26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015 17/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 23/09/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015 23/4/2015 30/04/2015 07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12th June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainbond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed</p>	

A51679245

			<p>therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>11/06/2015 FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>25/06/2015 FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>23/07/2015 FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.</p> <p>30/07/2015 FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p> <p>06/08/2015 FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11<sup>th</sup> and 4<sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>13/08/2015 PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>27/08/2015 GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>17/09/2015 GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
--	--	--	--	--

25494	NHS EW 059	ADULT HOSPITAL - VECTOR FOILTEC BURN OFF SYSTEM	04/06/2015	The Board record their great concern on the discovery that faults have been found in the VF ETFE roofing burn off mechanism. The Board require to be provided with a report on the current situation, cause of the fault, and interim contingency plan to mitigate the risk and a plan and programme for remedial works to bring the system into full operation. This information is required no later than 4pm Weds 10th June 2015, certainly for interim position and timescale to remedy, fault finding may take somewhat longer.
			11/06/2015	DW advised that some cables had been taken off and sent to an independent tester in Germany. The remedial works will take circa 2 weeks. Confirmation is awaited for when the cables will be back on site. Sheila is progressing and can provide explanation to PM. GB advised that BMCL had liaised with KHamill who has produced a report – GB noted that the points KH raised are minimal with the exception of the cafe which is his main concern. The only ignition spark point is the vending machine(s) at OPD which sit beneath the balcony and it is suggested that these could either be switched off or repositioned. DW advised that Sheila had issued the report. DW noted that there is a button on the BMS to open the vents and BMCL are going to tie this into the fire alarm. DW suggested that it would be mid July before the remedial works would be complete however BMCL were pushing to get this programme bettered. DW was asking that the company phase the provision of the materials. DH suggested that it may be beneficial to share the report with Strathclyde Fire & Rescue.
			25/06/2015	FS advised that the operatives are currently working on the wiring – it had been suggested it would take 1 day for each wire. Effectively there should now be 4 wires done and works should be complete by the end of July. DH enquired if the panel is currently disengaged and FS confirmed that it was disengaged.
			23/07/2015	FS advised that core B remedial works had been completed and works commenced to core D. FS agreed for get an update on the works and provide further feedback. PM enquired about the timescale for completion of the works and DW advised the works would be complete by the end of July.
			30/07/2015	FS noted that the wiring for 13 of the 20 had been completed at the time of the last meeting and that a further 1 may now have also been done. The works are weather dependent so it was thought that the weather would have prevented further progress. W/e 7 <sup>th</sup> August was being targeted for completion of the works. PM requested that BMCL liaise with IP to identify a NHS rep to witness the commissioning/testing.
			06/08/2015	FS advised that all 20 have been rewired and there are currently only 4 junction boxes to be done. BMCL are awaiting on Delta T however essentially all the Vectorfoiltec works would be completed later that day. GW enquired why Delta T was being procured through Mercury and not through Vectorfoiltec. FS agreed to liaise with Vectorfoiltec.
			13/08/2015	GA advised that Delta T engineer is back on site on Monday. Declan (Mercury) will speak to rep regarding a date for the return to site to carry out the connections.
			27/08/2015	GA advised that Delta T are onsite on 31/08 & 01/09 and that will conclude the works to wire the connections. BMCL will ensure that NHS reps witness the final commissioning.
			17/09/2015	DW noted that the works were now complete and that the Vectorfoiltec and Delta T certificates were on Zutec. DW noted that 1 NHS Rep had attended the training session. It was agreed that this item was now closed.

26955	NHS EWN 060	Stage 3 A Demolitions- Water Main-Hydrants	22/09/2015	<p>BMCL previously requested that all building services, including water mains/fire hydrant's within the Stage 3A buildings to be demolished ,areas were to be isolated and capped. The Board complied with this with respect to water mains/hydrant supplies . Diversions ,bypasses and temporary reduced flow supplies for the asbestos removal works have been put in place to allow this to happen at agreed handover dates and this has been done in liaison with the NHS Estates Department to ensure that there is no legionella (dead leg, low circulating) flow risk to the new and retained hospital facilities.</p> <p>BMCL verbally asked for water mains to be reconnected in August 15 and provided the detail of the required hydrants on 16th September 2015. The NHS will progress this request asap and is meeting with NHS Operational Estates to propose a scheme that will allow the hydrants to be reconnected at full flow and used at no contamination risk to the existing hospitals. It is expected that work will require to be undertaken to deliver this.</p> <p>This could delay the handover of the Stage 3A demolitions site and also result in additional expenditure by the Board to enable.</p>

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 23/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a</p>	

A51679245

			<p>07/05/2015 14/05/2015</p> <p>21/05/2015</p> <p>04/06/2015</p> <p>11/06/2015 25/06/2015 06/08/2015</p>	<p>blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs.</p> <p>DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p> <p>SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board</p> <p>DH noted that CG had confirmed that the BMCL retail unit works had been completed.</p> <p>Instruction to be given to BMCL to progress.</p> <p>GW advised that he had rechecked the costs and he thinks that the costs are correct.</p> <p>DW noted that minimal works have been commenced.</p> <p><b>DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).</b></p>	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	<p>18/05/2015</p> <p>21/05/2015 28/05/2015 04/06/2015</p> <p>11/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p>	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM</p>	

			06/08/2015	suggested that this item and PMI 411 should be issued as a single CE.	
			13/08/2015	GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.	
			27/08/2015	GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.	
			17/09/2015	GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited. GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	Please re-configure installed arrangement as follows.  Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC. Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs. Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.	
			25/06/2015	PM advised that he would liaise with JPhillips re doing the works at the weekend.	
			23/07/2015	GW advised that BMCL were preparing pricing.	
			30/07/2015	GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.	
			06/08/2015	GW noted this is WIP.	
			13/08/2015	PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.	
			27/08/2015	GW noted that costs had been uploaded for NHS review.	
			17/09/2015	PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.	
3924	PMI 416	CHILDREN'S HOSPITAL LEVEL 4 - DCFP ROOM 028	15/06/2015	Supply and install power, water and drainage services in this room to allow the Board to install 1 No washing machine and 1 No condensing tumble drier. Works to include; - 2no. 13A Sockets fitted 450mm FFL. - 1no. cold water supply fitted at 300mm FFL - 1no. hot water supply fitted at 300mm FFL - 2no. 50mm dia drainage connections fitted at low level with tundish for tumble dryer and dishwasher connections	

			<p>25/06/2015 23/07/2015 30/07/2015 17/09/2015</p>	<p>- All connections to kit by others (NHS FM). - Sterilisation of CWS &amp; HWS by BMCE. DW advised that the cost had been received from Mercury and BMCL have queried the cost GW advised that costs had been uploaded to sypro for NHS review It was noted that this item is on hold for now <b>It was agreed that this PMI should be cancelled.</b></p>	
3930	PMI 419	ADULT HOSPITAL - STAIR CORES A & B FIRE DOORS (2 sets)	<p>16/06/2015</p> <p>25/06/2015 23/07/2015 30/07/2015 06/08/2015 13/08/2015 27/08/2015 17/09/2015</p>	<p>Please provide a cost for the introduction of hold open stays to the single sets of self closing fire doors in Cores A &amp; B as indicated on the attached sketch. Stays to be linked to the fire alarm system and be wall mounted at door head level. These works are to provide barrier free access for wheelchair users</p> <p>Core A - doorset requires to be repositioned to give cover to open doorset and also allow free access for turning of wheelchairs into lift lobby.</p> <p>Core B - doors can remain in current location, Board will accept minor overlap of doorway to Cleaners Room.</p> <p>The Board are open to alternate solutions that achieve improved barrier free access for unattended wheelchair users.</p> <p>It was agreed that a separate meeting would take place at 9.30am the following day.</p> <p>GB advised that work is in progress to obtain the costs. GW suggested that the cost for this item could be allocated to PMI 328</p> <p>GB advised that cost had been received from TDSL however Mercury cost awaited. It was noted that the costs would be allocated to 328 contingency.</p> <p>GW advised that the costs would be uploaded asap</p> <p>GB advised that TDSL have responded with their cost. LJ has chased up Mercury for their cost</p> <p>GW advised that he will check that BMCL Have received all the cost info. GB suggested that costs had been received from TDSL and Mercury.</p> <p><b>PM noted that he was awaiting cost info. GB suggested that the Mercury costs were being chased up as the TDSL costs had been received. GB agreed to liaise with LJ. PM noted that he would provide a CE once costs reviewed. PM advised that he would be issuing a PMI for similar changes to Core C.</b></p>	Cross ref CE 145 issued 17/09/2015
3948	PMI 422	CHILDREN'S HOSPITAL AUDIOLOGY SUITE - AMENDMENTS TO POWER AND PATCH PANELS	<p>19/06/2015</p>	<p>Amendments to power and patch panels in 4 No audiology rooms. Also supply of blinds between test rooms and lobbies. 2No.</p> <p>Please proceed with works as set out on the attached quotation from Allaway Acoustics, works to include relocation of power and provision of new patch panels and provision of temporary cables.</p> <p>Proceed and install blinds as discussed a meeting 17 June 2015.</p> <p>Works not to include provision of finger guards.</p> <p>23 June 2015 additional works - please also relocate data sockets as per user requirements, change the PIR's to dimmer switches in each lobby. On options for data sockets proceed with the</p>	(cross ref PMI 328)

			<p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p>	<p>second option of using an extension cable to the current RJ45 socket and loop back into trunking and then run into new data outlet in position agreed with users.</p> <p>FS advised that the materials were being dispatched the previous day. The blinds would be fitted on 30<sup>th</sup> June. FS had responded to AIC. PM advised that JHarrigan wants to set-up a video-conference. FS suggested that increased noise is due to increased air volumes and JMiller was going back into review later that day. JM has got H&amp;V back on site. PM enquired if retesting was to be done. FS noted that the BMCL test results show is within limits and BMCL have not altered the balancing.</p> <p>FS advised that the operatives are back on site on 27<sup>th</sup> July 2015. GW advised that the costs had been uploaded on 16/07/2015</p> <p>PM advised that this item is on hold until testing to be undertaken on 03/08/2015 had been concluded</p> <p>PM noted that it was understood that the works are now complete. BMCL to provide cost for data socket/outlet works.</p> <p>GA advised that he had spoken to DG who would liaise with Richard asap – there had been difficulty contacting Richard. Allaway are also considering installing soft close closers.</p> <p>GW advised that the costs had been uploaded for NHS review. GA advised that the soft closers and latches remedial works had been completed earlier that day.</p> <p>Item closed. GA noted that tests had been undertaken the previous night and were being undertaken that day. Thus far the test results were favourable.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>• 10-12 air changes hour</i></li> <li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li> <li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p>	

				<p><i>Please organise an preliminary meeting with design team and Board to establish scope in more detail.</i></p> <p><i>(Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
			23/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
			30/07/2015	<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p>	
			06/08/2015	<p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p>	
			13/08/2015	<p>PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p>	
			27/08/2015	<p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p>	
			17/09/2015	<p>GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.</p>	

4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p>	
			23/07/2015	<p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p>	
			30/07/2015	PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal.	
			06/08/2015	<p>It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p>	
			13/08/2015	GA advised that the installation is due to commence the following week.	
			27/08/2015	<p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p>	
			17/09/2015	<p>GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasure. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged</p>	

			<p>access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p> <p>30/07/2015 GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p> <p>06/08/2015 Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>13/08/2015 GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>27/08/2015 PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p> <p>17/09/2015 PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap.</p>	
4092	PMI 427 -	ROYAL HOSPITAL FOR CHILDREN - IMAGING ROOM RCG-055 BONE DENSITOMETRY	<p>20/07/2015 The Board request that a contactor is supplied and fitted to allow X Ray warning light to be controlled via the equipment operation. However, due to urgent clinical need, until the contactor is available a temporary switching arrangement should be installed. Cost of contactor and interim switching arrangement to allocated to PMI 328.</p> <p>30/07/2015 DH noted that there was a meeting with GE scheduled to take place the following day. DH noted that this item would be charged against the Group 5 costs and not PMI 328.</p> <p>13/08/2015 GA advised that the contractor is due on site w/c 10/08/2015</p> <p>27/08/2015 DW advised that the operative was meant to be currently onsite. The part had been provided to IDM as free issue for them to fit. PM agreed to provide a CE. GW noted that the costs had been uploaded.</p> <p>17/09/2015 Item closed as CE 143 issued</p>	09/09/2015
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	<p>21/07/2015 Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p>	

			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015 17/09/2015	PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood. PM advised that he would approve the drawings asap and agreed to provide the response via Aconex	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	27/07/2015	The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.	
			13/08/2015	Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works. GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.	
			27/08/2015	GW advised that he will get costs asap. GA advised that he would request that TDSL progress the works asap.	
			17/09/2015	Cost to be uploaded	
4174	PMI 430	QEUH HAEMATO ONCOLOGY WARD LEVEL 4 - 24 SINGLE ROOMS PRESSURE GAUGES	27/07/2015	Please establish feasibility of installing digital room pressure gauges in 24No single bedrooms as part of the current adaptations to ward. Gauges to be sourced and installed within current agreed timescale to complete the works. If these gauges cannot be procured then supply and install magnahelic gauges as previously proposed.	Cross ref CE 142
			30/07/2015	Digital gauges to be provided with alarm that sounds once room pressure drops below 5 pascals for 5 minutes, alarm can sound at room or at a central location. DW noted that there is a lot of design work involved in this PMI and DW would provide info re programme impacts the following day.	
			06/08/2015	PM advised that information had been added to the 'notes' section on Sypro.	
			13/08/2015	GW advised that this was currently being priced and PH was chasing this up.	
			27/08/2015	GW advised that the costs had been uploaded and noted that the cost of the actual gauges was expensive.	
			17/09/2015	It was agreed this item can be closed as CE 142 issued	

4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	11/08/2015  27/08/2015  17/09/2015	Please provide proposals and a cost for the following; a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing. b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch. GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained. <b>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</b>	
4357	PMI 433 -	Power supply for Gas Solenoid (Mop Wash)	12/08/2015  27/08/2015	Install a power supply for the Gas Solenoid valve (installed by others) and wire emergency stop button (to be free issued by NHS). Solenoid valve to be interfaced with building fire alarm system. <b>PM advised that he would provide a CE once the costs are known</b>	Cross ref CE 146 issued 17/09/2015
4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015 27/08/2015 17/09/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150 Costs uploaded, cross ref BMCL EWN 0160 <b>PM noted that he would review the cost info uploaded to Sypro. GA noted that it would be beneficial to deal with the BBGE costs asap and deal with any 'delay' matters separately.</b>	
4366	PMI 435 -	Escape Door Set - Core E - level 2 - Swipe Card	13/08/2015  27/08/2015 17/09/2015	This escape door set has been fitted with maglocks but no swipe card operation panel. The Board request a cost to complete the installation with swipe card reader on stairwell side of door and maglock disengage on energisation of full fire alarm. (See attached drawing for specific location) GB advised that he would check the door drawings <b>PM to review costs info uploaded to Sypro and issue CE</b>	Cross ref CE 148 issued 22/09/2015
4455	PMI 436	ADULT HOSPITAL LEVEL 4 WARD B HAEMATO ONCOLOGY - AIR PERMEABILITY TEST	28/08/2015  17/09/2015	Proceed and undertake air permeability tests to 24 rooms and en suites in this ward and provide formal report prior to final handover to Board. Please provide cost for same. <b>PM to issue CE</b>	Cross ref CE 147 issued 17/09/2015
4467	PMI 437 -	Mop wash floor - painting	03/09/2015  17/09/2015	The Board request a price for the painting of the Mop Wash floor as a result of works carried out und PMI 433 (Power Supply for Gas Solenoid Valve and request from Infection Control to have a sealed floor.) <b>DW suggested that the NHS Estates may already have painted the floor and GF agreed to investigate</b>	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE DOORS HOLD OPEN STAYS	17/09/2015	Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels.	

4546	PMI 439	ADULT HOSPITAL - STRUCTURAL TERTIARY BLINDS REPAIRS	17/09/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p>	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015	<p>Please provide a cost to change the names of hospitals on system.</p> <p>Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children.</p>	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015	<p>Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.</p> <p>Please provide product data and costs to install in all rooms within unit where sprinkler system installed.</p>	
4591	PMI 442	Stage 3a / Neurosurgery Works - Principle Designer	23/09/2015	<p>Due to the changes in the CDM Regulations the Board requests Brookfield to undertake the role of Principle Designer as noted with the revised regulations. This role is to be discharged on the works as noted below;</p> <ol style="list-style-type: none"> <li>1. Neurosurgery Entrance</li> <li>2. Neurosurgery Overcladding</li> <li>3. Stage 3A Works (Landscaping, Demolitions)</li> </ol>	For discussion at EW Meeting 24/09/2015

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16612	CE 144	NCH Cath Lab Suite – Laser flaps to doors	28/08/2015	<p>Installation of laser flaps on doors in three theatres by transfer of flaps from the NCH cath lab suite</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT</p>	22/09/2015
16803	CE 145 -	ADULT HOSPITAL CORES A&B LEVELS 0,1 & 2 FIRE DOOR HOLD OPEN STAYS	17/09/2015	<p>Please proceed with works to supply and install hold open stays to fire doors in cores Arran and Bute on levels 0,1 &amp; 2 as set out in PMI 419.</p> <p>Agreed cost [REDACTED] incl. OH+P but excl VAT.</p>	
16805	CE 146	POWER SUPPLY FOR GAS SOLENOID VALVE (MOP WASH)	17/09/2015	<p>The Board confirm that BMCL should proceed and install a power supply to the gas solenoid valve for the Mop Wash area as per PMI 433.</p> <p>Agreed cost [REDACTED] incl OH+P but excl VAT.</p>	22/09/2015

A51679245

16807	CE 147	HAEMATO ONCOLOGY WARD L4B - AIR PERMEABILITY TESTS	17/09/2015	Please proceed and undertaken air permeability test to 24 single rooms as per PMI 436, submit report with test results to Board for review.  Agreed cost [REDACTED]	22/09/2015
16918	CE 148	ADULT HOSPITAL CORE E - LEVEL 2 ESCAPE DOORSET SWIPE CARD ENTRY SYSTEM	22/09/2015	The Board confirm you should proceed and complete installation to maglocks and swipe card reader to the double door set, fully commission and bring into use as per PMI 435.  Agreed cost [REDACTED] incl OH+P but excluding VAT.	
	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	

#### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) **DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the

witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015)

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a model (17/09/2015)
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015)
- Structural Blinds – BMCL to raise an EW regarding this. Discussed under NHS EW 057 (06/08/2015) PM to provide a PMI (17/09/2015)
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the

locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015)**

- Access & Maintenance Strategy for A&C – GB advised that this RDD doc needed to be returned as it was very overdue. GF advised that he had spoken to DH the previous week and that he would follow up the discussion (13/08/2015) GF agreed to liaise with DH re review and return of documents (27/08/2015) **GF noted that DHall had advised that he would have the review of the Access & Maintenance Strategy for A&C completed by 18/09/2015 ( 17/09/2015)**
- Overcladding works – GF noted that window film may need to be applied to windows at INS to allow patient dignity to be retained during the works. GF to draft a PMI for issue (27/08/2015) **GA advised that D&B had painted a protective coating onto the glass and requested that the NHS confirm that they are happy with the coating applied (privacy). If the NHS are ok with this coating then there will be no need for a PMI as this coating has been applied as part of the D&B Safety & Control measures. (17/09/2015)**
- PMI 423 - CHILDRENS HOSPITAL – MEDICINEMA. GW noted that this had been closed and removed from the tracker however GW had costs associated with this item. PM advised that as they doors had never been commissioned that there were no costs attributable to the NHS (27/08/2015)
- Vestibular Hook – GA advised that a walkround with DH had been carried out and it had been suggested that a PMI would be issued to BMCL for the reinstatement of the hoist, goal posts, etc. (17/09/2015)
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1697

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 23/09/2015:

<div style="text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time. <b>GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p>	

				<p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
			21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
			28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
			04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
			11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
			25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p>	
			30/07/2015	<p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p>	
			05/08/2015	<p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p>	
			13/08/2015	<p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p>	
			27/08/2015	<p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p>	

			17/09/2015 24/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion. GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	22/07/2015      23/07/2015   30/07/2015 05/08/2015   13/08/2015 27/08/2015  17/09/2015	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings . PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3<sup>rd</sup>. PM noted that this item would not be able to be sorted in the next couple of weeks.</p> <p>PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26<sup>th</sup> January is</p>	

			24/09/2015	<p>not a line in the sand as at 26<sup>th</sup> January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26<sup>th</sup> January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3<sup>rd</sup> for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.</p> <p>GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p> <p>GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.</p> <p>GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].</p>	
26745	BMCL-EWN-161	HV connection	<p>07/09/2015</p> <p>17/09/2015</p>	<p>We have been trying for the last 2 weeks to arrange for the termination of the temporary HV connections to our old welfare area.</p> <p>The NHS HV appointed person we have been told to liaise with is Paul McAllister who is on night shift and will not be available until next Friday.</p> <p>Without the HV termination Land Engineering will be prevented from completing the SUDS tank below the Children's Park.</p> <p>As per their current programme we needed the isolation by Friday (04-09-15) which was not achieved. Although this will not stop all the works in the area it will prevent the SUDS completion as planned.</p> <p>We require an alternative appointed person who can deal with this as a matter of urgency.</p> <p>GA noted that there had been a meeting to discuss held the previous day and the isolations and disconnections had now been scheduled to take place on 30<sup>th</sup> September 2015. There is potentially time</p>	

			24/09/2015	<p>delay costs.</p> <p>GA noted that arrangements had been put in place and that the termination of the temp HV connections were to be removed by the 30/09/2015. GF noted that plans were still on programme for 30/09/2015.</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA noted that soft ground conditions had delayed the works i.e. it had taken over 1 week to do 4 piles and there had also been a failed test which meant that the test crew had to remobilised. The retest had confirmed that there was no issue with the pile and the test equipment had been faulty. GA noted that the programme had been rescheduled and re-issued.</p> <p>DH noted the comment made at the previous meeting regarding the soft ground conditions and enquired if the ground conditions could not have been anticipated as were different from elsewhere and GA confirmed that the ground conditions could not have been anticipated.</p>	
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>DH noted that BMCL knew about the slab and GA acknowledged that whilst the slab was known the extent/scope of the slab was not known.</p>	
26766	BMCL-EWN-164	Delay in Asbestos removal	<p>10/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would</p>	

				organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8 <sup>th</sup> October) that the demolitions could at least start on the 8 <sup>th</sup> October and GA agreed to review and confirm back.	
--	--	--	--	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 23/09/2015

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by	

A51679245

			23/07/2015	10 <sup>th</sup> June. The replacement panels for remediation were currently awaited. FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
			30/07/2015	FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
26955	NHS EWN 060	Stage 3 A Demolitions- Water Main-Hydrants	22/09/2015	BMCL previously requested that all building services, including water mains/fire hydrant's within the Stage 3A buildings to be demolished ,areas were to be isolated and capped. The Board complied with this with respect to water mains/hydrant supplies . Diversions ,bypasses and temporary reduced flow supplies for the asbestos removal works have been put in place to allow this to happen at agreed handover dates and this has been done in liaison with the NHS Estates Department to ensure that there is no legionella (dead leg, low circulating) flow risk to the new and retained hospital facilities.  BMCL verbally asked for water mains to be reconnected in August 15 and provided the detail of the required hydrants on 16th September 2015. The NHS will progress this request asap and is meeting with NHS Operational Estates to propose a scheme that will allow the hydrants to be reconnected at full flow	

			24/09/2015	<p>and used at no contamination risk to the existing hospitals. It is expected that work will require to be undertaken to deliver this.</p> <p>This could delay the handover of the Stage 3A demolitions site and also result in additional expenditure by the Board to enable.</p> <p><b>It was agreed that this EW could be closed. BMCL can work without the hydrants being reconnected.</b></p>

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 23/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3387	PMI 343	NSGH Basement – Estates Workshop Fit Out	16/02/2015 19/02.2015 26/02/2015 05/03/2015 12/03/2015 19/03/2015 26/03/2015 02/04/2015 22/04/2015 30/04/2015 07/05/2015 14/05/2015	<p>Please provide cost for fit out of shell space FMB-003 for the use of an estates workshop. Board have confirmed they wish to proceed with design and costing work even if the works cannot be completed before 31<sup>st</sup> March 2015, BMCE to take forward.</p> <p>GW advised that BMCL are awaiting fees from Wallace Whittle but it is understood that responses to RFIs are outstanding in order to proceed. BMCL have been engaging with suppliers however 31<sup>st</sup> March completion date is doubtful.</p> <p>GW advised that cost info had been uploaded on 04/03/2015. PM enquired if the design work had commenced. GW advised that the design work had not commenced as yet as BMCL are awaiting an instruction. PM agreed to discuss with IP.</p> <p>DH advised that GB is to apply for a warrant. DP noted that the number of air changes has been increased.</p> <p>DP advised that the design had been received. BMCL have put queries to WW and information is expected back early w/c 23/03/2015</p> <p>DP advised that the design is due to be provided imminently.</p> <p>DP advised that done drawings, tied into 1, same as stores as sits in same area. GW advised that he had received the fee from Nightingale and would pass to the NHS asap.</p> <p>PM and DL to discuss/agree the way forward asap.</p> <p>PM advised that information is with IP. DW advised that there is a link between the ventilation for this item and the retail units and if do not go ahead with would need to check what can be done re ventilation. PM enquired if a blanking plate could be put on and DW advised that a blanking plate could be put on and BMCL would review what could be done. PM advised that this item would not be concluded quickly.</p> <p>PM advised that the information is with IP for review.</p> <p>DH noted that the basement workshop costs contained all the general works for the retail fit-outs. DW noted that the design was linked together and he hadn't realised that the cost had all been placed against this item. DH noted that the costs needed to be attributed appropriately.</p>	24/09/2015

A51679245

			21/05/2015	SF to organise meeting. PM suggested that misinformation about the vent system had been received. DW suggested that a blanking plate could be used – would use a spigot. GW advised that the allocation of costs was now understood. GW is awaiting a further discussion with DR re value for money for the Board	
			04/06/2015	DH noted that CG had confirmed that the BMCL retail unit works had been completed. Instruction to be given to BMCL to progress.	
			11/06/2015	GW advised that he had rechecked the costs and he thinks that the costs are correct.	
			25/06/2015	DW noted that minimal works have been commenced.	
			06/08/2015	DL advised that he would discuss the way forward with PM and thereafter confirm way forward to BMCL (next week).	
			24/09/2015	PM advised that this PMI could be closed as the item was not being further progressed at this time.	
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.  At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.	
			21/05/2015	It was agreed that BMCL will liaise with Siemens	
			28/05/2015	FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.	
			04/06/2015	FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.	
			11/06/2015	GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.	
			25/06/2015	PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.	
			23/07/2015	FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.	
			30/07/2015	PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.	
			06/08/2015	GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should	

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015</p> <p>25/06/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>GW advised that BMCL were preparing pricing.</p> <p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>GW noted this is WIP.</p> <p>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>GW noted that costs had been uploaded for NHS review.</p> <p>PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.</p> <p>PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p>	

Page 1708

			<p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"><li>• 10-12 air changes hour</li><li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li><li>• Propose solution to seal ceilings with current grid arrangement.</li><li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li></ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
	23/07/2015		<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
	30/07/2015		<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p>	
	06/08/2015		<p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their</p>	

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p>	<p>drawing sign-offs. DL suggested that a separate commercial discussion would be required. PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p> <p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p> <p>GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p> <p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>GA advised that the installation is due to commence the following week.</p> <p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been</p>	

			17/09/2015	complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED]. GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.	
			24/09/2015	PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.  Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUIH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.  Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column enclosure. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.  3D image to be prepared of design for approval.	
			30/07/2015	Refer attached sketch.	
			06/08/2015	GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.	
			13/08/2015	Consideration being given to options for infill panels. Positioning of bike stands under consideration.	
			27/08/2015	GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.	
			17/09/2015	PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.	
			24/09/2015	PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap. PM advised that he had received drawings (re screens) and had circulated to DL, etc. GB noted that the Sheffield Stand drawings would be provided asap. PM advised that he would issue a CE for the Sheffield Stands as soon as the drawings are provided to him.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.  The names for the new hospitals are;  The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow	

			<p>23/07/2015 30/07/2015 06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015 17/09/2015</p> <p>24/09/2015</p>	<p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p> <p>PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p>	
4173	PMI 429	QEUH LEVEL 4 WARD B - ROOM HOW 039 HAND DOOR SWING	<p>27/07/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>The Board request a cost to have the door changed from a right hand opening to a left hand opening with an integrated hold open device linked to the fire system. Also remove or disengage the digital lock. Confirm that existing door should be re-used with some cosmetic work required.</p> <p>Note this work to be priced and subject to approval completed within the timetable for the ward upgrade works.</p> <p>GW advised that PH is reviewing the costs. GA advised that TDSL are on site at the moment and it would be helpful if they could undertake these works while they are currently on site.</p> <p>GW advised that he will get costs asap. GA advised that he would request that TDSL progress the works asap.</p> <p>Cost to be uploaded</p> <p>PM noted that the CE had been issued and costs to be agreed.</p>	Cross ref CE 150
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p> <p>GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.</p> <p>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</p> <p>GA advised that he had received a price which had been passed to LJ/GW for checking and upload.</p>	

4363	PMI 434 -	Mobilisation & demobilisation of piling rig	12/08/2015 13/08/2015 27/08/2015 17/09/2015  24/09/2015	The Board request the provision of quotation for the remobilisation and subsequent demobilisation of the Piling Rig required to carryout the piling works associated with the Maternity VIE. Cross reference discussion in BMCL-EWN-0150 Costs uploaded, cross ref BMCL EWN 0160 PM noted that he would review the cost info uploaded to Sypro. GA noted that it would be beneficial to deal with the BBGE costs asap and deal with any 'delay' matters separately. <b>PM noted that CE 149 had been issued therefore PMI could be closed</b>	Cross ref CE 149
4467	PMI 437 -	Mop wash floor - painting	03/09/2015  17/09/2015  24/09/2015	The Board request a price for the painting of the Mop Wash floor as a result of works carried out und PMI 433 (Power Supply for Gas Solenoid Valve and request from Infection Control to have a sealed floor.) DW suggested that the NHS Estates may already have painted the floor and GF agreed to investigate <b>DH noted that he had understood that the Estates Dept had painted the floor. There had been an expectation that if there is a hole being put in the floor that the floor would be reinstated to a reasonable finish. GF advised that he would organise to meet with Infection Control colleagues to review.</b>	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE DOORS HOLD OPEN STAYS	17/09/2015  24/09/2015	Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels. <b>PM advised that he would liaise with Billy Hunter and confirm the way forward.</b>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015	Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.  Please provide unit cost for repairs as follows; a) Repair wand connection and bring blind back into full operation. b) Repair blind cord at head where has been pulled externally and bring blind back into full operation. c) Repair blind in space where has dropped or jammed and bring blind back into full operation.  It is understood that around 70 locations are affected.	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015  24/09/2015	Please provide a cost to change the names of hospitals on system.  Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. <b>GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha.</b>	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015	Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.  Please provide product data and costs to install in all rooms within unit where sprinkler system installed.	

			24/09/2015	DW agreed to check if cages could be put onto the heads.	
4591	PMI 442	Stage 3a / Neurosurgery Works - Principle Designer	23/09/2015  24/09/2015	Due to the changes in the CDM Regulations the Board requests Brookfield to undertake the role of Principle Designer as noted with the revised regulations. This role is to be discharged on the works as noted below; 1. Neurosurgery Entrance 2. Neurosurgery Overcladding 3. Stage 3A Works (Landscaping, Demolitions) GB advised that BMCL had been enquiring about the Principle Designer role internally. BMCL London have a Principle Designer role and that there is specific wording which needs to be agreed for the role to be undertaken on the works itemised above. DH noted that another F10 would need to be issued however this could be carried out online and was reasonably easy to do. PM enquired if the NHS could contract a Principle Contractor as having a London based rep may not be ideal. DH advised that C&B could appoint Aecom on behalf of the NHS. GA enquired about the Stage 3 ongoing PMIs. DH advised that the PMI works would need to be considered against the criteria i.e. single trade/less than 500 man days, etc then it is ok to go ahead with these works.	For discussion at EW Meeting 24/09/2015
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:  <a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a>  Allowance to be included for boxing in the vertical posts and altering the wall padding.	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	25/09/2015	The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
16961	CE 150	QEUH LEVEL 4 WARD B - ROOM HOW039 HAND DOOR SWING	24/09/2015	Proceed and hand existing door to this room and adapt existing ironmongery as required. Install new hold open stay with magnet linked to fire alarm system, to close on energisation.	

Other items that require discussion:  
A51679245

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015) **DW advised that the panel is not as yet connected and that BMCL had issued an EW to Land Eng so that BMCL can recover costs and instruct Mercury to connect the panel. (24/09/2015)**
- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015.(19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford

has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (34/09/2015)

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a physical model (17/09/2015) GB noted that BMCL are awaiting the written output (24/09/2015)
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015)
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) GW to liaise with GB re marking up a drawing (27/08/2015) PM noted that drawing to be provided by GW and requested that the drawing be provided before the end of October (24/09/2015)
- PMI 423 - CHILDRENS HOSPITAL – MEDICINEMA. GW noted that this had been closed and removed from the tracker however GW had costs associated with this item. PM advised that as they doors had never been commissioned that there were no costs attributable to the NHS (27/08/2015)
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this in now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015)

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015)
- Machair buy-out – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015)
- NCH Theatre – it was noted that Mercury were to look at alternate ducting as the theatre is over heating due to heat from cabinets. DW requested that a PMI be issued for this matter (24/09/2015) PMI 445 was issued on 25/09/2015 therefore item closed

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1717

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 07/10/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 07/10/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time. GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review. <b>GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p>	

			<p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
		26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
		02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
		23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
		07/05/2015	GB noted that collation of the Building Warrants is WIP	
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
		04/06/2015	FS advised that GB is liaising with Mercury	
		11/06/2015	GB advised that this would be progressed once the works completed in the summer	
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
		05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
		13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	

			<p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p>	<p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3<sup>rd</sup>. PM noted that this item would not be able to be sorted in the next couple of weeks.</p> <p>PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested</p>	

			<p>24/09/2015</p> <p>01/10/2015</p>	<p>that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26<sup>th</sup> January is not a line in the sand as at 26<sup>th</sup> January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26<sup>th</sup> January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3<sup>rd</sup> for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping. GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.</p> <p>GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p> <p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p> <p>GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.</p> <p>GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].</p> <p>GA noted that GW was to confirm the value.</p>	

26745	BMCL-EWN-161	HV connection	07/09/2015	<p>We have been trying for the last 2 weeks to arrange for the termination of the temporary HV connections to our old welfare area.</p> <p>The NHS HV appointed person we have been told to liaise with is Paul McAllister who is on night shift and will not be available until next Friday.</p> <p>Without the HV termination Land Engineering will be prevented from completing the SUDS tank below the Children's Park.</p> <p>As per their current programme we needed the isolation by Friday (04-09-15) which was not achieved. Although this will not stop all the works in the area it will prevent the SUDS completion as planned.</p> <p>We require an alternative appointed person who can deal with this as a matter of urgency.</p>	
			17/09/2015	GA noted that there had been a meeting to discuss held the previous day and the isolations and disconnections had now been scheduled to take place on 30 <sup>th</sup> September 2015. There is potentially time delay costs.	
			24/09/2015	GA noted that arrangements had been put in place and that the termination of the temp HV connections were to be removed by the 30/09/2015. GF noted that plans were still on programme for 30/09/2015.	
			01/10/2015	GA noted that the HV connection in the NCH park had now been removed and Land Eng were ongoing with the works. It was agreed this item could be closed.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.	
			17/09/2015	GA noted that soft ground conditions had delayed the works i.e. it had taken over 1 week to do 4 piles and there had also been a failed test which meant that the test crew had to remobilised. The retest had confirmed that there was no issue with the pile and the test equipment had been faulty. GA noted that the programme had been rescheduled and re-issued.	
			24/09/2015	DH noted the comment made at the previous meeting regarding the soft ground conditions and enquired if the ground conditions could not have been anticipated as were different from elsewhere and GA confirmed that the ground conditions could not have been anticipated.	
			01/10/2015	GA advised that a revised programme had been issued	
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.	
			17/09/2015	GA noted that this had cost Land Eng a 1 week delay to the programme.	
			24/09/2015	DH noted that BMCL knew about the slab and GA acknowledged that whilst the slab was known the extent/scope of the slab was not known.	
			01/10/2015	GA advised that a revised programme had been issued	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.	
			17/09/2015	GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos	

			<p>24/09/2015</p> <p>Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract.</p>	
--	--	--	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 07/10/2015

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the	

			30/07/2015	blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/010/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 23/09/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane	

A51679245

			<p>and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>21/05/2015 It was agreed that BMCL will liaise with Siemens</p> <p>28/05/2015 FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>04/06/2015 FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>11/06/2015 GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>25/06/2015 PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>23/07/2015 FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>30/07/2015 PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>06/08/2015 GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>13/08/2015 GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>27/08/2015 GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>17/09/2015 GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>24/09/2015 PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>01/10/2015 GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p>	
--	--	--	---	--

3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) - Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>25/06/2015 PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>23/07/2015 GW advised that BMCL were preparing pricing.</p> <p>30/07/2015 GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>06/08/2015 GW noted this is WIP.</p> <p>13/08/2015 PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>27/08/2015 GW noted that costs had been uploaded for NHS review.</p> <p>17/09/2015 PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.</p> <p>24/09/2015 PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.</p> <p>01/10/2015 GW advised that he was awaiting Land Eng to break down the costs</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows;</p> <p>Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows;</i></p> <p><i>Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>10-12 air changes hour</i></li> <li><i>Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and</i></li> </ul>	

			<p><i>between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></p> <ul style="list-style-type: none"> <li><i>Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</i></p> <p><i>Please organise an preliminary meeting with design team and Board to establish scope in more detail.</i></p> <p><i>(Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
		23/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
		30/07/2015	<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p>	
		06/08/2015	<p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p>	
		13/08/2015	<p>PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p>	
		27/08/2015	<p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p>	
		17/09/2015	<p>GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit</p>	

				galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasure. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p>	
			30/07/2015	Refer attached sketch.	
			06/08/2015	GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.	
			13/08/2015	Consideration being given to options for infill panels. Positioning of bike stands under consideration.	
			27/08/2015	GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.	
			17/09/2015	PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.	
			24/09/2015	PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap.	
			01/10/2015	PM advised that he had received drawings (re screens) and had circulated to DL, etc. GB noted that the Sheffield Stand drawings would be provided asap. PM advised that he would issue a CE for the Sheffield Stands as soon as the drawings are provided to him.	
				GB advised that the Bike Stand and Shelter information had been sent to PM for review via Aconex	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as</p>	

			<p>23/07/2015 30/07/2015 06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015 17/09/2015</p> <p>24/09/2015</p> <p>01/010/2015</p>	<p>per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p> <p>PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p>	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p> <p>GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.</p> <p>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</p> <p>GA advised that he had received a price which had been passed to LJ/GW for checking and upload.</p> <p>GW advised that LJ was finalising the information for upload later that day.</p>	
4467	PMI 437 -	Mop wash floor - painting	<p>03/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/010/2015</p>	<p>The Board request a price for the painting of the Mop Wash floor as a result of works carried out und PMI 433 (Power Supply for Gas Solenoid Valve and request from Infection Control to have a sealed floor.)</p> <p>DW suggested that the NHS Estates may already have painted the floor and GF agreed to investigate</p> <p>DH noted that he had understood that the Estates Dept had painted the floor. There had been an expectation that if there is a hole being put in the floor that the floor would be reinstated to a reasonable finish. GF advised that he would organise to meet with Infection Control colleagues to review.</p> <p>GW noted this item should be closed. BMCL did not think that the NHS Estates had applied the correct epoxy coating and did not think it was fit for purpose. GF advised that he would speak to</p>	

				PM regarding the way forward.	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE DOORS HOLD OPEN STAYS	17/09/2015  24/09/2015 01/10/2015	Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels. PM advised that he would liaise with Billy Hunter and confirm the way forward. PM to provide feedback.	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015        01/10/2015	Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.  Please provide unit cost for repairs as follows; a) Repair wand connection and bring blind back into full operation. b) Repair blind cord at head where has been pulled externally and bring blind back into full operation. c) Repair blind in space where has dropped or jammed and bring blind back into full operation.  It is understood that around 70 locations are affected. GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015  24/09/2015  01/10/2015	Please provide a cost to change the names of hospitals on system.  Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha. SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes.	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015  24/09/2015 01/10/2015	Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.  Please provide product data and costs to install in all rooms within unit where sprinkler system installed. DW agreed to check if cages could be put onto the heads. DW noted that the head installed suits the ceiling so it isn't as simple as putting a cage on it. Mercury are looking at whether there is potential to put a grille over it.	
4591	PMI 442	Stage 3a / Neurosurgery Works - Principle Designer	23/09/2015  24/09/2015	Due to the changes in the CDM Regulations the Board requests Brookfield to undertake the role of Principle Designer as noted with the revised regulations. This role is to be discharged on the works as noted below; 1. Neurosurgery Entrance 2. Neurosurgery Overcladding 3. Stage 3A Works (Landscaping, Demolitions) GB advised that BMCL had been enquiring about the Principle Designer role internally. BMCL London have a Principle Designer role and that there is specific wording which needs to be agreed	For discussion at EW Meeting 24/09/2015

			01/10/2015	for the role to be undertaken on the works itemised above. DH noted that another F10 would need to be issued however this could be carried out online and was reasonably easy to do. PM enquired if the NHS could contract a Principle Contractor as having a London based rep may not be ideal. DH advised that C&B could appoint Aecom on behalf of the NHS. GA enquired about the Stage 3 ongoing PMIs. DH advised that the PMI works would need to be considers against the criteria i.e. single trade/less than 500 man days, etc then it is ok to go ahead with these works. GW advised this item is work in progress to pull together the information for NHS review. GF agreed to liaise with PM to confirm the way forward.	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015  01/10/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:  <a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a>  Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	25/09/2015  01/10/2015	The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets GW noted that the costing is ongoing	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
16961	CE 150	QEUH LEVEL 4 WARD B - ROOM HOW039 HAND DOOR SWING	24/09/2015	Proceed and hand existing door to this room and adapt existing ironmongery as required. Install new hold open stay with magnet linked to fire alarm system, to close on energisation.	

### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS

(08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015) DW advised that the panel is not as yet connected and that BMCL had issued an EW to Land Eng so that BMCL can recover costs and instruct Mercury to connect the panel. (24/09/2015) **GA advised that BMCL will remove the valve in the manhole and obtain a valve that is compatible with decontamination needs (01/10/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) **DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015)**

- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a physical model (17/09/2015) GB noted that BMCL are awaiting the written output (24/09/2015) **GB noted that the report is currently being finalised and he suggested that this would be in the next completed within the next couple of weeks (01/10/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) **DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015) PM noted that drawing to be provided by GW and requested that the drawing be provided before the end of October (24/09/2015)**
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) **PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015)**

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015)
- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) DW advised that all the information had been uploaded to Zutec however he would liaise with LM to ascertain what information she was requesting (01/10/2015)
- NCH Theatre – it was noted that Mercury were to look at alternate ducting as the theatre is over heating due to heat from cabinets. DW requested that a PMI be issued for this matter (24/09/2015) PMI 445 was issued on 25/09/2015 therefore item closed
- Car Park 4 Surface Car Park re JMP Traffic Report – GB noted that he was awaiting an update on progress. GB mentioned that the Building Control process could take ¾ months and enquired whether BMCL should commence the process now (01/10/2015)
- Fire drawings – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1737

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 21/10/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 21/10/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time. GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review. GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this. <b>GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets</p>	

			<p>PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
		26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
		02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
		23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
		30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
		07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
		14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
		21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
		28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
		04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
		11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
		25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p>	
		30/07/2015	<p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p>	
		05/08/2015	<p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p>	

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings . PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay</p>	

			17/09/2015	1/3 <sup>rd</sup> . PM noted that this item would not be able to be sorted in the next couple of weeks. PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26 <sup>th</sup> January is not a line in the sand as at 26 <sup>th</sup> January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26 <sup>th</sup> January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3 <sup>rd</sup> for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.	
			24/09/2015	GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.	
			01/10/2015	GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.	
			08/10/2015	GA advised that he would organise a meeting after the school holiday period.	
26405	BMCL-EWN-160	Delays to piling at VIE2	10/08/2015	Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.  The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.  Actions required;  1. Please provide a PMI to stand down works. 2. Provide asbestos clearance certificate for solemn of Maternity Building 3. Confirm acceptance of medical gas design 4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS & BM	
			13/08/2015	GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].	
			27/08/2015	Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.	
			17/09/2015	GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.	
			24/09/2015	GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].	
			01/10/2015	GA noted that GW was to confirm the value.	

26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK	

			01/10/2015	(programmed for 8 <sup>th</sup> October) that the demolitions could at least start on the 8 <sup>th</sup> October and GA agreed to review and confirm back. GA advised that Central Demolition have been arranged to start on site on 12 <sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.	
			08/10/2015	GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1 <sup>st</sup> phase works. BMCL are also awaiting information about the underground services.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 21/10/2015

							
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.			
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report			
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.			
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.			

A51679245

			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap the programme indicates the works finishing in 3 weeks.
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.
			30/07/2015	FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had

			24/09/2015 01/10/2015 08/10/2015	<p>been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
27446	NHS EWN 061	Neurosurgery Entrance - Ground Floor Concrete Pour	20/10/2015	<p>Further to discussions on 20th October please confirm revised date for the ground floor concrete pour to allow notification to end users etc.</p> <p>Based on yesterday's progress to date on site I'm concerned that we will miss this week and it will be w/c 26th before this is carried out.</p> <p>Please provide an indication of any impact to programme.</p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 21/10/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015       21/05/2015 28/05/2015 04/06/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p>	

A51679245

			<p>11/06/2015 GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>25/06/2015 PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>23/07/2015 FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>30/07/2015 PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>06/08/2015 GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>13/08/2015 GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>27/08/2015 GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>17/09/2015 GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>24/09/2015 PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>01/010/2015 GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p> <p>08/10/2015 GA noted that costs are awaited from Land Eng.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015 Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>25/06/2015 PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>23/07/2015 GW advised that BMCL were preparing pricing.</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective. GW noted this is WIP.</p> <p>PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p> <p>GW noted that costs had been uploaded for NHS review.</p> <p>PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.</p> <p>PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.</p> <p>GW advised that he was awaiting Land Eng to break down the costs</p> <p>GA noted that cost breakdown is awaited from Land Eng.</p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p> <p>23/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p>Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</p> <p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying</p>	

			<p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p> <p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.</p> <p>PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.</p> <p>PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.</p> <p>PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.</p> <p>GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.</p> <p>GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item.</p> <p>GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21<sup>st</sup> October 2015. If nurses require training then further training would be arranged.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	07/07/2015	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake</p>	

				<p>review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p> <p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>23/07/2015 Notify Board team once sample prepared for review.</p> <p>30/07/2015 FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p> <p>06/08/2015 PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>13/08/2015 GA advised that the installation is due to commence the following week.</p> <p>27/08/2015 GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p> <p>17/09/2015 GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.</p> <p>24/09/2015 PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.</p> <p>01/10/2015 GA advised that BMCL are awaiting information from Land Engineer regarding in relation to the galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.</p> <p>08/10/2015 GA advised that BMCL are awaiting copy of the invoice from Land Eng.</p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p>	

			<p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p> <p>Refer attached sketch.</p> <p>30/07/2015 GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p> <p>06/08/2015 Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>13/08/2015 GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>27/08/2015 PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p> <p>17/09/2015 PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap.</p> <p>24/09/2015 PM advised that he had received drawings (re screens) and had circulated to DL, etc. GB noted that the Sheffield Stand drawings would be provided asap. PM advised that he would issue a CE for the Sheffield Stands as soon as the drawings are provided to him.</p> <p>01/10/2015 GB advised that the Bike Stand and Shelter information had been sent to PM for review via Aconex</p> <p>08/10/2015 <b>PM to review the information issued via Aconex and confirm way forward.</b></p>	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	<p>21/07/2015 Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>23/07/2015 Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>30/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>06/08/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be</p>	

			<p>27/08/2015 17/09/2015</p> <p>24/09/2015</p> <p>01/010/2015 08/10/2015</p>	<p>commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood. PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p>	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015 08/10/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p> <p>GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.</p> <p>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</p> <p>GA advised that he had received a price which had been passed to LJ/GW for checking and upload.</p> <p>GW advised that LJ was finalising the information for upload later that day.</p> <p>GA noted that the cost information had been uploaded by LJ.</p>	
4467	PMI 437 -	Mop wash floor - painting	<p>03/092015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/010/2015</p> <p>08/10/2015</p>	<p>The Board request a price for the painting of the Mop Wash floor as a result of works carried out und PMI 433 (Power Supply for Gas Solenoid Valve and request from Infection Control to have a sealed floor.)</p> <p>DW suggested that the NHS Estates may already have painted the floor and GF agreed to investigate</p> <p>DH noted that he had understood that the Estates Dept had painted the floor. There had been an expectation that if there is a hole being put in the floor that the floor would be reinstated to a reasonable finish. GF advised that he would organise to meet with Infection Control colleagues to review.</p> <p>GW noted this item should be closed. BMCL did not think that the NHS Estates had applied the correct epoxy coating and did not think it was fit for purpose. GF advised that he would speak to PM regarding the way forward.</p> <p>Item closed for BMCL. NHS will progress. PMI to be cancelled.</p>	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE	<p>17/09/2015</p> <p>24/09/2015</p>	<p>Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels.</p> <p>PM advised that he would liaise with Billy Hunter and confirm the way forward.</p>	

		DOORS HOLD OPEN STAYS	01/10/2015	PM to provide feedback.	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015        01/10/2015  08/10/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon.</p>	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015   24/09/2015   01/10/2015	<p>Please provide a cost to change the names of hospitals on system.</p> <p>Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children.</p> <p>GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha.</p> <p>SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes.</p>	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015   24/09/2015  01/10/2015	<p>Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.</p> <p>Please provide product data and costs to install in all rooms within unit where sprinkler system installed.</p> <p>DW agreed to check if cages could be put onto the heads.</p> <p>DW noted that the head installed suits the ceiling so it isn't as simple as putting a cage on it. Mercury are looking at whether there is potential to put a grille over it.</p>	
4591	PMI 442	Stage 3a / Neurosurgery Works - Principle Designer	23/09/2015   24/09/2015	<p>Due to the changes in the CDM Regulations the Board requests Brookfield to undertake the role of Principle Designer as noted with the revised regulations. This role is to be discharged on the works as noted below;</p> <ol style="list-style-type: none"> <li>1. Neurosurgery Entrance</li> <li>2. Neurosurgery Overcladding</li> <li>3. Stage 3A Works (Landscaping, Demolitions)</li> </ol> <p>GB advised that BMCL had been enquiring about the Principle Designer role internally. BMCL London have a Principle Designer role and that there is specific wording which needs to be agreed for the role to be undertaken on the works itemised above. DH noted that another F10 would need to be issued however this could be carried out online and was reasonably easy to do. PM enquired</p>	

			01/10/2015 08/10/2015	<p>if the NHS could contract a Principle Contractor as having a London based rep may not be ideal. DH advised that C&amp;B could appoint Aecom on behalf of the NHS. GA enquired about the Stage 3 ongoing PMIs. DH advised that the PMI works would need to be considers against the criteria i.e. single trade/less than 500 man days, etc then it is ok to go ahead with these works.</p> <p>GW advised this item is work in progress to pull together the information for NHS review. GF agreed to liaise with PM to confirm the way forward.</p> <p>GF advised that he would email Currie &amp; Brown seeking confirmation that they are progressing with the Principal Contractor role. It was agreed this item could be closed.</p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015  01/10/2015 08/10/2015	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding.</p> <p>GW noted that the costing is ongoing</p> <p>GA noted that the information was with the design and cost teams</p>	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	25/09/2015 01/10/2015	<p>The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets</p> <p>GW noted that the costing is ongoing</p>	
4769	PMI 445	RTPI BUS SIGNS - PROVISION OF 4 No 6 AMP BREAKERS IN FP11	20/10/2015	<p>In feeder pillar FP11 please supply and install 4@6 amp 230v single phase breakers, these to be RCD, but if space does not permit can be RCBO's. Please proceed immediately with this work.</p> <p>Please supply and install 4@6 amp 230v single phase, these to be RCD, but if space does not permit can be RCBO's. Note the four supplies must not be linked to any to any device that controls operation by daylight (PIR) as the RTPI signs will be operational 24/7. Connections to the breakers will be made by the installer of the RTPI signage (CUBIC). Plan is to install signs in 2nd week November.</p>	
4793	PMI 446	ADULT HOSPITAL - WARD 4B ROOM HOW-208 CONNECTIONS TO FITTED WHB	21/10/2015	<p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please complete works by 29th October.</p> <p>The H&amp;CW services are piped to beneath the WHB and only require final flexi-connections. The waste bottle trap requires to be connected to the waste spigot installed by Brookfield.</p>	

4795	PMI 447 -	ADULT HOSPITAL LEVEL 1 CRITICAL CARE WARD 5 No. ISOLATION ROOMS	21/10/2015	Supply and fit stainless steel D-handles to 5 No doors as noted below. Fix D handles over existing stainless steel push plates to avoid repairs to doors.  To the larger main leaf of the penny farthing door set between the pressurised lobby and the single room, supply and install 1 No. st. steel D handle on the lobby side of the door. This side is currently fitted with a st. steel push plate. Please leave push plate in place and supply a D handle to sit over the plate so the handle and its fixing rose need to be larger than the overall length of the plate. Single bedroom room numbers are - CCW140; CCW-165; CCW-242; CCW-025 and CCW-111. Note these should only be fitted in locations where lever handles on both side of doors do NOT occur.

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
16961	CE 150	QEUH LEVEL 4 WARD B - ROOM HOW039 HAND DOOR SWING	24/09/2015	Proceed and hand existing door to this room and adapt existing ironmongery as required. Install new hold open stay with magnet linked to fire alarm system, to close on energisation.	21/10/2015
17555	CE 151	QEUH - 20 No CYCLE STANDS AND ASSOCIATED SCREENS AT MAIN ENTRANCE	20/10/2015	Please proceed to procure and install stainless steel Sheffield style bike stands and associated screens as developed through PMI 426. Fixing for 20 No bike stands as per existing stands installed through contract. Spacing to be 850mm centre to centre of each stand. Provide screens as per revised design prepared by landscape architect.  Agreed cost [REDACTED] incl. of OH+P but exclusive of VAT. Cost split between Board risk and Endowment fund.	21/10/2015

### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would

obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015) DW advised that the panel is not as yet connected and that BMCL had issued an EW to Land Eng so that BMCL can recover costs and instruct Mercury to connect the panel. (24/09/2015) GA advised that BMCL will remove the valve in the manhole and obtain a valve that is compatible with decontamination needs (01/10/2015) **GA advised that the valve in the manhole had been removed and been sent to Portsmouth to get the actuator fitted and valve calibrated. (8/10/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) **DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS

wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a physical model (17/09/2015) GB noted that BMCL are awaiting the written output (24/09/2015) **GB noted that the report is currently being finalised and he suggested that this would be in the next completed within the next couple of weeks (01/10/2015)**

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) **DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015) PM noted that drawing to be provided by GW and requested that the drawing be provided before the end of October (24/09/2015)**
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) **GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) **HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015)**

- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) DW advised that all the information had been uploaded to Zutec however he would liaise with LM to ascertain what information she was requesting (01/10/2015)
- Car Park 4 Surface Car Park re JMP Traffic Report – GB noted that he was awaiting an update on progress. GB mentioned that the Building Control process could take 3-4 months and enquired whether BMCL should commence the process now (01/10/2015)
- Fire drawings – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015). GF noted that a meeting was being arranged (08/10/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1758

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 28/10/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting decisions at 26/10/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time. GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review. GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this. GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>Work in progress</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p>	

			<p>PMI 347 – Change of materials  PMI 352 – additional electrical sockets  PMI 357 – additional water supplies  PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
		26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
		02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
		23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
		07/05/2015	GB noted that collation of the Building Warrants is WIP	
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
		04/06/2015	FS advised that GB is liaising with Mercury	
		11/06/2015	GB advised that this would be progressed once the works completed in the summer	
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design	

			<p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p>	<p>drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p>	

			27/08/2015	GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3 <sup>rd</sup> . PM noted that this item would not be able to be sorted in the next couple of weeks.	
			17/09/2015	PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26 <sup>th</sup> January is not a line in the sand as at 26 <sup>th</sup> January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26 <sup>th</sup> January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3 <sup>rd</sup> for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.	
			24/09/2015	GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.	
			01/10/2015	GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.	
			08/10/2015 22/10/2015	GA advised that he would organise a meeting after the school holiday period. <b>PM advised that this had been discussed at an earlier meeting with the Project Directors. PM understood that a quantum was to be identified.</b>	
26405	BMCL-EWN-160	Delays to piling at VIE2	10/08/2015	Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.  The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.  Actions required;  1. Please provide a PMI to stand down works. 2. Provide asbestos clearance certificate for solemn of Maternity Building 3. Confirm acceptance of medical gas design 4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS & BM	
			13/08/2015	GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].	
			27/08/2015	Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.	
			17/09/2015	GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.	

			24/09/2015	GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].	
			01/10/2015 22/10/2015	GA noted that GW was to confirm the value. PM advised that confirmation of the value is awaited.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would	

			<p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
27446	NHS EWN 061	Neurosurgery Entrance - Ground Floor Concrete Pour	<p>20/10/2015</p> <p>22/10/2015</p>	<p>Further to discussions on 20th October please confirm revised date for the ground floor concrete pour to allow notification to end users etc.</p> <p>Based on yesterday's progress to date on site I'm concerned that we will miss this week and it will be w/c 26th before this is carried out.</p> <p>Please provide an indication of any impact to programme.</p> <p>GB noted that the plate detail was to be concluded between the engineers (there had been a difference of opinion). Also, there had been an issue getting steel fixers. Rob Blady had updated GF.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 28/10/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p>	
			21/05/2015	It was agreed that BMCL will liaise with Siemens	
			28/05/2015	FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.	
			04/06/2015	FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.	
			11/06/2015	GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.	
			25/06/2015	PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.	
			23/07/2015	FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.	
			30/07/2015	PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.	
			06/08/2015	GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.	
			13/08/2015	GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.	
			27/08/2015	GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had	

			17/09/2015	advised that he would be carrying out a site walkround – feedback is awaited.	
			24/09/2015	GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.	
			01/10/2015	PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.	
			08/10/2015	GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.	
				GA noted that costs are awaited from Land Eng.	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	Please re-configure installed arrangement as follows.	
				Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.	
				Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.	
				Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.	
				Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.	
			25/06/2015	PM advised that he would liaise with JPhillips re doing the works at the weekend.	
			23/07/2015	GW advised that BMCL were preparing pricing.	
			30/07/2015	GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.	
			06/08/2015	GW noted this is WIP.	
			13/08/2015	PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.	
			27/08/2015	GW noted that costs had been uploaded for NHS review.	
			17/09/2015	PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.	
			24/09/2015	PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.	
			01/10/2015	GW advised that he was awaiting Land Eng to break down the costs	
			08/10/2015	GA noted that cost breakdown is awaited from Land Eng.	
			22/10/2015	PM noted that he had asked for additional info re	
				1- change to white lining	
				2- installation of new circuit	
				3- paving slabs in front of the feeder pillar	

				GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 6.	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>• 10-12 air changes hour</i></li> <li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li> <li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
			23/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
			30/07/2015	<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back –</p>	

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted. PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required. PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing. PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests. GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item. GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item. GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21<sup>st</sup> October 2015. If nurses require training then further training would be arranged. PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p>	

			<p>23/07/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p> <p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>GA advised that the installation is due to commence the following week.</p> <p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p> <p>GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.</p> <p>PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.</p> <p>GA advised that BMCL are awaiting information from Land Engineer regarding in relation to the galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.</p> <p>GA advised that BMCL are awaiting copy of the invoice from Land Eng.</p> <p><b>GB noted that he was not aware of the invoice having been received by BMCL.</b></p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p>	

			<p>30/07/2015 Refer attached sketch. GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design.</p> <p>06/08/2015 Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>13/08/2015 GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>27/08/2015 PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p> <p>17/09/2015 PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap.</p> <p>24/09/2015 PM advised that he had received drawings (re screens) and had circulated to DL, etc. GB noted that the Sheffield Stand drawings would be provided asap. PM advised that he would issue a CE for the Sheffield Stands as soon as the drawings are provided to him.</p> <p>01/10/2015 GB advised that the Bike Stand and Shelter information had been sent to PM for review via Aconex</p> <p>08/10/2015 PM to review the information issued via Aconex and confirm way forward.</p> <p>22/10/2015 It was agreed that this item could be closed. CE 151 issued. GB noted that drawings re the shelters had been issued via Aconex for PM's review. PM agreed to review asap.</p>	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	<p>21/07/2015 Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via</p>	

			<p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p>	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p> <p>GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.</p> <p>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</p> <p>GA advised that he had received a price which had been passed to LJ/GW for checking and upload.</p> <p>GW advised that LJ was finalising the information for upload later that day.</p> <p>GA noted that the cost information had been uploaded by LJ.</p> <p>PM advised that this item could now be closed as the service were progressing with the works.</p>	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE DOORS HOLD OPEN STAYS	<p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>22/10/2015</p>	<p>Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels.</p> <p>PM advised that he would liaise with Billy Hunter and confirm the way forward.</p> <p>PM to provide feedback.</p> <p>PM advised this item was now cancelled.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	<p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types if repairs that are required and it was anticipated that the cost information would be</p>	

			22/10/2015	provided soon. PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015  24/09/2015  01/10/2015  22/10/2015	Please provide a cost to change the names of hospitals on system.  Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha. SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes. Feedback from Estates Dept awaited	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015  24/09/2015 01/10/2015  22/10/2015	Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.  Please provide product data and costs to install in all rooms within unit where sprinkler system installed. DW agreed to check if cages could be put onto the heads. DW noted that the head installed suits the ceiling so it isn't as simple as putting a cage on it. Mercury are looking at whether there is potential to put a grille over it. PM noted that the sprinkler head protection is only required in the soft play room. PM agreed to discuss with GDonnelly. It was agreed this item could be cancelled.	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015  01/10/2015 08/10/2015 22/10/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:  <a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a>  Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	25/09/2015  01/10/2015 22/10/2015	The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room.	
4769	PMI 445	RTPI BUS SIGNS - PROVISION OF 4 No 6 AMP BREAKERS IN FP11	20/10/2015	In feeder pillar FP11 please supply and install 4@6 amp 230v single phase breakers, these to be RCD, but if space does not permit can be RCBO's. Please proceed immediately with this work.  Please supply and install 4@6 amp 230v single phase, these to be RCD, but if space does not	

				<p>permit can be RCBO's. Note the four supplies must not be linked to any to any device that controls operation by daylight (PIR) as the RTPI signs will be operational 24/7. Connections to the breakers will be made by the installer of the RTPI signage (CUBIC). Plan is to install signs in 2nd week November.</p>	
4793	PMI 446	ADULT HOSPITAL - WARD 4B ROOM HOW-208 CONNECTIONS TO FITTED WHB	21/10/2015	<p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please complete works by 29th October.</p> <p>The H&amp;CW services are piped to beneath the WHB and only require final flexi-connections. The waste bottle trap requires to be connected to the waste spigot installed by Brookfield.</p> <p>** Additional note added to PMI ** - Flush system prior to final connection/liaise with Estates</p>	
4795	PMI 447 -	ADULT HOSPITAL LEVEL 1 CRITICAL CARE WARD 5 No. ISOLATION ROOMS	21/10/2015  22/10/2015	<p>Supply and fit stainless steel D-handles to 5 No doors as noted below. Fix D handles over existing stainless steel push plates to avoid repairs to doors.</p> <p>To the larger main leaf of the penny farthing door set between the pressurised lobby and the single room, supply and install 1 No. st. steel D handle on the lobby side of the door. This side is currently fitted with a st. steel push plate. Please leave push plate in place and supply a D handle to sit over the plate so the handle and its fixing rose need to be larger than the overall length of the plate. Single bedroom room numbers are - CCW140; CCW-165; CCW-242; CCW-025 and CCW-111. Note these should only be fitted in locations where lever handles on both side of doors do NOT occur.</p> <p>PM requested that GB check the Ironmongery schedule re door handles for the 10 isolation rooms as 5 isolation room doors have different handles from the other 5 isolation rooms. GB suggested that the ironmongery should have been consistent on all the isolation room doors.</p>	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015	<p>Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.</p> <p>Please contact Jim Harrigan to make arrangements for removal.</p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p>	

				The attachment is the area to be removed shown marked in blue.	
4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	

### Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015) DW advised that the panel is not as yet connected and that BMCL had issued an EW to Land Eng so that BMCL can recover costs and instruct Mercury to connect the panel. (24/09/2015) GA advised that BMCL will remove the valve in the manhole and obtain a valve that is compatible with decontamination needs (01/10/2015) GA advised that the valve in the manhole had been removed and been sent to Portsmouth to get the actuator fitted and valve calibrated. (8/10/2015)

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) **DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a physical model (17/09/2015) GB noted that BMCL are awaiting the written output (24/09/2015) GB noted that the report is currently being finalised and he suggested that this would be in the next completed within the next couple of weeks (01/10/2015) **GB noted that the report should be available now and he would chase this up (22/10/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking

in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) **DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015)**

- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015) PM noted that drawing to be provided by GW and requested that the drawing be provided before the end of October (24/09/2015)**
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) **PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) **HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015)**
- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) **DW advised that all the information had been uploaded to Zutec however he would liaise with LM to ascertain what information she was requesting (01/10/2015)**
- Car Park 4 Surface Car Park re JMP Traffic Report – GB noted that he was awaiting an update on progress. GB mentioned that the Building Control process could take 3-4 months and enquired whether BMCL should commence the process now (01/10/2015) **PM noted that there was a meeting with JMP scheduled for 26/10/2015. (22/10/2015)**
- Fire Strategy drawings – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015). **GF noted that a meeting was being arranged (08/10/2015) GB noted that there was a meeting arranged for w/c 26<sup>th</sup> October 2015.**

			<p>26/03/2015 02/04/2015</p> <p>28/05/2015 25/06/2015</p> <p>30/07/2015</p> <p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>works. DL and PM to discuss PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE. Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept. DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be. GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done. GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off. GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week. GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time. GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review. GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this. GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>Work in progress</p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p>	

			<p>PMI 347 – Change of materials  PMI 352 – additional electrical sockets  PMI 357 – additional water supplies  PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
		26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
		02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
		23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
		07/05/2015	GB noted that collation of the Building Warrants is WIP	
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
		04/06/2015	FS advised that GB is liaising with Mercury	
		11/06/2015	GB advised that this would be progressed once the works completed in the summer	
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design	

			<p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p>	<p>drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p> <p>13/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works. GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p>	

			27/08/2015	GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3 <sup>rd</sup> . PM noted that this item would not be able to be sorted in the next couple of weeks.	
			17/09/2015	PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26 <sup>th</sup> January is not a line in the sand as at 26 <sup>th</sup> January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26 <sup>th</sup> January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3 <sup>rd</sup> for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.	
			24/09/2015	GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.	
			01/10/2015	GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.	
			08/10/2015 22/10/2015	GA advised that he would organise a meeting after the school holiday period. <b>PM advised that this had been discussed at an earlier meeting with the Project Directors. PM understood that a quantum was to be identified.</b>	
26405	BMCL-EWN-160	Delays to piling at VIE2	10/08/2015	Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.  The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.  Actions required;  1. Please provide a PMI to stand down works. 2. Provide asbestos clearance certificate for solemn of Maternity Building 3. Confirm acceptance of medical gas design 4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS & BM	
			13/08/2015	GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].	
			27/08/2015	Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.	
			17/09/2015	GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.	

			24/09/2015	GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].	
			01/10/2015 22/10/2015	GA noted that GW was to confirm the value. PM advised that confirmation of the value is awaited.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would	

			<p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
27446	NHS EWN 061	Neurosurgery Entrance - Ground Floor Concrete Pour	<p>20/10/2015</p> <p>22/10/2015</p>	<p>Further to discussions on 20th October please confirm revised date for the ground floor concrete pour to allow notification to end users etc.</p> <p>Based on yesterday's progress to date on site I'm concerned that we will miss this week and it will be w/c 26th before this is carried out.</p> <p>Please provide an indication of any impact to programme.</p> <p>GB noted that the plate detail was to be concluded between the engineers (there had been a difference of opinion). Also, there had been an issue getting steel fixers. Rob Blady had updated GF.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/11/2015

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p>	
			21/05/2015	It was agreed that BMCL will liaise with Siemens	
			28/05/2015	FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.	
			04/06/2015	FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.	
			11/06/2015	GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.	
			25/06/2015	PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.	
			23/07/2015	FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.	
			30/07/2015	PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.	
			06/08/2015	GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.	
			13/08/2015	GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.	
			27/08/2015	GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had	

			17/09/2015	advised that he would be carrying out a site walkround – feedback is awaited.	
			24/09/2015	GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.	
			01/10/2015	PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.	
			08/10/2015	GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.	
				GA noted that costs are awaited from Land Eng.	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	Please re-configure installed arrangement as follows.	
				Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.	
				Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.	
				Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.	
				Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.	
			25/06/2015	PM advised that he would liaise with JPhillips re doing the works at the weekend.	
			23/07/2015	GW advised that BMCL were preparing pricing.	
			30/07/2015	GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.	
			06/08/2015	GW noted this is WIP.	
			13/08/2015	PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.	
			27/08/2015	GW noted that costs had been uploaded for NHS review.	
			17/09/2015	PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.	
			24/09/2015	PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.	
			01/10/2015	GW advised that he was awaiting Land Eng to break down the costs	
			08/10/2015	GA noted that cost breakdown is awaited from Land Eng.	
			22/10/2015	PM noted that he had asked for additional info re	
				1- change to white lining	
				2- installation of new circuit	
				3- paving slabs in front of the feeder pillar	

				GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 6.	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	03/07/2015	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li><i>• 10-12 air changes hour</i></li> <li><i>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</i></li> <li><i>• Propose solution to seal ceilings with current grid arrangement.</i></li> <li><i>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</i></li> </ul> <p><i>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	
			23/07/2015	<p>PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27<sup>th</sup> May 2010 was a significant date.</p>	
			30/07/2015	<p>DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back –</p>	

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted. PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1<sup>st</sup> element being due to the NHS and the 2<sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required. PM noted that there had been a few additions to this item (PMI 429 &amp; PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing. PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests. GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item. GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item. GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21<sup>st</sup> October 2015. If nurses require training then further training would be arranged. PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.</p>	
4042	PMI 425 -	EXTERNALS WORKS - TREE GRATINGS	<p>07/07/2015</p>	<p>The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.</p> <p>Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.</p> <p>Prepare a sample grating coated with Smartkote - Protectakote UVR, anti slip coating, colour - translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.</p>	

			<p>23/07/2015</p> <p>30/07/2015 06/08/2015</p> <p>13/08/2015 27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015 22/10/2015</p>	<p>Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a></p> <p>Notify Board team once sample prepared for review.</p> <p>FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.</p> <p>PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal. It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.</p> <p>GA advised that the installation is due to commence the following week.</p> <p>GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].</p> <p>GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.</p> <p>PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.</p> <p>GA advised that BMCL are awaiting information from Land Engineer regarding in relation to the galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.</p> <p>GA advised that BMCL are awaiting copy of the invoice from Land Eng.</p> <p><b>GB noted that he was not aware of the invoice having been received by BMCL.</b></p>	
4091	PMI 426 -	QUEEN ELIZABETH UNI. HOSPITAL - MAIN ENTRANCE AREA	20/07/2015	<p>Please undertake feasibility study to design (for approval) and establish cost to install 20 No 'Sheffield' type stainless steel bike stands and associated screens and frames.</p> <p>Base on the attached sketch, please prepare design and costs to install an additional 20 No stainless steel bike stands to match existing at the front entrance to the QEUH. Stand to be spaced as per existing and a suitable distance from face of building to allow bikes to be centred on stands but stop smokers standing between stands and face of building.</p> <p>Also prepare design for 4 No stainless steel post and screens ( 2 in location A and 2 in location B) to stop access to rear of adjacent column encasement. Frames to be stainless steel tube of similar diameter to bike stands and same finish, infill panel to be stainless steel perforated sheet. Hinged access panel to be provided for cleaning space.</p> <p>3D image to be prepared of design for approval.</p>	

			<p>30/07/2015 Refer attached sketch.</p> <p>06/08/2015 GB noted this item is WIP and Joanne will prepare a cost for providing a design. PM advised that this needed to be pushed on with and GB should instruct Joanne to progress with design. Consideration being given to options for infill panels. Positioning of bike stands under consideration.</p> <p>13/08/2015 GB advised that Joanne had visited the site the previous week and was progressing the drawings. GB would liaise with Joanne for an update.</p> <p>27/08/2015 PM advised that he would review the sketch asap. GB noted that he had received the design cost from Gillespies.</p> <p>17/09/2015 PM requested that a separate cost for the bicycle stands be provided so that the NHS could progress these asap.</p> <p>24/09/2015 PM advised that he had received drawings (re screens) and had circulated to DL, etc. GB noted that the Sheffield Stand drawings would be provided asap. PM advised that he would issue a CE for the Sheffield Stands as soon as the drawings are provided to him.</p> <p>01/10/2015 GB advised that the Bike Stand and Shelter information had been sent to PM for review via Aconex</p> <p>08/10/2015 PM to review the information issued via Aconex and confirm way forward.</p> <p>22/10/2015 It was agreed that this item could be closed. CE 151 issued. GB noted that drawings re the shelters had been issued via Aconex for PM's review. PM agreed to review asap.</p>	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS - WEST AND NORTH ENTRANCE TO BOULEVARD	<p>21/07/2015 Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that JMiller is investigating a way to connect the lights and he would ask JMiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to RCalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via</p>	

			<p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p>	
4351	PMI 432	CHILDRENS HOSPITAL LEVEL 4 DCFP EXTERNAL PLAY AREA	<p>11/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p>	<p>Please provide proposals and a cost for the following;</p> <p>a) close over 4 number window apertures with metal flush faced panels to either match surrounding silver cladding or in bright colours to match other play features and surfacing.</p> <p>b) Over extent of open garden to above, provide proposals to suspend netting to prevent balls exiting the play space area utilising stainless steel rope, bottle screws, D fittings to support light coloured net with mesh size between 75 and 100mm. Refer attached sketch.</p> <p>GB suggested that there be planning issues relating to this request. Pm noted that there was no change to the external face. GB noted that the cost info is yet to be obtained.</p> <p>It was noted that BMCL had reviewed this with the steel fabricator and costs should be available in the next couple of days.</p> <p>GA advised that he had received a price which had been passed to LJ/GW for checking and upload.</p> <p>GW advised that LJ was finalising the information for upload later that day.</p> <p>GA noted that the cost information had been uploaded by LJ.</p> <p>PM advised that this item could now be closed as the service were progressing with the works.</p>	
4545	PMI 438	ADULT HOSPITAL - STAIR/LIFT CORE C LEVELS 0,1 & 2 FIRE DOORS HOLD OPEN STAYS	<p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>22/10/2015</p>	<p>Please provide costs to supply and install hold open stays to double set of fire doors exiting this core on 3 levels.</p> <p>PM advised that he would liaise with Billy Hunter and confirm the way forward.</p> <p>PM to provide feedback.</p> <p>PM advised this item was now cancelled.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	<p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types if repairs that are required and it was anticipated that the cost information would be</p>	

			22/10/2015	provided soon. PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	17/09/2015  24/09/2015  01/10/2015  22/10/2015	Please provide a cost to change the names of hospitals on system.  Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha. SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes. Feedback from Estates Dept awaited	
4577	PMI 441 -	RHC LEVEL 4 DCFP - PROTECTION OF SPRINKLER HEADS IN PATIENT AREAS.	21/09/2015  24/09/2015 01/10/2015  22/10/2015	Please establish if there is a proprietary product on the market that can be installed over fire sprinkler heads to protect from impact of thrown objects such as balls shoes etc.  Please provide product data and costs to install in all rooms within unit where sprinkler system installed. DW agreed to check if cages could be put onto the heads. DW noted that the head installed suits the ceiling so it isn't as simple as putting a cage on it. Mercury are looking at whether there is potential to put a grille over it. PM noted that the sprinkler head protection is only required in the soft play room. PM agreed to discuss with GDonnelly. It was agreed this item could be cancelled.	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015  01/10/2015 08/10/2015 22/10/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:  <a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a>  Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	25/09/2015  01/10/2015 22/10/2015	The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room.	
4769	PMI 445	RTPI BUS SIGNS - PROVISION OF 4 No 6 AMP BREAKERS IN FP11	20/10/2015	In feeder pillar FP11 please supply and install 4@6 amp 230v single phase breakers, these to be RCD, but if space does not permit can be RCBO's. Please proceed immediately with this work.  Please supply and install 4@6 amp 230v single phase, these to be RCD, but if space does not	

				<p>permit can be RCBO's. Note the four supplies must not be linked to any to any device that controls operation by daylight (PIR) as the RTPI signs will be operational 24/7. Connections to the breakers will be made by the installer of the RTPI signage (CUBIC). Plan is to install signs in 2nd week November.</p>	
4793	PMI 446	ADULT HOSPITAL - WARD 4B ROOM HOW-208 CONNECTIONS TO FITTED WHB	21/10/2015	<p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.</p> <p>Please complete works by 29th October.</p> <p>The H&amp;CW services are piped to beneath the WHB and only require final flexi-connections. The waste bottle trap requires to be connected to the waste spigot installed by Brookfield.</p> <p>** Additional note added to PMI ** - Flush system prior to final connection/liaise with Estates</p>	
4795	PMI 447 -	ADULT HOSPITAL LEVEL 1 CRITICAL CARE WARD 5 No. ISOLATION ROOMS	21/10/2015  22/10/2015	<p>Supply and fit stainless steel D-handles to 5 No doors as noted below. Fix D handles over existing stainless steel push plates to avoid repairs to doors.</p> <p>To the larger main leaf of the penny farthing door set between the pressurised lobby and the single room, supply and install 1 No. st. steel D handle on the lobby side of the door. This side is currently fitted with a st. steel push plate. Please leave push plate in place and supply a D handle to sit over the plate so the handle and its fixing rose need to be larger than the overall length of the plate. Single bedroom room numbers are - CCW140; CCW-165; CCW-242; CCW-025 and CCW-111. Note these should only be fitted in locations where lever handles on both side of doors do NOT occur.</p> <p>PM requested that GB check the Ironmongery schedule re door handles for the 10 isolation rooms as 5 isolation room doors have different handles from the other 5 isolation rooms. GB suggested that the ironmongery should have been consistent on all the isolation room doors.</p>	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015	<p>Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.</p> <p>Please contact Jim Harrigan to make arrangements for removal.</p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p>	

				The attachment is the area to be removed shown marked in blue.	
4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	

## Other items that require discussion:

- Decontamination tank – it was noted that this may have a longer delivery time than previously expected therefore the works may not be complete by 26<sup>th</sup> January 2015. BMCL will wait until the date is confirmed and will raise as an issue as required. (11/12/2014) DP noted this is WIP. BMCL are starting to do drainage works and the tank is expected to be delivered 6<sup>th</sup> February 2015 and all works to be concluded by 24<sup>th</sup> February 2015. (15/01/2015) AF advised that he had a drawing to be provided to the NHS (08/01/2015) AF advised that he would tie in with KC re the works (22/01/2015) AF suggested that the works may be commenced w/c 09/02/2015 (05/02/2015) AF advised that the works are still to be commenced. PMcG has had difficulty getting the design solution. FS will progress (12/2/2015). Now planned to commence 9<sup>th</sup> March 2015 and will take 10 days to complete. (19/02/2015). GW advised that work is underway and he understood the tank has been delivered – GW will check and confirm re tank delivery (12/03/2015) DP advised that the tank is due to be delivered on 24/03/2015 and the hole is currently being dug (19/03/2015) FS reported that he had been advised by the manufacturer that the tank needs to be remade as there is an issue with the tank that was initially made. FS had only been informed of this matter earlier that day and would obtain further information and would subsequently provide further feedback to the NHS. (26/03/2015) FS advised that the tank was due on site that day (02/04/2015) FS advised that the tank has been installed. DW noted that there is a couple of panels to go in as yet. CG is liaising with HGriffin re the location for the panels (30/04/2015) It was noted that the level panel had been installed. A switch is needed however there is a permanent diversion to the tank at this time. (07/05/2015) DW noted that the switch for the valve is awaited (14/05/2015) DW advised that operatives should be on-site w/c 25/05/2015 (21/05/2015) DW advised BMCL were awaiting the manufacturer diverting switch. DH advised that the NHS want the system to be up and running by 30/05/2015. DW advised that the system is operation however the diverting switch will not be fitted prior to 30<sup>th</sup> March 2015. BMCL will leave the valve open so the tank will need to be eventually pumped out. (28/05/2015) DW advised that BMCL are still awaiting the switch and try to push this on (04/06/2015) DW advised that he was pushing to get the contractor on site to do the panel mod. DH advised this needed to be pushed on

asap (11/06/2015) DW advised that BMCL were actively trying to push on obtaining the switch and are awaiting the company to commit to a date. (25/06/2015) DW advised that the panel is due to be delivered before the end of the current week (23/07/2015) DW noted that the panel is now onsite and would be fitted by the middle of the following week. ((30/07/2015). GA advised that he would provide an update asap as there was no update available at this time (06/08/2015) GA advised that the panel was currently being fitted. PM enquired if there is any commissioning that the Board needs to witness and GA agreed to check and confirm back. GA would seek an update from JMiller the following day (13/08/2015) GA advised that BMCL are awaiting the return date for Pipex to commission the tank and panel. Once pipex have concluded their works then BMCL will do a joint commission/handover with NHS Estates. (27/08/2015) DW noted that BMCL were now looking for Mercury to do the install works in order not to delay the works any further (17/09/2015) DW advised that the panel is not as yet connected and that BMCL had issued an EW to Land Eng so that BMCL can recover costs and instruct Mercury to connect the panel. (24/09/2015) GA advised that BMCL will remove the valve in the manhole and obtain a valve that is compatible with decontamination needs (01/10/2015) **GA advised that the valve in the manhole had been removed and been sent to Portsmouth to get the actuator fitted and valve calibrated. (8/10/2015)**

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) **DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015)**
- Consultants Wind Survey – GB noted that they have been organized to come on site on Monday to look at a solution for the entrance re openness to conditions. There has been a query re the wind study. DH also noted that the landscaping is very immature at this time so doesn't provide any windbreak at this time. (14/05/2015) FS advised that the consultants were on site on Monday (21/05/2015) It was noted that BMCL are reviewing – have met with WSP. Looking at updating the wind survey. Orientation of some buildings differs from the early masterplan which the wind study was based on. WSP are updating on the basis of the current buildings and current orientation of buildings (28/05/2015) GB advised that the consultants were preparing a model update at moment on basis of positions of buildings. GW advised that he would need to know if the NHS wanted a wind survey to be carried out – cost circa [REDACTED]. GW suggested that GB, DS and GW discuss. PM agreed to discuss with DL (11/06/2015) GB advised that the survey report is awaited (25/06/2015) GB advised that he had spoken to John Cox from WSP re model and whether the report is nearing completion. John had advised that he is currently in dialogue with Gillespies and potential to use soft landscaping being looked at (30/07/2015) GB advised that initial feedback was expected imminently and he would chase this up (06/08/2015) GB noted that BMCL are getting outputs from the works with the model. A meeting with the NHS would be organized to discuss in due course (13/08/2015) GB advised that WSP have updated the model and prepared analysis. WSP have met with Gillespies to look at potential solutions. BMCL will meet with Gillespies soon and thereafter BMCL will meet with the NHS to go through the survey results. The model can be updated to show the impact of including any changes (27/08/2015) GB advised that BMCL had met with WSP and the model is complete. It has been identified that there is an increase in wind from the north east. The report will

be provided in due course. Suggestions to improve the conditions at the front of the hospitals will be provided. The CFD is not an appropriate analysis to progress solution and WSP are going to propose doing a physical model (17/09/2015) GB noted that BMCL are awaiting the written output (24/09/2015) GB noted that the report is currently being finalised and he suggested that this would be in the next completed within the next couple of weeks (01/10/2015) **GB noted that the report should be available now and he would chase this up (22/10/2015)**

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) **DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015)**
- Pattressing (PMI 359) – DH suggested that there was potentially 6 rooms in renal that did not have patient entertainment. Information to be provided as to where pattressing was installed that wasn't covered by the PMI. (23/07/2015) GW advised that BMCL had dealt with the pattressing and lights relocation. PM requested that BMCL provide a list of the locations (30/07/2015) FS/GW to agreed to provide the drawing info to PM asap. (06/08/2015) GA advised he would progress this matter, GW to liaise with FS in the first instance (13/08/2015) **GW to liaise with GB re marking up a drawing (27/08/2015) PM noted that drawing to be provided by GW and requested that the drawing be provided before the end of October (24/09/2015)**
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) **PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) **HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015)**
- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) **DW advised that all the information had been uploaded to Zutech however he would liaise with LM to ascertain what information she was requesting (01/10/2015)**
- Car Park 4 Surface Car Park re JMP Traffic Report – GB noted that he was awaiting an update on progress. GB mentioned that the Building Control process could take 3-4 months and enquired whether BMCL should commence the process now (01/10/2015) **PM noted that there was a meeting with JMP scheduled for 26/10/2015. (22/10/2015)**

- Fire Strategy drawings – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015). GF noted that a meeting was being arranged (08/10/2015) GB noted that there was a meeting arranged for w/c 26<sup>th</sup> October 2015.

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1801

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 18/11/2015:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as of 16/11/2016:

Brookfield MULTIPLEX BM					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a progamme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the	
A51679245					

			<p>works.</p> <p>DL and PM to discuss</p> <p>26/03/2015 02/04/2015</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.</p> <p>28/05/2015 25/06/2015</p> <p>Meeting being organised for 04/06/2015. Invite to be sent to FS.</p> <p>PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</p> <p>30/07/2015</p> <p>DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.</p> <p>06/08/2015</p> <p>GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.</p> <p>13/08/2015</p> <p>GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.</p> <p>27/08/2015</p> <p>GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</p> <p>17/09/2015</p> <p>GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.</p> <p>24/09/2015</p> <p>GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.</p> <p>01/10/2015</p> <p>GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.</p> <p>08/10/2015</p> <p>GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>22/10/2015 12/11/2015</p> <p>Work in progress</p> <p>GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI &amp; ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.</p>	
--	--	--	---	--

2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
			21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
			28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
			04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
			11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
			25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now</p>	

			<p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works.</p>	

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3rd. PM noted that this item would not be able to be sorted in the next couple of weeks.</p> <p>PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26th January is not a line in the sand as at 26th January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26th January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3rd for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.</p> <p>GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.</p> <p>GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.</p> <p>GA advised that he would organise a meeting after the school holiday period.</p> <p>PM advised that this had been discussed at an earlier meeting with the Project Directors. PM understood that a quantum was to be identified.</p> <p>GA noted that GW had advised that this matter is now concluded. PM noted that he was unsure how the fire stopping attributable to each party could be quantified but he understood that GW and DR are agreeing an amount.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p>	12/11/2015

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p> <p>GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.</p> <p>GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].</p> <p>GA noted that GW was to confirm the value.</p> <p>PM advised that confirmation of the value is awaited.</p> <p>GA noted that GW was to confirm the value with DR. Item closed as covered by CE .</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p>
26766	BMCL-EWN-164	Delay in Asbestos removal	<p>10/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which</p>	

			<p>BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract.</p> <p>08/10/2015 GA noted that the information required is for the first building in the phase to be demolished. GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB</p>	
--	--	--	---	--

			12/11/2015	<p>noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
--	--	--	------------	---	--

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p> <p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
27446	NHS EWN 061	Neurosurgery Entrance - Ground Floor Concrete Pour	<p>20/10/2015</p>	<p>Further to discussions on 20th October please confirm revised date for the ground floor concrete pour to allow notification to end users etc.</p> <p>Based on yesterday's progress to date on site I'm concerned that we will miss this week and it will be w/c 26th before this is carried out.</p> <p>Please provide an indication of any impact to programme.</p>	12/11/2015

			22/10/2015 12/11/2015	GB noted that the plate detail was to be concluded between the engineers (there had been a difference of opinion). Also, there had been an issue getting steel fixers. Rob Blady had updated GF. It was agreed that this item could be closed	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/11/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015  21/05/2015 28/05/2015 04/06/2015  11/06/2015 25/06/2015  23/07/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an</p>	

A51679245

			<p>30/07/2015 email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>06/08/2015 PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>13/08/2015 GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>27/08/2015 GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>17/09/2015 GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>24/09/2015 GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>01/010/2015 PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>08/10/2015 GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p> <p>12/11/2015 GA noted that costs are awaited from Land Eng.</p> <p>LJ suggested that all the costs had been uploaded to Sypro. PM agreed to check Sypro for the info.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015 Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>25/06/2015 PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>23/07/2015 GW advised that BMCL were preparing pricing.</p> <p>30/07/2015 GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>06/08/2015 GW noted this is WIP.</p> <p>13/08/2015 PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p>	

			<p>27/08/2015 17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015 08/10/2015 22/10/2015</p> <p>12/11/2015</p>	<p>GW noted that costs had been uploaded for NHS review.</p> <p>PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.</p> <p>PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.</p> <p>GW advised that he was awaiting Land Eng to break down the costs</p> <p>GA noted that cost breakdown is awaited from Land Eng.</p> <p>PM noted that he had asked for additional info re</p> <ol style="list-style-type: none"> <li>1- change to white lining</li> <li>2- installation of new circuit</li> <li>3- paving slabs in front of the feeder pillar</li> </ol> <p>GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 3</p> <p><b>LJ advised that she would upload the Mercury cost asap. PM enquired why the quote included an excavator/dump truck. LJ agreed to provide a revised cost break down.</b></p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p>Please organise an preliminary meeting with design team and Board to establish scope in more detail.</p> <p><i>(Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	12/11/2015

			23/07/2015	PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27 <sup>th</sup> May 2010 was a significant date.	
			30/07/2015	DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.	
			06/08/2015	PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1 <sup>st</sup> element being due to the NHS and the 2 <sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.	
			13/08/2015	PM noted that there had been a few additions to this item (PMI 429 & PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.	
			27/08/2015	PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.	
			17/09/2015	GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.	
			01/10/2015	GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item.	
			08/10/2015	GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21 <sup>st</sup> October 2015. If nurses require training then further training would be arranged.	

			22/10/2015	PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.	
			12/11/2015	PM noted that the ward and validation information had all been handed over. It was noted that GW and DR are discussing costs. It was agreed that the PMI could be closed.	
4042	PMI 425 -	EXTERNALS WORKS – TREE GRATINGS	07/07/2015	The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.  Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.  Prepare a sample grating coated with Smartkote – Protectakote UVR, anti slip coating, colour – translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.  Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a>	12/11/2015
			23/07/2015	Notify Board team once sample prepared for review. FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.	
			30/07/2015	PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal.	
			06/08/2015	It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.	
			13/08/2015	GA advised that the installation is due to commence the following week.	
			27/08/2015	GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].	
			17/09/2015	GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.	
			24/09/2015	PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.	
			01/10/2015	GA advised that BMCL are awaiting information from Land Engineer regarding in relation to the galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.	
			08/10/2015	GA advised that BMCL are awaiting copy of the invoice from Land Eng.	
			22/10/2015	GB noted that he was not aware of the invoice having been received by BMCL.	

A51679245

4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>24/09/2015 GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>01/10/2015 GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>08/10/2015 GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>22/10/2015 GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>12/11/2015 PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTURAL TERTIARY BLINDS REPAIRS	17/09/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full</p>	

			<p>operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>01/10/2015 08/10/2015 22/10/2015 12/11/2015</p> <p>It is understood that around 70 locations are affected. GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info. GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon. PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap. LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	<p>17/09/2015 24/09/2015 01/10/2015 22/10/2015 12/11/2015</p> <p>Please provide a cost to change the names of hospitals on system.</p> <p>Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha. SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes. Feedback from Estates Dept awaited PM noted that the names had been changed by Signbrand at no cost therefore it was agreed this item could be closed.</p>	12/11/2015
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015</p> <p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p>	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	<p>25/09/2015</p> <p>The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets</p>	

			01/10/2015 22/10/2015  12/11/2015	GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room.  DW suggested that a duct would have to be taken from theatre ducting. BMCL had received a design from WWhittle however there is a bit of work involved in installing the additional ventilation and consideration would need to be given to the disruption factor, HAI Scribe needs, etc.	
4769	PMI 445	RTPI BUS SIGNS - PROVISION OF 4 No 6 AMP BREAKERS IN FP11	20/10/2015   12/11/2015	In feeder pillar FP11 please supply and install 4@6 amp 230v single phase breakers, these to be RCD, but if space does not permit can be RCBO's. Please proceed immediately with this work.  Please supply and install 4@6 amp 230v single phase, these to be RCD, but if space does not permit can be RCBO's. Note the four supplies must not be linked to any to any device that controls operation by daylight (PIR) as the RTPI signs will be operational 24/7. Connections to the breakers will be made by the installer of the RTPI signage (CUBIC). Plan is to install signs in 2nd week November.  It was noted that CE 152 had been issued which covered this PMI therefore the PMI should be closed.	12/11/2015
4793	PMI 446	ADULT HOSPITAL - WARD 4B ROOM HOW-208 CONNECTIONS TO FITTED WHB	21/10/2015   12/11/2015	Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.  Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.  Please complete works by 29th October.  The H&CW services are piped to beneath the WHB and only require final flexi-connections. The waste bottle trap requires to be connected to the waste spigot installed by Brookfield.  ** Additional note added to PMI ** - Flush system prior to final connection/liaise with Estates It was noted that CE 153 had been issued which covered this PMI therefore the PMI should be closed. PM noted that the whb still had a sign up re flushing and DW advised that generally the flushing signage remains in place until the sterilisation results are received. DW agreed to check this out.	12/11/2012
4795	PMI 447 -	ADULT HOSPITAL LEVEL 1 CRITICAL CARE WARD 5 No. ISOLATION ROOMS	21/10/2015	Supply and fit stainless steel D-handles to 5 No doors as noted below. Fix D handles over existing stainless steel push plates to avoid repairs to doors.  To the larger main leaf of the penny farthing door set between the pressurised lobby and the single room, supply and install 1 No. st. steel D handle on the lobby side of the door. This side is currently fitted with a st. steel push plate. Please leave push plate in place and supply a D handle to sit over the plate so the handle and its fixing rose need to be larger than the overall length of the plate. Single bedroom room numbers are - CCW140; CCW-165; CCW-242; CCW-025 and CCW-111. Note these should only be fitted in locations where lever handles on both side of doors do NOT occur.	12/11/2015

			22/10/2015  12/11/2015	PM requested that GB check the Ironmongery schedule re door handles for the 10 isolation rooms as 5 isolation room doors have different handles from the other 5 isolation rooms. GB suggested that the ironmongery should have been consistent on all the isolation room doors.  It was noted that CE 154 had been issued which covered this PMI therefore the PMI should be closed.	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015  12/11/2015	Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.  Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015  12/11/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .  The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015  12/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge , water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter.  GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
A51679245					

16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
17848	CE 152	ARRIVAL SQUARE - RTP1 BUS SIGN ELECTRICAL CONNECTIONS	12/11/2015	Provide and install 4 @ 6amp RCBO circuit breakers in feeder pillar 11 as per PMI 445. To be on permanent power supply not controlled by PIR. Funded from Section 75 fund for Fastlink installation.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	17/11/2015
17850	CE 153	QEUH LEVEL 4 WARD B ROOM HOW-208 - CONNECT GP2 WHB TO SERVICES	12/11/2015	Connect vanity basin in fitted unit, supplied and installed by Board, to H+C water supply and 38mm drain outlet, commission and sanitise water pipes, as per PMI 446. Funded from Board Group 2 equipment budget.  Agreed cost [REDACTED] inc.OH+P but excluding VAT.	17/11/2015
17852	CE 154	QEUH CCW 5 No ISOLATION ROOMS - ADDITIONAL DOOR HANDLES	12/11/2015	In rooms CCW-140; 165; 242; 025 and 111 supply and install stainless steel D handles as per PMI 447.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	17/11/2015
17855	CE 155	PHASE 3A - CAR PARK 4 BUILDING WARRANT	12/11/2015	Please proceed with design to a level to make a formal submission and secure full building warrant consent.  Agreed cost [REDACTED] incl. of OH+P but excl VAT.	17/11/2015

#### Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015.(19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference n opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted

that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015)

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015)
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015) PM advised that a plan showing which tiles BMCL would be replacing had been received. GA noted that there is circa 20 tiles still to be replaced. PM noted that the problem is ongoing and that the NHS may need to bring in a building expert to look at the issue and provide feedback. (12/11/2015)
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015)

- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) DW advised that all the information had been uploaded to Zutec however he would liaise with LM to ascertain what information she was requesting (01/10/2015) It was noted that BMCL had received no further feedback from LM therefore the item could be closed (12/11/2015)
- Fire Strategy drawings report – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015). GF noted that a meeting was being arranged (08/10/2015) GB noted that there was a meeting arranged for w/c 26<sup>th</sup> October 2015. GB advised that he had met with GDonnelly and WSP and that WSP are updating their strategy and providing additional information requested by GD (12/11/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1824

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 18/11/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014	Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.	
			04/12/2014	DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.	
			08/01/2015	DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate.	
			15/01/2015	AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.	
			22/01/2015	DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.	
			29/01/2015	GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.	
			05/02/2015	GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.	
			19/02/2015	Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3 <sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14 <sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley & Kirkwood Air Products and HPI.	
			26/02/2015	DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.	
			05/03/2015	DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.	
			12/03/2015	DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.	
			19/03/2015	PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do	

A51679245

			<p>the works.</p> <p>26/03/2015 02/04/2015</p> <p>DL and PM to discuss</p> <p>PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.</p> <p>28/05/2015 25/06/2015</p> <p>Meeting being organised for 04/06/2015. Invite to be sent to FS.</p> <p>PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</p> <p>30/07/2015</p> <p>DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.</p> <p>06/08/2015</p> <p>GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.</p> <p>13/08/2015</p> <p>GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.</p> <p>27/08/2015</p> <p>GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</p> <p>17/09/2015</p> <p>GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.</p> <p>24/09/2015</p> <p>GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.</p> <p>01/10/2015</p> <p>GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.</p> <p>08/10/2015</p> <p>GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>22/10/2015 12/11/2015</p> <p>Work in progress</p> <p>GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI &amp; ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.</p>	
--	--	--	---	--

2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
			21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
			28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
			04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
			11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
			25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now</p>	

			<p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p>	
26026	BMCL-EWN-159	Fire Stopping Reinstatement	<p>22/07/2015</p> <p>23/07/2015</p> <p>30/07/2015</p> <p>05/08/2015</p>	<p>Further to EWN meeting on 11/6/2015 where BM noted that there were instances where NHS direct contractors had not reinstated fire stopping between compartment walls we have now completed the reinstatement of all affected works.</p> <p>The scope of works involved physical checks in every compartment room by room and reinstatement as necessary.</p> <p>Board to issue PMI/ CE covering the works.</p> <p>FS advised that JRedmond had taken the marked up drawings and carried out sampling. GW noted that the NHS were to issue a PMI for the firestopping survey works. GW noted that BMCL had a bill for [REDACTED] for the works which he needed to progress. GB suggested that BMCL would need sign-off of the fire stopping marked up drawings. PM agreed to sign off the survey results for the fire stopping. A discussion regarding the associated costs would be needed. DH suggested that there was no definition of the scope of works and the NHS would need to look at the costs /works carried out to make there was no double counting – NHS Contractor issue/BMCL contractor issue)</p> <p>PM and GW to discuss. PM noted that he wasn't sure how it would be possible to agree who is responsible for not reinstating fire stopping. PM agreed to discuss this with DH in the first instance.</p> <p>GW advised that an offer had been provided to PM. PM acknowledged receiving the offer noting that he did not know how can accept the offer. GW advised that the NHS have the survey results and the price is based on a %. DL noted that there was to be a line in the sand drawn and BMCL to carry out the works.</p>	

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>GW noted that when BMCL handed over the hospitals to the NHS that all the fire stopping had been done. FS advised that the fire stopping was part of the building control sign-off. DL suggested that BMCL did not have all the fire stopping fully complete or that there wasn't fire stopping interrupted due to BMCL works. GW acknowledged that BMCL would still have had some fire stopping works to complete. DL advised that he would review the proposal.</p> <p>GW advised that he needs to know how to proceed as BMCL have already paid Astins for the work. There had been no costs included for Mercury for the provision of the pillows or physically putting the missing pillows back in.</p> <p>GA advised that there is a thread on Aconex with all the information – all fire stopping is complete. It was enquired how the NHS would want to progress to close this item out. PM advised that he will need a print of the complete package of info. GW advised that BMCL have not charged for replacement bags which were replaced as the checks were being done. BMCL are looking for NHS to pay 2/3rds and BMCE to pay 1/3rd. PM noted that this item would not be able to be sorted in the next couple of weeks.</p> <p>PM advised that he had printed off the Aconex pack but that he wasn't sure it contained the information that was needed for review. GA advised that it was on an Aconex uploaded by Fergus. PM suggested that there would need to be a separate meeting to discuss this item and that he wasn't sure how this matter could be concluded. GW advised that BMCL had carried out all of the reinstatement works in relation to both the PMI and NHS Contractor related issues. The costs issued from BMCL are Astins costs and the information includes the time sheets and costs for materials. GA agreed to print off the drawings so that a meeting can be organised to review and discuss. PM noted that in his view the 26th January is not a line in the sand as at 26th January the building was not complete. GW noted that Capita signed off the building as complete and that BMCL have a completion certificate. As at 26th January Astins assure BMCL that all the fire stopping was complete. GW had reduced the Astins fee by 1/3rd for the PMI works, etc. BMCL had not included any Mercury costs or BMCL supervision costs in the cost information uploaded. PM noted that Capita did not check every nook and cranny. GW reported that it was BMCL who identified and advised the NHS that the group 5 contractors were not reinstating the fire stopping.</p> <p>GA noted that he would print off the drawings and arrange a separate meeting. DH enquired about the reference at the previous meeting to the Board's Group 5 contractors noting that the majority of their works did not extend outwith the rooms they were working in. GA advised that it was planned to print off the drawings and overlay with the Group 5 cables runs.</p> <p>GA advised that Danielle is currently printing off the drawings and he would organise a meeting asap thereafter.</p> <p>GA advised that he would organise a meeting after the school holiday period.</p> <p>PM advised that this had been discussed at an earlier meeting with the Project Directors. PM understood that a quantum was to be identified.</p> <p>GA noted that GW had advised that this matter is now concluded. PM noted that he was unsure how the fire stopping attributable to each party could be quantified but he understood that GW and DR are agreeing an amount.</p>	
26405	BMCL-EWN-160	Delays to piling at VIE2	<p>10/08/2015</p>	<p>Following today's meeting on site Gillon Armstrong/ Graham Forsyth we are unable to commence the VIE works due to outstanding information/ lack of certification for asbestos clearance works.</p> <p>The implication of this is that is we will need to stand down our piling contractor and demobilise the piling rig on site and re mobilise to form the VIE piles at a later date which will result in us incurring additional costs.</p>	12/11/2015

			<p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>Actions required;</p> <ol style="list-style-type: none"> <li>1. Please provide a PMI to stand down works.</li> <li>2. Provide asbestos clearance certificate for solemn of Maternity Building</li> <li>3. Confirm acceptance of medical gas design</li> <li>4. Agree isolation strategy (if required) for VIE pipework during piling works – Action by NHS &amp; BM</li> </ol> <p>GW advised that BMCL are awaiting info from Balfour Beattie. To obtain a cost BMCL would potentially need a return date for the rig. GW suggested that cost may be [REDACTED].</p> <p>Cross ref PMI 434. GA advised that the costs had been uploaded to PMI 434.</p> <p>GA advised that the costs had been uploaded. PM advised that he would request DR to review asap.</p> <p>GA advised that the costs had been uploaded. PM noted that the CE had been issued. DH advised that DR had reviewed the cost information and commented that the quote contains a cost of [REDACTED] to relocate the rig and a separate cost for demobilisation of [REDACTED]. DR suggests that the cost therefore would be [REDACTED] - [REDACTED] equalling [REDACTED].</p> <p>GA noted that GW was to confirm the value.</p> <p>PM advised that confirmation of the value is awaited.</p> <p>GA noted that GW was to confirm the value with DR. Item closed as covered by CE .</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	
26766	BMCL-EWN-164	Delay in Asbestos removal	<p>10/09/2015</p> <p>17/09/2015</p> <p>24/09/2015</p>	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which</p>	

			<p>BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract.</p> <p>08/10/2015 GA noted that the information required is for the first building in the phase to be demolished. GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB</p>	
--	--	--	---	--

			12/11/2015	<p>noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detaile don programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be

			<p>06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p> <p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
27446	NHS EWN 061	Neurosurgery Entrance - Ground Floor Concrete Pour	<p>20/10/2015</p>	<p>Further to discussions on 20th October please confirm revised date for the ground floor concrete pour to allow notification to end users etc.</p> <p>Based on yesterday's progress to date on site I'm concerned that we will miss this week and it will be w/c 26th before this is carried out.</p> <p>Please provide an indication of any impact to programme.</p>	12/11/2015

			22/10/2015 12/11/2015	GB noted that the plate detail was to be concluded between the engineers (there had been a difference of opinion). Also, there had been an issue getting steel fixers. Rob Blady had updated GF. It was agreed that this item could be closed	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/11/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015  21/05/2015 28/05/2015 04/06/2015  11/06/2015 25/06/2015  23/07/2015	<p>Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.</p> <p>At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.</p> <p>At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.</p> <p>It was agreed that BMCL will liaise with Siemens</p> <p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an</p>	

A51679245

			<p>30/07/2015 email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>06/08/2015 PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>13/08/2015 GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>27/08/2015 GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>17/09/2015 GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>24/09/2015 GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>01/10/2015 PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>08/10/2015 GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p> <p>12/11/2015 GA noted that costs are awaited from Land Eng. LJ suggested that all the costs had been uploaded to Sypro. PM agreed to check Sypro for the info.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	<p>03/06/2015 Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance.</p> <p>Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area.</p> <p>25/06/2015 PM advised that he would liaise with JPhillips re doing the works at the weekend.</p> <p>23/07/2015 GW advised that BMCL were preparing pricing.</p> <p>30/07/2015 GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective.</p> <p>06/08/2015 GW noted this is WIP.</p> <p>13/08/2015 PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs.</p>	

			<p>27/08/2015 17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015 08/10/2015 22/10/2015</p> <p>12/11/2015</p>	<p>GW noted that costs had been uploaded for NHS review.</p> <p>PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info.</p> <p>PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box.</p> <p>GW advised that he was awaiting Land Eng to break down the costs</p> <p>GA noted that cost breakdown is awaited from Land Eng.</p> <p>PM noted that he had asked for additional info re</p> <ol style="list-style-type: none"> <li>1- change to white lining</li> <li>2- installation of new circuit</li> <li>3- paving slabs in front of the feeder pillar</li> </ol> <p>GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 3</p> <p><b>LJ advised that she would upload the Mercury cost asap. PM enquired why the quote included an excavator/dump truck. LJ agreed to provide a revised cost break down.</b></p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The performance specification to be;</i></p> <ul style="list-style-type: none"> <li>• 10-12 air changes hour</li> <li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li> <li>• Propose solution to seal ceilings with current grid arrangement.</li> <li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li> </ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p>Please organise an preliminary meeting with design team and Board to establish scope in more detail.</p> <p><i>(Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</i></p>	12/11/2015

			23/07/2015	PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27 <sup>th</sup> May 2010 was a significant date.
			30/07/2015	DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.
			06/08/2015	PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1 <sup>st</sup> element being due to the NHS and the 2 <sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.
			13/08/2015	PM noted that there had been a few additions to this item (PMI 429 & PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.
			27/08/2015	PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges and air permeability tests.
			17/09/2015	GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.
			01/10/2015	GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item.
			08/10/2015	GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21 <sup>st</sup> October 2015. If nurses require training then further training would be arranged.

			22/10/2015	PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.	
			12/11/2015	PM noted that the ward and validation information had all been handed over. It was noted that GW and DR are discussing costs. It was agreed that the PMI could be closed.	
4042	PMI 425 -	EXTERNALS WORKS – TREE GRATINGS	07/07/2015	The Board have received a number of complaints from members of the public and staff that the surface of the tree gratings is slippery and there have been a number of falls resulting. Undertake review and works as noted below.  Please provide the following information regarding the tree gratings. Manufacturers product catalogue with supporting information of reference sites where product has been used and information relative to slip resistance.  Prepare a sample grating coated with Smartkote – Protectakote UVR, anti slip coating, colour – translucent, applied as per manufacturer's instructions, application to surfaces of grating coming into contact with foot traffic. Proceed immediately with sample.  Link: <a href="http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html">http://www.anti-slip-paint.co.uk/protectakote-litre-p-248.html</a>	12/11/2015
			23/07/2015	Notify Board team once sample prepared for review. FS advised that BMCL are awaiting samples from Land Eng – barrier and anti-slip. PM requested that the product spec be provided. GB suggested that BMCL should check that what was fitted is what was specified. FS advised that the product spec is on Zutec.	
			30/07/2015	PM noted that the sticky paint solution didn't work when wet. GA has shown another proposal.	
			06/08/2015	It was noted that the small fencing is in manufacture. GB advised that Joanne (Gillespies) had suggested that a resin water penetrable gravel could be used. PM suggested that it was too late to consider other options. GA confirmed that the small fencing is in manufacture. PM advised that BMCL should continue to progress with the small fencing.	
			13/08/2015	GA advised that the installation is due to commence the following week.	
			27/08/2015	GW advised that costs have been uploaded. As far as the grating manufacturer and Gillespies are concerned the gratings are ok, as specified and as fitted elsewhere. BMCL are requesting a CE for the tree gratings. PM advised that there have been recorded incidents on site where people have been injured, incidents have been logged on the NHS Datix system. There have also been complaints about the gratings being slippery. GW noted that the cost is circa [REDACTED].	
			17/09/2015	GA advised that the posts and chains had been installed. PM advised that there have been 4 separate people slipping/tripping on the gratings and query the galvanising. GW agreed to raise this with the Land Eng noting that the manufacturer and Landscape Architects have confirmed that there is no issue with these gratings at any other site.	
			24/09/2015	PM advised that he still considered that the gratings were not fit for purpose and noted that BMCL were to check out the proprietary galvanising.	
			01/10/2015	GA advised that BMCL are awaiting information from Land Engineer regarding in relation to the galvanising. GW advised that verbal confirmation regarding the galvanising had been provided.	
			08/10/2015	GA advised that BMCL are awaiting copy of the invoice from Land Eng.	
			22/10/2015	GB noted that he was not aware of the invoice having been received by BMCL.	

4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>24/09/2015 GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>01/10/2015 GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>08/10/2015 GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>22/10/2015 GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>12/11/2015 PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTURAL TERTIARY BLINDS REPAIRS	17/09/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full</p>	

			<p>operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>01/10/2015 08/10/2015 22/10/2015 12/11/2015</p> <p>It is understood that around 70 locations are affected. GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info. GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon. PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap. LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4549	PMI 440	3 No. INTERACTIVE WAYFINDING TOUCHSCREENS	<p>17/09/2015 24/09/2015 01/10/2015 22/10/2015 12/11/2015</p> <p>Please provide a cost to change the names of hospitals on system.</p> <p>Please provide a cost to change the names of the hospitals on the system to the Queen Elizabeth University Hospital and the Royal Hospital for Children. GB suggested that Natasha had previously provided information to the about making minor changes to the system. DW suggested that PM should liaise with Maggie Walshe/Stephen Drummond in the first instance. GB agreed to contact Natasha. SF advised that the Estates Helpdesk was checking that their access to the system is sufficient to make the changes. Feedback from Estates Dept awaited PM noted that the names had been changed by Signbrand at no cost therefore it was agreed this item could be closed.</p>	12/11/2015
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015</p> <p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p>	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	<p>25/09/2015</p> <p>The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets</p>	

			01/10/2015 22/10/2015  12/11/2015	GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room.  DW suggested that a duct would have to be taken from theatre ducting. BMCL had received a design from WWhittle however there is a bit of work involved in installing the additional ventilation and consideration would need to be given to the disruption factor, HAI Scribe needs, etc.	
4769	PMI 445	RTPI BUS SIGNS - PROVISION OF 4 No 6 AMP BREAKERS IN FP11	20/10/2015   12/11/2015	In feeder pillar FP11 please supply and install 4@6 amp 230v single phase breakers, these to be RCD, but if space does not permit can be RCBO's. Please proceed immediately with this work.  Please supply and install 4@6 amp 230v single phase, these to be RCD, but if space does not permit can be RCBO's. Note the four supplies must not be linked to any to any device that controls operation by daylight (PIR) as the RTPI signs will be operational 24/7. Connections to the breakers will be made by the installer of the RTPI signage (CUBIC). Plan is to install signs in 2nd week November.  It was noted that CE 152 had been issued which covered this PMI therefore the PMI should be closed.	12/11/2015
4793	PMI 446	ADULT HOSPITAL - WARD 4B ROOM HOW-208 CONNECTIONS TO FITTED WHB	21/10/2015   12/11/2015	Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.  Please make final connections to services (installed by Brookfield Multiplex) to wash hand basin on fitted unit (installed by others) services are hot water, cold water and 38mm waste connection.  Please complete works by 29th October.  The H&CW services are piped to beneath the WHB and only require final flexi-connections. The waste bottle trap requires to be connected to the waste spigot installed by Brookfield.  ** Additional note added to PMI ** - Flush system prior to final connection/liaise with Estates It was noted that CE 153 had been issued which covered this PMI therefore the PMI should be closed. PM noted that the whb still had a sign up re flushing and DW advised that generally the flushing signage remains in place until the sterilisation results are received. DW agreed to check this out.	12/11/2012
4795	PMI 447 -	ADULT HOSPITAL LEVEL 1 CRITICAL CARE WARD 5 No. ISOLATION ROOMS	21/10/2015	Supply and fit stainless steel D-handles to 5 No doors as noted below. Fix D handles over existing stainless steel push plates to avoid repairs to doors.  To the larger main leaf of the penny farthing door set between the pressurised lobby and the single room, supply and install 1 No. st. steel D handle on the lobby side of the door. This side is currently fitted with a st. steel push plate. Please leave push plate in place and supply a D handle to sit over the plate so the handle and its fixing rose need to be larger than the overall length of the plate. Single bedroom room numbers are - CCW140; CCW-165; CCW-242; CCW-025 and CCW-111. Note these should only be fitted in locations where lever handles on both side of doors do NOT occur.	12/11/2015

			22/10/2015  12/11/2015	PM requested that GB check the Ironmongery schedule re door handles for the 10 isolation rooms as 5 isolation room doors have different handles from the other 5 isolation rooms. GB suggested that the ironmongery should have been consistent on all the isolation room doors.  It was noted that CE 154 had been issued which covered this PMI therefore the PMI should be closed.	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015  12/11/2015	Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.  Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015  12/11/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .  The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015  12/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge , water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample.	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
17848	CE 152	ARRIVAL SQUARE - RTPI BUS SIGN ELECTRICAL CONNECTIONS	12/11/2015	Provide and install 4 @ 6amp RCBO circuit breakers in feeder pillar 11 as per PMI 445. To be on permanent power supply not controlled by PIR. Funded from Section 75 fund for Fastlink installation.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	17/11/2015
17850	CE 153	QEUH LEVEL 4 WARD B ROOM HOW-208 - CONNECT GP2 WHB TO SERVICES	12/11/2015	Connect vanity basin in fitted unit, supplied and installed by Board, to H+C water supply and 38mm drain outlet, commission and sanitise water pipes, as per PMI 446. Funded from Board Group 2 equipment budget.  Agreed cost [REDACTED] inc.OH+P but excluding VAT.	17/11/2015
17852	CE 154	QEUH CCW 5 No ISOLATION ROOMS - ADDITIONAL DOOR HANDLES	12/11/2015	In rooms CCW-140; 165; 242; 025 and 111 supply and install stainless steel D handles as per PMI 447.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	17/11/2015
17855	CE 155	PHASE 3A - CAR PARK 4 BUILDING WARRANT	12/11/2015	Please proceed with design to a level to make a formal submission and secure full building warrant consent.  Agreed cost [REDACTED] incl. of OH+P but excl VAT.	17/11/2015
18120	CE 156	ARRIVAL SQUARE - WHITE LINING AND POWER SUPPLY TO TRAFFIC SIGNALS	26/11/2015	The Board confirm works as set out in PMI 411 to reconfigure white lining at junctions in two locations and separate power supply to three sets of traffic signals from local street lighting, e.g on separate breakers in power pillar, all as requested by Glasgow City Council. Funded from Section 75 budget.	
18122	CE 157	QEUH & RHC WORKS - ADDITIONAL FIRE STOPPING WORKS	26/11/2015	The Board confirm the requirement for post completion works by Brookfield Multiplex to reinstate fire stopping disturbed by 3rd party contractor works. (Note these additional works are not as a result of on going works or omissions by Brookfield Multiplex).	

## Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) **DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) **DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015)**
- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if

the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the tile on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015) PM advised that a plan showing which tiles BMCL would be replacing had been received. GA noted that there is circa 20 tiles still to be replaced. PM noted that the problem is ongoing and that the NHS may need to bring in a building expert to look at the issue and provide feedback. (12/11/2015)

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015)
- Machair liquidation – DH advised that Lynn Morrison has asked for the original data prior to Machair being bought out (24/09/2015) DW advised that all the information had been uploaded to Zutech however he would liaise with LM to ascertain what information she was requesting (01/10/2015) It was noted that BMCL had received no further feedback from LM therefore the item could be closed (12/11/2015)
- Fire Strategy drawings report – GB suggested that a meeting should be arranged to go over the comments from GDonnelly and that GB would organize WSP Fire to attend the meeting (01/10/2015). GF noted that a meeting was being arranged (08/10/2015) GB noted that there was a meeting arranged for w/c 26<sup>th</sup> October 2015. GB advised that he had met with GDonnelly and WSP and that WSP are updating their strategy and providing additional information requested by GD (12/11/2015)

			<p>the works.</p> <p>26/03/2015 DL and PM to discuss</p> <p>02/04/2015 PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.</p> <p>28/05/2015 Meeting being organised for 04/06/2015. Invite to be sent to FS.</p> <p>25/06/2015 PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</p> <p>30/07/2015 DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.</p> <p>06/08/2015 GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.</p> <p>13/08/2015 GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.</p> <p>27/08/2015 GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</p> <p>17/09/2015 GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.</p> <p>24/09/2015 GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.</p> <p>01/10/2015 GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.</p> <p>08/10/2015 GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>22/10/2015 Work in progress</p> <p>12/11/2015 GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI &amp; ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.</p> <p>26/11/2015 GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.</p>	
--	--	--	---	--

2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
			21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
			28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
			04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
			11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
			25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now</p>	

			<p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015 26/11/2015</p>	<p>be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>GA noted that DW is chasing up Mercury for updated drawings</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015 08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015 01/10/2015 08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p>
26766	BMCL-EWN-164	Delay in Asbestos removal	<p>10/09/2015</p> <p>17/09/2015</p>	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos</p>	

			<p>24/09/2015</p> <p>Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract.</p>	
--	--	--	--	--

			08/10/2015  22/10/2015  12/11/2015  26/11/2015	<p>GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUILDINGS	24/11/2015          26/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015    26/11/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QUEH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p>	

2798 2	BMCL-EWN- 169	ADVERSE WEATHER CONDITIONS	03/12/2015	We are currently experiencing delays to the works at the INS Entrance due to adverse weather conditions. The overall shift in programme commencement date has pushed the programme back such that we are erecting the structure and envelope works during the winter period which had not previously been envisaged.	
-----------	------------------	-------------------------------	------------	--	--

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>06/08/2015 PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>13/08/2015 GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>27/08/2015 GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>17/09/2015 GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>24/09/2015 GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>01/010/2015 GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>08/10/2015 GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>22/10/2015 PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p> <p>12/11/2015 GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p> <p>26/11/2015 GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
27784	NHS EWN 062	Decontamination Tank	17/11/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are	

	-		26/11/2015	completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015 26/11/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.  Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/11/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.  At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.	
			21/05/2015	It was agreed that BMCL will liaise with Siemens	

A51679245

			28/05/2015 04/06/2015  11/06/2015 25/06/2015 23/07/2015  30/07/2015 06/08/2015  13/08/2015 27/08/2015 17/09/2015  24/09/2015  01/10/2015 08/10/2015 12/11/2015 26/11/2015	<p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p> <p>GA noted that costs are awaited from Land Eng.</p> <p>LJ suggested that all the costs had been uploaded to Sypro. PM agreed to check Sypro for the info.</p> <p>GA noted that LJ had advised that costs have been uploaded. PM advised that he had issued a CE on basis of PMI 411. It was agreed this item could be closed.</p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a</p>	

			<p>25/06/2015 23/07/2015 30/07/2015  06/08/2015 13/08/2015  27/08/2015 17/09/2015   24/09/2015  01/10/2015 08/10/2015 22/10/2015   12/11/2015  26/11/2015</p>	<p>circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area. PM advised that he would liaise with JPhillips re doing the works at the weekend. GW advised that BMCL were preparing pricing. GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective. GW noted this is WIP. PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs. GW noted that costs had been uploaded for NHS review. PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info. PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box. GW advised that he was awaiting Land Eng to break down the costs GA noted that cost breakdown is awaited from Land Eng. PM noted that he had asked for additional info re 1- change to white lining 2- installation of new circuit 3- paving slabs in front of the feeder pillar GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 3 LJ advised that she would upload the Mercury cost asap. PM enquired why the quote included an excavator/dump truck. LJ agreed to provide a revised cost break down. <b>PM advised that CE 156 had been issued earlier that day therefore this item could be closed.</b></p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The</i></p>	12/11/2015

Page 1859

			<p>performance specification to be;</p> <ul style="list-style-type: none"><li>• 10-12 air changes hour</li><li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li><li>• Propose solution to seal ceilings with current grid arrangement.</li><li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li></ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</p>	
		23/07/2015	PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27 <sup>th</sup> May 2010 was a significant date.	
		30/07/2015	DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.	
		06/08/2015	PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1 <sup>st</sup> element being due to the NHS and the 2 <sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.	
		13/08/2015	PM noted that there had been a few additions to this item (PMI 429 & PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.	
		27/08/2015	PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges	

			17/09/2015	and air permeability tests. GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.	
			01/10/2015	GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item.	
			08/10/2015	GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21 <sup>st</sup> October 2015. If nurses require training then further training would be arranged.	
			22/10/2015	PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.	
			12/11/2015	PM noted that the ward and validation information had all been handed over. It was noted that GW and DR are discussing costs. It was agreed that the PMI could be closed.	
			26/11/2015	PM noted that CE 159 had been issued. The costs had been agreed between DR and GW. It was agreed this item could be closed.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.  The names for the new hospitals are;  The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow  Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.	

			17/09/2015 24/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015 26/11/2015	<p>PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015       01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon.</p> <p>PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.</p> <p>LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:	

			<p>01/10/2015 08/10/2015 22/10/2015 12/11/2015</p> <p>26/11/2015</p>	<p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired. GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.</p>	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	<p>25/09/2015 01/10/2015 22/10/2015 12/11/2015</p> <p>26/11/2015</p>	<p>The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room. DW suggested that a duct would have to be taken from theatre ducting. BMCL had received a design from WWhittle however there is a bit of work involved in installing the additional ventilation and consideration would need to be given to the disruption factor, HAI Scribe needs, etc. PM advised that CE 158 had been issued therefore this item could be closed.</p>	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	<p>22/10/2015</p> <p>12/11/2015 26/11/2015</p>	<p>Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.</p> <p>Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up. GA advised that the works were due to be commenced 3rd/4th December 2015.</p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	<p>27/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p>	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p> <p>The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE. GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.</p>	

4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015 26/11/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees. PM advised that CE 155 had been issued therefore this item could be closed.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015 12/11/2015 26/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that they can prepare a price.	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity.	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view may be considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015	Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC; a) Induction loop to main out patient reception desk. b) PA system in main atrium. c) Static systems wall mounted nurse call panels in out patient departments.	

				Provide photocopy of key documents for reference in folder of lead manager.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p>	
5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015	<p>REH-049 – REHAB/TREATMENT ROOM Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18120	CE 156	ARRIVAL SQUARE - WHITE LINING AND POWER SUPPLY TO TRAFFIC SIGNALS	26/11/2015	The Board confirm works as set out in PMI 411 to reconfigure white lining at junctions in two locations and separate power supply to three sets of traffic signals from local street lighting, e.g on separate breakers in power pillar, all as requested by Glasgow City Council. Funded from Section 75 budget.  Cost confirmed by Project Manager as [REDACTED] incl )H+P but excluding VAT. Build up of costs attached.	02/12/2015
18122	CE 157	QEUH & RHC WORKS - ADDITIONAL FIRE STOPPING WORKS	26/11/2015	The Board confirm the requirement for post completion works by Brookfield Multiplex to reinstate fire stopping disturbed by 3rd party contractor works. (Note these additional works are not as a result of on going works or omissions by Brookfield Multiplex).  Agreed cost [REDACTED] excl VAT.	02/12/2015
18128	CE 158	RHC THEATRE DEPT SCOPE STORE - ADDITIONAL VENTILATION	26/11/2015	Please proceed with works to install additional ventilation to room THE-103., as scoped out under PMI444. The requirement for additional ventilation has result from and under estimation of the heat output from the 4 No drying cabinets transferred from Yorkhill. Cost allocated to Gp.2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	02/12/2015
18133	CE 159	QEUH WARD 4B - ADDITIONAL WORKS ASSOCIATED WITH UPGRADE OF WARD	26/11/2015	Cost arising from additional works to ceilings and M&E infrastructure associated with the general upgrade of the ward.  Agreed cost [REDACTED] incl OH+P but excluding VAT.	02/12/2015

### Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) **GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) **GA advised that DW could be asked to provide an update by email (26/11/2015)**

- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015) PM advised that a plan showing which tiles BMCL would be replacing had been received. GA noted that there is circa 20 tiles still to be replaced. PM noted that the problem is ongoing and that the NHS may need to bring in a building expert to look at the issue and provide feedback. (12/11/2015) GA advised that the last 20 tiles are due on site w/c 30/11/2015. There was 2-3 nights work required and the works would commence as soon as all the tiles are on site. PM suggested that the issue was still ongoing and that he may seek to obtain a second opinion. PM noted that there are tiles at the NCH atrium which need to be replaced as well. PM agreed to confirm the way forward. GA advised that he would ask G O'S to check the basement for any spare tiles and if there are spare tiles he would get the company to fit them. (26/11/2015)
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015)
- Visacom Panels. PM advised that he was being put under pressure to get the circa 64 visacom panels sorted. GA advised that TDSL have taken some spare doors back to the factory to use to identify a solution. GA noted that the 2 isolation room doors at Schiehallion were due on site w/c 30/11/2015 and BMCL would liaise with Jean Kirkwood for access to fit them. GA advised that it had been estimated that there will be circa 1200 sets which will need to be changed. BMCL are going through the door schedule to identify which ones need to be changed. PM suggested that in order to easily identify which visacom panels/doors had been replaced that it may be beneficial to change the door handles to a different colour.

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1868

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 09/12/2015:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract.</p> <p>GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do</p>	

A51679245

			<p>the works.</p> <p>26/03/2015 DL and PM to discuss</p> <p>02/04/2015 PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.</p> <p>28/05/2015 Meeting being organised for 04/06/2015. Invite to be sent to FS.</p> <p>25/06/2015 PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.</p> <p>30/07/2015 DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.</p> <p>06/08/2015 GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.</p> <p>13/08/2015 GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.</p> <p>27/08/2015 GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.</p> <p>17/09/2015 GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.</p> <p>24/09/2015 GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.</p> <p>01/10/2015 GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.</p> <p>08/10/2015 GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.</p> <p>22/10/2015 Work in progress</p> <p>12/11/2015 GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI &amp; ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.</p> <p>26/11/2015 GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.</p>
--	--	--	---

2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p>	
			21/05/2015	<p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	
			28/05/2015	<p>FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p>	
			04/06/2015	<p>FS advised that GB is liaising with Mercury</p>	
			11/06/2015	<p>GB advised that this would be progressed once the works completed in the summer</p>	
			25/06/2015	<p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now</p>	

			<p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015 26/11/2015</p>	<p>be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>GA noted that DW is chasing up Mercury for updated drawings</p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015 08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015 01/10/2015 08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p>	<p>*****</p>
26766	BMCL-EWN-164	Delay in Asbestos removal	<p>10/09/2015</p> <p>17/09/2015</p>	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos</p>	

			<p>24/09/2015</p> <p>Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract.</p>	
--	--	--	--	--

			08/10/2015  22/10/2015  12/11/2015  26/11/2015	<p>GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUILDINGS	24/11/2015          26/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015    26/11/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QUEH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p>	

27982	BMCL-EWN-169	ADVERSE WEATHER CONDITIONS	03/12/2015	We are currently experiencing delays to the works at the INS Entrance due to adverse weather conditions. The overall shift in programme commencement date has pushed the programme back such that we are erecting the structure and envelope works during the winter period which had not previously been envisaged.	
28035	BMCL-EWN-170	Stage 3A Additional time required to process out patients	04/12/2015	Further to the partial demolition and handover of the Out Patients building we can confirm that the original duration for the demolition and removal of this building cannot now be achieved due to the nature of the way it has been partially demolished. The materials generated from the partial demolition of this building have not been segregated adequately and as such this will have to be carried out retrospectively. We have also had to stop works currently in progress on site to make safe the piles of debris in preparation for the high winds forecast. There are also full drums of diesel and a bin containing potentially contaminated asbestos removal PPE that have been left within our site boundary, these require to be removed asap to allow works in this area to continue. The additional duration will be taken into account when the programme is revised following the handover of the remaining building.	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>06/08/2015 PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>13/08/2015 GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>27/08/2015 GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>17/09/2015 GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>24/09/2015 GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>01/010/2015 GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p> <p>08/10/2015 GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p> <p>22/10/2015 PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p> <p>12/11/2015 GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p> <p>26/11/2015 GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
27784	NHS EWN 062	Decontamination Tank	17/11/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are	

	-		26/11/2015	completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015 26/11/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.  Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/11/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
3777	PMI 400 -	ARRIVAL SQ TRAFFIC SIGNALS	18/05/2015	Please effect repairs to traffic signals as per the attached drawing and specification. This work requires to be undertaken as soon as possible as the current set up is affecting scheduling of bus services through Arrival Square.  At location A on attached drawing, please reposition light sensor to give better coverage over lane and improve movement of bus services. Currently sensor partially screened by lamp head that is position in front of it.  At location B on attached drawing re-fit damaged lamp head, in doing so increase the width between the two sets of signal heads for this lane to avoid further damage. Note this third time lamphead has been hit and needs to be positioned to avoid further damage.	
			21/05/2015	It was agreed that BMCL will liaise with Siemens	

A51679245

			28/05/2015 04/06/2015  11/06/2015 25/06/2015 23/07/2015  30/07/2015 06/08/2015  13/08/2015 27/08/2015 17/09/2015  24/09/2015  01/10/2015 08/10/2015 12/11/2015 26/11/2015	<p>FS advised that Jamie Phillips is liaising with Siemens and he would obtain feedback asap.</p> <p>FS advised that he had spoken to Jamie Phillips the previous week and info is awaited back from Siemens. PM advised that PM and PMc had met with the Council as there was items which would stop the sign-off. It had been agreed to remove a lamp head of the islands and to rephrase the lights. PMI 411 had been raised to cover these items.</p> <p>GW noted that the cost had been uploaded on 05/06. PM advised that in his view the sensor head wasn't correctly positioned and suggested this was a Siemens defect.</p> <p>PM noted that JPhillips was getting the white lining done later that week. DH enquired about finishing off the white lining at the bottom of Hardgate Road i.e. was it to the new layout and FS agreed to check this out.</p> <p>FS advised that the white lining had been done. PM advised that he had sent John Sharkey an email to chase up the replacement light heads. GW noted that PM had previously suggested that the light heads were not fit for purpose as they had been hit by numerous buses. GB suggested that BMCL should get confirmation of which lights had been problematic and ask WSP to confirm the design is suitable.</p> <p>PM suggested that this needed to be discussed and the NHS/BMCL attributed costs identified. PM suggested that this item and PMI 411 should be issued as a single CE.</p> <p>GB advised that WSP are reviewing the design development. GB is in dialogue with D Campbell. It was suggested that the buses switching lanes had been hitting the lights. GW noted that there was 3 elements to this a) light repositioning, b) timing and c) sequencing. PM advised that BMCL should identify the sequencing costs for NHS review.</p> <p>GB advised that DCampbell is going to review on site later that day. Info will be provided to GW once known.</p> <p>GB advised that DC has carried out a desktop review and is satisfied that the design is ok. DC had advised that he would be carrying out a site walkround – feedback is awaited.</p> <p>GB noted that DCampbell had confirmed that the design is correct however the road was being used incorrectly. DCampbell had made some suggestions as to how could improve. GW provided a hard copy of the info.</p> <p>PM advised that confirmation of the costs was required from GW as it appeared that a replacement head was included in the costs. GB advised that DC had checked the design and construction and was satisfied they are acceptable.</p> <p>GW noted that he had provided costs and subsequently PM had requested that certain costs be removed. Information is awaited from Land Eng.</p> <p>GA noted that costs are awaited from Land Eng.</p> <p>LJ suggested that all the costs had been uploaded to Sypro. PM agreed to check Sypro for the info.</p> <p><b>GA noted that LJ had advised that costs have been uploaded. PM advised that he had issued a CE on basis of PMI 411. It was agreed this item could be closed.</b></p>	
3881	PMI 411	ARRIVAL SQUARE - ROAD WORKS	03/06/2015	<p>Please re-configure installed arrangement as follows.</p> <p>Transport Hub East - Northbound traffic and Fastlink - Two stop lines require to be relocated 2m prior to the primary poles, as discussed on site 2nd June 2015, NHS/BM/GCC.</p> <p>Transport Hub Puffins (centre) -Zig Zag markings on away side of crossing points require to be relocated a minimum distance of 1.7m / maximum 3m from road studs.</p> <p>Electrical supply - the electrical supply for the traffic signals will require to be separated and a</p>	

			<p>25/06/2015 23/07/2015 30/07/2015  06/08/2015 13/08/2015  27/08/2015 17/09/2015   24/09/2015  01/10/2015 08/10/2015 22/10/2015   12/11/2015  26/11/2015</p>	<p>circuit breaker installed outwith the lighting control panel so that street lighting and traffic signals are not both affected when either needs to be isolated for maintenance. Doors to Signals control boxes - in some locations the operation of the access doors is hampered by soft landscaping. GCC suggested two 600x600mm pc slabs should be placed in front of door where this opens onto grass or other area. PM advised that he would liaise with JPhillips re doing the works at the weekend. GW advised that BMCL were preparing pricing. GW advised that he now had the cost info. PM noted that GCC had suggested that the lights being on a single cable is not acceptable. DW advised that it is acceptable from an electrical perspective. GW noted this is WIP. PM stated that he understood that this item is WIP as of the previous week. GW advised he would check costs. GW noted that costs had been uploaded for NHS review. PM advised that the zig zag lines and hub puffins were agreed however he had gone back to GCC and been advised that it is illegal to wire traffic lights to street lights. GA advised that WW had confirmed that it is not illegal. PM requested that BMCL provide a breakdown of the costs and GW advised that the cost breakdown should be on Sypro. GW provided a hard copy of the cost info. PM noted that he needed the costs to be broken down. PM advised that the cost for the paving slabs at the box were not an NHS issue as is an access matter in that the slabs allowed people to be able to work in/at the box. GW advised that he was awaiting Land Eng to break down the costs GA noted that cost breakdown is awaited from Land Eng. PM noted that he had asked for additional info re 1- change to white lining 2- installation of new circuit 3- paving slabs in front of the feeder pillar GW was to separately itemise the first 2 items. PM did not think that the NHS should pay for item 3 LJ advised that she would upload the Mercury cost asap. PM enquired why the quote included an excavator/dump truck. LJ agreed to provide a revised cost break down. <b>PM advised that CE 156 had been issued earlier that day therefore this item could be closed.</b></p>	
4026	PMI 424	ADULT HOSPITAL HAEMATO-ONCOLOGY WARD LEVEL 4	<p>03/07/2015</p>	<p>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works.</p> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed.</p> <p>Procurement of 2 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed.</p> <p><i>Please proceed with the following design works and procurement of materials as follows; Re design of air handling system in Haemato-oncology ward (level 4) leading to the order, purchase and installation of a larger fan motor and associated equipment and works. The</i></p>	12/11/2015

Page 1880

			<p>performance specification to be;</p> <ul style="list-style-type: none"><li>• 10-12 air changes hour</li><li>• Positive pressure differential between single bedrooms and corridor of 5-10 pascals, and between ward corridor and adjacent stairwells and atrium of 2-3 pascals or confirm maximum achievable during design stage.</li><li>• Propose solution to seal ceilings with current grid arrangement.</li><li>• Propose pressure monitoring solution for rooms viewable from corridor for each room.</li></ul> <p>Procurement of 30 No. new HEPA cartridge filters for the ward, and installation when instructed. Procurement of 5 No. HEPA cartridge filters for the HDU area on Level 1 within CCU Ward, with installation and commissioning when instructed. Please organise an preliminary meeting with design team and Board to establish scope in more detail. (Note 16th July - HEPA filters for CCW/HDU Level 1 NSGH increased from 2 to 5)</p>	
		23/07/2015	PM noted that he would provide a PMI for magnetic gauges. GW advised that BMCL are carrying out a lot of investigation works as to how have got to where we are. DH suggested that in reality what has been provided does not meet the CoS. GW advised that the Board had signed off the RDS and 1:50s. GB advised that the Board had signed off the ceiling plans, etc. DH suggested that it needed to be identified as to why it had changed from a sealed room to a non-sealed room. GW raised concern about growing costs of the investigations i.e. got [REDACTED] costs from ceiling contractor. There is concern that the level 4 changes PMI replicated what was there. PM advised that a way forward had been identified however the level 4 route needed to be looked at. Sign-off from infection control is required. The schedule of the AGVs needed to be checked. The RAMS for the work would need to be provided to the NHS for sign-off. HAI scribe will need to be completed. DH suggested that a User Meeting circa 27 <sup>th</sup> May 2010 was a significant date.	
		30/07/2015	DW advised that the PMI no longer ties up with the works being undertaken i.e. 6 air changes. PM advised that he had provided the spec to Gary Jenkins and no response had been provided back – if no response has been provided by 31/07/2015 then this would be the spec by which BMCL will be validated against. DW noted that a further 2 HEPA filters were scheduled to arrive on site the following day. PM was to asked which rooms were to be prioritised for these filters to be fitted.	
		06/08/2015	PM noted that PMI 430 had been issued re feasibility of installing the gauges. GA noted that the ceilings had been taken down in the single bedrooms and the plasterboard walls are going up – this was expected to be complete by the end of the following week. DL enquired about the potential timing for completion of the works and GA advised it was mid October. GW suggested that there are 2 elements to this issue with the 1 <sup>st</sup> element being due to the NHS and the 2 <sup>nd</sup> element being debateable. GW noted that BMCL are in the process of getting Nightingale to dig through their drawing sign-offs. DL suggested that a separate commercial discussion would be required.	
		13/08/2015	PM noted that there had been a few additions to this item (PMI 429 & PMI 430). GA noted that all plasterboard ceilings are complete, ames taping complete and the lighting, ceiling grilles and decoration works ongoing. BMCL proposed to carry out a sample test w/c 17/08/2015. The works remained on programme however programme to be updated to take account of installation of gauges and final permeability testing.	
		27/08/2015	PM noted that he understood BMCL were to be provided with PMIs for the magnehelics gauges	

			17/09/2015	and air permeability tests. GA advised that the works are ongoing and BMCL are progressing the fit out of the back boxes for the gauges whilst awaiting delivery of the gauges. DW advised that some of the gauges will sit potentially 30-40mm out from the wall where the boxes are being fitted into the concrete. PM enquired how BMCL proposed to detail this. GA advised that BMCL are currently identifying the detailing – may need to fabricate mdf or plastic cover. PM noted that the NHS do not see this item as being an NHS cost therefore costs would need to be discussed in a separate meeting. GW reported that this was not viewed as a BMCL cost. PM requested that BMCL provide a statement which outlines why BMCL consider the NHS are liable for this item.	
			01/10/2015	GW advised that information had been sent to PM outlining why BMCL consider the NHS to be liable for this item.	
			08/10/2015	GA advised that works are ongoing with regards to the gauges, commissioning of the gauges. DW will arrange training on the digital gauges for NHS Estates staff – potential date is 21 <sup>st</sup> October 2015. If nurses require training then further training would be arranged.	
			22/10/2015	PM noted that this item had been discussed at a meeting earlier that day with the Project Directors. PM understood that BMCL were to review the payment application for these works and provide a proposal. PM understood that works are still on line to complete as per programme.	
			12/11/2015	PM noted that the ward and validation information had all been handed over. It was noted that GW and DR are discussing costs. It was agreed that the PMI could be closed.	
			26/11/2015	PM noted that CE 159 had been issued. The costs had been agreed between DR and GW. It was agreed this item could be closed.	
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.  The names for the new hospitals are;  The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow  Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.	

			17/09/2015 24/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015 26/11/2015	<p>PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015       01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon.</p> <p>PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.</p> <p>LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:	

			<p>01/10/2015 08/10/2015 22/10/2015 12/11/2015  26/11/2015</p>	<p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired. <b>GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.</b></p>	
4610	PMI 444 -	THE-103 Scope store - Additional Ventilation	<p>25/09/2015  01/10/2015 22/10/2015  12/11/2015  26/11/2015</p>	<p>The Board request a cost to install additional ventilation to THE-103 Scope store to accommodate the heat output from the scope storage cabinets GW noted that the costing is ongoing GB advised that DW was investigating what needed to be done to install additional ventilation into that room. DW suggested that a duct would have to be taken from theatre ducting. BMCL had received a design from WWhittle however there is a bit of work involved in installing the additional ventilation and consideration would need to be given to the disruption factor, HAI Scribe needs, etc. <b>PM advised that CE 158 had been issued therefore this item could be closed.</b></p>	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	<p>22/10/2015    12/11/2015 26/11/2015</p>	<p>Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.</p> <p>Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up. <b>GA advised that the works were due to be commenced 3rd/4th December 2015.</b></p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	<p>27/10/2015   12/11/2015  26/11/2015</p>	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p> <p>The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE. <b>GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.</b></p>	

4831	PMI 450 -	Car Park 4 - Building Warrant Application	27/10/2015 26/11/2015	Please provide the Board with a cost to take the design to a stage suitable for making a full building warrant application. Costs to include all associated fees. PM advised that CE 155 had been issued therefore this item could be closed.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015 12/11/2015 26/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that they can prepare a price.	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity.	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view may be considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015	Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC; a) Induction loop to main out patient reception desk. b) PA system in main atrium. c) Static systems wall mounted nurse call panels in out patient departments.	

				Provide photocopy of key documents for reference in folder of lead manager.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p>	
5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015	<p>REH-049 – REHAB/TREATMENT ROOM Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18120	CE 156	ARRIVAL SQUARE - WHITE LINING AND POWER SUPPLY TO TRAFFIC SIGNALS	26/11/2015	The Board confirm works as set out in PMI 411 to reconfigure white lining at junctions in two locations and separate power supply to three sets of traffic signals from local street lighting, e.g on separate breakers in power pillar, all as requested by Glasgow City Council. Funded from Section 75 budget.  Cost confirmed by Project Manager as [REDACTED] incl )H+P but excluding VAT. Build up of costs attached.	02/12/2015
18122	CE 157	QEUH & RHC WORKS - ADDITIONAL FIRE STOPPING WORKS	26/11/2015	The Board confirm the requirement for post completion works by Brookfield Multiplex to reinstate fire stopping disturbed by 3rd party contractor works. (Note these additional works are not as a result of on going works or omissions by Brookfield Multiplex).  Agreed cost [REDACTED] excl VAT.	02/12/2015
18128	CE 158	RHC THEATRE DEPT SCOPE STORE - ADDITIONAL VENTILATION	26/11/2015	Please proceed with works to install additional ventilation to room THE-103., as scoped out under PMI444. The requirement for additional ventilation has result from and under estimation of the heat output from the 4 No drying cabinets transferred from Yorkhill. Cost allocated to Gp.2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	02/12/2015
18133	CE 159	QEUH WARD 4B - ADDITIONAL WORKS ASSOCIATED WITH UPGRADE OF WARD	26/11/2015	Cost arising from additional works to ceilings and M&E infrastructure associated with the general upgrade of the ward.  Agreed cost [REDACTED] incl OH+P but excluding VAT.	02/12/2015

### Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) **GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) **GA advised that DW could be asked to provide an update by email (26/11/2015)**

- Main Atrium floor tiles – GA advised that DL had asked AFernie to replace circa 40 floor tiles in the main atrium. BMCL view is that this is now an NHS issue. GB noted that the broken tiles appeared to be concentrated at the main entrance area and there had been a suggestion that the damage could have been caused by a pallet truck. GA enquired if the tile is fit for purpose. PM agreed to discuss this matter with DL. (17/09/2015) PM noted that he understood that works are underway and it is wip to get the detail of the ride-on machine weight. GB advised that he had asked Nightingale to provide information regarding the load rating of the tile. DH suggested that it would need to be understood if it is a damage or defect issue. PM noted that he planned to meet with JRedmond – SF to organise. (24/09/2015) GW suggested that the tiles had been broken through misuse and that BMCL should be paid for the works undertaken to replace the broken tiles as agreed between DL & AF. GW noted that BMCL will need to pay the contractor for the works. GW advised that the tile spec and grounding is correct (01/10/2015) GA advised that BMCL are still replacing the tiles. As the repairs are being carried out a drawing is being marked up which shows other damages. BMCL have photos of deliveries being made by pallet truck. BMCL have also identified some tiles that have a lip on them and have added these to the BMCL works as tiles with a lip would be a defect (08/10/2015) PM noted that this matter had been discussed at a meeting earlier that day with the Project Directors. PM noted that DL had given the go-ahead to pay for recent replacements. DL requested that GF investigate what type of trolleys/carts are being used for the retail unit deliveries. (22/10/2015) PM advised that a plan showing which tiles BMCL would be replacing had been received. GA noted that there is circa 20 tiles still to be replaced. PM noted that the problem is ongoing and that the NHS may need to bring in a building expert to look at the issue and provide feedback. (12/11/2015) GA advised that the last 20 tiles are due on site w/c 30/11/2015. There was 2-3 nights work required and the works would commence as soon as all the tiles are on site. PM suggested that the issue was still ongoing and that he may seek to obtain a second opinion. PM noted that there are tiles at the NCH atrium which need to be replaced as well. PM agreed to confirm the way forward. GA advised that he would ask G O'S to check the basement for any spare tiles and if there are spare tiles he would get the company to fit them. (26/11/2015)
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015)
- Visacom Panels. PM advised that he was being put under pressure to get the circa 64 visacom panels sorted. GA advised that TDSL have taken some spare doors back to the factory to use to identify a solution. GA noted that the 2 isolation room doors at Schiehallion were due on site w/c 30/11/2015 and BMCL would liaise with Jean Kirkwood for access to fit them. GA advised that it had been estimated that there will be circa 1200 sets which will need to be changed. BMCL are going through the door schedule to identify which ones need to be changed. PM suggested that in order to easily identify which visacom panels/doors had been replaced that it may be beneficial to change the door handles to a different colour.

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1889

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 09/12/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
			Work in progress
		22/10/2015 12/11/2015	GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
			GA advised that a drawing had been submitted and approval awaited from David Bratley. Subsequent to

			10/12/2015	approval, BMCL would expect a PMI with the approved drawing attached to instruct the works.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
			21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	

			<p>04/06/2015 11/06/2015 25/06/2015</p> <p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015 26/11/2015 10/12/2015</p>	<p>FS advised that GB is liaising with Mercury</p> <p>GB advised that this would be progressed once the works completed in the summer</p> <p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>GA noted that DW is chasing up Mercury for updated drawings</p> <p><b>GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.</b></p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015 08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p><b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015 01/10/2015 08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p><b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works.	

			17/09/2015	<p>A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p>	
			24/09/2015	<p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p>	
			01/10/2015	<p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack.</p>	

			<p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated in away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p> <p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished.	

			26/11/2015  10/12/2015	<p>To date only the following buildings have been released for demolition following the removal of ACM/s,</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed by Friday 4<sup>th</sup> December 2015.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015  26/11/2015  10/12/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p> <p>HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified.</p>	
27982	BMCL-EWN-169	ADVERSE WEATHER CONDITIONS	03/12/2015  10/12/2015	<p>We are currently experiencing delays to the works at the INS Entrance due to adverse weather conditions. The overall shift in programme commencement date has pushed the programme back such that we are erecting the structure and envelope works during the winter period which had not previously been envisaged.</p> <p>GA advised that this EW had only been raised to advise of the adverse weather experienced. BMCL would review the internal fit out elements and GA did not expect to move the programme.</p>	
28035	BMCL-EWN-170	Stage 3A Additional time required to process out patients	04/12/2015	<p>Further to the partial demolition and handover of the Out Patients building we can confirm that the original duration for the demolition and removal of this building cannot now be achieved due to the nature of the way it has been partially demolished. The materials generated from the partial demolition of this building have not been segregated adequately and as such this will have to be carried out retrospectively. We have also had to stop works currently in progress on site to make safe the piles of debris in preparation for the high winds forecast. There are also full drums of diesel and a bin containing potentially contaminated asbestos removal PPE that have been left within our site boundary, these require to be removed asap to allow works in this area to continue. The additional duration will be taken into account when the</p>	

			10/12/2015	programme is revised following the handover of the remaining building. HMc noted that the diesel drums had been left to the side and that the wheelie bin had been pushed out of the site.	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works. GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B<CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015	BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?	

Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/010/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the	

				panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015  26/11/2015  10/12/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve. GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015  26/11/2015 10/12/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.. GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015   10/12/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.  Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015   10/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment. GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 10/12/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p>	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.	
			17/09/2015	PM advised that he would approve the drawings asap and agreed to provide the response via Aconex	
			24/09/2015	GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.	
			01/10/2015	GB noted that a series of drawings had been issued and feedback from PM was awaited.	
			08/10/2015	GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.	
			22/10/2015	GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.	
			12/11/2015	PM noted that the Board were considering changing the colour of the signage/lettering as the sign	

A51679245

			26/11/2015 10/11/2015	<p>wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015       01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon.</p> <p>PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.</p> <p>LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015    01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding.</p> <p>GW noted that the costing is ongoing</p> <p>GA noted that the information was with the design and cost teams</p> <p>GB advised that the information had been provided to WSP for them to provide a design</p> <p>GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p>	

			26/11/2015  10/12/2015	GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.  LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015   12/11/2015 26/11/2015 10/12/2015	Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.  Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up. GA advised that the works were due to be commenced 3rd/4th December 2015. GA advised that the works had been completed. LJ to upload the cost and PM to raise CE.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015  12/11/2015 26/11/2015 10/12/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .  The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE. GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works. PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015  12/11/2015 26/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge , water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that they can prepare a price.	

			10/12/2015	GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area.	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015  10/12/2015	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.  GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs.	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity. LJ advised that info is awaited from AC Flooring	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible. LJ noted that information is with Designers and their design fee cost is awaited	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015  10/12/2015	Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC; a) Induction loop to main out patient reception desk. b) PA system in main atrium. c) Static systems wall mounted nurse call panels in out patient departments.  Provide photocopy of key documents for reference in folder of lead manager. PM advised that he suspected that any training would need to take place in the new year. The NHS rep who is co-ordinating members of staff to attend the training is currently on leave and the date proposed doesn't allow enough time for the NHS rep to organise staff to attend the training.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).  Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g	

Page 1904

				<p>curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC.</p> <p>Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p> <p>10/12/2015</p> <p>It was noted that this info is with Workspace Design for them to provide a quote.</p>	
5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015	<p>REH-049 – REHAB/TREATMENT ROOM</p> <p>Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM</p> <p>Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p> <p>10/12/2015</p> <p>REH-049 - PM requested that BMCL organise for the Arjo rep to come to site so that PM can meet with the rep.</p> <p>REH -036 – GA noted that DW had advised that Mercury have reviewed and some works have subsequently been completed. The hairdryer socket however is unable to be fitted as this would contravene British Standards.</p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	17/12/2015	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p> <p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following;</p> <p>1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install.</p> <p>2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051.</p> <p>Refer attached datasheet.</p>	
5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p> <p>3) Extension of Tobermore paving from OB to Langlands Drive</p>	

				4) Access path across grasscrete to CP2 staircore. 5) Construction of grassed strips between office block and CMB/Carpark	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	23/12/2015	<p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18463	CE 160	RHC LEVEL 4 - DCFP DOOR LOCKS IN MAIN CORRIDOR	17/12/2015	Confirmation of PMI 452 for the installation of 7 No. star security locks to rooms DCFP-013, 021, 025, 027, 029, 038 and 048. Assign costs to Group 2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	
18501	CE 161	RHC AUDIOLOGY DEPT - CONTROL ROOMS OPD-083 & 086	22/12/2015	Remove fitted desks in Control Rooms as per PMI 448.  Agreed cost [REDACTED] incl OH+P but excl VAT.	

### Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015) **GA advised that the test rig is to be on site w/c 14/12/2015. Mercury to contact DBrattay and agree the programme of works. (10/12/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) **GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015)**

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1909

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 22/12/2015:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
			GA advised that a drawing had been submitted and approval awaited from David Bratley. Subsequent to

			10/12/2015	approval, BMCL would expect a PMI with the approved drawing attached to instruct the works.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	
			21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	

			<p>04/06/2015 11/06/2015 25/06/2015</p> <p>30/07/2015</p> <p>05/08/2015 13/08/2015</p> <p>27/08/2015</p> <p>17/09/2015 24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015 26/11/2015 10/12/2015</p>	<p>FS advised that GB is liaising with Mercury</p> <p>GB advised that this would be progressed once the works completed in the summer</p> <p>GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>GA noted that DW is chasing up Mercury for updated drawings</p> <p><b>GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.</b></p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015</p> <p>01/10/2015 08/10/2015</p>	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p><b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015</p> <p>17/09/2015 01/10/2015 08/10/2015</p>	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p><b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works.	

			17/09/2015	<p>A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p>	
			24/09/2015	<p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p>	
			01/10/2015	<p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack.</p>	

			<p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated in away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p> <p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished.	

			26/11/2015  10/12/2015	<p>To date only the following buildings have been released for demolition following the removal of ACM/s,</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed by Friday 4<sup>th</sup> December 2015.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015  26/11/2015  10/12/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p> <p>HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified.</p>	
27982	BMCL-EWN-169	ADVERSE WEATHER CONDITIONS	03/12/2015  10/12/2015	<p>We are currently experiencing delays to the works at the INS Entrance due to adverse weather conditions. The overall shift in programme commencement date has pushed the programme back such that we are erecting the structure and envelope works during the winter period which had not previously been envisaged.</p> <p>GA advised that this EW had only been raised to advise of the adverse weather experienced. BMCL would review the internal fit out elements and GA did not expect to move the programme.</p>	
28035	BMCL-EWN-170	Stage 3A Additional time required to process out patients	04/12/2015	<p>Further to the partial demolition and handover of the Out Patients building we can confirm that the original duration for the demolition and removal of this building cannot now be achieved due to the nature of the way it has been partially demolished. The materials generated from the partial demolition of this building have not been segregated adequately and as such this will have to be carried out retrospectively. We have also had to stop works currently in progress on site to make safe the piles of debris in preparation for the high winds forecast. There are also full drums of diesel and a bin containing potentially contaminated asbestos removal PPE that have been left within our site boundary, these require to be removed asap to allow works in this area to continue. The additional duration will be taken into account when the</p>	

			10/12/2015	programme is revised following the handover of the remaining building. HMc noted that the diesel drums had been left to the side and that the wheelie bin had been pushed out of the site.	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works. GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B<CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015	BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/10/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the	

				panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015  26/11/2015  10/12/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve. GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015  26/11/2015 10/12/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.. GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015   10/12/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.  Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015   10/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment. GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 22/12/2015

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p>	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.	
			17/09/2015	PM advised that he would approve the drawings asap and agreed to provide the response via Aconex	
			24/09/2015	GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.	
			01/10/2015	GB noted that a series of drawings had been issued and feedback from PM was awaited.	
			08/10/2015	GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.	
			22/10/2015	GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.	
			12/11/2015	PM noted that the Board were considering changing the colour of the signage/lettering as the sign	

A51679245

			26/11/2015 10/11/2015	<p>wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.</p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTAL TERTIARY BLINDS REPAIRS	17/09/2015       01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p> <p>GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info.</p> <p>GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon.</p> <p>PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap.</p> <p>LJ advised that Structal have stated in the O&amp;M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation.</p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015    01/10/2015 08/10/2015 22/10/2015 12/11/2015	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding.</p> <p>GW noted that the costing is ongoing</p> <p>GA noted that the information was with the design and cost teams</p> <p>GB advised that the information had been provided to WSP for them to provide a design</p> <p>GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p>	

			26/11/2015  10/12/2015	GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.  LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015    12/11/2015 26/11/2015 10/12/2015	Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.  Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up. GA advised that the works were due to be commenced 3rd/4th December 2015. GA advised that the works had been completed. LJ to upload the cost and PM to raise CE.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015   12/11/2015  26/11/2015  10/12/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .  The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE. GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works. PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015      12/11/2015   26/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge , water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that the can prepare a price.	

			10/12/2015	GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area.	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015  10/12/2015	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.  GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs.	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity. LJ advised that info is awaited from AC Flooring	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible. LJ noted that information is with Designers and their design fee cost is awaited	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015  10/12/2015	Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC; a) Induction loop to main out patient reception desk. b) PA system in main atrium. c) Static systems wall mounted nurse call panels in out patient departments.  Provide photocopy of key documents for reference in folder of lead manager. PM advised that he suspected that any training would need to take place in the new year. The NHS rep who is co-ordinating members of staff to attend the training is currently on leave and the date proposed doesn't allow enough time for the NHS rep to organise staff to attend the training.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).  Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g	

Page 1924

				<p>curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC.</p> <p>Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p> <p>10/12/2015</p> <p>It was noted that this info is with Workspace Design for them to provide a quote.</p>	
5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015	<p>REH-049 – REHAB/TREATMENT ROOM</p> <p>Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM</p> <p>Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p> <p>10/12/2015</p> <p>REH-049 - PM requested that BMCL organise for the Arjo rep to come to site so that PM can meet with the rep.</p> <p>REH -036 – GA noted that DW had advised that Mercury have reviewed and some works have subsequently been completed. The hairdryer socket however is unable to be fitted as this would contravene British Standards.</p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	17/12/2015	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p> <p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following;</p> <p>1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install.</p> <p>2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051.</p> <p>Refer attached datasheet.</p>	
5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p> <p>3) Extension of Tobermore paving from OB to Langlands Drive</p>	

				<p>4) Access path across grasscrete to CP2 staircore.</p> <p>5) Construction of grassed strips between office block and CMB/Carpark</p>	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	23/12/2015	<p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18463	CE 160	RHC LEVEL 4 - DCFP DOOR LOCKS IN MAIN CORRIDOR	17/12/2015	Confirmation of PMI 452 for the installation of 7 No. star security locks to rooms DCFP-013, 021, 025, 027, 029, 038 and 048. Assign costs to Group 2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	
18501	CE 161	RHC AUDIOLOGY DEPT - CONTROL ROOMS OPD-083 & 086	22/12/2015	Remove fitted desks in Control Rooms as per PMI 448.  Agreed cost [REDACTED] incl OH+P but excl VAT.	

### Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015) **GA advised that the test rig is to be on site w/c 14/12/2015. Mercury to contact DBrattay and agree the programme of works. (10/12/2015)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) **GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015)**

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1929

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 27/01/2016:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Brattay. Subsequent to

			14/01/2016	<p>approval, BMCL would expect a PMI with the approved drawing attached to instruct the works.</p> <p><b>GF noted that the drawings are with DB &amp; IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley &amp; Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.</b></p>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p> <p>07/05/2015</p> <p>14/05/2015</p> <p>21/05/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p> <p>GB noted that collation of the Building Warrants is WIP</p> <p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p>	

			<p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>13/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>27/08/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>17/09/2015 DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>24/09/2015 GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>01/10/2015 GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>08/10/2015 GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>22/10/2015 GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>12/11/2015 DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>26/11/2015 GA noted that DW is chasing up Mercury for updated drawings</p> <p>10/12/2015 GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.</p> <p>14/01/2016 <b>GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.</b></p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015 Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>01/10/2015 GA advised that a revised programme had been issued</p> <p>08/10/2015 <b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p>
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	<p>10/09/2015 Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>17/09/2015 GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>01/10/2015 GA advised that a revised programme had been issued</p> <p>08/10/2015 <b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed</b></p>	<p>*****</p>

				but to remain on tracker until the end of the works.	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015  24/09/2015  01/10/2015	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM</p>	

			<p>noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>12/11/2015 GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>26/11/2015 GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p> <p>10/12/2015 GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the</p>	
--	--	--	--	--

			14/01/2016	<p>labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p><b>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</b></p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUILDINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p><b>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</b></p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	<p>24/11/2015</p> <p>26/11/2015</p>	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p>	

			10/12/2015  14/01/2016	HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified. <b>GA noted that the remainder of the staff were scheduled to undergo the training w/c 18/01/2016 at Fairfield Offices.</b>	
27982	BMCL-EWN-169	ADVERSE WEATHER CONDITIONS	03/12/2015  10/12/2015  14/01/2016	We are currently experiencing delays to the works at the INS Entrance due to adverse weather conditions. The overall shift in programme commencement date has pushed the programme back such that we are erecting the structure and envelope works during the winter period which had not previously been envisaged. GA advised that this EW had only been raised to advise of the adverse weather experienced. BMCL would review the internal fit out elements and GA did not expect to move the programme. <b>GA noted that this EW had been issued as a note.</b>	
28035	BMCL-EWN-170	Stage 3A Additional time required to process out patients	04/12/2015    10/12/2015  14/01/2016	Further to the partial demolition and handover of the Out Patients building we can confirm that the original duration for the demolition and removal of this building cannot now be achieved due to the nature of the way it has been partially demolished. The materials generated from the partial demolition of this building have not been segregated adequately and as such this will have to be carried out retrospectively. We have also had to stop works currently in progress on site to make safe the piles of debris in preparation for the high winds forecast. There are also full drums of diesel and a bin containing potentially contaminated asbestos removal PPE that have been left within our site boundary, these require to be removed asap to allow works in this area to continue. The additional duration will be taken into account when the programme is revised following the handover of the remaining building. HMc noted that the diesel drums had been left to the side and that the wheelie bin had been pushed out of the site. <b>It was agreed this item could be closed.</b>	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015   14/01/2016	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works. GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B<CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW. <b>GA noted that BMCL had completed their investigative works and surveys.</b>	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015  14/01/2016	BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required? <b>GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum.</b>	

28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. <b>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. <b>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/010/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the	

			14/01/2016	panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting. <b>GA noted that Structural were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</b>	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015 26/11/2015 10/12/2015 14/01/2016	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve. GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break. <b>DW noted that the works are complete and JMiller will liaise with IPowrie regarding training. There appears to be a difference in opinion with users which IP is working through.</b>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015 26/11/2015 10/12/2015 14/01/2016	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.. GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS <b>GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</b>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015  10/12/2015  14/01/2016	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.  Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day. <b>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and</b>	

				been advised that the mechanism works as desired. BMCL had agreed to do replacement to level, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015  10/12/2015  14/01/2016	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment. GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well. GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 14/01/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as</p>	

A51679245

			<p>23/07/2015 30/07/2015 06/08/2015</p> <p>13/08/2015</p> <p>27/08/2015 17/09/2015</p> <p>24/09/2015</p> <p>01/10/2015 08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p> <p>10/11/2015 14/01/2016</p>	<p>per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.</p> <p>PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.</p> <p><b>GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016.</b></p>	
4546	PMI 439	ADULT HOSPITAL - STRUCTURAL TERTIARY BLINDS REPAIRS	17/09/2015	<p>Please provide stand flat rate costs per location for the following types of repairs following misuse of blinds.</p> <p>Please provide unit cost for repairs as follows;</p> <p>a) Repair wand connection and bring blind back into full operation.</p> <p>b) Repair blind cord at head where has been pulled externally and bring blind back into full operation.</p> <p>c) Repair blind in space where has dropped or jammed and bring blind back into full operation.</p> <p>It is understood that around 70 locations are affected.</p>	

			01/10/2015 08/10/2015 22/10/2015 12/11/2015  14/01/2016	GA advised that the QS that BMCL were dealing with has subsequently left Structal and BMCL are working with the new QS to obtain this info. GA advised that Jordan had carried out a walkround with the Structal surveyor to look at the different types of repairs that are required and it was anticipated that the cost information would be provided soon. PM advised that the blinds need to be sorted asap. PM requested that the cost information be provided asap. LJ advised that Structal have stated in the O&M that Euroclad carries out their repairs however BMCL do not contract with Euroclad so BMCL are in discussion with Structal to identify way forward. PM enquired if it would be possible for the NHS to contract with Euroclad and this was confirmed. LJ noted that she was checking the warranty in relation to the removal of the internal glass. PM suggested that the internal glass should not need to be removed. LJ agreed to provide a copy of the quotation. <b>PM advised that the NHS were trying to progress this matter therefore item is closed for BMCL.</b>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015   01/10/2015 08/10/2015 22/10/2015 12/11/2015  26/11/2015 10/12/2015  14/01/2016	The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:  <a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a>  Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired. GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss. LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service. <b>GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCox by BMCL.</b>	
4807	PMI 448 -	RHC AUDIOLOGY DEPT - ROOMS OPD-086 LOBBY & OPD - 083 LOBBY	22/10/2015         12/11/2015	Please carefully remove the two fitted worktops and metal tube legs in each of the two rooms noted above. Clean off any silicone sealant from wall and touch up decoration as required. Leave prefinished white timber support on wall at junction of worktop and wall. Contact Estates and deliver worktops into storage in basement for future use.  Please contact Jim Harrigan to make arrangements for removal. LJ advised that the quotation was still awaited however she would chase this up.	

			26/11/2015 10/12/2015 14/01/2016	GA advised that the works were due to be commenced 3rd/4th December 2015. GA advised that the works had been completed. LJ to upload the cost and PM to raise CE. <b>It was agreed this item could be closed as CE 161 had been issued.</b>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015   12/11/2015  26/11/2015  10/12/2015  14/01/2016	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p> <p>The attachment is the area to be removed shown marked in blue.</p> <p>GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.</p> <p>GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.</p> <p>PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.</p> <p><b>GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off</b></p>	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015   12/11/2015  26/11/2015 10/12/2015  14/01/2016	<p>Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge , water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter.</p> <p>GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample.</p> <p>GA advised that Central are looking to get access to the area so that they can prepare a price.</p> <p>GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area.</p> <p><b>PM noted that the costs had been uploaded to Sypro and he would issue a CE for this item</b></p>	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015   10/12/2015	<p>Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.</p> <p>GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs.</p>	

			14/01/2016	<b>GA noted that a sample has been approved and fitting would be progressed by MMM joinery asap.</b>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015 14/01/2016	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity. LJ advised that info is awaited from AC Flooring <b>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</b>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015       10/12/2015 14/01/2016	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible. LJ noted that information is with Designers and their design fee cost is awaited <b>GA noted that LJ is awaiting Nightingale fee offer.</b>	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015    10/12/2015  14/01/2016	Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC; a) Induction loop to main out patient reception desk. b) PA system in main atrium. c) Static systems wall mounted nurse call panels in out patient departments.  Provide photocopy of key documents for reference in folder of lead manager. PM advised that he suspected that any training would need to take place in the new year. The NHS rep who is co-ordinating members of staff to attend the training is currently on leave and the date proposed doesn't allow enough time for the NHS rep to organise staff to attend the training. <b>DW noted that the training had been scheduled for today however had been cancelled and subsequently rescheduled to take place on 18 Jan 2016.</b>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).  Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-	

			10/12/2015 14/01/2016	<p>014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote.</p> <p><b>GA noted that LJ has received costs and will upload to Sypro by close of business that day.</b></p>	
5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015          10/12/2015    14/01/2016	<p>REH-049 – REHAB/TREATMENT ROOM Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer. REH-049 - PM requested that BMCL organise for the Arjo rep to come to site so that PM can meet with the rep. REH -036 – GA noted that DW had advised that Mercury have reviewed and some works have subsequently been completed. The hairdryer socket however is unable to be fitted as this would contravene British Standards.</p> <p><b>PM noted that Arjo Huntleigh are to be organised to come back to site and that Jordan is progressing this.</b></p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	17/12/2015          14/01/2016	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p> <p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following; 1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install. 2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051. Refer attached datasheet.</p> <p><b>PM noted that the users have advised that they do not consider the baskets as a ligature risk. PM requested that BMCL progress the fitting of the baskets asap as the Board Chairman has taken an interest in the DCFP area. DW advised that the retrofit of the basket may cause difficulty re warranty. DW agreed to get an update from LJ and provide feedback asap.</b></p>	
5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p>	

				Provide a quotation to include the following; 1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard. 2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive 3) Extension of Tobermore paving from OB to Langlands Drive 4) Access path across grasscrete to CP2 staircore. 5) Construction of grassed strips between office block and CMB/Carpark <b>GA noted that LJ is awaiting costs from LE</b>	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	14/01/2016 23/12/2015 14/01/2016	Please provide a price to undertake the following works, refer attached sketch drawings.  Please provide a price to undertake the following works, refer attached sketch drawings. Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads. Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards. <b>DW advised that he would liaise with LJ for an update.</b>	
5230	PMI 461 HV	Infrastructure Works	20/01/2016	The Board are progressing with the installation of HV Infrastructure on the QEUH Campus, with a section of the cable route running through the current Phase 3a Demolition Site  Proceed with the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely; 1) Excavation of track approximately 50m. 2) Installation of 3No. 200mm uPVC Ducts including draw ropes. 3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level 4) Forming 2No. temporary draw pits.	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18463	CE 160	RHC LEVEL 4 - DCFP DOOR LOCKS IN MAIN CORRIDOR	17/12/2015	Confirmation of PMI 452 for the installation of 7 No. star security locks to rooms DCFP-013, 021, 025, 027, 029, 038 and 048. Assign costs to Group 2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	
18501	CE 161	RHC AUDIOLOGY DEPT - CONTROL ROOMS OPD-083 & 086	22/12/2015	Remove fitted desks in Control Rooms as per PMI 448.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
18824	CE 162	PHASE 3A - SURFACE CAR PARK 4 - CONSTRUCTION PHASE	26/01/2016	Brookfield Multiplex are to proceed with the construction of the surface car park works as set out in PMI 320 and as detailed in the approved planning submission from Glasgow City Council. Target completion date is 30 June 2016, with a revised programme to be submitted within one week of this CE issue.	

## Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015) GA advised that the test rig is to be on site w/c 14/12/2015. Mercury to contact DBrattay and agree the programme of works. (10/12/2015) **DW advised that HPI are due on site at the beginning of February doing a maintenance visit and will carry out the works then (14/01/2016)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from

IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016)

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016)
- CE 156 – 3 sets of supply onto a single switch – DW noted that he has an agreed proposal as to how to progress this matter. However, to carry out the works will require that the traffic lights are switched off. IP and JW are discussing (14/01/2016)
- Signal at crossing point – PM noted that one of them is loose and that he would provide contact details of John Sharkey to JPhillips (14/01/2016)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1951

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 05/02/2016:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Bratney. Subsequent to

			14/01/2016	approval, BMCL would expect a PMI with the approved drawing attached to instruct the works. GF noted that the drawings are with DB & IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley & Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.	
			28/01/2016	<b>GF advised that he is trying to progress the sign-off and return of the drawings.</b>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.	

			<p>21/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>28/05/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>04/06/2015 FS advised that GB is liaising with Mercury</p> <p>11/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>25/06/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>30/07/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>05/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>13/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>27/08/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>17/09/2015 DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>24/09/2015 GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>01/10/2015 GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>08/10/2015 GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>22/10/2015 GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>12/11/2015 DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>26/11/2015 GA noted that DW is chasing up Mercury for updated drawings</p> <p>10/12/2015 GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.</p> <p>14/01/2016 GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.</p> <p>28/01/2016 <b>GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB.</b></p>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	<p>10/09/2015 Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>01/10/2015 GA advised that a revised programme had been issued</p> <p>08/10/2015 <b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p>

26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p> <p><b>PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.</b></p>	*****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to</p>	

			01/10/2015	<p>review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
			22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>	
			12/11/2015	<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
			26/11/2015	<p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
			10/12/2015	<p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised</p>	

			<p>14/01/2016</p> <p>28/01/2016</p>	<p>programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p> <p><b>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos.</b></p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	<p>24/11/2015</p> <p>26/11/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>

			10/12/2015	estimated. HMc noted that all buildings had been handed over by Friday 4 <sup>th</sup> December 2015.	
2788 6	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015  26/11/2015  10/12/2015  14/01/2016  28/01/2016	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p> <p>HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified.</p> <p>GA noted that the remainder of the staff were scheduled to undergo the training w/c 18/01/2016 at Fairfield Offices.</p> <p><b>GA advised that the training had now been provided. LJ requested a PMI for the cost which BMCL have encountered.</b></p>	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015    14/01/2016 28/01/2016	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p> <p>GA noted that BMCL had completed their investigative works and surveys.</p> <p><b>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night.</b></p>	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015  14/01/2016  28/01/2016	<p>BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?</p> <p><b>GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum. LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA requested a scope for the works.</b></p>	

28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. <b>GF noted that the asbestos had been removed the previous day.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016 14/01/2016 28/01/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. <b>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	<p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
			13/08/2015	<p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p>	
			27/08/2015	<p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p>	
			17/09/2015	<p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
			24/09/2015	<p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p>	
			01/010/2015	<p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
			08/10/2015	<p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
			22/10/2015	<p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
			12/11/2015	<p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
			26/11/2015	<p>GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
			10/12/2015	<p>GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the</p>	

			14/01/2016  28/01/2016	panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting. GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.  <b>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1st Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</b>	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015  26/11/2015  10/12/2015  14/01/2016  28/01/2016	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap. GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve. GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break. DW noted that the works are complete and JMiller will liaise with IPowrie regarding training. There appears to be a difference in opinion with users which IP is working through. <b>GA advised that JMiller is awaiting on confirmation from Estates as to when the training is to be provided. PM advised that BMCL should go ahead and organise the training.</b>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015  26/11/2015 10/12/2015 14/01/2016   28/01/2016	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap. GA noted that GB had been chasing WSP for the report.. GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop. <b>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCox to go through the report. The report would subsequently be issued to the NHS asap.</b>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015       10/12/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.       Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion	

			14/01/2016	needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
			28/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured. <b>GA advised that WIP to level 8.</b> <b>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</b>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	
			10/12/2015	GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	
			14/01/2016	GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	
			28/01/2016	<b>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</b>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 05/02/2016

						
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions		Date Closed Out/Status

A51679245

4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.
				The names for the new hospitals are;
				The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow
				Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.
			17/09/2015	PM advised that he would approve the drawings asap and agreed to provide the response via Aconex
			24/09/2015	GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.
			01/10/2015	GB noted that a series of drawings had been issued and feedback from PM was awaited.
			08/10/2015	GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.
			22/10/2015	GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.
			12/11/2015	PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.
			26/11/2015	GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.
			10/11/2015	GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.
			14/01/2016	GA advised that the revised signage was due mid Feb and the duct works would be commenced 25 <sup>th</sup> Jan 2016.
			28/01/2016	GA noted that signage will start to be installed the following day and the lights would be

				<b>installed mid Feb 2016.</b>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015</p> <p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p>	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding.</p> <p>GW noted that the costing is ongoing</p> <p>GA noted that the information was with the design and cost teams</p> <p>GB advised that the information had been provided to WSP for them to provide a design</p> <p>GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p> <p>GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.</p> <p>LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.</p> <p>GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCoX by BMCL.</p> <p><b>LJ noted that the design costs had been uploaded to Sypro earlier that day for NHS review/approval.</b></p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	<p>27/10/2015</p> <p>12/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p>	<p>The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p> <p>The attachment is the area to be removed shown marked in blue.</p> <p>GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.</p> <p>GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.</p> <p>PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.</p> <p>GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off</p> <p><b>GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the</b></p>	

				<b>new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.</b>	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015  12/11/2015  26/11/2015 10/12/2015  14/01/2016 28/01/2016	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that they can prepare a price. GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area. PM noted that the costs had been uploaded to Sypro and he would issue a CE for this item <b>GA advised that the works were complete and the cost info was to be provided to the NHS for input to Sypro.</b>	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015  10/12/2015  14/01/2016 28/01/2016	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff. GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs. GA noted that a sample has been approved and fitting would be progressed by MMM joinery asap. <b>GA advised that the locks delivery is awaited. PM noted that he had advised the users that it would likely be 5-6 weeks.</b>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015 14/01/2016  28/01/2016	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity. LJ advised that info is awaited from AC Flooring GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete. <b>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</b>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 & 178	01/12/2015	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.	

			10/12/2015 14/01/2016 28/01/2016	<p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p><b>LJ advised that the quotation had been uploaded to Sypro for NHS review</b></p>	
5063	PMI 455	RHC BUILDING SYSTEMS IN MAIN ENTRANCE	01/12/2015  10/12/2015 14/01/2016 28/01/2016	<p>Please organise and provide a 1/2 day teach-in for senior staff on the operation of the following systems in RHC;</p> <ul style="list-style-type: none"> <li>a) Induction loop to main out patient reception desk.</li> <li>b) PA system in main atrium.</li> <li>c) Static systems wall mounted nurse call panels in out patient departments.</li> </ul> <p>Provide photocopy of key documents for reference in folder of lead manager.</p> <p>PM advised that he suspected that any training would need to take place in the new year. The NHS rep who is co-ordinating members of staff to attend the training is currently on leave and the date proposed doesn't allow enough time for the NHS rep to organise staff to attend the training.</p> <p>DW noted that the training had been scheduled for today however had been cancelled and subsequently rescheduled to take place on 18 Jan 2016.</p> <p><b>It was agreed that this item could be closed as training had been completed.</b></p>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015  10/12/2015 14/01/2016 28/01/2016	<p>Room OPD-015 MEETING ROOM</p> <p>Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04.</p> <p>(Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM</p> <p>Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC.</p> <p>Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p> <p>It was noted that this info is with Workspace Design for them to provide a quote.</p> <p>GA noted that LJ has received costs and will upload to Sypro by close of business that day.</p> <p><b>LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.</b></p>	

5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	02/12/2015	<p>REH-049 – REHAB/TREATMENT ROOM</p> <p>Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p>	
			10/12/2015	<p>REH-036 – SHOWER ROOM</p> <p>Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p> <p>REH-049 - PM requested that BMCL organise for the Arjo rep to come to site so that PM can meet with the rep.</p> <p>REH -036 – GA noted that DW had advised that Mercury have reviewed and some works have subsequently been completed. The hairdryer socket however is unable to be fitted as this would contravene British Standards.</p>	
			14/01/2016	<p>PM noted that Arjo Huntleigh are to be organised to come back to site and that Jordan is progressing this.</p>	
			28/01/2016	<p><b>PM advised that he would provide a CE for this item as the NHS needed Arjo to come back to site.</b></p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	17/12/2015	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p>	
			14/01/2016	<p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following;</p> <p>1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install.</p> <p>2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051.</p> <p>Refer attached datasheet.</p> <p>PM noted that the users have advised that they do not consider the baskets as a ligature risk. PM requested that BMCL progress the fitting of the baskets asap as the Board Chairman has taken an interest in the DCFP area. DW advised that the retrofit of the basket may cause difficulty re warranty. DW agreed to get an update from LJ and provide feedback asap.</p>	
			28/01/2016	<p><b>PM advised that DW has provided an email and on the basis of this email PM had advised the users that there is a difficulty in getting warranty on the system if baskets are installed.</b></p>	
5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p>	
				<p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	
18463	CE 160	RHC LEVEL 4 - DCFP DOOR LOCKS IN MAIN CORRIDOR	17/12/2015	Confirmation of PMI 452 for the installation of 7 No. star security locks to rooms DCFP-013, 021, 025, 027, 029, 038 and 048. Assign costs to Group 2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	
18501	CE 161	RHC AUDIOLOGY DEPT - CONTROL ROOMS OPD-083 & 086	22/12/2015	Remove fitted desks in Control Rooms as per PMI 448.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
18824	CE 162	PHASE 3A - SURFACE CAR PARK 4 - CONSTRUCTION PHASE	26/01/2016  28/01/2016	Brookfield Multiplex are to proceed with the construction of the surface car park works as set out in PMI 320 and as detailed in the approved planning submission from Glasgow City Council. Target completion date is 30 June 2016, with a revised programme to be submitted within one week of this CE issue.  Agreed cost [REDACTED] incl OH+P but excl. VAT. <b>It was noted that sign-off of the building warrant is awaited.</b>	
18931	CE 162A	RHC REHABILITATION DEPARTMENT ROOM REH-049 VESTIBULAR HOOK	03/02/2016	Please proceed with design for gantry to support vestibular hook, all as per design information supplied under PMI 443. Please provide design for approval, cost to fabricate and install and programme to install.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
18933	CE 163	RHC REHABILITATION DEPARTMENT - ROOM REH 049 TREATMENT ROOM	03/02/2016	Works as set out in PMI 457. In Room REH-049 shorten track and re-commission Arjo Huntleigh Maxi Sky Lift. Make adjustments to ceiling grid and tiles as required.  Agreed cost [REDACTED] incl OH+P but excl. VAT	

## Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015) GA advised that the test rig is to be on site w/c 14/12/2015. Mercury to contact DBrattay and agree the programme of works. (10/12/2015) DW advised that HPI are due on site at the beginning of February doing a maintenance visit and will carry out the works then (14/01/2016)

**GA advised that the works have been programmed to take place on 9/10<sup>th</sup> Feb 2016. (28/01/2016)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from

IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) **It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016)**

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016) **It was noted that DW is awaiting an update from JKeenan (28/01/2016)**
- CE 156 – 3 sets of supply onto a single switch – DW noted that he has an agreed proposal as to how to progress this matter. However, to carry out the works will require that the traffic lights are switched off. IP and JW are discussing (14/01/2016) **GA advised that JMiller had issued an email outlining what needed to be carried out to do the works. PM enquired if BMCL could provide a couple of paras about what BMCL will be doing. PM advised that he would be happy to meet JMiller if required the following week. GA advised that a temporary traffic management plan could be put in place however the quote did not include for traffic management. LJ was requested to progress this with LEng. PM noted that the traffic management would need to ensure that the traffic into the bus lanes is managed. HMc to be involved in any discussions so can co-ordinate. (28/01/2016)**
- Signal at crossing point – PM noted that one of them is loose and that he would provide contact details of John Sharkey to JPhillips (14/01/2016) **GA advised that he had checked and was unable to find any loose. PM advised that he would email John Sharkey for confirmation of which signal was loose. (18/01/2016)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1973

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 11/02/2016:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	03/12/2014  04/12/2014  08/01/2015 15/01/2015  22/01/2015  29/01/2015  05/02/2015  19/02/2015  26/02/2015  05/03/2015  12/03/2015 19/03/2015	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Bratney. Subsequent to

			14/01/2016	approval, BMCL would expect a PMI with the approved drawing attached to instruct the works. GF noted that the drawings are with DB & IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley & Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.	
			28/01/2016 11/02/2016	GF advised that he is trying to progress the sign-off and return of the drawings. <b>GF noted that the drawing was being revised and a PMI would be issued to BMCL in due course. It was proposed that a walkround should be organised.</b>	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.	
			07/05/2015	GB noted that collation of the Building Warrants is WIP	
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury	

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	<b>It was noted that this continues to be WIP with GB packaging up the drawings for issue.</b>	

26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	<p>Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date.</p> <p>GA advised that a revised programme had been issued</p> <p><b>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</b></p>	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	<p>Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information.</p> <p>GA noted that this had cost Land Eng a 1 week delay to the programme.</p> <p>GA advised that a revised programme had been issued</p> <p>Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.</p> <p><b>PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.</b></p>	<p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	<p>Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached.</p> <p>GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&amp;C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped,</p>	

			01/10/2015	<p>witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
			22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMII/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>	
			12/11/2015	<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
			26/11/2015	<p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
			10/12/2015	<p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that</p>	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p> <p>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p> <p><b>It was noted that a revised programme has been issued which updates on the works</b></p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p>	<p>*****</p> <p>All delays to be</p>

			26/11/2015	<p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p>	<p>reviewed at the end of the programme</p> <p>*****</p>
			10/12/2015	<p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p>	
			26/11/2015	<p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p>	
			10/12/2015	<p>HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified.</p>	
			14/01/2016	<p>GA noted that the remainder of the staff were scheduled to undergo the training w/c 18/01/2016 at Fairfield Offices.</p>	
			28/01/2016	<p>GA advised that the training had now been provided. LJ requested a PMI for the cost which BMCL have encountered</p>	
			11/02/2016	<p><b>It was noted that BMCL are awaiting the issue of the PMI from the NHS.</b></p>	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p>	
			10/12/2015	<p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p>	
			14/01/2016	<p>GA noted that BMCL had completed their investigative works and surveys.</p>	
			28/01/2016	<p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a</p>	

			11/02/2016	night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. <b>It was noted that the works have been carried out. Item to remain on tracker until demolition works complete.</b>	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015 14/01/2016 28/01/2016 11/02/2016	BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required? GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum. LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA requested a scope for the works. <b>It was noted that BMCL are awaiting the issue of the PMI from the NHS for the design and install of BMS. Allowance within project budget costs.</b>	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016 11/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. <b>It was noted that the delays are approx 2 weeks</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016 14/01/2016 28/01/2016 11/02/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. <b>It was noted that the strip out is to be progressed.</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/010/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the	

			14/01/2016 28/01/2016 11/02/2016	<p>panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p><b>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structural panel is on order and mastic works.</b></p>	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015 26/11/2015 10/12/2015 14/01/2016 28/01/2016 11/02/2016	<p>The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap.</p> <p>GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve.</p> <p>GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break.</p> <p>DW noted that the works are complete and JMiller will liaise with IPowrie regarding training. There appears to be a difference in opinion with users which IP is working through.</p> <p>GA advised that JMiller is awaiting on confirmation from Estates as to when the training is to be provided. PM advised that BMCL should go ahead and organise the training.</p> <p><b>GF agreed to email IP in order to progress the training.</b></p>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015 26/11/2015 10/12/2015 14/01/2016 28/01/2016 11/02/2016	<p>The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.</p> <p>GA noted that GB had been chasing WSP for the report.</p> <p>GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS</p> <p>GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</p> <p>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCox to go through the report. The report would subsequently be issued to the NHS asap.</p> <p><b>It was noted that BMCL had received correspondence from WSP earlier that day . Letter would be issued to the NHS asap.</b></p>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p> <p>Note this defect has become a serious and disruptive operational matter, and should be given priority to</p>	

			10/12/2015	secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.	
			28/01/2016	GA advised that WIP to level 8. Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.	
			11/02/2016	<b>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward. GA noted that the encapsulated door sample was to be offered to the NHS for review.</b>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	
			10/12/2015	GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put is as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	
			14/01/2016	GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	
			28/01/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			11/02/2016	<b>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).</b>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 24/02/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p>	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.	
			27/08/2015	PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.	
			17/09/2015	PM advised that he would approve the drawings asap and agreed to provide the response via Aconex	
			24/09/2015	GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.	
			01/10/2015	GB noted that a series of drawings had been issued and feedback from PM was awaited.	
			08/10/2015	GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.	
			22/10/2015	GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.	
			12/11/2015	PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be	

A51679245

			<p>26/11/2015 replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>10/11/2015 GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>14/01/2016 GA advised that the signs had been ordered and a delivery date was awaited from Land Eng. GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016.</p> <p>28/01/2016 GA noted that signage will start to be installed the following day and the lights would be installed mid Feb 2016.</p> <p>11/02/2016 <b>GA noted that the lights would be on by 19<sup>th</sup> Feb 2016.</b></p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015 The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>01/10/2015 Allowance to be included for boxing in the vertical posts and altering the wall padding.</p> <p>08/10/2015 GW noted that the costing is ongoing</p> <p>22/10/2015 GA noted that the information was with the design and cost teams</p> <p>12/11/2015 GB advised that the information had been provided to WSP for them to provide a design</p> <p>26/11/2015 GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p> <p>10/12/2015 GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.</p> <p>14/01/2016 LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.</p> <p>28/01/2016 GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCoX by BMCL.</p> <p>11/02/2016 LJ noted that the design costs had been uploaded to Sypro earlier that day for NHS review/approval.</p> <p><b>It was noted that BMCL are awaiting the issue of the CE from the NHS.</b></p>	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	<p>27/10/2015 The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .</p> <p>12/11/2015 The attachment is the area to be removed shown marked in blue.</p> <p>GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing</p>	

			<p>26/11/2015 Management Building. PM agreed to look out the CE.</p> <p>10/12/2015 GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.</p> <p>14/01/2016 PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.</p> <p>28/01/2016 GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off</p> <p>11/02/2016 GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.</p> <p><b>GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.</b></p>	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	<p>09/11/2015 Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter.</p> <p>12/11/2015 GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample.</p> <p>26/11/2015 GA advised that Central are looking to get access to the area so that they can prepare a price.</p> <p>10/12/2015 GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area.</p> <p>14/01/2016 PM noted that the costs had been uploaded to Sypro and he would issue a CE for this item</p> <p>28/01/2016 GA advised that the works were complete and the cost info was to be provided to the NHS for input to Sypro.</p> <p>11/02/2016 <b>BMCL to upload costs to Sypro</b></p>	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	<p>26/11/2015 Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.</p> <p>10/12/2015 GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs.</p> <p>14/01/2016 GA noted that a sample has been approved and fitting would be progressed by MMM joinery asap.</p>	Cross ref CE 160

			28/01/2016 11/02/2016	GA advised that the locks delivery is awaited. PM noted that he had advised the users that it would likely be 5-6 weeks. <b>GA noted that the works have been completed. CE to be provided by NHS and costs to be uploaded to Sypro.</b>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015 14/01/2016 28/01/2016 11/02/2016	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.  Works cost based on rate per location. Provide cost once survey confirms quantity. LJ advised that info is awaited from AC Flooring GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete. GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap. <b>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</b>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015 14/01/2016 28/01/2016 11/02/2016	Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.  Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible. LJ noted that information is with Designers and their design fee cost is awaited GA noted that LJ is awaiting Nightingale fee offer. LJ advised that the quotation had been uploaded to Sypro for NHS review <b>GF noted that authorisation to progress is awaited.</b>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).  Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.	

5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <ol style="list-style-type: none"> <li>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</li> <li>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</li> <li>3) Extension of Tobermore paving from OB to Langlands Drive</li> <li>4) Access path across grasscrete to CP2 staircore.</li> <li>5) Construction of grassed strips between office block and CMB/Carpark</li> </ol> <p>GA noted that LJ is awaiting costs from LE</p> <p>LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p><b>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</b></p>	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	23/12/2015	<p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p> <p>DW advised that he would liaise with LJ for an update.</p> <p>LJ advised the info was awaited from Mercury.</p> <p><b>It was noted that info is still awaited from Mercury.</b></p>	
5230	PMI 461	HV Infrastructure Works	20/01/2016	<p>The Board are progressing with the installation of HV Infrastructure on the QEUH Campus, with a section of the cable route running through the current Phase 3a Demolition Site</p> <p>Proceed with the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely;</p> <ol style="list-style-type: none"> <li>1) Excavation of track approximately 50m.</li> <li>2) Installation of 3No. 200mm uPVC Ducts including draw ropes.</li> <li>3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level</li> <li>4) Forming 2No. temporary draw pits.</li> </ol> <p>LJ advised that the quote had been uploaded earlier that day.</p> <p><b>GF advised that the costs are ok</b></p>	

5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	10/02/2016	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.</p> <p>Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation.</p>	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016	<p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p>	
5342	PMI 464	Destructive Testing of Neurosurgery Overcladding Wind	10/02/2016	<p>The Board has concerns regarding the robustness of the internal window restrictor and external "Jackloc"</p> <p>Provide quotation for the destructive testing of new window frame to establish force required to break the internal restrictor and the Jacloc.</p>	
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016	<p>Alterations to curtain tracks abutting new windows</p> <p>Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows</p>	
5367	PMI 466	RHC LEVEL 4 DCFP - ANTILIGATURE THUMB TURN TO VISICOM SCREENS	17/02/2016	<p>Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms.</p> <p>Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms. Note anti-ligature thumb turns fitted to room side already.</p> <p>Rooms concerned are DCFP-022, 031, 032, 034, 035 &amp; 037.</p>	
	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLL	17/02/2016	<p>Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite..</p> <p>Take delivery of 3.5mm long, 76mm dia sign pole supplied to your Neuro site cabins. To 200mm dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).</p>	

For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
16933	CE 149	VIE 2 DEMOBILISATION AND MOBILISATION OF PILING RIG	23/09/2015	The Board confirm that the works to pile the VIE slab cannot run concurrent with INS works as a result of an on going asbestos survey. Rig will require to leave site and return once survey and any associated works complete.	Closed
18463	CE 160	RHC LEVEL 4 - DCFP DOOR LOCKS IN MAIN CORRIDOR	17/12/2015	Confirmation of PMI 452 for the installation of 7 No. star security locks to rooms DCFP-013, 021, 025, 027, 029, 038 and 048. Assign costs to Group 2 equipment budget.  Agreed cost [REDACTED] inc. OH+P but excl. VAT.	Closed
18501	CE 161	RHC AUDIOLOGY DEPT - CONTROL ROOMS OPD-083 & 086	22/12/2015	Remove fitted desks in Control Rooms as per PMI 448.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
18824	CE 162	PHASE 3A - SURFACE CAR PARK 4 - CONSTRUCTION PHASE	26/01/2016  28/01/2016	Brookfield Multiplex are to proceed with the construction of the surface car park works as set out in PMI 320 and as detailed in the approved planning submission from Glasgow City Council. Target completion date is 30 June 2016, with a revised programme to be submitted within one week of this CE issue.  Agreed cost [REDACTED] incl OH+P but excl. VAT. It was noted that sign-off of the building warrant is awaited.	Closed
18931	CE 162A	RHC REHABILITATION DEPARTMENT ROOM REH-049 VESTIBULAR HOOK	03/02/2016	Please proceed with design for gantry to support vestibular hook, all as per design information supplied under PMI 443. Please provide design for approval, cost to fabricate and install and programme to install.  Agreed cost [REDACTED] incl OH+P but excl VAT.	
18933	CE 163	RHC REHABILITATION DEPARTMENT - ROOM REH 049 TREATMENT ROOM	03/02/2016	Works as set out in PMI 457. In Room REH-049 shorten track and re-commission Arjo Huntleigh Maxi Sky Lift. Make adjustments to ceiling grid and tiles as required.  Agreed cost [REDACTED] incl OH+P but excl. VAT	Closed 24/02/2016

19114	CE 164	PHASE 3A DEMOLITION OF SURGICAL BLOCK - CAPPING LAYER	16/02/2016	Supply and install foamed concrete capping layer to contaminated (Asbestos particulate) ground in under-croft as set out in PMI 451.  Agreed cost [REDACTED] incl. OH+P but excl. VAT. Set against risk budget for Ph. 3A contaminated ground.	Closed 24/02/2016
19115	CE 165	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 & 178	16/02/2016	Please proceed with detailed design to establish feasibility and cost to make layout changes in the above rooms as set out in PMI 454.  Agreed cost for design work is [REDACTED] incl. OH+P but excl. VAT.	Closed 24/02/2016
19116	CE 166 -	RHC BUILDING SYSTEMS - ADDITIONAL TRAINING	16/02/2016	Provide additional staff training on nurse call, audio loop and Tannoy systems as per PMI 455.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	Closed 24/02/2016

## Other items that require discussion:

- Medical gas alarm transducers retrofit – DH requested that DP provide information regarding the timescales (15/01/2015) DP advised this is WIP. BMCL are pushing to get the transducers fitted, tested and witnessed. DH noted that the outstanding risk is circa 7 transducers which are not on site as yet to be fitted. (22/01/2015) AF advised that DP would be asked to provide an update (29/01/2015) DP advised that they were all fitted and circa 60% tested. Witnessing to commence 09/02/2015. DH suggested that IS is on leave (05/02/2015). All now fitted and tested, with witnessing by H&K ongoing. Nitrous total flow test 18/02/2015, await result. (19/02/2015). DP advised that the witnessing was currently being worked through. Sign off would be needed by IP as AE (05/03/2015) DP advised that HPI had been contacted to confirm that their paperwork needs to be completed by 31<sup>st</sup> March 2015. DH advised that ISandford is on site doing late shifts for testing. (12/03/2015) DH advised that it was thought that the witness testing was circa 70% and H&K had been advised that they need to get all the paperwork complete by 31<sup>st</sup> March 2015. (19/03/2015) DP noted that he thought that work was all complete but that he would check and provide feedback later that day (26/03/2015) DP Advised that he understood that all the works had been carried out (02/04/2015) DW advised that the system is all up and running and signed up. There are a couple of transducers to be replaced as pressures are drifting. (30/4/2015) DW advised that he would seek a status update (07/05/2015) DW noted that there was a difference in opinion between IS and HPI – work in progress to conclude (14/05/2015) DW advised that there is an issue – the schedule has been given to IS so that he can mark it up (21/05/2015) DW noted that IS has the info and he would chase up IS so that this matter could be closed out. (28/05/2015) DW advised that he is awaiting ISandford to confirm which transducer is to be changed. DW advised that he will continue to push. (04/06/2015) DW noted that ISandford had provided a list. HPI and Mercury are being geared up to start swapping out the transducers (11/06/2015) DW advised that the transducers have been ordered and BMCL are awaiting a delivery date (25/06/2015) DW noted that the transducers are with HPI however the HPI rep is currently on sick leave (30/07/2015) GA advised that he would liaise with JM for update (06/08/2015) GA advised that all materials are on site and HPI and AE are discussing how to do the swapover. Difficulty is that the drawing showing the transducers is with the rep who is on sick leave (13/08/2015) GA advised that HPI are liaising with NHS Estates to identify dates for the works (27/08/2015) DW advised that there had been difficulty obtaining AP sign off so BMCL had given the info to ISandford to review and ISandford has come back with some comments. It was hoped that the works could be started w/c 21/09/2015 (17/09/2015) DW advised that the RAMS had been issued to David Brattay and has now been signed off (24/09/2015) DW advised that Mercury are awaiting starting. DBrattay is to advise when Mercury can gain access to each area to that the retrofit works can be carried out. (01/10/2015) DW advised that BMCL have an indicative date from DBrattay. The test rig which had been delivered to site was subsequently identified as having a fault and therefore was unable to test the new transducer for rise/fall in pressure. WIP (12/11/2015) GA advised that BMCL were awaiting confirmation when the test rig will be back on site, BMCL would link in with David Brattay (26/11/2015) GA advised that the test rig is to be on site w/c 14/12/2015. Mercury to contact DBrattay and agree the programme of works. (10/12/2015) DW advised that HPI are due on site at the beginning of February doing a maintenance visit and will carry out the works then (14/01/2016) GA advised that the works have been programmed to take place on 9/10<sup>th</sup> Feb 2016. (28/01/2016) **DW to confirm that works are complete (11/02/2016)**
- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due

to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) **GF agreed to discuss with IP – IP to clean the system in advance of BMCL changing the valves over (11/02/2016)**

- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016) It was noted that DW is awaiting an update from JKeenan (28/01/2016) **No update was available regarding replacement chatterbox – GF agreed to liaise with JK for an update (11/02/2016)**
- CE 156 – 3 sets of supply onto a single switch – DW noted that he has an agreed proposal as to how to progress this matter. However, to carry out the works will require that the traffic lights are switched off. IP and JW are discussing (14/01/2016) GA advised that JMiller had issued an email outlining what needed to be carried out to do the works. PM enquired if BMCL could provide a couple of paras about what BMCL will be doing. PM advised that he would be happy to meet JMiller if required the following week. GA advised that a temporary traffic management plan could be put in place however the quote did not include for traffic management. LJ was requested to progress this with LEng. PM noted that the traffic management would need to ensure that the traffic into the bus lanes is managed. HMc to be involved in any discussions so can co-ordinate. (28/01/2016) **GF advised that he would check with BHunter (11/02/2016)**
- Signal at crossing point – PM noted that one of them is loose and that he would provide contact details of John Sharkey to JPhillips (14/01/2016) **GA advised that he had checked and was unable to find any loose. PM advised that he would email John Sharkey for confirmation of which signal was loose. (18/01/2016)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 1997

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 09/03/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Brattay. Subsequent to

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>approval, BMCL would expect a PMI with the approved drawing attached to instruct the works. GF noted that the drawings are with DB &amp; IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley &amp; Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.</p> <p>GF advised that he is trying to progress the sign-off and return of the drawings.</p> <p>GF noted that the drawing was being revised and a PMI would be issued to BMCL in due course. It was proposed that a walkround should be organised.</p> <p>GA advised this was issued for pricing but revision to sequencing to be undertaken. Mercury will tie up directly with HPI. GF agreed to chase up IP.</p>	
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p> <p>23/4/2015</p> <p>30/04/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p> <p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p> <p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing</p>	

			<p>07/05/2015 update/design fees.</p> <p>14/05/2015 GB noted that collation of the Building Warrants is WIP</p> <p>21/05/2015 GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.</p> <p>28/05/2015 FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application</p> <p>04/06/2015 FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.</p> <p>11/06/2015 FS advised that GB is liaising with Mercury</p> <p>25/06/2015 GB advised that this would be progressed once the works completed in the summer</p> <p>30/07/2015 GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.</p> <p>05/08/2015 GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.</p> <p>13/08/2015 GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.</p> <p>27/08/2015 GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.</p> <p>17/09/2015 GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.</p> <p>24/09/2015 DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.</p> <p>01/10/2015 GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.</p> <p>08/10/2015 GA advised that BMCL are awaiting on another couple of drawings from group management.</p> <p>22/10/2015 GA advised that this item is WIP with the group management drawings expected within the next week or so.</p> <p>12/11/2015 GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.</p> <p>26/11/2015 DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.</p> <p>10/12/2015 GA noted that DW is chasing up Mercury for updated drawings</p> <p>14/01/2016 GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.</p> <p>28/01/2016 GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.</p> <p>11/02/2016 GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB</p> <p>25/02/2016 It was noted that this continues to be WIP with GB packaging up the drawings for issue.</p> <p>GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.</p>

26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped,	

			01/10/2015	<p>witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
			22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMII/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>	
			12/11/2015	<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
			26/11/2015	<p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
			10/12/2015	<p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that</p>	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016 25/02/2015</p>	<p>materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p> <p>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p> <p>It was noted that a revised programme has been issued which updates on the works LJ advised that the costs should be with the NHS in the next few weeks.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH)</p>	*****

Page 2004

			26/11/2015	THERAPY CENTRE (AL) DAY HOSPITAL Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015. GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.	10/12/2015 HMc noted that all buildings had been handed over by Friday 4 <sup>th</sup> December 2015.	All delays to be reviewed at the end of the programme  *****
27886	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	24/11/2015  26/11/2015  10/12/2015  14/01/2016  28/01/2016  11/02/2016 25/02/2016	Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements. If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this. GA advised that M&S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap. HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified. GA noted that the remainder of the staff were scheduled to undergo the training w/c 18/01/2016 at Fairfield Offices. GA advised that the training had now been provided. LJ requested a PMI for the cost which BMCL have encountered It was noted that BMCL are awaiting the issue of the PMI from the NHS.	NHS to issue PM for the additional training required by BMCL	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015    14/01/2016 28/01/2016	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works. GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B<CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW. GA noted that BMCL had completed their investigative works and surveys.	GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for	Item to remain on tracker until demolition works complete.

			11/02/2016	Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016	BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required? GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum. LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA requested a scope for the works. It was noted that BMCL are awaiting the issue of the PMI from the NHS for the design and install of BMS. Allowance within project budget costs. GF agreed to provide the PMI asap. GW noted that a cost from Mercury had been provided at the start as had advised that would be needed to make the system work however DR had advised that it wasn't required.	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	<p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
			13/08/2015	<p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p>	
			27/08/2015	<p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p>	
			17/09/2015	<p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
			24/09/2015	<p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p>	
			01/010/2015	<p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
			08/10/2015	<p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
			22/10/2015	<p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
			12/11/2015	<p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
			26/11/2015	<p>GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
			10/12/2015	<p>GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the</p>	

			14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.</p> <p><b>GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.</b></p>	
27784	NHS EWN 062 -	Decontamination Tank	17/11/2015 26/11/2015 10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap.</p> <p>GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve.</p> <p>GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break.</p> <p>DW noted that the works are complete and JMiller will liaise with IPowrie regarding training. There appears to be a difference in opinion with users which IP is working through.</p> <p>GA advised that JMiller is awaiting on confirmation from Estates as to when the training is to be provided. PM advised that BMCL should go ahead and organise the training.</p> <p>GF agreed to email IP in order to progress the training.</p> <p><b>GF advised that a date for the training is to be provided by IP asap.</b></p>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUA/RHC - Front Elevation	17/11/2015 26/11/2015 10/12/2015 14/01/2016  28/01/2016 11/02/2016 25/02/2016	<p>The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUA/RHC be provided to the Board asap.</p> <p>GA noted that GB had been chasing WSP for the report..</p> <p>GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS</p> <p>GA noted that BMCL had met with JCoX earlier that day. JCoX had suggested that there is no great difference in study findings. The letter from JCoX would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCoX info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</p> <p>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCoX to go through the report. The report would subsequently be issued to the NHS asap. It was noted that BMCL had received correspondence from WSP earlier that day. Letter would be issued to the NHS asap.</p> <p><b>GW advised that the letter received from WSP was under review by BMCL. BMCL had also received a report from Gillespies which suggested that there are no hard/soft landscaping changes which can be done to assist. The WSP outcome had taken longer than expected to obtain as the model which the previous survey had been carried out on was now not available. GW noted that JCoX</b></p>	

				had advised that he had told the NHS that they would be building a 14 storey building on a windy site.	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	<p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p> <p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH</p>	

			14/01/2016	noted that he had a similar concern about the lighting raised to himself as well. GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	
			28/01/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			11/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).	
			25/02/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 09/03/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.  The names for the new hospitals are;  The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow  Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.	
			23/07/2015	GB advised that BMCL would put an instruction to Land Eng.	
			30/07/2015	GB noted that he had asked Gillespies to update their drawings.	
			06/08/2015	GA advised that the bulk of the works will be complete by 7 <sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.	
			13/08/2015	GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the	

A51679245

			<p>27/08/2015 17/09/2015 24/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015 26/11/2015 10/11/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016</p>	<p>works which will be required to connect the lighting due to the distance to the nearest connection point. PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood. PM advised that he would approve the drawings asap and agreed to provide the response via Aconex GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap. GB noted that a series of drawings had been issued and feedback from PM was awaited. GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds. GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress. PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided. GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review. GA advised that the signs had been ordered and a delivery date was awaited from Land Eng. GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016. GA noted that signage will start to be installed the following day and the lights would be installed mid Feb 2016. GA noted that the lights would be on by 19<sup>th</sup> Feb 2016. <b>GA advised that the signage has been installed. BMCL are not satisfied with the repairs to the block work and have asked another company to look at this as there are a few holes to be remediated. The lighting is due to be installed at the beginning of March 2016.</b></p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015  01/10/2015 08/10/2015 22/10/2015 12/11/2015 26/11/2015</p>	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired. GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.</p>	

			10/12/2015	LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.	
			14/01/2016	GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCox by BMCL.	
			28/01/2016	LJ noted that the design costs had been uploaded to Sypro earlier that day for NHS review/approval.	
			11/02/2016	It was noted that BMCL are awaiting the issue of the CE from the NHS.	
			25/02/2016	CE 162A issued. It was noted that GB has advised WSP to progress with the design. BMCL to accept PMI on basis of design only. NHS to raise PMI for supply and install of goalpost frame subject to satisfactory design.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of	09/11/2015	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a	25/02/2016

		0.004%	<p>12/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter.</p> <p>GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample.</p> <p>GA advised that Central are looking to get access to the area so that they can prepare a price.</p> <p>GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area.</p> <p>PM noted that the costs had been uploaded to Sypro and he would issue a CE for this item</p> <p>GA advised that the works were complete and the cost info was to be provided to the NHS for input to Sypro.</p> <p>BMCL to upload costs to Sypro</p> <p><b>It was noted that CE 164 had been issued. Item closed</b></p>	
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	<p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff.</p> <p>GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs.</p> <p>GA noted that a sample has been approved and fitting would be progressed by MMM joinery asap.</p> <p>GA advised that the locks delivery is awaited. PM noted that he had advised the users that it would likely be 5-6 weeks.</p> <p>GA noted that the works have been completed. CE to be provided by NHS and costs to be uploaded to Sypro.</p>	Cross ref CE 160
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	<p>01/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p><b>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with</b></p>	

				DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p><b>It was noted that CE 165 has been issued. Item closed.</b></p>	CE 165
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015  10/12/2015 14/01/2016 28/01/2016  11/02/2016 25/02/2016	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote. GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room. GF noted that he would liaise with PM</p> <p><b>GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.</b></p>	

5067	PMI 457	RHC – REHABILITATION DEPARTMENT - REH 036 & 049	<p>02/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>REH-049 – REHAB/TREATMENT ROOM Arrange for Arjo Huntleigh to attend site and re-commission Maxi Sky hoist in room. In addition establish feasibility and cost to shorten support rail at window end by 1 metre. Provide cost for second item before proceeding.</p> <p>REH-036 – SHOWER ROOM Isolate and disconnect cleaners power outlet adjacent to shower area at low level, supply and fit blank cover plate and seal around with white silicone. Behind door and adjacent to mirror at a height of 1200mm supply and install a single 13a socket outlet in compliance with IEE Regulations. This socket for use of hair dryer.</p> <p>REH-049 - PM requested that BMCL organise for the Arjo rep to come to site so that PM can meet with the rep.</p> <p>REH -036 – GA noted that DW had advised that Mercury have reviewed and some works have subsequently been completed. The hairdryer socket however is unable to be fitted as this would contravene British Standards.</p> <p>PM noted that Arjo Huntleigh are to be organised to come back to site and that Jordan is progressing this.</p> <p>PM advised that he would provide a CE for this item as the NHS needed Arjo to come back to site. Arjo to revisit the site. Stop block to be inserted rather than be altered</p> <p>GA advised that all works have been completed with the exception of shortening the hoist track. BMCL are awaiting the co-ordination information re vestibular hook before carrying out further works. It was noted that CE 163 had been issued therefore item could be closed.</p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	<p>17/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p> <p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following; 1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install. 2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051. Refer attached datasheet.</p> <p>PM noted that the users have advised that they do not consider the baskets as a ligature risk. PM requested that BMCL progress the fitting of the baskets asap as the Board Chairman has taken an interest in the DCFP area. DW advised that the retrofit of the basket may cause difficulty re warranty. DW agreed to get an update from LJ and provide feedback asap.</p> <p>PM advised that DW has provided an email and on the basis of this email PM had advised the users that there is a difficulty in getting warranty on the system if baskets are installed.</p> <p>GF noted that he would liaise with PM regarding the way forward</p> <p>GA noted that DW had been advised by Mercury that they will not fit the cage guards. PM noted that he had thought DW was going to liaise further with the insurance company. GA agreed to check with DW.</p>	

5144	PMI 459 -	Office Block External Works	21/12/2015	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <ol style="list-style-type: none"> <li>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</li> <li>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</li> <li>3) Extension of Tobermore paving from OB to Langlands Drive</li> <li>4) Access path across grasscrete to CP2 staircore.</li> <li>5) Construction of grassed strips between office block and CMB/Carpark</li> </ol> <p>GA noted that LJ is awaiting costs from LE</p> <p>28/01/2016 LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p>11/02/2016 It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>25/02/2016 <b>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</b></p>	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	23/12/2015	<p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Please provide a price to undertake the following works, refer attached sketch drawings.</p> <p>Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p> <p>14/01/2016 DW advised that he would liaise with LJ for an update.</p> <p>28/01/2016 LJ advised the info was awaited from Mercury.</p> <p>11/02/2016 It was noted that info is still awaited from Mercury.</p> <p>25/02/2016 <b>LJ advised that the quotations had now been received by BMCL and a copy would be provided to the NHS asap.</b></p>	Cross ref CE 167
5230	PMI 461	HV Infrastructure Works	20/01/2016	<p>The Board are progressing with the installation of HV Infrastructure on the QEUH Campus, with a section of the cable route running through the current Phase 3a Demolition Site</p> <p>Proceed with the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely;</p> <ol style="list-style-type: none"> <li>1) Excavation of track approximately 50m.</li> <li>2) Installation of 3No. 200mm uPVC Ducts including draw ropes.</li> <li>3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level</li> <li>4) Forming 2No. temporary draw pits.</li> </ol> <p>28/01/2016 LJ advised that the quote had been uploaded earlier that day.</p> <p>11/02/2016 GF advised that the costs are ok</p> <p>25/02/2016 <b>GF agreed to provide a CE for the works. HMc advised that works will be carried out across the</b></p>	

				demolition site entrance over the weekend.	
5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	10/02/2016  25/02/2016	The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.  Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 & 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation. LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter.	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016  25/02/2016	Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base  Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base. Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document. It was noted that the sequencing info is awaited.	
5342	PMI 464	Destructive Testing of Neurosurgery Overcladding Wind	10/02/2016  25/02/2016	The Board has concerns regarding the robustness of the internal window restrictor and external "Jackloc"  Provide quotation for the destructive testing of new window frame to establish force required to break the internal restrictor and the Jacloc. GF advised that the further certification had been provided however if reps are not happy then costs would need to be rejected.	
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info	
5367	PMI 466	RHC LEVEL 4 DCFP - ANTILIGATURE THUMB TURN TO VISICOM SCREENS	17/02/2016  25/02/2016	Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms.  Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms. Note anti-ligature thumb turns fitted to room side already.  Rooms concerned are DCFP-022, 031, 032, 034, 035 & 037. PM advised that the anti-lig thumb turn has a cone shape to the room side and that the room side type is to be the same as that which is to be fitted to the corridor side. It was noted that CE 160 had been issued	
	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLL	17/02/2016	Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite..	

			25/02/2016	<p>Take delivery of 3.5mm long, 76mm dia sign pole supplied to your Neuro site cabins. To 200mm dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).</p> <p>For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.</p> <p>GF advised that he would organise for the pole to be provided. Design and costs for bike stands received.</p>	
5443	PMI 468 -	Asbestos Awareness Training for BMCL Site Staff	07/03/2016	The Board request BMCL provide the cost incurred for the additional training undertaken by BMCL Site Staff and Operatives in order to comply and adhere to the Board's Asbestos Management Policy. This was out with the contractual requirements of the NSGH project. Cross reference BMCL/EW/168	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016	The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2015	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame.	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016	<p>The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below</p> <p>Corridor to be HEPA filtered  Bathrooms to be fully sealed  Room pressures to be 2.5 -8 PA  ACH 6/hr  Air Change in prep room 6/hr  Entrance to ward to be air locked using double door at front entrance.  Exit door (beside room 76) to be sealed and only used as fire exit.</p> <p>BMCL is also requested to confirm the timescale to complete the feasibility study.</p>	

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016	<p>The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e.</p> <p>Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p> <p>Agreed cost [REDACTED] incl. OH+P but excl. VAT.</p>	
19415	CE 168 -	HV Infrastructure Works	07/03/2016	<p>The Board confirm that BMCL should proceed with the works as identified in PMI 461 i.e. the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely;</p> <ol style="list-style-type: none"> <li>1) Excavation of track approximately 50m.</li> <li>2) Installation of 3No. 200mm uPVC Ducts including draw ropes.</li> <li>3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level</li> <li>4) Forming 2No. temporary draw pits.</li> </ol> <p>Agreed cost [REDACTED] incl. OH+P but excl. VAT.</p>	

## Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) **It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016) It was noted that DW is awaiting an update from JKeenan (28/01/2016) No update was available regarding replacement chatterbox – GF agreed to liaise with JK for an update (11/02/2016) **GF noted that BMCL are awaiting the chatterbox being fitted by the NHS Estates Dept (25/03/2016).**
- CE 156 – 3 sets of supply onto a single switch – DW noted that he has an agreed proposal as to how to progress this matter. However, to carry out the works will require that the traffic lights are switched off. IP and JW are discussing (14/01/2016) GA advised that JMiller had issued an email outlining what needed to be carried out to do the works. PM enquired if BMCL could provide a couple of paras about what BMCL will be doing. PM advised that he would be happy to meet JMiller if required the following week. GA advised that a temporary traffic management plan could be put in place however the quote did not include for traffic management. LJ was requested to progress this with LEng. PM noted that the traffic management would need to ensure that the traffic into the bus lanes is managed. HMc to be involved in any discussions so can co-ordinate. (28/01/2016) **GF advised that he would check with BHunter (11/02/2016) GA advised that the works to the 3 sets of traffic lights would be carried out on 5<sup>th</sup> March and not 27<sup>th</sup> Feb as previously indicated. BMCL will have traffic marshalls but not traffic management (25/02/2016)**

- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 2022

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 23/03/2016:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	
A51679245					

			works. DL and PM to discuss
		26/03/2015 02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015 25/06/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS. PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
		22/10/2015 12/11/2015	Work in progress GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		26/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Brattay. Subsequent to

			14/01/2016	approval, BMCL would expect a PMI with the approved drawing attached to instruct the works. GF noted that the drawings are with DB & IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley & Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.	
			28/01/2016	GF advised that he is trying to progress the sign-off and return of the drawings.	
			11/02/2016	GF noted that the drawing was being revised and a PMI would be issued to BMCL in due course. It was proposed that a walkround should be organised.	
			25/02/2016	GA advised this was issued for pricing but revision to sequencing to be undertaken. Mercury will tie up directly with HPI. GF agreed to chase up IP.	
			10/03/2016	GF noted that he would send an email to BHunter after this meeting finishes in order to conclude the NHS input required.	
2457 6	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.	
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.	
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings	

		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.
		07/05/2015	GB noted that collation of the Building Warrants is WIP
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.
		04/06/2015	FS advised that GB is liaising with Mercury
		11/06/2015	GB advised that this would be progressed once the works completed in the summer
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.
		05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.
		13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.
		27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.
		17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.
		24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.
		01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.
		08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.
		22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.
		12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.
		26/11/2015	GA noted that DW is chasing up Mercury for updated drawings
		10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.
		14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.
		28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB
		11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.
		25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.

			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015       24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations	

			<p>noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>12/11/2015 GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>26/11/2015 GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
--	--	--	---	--

			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	
			11/02/2016	It was noted that a revised programme has been issued which updates on the works	
			25/02/2015	LJ advised that the costs should be with the NHS in the next few weeks.	
			10/03/2016	LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished. To date only the following buildings have been released for demolition following the removal of ACM/s;	

			26/11/2015	<p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
			10/12/2015	<p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	
2788 6	BMCL-EWN-168	REQUIREMENT FOR ADDITIONAL TRAINING	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p>	<p>Further to correspondence from Hugh McDerment dated 16th November 2015, we confirm that the requirement to have all personnel associated with the ongoing works on the QEUH campus to be qualified in asbestos awareness is currently out with our contractual requirements.</p> <p>If this training is required to comply with the policy please advise on how you wish us to proceed, as works are currently progressing in breach of this.</p> <p>GA advised that M&amp;S were scheduled to undertake the Asbestos Awareness training the following day. GA noted that Central Demolition reps already had the certification. GA advised that he also had the certification however PMcG did not and PMcG would undertake the training asap.</p> <p>HMc noted that he had met with the Board's Asbestos Manager who had confirmed that everyone on site needs to adhere to the policy – even cleaners should have an asbestos awareness certificate. GA advised that BMCL were in the process of getting all reps certified.</p> <p>GA noted that the remainder of the staff were scheduled to undergo the training w/c 18/01/2016 at Fairfield Offices.</p> <p>GA advised that the training had now been provided. LJ requested a PMI for the cost which BMCL have encountered</p> <p>It was noted that BMCL are awaiting the issue of the PMI from the NHS.</p> <p>NHS to issue PMI for the additional training required by BMCL</p> <p>It was noted that PMI Had been issued therefore this EW could be closed. Cross ref PMI 468.</p>	Cross ref PMI 468
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to</p>	<p>Item to remain on tracker until demolition works complete.</p>

			14/01/2016 28/01/2016  11/02/2016	<p>asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW. GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.</p>	
28099	BMCL-EWN-172	INS Entrance - BMS System	14/12/2015  14/01/2016  28/01/2016  11/02/2016  25/02/2016  10/03/2016	<p>BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?</p> <p>GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum.</p> <p>LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA requested a scope for the works.</p> <p>It was noted that BMCL are awaiting the issue of the PMI from the NHS for the design and install of BMS. Allowance within project budget costs.</p> <p>GF agreed to provide the PMI asap. GW noted that a cost from Mercury had been provided at the start as had advised that would be needed to make the system work however DR had advised that it wasn't required.</p> <p><b>PMI requesting cost information provided therefore this EW can be closed.</b></p>	Cross reference PMI 469
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p> <p><b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b></p>	

28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p>	
-------	--------------	--	--	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 23/03/2016

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015  23/4/2015  30/04/2015  07/05/2015  14/05/2015  21/05/2015 28/05/2015 04/06/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p>	

A51679245

			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
			30/07/2015	FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand. FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/10/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should	

			22/10/2015	also liaise with RClinton. PM noted that it is work in progress re Structural panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structural regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
			14/01/2016	GA noted that Structural were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.	
			28/01/2016	GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structural on 1 <sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.	
			11/02/2016	GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structural panel is on order and mastic works.	
			25/02/2016	GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.	
			10/03/2016	GA advised that the panel was expected to be delivered to the Structural factory w/c 14 <sup>th</sup> March and to the QEUH w/c 21 <sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.	

27784	NHS EWN 062 -	Decontamination Tank	17/11/2015	The Board request that the works to complete the full operationalisation of the decontamination tank are completed asap.	
			26/11/2015	GA advised that the replacement valve was on its way back to site. As soon as the valve arrives he would organise for Mercury to fit the valve.	
			10/12/2015	GA advised that the replacement valve is due on site that day and anticipating that by the end of the following week that the system will be operational. Training of the system would follow however this was now likely to be after the festive break.	
			14/01/2016	DW noted that the works are complete and JMiller will liaise with IPowrie regarding training. There appears to be a difference in opinion with users which IP is working through.	
			28/01/2016	GA advised that JMiller is awaiting on confirmation from Estates as to when the training is to be provided. PM advised that BMCL should go ahead and organise the training.	
			11/02/2016	GF agreed to email IP in order to progress the training.	
			25/02/2016	GF advised that a date for the training is to be provided by IP asap.	
			10/03/2016	GA advised that training had now been provided therefore this item could be closed.	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	17/11/2015	The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.	
			26/11/2015	GA noted that GB had been chasing WSP for the report..	
			10/12/2015	GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS	
			14/01/2016	GA noted that BMCL had met with JCoX earlier that day. JCoX had suggested that there is no great difference in study findings. The letter from JCoX would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCoX info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.	
			28/01/2016	GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCoX to go through the report. The report would subsequently be issued to the NHS asap.	
			11/02/2016	It was noted that BMCL had received correspondence from WSP earlier that day . Letter would be issued to the NHS asap.	
			25/02/2016	GW advised that the letter received from WSP was under review by BMCL. BMCL had also received a report from Gillespies which suggested that there are no hard/soft landscaping changes which can be done to assist. The WSP outcome had taken longer than expected to obtain as the model which the previous survey had been carried out on was now not available. GW noted that JCoX had advised that he had told the NHS that they would be building a 14 storey building on a windy site.	
			10/03/2016	GA advised that the wind survey report is with AFernie.	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.	
			10/12/2015	Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p>	<p>place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.</p> <p>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</p> <p>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being</p>	

			25/02/2016 10/03/2016	installed the following day (12/2/). GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns. GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
29125	NHS EW 066 -	Phase 3a HV Cable Fault	09/03/2016 10/03/2016	The Boards Estates team have advised that a fault has been identified on the HV cable that crosses the Phase 3a Landscaping site. The suggestion from the Estates team is that the Demolition site trafficking over the cable has caused the fault. Allow the Boards HV Contractor access to site to carryout investigations and repairs. GA noted that PMcG has been in touch with contractors for them to get access to site to do exploratory works. GA advised that BMCL have not damaged the drain.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 23/03/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015  23/07/2015 30/07/2015 06/08/2015  13/08/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>GB advised that BMCL would put an instruction to Land Eng.</p> <p>GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the</p>	

			<p>27/08/2015 17/09/2015 24/09/2015 01/10/2015 08/10/2015 22/10/2015 12/11/2015 26/11/2015 10/11/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016</p>	<p>works which will be required to connect the lighting due to the distance to the nearest connection point. PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood. PM advised that he would approve the drawings asap and agreed to provide the response via Aconex GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap. GB noted that a series of drawings had been issued and feedback from PM was awaited. GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds. GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress. PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided. GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review. GA advised that the signs had been ordered and a delivery date was awaited from Land Eng. GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016. GA noted that signage will start to be installed the following day and the lights would be installed mid Feb 2016. GA noted that the lights would be on by 19<sup>th</sup> Feb 2016. GA advised that the signage has been installed. BMCL are not satisfied with the repairs to the block work and have asked another company to look at this as there are a few holes to be remediated. The lighting is due to be installed at the beginning of March 2016. <b>GA advised that the lights were currently being installed and it was hoped that the lighting would be completed early w/c 14/03 at the latest.</b></p>	
4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	<p>25/09/2015          01/10/2015 08/10/2015 22/10/2015 12/11/2015</p>	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding. GW noted that the costing is ongoing GA noted that the information was with the design and cost teams GB advised that the information had been provided to WSP for them to provide a design GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.</p>	

			26/11/2015	GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.	
			10/12/2015	LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.	
			14/01/2016	GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCoX by BMCL.	
			28/01/2016	LJ noted that the design costs had been uploaded to Sypro earlier that day for NHS review/approval.	
			11/02/2016	It was noted that BMCL are awaiting the issue of the CE from the NHS.	
			25/02/2016	CE 162A issued. It was noted that GB has advised WSP to progress with the design. BMCL to accept PMI on basis of design only. NHS to raise PMI for supply and install of goalpost frame subject to satisfactory design.	
			10/03/2016	GA advised that WSP have been requested to progress the design. It was noted that CE 162 had been issued to cover the design element.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	

			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.	
4906	PMI 451 -	Capping instructions for soil area below Block AL with ACM content of 0.004%	09/11/2015  12/11/2015  26/11/2015 10/12/2015  14/01/2016 28/01/2016  11/02/2016 25/02/2016 10/03/2016	Please refer to the area in blue on the attachment. This basement area has a concrete slab/screed floor and below this the soil was found to have an asbestos content of 0.004% and is required to be undisturbed during the demolition and then the concrete screed/ slab has to be overlain with a suitable approved geotextile membrane of the following type – minimum 1000 gauge, water permeable, rot proof, chemically resistant, high tensile strength. (TCS Geotechnics GP90 is suggested or equivalent approved) and then capped with a layer of inert soil to 0.6 m depth minimum. The geotextile must be fixed securely and overlap by a minimum of 0.2 m at joints and extend to a minimum distance of 1 metre past the extents of the soil area perimeter. GA advised that he had forwarded on this information to Central Demolition in order to get their thoughts on how to do this and to obtain a quote. HMc noted that the capping materials should have no asbestos content and that Central Demolition should be able to provide a sample. GA advised that Central are looking to get access to the area so that they can prepare a price. GA advised that it was proposed to pump in self levelling concrete through the window on to the solum. This will allow the building to come down safely on top of that area. PM noted that the costs had been uploaded to Sypro and he would issue a CE for this item GA advised that the works were complete and the cost info was to be provided to the NHS for input to Sypro. BMCL to upload costs to Sypro It was noted that CE 164 had been issued. Item closed <b>GA advised that the asbuilt drawing will identify the encapsulated area. Item closed</b>	25/02/2016
5030	PMI 452	RH C LEVEL 4 DCFP WARD - CORRIDOR LOCKS ON TOILET AND UTILITY ROOM DOORS	26/11/2015  10/12/2015  14/01/2016 28/01/2016  11/02/2016  10/03/2016	Please replace lock mechanism to 7 No. door locks on corridor side of doors to enable them to be locked by staff to restrict access by the patients. All as agreed with staff. Please proceed immediately to source materials and complete work as soon as possible. Rooms are thought to be DCFP - 013, 021, 025, 027, 029, 038 and 048 please confirm with staff user group on ward. Do not incorporate any other works that may be verbally instructed by local user staff. GA noted that a sample has been fitted and approved. The remainder to be provided – will be 7 locks with 7 torx keys. LJ to upload costs. GA noted that a sample has been approved and fitting would be progressed by MMM joinery asap. GA advised that the locks delivery is awaited. PM noted that he had advised the users that it would likely be 5-6 weeks. GA noted that the works have been completed. CE to be provided by NHS and costs to be uploaded to Sypro. <b>It was noted that CE 160 had been issued. Item closed</b>	Cross ref CE 160
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015	In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.	

			<p>10/12/2015 14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016 25/02/2016</p> <p>10/03/2016</p>	<p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p><b>GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</b></p>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	<p>01/12/2015</p> <p>10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016</p>	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p>It was noted that CE 165 has been issued. Item closed.</p> <p><b>GA advised that the drawings had been received and will be reviewed asap. Item closed.</b></p>	CE 165
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	<p>02/12/2015</p>	<p>Room OPD-015 MEETING ROOM</p> <p>Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04.</p> <p>(Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM</p> <p>Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC.</p> <p>Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p>	

			<p>10/12/2015 14/01/2016 28/01/2016</p> <p>11/02/2016 25/02/2016</p> <p>10/03/2016</p>	<p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote.</p> <p>GA noted that LJ has received costs and will upload to Sypro by close of business that day.</p> <p>LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.</p> <p>GF noted that he would liaise with PM</p> <p>GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.</p> <p>GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL ROOM/SOFT PLAY AREA	<p>17/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016 25/02/2016</p> <p>10/03/2016</p>	<p>Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.</p> <p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following;</p> <p>1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install.</p> <p>2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051.</p> <p>Refer attached datasheet.</p> <p>PM noted that the users have advised that they do not consider the baskets as a ligature risk. PM requested that BMCL progress the fitting of the baskets asap as the Board Chairman has taken an interest in the DCFP area. DW advised that the retrofit of the basket may cause difficulty re warranty. DW agreed to get an update from LJ and provide feedback asap.</p> <p>PM advised that DW has provided an email and on the basis of this email PM had advised the users that there is a difficulty in getting warranty on the system if baskets are installed.</p> <p>GF noted that he would liaise with PM regarding the way forward</p> <p>GA noted that DW had been advised by Mercury that they will not fit the cage guards. PM noted that he had thought DW was going to liaise further with the insurance company. GA agreed to check with DW.</p> <p>GA advised this had been discussed with DW. DW advised that it needs to be an approved design and therefore a new fitment/sprinkler head would need to be installed. DW had already confirmed this by email to the PM prior to PM leaving the Board.</p>	
5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p>	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p> <p>3) Extension of Tobermore paving from OB to Langlands Drive</p> <p>4) Access path across grasscrete to CP2 staircore.</p>	

			<p>14/01/2016 28/01/2016  11/02/2016  25/02/2016 10/03/2016</p>	<p>5) Construction of grassed strips between office block and CMB/Carpark GA noted that LJ is awaiting costs from LE LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW. It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up. It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review. <b>GF advised that he would liaise with DR regarding the costs provided.</b></p>	
5160	PMI 460	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	<p>23/12/2015         14/01/2016 28/01/2016 11/02/2016 25/02/2016  10/03/2016</p>	<p>Please provide a price to undertake the following works, refer attached sketch drawings.  Please provide a price to undertake the following works, refer attached sketch drawings. Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads. Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards. DW advised that he would liaise with LJ for an update. LJ advised the info was awaited from Mercury. It was noted that info is still awaited from Mercury. LJ advised that the quotations had now been received by BMCL and a copy would be provided to the NHS asap. <b>It was noted that CE 167 has been issued therefore this item could be closed.</b></p>	Cross ref CE 167
5230	PMI 461	HV Infrastructure Works	<p>20/01/2016       28/01/2016 11/02/2016 25/02/2016  10/03/2016</p>	<p>The Board are progressing with the installation of HV Infrastructure on the QEUH Campus, with a section of the cable route running through the current Phase 3a Demolition Site  Proceed with the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely; 1) Excavation of track approximately 50m. 2) Installation of 3No. 200mm uPVC Ducts including draw ropes. 3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level 4) Forming 2No. temporary draw pits. LJ advised that the quote had been uploaded earlier that day. GF advised that the costs are ok GF agreed to provide a CE for the works. HMc advised that works will be carried out across the demolition site entrance over the weekend. <b>It was noted that CE 168 has been issued therefore this item could be closed.</b></p>	Cross ref CE 168
5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	<p>10/02/2016</p>	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.  Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the</p>	

			25/02/2016 10/03/2016	statutory approval fees within quotation. LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter. GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL.	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016  25/02/2016	Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base  Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base. Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document. It was noted that the sequencing info is awaited.	
5342	PMI 464	Destructive Testing of Neurosurgery Overcladding Wind	10/02/2016  25/02/2016 10/03/2016	The Board has concerns regarding the robustness of the internal window restrictor and external "Jackloc"  Provide quotation for the destructive testing of new window frame to establish force required to break the internal restrictor and the Jacloc. GF advised that the further certification had been provided however if reps are not happy then costs would need to be rejected. GF noted that this PMI was now cancelled. A new PMI would be issued re jaclocs. GF would liaise with SWalker re whether fitting of jaclocs is required to the office space.	
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost.	
5367	PMI 466	RHC LEVEL 4 DCFP - ANTILIGATURE THUMB TURN TO VISICOM SCREENS	17/02/2016  25/02/2016 10/03/2016	Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms.  Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms. Note anti-ligature thumb turns fitted to room side already.  Rooms concerned are DCFP-022, 031, 032, 034, 035 & 037. PM advised that the anti-lig thumb turn has a cone shape to the room side and that the room side type is to be the same as that which is to be fitted to the corridor side. It was noted that CE 160 had been issued It was noted that CE 160 issued therefore this item could now be closed	
	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLL	17/02/2016	Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite.. 			25/02/2016  10/03/2016	<p>dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grow in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).</p> <p>For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.</p> <p>GF advised that he would organise for the pole to be provided. Design and costs for bike stands received.</p> <p>GA advised that the pole had been delivered and that Land Engineering would install before the end of the following week.</p>	
5443	PMI 468 -	Asbestos Awareness Training for BMCL Site Staff	07/03/2016  10/03/2016	<p>The Board request BMCL provide the cost incurred for the additional training undertaken by BMCL Site Staff and Operatives in order to comply and adhere to the Board's Asbestos Management Policy. This was out with the contractual requirements of the NSGH project. Cross reference BMCL/EW/168</p> <p>It was noted that NHS to issue CE to BMCL.</p>	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016	The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016	<p>The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame.</p> <p>GA noted that WSP are progressing the design.</p>	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016  10/03/2016	<p>The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below</p> <p>Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.</p> <p>BMCL is also requested to confirm the timescale to complete the feasibility study.</p> <p>GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB.</p>	
5509	PMI 472 -	Scaffold Alterations - Level 2 South Tower	21/03/2016	The Board request that BMCL carry out alterations to the level 2 south tower scaffolds to allow replacement of faulty UPS Equipment. Scaffold transoms to be raised with standard on AHU support beam removed.	

				Anticipated delivery date w/c 4th April 2016, date will be confirmed under separate correspondence.	
5510	PMI 473 -	Children's Play Park - Weed Suppression	21/03/2016	As per discussions on site (between Paul McGuinness and Graham Forsyth) this PMI confirms the verbal agreement that BMCL should not install bark mulch within the planted areas of the children's play park due to issues for immunosuppressed patients.  Further direction will be provided whether it may be an alternative or for the weed suppression to be omitted.	

### COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016	The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e. Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads. Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	Item closed 21/03/2016
19415	CE 168 -	HV Infrastructure Works	07/03/2016	The Board confirm that BMCL should proceed with the works as identified in PMI 461 i.e. the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely; 1) Excavation of track approximately 50m. 2) Installation of 3No. 200mm uPVC Ducts including draw ropes. 3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level 4) Forming 2No. temporary draw pits.  Agreed cost [REDACTED] incl. OH+P but excl. VAT.	Item closed 21/03/2016

### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) **GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016) It was noted that DW is awaiting an update from JKeenan (28/01/2016) No update was available regarding replacement chatterbox – GF agreed to liaise with JK for an update (11/02/2016) **GF noted that BMCL are awaiting the chatterbox being fitted by the NHS Estates Dept (25/03/2016).**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) **GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 2047

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 06/04/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
23685	BMCE-EWN-000150	VIE 2 Slab and foundation increase	<p>03/12/2014</p> <p>04/12/2014</p> <p>08/01/2015</p> <p>15/01/2015</p> <p>22/01/2015</p> <p>29/01/2015</p> <p>05/02/2015</p> <p>19/02/2015</p> <p>26/02/2015</p> <p>05/03/2015</p> <p>12/03/2015</p> <p>19/03/2015</p>	<p>Due to late amendments to the requirements from Air Products, the Boards specialist gases supplier, from those provided to BMCE by Air Products have resulted in the requirement to pile and increase slab depth, width and length from that previously required. This will result in additional cost and a delay to this requirement being completed by the stage 3 completion date.</p> <p>DH suggested that BMCL now have a programme issue which is accepted on the basis that it is a life safety system. There is a programme of works which needs to be done and DH suggested that the works should be carried out in March/April i.e. after the link bridge is complete but before the first patient. DH requested a justification for the alteration to the cost.</p> <p>DP advised that WSP on-going with the design to establish if any additional cost from initial cost estimate. AF advised that the design from WSP would be provided to PM as a pack. The swept path enlargement info is in the same pack and AF requested that the NHS provide the swept path information to Air Products. DH enquired if there was formal agreement from Air Products regarding the slab and DP confirmed that the design is based on the information agreed with Air Products.</p> <p>DMF advised that BMCL had the details to be uploaded to Sypro and this would be undertaken w/c 26/01/2015. PM confirmed that the drawings had been received and provided to Air Products for them to confirm they are ok.</p> <p>GW advised that BMCL have indicative costs and are awaiting BBJ to confirm their costs. Circa [REDACTED]. DH noted that this was to provide resilience. GW advised that BMCL had allowed for resilience and then Air Products changed the requirements. AF suggested that a separate meeting should be set-up to discuss the costs when available.</p> <p>GW advised that BMCL have more information to go through. AF suggested organising a separate meeting.</p> <p>Meeting arranged for 25.02.2015. Board to consider BMCE options for start date, if started now works could be complete by 3<sup>rd</sup> August, if held to coincide with piling works at INS entrance (with potential [REDACTED] saving) would not complete until 14<sup>th</sup> Sept. Board to review options to maintain resilience, also discuss with Hulley &amp; Kirkwood Air Products and HPI.</p> <p>DP advised that there had been a meeting the previous day. The NHS were to have an internal discussion. BMCL are continuing to work to the latter date to link in with the Neurosciences works.</p> <p>DP advised that BMCL are still working to the later plan for piling. He understood that the NHS were going to discuss the costs. DP had received a drawing which he would provide to the NHS asap. BMCL will need to take over the pavement. GW advised that he had no instructed LEng to do the Civils works. Suggestion is that works are [REDACTED] and BMCL wish to discuss the costs. PM advised that the NHS would try to resolve the costs by the end of the week.</p> <p>DP noted that it was understood that PM would discuss initially with DL and thereafter with GW.</p> <p>PM advised that he would liaise with DL and the NHS would come to a principle re what is in contract. GW advised that BMCL have had a meeting and want to discuss a compromise solution. BMCL will do the</p>	

A51679245

			works.
		26/03/2015	DL and PM to discuss
		02/04/2015	PM noted that he had discussed this with DL who had advised that he is not in a position to negotiate. GW advised that this was not satisfactory as BMCL had carried out the works which were needed because the Board's supplier had changed requirements twice – the latest change only being 6 months previous. AFe suggested that there should be a separate meeting to wrap up specific matters i.e. VIE, Soft landing costs, etc. GW agreed to prepare a paper to explain the BMCL position re the VIE.
		28/05/2015	Meeting being organised for 04/06/2015. Invite to be sent to FS.
		25/06/2015	PM noted that David had been requesting access to solum. DH noted access is required at the Mat in order to access a valve. PM suggested that it was to isolate a service. DH noted that ISandford was going to identify where the Med Gas survey has gone – should be with the Estates Dept.
		30/07/2015	DH enquired if BMCL were any further forward securing the drawings and DW advised not at moment due to the contact at HPI being on sick leave. DH suggested that BMCL could try Dom O'Donnell at Medi-gas who have record drawings – at least these would identify where access needs to be.
		06/08/2015	GW advised that design had been received that week. GB noted that Balfour Beattie are looking at the piling. GA noted that trial pits would also be done.
		13/08/2015	GA acknowledged that BMCL had received a limited asbestos risk assessment and that this had subsequently been passed to HPI. It was hoped that there was sufficient info to allow HPI to proceed with the design works, the piling cant start until the works are done. BMCL need to know that the valves are where they are meant to be and that there have been no tails taken off.
		27/08/2015	GA advised that Mercury are developing confined space risk assessment and method statement. Understand that NHS are going to provide further asbestos info/certification. GF advised that he had liaised with the rep re obtaining survey information and it is hoped that the survey information would be available the following week.
		17/09/2015	GA advised that the next round of asbestos survey information had been received for the trench – the information had subsequently been issued to HPI and Mercury for them to progress with the design. PM enquired if any further asbestos surveys were required and GA advised that no further surveys required at this time.
		24/09/2015	GA advised that the survey info had gone to HPI who are just finalising their paperwork to let them on site the survey on 25/09/2015. Once surveyed the design will be finalised and provided to ISandford for review.
		01/10/2015	GA advised that BMCL are having difficulty getting HPI trained up however the control measures may decrease if another access point is identified. GF suggested that there is a room in Maternity with a hatch which may provide access and that he would investigate this.
		08/10/2015	GF advised that David Brattay and Paul McGuinness are investigating other access to the pipework which would require less control measures to be put in place.
			Work in progress
		22/10/2015	GA advised that the way forward had been discussed at the progress meeting earlier that day. BMCL will continue to progress with the works they can. BMCL may need to get an instruction from the NHS re enabling works which fall out the current remit. GF noted that it had been agreed with HPI & ISandford to do a full isolation. DW suggested that GF should liaise with ISandford.
		12/11/2015	GA advised that there had been a meeting the previous week with the appropriate reps in attendance (NHS, BMCL, HPI, HK, Mercury. Proposals for enabling works to allow BMCL to progress the piling works had been discussed. IS has issued a phasing drawing. PM noted that he would discuss this with GF.
		26/11/2015	
		10/12/2015	GA advised that a drawing had been submitted and approval awaited from David Bratley. Subsequent to

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>approval, BMCL would expect a PMI with the approved drawing attached to instruct the works. GF noted that the drawings are with DB &amp; IP and signoff was anticipated to be concluded over the weekend. The sign-off will allow HPI to provide info re strategy and phasing. IP/DB will meet with and David/HPI and IS/Hulley &amp; Kirkwood. DW enquired if there would be a PMI issued to BMCL and this was confirmed.</p> <p>GF advised that he is trying to progress the sign-off and return of the drawings.</p> <p>GF noted that the drawing was being revised and a PMI would be issued to BMCL in due course. It was proposed that a walkround should be organised.</p> <p>GA advised this was issued for pricing but revision to sequencing to be undertaken. Mercury will tie up directly with HPI. GF agreed to chase up IP.</p> <p>GF noted that he would send an email to BHunter after this meeting finishes in order to conclude the NHS input required.</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up. Item closed as PMI 463 issued.</p>	
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	<p>25/03/2015</p> <p>26/03/2015</p> <p>02/04/2015</p>	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p> <p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p> <p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	

		23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings
		30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.
		07/05/2015	GB noted that collation of the Building Warrants is WIP
		14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury providing final position and as fitted drawings.
		21/05/2015	FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application
		28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.
		04/06/2015	FS advised that GB is liaising with Mercury
		11/06/2015	GB advised that this would be progressed once the works completed in the summer
		25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.
		30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.
		05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.
		13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.
		27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.
		17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.
		24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.
		01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.
		08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.
		22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.
		12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.
		26/11/2015	GA noted that DW is chasing up Mercury for updated drawings
		10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.
		14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.
		28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB
		11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.

			25/02/2016 10/03/2016 24/03/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this. GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control. <b>WIP</b>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015 01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015 28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015 17/09/2015 24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can	

			<p>be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>12/11/2015 GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
--	--	--	---	--

			26/11/2015	GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	
			11/02/2016	It was noted that a revised programme has been issued which updates on the works	
			25/02/2015	LJ advised that the costs should be with the NHS in the next few weeks.	
			10/03/2016	LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]	
			24/03/2016	GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.	

27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUILDINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p><b>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p> <p>GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night.</p> <p>It was noted that the works have been carried out.</p>	<p><b>Item to remain on tracker until demolition works complete.</b></p>
28099	BMCL-EWN-172	INS Entrance - BMS System	<p>14/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p>	<p>BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?</p> <p>GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum.</p> <p>LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA</p>	<p><b>Cross reference PMI 469</b></p>

			11/02/2016 25/02/2016 10/03/2016	requested a scope for the works. It was noted that BMCL are awaiting the issue of the PMI from the NHS for the design and install of BMS. Allowance within project budget costs. GF agreed to provide the PMI asap. GW noted that a cost from Mercury had been provided at the start as had advised that would be needed to make the system work however DR had advised that it wasn't required. <b>PMI requesting cost information provided therefore this EW can be closed.</b>	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . <b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible. <b>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/10/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the	

			14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	<p>panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.</p> <p>GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.</p> <p>GA advised that the panel was expected to be delivered to the Structal factory w/c 14<sup>th</sup> March and to the QUEH w/c 21<sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.</p> <p>GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucubond) was awaited.</p>	
27785	NHS EWN 063 -	Consultant Wind Study re QUEH/RHC - Front Elevation	17/11/2015 26/11/2015 10/12/2015 14/01/2016  28/01/2016 11/02/2016 25/02/2016  10/03/2016 24/03/2016	<p>The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QUEH/RHC be provided to the Board asap.</p> <p>GA noted that GB had been chasing WSP for the report..</p> <p>GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS</p> <p>GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</p> <p>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCox to go through the report. The report would subsequently be issued to the NHS asap. It was noted that BMCL had received correspondence from WSP earlier that day . Letter would be issued to the NHS asap.</p> <p>GW advised that the letter received from WSP was under review by BMCL. BMCL had also received a report from Gillespies which suggested that there are no hard/soft landscaping changes which can be done to assist. The WSP outcome had taken longer than expected to obtain as the model which the previous survey had been carried out on was now not available. GW noted that JCox had advised that he had told the NHS that they would be building a 14 storey building on a windy site.</p> <p>GA advised that the wind survey report is with AFernie.</p> <p>GA advised that AF had issued the letter to DWL on 21/03/2016. GF agreed to liaise with DWL.</p>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p>	

			<p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting</p>	

			28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	<p>conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.</p> <p>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</p> <p>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).</p> <p>GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.</p> <p>GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.</p> <p>GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.</p>	
29125	NHS EW 066 -	Phase 3a HV Cable Fault	09/03/2016 10/03/2016 24/03/2016	<p>The Boards Estates team have advised that a fault has been identified on the HV cable that crosses the Phase 3a Landscaping site.</p> <p>The suggestion from the Estates team is that the Demolition site trafficking over the cable has caused the fault.</p> <p>Allow the Boards HV Contractor access to site to carryout investigations and repairs.</p> <p>GA noted that PMcG has been in touch with contractors for them to get access to site to do exploratory works. GA advised that BMCL have not damaged the drain.</p> <p>GA noted that he understood that the reps had been onsite and cut the piece of cable out, replaced and rejoined.</p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 06/04/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH ENTRANCE TO BOULEVARD	21/07/2015	<p>Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.</p> <p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as</p>	

A51679245

			<p>23/07/2015 per existing proposals. Where possible retain all materials already fabricated.</p> <p>30/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>06/08/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>24/09/2015 GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>01/10/2015 GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>08/10/2015 GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>22/10/2015 GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>12/11/2015 PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>26/11/2015 GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>10/11/2015 GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.</p> <p>14/01/2016 GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016.</p> <p>28/01/2016 GA noted that signage will start to be installed the following day and the lights would be installed mid Feb 2016.</p> <p>11/02/2016 GA noted that the lights would be on by 19<sup>th</sup> Feb 2016.</p> <p>25/02/2016 GA advised that the signage has been installed. BMCL are not satisfied with the repairs to the block work and have asked another company to look at this as there are a few holes to be remediated. The lighting is due to be installed at the beginning of March 2016.</p> <p>10/03/2016 GA advised that the lights were currently being installed and it was hoped that the lighting would be completed early w/c 14/03 at the latest.</p> <p>24/03/2016 GA advised that half of the fittings had been installed. Mercury is currently in commercial discussions with Alpha. BMCL are pursuing the completion of the works.</p>

4609	PMI 443 -	NCH Rehab department (REH049) - Vestibular Hook	25/09/2015	<p>The Board request a cost to design and install a goalpost frame to support a vestibular hook within the NCH Rehab department (REH049) located as per item VES1000 on drawing number NA-SZ-XX-AS-400-290-01. The details and working load are as noted on:</p> <p><a href="http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp">http://www.southpaw.co.uk/i-beam-or-h-beam-kit-303-p.asp</a></p> <p>Allowance to be included for boxing in the vertical posts and altering the wall padding.</p>	
			01/10/2015	GW noted that the costing is ongoing	
			08/10/2015	GA noted that the information was with the design and cost teams	
			22/10/2015	GB advised that the information had been provided to WSP for them to provide a design	
			12/11/2015	GB advised that he had spoken to John Cox at WSP. WSP have had a change of staff so progress has been slower than desired.	
			26/11/2015	GA advised that GB was chasing WSP for design. PM suggested that the service had now received a quote for a company and there would be an NHS Meeting to discuss.	
			10/12/2015	LJ noted that she had been advised that a design would need to be done. BMCL could not get the design done until the fee had been agreed with the NHS. LJ advised that she would submit the fees for approval. PM requested that BMCL please push on as much as possible as currently the service cannot deliver the full service.	
			14/01/2016	GA advised that GB is chasing up WSP for a design. Delay in providing design/closing out items had been raised with JCox by BMCL.	
			28/01/2016	LJ noted that the design costs had been uploaded to Sypro earlier that day for NHS review/approval.	
			11/02/2016	It was noted that BMCL are awaiting the issue of the CE from the NHS.	
			25/02/2016	CE 162A issued. It was noted that GB has advised WSP to progress with the design. BMCL to accept PMI on basis of design only. NHS to raise PMI for supply and install of goalpost frame subject to satisfactory design.	
			10/03/2016	GA advised that WSP have been requested to progress the design. It was noted that CE 162 had been issued to cover the design element.	
			24/03/2016	GA advised that BMCL are pursuing WSP for a design. It was agreed this PMI should be closed and discussions noted under PMI 470.	
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off</p> <p>GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.</p> <p>GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.</p> <p>GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.</p> <p>HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.</p> <p>GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblin to be finalised asap.</p>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	<p>01/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p>GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</p> <p>GA advised that JS had provided the tile replacement marked up drawing to SF.</p>	

5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p>It was noted that CE 165 has been issued. Item closed.</p> <p>GA advised that the drawings had been received and will be reviewed asap. Item closed.</p> <p>GA advised that BMCL had the Nightingale drawings but were awaiting the WW drawings. GF agreed to discuss this with SRussell.</p>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015  10/12/2015 14/01/2016 28/01/2016  11/02/2016 25/02/2016 10/03/2016	<p>Room OPD-015 MEETING ROOM</p> <p>Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04.</p> <p>(Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM</p> <p>Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC.</p> <p>Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p> <p>It was noted that this info is with Workspace Design for them to provide a quote.</p> <p>GA noted that LJ has received costs and will upload to Sypro by close of business that day.</p> <p>LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.</p> <p>GF noted that he would liaise with PM</p> <p>GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.</p> <p>GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	
5128	PMI 458 -	RHC LEVEL 4 DCFP WARD - DCFP-051 BALL	17/12/2015	Please review feasibility of fitting cage guards to sprinkler heads in this room, screw fixed to plaster board ceiling.	

		ROOM/SOFT PLAY AREA	<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>The Board propose fitting cage guards to the 7 sprinkler heads in this room as per the attached datasheet from SIGMA FIRE Type SC004. Please confirm the following;</p> <p>1) Confirm with the sprinkler installer (Mercury) that they will warrant the use of this product over their sprinkler head, or alternatively, do they market a similar product that we can install.</p> <p>2) Provide a price for the supply and installation of 7 No. cage guards to the sprinkler heads in room DCFP-051.</p> <p>Refer attached datasheet.</p> <p>PM noted that the users have advised that they do not consider the baskets as a ligature risk. PM requested that BMCL progress the fitting of the baskets asap as the Board Chairman has taken an interest in the DCFP area. DW advised that the retrofit of the basket may cause difficulty re warranty. DW agreed to get an update from LJ and provide feedback asap.</p> <p>PM advised that DW has provided an email and on the basis of this email PM had advised the users that there is a difficulty in getting warranty on the system if baskets are installed.</p> <p>GF noted that he would liaise with PM regarding the way forward</p> <p>GA noted that DW had been advised by Mercury that they will not fit the cage guards. PM noted that he had thought DW was going to liaise further with the insurance company. GA agreed to check with DW.</p> <p>GA advised this had been discussed with DW. DW advised that it needs to be an approved design and therefore a new fitment/sprinkler head would need to be installed. DW had already confirmed this by email to the PM prior to PM leaving the Board.</p> <p><b>It was agreed this item was closed. GF to confirm out that not being progressed. GA advised that the 23<sup>rd</sup>/24<sup>th</sup> had been programmed for the door entry works.</b></p>	
5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p> <p>3) Extension of Tobermore paving from OB to Langlands Drive</p> <p>4) Access path across grasscrete to CP2 staircore.</p> <p>5) Construction of grassed strips between office block and CMB/Carpark</p> <p>GA noted that LJ is awaiting costs from LE</p> <p>LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</p> <p>GF advised that he would liaise with DR regarding the costs provided.</p> <p><b>GF advised that he would liaise with DWL regarding the way forward.</b></p>	

5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	10/02/2016  25/02/2016 10/03/2016  24/03/2016	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.</p> <p>Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation.</p> <p>LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter.</p> <p>GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL.</p> <p>GF agreed to review asap</p>	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016  25/02/2016 24/03/2016	<p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p> <p>It was noted that the sequencing info is awaited.</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up.</p>	Cross ref BMCL EW 150
5342	PMI 464	Destructive Testing of Neurosurgery Overcladding Windows	10/02/2016  25/02/2016 10/03/2016 24/03/2016	<p>The Board has concerns regarding the robustness of the internal window restrictor and external "Jackloc"</p> <p>Provide quotation for the destructive testing of new window frame to establish force required to break the internal restrictor and the Jacloc.</p> <p>GF advised that the further certification had been provided however if reps are not happy then costs would need to be rejected.</p> <p>GF noted that this PMI was now cancelled. A new PMI would be issued re jaclocs. GF would liaise with SWalker re whether fitting of jaclocs is required to the office space.</p> <p>GF advised that he would provide a PMI requesting jaclocs be fitted to all windows</p>	
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016	<p>Alterations to curtain tracks abutting new windows</p> <p>Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows</p> <p>LJ advised that BMCL are awaiting cost info</p> <p>LJ advised that she is pursuing the cost.</p> <p>GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable</p>	
5367	PMI 466	RHC LEVEL 4 DCFP - ANTILIGATURE THUMB TURN TO VISICOM SCREENS	17/02/2016	<p>Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms.</p> <p>Please provide a price to supply and install anti-ligature thumb turn control knobs to the corridor side of the Visicom screens to single and double bedrooms. Note anti-ligature thumb turns fitted to room side already.</p>	

			25/02/2016	Rooms concerned are DCFP-022, 031, 032, 034, 035 & 037. PM advised that the anti-lig thumb turn has a cone shape to the room side and that the room side type is to be the same as that which is to be fitted to the corridor side. It was noted that CE 160 had been issued	
			10/03/2016 24/03/2016	It was noted that CE 160 issued therefore this item could now be closed GA advised that the handles were expected to be delivered to site by 10 <sup>th</sup> April 2016.	
	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLL	17/02/2016	Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite..	
			25/02/2016	Take delivery of 3.5mm long, 76mm dia sign pole supplied to your Neuro site cabins. To 200mm dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).	
			10/03/2016	For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.	
			24/03/2016	GF advised that he would organise for the pole to be provided. Design and costs for bike stands received. GA advised that the pole had been delivered and that Land Engineering would install before the end of the following week. GA advised that the hole had been cored however an obstruction was identified when the pole was to be fitted. The coring rig is being organised to come back on site.	
5443	PMI 468 -	Asbestos Awareness Training for BMCL Site Staff	07/03/2016	The Board request BMCL provide the cost incurred for the additional training undertaken by BMCL Site Staff and Operatives in order to comply and adhere to the Board's Asbestos Management Policy. This was out with the contractual requirements of the NSGH project. Cross reference BMCL/EW/168	
			10/03/2016 24/03/2016	It was noted that NHS to issue CE to BMCL. It was noted that this item is closed.	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016	The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172	
			24/03/2016	GA advised that LJ is pursuing the cost info.	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame.	
			10/03/2016 24/03/2016	GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD	09/03/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered	

		REQUIREMENTS	10/03/2016  24/03/2016	<p>Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.</p> <p>BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month.</p>	
5509	PMI 472 -	Scaffold Alterations - Level 2 South Tower	21/03/2016  24/03/2016	<p>The Board request that BMCL carry out alterations to the level 2 south tower scaffolds to allow replacement of faulty UPS Equipment. Scaffold transoms to be raised with standard on AHU support beam removed.</p> <p>Anticipated delivery date w/c 4th April 2016, date will be confirmed under separate correspondence. GA advised that D&amp;B had been asked to provide costs.</p>	
5510	PMI 473 -	Children's Play Park - Weed Suppression	21/03/2016  24/03/2016	<p>As per discussions on site (between Paul McGuinness and Graham Forsyth) this PMI confirms the verbal agreement that BMCL should not install bark mulch within the planted areas of the children's play park due to issues for immunosuppressed patients.</p> <p>Further direction will be provided whether it may be an alternative or for the weed suppression to be omitted. GF to liaise with IP re bark substitute</p>	
5564	PMI 474 -	Children's Play Park - Weed Suppression	04/04/2016	Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic).	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)	
5575	PMI 476 -	Neurosurgery Overcladding Windows	05/04/2016	The Board request that BMCL supply and fit Jaclocs to all new windows. Cross reference PMI 464.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016  24/03/2016	<p>The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e.</p> <p>Item 1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033.</p> <p>Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.</p> <p>Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.</p> <p>Agreed cost [REDACTED] incl. OH+P but excl. VAT.</p> <p>GA advised that the works are programmed to take place 25<sup>th</sup> April. JS is tying in with the DCFP staff.</p>	Item closed 21/03/2016
19415	CE 168 -	HV Infrastructure Works	07/03/2016	<p>The Board confirm that BMCL should proceed with the works as identified in PMI 461 i.e. the installation of the works detailed within the Wallace Whittle Drg G1613-XX-XX-PL-E60-25, namely;</p> <p>1) Excavation of track approximately 50m.</p> <p>2) Installation of 3No. 200mm uPVC Ducts including draw ropes.</p> <p>3) Backfilling to ensure that the duct crown has 800mm to proposed finished ground level</p> <p>4) Forming 2No. temporary draw pits.</p>	Item closed 21/03/2016
19863	CE 169 -	Asbestos Awareness Training for BMCL site staff	04/04/2016	<p>The Board confirms acceptance of the costs incurred by BMCL (under BMCL EW 172 and PMI 469) to provide additional training in order to comply the Board's Asbestos Management Policy.</p> <p>Agreed cost: [REDACTED] inclusive of OH&amp;P but exclusive of VAT</p>	Item closed 05/04/2016
19864	CE 170 -	City Bike Stands at QEUH Main Entrance - Sign Pole	04/04/2016	<p>The Board confirm that BMCL should proceed with PMI 467 regarding the installation of the sign pole for City Bike at the main entrance to the QEUH.</p> <p>Agreed cost: [REDACTED] inclusive of OH&amp;P but exclusive of VAT</p>	Item closed 05/04/2016
19866	CE 171 -	DCFP - Anti-ligature Thumb Turn to Visicom screens	04/04/2016	<p>The Board confirm that BMCL should proceed with PMI 466 regarding the installation of Anti-ligature Thumb Turn to Visicom screens to rooms DCFP 022, 031, 032, 035, 037 within RHC level 4.</p> <p>Agreed cost: [REDACTED] inclusive of OH&amp;P but exclusive of VAT</p>	Item closed 05/04/2016

## Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) **GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016)**
- Gas Meter (BMS) – DW noted that this was still to be connected and advised that BMCL needed detail of how/where to connect to for pulsed output. HMc agreed to check with the manufacturer. (24/09/2015) HMc noted that he needed the serial numbers of the gas meter. It was agreed that DW and HM would meet on site to obtain the number (01/10/2015) HMc advised that he had spoken to Cyril who had advised that he had contacted BMCL. DW advised that he was not aware of any contact being made HMc agreed to check this out. (12/11/2015) GA noted that DW is awaiting contact details from Estates re wiring in BMU. GA advised that DW could be asked to provide an update by email (26/11/2015) It was noted that DW is in discussion with JKeenan – a connection for into the meter has been requested. HMc noted that it had been suggested that there had been a fault with the meter. (10/12/2015) DW advised that he was awaiting confirmation from JKennan re new chatterbox being issued (14/01/2016) It was noted that DW is awaiting an update from JKeenan (28/01/2016) No update was available regarding replacement chatterbox – GF agreed to liaise with JK for an update (11/02/2016) **GF noted that BMCL are awaiting the chatterbox being fitted by the NHS Estates Dept (25/03/2016).**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) **GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016)**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 20/04/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	<b>WIP</b>	

26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped,	

			01/10/2015	<p>witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1 <sup>st</sup> phase works. BMCL are also awaiting information about the underground services.	
			22/10/2015	PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31 <sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMII/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.	
			12/11/2015	GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16 <sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient & therapies building would be demolished at handover to BMCL.	
			26/11/2015	GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2015</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p> <p>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p> <p>It was noted that a revised programme has been issued which updates on the works</p> <p>LJ advised that the costs should be with the NHS in the next few weeks.</p> <p>LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]</p> <p>GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p>	

			26/11/2015	<p>A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p>	<p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
			10/12/2015	<p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p> <p>GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.</p>	<p>Item to remain on tracker until demolition works complete.</p>
28099	BMCL-EWN-172	INS Entrance - BMS System	<p>14/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>BMS system was not included in the CEN issued by the NHS instructing the works for the INS entrance to commence. Please confirm whether these works are required?</p> <p>GA advised that there is a provisional sum identified for these works. DW advised that LJ is checking with Mercury for cost so can identify the actual cost against the provisional sum.</p> <p>LJ noted that BMCL are awaiting fixed costs from Mercury as the [REDACTED] is a provisional sum. LJ advised that BMCL do not have a PMI to instruct the works and requested that the NHS issue the PMI. GA requested a scope for the works.</p> <p>It was noted that BMCL are awaiting the issue of the PMI from the NHS for the design and install of BMS. Allowance within project budget costs.</p> <p>GF agreed to provide the PMI asap. GW noted that a cost from Mercury had been provided at the start as had advised that would be needed to make the system work however DR had advised that it wasn't</p>	<p>Cross reference PMI 469</p>

			10/03/2016	required. PMI requesting cost information provided therefore this EW can be closed.	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . <b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible. GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc. <b>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14<sup>th</sup> April 2016.</b>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	<p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
			13/08/2015	<p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p>	
			27/08/2015	<p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p>	
			17/09/2015	<p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
			24/09/2015	<p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p>	
			01/010/2015	<p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
			08/10/2015	<p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
			22/10/2015	<p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
			12/11/2015	<p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
			26/11/2015	<p>GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
			10/12/2015	<p>GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the</p>	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p>	<p>panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.</p> <p>GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.</p> <p>GA advised that the panel was expected to be delivered to the Structal factory w/c 14<sup>th</sup> March and to the QEUH w/c 21<sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.</p> <p>GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucubond) was awaited.</p> <p>GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.</p>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	<p>17/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p>	<p>The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.</p> <p>GA noted that GB had been chasing WSP for the report..</p> <p>GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS</p> <p>GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</p> <p>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCox to go through the report. The report would subsequently be issued to the NHS asap. It was noted that BMCL had received correspondence from WSP earlier that day . Letter would be issued to the NHS asap.</p> <p>GW advised that the letter received from WSP was under review by BMCL. BMCL had also received a report from Gillespies which suggested that there are no hard/soft landscaping changes which can be done to assist. The WSP outcome had taken longer than expected to obtain as the model which the previous survey had been carried out on was now not available. GW noted that JCox had advised that he had told the NHS that they would be building a 14 storey building on a windy site.</p> <p>GA advised that the wind survey report is with AFernie.</p> <p>GA advised that AF had issued the letter to DWL on 21/03/2016. GF agreed to liaise with DWL.</p>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	<p>26/11/2015</p>	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p>	

			<p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p>	<p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p> <p>GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to agree HAI Scribe for the high risks areas.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH</p>	

			14/01/2016	Park. GA advised that there was lighting being put in as part of the children's park but only small lights. GH noted that he had a similar concern about the lighting raised to himself as well.	
			28/01/2016	GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	
			11/02/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			25/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).	
			10/03/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	
			24/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
			07/04/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
				GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
29125	NHS EW 066 -	Phase 3a HV Cable Fault	09/03/2016	The Boards Estates team have advised that a fault has been identified on the HV cable that crosses the Phase 3a Landscaping site.	
			10/03/2016	The suggestion from the Estates team is that the Demolition site trafficking over the cable has caused the fault.	
			24/03/2016	Allow the Boards HV Contractor access to site to carryout investigations and repairs.	
			07/04/2016	GA noted that PMcG has been in touch with contractors for them to get access to site to do exploratory works. GA advised that BMCL have not damaged the drain.	
				GA noted that he understood that the reps had been onsite and cut the piece of cable out, replaced and rejoined.	
				HMc noted that he understood that the cable had been repaired. HMc advised that he would provide the BMCL feedback to the Estates Reps.	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 20/04/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4099	PMI 428	MAIN ENTRANCE FEATURE WALLS – WEST AND NORTH	21/07/2015	Following recent opening ceremony the hospitals have new names and these will require to be displayed on entrance walls. Do not fit signs based on existing design, prepare new sign layout and procure and install based on new names.	

A51679245

		ENTRANCE TO BOULEVARD		<p>The names for the new hospitals are;</p> <p>The Queen Elizabeth University Hospital, Glasgow The Royal Hospital for Children, Glasgow</p> <p>Please prepare new design for sign installation for approval, following which supply and install as per existing proposals. Where possible retain all materials already fabricated.</p> <p>23/07/2015 GB advised that BMCL would put an instruction to Land Eng.</p> <p>30/07/2015 GB noted that he had asked Gillespies to update their drawings.</p> <p>06/08/2015 GA advised that the bulk of the works will be complete by 7<sup>th</sup> August with the exception of the coping stone. AF advised that the coping stone design had been changed and he suggested it would be circa 5 weeks to manufacture.</p> <p>13/08/2015 GB advised that Joanne is currently working on this and GB would request an update re progress from Joanne asap. GA advised that the scaffolding is all coming down and landscaping will be commenced. GB noted that Jmiller is investigating a way to connect the lights and he would ask Jmiller for an update. GW suggested that costs initially proposed did not include enough for the works which will be required to connect the lighting due to the distance to the nearest connection point.</p> <p>27/08/2015 PM advised that he will print of the drawings and provide to DL for DL to show to Rcalderwood.</p> <p>17/09/2015 PM advised that he would approve the drawings asap and agreed to provide the response via Aconex</p> <p>24/09/2015 GB advised that revised drawings have been issued for RDD. PM advised that the drawings would be reviewed asap.</p> <p>01/10/2015 GB noted that a series of drawings had been issued and feedback from PM was awaited.</p> <p>08/10/2015 GA noted that he had received the RDD drawings back and that BMCL will order up the lettering asap. The coping was due to be installed soon. BMCL had received design proposals for the lighting and planted beds.</p> <p>22/10/2015 GB advised that he had received the document as a no comment therefore had passed to Land Eng to progress.</p> <p>12/11/2015 PM noted that the Board were considering changing the colour of the signage/lettering as the sign wasn't very clear. GA advised that the lettering on the signage was the wrong size and would be replaced therefore if the NHS wanted to change colours then this would be an opportunity to do so now. It was noted that the stainless steel did not stand out. GB advised that he would ask for samples to be provided.</p> <p>26/11/2015 GA advised that BMCL had received samples earlier that day but they were not happy with them so would not be offering the samples up for NHS review.</p> <p>10/11/2015 GA advised that the signs had been ordered and a delivery date was awaited from Land Eng.</p> <p>14/01/2016 GA advised that the revised signage was due mid Feb and the duct works would be commenced 25<sup>th</sup> Jan 2016.</p> <p>28/01/2016 GA noted that signage will start to be installed the following day and the lights would be installed mid Feb 2016.</p> <p>11/02/2016 GA noted that the lights would be on by 19<sup>th</sup> Feb 2016.</p> <p>25/02/2016 GA advised that the signage has been installed. BMCL are not satisfied with the repairs to the</p>	
--	--	-----------------------	--	---	--

			07/04/2016	HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	01/12/2015  10/12/2015 14/01/2016  28/01/2016  11/02/2016 25/02/2016  10/03/2016  24/03/2016 07/04/2016	<p>In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p>GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</p> <p>GA advised that JS had provided the tile replacement marked up drawing to SF.</p> <p>GA advised that the delivery of the 14 remaining tiles is still awaited.</p>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015  10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p>It was noted that CE 165 has been issued. Item closed.</p> <p>GA advised that the drawings had been received and will be reviewed asap. Item closed.</p> <p>GA advised that BMCL had the Nightingale drawings but were awaiting the WW drawings. GF agreed to discuss this with SRussell.</p>	CE 165

5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	<p>02/12/2015</p> <p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote. GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room. 11/02/2016 GF noted that he would liaise with PM 25/02/2016 GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed. 10/03/2016 GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	
5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p> <p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following; 1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard. 2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive 3) Extension of Tobermore paving from OB to Langlands Drive 4) Access path across grasscrete to CP2 staircore. 5) Construction of grassed strips between office block and CMB/Carpark</p> <p>14/01/2016 GA noted that LJ is awaiting costs from LE 28/01/2016 LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW. 11/02/2016 It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up. 25/02/2016 It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review. 10/03/2016 GF advised that he would liaise with DR regarding the costs provided. 24/03/2016 GF advised that he would liaise with DWL regarding the way forward.</p>	

5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	10/02/2016  25/02/2016 10/03/2016  24/03/2016	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.</p> <p>Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation.</p> <p>LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter.</p> <p>GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL.</p> <p>GF agreed to review asap</p>	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016  25/02/2016 24/03/2016  07/04/2016	<p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p> <p>It was noted that the sequencing info is awaited.</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up.</p> <p>LJ advised that the quote received from Mercury had exclusions and another quote is being sought.</p>	Cross ref BMCL EW 150
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016	<p>Alterations to curtain tracks abutting new windows</p> <p>Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows</p> <p>LJ advised that BMCL are awaiting cost info</p> <p>LJ advised that she is pursuing the cost.</p> <p>GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable</p> <p>GA advised that RGalloway had requested a copy of the quotation provided by D&amp;B Facades for review. GF to confirm way forward.</p>	
	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLE	17/02/2016	<p>Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite..</p> <p>Take delivery of 3.5mm long, 76mm dia sign pole supplied to your Neuro site cabins. To 200mm dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).</p> <p>For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.</p>	Cross reference CE 170

			25/02/2016 10/03/2016 24/03/2016 07/04/2016	GF advised that he would organise for the pole to be provided. Design and costs for bike stands received. GA advised that the pole had been delivered and that Land Engineering would install before the end of the following week. GA advised that the hole had been cored however an obstruction was identified when the pole was to be fitted. The coring rig is being organised to come back on site. GA advised that confirmation of the rig returning is awaited from Land Eng. If the works are not completed by 13/04/2016 then BMCL will instruct the works to be carried out by another company.	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016 24/03/2016	The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172 GA advised that LJ is pursuing the cost info.	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016 10/03/2016 24/03/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame. GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016   10/03/2016 24/03/2016  07/04/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month. GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options.	Cross ref PMI 475

5509	PMI 472 -	Scaffold Alterations - Level 2 South Tower	21/03/2016  24/03/2016 07/04/2016	The Board request that BMCL carry out alterations to the level 2 south tower scaffolds to allow replacement of faulty UPS Equipment. Scaffold transoms to be raised with standard on AHU support beam removed.  Anticipated delivery date w/c 4th April 2016, date will be confirmed under separate correspondence. GA advised that D&B had been asked to provide costs. LJ advised that cost would be uploaded asap	
5510	PMI 473 -	Children's Play Park - Weed Suppression	21/03/2016  24/03/2016 07/04/2016	As per discussions on site (between Paul McGuinness and Graham Forsyth) this PMI confirms the verbal agreement that BMCL should not install bark mulch within the planted areas of the children's play park due to issues for immunosuppressed patients.  Further direction will be provided whether it may be an alternative or for the weed suppression to be omitted. GF to liaise with IP re bark substitute It was agreed that this item could be closed as PMI 474 requests alternate solution.	Cross ref PMI 474
5564	PMI 474 -	Children's Play Park - Weed Suppression	04/04/2016  07/04/2016	Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic). GA advised that Land Eng have been requested to provide samples for review by the Board. GA noted that if a membrane is to be used then the planting would need to be removed so allow the membrane to be put in place and then replaced/replanted.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016  07/04/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)	
5575	PMI 476 -	Neurosurgery Overcladding Windows	05/04/2016	The Board request that BMCL supply and fit Jaclocs to all new windows. Cross reference PMI 464.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016	The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e. Item1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads.	Item closed 21/03/2016

A51679245

			24/03/2016  07/04/2016	Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.  Agreed cost [REDACTED] incl. OH+P but excl. VAT. GA advised that the works are programmed to take place 25 <sup>th</sup> April. JS is tying in with the DCFP staff. GA advised that works are complete with the exception of the balustrade (awaiting delivery to site w/c 12/04/2016) and door entry system (programmed for the end of April)	
19866	CE 171 -	DCFP - Anti-ligature Thumb Turn to Visicom screens	04/04/2016  07/04/2016	The Board confirm that BMCL should proceed with PMI 466 regarding the installation of Anti-ligature Thumb Turn to Visicom screens to rooms DCFP 022, 031, 032, 035, 037 within RHC level 4.  Agreed cost: [REDACTED] inclusive of OH&P but exclusive of VAT  GA Noted that the handles are due to be delivered to site w/c 11/04/2016	Item closed 05/04/2016

#### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) **GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016)**

- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 18/05/2016:

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 16/05/2016:

<div style="float: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <p>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</p> <p>PMI 338 – full fit out</p> <p>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</p> <p>PMI 343 – fit out</p> <p>PMI 347 – Change of materials</p> <p>PMI 352 – additional electrical sockets</p> <p>PMI 357 – additional water supplies</p> <p>PMI 360 – additional power, water and drainage connections</p> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	
A51679245					

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	<b>GA advised that he had chased up Mercury the previous week and would continue to pursue</b>	

				however noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting date for completion of the drawings.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015        24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations	

			<p>noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p>
		01/10/2015	<p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>
		08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>
		22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>
		12/11/2015	<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>
		26/11/2015	<p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>

			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	
			11/02/2016	It was noted that a revised programme has been issued which updates on the works	
			25/02/2015	LJ advised that the costs should be with the NHS in the next few weeks.	
			10/03/2016	LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]	
			24/03/2016	GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.	
			21/04/2016	LJ advised that awaiting final account discussion with GW so can build up the other costs.	
			05/05/2016	LJ advised that GW is working on the costs for discussion with C&B.	

27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUILDINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p> <p>GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night.</p> <p>It was noted that the works have been carried out.</p>	<p>Item to remain on tracker until demolition works complete.</p>
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	<p>12/01/2016</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p>	

			25/02/2016	HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016 21/04/2016 05/05/2016	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p> <p>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</p> <p>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14th April 2016.</p> <p>GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services.</p> <p>GF advised that AD is pursuing the removal of the fire damper panel.</p>	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016	<p>Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road.</p> <p>GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings</p>	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured.	

29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016	We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs.	
-------	--------------	------------------------------------	------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 04/05/2016

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	

A51679245

			30/07/2015	<p>FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p> <p>FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11<sup>th</sup> and 4<sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	<p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
			13/08/2015	<p>GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p>	
			27/08/2015	<p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p>	
			17/09/2015	<p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
			24/09/2015	<p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p>	
			01/10/2015	<p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
			08/10/2015	<p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
			22/10/2015	<p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
			12/11/2015	<p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
			26/11/2015	<p>GA advised that the works were substantially complete. The fin on the south east corner had been fitted</p>	

			<p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p>	<p>back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p> <p>GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.</p> <p>GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.</p> <p>GA advised that the panel was expected to be delivered to the Structal factory w/c 14<sup>th</sup> March and to the QEUH w/c 21<sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.</p> <p>GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucubond) was awaited.</p> <p>GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.</p> <p>GA advised that Level 11 panel works to be carried out either 23<sup>rd</sup> or 24<sup>th</sup>. The alucobond panel works will be carried out when the NCH Roof Garden works are being undertaken.</p> <p>GA advised that the Structal panel was being delivered 06/05/2016 and would be fitted asap thereafter dependent on satisfactory weather conditions. GA enquired which ward had been affected by the fire incident and GF agreed to confirm.</p>	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	<p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p>	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p> <p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been</p>	

			<p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p>	<p>advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured. GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p> <p>GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.</p> <p>GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.</p> <p>GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.</p> <p>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</p> <p>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).</p>	

			25/02/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	
			10/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
			24/03/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
			07/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
			21/04/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.	
			05/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 18/05/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was	

A51679245

			<p>11/02/2016 suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.</p> <p>25/02/2016 GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.</p> <p>10/03/2016 GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.</p> <p>24/03/2016 HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.</p> <p>07/04/2016 GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblin to be finalised asap.</p> <p>05/05/2016 HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.</p> <p>HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.</p>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	<p>01/12/2015 In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>10/12/2015 Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>14/01/2016 LJ advised that info is awaited from AC Flooring</p> <p>28/01/2016 GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>11/02/2016 GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>25/02/2016 Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p>10/03/2016 GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</p>	Item closed Cross ref CE 175

			24/03/2016 07/04/2016 05/05/2016	GA advised that JS had provided the tile replacement marked up drawing to SF. GA advised that the delivery of the 14 remaining tiles is still awaited. GA advised that tiles have now been delivered and confirmation of labour to install the teams is awaited.	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	01/12/2015       10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016  05/05/2016	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p>It was noted that CE 165 has been issued. Item closed.</p> <p>GA advised that the drawings had been received and will be reviewed asap. Item closed.</p> <p>GA advised that BMCL had the Nightingale drawings but were awaiting the WW drawings. GF agreed to discuss this with SRussell.</p> <p>GF advised that he had passed the drawings to Anne Harkness however he needed the cost info so that he could provide this to SRussell and also the M&amp;E info. GA noted that DW had gone back to WWhittle on a couple of points and once response from WWhittle has been obtained the final M&amp;E drawings would be provided asap. NHS to confirm if medical gases are required. GA advised that in anticipation of carrying out the works that he had requested the HAI Scribe to be prepared.</p>	CE 165
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p>	CE to be issued

			<p>10/12/2015 14/01/2016 28/01/2016</p> <p>11/02/2016 25/02/2016</p> <p>10/03/2016</p>	<p>Room OPD-014 OBSERVATION ROOM</p> <p>At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote.</p> <p>GA noted that LJ has received costs and will upload to Sypro by close of business that day.</p> <p>LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.</p> <p>GF noted that he would liaise with PM</p> <p>GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.</p> <p>GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	
5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p> <p>14/01/2016 28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016 10/03/2016 24/03/2016 05/05/2016</p>	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <ol style="list-style-type: none"> <li>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</li> <li>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</li> <li>3) Extension of Tobermore paving from OB to Langlands Drive</li> <li>4) Access path across grasscrete to CP2 staircore.</li> <li>5) Construction of grassed strips between office block and CMB/Carpark</li> </ol> <p>GA noted that LJ is awaiting costs from LE</p> <p>LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</p> <p>GF advised that he would liaise with DR regarding the costs provided.</p> <p>GF advised that he would liaise with DWL regarding the way forward.</p> <p>GF advised that the works would be awarded soon and the NHS were in the process of finalising the internal budgets to allow the works to be awarded.</p>	
5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	<p>10/02/2016</p> <p>25/02/2016 10/03/2016</p> <p>24/03/2016 05/05/2016</p>	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.</p> <p>Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation.</p> <p>LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter.</p> <p>GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL.</p> <p>GF agreed to review asap</p> <p>GF noted that these works may not be progressed through BMCL and he would confirm the way forward asap.</p>	

5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016  25/02/2016 24/03/2016  07/04/2016 21/04/2016	Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base  Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base. Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document. It was noted that the sequencing info is awaited. GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up. LJ advised that the quote received from Mercury had exclusions and another quote is being sought. LJ advised that the cost had been uploaded to Sypro for NHS review	Cross ref BMCL EW 150
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016  21/04/2016  05/05/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016  24/03/2016 05/05/2016	The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172 GA advised that LJ is pursuing the cost info. It was agreed that this item could now be closed. CE 172 issued.	Cross ref CE 172

5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016 24/03/2016 21/04/2016  05/05/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame. GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design GA advised that the design has now been received and the costs are being identified. An instruction to get the steel fabricated has been drafted for issue. AC flooring costs are awaited. BMCL will provide a programme for the works so the NHS can have an understanding of how long the room will be out of use so can schedule the works. LJ noted that the cost would be uploaded by 09/05/2016. GA advised that the works would be 3-4 weeks once commenced.	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016  10/03/2016 24/03/2016 07/04/2016 21/04/2016 05/05/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month. GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options. GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016. GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell.	Cross ref PMI 475
5509	PMI 472 -	Scaffold Alterations - Level 2 South Tower	21/03/2016	The Board request that BMCL carry out alterations to the level 2 south tower scaffolds to allow replacement of faulty UPS Equipment. Scaffold transoms to be raised with standard on AHU support beam removed.	Cross ref CE 174

			24/03/2016 07/04/2016 21/04/2016 05/05/2016	Anticipated delivery date w/c 4th April 2016, date will be confirmed under separate correspondence. GA advised that D&B had been asked to provide costs. LJ advised that cost would be uploaded asap LJ advised that the costs had been uploaded for NHS review CE issued therefore item could be closed	
5564	PMI 474 -	Children's Play Park - Weed Suppression	04/04/2016  07/04/2016  21/04/2016 05/05/2016	Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic). GA advised that Land Eng have been requested to provide samples for review by the Board. GA noted that if a membrane is to be used then the planting would need to be removed so allow the membrane to be put in place and then replaced/replanted. GA advised that BMCL have spoken to Land Eng & Gillespies and will provide proposals. GA advised that the options were to be forwarded to IP. GA noted that there were 2 options provided.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)	
5575	PMI 476 -	Neurosurgery Overcladding Windows	05/04/2016 21/04/2016 05/05/2016	The Board request that BMCL supply and fit Jalclocs to all new windows. Cross reference PMI 464. NHS to provide CE for costs NHS to provide CE for costs	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	22/04/2016	The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows; 1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high) 2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point.	
5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No. mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June.	

5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016  05/05/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed.  GF confirmed that the larger screws should be used to fix the IPS Panels.

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016  24/03/2016 07/04/2016 05/05/2016	The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e. Item 1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads. Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.  Agreed cost [REDACTED] incl. OH+P but excl. VAT. GA advised that the works are programmed to take place 25 <sup>th</sup> April. JS is tying in with the DCFP staff. GA advised that works are complete with the exception of the balustrade (awaiting delivery to site w/c 12/04/2016) and door entry system (programmed for the end of April) GA advised that the balustrade was bow in and the door entry system was to be installed.	Item closed 21/03/2016
19866	CE 171 -	DCFP - Anti-ligature Thumb Turn to Visicom screens	04/04/2016  07/04/2016 21/04/2016 05/05/2016	The Board confirm that BMCL should proceed with PMI 466 regarding the installation of Anti-ligature Thumb Turn to Visicom screens to rooms DCFP 022, 031, 032, 035, 037 within RHC level 4.  Agreed cost: [REDACTED] inclusive of OH&P but exclusive of VAT  GA Noted that the handles are due to be delivered to site w/c 11/04/2016 GA advised that he would liaise with JS for an update GA advised that the replacement thumb turns had all been fitted and the visioms cams had also been changed whilst working in that area.	Item closed 05/04/2016
20250	CE 176 -	Alterations to Childrens Roof Gardens	29/04/2016	The Board confirm that BMCL should proceed with the alterations to the Children's Roof Garden as detailed in PMI 478 i.e. 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding.	

A51679245

				4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. Agreed maximum cost [REDACTED] inclusive of OH&P but ex VAT	
--	--	--	--	--	--

#### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) **GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) **GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016)**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 04/05/2016:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	<b>GA advised that he was awaiting feedback from GB who had just returned back from leave</b>	

26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 2015. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped,	

			01/10/2015	<p>witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
			22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMII/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>	
			12/11/2015	<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
			26/11/2015	<p>GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p>	
			10/12/2015	<p>GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that</p>	

			14/01/2016	<p>materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p>	
			28/01/2016	<p>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p>	
			11/02/2016	<p>It was noted that a revised programme has been issued which updates on the works</p>	
			25/02/2015	<p>LJ advised that the costs should be with the NHS in the next few weeks.</p>	
			10/03/2016	<p>LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]</p>	
			24/03/2016	<p>GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.</p>	
			21/04/2016	<p>LJ advised that awaiting final account discussion with GW so can build up the other costs.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s; ORTHO THEATRES (DG)</p>	

			<p>26/11/2015</p> <p>10/12/2015</p>	<p>SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p><b>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</b></p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p> <p>GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.</p>	<p>Item to remain on tracker until demolition works complete.</p>
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	<p>12/01/2016</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p>	<p>Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p> <p><b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b></p>	

28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	<p>12/01/2016</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p>	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p> <p>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</p> <p>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14<sup>th</sup> April 2016.</p> <p>GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services.</p>	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016	Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road.	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured.	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	
			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be	

A51679245

				<p>fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
			06/08/2015	<p>PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p>	
			13/08/2015	<p>GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p>	
			27/08/2015	<p>GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p>	
			17/09/2015	<p>GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p>	
			24/09/2015	<p>GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p>	
			01/010/2015	<p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
			08/10/2015	<p>GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.</p>	
			22/10/2015	<p>PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.</p>	
			12/11/2015	<p>GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.</p>	
			26/11/2015	<p>GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.</p>	
			10/12/2015	<p>GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the</p>	

			<p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p>	<p>panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.</p> <p>GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.</p> <p>GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1<sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.</p> <p>GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.</p> <p>GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.</p> <p>GA advised that the panel was expected to be delivered to the Structal factory w/c 14<sup>th</sup> March and to the QEUH w/c 21<sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.</p> <p>GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucobond) was awaited.</p> <p>GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.</p> <p>GA advised that Level 11 panel works to be carried out either 23<sup>rd</sup> or 24<sup>th</sup>. The alucobond panel works will be carried out when the NCH Roof Garden works are being undertaken.</p>	
27785	NHS EWN 063 -	Consultant Wind Study re QEUH/RHC - Front Elevation	<p>17/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>21/04/2016</p>	<p>The Board request that the report prepared by the BMCL Consultant undertaking a Wind Study of the front elevation of the QEUH/RHC be provided to the Board asap.</p> <p>GA noted that GB had been chasing WSP for the report..</p> <p>GA advised that GB was scheduled to meet with WSP to review the report prior to formal issue to the NHS</p> <p>GA noted that BMCL had met with JCox earlier that day. JCox had suggested that there is no great difference in study findings. The letter from JCox would be issued to the NHS asap. GF enquired if it would be worthwhile trying to validate the model. DW noted this is difficult to do. GA noted that the next step would be to carry out wind tunnel analysis of a 3d model. GF suggested that monitors could be put up. GA advised that BMCL would digest the JCox info and thereafter agree to meet to discuss way forward to resolve. PM suggested that this matter would not be an issue that the Board would drop.</p> <p>GF reported that GB had advised that WSP were due to issue their report later that day. GB had arranged to meeting with JCox to go through the report. The report would subsequently be issued to the NHS asap. It was noted that BMCL had received correspondence from WSP earlier that day . Letter would be issued to the NHS asap.</p> <p>GW advised that the letter received from WSP was under review by BMCL. BMCL had also received a report from Gillespies which suggested that there are no hard/soft landscaping changes which can be done to assist. The WSP outcome had taken longer than expected to obtain as the model which the previous survey had been carried out on was now not available. GW noted that JCox had advised that he had told the NHS that they would be building a 14 storey building on a windy site.</p> <p>GA advised that the wind survey report is with AFernie.</p> <p>GA advised that AF had issued the letter to DWL on 21/03/2016. GF agreed to liaise with DWL.</p> <p>It was noted this item should be closed.</p>	

27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.
			10/12/2015	Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.
			28/01/2016	GA advised that WIP to level 8. Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.
			11/02/2016	GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward. GA noted that the encapsulated door sample was to be offered to the NHS for review.
			25/02/2016	GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.
			10/03/2016	GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.
			24/03/2016	GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised
			07/04/2016	GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.
			21/04/2016	GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.

28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	
			10/12/2015	GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	
			14/01/2016	GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.	
			28/01/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			11/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).	
			25/02/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	
			10/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
			24/03/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
			07/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
			21/04/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.	
29125	NHS EW 066 -	Phase 3a HV Cable Fault	09/03/2016	The Boards Estates team have advised that a fault has been identified on the HV cable that crosses the Phase 3a Landscaping site. The suggestion from the Estates team is that the Demolition site trafficking over the cable has caused the fault.	
			10/03/2016	Allow the Boards HV Contractor access to site to carryout investigations and repairs. GA noted that PMcG has been in touch with contractors for them to get access to site to do exploratory works. GA advised that BMCL have not damaged the drain.	
			24/03/2016	GA noted that he understood that the reps had been onsite and cut the piece of cable out, replaced and rejoined.	
			07/04/2016	HMc noted that he understood that the cable had been repaired. HMc advised that he would provide the BMCL feedback to the Estates Reps.	
			21/04/2016	Item closed	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 04/05/2016

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	
			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.	
			24/03/2016	GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblin to be finalised asap.	
			07/04/2016	HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from	

			04/05/2016	<p>leave.</p> <p>HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planng.</p>	
5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	<p>01/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p>	<p>In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p>GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</p> <p>GA advised that JS had provided the tile replacement marked up drawing to SF.</p> <p>GA advised that the delivery of the 14 remaining tiles is still awaited.</p>	<p>Item closed</p> <p>Cross ref</p>
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	<p>01/12/2015</p> <p>10/12/2015</p>	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p>	<p>CE 165</p>

			28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016	LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW. It was noted that the cost had been submitted and was with Currie & Brown for review. GF agreed to chase this up. It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review. GF advised that he would liaise with DR regarding the costs provided. GF advised that he would liaise with DWL regarding the way forward.	
5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	10/02/2016    25/02/2016 10/03/2016 24/03/2016	The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.  Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 & 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation. LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter. GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL. GF agreed to review asap	
5340	PMI 463	VIE 2 Medical Gas Alterations	10/02/2016   25/02/2016 24/03/2016 07/04/2016 21/05/2016	Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base  Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base. Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document. It was noted that the sequencing info is awaited. GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up. LJ advised that the quote received from Mercury had exclusions and another quote is being sought. LJ advised that the cost had been uploaded to Sypro for NHS review	Cross ref BMCL EW 150
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016   25/02/2016 10/03/2016 24/03/2016 07/04/2016 21/05/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building.	

	PMI 467	QEUH - CITY BIKE STANDS AT MAIN ENTRANCE - SIGN POLE	17/02/2016  25/02/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016	<p>Take delivery of 3.5mm long, 76mm dia stainless steel sign pole supplied to your Neuro site cabins. Install into the 200mm dia cored hole at west end of west bike racks, excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite..</p> <p>Take delivery of 3.5mm long, 76mm dia sign pole supplied to your Neuro site cabins. To 200mm dia cored hole at west end of west bike racks excavate hole to a depth of 600mm, insert and grout in pole to achieve a height of 2.9m from surrounding granite. (Delivery to be arranged through Graham Forsyth).</p> <p>For information only - others will supply and fit a 500mm cube onto of the post leaving a clear height below the base of the cube of 2.4m.</p> <p>GF advised that he would organise for the pole to be provided. Design and costs for bike stands received.</p> <p>GA advised that the pole had been delivered and that Land Engineering would install before the end of the following week.</p> <p>GA advised that the hole had been cored however an obstruction was identified when the pole was to be fitted. The coring rig is being organised to come back on site.</p> <p>GA advised that confirmation of the rig returning is awaited from Land Eng. If the works are not completed by 13/04/2016 then BMCL will instruct the works to be carried out by another company.</p> <p>GA advised that the works had been completed therefore item could be closed.</p>	
5444	PMI 469 -	INS Entrance - BMS System	07/03/2016  24/03/2016	<p>The Board request that BMCL provide the cost for the supply, install and commissioning of the BMS FOR THE Neurosurgery Entrance Project. (Provisional sum allowance included within overall scheme budget but excluded from CE). Cross ref BMCL-EWN- 172</p> <p>GA advised that LJ is pursuing the cost info.</p>	Cross ref CE 172
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016 24/03/2016 21/04/2016	<p>The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame.</p> <p>GA noted that WSP are progressing the design.</p> <p>GA advised that BMCL are pursuing WSP for a design</p> <p>GA advised that the design has now been received and the costs are being identified. An instruction to get the steel fabricated has been drafted for issue. AS flooring costs are awaited. BMCL will provide a programme for the works so the NHS can have an understanding of how long the room will be out of use so can schedule the works.</p>	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016	<p>The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below</p> <p>Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr</p>	Cross ref PMI 475

			<p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p>	<p>Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.</p> <p>BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month. GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options. <b>GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016.</b></p>	
5509	PMI 472 -	Scaffold Alterations - Level 2 South Tower	<p>21/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p>	<p>The Board request that BMCL carry out alterations to the level 2 south tower scaffolds to allow replacement of faulty UPS Equipment. Scaffold transoms to be raised with standard on AHU support beam removed.</p> <p>Anticipated delivery date w/c 4th April 2016, date will be confirmed under separate correspondence. GA advised that D&amp;B had been asked to provide costs. LJ advised that cost would be uploaded asap <b>LJ advised that the costs had been uploaded for NHS review</b></p>	
5510	PMI 473 -	Children's Play Park - Weed Suppression	<p>21/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p>	<p>As per discussions on site (between Paul McGuinness and Graham Forsyth) this PMI confirms the verbal agreement that BMCL should not install bark mulch within the planted areas of the children's play park due to issues for immunosuppressed patients.</p> <p>Further direction will be provided whether it may be an alternative or for the weed suppression to be omitted. GF to liaise with IP re bark substitute <b>It was agreed that this item could be closed as PMI 474 requests alternate solution.</b></p>	<b>Cross ref PMI 474</b>
5564	PMI 474 -	Children's Play Park - Weed Suppression	<p>04/04/2016</p> <p>07/04/2016</p>	<p>Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic). GA advised that Land Eng have been requested to provide samples for review by the Board. GA noted that if a membrane is to be used then the planting would need to be removed so allow the membrane to be put in place and then replaced/replanted.</p>	

			21/04/2016	GA advised that BMCL have spoken to Land Eng & Gillespies and will provide proposals.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)	
5575	PMI 476 -	Neurosurgery Overcladding Windows	05/04/2016 21/04/2016	The Board request that BMCL supply and fit Jaclocs to all new windows. Cross reference PMI 464. NHS to provide CE for costs	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	22/04/2016	The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows; 1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high) 2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point.	
5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June.	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
19414	CE 167 -	RHC LEVEL 4 / WARD 4 DCFP ADAPTATIONS	07/03/2016	The Board confirm that BMCL should proceed with the works as identified in PMI 460 i.e. Item 1 - Provide a cost to supply and install additional video entry controls at DCFP L0 entrance to DCFP-005 and DCFP-033, and also extent main entrance door entry system to DCFP-033. Item 2 - DCFP-015 Provide cost to fabricate and install a demountable raised floor in the room, in 3 sections, as per attached drawing, to include balustrade, vinyl flooring finish and hi-viz nosings to stair treads. Item 3 - Signage - provide two new signs as per drawing, replace sign that incorrectly refers to Level 3 wards.	Item closed 21/03/2016

A51679245

			24/03/2016  07/04/2016	Agreed cost [REDACTED] incl. OH+P but excl. VAT. GA advised that the works are programmed to take place 25 <sup>th</sup> April. JS is tying in with the DCFP staff. GA advised that works are complete with the exception of the balustrade (awaiting delivery to site w/c 12/04/2016) and door entry system (programmed for the end of April)	
19866	CE 171 -	DCFP - Anti-ligature Thumb Turn to Visicom screens	04/04/2016  07/04/2016 21/04/2016	The Board confirm that BMCL should proceed with PMI 466 regarding the installation of Anti-ligature Thumb Turn to Visicom screens to rooms DCFP 022, 031, 032, 035, 037 within RHC level 4.  Agreed cost: [REDACTED] inclusive of OH&P but exclusive of VAT  GA Noted that the handles are due to be delivered to site w/c 11/04/2016 GA advised that he would liaise with JS for an update	Item closed 05/04/2016
20241	CE172 -	INS Entrance - BMS System	29/04/2016	The Board confirms that BMCL should proceed with the supply and install of the BMS System to the INS Entrance as per PMI 469. Agreed cost of [REDACTED] inclusive of OH&P but ex VAT.	Item closed 29/04/2016
20242	CE 173 -	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD	29/04/2016	The Board confirm acceptance of the design fees and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL). Agreed cost [REDACTED] inclusive of OH&P but ex VAT.	Item closed 29/04/2016
20247	CE 175 -	QEUH & RHC Atrium Floor Tiles - Repairs to ceramic floor tiles	29/04/2016	The Board confirms acceptance of the quotation for the repairs to the ceramic floor tiles in both the QEUH and RHC atrium areas as per BM site survey 10/12/2015 and as detailed in PMI 453. Agreed cost [REDACTED] inclusive of OH&P but ex VAT.	Item closed 29/04/2016
20247	CE 175	QEUH & RHC Atrium Floor Tiles - Repairs to ceramic floor tiles	29/04/2016	The Board confirms acceptance of the quotation for the repairs to the ceramic floor tiles in both the QEUH and RHC atrium areas as per BM site survey 10/12/2015 and as detailed in PMI 453. Agreed cost [REDACTED] inclusive of OH&P but ex VAT.	Item closed 29/04/2016

#### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back

up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) **GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016)**

- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . **GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016)**

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however	

			18/052016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting date for completion of the drawings. <b>GA advised that DW is chasing up Mercury</b>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015  17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015       24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can	

			<p>01/10/2015</p> <p>08/10/2015</p> <p>22/10/2015</p> <p>12/11/2015</p>	<p>be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p>	
--	--	--	---	---	--

			26/11/2015	GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	
			11/02/2016	It was noted that a revised programme has been issued which updates on the works	
			25/02/2015	LJ advised that the costs should be with the NHS in the next few weeks.	
			10/03/2016	LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]	
			24/03/2016	GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.	

			21/04/2016 05/05/2016 18/05/2016	LJ advised that awaiting final account discussion with GW so can build up the other costs. LJ advised that GW is working on the costs for discussion with C&B. GA noted that LJ was awaiting information from GWallace and suggested that the costs would be issued by cop 20/05/2016	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	24/11/2015  26/11/2015  10/12/2015	Please accept this EWN as notification of continued delays incurred on site due to non-availability of buidlings to be demolished. To date only the following buildings have been released for demolition following the removal of ACM/s; ORTHO THEATRES (DG) SITU (DC) A&E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015. GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated. HMc noted that all buildings had been handed over by Friday 4 <sup>th</sup> December 2015.	*****  All delays to be reviewed at the end of the programme  *****
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	09/12/2015  10/12/2015  14/01/2016 28/01/2016  11/02/2016	Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works. GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B<CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW. GA noted that BMCL had completed their investigative works and surveys. GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.	Item to remain on tracker until demolition works complete.
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos	12/01/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full	

		materials.	14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p> <p><b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b></p>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016 21/04/2016 05/05/2016	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p> <p>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</p> <p>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14<sup>th</sup> April 2016.</p> <p>GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services.</p> <p><b>GF advised that AD is pursuing the removal of the fire damper panel.</b></p>	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016	<p>Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road.</p> <p>GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings</p> <p><b>GA requested that the NHS provide a PMI for changing the drawing(s).</b></p>	

29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured.	
29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016 19/05/2016	We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs. GA advised that it was hoped to slot in those missed wards into the gap in the programme	
30164	BMCL – EWN - 178	Unchartered underground services within Phase 3A works	31/05/2016	Land Engineering have discovered 3 No. potentially live, uncharted, electrical cables within the Central Park area whilst carrying out CAT scans prior to excavating the SUDS pond. The NHS were notified of these on 10th April and it was confirmed to them on 11th May that these were within either the SUDS pond excavation or the Orchard area and therefore need to be diverted/isolated. (The NHS and Burgoyne's have both been out to see the cables but no other action has yet taken place).  These services are now having an impact on progress on site.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 01/06/2016

							
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.			
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report			
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.			
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.			
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.			
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.			
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.			
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainbond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed			

A51679245

			<p>therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>11/06/2015 FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>25/06/2015 FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>23/07/2015 FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.</p> <p>30/07/2015 FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p> <p>06/08/2015 FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11<sup>th</sup> and 4<sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p> <p>13/08/2015 PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.</p> <p>27/08/2015 GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.</p> <p>17/09/2015 GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.</p> <p>24/09/2015 GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28<sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.</p> <p>01/10/2015 GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.</p> <p>GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.</p>	
--	--	--	---	--

			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
			14/01/2016	GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.	
			28/01/2016	GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1 <sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.	
			11/02/2016	GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.	
			25/02/2016	GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.	
			10/03/2016	GA advised that the panel was expected to be delivered to the Structal factory w/c 14 <sup>th</sup> March and to the QEUH w/c 21 <sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.	
			24/03/2016	GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucobond) was awaited.	
			07/04/2016	GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.	
			21/04/2016	GA advised that Level 11 panel works to be carried out either 23 <sup>rd</sup> or 24 <sup>th</sup> . The alucobond panel works will be carried out when the NCH Roof Garden works are being undertaken.	
			05/05/2016	GA advised that the Structal panel was being delivered 06/05/2016 and would be fitted asap thereafter dependent on satisfactory weather conditions. GA enquired which ward had been affected by the fire incident and GF agreed to confirm.	
			19/05/2016	GA Advised that the works were scheduled to take place on 21/05/2016	

27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.
			10/12/2015	Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.
			28/01/2016	GA advised that WIP to level 8. Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.
			11/02/2016	GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward. GA noted that the encapsulated door sample was to be offered to the NHS for review.
			25/02/2016	GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.
			10/03/2016	GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.
			24/03/2016	GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised
			07/04/2016	GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.
			21/04/2016	GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.
			05/05/2016	GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.
			19/05/2016	GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air

				permeability tests will not be carried out on isolation rooms.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	03/12/2015	In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.	
			10/12/2015	GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.	
			14/01/2016	GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an lpad lux level app had been utilised.	
			28/01/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			11/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).	
			25/02/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	
			10/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
			24/03/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
			07/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
			21/04/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.	
			05/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.	
			19/05/2016	GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 01/06/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status

A51679245

4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblines could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.
			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblines at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.
			24/03/2016	GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblines to be finalised asap.
			07/04/2016	HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.
			05/05/2016	HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.

5059	PMI 453	QEUH & RHC ATRIUM FLOORS - REPAIRS TO CERAMIC FLOOR TILES	<p>01/12/2015</p> <p>10/12/2015 14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016 25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016 07/04/2016 05/05/2016</p> <p>19/05/2016</p>	<p>In addition to repairs being undertaken by Brookfield Multiplex, proceed and repair circa 20 tiles in each location, exact numbers and colours to be established on commencement of works, provide cost for repairs over night.</p> <p>Works cost based on rate per location. Provide cost once survey confirms quantity.</p> <p>LJ advised that info is awaited from AC Flooring</p> <p>GA advised that there is 14 tiles remaining to be replaced in the Adult Hospital – these are on order and awaiting delivery. The replacement tile works in the NCH are almost complete.</p> <p>GA advised that BMCL were awaiting delivery of the remaining 14 tiles. LJ agreed to upload the costs asap.</p> <p>Costs to be uploaded to Sypro. GA noted that only 14 tiles are awaited to complete the works.</p> <p>GA advised that BMCL are still awaiting delivery of 14 floor tiles from Portugal. AF had mentioned that he is awaiting the PMI for the first 40 tiles. GF enquired if JS has a drawing of the locations of the replaced 40 tiles. GA noted that the replacement of the 40 tiles had been agreed directly with DL. It was noted that JS would have a survey drawing of the tiles – some were AC Flooring works and other were point load breaks. GW noted that the costs had been provided to DR a while ago.</p> <p>GA advised that BMCL are awaiting delivery of 14 tiles. BMCL are awaiting the PMI for the tile replacement which was carried out in preparation for the official opening.</p> <p>GA advised that JS had provided the tile replacement marked up drawing to SF.</p> <p>GA advised that the delivery of the 14 remaining tiles is still awaited.</p> <p>GA advised that tiles have now been delivered and confirmation of labour to install the teams is awaited.</p> <p>GA advised that the tiles were onsite ready for install</p>	<p>Item closed</p> <p>Cross ref</p> <p>CE 175</p>
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	<p>01/12/2015</p> <p>10/12/2015 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016</p> <p>05/05/2016</p>	<p>Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>LJ noted that information is with Designers and their design fee cost is awaited</p> <p>GA noted that LJ is awaiting Nightingale fee offer.</p> <p>LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>GF noted that authorisation to progress is awaited.</p> <p>It was noted that CE 165 has been issued. Item closed.</p> <p>GA advised that the drawings had been received and will be reviewed asap. Item closed.</p> <p>GA advised that BMCL had the Nightingale drawings but were awaiting the WW drawings. GF agreed to discuss this with SRussell.</p> <p>GF advised that he had passed the drawings to Anne Harkness however he needed the cost info</p>	<p>CE 165</p>

			<p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>05/05/2016</p>	<p>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</p> <p>GF advised that he would liaise with DR regarding the costs provided.</p> <p>GF advised that he would liaise with DWL regarding the way forward.</p> <p>GF advised that the works would be awarded soon and the NHS were in the process of finalising the internal budgets to allow the works to be awarded.</p>	
5339	PMI 462 -	Neurosurgery / Neurology Linkbridge	<p>10/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>05/05/2016</p> <p>19/05/2016</p>	<p>The Board are reviewing the potential options to resolve access restrictions beyond the Linkbridge between the Neurosurgery / Neurology buildings.</p> <p>Provide a quotation for the development of outline feasibility study and costs associated with the forming a new Linkbridge between the existing Neurosurgery stair core and the rooms on level 1 &amp; 2 to the east of the existing break through point within the Neurology building. Also include the statutory approval fees within quotation.</p> <p>LJ noted that BMCL are awaiting costs from Fairhurst and would upload asap thereafter.</p> <p>GA advised that the costs have been uploaded and BMJ had already carried out an initial feasibility study. GF agreed to review the costs and speak to DWL.</p> <p>GF agreed to review asap</p> <p>GF noted that these works may not be progressed through BMCL and he would confirm the way forward asap.</p> <p>GF confirmed that the NHS would not be progressing this item through BMCL and PMI to be closed.</p>	
5340	PMI 463	VIE 2 Medical Gas Alterations	<p>10/02/2016</p> <p>25/02/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>19/05/2016</p>	<p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p> <p>It was noted that the sequencing info is awaited.</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up.</p> <p>LJ advised that the quote received from Mercury had exclusions and another quote is being sought.</p> <p>LJ advised that the cost had been uploaded to Sypro for NHS review</p> <p>NHS to issue CE for this item</p>	<p>Cross ref BMCL EW 150</p>

5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016  21/04/2016  05/05/2016 19/05/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap.	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016 24/03/2016 21/04/2016  05/05/2016 19/05/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame. GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design GA advised that the design has now been received and the costs are being identified. An instruction to get the steel fabricated has been drafted for issue. AC flooring costs are awaited. BMCL will provide a programme for the works so the NHS can have an understanding of how long the room will be out of use so can schedule the works. LJ noted that the cost would be uploaded by 09/05/2016. GA advised that the works would be 3-4 weeks once commenced. GA noted that the costs had been uploaded to Sypro for NHS review.	
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016          10/03/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA	Cross ref PMI 475

			<p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p>	<p>requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB.</p> <p>GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month.</p> <p>GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options.</p> <p>GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016.</p> <p>GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell.</p>	
5564	PMI 474 -	Children's Play Park - Weed Suppression	<p>04/04/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p>	<p>Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic).</p> <p>GA advised that Land Eng have been requested to provide samples for review by the Board. GA noted that if a membrane is to be used then the planting would need to be removed so allow the membrane to be put in place and then replaced/replanted.</p> <p>GA advised that BMCL have spoken to Land Eng &amp; Gillespies and will provide proposals.</p> <p>GA advised that the options were to be forwarded to IP. GA noted that there were 2 options provided.</p> <p>GA advised that the bark was to be reinstated</p>	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	<p>04/04/2016</p>	<p>The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)</p>	
5575	PMI 476 -	Neurosurgery Overcladding Windows	<p>05/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p>	<p>The Board request that BMCL supply and fit Jaclocs to all new windows. Cross reference PMI 464.</p> <p>NHS to provide CE for costs</p> <p>NHS to provide CE for costs</p>	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	<p>22/04/2016</p> <p>19/05/2016</p>	<p>The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows;</p> <p>1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high)</p> <p>2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point.</p> <p>It was noted that the costs are awaited</p>	

5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016  19/05/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. <b>It was noted that the works are ongoing</b>	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016  05/05/2016 19/05/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed. GF confirmed that the larger screws should be used to fix the IPS Panels. <b>GA noted that the costs have been uploaded to Sypro for NHS review</b>	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/discussed	Actions	Date Closed Out/Status
20250	CE 176 -	Alterations to Childrens Roof Gardens	29/04/2016	The Board confirm that BMCL should proceed with the alterations to the Children's Roof Garden as detailed in PMI 478 i.e. 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. Agreed maximum cost [REDACTED] inclusive of OH&P but ex VAT	26/05/2016
20655	CE 177 -	Office Block External Works	26/05/2016	The Board confirm acceptance of the quotation supplied for PMI 459 Office Block External Works and confirm that BMCL should proceed with the works as detailed in PMI 459.	26/05/2016
20656	CE 178 -	VIE 2 Medical Gas Alterations	26/05/2016	The Board confirm acceptance of the quotation provided for the works outlined in PMI 463 VIE 2 Medical Gas Alterations and confirm that BMCL should proceed with these works.  Cost agreed [REDACTED] inclusive of OH&P but exclusive of VAT	26/05/2016

20658	CE 179 -	Neurosurgery Overcladding Windows	26/05/2016	The Board confirm acceptance of the quotation provided to install jaclocs to all new windows. Cross reference PMI 464 and PMI 476.  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	26/05/2016
20660	CE 180 -	NCH Rehab department (REH049) - Vestibular Hook	26/05/2016	The Board confirms acceptance of the quotation for the supply and install of goalpost frame. Cross reference PMI 443 and PMI 470.  Cost agreed as [REDACTED]	26/05/2016

#### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) **GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa

220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 2154

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 15/06/2016

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.
			04/06/2015	FS advised that GB is liaising with Mercury
			11/06/2015	GB advised that this would be progressed once the works completed in the summer
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.
			24/03/2016	WIP
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however

			18/052016 02/06/2016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting <b>date for completion of the drawings.</b> <b>GA advised that DW is chasing up Mercury</b> GA advised that BMCL had employed an intern to progress the mark ups of the drawings in order not to delay the warrant application further.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****  All delays to be reviewed at the end of the programme  *****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015       24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week	

			<p>lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>12/11/2015 GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished</p>	
--	--	--	--	--

			26/11/2015	at handover to BMCL. GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	
			11/02/2016	It was noted that a revised programme has been issued which updates on the works	
			25/02/2015	LJ advised that the costs should be with the NHS in the next few weeks.	
			10/03/2016	LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]	
			24/03/2016	GA advised that BMCL were preparing to settle the final account with Central Demolition and would	

28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p> <p><b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b></p>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016 05/05/2016 02/06/2016	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p> <p>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</p> <p>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14<sup>th</sup> April 2016.</p> <p>GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services.</p> <p>GF advised that AD is pursuing the removal of the fire damper panel.</p> <p><b>GA advised the a revised programme had been issued via Sypro and emailed out earlier that day. GW will look at the costs for delays and will liaise with DR. GF confirmed that the fire alarm panel works had been completed. GA advised that the water pipe which serves the radiator panel located behind the fixed seating is still live and requires to be isolated. GF agreed to progress.</b></p>	

29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016 02/06/2016	Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road. GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings GA requested that the NHS provide a PMI for changing the drawing(s). GA noted that PMcG had sent on the details to WS. BMCL would provide the cost for the redesign work. The cost information would be uploaded to PMI 449.	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016   02/06/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured. It was noted that GW and DR will review	
29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016  19/05/2016 02/06/2016	We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs. GA advised that it was hoped to slot in those missed wards into the gap in the programme GA advised that it was still the intention to slot in those missed zones into the gap. GF advised that he had discussed this with Jamie Munro and that once the programme for the works has been received GF would liaise with the Users.	
30164	BMCL – EWN - 178	Unchartered underground services within Phase 3A works	31/05/2016   02/06/2016	Land Engineering have discovered 3 No. potentially live, uncharted, electrical cables within the Central Park area whilst carrying out CAT scans prior to excavating the SUDS pond. The NHS were notified of these on 10th April and it was confirmed to them on 11th May that these were within either the SUDS pond excavation or the Orchard area and therefore need to be diverted/isolated. (The NHS and Burgoynes have both been out to see the cables but no other action has yet taken place).  These services are now having an impact on progress on site. It was noted that the NHS Estates Dept are trying to eliminate all possibilities prior to any switch off of the HV which was a last resort. It was suspected that any switch off would not be until the following week and would only be carried out after 5pm. GA advised that there was still concern that the process may not confirm if it is the same cable.	
30393	BMCL – EWN - 179	EWN- Existing screed to INS entrance, levels for floor finishes	15/06/2016	Existing screed within INS requires to be removed, this has been excluded within the cost plan for the INS and should be instructed.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 16/06/2016

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015	Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.	
			23/4/2015	AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report	
			30/04/2015	FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.	
			07/05/2015	FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.	
			14/05/2015	FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.	
			21/05/2015	FS advised that work is ongoing – programme shows the work finishing by 12 <sup>th</sup> June 2015.	
			28/05/2015	FS noted that there are currently 2 operatives on site and that he would obtain an update asap.	
			04/06/2015	FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.	
			11/06/2015	FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.	
			25/06/2015	FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10 <sup>th</sup> June. The replacement panels for remediation were currently awaited.	
			23/07/2015	FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The works to the flashes would be carried out on 27/07/2015.	
				FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.	

A51679245

			30/07/2015	FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11 <sup>th</sup> and 4 <sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainbond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.	
			06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
			13/08/2015	GA advised hat the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
			27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
			17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
			24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
			01/010/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
			08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
			22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
			12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	
			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	

			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
			14/01/2016	GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.	
			28/01/2016	GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1 <sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.	
			11/02/2016	GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.	
			25/02/2016	GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.	
			10/03/2016	GA advised that the panel was expected to be delivered to the Structal factory w/c 14 <sup>th</sup> March and to the QEUH w/c 21 <sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.	
			24/03/2016	GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucobond) was awaited.	
			07/04/2016	GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.	
			21/04/2016	GA advised that Level 11 panel works to be carried out either 23 <sup>rd</sup> or 24 <sup>th</sup> . The alucobond panel works will be carried out when the NCH Roof Garden works are being undertaken.	
			05/05/2016	GA advised that the Structal panel was being delivered 06/05/2016 and would be fitted asap thereafter dependent on satisfactory weather conditions. GA enquired which ward had been affected by the fire incident and GF agreed to confirm.	
			19/05/2016	GA Advised that the works were scheduled to take place on 21/05/2016	
			02/06/2016	GA advised that the level 11 glazed unit has been replaced. Gaskets in 1 week Saturday and then fin to be fitted. GA noted that the Core G panel had also been fitted.	
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.	
			10/12/2015	Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a	

			<p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/06/2016</p>	<p>period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured. GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p> <p>GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.</p> <p>GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.</p> <p>GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.</p> <p>GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air permeability tests will not be carried out on isolation rooms.</p> <p>GA noted that a further circa 150 visicom units had been remediated leaving circa 100 still to do. GA noted that BMCL had been unable to progress the works to be undertaken in Critical Care by Iain Thomson. GF agreed to liaise with Lynn Pritchard.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.</p>	

			28/01/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.	
			11/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).	
			25/02/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.	
			10/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.	
			24/03/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
			07/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
			21/04/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.	
			05/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.	
			19/05/2016	GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.	
			02/06/2016	GA advised that Paul had sent through his proposal and is working to progress with Land Eng.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 01/06/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	

A51679245

			<p>10/12/2015 PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.</p> <p>14/01/2016 GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off</p> <p>28/01/2016 GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.</p> <p>11/02/2016 GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.</p> <p>25/02/2016 GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblines could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.</p> <p>10/03/2016 HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblines at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.</p> <p>24/03/2016 GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblines to be finalised asap.</p> <p>07/04/2016 HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.</p> <p>05/05/2016 HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.</p>	
5060	PMI 454	QEUH IMMEDIATE ASSESSMENT UNIT - ROOMS AAW 172 7 178	<p>01/12/2015 Please test the feasibility of carrying out the works to convert Room AAW-172 into a trolley waiting area and convert Room AAW-178 into a relatives waiting area. Other options that provide the same basic space but are less disruptive from a works point of view maybe considered.</p> <p>Based on the narrative above, please consider the feasibility of the proposal to provide a 3 @ trolley space in what was AAW 172 including the framing up of the single access door, the formation of a large aperture to AAW-175 with dropped bulkhead to avoid works to plasterboard ceiling in AAW-175. Remove benching but leave trunking on wall, provide cubicle curtain tracks as shown. Check feasibility of re-routing fire wall as indicated. In room AAW-178 open end wall to AAW-177, frame up single door, leave glazed window, remove dado trunking and isolate services. Provide TV point. Please provide feasibility report as soon as possible.</p> <p>10/12/2015 LJ noted that information is with Designers and their design fee cost is awaited</p>	CE 165

			<p>14/01/2016 GA noted that LJ is awaiting Nightingale fee offer.</p> <p>28/01/2016 LJ advised that the quotation had been uploaded to Sypro for NHS review</p> <p>11/02/2016 GF noted that authorisation to progress is awaited.</p> <p>25/02/2016 It was noted that CE 165 has been issued. Item closed.</p> <p>10/03/2016 GA advised that the drawings had been received and will be reviewed asap. Item closed.</p> <p>24/03/2016 GA advised that BMCL had the Nightingale drawings but were awaiting the WW drawings. GF agreed to discuss this with SRussell.</p> <p>05/05/2016 GF advised that he had passed the drawings to Anne Harkness however he needed the cost info so that he could provide this to SRussell and also the M&amp;E info. GA noted that DW had gone back to WWhittle on a couple of points and once response from WWhittle has been obtained the final M&amp;E drawings would be provided asap. NHS to confirm if medical gases are required. GA advised that in anticipation of carrying out the works that he had requested the HAI Scribe to be prepared. It was noted that the drawings had been issued for to Anne Harkness for comment.</p> <p>19/05/2016 GA noted that feedback is awaited regarding the options provided by BMCL i.e. is medical gas required on the medical trunking. GF agreed to liaise with SR and provide feedback.</p> <p>02/06/2016</p>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	<p>02/12/2015 Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.</p> <p>10/12/2015 It was noted that this info is with Workspace Design for them to provide a quote.</p> <p>14/01/2016 GA noted that LJ has received costs and will upload to Sypro by close of business that day.</p> <p>28/01/2016 LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.</p> <p>11/02/2016 GF noted that he would liaise with PM</p> <p>25/02/2016 GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.</p> <p>10/03/2016 GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	CE to be issued

5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>05/05/2016</p> <p>02/06/2016</p>	<p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <ol style="list-style-type: none"> <li>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</li> <li>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</li> <li>3) Extension of Tobermore paving from OB to Langlands Drive</li> <li>4) Access path across grasscrete to CP2 staircore.</li> <li>5) Construction of grassed strips between office block and CMB/Carpark</li> </ol> <p>GA noted that LJ is awaiting costs from LE</p> <p>LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</p> <p>GF advised that he would liaise with DR regarding the costs provided.</p> <p>GF advised that he would liaise with DWL regarding the way forward.</p> <p>GF advised that the works would be awarded soon and the NHS were in the process of finalising the internal budgets to allow the works to be awarded.</p> <p>It was noted that CE 177 had been issued. GA noted that the programme will hinge on MSCP3 works and consideration needs to be given to Laing O'Rourke access to there site set-up. HMc advised that the completion date for the MSCP3 is 14<sup>th</sup> July 2016. GA suggested that the works could be commenced 1<sup>st</sup> week August 2016.</p>	Cross reference CE 177
5340	PMI 463	VIE 2 Medical Gas Alterations	<p>10/02/2016</p> <p>25/02/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>19/05/2016</p> <p>02/06/2016</p>	<p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p> <p>It was noted that the sequencing info is awaited.</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up.</p> <p>LJ advised that the quote received from Mercury had exclusions and another quote is being sought.</p> <p>LJ advised that the cost had been uploaded to Sypro for NHS review</p> <p>NHS to issue CE for this item</p> <p>It was noted that CE 178 had been issued. GA advised that he would pursue Mercury to progress this item and GA would provide a date for Air Products coming to site.</p>	Cross ref BMCL EW 150

5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016  21/04/2016  05/05/2016 19/05/2016 02/06/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap. Gf advised that he understood a review of the costs were ongoing by RG and LJ	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016 24/03/2016 21/04/2016  05/05/2016  19/05/2016 02/06/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame. GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design GA advised that the design has now been received and the costs are being identified. An instruction to get the steel fabricated has been drafted for issue. AC flooring costs are awaited. BMCL will provide a programme for the works so the NHS can have an understanding of how long the room will be out of use so can schedule the works. LJ noted that the cost would be uploaded by 09/05/2016. GA advised that the works would be 3-4 weeks once commenced. GA noted that the costs had been uploaded to Sypro for NHS review. It was noted that CE 180 had been issued.	Cross ref CE 180
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016          10/03/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec	Cross ref PMI 475

			<p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>02/06/2016</p>	<p>provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB.</p> <p>GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month.</p> <p>GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options.</p> <p>GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016.</p> <p>GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell.</p> <p>GA advised that the air handling unit supplier for Mercury are working on an alternate solution as previous proposal does now not comply with new EU legislation.</p>	
5564	PMI 474 -	Children's Play Park - Weed Suppression	<p>04/04/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/6/2016</p>	<p>Further to PMI 473 (Children's Play Park - Weed Suppression) the Board request a cost to substitute the bark mulch which has now been omitted for a layer of anti weed membrane layered on all bare soil areas with a synthetic chip material (soft plastic).</p> <p>GA advised that Land Eng have been requested to provide samples for review by the Board. GA noted that if a membrane is to be used then the planting would need to be removed so allow the membrane to be put in place and then replaced/replanted.</p> <p>GA advised that BMCL have spoken to Land Eng &amp; Gillespies and will provide proposals.</p> <p>GA advised that the options were to be forwarded to IP. GA noted that there were 2 options provided.</p> <p>GA advised that the bark was to be reinstated</p> <p>GA advised that the bark was now all in place. It was agreed this item could be closed.</p>	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	<p>04/04/2016</p>	<p>The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)</p>	
5575	PMI 476 -	Neurosurgery Overcladding Windows	<p>05/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>02/06/2016</p>	<p>The Board request that BMCL supply and fit Jaclocs to all new windows. -

**Other items that require discussion:**

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016) **G noted that meetings are ongoing and that there is a meeting scheduled to take place on 8<sup>th</sup> June 2016. (02/06/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016) **Over 800 remedials done as of Monday. GA requested that the NHS provide a PMI for the placement of the instruction stickers at the visicom units and GF agreed to provide. (30/05/2016)**

- Labs Block – solar shading fin – GF noted that a solar shading fin had been shattered during previous replacement and enquired when BMCL proposed to replace the fin. GA advised that he was not aware of this defect. (02/06/2016)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 29/06/2016

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however	

			18/052016 02/06/2016  16/06/2016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting <b>date for completion of the drawings</b> . GA advised that DW is chasing up Mercury GA advised that BMCL had employed an intern to progress the mark ups of the drawings in order not to delay the warrant application further. <b>DW advised that the Intern was progressing the mark-up of the drawings. Levels 0 and 1 were being marked up and issued to Building Control along with the test certification. It would take a long time to do all the floors.</b>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that	

Page 2178

				<p>BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p>	
		01/10/2015		<p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
		08/10/2015		<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
		22/10/2015		<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p>	
		12/11/2015		<p>GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that</p>	

			<p>day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>26/11/2015 GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p> <p>10/12/2015 GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>14/01/2016 GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p> <p>28/01/2016 GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p> <p>11/02/2016 It was noted that a revised programme has been issued which updates on the works</p> <p>25/02/2016 LJ advised that the costs should be with the NHS in the next few weeks.</p>	
--	--	--	--	--

			11/02/2016	Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016 14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . <b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016 21/04/2016  05/05/2016 02/06/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible. GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc. GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14 <sup>th</sup> April 2016. GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services. GF advised that AD is pursuing the removal of the fire damper panel. <b>GA advised the a revised programme had been issued via Sypro and emailed out earlier that day. GW will look at the costs for delays and will liaise with DR. GF confirmed that the fire alarm panel works had been completed. GA advised that the water pipe which serves the radiator panel located behind the fixed seating is still live and requires to be isolated. GF agreed to progress.</b>	

29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016 02/06/2016	<p>Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road.</p> <p>GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings</p> <p>GA requested that the NHS provide a PMI for changing the drawing(s).</p> <p>GA noted that PMcG had sent on the details to WS. BMCL would provide the cost for the redesign work. The cost information would be uploaded to PMI 449.</p>	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016   02/06/2016	<p>Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured.</p> <p>It was noted that GW and DR will review</p>	
29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016  19/05/2016 02/06/2016  18/06/2016	<p>We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs.</p> <p>GA advised that it was hoped to slot in those missed wards into the gap in the programme</p> <p>GA advised that it was still the intention to slot in those missed zones into the gap. GF advised that he had discussed this with Jamie Munro and that once the programme for the works has been received GF would liaise with the Users.</p> <p>GF advised that he had discussed with JMunro and a way forward had been agreed. GF would liaise with SWalker and seek approval for the proposed decants.</p>	
30164	BMCL – EWN - 178	Unchartered underground services within Phase 3A works	31/05/2016   02/06/2016  18/06/2016	<p>Land Engineering have discovered 3 No. potentially live, uncharted, electrical cables within the Central Park area whilst carrying out CAT scans prior to excavating the SUDS pond.</p> <p>The NHS were notified of these on 10th April and it was confirmed to them on 11th May that these were within either the SUDS pond excavation or the Orchard area and therefore need to be diverted/isolated. (The NHS and Burgoyne have both been out to see the cables but no other action has yet taken place).</p> <p>These services are now having an impact on progress on site.</p> <p>It was noted that the NHS Estates Dept are trying to eliminate all possibilities prior to any switch off of the HV which was a last resort. It was suspected that any switch off would not be until the following week and would only be carried out after 5pm. GA advised that there was still concern that the process may not confirm if it is the same cable.</p> <p>GF advised that the cable would be spiked on 23/06/2016. HM advised that the cable had been tracked back to the sub-station and was found to be severed and that the readings being obtained are from induction. HMc would provide confirmation of the cable being dead to BMCL on 23/06/2016.</p>	

30393	BMCL – EWN - 179	EWN- Existing screed to INS entrance, levels for floor finishes	15/06/2016 18/06/2016	Existing screed within INS requires to be removed, this has been excluded within the cost plan for the INS and should be instructed. GF noted that the PMI had been provided – Cross reference PMI 481. GW advised that as the building was occupied that the cost had been based on approx levels.	
-------	------------------	---	--------------------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 16/06/2016

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
24641	NHS EW 057	ADULT HOSPITAL STRUCTAL SYSTEM	02/04/2015 23/4/2015 30/04/2015 07/05/2015 14/05/2015 21/05/2015 28/05/2015 04/06/2015 11/06/2015 25/06/2015 23/07/2015	<p>Please undertake a comprehensive survey and prepare a report for Board review on the panel failure that occurred on 1st April 2015. A metal outer panel is reported to have become dislodged from its carrier and fell to roof Level 4. The Board also wish to establish the safety measure being taken by BMCE while the cause is being established.</p> <p>AF advised that the install had been surveyed and the screw fixings would be replaced. The works would take 2-3 weeks to complete. BMCL would provide a programme for the works. DL advised that the NHS would need to understand the programme to ensure that the works do not cause any privacy issues for patients. DL requested that he be provided with a copy of the incident report</p> <p>FS advised that an updated incident report was awaited and that he would obtain a copy of the report and provide it to DL.</p> <p>FS noted that additional fixings are being put in so he had been advised that the works would take longer however there had been an additional team put on to carry out the works - it was suggested that it would take 3-4 weeks to complete the works.</p> <p>FS acknowledging that he had received the final survey and programme and would forward to PM asap – the programme indicates the works finishing in 3 weeks.</p> <p>FS advised that work is ongoing – programme shows the work finishing by 12<sup>th</sup> June 2015.</p> <p>FS noted that there are currently 2 operatives on site and that he would obtain an update asap.</p> <p>FS noted the following update from the contractor: all the hitch plates had been fitted so the rainobond panels will not come off the building. It takes 1 day to drop down elevation and there are 38 drops needed therefore potentially 38 days worth of work however this is dependent on the weather. FS advised that he had delivery dates for the replacement glass. FWS would provide a copy of the survey report. PM advised that operatives needed to be mindful when doing the glass works at the wards.</p> <p>FS advised that he had provided a copy of the report however had received a further update the previous evening and he would provide this update to PM asap. 2 glass panels had been broken however Sheila had previously requested that a couple of spare curved panels be made in case of breakage and the panels are back in fabrication.</p> <p>FS advised that the operatives were currently on site. The east side had been finished and the operatives were 50% complete on the west elevation. It was being suggested that the operatives would be finished by 10<sup>th</sup> June. The replacement panels for remediation were currently awaited.</p> <p>FS advised that all the rainobond panels had been fixed. The 2 replacement panels were en-route to site and a further 2 replacement panels were to be delivered and the delivery detail of these was awaited. The</p>	18/06/2016

A51679245

			works to the flashes would be carried out on 27/07/2015.	
		30/07/2015	<p>FS noted that the issue re the blinds was thought to be due to people pulling the wand to try and lift the blind which doesn't actually lift in anycase. It is thought that after someone has broken the wand then they can get access to the loop at the head. PM suggested that signage re the operation of the blinds may need to be installed and saying not to pull the wand.</p> <p>FS advised that he had met on 28/07/2015 with the Structal. There are 2no. units (11<sup>th</sup> and 4<sup>th</sup> floor) to be fitted w/c 03/08/2015. The curved spandrel for zone F will be 28/08/2015. The rainobond remedials have been completed and written confirmation of this is awaited. The sills for level 12 are scheduled to be delivered on 30/07/2015. The level 4 sills are WIP. A couple of the units need to have the condensation removed from the panels – discussions ongoing to arrange access. FS reported that the blinds are getting misused and he had been advised that Structal were requested not to put on stickers – a copy of this instruction is awaited. BMCL had reviewed 5F and 30% have broken wands. IP reps have carried out a survey and BMCL request confirmation as to what BMCL should do with the survey outcome. PM requested that a copy of the survey information be provided so that he could review and discuss with DL re paying for repairs now and getting signage installed.</p>	
		06/08/2015	PM noted that there had been a site visit to look at blinds. It was clear that there is an issue and it is proposed to install signage at the ingo where the blind wand rests. The NHS are looking for a price to get the blinds fixed.	
		13/08/2015	GA advised that the outstanding flashes and condensation matters would be complete by w/e21/08/2015. The panel replacement would be complete by end of August as previously advised. BMCL are struggling to get a price back for the wand/blind repairs due to reps being on annual leave.	
		27/08/2015	GA advised that the outstanding panel is due w/c 31/08/2015 and it would be 1week/10 days to complete the works. Costs for the blind remedial works are awaited.	
		17/09/2015	GA advised that a meeting with Structal had been scheduled to take place the following day. Structal had failed to meet the 28 <sup>th</sup> August completion date and this had been escalated to AFernie. A meeting had been organised to discuss logistics, exclusion zones, etc – GA would provide feedback to PM on Friday.	
		24/09/2015	GA advised that BMCL are still awaiting confirmation for the panel delivery and a price for sorting the blinds. Structal have failed to meet all dates so far. GA had escalated the matter to A Fernie.	
		01/10/2015	GA advised that the outstanding panels are in the country and BMCL are awaiting confirmation of when they will be delivered from Wishaw. GA had liaised with PM and that the works would take place over a few weekends.	
		08/10/2015	GA advised that the panels are due to be delivered to site the next day (09/10/2015) with the exception of the curved panels. The panels would be fitted over the next few weekends. Jordan would tie-in with the NHS Estates to arrange. The panels will be fitted from a cradle off the roof. GF noted that Jordan should also liaise with RClinton.	
		22/10/2015	PM noted that it is work in progress re Structal panel replacement. AF has agreed to get some NHS reps trained up so that there are NHS reps who can fix blinds.	
		12/11/2015	GA advised that all non –curved panels are on site for installation and the works to the BMU were complete. The install of the panels was hoped to commence on 14/11/2015 however this was dependent of the weather conditions. BMCL are awaiting confirmation from Structal regarding the delivery of the curved panel. PM noted that he had noticed that a fin has come off and GA advised that this is currently sitting on the roof. PM enquired about the fin lighting and DW advised that BMCL would need to train up some reps to undertake the works.	

			26/11/2015	GA advised that the works were substantially complete. The fin on the south east corner had been fitted back on. 2 panels had been installed. The internal works (removal of condensation) was scheduled to take place the following day (27/11/2015). The curved panel was also scheduled to be fitted the following day however this work was weather dependant. PM noted that there was a panel missing at Core G – users had advised that the panel had never been fitted. PM advised that you could see where the panel is missing from the roof garden.	
			10/12/2015	GA advised that the panels were on site and BMCL were awaiting suitable weather conditions so that the panels could be installed. PM agreed that BMCL should wait for suitable weather conditions – better to do it safely rather than hurried. GA noted that Mercury were doing the fin lighting.	
			14/01/2016	GA noted that Structal were scheduled to commence the replacement panel work (level 11 cracked panel and curved panel) on 16/01/2016.	
			28/01/2016	GA advised that the curved panel had now been installed. The cracked panel on level 11 had not been replaced due to the weather conditions changing. GA was meeting with Structal on 1 <sup>st</sup> Feb 2016. GA noted that it was only the cracked panel and some mastic works to be completed. GA noted that the fin lighting is WIP and that JMiller had sent a traffic plan to the NHS for approval.	
			11/02/2016	GA advised that 2 items were remaining to complete the works: The level 11 cracked panel replacement- A replacement structal panel is on order and mastic works.	
			25/02/2016	GA advised that delivery of the level 11 panel is awaited. The delivery date for the Alucobond panel for level 4 core G is also awaited.	
			10/03/2016	GA advised that the panel was expected to be delivered to the Structal factory w/c 14 <sup>th</sup> March and to the QEUH w/c 21 <sup>st</sup> March. Thereafter the panel would be installed as soon as weather permits.	
			24/03/2016	GA advised that the delivery date for the remaining 2 panels (1 glass unit and 1 alucubond) was awaited.	
			07/04/2016	GA noted that he was not satisfied with the delay in getting the panels delivered to site and the matter has been escalated.	
			21/04/2016	GA advised that Level 11 panel works to be carried out either 23 <sup>rd</sup> or 24 <sup>th</sup> . The alucobond panel works will be carried out when the NCH Roof Garden works are being undertaken.	
			05/05/2016	GA advised that the Structal panel was being delivered 06/05/2016 and would be fitted asap thereafter dependent on satisfactory weather conditions. GA enquired which ward had been affected by the fire incident and GF agreed to confirm.	
			19/05/2016	GA Advised that the works were scheduled to take place on 21/05/2016	
			02/06/2016	GA advised that the level 11 glazed unit has been replaced. Gaskets in 1 week Saturday and then fin to be fitted. GA noted that the Core G panel had also been ifitted.	
			16/06/2016	It was agreed that this EW could be closed .	

27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.	
				Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.	

			10/12/2015	GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.	
			28/01/2016	GA advised that WIP to level 8. Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.	
			11/02/2016	GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward. GA noted that the encapsulated door sample was to be offered to the NHS for review.	
			25/02/2016	GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.	
			10/03/2016	GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.	
			24/03/2016	GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised	
			07/04/2016	GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.	
			21/04/2016	GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.	
			05/05/2016	GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.	
			19/05/2016	GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air permeability tests will not be carried out on isolation rooms.	
			02/06/2016	GA noted that a further circa 150 visicom units had been remediated leaving circa 100 still to do. GA noted that BMCL had been unable to progress the works to be undertaken in Critical Care by Iain Thomson. GF agreed to liaise with Lynn Pritchard.	
			16/06/2016	FS advised that the remedial works were 95% complete with access to critical care being an issue. Infection control are asking for the rooms to be retested – subsequently discussed with Ian Powrie who confirmed that as not a refurb retesting would not be requested. It was noted that a visual inspection of the	

				works could be viewed once completed. GF agreed to liaise with LPritchard. GW advised that the Administrator has requested proof that this is a defect and suggested that it would be beneficial not to repair one so that a rep can be brought to site to review. GF advised that he would email GW to state that this is a fully operational hospital and the product is defective.	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an lpad lux level app had been utilised.</p> <p>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</p> <p>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).</p> <p>GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.</p> <p>GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.</p> <p>GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.</p> <p>GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.</p> <p>GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.</p> <p>GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.</p> <p>GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.</p> <p>GA advised that Paul had sent through his proposal and is working to progress with Land Eng.</p> <p>DW advised that the drawing had been issues to Mercury and Land Eng for pricing. LJ agreed to pursue the costing info.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 29/06/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	
			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.	
			24/03/2016	GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblin to be finalised asap.	

A51679245

			07/04/2016 05/05/2016  18/06/2016	<p>HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.</p> <p>HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.</p> <p>GW noted that a saving had been provided as per PMI and NHS have then gone back to the contract. WSP have provided their design costs. GW suggested that the PMI be closed and reissued.</p>	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015       10/12/2015 14/01/2016 28/01/2016  11/02/2016 25/02/2016  10/03/2016	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote. GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room. GF noted that he would liaise with PM GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed. GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</p>	CE to be issued

5144	PMI 459 -	Office Block External Works	<p>21/12/2015</p> <p>The boulevard has been partially developed by BAM Construction through the OB &amp; TLF projects. Remainder of works to be carried out post completion of CP2 Extension</p> <p>Provide a quotation to include the following;</p> <p>1) Savings achieved from omitting the current Contract Sum allowance for the external works within the boulevard.</p> <p>2) Installing grasscrete fire access route between the East Campus access points and Langlands Drive</p> <p>3) Extension of Tobermore paving from OB to Langlands Drive</p> <p>4) Access path across grasscrete to CP2 staircore.</p> <p>5) Construction of grassed strips between office block and CMB/Carpark</p> <p>14/01/2016</p> <p>GA noted that LJ is awaiting costs from LE</p> <p>28/01/2016</p> <p>LJ advised that the quote had been uploaded earlier that day. Pack of info was provided to GF from GW.</p> <p>11/02/2016</p> <p>It was noted that the cost had been submitted and was with Currie &amp; Brown for review. GF agreed to chase this up.</p> <p>25/02/2016</p> <p>It was noted that the costs for this had been uploaded to Sypro on 28/01 for NHS review.</p> <p>10/03/2016</p> <p>GF advised that he would liaise with DR regarding the costs provided.</p> <p>24/03/2016</p> <p>GF advised that he would liaise with DWL regarding the way forward.</p> <p>05/05/2016</p> <p>GF advised that the works would be awarded soon and the NHS were in the process of finalising the internal budgets to allow the works to be awarded.</p> <p>02/06/2016</p> <p>It was noted that CE 177 had been issued. GA noted that the programme will hinge on MSCP3 works and consideration needs to be given to Laing O'Rourke access to there site set-up. HMc advised that the completion date for the MSCP3 is 14<sup>th</sup> July 2016. GA suggested that the works could be commenced 1<sup>st</sup> week August 2016.</p> <p>16/06/2016</p> <p>It was agreed this PMI could be closed.</p>	Cross reference CE 177
5340	PMI 463	VIE 2 Medical Gas Alterations	<p>10/02/2016</p> <p>Alterations to Medical Gas system to allow construction of the VIE 2 Slab Base</p> <p>Provide quotation to carry out alteration to medical gas network adjacent to the proposed VIE 2 Slab Base.</p> <p>Refer to Hulley Kirkwood Schematic Drawings and outline works sequence document.</p> <p>25/02/2016</p> <p>It was noted that the sequencing info is awaited.</p> <p>24/03/2016</p> <p>GA advised that the revised sequencing drawings had been received by BMCL and subsequently forwarded to Mercury to cost up.</p> <p>07/04/2016</p> <p>LJ advised that the quote received from Mercury had exclusions and another quote is being sought.</p> <p>21/04/2016</p> <p>LJ advised that the cost had been uploaded to Sypro for NHS review</p> <p>19/05/2016</p> <p>NHS to issue CE for this item</p> <p>02/06/2016</p> <p>It was noted that CE 178 had been issued. GA advised that he would pursue Mercury to progress this item and GA would provide a date for Air Products coming to site.</p> <p>16/06/2016</p> <p>It was agreed this PMI could be closed.</p>	Cross ref BMCL EW 150

5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016  21/04/2016  05/05/2016 19/05/2016 02/06/2016 16/06/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap. Gf advised that he understood a review of the costs were ongoing by RG and LJ <b>GF to check with RG that costs are acceptable and then provide CE.</b>	
5445	PMI 470	NCH Rehab department (REH049) - Vestibular Hook	07/03/2016  10/03/2016 24/03/2016 21/04/2016  05/05/2016  19/05/2016 02/06/2016 16/06/2016	The Board request that BMCL provide the cost for the supply and install of goalpost frame subject to completion of ongoing design. Cross reference PMI 443 for further details. The Board confirm that PMI 443 will now only relate to the design works associated with the goal post frame. GA noted that WSP are progressing the design. GA advised that BMCL are pursuing WSP for a design GA advised that the design has now been received and the costs are being identified. An instruction to get the steel fabricated has been drafted for issue. AC flooring costs are awaited. BMCL will provide a programme for the works so the NHS can have an understanding of how long the room will be out of use so can schedule the works. LJ noted that the cost would be uploaded by 09/05/2016. GA advised that the works would be 3-4 weeks once commenced. GA noted that the costs had been uploaded to Sypro for NHS review. It was noted that CE 180 had been issued. <b>It was agreed this PMI could be closed.</b>	Cross ref CE 180
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance.	Cross ref PMI 475

			<p>Exit door (beside room 76) to be sealed and only used as fire exit.</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p>	<p>BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB.</p> <p>GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month.</p> <p>GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options.</p> <p>GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016.</p> <p>GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell.</p> <p>GA advised that the air handling unit supplier for Mercury are working on an alternate solution as previous proposal does now not comply with new EU legislation.</p> <p>DW advised that BMCL are awaiting the costing from the AHU manufacturer and Mercury are chasing the cost info. Mercury propose to check with another supplier. DW noted that there was a query regarding warranty – if change the AHU then may lose the Barkel warranty however there was only a short warranty period now left. GW requested a CE for the design fees and then for the PMI to be closed.</p>	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016	<p>The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)</p>	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	<p>22/04/2016</p> <p>19/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p>	<p>The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows;</p> <p>1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high)</p> <p>2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point.</p> <p>It was noted that the costs are awaited</p> <p>GA advised that the costs had been uploaded to Sypro for review/agreement. GA noted that he had instructed the works as e knew that the NHS are keen to progress. GA advised that the actual materials are off the shelf however install would depend on getting a slot with the powder coaters.</p> <p>GW noted that the cost had been uploaded and requested the CE for the works.</p>	

5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016      19/05/2016 02/06/2016  16/06/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. It was noted that the works are ongoing GA advised that the works were substantially complete. GF noted that he would be reviewing the lock/latch covers with PMcG later that day. <b>It was noted that the CE for this item had been issued and subsequently accepted therefore this item could be closed.</b>	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016   05/05/2016 19/05/2016 02/06/2016  16/06/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed. GF confirmed that the larger screws should be used to fix the IPS Panels. GA noted that the costs have been uploaded to Sypro for NHS review GF acknowledged receiving the costs and advised that he would need to discuss the costs with DLoudon as DL was of the view that this matter is a defect. GW requested a CE for the works.	
5951	PMI 480	Alterations to QEUH Acute Assessment Ward	24/06/2016	The Board requests that Brookfield provide a cost for alterations within the QEUH Acute Assessment Ward as detailed on the attached sketch.	
5952	PMI 481 -	Uplift Existing Floor Screed within the Existing Entrance Area	15/06/2016	In accordance with Clause 61.1 proceed with the uplift of the existing screed within the Entrance Area of the Neurosurgery Building. Refer to attached marked up sketch for locations

**Other items that require discussion:**

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016) G noted that meetings are ongoing and that there is a meeting scheduled to take place on 8<sup>th</sup> June 2016. (02/06/2016) **DW suggested that this note should be concluded the following week – action is currently on DBratney. (16/06/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016) Over 800 remedials done as of Monday. GA requested that the NHS provide a PMI for the placement of the instruction stickers at the visicom units and GF agreed to provide. (30/05/2016) **It was agreed this item could be closed subject to the issue of the PMI for the placement of the stickers. The stickers were being fixed as the blinds are repaired. (16/06/2016)**

- Labs Block – solar shading fin – GF noted that a solar shading fin had been shattered during previous replacement and enquired when BMCL proposed to replace the fin. GA advised that he was not aware of this defect. (02/06/2016)
- Car park 4 – completion date 24<sup>th</sup> June – it was noted that PMcG had advised that BW/Planning permission has not been granted and this needs to be confirmed to the NHS asap so that an internal decision can be taken. (16/06/2016)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 2196

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 11/07/2016

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however	

			18/052016 02/06/2016  16/06/2016  30/06/2016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting <b>date for completion of the drawings</b> . GA advised that DW is chasing up Mercury GA advised that BMCL had employed an intern to progress the mark ups of the drawings in order not to delay the warrant application further. DW advised that the Intern was progressing the mark-up of the drawings. Levels 0 and 1 were being marked up and issued to Building Control along with the test certification. It would take a long time to do all the floors. FS advised that the mark up of the drawings had been completed and the application was wip.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they	

			<p>will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant</p>	
--	--	--	--	--

			12/11/2015	to be applied for. GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16 <sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient & therapies building would be demolished at handover to BMCL.	
			26/11/2015	GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	

			<p>11/02/2016 25/02/2015 10/03/2016</p> <p>24/03/2016</p> <p>21/04/2016 05/05/2016 18/05/2016</p> <p>16/06/2016</p>	<p>It was noted that a revised programme has been issued which updates on the works LJ advised that the costs should be with the NHS in the next few weeks.</p> <p>LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]</p> <p>GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.</p> <p>LJ advised that awaiting final account discussion with GW so can build up the other costs.</p> <p>LJ advised that GW is working on the costs for discussion with C&amp;B.</p> <p>GA noted that LJ was awaiting information from GWallace and suggested that the costs would be issued by cop 20/05/2016</p> <p>GW noted that BMCL are pulling together all the phase 3A delays. GA advised DR has stated that the INS delays should be left to the end so the actual finish date is known. GA suggested that some of the items should be closed out and combined into 1 single EW.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p>	<p>Item to remain on tracker until demolition works complete.</p>

			14/01/2016 28/01/2016  11/02/2016	GA noted that BMCL had completed their investigative works and surveys. GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . <b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016 21/04/2016 05/05/2016 02/06/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible. GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc. GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14 <sup>th</sup> April 2016. GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services. GF advised that AD is pursuing the removal of the fire damper panel. GA advised the a revised programme had been issued via Sypro and emailed out earlier that day. GW will look at the costs for delays and will liaise with DR. GF confirmed that the fire alarm panel works had been	

			30/06/2016	completed. GA advised that the water pipe which serves the radiator panel located behind the fixed seating is still live and requires to be isolated. GF agreed to progress. FS advised that BMCL require acceptance of the submitted programme as per NEC3 contractual arrangements.	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016 02/06/2016  30/06/2016	Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road. GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings GA requested that the NHS provide a PMI for changing the drawing(s). GA noted that PMcG had sent on the details to WS. BMCL would provide the cost for the redesign work. The cost information would be uploaded to PMI 449. LJ advised that BMCL were awaiting a new PMI as it was not possible for BMCL to revert back to the contract drawings because of the new CP. The road layout would need to be reviewed/designed by WSP. FS tabled a drawing and raised queries. It was agreed that the group would carry out a walk round of the blue light route at the end of the meeting. New PMI to be provided to BMCL on basis of discussions of walkround.	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016  02/06/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured. It was noted that GW and DR will review	
29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016  19/05/2016 02/06/2016  16/06/2016  30/06/2016	We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs. GA advised that it was hoped to slot in those missed wards into the gap in the programme GA advised that it was still the intention to slot in those missed zones into the gap. GF advised that he had discussed this with Jamie Munro and that once the programme for the works has been received GF would liaise with the Users. GF advised that he had discussed with JMunro and a way forward had been agreed. GF would liaise with SWalker and seek approval for the proposed decants. It was agreed that this item could be closed.	
30164	BMCL – EWN - 178	Uncharted underground services within Phase 3A works	31/05/2016  02/06/2016	Land Engineering have discovered 3 No. potentially live, uncharted, electrical cables within the Central Park area whilst carrying out CAT scans prior to excavating the SUDS pond. The NHS were notified of these on 10th April and it was confirmed to them on 11th May that these were within either the SUDS pond excavation or the Orchard area and therefore need to be diverted/isolated. (The NHS and Burgoyne have both been out to see the cables but no other action has yet taken place).  These services are now having an impact on progress on site. It was noted that the NHS Estates Dept are trying to eliminate all possibilities prior to any switch off of the HV which was a last resort. It was suspected that any switch off would not be until the following week and would only be carried out after 5pm. GA advised that there was still concern that the process may not confirm if it is the same cable.	

			18/06/2016	GF advised that the cable would be spiked on 23/06/2016. HM advised that the cable had been tracked back to the sub-station and was found to be severed and that the readings being obtained are from induction. HMc would provide confirmation of the cable being dead to BMCL on 23/06/2016.	
			30/06/2016	It was agreed that this item could be closed. The cable had been spiked and confirmed as dead.	
30393	BMCL – EWN - 179	EWN- Existing screed to INS entrance, levels for floor finishes	15/06/2016 18/06/2016	Existing screed within INS requires to be removed, this has been excluded within the cost plan for the INS and should be instructed. GF noted that the PMI had been provided – Cross reference PMI 481. GW advised that as the building was occupied that the cost had been based on approx levels.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/07/2016

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015  10/12/2015  14/01/2016  28/01/2016  11/02/2016	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p> <p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward</p>	

A51679245

			<p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p> <p>30/06/2016</p>	<p>to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p> <p>GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.</p> <p>GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.</p> <p>GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.</p> <p>GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air permeability tests will not be carried out on isolation rooms.</p> <p>GA noted that a further circa 150 visicom units had been remediated leaving circa 100 still to do. GA noted that BMCL had been unable to progress the works to be undertaken in Critical Care by Iain Thomson. GF agreed to liaise with Lynn Pritchard.</p> <p>FS advised that the remedial works were 95% complete with access to critical care being an issue. Infection control are asking for the rooms to be retested – subsequently discussed with Ian Powrie who confirmed that as not a refurb retesting would not be requested. It was noted that a visual inspection of the works could be viewed once completed. GF agreed to liaise with LPritchard. GW advised that the Administrator has requested proof that this is a defect and suggested that it would be beneficial not to repair one so that a rep can be brought to site to review. GF advised that he would email GW to state that this is a fully operational hospital and the product is defective.</p> <p><b>FS advised that the remedial works were wip. To date the works to the High Line blinds were 90% complete and the Visicoms were 95% complete.</b></p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be</p>	

			28/01/2016	accurate as an Ipad lux level app had been utilised.
			11/02/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.
			25/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).
			10/03/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.
			24/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.
			07/04/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.
			21/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.
			05/05/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.
			19/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.
			02/06/2016	GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.
			16/06/2016	GA advised that Paul had sent through his proposal and is working to progress with Land Eng.
			30/06/2016	DW advised that the drawing had been issues to Mercury and Land Eng for pricing. LJ agreed to pursue the costing info.
				GF advised that he had drawings and would pass onto FM and Estates colleagues for info.

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 30/06/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblines could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	
			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblines at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.	
			24/03/2016	GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblines to be finalised asap.	

A51679245

			07/04/2016	HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.	
			05/05/2016	HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.	
			18/06/2016	GW noted that a saving had been provided as per PMI and NHS have then gone back to the contract. WSP have provided their design costs. GW suggested that the PMI be closed and reissued.	
			30/06/2016	It was agreed that this item could be closed.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).	CE to be issued
				Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.	
			10/12/2015	Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.	
			14/01/2016	It was noted that this info is with Workspace Design for them to provide a quote.	
			28/01/2016	GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.	
			11/02/2016	GF noted that he would liaise with PM	
			25/02/2016	GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.	
			10/03/2016	GA advised that the mirror film was to be fitted 14 <sup>th</sup> March 2016.	

5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016 25/02/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016 05/05/2016 19/05/2016 02/06/2016 16/06/2016 30/06/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap. Gf advised that he understood a review of the costs were ongoing by RG and LJ GF to check with RG that costs are acceptable and then provide CE. <b>GF agreed to progress the issue of the CE</b>	Cross ref CE 182
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month. GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options. GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on	Cross ref PMI 475  Cross ref CE 173

			05/05/2016 02/06/2016 16/06/2016	22/04/2016. GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell. GA advised that the air handling unit supplier for Mercury are working on an alternate solution as previous proposal does now not comply with new EU legislation. DW advised that BMCL are awaiting the costing from the AHU manufacturer and Mercury are chasing the cost info. Mercury propose to check with another supplier. DW noted that there was a query regarding warranty – if change the AHU then may lose the Barkel warranty however there was only a short warranty period now left. GW requested a CE for the design fees and then for the PMI to be closed.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016 30/06/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL) LJ advised that the costs had been updated to include the Barkel costs which had previously been omitted from the quote due to the costs being awaited.	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	22/04/2016 19/05/2016 02/06/2016 16/06/2016 30/06/2016	The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows; 1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high) 2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point. It was noted that the costs are awaited GA advised that the costs had been uploaded to Sypro for review/agreement. GA noted that he had instructed the works as e knew that the NHS are keen to progress. GA advised that the actual materials are off the shelf however install would depend on getting a slot with the powder coaters. GW noted that the cost had been uploaded and requested the CE for the works. GF agreed to progress the issue of the CE	Cross ref CE 181
5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016 19/05/2016 02/06/2016 16/06/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No. mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. It was noted that the works are ongoing GA advised that the works were substantially complete. GF noted that he would be reviewing the lock/latch covers with PMcG later that day. It was noted that the CE for this item had been issued and subsequently accepted therefore this item could be closed.	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be	Cross ref CE 183

			05/05/2016 19/05/2016 02/06/2016  16/06/2016 30/06/2016	securely fixed. GF confirmed that the larger screws should be used to fix the IPS Panels. GA noted that the costs have been uploaded to Sypro for NHS review GF acknowledged receiving the costs and advised that he would need to discuss the costs with DLoudon as DL was of the view that this matter is a defect. GW requested a CE for the works. GF agreed to progress the issue of the CE	
5951	PMI 480	Alterations to QEUH Acute Assessment Ward	24/06/2016	The Board requests that Brookfield provide a cost for alterations within the QEUH Acute Assessment Ward as detailed on the attached sketch.	
5952	PMI 481 -	Uplift Existing Floor Screed within the Existing Entrance Area	15/06/2016  30/06/2016	In accordance with Clause 61.1 proceed with the uplift of the existing screed within the Entrance Area of the Neurosurgery Building. Refer to attached marked up sketch for locations It was noted that this matter was with BMCL to progress	
6001	PMI 482 -	High-level blinds - Instruction stickers	06/07/2016	The Board request that BMCL provide a cost for the supply and installation of instruction stickers for the high level blinds as discussed at the Early Warning meetings.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
21182	CE 181 -	Ground Level Childrens Play Park Fence	06/07/2016	The Board confirm the Brookfield should progress with the installation of the ground level Childrens play park fence. Cross reference PMI 477  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016
21183	CE 182 -	Neurosurgery Overcladding Curtain Rail Modifications	06/07/2016	Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows as discussed at the Early Warning meetings.  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016
21184	CE 183 -	QEUH - IPS Remedial works	06/07/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed.  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016

-

## Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept ( 27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP –IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016) G noted that meetings are ongoing and that there is a meeting scheduled to take place on 8<sup>th</sup> June 2016. (02/06/2016)  
**DW suggested that this note should be concluded the following week – action is currently on DBratney. (16/06/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016) Over 800 remedials done as of Monday. GA requested that the NHS provide a PMI for the placement of the instruction stickers at the visicom units and GF agreed to provide. (30/05/2016) **It was agreed this item could be closed subject to the issue of the PMI for the placement of the stickers. The stickers were being fixed as the blinds are repaired. (16/06/2016)**
- Labs Block – solar shading fin – GF noted that a solar shading fin had been shattered during previous replacement and enquired when BMCL proposed to replace the fin. GA advised that he was not aware of this defect. (02/06/2016) **HMc agreed to liaise with CPurdon regarding back ground to this (30/06/2016)**
- Car park 4 – completion date 24<sup>th</sup> June – it was noted that PMcG had advised that BW/Planning permission has not been granted and this needs to be confirmed to the NHS asap so that an internal decision can be taken. (16/06/2016) **FS noted that there was 11 conditions of which 8 had been discharged. The 3 remaining conditions related to a) emissions survey which Land Eng are working on, b) contaminated land certification which the Contamination Land Officer had signed off and c) Landscaping completion and Land Eng would confirm these dates on the basis of the planting season. In relation to the Building Warrant – BMCL had been unable to contact the Building Control officer**

therefore were unable to obtain the completion certificate. FS advised that GBurnett and PMcGuinness would progress these matters whilst FS was on annual leave (30/06/2016)

- Noise due to drilling – GF noted that there had been a complaint received regarding the drilling for the dowels for the first floor slab. GF enquired if there was potential to carry out this work over a weekend or in the evening noting however that the NHS did not want any impact to the programme. FS agreed to review and confirm back. (30/06/2016)
- VIE works programe – GF noted that DBratney is seeking an update as to when the alterations will be carried out. FS advised that BMCL were now in receipt of the final piling design and would provide info asap. (30/06/2016)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 2214

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 10/08/2016

The following Early Warnings have been submitted to the PMO Board and are awaiting close out as per 2019						Brookfield MULTIPLEX	BM
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status		
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications: PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant) PMI 338 – full fit out PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB) PMI 343 – fit out PMI 347 – Change of materials PMI 352 – additional electrical sockets PMI 357 – additional water supplies PMI 360 – additional power, water and drainage connections  Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.  Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.			
			26/03/2015	GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data & power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.			
			02/04/2015	GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.			
			23/4/2015	FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings			
			30/04/2015	GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.			
			07/05/2015	GB noted that collation of the Building Warrants is WIP			
			14/05/2015	GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury			
A51679245							

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however	

			18/052016 02/06/2016  16/06/2016  30/06/2016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting <b>date for completion of the drawings</b> . GA advised that DW is chasing up Mercury GA advised that BMCL had employed an intern to progress the mark ups of the drawings in order not to delay the warrant application further. DW advised that the Intern was progressing the mark-up of the drawings. Levels 0 and 1 were being marked up and issued to Building Control along with the test certification. It would take a long time to do all the floors. FS advised that the mark up of the drawings had been completed and the application was wip.	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme  *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015   24/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the demolitions will be carried out in the same manner as the T&L. HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they	

			<p>will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p> <p>01/10/2015 GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p> <p>08/10/2015 GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p> <p>22/10/2015 PM noted that BMCL were to redraw the programme however the general thought is that everything will still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant</p>	
--	--	--	--	--

			12/11/2015	to be applied for. GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16 <sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient & therapies building would be demolished at handover to BMCL.	
			26/11/2015	GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings	
			10/12/2015	GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19 <sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19 <sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.	
			14/01/2016	GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.	
			28/01/2016	GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos	

			<p>11/02/2016 25/02/2015 10/03/2016</p> <p>24/03/2016</p> <p>21/04/2016 05/05/2016 18/05/2016</p> <p>16/06/2016</p>	<p>It was noted that a revised programme has been issued which updates on the works LJ advised that the costs should be with the NHS in the next few weeks.</p> <p>LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]</p> <p>GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.</p> <p>LJ advised that awaiting final account discussion with GW so can build up the other costs.</p> <p>LJ advised that GW is working on the costs for discussion with C&amp;B.</p> <p>GA noted that LJ was awaiting information from GWallace and suggested that the costs would be issued by cop 20/05/2016</p> <p>GW noted that BMCL are pulling together all the phase 3A delays. GA advised DR has stated that the INS delays should be left to the end so the actual finish date is known. GA suggested that some of the items should be closed out and combined into 1 single EW.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG) SITU (DC) A&amp;E (AK) ORTHOPAEDIC (DH) THERAPY CENTRE (AL) DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed over by Friday 4th December 2015.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why B&lt;CL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW.</p>	<p>Item to remain on tracker until demolition works complete.</p>

			14/01/2016 28/01/2016  11/02/2016	GA noted that BMCL had completed their investigative works and surveys. GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016 28/01/2016 11/02/2016 25/02/2016	Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence. HMc noted that the asbestos works had been scheduled to take place on 26/01/2016. GF noted that the asbestos had been removed the previous day. It was noted that the delays are approx 2 weeks . <b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016 21/04/2016 05/05/2016 02/06/2016	Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services. GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance. It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016. It was noted that the strip out is to be progressed. GF advised that asbestos removal works are ongoing GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible. GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc. GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are progressing works that can be. Asbestos removals planned to take place from 14 <sup>th</sup> April 2016. GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services. GF advised that AD is pursuing the removal of the fire damper panel. GA advised the a revised programme had been issued via Sypro and emailed out earlier that day. GW will look at the costs for delays and will liaise with DR. GF confirmed that the fire alarm panel works had been	

			30/06/2016	completed. GA advised that the water pipe which serves the radiator panel located behind the fixed seating is still live and requires to be isolated. GF agreed to progress. FS advised that BMCL require acceptance of the submitted programme as per NEC3 contractual arrangements.	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016 02/06/2016  30/06/2016	Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road. GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings GA requested that the NHS provide a PMI for changing the drawing(s). GA noted that PMcG had sent on the details to WS. BMCL would provide the cost for the redesign work. The cost information would be uploaded to PMI 449. LJ advised that BMCL were awaiting a new PMI as it was not possible for BMCL to revert back to the contract drawings because of the new CP. The road layout would need to be reviewed/designed by WSP. FS tabled a drawing and raised queries. It was agreed that the group would carry out a walk round of the blue light route at the end of the meeting. New PMI to be provided to BMCL on basis of discussions of walkround.	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016   02/06/2016	Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured. It was noted that GW and DR will review	
29876	BMCL-EWN-177	INS Over cladding - internal works	10/05/2016  19/05/2016 02/06/2016  16/06/2016  30/06/2016	We have been unable to achieve the internal fit out portion of the over cladding programme due to the NHS being unable to meet the decant programme. This will potentially have an impact on programme duration and costs. GA advised that it was hoped to slot in those missed wards into the gap in the programme GA advised that it was still the intention to slot in those missed zones into the gap. GF advised that he had discussed this with Jamie Munro and that once the programme for the works has been received GF would liaise with the Users. GF advised that he had discussed with JMunro and a way forward had been agreed. GF would liaise with SWalker and seek approval for the proposed decants. It was agreed that this item could be closed.	
30164	BMCL – EWN - 178	Uncharted underground services within Phase 3A works	31/05/2016   02/06/2016	Land Engineering have discovered 3 No. potentially live, uncharted, electrical cables within the Central Park area whilst carrying out CAT scans prior to excavating the SUDS pond. The NHS were notified of these on 10th April and it was confirmed to them on 11th May that these were within either the SUDS pond excavation or the Orchard area and therefore need to be diverted/isolated. (The NHS and Burgoyne have both been out to see the cables but no other action has yet taken place).  These services are now having an impact on progress on site. It was noted that the NHS Estates Dept are trying to eliminate all possibilities prior to any switch off of the HV which was a last resort. It was suspected that any switch off would not be until the following week and would only be carried out after 5pm. GA advised that there was still concern that the process may not confirm if it is the same cable.	

			18/06/2016	GF advised that the cable would be spiked on 23/06/2016. HM advised that the cable had been tracked back to the sub-station and was found to be severed and that the readings being obtained are from induction. HMc would provide confirmation of the cable being dead to BMCL on 23/06/2016.	
			30/06/2016	It was agreed that this item could be closed. The cable had been spiked and confirmed as dead.	
30393	BMCL – EWN - 179	EWN- Existing screed to INS entrance, levels for floor finishes	15/06/2016 18/06/2016	Existing screed within INS requires to be removed, this has been excluded within the cost plan for the INS and should be instructed. GF noted that the PMI had been provided – Cross reference PMI 481. GW advised that as the building was occupied that the cost had been based on approx levels.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 10/08/2016

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015  10/12/2015  14/01/2016  28/01/2016  11/02/2016	<p>Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.</p> <p>Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution.</p> <p>GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.</p> <p>GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.</p> <p>GA advised that WIP to level 8.</p> <p>Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.</p> <p>GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward</p>	

A51679245

			<p>25/02/2016</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>07/04/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p> <p>30/06/2016</p>	<p>to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.</p> <p>GA noted that the encapsulated door sample was to be offered to the NHS for review.</p> <p>GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.</p> <p>GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.</p> <p>GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised</p> <p>GA advised that good progress was being achieved with remedial works having been carried out to 650 units. BMCL are working to the agree HAI Scribe for the high risks areas.</p> <p>GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.</p> <p>GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.</p> <p>GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air permeability tests will not be carried out on isolation rooms.</p> <p>GA noted that a further circa 150 visicom units had been remediated leaving circa 100 still to do. GA noted that BMCL had been unable to progress the works to be undertaken in Critical Care by Iain Thomson. GF agreed to liaise with Lynn Pritchard.</p> <p>FS advised that the remedial works were 95% complete with access to critical care being an issue. Infection control are asking for the rooms to be retested – subsequently discussed with Ian Powrie who confirmed that as not a refurb retesting would not be requested. It was noted that a visual inspection of the works could be viewed once completed. GF agreed to liaise with LPritchard. GW advised that the Administrator has requested proof that this is a defect and suggested that it would be beneficial not to repair one so that a rep can be brought to site to review. GF advised that he would email GW to state that this is a fully operational hospital and the product is defective.</p> <p>FS advised that the remedial works were wip. To date the works to the High Line blinds were 90% complete and the Visicoms were 95% complete.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be</p>	

			28/01/2016	accurate as an Ipad lux level app had been utilised.
			11/02/2016	GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat & NCH). BMCL will be installing temp lights at their hoarding.
			25/02/2016	GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).
			10/03/2016	GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.
			24/03/2016	GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.
			07/04/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.
			21/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.
			05/05/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.
			19/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.
			02/06/2016	GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.
			16/06/2016	GA advised that Paul had sent through his proposal and is working to progress with Land Eng.
			30/06/2016	DW advised that the drawing had been issues to Mercury and Land Eng for pricing. LJ agreed to pursue the costing info.
				GF advised that he had drawings and would pass onto FM and Estates colleagues for info.

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 10/08/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
4830	PMI 449 -	Amendment to Stage 3A works due to MSCP3	27/10/2015	The revised layout of MSCP3 does not require the full length of access road, footpath or same number of lighting columns currently in the Stage 3A works. Please provide cost saving calculation for the removal of the works shown highlighted in blue on the attached extract of drawing WSP-EW-PL-716-04-Rev F .	
			12/11/2015	The attachment is the area to be removed shown marked in blue. GA noted that PMcG has issued an RFI regarding the road surfacing works. PM noted that a previous CE had been issued to BMCL for the section of the road at the front of the existing Management Building. PM agreed to look out the CE.	
			26/11/2015	GA advised that there had been various PMIs issued throughout the life of the project and that the Masterplan had changed and the NHS were responsible for the Masterplan. It was agreed that a meeting should be organised to go over the PMIs/roads works.	
			10/12/2015	PM noted that there had been a meeting on 8/12 to discuss. PMcG has provided drawings which have subsequently been provided to Hypostyle so they can drop the information on to it.	
			14/01/2016	GA advised that PMcGuinness has compiled a drawing of the various PMIs and that a meeting with the NHS to discuss was to be scheduled. The drawing will be provided to the NHS for review and sign-off	
			28/01/2016	GA advised that there had been a couple of meetings to discuss the way forward. Land Eng are currently setting out kerbing however this is based upon the WSP drawing and not the new masterplan drawing. It would be beneficial if BMCL could get Dunne setting out info. It was suggested that BMCL could free issue the light columns to Dunne for them to connect. LJ noted that GW had suggested that the lights could be used at Maternity.	
			11/02/2016	GF noted that the design is to be prepared and Dunne will be provided with the lights as free issue. Dropped manhole.	
			25/02/2016	GA advised that the design for the curbed line to be agreed. NHS to confirm if WSP of Dunne to do design. HMC suggested that the existing kerblin could be used. GA suggested that all the changes needed to be collated onto 1 drawing as this would prevent potential difficulties at a later date. HMc agreed to progress.	
			10/03/2016	HMc advised that he has sent an invite to PMcG to meet to review the drawing and rationalise. It was proposed to tie into the existing kerblin at the front of the MSCP. It was proposed that a combined drain could be changed to a slot drain. Once the drawing has been marked up then he would provide to PMcG for issue to WSP. GA advised that BMCL would need a PMI to ask WSP to review the mark-up and produce a final drawing.	
			24/03/2016	GF advised that HMc would be progressing this on 29/03/2016. GF advised that BMCL require the kerblin to be finalised asap.	

A51679245

			07/04/2016	HMc advised that he would prioritise the drawing mark-up with PMcG once HMc returns back from leave.	
			05/05/2016	HMc advised that it was proposed that the kerblines should be kept as existing, the central island to be removed and painted on and a slot drain to be installed. HMc would mark up a drawing and provide to BMCL for provision to WSP for preparing plan and BMCL costing – HMc suggested that it may be cost neutral. GA enquired about the roadworks being done by GCC and if there is any impact on the BMCL works. GF agreed to provide a copy of the drawing from GCC and provided an overview of the proposed works. GA advised he would liaise with GB to check if BMCL would need to go back to Planning.	
			18/06/2016	GW noted that a saving had been provided as per PMI and NHS have then gone back to the contract. WSP have provided their design costs. GW suggested that the PMI be closed and reissued.	
			30/06/2016	It was agreed that this item could be closed.	
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).	CE to be issued
				Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.	
			10/12/2015	Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013.	
			14/01/2016	It was noted that this info is with Workspace Design for them to provide a quote.	
			28/01/2016	GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1 room.	
			11/02/2016	GF noted that he would liaise with PM	
			25/02/2016	GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed.	
			10/03/2016	GA advised that the mirror film was to be fitted 14 <sup>th</sup> March 2016.	

5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016 25/02/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016 05/05/2016 19/05/2016 02/06/2016 16/06/2016 30/06/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap. Gf advised that he understood a review of the costs were ongoing by RG and LJ GF to check with RG that costs are acceptable and then provide CE. <b>GF agreed to progress the issue of the CE</b>	Cross ref CE 182
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016 10/03/2016 24/03/2016 07/04/2016 21/04/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month. GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options. GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on	Cross ref PMI 475  Cross ref CE 173

			05/05/2016 02/06/2016 16/06/2016	22/04/2016. GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell. GA advised that the air handling unit supplier for Mercury are working on an alternate solution as previous proposal does now not comply with new EU legislation. DW advised that BMCL are awaiting the costing from the AHU manufacturer and Mercury are chasing the cost info. Mercury propose to check with another supplier. DW noted that there was a query regarding warranty – if change the AHU then may lose the Barkel warranty however there was only a short warranty period now left. GW requested a CE for the design fees and then for the PMI to be closed.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016 30/06/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL) LJ advised that the costs had been updated to include the Barkel costs which had previously been omitted from the quote due to the costs being awaited.	
5645	PMI 477 -	Ground Level Childrens Play Park Fence	22/04/2016 19/05/2016 02/06/2016 16/06/2016 30/06/2016	The Board requests the provision of a quotation for the installation of fencing within the ground level childrens play park as follows; 1) Form double gate at east end of fire track and extend fence to NW corner of Neonatal unit, include provision of pedestrian fire exit gate with push pad exit. (All 1.8m high) 2) Install pedestrian fence (looped top or similar) from CP1 to Neonatal unit as per route designated on the marked up sketch drawing. Make allowance for double gate on fire track and single gate at the main access point. It was noted that the costs are awaited GA advised that the costs had been uploaded to Sypro for review/agreement. GA noted that he had instructed the works as e knew that the NHS are keen to progress. GA advised that the actual materials are off the shelf however install would depend on getting a slot with the powder coaters. GW noted that the cost had been uploaded and requested the CE for the works. GF agreed to progress the issue of the CE	Cross ref CE 181
5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016 19/05/2016 02/06/2016 16/06/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No. mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June. It was noted that the works are ongoing GA advised that the works were substantially complete. GF noted that he would be reviewing the lock/latch covers with PMcG later that day. It was noted that the CE for this item had been issued and subsequently accepted therefore this item could be closed.	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be	Cross ref CE 183

			05/05/2016 19/05/2016 02/06/2016  16/06/2016 30/06/2016	securely fixed. GF confirmed that the larger screws should be used to fix the IPS Panels. GA noted that the costs have been uploaded to Sypro for NHS review GF acknowledged receiving the costs and advised that he would need to discuss the costs with DLoudon as DL was of the view that this matter is a defect. GW requested a CE for the works. GF agreed to progress the issue of the CE	
5951	PMI 480	Alterations to QEUH Acute Assessment Ward	24/06/2016	The Board requests that Brookfield provide a cost for alterations within the QEUH Acute Assessment Ward as detailed on the attached sketch.	
5952	PMI 481 -	Uplift Existing Floor Screed within the Existing Entrance Area	15/06/2016  30/06/2016	In accordance with Clause 61.1 proceed with the uplift of the existing screed within the Entrance Area of the Neurosurgery Building. Refer to attached marked up sketch for locations It was noted that this matter was with BMCL to progress	
6001	PMI 482 -	High-level blinds - Instruction stickers	06/07/2016	The Board request that BMCL provide a cost for the supply and installation of instruction stickers for the high level blinds as discussed at the Early Warning meetings.	
6111	PMI 483	Neurosurgery Overcladding - External Lights	27/07/2016	Supply only 4No Bulkhead light fittings to fire exits and FM entrance of the Neurosurgery Building. These will match those installed on main NSGH project. Installation costs already included within the Target Cost.	

## COMPENSATION EVENTS

Sypro ID	NHS Ref No	Item	Date Raised/ discussed	Actions	Date Closed Out/Status
21182	CE 181 -	Ground Level Childrens Play Park Fence	06/07/2016	The Board confirm the Brookfield should progress with the installation of the ground level Childrens play park fence. Cross reference PMI 477  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016
21183	CE 182 -	Neurosurgery Overcladding Curtain Rail Modifications	06/07/2016	Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows as discussed at the Early Warning meetings.  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016
21184	CE 183 -	QEUH - IPS Remedial works	06/07/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed.  Cost agreed as [REDACTED] inclusive of OH&P but exclusive of VAT	11/07/2016

21714	CE 184	Alterations to QEUH Acute Assessment Ward	10/08/2016	The Board confirm acceptance of the design fees identified for PMI 480 - Alterations to QEUH Acute Assessment Ward and request BMCL to provide a cost and programme for the alterations as detailed on the sketch.	
				Agreed cost [REDACTED] inc of OH&P but ex VAT (Design Fees only)	

#### Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter (30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP – IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016) G noted that meetings are ongoing and that there is a meeting scheduled to take place on 8<sup>th</sup> June 2016. (02/06/2016) **DW suggested that this note should be concluded the following week – action is currently on DBratney. (16/06/2016)**
- Highline blinds – it was noted that there had been 80 failures from 1700 blinds and BMCL were considering that they will carry out remedial works to all the highline blinds (observation windows) rather than leave and become a latent defect. BMCL would want to carry out these works at the same time as carrying out the door remedial works. GW advised that he proposed to discuss with DR how to progress this as the cost to carry out the highline blind repairs will be in excess of the retention BMCL hold. PM advised that BMCL should discuss with DR and GF should raise with DL. GW advised that he would be happy to discuss the issue with DL and Alan Douglas. (25/02/2016) GA advised that JS is liaising with IPowrie re HAI. BMCL propose to carry out the works at the same time as doing the visicom remedials (10/03/2016) GF advised that the BMCL are continuing to work through the building in conjunction with carrying out the visicom remedials – circa 140 blinds have had remedial works carried out. (24/03/2016) . GA advised that circa 220 have been repaired. (07/04/2016) GA advised that circa 350-400 have now been changed over. These works will slow down as the operatives move across to carry out works to the NHS Roof Garden. (21/04/2016) GA advised that the works had been stopped as the operatives had moved onto work on the roof garden (05/05/2016) Over 800 remedials done as of Monday. GA requested that the NHS provide a PMI for the placement of the instruction stickers at the visicom units and GF agreed to provide. (30/05/2016) **It was agreed this item could be closed subject to the issue of the PMI for the placement of the stickers. The stickers were being fixed as the blinds are repaired. (16/06/2016)**

- Labs Block – solar shading fin – GF noted that a solar shading fin had been shattered during previous replacement and enquired when BMCL proposed to replace the fin. GA advised that he was not aware of this defect. (02/06/2016) HMc agreed to liaise with CPurdon regarding back ground to this (30/06/2016)
- Car park 4 – completion date 24<sup>th</sup> June – it was noted that PMcG had advised that BW/Planning permission has not been granted and this needs to be confirmed to the NHS asap so that an internal decision can be taken. (16/06/2016) FS noted that there was 11 conditions of which 8 had been discharged. The 3 remaining conditions related to a) emissions survey which Land Eng are working on, b) contaminated land certification which the Contamination Land Officer had signed off and c) Landscaping completion and Land Eng would confirm these dates on the basis of the planting season. In relation to the Building Warrant – BMCL had been unable to contact the Building Control officer therefore were unable to obtain the completion certificate. FS advised that GBurnett and PMcGuinness would progress these matters whilst FS was on annual leave (30/06/2016)
- Noise due to drilling – GF noted that there had been a complaint received regarding the drilling for the dowels for the first floor slab. GF enquired if there was potential to carry out this work over a weekend or in the evening noting however that the NHS did not want any impact to the programme. FS agreed to review and confirm back. (30/06/2016)
- VIE works programe – GF noted that DBratney is seeking an update as to when the alterations will be carried out. FS advised that BMCL were now in receipt of the final piling design and would provide info asap. (30/06/2016)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as 11/08/2016

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
24576	BMCE-EWN-000154	Retrospective Building Warrants for PMI's	25/03/2015	<p>Brookfield have been advised by building control that the following PMI's will be subject to Building Warrant applications:</p> <ul style="list-style-type: none"> <li>PMI 328 – (only for the electrical works – the data is low voltage and does not require a warrant)</li> <li>PMI 338 – full fit out</li> <li>PMI 340 – small power, power to water heater, lighting (warrant not required for one WHB)</li> <li>PMI 343 – fit out</li> <li>PMI 347 – Change of materials</li> <li>PMI 352 – additional electrical sockets</li> <li>PMI 357 – additional water supplies</li> <li>PMI 360 – additional power, water and drainage connections</li> </ul> <p>Design fees were specifically excluded for the majority of the PMI's and no costs for building warrants have been included.</p> <p>Brookfield will need to instruct the design team to produce the information required to put together a retrospective catch all Building Warrant up to PMI 360. Brookfield will advise on an individual basis for PMI's after PMI 360.</p>	
			26/03/2015	<p>GB advised that he had identified the PMIs which required Building Warrants and he had discussed these with Building Control so that they are aware that warrant applications will be made in due course. GB was not sure that a single warrant application was the best approach as there is a risk that 1 item could delay all the warrant approvals. DH noted that the majority of applications will be retrospective warrant applications however there should be an opportunity to group items i.e. data &amp; power. GW advised that the design for the application was being obtained from WW. DH noted that he thought it had been agreed to use the Mercury as fitted drawings rather than getting the WW dwg updated.</p>	
			02/04/2015	<p>GB advised that he had good confirmation from GCC that they will accept Mercury as fitted drawings. There may be a couple that they can't accept and may need to get WW and/or Nightingale drawings. PM advised that if there are design costs involved that these be advised asap so that the NHS can get approval and the design process does not get delayed.</p>	
			23/4/2015	<p>FS advised that the information was being pulled together and BMCL were ensuring that any costs for the Mercury as fitted drawings</p>	
			30/04/2015	<p>GB advised that it would be towards the summer before the warrant applications are submitted. Pulling together a list of all the warrants is WIP. DH noted that some of the PMIs include for drawing update/design fees.</p>	
			07/05/2015	<p>GB noted that collation of the Building Warrants is WIP</p>	
			14/05/2015	<p>GB noted that he was pulling together all the building warrants together in circa 1 month. Awaiting Mercury</p>	

A51679245

			21/05/2015	providing final position and as fitted drawings. FS advised that BMCL will start to pull together the list suggesting that NHS changes will be minimal and should not impact on the BW application	
			28/05/2015	FS noted that GB will start working on the collation of the BW application – it was thought that there would not be many more data/power changes from the NHS.	
			04/06/2015	FS advised that GB is liaising with Mercury	
			11/06/2015	GB advised that this would be progressed once the works completed in the summer	
			25/06/2015	GB advised that BMCL are awaiting the Mercury updated drawings. FS suggested that a line should now be drawn in the sand re NHS changes and BW process start to be progressed.	
			30/07/2015	GB advised that GB and DW have been discussing. DW noted that it may be a couple of weeks to get the drawings, BMCL has some Mercury drawings but don't have Boston drawings. GB suggested that data drawings would not be needed. GW enquired how drawing updates were being dealt with as some PMIs had not been included in drawing updates. DW advised that the as-built drawings were being used. PM requested that once the amendment is submitted that BMCL collate and identify if there is any design drawing update cost attributed to the NHS.	
			05/08/2015	GB noted that it is WIP pulling the drawings together. Process agreed with Building Control.	
			13/08/2015	GB noted that he would have a better understanding of progress when DWilson returns from leave the following week.	
			27/08/2015	GB advised that Mercury are working through the small power drawings. GW enquired about the process for submitting the warrant application and GB advised that it was proposed to submit an amendment and he would confirm with Building Control that this was satisfactory.	
			17/09/2015	DW advised that the CAD'ing of the drawings relating to PMIs was nearing completion.	
			24/09/2015	GB noted that BMCL are awaiting some drawings and that Mercury are ongoing with the CAD'ing of drawings.	
			01/10/2015	GA advised that BMCL are awaiting on another couple of drawings from group management.	
			08/10/2015	GA advised that this item is WIP with the group management drawings expected within the next week or so.	
			22/10/2015	GB advised that DW is chasing up the final few drawings. Building warrant for mop wash is with Building Control to review and provide a retrospective warrant.	
			12/11/2015	DW suggested that BMCL would have the rd line drawings by w/e 20/11/2015.	
			26/11/2015	GA noted that DW is chasing up Mercury for updated drawings	
			10/12/2015	GA advised that the delay in getting the drawings had been due to the Mercury red line boundary drawing being lost and Mercury having to go round the site to mark-up a replacement.	
			14/01/2016	GA suggested that GB now has all the drawings and is in the process of packaging them up for issue.	
			28/01/2016	GA advised that GB is progressing this item. PM requested an indication of when this item would be closed out. GA agreed to liaise with GB	
			11/02/2016	It was noted that this continues to be WIP with GB packaging up the drawings for issue.	
			25/02/2016	GA advised that this remains as WIP. Building Control have requested that every single additional socket be highlighted. Mercury are progressing this.	
			10/03/2016	GA advised that Mercury are progressing the 'bubbling up' of the drawings showing the additional sockets for submission back to Building Control.	
			24/03/2016	WIP	
			21/04/2016	GA advised that he was awaiting feedback from GB who had just returned back from leave	
			05/05/2016	GA advised that he had chased up Mercury the previous week and would continue to pursue however	

			18/05/2016 02/06/2016  16/06/2016  30/06/2016 11/08/2016	noting that the drawing mark-up would not be their top priority as Mercury are dealing with other matters on site. GA advised that he would liaise with Kieron and request a date for the close out of the drawing mark-ups. GF to email GA requesting <b>date for completion of the drawings</b> . GA advised that DW is chasing up Mercury GA advised that BMCL had employed an intern to progress the mark ups of the drawings in order not to delay the warrant application further. DW advised that the Intern was progressing the mark-up of the drawings. Levels 0 and 1 were being marked up and issued to Building Control along with the test certification. It would take a long time to do all the floors. FS advised that the mark up of the drawings had been completed and the application was wip. <b>FS advised that all the drawings had been marked up however BMCL need Mercury to update the circuit charts and test information. FS suggested that should the NHS want to put the fire doors on to hold opens then this would require a further Building Warrant submission therefore it may be beneficial to hold off the current retrospective building warrant application until the fire door/hold opens had been agreed. FS advised that he would ask DW for an update regarding the submission. .</b>	
26764	BMCL-EWN-162	Delay in Contract work to INS extension	10/09/2015  01/10/2015 08/10/2015	Please accept this EWN as notification of the delay in contract works on the INS entrance Project. Piling works have overrun by 3 weeks due to unforeseen ground conditions at 4nr pile locations. We will use of best endeavours to minimise the impact this delay has on the original completion date. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works.	*****
26765	BMCL-EWN-163	Unforeseen Ground Conditions - Concrete Slab	10/09/2015 17/09/2015 01/10/2015 08/10/2015  28/01/2016	Delay to programme - This delay has been incurred due to unforeseen ground conditions: Concrete slab below tar level to be removed, this was not highlighted/ identified on site survey information. GA noted that this had cost Land Eng a 1 week delay to the programme. GA advised that a revised programme had been issued Noted that there is no further action for this item from programme or construction viewpoint. Item closed but to remain on tracker until the end of the works. PM advised that the NHS needed to have an indication of any commercial aspects. LJ advised that BMCL are in discussion with Central Demo regarding the claim for [REDACTED] for the removal of copper which they didn't get. GF to liaise with DR re assessment of potential costs. GA advised that BMCL were meeting with Central Demo the following day. It was BMCL intention to split the site in half and handover half to Land Eng so that the children's park element can be brought forward.	All delays to be reviewed at the end of the programme *****
26766	BMCL-EWN-164	Delay in Asbestos removal	10/09/2015  17/09/2015	Original programme dated 28/3/14 shows demolition starting on 17th August 205. Due to the NHS being delayed in removing the asbestos Brookfield Multiplex were not able to commence the demolition works. A revised programme has been attached. GA advised that BMCL are starting to receive information however the information is not in a structured format therefore going forward requested that the information is structured similar to a pre-construction information pack – survey, clearance certs, etc. HMc noted that the Shine system is used for Asbestos Management by NHS GG&C and the system complies with the HSE. HMc advised that he would request that the information is more structured and he would organize a meeting with Redhills to discuss. PM requested that the NHS provide BMCL with a complete pack. HMc advised that he had asked for RAMS, Isolation/connections requirements, etc and this information was awaited. GA advised that he had a pre-start meeting with Central Demo and that the information was starting to be received noting that the	

			24/09/2015	<p>demolitions will be carried out in the same manner as the T&amp;L.</p> <p>HM noted that he had provided a status update by email the previous day and that there are areas which BMCL could start in i.e. soft strip. GA provided an overview of the demolition plans i.e. start at day hospital and work towards the new hospitals. The demolition contractor will not be carrying out a soft strip as they will demolish and take off site for sorting and disposal as appropriate. BMCL are awaiting information for AI and AK. HMc noted that the information already provided relates to buildings which are sizeable and that BMCL could commence the works noting that AI is due at start of Oct and enquired if BMCL could work with the NHS. GA advised that BMCL have been working with the NHS and had rephrased and reprogrammed the works. BMCL will commence as soon as get clearance of the buildings noting a 2 week lead time is required for Central Demo. BMCL would start to put up the heras fencing so the buildings can be linked into the different programme phases. HMc noted that a cordon for AK could be provided. GA advised that a piecemeal approach prevents continuity, etc. GA enquired about the service isolations noting that it was agreed that BMCL would get a subscan document which showed where pipes had been capped/chopped. GA noted concern about power to the buildings. HMc advised that he would organise for an electrician to come in and test all the boards. HMc noted that the gas main had been capped, witnessed, photographed and certified. GA advised that BMCL need a subscan showing what has been disconnected, what is being retained. HMc agreed to provide a marked up drawing asap. HM noted that the water was originally to be disconnected but had now received a request to reconnect a number of hydrants. GA advised that BMCL can work without the hydrants as they had further reviewed the requirements. DH suggested that if BMCL get clearance of all the buildings with the exception of AK (programmed for 8<sup>th</sup> October) that the demolitions could at least start on the 8<sup>th</sup> October and GA agreed to review and confirm back.</p>	
			01/10/2015	<p>GA advised that Central Demolition have been arranged to start on site on 12<sup>th</sup> October. GA enquired if BMCL would be receiving the documentation for the remaining buildings in the stage 1 works. HM advised that he was expecting clearance of block AK on 5/10/2015 and block AI on 9/10/2015. HM suggested that BMCL continue to bring in Central demolition to start on 12/10 and if there are any issues then these can be dealt with as they occur. GA advised that he still wanted to carry out a walk-through on 06/10/2015 and thereafter with GBell on 9/10/2015. GA noted that the Aconex recently issued only had 1 certificate attached and not 45 as the message stated. HM advised that he had marked up a sub-scan document. HM noted that there was a gap in the survey information as DFraser had provided a mark-up of the areas to be scanned and some of the buildings were not in the original contract. GA raised concern about not having sub-scan documents of all the buildings to be demolished and on the basis of having found unidentified services previously this was a risk. GA acknowledged that BMCL didn't identify the other buildings as they were not part of the contract at that time. HM enquired how BMCL wanted to progress. GA advised that BMCL would expect the NHS to provide information for all the buildings as part of a pre-construction pack. GA Noted that there could be issues if BMCL create holes. GA noted that the services were isolated 1m away from the building however BMCL needed these to be isolated at their hoarding line so that the foundations can be grubbed out. HM advised that he would liaise with PMoir the following day re obtaining sub-scan information for the buildings which were additional to the BMCL original contract. GA noted that the information required is for the first building in the phase to be demolished.</p>	
			08/10/2015	<p>GA advised that Central Demolitions would be starting on site on Monday 12/10/2015 and noted that there is significant risk as awaiting asbestos clearance certificates for 2 of the biggest buildings in the 1<sup>st</sup> phase works. BMCL are also awaiting information about the underground services.</p>	
			22/10/2015	<p>PM noted that BMCL were to redraw the programme however the general thought is that everything will</p>	

			<p>still finish by 31<sup>st</sup> August with the exception of the INS. There was concern that the car park works would not be done to the desired timetable and there was a meeting organised with JMP on 26/10/2015. GB noted that there was concern that Planning could take a number of weeks and suggested that the NHS provide a PMI/CE to BMCL requesting that the design be completed sufficiently to allow a Building Warrant to be applied for.</p> <p>12/11/2015 GA noted that BMCL were awaiting the handover of the remaining buildings. HMc had advised earlier that day that the surgical block would be handed over on 16<sup>th</sup> Nov and the Out-patients would be handed over at the end of November. Once the buildings have been handed over GA would update the overall programme. PM noted that a good proportion of the out patient &amp; therapies building would be demolished at handover to BMCL.</p> <p>26/11/2015 GA noted that a subsequent EWN had been raised. Cross reference with BMCL – EWN – 167 – Delays to handing over buildings</p> <p>10/12/2015 GA advised that a revised programme had been issued the previous day. The covering email had provided an overview of the changes to the revised programme. HMc disputed that there should be 2 week delay due to the demolition materials segregation for the out-patient building as BMCL had previously stated that materials would be taken off site for segregation. DH noted that the contract completion date is 19<sup>th</sup> July however it now appeared that the completion date was being pushed out to the 19<sup>th</sup> September 2016. HMc acknowledged that there had been some slippage in building handover but that he thought the programme to do out-patients was too long. HMc noted that there did not appear to be a lot of operatives working on the demolition site and enquired if there is scope to accelerate the works. GA advised that BMCL had not had the continuity of work to man-up the demolition works. PM acknowledged receiving the revised programme however requested that programmes be uploaded to Sypro. DH noted that the revised programme was not in NEC3 format, did not appear to have any float and enquired if the red line signifies the critical path. GA advised that he had prepared the revised programme as there was no programme resource on site. It was agreed that BMCL should upload the contract programme for phase 3a along with the current programme. DH suggested that GA could look at the programmes previously uploaded to Sypro for the format of programmes going forward. SF was requested to obtain a Sypro login for GArmstrong. GA advised that BMCL had reviewed the operatives and equipment on site and had a meeting scheduled with the Director of Central Demolition to discuss way forward. GA advised that the labour level will remain as is until after the festive break. DH suggested that BMCL could consider combining activities which overlap in order to regain time in the programme, activities such as those identified on line 12 and line 21.</p> <p>14/01/2016 GA noted that the revised programme has been issued and comments on the programme had been received back via email from HMc. GA noted that the programme had been based on the same logic as the previous programme. HMc suggested that the programme should be re-jigged noting that the programme included for BMCL removing asbestos which the NHS were now doing. HMc suggested that the activity durations could be shortened if labour resources are increased. GA advised that BMCL would not be shortening the durations of the works however they were endeavouring to beat the programme. GA noted that BMCL had already reduced the durations of the road works and landscaping works and had already absorbed delays to the handover of the buildings. HMc advised that he would have expected there to be more trucks removing the debris. GA advised that the number of trucks will increase once the foundations are broken up and scrubbed up. HMc suggested that the NHS and BMCL should meet to discuss the programme. GF advised that HMc and GF will discuss the programme and provide feedback. GA stressed that BMCL are endeavouring to beat the programme.</p>

			<p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2015</p> <p>10/03/2016</p> <p>24/03/2016</p> <p>21/04/2016</p> <p>05/05/2016</p> <p>18/05/216</p> <p>16/06/2016</p> <p>11/08/2016</p>	<p>GF noted that he understood that the clearance certs had been issued the previous day. GA acknowledging receiving the certs the previous day and advised that the soft strip works had commenced and were due to complete the following week. GA advised that it is the soft strip works which tends to identify asbestos</p> <p>It was noted that a revised programme has been issued which updates on the works</p> <p>LJ advised that the costs should be with the NHS in the next few weeks.</p> <p>LJ advised that between EW 164 and 173 and based upon the contractor application the delay claim was in the region of [REDACTED]</p> <p>GA advised that BMCL were preparing to settle the final account with Central Demolition and would confirm the additional costs incurred thereafter.</p> <p>LJ advised that awaiting final account discussion with GW so can build up the other costs.</p> <p>LJ advised that GW is working on the costs for discussion with C&amp;B.</p> <p>GA noted that LJ was awaiting information from GWallace and suggested that the costs would be issued by cop 20/05/2016</p> <p>GW noted that BMCL are pulling together all the phase 3A delays. GA advised DR has stated that the INS delays should be left to the end so the actual finish date is known. GA suggested that some of the items should be closed out and combined into 1 single EW.</p> <p>GF advised that RG would discuss this matter with LJ.</p>	
27885	BMCL-EWN-167	DELAYS IN HANDING OVER BUIDLINGS	<p>24/11/2015</p> <p>26/11/2015</p> <p>10/12/2015</p>	<p>Please accept this EWN as notification of continued delays incurred on site due to non-availability of buildings to be demolished.</p> <p>To date only the following buildings have been released for demolition following the removal of ACM/s;</p> <p>ORTHO THEATRES (DG)</p> <p>SITU (DC)</p> <p>A&amp;E (AK)</p> <p>ORTHOPAEDIC (DH)</p> <p>THERAPY CENTRE (AL)</p> <p>DAY HOSPITAL</p> <p>Original commencement date for phase 3A works (as detailed on programme BM-GS3-OT-0774 dated 28/3/14) was the 3rd August 2015 with all buildings cleared of asbestos and demolition commencing on the 17th August 2015.</p> <p>GA advised that the latest date for the surgical block had been advised as 27/11/2015 however the handover had now been moved back to w/c 30/11/2015. BMCL have subsequently cancelled the scheduled crane lift as BMCL would prefer not to have reps going through the surgical building whilst asbestos removals are being carried out. GA noted that BMCL did not have any construction drawings for the link bridge therefore they would need to drill into the slab so that the weight of the bridge can be estimated.</p> <p>HMc noted that all buildings had been handed over by Friday 4<sup>th</sup> December 2015.</p>	<p>*****</p> <p>All delays to be reviewed at the end of the programme</p> <p>*****</p>
28056	BMCL-EWN-171	Investigative works at Surgical Block Link Bridge	<p>09/12/2015</p> <p>10/12/2015</p>	<p>Due to lack of information issued by the NHS on the construction of the Surgical Block Link Bridge we require to carry out investigative works to determine its weight to allow lift plan to be fully developed. We believe these works are outwith our current scope and would request that further information is provided or a PMI raised to cover these additional works.</p> <p>GA noted that BMCL have had to undertake investigative works in order to calculate the weight of the</p>	<p>Item to remain on tracker until demolition works complete.</p>

			14/01/2016 28/01/2016  11/02/2016	<p>bridge i.e. pull up the floor, drill through the floor, measure the gauge of steel, etc. PM enquired why BMCL were only doing the survey works now. GA advised that the buildings on either side of the bridge had not been handed over. HMc advised that access had always been provided through the AMB and due to asbestos removal being undertaken it had been proposed to install a temp partition. GA noted that he had been advised that BMCL have had to carry out more survey works than what was reasonable to expect/outwith the scope of works. LJ advised that she would liaise with GW regarding this EW. GA noted that BMCL had completed their investigative works and surveys.</p> <p>GA advised that there had been no claim as yet from Central Demo. The link bridge removal is planned for Sunday 31/01/16 but the removal is weather dependent. BMCL would be reluctant to wait for another Sunday therefore if adverse weather stops the removal BMCL would be looking to carry out the works at a night shift. GF advised that the Estates Dept are favourable to removing the link bridge at night. It was noted that the works have been carried out.</p>	
28291	BMCL-EWN-173	Stage 3A - Discovery of unidentified asbestos materials.	12/01/2016  14/01/2016 28/01/2016 11/02/2016 25/02/2016	<p>Progress to the demolition works within stage 3A have been affected due to the discovery of unidentified asbestos materials. The affect this will have on cost and / or programme will be calculated once the full impact of this discovery is understood and works are able to fully recommence.</p> <p>HMc noted that the asbestos works had been scheduled to take place on 26/01/2016.</p> <p>GF noted that the asbestos had been removed the previous day.</p> <p>It was noted that the delays are approx 2 weeks .</p> <p><b>HMc advised that the surveyors have been alerted that there may be costs to be recovered. LJ agreed to provide costs asap.</b></p>	
28292	BMCL-EWN-174	INS Entrance - Delay in asbestos removal and service isolation / disconnection	12/01/2016  14/01/2016  28/01/2016 11/02/2016 25/02/2016 10/03/2016  24/03/2016  07/04/2016	<p>Potential delays to programme due to late asbestos removal, service isolation and disconnection within the existing portion of the INS building due to be reconfigured as part of the new entrance works. Preparation works to allow demolition to commence are now overdue. Demolition works are due to commence on Monday 18th Jan. This element of the programme will be rescheduled following the removal of asbestos and disconnection of services.</p> <p>GF noted that he had received the final report and he would upload this to Aconex. ADrennan is liaising with JDargan to get the isolations carried out. GA noted he was not aware that any asbestos had been identified in the level 1 corridor and enquired if it would be possible to get the isolations carried out to level 1 in the first instance.</p> <p>It was noted that Enviraz was scheduled to remove the asbestos on 30/01/2016.</p> <p>It was noted that the strip out is to be progressed.</p> <p>GF advised that asbestos removal works are ongoing</p> <p>GA advised that there was a significant impact to the programme. BMCL have not reissued the programme as it is not known when the area will be handed over to BMCL. GF advised that AD is pushing on the asbestos removal works as much as possible.</p> <p>GA advised that the overhang/regen kitchen has been cleared and the enclosure has gone. The clearance of the overhang at the bike shelter is anticipated to be 26/03/2016. Thereafter above ceiling/joints. GA requested a walk-round noting that there is a lot of pipework and units which need to be removed/chopped in line with the redline boundary. GA advised that the programme is currently being updated and will be issues in due course – BMCL have added a further 2 weeks to the programme for the commissioning/BMS. The programme is being drafted dependent on the HAI Scribe, etc.</p> <p>GA advised that there are still asbestos clearances to be carried out and certs provided, etc. BMCL are</p>	

			21/04/2016 05/05/2016 02/06/2016  30/06/2016  11/08/2016	<p>progressing works that can be. Asbestos removals planned to take place from 14<sup>th</sup> April 2016. GA advised that the asbestos has been removed (other than any ductwork). BMCL have taken down ceilings in order to enable ADrennan to cut services.</p> <p>GF advised that AD is pursuing the removal of the fire damper panel.</p> <p>GA advised the a revised programme had been issued via Sypro and emailed out earlier that day. GW will look at the costs for delays and will liaise with DR. GF confirmed that the fire alarm panel works had been completed. GA advised that the water pipe which serves the radiator panel located behind the fixed seating is still live and requires to be isolated. GF agreed to progress.</p> <p>FS advised that BMCL require acceptance of the submitted programme as per NEC3 contractual arrangements.</p> <p>GF agreed to accept the programme uploaded to Sypro.</p>	
29718	BMCL-EWN-175	Redesign of Blue Light Route	26/04/2016  05/05/2016  19/05/2016 02/06/2016  30/06/2016  11/08/2016	<p>Please accept this EWN as notification of potential additional costs and delays to the completion of the phase 3A contract works due to the requirement to redesign the layout and detailing of the blue light route running between Langlands Drive and Govan Road.</p> <p>GA advised that BMCL had reviewed options internally. GF requested that BMCL progress in line with the contract drawings. GF noted that the contract drawings would need to be changed to take account of the new CP extension. GF to confirm way forward. HMc to provide the Dunne drawings</p> <p>GA requested that the NHS provide a PMI for changing the drawing(s).</p> <p>GA noted that PMcG had sent on the details to WS. BMCL would provide the cost for the redesign work. The cost information would be uploaded to PMI 449.</p> <p>LJ advised that BMCL were awaiting a new PMI as it was not possible for BMCL to revert back to the contract drawings because of the new CP. The road layout would need to be reviewed/designed by WSP. FS tabled a drawing and raised queries. It was agreed that the group would carry out a walk round of the blue light route at the end of the meeting. New PMI to be provided to BMCL on basis of discussions of walkround.</p> <p>FS suggested that for the avoidance of any doubt it would be beneficial to have a meeting to discuss what the NHS requires. FS advised that BMCL would draw-up what the expected that they needed to do and provide to WSP in order that WSP can confirm the pipe size required.</p>	
29719	BMCL-EWN-176	INS Entrance - Delay to commencing demolition works	26/04/2016  02/06/2016 11/08/2016	<p>Further to BMCL-EWN-174, please confirm when the demolition works to the INS Entrance will be able to commence to allow the contract programme to be rescheduled. Prior to these works commencing they require the ACM's to be removed and redundant services to be isolated and disconnected within the area to be reconfigured.</p> <p>It was noted that GW and DR will review</p> <p>GF agreed to liaise with DR/RG regarding INS delays.</p>	
30393	BMCL – EWN - 179	EWN- Existing screed to INS entrance, levels for floor finishes	15/06/2016  18/06/2016	<p>Existing screed within INS requires to be removed, this has been excluded within the cost plan for the INS and should be instructed.</p> <p>GF noted that the PMI had been provided – Cross reference PMI 481. GW advised that as the building was occupied that the cost had been based on approx levels.</p>	

Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
27913	NHS EWN 064	TDSL VISTAMATIC WINDOWS AND SCREEN TO DOORS	26/11/2015	Following the continued failure of the operating mechanism for these components throughout the complex, please supply as a matter of urgency a) confirmation of the manufacturers proposals to remedy the defects, and b) plans and a programme to return and correct all the defects within a period acceptable to the Board.	
			10/12/2015	Note this defect has become a serious and disruptive operational matter, and should be given priority to secure a solution. GA advised that he had chased TDSL again and he had told them that they need to get a programme in place by 14/12/2015. PM enquired if there is anything in the contract re resolution of this type of matter. DH suggested that as the matter is impacting on the operation of the rooms/hospital then these would be expected to have a 24 hour response period however this may not be practical. GA noted that Schiehallion needs new doors – had previously been advised would be onsite and now advised that the doors haven't been made yet. DH enquired if there was a performance /non availability clause. LJ agreed to raise with GW in case there is something that can be done commercially/through Tim Bicknell to progress this matter. LJ advised that she would provide feedback the following day.	
			14/01/2016	GA advised that BMCL had fitted a sample component to ward 4B. Have looked at it with IP and been advised that the mechanism works as desired. BMCL had agreed to do replacement to level 4, leave for a period of time so can check out the performance. If satisfactory then would programme the works in other areas. MMM Joinery will be carrying out the works. PM advised that the NHS need to understand that MMM have knowledge and experience of encapsulated doors and there is a continuity of working when the works are commenced in ward areas. PM noted concern about MMM Joinery. GA advised that MMM Joinery do not have a door manufacturing facility therefore encapsulated doors, etc will be procured.	
			28/01/2016	GA advised that WIP to level 8. Encapsulated doors - The joiners are creating a sample to be offered to the NHS for sign off. PM advised this would require infection control sign off.	
			11/02/2016	GA advised that works to level 8 would be completed the following day (12/02). GA noted that there had been a preference from DL/PM to monitor the remedial works for 3-4 weeks. Confirmation of way forward to be provided by NHS. GF agreed to liaise with IP to confirm the way forward.	
			25/02/2016	GA noted that the encapsulated door sample was to be offered to the NHS for review. GA advised that at the previous week there had been remedial works carried out to 197 visicom units. A programme for the remainder of the building had been sent to IP. BMCL have a list of the low risk and high risk areas. HAI scribe to be closed out with NHS Infection Control reps.	
			10/03/2016	GA advised that 330 visicoms have now been changed out. Awaiting HAI scribe meeting for high risk areas with NHS Infection Control. JS is liaising with IP to push on directly. GF advised that GF/HMc would meet with Sofie to progress.	
			24/03/2016	GA advised that programme is ongoing and circa 500 units have been remediated. A meeting to discuss/agree the HAI Scribe for the high risk areas has been organised	
			07/04/2016	GA advised that good progress was being achieved with remedial works having been carried out to 650	

A51679245

			<p>21/04/2016</p> <p>05/05/2016</p> <p>19/05/2016</p> <p>02/06/2016</p> <p>16/06/2016</p> <p>30/06/2016</p> <p>11/08/2016</p>	<p>units. BMCL are working to the agree HAI Scribe for the high risks areas.</p> <p>GA advised that circa 800 visicoms have now been changed out. The works to the visicom repairs will slow down as the operatives will need to be diverted onto the NCH Roof Garden works.</p> <p>GA noted that over 950 visicoms had now been changed out. GF requested that the sample stickers be provided to the NHS and advised he would raise a PMI requesting this.</p> <p>GA advises that remedial works to over 1000 visicoms had been carried out. GA confirmed that air permeability tests will not be carried out on isolation rooms.</p> <p>GA noted that a further circa 150 visicom units had been remediated leaving circa 100 still to do. GA noted that BMCL had been unable to progress the works to be undertaken in Critical Care by Iain Thomson. GF agreed to liaise with Lynn Pritchard.</p> <p>FS advised that the remedial works were 95% complete with access to critical care being an issue. Infection control are asking for the rooms to be retested – subsequently discussed with Ian Powrie who confirmed that as not a refurb retesting would not be requested. It was noted that a visual inspection of the works could be viewed once completed. GF agreed to liaise with LPritchard. GW advised that the Administrator has requested proof that this is a defect and suggested that it would be beneficial not to repair one so that a rep can be brought to site to review. GF advised that he would email GW to state that this is a fully operational hospital and the product is defective.</p> <p>FS advised that the remedial works were wip. To date the works to the High Line blinds were 90% complete and the Visicoms were 95% complete.</p> <p>FS advised that BMCL had completed all the remedial works that they have been able to access. GF advised that JSullivan has supplied info to IP and asked IP for clarification on a couple of items.</p>	
28016	NHS EWN 065	Rectify issue of no Amenity Lighting between the new Children's Hospital and the Maternity Building	<p>03/12/2015</p> <p>10/12/2015</p> <p>14/01/2016</p> <p>28/01/2016</p> <p>11/02/2016</p> <p>25/02/2016</p> <p>10/03/2016</p>	<p>In the paved area between the West Elevation of New Children's hospital and the Maternity building / new children's park that has been handed over and is used by the public for access there is no provision of amenity/street lighting. Can BMCL please confirm if and when this lighting will be installed as the area is considered non compliant at the moment.</p> <p>GA advised that Wallace Whittle are reviewing the drawing for this area. The bulkhead lights on the maternity elevation are now on however GA was not sure if the matter had been raised in advance of bulkhead lights being switched on. PM enquired if there was any lighting to be put in as part of the NCH Park. GA advised that there was lighting being put in as part of the children's park but only small lights. DH noted that he had a similar concern about the lighting raised to himself as well.</p> <p>GA advised that Gillespies and WWhittle are due to meet on site later that day to review the lighting conditions. Both parties have already been on site. A proposal would be provided to the NHS in due course. HMc noted that the results identified by the NHS were for indication purposes as they may not be accurate as an Ipad lux level app had been utilised.</p> <p>GA noted that the walkround had highlighted a few dark areas (blue light route opposite the BMCL site, NCH Ambulance area, area between Mat &amp; NCH). BMCL will be installing temp lights at their hoarding.</p> <p>GA noted that a revised design was being considered by BMCL consultants. Temporary lighting was being installed the following day (12/2/).</p> <p>GA advised that the lighting had been installed in the area and a revised drawing issued to the NHS for review which shows additional light columns.</p> <p>GA advised that the proposal is with the design team to finalise the cable routes. As soon as finalised then will provide the drawings through the RDD process.</p>	

			24/03/2016	GA advised that he had the positioning of the light columns however he was awaiting the cabling schematic from Wallace Whittle in order to progress.	
			07/04/2016	GA advised that the cabling schematic is awaited however BMCL have ordered the materials. A programme will be provided to the Board in due course.	
			21/04/2016	GA advised that BMCL are awaiting a couple of details from WW to proceed with the works however the instructions to the sub-contractors have been issued. Drawings will be issued to the NHS asap.	
			05/05/2016	GA advised that BMCL now have all the details and would issue the drawings to the NHS on 06/05/2016. BMCL would progress works with Land Eng.	
			19/05/2016	GA advised that PMcG and LJ are dealing with these works and that the drawings had been issued to the NHS for review/sign-off.	
			02/06/2016	GA advised that Paul had sent through his proposal and is working to progress with Land Eng.	
			16/06/2016	DW advised that the drawing had been issues to Mercury and Land Eng for pricing. LJ agreed to pursue the costing info.	
			30/06/2016	GF advised that he had drawings and would pass onto FM and Estates colleagues for info.	
			11/08/2016	FS advised that he would check with LJ if the cost info was available.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as 11/08/2016

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
5066	PMI 456	RHC – OUTPATIENT DEPARTMENT (Curtains/Blinds)	02/12/2015	<p>Room OPD-015 MEETING ROOM Provide roller blinds to this room as per the signed off (overmarked) blind strategy drawing NA XX 00 PL 321 130 04. (Refer attached extract of drawing).</p> <p>Room OPD-013 INTERVIEW ROOM Provide Gp1 black curtain (CUR1000) and fit to TRA1000 installed by BM. To cover window, e.g curtain drop stops at cill of screen. Refer NA-SZ-00-RD-400 OPDC. Supply and install one way vision film to screen on party wall between rooms OPD-013 and OPD-014, screen Gp1 item and noted in RDS NCH 00 OPD 014 / OBS 301 as one way vision. Vision obscured when looking from OPD-013 to 014. Suggest airport security style film. Please confirm solution prior to installation.</p> <p>Room OPD-014 OBSERVATION ROOM At Board's cost, supply and install TRA 1000 curtain rail and curtain as per room OPD-013. It was noted that this info is with Workspace Design for them to provide a quote. GA noted that LJ has received costs and will upload to Sypro by close of business that day. LJ noted that the costs had been uploaded. PM requested that LJ check that the costs is only for 1</p>	CE to be issued

A51679245

			11/02/2016 25/02/2016 10/03/2016	room. GF noted that he would liaise with PM GA noted that 2 outstanding curtains ordered and would be delivered to site within the next 2 weeks. The 1 way film to be onsite the following week. It was agreed item could be closed. <b>GA advised that the mirror film was to be fitted 14<sup>th</sup> March 2016.</b>	
5343	PMI 465	Neurosurgery Overcladding Curtain Rail Modifications	10/02/2016  25/02/2016 10/03/2016 24/03/2016  07/04/2016  21/04/2016  05/05/2016 19/05/2016 02/06/2016 16/06/2016 30/06/2016 11/08/2016	Alterations to curtain tracks abutting new windows  Carryout the removal, modification to track length and refixing of curtain rail in areas where the ends of the rail abut the new / existing windows LJ advised that BMCL are awaiting cost info LJ advised that she is pursuing the cost. GF advised he would liaise with Raymond. GA advised that he had reviewed the cost and was of the opinion that given the number of curtain tracks that the cost is reasonable GA advised that RGalloway had requested a copy of the quotation provided by D&B Facades for review. GF to confirm way forward. GF advised that he would liaise with Raymond Galloway. LJ advised that the MM cost was similar however it may be beneficial to minimise the number of different contractors working in the building. GF advised that he would liaise with Raymond Galloway and provide feedback asap GF advised that review of the cost was ongoing and GF would provide feedback asap. Gf advised that he understood a review of the costs were ongoing by RG and LJ GF to check with RG that costs are acceptable and then provide CE. <b>GF agreed to progress the issue of the CE</b> <b>Agreed item could be closed as CE issued – cross ref CE 182</b>	<b>Cross ref CE 182</b>
5453	PMI 471	ADULT HOSPITAL - WARD 4B/HAEMATO- ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	09/03/2016          10/03/2016  24/03/2016	The Board requests that BMCL establish the feasibility, estimated costs and programme of works in order to achieve the revised specification as listed below  Corridor to be HEPA filtered Bathrooms to be fully sealed Room pressures to be 2.5 -8 PA ACH 6/hr Air Change in prep room 6/hr Entrance to ward to be air locked using double door at front entrance. Exit door (beside room 76) to be sealed and only used as fire exit.  BMCL is also requested to confirm the timescale to complete the feasibility study. GF advised that Steve Russell will be progressing this item since the retirement of PM. GA requested that a meeting be organised with NHS Reps as BMCL have queries regarding the spec provided. The BMCL attendees at this meeting should be GA, LJ, DW and GB. GA advised that a joint meeting between BMCL and NHS Reps had taken place the previous day and the queries had been answered. DWilson has updated the query sheet and issued to DWL and SR. BMCL are progressing with the feasibility and suggest the timeframe for the feasibility outcome will be circa 1 month.	<b>Cross ref PMI 475</b>  <b>Cross ref CE 173</b>  <b>11/08/2016</b>

			07/04/2016	GA advised that BMCL are in the process of carrying out the feasibility study and anticipate this being concluded in 2-3 weeks time. GA noted that there had been some outstanding queries as the Infection Control rep had not been able to attend the user group meeting. BMCL would be proposing options.	
			21/04/2016	GA advised that DWilson would be issuing the feasibility report with indicative costs to DWL on 22/04/2016.	
			05/05/2016	GA advised that the feasibility study had been submitted and feedback is awaited. GF agreed to chase up SRussell.	
			02/06/2016	GA advised that the air handling unit supplier for Mercury are working on an alternate solution as previous proposal does now not comply with new EU legislation.	
			16/06/2016	DW advised that BMCL are awaiting the costing from the AHU manufacturer and Mercury are chasing the cost info. Mercury propose to check with another supplier. DW noted that there was a query regarding warranty – if change the AHU then may lose the Barkel warranty however there was only a short warranty period now left. GW requested a CE for the design fees and then for the PMI to be closed.	
			11/08/2016	FS advised that no feedback had been received from the NHS. It was noted that CE 173 had been issued and accepted for the design fees. It was agreed that this item should be closed and should NHS wish to proceed this can be instructed under a separate PMI.	
5566	PMI 475	ADULT HOSPITAL - WARD 4B/HAEMATO-ONCOLOGY WARD - ALTERATION TO BOARD REQUIREMENTS	04/04/2016	The Board confirm acceptance of the design fees as identified for PMI 475 and request that BMCL progress PMI 471 (i.e. establish the feasibility, estimated costs and programme of works to achieve the revised spec as agreed by DWL)	11/08/2016
			30/06/2016	LJ advised that the costs had been updated to include the Barkel costs which had previously been omitted from the quote due to the costs being awaited.	
			11/08/2016	As above. Item closed	
5647	PMI 478 -	Alterations to Childrens Roof Gardens	22/04/2016	In accordance with Clause 61.1 progress with the alterations to the Children's Roof Garden 1) Increase height of fence to a height of 2.4m above finished level with an inward spay of 400mm (see sketch detail) 2) Remove wire trellis and eye bolts as indicated on sketch. 3) Remove 2No, mounds and replace with astro turf to same level as surrounding. 4) Remove planters and replace with astro turf to same level as surrounding. Works to be complete on or before 1st June.	
			19/05/2016	It was noted that the works are ongoing	
			02/06/2016	GA advised that the works were substantially complete. GF noted that he would be reviewing the lock/latch covers with PMcG later that day.	
			16/06/2016	It was noted that the CE for this item had been issued and subsequently accepted therefore this item could be closed.	
5681	PMI 479 -	QEUH - IPS Remedial works	29/04/2016	The Board requests that BMCL provide a cost for the secure fixing of IPS Panels which have dispensers fitted by the Board. The Board anticipate that circa 4000 IPS Panels will require to be securely fixed.	Cross ref CE 183
			05/05/2016	GF confirmed that the larger screws should be used to fix the IPS Panels.

## Other items that require discussion:

- Energy Centre works (heating to Labs) – DW advised that BMCL cannot do the works and PM requested that BMCL advise what they require from the NHS (23/07/2015) DW suggested that BMCL would raise this item as a EW. It was noted that PM and DW would be meeting with A Gallagher on 03/08/2015 which may assist to resolve this matter

(30/07/2015) PM noted that this item was still to be discussed with AGallagher – PM was scheduled to meet with AG the following day (06/08/2015) GA advised that JM has been working in the energy centre for the majority of the week. JM had difficulty co-ordinating everyone who needed to be involved in the test. GA advised that JMiller is linking in with IP and that GA will get a run down of all the works and will split out the different elements and provide update. (13/08/2015) GA noted that an update had been provided earlier that day. The information had all been provided for the IPowrie SEPA report. There was some BMCL works to be concluded before EC is handed back over to NHS Estates Dept (27/08/2015) DW advised that he would issue an EW. NHS Estates have a couple of barrel to change, etc. The boilers are going back up to temperature on 17/09/2015 as agreed with Zurich (17/09/2015) Heating to Labs – it was noted that DW is to liaise with IP. Energy Centre works – DW advised that the boilers are back up to temperature as per design. Zurich are in possession of all the information so they can issue the MTHW certificate. DH enquired about the CHPs and DW noted that the issue is being resolved now by Adina (24/09/2015) DW advised that the boilers are all back on and running to temp. BMCL are awaiting information from IP (01/10/2015) DW noted that there had been no further progress on this matter – BMCL are awaiting confirmation from IPowrie – BMCL require the NHS to clean their pipework prior to connection. (12/11/2015) GA advised that DW could be asked to provide an update by email (26/11/2015) GA noted that DW had advised that a programme of works is still awaited from IP. DH advised that he was meeting with IP on 11/12/2015 and would raise this matter with IP. (10/12/2015) DW advised that he would provide an update asap – DW was due to meet with IP the next day (14/01/2016) It was noted that IP had confirmed that he would get the system cleaned asap (28/01/2016) GF agreed to discuss with IP – IP to clean the system in advance of BMCL changing the valves over (11/02/2016) It was noted that this had been discussed between DW and IP on 22/02/2016. It had been agreed that CDowson should get H&V to carry out the cleaning works (25/02/2016) GA noted that CDowson is organizing for H&V to clean the system. Confirmation of the works being completed is awaited (10/03/2016) GA advised that BMCL re awaiting CDowson to flush the labs heating system and DWilson is liaising with CDowson regarding this. (07/04/2016) GA advised that BMCL are still awaiting the system top be cleaned by the NHS (21/04/2016) GF noted that there was a meeting to discuss the Energy Centre scheduled to take place the following day (05/05/2016) G noted that meetings are ongoing and that there is a meeting scheduled to take place on 8<sup>th</sup> June 2016. (02/06/2016) **DW suggested that this note should be concluded the following week – action is currently on DBratney. (16/06/2016)**

- Labs Block – solar shading fin – GF noted that a solar shading fin had been shattered during previous replacement and enquired when BMCL proposed to replace the fin. GA advised that he was not aware of this defect. (02/06/2016) HMc agreed to liaise with CPurdon regarding back ground to this (30/06/2016) **GF advised that he had a picture of the damaged solar shading fin and would provide to FS. (11/08/2016)**
- Car park 4 – completion date 24<sup>th</sup> June – it was noted that PMcG had advised that BW/Planning permission has not been granted and this needs to be confirmed to the NHS asap so that an internal decision can be taken. (16/06/2016) FS noted that there was 11 conditions of which 8 had been discharged. The 3 remaining conditions related to a) emissions survey which Land Eng are working on, b) contaminated land certification which the Contamination Land Officer had signed off and c) Landscaping completion and Land Eng would confirm these dates on the basis of the planting season. In relation to the Building Warrant – BMCL had been unable to contact the Building Control officer therefore were unable to obtain the completion certificate. FS advised that GBurnett and PMcGuinness would progress these matters whilst FS was on annual leave (30/06/2016) **FS advised that he had sent an update email to DWL. Meeting with Building Control potentially scheduled to take place tomorrow (Friday 12/08/2016 at 11am).**
- VIE works programme – GF noted that DBratney is seeking an update as to when the alterations will be carried out. FS advised that BMCL were now in receipt of the final piling design and would provide info asap. (30/06/2016) **FS advised that the piling design had been completed and they he understood there may be service diversions to be undertaken. GF agreed to liaise with DB. (11/08/2016)**
- Doors drawings – GF advised that he would be raising a PMI instructing BMCL to review the doors. (11/08/2016)
- Chilled beam/dew point control – GF advised that there had been incidences of flooding in some of the rooms noting that the control strategy had been reviewed as part of the works. (11/08/2016)
- Discolouration of floor coverings (ground and first floor) – GF noted that this required to be reviewed by NHS and BMCL (11/08/2016)
- **Water ingress at A & B side of primary sub-station at car park 1 – GF requested that BMCL review and liaise with Estates for access (11/08/2016)**

SCOTTISH HOSPITALS INQUIRY  
**Bundle of documents for Oral hearings commencing from 13 May 2025 in  
relation to the Queen Elizabeth University Hospital and the Royal Hospital for  
Children, Glasgow**  
**Bundle 32 – Early Warning (EW) Trackers**
