confirm the way forward for BMCL. BMCL to provide indication of costs. DS noted that the drawings would need to be redone. PM advised that he was waiting on information from Truform and PM would sit down with BMCL to discuss what standard of shelters that BMCL have costed. GW advised that BMCL have costed for 6 new shelters, Land Engineering have priced for installing bus stops. DS enquired if there had been a discussion regarding the traffic lights and it was noted that there is a legal discussion ongoing regarding maintenance/adoption. If the lights are being ordered from Siemens then BMCL need to understand where the lights are being wired to/clarity needed. It was suggested that the monitoring link could be post pc. PM suggested that the NHS should adopt and DS noted that this would require an AIP for the NHS to adopt. DS enquired about the totems noting that he had been advised that GCC will supply and install the totems and BMCL only to install the ducting (90mm). BMCL were awaiting the foundation details for the totems. DS agree to provide the notes of the meeting to PM for information.</p>	
			05/06/2014	<p>GW advised that the cost awaited from Land Engineering. GW had received the street lighting drawing from DCampbell and had sent this onto GCC. GW suggested that there is a legal issue to be concluded between GCC and NHS re roads adoption. Consideration to be given to way forward if GCC do not progress i.e. go to Siemens direct however this has implications. GW requested that NHS give a steer on what BMCL should do next.</p>	
			12/06/2014	<p>BMCL pricing revised layout and await costs from Land Engineering. GW to follow up on order for signal replacement.</p>	

			26/06/2014 03/07/2014	Await costs from BMCE. GW advised this is work in progress as awaiting information from Mercury (costs associated with the ducting works). DH advised that there may be a tweak to the location of the street lights on the traffic island. PM advised that the NHS wanted to get cost info asap so can conclude. GW agreed to progress.	
			10/07/2014	PM noted that costs are awaited. DP advised that cost from mercury is awaited and he would progress this in GW's absence.	
			24/07/2014	<b>** Cross ref PMI 293 **</b>	
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	Please provide a cost to incorporate the undernoted works into the contract.	
				Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.	
			15/05/2014	GW noted this is WIP	
			22/05/2014	WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC	
			29/05/2014	DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.	
			05/06/2014	GW advised that price awaited back from Mercury and Land Engineering.	
			12/06/2014	Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.	
			26/06/2014	Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still outstanding and this element forms part of these works which are due to commence in the autumn.	
			03/07/2014	GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.	

			10/07/2014 24/07/2014	DP advised that BMCL have had internal discussions and drawing being prepared re Hardgate Road/Car Park area for GCC. GW advised that the cost had been uploaded the previous day. PM agreed to review the quote asap.	
2595	PMI 291	NCH Radiology - MRI Patient Prep	12/05/2014 15/05/2014 22/05/2014 16/07/2014 24/07/2014	The Board request a proposed cost/programme assessment for the addition of Nitrous Oxide, Medical Air (MA4) and AGSS into the bedhead in RCG-071. It is assumed that these can be provided from AVSU 182 located outside RCG-064. DP agreed to investigate and DH agreed to have a look at the bedhead. TRU1001 – should be capable of accommodating – costs being prepared and assessed if trunking can accommodate. Feedback to NHS  Instruction Added to Sypro 16/07/2014 The Board confirm that BMCL should proceed with the change as outlined. Costs to be allocated to Group 1 Equipment.  Item closed. Cost agreed on equipment schedule. PMI accepted. GW to provide the most up to date equipment list.	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014       10/07/2014 24/07/2014	The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.  The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.  Information confirmed as; 1) Narrative. 2) WSP Drg: WSP EW XX SK 771 117 Rev 03. 3) Bus shelter data sheet. 4) Bus shelter foundation detail. PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this. GW advised that the costs were currently being uploaded for options A and B	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014  05/06/2014 12/06/2014 26/06/2014 03/07/2014	Upgrade and extension to main entrance area at ground and first floor level.  Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team. Fees and programme to be provided by 16 <sup>th</sup> June 2014. Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014. AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were	

			10/07/2014  24/07/2014	being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297). PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible. GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.	
2711	PMI 296	NSGH - SECTION 56/1 ROADWORKS – PROPOSED ALTERATIONS	01/07/2014  03/07/2014 10/07/2014 24/07/2014	Proposed amendment to south kerb line outside private dwelling houses on Govan Road.  Following the meeting held on 27th June 2014, with Glasgow City Council, to discuss their proposed alterations to the approved Section 56/1 road layout on Govan Road the Board instruct Brookfield Multiplex to proceed with the following work. Redesign the road layout to match the GCC Fastlink layout (see attached); meet with GCC Land Engineering Services and agree to secure amendment to Section 56/1 approvals. Establish costs for all re-design work, construction works and factor in any omissions such as the middle island at the old hospital entrance.  Refer attached drawings and narrative. Provide costs as noted above by 15th July 2014. GW advised he would provide the information to DCampbell however think he DCampbell will have safety concerns. Update to be provided to the NHS asap. GW advised that the costs had been uploaded the previous day. DS noted that BMCL anticipated being in receipt of the drawings by cop 25/07/2014. DS suggested that there should be a discussion with the NHS re the dialogue which needs to happen with GCC.	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014  10/07/2014 24/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.  PM advised that he was awaiting cost for the feasibility study. PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.	
2778	PMI 298	Adult Atrium & NCH Entrance Lobby - Power supply & Additional Containment	25/07/2014	The Board confirm the requirement for 3 x 32A supplies terminated with isolators and additional containment routes for the installation of telecoms cabling by others at agreed locations in the Adult Atrium & NCH Entrance Lobby to facilitate the future installation of ATM's.	

2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014	<p>Additional survey work to foundations of existing building.</p> <p>Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.</p> <p>Please pre-survey all proposed areas with service detection equipment and hand dig as required.</p> <p>Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.</p> <p>Consider all service pipes to be live.</p>	
------	---------	--	------------	--	--

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
		Equipment List	10/07/2014 24/07/2014	<p>Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position.</p> <p>PM noted that there was a query re 2 items on the list (a – cost for MA4 but no breakdown and b – public telephone cost).</p> <p>Up to date agreed equipment list to be provided to the NHS</p>	

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014)

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCL on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14). PM requested that an update of the drawings is provided by 24/07/2014 (10/07/2014) **DS noted that Joanne had confirmed that the revised drawings are under preparation and will be provided asap. (24/07/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) **GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014)**
- Neo-natal link bridge drawings – AFe to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGReen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) **DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) **Discussion scheduled to take place on 25/07/2014 (24/07/2014)**
- Equipment relocation to another area – AFe enquired when the Group 5 equipment was going to be relocated and DH agreed to liaise with FW and confirm back. (03/07/2014) DH noted that he had spoken with FW the previous day who had advised that FW has received a method statement and will discuss this with AStephen asap. (10/07/2014) **Item closed – equipment has now be relocated. (24/07/2014)**
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters.It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014)
- Adult Atrium/NCH Lobby – DH advised that he would be carrying out a visit to site to look at the potential for retro-fitting ATMs (will require power and data). (24/07/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 13/08/2014:

The following Early Warnings have been submitted to the PMO Board and are awaiting close out as at 16/03/2014.						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.			
			07/11/2013	DH advised that <ul style="list-style-type: none"><li>One group of M&amp;E information which was to be returned later that day.</li><li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li><li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li></ul>			
			17/11/2013	DH advised that there were 3 items outstanding: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li><li>c) Pharmacy Cupboard – PM progressing</li></ul>			
			21/11/2013	PM advised that: <ul style="list-style-type: none"><li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li><li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li></ul>			
			28/11/2013	DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.			
			12/12/2013	DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.			
			19/12/2013	It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6 <sup>th</sup> Jan 2014. Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013) Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that			

			08/01/14	there were very few returned drawings outstanding from the NHS. DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18 <sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23 <sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI	
			16/01/2014	DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.	
			23/01/2014	DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.	
			06/02/2014	DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.	
			13/02/2014	It was noted that there was no drawings currently overdue	
			20/02/2014	It was noted that there was no drawings currently overdue	
			26/02/2014	Lighting calculations – DH agreed to return these with C for reissue Wayfinding drawings are scheduled for return on Monday 3 <sup>rd</sup> March 2014	
			06/03/2014	Timber cladding will be returned by Hugh McDermont at the end of the week Lead Lining information awaited for revision and return, Aseptic information awaited for review and return FW and DH meeting Ken Hall & Brendan Rooney later today to finalise the bedhead information	
			13/03/2014	DH reported that the Aseptic and Lead detail drawings are to be returned and these will be chased up	
			20/03/2014	DH reported that there was a meeting to finalise the bedhead discussions later that day. DP advised that FW had queried patient entertainment re plaster rooms and the answer is no. DH advised that he had suggested that a mobile solution could be used in the plaster rooms, etc and it had been confirmed that a mobile solution could be used however the NHS needed to see the technical detail for the potential mobile solution.	
			27/03/2014	DH provided the following update: <ul style="list-style-type: none"> <li>he had spoken to FW re the lead details and been advised that JRobertson had been on holiday but that she would chase this up.</li> </ul>	

				<ul style="list-style-type: none"> <li>• A request for a reprint of the 2 RCP drawings would be made as these cannot currently be located</li> <li>• Equipment schedule – DH had reviewed the schedule and it was with FW for final checking and would be provided to BMCL asap</li> <li>• Aseptic drawings – RCP drawing had been returned</li> </ul>	
			03/04/2014	DS advised that in relation to the lead drawings this matter had been raised a few times and work has already been done.	
			10/04/2014	DH advised that the Major Equipment schedule RDD had been returned earlier that morning as a B status with only minor comments (mismatch in 1 room)	
			17/04/2014	DS noted that the RDD Tracker report had been issued and there were no outstanding items of concern. DH advised that he had a batch of M&E drawings predominantly Medical Gas (circa 45) and he would return these on 24/04/2014.	
			24/04/2014	DH noted that the 2 x 'lead lined' drawings had reappeared on the tracker and he would investigate the return of the drawings with FW. DH advised that he would liaise with HG and MM to obtain a date for the return of the wayfinding drawings. The M&E batch of drawings was WIP.	
			01/05/2014	DH advised that all the lead detail drawings had been returned. The review of the Medical Gas drawings was circa 50% complete and there were no major issues being identified. Fire strategy 'B' comment on 1 drawing – GB and DH to discuss and agreed way forward. Fire Strategy to be updated in relation to carts and art work.	
			08/05/2014	DH advised that the Medical Gas drawings had been returned on 6/5/2014. DS enquired if DH had liaised with GB re updating the Fire Strategy and DH confirmed he had.	
			15/05/2014	DS advised that there were no issues. DH agreed to chase up the wayfinding RDD for return	
			22/05/2014	DH advised that Wayfinding was now returned and a conversation had with DH and FW and the bed heads will be returned via the formal RDD process	
			29/05/2014	DS noted that there was 52 items overdue – mainly M&E – nothing that is causing grief. It was noted that FW is reviewing the bed-heads however it was thought that these were being issued for info only as per previous discussions.	
			12/06/14	Board have requested the withdrawal of the 52 items, specific issues to be dealt with through RFI. Two lead lined cabinet details remain outstanding. Medigas detail for NCH dental area is requires a quick turn around.	
			19.6.2014	2 minor items; Car Park 1 stat signage and lead details. DH agreed to follow up.	
			26.6.2014	Lead details returned in week, statutory signage ongoing, DH to chase. Adult entrance plasterboard details highlighted but Board no knowledge of receipt, GW to check in system.	
			03/07/2014	5 documents listed on tracker. A) 3 docs relate to 1 transmittal re wayfinding - these had been returned back to the NHS as the front sheet had not been signed off – these would be returned back to BMCL later that day. B) The column cladding drawing had been returned to BMCL on 30 <sup>th</sup> May 2014. C) description states for CP1 in error as dwg relates to Hazard signage for A&C – the necessary approvals to achieve sign-off is being progressed.	
			10/07/2014	DH noted that there had been no schedule issued on 9/07 however he thought that the only item to be returned to BMCL is the hazard signage.	
			24/07/2014	DH noted that 2 docs had been returned the previous day at C status, wayfinding docs would be returned asap.	

			31/07/2014	<p>AFe noted that TDSL were awaiting sign-off of the doors for Schiehallion – propping 2 x 6mm panes. DH noted that there was concern regarding the double doors into the isolation rooms and the double doors into the ensuite. AFe advised that TDSL were providing a review of all the doors and are preparing a mark-up of all the 'holes in the walls'.</p> <p>AFe advised that he was getting the BMCL reps to check everything is ok re the dental chairs.</p> <p>PM enquired if this item could be closed. DP advised that the EW had served a good purpose and suggested that the early notes could be removed. DH noted that the tracker gets reviewed every week. AFe suggested that a note be put at the end "Review of RDD Tracker" and this was agreed. DH advised that the current tracker had 2 items listed – 1 item was with BMCL and the other item had been returned to BMCL but could not be located therefore a reprint was being provided to the NHS to re-review. DH noted that the schiehallion door drawings had been received the previous day.</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>03/04/2014</p> <p>10/04/2014</p> <p>24/04/2014</p> <p>01/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>24/07/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p> <p>GW tables costs and supporting information for review by C&amp;B</p> <p>DR has to make recommendations on information provided from BMCL</p> <p>DR now has costs from BMCL to review and will revert back to BMCL</p> <p>DR reported that he had the report and was to review with DWL and then discuss with GW</p> <p>GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim.</p> <p>DR advised that he would conclude the information for provision to DL.</p> <p>DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW.</p> <p>Noted that DR was to meet with DL.</p> <p>DL noted that DR would discuss with GW asap</p> <p>Ongoing</p> <p>GW advised this is to be wrapped up in the INS entrance works.</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p> <p>DR and GW in discussion re way forward</p>	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	<p>06/03/2014</p> <p>13/03/2014</p> <p>20/03/2014</p> <p>27/03/2014</p> <p>01/05/2014</p> <p>26/06/2014</p> <p>24/07/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average.</p> <p>GW to provide back-up information</p> <p>GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather</p> <p>Ongoing.</p> <p>C&amp;B to contact GW to discuss.</p> <p>DR and GW in discussion re way forward</p>	

20877	BMCL-EWN-143 -	Alterations to arrival square	10/03/2014	<p>With reference to PMI 254, we enclose further update of the drawing, following discussion with the Board. We note that this requires a further safety study, drainage alterations and service co-ordination etc at this stage.</p> <p>As this scheme is now more complex than originally envisaged BM will need to undertake a Stage 2 safety audit, we would be pleased to meet with the NHS Board and the authorities to expedite this matter. BM would however note that authority approval risk does not remain with BM as there is now programme implications starting with traffic lights, kerb realignment etc.</p> <p>Board requested to meet with BMCL</p>	
			13/03/2014	<p>Met last Friday to review and alternative solution proposed by WSP (DCampbell) to allow 2 buses to lay-up in the curved lay-by with patient transport drop-off accommodated in the central island area. Verbal feedback from GCC was positive. Once written confirmation received then progress under current TRO</p> <p>GW noted there could be implications to the programme and it was noted that it was a straightforward change therefore should hopefully be no issue.</p>	
			20/03/2014	<p>GW advised that BMCL need a way forward re the drawing confirmed by the NHS so that the design works can be progressed. AK noted that the bus stops would impact on the footpath. DH advised that the kerb lines are accepted by GCC. The positioning of the bus stops were to be confirmed. GCC were proposing that zig-zag lines. Final drawing is awaited from GCC confirming crossing and positions for 4 bus stops. GW enquired if there was any reason that BMCL could not engage with GCC re the lights and pelican crossings. DH noted that there was no reason to stop BMCL engaging with GCC however GCC were providing a plotted drawing. DH confirmed that BMCL should procure the signals. DH noted that the number of lights was still to be confirmed. AK suggested that the 771 series drawings show the lights. GW noted that WSP had initially prepared 5 drawings showing the lights and it was proposed that WSP be requested to provide 1 drawing which had all the street lights and he suspected that the current drawings may be out of date. DH advised that the street lights needed to be discussed and agreed. GW noted that WSP have suggested that they have £25k indicative costs for surveys, etc for the detailed design. DH agreed to issues a PMI later that day to confirm that BMCL should procure the signals and also confirm that BMCL should procure the detailed design from WSP.</p>	
			27/03/2014	<p>DH advised that he had issued the PMI re procurement of the signals and that DH was actively pursuing GCC for a response. DS advised that confirmation of the way forward was required asap. GW noted that the only item which BMCL could progress at this time is the procurement of the traffic lights. DH advised that only confirmation of the position of the bus stops awaited which may impact on the type of kerb. DH noted that he would pursue GCC for a response and if no response by cop that day (27/03/2014) then he would amend the PMI. GW requested a meeting to discuss the bus shelters and PM advised that the NHS reps for this meeting would be PM and DH. DH noted that a RCC would be required and DS requested that this be added to the PMI so that BMCL can instruct WSP to work on the RCC. DS enquired about Planning permission and PM advised that he needed to discuss this with DH in the first instance.</p>	
			03/04/2014	<p>DS suggested that the PMI wasn't clear so the PMI hadn't been progressed in any way. GW noted that the instruction had been written to allow BMCL to progress with the street lights. BMCL had advised GCC that the NHS have ongoing matters to resolve at this time therefore BMCL will not be progressing discussions at this time. PM advised that the only item in abeyance is the kerb that runs along the A&amp;C frontage and crossing – all other items are on the WSP 'SK' drawing. GW GW advised that the GCC rep will not progress and that George had sent across the sketch to GCC. PM enquired that if the NHS issue an instruction to BMCL then there are duty bound to carry out the instruction and it was confirmed that</p>	

			<p>10/04/2014</p> <p>17/04/2014</p> <p>24/04/2014</p> <p>30/04/2014</p> <p>08/05/2014</p> <p>31/05/2014</p>	<p>BMCL were bound to carry out an instruction as long as it is clear. PM advised that he would be meeting with SPT w/c 07/04/2014 to conclude the discussions and it was thought that the final scheme was close to being agreed and that Kevin MacCormack is happy with the proposals. In relation to the RCC – a drawing will need to be submitted, there may be a need to update RSA however there was no requirement to update the Vissim model. It was expected that consensus position would be achieved w/c 07/04/2014. DS requested that the NHS confirm the way forward post the GCC meeting. PM noted that he would be meeting with the GCC Planners in order to get the shuttle bus condition removed, to discuss the Section 75 and cashflow. DS advised that BMCL were happy to meet with the NHS whenever required.</p> <p>DS noted that a good meeting had been had the previous day. BMCL had received the PMI which crystalises the information which BMCL can progress on. DS would find out what the consultant expenses were to date and would provide this to the NHS so a CEN can be raised for these costs. DS would then get the costs for the works going forward which would be a separate PMI.</p> <p>DS advised that he had met with the consultants w/c 14/04/2014. The costs and details were being prepared. There are some queries to be discussed i.e. kerb tracking.</p> <p>DS noted that BMCL were identifying programme implications. PM noted that if at any stage the programme was to be a live issue then BMCL to liaise with PM and PM will provide any decisions so BMCL can proceed on programme. DS noted that programme will need to be mitigated as the package is already let. BMCL have sufficient information now to analyse programme. DH enquired if the NHS were happy to issue PMIs to BMCL to allow them to progress with work so that the programme is not impacted on. DS advised that the area was being cleared so can start working. GW noted that the site is pretty congested.</p> <p>Updated drawing received 30/04/2014. NHS to meet with GCC asap. Ongoing to conclude discussion.</p> <p>** Cross reference with PMI 283**</p> <p>Agreed that this item could be closed as being dealt with under PMI 283</p>	
21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre.</p> <p>The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.</p> <p>Board to issue PMI to instruct additional monitoring and measuring</p> <p>DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.</p> <p>DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.</p> <p>DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.</p> <p>DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date</p>	

				and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014  03/07/2014  10/07/2014 24/07/2014  31/07/2014	<p>The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.</p> <p>Board to confirm acceptance</p> <p>PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.</p> <p>DH advised that the draft permit was published in accordance with the timeline (7<sup>th</sup>).</p> <p>DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.</p> <p>DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10<sup>th</sup> August 2014.</p>	
21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014  03/07/2014  10/07/2014 24/07/2014  31/07/2014	<p>Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie &amp; Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.</p> <p>GW noted that BMCL should have been progressing the kerbing under the LE contract. DH advised that NMCL and NHS should not be accepting any charges from GGC as it is GCC that made the embargo which started in April. GW noted that there had also been a fault in the cable.</p> <p>DH advised that he will provide feedback to DP asap.</p> <p>DH noted that the Virgin works were 100% complete however it was proving difficult to get communication with C&amp;W which is apparently not uncommon. A potential solution had been identified and was being checked out in relation to RCC implications. GW noted that the only work that can be undertaken in that area at the moment is take down the wall however BMCL were reluctant to start/stop works.</p> <p>GT to liaise with AFe to discuss potential solution</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013  19/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled for 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available

			<p>29/5/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>PM to confirm if ok with BMCL demolition list.</p> <p>Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&amp;E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.</p> <p>Tenders issued w/c 23 June 2014, with 4 week tender period.</p> <p>GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.</p> <p>PM noted that he understood the tenders had been issued.</p> <p>It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 8<sup>th</sup> August 2014.</p> <p>GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p> <p>20/03/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was</p>	

			27/03/2014	being proposed to have a solid support rather than 'colander' style support. DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	
			22/05/2014	DP to progress.	
			12/06/2014	Work in progress, action on DP.	
			26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	
			03/07/2014	DP advised he would push on the write up of the proposed option.	
			10/07/2014	DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014.	
			31/07/2014	DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 13/08/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014	Please provide a cost to incorporate the undernoted works into the contract.  Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections of roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.	
			15/05/2014	GW noted this is WIP	

A51679245

			<p>22/05/2014</p> <p>29/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p> <p>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</p> <p>Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still outstanding and this element forms part of these works which are due to commence in the autumn.</p> <p>GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.</p> <p>DP advised that BMCL have had internal discussions and drawing being prepared re Hardgate Road/Car Park area for GCC.</p> <p>GW advised that the cost had been uploaded the previous day. PM agreed to review the quote asap.</p> <p>PM advised that he understood that BMCL had received the price back and that the NHS would go through the dwgs received. DH suggested that dwg 105 is missing from the pack (focus is on Hardgate Road) which was issued by WSP. DH had liaised with DS regarding the missing dwg as this is an important dwg to be reviewed. PM noted that he would be writing to GCC to ask why GCC has decided that the NHS should be responsible for new street lights on Hardgate Road. DH advised that dwgs to identify how many additional lights that GCC expect the NHS to do.</p>	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	<p>29/05/2014</p>	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as; 1) Narrative.</p>	

			<p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.  3) Bus shelter data sheet.  4) Bus shelter foundation detail.  PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.  GW advised that the costs were currently being uploaded for options A and B  PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.</p>	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.</p>	

2711	PMI 296	NSGH - SECTION 56/1 ROADWORKS – PROPOSED ALTERATIONS	01/07/2014   03/07/2014  10/07/2014 24/07/2014  31/07/2014	<p>Proposed amendment to south kerb line outside private dwelling houses on Govan Road.</p> <p>Following the meeting held on 27th June 2014, with Glasgow City Council, to discuss their proposed alterations to the approved Section 56/1 road layout on Govan Road the Board instruct Brookfield Multiplex to proceed with the following work. Redesign the road layout to match the GCC Fastlink layout (see attached); meet with GCC Land Engineering Services and agree to secure amendment to Section 56/1 approvals. Establish costs for all re-design work, construction works and factor in any omissions such as the middle island at the old hospital entrance.</p> <p>Refer attached drawings and narrative. Provide costs as noted above by 15th July 2014.</p> <p>GW advised he would provide the information to DCampbell however think he DCampbell will have safety concerns.</p> <p>Update to be provided to the NHS asap.</p> <p>GW advised that the costs had been uploaded the previous day. DS noted that BMCL anticipated being in receipt of the drawings by cop 25/07/2014. DS suggested that there should be a discussion with the NHS re the dialogue which needs to happen with GCC.</p> <p>PM noted that he had received a pack of drawings which he was reviewing. PM raised concern re the 3 lanes of traffic and suggested that the NHS should write to GCC to highlight collective concerns.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014   10/07/2014 24/07/2014 31/07/2014	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p>	
2778	PMI 298	Adult Atrium & NCH Entrance Lobby - Power supply & Additional Containment	25/07/2014  31/07/2014	<p>The Board confirm the requirement for 3 x 32A supplies terminated with isolators and additional containment routes for the installation of telecoms cabling by others at agreed locations in the Adult Atrium &amp; NCH Entrance Lobby to facilitate the future installation of ATM's.</p> <p>GW agreed to check that this instruction had been issued to Mercury.</p>	
2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014	<p>Additional survey work to foundations of existing building.</p> <p>Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.</p> <p>Please pre-survey all proposed areas with service detection equipment and hand dig as required.</p> <p>Establish agreed access with Board representatives and building users prior to commencement.</p> <p>Erect and maintain hoardings around all excavations, displaying all required safety and directional</p>	

				signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.  Consider all service pipes to be live.	
2837	PMI 300	- Patient Entertainment	13/08/2014	The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072	
2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping.	
2840	PMI 302	NCH Children's Park – Amendment to proposals	13/08/2014	The Board instruct BMCL to reposition the horizontal bars (Q52/119), remove the barrel net (Q52/119) and install 1no. inclusive roundabout (details attached) in lieu of the barrel net as per Gillespies marked up drawing.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
12819	CE 057 -	Equipment List - Groups 1 and 2	10/07/2014 24/07/2014 31/07/2014	Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position. PM noted that there was a query re 2 items on the list (a – cost for MA4 but no breakdown and b – public telephone cost). Up to date agreed equipment list to be provided to the NHS DH to discuss with AKerr	
12797	CE 056	NEUROSURGICAL BLOCK - UPGRADE OF MAIN ENTRANCE	30/07/2014	Upgrade and extension to main entrance. Proceed with design development to develop design for client sign off, submit planning application, develop programme, develop risk matrix and agree TP with Board. Confirm proceed with PMI 294. The fee below excludes Building Warrant fees.  CE agreed on system – 13/08/2014	13/08/2014

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) **DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCE on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14). PM requested that an update of the drawings is provided by 24/07/2014 (10/07/2014) DS noted that Joanne had confirmed that the revised drawings are under preparation and will be provided asap. (24/07/2014) **PM noted that he is awaiting a drawing (31/07/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) **GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014)**
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGReen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) **AFe advised that feedback is awaited from WSP (31/07/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) **Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the**

same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014)

- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a ‘control panel’. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of “at main entrance”. DH advised that he is of the view that this is a Firecode matter. The alarm location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board’s Fire Officer would need to agree that the location is ok (31/07/2014)
- Review of RDD Tracker

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 920

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 20/08/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. <b>DR and GW in discussion re way forward</b>			
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. <b>DR and GW in discussion re way forward</b>			

A51679245

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.	
			24/07/2014	DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.	
			31/07/2014	DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
			14/08/2014	AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August. Board to confirm acceptance	
			03/07/2014	PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.	
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.	

21894	BMCL-EWN-000148 -	Fibre optic cable diversion works Renfrew Road	02/07/2014	Brookfield Multiplex were expecting fibre cable diversions at Renfrew Road to be completed week commencing 16th June which was the date given to Currie & Brown by Cable and Wireless. Brookfield Multiplex were due to remove the existing brick wall two weeks prior to our kerbing starting 18th July (as per our latest programme). We have now been advised that the fibre cable diversion works will be completed on 19th July. We have also tried to gain a partial road closure permit to coincide with the 19th July to allow us to divert the footpath and tie-in the road kerbs, but GCC are refusing to grant this partial road closure due to the Commonwealth Games embargo.	
			03/07/2014	GW noted that BMCL should have been progressing the kerbing under the LE contract. DH advised that NMCL and NHS should not be accepting any charges from GGC as it is GCC that made the embargo which started in April. GW noted that there had also been a fault in the cable.	
			10/07/2014	DH advised that he will provide feedback to DP asap.	
			24/07/2014	DH noted that the Virgin works were 100% complete however it was proving difficult to get communication with C&W which is apparently not uncommon. A potential solution had been identified and was being checked out in relation to RCC implications. GW noted that the only work that can be undertaken in that area at the moment is take down the wall however BMCL were reluctant to start/stop works.	
			31/07/2014 14/08/2014	GT to liaise with AFe to discuss potential solution EW closed – refer to PMI	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 20/08/2014

						
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this. WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works. AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time. WIP by BMCL AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS. AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.		
A51670245						

A51679245

			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true

			17/04/2014	reflection of the buildings. DL requested that BMCL provide the cost information by mid May. PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.
			10/07/2014	PM noted that he understood the tenders had been issued.
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B

				costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.	
			16/01/2014	An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.	
			23/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			30/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a “colander effect”. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			13/02/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
			27/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.	
			06/03/2014	DP expected to be able to provide a response to the NHS in the next 7-10 days.	
			20/03/2014	Report anticipated shortly	
			27/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			04/04/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than ‘colander’ style support.	
			10/04/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			17/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			24/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			08/05/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			15/05/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			22/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
				DP advised that he was continuing to pursue the formal report.	
				DP to progress.	

			12/0620/14 26.06.2014	Work in progress, action on DP. This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	
			03/07/2014 10/07/2014 31/07/2014 14/08/2014	DP advised he would push on the write up of the proposed option. DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014. DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014. <b>DP to provide update on return from leave</b>	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 20/08/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014  15/05/2014 22/05/2014  29/05/2014  05/06/2014 12/06/2014  26/06/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p> <p>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</p> <p>Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still</p>	

A51679245

			03/07/2014	outstanding and this element forms part of these works which are due to commence in the autumn. GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.	
			10/07/2014	DP advised that BMCL have had internal discussions and drawing being prepared re Hardgate Road/Car Park area for GCC.	
			24/07/2014	GW advised that the cost had been uploaded the previous day. PM agreed to review the quote asap.	
			31/07/2014	PM advised that he understood that BMCL had received the price back and that the NHS would go through the dwgs received. DH suggested that dwg 105 is missing from the pack (focus is on Hardgate Road) which was issued by WSP. DH had liaised with DS regarding the missing dwg as this is an important dwg to be reviewed. PM noted that he would be writing to GCC to ask why GCC has decided that the NHS should be responsible for new street lights on Hardgate Road. DH advised that dwgs to identify how many additional lights that GCC expect the NHS to do.	
			14/08/2014	PM advised that he would discuss this matter with DL and suggested that this item would become a CE in the next couple of weeks.	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.	
				The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.	
				Information confirmed as; 1) Narrative. 2) WSP Drg: WSP EW XX SK 771 117 Rev 03. 3) Bus shelter data sheet. 4) Bus shelter foundation detail.	
			10/07/2014	PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.	
			24/07/2014	GW advised that the costs were currently being uploaded for options A and B	
			31/07/2014	PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.	
			14/08/2014	PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out	

				of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p> <p>14/08/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.</p> <p>PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe</p>	

A51679245

2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE- DESIGN	20/08/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council.	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
12819	CE 057 -	Equipment List - Groups 1 and 2	10/07/2014  24/07/2014 31/07/2014 14/08/2014 21/08/2014	Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position. PM noted that there was a query re 2 items on the list (a – cost for MA4 but no breakdown and b – public telephone cost). Up to date agreed equipment list to be provided to the NHS DH to discuss with AKerr GW advised that BMCL were progressing this PMI GW to add in zero cost so CE can be closed.	
		NCH Park		To be raised in due course	

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014)

- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCL on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14). PM requested that an update of the drawings is provided by 24/07/2014 (10/07/2014) DS noted that Joanne had confirmed that the revised drawings are under preparation and will be provided asap. (24/07/2014) **PM noted that he is awaiting a drawing re main entrances (31/07/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) **GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014)**
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGreen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion and the wording was being agreed with WR (14/08/2014) **PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed t the same spec. PM agreed to liaise with FShaw (14/08/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) **PM noted this item is WIP (14/08/2014)**
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of "at main entrance". DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board's Fire Officer would need to agree that the location is ok (31/07/2014) **DP to provide update on return from leave (14/08/2014)**

- Pigeon sounder box – AFe noted that KConnelly had showed the sounder box to AFe at a meeting the previous day. AFe advised that if the NHS purchases the boxes then AFe would organize to get them fitted via Mercury. (14/08/2014)
- Review of RDD Tracker

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 27/08/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p>	<p>The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre.</p> <p>The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.</p> <p>Board to issue PMI to instruct additional monitoring and measuring</p> <p>DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.</p> <p>DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.</p> <p>DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.</p> <p>DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.</p> <p>AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.</p> <p><b>AFe noted that certification from SEPA had been received via IPowrie</b></p>	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p>	<p>The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015.</p> <p>The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.</p> <p>Board to confirm acceptance</p> <p>PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.</p> <p>DH advised that the draft permit was published in accordance with the timeline (7<sup>th</sup>).</p> <p>DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.</p> <p>DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10<sup>th</sup> August 2014.</p> <p>IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.</p> <p><b>It was noted that the pack was being issued later that day to SEPA</b></p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 27/08/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2012</p> <p>07/11/2013</p> <p>21/11/2013</p> <p>12/12/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP</p>	

A51679245

			<p>19/12/2013 test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>09/01/2014 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>16/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>23/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>15/05/2014 GW and AFe to do walkround early w/c 19/05 with HMc</p>	
--	--	--	---	--

			22/05/2014	Walkabout scheduled on 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available	
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy are finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.	
			05/06/2014	PM to confirm if ok with BMCL demolition list.	
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.	
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.	
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.	
			10/07/2014	PM noted that he understood the tenders had been issued.	
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.	
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.	
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.	
			21/08/2014	AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1 <sup>st</sup> quarter next year.	

Page 939

20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.
			16/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.
			23/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.
			30/01/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.
			13/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days.
			27/02/2014	Report anticipated shortly
			06/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.
			15/05/2014	DP advised that he was continuing to pursue the formal report.
			22/05/2014	DP to progress.
			12/06/2014	Work in progress, action on DP.
			26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.

			03/07/2014 10/07/2014 31/07/2014 14/08/2014 21/08/2014	DP advised he would push on the write up of the proposed option. DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014. DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014. DP to provide update on return from leave AFe advised that PMc has raised some concerns (highlighted by Land Eng.) about the condition of the road down past the VIE. BMCL were to scarify and re-lay the tarmac but Land Eng. are saying that they don't think the road will last very long.

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 27/08/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2582	PMI 289	RESURFACING AND STREET LIGHTING WORKS	08/05/2014  15/05/2014 22/05/2014  29/05/2014  05/06/2014 12/06/2014  26/06/2014	<p>Please provide a cost to incorporate the undernoted works into the contract.</p> <p>Please provide a cost for each of the two areas, as indicated on the attached sketch at A and B, for the strip and relay of respective sections or roadway, and compaction of any softspots prior to resurfacing the area and making good junctions with adjacent new roads and margins, and graded to fall for existing cambers and drainage to existing gulleys. Provide also costs for replacement of existing street lighting columns and heads to match new being provided through the contract, and recabling underground and connection to main infrastructure. Generally making good all junctions with existing finishes and surfaces. Programme works as part of BMCE contract works for adjacent areas in both locations.</p> <p>GW noted this is WIP</p> <p>WIP heads for lights have been sourced but are not BStandard compliant which may be an issue for GCC. GW if these heads are not usable it will be necessary to have a further meeting with GCC. It was noted that Section 56(2) remains to be signed off. BMCL agreed to complete the process for lights and then revert back to NHS before progressing with GCC</p> <p>DS advised that he will liaise with DCampbell. BMCL do not want to do additional lights and will challenge any request to install additional lights. The suggested additional lights are based on the campus wide and outwith the BMCL project. GW noted that GCC has already resurfaced the the road which GCC have come back re the street lights. DR suggested that a cost for doing all the street lights should be obtained so can have discussion with GCC. GW noted that Mercury had difficulty identifying top fed lights.</p> <p>GW advised that price awaited back from Mercury and Land Engineering.</p> <p>Await costs from Land Engineering for road works element. Mercury to conclude options for lighting and BMCL to meet with Council to confirm if proposals are workable, different potential strategy for wiring noted.</p> <p>Ongoing discussion re top and bottom fed lighting solutions and their respective costs. BMCE need to develop a proposal and discuss with Glasgow City Council, approval of Section 56/2 still</p>	

A51679245

			03/07/2014	outstanding and this element forms part of these works which are due to commence in the autumn. GW advised that he was awaiting street lighting costs from Mercury – he had been chasing Mercury all week. DH advised that a technical submittal needs to be signed off to conclude the 56(2). GW advised that the section 56 information had been with GCC for 3 years and no-one had done any work re the street lighting. DH noted that the Team needs to be able to go back to GCC and confirm the way forward/technical solution. DP advised that BMCL would sort out the technical submittal internally to minimize the number of people involved in the process. DH advised that the street lighting had not been discussed with GCC however there is a need to be able to confirm that the technical solution is do-able.	
			10/07/2014	DP advised that BMCL have had internal discussions and drawing being prepared re Hardgate Road/Car Park area for GCC.	
			24/07/2014	GW advised that the cost had been uploaded the previous day. PM agreed to review the quote asap.	
			31/07/2014	PM advised that he understood that BMCL had received the price back and that the NHS would go through the dwgs received. DH suggested that dwg 105 is missing from the pack (focus is on Hardgate Road) which was issued by WSP. DH had liaised with DS regarding the missing dwg as this is an important dwg to be reviewed. PM noted that he would be writing to GCC to ask why GCC has decided that the NHS should be responsible for new street lights on Hardgate Road. DH advised that dwgs to identify how many additional lights that GCC expect the NHS to do.	
			14/08/2014	PM advised that he would discuss this matter with DL and suggested that this item would become a CE in the next couple of weeks.	
			21/08/2014	PM advised this PMI had been superseded by PMI 305 therefore PMI could be closed.	
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.	
				The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.	
				Information confirmed as; 1) Narrative. 2) WSP Drg: WSP EW XX SK 771 117 Rev 03. 3) Bus shelter data sheet. 4) Bus shelter foundation detail.	
			10/07/2014	PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.	
			24/07/2014	GW advised that the costs were currently being uploaded for options A and B	
			31/07/2014	PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.	
			14/08/2014	PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is	

			21/08/2014	<p>proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.</p> <p>DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.</p>	
2639	PMI 294 -	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p> <p>14/08/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.</p> <p>PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans.</p>	

			14/08/2014  21/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.  AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014          21/08/2014	Additional survey work to foundations of existing building.  Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.  Please pre-survey all proposed areas with service detection equipment and hand dig as required.  Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.  Consider all service pipes to be live. GW noted this is WIP	
2837	PMI 300	Patient Entertainment	13/08/2014  14/08/2014  21/08/2014	The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072  It was noted that a response had been provided to DH. AFe suggested that these works would require a lot of down taking of walls, bedheads in addition to cutting and retesting gases and putting in eco stud parttresses and BMCL were proposing that a pendant should be used instead. PM agreed to review the BMCL proposals on site. AFe acknowledged that there was a few other rooms where the patient entertainment had been missed out.  AFe advised that it was still to be identified if to be ceiling or wall mounted. BMCL were meeting with the subcontractor later that day to discuss the costs for the brackets. AFe advised that he would check out if the 5 rooms identified in the PMI could be wall mounted.	
2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014  14/08/2014 27/08/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping. GW advised that BMCL were progressing this PMI GW advised that he was waiting price information from Land Eng.	

2840	PMI 302	NCH Children's Park – Amendment to proposals	13/08/2014 14/08/2014 21/08/2014	The Board instruct BMCL to reposition the horizontal bars (Q52/119), remove the barrel net (Q52/119) and install 1no. inclusive roundabout (details attached) in lieu of the barrel net as per Gillespies marked up drawing. GW advised that BMCL were progressing this PMI Cost agreed. Item closed subject to CE being raised by PM	
2867	PMI 303	Adult Hospital Signage for all WC's	19/08/2014	The Board confirm that door signage other than disabled discs should not be fitted to ambulant, semi ambulant, disabled and ensuite facilities within the podium and ward stack. The attached list identifies those rooms affected and also confirms where disabled discs should be installed as per contract. All spare signs should be boxed and handed over to the Board representative at the end of the project. The Board will be fitting 'dementia' signage to all doors included on the attached list.	
2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE-DESIGN	20/08/2014  21/08/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council. Overview of the works to be done provided. Discussions with GCC ongoing in relation to the extent of the works. Costs to be covered through the section 75 monies. DS to progress dialogue with GCC.	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014  21/08/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289. GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
12819	CE 057	Equipment List - Groups 1 and 2	10/07/2014 24/07/2014 31/07/2014 14/08/2014 21/08/2014	Ref PMI 295 - CE required for recent amendments to the main equipment list. CE to close out current position. PM noted that there was a query re 2 items on the list (a – cost for MA4 but no breakdown and b – public telephone cost). Up to date agreed equipment list to be provided to the NHS DH to discuss with AKerr GW advised that BMCL were progressing this PMI GW to add in zero cost so CE can be closed.	

		NCH Park		CE to be raised by PM – cross ref PMI 302
		RESURFACING AND STREET LIGHTING WORKS		CE to be raised by PM – cross ref PMI 305

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) **DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014)**
- Gas meter housing and entrances – Gilliespies to be contacted to provide information on this and the boundary wall and entrances to the hospitals. DS agreed to progress to provide details (13/03/2014) It was noted that there needed to be agreement about a) what was to be done at the 2 principal entrances and b) the wayfinding and art input to the entrances. GW noted that BMCL needed confirmation of the hospital name (20/03/2014) DS advised that BMCL would be meeting with Gillespies to progress the design for the whole of the entrance and once prepared presentation of the proposal would be provided to the NHS (27/03/2014) DS advised he had met with Gillespies and discussed what has to be done at Renfrew and Hardgate Road entrances and a whole entrance presentation will be provided to the NHS in June (04/04/2014) DS provided mark-ups to PM so can get clarity that going in correct directions. (15/05/2014) Interim meeting held and proposals being worked up (29/05/2014). Updated drawings awaited from BMCL. (12/06/2014). Revised drawings received from BMCE on 20/06/14 and comments returned to DS on 25/06/2014. (26/06/14). PM requested that an update of the drawings is provided by 24/07/2014 (10/07/2014) DS noted that Joanne had confirmed that the revised drawings are under preparation and will be provided asap. (24/07/2014) PM noted that he is awaiting a drawing re main entrances (31/07/2014) **AFe/GW agreed to chase up DS for the drawing (21/08/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) **GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014)**
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGreen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion

and the wording was being agreed with WR (14/08/2014) PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed to the same spec. PM agreed to liaise with FShaw (14/08/2014) AFe noted that there is communication going between WSP and Fairhurst – WIP to conclude (21/08/2014)

- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014)
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of "at main entrance". DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board's Fire Officer would need to agree that the location is ok (31/07/2014) DP to provide update on return from leave (14/08/2014)
- Review of RDD Tracker

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 948

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 03/09/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	

A51679245

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.	
			24/07/2014	DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.	
			31/07/2014	DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
			14/08/2014	AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.	
			21/08/2014 28/08/2014	AFe noted that certification from SEPA had been received via IPowrie DH advised that it had been agreed with DP that a meeting should be set-up next week with IP. The first tests are due to be carried out in January 2015 which will be the baseline. It was noted that the SUDS wetlands redesign submission is 30 <sup>th</sup> September 2014. DS advised that everything is progressing satisfactorily and he would meet with DH to agree the wording.	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26 <sup>th</sup> of January 2015 and the contract completion date of 28 <sup>th</sup> February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7 <sup>th</sup> August 2014 with commissioning activities allowed to commence from the 21 <sup>st</sup> of August.	
			03/07/2014	Board to confirm acceptance PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will	

			14/08/2014 21/08/2014 28/08/2014	<p>be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10<sup>th</sup> August 2014.</p> <p>IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.</p> <p>It was noted that the pack was being issued later that day to SEPA</p> <p>DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.</p>	
--	--	--	--	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 03/09/2014

					
SypID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to</p>	

A51679245

			<p>BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposed. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the</p>	
--	--	--	---	--

				<p>BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>15/05/2014 GW and AFe to do walkround early w/c 19/05 with HMc</p> <p>22/05/2014 Walkabout scheduled for 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</p> <p>29/5/2014 PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy are finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>05/06/2014 PM to confirm if ok with BMCL demolition list.</p> <p>12/06/2014 Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&amp;E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.</p> <p>26/06/2014 Tenders issued w/c 23 June 2014, with 4 week tender period.</p> <p>03/07/2014 GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.</p> <p>10/07/2014 PM noted that he understood the tenders had been issued.</p> <p>24/07/2014 It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 8<sup>th</sup> August 2014.</p> <p>31/07/2014 GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.</p> <p>14/08/2014 GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&amp;B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&amp;B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>21/08/2014 AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the</p>
--	--	--	--	--

			28/08/2014	<p>Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014  23/01/2014  30/01/2014  13/02/2014  27/02/2014 06/03/2014  20/03/2014  27/03/2014  04/04/2014  10/04/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back</p>	

			17/04/2014	to the NHS GG&C Estates Dept.	
			24/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			08/05/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			15/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			22/05/2014	DP advised that he was continuing to pursue the formal report.	
			12/06/2014	DP to progress.	
			26.06.2014	Work in progress, action on DP.	
			03/07/2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	
			10/07/2014	DP advised he would push on the write up of the proposed option.	
			31/07/2014	DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014.	
			14/08/2014	DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014.	
			21/08/2014	DP to provide update on return from leave	
				DP to provide an update urgently as EW to be closed out asap.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 03/09/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol>	
			10/07/2014	PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.	
			24/07/2014	GW advised that the costs were currently being uploaded for options A and B	
			31/07/2014	PM advised that the pack of information was under review. DH noted that the QS was also	

A51679245

			<p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p>	<p>reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.</p> <p>PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.</p> <p>DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.</p> <p>GW noted that CE required asap – circa £126k – excludes the bus shelters. DH agreed to organize the CE. GW noted that the sub-contractors had been advised to proceed however BMCL needed a CE to cover the sub-contractor instructions. DS advised that he had seen correspondence advising that planning for the revised arrival square had been received. DS agreed to provide the NHS with a copy of the correspondence. (Cross ref CE 060)</p>	
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was</p>	

			<p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p>	<p>noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.</p> <p>PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day</p> <p>PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.</p> <p>DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16<sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28<sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&amp;E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	<p>04/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p>	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p>	

			31/07/2014	DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.	
			14/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.	
			21/08/2014	AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
			28/08/2014	It was noted that the price and the programme were to be provided to the NHS on 29/08/2014	
2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014	Additional survey work to foundations of existing building.  Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.  Please pre-survey all proposed areas with service detection equipment and hand dig as required.  Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.	
			21/08/2014	Consider all service pipes to be live. GW noted this is WIP	
			28/08/2014	GW advised that CE required asap. CE value circa £10k. DH enquired what the architectural fees are for and GW agreed to liaise with AKerr regarding the costs included in the quotation. (Cross ref CE 061)	
2837	PMI 300	Patient Entertainment	13/08/2014	The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072	
			14/08/2014	It was noted that a response had been provided to DH. AFe suggested that these works would require a lot of down taking of walls, bedheads in addition to cutting and retesting gases and putting in eco stud parttresses and BMCL were proposing that a pendant should be used instead. PM agreed to review the BMCL proposals on site. AFe acknowledged that there was a few other rooms where the patient entertainment had been missed out.	
			21/08/2014	AFe advised that it was still to be identified if to be ceiling or wall mounted. BMCL were meeting	

			28/08/2014	with the subcontractor later that day to discuss the costs for the brackets. AFe advised that he would check out if the 5 rooms identified in the PMI could be wall mounted. DL noted that the approval for the patient entertainment system for the Adult Hospital was nearing conclusion. GW advised that cost for the rooms identified in the PMI was still to be bottomed out with Mercury. DH advised that he understood that James Bailey would like to liaise with DH and DH would organize to speak to JBailey. DH suggested that the cost of the brackets can be drastically reduced on the basis of lessons learned at renal bays.	
2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014 14/08/2014 28/08/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping. GW advised that BMCL were progressing this PMI GW advised that he was waiting price information from Land Eng.	
2867	PMI 303	Adult Hospital Signage for all WC's	19/08/2014  28/08/2014	The Board confirm that door signage other than disabled discs should not be fitted to ambulant, semi ambulant, disabled and ensuite facilities within the podium and ward stack. The attached list identifies those rooms affected and also confirms where disabled discs should be installed as per contract. All spare signs should be boxed and handed over to the Board representative at the end of the project. The Board will be fitting 'dementia' signage to all doors included on the attached list. GW enquired how the NHS would like to deal with any savings realized suggesting this could be an equipment list item. NHS to confirm.	
2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE-DESIGN	20/08/2014  21/08/2014 28/08/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council. Overview of the works to be done provided. Discussions with GCC ongoing in relation to the extent of the works. Costs to be covered through the section 75 monies. DS to progress dialogue with GCC. DS advised that he was awaiting a meeting with GCC.(Cross ref CE 059)	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014  21/08/2014 28/08/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289. GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works. DH noted that there was a query regarding the CE value (£157k versus £237k). GW advised that he would review the CE value.	

## COMPENSATION EVENTS

A51679245

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
	CE 058	NCH Park (Cross ref PMI 302)	03/09/2014	The Board confirm that BMCL should proceed with PMI 302 as per Gillespies marked up drawing: * remove the barrel net, * reposition the horizontal bars * incorporate 1 inclusive roundabout.  Agreed cost £5,063.74 including BMCL OH&P and excluding VAT	
	CE 059	Section 56/1 Roadworks – proposed alteration – introduction of layby	03/09/2014	The Board confirm that BMCL should proceed with PMI 304 and construct lay-by outside houses on Govan Road as per drawings approved by Glasgow City Council.  Agreed cost is £41,946.93 inc BMCL OH&P but ex VAT	
	CE 060	Arrival Square (Cross ref PMI 293)	03/09/2014	The Board confirm acceptance of the works as detailed in PMI 293 noting that the procurement of the bus shelters have been excluded from these works.  Agreed cost is £126,007.87 inc BMCL OH&P but exc VAT	
	CE 061	Neurosurgical Block Entrance Works (cross ref PMI 299)	03/09/2014	The Board confirm that BMCL should proceed with PMI 299 and carry out the surveys works as per marked up BMCL drawings.  The agreed price is £8,822.92 inc BMCL OH&P and exc VAT	
		RESURFACING AND STREET LIGHTING WORKS		CE to be raised by PM – cross ref PMI 305	

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014)  
DP to be requested to provide update re progress to conclude matter asap (28/08/2014)

- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) **GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014)**
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGreen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion and the wording was being agreed with WR (14/08/2014) PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed to the same spec. PM agreed to liaise with FShaw (14/08/2014) **AFe noted that there is communication going between WSP and Fairhurst – WIP to conclude (21/08/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) **PM advised that he will prepare a plan on return from his annual leave (21/08/2014)**
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of "at main entrance". DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board's Fire Officer would need to agree that the location is ok (31/07/2014) DP to provide update on return from leave (14/08/2014) **DH agreed to liaise with GB (28/08/2014)**
- Condition of road down past the VIE – GW to raise EW
- **VIE – change to Air Products requirements – GW to raise EW**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 10/09/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward	

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p> <p>04/09/2014</p>	<p>The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre.</p> <p>The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.</p> <p>Board to issue PMI to instruct additional monitoring and measuring</p> <p>DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.</p> <p>DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.</p> <p>DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.</p> <p>DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.</p> <p>AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.</p> <p>AFe noted that certification from SEPA had been received via IPowrie</p> <p>DH advised that it had been agreed with DP that a meeting should be set-up next week with IP. The first tests are due to be carried out in January 2015 which will be the baseline.</p> <p>It was noted that the SUDS wetlands redesign submission is 30<sup>th</sup> September 2014. DS advised that everything is progressing satisfactorily and he would meet with DH to agree the wording.</p> <p>DH noted that a meeting had been held the previous day to agree the site wide emission testing/monitoring would be undertaken by the NHS. DH noted that BMCL have some additional commissioning checks and further discussion required.</p>	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	<p>01/07/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p>	<p>The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26<sup>th</sup> of January 2015 and the contract completion date of 28<sup>th</sup> February 2015.</p> <p>The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7<sup>th</sup> August 2014 with commissioning activities allowed to commence from the 21<sup>st</sup> of August.</p> <p>Board to confirm acceptance</p> <p>PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.</p> <p>DH advised that the draft permit was published in accordance with the timeline (7<sup>th</sup>).</p> <p>DP advised that there had been a meeting with IAnders and there was an understanding of what needed</p>	

			<p>31/07/2014</p> <p>14/08/2014 21/08/2014 28/08/2014</p> <p>04/09/2014</p>	<p>to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.</p> <p>DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10<sup>th</sup> August 2014.</p> <p>IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.</p> <p>It was noted that the pack was being issued later that day to SEPA</p> <p>DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.</p> <p>DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.</p>	
--	--	--	---	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 10/09/2014

						
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013 17/10/2013</p> <p>24/10/2012</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p>		

A51679245

			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true

			17/04/2014	reflection of the buildings. DL requested that BMCL provide the cost information by mid May. PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.
			10/07/2014	PM noted that he understood the tenders had been issued.
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B

			<p>21/08/2014</p> <p>28/08/2014</p> <p>04/09/2014</p>	<p>costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p> <p>GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p>	

			27/02/2014	Report anticipated shortly	
			06/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	
			22/05/2014	DP to progress.	
			12/06/2014	Work in progress, action on DP.	
			26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	
			03/07/2014	DP advised he would push on the write up of the proposed option.	
			10/07/2014	DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014.	
			31/07/2014	DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014.	
			14/08/2014	DP to provide update on return from leave	
			21/08/2014	DP to provide an update urgently as EW to be closed out asap.	
			04/09/2014	DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 10/09/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol>	
			10/07/2014	<p>PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.</p>	
			24/07/2014	<p>GW advised that the costs were currently being uploaded for options A and B</p>	
			31/07/2014	<p>PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.</p>	
			14/08/2014	<p>PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.</p>	
			21/08/2014	<p>DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.</p>	
			28/08/2014	<p>GW noted that CE required asap – circa £126k – excludes the bus shelters. DH agreed to organize the CE. GW noted that the sub-contractors had been advised to proceed however BMCL needed a CE to cover the sub-contractor instructions. DS advised that he had seen correspondence advising</p>	

				that planning for the revised arrival square had been received. DS agreed to provide the NHS with a copy of the correspondence. (Cross ref CE 060)	
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.	
			05/06/2014	Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
			12/06/2014	Fees and programme to be provided by 16 <sup>th</sup> June 2014.	
			26/06/2014	Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.	
			03/07/2014	AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	
			10/07/2014	PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.	
			24/07/2014	GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.	
			31/07/2014	PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.	
			14/08/2014	PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day	
			21/08/2014	PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.	
			28/08/2014	DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at	

			04/09/2014	<p>the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16<sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28<sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&amp;E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.</p> <p>GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	<p>04/07/2014</p> <p>10/07/2014 24/07/2014 31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p>	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p>	

2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014	Additional survey work to foundations of existing building.  Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.  Please pre-survey all proposed areas with service detection equipment and hand dig as required.  Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.  Consider all service pipes to be live. GW noted this is WIP GW advised that CE required asap. CE value circa £10k. DH enquired what the architectural fees are for and GW agreed to liaise with AKerr regarding the costs included in the quotation. (Cross ref CE 061)  04/09/2014 DR suggested that the £10k is in the £160k. GW agreed to check and confirm back.	
2837	PMI 300	Patient Entertainment	13/08/2014	The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072	
			14/08/2014	It was noted that a response had been provided to DH. AFe suggested that these works would require a lot of down taking of walls, bedheads in addition to cutting and retesting gases and putting in eco stud partresses and BMCL were proposing that a pendant should be used instead. PM agreed to review the BMCL proposals on site. AFe acknowledged that there was a few other rooms where the patient entertainment had been missed out.	
			21/08/2014	AFe advised that it was still to be identified if to be ceiling or wall mounted. BMCL were meeting with the subcontractor later that day to discuss the costs for the brackets. AFe advised that he would check out if the 5 rooms identified in the PMI could be wall mounted.	
			28/08/2014	DL noted that the approval for the patient entertainment system for the Adult Hospital was nearing conclusion. GW advised that cost for the rooms identified in the PMI was still to be bottomed out with Mercury. DH advised that he understood that James Bailey would like to liaise with DH and DH would organize to speak to JBailey. DH suggested that the cost of the brackets can be drastically reduced on the basis of lessons learned at renal bays.	
			04/09/2014	DH advised that he was meeting with JBailey later that day.	

2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014 14/08/2014 28/08/2014 04/09/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping. GW advised that BMCL were progressing this PMI GW advised that he was waiting price information from Land Eng. GW noted that the costs had been uploaded to Sypro	
2867	PMI 303	Adult Hospital Signage for all WC's	19/08/2014   28/08/2014 04/09/2014	The Board confirm that door signage other than disabled discs should not be fitted to ambulant, semi ambulant, disabled and ensuite facilities within the podium and ward stack. The attached list identifies those rooms affected and also confirms where disabled discs should be installed as per contract. All spare signs should be boxed and handed over to the Board representative at the end of the project. The Board will be fitting 'dementia' signage to all doors included on the attached list. GW enquired how the NHS would like to deal with any savings realized suggesting this could be an equipment list item. NHS to confirm. GW suggested that there would be a saving of circa £1200 and the NHS were requested to confirm if this should be dealt with through the equipment list.	
2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE-DESIGN	20/08/2014  21/08/2014  28/08/2014 04/09/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council. Overview of the works to be done provided. Discussions with GCC ongoing in relation to the extent of the works. Costs to be covered through the section 75 monies. DS to progress dialogue with GCC. DS advised that he was awaiting a meeting with GCC.(Cross ref CE 059) Item closed as CE issued.	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014  21/08/2014 28/08/2014 04/09/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289. GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works. DH noted that there was a query regarding the CE value (£157k versus £237k). GW advised that he would review the CE value. GW noted that a CE was to be raised for BMCL. It was noted that DL would need to confirm the way forward.	

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
	CE 058	NCH Park (Cross ref PMI 302)	03/09/2014	The Board confirm that BMCL should proceed with PMI 302 as per Gillespies marked up drawing: * remove the barrel net, * reposition the horizontal bars * incorporate 1 inclusive roundabout.  Agreed cost £5,063.74 including BMCL OH&P and excluding VAT	09/09/2014
	CE 059	Section 56/1 Roadworks – proposed alteration – introduction of layby	03/09/2014	The Board confirm that BMCL should proceed with PMI 304 and construct lay-by outside houses on Govan Road as per drawings approved by Glasgow City Council.  Agreed cost is £41,946.93 inc BMCL OH&P but ex VAT	09/09/2014
	CE 060	Arrival Square (Cross ref PMI 293)	03/09/2014	The Board confirm acceptance of the works as detailed in PMI 293 noting that the procurement of the bus shelters have been excluded from these works.  Agreed cost is £126,007.87 inc BMCL OH&P but exc VAT <b>Post Note: Initial cost profile had not correctly included the Landscape Architect fees - revised agreed price is £134,681.03 inc BMCL OH&amp;P but exc VAT</b>	10/09/2014
	CE 061	Neurosurgical Block Entrance Works (cross ref PMI 299)	03/09/2014	The Board confirm that BMCL should proceed with PMI 299 and carry out the surveys works as per marked up BMCL drawings.  The agreed price is £8,822.92 inc BMCL OH&P and exc VAT <b>Noted that this CE may need to be cancelled.</b>	
		RESURFACING AND STREET LIGHTING WORKS		CE to be raised by PM – cross ref PMI 305	

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP

advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014)

- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that B<CL are awaiting the cost information from Siemens. (04/09/2014)
- Neo-natal link bridge drawings – AFe to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGreen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion and the wording was being agreed with WR (14/08/2014) PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed t the same spec. PM agreed to liaise with FShaw (14/08/2014) AFe noted that there is communication going between WSP and Fairhurst – WIP to conclude (21/08/2014) AFe noted this is WIP to conclude . (04/09/2014)
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014)
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of "at main entrance". DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board's Fire Officer would need to agree that the location is ok (31/07/2014) DP to provide update on return from leave (14/08/2014) DH agreed to liaise with GB (28/08/2014) DH noted that GBurnett was to get a statement from WSP fire and DH would liaise with GB asap . (04/09/2014)

- Condition of road down past the VIE – GW to raise EW (03/09/2014)
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 17/09/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward	

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.	
			24/07/2014	DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.	
			31/07/2014	DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
			14/08/2014	AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.	
			21/08/2014	AFe noted that certification from SEPA had been received via IPowrie	
			28/08/2014	DH advised that it had been agreed with DP that a meeting should be set-up next week with IP. The first tests are due to be carried out in January 2015 which will be the baseline. It was noted that the SUDS wetlands redesign submission is 30 <sup>th</sup> September 2014. DS advised that everything is progressing satisfactorily and he would meet with DH to agree the wording.	
			04/09/2014	DH noted that a meeting had been held the previous day to agree the site wide emission testing/monitoring would be undertaken by the NHS. DH noted that BMCL have some additional commissioning checks and further discussion required.	
			11/09/2014	DH advised that costs are awaited from URS. Way forward agreed - NHS will do the air monitoring. Agreement re additional monitoring to be concluded. DP advised that he needed to understand what is required for the retained estate element.	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26 <sup>th</sup> of January 2015 and the contract completion date of 28 <sup>th</sup> February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7 <sup>th</sup> August 2014 with commissioning activities allowed to commence from the 21 <sup>st</sup> of August. Board to confirm acceptance	

			03/07/2014	PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible.	
			10/07/2014	BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			24/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
				DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.	
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.	
			21/08/2014	It was noted that the pack was being issued later that day to SEPA	
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.	
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.	
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 17/09/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage.	
			19/09/2013	PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.	
			26/09/2013	WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.	
			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL	

A51679245

				programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.
			10/10/2013	WIP by BMCL
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.

			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.
			10/07/2014	PM noted that he understood the tenders had been issued.
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for

			<p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p> <p>04/09/2014</p> <p>11/09/2014</p>	<p>25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 8<sup>th</sup> August 2014. GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.</p> <p>GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&amp;B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&amp;B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p> <p>GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.</p> <p>GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p>	

			<p>16/01/2014 An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>23/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>30/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>13/02/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>27/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>06/03/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>20/03/2014 Report anticipated shortly</p> <p>27/03/2014 DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>04/04/2014 DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>10/04/2014 DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>17/04/2014 GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>24/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>08/05/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>15/05/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>22/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>12/06/2014 DP advised that he was continuing to pursue the formal report.</p> <p>26.06.2014 DP to progress.</p> <p>03/07/2014 Work in progress, action on DP.</p> <p>10/07/2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>31/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>14/08/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>21/08/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>DP to provide update on return from leave</p> <p>DP to provide an update urgently as EW to be closed out asap.</p>
--	--	--	--

			04/09/2014  11/09/2014	DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.  DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.	
--	--	--	------------------------------	--	--

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 17/09/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014          10/07/2014  24/07/2014 31/07/2014   14/08/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol> <p>PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.</p> <p>GW advised that the costs were currently being uploaded for options A and B</p> <p>PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.</p> <p>PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the</p>	

A51679245

			<p>21/08/2014</p> <p>28/08/2014</p> <p>11/09/2014</p>	<p>foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.</p> <p>DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.</p> <p>GW noted that CE required asap – circa £126k – excludes the bus shelters. DH agreed to organize the CE. GW noted that the sub-contractors had been advised to proceed however BMCL needed a CE to cover the sub-contractor instructions. DS advised that he had seen correspondence advising that planning for the revised arrival square had been received. DS agreed to provide the NHS with a copy of the correspondence. (Cross ref CE 060)</p> <p>It was noted that DS was to provide a copy confirming the planning amendment. PM suggested that this had already been circulated. AFe enquired if the NHS could provide the details for the bus stops so that the foundations can be understood. PM noted that the foundation detail had been included on the PMI.</p>	
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM</p>	

			14/08/2014	advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users. PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day	
			21/08/2014	PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.	
			28/08/2014	DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16 <sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28 <sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.	
			04/09/2014	GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.	
			11/09/2014	GW advised that the final cost proposal was with DR for review. DL noted that C&B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chilling and that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about	

				<p>patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.</p> <p>.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	<p>04/07/2014</p> <p>10/07/2014 24/07/2014 31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014 11/09/2014</p>	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried</p>	

				out. AFe suggested that it will be the new year before suppliers are on board.	
2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014          21/08/2014 28/08/2014  04/09/2014 11/09/2014	<p>Additional survey work to foundations of existing building.</p> <p>Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.</p> <p>Please pre-survey all proposed areas with service detection equipment and hand dig as required.</p> <p>Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.</p> <p>Consider all service pipes to be live. GW noted this is WIP GW advised that CE required asap. CE value circa £10k. DH enquired what the architectural fees are for and GW agreed to liaise with AKerr regarding the costs included in the quotation. (Cross ref CE 061) DR suggested that the £10k is in the £160k. GW agreed to check and confirm back. <b>It was agreed this item was closed. £10k already included in previous PMI/CE</b></p>	
2837	PMI 300	Patient Entertainment	13/08/2014   14/08/2014  21/08/2014  28/08/2014	<p>The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072</p> <p>It was noted that a response had been provided to DH. AFe suggested that these works would require a lot of down taking of walls, bedheads in addition to cutting and retesting gases and putting in eco stud pattresses and BMCL were proposing that a pendant should be used instead. PM agreed to review the BMCL proposals on site. AFe acknowledged that there was a few other rooms where the patient entertainment had been missed out.</p> <p>AFe advised that it was still to be identified if to be ceiling or wall mounted. BMCL were meeting with the subcontractor later that day to discuss the costs for the brackets. AFe advised that he would check out if the 5 rooms identified in the PMI could be wall mounted.</p> <p>DL noted that the approval for the patient entertainment system for the Adult Hospital was nearing conclusion. GW advised that cost for the rooms identified in the PMI was still to be bottomed out with Mercury. DH advised that he understood that James Bailey would like to liaise with DH and DH would organize to speak to JBailey. DH suggested that the cost of the brackets can be drastically reduced on the basis of lessons learned at renal bays.</p>	

			04/09/2014 11/09/2014	DH advised that he was meeting with JBailey later that day. DH advised this matter is work in progress. DH had met with JBailey. JBailey has done a detailed summary of the discussions and he would provide this to the NHS for confirming back. The majority will now be ceiling mounted. PMI to be provided to BMCL confirming way forward.	
2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014 14/08/2014 28/08/2014 04/09/2014 11/09/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping. GW advised that BMCL were progressing this PMI GW advised that he was waiting price information from Land Eng. GW noted that the costs had been uploaded to Sypro CE awaited	
2867	PMI 303	Adult Hospital Signage for all WC's	19/08/2014  28/08/2014 04/09/2014 11/09/2014	The Board confirm that door signage other than disabled discs should not be fitted to ambulant, semi ambulant, disabled and ensuite facilities within the podium and ward stack. The attached list identifies those rooms affected and also confirms where disabled discs should be installed as per contract. All spare signs should be boxed and handed over to the Board representative at the end of the project. The Board will be fitting 'dementia' signage to all doors included on the attached list. GW enquired how the NHS would like to deal with any savings realized suggesting this could be an equipment list item. NHS to confirm. GW suggested that there would be a saving of circa £1200 and the NHS were requested to confirm if this should be dealt with through the equipment list. Item closed – equipment list item.	
2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE-DESIGN	20/08/2014  21/08/2014  28/08/2014 04/09/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council. Overview of the works to be done provided. Discussions with GCC ongoing in relation to the extent of the works. Costs to be covered through the section 75 monies. DS to progress dialogue with GCC. DS advised that he was awaiting a meeting with GCC. (Cross ref CE 059) Item closed as CE issued.	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289.	

			21/08/2014	GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works.	
			28/08/2014	DH noted that there was a query regarding the CE value (£157k versus £237k). GW advised that he would review the CE value.	
			04/09/2014	GW noted that a CE was to be raised for BMCL. It was noted that DL would need to confirm the way forward.	
			11/09/2014	CE awaited	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE 060	Arrival Square (Cross ref PMI 293)	03/09/2014	The Board confirm acceptance of the works as detailed in PMI 293 noting that the procurement of the bus shelters have been excluded from these works.  Agreed cost is £126,007.87 inc BMCL OH&P but exc VAT <b>Post Note: Initial cost profile had not correctly included the Landscape Architect fees - revised agreed price is £134,681.03 inc BMCL OH&amp;P but exc VAT</b>	10/09/2014
	CE 061	Neurosurgical Block Entrance Works (cross ref PMI 299)	03/09/2014	The Board confirm that BMCL should proceed with PMI 299 and carry out the surveys works as per marked up BMCL drawings.  The agreed price is £8,822.92 inc BMCL OH&P and exc VAT Noted that this CE may need to be cancelled. <b>CE accepted at £0 value</b>	
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289.	
		Cable & Wireless Matters		To be raised	

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for

review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26/09/2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) **JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014)**

- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that BMCL are awaiting the cost information from Siemens. (04/09/2014) **GW advised that he was continuing to pursue and may ask for NHS assistance if one further attempt to get information from Siemens fails. GW will discuss with DL as necessary (11/09/2014)**
- Neo-natal link bridge drawings – AFe to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGreen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion and the wording was being agreed with WR (14/08/2014) PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed to the same spec. PM agreed to liaise with FShaw (14/08/2014) AFe noted that there is communication going between WSP and Fairhurst – WIP to conclude (21/08/2014) AFe noted this is WIP to conclude. (04/09/2014) **AFe noted that a formal response is awaited – AFe has been verbally advised that the position has been agreed between WSP and Fairhurst (11/09/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) **PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014)**
- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a 'control panel'. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the

Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of "at main entrance". DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board's Fire Officer would need to agree that the location is ok (31/07/2014) DP to provide update on return from leave (14/08/2014) DH agreed to liaise with GB (28/08/2014) DH noted that GBurnett was to get a statement from WSP fire and DH would liaise with GB asap. (04/09/2014) DH advised that he had received information from GBurnett – advised that everything is in compliance with the regs. DH will review and provide feedback if any issues are identified. (11/09/2014)

- Condition of road down past the VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014)
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014)
- 56/2 submission – DH requested that a copy of the 56/2 drawing be provided to the NHS (11/09/2014)
- Removal of trees – AFe noted that he had received a complaint letter for a local resident. BMCL were concerned that they would need to cut down some trees. DL advised that the NHS would need to liaise with resident(s). It was noted that the NHS accepts that some trees will need to come down (11/09/2014)
- MRI Transfer Programme – AFe noted that he had been advised the MRI transfer would be April/May and DH advised that the transfer MRI had always been proposed as April/May. AFe proposed that the panel to the link bridge should be fitted so that the link bridge is complete. DH suggested that the final panel should be left out. (11/09/2014)
- Pneumatic tube over the main road – DP noted that the tube needed to stay until the A&E moves into the hospitals. BMCL have an issue in that they don't have any road consents as was a construction site. PM advised that if the tube needs to be taken down then the NHS could potential look at porting costs for a month or so.
- Ogilvie Car Park – AFe advised that BMCL were due to carry out works to the car park to put it back to the condition they received it. DL advised he had asked Ogilvy if BMCL can leave it as is as the NHS are interested in the land. GW agreed to liaise with the Ogilvy lawyer (11/09/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 24/09/2014:

						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward <b>DR and GW have agreed the way forward</b>			
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward <b>DR and GW have agreed the way forward</b>			

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.	
			24/07/2014	DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.	
			31/07/2014	DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
			14/08/2014	AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.	
			21/08/2014	AFe noted that certification from SEPA had been received via IPowrie	
			28/08/2014	DH advised that it had been agreed with DP that a meeting should be set-up next week with IP. The first tests are due to be carried out in January 2015 which will be the baseline. It was noted that the SUDS wetlands redesign submission is 30 <sup>th</sup> September 2014. DS advised that everything is progressing satisfactorily and he would meet with DH to agree the wording.	
			04/09/2014	DH noted that a meeting had been held the previous day to agree the site wide emission testing/monitoring would be undertaken by the NHS. DH noted that BMCL have some additional commissioning checks and further discussion required.	
			11/09/2014	DH advised that costs are awaited from URS. Way forward agreed - NHS will do the air monitoring. Agreement re additional monitoring to be concluded. DP advised that he needed to understand what is required for the retained estate element.	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26 <sup>th</sup> of January 2015 and the contract completion date of 28 <sup>th</sup> February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7 <sup>th</sup> August 2014 with commissioning activities allowed to commence from the 21 <sup>st</sup> of August. Board to confirm acceptance	

			03/07/2014	PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.	
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.	
			21/08/2014	It was noted that the pack was being issued later that day to SEPA	
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.	
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.	
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 24/09/2014

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL</p>	
			19/09/2013		
			26/09/2013		
			03/10/2013		

A51679245

				programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.
			10/10/2013	WIP by BMCL
			17/10/2013	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.
			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.
			12/12/2013	AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposed. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.

			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.	
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.	
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.	
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.	
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.	
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc	
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available	
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.	
			05/06/2014	PM to confirm if ok with BMCL demolition list.	
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.	
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.	
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.	
			10/07/2014	PM noted that he understood the tenders had been issued.	
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for	

			<p>31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014</p> <p>04/09/2014</p> <p>11/09/2014</p>	<p>25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 8<sup>th</sup> August 2014. GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.</p> <p>GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&amp;B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&amp;B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p> <p>GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.</p> <p>GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p>	

			<p>16/01/2014 An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>23/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>30/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>13/02/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>27/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>06/03/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>20/03/2014 Report anticipated shortly</p> <p>27/03/2014 DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>04/04/2014 DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>10/04/2014 DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>17/04/2014 GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>24/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>08/05/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>15/05/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>22/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>12/06/2014 DP advised that he was continuing to pursue the formal report.</p> <p>26.06.2014 DP to progress.</p> <p>03/07/2014 Work in progress, action on DP.</p> <p>10/07/2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>31/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>14/08/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>21/08/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>DP to provide update on return from leave</p> <p>DP to provide an update urgently as EW to be closed out asap.</p>
--	--	--	--

			04/09/2014  11/09/2014	DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.  DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.	
--	--	--	------------------------------	--	--

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 24/09/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014          10/07/2014  24/07/2014 31/07/2014   14/08/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol> <p>PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.</p> <p>GW advised that the costs were currently being uploaded for options A and B</p> <p>PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.</p> <p>PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the</p>	

A51679245

			<p>21/08/2014</p> <p>28/08/2014</p> <p>11/09/2014</p>	<p>foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formalise the arrival square works in the next couple of weeks.</p> <p>DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.</p> <p>GW noted that CE required asap – circa £126k – excludes the bus shelters. DH agreed to organize the CE. GW noted that the sub-contractors had been advised to proceed however BMCL needed a CE to cover the sub-contractor instructions. DS advised that he had seen correspondence advising that planning for the revised arrival square had been received. DS agreed to provide the NHS with a copy of the correspondence. (Cross ref CE 060)</p> <p>It was noted that DS was to provide a copy confirming the planning amendment. PM suggested that this had already been circulated. AFe enquired if the NHS could provide the details for the bus stops so that the foundations can be understood. PM noted that the foundation detail had been included on the PMI.</p>	
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	<p>30/05/2014</p> <p>05/06/2014</p> <p>12/06/2014</p> <p>26/06/2014</p> <p>03/07/2014</p> <p>10/07/2014</p> <p>24/07/2014</p> <p>31/07/2014</p>	<p>Upgrade and extension to main entrance area at ground and first floor level.</p> <p>Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).</p> <p>GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.</p> <p>Fees and programme to be provided by 16<sup>th</sup> June 2014.</p> <p>Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.</p> <p>AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).</p> <p>PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.</p> <p>GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.</p> <p>PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM</p>	

			14/08/2014	advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users. PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day	
			21/08/2014	PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.	
			28/08/2014	DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16 <sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28 <sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.	
			04/09/2014	GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.	
			11/09/2014	GW advised that the final cost proposal was with DR for review. DL noted that C&B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chillingand that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about	

				<p>patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	<p>04/07/2014</p> <p>10/07/2014 24/07/2014 31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014 11/09/2014</p>	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p>	

2784	PMI 299	NEUROSURGICAL BLOCK ENTRANCE - ADDITIONAL SURVEY	30/07/2014	Additional survey work to foundations of existing building.  Please proceed and undertake exploratory investigations to establish position and extent of existing foundations as per the attached marked up drawings supplied by Brookfield Multiplex.  Please pre-survey all proposed areas with service detection equipment and hand dig as required.  Establish agreed access with Board representatives and building users prior to commencement. Erect and maintain hoardings around all excavations, displaying all required safety and directional signage. Manage all excavated materials in a secure area for backfilling, make all finishes good once investigation works complete. Maintain safe access for pedestrians and vehicles at front of building at all times, where required provide Banksman to direct pedestrians and traffic. Provide method statements as requested for review by NHS Estates personnel.  Consider all service pipes to be live. GW noted this is WIP 21/08/2014 28/08/2014 GW advised that CE required asap. CE value circa £10k. DH enquired what the architectural fees are for and GW agreed to liaise with AKerr regarding the costs included in the quotation. (Cross ref CE 061) 04/09/2014 11/09/2014 DR suggested that the £10k is in the £160k. GW agreed to check and confirm back. <b>It was agreed this item was closed. £10k already included in previous PMI/CE</b>	
2837	PMI 300	Patient Entertainment	13/08/2014	The Board confirm, as previously noted, that wall mounted Patient Entertainment is required in the following rooms: * NCH-00-EMC-054 * NCH-01-MDU-021 * NCH-01-MDU-023 * NCH-02-ARU-004 * NCH-02-ARU-072	
			14/08/2014	It was noted that a response had been provided to DH. AFe suggested that these works would require a lot of down taking of walls, bedheads in addition to cutting and retesting gases and putting in eco stud pattresses and BMCL were proposing that a pendant should be used instead. PM agreed to review the BMCL proposals on site. AFe acknowledged that there was a few other rooms where the patient entertainment had been missed out.	
			21/08/2014	AFe advised that it was still to be identified if to be ceiling or wall mounted. BMCL were meeting with the subcontractor later that day to discuss the costs for the brackets. AFe advised that he would check out if the 5 rooms identified in the PMI could be wall mounted.	
			28/08/2014	DL noted that the approval for the patient entertainment system for the Adult Hospital was nearing conclusion. GW advised that cost for the rooms identified in the PMI was still to be bottomed out with Mercury. DH advised that he understood that James Bailey would like to liaise with DH and DH would organize to speak to JBailey. DH suggested that the cost of the brackets can be drastically reduced on the basis of lessons learned at renal bays.	
			04/09/2014 11/09/2014	DH advised that he was meeting with JBailey later that day. <b>DH advised this matter is work in progress. DH had met with JBailey. JBailey has done a detailed</b>	

				summary of the discussions and he would provide this to the NHS for confirming back. The majority will now be ceiling mounted.PMI to be provided to BMCL confirming way forward.	
2839	PMI 301	Request to hand dig trenches at Govan Rd/Renfrew Rd	13/08/2014 14/08/2014 28/08/2014 04/09/2014 11/09/2014	The Board confirm the request to hand dig slit trenches on Govan Road/Renfrew Road at the new entrance to expose and identify the Cable & Wireless service with a view to lowering/capping. GW advised that BMCL were progressing this PMI GW advised that he was waiting price information from Land Eng. GW noted that the costs had been uploaded to Sypro CE awaited	
2867	PMI 303	Adult Hospital Signage for all WC's	19/08/2014  28/08/2014 04/09/2014 11/09/2014	The Board confirm that door signage other than disabled discs should not be fitted to ambulant, semi ambulant, disabled and ensuite facilities within the podium and ward stack. The attached list identifies those rooms affected and also confirms where disabled discs should be installed as per contract. All spare signs should be boxed and handed over to the Board representative at the end of the project. The Board will be fitting 'dementia' signage to all doors included on the attached list. GW enquired how the NHS would like to deal with any savings realized suggesting this could be an equipment list item. NHS to confirm. GW suggested that there would be a saving of circa £1200 and the NHS were requested to confirm if this should be dealt with through the equipment list. Item closed – equipment list item.	
2872	PMI 304	NEW HOSPITALS SECTION 56/1 ROADWORKS GCC RE-DESIGN	20/08/2014  21/08/2014  28/08/2014 04/09/2014	Amendment to Section 56/1 approved roadworks on Govan Road. Glasgow City Council have issued their Fastlink route TRO, this requires the introduction of a lay-by outside houses on Govan Road, to include a disabled parking bay. Works to proceed on basis they will be funded by GCC.  Brookfield Multiplex are instructed to secure revised Section 56/1 consent from Glasgow City Council for this section of roadway, and subject to receipt of same, to proceed and construct lay-by as per the drawings approved by Glasgow City Council. Overview of the works to be done provided. Discussions with GCC ongoing in relation to the extent of the works. Costs to be covered through the section 75 monies. DS to progress dialogue with GCC. DS advised that he was awaiting a meeting with GCC.(Cross ref CE 059) Item closed as CE issued.	
2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289.	

			21/08/2014 28/08/2014 04/09/2014 11/09/2014	GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works. DH noted that there was a query regarding the CE value (£157k versus £237k). GW advised that he would review the CE value. GW noted that a CE was to be raised for BMCL. It was noted that DL would need to confirm the way forward. CE awaited	
2960	PMI 306	CABLE & WIRELESS FIBRE OPTIC CABLE - GOVAN & RENFREW ROAD	15/09/2014	Please proceed and lower this utility cable over length of the new Govan Road junction.  Please proceed and lower this utility cable over length of new junction (and into footpath as required to achieve datum below road surface), including the provision of split ducts, connection to existing inspection chambers and make all finishes good. Please take and provide a range of as fitted photographs of the works for the Board's retention and archive. Confirm costs for above works that are in addition to those instructed through PMI 301.	
2988	PMI 307	Patient Entertainment Screens	24/09/2014	The Board confirm acceptance of ceiling mounted patient entertainment screens in the locations on the attached list to minimise disruption to already completed and inspected areas.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
	CE 060	Arrival Square (Cross ref PMI 293)	03/09/2014	The Board confirm acceptance of the works as detailed in PMI 293 noting that the procurement of the bus shelters have been excluded from these works.  Agreed cost is £126,007.87 inc BMCL OH&P but exc VAT Post Note: Initial cost profile had not correctly included the Landscape Architect fees - revised agreed price is £134,681.03 inc BMCL OH&P but exc VAT	10/09/2014
	CE 061	Neurosurgical Block Entrance Works (cross ref PMI 299)	03/09/2014	The Board confirm that BMCL should proceed with PMI 299 and carry out the surveys works as per marked up BMCL drawings.  The agreed price is £8,822.92 inc BMCL OH&P and exc VAT Noted that this CE may need to be cancelled. CE accepted at £0 value	
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289.	

		Cable & Wireless Matters		To be raised	
--	--	--------------------------	--	--------------	--

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) **JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that BMCL are awaiting the cost information from Siemens. (04/09/2014) **GW advised that he was continuing to pursue and may ask for NHS assistance if one further attempt to get information from Siemens fails. GW will discuss with DL as necessary (11/09/2014)**
- Neo-natal link bridge drawings – AF to check and confirm reference to 25T load capacity/deflection characteristics of beam in Neonatal unit, this incumbent on WSP as designers and not the original design team. (19/06/14). WIP (26.06.14). AFe advised that he had been advised verbally that the beam is satisfactory to take the loading and written confirmation of this is awaited. (03/07/2014) DH noted that WR had seen a response on Aconex and has raised a query. TGReen has advised that no issues. PM will await confirmation from WR that response is satisfactory (10/07/2014) DH advised that he had checked Aconex and it appears that the query remains open on Aconex as it appears that there is 2 points outstanding (24/07/2014) AFe advised that feedback is awaited from WSP (31/07/2014) AFe advised that this matter was nearing conclusion and the wording was being agreed with WR (14/08/2014) PM advised that a list of all the finishes being put into the link is being requested so that other areas can be completed t the same spec. PM agreed to liaise with FShaw (14/08/2014) AFe noted that there is communication going between WSP and Fairhurst – WIP to conclude (21/08/2014) AFe noted this is WIP to conclude . (04/09/2014) **AFe noted that a formal response is awaited – AFe has been verbally advised that the position has been agreed between WSP and Fairhurst (11/09/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building.(03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be

out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014)

- Fire Alarm panels – location of front door fire alarm panels have been changed – signed off as a ‘control panel’. DH suggested that the positions needed to be reviewed against regs/guidance as the panels are not in direct access positions i.e. are behind reception counters. It is understood that all the cabling is in. DH suggested that the Building Control drawings would need to be checked and that BMCL should ask Scotshield to carry out the checks. (24/07/2014) DP noted that the panels are installed as per Building Control dwgs. Stakeholder liaison had been undertaken to check out the interpretation of “at main entrance”. DH advised that he is of the view that this is a Firecode matter. The adult location is satisfactory but the NCH is located deeper into the building than expected suggesting that the Board’s Fire Officer would need to agree that the location is ok (31/07/2014) DP to provide update on return from leave (14/08/2014) DH agreed to liaise with GB (28/08/2014) DH noted that GBurnett was to get a statement from WSP fire and DH would liaise with GB asap. (04/09/2014) DH advised that he had received information from GBurnett – advised that everything is in compliance with the regs. DH will review and provide feedback if any issues are identified. (11/09/2014)
- Condition of road down past the VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014)
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014)
- 56/2 submission – DH requested that a copy of the 56/2 drawing be provided to the NHS (11/09/2014)
- Removal of trees – Afe noted that he had received a complaint letter for a local resident. BMCL were concerned that they would need to cut down some trees. DL advised that the NHS would need to liaise with resident(s). It was noted that the NHS accepts that some trees will need to come down (11/09/2014)
- MRI Transfer Programme – AFe noted that he had been advised the MRI transfer would be April/May and DH advised that the transfer MRI had always been proposed as April/May. AFe proposed that the panel to the link bridge should be fitted so that the link bridge is complete. DH suggested that the final panel should be left out. (11/09/2014)
- Pneumatic tube over the main road – DP noted that the tube needed to stay until the A&E moves into the hospitals. BMCL have an issue in that they don’t have any road consents as was a construction site. PM advised that if the tube needs to be taken down then the NHS could potential look at porting costs for a month or so.

- Ogilvie Car Park – AFe advised that BMCL were due to carry out works to the car park to put it back to the condition they received it. DL advised he had asked Ogilvy if BMCL can leave it as is as the NHS are interested in the land. GW agreed to liaise with the Ogilvy lawyer (11/09/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1009

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 01/10/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward	
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward	

A51679245

21886	BMCL-EWN-000146	SEPA PPC - Additional monitoring and measuring	01/07/2014	The content of the draft PPC certificate BM have seen has the requirement for additional monitoring and measuring relating to plant within the Energy Centre. The requirement to conform with the draft permit conditions will incur additional costs which are as a direct result of a change in legislation requiring the PPC Certificate at commissioning stage and not operational stage.	
			03/07/2014	Board to issue PMI to instruct additional monitoring and measuring DP suggested that a meeting should be held to identify and agree a common way forward for the site and retained estate. BMCL propose to carry out the monitoring in November. DP proposed that a meeting should be held end of July. DH concurred that a common approach/methodology and agreed scope if required.	
			10/07/2014	DH advised that the additional monitoring scope will need to be identified/agreed once the permit has been issued. DH will check if URS can undertake the monitoring works and if so then obtain an order of the costs.	
			24/07/2014	DP advised that there was a meeting scheduled for beginning August to review the monitoring requirements for BMCL and the wider site.	
			31/07/2014	DP noted that a meeting to discuss compliance re NHS Green code had taken place the previous date and BMCL understand what is required. DH advised that he had spoken to Mark who had advised that they can do both the NHS and BMCL works. Scope of works will need to be provided to Mark so that an order of costs can be obtained.	
			14/08/2014	AFe noted that BMCL were liaising with URS re emissions. AFe to get an update from DP on return from leave.	
			21/08/2014	AFe noted that certification from SEPA had been received via IPowrie	
			28/08/2014	DH advised that it had been agreed with DP that a meeting should be set-up next week with IP. The first tests are due to be carried out in January 2015 which will be the baseline. It was noted that the SUDS wetlands redesign submission is 30 <sup>th</sup> September 2014. DS advised that everything is progressing satisfactorily and he would meet with DH to agree the wording.	
			04/09/2014	DH noted that a meeting had been held the previous day to agree the site wide emission testing/monitoring would be undertaken by the NHS. DH noted that BMCL have some additional commissioning checks and further discussion required.	
			11/09/2014	DH advised that costs are awaited from URS. Way forward agreed - NHS will do the air monitoring. Agreement re additional monitoring to be concluded. DP advised that he needed to understand what is required for the retained estate element.	
			25/09/2014	DH noted that the appointment of URS to carry out the monitoring works was to be undertaken by the NHS. The NHS will continue to liaise with BMCL re the Energy Centre. Monitoring will commence Jan 2015. It was agreed this item could be closed.	

21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.
			03/07/2014	Board to confirm acceptance PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.
			21/08/2014	It was noted that the pack was being issued later that day to SEPA
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.
			25/09/2014	DH noted that the wet lands/Suds pond report was to be concluded and it was anticipated it would be concluded later that day.

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013  19/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

A51679245

			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled for 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available

			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.	
			05/06/2014	PM to confirm if ok with BMCL demolition list.	
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.	
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.	
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.	
			10/07/2014	PM noted that he understood the tenders had been issued.	
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.	
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.	
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.	
			21/08/2014	AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1 <sup>st</sup> quarter next year.	
			28/08/2014	GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have	

			04/09/2014	received the tenders back for the surveys and enabling works. GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.	
			11/09/2014	GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.	
			25/09/2014	DR advised that he had received the costs from BMCL. PM advised that he would like to see the drawings. GW agreed to provide the drawings, demo quote breakdown and Land Eng quote breakdown to PM.	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.	
			16/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			23/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			30/01/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
			13/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days.	
			27/02/2014	Report anticipated shortly	
			06/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	

			<p>17/04/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>24/04/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>08/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>15/05/2014 DP advised that he was continuing to pursue the formal report.</p> <p>22/05/2014 DP to progress.</p> <p>12/06/2014 Work in progress, action on DP.</p> <p>26.06.2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>03/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>10/07/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>31/07/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>14/08/2014 DP to provide update on return from leave</p> <p>21/08/2014 DP to provide an update urgently as EW to be closed out asap.</p> <p>04/09/2014 DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.</p> <p>11/09/2014 DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.</p> <p>25/09/2014 GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was logical and would stop the pipe from sludging up.</p>	
22802	NHS EW 053	Curtain Tracks	<p>26/09/2014 The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p>	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 01/10/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2637	PMI 293	ARRIVAL SQUARE - INSTRUCTION TO PROCEED	29/05/2014	<p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI.</p> <p>The Board instruct Brookfield Multiplex to proceed with design, costing and construction works based on the information attached to this PMI. Provide updated drawings for RDD sign off, for amendment to RCC through further submission to GCC.</p> <p>Information confirmed as;</p> <ol style="list-style-type: none"> <li>1) Narrative.</li> <li>2) WSP Drg: WSP EW XX SK 771 117 Rev 03.</li> <li>3) Bus shelter data sheet.</li> <li>4) Bus shelter foundation detail.</li> </ol>	
			10/07/2014	PM advised that he had received a revised spec for the bus shelter (smaller bus shelter proposed). PM would provide the revised spec via PMI and would liaise directly with BMCL rep dealing with this.	
			24/07/2014	GW advised that the costs were currently being uploaded for options A and B	
			31/07/2014	PM advised that the pack of information was under review. DH noted that the QS was also reviewing the information. PM noted that the Truform shelter is the largest element of the overall cost. DH advised that he had a query re ducts as he was of the understanding that BMCL should already have the ducts in. PM noted that 2 masts have been omitted.	
			14/08/2014	PM noted that he had met with GCC the previous day and it had been agreed that GCC will re-write a clause in the Section 75 agreement to include the arrival square works. PM advised that it is proposed to take the bus shelters and potentially the bus shelter foundations foundation works out of the BMCL contract as SPT are purchasing shelters for the wider transport scheme – the first 4 shelters to be purchased will be for the SGH site. AFe advised that he will ask Land Eng. to update their drawings. PM advised that he will liaise with PMcGuinness. AFe suggested that the foundation works for the shelters should be left in the BMCL contract as otherwise there could be a gap in the finished left/ground whilst waiting for the shelters works to be carried out. PM advised that he would discuss with DR and it was hoped to formulise the arrival square works in the next couple of weeks.	
			21/08/2014	DR advised that the price received from BMCL is under review. PM advised that the shelters were to be formally removed from the BMCL works however BMCL will be asked to put in the foundations and ducting.	
			28/08/2014	GW noted that CE required asap – circa £126k – excludes the bus shelters. DH agreed to organize the CE. GW noted that the sub-contractors had been advised to proceed however BMCL needed a CE to cover the sub-contractor instructions. DS advised that he had seen correspondence advising	

			11/09/2014	that planning for the revised arrival square had been received. DS agreed to provide the NHS with a copy of the correspondence. (Cross ref CE 060)	
			25/09/2014	It was noted that DS was to provide a copy confirming the planning amendment. PM suggested that this had already been circulated. AFe enquired if the NHS could provide the details for the bus stops so that the foundations can be understood. PM noted that the foundation detail had been included on the PMI.  PM advised he had met with PMc to discuss the foundation detail. Discussions were continuing with GCC re maintaining the 3 sets of lights that BMCL are putting in. Agreed this item could be closed.	
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.	
			05/06/2014	Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc).	
			12/06/2014	GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
			26/06/2014	Fees and programme to be provided by 16 <sup>th</sup> June 2014.	
			03/07/2014	Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.	
			10/07/2014	AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	
			24/07/2014	PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.	
			31/07/2014	GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.	
			14/08/2014	PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.	
				PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise	

			<p>the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day</p> <p>21/08/2014 PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.</p> <p>28/08/2014 DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16<sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28<sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&amp;E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.</p> <p>04/09/2014 GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.</p> <p>11/09/2014 GW advised that the final cost proposal was with DR for review. DL noted that C&amp;B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chillingand that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL</p>	
--	--	--	--	--

			25/09/2014	<p>and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.</p> <p>DR advised that he had received the revised cost and would need to sit down and go through collectively. DP noted the GW needs to discuss with JM as GF and users may be thinking that there is additional changes to the scheme i.e. user want reception shut off. GW noted that the price is based on the pre-planning drawings and not building warrant drawings. PM advised that GF had been challenged to look to make additional savings. GF needs to meet with PH/GW and GB to agree the drawings and if was suggested that this meeting should be arranged for 30/09/2014. PM advised that he would get GF to organize the meeting.</p>	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	<p>04/07/2014</p> <p>10/07/2014 24/07/2014 31/07/2014</p> <p>14/08/2014</p> <p>21/08/2014</p> <p>28/08/2014 11/09/2014</p>	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried</p>	

2873	PMI 305	RESURFACING AND STREET LIGHTING WORKS	20/08/2014  21/08/2014 28/08/2014 04/09/2014 11/09/2014 25/09/2014	Resurfacing and new street lighting to a section of roadway on Hardgate Road, and a length of roadway within the campus opposite the current Management Building. Both sections of roadway sit outside Brookfields current scope of works.  Proceed with works as described and costed as part of PMI 289. GW noted that a CE needed to be issued to BMCL. BMCL meeting with Mercury later that day and BMCL will instruct Land Eng. and Mercury to carry out the works. DH noted that there was a query regarding the CE value (£157k versus £237k). GW advised that he would review the CE value. GW noted that a CE was to be raised for BMCL. It was noted that DL would need to confirm the way forward. CE awaited CE 062 issues therefore this PMI can be closed. PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap.	
2960	PMI 306	CABLE & WIRELESS FIBRE OPTIC CABLE - GOVAN & RENFREW ROAD	15/09/2014    25/09/2014	Please proceed and lower this utility cable over length of the new Govan Road junction.  Please proceed and lower this utility cable over length of new junction (and into footpath as required to achieve datum below road surface), including the provision of split ducts, connection to existing inspection chambers and make all finishes good. Please take and provide a range of as fitted photographs of the works for the Board's retention and archive. Confirm costs for above works that are in addition to those instructed through PMI 301. GW noted that price awaited from Land Eng.	
2988	PMI 307	Patient Entertainment Screens	24/09/2014 25/09/2014	The Board confirm acceptance of ceiling mounted patient entertainment screens in the locations on the attached list to minimise disruption to already completed and inspected areas. Agreed item closed	25/09/2014

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014 25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	

		Cable & Wireless Matters		To be raised	
--	--	--------------------------	--	--------------	--

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) **DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that BMCL are awaiting the cost information from Siemens. (04/09/2014) GW advised that he was continuing to pursue and may ask for NHS assistance if one further attempt to get information from Siemens fails. GW will discuss with DL as necessary (11/09/2014) **Item closed - BMCL has got their order placed now. (25/09/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) **PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it**

appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014)

- Condition of road down past the new VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014) GW advised that Land Eng have been asked to provide a cost for the works (25/09/2014)
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014)
- Removal of trees – Afe noted that he had received a complaint letter for a local resident. BMCL were concerned that they would need to cut down some trees. DL advised that the NHS would need to liaise with resident(s). It was noted that the NHS accepts that some trees will need to come down (11/09/2014) PM requested that BMCL provide a copy of the drawing so that the number of trees to be taken down can be identified so MMcA can liaise with the residents. PMs agreed to speak to PMcG (25/09/2014).
- Pneumatic tube over the main road – DP noted that the tube needed to stay until the A&E moves into the hospitals. BMCL have an issue in that they don't have any road consents as was a construction site. PM advised that if the tube needs to be taken down then the NHS could potential look at portering costs for a month or so. (11/09/2014) It was noted that DP needs confirmation of when the Board need the pneumatic tube taken down. PM agreed to liaise with KConnelly. DH noted that the first bus to A&E is planned for 1<sup>st</sup> week May 2015.
- Ogilvie Car Park – AFe advised that BMCL were due to carry out works to the car park to put it back to the condition they received it. DL advised he had asked Ogilvy if BMCL can leave it as is as the NHS is interested in the land. GW agreed to liaise with the Ogilvy lawyer (11/09/2014) PM advised that the NHS are currently getting DV valuation on 2 plots of land. GW advised that BMCL were starting to get concerned about the time left remaining to put the car park back to the same condition it was when BMCL took it over. PM suggested that GW liaised directly with DL. DS suggested that BMCL should progress to fulfill contract with Ogilvy. (25/09/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 08/10/2014:

						 
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward		
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014 24/07/2014 11/09/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward		

21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.
			03/07/2014	Board to confirm acceptance PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.
			21/08/2014	It was noted that the pack was being issued later that day to SEPA
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.
			25/09/2014	DH noted that the wet lands/Suds pond report was to be concluded and it was anticipated it would be concluded later that day.
			02/10/2014	DP advised that the report had been concluded and issued to SEPA

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013 19/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p>	

			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.
			24/04/2014	PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available

			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.	
			05/06/2014	PM to confirm if ok with BMCL demolition list.	
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.	
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.	
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.	
			10/07/2014	PM noted that he understood the tenders had been issued.	
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.	
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.	
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.	
			21/08/2014	AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1 <sup>st</sup> quarter next year.	
			28/08/2014	GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have	

			04/09/2014	received the tenders back for the surveys and enabling works. GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.	
			11/09/2014	GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.	
			25/09/2014	DR advised that he had received the costs from BMCL. PM advised that he would like to see the drawings. GW agreed to provide the drawings, demo quote breakdown and Land Eng quote breakdown to PM.	
			02/10/2014	GW advised that he would provide the drawings and quote information later that day	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.	
			16/01/2014	DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.	
			23/01/2014	DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Decca Plastics.	
			30/01/2014	DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.	
			13/02/2014	DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert. DP expected to be able to provide a response to the NHS in the next 7-10 days.	
			27/02/2014	Report anticipated shortly	
			06/03/2014	DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	

			<p>10/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>17/04/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>24/04/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>08/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>15/05/2014 DP advised that he was continuing to pursue the formal report.</p> <p>22/05/2014 DP to progress.</p> <p>12/06/2014 Work in progress, action on DP.</p> <p>26.06.2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>03/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>10/07/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>31/07/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>14/08/2014 DP to provide update on return from leave</p> <p>21/08/2014 DP to provide an update urgently as EW to be closed out asap.</p> <p>04/09/2014 DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.</p> <p>11/09/2014 DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.</p> <p>25/09/2014 GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was logical and would stop the pipe from sludging up.</p> <p>02/10/2014 PM advised that information had been provided to IP for forwarding to HFS. DP advised that BMCL will be progressing on the basis of the information provided, system N+1 therefore changes can be made as late as January 2015.</p>	
22802	NHS EW 053	Curtain Tracks	<p>26/09/2014 The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 08/10/2014

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.	
			05/06/2014	Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
			12/06/2014	Fees and programme to be provided by 16 <sup>th</sup> June 2014.	
			26/06/2014	Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.	
			03/07/2014	AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	
			10/07/2014	PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.	
			24/07/2014	GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.	
			31/07/2014	PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.	
			14/08/2014	PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe	

			<p>21/08/2014</p> <p>28/08/2014</p> <p>04/09/2014</p> <p>11/09/2014</p>	<p>advised that an update will be provided at the logistics meeting scheduled to take place later that day</p> <p>PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.</p> <p>DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16<sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28<sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&amp;E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.</p> <p>GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.</p> <p>GW advised that the final cost proposal was with DR for review. DL noted that C&amp;B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chillingand that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had</p>	
--	--	--	---	---	--

			25/09/2014	suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.	
			02/10/2014	DR advised that he had received the revised cost and would need to sit down and go through collectively. DP noted the GW needs to discuss with JM as GF and users may be thinking that there is additional changes to the scheme i.e. user want reception shut off. GW noted that the price is based on the pre-planning drawings and not building warrant drawings. PM advised that GF had been challenged to look to make additional savings. GF needs to meet with PH/GW and GB to agree the drawings and if was suggested that this meeting should be arranged for 30/09/2014. PM advised that he would get GF to organize the meeting. PM advised that meeting held the previous day and NHS trying to meet with Estates colleagues and CGrindlay will be invited along to this meeting, drawing provided by CGrindlay, NHS have a couple of options to consider. It was acknowledged that the NHS are not aware of the condition of the existing services at this time.	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.	
			10/07/2014	PM advised that he was awaiting cost for the feasibility study.	
			24/07/2014	PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.	
			31/07/2014	DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.	
			14/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.	
			21/08/2014	AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
			28/08/2014	It was noted that the price and the programme were to be provided to the NHS on 29/08/2014	
			11/09/2014	DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.  Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014  25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289.  Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	
	CE063	FIBRE OPTIC CABLE DIVERSION GOVAN ROAD	03/10/2014	The Board confirm acceptance of your quotations in response to PMI's 301 and 306. The works are to carry out investigatory digs across the Govan Rd bell mouth to the Boulevard, to establish location of fibre optic cable and subsequently lower the cable to a safe working depth under the new roadway. Two quotations in the gross amount of £8,834.96 inclusive of OH+P are accepted by the Board for these works.	

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) **DP noted this matter is WIP (2/10/2014)**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that BMCL are awaiting the cost information from Siemens. (04/09/2014) GW advised that he was continuing to pursue and may ask for NHS assistance if one further attempt to get information from Siemens fails. GW will discuss with DL as necessary (11/09/2014) Item closed - BMCL has got

their order placed now. (25/09/2014) PM noted that GCC reps have indicated that they will want reps to visit site to see the ducts being installed etc. AFe advised that PM should liaise with PMcG (02/10/2014)

- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014)
- Condition of road down past the new VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014) GW advised that Land Eng have been asked to provide a cost for the works (25/09/2014) GW advised that he would progress obtaining the quote from Land Eng (02/10/2014)
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifold the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014)
- Removal of trees – Afe noted that he had received a complaint letter for a local resident. BMCL were concerned that they would need to cut down some trees. DL advised that the NHS would need to liaise with resident(s). It was noted that the NHS accepts that some trees will need to come down (11/09/2014) PM requested that BMCL provide a copy of the drawing so that the number of trees to be taken down can be identified so MMCA can liaise with the residents. PMs agreed to speak to PMcG (25/09/2014). PM advised that the local residents had been written to and the NHS would deal with any responses back. PM requested that the tree in the corner is not removed but cut down and the stump grinded away or left to rot (02/10/2014)

- Pneumatic tube over the main road – DP noted that the tube needed to stay until the A&E moves into the hospitals. BMCL have an issue in that they don't have any road consents as was a construction site. PM advised that if the tube needs to be taken down then the NHS could potential look at portering costs for a month or so. (11/09/2014) It was noted that DP needs confirmation of when the Board need the pneumatic tube taken down. PM agreed to liaise with KConnelly. DH noted that the first bus to A&E is planned for 1<sup>st</sup> week May 2015. (09/2014) PM suggested that the NHS would want to keep the road closed until April. DP advised that the plans to remove the pneumatic tube would be prepared once confirmation is received from the NHS re date road to be opened (02/10/2014)
- Ogilvie Car Park – AFe advised that BMCL were due to carry out works to the car park to put it back to the condition they received it. DL advised he had asked Ogilvy if BMCL can leave it as is as the NHS is interested in the land. GW agreed to liaise with the Ogilvy lawyer (11/09/2014) PM advised that the NHS are currently getting DV valuation on 2 plots of land. GW advised that BMCL were starting to get concerned about the time left remaining to put the car park back to the same condition it was when BMCL took it over. PM suggested that GW liaised directly with DL. DS suggested that BMCL should progress to fulfill contract with Ogilvy. (25/09/2014) PM advised that the instruction is that BMCL should do what they need to do to protect their interests. The NHS has 2 district valuations for sites. AFe noted that BMCL have written to Ogilvy lawyers to ask if ok to leave the tarmac and stone insitu. GW advised that SP have removed the meter. (02/10/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 29/10/2014:

						 
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014  06/02/2014 13/02/2014 20/02/2014 27/02/2014 06/03/2014 13/03/2014 20/03/2014  27/03/2014 03/04/2014  10/04/2014 24/04/2014 01/05/2014 05/06/2014 12/06/2014 26/06/2014 24/07/2014 11/09/2014 09/10/2014  23/10/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. It was noted that BMCL were preparing the information pack of the impacts of the adverse weather. GW to discuss info with DR GW tables costs and supporting information for review by C&B DR has to make recommendations on information provided from BMCL DR now has costs from BMCL to review and will revert back to BMCL DR reported that he had the report and was to review with DWL and then discuss with GW GW noted that BMCL were awaiting an update from DR re the information provided by BMCL to support the exceptional weather claim. DR advised that he would conclude the information for provision to DL. DR advised that he will meet with DL to take him through the information and will thereafter provide feedback to GW. Noted that DR was to meet with DL. DL noted that DR would discuss with GW asap Ongoing GW advised this is to be wrapped up in the INS entrance works. Ongoing. C&B to contact GW to discuss. DR and GW in discussion re way forward DR and GW have agreed the way forward DR advised that the costs for the weather event had been agreed and a CE would be issued. This item could now be closed. CLOSED		
20870	BMCL-EWN-142	February 14 Exceptional Weather Conditions	06/03/2014  13/03/2014  20/03/2014 27/03/2014 01/05/2014 26/06/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during February 14. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract. DH and GW need to discuss the manual adjustments to the 1 in 10 year event calculations for total rainfall and review amendment as worst event was below average. GW to provide back-up information GW noted that he was awaiting the outcome of EWN 141 –December Exceptional Weather Ongoing. C&B to contact GW to discuss.		

			24/07/2014 11/09/2014 09/10/2014 23/10/2014	DR and GW in discussion re way forward DR and GW have agreed the way forward As above. CLOSED	
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014  03/07/2014  10/07/2014 24/07/2014  31/07/2014  14/08/2014 21/08/2014 28/08/2014  04/09/2014  11/09/2014  25/09/2014  02/10/2014 09/10/2014	<p>The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.</p> <p>Board to confirm acceptance</p> <p>PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.</p> <p>DH advised that the draft permit was published in accordance with the timeline (7<sup>th</sup>).</p> <p>DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.</p> <p>DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10<sup>th</sup> August 2014.</p> <p>IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.</p> <p>It was noted that the pack was being issued later that day to SEPA</p> <p>DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.</p> <p>DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.</p> <p>It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.</p> <p>DH noted that the wet lands/Suds pond report was to be concluded and it was anticipated it would be concluded later that day.</p> <p>DP advised that the report had been concluded and issued to SEPA</p> <p>DP advised that the next batch of reports are due today and tomorrow (09/10 &amp; 10/10) and BMCL are progressing as per programme. DR enquired about the programme for the petrol interceptor and DP</p>	

			23/10/2014	<p>advised that the interceptor is on order and the delivery timescale is circa 6 weeks and there is circa 8 weeks of works to be done in that area. PM noted that he understood the interceptor was to be installed at the north side of the energy centre in the concrete bay and this was confirmed</p> <p>Tank has arrived on site and is programmed to be installed week commencing Monday 27/10/2014. DS has requested the information on the oil retention material from WSP. Timescale for response required to be passed to DH in order that SEPA can be updated.</p>

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 09/10/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates</p>	

A51679245

			<p>provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p> <p>08/05/2014 It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL</p>	
--	--	--	--	--

			<p>can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. PM enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.</p> <p>15/05/2014 GW and AFe to do walkround early w/c 19/05 with HMc</p> <p>22/05/2014 Walkabout scheduled or 27<sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available</p> <p>29/5/2014 PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.</p> <p>05/06/2014 PM to confirm if ok with BMCL demolition list.</p> <p>12/06/2014 Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&amp;E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.</p> <p>26/06/2014 Tenders issued w/c 23 June 2014, with 4 week tender period.</p> <p>03/07/2014 GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.</p> <p>10/07/2014 PM noted that he understood the tenders had been issued.</p> <p>24/07/2014 It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS &amp; BMCL to discuss the externals. Tenders are due back in 8<sup>th</sup> August 2014.</p> <p>31/07/2014 GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.</p> <p>14/08/2014 GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&amp;B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&amp;B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>21/08/2014 AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car</p>
--	--	--	--

			<p>28/08/2014</p> <p>04/09/2014</p> <p>11/09/2014</p> <p>25/09/2014</p> <p>02/10/2014</p> <p>09/10/2014</p> <p>23/10/2014</p>	<p>park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p> <p>GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.</p> <p>GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.</p> <p>DR advised that he had received the costs from BMCL. PM advised that he would like to see the drawings. GW agreed to provide the drawings, demo quote breakdown and Land Eng quote breakdown to PM.</p> <p>GW advised that he would provide the drawings and quote information later that day</p> <p>PM requested that GW provided the drawings on Sypro and GW agreed to provide these asap.</p> <p>AFe enquired about if BMCL would be receiving a PMI for the demolition works and DR advised that the NHS had decided to deal with the demolitions separately from the Car Park works as the Board need to identify funding for the car parking.</p> <p>DR noted that MSCar Park 3 was due to be advertised on 10/10/2014.</p> <p><b>Drawings have been provided by GW. Programme is being reviewed and DWL will update. AFe suggested a meeting to confirm plans and demolition line. It was agreed that this item can now be CLOSED</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p>	

			<p>27/02/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>06/03/2014 Report anticipated shortly</p> <p>20/03/2014 DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>27/03/2014 DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>04/04/2014 DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>10/04/2014 GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>17/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>24/04/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>08/05/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>15/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>22/05/2014 DP advised that he was continuing to pursue the formal report.</p> <p>12/06/2014 DP to progress.</p> <p>26.06.2014 Work in progress, action on DP.</p> <p>03/07/2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>10/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>31/07/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>14/08/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>21/08/2014 DP to provide update on return from leave</p> <p>04/09/2014 DP to provide an update urgently as EW to be closed out asap.</p> <p>11/09/2014 DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.</p> <p>25/09/2014 DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.</p> <p>GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was</p>
--	--	--	---

			02/10/2014	logical and would stop the pipe from sludging up. PM advised that information had been provided to IP for forwarding to HFS. DP advised that BMCL will be progressing on the basis of the information provided, system N+1 therefore changes can be made as late as January 2015.	
			09/10/2014	PM enquired if a response was awaited from IP and DP confirmed that BMCL were awaiting a response. PM advised he would liaise with IP.	
			23/10/2014	DH agreed to check on the progress of this. AFe reported that the columns have had perforations and slots cut and it will now be necessary to check that HFS are satisfied with the proposed solution - DH agreed to check with IP whether any response has been received.	
22802	NHS EW 053	Curtain Tracks	26/09/2014	The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients. Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.	
			09/10/2014 24/10/2014	PM advised that he would discuss this internally and report back. A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between two curtains when pulled fully closed.- sub-contractor will be asked to review and amend the track if required.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 09/10/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.	
			05/06/2014	Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
			12/06/2014	Fees and programme to be provided by 16 <sup>th</sup> June 2014.	
			26/06/2014	Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.	
			03/07/2014	AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	

A51679245

			10/07/2014	PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.
			24/07/2014	GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.
			31/07/2014	PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.
			14/08/2014	PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day
			21/08/2014	PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.
			28/08/2014	DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16 <sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28 <sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire

			04/09/2014	exit works. GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.	
			11/09/2014	GW advised that the final cost proposal was with DR for review. DL noted that C&B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chilling and that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.	
			25/09/2014	DR advised that he had received the revised cost and would need to sit down and go through collectively. DP noted the GW needs to discuss with JM as GF and users may be thinking that there is additional changes to the scheme i.e. user want reception shut off. GW noted that the price is based on the pre-planning drawings and not building warrant drawings. PM advised that GF had been challenged to look to make additional savings. GF needs to meet with PH/GW and GB to agree the drawings and if was suggested that this meeting should be arranged for 30/09/2014. PM advised that he would get GF to organize the meeting.	
			02/10/2014	PM advised that meeting held the previous day and NHS trying to meet with Estates colleagues and CGrindlay will be invited along to this meeting, drawing provided by CGrindlay, NHS have a couple of options to consider. It was acknowledged that the NHS are not aware of the condition of the existing services at this time.	
			09/10/2014	DR advised that a report had been prepared and was being revised in line with minor comments received from DL. DL would be discussing the report with RC Calderwood asap. PM advised that it was anticipated that a way forward would be confirmed soon. PM noted that it would still be beneficial if Colin could provide the cost info. PM noted that Planning permission was still awaited. PM noted that some drawings had been missed in someone's e-mail box and this may have delayed the submission of drawings to GCC. AFe requested that GW liaised with GBurnett re linking in with JMiller in order to progress the planning application.	
			23/10/2014	Planning permission is awaited. A meeting to review the M&E costs for the main entrance is scheduled for Friday.	
2721	PMI 297 A51679245	NEUROSURGICAL	04/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General	

		BUILDING OVERCLAD PROJECT		<p>Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p>	
			10/07/2014	PM advised that he was awaiting cost for the feasibility study.	
			24/07/2014	PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.	
			31/07/2014	DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.	
			14/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.	
			21/08/2014	AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
			28/08/2014	It was noted that the price and the programme were to be provided to the NHS on 29/08/2014	
			11/09/2014	DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.	
				<p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p>	
			25/09/2014	DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up & down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overclad design review could be carried out in the same meeting.	
			02/10/2014	PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
451630315	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014  25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing	

A51679245

				asap. DS agreed to discuss with DCampbell	
	CE063	FIBRE OPTIC CABLE DIVERSION GOVAN ROAD	03/10/2014  23/10/2014	The Board confirm acceptance of your quotations in response to PMI's 301 and 306. The works are to carry out investigatory digs across the Govan Rd bell mouth to the Boulevard, to establish location of fibre optic cable and subsequently lower the cable to a safe working depth under the new roadway. Two quotations in the gross amount of £8,834.96 inclusive of OH+P are accepted by the Board for these works. Item can be CLOSED	
	CE 064	Section 56/1 - 6 No. Additional Street Lights, Columns & Cabling to Hardgate Road	09/10/2014  23/10/2014	Please procure and install 6 No. additional street lights within the Section 56/1 area of work as required by Glasgow City Council. Please refer attached drawing and cost breakdown as prepared by BMCE.  Quotation as provided amounts to £42,907.98 inclusive of overhead and profit, but excludes VAT. Agreement awaited from GCC on revised drawings - DH awaiting drawing from DS	

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) **Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014**
- Traffic lights in the hub area – GW noted that this was causing him concern. (05/06/2014). GW to follow up with Council. (12/06/2014). GW still trying to progress with Siemens – WIP. (26/06/2014). GW noted this is WIP – GW still trying to get confirmation from Siemens. DH agreed to raise this matter with Alan Anderson. GW was requested to confirm who BMCL have discussed this matter with. (03/07/2014) DH advised that he had spoken to AAnderson who will speak directly to LES later that week. LES are meeting with their legal department re LES risks re taking on the maintenance of the traffic lights and feedback is awaited (10/07/2014) GW suggested that BMCL raise this matter as a EW as is causing a procurement issue for BMCL in obtaining the traffic lights (24/07/2014) GW noted that he had written to Siemens and they had asked for the drawing back (31/07/2014) GW advised that she had re-issued drawings as requested and no response received back from Siemens (14/08/2014) GW noted that he had received an apologetic email from Siemens advising that the cost will be provided asap (21/08/2014) GW noted that the costs are awaited and that he would pursue the cost info (28/08/2014) GW advised that BMCL are awaiting the cost information from Siemens. (04/09/2014) GW advised that he was continuing to pursue and may ask for NHS assistance if one further attempt to get information from Siemens fails. GW will discuss with DL as necessary (11/09/2014) Item closed - BMCL has got their order placed now. (25/09/2014) PM noted that GCC reps have indicated that they will want reps to visit site to see the ducts being installed etc. AFe advised that PM should liaise with PMcG (02/10/2014) GW advised that Siemens are only prepared to provide a 1 year warranty. PM advised that the NHS need to agree a maintenance package with GCC. PM to provide the name of the GCC rep who should be invited to see the ducts to DP/PMcG. (09/10/2014) **23/10/2014 rep from GCC to check (PMcG has invited to attend site) and then item can be CLOSED**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual

leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) **Date to be slotted into the diary for next week to discuss 23/10/2014**

- Condition of road down past the new VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014) GW advised that Land Eng have been asked to provide a cost for the works (25/09/2014) GW advised that he would progress obtaining the quote from Land Eng (02/10/2014) DR suggested that a provisional sum for the works should be identified at this time (09/10/2014) **Area to be reviewed and then item can be CLOSED 24/10/2014**
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014) DP advised that he was setting up a meeting with Air Products, I Sandford, I Powrie, NHS and BMCL. GW advised that in the meantime BMCL have instructed WSP to do survey works. (09/10/2014) **Further meeting next Tuesday there will require a 1 day down time to transfer over EW may be required but this will be decided after meeting 23/10/2014**
- Pneumatic tube over the main road – DP noted that the tube needed to stay until the A&E moves into the hospitals. BMCL have an issue in that they don't have any road consents as was a construction site. PM advised that if the tube needs to be taken down then the NHS could potential look at portering costs for a month or so. (11/09/2014) It was noted that DP needs confirmation of when the Board need the pneumatic tube taken down. PM agreed to liaise with KConnelly. DH noted that the first bus to A&E is planned for 1<sup>st</sup> week May 2015. (09/2014) PM suggested that the NHS would want to keep the road closed until April. DP advised that the plans to remove the pneumatic tube would be prepared once confirmation is received from the NHS re date road to be opened (02/10/2014) **This requires to be removed before the road is opened and a date to be given to BMCE when this is most suitable. Additional portering required during down time of around 3-4 weeks 23/10/2014 CLOSED**
- Ogilvie Car Park – AFe advised that BMCL were due to carry out works to the car park to put it back to the condition they received it. DL advised he had asked Ogilvy if BMCL can leave it as is as the NHS is interested in the land. GW agreed to liaise with the Ogilvy lawyer (11/09/2014) PM advised that the NHS are currently getting DV valuation on 2 plots of land. GW advised that BMCL were starting to get concerned about the time left remaining to put the car park back to the same condition it was when BMCL took it over. PM suggested that GW liaised directly with DL. DS suggested that BMCL should progress to fulfill contract with Ogilvy. (25/09/2014) PM advised that the instruction is that BMCL should do what they need to do to protect their interests. The NHS has 2 district valuations for sites. AFe noted that BMCL have written to Ogilvy lawyers to ask if ok to leave the tarmac and stone insitu. GW advised that SP have removed the meter. (02/10/2014) PM advised that DL is still progressing discussions. GW advised that

the status quo for BMCL still exists. Ogilvy have done a dilapidation survey which identified that they wanted a litter pick which has been done. The gates are padlocked with an Ogilvy padlock. (09/10/2014) No further progress and it was noted that this can be CLOSED 23/10/2014

- Bridge tie in @ neuro – DP advised that he needed a date for this work. GF to liaise with PMcG today. (09/10/2014) As noted in EW 23/10/2014
- Food waste – DP advised that BMCL are having difficulty with Dawsons as they will not go into contract with Mercury or BMCL. Dawson give their equipment to an installer. The installer hasn't been through the H&S checks. BMCL are pursuing Dawsons. BMCL have an alternate solution and would want them to meet with the NHS. AFe noted that BMCL will have internal issues re warranties. PM requested that BMCL progress with Dawsons in the first instance and organize for alternate supplier to meet with NHS/BMCL. AFe advised that he would issue this as an EW. (09/10/2014) DWL to speak to rep from dawsons 23/10/2014
- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014
- Pharmacy Roller Shutter - changes required? 23/10/2014
- Lift Protection - clarity on which will be required to have protection remaining - meeting required to clarify 23/10/2014
- Xray rooms - some enabling works to be undertaken to allow installation of Samsung Digital X-Ray equipment. DH will review and advise. 23/10/2014

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1056

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 12/11/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.	
			03/07/2014	Board to confirm acceptance PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.	
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.	
			21/08/2014	It was noted that the pack was being issued later that day to SEPA	
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.	
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.	
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.	
	A51679245		25/09/2014	DH noted that the wet lands/Suds pond report was to be concluded and it was anticipated it would be	

			02/10/2014 09/10/2014	concluded later that day. DP advised that the report had been concluded and issued to SEPA DP advised that the next batch of reports are due today and tomorrow (09/10 & 10/10) and BMCL are progressing as per programme. DR enquired about the programme for the petrol interceptor and DP advised that the interceptor is on order and the delivery timescale is circa 6 weeks and there is circa 8 weeks of works to be done in that area. PM noted that he understood the interceptor was to be installed at the north side of the energy centre in the concrete bay and this was confirmed	
			23/10/2014	Tank has arrived on site and is programmed to be installed week commencing Monday 27/10/2014. DS has requested the information on the oil retention material from WSP. Timescale for response required to be passed to DH in order that SEPA can be updated.	
			30/10/2014	DH advised that there are no current programme implications. DP noted that the tank works had been commenced. DH noted that the revised wording for the SEPA PPC response had been finalized and was being put on headed paper and it would be issued via IPowrie to SEPA.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 05/11/2014

							
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.</p> <p>AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a</p>			

A51679245

				<p>separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>19/12/2013 Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>09/01/2014 Meeting to be scheduled to review some aspects of the work</p> <p>16/01/2014 Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p>23/01/2014 Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</p> <p>27/02/2014 Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting</p> <p>06/03/2014 AK noted that programme review was nearing completion</p> <p>13/03/2014 AK was unable to attend and the information will be ready for discussion next week</p> <p>20/03/2014 AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.</p> <p>27/03/2014 GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposes. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.</p> <p>04/04/2014 PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.</p> <p>10/04/2014 GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.</p> <p>17/04/2014 PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos removal.</p> <p>24/04/2014 PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.</p>	
--	--	--	--	--	--

			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.
			10/07/2014	PM noted that he understood the tenders had been issued.
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do 2 options – a) full car park scheme and b) temp car park with drainage.
			21/08/2014	AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night.

				<p>PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p> <p>28/08/2014 GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.</p> <p>04/09/2014 GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.</p> <p>11/09/2014 GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.</p> <p>25/09/2014 DR advised that he had received the costs from BMCL. PM advised that he would like to see the drawings. GW agreed to provide the drawings, demo quote breakdown and Land Eng quote breakdown to PM.</p> <p>02/10/2014 GW advised that he would provide the drawings and quote information later that day</p> <p>09/10/2014 PM requested that GW provided the drawings on Sypro and GW agreed to provide these asap. AFe enquired about if BMCL would be receiving a PMI for the demolition works and DR advised that the NHS had decided to deal with the demolitions separately from the Car Park works as the Board need to identify funding for the car parking.</p> <p>23/10/2014 DR noted that MSCar Park 3 was due to be advertised on 10/10/2014. Drawings have been provided by GW. Programme is being reviewed and DWL will update. AFe suggested a meeting to confirm plans and demolition line. It was agreed that this item can now be CLOSED</p> <p>29/10/2014 GW advised that he was tidying up the proposal and enquired what is to happen to the area marked as development area. GW noted that the original quote had a £150k provisional sum included for this area. PM advised that the area should be top soiled and seeded and that the provisional sum should be left in. GW suggested that the provisional sum could be reduced to £100k and this was agreed. DH suggested that the area could be used as a patient transport laydown space. GW enquired if the NHS still wanted Heras fencing and DR confirmed that Heras was wanted. GW advised that BMCL were not happy to use heras fencing. PM advised that the NHS would be ok with BMCL re-using the corrugated fencing as long as the fencing at the Labs side is replaced with heras. GW noted that he was finalizing the figures in relation the queries raised by DR. PM noted that the NHS would review the costs and thereafter prepare a paper for consideration/approval at the NHS Board.</p>	
20424	NHS EW 051	Cold Water Storage	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow	

		Tanks		<p>PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>16/01/2014 DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>23/01/2014 DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>30/01/2014 DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>13/02/2014 DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>27/02/2014 DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>06/03/2014 Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>20/03/2014 DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>27/03/2014 DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>04/04/2014 GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>10/04/2014 DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>17/04/2014 DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>24/04/2014 DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p> <p>08/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>15/05/2014 DP advised that he was continuing to pursue the formal report.</p> <p>22/05/2014 DP to progress.</p> <p>12/06/2014 Work in progress, action on DP.</p> <p>26.06.2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>03/07/2014 DP advised he would push on the write up of the proposed option.</p>	
--	--	-------	--	--	--

			<p>10/07/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>31/07/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>14/08/2014 DP to provide update on return from leave</p> <p>21/08/2014 DP to provide an update urgently as EW to be closed out asap.</p> <p>04/09/2014 DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.</p> <p>11/09/2014 DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.</p> <p>25/09/2014 GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was logical and would stop the pipe from sludging up.</p> <p>02/10/2014 PM advised that information had been provided to IP for forwarding to HFS. DP advised that BMCL will be progressing on the basis of the information provided, system N+1 therefore changes can be made as late as January 2015.</p> <p>09/10/2014 PM enquired if a response was awaited from IP and DP confirmed that BMCL were awaiting a response. PM advised he would liaise with IP.</p> <p>23/10/2014 DH agreed to check on the progress of this. AFe reported that the columns have had perforations and slots cut and it will now be necessary to check that HFS are satisfied with the proposed solution - DH agreed to check with IP whether any response has been received.</p> <p>30/10/2014 DH advised that formal feedback is awaited from HFS and he would pursue the feedback</p>	
22802	NHS EW 053	Curtain Tracks	<p>26/09/2014 The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients. Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p> <p>09/10/2014 PM advised that he would discuss this internally and report back.</p> <p>24/10/2014 A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between two curtains when pulled fully closed - sub-contractor will be asked to review and amend the track if required.</p> <p>30/10/2014 DH advised that he had undertaken a site visit with IHamilton and a solution to conclude the matter in A&amp;E and CC resus bays had been identified. DH would provide information to BMCL re variance in curtain track heights at half wall.</p>	

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2639	PMI 294	NEUROSURGICAL BLOCK, UPGRADE OF MAIN ENTRANCE	30/05/2014	Upgrade and extension to main entrance area at ground and first floor level.	
			05/06/2014	Proceed with next stage of design and preparation for construction as set out in the attached narrative (word doc). GW noted that he had instructed the design team to proceed to RIBA stage 3 and is awaiting update from the team.	
			12/06/2014	Fees and programme to be provided by 16 <sup>th</sup> June 2014.	
			26/06/2014	Fee information received, programme required by end of month. Planning application needs to be submitted to meet approval date in September 2014.	
			03/07/2014	AFe noted that BMCL had a meeting yesterday to discuss – he understood that the toilets were being moved back out/reduced at the front entrance. PM advised that he had confirmed the layout with the building users. PM advised that the NHS are willing to consider any VE i.e. remove the metal canopy, change the front door. AFe noted that he understood that BMCL were undertaking the cladding works and GW advised that BMCL have been instructed to proceed the design. PM agreed to issue a PMI to confirm that BMCL should proceed to design (cross ref PMI 297).	
			10/07/2014	PM advised that he understood that planning application was submitted on Monday. PM had spoken to DS and advised that NHS will not take any risk on ground conditions. BMCL to confirm if any additional surveys are required to mitigate ground condition risk. DH noted that there was a meeting re keeping the INS with an operational entrance, BAM interaction with the works and roundhouse demolition. A proposal to move the temporary entrance had been provided. It is understood that there is a preference to defer the overcladding works as this will close off the BAM Access to site. PM will liaise with GF – there is a need to ensure that the INS is kept accessible.	
			24/07/2014	GW advised that costs being identified and a price will be submitted by end of August 2014. It was noted that the planning application had been registered on 23/07/2014. GW advised that WSP had asked for drawings so can do trial pits in order to review the mini-pile solution.	
			31/07/2014	PM advised that the NHS were getting some survey works undertaken that day. The NHS were linking in with CGrindlay. AFe noted that PMcGhad discussed the slab works at the Construction Interface Group meeting and BMCL wanted to commence works in the next few weeks. PM advised that the NHS would need 10-14 days notice of the works commencing so that the NHS can liaise with the building users.	
			14/08/2014	PM advised that he was working to the end August date advised by BMCL. A user group meeting had been held, some amendments had been identified and the architects were updating the plans. AFe advised that he was meeting with GArmstrong on 15/08/2014 and would firm up on a start date. AFe was checking that there is sufficient design finalized to commence the works and finalise the scheduled rather than doing any works piecemeal. PM advised that he needed to understand the proposed dates for the break-in works so that he can ensure that the rooms are vacated. AFe advised that an update will be provided at the logistics meeting scheduled to take place later that day	

A51679245

			21/08/2014	PM noted that the breakthrough was to be carried out w/c 15/09/2014 and that BMCL will be doing hand digs.	
			28/08/2014	DL noted that the start dates had been known for months and that DL will deal with the building users. DL reported that he had been advised previously that the NHS would get limited access at the front door and now advised that NHS would not be getting any access and that the Fire Escape is not big enough so needs to be made bigger. GW enquired what the NHS were expecting to receive back from BMCL as they had only received the Nightingale drawings the previous week and the design changes were not minimal and FES have advised that they cannot price. DH noted that the toilets had been moved as VE in discussion between AFe and PM. DH advised that the changes requested by the Users is minimal the other changes are either for VE or construction purposes. DH noted that BMCL would need to provide a price that is caveated. The Project Team had a meeting on the 16 <sup>th</sup> September where the cost information needed to be presented therefore the Project Team require the cost information by the 28 <sup>th</sup> August but understand there was agreement at the Commercial Group that the costs are to be provided to the NHS by 29/08/2014. It was noted that advice being received states that the systems in the building are circa 40 years old and the Mercury costs include allowances as Mercury suggesting that the systems will need to be changed. DL advised that the cost information needs to clearly confirm the scope of the cost. GW advised that BMCL did not have revised WW drawings based on the updated Nightingale drawings so it is not possible to identify the M&E impact of the VE. DL advised that he needed complete clarity about what costs are for. DL enquired if BMCL would want BMCL or BAM to carryout the Fire Exit widening works and GW advised that it would be preferable for BAM to carry out the fire exit works.	
			04/09/2014	GW advised that the cost was submitted the previous day. DR advised that he would discuss this with GW. DH noted that a meeting had been held with SRussell, GForsyth and BAM. BAM are working to end September date. BAM are widening the door under the existing link bridge. Discussions to be concluded by w/e 5/09/2014. DR requested that based on the programme that GW provide an indication of the cashflow.	
			11/09/2014	GW advised that the final cost proposal was with DR for review. DL noted that C&B are to provide a view about the proposal to DL. DL noted that the cost proposal is circa £600k higher than the NHS budget. GW noted that the BMCL cost proposal is 0.88m higher than the initial cost suggested. AFe advised that he understood there was changes to the drawings signed off the previous day i.e. chillingand that this is not taken account of in the current price. AFe suggested that DS meets with GF to agree changes so that the NHS can get costs. DL advised that he had asked for core samples and AFe advised that this has been organized. AFe noted concern about patient dignity while the works are being carried out. DL noted that consideration needed to be given to the programme as the building will open at the same time as the hospitals. PM suggested that it may be ok for the hospitals to open as long as the building looks complete. AFe advised that the BMCL cost has included high end hoarding. DP advised that consideration could be given to DX cooling or having a separate chiller. DL proposed that BMCL should provide a range of options/costs. DL agreed to obtain an update from GF. DL enquired what the lead in time for BMCL and getting the order to progress the works. AFe advised that BMCL needed confirmation of the way forward asap as it is circa 8 weeks until any piling can be started. GW noted that DR had suggested that the cost was in the range of what was expected and the costs were with Evelyn for checking the detail. AFe agreed to commence engagement with the sub-contractors.	

			25/09/2014	DR advised that he had received the revised cost and would need to sit down and go through collectively. DP noted the GW needs to discuss with JM as GF and users may be thinking that there is additional changes to the scheme i.e. user want reception shut off. GW noted that the price is based on the pre-planning drawings and not building warrant drawings. PM advised that GF had been challenged to look to make additional savings. GF needs to meet with PH/GW and GB to agree the drawings and if was suggested that this meeting should be arranged for 30/09/2014. PM advised that he would get GF to organize the meeting.	
			02/10/2014	PM advised that meeting held the previous day and NHS trying to meet with Estates colleagues and CGrindlay will be invited along to this meeting, drawing provided by CGrindlay, NHS have a couple of options to consider. It was acknowledged that the NHS are not aware of the condition of the existing services at this time.	
			09/10/2014	DR advised that a report had been prepared and was being revised in line with minor comments received from DL. DL would be discussing the report with RCalderwood asap. PM advised that it was anticipated that a way forward would be confirmed soon. PM noted that it would still be beneficial if Colin could provide the cost info. PM noted that Planning permission was still awaited. PM noted that some drawings had been missed in someone's e-mail box and this may have delayed the submission of drawings to GCC. AFe requested that GW liaised with GBurnett re linking in with JMiller in order to progress the planning application.	
			23/10/2014	Planning permission is awaited. A meeting to review the M&E costs for the main entrance is scheduled for Friday.	
			30/10/2014	PM noted that there were some matters to conclude. GW noted that there is 4 issues against the £200k i.e. landscaping, suds/drainage, additional cost re existing infrastructure and mercury costs for lights. The mercury costs are being checked. DR noted that there is a plan to work through the money however nothing can be done until get planning. AFe noted that GB is chasing up Jim for the outcome of the planning application on a bi-daily basis. AFe noted that planning are asking for a PI and the consultants won't give a PI. Agreed to close this PMI as item covered under PMI 308.	
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.	
			10/07/2014	PM advised that he was awaiting cost for the feasibility study.	
			24/07/2014	PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.	
			31/07/2014	DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.	
			14/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.	
			21/08/2014	AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
			28/08/2014	It was noted that the price and the programme were to be provided to the NHS on 29/08/2014	

			11/09/2014	DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.	
			25/09/2014	Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.	
			02/10/2014	DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up & down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overlaid design review could be carried out in the same meeting. PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and BMCL should have highlighted all the risks. BMCL were in the process of identifying a panel carrier system which can be retrofitted. AFe advised that the programme to achieve a finished clad building in time for the royal opening is difficult noting that the timescale for the works is indicated as circa 36 weeks. PM noted that the NHS would be unable to signoff the proposals until the Planning permission is granted.	
			09/10/2014	AFe advised that BMCL had met with CladUK who had subsequently provided an indicative price based on a standard panel. CladUK advised that the standard panel they use does not provide thermal gain as it is a vented system (top and bottom) however a formal response is awaited. BMCL anticipate obtaining a firmed up price for the works after the school holiday period. Once BMCL ensure that the price is in the NHS cost range then will apply for planning permission. DR requested that BMCL provide a programme for the cladding works in order that the NHS can identify and plan for when areas/offices, etc need to be vacated. AFe proposed that BMCL would mark-up a drawing to show the corridor works and ward/clinical area works noting that the corridor works will be quicker to do. It was noted that BMCL are seeking a fixed price for the works from CladUK. AFe noted that the cladding and window works sit separately. DR noted that it would be helpful if BMCL could reduce the price as the current price was close to the NHS budget for the works and this would assist to achieve approval of the INS Entrance works fundng.	

			23/10/2014	A sample board of the cladding to be provided to show options. AFe noted that the cost was not hugely different. A review of the risks required for window replacement activities. The area of elevation for the ICE building abutment now removed from the costs and repricing is completed. It was agreed that BMCE and NHS to meet next week to review. The next stage once agreed is to engage planning and project a start on site date - anticipated to be around March 2015. Design and warrents plus SER take around 12-14 weeks but BMCE will push to shorten this time. Cashflow - progress design up to Christmas and place order for all materials in order to maximize spend within current financial year.	
			30/10/2014	GW noted that a further conversation with Clad UK had taken place and proposal repriced on the basis of these discussions. BMCL would be discussing with D&B Facades in due course. GW enquired about the drop dead date for NHS approval and DR confirmed that BMCL were to progress Planning as Planning is the driver for approval as is being dealt with through the Board's Capital Plan.	
3029	PMI 308	INS Entrance Works	10/10/2014	Further to PMI 294 and submission of the cost estimate on 22 September 2014 in sum of £3,702,968 it is confirmed that it is the intention of the Board to proceed with these works and to issue a Compensation Event to formalise the contractual arrangements. This PMI should be taken as an instruction for Brookfield Multiplex to progress design and procurement. In order to finalise the Compensation Event the following should be completed by 24th October 2014:-  1. Planning Permission approval received 2. Complete RIBA Stage 3 design for underground drainage in order that "Provisional" note included in submitted price can be removed 3. Complete RIBA Stage 3 design for external works in order that "Provisional" note included in submitted price can be removed 4. Complete RIBA Stage 3 design for building services in order that exclusions / caveats can be finalised 5. Update design, procurement and construction programme 6. Prepare a full information pack of all PMI 294 RIBA Stage 3 deliverables to be attached to the Compensation Event  Prior to finalisation of the Compensation Event the Board confirm it will underwrite all eligible costs in developing the INS Entrance works. CE noted with 6 actions - this is tied to planning and pack is to be made ready in anticipation of planning approval receipt. DWL noted that time will need to be given to allow information relay to users. Date for break into INS has now been altered. Conflicting requirements between projects relation to the opening of the bridge link to be resolved by dialogue. Bridge opening - a conversation will be required with users. It may be possible to create a fire box within the bridge during external works and a plan in place for its removal at the completion of the works - it was to be noted that access requires to remain for potential movement of patients to theatres.	
			23/10/2014		
			30/10/2014	PM noted that there were some matters to conclude. GW noted that there is 4 issues against the £200k i.e. landscaping, suds/drainage, additional cost re existing infrastructure and mercury costs	

				for lights. The mercury costs are being checked. DR noted that there is a plan to work through the money however nothing can be done until get planning. AFE noted that GB is chasing up Jim for the outcome of the planning application on a bi-daily basis. AFE noted that planning are asking for a PI and the consultants won't give a PI.	
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014  23/10/2014  30/10/2014	<p>Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p> <p>PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.</p> <p>DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.</p>	
3061	PMI 310	ADAPTATIONS TO BUILDING SERVICES FOR IMAGING EQUIPMENT INSTALL	27/10/2014	<p>Please proceed with the attached amendements to services/equipment as per the attached schedule. Costs for same to be incorporated in the Group1 equipment list.</p> <p>The Board request that alterations to 13no. General X-Ray rooms, as listed on the attached schedule, are undertaken to facilitate the installation of Samsung Digital X-Ray equipment by MIS Ltd. The alterations are limited to:</p> <ul style="list-style-type: none"> <li>- removal of temporary/permanent containment at desk locations</li> <li>- relocation of sprinkler heads</li> <li>- removal of RAC1020 pigeon hole units</li> <li>- relocation of wireless access points</li> <li>- removal of emergency stop buttons in 3 locations</li> <li>- Relocation of nurse call/reset panel in 2 locations</li> <li>- Relocation of lead apron rack.</li> </ul> <p>Works to include, where necessary, making good of lead lining and finishes.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	<p>The Board require a cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> </ol>	

				<p>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</p> <p>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</p> <p>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</p> <p>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</p>

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014 25/09/2014	<p>Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289.</p> <p>Agreed item to be closed</p> <p>PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell</p>	
	CE063	FIBRE OPTIC CABLE DIVERSION GOVAN ROAD	03/10/2014  23/10/2014	<p>The Board confirm acceptance of your quotations in response to PMI's 301 and 306. The works are to carry out investigatory digs across the Govan Rd bell mouth to the Boulevard, to establish location of fibre optic cable and subsequently lower the cable to a safe working depth under the new roadway.</p> <p>Two quotations in the gross amount of £8,834.96 inclusive of OH+P are accepted by the Board for these works.</p> <p><b>Item can be CLOSED</b></p>	
	CE 064	Section 56/2 - 6 No. Additional Street Lights, Columns & Cabling to Hardgate Road	09/10/2014  23/10/2014	<p>Please procure and install 6 No. additional street lights within the Section 56/2 area of work as required by Glasgow City Council. Please refer attached drawing and cost breakdown as prepared by BMCE.</p> <p>Quotation as provided amounts to £42,907.98 inclusive of overhead and profit, but excludes VAT.</p> <p><b>Agreement awaited from GCC on revised drawings - DH awaiting drawing from DS</b></p>	
	CE 065	Adverse Weather Cross reference BMCL EW 141 & 142		To be issued	

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 **DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014 **Meeting organized on 31/10/2014 to discuss (30/10/2014)**

- Condition of road down past the new VIE – GW to raise EW (03/09/2014) It was noted that Land Eng have suggested that areas of the sub-base are not in a good condition so if relay over the tarmac on top then there will be problems in the future. PM proposed that WRoxburgh should be asked to provide a view and AFe suggested that WR should review with PMcG and AH. AFe suggested that BMCL could price for the remediation works. (11/09/2014) GW advised that Land Eng have been asked to provide a cost for the works (25/09/2014) GW advised that he would progress obtaining the quote from Land Eng (02/10/2014) DR suggested that a provisional sum for the works should be identified at this time (09/10/2014) Area to be reviewed and then item can be CLOSED 24/10/2014 **Noted that WR has done an inspection BMCL to identify any issues when they are carrying out the works (30/10/2014)**
- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014) DP advised that he was setting up a meeting with Air Products, I Sandford, I Powrie, NHS and BMCL. GW advised that in the meantime BMCL have instructed WSP to do survey works. (09/10/2014) Further meeting next Tuesday there will require a 1 day down time to transfer over EW may be required but this will be decided after meeting 23/10/2014. **Noted that Air Products are to provide information re revised base so WSP can design slab/base. BMCL will need to divert Oxygen main in that area. GW enquired what BMCL should do about the costs incurred as the slab is now a lot bigger than what was agreed. AFe suggested that BMCL should firstly ascertain if a piling solution will be required. DH noted that this is a timing issue re patient safety. (30/10/2014) GW advised that he would raise an EW as these works will fall outwith the completion period.**
- Bridge tie in @ neuro – DP advised that he needed a date for this work. GF to liaise with PMcG today. (09/10/2014) As noted in EW 23/10/2014. **AFe advised that the opening of the link bridge had been discussed with Gillon and it was anticipated that BMCL should be able to complete the works and stay open by April 2015. PM was requested to provide feedback re the windows. (30/10/2014)**
- Food waste – DP advised that BMCL are having difficulty with Dawsons as they will not go into contract with Mercury or BMCL. Dawson give their equipment to an installer. The installer hasn't been through the H&S checks. BMCL are pursuing Dawsons. BMCL have an alternate solution and would want them to meet with the NHS. AFe noted that BMCL will have internal issues re warranties. PM requested that BMCL progress with Dawsons in the first instance and organize for alternate supplier to meet with NHS/BMCL. AFe advised that he would issue this as an EW. (09/10/2014) DWL to speak to rep from dawsons 23/10/2014. **AFe noted that BMCL will need to cut a chase in the service yard at the Labs and BMCL will liaise with the NHS re these works. PM advised this should be dealt with/raised as necessary. (30/10/2014)**
- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014. **DH advised that he had discussed this and it was thought that a PMI is not necessary (30/10/2014)**
- Pharmacy Roller Shutter - changes required? 23/10/2014 **DP advised that he is awaiting info from FW re change to be made (30/10/2014)**
- Lift Protection - clarity on which will be required to have protection remaining - meeting required to clarify 23/10/2014. **PM advised that he would discuss this with KC and AT what lifts are planned to be used during the 12 week commissioning (30/10/2014)**
- Xray rooms - some enabling works to be undertaken to allow installation of Samsung Digital X-Ray equipment. DH will review and advise. 23/10/2014. **Noted that this matter is covered under PMI 310 therefore this item can be closed. (30/10/2014)**

- Light controls – noted that the grommet between the light fittings and pole are not fit for purpose and are being replaced. (30/10/2014)
- TDSL window – issue has been identified and TDSL are investigating – it was thought the grub screw needs to be looked at. (30/10/2014)
- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1073

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 19/11/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
21887	BMCL-EWN-000147	SEPA PPC - Programme implications	01/07/2014	The content of the draft PPC certificate BM have seen has the allowance for SEPA to halt commissioning activities on the Project. BM raise the prospect that this has the potential to affect both the target completion date of 26th of January 2015 and the contract completion date of 28th February 2015. The timing of the issuing of the final PPC certificate plus the requirement for 14 days notice given to SEPA for commissioning activities has the potential to delay the project. Current forecast is PPC certification would be granted 7th August 2014 with commissioning activities allowed to commence from the 21st of August.	
			03/07/2014	Board to confirm acceptance PM and DH to discuss with DL. Everyone is working to make the permit happen as soon as possible. BMCL propose to do 'functional' checks until PPC permit provided. The 'functional' checks will be in line with the definition as provided by SEPA.	
			10/07/2014	DH advised that the draft permit was published in accordance with the timeline (7 <sup>th</sup> ).	
			24/07/2014	DP advised that there had been a meeting with IAnders and there was an understanding of what needed to be done. Matter being progressed to an appropriate timeline. DH suggested that once get the permit that there is a letter ready outlining what it is proposed for commissioning.	
			31/07/2014	DP advised that he has a pack prepared which includes all the pre-commissioning checks. The pack will be sense checked. DH advised that the pack should be ready for when the permit is received. DP advised that the aim is to have the pack ready for the 10 <sup>th</sup> August 2014.	
			14/08/2014	IP and DW met on 13/08/2014 and information will be ready for issue later 14/8/2014.	
			21/08/2014	It was noted that the pack was being issued later that day to SEPA	
			28/08/2014	DH advised that the pack had been issued to SEPA the previous week. DS suggested that it would be beneficial to have a page turn through the document from SEPA as dates appear to be erroneous. DH advised that IP is going through the document and pulling out all the dates. The first commissioning is due to take place early September 2014. BMCL are progressing on the basis of the commissioning programme submitted to SEPA. DL need to ensure joint BMCL and NHS provide co-ordinated responses to SEPA.	
			04/09/2014	DH noted that SEPA have advised that the submission did not include enough information however supplementary information has subsequently been provided therefore no issues were anticipated. There is no plant which achieves the emissions threshold. SEPA appear to be supportive of NHS/BMCL achieving PPC. Letter issued to BMCL from IP is a requirement of SEPA i.e. NHS must write to BMCL advising that BMCL are authorized to undertake activities related to CHPs, Boilers, etc in line with the PPC permit.	
			11/09/2014	It was agreed to leave this item on the tracker so that item can be monitored. DH noted that there was an outstanding item re SUDS pond i.e. WSP to provide the specification of the wall type. Info to be provided to SEPA by 28/09. DH noted that the interceptor thereafter needs to be fitted. DH and DS to discuss.	
	A51679245		25/09/2014	DH noted that the wet lands/Suds pond report was to be concluded and it was anticipated it would be	

			02/10/2014 09/10/2014	concluded later that day. DP advised that the report had been concluded and issued to SEPA DP advised that the next batch of reports are due today and tomorrow (09/10 & 10/10) and BMCL are progressing as per programme. DR enquired about the programme for the petrol interceptor and DP advised that the interceptor is on order and the delivery timescale is circa 6 weeks and there is circa 8 weeks of works to be done in that area. PM noted that he understood the interceptor was to be installed at the north side of the energy centre in the concrete bay and this was confirmed	
			23/10/2014	Tank has arrived on site and is programmed to be installed week commencing Monday 27/10/2014. DS has requested the information on the oil retention material from WSP. Timescale for response required to be passed to DH in order that SEPA can be updated.	
			30/10/2014	DH advised that there are no current programme implications. DP noted that the tank works had been commenced. DH noted that the revised wording for the SEPA PPC response had been finalized and was being put on headed paper and it would be issued via IPowrie to SEPA.	
			12/11/2014	DH advised that SEPA had been supplied with all the documents and SEPA had confirmed receipt of the documents and that everything is in order. There had been a visit the previous date and dirty rags in an open container had been observed to which SEPA had been advised that a sealed container is awaited. Permit from SEPA had been received. Agreed this item could be closed.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 19/11/2014

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p>	

A51679245

			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.
			12/12/2013	AK advised that he was getting a programme plotted for discussion.
				AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.
			09/01/2014	Meeting to be scheduled to review some aspects of the work
			16/01/2014	Noted that AK and PM were meeting later that day to discuss BMCL queries.
			23/01/2014	Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.
			27/02/2014	Noted that information was to be forwarded from BMCL for programme and sequence and costs – discussions will continue out-with meeting
			06/03/2014	AK noted that programme review was nearing completion
			13/03/2014	AK was unable to attend and the information will be ready for discussion next week
			20/03/2014	AK advised that he was reviewing how the works can be linked into the other demo works and will prep information for discussion over the weekend. It was agreed that AK should meet with PM and DH in the latter part of w/c 24/03/14.
			27/03/2014	GW advised that he needed to review this with AK. PM advised that item was becoming important to the NHS for budgeting purposed. GW advised that AK is tidying up his notes and he will liaise with AK asap. DS advised that he would organize a meeting date asap.
			04/04/2014	PM advised that he had met with GW and AK earlier that week to discuss the additional works. HMc had subsequently provided information to AK re the basement locations. It was noted that AK was working over the weekend to prepare the scope of works so can put out to tender.
			10/04/2014	GW advised that AK was working over the weekend on the proposals and GW would get an update asap. PM advised that there was consideration being given to BMCL doing the asbestos removal and that there was an internal discussion ongoing as to identify the best solution so not to split the risks. GW advised that BMCL could not provide a price for the asbestos removal as he did not have a survey. PM advised that BMCL should progress on the basis of the PMI and the NHS would confirm if BMCL should undertake the asbestos removal. PM noted that the NHS have Management Surveys however these did not give a true reflection of the buildings. DL requested that BMCL provide the cost information by mid May.
			17/04/2014	PM noted that the NHS were still considering whether BMCL should be asked to carry out the asbestos

			24/04/2014	removal. PM acknowledged that this is WIP. GW advised he would catchup with AK asap. It was suggested that BMCL were awaiting information from the NHS re which buildings have basements. DH suggested that HMc had provided a detailed response to which indicates undercrofts, solums, basements, etc.
			08/05/2014	It was noted that BMCL had discussed this item earlier that morning. BMCL were of the view that the NHS would need to do the asbestos survey. BMCL wanted the NHS to provide the date by which the NHS required the buildings to be down by in order to programme the works backwards. GW suggested the BMCL could get a price from demo contractors on the basis that the buildings have no asbestos. PM suggested that a walkround would be beneficial and would consider if there was any value to the NHS getting management surveys. AFe advised that it would be beneficial if BMCL could have a walkround with PM and this was agreed. PM noted that he would identify if the NHS use a frameworks contractor – BMCL can then manage. AFe noted that there was implications for stepping down the asbestos responsibility. DS enquired if the NHS would be obtaining the necessary consents and PM advise that he would expect BMCL to progress the warrants, consents, etc. GW suggested that a bat survey may need to be carried out. PM agreed to organize a walk-round.
			15/05/2014	GW and AFe to do walkround early w/c 19/05 with HMc
			22/05/2014	Walkabout scheduled or 27 <sup>th</sup> May. GW requested drawings of existing buildings. PM noted these had been forwarded to AK where available
			29/5/2014	PM advised that a walkround of pieces of the existing estate had been undertaken on 27/05. GW reported that PMcGuinness is marking up a drawing with a view to going to the market. PM noted that he understood that a Framework is being set-up for demolition works and he would provide this info to BMCL. GW advised that Paul and Andy and finalizing the scope of works and it was intended that 2 prices are obtained i.e. a) BMCL scope of works only and b) NHS scope of works.
			05/06/2014	PM to confirm if ok with BMCL demolition list.
			12/06/2014	Demolition list confirmed. Tenders due to be issued shortly to 5 demolition contractors on basis all asbestos has been removed from the buildings by others. Tenders in 3 parts – 1) Phase 3A buildings plus A&E, Therapies and OPD; 2) the Management Building and 3) Imaging and Medical Block bar the Listed element. Tender period 3-4 weeks.
			26/06/2014	Tenders issued w/c 23 June 2014, with 4 week tender period.
			03/07/2014	GW noted that the tenders had not gone out as there were 2 outstanding queries. PM advised that AK Had spoken to PM the previous day. GW agreed to check whether the tenders had gone out.
			10/07/2014	PM noted that he understood the tenders had been issued.
			24/07/2014	It was noted that BMCL are out to tender for the stage 3a works and a meeting has been organized for 25/07/2014 for the NHS & BMCL to discuss the externals. Tenders are due back in 8 <sup>th</sup> August 2014.
			31/07/2014	GW advised that the tenders were starting to be received – 1 has some queries. Land Eng had been asked to price for a deck to the car park (noting that there is a substantial difference in levels). AFe advised that BMCL would look at best value solutions re levels. GW advised that he is awaiting a price and AKerr was chasing this up.
			14/08/2014	GW advised that tenders received and BMCL reviewing the tenders later that day. AFe noted that there was a spread in the pricing. BMCL have organized for 2 of the companies w/c 18/08/2014. BMCL will review the start dates etc once the final evaluation has been done. Land Eng costs for car park D&B will be provided in next 2-3 weeks. GW advised that there is a level difference so it is better to obtain the D&B costing rather than a quick cost plan. DR advised that NHS looking for most economic solution for airport style. GW suggested that an element of drainage would need to be installed. DR requested that BMCL do

			21/08/2014	<p>2 options – a) full car park scheme and b) temp car park with drainage.</p> <p>AFe noted that BMCL had received all the prices back. Two tender reviews had been undertaken with Central Demolition and Hunter demolition. The central demolitions tender appears to have missed some items from the tender. AFe enquired when it was expected that the bridge would be craned off i.e. at night. PM suggested that late day time for craning off the bridge. GW noted that information is awaited from Land Eng who have sent in circa 20 queries which are currently being responded to. Land Eng are working up a design. AFe noted that BMCL have a programme in place for the demolition work. AFe advised that the Hunter representative had advised the asbestos in the theatre block is encased with tar. PM reported that he thought the NHS were getting management surveys of the buildings done over the next couple of months. GW advised that Land Eng. have asked for clarity as to what 'airport' style parking is. PM noted that it had been agreed at the previous meeting that Land Eng should cost up an airport style temp car park and a full car park permanent scheme. GW enquired about the time line for the construction of the car park next to the existing Barr Car park and PM suggested that construction would be next September. DR suggested that the car park will be subject to OJEU and the construction works and demolitions may be as 1 package. PM advised that the NHS would potentially go to the market with the car park in the 1<sup>st</sup> quarter next year.</p>	
			28/08/2014	GW noted that Land Eng have been given an extra week to provide car park options. 2 final demolition tenders have been received and being reviewed later that day. DL noted that the NHS should have received the tenders back for the surveys and enabling works.	
			04/09/2014	GW noted that BMCL have received some cost information noting that Land Eng were given a further week for the car park cost information (due 05/09/2014). GW noted that BMCL have received 2 competitive prices and have had 2 post tender meetings with the potential contractors. Indicative cost = circa £1.2m.	
			11/09/2014	GW noted that he had received a cost back for the car park however there are a couple of queries with DCampbell. GW will meet with AFe to discuss the demo tenders. It is anticipated that the price for the works will be provided to the NHS by the next day.	
			25/09/2014	DR advised that he had received the costs from BMCL. PM advised that he would like to see the drawings. GW agreed to provide the drawings, demo quote breakdown and Land Eng quote breakdown to PM.	
			02/10/2014	GW advised that he would provide the drawings and quote information later that day	
			09/10/2014	PM requested that GW provided the drawings on Sypro and GW agreed to provide these asap. AFe enquired about if BMCL would be receiving a PMI for the demolition works and DR advised that the NHS had decided to deal with the demolitions separately from the Car Park works as the Board need to identify funding for the car parking.	
			23/10/2014	DR noted that MSCar Park 3 was due to be advertised on 10/10/2014. Drawings have been provided by GW. Programme is being reviewed and DWL will update. AFe suggested a meeting to confirm plans and demolition line. It was agreed that this item can now be CLOSED	
			29/10/2014	GW advised that he was tidying up the proposal and enquired what is to happen to the area marked as development area. GW noted that the original quote had a £150k provisional sum included for this area. PM advised that the area should be top soiled and seeded and that the provisional sum should be left in. GW suggested that the provisional sum could be reduced to £100k and this was agreed. DH suggested that the area could be used as a patient transport laydown space. GW enquired if the NHS still wanted Heras fencing and DR confirmed that Heras was wanted. GW advised that BMCL were not happy to use heras fencing. PM advised that the NHS would be ok with BMCL re-using the corrugated fencing as long	

			12/11/2014	<p>as the fencing at the Labs side is replaced with heras. GW noted that he was finalizing the figures in relation the queries raised by DR. PM noted that the NHS would review the costs and thereafter prepare a paper for consideration/approval at the NHS Board.</p> <p>DL advised that a paper was being submitted to the Board's ASSB on Monday and QPC on Tuesday and he was not anticipating any issues. It was agreed this item could be closed.</p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014  23/01/2014  30/01/2014  13/02/2014  27/02/2014 06/03/2014  20/03/2014  27/03/2014  04/04/2014  10/04/2014  17/04/2014  24/04/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.</p> <p>DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.</p> <p>DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.</p> <p>GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.</p> <p>DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&amp;C Estates Dept.</p> <p>DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.</p> <p>DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.</p>	

			<p>08/05/2014 DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.</p> <p>15/05/2014 DP advised that he was continuing to pursue the formal report.</p> <p>22/05/2014 DP to progress.</p> <p>12/06/2014 Work in progress, action on DP.</p> <p>26.06.2014 This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.</p> <p>03/07/2014 DP advised he would push on the write up of the proposed option.</p> <p>10/07/2014 DP advised it is the intention to have the write-up of the report closed off by 24<sup>th</sup> July 2014.</p> <p>31/07/2014 DP advised this is WIP to conclude and the focus was to conclude before cop 8<sup>th</sup> August 2014.</p> <p>14/08/2014 DP to provide update on return from leave</p> <p>21/08/2014 DP to provide an update urgently as EW to be closed out asap.</p> <p>04/09/2014 DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.</p> <p>11/09/2014 DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.</p> <p>25/09/2014 GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was logical and would stop the pipe from sludging up.</p> <p>02/10/2014 PM advised that information had been provided to IP for forwarding to HFS. DP advised that BMCL will be progressing on the basis of the information provided, system N+1 therefore changes can be made as late as January 2015.</p> <p>09/10/2014 PM enquired if a response was awaited from IP and DP confirmed that BMCL were awaiting a response. PM advised he would liaise with IP.</p> <p>23/10/2014 DH agreed to check on the progress of this. AFe reported that the columns have had perforations and slots cut and it will now be necessary to check that HFS are satisfied with the proposed solution - DH agreed to check with IP whether any response has been received.</p> <p>30/10/2014 DH advised that formal feedback is awaited from HFS and he would pursue the feedback</p> <p>12/11/2014 <b>PM advised that he was awaiting a paper from IP and that the paper was expected imminently. It is proposed to change them and confirmation would be provided to BMCL asap.</b></p>	
22802	NHS EW 053	Curtain Tracks	<p>26/09/2014 The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p> <p>09/10/2014 PM advised that he would discuss this internally and report back.</p> <p>24/10/2014 A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between</p>	

			30/10/2014  1/11/2014	<p>two curtains when pulled fully closed - sub-contractor will be asked to review and amend the track if required.</p> <p>DH advised that he had undertaken a site visit with IHamilton and a solution to conclude the matter in A&amp;E and CC resus bays had been identified. DH would provide information to BMCL re variance in curtain track heights at half wall.</p> <p>DH and AFe had previously discussed this item and it had been agreed that IHamilton is going to arrange a sample for NHS review.</p>	
--	--	--	-----------------------------	---	--

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 12/11/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014           10/07/2014 24/07/2014 31/07/2014           14/08/2014           21/08/2014           28/08/2014 11/09/2014	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p> <p>PM advised that he was awaiting cost for the feasibility study.</p> <p>PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top</p>	

A51679245

			<p>25/09/2014</p> <p>02/10/2014</p> <p>09/10/2014</p> <p>23/10/2014</p>	<p>and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p> <p>DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&amp;B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up &amp; down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overclad design review could be carried out in the same meeting. PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and BMCL should have highlighted all the risks. BMCL were in the process of identifying a panel carrier system which can be retrofitted. AFe advised that the programme to achieve a finished clad building in time for the royal opening is difficult noting that the timescale for the works is indicated as circa 36 weeks. PM noted that the NHS would be unable to signoff the proposals until the Planning permission is granted.</p> <p>AFe advised that BMCL had met with CladUK who had subsequently provided an indicative price based on a standard panel. CladUK advised that the standard panel they use does not provide thermal gain as it is a vented system (top and bottom) however a formal response is awaited. BMCL anticipate obtaining a firmed up price for the works after the school holiday period. Once BMCL ensure that the price is in the NHS cost range then will apply for planning permission. DR requested that BMCL provide a programme for the cladding works in order that the NHS can identify and plan for when areas/offices, etc need to be vacated. AFe proposed that BMCL would mark-up a drawing to show the corridor works and ward/clinical area works noting that the corridor works will be quicker to do. It was noted that BMCL are seeking a fixed price for the works from CladUK. AFe noted that the cladding and window works sit separately. DR noted that it would be helpful if BMCL could reduce the price as the current price was close to the NHS budget for the works and this would assist to achieve approval of the INS Entrance works fundng.</p> <p>A sample board of the cladding to be provided to show options. AFe noted that the cost was not hugely different. A review of the risks required for window replacement activities. The area of elevation for the ICE building abutment now removed from the costs and repricing is completed. It was agreed that BMCE and NHS to meet next week to review. The next stage once agreed is to engage planning and project a start on site date - anticipated to be around March 2015. Design and warrents plus SER take around 12-14 weeks but BMCE will push to shorten this time.</p> <p>Cashflow - progress design up to Christmas and place order for all materials in order to maximize spend within current financial year.</p>	
--	--	--	---	--	--

			30/10/2014  13/11/2014	<p>GW noted that a further conversation with Clad UK had taken place and proposal repriced on the basis of these discussions. BMCL would be discussing with D&amp;B Facades in due course. GW enquired about the drop dead date for NHS approval and DR confirmed that BMCL were to progress Planning as Planning is the driver for approval as is being dealt with through the Board's Capital Plan.</p> <p>DS advised that he had made a couple of enquiries which had identified that a) the building could be overclad without insulating, b) building too hot as is so insulating c) Building Standards Division advised that should insulate, d) Building Control indicated that they could only decide on basis of application. DS was due to meet with RBarlow on 19/11 and he would raise the subject with RBarlow at this meeting. DS noted that if there is no requirement to insulate then the way forward was known. If the building did need to be insulated then the NHS would need to deal with the cooling of the building. DS suggested that it would be beneficial if a survey of the building environmental was undertaken. AFe advised that he was getting the drawings updated for review by the NHS. DL noted that it was disappointing that only now being advised of the Building Regulations and that the cost of the overclad project was getting close to being above the NHS financial envelope. If the NHS require to do anything re infrastructure to the building then the project may not go ahead. DL enquired if there was any opportunity to get the project through as the windows will improve the heat loss. PM advised that Glasgow University had just overclad a building without needing to insulate it. AFe advised that it was D&amp;B Facades who had only recently suggested that insulation may be required. DL noted that it was only to be an aesthetic treatment to the building. DH suggested that the NHS have to achieve the cashflow. AFe noted that the cost provided to the NHS is for an insulated building. DR agreed to contact Glasgow University for information about their recent overclad project. PM agreed to contact DNimmo to advise that BMCL will be contacting him. DR advised that JMurray had previously been provided with a copy of the feasibility study. DL advised that Robert Kilpatrick was the engineer and may be a good point of contact. DR noted that DNimmo may be the best person to speak to.</p>	
3029	PMI 308	INS Entrance Works	10/10/2014	<p>Further to PMI 294 and submission of the cost estimate on 22 September 2014 in sum of £3,702,968 it is confirmed that it is the intention of the Board to proceed with these works and to issue a Compensation Event to formalise the contractual arrangements. This PMI should be taken as an instruction for Brookfield Multiplex to progress design and procurement. In order to finalise the Compensation Event the following should be completed by 24th October 2014:-</p> <ol style="list-style-type: none"> <li>1. Planning Permission approval received</li> <li>2. Complete RIBA Stage 3 design for underground drainage in order that "Provisional" note included in submitted price can be removed</li> <li>3. Complete RIBA Stage 3 design for external works in order that "Provisional" note included in submitted price can be removed</li> <li>4. Complete RIBA Stage 3 design for building services in order that exclusions / caveats can be finalised</li> <li>5. Update design, procurement and construction programme</li> <li>6. Prepare a full information pack of all PMI 294 RIBA Stage 3 deliverables to be attached to the Compensation Event</li> </ol> <p>Prior to finalisation of the Compensation Event the Board confirm it will underwrite all eligible costs</p>	

			23/10/2014	in developing the INS Entrance works. CE noted with 6 actions - this is tied to planning and pack is to be made ready in anticipation of planning approval receipt. DWL noted that time will need to be given to allow information relay to users. Date for break into INS has now been altered. Conflicting requirements between projects relation to the opening of the bridge link to be resolved by dialogue. Bridge opening - a conversation will be required with users. It may be possible to create a fire box within the bridge during external works and a plan in place for its removal at the completion of the works - it was to be noted that access requires to remain for potential movement of patients to theatres.	
			30/10/2014	PM noted that there were some matters to conclude. GW noted that there is 4 issues against the £200k i.e. landscaping, suds/drainage, additional cost re existing infrastructure and mercury costs for lights. The mercury costs are being checked. DR noted that there is a plan to work through the money however nothing can be done until get planning. AFE noted that GB is chasing up Jim for the outcome of the planning application on a bi-daily basis. AFe noted that planning are asking for a PI and the consultants won't give a PI.	
			13/11/2014	DL advised that the NHS were due to issue a PMI. DR advised that the costs had been agreed and he was drafting the PMI for issue. GW was requested to provide the cost plan for the works. DS raised concern that there had been an initial meeting which GDonnelly had attended and no issues had been raised however GDonnelly has now come back with an issue re sprinklers to 1 room. It was suggested that the fire rating of the room should be improved. DH advised that he had read the regs and there are options to provide another form of suppression. It was noted that a view could be requested.	
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDerment to agree extend of works. All as discussed Paul McGuiness / Hugh McDerment. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDerment to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	

3061	PMI 310	ADAPTATIONS TO BUILDING SERVICES FOR IMAGING EQUIPMENT INSTALL	27/10/2014	<p>Please proceed with the attached amendments to services/equipment as per the attached schedule. Costs for same to be incorporated in the Group1 equipment list.</p> <p>The Board request that alterations to 13no. General X-Ray rooms, as listed on the attached schedule, are undertaken to facilitate the installation of Samsung Digital X-Ray equipment by MIS Ltd. The alterations are limited to:</p> <ul style="list-style-type: none"> <li>- removal of temporary/permanent containment at desk locations</li> <li>- relocation of sprinkler heads</li> <li>- removal of RAC1020 pigeon hole units</li> <li>- relocation of wireless access points</li> <li>- removal of emergency stop buttons in 3 locations</li> <li>- Relocation of nurse call/reset panel in 2 locations</li> <li>- Relocation of lead apron rack.</li> </ul> <p>Works to include, where necessary, making good of lead lining and finishes.</p> <p>DH noted that the works are ongoing. DH was being advised that the works are not being carried out quick enough. DP noted that resources are being diverted to carry out the adaptations when it was possible to do so as BMCL were ensuring no impact to other works.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	10/11/2014	<p>The Board require a cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228 for connection of 'stacks' to the pendant.</li> </ol> <p>DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p>	
3104	PMI 312 -	ADULT & CHILDREN'S HOSPITAL - COLD WATER STORAGE TANKS	17/11/2014	<p>Please replace the installed hollow lid supports with solid supports.</p> <p>In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on 19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks.</p>	

3105	PMI 313 -	MRI Room Services	17/11/2014	<p>The following items require to be addressed to allow co-ordination with the Siemens installations within the 4no. MRI suites, in the following order to follow the installation programme.</p> <p>RCG -064 (MRI Scanner): Waste pipework from drip tray beneath SWVP to be re-routed away from vent ductwork and connected to drainage</p> <p>RCG-065 (Technical Room): Existing PAN013 to be replaced with isolator to allow installation of supplier switchgear</p> <p>RAG - 123 (Technical Room): Electrical switchgear currently located on wall backing on to RAG-112 to be relocated on to wall backing on to MIL-007/MIL-004 set out min 2.5m from original wall, all to allow installation of penetration panel and equipment cabinets</p> <p>RAG-109 (MRI Room): Quench pipe entering from RAG-110 to be raised to above Faraday Cage level(exact requirement to be confirmed) and existing support to be modified to eliminate likelihood of damage/corrosion due to contact between different metals</p> <p>RAG-110 (Technical Room): Review cooling requirements, and if acceptable, remove 1no. Airedale downflow unit backing on to RAG-111. Relocate switchgear from current position to location vacated by downflow unit including replacing PAN 013 with isolator switch</p> <p>RCF - 042: Remove existing PAN-013 and locate new isolator to RHS of door leaving space for supplier switchgear</p>	
3106	PMI 314 -	Fluoroscopy Equipment Co-ordination	17/11/2014	<p>The Board request that the wall mounted IPS control panel in the Endoscopy room (RAF-009) is relocated to allow positioning of the equipment generators.</p> <p>It is proposed that, subject to size/depth of the panel, it is relocated onto the control desk trunking/power pole being installed by Phillips as part of the Group 5 installation.</p>	
3112	PMI 315	ADULT & CHILDREN'S HOSPITALS - PROTECTIVE CURTAINS FOR LIFTS	19/11/2014	<p>Please order and install hanging studs and protective fabric drapes as detailed in the attached drawing and specification.</p> <p>Please proceed and have stud fixings for hanging protective drapes in lift cars installed in 8 No. lifts cars as detailed on the attached drawing.</p> <p>Please provide 6 sets of protective lift drapes as detailed on the attached schedule, sized for the specific lifts noted. Note some lifts will share 1 set of drapes.</p> <p>Provide storage bags as noted in Schindler quotation (also attached).</p> <p>Please confirm total cost incl of OHP and confirm these item will be added to the Group 1 equipment list.</p>	

## COMPENSATION EVENTS

A51679245

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014 25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	
	CE063	FIBRE OPTIC CABLE DIVERSION GOVAN ROAD	03/10/2014  23/10/2014	The Board confirm acceptance of your quotations in response to PMI's 301 and 306. The works are to carry out investigatory digs across the Govan Rd bell mouth to the Boulevard, to establish location of fibre optic cable and subsequently lower the cable to a safe working depth under the new roadway. Two quotations in the gross amount of £8,834.96 inclusive of OH+P are accepted by the Board for these works. <b>Item can be CLOSED</b>	
	CE 064	Section 56/2 - 6 No. Additional Street Lights, Columns & Cabling to Hardgate Road	09/10/2014  23/10/2014	Please procure and install 6 No. additional street lights within the Section 56/2 area of work as required by Glasgow City Council. Please refer attached drawing and cost breakdown as prepared by BMCE.  Quotation as provided amounts to £42,907.98 inclusive of overhead and profit, but excludes VAT. <b>Agreement awaited from GCC on revised drawings - DH awaiting drawing from DS</b>	
13594	CE 065	Adverse Weather Cross reference BMCL EW 141 & 142	12/11/2014	The Board confirm that during December 2013 & February 2014 there were a series of isolated 1 in 10 year weather events. The impacts have been collectively assessed and a CE is due under the contract.	
13598	CE 066	Neurosurgical Block - Extension to main entrance	13/11/2014	The Board instruct Brookfield Multiplex to carry out and complete the INS Entrance extension works all as set out in Brookfield Multiplex submission document dated 24th October 2014 titled "Response to Project Managers Instruction 308 INS Entrance Works" and for the agreed target price adjustment of £3,826,354.00.  These works will be classified as Stage 4 of the contract signed 18th December 2009 , and subject to specific contractual terms additions / amendments:- Data Part Contract 1 – Data Provided by the Employer <ul style="list-style-type: none"> <li>Clause 3 Time: Access Date Start on Site – Stage 4: 19th January 2015.</li> <li>Optional Statements Employer risks – Appendix E Board risks remain, with exception of weather where base date for assessment of employer risks will be the date of this Compensation Event, and ground conditions where all available additional information obtained since contract award 18th December 2009 has been considered</li> <li>Optional Clause X5: Completion Date - 58 calendar weeks from start date</li> </ul>	

## Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) **DH advised that he would chase up JBushfield (13/10/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014 Meeting organized on 31/10/2014 to discuss (30/10/2014) **PM advised that the CMB was under consideration and requested that AFe confirm the number of BMCL which**

require to be accommodated. AFe confirmed that the preference was for BMCL to be on the ground floor. Afe suggested that the office block could remain on site until May – cabins to be removed June. PM suggested that the NHS floor would be closed in February (13/10/2014)

- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014) DP advised that he was setting up a meeting with Air Products, I Sandford, I Powrie, NHS and BMCL. GW advised that in the meantime BMCL have instructed WSP to do survey works. (09/10/2014) Further meeting next Tuesday there will require a 1 day down time to transfer over EW may be required but this will be decided after meeting 23/10/2014. Noted that Air Products are to provide information re revised base so WSP can design slab/base. BMCL will need to divert Oxygen main in that area. GW enquired what BMCL should do about the costs incurred as the slab is now a lot bigger than what was agreed. AFe suggested that BMCL should firstly ascertain if a piling solution will be required. DH noted that this is a timing issue re patient safety. (30/10/2014) GW advised that he would raise an EW as these works will fall outwith the completion period. DP advised that he had received the drawing and would issue this to the NHS for review. GW agreed to raise an EW regarding this matter. (19/11/2014)
- Bridge tie in @ neuro – DP advised that he needed a date for this work. GF to liaise with PMcG today. (09/10/2014) As noted in EW 23/10/2014. AFe advised that the opening of the link bridge had been discussed with Gillon and it was anticipated that BMCL should be able to complete the works and stay open by April 2015. PM was requested to provide feedback re the windows. (30/10/2014) DL noted that the date is 24<sup>th</sup> November 2014 (13/11/2014)
- Food waste – DP advised that BMCL are having difficulty with Dawsons as they will not go into contract with Mercury or BMCL. Dawson give their equipment to an installer. The installer hasn't been through the H&S checks. BMCL are pursuing Dawsons. BMCL have an alternate solution and would want them to meet with the NHS. AFe noted that BMCL will have internal issues re warranties. PM requested that BMCL progress with Dawsons in the first instance and organize for alternate supplier to meet with NHS/BMCL. AFe advised that he would issue this as an EW. (09/10/2014) DWL to speak to rep from dawsons 23/10/2014. AFe noted that BMCL will need to cut a chase in the service yard at the Labs and BMCL will liaise with the NHS re these works. PM advised this should be dealt with/raised as necessary. (30/10/2014) DP noted that the preliminary works were being commenced and Dawsons would then come in and do the walls and the ceilings then go off site until January. It was agreed this item could now be closed (13/11/2014)
- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014. DH advised that he had discussed this and it was thought that a PMI is not necessary (30/10/2014) GW to provide information to DH as DH had suggested that there has been a significant increase to the cost for the 3 small hatches. (13/11/2014)
- Pharmacy Roller Shutter - changes required? 23/10/2014 DP advised that he is awaiting info from FW re change to be made (30/10/2014) DH noted that there was an omission to the small shutter to the vending in AAU. PM agreed to review on site and confirm way forward to BMCL (13/11/2014)
- Lift Protection - clarity on which will be required to have protection remaining - meeting required to clarify 23/10/2014. PM advised that he would discuss this with KC and AT what lifts are planned to be used during the 12 week commissioning (30/10/2014) DP noted that meeting had taken place – NHS to confirm the curtains (13/11/2014)
- Xray rooms - some enabling works to be undertaken to allow installation of Samsung Digital X-Ray equipment. DH will review and advise. 23/10/2014. Noted that this matter is covered under PMI 310 therefore this item can be closed. (30/10/2014)

- Blind controls – noted that the grommet between the blind fittings and pole can break in certain circumstances and are being replaced to all windows. (30/10/2014)
- TDSL window – issue has been identified and TDSL are investigating – it was thought the grub screw needs to be looked at. (30/10/2014) AFe advised that a review was being carried out. It was agreed this item could be closed (13/11/2014)
- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014) DP advised that the 1<sup>st</sup> panel is due to be on site on 14<sup>th</sup> November 2014. DP would organize for ISandford to confirm that he is ok with the set-up. Confirmation of panel demonstration is awaited (13/11/2014)
- MRI rooms – DH noted that there is a clash between the isolator and Siemens – Siemens need the wall clear for their works (13/11/2014)
- County Air Ambulance Trust – DS advised that he had sent info to DL and PM. They are looking to extend their operation into Scotland. A rep will be visiting Glasgow in December 2014. There may be an opportunity to get a non-refundable grant towards the helipad and BMCL were furthering discussions as they are very interested in the SGH helipad. (13/11/2014)
- Impact of MRI quench pipes on Helipad – DH advised that this had been raised as a potential risk to Helicopter landings. The quench pipe is 40m below the helipad. DH enquired if there is a way to close out this item. DL suggested that the rep should be asked to provide evidence. AFe suggested that DH should liaise with Siemens. (13/11/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1090

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 26/11/2014:

<div>  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23504	BMCE-EWN-000149	AGV Lift Segregation	21/01/2014	<p>Following the recent Swisslog AGV TCMS2 software simulation, we have been advised by Swisslog the current Clean &amp; Dirty lift segregation is detrimentally affecting their delivery systems and matrix times. Therefore, currently as the project stands, the AGV system is non-compliant with NHS ER's.</p> <p>Swisslog propose remove AGV Clean &amp; Dirty lift segregation to allowing all AGV's to use any AGV lift. NHS Infection Control Procedures for AGV Lifts Core C, D, F, H &amp; K to be reviewed.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 26/11/2014

<div>  </div>					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p> <p>27/02/2014</p> <p>06/03/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p>DP advised that he had put the alert to Mercury and Decca Plastics. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Decca Plastics.</p> <p>DP noted that he would push Mercury and Decca Plastics for a response. DP had liaised with Mercury the previous day.</p> <p>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert.</p> <p>DP expected to be able to provide a response to the NHS in the next 7-10 days.</p> <p>Report anticipated shortly</p> <p>DP noted that he has met with Mercury and Decca Plastics and is awaiting their proposals for addressing</p>	20/11/2014

A51679245

				the safety action notice. Any works required will occur in the period prior to handover when they require to be emptied and cleaned in any case.	
			20/03/2014	DP advised that it was proposed to confirm the way forward w/c 24/03/2014 however at this time it was being proposed to have a solid support rather than 'colander' style support.	
			27/03/2014	DP advised that this item had been escalated with Mercury as there was currently a window of opportunity to resolve with minimal impact. DP noted that there would be another window of opportunity if works cannot be undertaken now. DH advised that the NHS needed to understand the detail of what will be done and DP agreed to provide this information in due course.	
			04/04/2014	GW noted that DP had advised that the works need to be done but not an issue if not undertaken in advance of the first fill up.	
			10/04/2014	DH advised that the NHS needed BMCL to confirm what they intended to do so that this could be fed back to the NHS GG&C Estates Dept.	
			17/04/2014	DP advised that formal report is awaited. The tubes are not structural support. The report would be provided asap.	
			24/04/2014	DP reported that BMCL had not progressed any potential solutions however the tank manufacturer may have and that BMCL would assess if solutions had been progressed. Formal report awaited from tank manufacturer for provision to the NHS.	
			08/05/2014	DP advised that he was awaiting feedback and would pursue and provide an update at the next meeting.	
			15/05/2014	DP advised that he was continuing to pursue the formal report.	
			22/05/2014	DP to progress.	
			12/06/2014	Work in progress, action on DP.	
			26.06.2014	This item now becoming urgent, a decision is required by September 14, and working back from this date to go through a review process with HFS, the 'collander option' needs to be written up and tested.	
			03/07/2014	DP advised he would push on the write up of the proposed option.	
			10/07/2014	DP advised it is the intention to have the write-up of the report closed off by 24 <sup>th</sup> July 2014.	
			31/07/2014	DP advised this is WIP to conclude and the focus was to conclude before cop 8 <sup>th</sup> August 2014.	
			14/08/2014	DP to provide update on return from leave	
			21/08/2014	DP to provide an update urgently as EW to be closed out asap.	
			04/09/2014	DH advised that he had received a note from DP in which he indicated a £15k additional cost. DH advised that the NHS needs to understand when remedial works can be carried out.	
			11/09/2014	DP advised that it was proposed to carry out the remedial works in October s the tanks will be getting emptied before the major sterilization works are undertaken. DP was requested to check how far down the support pipes the holes will be drilled as there was concern that if there is still a solid section at the bottom of the pipe that the issue will not have been solved and suggested that a slot at the bottom would need to be cut in the pipe. DP noted that cost of the works is circa £20k as some tanks had been missed of the initial costing exercise. DP agreed to confirm the size of the holes.	
			25/09/2014	GW provided the following update on behalf of DP = 10mm, 300 centres ,slots to be cut out at the bottom. DH requested that DP write to confirm the way forward so that this information can be passed to HFS through IP as a response to the Safety Action Notice. DS enquired if this solution had been accepted on other schemes and DH advised that the proposals had not been accepted. DH enquired if there was any indication as to how HFS would respond and DH noted there was no indication however the proposal was logical and would stop the pipe from sludging up.	
			02/10/2014	PM advised that information had been provided to IP for forwarding to HFS. DP advised that BMCL will be progressing on the basis of the information provided, system N+1 therefore changes can be made as late	

			09/10/2014 23/10/2014 30/10/2014 13/11/2014 20/11/2014	<p>as January 2015.</p> <p>PM enquired if a response was awaited from IP and DP confirmed that BMCL were awaiting a response. PM advised he would liaise with IP.</p> <p>DH agreed to check on the progress of this. AFe reported that the columns have had perforations and slots cut and it will now be necessary to check that HFS are satisfied with the proposed solution - DH agreed to check with IP whether any response has been received.</p> <p>DH advised that formal feedback is awaited from HFS and he would pursue the feedback</p> <p>PM advised that he was awaiting a paper from IP and that the paper was expected imminently. It is proposed to change them and confirmation would be provided to BMCL asap.</p> <p><b>It was noted that this item can now be closed as PMI 312 issued.</b></p>	
22802	NHS EW 053	Curtain Tracks	26/09/2014  09/10/2014 24/10/2014 30/10/2014 13/11/2014 20/11/2014	<p>The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p> <p>PM advised that he would discuss this internally and report back.</p> <p>A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between two curtains when pulled fully closed - sub-contractor will be asked to review and amend the track if required.</p> <p>DH advised that he had undertaken a site visit with IHamilton and a solution to conclude the matter in A&amp;E and CC resus bays had been identified. DH would provide information to BMCL re variance in curtain track heights at half wall.</p> <p>DH and AFe had previously discussed this item and it had been agreed that IHamilton is going to arrange a sample for NHS review.</p> <p><b>AFe noted that the sample is awaited and the NHS will be advised asap when the sample is available – will be a shortened sample.</b></p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 26/11/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014	<p>RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.</p> <p>Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.</p>	

			<p>10/07/2014 PM advised that he was awaiting cost for the feasibility study.</p> <p>24/07/2014 PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.</p> <p>31/07/2014 DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.</p> <p>14/08/2014 GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.</p> <p>21/08/2014 AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&amp;B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.</p> <p>28/08/2014 It was noted that the price and the programme were to be provided to the NHS on 29/08/2014</p> <p>11/09/2014 DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.</p> <p>25/09/2014 Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p> <p>02/10/2014 DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&amp;B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up &amp; down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overclad design review could be carried out in the same meeting.</p> <p>PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and BMCL should have highlighted all the risks. BMCL were in the process of identifying a panel carrier system which can be retrofitted. AFe advised that the programme to achieve a finished clad building in time for the royal opening is difficult noting that the timescale for the works is indicated as circa 36 weeks. PM noted that the NHS would be unable to signoff the proposals until the</p>
--	--	--	--

			09/10/2014	<p>Planning permission is granted.</p> <p>AFe advised that BMCL had met with CladUK who had subsequently provided an indicative price based on a standard panel. CladUK advised that the standard panel they use does not provide thermal gain as it is a vented system (top and bottom) however a formal response is awaited. BMCL anticipate obtaining a firmed up price for the works after the school holiday period. Once BMCL ensure that the price is in the NHS cost range then will apply for planning permission. DR requested that BMCL provide a programme for the cladding works in order that the NHS can identify and plan for when areas/offices, etc need to be vacated. AFe proposed that BMCL would mark-up a drawing to show the corridor works and ward/clinical area works noting that the corridor works will be quicker to do. It was noted that BMCL are seeking a fixed price for the works from CladUK. AFe noted that the cladding and window works sit separately. DR noted that it would be helpful if BMCL could reduce the price as the current price was close to the NHS budget for the works and this would assist to achieve approval of the INS Entrance works funding.</p>	
			23/10/2014	<p>A sample board of the cladding to be provided to show options. AFe noted that the cost was not hugely different. A review of the risks required for window replacement activities. The area of elevation for the ICE building abutment now removed from the costs and repricing is completed. It was agreed that BMCE and NHS to meet next week to review. The next stage once agreed is to engage planning and project a start on site date - anticipated to be around March 2015. Design and warrents plus SER take around 12-14 weeks but BMCE will push to shorten this time. Cashflow - progress design up to Christmas and place order for all materials in order to maximize spend within current financial year.</p>	
			30/10/2014	<p>GW noted that a further conversation with Clad UK had taken place and proposal repriced on the basis of these discussions. BMCL would be discussing with D&amp;B Facades in due course. GW enquired about the drop dead date for NHS approval and DR confirmed that BMCL were to progress Planning as Planning is the driver for approval as is being dealt with through the Board's Capital Plan.</p>	
			13/11/2014	<p>DS advised that he had made a couple of enquiries which had identified that a) the building could be overclad without insulating, b) building too hot as is so insulating c) Building Standards Division advised that should insulate, d) Building Control indicated that they could only decide on basis of application. DS was due to meet with RBarlow on 19/11 and he would raise the subject with RBarlow at this meeting. DS noted that if there is no requirement to insulate then the way forward was known. If the building did need to be insulated then the NHS would need to deal with the cooling of the building. DS suggested that it would be beneficial if a survey of the building environmental was undertaken. AFe advised that he was getting the drawings updated for review by the NHS. DL noted that it was disappointing that only now being advised of the Building Regulations and that the cost of the overclad project was getting close to being above the NHS financial envelope. If the NHS require to do anything re infrastructure to the building then the project may not go ahead. DL enquired if there was any opportunity to get the project through as the windows will improve the heat loss. PM advised that Glasgow University had just overclad a building without needing to insulate it. AFe advised that it was D&amp;B Facades who had only recently suggested that insulation may be required. DL noted that it was only to be an aesthetic treatment to the building. DH suggested that the NHS have to achieve the cashflow. AFe noted that the cost provided to the NHS is for an insulated building. DR agreed to contact Glasgow University for information about their recent overclad project. PM agreed to contact DNimmo to advise that</p>	

			20/11/2014	<p>BMCL will be contacting him. DR advised that JMurray had previously been provided with a copy of the feasibility study. DL advised that Robert Kilpatrick was the engineer and may be a good point of contact. DR noted that DNimmo may be the best person to speak to.</p> <p>PM advised that he had emailed RKilpatrick the previous week. DS noted that Building Control have advised that the panels do not need to be insulated. DL noted that the way forward re the cavity barrier would need to be agreed. It was noted that BMCL need to provide the programme as the NHS have cashflow to achieve. DS noted that there had been a previous discussion regarding the vesting of materials. AF agreed to provide the programme asap. DL enquired whether a staged warrant was required and DS advised that the overclad is a single application and the entrance works is in 6 stages. AF noted that BMCL were checking for any savings which could be obtained as insulated panel now required.</p>	
3029	PMI 308	INS Entrance Works	<p>10/10/2014</p> <p>23/10/2014</p> <p>30/10/2014</p>	<p>Further to PMI 294 and submission of the cost estimate on 22 September 2014 in sum of £3,702,968 it is confirmed that it is the intention of the Board to proceed with these works and to issue a Compensation Event to formalise the contractual arrangements. This PMI should be taken as an instruction for Brookfield Multiplex to progress design and procurement. In order to finalise the Compensation Event the following should be completed by 24th October 2014:-</p> <ol style="list-style-type: none"> <li>1. Planning Permission approval received</li> <li>2. Complete RIBA Stage 3 design for underground drainage in order that "Provisional" note included in submitted price can be removed</li> <li>3. Complete RIBA Stage 3 design for external works in order that "Provisional" note included in submitted price can be removed</li> <li>4. Complete RIBA Stage 3 design for building services in order that exclusions / caveats can be finalised</li> <li>5. Update design, procurement and construction programme</li> <li>6. Prepare a full information pack of all PMI 294 RIBA Stage 3 deliverables to be attached to the Compensation Event</li> </ol> <p>Prior to finalisation of the Compensation Event the Board confirm it will underwrite all eligible costs in developing the INS Entrance works.</p> <p>CE noted with 6 actions - this is tied to planning and pack is to be made ready in anticipation of planning approval receipt. DWL noted that time will need to be given to allow information relay to users. Date for break into INS has now been altered. Conflicting requirements between projects relation to the opening of the bridge link to be resolved by dialogue.</p> <p>Bridge opening - a conversation will be required with users. It may be possible to create a fire box within the bridge during external works and a plan in place for its removal at the completion of the works - it was to be noted that access requires to remain for potential movement of patients to theatres.</p> <p>PM noted that there were some matters to conclude. GW noted that there is 4 issues against the £200k i.e. landscaping, suds/drainage, additional cost re existing infrastructure and mercury costs for lights. The mercury costs are being checked. DR noted that there is a plan to work through the money however nothing can be done until get planning. AFE noted that GB is chasing up Jim for the outcome of the planning application on a bi-daily basis. AFe noted that planning are asking for a PI and the consultants won't give a PI.</p>	20/11/2014

			13/11/2014	DL advised that the NHS were due to issue a PMI. DR advised that the costs had been agreed and he was drafting the PMI for issue. GW was requested to provide the cost plan for the works. DS raised concern that there had been an initial meeting which GDonnelly had attended and no issues had been raised however GDonnelly has now come back with an issue re sprinklers to 1 room. It was suggested that the fire rating of the room should be improved. DH advised that he had read the regs and there are options to provide another form of suppression. DS advised that BMCL will pursue a view agreement with Building Control in respect to the location of the Aroma/patient adjacency.	
			20/11/2014	Item closed as CE066 issued.	
3040	PMI 309	Langlands Drive Bus Lay-by Service Diversions	16/10/2014	Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works. Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert. IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits. All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.	
			23/10/2014	PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.	
			30/10/2014	DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.	
			13/11/2014	DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.	
			20/11/2014	DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1 <sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.	
3061	PMI 310	ADAPTATIONS TO BUILDING SERVICES FOR IMAGING EQUIPMENT INSTALL	27/10/2014	Please proceed with the attached amendments to services/equipment as per the attached schedule. Costs for same to be incorporated in the Group1 equipment list.  The Board request that alterations to 13no. General X-Ray rooms, as listed on the attached schedule, are undertaken to facilitate the installation of Samsung Digital X-Ray equipment by MIS Ltd. The alterations are limited to:  - removal of temporary/permanent containment at desk locations - relocation of sprinkler heads - removal of RAC1020 pigeon hole units - relocation of wireless access points	

			<p>13/11/2014</p> <p>20/11/2014</p>	<ul style="list-style-type: none"> <li>- removal of emergency stop buttons in 3 locations</li> <li>- Relocation of nurse call/reset panel in 2 locations</li> <li>- Relocation of lead apron rack.</li> </ul> <p>Works to include, where necessary, making good of lead lining and finishes.</p> <p>DH noted that the works are ongoing. DH was being advised that the works are not being carried out quick enough. DP noted that resources are being diverted to carry out the adaptations when it was possible to do so as BMCL were ensuring no impact to other works.</p> <p>DH noted that the majority of works have been carried out. GW advised that he would provide tge cost info asap.</p>	
3091	PMI 311	Alterations to two hybrid/interventional theatres (THE228/232)	<p>10/11/2014</p> <p>13/11/2014</p> <p>20/11/2014</p>	<p>The Board requires cost for the following alterations to the two hybrid/interventional theatres (THE228/232) as below:</p> <ol style="list-style-type: none"> <li>1) To carry out a further core in each theatre set-out as per the attached drawings</li> <li>2) To infill the existing cores to reinstate the fire separation between compartments and to provide a level floor</li> <li>3) To relocate 1no. monitor in each theatre from the ceiling mounted arm on the scrub side of the room to the vacant arm on the surgeon's panel/pendant side of the table.</li> <li>4) To replace the fixed arm section on both the upper and lower arms of the scrub side ceiling mount, in both theatres, extending each arm by 250mm</li> <li>5) to supply/install an additional operating light to the second arm of the scrub side ceiling mount in both theatres</li> <li>6) to relocate the scrub side ceiling mount in THE 232 to as close to the outer rail of the unistrut ceiling as possible as set out on sketch (SK02)</li> <li>7) to alter the av cabling &amp; electrical installation as necessary to accommodate the above changes including provision of 1no. outlet plate on PEN 013B in THE 228for connection of 'stacks' to the pendant.</li> </ol> <p>DH acknowledged that information was awaited from Starkstrom – feedback was awaited re the core and movement of 1 light. DP noted that the BMCL commissioning of the theatre suite may fall out of the 26<sup>th</sup> January 2015.</p> <p>AF advised that he had all the supply chain providing feedback on 21/11/2014. AF noted that BMCL want to try and catch all the construction works before the 26<sup>th</sup> January 2015.DH advised that he would liaise between BMCL and Toshiba. AF noted that it was proposed to have a meeting on Monday.</p>	
3104	PMI 312 -	ADULT & CHILDREN'S HOSPITAL - COLD WATER STORAGE TANKS	<p>17/11/2014</p> <p>20/11/2014</p>	<p>Please replace the installed hollow lid supports with solid supports.</p> <p>In cold water storage tanks, you are instructed to replace the hollow lid supports currently installed with solid supports to comply with recommendations DoH/HFS Alert Ref:EFA/2013/004 issued on 19th November 2013 and by doing so, greatly reduce the likelihood of the growth of Pseudomonas within the tanks.</p> <p>GW advised that he would confirm the costs to the NHS asap. Thereafter CE to be issued by the NHS.</p>	

3105	PMI 313 -	MRI Room Services	17/11/2014	<p>The following items require to be addressed to allow co-ordination with the Siemens installations within the 4no. MRI suites, in the following order to follow the installation programme.</p> <p>RCG -064 (MRI Scanner): Waste pipework from drip tray beneath SWVP to be re-routed away from vent ductwork and connected to drainage</p> <p>RCG-065 (Technical Room): Existing PAN013 to be replaced with isolator to allow installation of supplier switchgear</p> <p>RAG - 123 (Technical Room): Electrical switchgear currently located on wall backing on to RAG-112 to be relocated on to wall backing on to MIL-007/MIL-004 set out min 2.5m from original wall, all to allow installation of penetration panel and equipment cabinets</p> <p>RAG-109 (MRI Room): Quench pipe entering from RAG-110 to be raised to above Faraday Cage level(exact requirement to be confirmed) and existing support to be modified to eliminate likelihood of damage/corrosion due to contact between different metals</p> <p>RAG-110 (Technical Room): Review cooling requirements, and if acceptable, remove 1no. Airedale downflow unit backing on to RAG-111. Relocate switchgear from current position to location vacated by downflow unit including replacing PAN 013 with isolator switch</p> <p>RCF - 042: Remove existing PAN-013 and locate new isolator to RHS of door leaving space for supplier switchgear</p> <p><b>AFe advised this PMI needed to be discussed. DH noted that the revised works to RCG 064 needs to be complete by Monday 24<sup>th</sup> November 2014 as the Group 5 supplier commences their works on 24/11/2014.</b></p>	
3106	PMI 314 -	Fluoroscopy Equipment Co-ordination	17/11/2014	<p>The Board request that the wall mounted IPS control panel in the Endoscopy room (RAF-009) is relocated to allow positioning of the equipment generators.</p> <p>It is proposed that, subject to size/depth of the panel, it is relocated onto the control desk trunking/power pole being installed by Phillips as part of the Group 5 installation.</p>	
3112	PMI 315	ADULT & CHILDREN'S HOSPITALS - PROTECTIVE CURTAINS FOR LIFTS	19/11/2014	<p>Please order and install hanging studs and protective fabric drapes as detailed in the attached drawing and specification.</p> <p>Please proceed and have stud fixings for hanging protective drapes in lift cars installed in 8 No. lifts cars as detailed on the attached drawing.</p> <p>Please provide 6 sets of protective lift drapes as detailed on the attached schedule, sized for the specific lifts noted. Note some lifts will share 1 set of drapes.</p> <p>Provide storage bags as noted in Schindler quotation (also attached).</p> <p>Please confirm total cost incl of OHP and confirm these item will be added to the Group 1</p>	

			20/11/2014	equipment list. GW noted that JBaillie will deal with the costs later that day. DH suggested that there was already a fixed costs provided for the works.	
--	--	--	------------	--	--

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
	CE062	RESURFACING AND STREET LIGHTING WORKS (cross ref PMI 305)	12/09/2014 25/09/2014	Please proceed with road resurfacing and street lighting works to a section of Hardgate Road and a section of roadway outside the Management Office at SGH all as set out in PMI 289. Agreed item to be closed PM noted that NHS were having a pre-meet before meeting GCC and a copy of the drawing with the 6 street lights taken off which are deemed to be GCC responsibility. BMCL to provide drawing asap. DS agreed to discuss with DCampbell	
13594	CE 065	Adverse Weather Cross reference BMCL EW 141 & 142	12/11/2014	The Board confirm that during December 2013 & February 2014 there were a series of isolated 1 in 10 year weather events. The impacts have been collectively assessed and a CE is due under the contract.	26/11/2014
13598	CE 066	Neurosurgical Block - Extension to main entrance	13/11/2014  20/11/2014	The Board instruct Brookfield Multiplex to carry out and complete the INS Entrance extension works all as set out in Brookfield Multiplex submission document dated 24th October 2014 titled "Response to Project Managers Instruction 308 INS Entrance Works" and for the agreed target price adjustment of £3,826,354.00.  These works will be classified as Stage 4 of the contract signed 18th December 2009 , and subject to specific contractual terms additions / amendments:- Data Part Contract 1 – Data Provided by the Employer <ul style="list-style-type: none"> <li>Clause 3 Time: Access Date Start on Site – Stage 4: 19th January 2015.</li> <li>Optional Statements Employer risks – Appendix E Board risks remain, with exception of weather where base date for assessment of employer risks will the date of this Compensation Event, and ground conditions where all available additional information obtained since contract award 18th December 2009 has been considered</li> <li>Optional Clause X5: Completion Date - 58 calendar weeks from start date</li> </ul> It was noted that JDPierce had been lined up for later in the week and a call had been put into to get the reps on site from 24/11/2014. Gillon is the BMCL point of contact for these works. BMCL sought confirmation of the NHS point of contact. GW advised that he had issued an updated cashflow to GF on 19/11/2014	26/11/2014

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013) DP suggested that the way forward/proposals will be agreed asap (20/03/2014) DP advised that he had a schedule and series of meetings organised to discuss the HV with Wallace Whittle and key stakeholders (27/03/2014). WIP (17/0/2014) DP advised that WW on site yesterday. There is a new HV rep getting involved – new rep had been provided with a tour of the site and discussions are being progressed. (24/04/2014) DP advised this is WIP/Ongoing. (01/05/2014) DP advised that good progress was being achieved and suggested that matter would be concluded by mid June 2014. (29/05/2014). Work on going to conclude by end of June 2015. (12/06/2014). BMCE have now completed review and will prepare a report for review by Board and Wallace Whittle in July, with sign off by month end. Solution may require two isolated areas of pipe being wrapped in fire blanket. WIP (26.09.2014) DP advised that this was WIP and that it will be a couple of weeks before the report is concluded. Confirmed that a separate compartment will not be required. Gillon has asked for a cost for blankets (03/07/2014) DP advised that report on target to be issued to the NHS by 24/07/2014. (10/07/2014) DP advised this is nearing conclusion and he was awaiting a response to a couple of queries he had (24/07/2014) DP advised that he was pushing this matter on and the report was expected imminently (31/07/2014) DP to be requested to provide update re progress to conclude matter asap (28/08/2014) JB advised that the report has been issued in draft format so that the NHS can ask JBushfield to review. DH to provide the report to JBushfield. (11/09/2014) DH advised that report had been provided to JBushfield and JBushfield has been asked to provide the fee for the works so can progress. (25/09/2014) DP noted this matter is WIP (2/10/2014) DR noted this was WIP. DR advised that he had received a fee for the JB review and this had been passed to DH for checking and discussion with JB (09/10/2014) Wallace Whittle to complete review, week commencing 03 November and this item can be CLOSED 23/10/2014 DH advised that he was expecting a response from JB on 3<sup>rd</sup> November 2014. (30/10/2014) DH advised that he would chase up JBushfield (13/10/2014) **DH advised that JBushfield has reviewed the document and indicated that he is generally satisfied with the document. He has requested to walk 1 area and will be onsite later that day to review, thereafter he will conclude and submit his report. (20/11/2014)**
- Review of offices removal – AFe advised that he needs a note of the dates and accommodation requirements for each party who remain to be on-site. AFe suggested that the cabins are moved after the 26<sup>th</sup> January 2015. PM noted that the children's park needs to be substantially complete for the official opening of hospitals at tail end of 2015. AFe noted that he has a stage 3a programme. AFe highlighted some options which was being considered and agreed to provide some scenarios/options to the NHS. AFe noted that he agreed to work backwards from the date of the Royal visit. PM suggested that AFe organize a meeting to discuss options. AFe suggested that it would be useful to get a plan for the Management Building. (03/07/2014) PM advised that phase 3a draft programme had been provided. PM suspected that the NHS will be expected to be out of the offices by end January 2015. The NHS will further develop a plan for post 26<sup>th</sup> January 2015. (10/07/2014) Discussion scheduled to take place on 25/07/2014 (24/07/2014) PM noted that he would discuss the Management Offices with GL. AFe advised that he had discussed the car parking with DL. The NHS will be issued with the same no. of permits as are provided in the existing car park. Non-permit holders will be able to park in the non-permit holders area within the MSCP. It is proposed to commence using the MSCP in September and stop using the MSCP in March/April 2015. AFe advised that BMCL are proposing keeping some cabins on site until May and BMCL are identifying storage areas in the building. (31/07/2014) PM noted this item is WIP (14/08/2014) PM advised that he will prepare a plan on return from his annual leave (21/08/2014) PM advised that he would progress this matter over the next few weeks. AFe suggested that BMCL would be looking for circa 100 places. PM noted that would discuss the programme of moves of site with AFe. AFe advised that he was of the view to move out of the offices Feb/March however they could perhaps be retained until April/May. (11/09/2014) PM advised he will be progressing next week. Confirmed that can't return management building as a base for site staff. It was noted that it appears when demolishing the corridor at the CMB building that impacts on Management Building Services. Will identify area for BMCL to put cabins. DR noted that BMCL did not have cabins in cost plan post January 2015. PM suggested that this is an EW for the Project. GW advised that there needed to be a discussion re what the BMCL care management team are expected to do as it is BMCL's expectation that the NHS do not have the staff to operate the building immediately after handover for a period of time. (25/09/2014) PM advised that he had received feedback which indicated that there would be a cost of circa £150k to reinstate services to the Management Building as services linked to buildings that are being demolished. PM enquired if there was potential for these costs to be offset against the cost of BMCL moving the cabins. GW suggested that he anticipated that BMCL would be able to contribute. PM agreed to progress proposals asap. (02/10/2014) AFe advised it would be good to have a quick meeting after the school holidays to discuss thoughts. PM agreed to progress proposals (09/10/2014) Date to be slotted into the diary for next week to discuss 23/10/2014 Meeting organized on 31/10/2014 to discuss (30/10/2014) **PM advised that the CMB was under consideration and requested that AFe confirm the number of BMCL which**

require to be accommodated. AFe confirmed that the preference was for BMCL to be on the ground floor. Afe suggested that the office block could remain on site until May – cabins to be removed June. PM suggested that the NHS floor would be closed in February (13/10/2014)

- VIE – change to Air Products requirements – GW to raise EW (03/09/2014) GW advised that BMCL were pulling together a report of what happened and when. BMCL always understood they would have to extend the slab but never agreed to build a new longer and thicker slab for the VIE. DH advised that the NHS have a proposal to be discussed (i.e. doubling up the tanks instead of purchasing a new larger tank). Discussion to be had with DP, DH, and IS to check if there are any technical issues with this proposal i.e. manifolding the tanks together. GW noted that the bigger slab requires a new piled solution not an extension to the slab. GW noted that there were implications to the programme should a piled foundation be required. (04/09/2014) DP noted that he had asked WSP to commence survey works and identify ground conditions. DH noted that there are 2 potential impacts = cost and time. It was noted that there is an alternative proposal with the AE for review and was provided to Air Products. DP suggested that ISandford should be asked to take the proposal to Air Products. DH agreed to liaise with ISandford. (11/09/2014) It was noted that BM are in discussion with Air Products (25/09/2014) DP advised that he had received a drawing back from Air Products but it was not what was expected/wanted. DP noted the drawing was positive in that it showed a twin set-up however what shown required a bigger slab therefore further dialogue with Air Products would take place. AB would be asked to show the target dates on the BMCL programme (02/10/2014) DP advised that he was setting up a meeting with Air Products, I Sandford, I Powrie, NHS and BMCL. GW advised that in the meantime BMCL have instructed WSP to do survey works. (09/10/2014) Further meeting next Tuesday there will require a 1 day down time to transfer over EW may be required but this will be decided after meeting 23/10/2014. Noted that Air Products are to provide information re revised base so WSP can design slab/base. BMCL will need to divert Oxygen main in that area. GW enquired what BMCL should do about the costs incurred as the slab is now a lot bigger than what was agreed. AFe suggested that BMCL should firstly ascertain if a piling solution will be required. DH noted that this is a timing issue re patient safety. (30/10/2014) GW advised that he would raise an EW as these works will fall outwith the completion period. DP advised that he had received the drawing and would issue this to the NHS for review. GW agreed to raise an EW regarding this matter. (19/11/2014) **DS noted that the SI had been completed. Once the SI report has been received then the design of the slab will be commenced. (20/11/2014)**
- Hatches in Radiology - AFe noted that a PMI will be required - AFe agreed to write up and forward to the NHS 23/10/2014. DH advised that he had discussed this and it was thought that a PMI is not necessary (30/10/2014) GW to provide information to DH as DH had suggested that there has been a significant increase to the cost for the 3 small hatches. (13/11/2014) **DH advised that he had the information re cost for changes and would discuss these with FW and confirm the NHS requirements asap thereafter (20/11/2014)**
- Pharmacy Roller Shutter - changes required? 23/10/2014 DP advised that he is awaiting info from FW re change to be made (30/10/2014) DH noted that there was an omission to the small shutter to the vending in AAU. PM agreed to review on site and confirm way forward to BMCL (13/11/2014) **It was noted that it had been previously agreed that the shutter should be left in place. It was agreed that the NHS would review this on site to check that this will not foul with the vending machines.(20/11/14)**
- Medical gas panel – DH advised there was an issue re HPI and compliance. DP noted that BMCL were trying to get the panels in smaller batches onto site earlier (30/10/2014) DP advised that the 1<sup>st</sup> panel is due to be on site on 14<sup>th</sup> November 2014. DP would organize for ISandford to confirm that he is ok with the set-up. Confirmation of panel demonstration is awaited (13/11/2014) **AF noted that the panel hadn't arrived however DP was progressing the delivery of the panel (20/11/2014)**
- Swisslog – DH noted that the NHS needed confirmation of what is included in the Swisslog Maintenance contract and GW agreed to investigate (20/11/2014)
- VIE/Turning circle – it was noted that the NHS Had thought that BMCL were going to speak to WSP re how they had done the swept path analysis – it was established on site that there was an issue with a manhole cover which meant that the lorry delivering to the VIE could not use this area. The man-hole cover has now been replaced and the lorry driver is to come back and check he is now ok to use the full area. (20/11/2014)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1102

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 03/12/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23504	BMCE-EWN-000149	AGV Lift Segregation	21/011/2014  27/11/2014	<p>Following the recent Swisslog AGV TCMS2 software simulation, we have been advised by Swisslog the current Clean &amp; Dirty lift segregation is detrimentally affecting their delivery systems and matrix times. Therefore, currently as the project stands, the AGV system is non-compliant with NHS ER's.</p> <p>Swisslog propose remove AGV Clean &amp; Dirty lift segregation to allowing all AGV's to use any AGV lift. NHS Infection Control Procedures for AGV Lifts Core C, D, F, H &amp; K to be reviewed.</p> <p>GW advised that the way forward had been agreed between KConnelly and CGrindlay. DH advised that essentially are not separating the clean and dirty or the vertical – PMI to be provided to BMCL to confirm acceptance of change from ERs.</p>	
		VIE		To be raised (see notes section for further information)	
		Link Bridge at Neuro and impact on INS Entrance		<p>To be raised.</p> <p>Advised that INS Entrance start date is at threat. BMCL are concerned at starting the works at this stage and due to the closeness of the Xmas shut down period that a hole needs to be left in the building over the festive period. BMCL are now struggling to get the structural steel company on site as there are now focused on completing other existing works.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 03/12/2014

<div>  </div>					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
22802	NHS EW 053	Curtain Tracks	26/09/2014  09/10/2014 24/10/2014	<p>The Board have identified with their curtain supplier that the track arrangement, as installed, in critical care and resus areas where bays are divided by half height walls is not practical and results in lack of privacy for patients.</p> <p>Additionally the Board notes that tracks generally have been installed at varying heights which represents operational difficulties. In accordance with the standard fixing details (NA-XX-XX-SC-400-001) these should be installed at a consistent height of 2100mm.</p> <p>PM advised that he would discuss this internally and report back.</p> <p>A site visit with IHamilton is arranged with DH for the coming week with regards to the gap noted between two curtains when pulled fully closed - sub-contractor will be asked to review and amend the track if required.</p>	

A51679245

			30/10/2014	DH advised that he had undertaken a site visit with IHamilton and a solution to conclude the matter in A&E and CC resus bays had been identified. DH would provide information to BMCL re variance in curtain track heights at half wall.	
			13/11/2014	DH and AFe had previously discussed this item and it had been agreed that IHamilton is going to arrange a sample for NHS review.	
			20/11/2014	AF noted that the sample is awaited and the NHS will be advised asap when the sample is available – will be a shortened sample.	
			27/11/2014	DH advised that he had seen a sample and was content with the sample however would want a certain piece cut out (middle leg to support). FMcCluskey had also been asked to review the sample. DH would provide an instruction later that day.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 26/11/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2721	PMI 297	NEUROSURGICAL BUILDING OVERCLAD PROJECT	04/07/2014	RIBA Stage 2 Feasibility Study to overclad the Neurosurgical Building at Southern General Hospital.  Proceed with Feasibility Study and complete by 1st August 2014 all as per narrative.	
			10/07/2014	PM advised that he was awaiting cost for the feasibility study.	
			24/07/2014	PM agreed to look out the Neuro building drawings. WSP to advise what surveys are required.	
			31/07/2014	DP raised concern that he did not think that the natural ventilation scheme in the building matched like for like re new windows. PM suggested that someone needs to check that the overclad solution has the same number of windows. DH noted that if rainscreen type being installed then this would make the building more airtight.	
			14/08/2014	GW noted that costing was work in progress. PM advised that he had agreed the extent of the cladding with the architect. AFe agreed to progress this item.	
			21/08/2014	AFe noted this is WIP. AFe and GW were meeting with DL on Friday to discuss the high level cost plans. GW noted that D&B would be providing cost information on 22/08/2014. GW noted that BMCL will look at the costs. AFe suggests a longer programme of works i.e 35 weeks rather than 26 weeks.	
			28/08/2014	It was noted that the price and the programme were to be provided to the NHS on 29/08/2014	
			11/09/2014	DL advised that he was becoming concerned about information being received by the NHS. GW advised that BMCL have provided the information and that the costs for the prelims and joint. The cost information was with DR for review. The anticipated programme for the works was 37 weeks however there was a lot of liaison to take place to agree the start date as BMCL have concern about the NHS decant/phasing.	

A51679245

			<p>25/09/2014</p> <p>02/10/2014</p> <p>09/10/2014</p> <p>23/10/2014</p>	<p>Concern was raised that there are suggestions that the over-cladding may make the building overheat i.e. better insulated – u value will increase. AFe advised that BMCL have looked at top and bottom hung windows. DH suggested that the perimeter rooms will be impacted i.e. less leakage. DL enquired if this can be computer modeled. DH suggested that the building doesn't work at the moment as windows will have had window restrictors retrofitted at some point. AFe noted that the concern was that the overcladding may make a warm building even warmer. DL suggested that GForsyth should contact the University for information on the summer system recently installed to the Library. PM suggested that a mock-up of a room/window should be carried out. AFe suggested that it will be the new year before suppliers are on board.</p> <p>DR advised that he needed to go through and agree what everyone is signing up to. GW enquired who would be carrying out the thermal analysis noting that JBushfield had been asked to identify the works and provide an indication of the cost however DP has suggested that the cost appears to be too cheap so may not have everything in the scope of works. It was noted that D&amp;B Façade have provided comments. DS noted that he understood that cladding was to improve the aesthetics and BMCL could look at providing a good quality rain screen façade. PM noted that the previous Nimmo design had a cavity which allowed air to pass through/up &amp; down. DR enquired if there is potential to put in more opening lights into the glazed screens. PM suggested that discussion re: main entrance and overclad design review could be carried out in the same meeting. PM advised that file had been received from PMcGuinness. The NHS are still awaiting feedback from BMCL re the options for panels. PM would discuss with DL later that day. The focus will be on carrying out the front entrance works. AF acknowledged that the proposal has thermal issues and BMCL should have highlighted all the risks. BMCL were in the process of identifying a panel carrier system which can be retrofitted. AFe advised that the programme to achieve a finished clad building in time for the royal opening is difficult noting that the timescale for the works is indicated as circa 36 weeks. PM noted that the NHS would be unable to signoff the proposals until the Planning permission is granted.</p> <p>AFe advised that BMCL had met with CladUK who had subsequently provided an indicative price based on a standard panel. CladUK advised that the standard panel they use does not provide thermal gain as it is a vented system (top and bottom) however a formal response is awaited. BMCL anticipate obtaining a firmed up price for the works after the school holiday period. Once BMCL ensure that the price is in the NHS cost range then will apply for planning permission. DR requested that BMCL provide a programme for the cladding works in order that the NHS can identify and plan for when areas/offices, etc need to be vacated. AFe proposed that BMCL would mark-up a drawing to show the corridor works and ward/clinical area works noting that the corridor works will be quicker to do. It was noted that BMCL are seeking a fixed price for the works from CladUK. AFe noted that the cladding and window works sit separately. DR noted that it would be helpful if BMCL could reduce the price as the current price was close to the NHS budget for the works and this would assist to achieve approval of the INS Entrance works fundng.</p> <p>A sample board of the cladding to be provided to show options. AFe noted that the cost was not hugely different. A review of the risks required for window replacement activities. The area of elevation for the ICE building abutment now removed from the costs and repricing is completed. It was agreed that BMCE and NHS to meet next week to review. The next stage once agreed is to engage planning and project a start on site date - anticipated to be around March 2015. Design and warrants plus SER take around 12-14 weeks but BMCE will push to shorten this time.</p>	
--	--	--	---	--	--

			30/10/2014	Cashflow - progress design up to Christmas and place order for all materials in order to maximize spend within current financial year.	
			13/11/2014	GW noted that a further conversation with Clad UK had taken place and proposal repriced on the basis of these discussions. BMCL would be discussing with D&B Facades in due course. GW enquired about the drop dead date for NHS approval and DR confirmed that BMCL were to progress Planning as Planning is the driver for approval as is being dealt with through the Board's Capital Plan.	
			20/11/2014	DS advised that he had made a couple of enquiries which had identified that a) the building could be overclad without insulating, b) building too hot as is so insulating c) Building Standards Division advised that should insulate, d) Building Control indicated that they could only decide on basis of application. DS was due to meet with RBarlow on 19/11 and he would raise the subject with RBarlow at this meeting. DS noted that if there is no requirement to insulate then the way forward was known. If the building did need to be insulated then the NHS would need to deal with the cooling of the building. DS suggested that it would be beneficial if a survey of the building environmental was undertaken. AFe advised that he was getting the drawings updated for review by the NHS. DL noted that it was disappointing that only now being advised of the Building Regulations and that the cost of the overclad project was getting close to being above the NHS financial envelope. If the NHS require to do anything re infrastructure to the building then the project may not go ahead. DL enquired if there was any opportunity to get the project through as the windows will improve the heat loss. PM advised that Glasgow University had just overclad a building without needing to insulate it. AFe advised that it was D&B Facades who had only recently suggested that insulation may be required. DL noted that it was only to be an aesthetic treatment to the building. DH suggested that the NHS have to achieve the cashflow. AFe noted that the cost provided to the NHS is for an insulated building. DR agreed to contact Glasgow University for information about their recent overclad project. PM agreed to contact DNimmo to advise that BMCL will be contacting him. DR advised that JMurray had previously been provided with a copy of the feasibility study. DL advised that Robert Kilpatrick was the engineer and may be a good point of contact. DR noted that DNimmo may be the best person to speak to.	
			27/11/2014	PM advised that he had emailed RKilpatrick the previous week. DS noted that Building Control have advised that the panels do not need to be insulated. DL noted that the way forward re the cavity barrier would need to be agreed. It was noted that BMCL need to provide the programme as the NHS have cashflow to achieve. DS noted that there had been a previous discussion regarding the vesting of materials. AF agreed to provide the programme asap. DL enquired whether a staged warrant was required and DS advised that the overclad is a single application and the entrance works is in 6 stages. AF noted that BMCL were checking for any savings which could be obtained as insulated panel now required.	
				AFe advised that revised prices had been received from CladUK and that D&B Facades would provide prices (excluding the insulation) later that day. BMCL were proposing to instruct the contract based on the previous proposals. PM advised that the NHS required drawings and a confirmed price based on insulated panels so can sign-off the proposals whilst awaiting formal confirmation from BMCL that they will accept the use of non-insulated panels. GW advised that PHeath is awaiting a price from D&B Facades for the non-insulated panel. It was noted that there had been an agreement to overpaint some of the panels at the rear of the building. PM advised that he would want to be able to close this item out by cop 28/11/2014.	

3040	PMI 309	Langlands Drive Bus Lay- by Service Diversions	<p>16/10/2014</p> <p>23/10/2014</p> <p>30/10/2014</p> <p>13/11/2014</p> <p>20/11/2014</p> <p>27/11/2014</p>	<p>Please undertake diversionary works to existing services as described below. Please liaise with Hugh McDermont to agree extend of works. All as discussed Paul McGuinness / Hugh McDermont. SGN Gas Main - BMCE to contact SGN and agree works to cap pipe at a position at nearest point west of tee off to PDRU building. SGN to confirm main does not serve any buildings down line from this point, pipe appears to be capped at Langlands Building LPG tanks. Once pipe capped, BMCE to vent pipe and remove from area of works.</p> <p>Water main - excavate and expose main to confirm depth, if not sufficient for pavement, or cannot be accommodated in pavement design then lower, if cannot be lowered then divert.</p> <p>IT/Comms Ducts - expose ducts to confirm depth, if insufficient or cannot be protected by concrete slab, lower ducts and 2 No. pits.</p> <p>All above to be inspected on site once opened up, Hugh McDermont to view on behalf of NHS and agree extend of works.</p> <p>PMI has now been forwarded - some work to be concluded with SGN and Scottish Water before the programme can be concluded.</p> <p>DP advised that he had contacted Scottish Water and Scottish Gas Networks and asked them to confirm their services noting that SW and SGN will obviously work to their own programme to carry out these works however DP would continue to review and push to get the works carried out.</p> <p>DP advised that SGN were due on site later that day to inspect the pipe and advise on any work required. DP noted that the water pipe was an NHS pipe so is easier to deal with.</p> <p>DS noted that DP has advised that the SGN gas pipe is ok. The tree removal is expected to commence 1<sup>st</sup> week December 2014. GW enquired if BMCL had an agreed scope of works re services i.e. water pipe. GW noted that it had previously been agreed that BMCL would have a walkround with Hugh McDermont to agree the scope of works. PM advised that once the pipe is exposed then there would be a site visit to agree the way forward.</p> <p><b>AFe noted that the trees would be coming down on Monday and BMCL would then create a path round the back. Thereafter the excavation would be undertaken. SGN rep have advised that there may be another gas pipe but this will not be known until excavate. PMcG is meeting with AFe later that day to discuss public/pedestrian separation.</b></p>	
3061	PMI 310	ADAPTATIONS TO BUILDING SERVICES FOR IMAGING EQUIPMENT INSTALL	<p>27/10/2014</p>	<p>Please proceed with the attached amendments to services/equipment as per the attached schedule. Costs for same to be incorporated in the Group1 equipment list.</p> <p>The Board request that alterations to 13no. General X-Ray rooms, as listed on the attached schedule, are undertaken to facilitate the installation of Samsung Digital X-Ray equipment by MIS Ltd. The alterations are limited to:</p> <ul style="list-style-type: none"> <li>- removal of temporary/permanent containment at desk locations</li> <li>- relocation of sprinkler heads</li> <li>- removal of RAC1020 pigeon hole units</li> <li>- relocation of wireless access points</li> <li>- removal of emergency stop buttons in 3 locations</li> <li>- Relocation of nurse call/reset panel in 2 locations</li> <li>- Relocation of lead apron rack.</li> </ul>	

			13/11/2014	Works to include, where necessary, making good of lead lining and finishes. DH noted that the works are ongoing. DH was being advised that the works are not being carried out quick enough. DP noted that resources are being diverted to carry out the adaptations when it was possible to do so as BMCL were ensuring no impact to other works.	
			20/11/2014	DH noted that the majority of works have been carried out. GW advised that he would provide the cost info asap.	
			27/11/2014	DH noted that the alterations are work in progress. Costs are needed asap. GW reported that Mercury have advised that they will provide the costs later that day.
