**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BCL as at 30/07/2010:

					
Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
323	MB/PM/General/001	Stage 1 Laboratories - Start on Site Date	27th January 2010	Closed out	27/01/2010
324	MB/PMI/General/002	Revision to Contract Assessment Dates	8th February 2010.	Closed out	08/02/2010
325	LAB / PM / General / 003	Laboratory Block – Tunnel Reconfiguration	10th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
326	PMI / General / 004	Excavated Materials / Spoil	23rd February 2010	Closed out	10/03/2010
327	PMI / General / 005	Laboratory Project - Future Expansion	23rd February 2010	Ongoing assessment as part of Stage d to e reconciliation	
328	PMI / General / 006	Laboratory Project - Basement Floor Level	26th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
329	PMI / General / 007	Laboratory Project - Ventilation to PM tables	26th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
330	PMI / General / 008	Laboratory - Stage E Civil & Structural Engineering Drawings	9th March 2010	Ongoing assessment as part of Stage d to e reconciliation	
331	PMI / General / 009	Laboratory Project - Relocation of Footprint	10th March 2010	Closed out	10/03/2010
332	PMI / General / 010	Laboratory project – Architectural drawings and NBS Specification	23 <sup>rd</sup> March 2010	Ongoing assessment as part of Stage d to e reconciliation. AL 70 series drawings to be confirmed	
333	PMI / General / 011	Laboratory Block – VE Review 1	25 <sup>th</sup> March 2010	Ongoing assessment as part of Stage d to e reconciliation M&E updated drawings to be provided	
334	PMI / General / 012	AGV System - Cart Washer	25 <sup>th</sup> March 2010	Cart Washer not required by Board. CE notified by BCL (CE 006) CE accepted by Board	9/06/2010
335	PMI / General / 013	Laboratory Project – Removal of Foundation from Old Rec Pavilion	8 <sup>th</sup> April 2010	Closed out No cost	08/04/2010
336	PMI / General / 014	Laboratory Project – Diversion of Water Main	8 <sup>th</sup> April 2010	CE notified by BCL (CE 004) CE accepted by Board	25/05/2010
337	PMI / General / 015	Removal of Japanese Knotweed (Bunded Area) Off Site	28 <sup>th</sup> April 2010	CE raised by BCL (CE 002) CE accepted by Board	10/06/2010
351	PMI / General / 016	Laboratory - Stage E - Mechanical and Electrical Drawings and Specification	17 <sup>th</sup> May 2010	Confirmation of drawing hierarchy as at 17 <sup>th</sup> May 2010 – stage D to E	
356	PMI / General / 017	Laboratory Block – Mortuary (Basement Level -1) Room L-1/B/027	31 <sup>st</sup> May 2010	CE notified by BCL (CE005) CE accepted by Board	24/06/2010
367	PMI / General / 018	Laboratory Project-Mortuary X Ray Room L1/B/027	17 <sup>th</sup> June 2010	To be read in conjunction with PMI / General / 017 New room layout to be designed Proposal received from Wallace Whittle, BCL to review.	

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
368	PMI/General/019	Change to Electrical Load requirements	23rd June 2010	Linked to NHS-EW-010 and NHS-EW-013. BCL to provide costs. BCL instructed Mercury to provide quotes. BCL reported that they would need to check that the space remains	
369	PMI/General/020	Borehole Water Supply	23rd June 2010	Board reviewing cost information received from BCL CE event raised by BCL. Board pursuing confirmation letter from Business Stream. LM to ask Hugh McDerment to follow up on letter.	
370	PMI/General/021	HAEMATO-ONCOLOGY WARD	23rd June 2010	Links to NHS-EW-007 and NHS-EW-008 BCL to provide an indication of the cost saving to remove the additional filtration to the 8 No rooms and ensuites.	
375	PMI/General/022	New Children's Hospital – Theatre Recovery Area	30 <sup>th</sup> June 2010	Links to NHS-EW-014 (Sypro 6981) Board confirmed that they no longer require fixed solid partition walls between recovery bays (17 bays). BCL to provide updated 1:50 theatre plans and provide costs	
381	PMI / General /023	Stage 3 Adult Hospital CCU Bed Bay Dividers	8 <sup>th</sup> July 2010	BCL to provide revised layout omitting single bed bay glass screens for approval by the Board team BCL to provide cost saving for the removal BCL to provide drawing for review.	
383	PMI/General/024	Laboratory Block – Fire Alarm Cable	09 <sup>th</sup> July 2010	BCL to provide costs to substitute Prysmian FP200 plus cable system in lieu of MICCE cable system. Cost uploaded to notes section by BCL and under review by NHS team	
384	PMI/General/025	Laboratory Project – Fixed Sun-shading Fins	23 <sup>rd</sup> July 2010	Links to BCL-EW-028 Board confirmed that Brookfield may proceed and install fixed sun shading fins to the office pod of the Laboratory Block in lieu of moveable fins.	
386	PMI/General/026	Laboratory Block Fire Stair Handrails and Balustrades.	30 <sup>th</sup> July 2010	Links to BCL-EW-030 BCL to provide potential VE saving if handrails and balustrades within the fire stairs is changed from stainless steel to mild steel painted.	

**COMPENSATION EVENTS**

The following Compensation Events have been submitted as at 30/07/2010:

				
Sypro ID No	NHS Ref No	Item	Date Issued	Status
4294	CE 001	Removal of Asbestos Building Board	10th March 2010	Agreed
4295	CE 002	Removal of Japanese Knotweed	10th March 2010	Agreed
4296	CE 003	Removal of Excess Spoil	10th March 2010	Agreed
4451	CE 004	Water Main within Basement Footprint	25 <sup>th</sup> May 2010	Agreed
4501	CE 005	PMI / General / 017 - Laboratory Block - Mortuary (Basement Level -1) Room L-1/B/027	3 <sup>rd</sup> June 2010	Agreed
4528	CE 006	AGV System - Cart Washer Removal	9 <sup>th</sup> June 2010	Agreed
4632	CE 007	Labs Project - Copper Cladding to external columns	28 <sup>th</sup> June 2010	Agreed
4660	CE 008	Kitchen Relocation from level 3 to Basement	02 <sup>nd</sup> July 2010	Agreed
4661	CE 009	Service drain to the side of the Laboratories Building (BCL-EW-018) Sypro 6732	02 <sup>nd</sup> July 2010	Agreed
4676	CE 010	Borehole water supply	7 <sup>th</sup> July 2010	Costs under consideration by NHS

## NEC3 – STATUS UPDATE

## EARLY WARNINGS

The following Early Warnings have been submitted to the NHS Board as at 05/08/2010:

<div>  </div>					
Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6715	BCL-EW-001	Brookfield Value Engineering Items	13 January 2010	Value impact work in progress Focus on Tunnel Arrangement – Pack received by Board 01/02/2010	10/02/2010 (PM PMI 003)
6716	BCL-EW-002	Mobile Phone Mast Location	8 <sup>th</sup> February 2010	Agreement in principle re Scottish Water Land Acquisition. Works on-going to purchase land. EW to be closed out	22/07/2010
6717	BCL-EW-003	Utilities (1MVA) Power	10 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6718	BCL-EW-004	Utilities (11kv Breaker)	10 Feb 2010	Part of Scottish Power Quotation	13/04/2010
6719	BCL-EW-005	Utilities (Moving 11KV Circuit Breakers) – Hospitals	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6720	BCL-EW-006	Utilities (Moving 11KV Circuit Breakers) – Labs	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6721	BCL-EW-007	Discovery of Foundations and Brickwork (Labs Site)	3 <sup>rd</sup> March 2010	Dunne's have removed foundations and brickwork.	8/04/2010 (PMI/General/013)
6722	BCL-EW-008	Planning Issues (Labs Render)	4 <sup>th</sup> March 2010	Agreed at EW Meeting 17/06/2010 to close EW out	17/06/2010
6723	BCL-EW-009	Planning Issues (Adult and Children's Render)	5 <sup>th</sup> March 2010	<p>BCL worked with Planning Dept to identify agreeable finishes. Indicative costs circa £500k and would like the Board to contribute to the cost. BCL progressed to ensure there was no delay to Planning.</p> <p>BCL to provide info re costs and % share requested from Board for AS to present to RC.</p> <p>BCL currently drafting report.</p>	
6724	BCL-EW-010	Repositioning of Labs Building	8 <sup>th</sup> March 2010	Cross reference with PMI / General / 008 and PMI / General / 009	10 <sup>th</sup> March 2010 (PMI/General/009) PART OF STAGE E
6725	BCL-EW-011	Water Main within Basement Footprint	9 <sup>th</sup> March 2010	Water main being diverted 13/03/2010	08/04/2010 (PMI/General/014)
6726	BCL-EW-012	Access Road serving the laboratories	19 <sup>th</sup> March 2010	<p>Request for instruction to extend the access road.</p> <p>NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out</p>	10 <sup>th</sup> June 2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6727	BCL-EW-013	Laboratories Tunnel	29 <sup>th</sup> March 2010	Request to construct the Labs tunnel beyond the extents of the new access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10 <sup>th</sup> June 2010
6728	BCL-EW-014	Increase in Building Control Fees	14 <sup>th</sup> April 2010	BCL submitted Building Warrant Application. Expectation that receiving building warrant locks design into current legislation.  BCL identifying impending changes to legislation for discussion with the NHS team.  BCL negotiations with GCC to be concluded by 15 <sup>th</sup> July 2010.  Work ongoing by BCL, meeting next week to discuss and finalise.	
6729	BCL-EW-015	Junctions at Govan Road	14 <sup>th</sup> April 2010	NHS confirmed that SW have advised that they are unwilling to alter their junctions at Govan Road. WSP to be asked if GCC can serve a left turn only enforcement notice on SW.  Junction information indicated on Masterplan submitted end April and VISSIM model shows no impact on junction. RCC will conclude this issue.	
				Discussion re private or adopted road. PM view that road should be private but built to adoptable road standard. DS agreed to discuss with Jim Miller.  BCL to prepare and submit Section 56 application.	
6730	BCL-EW-016	Kitchen Relocation from level 3 to Basement	14 <sup>th</sup> April 2010	NHS team obtaining still to obtain formal Board sign off however AS confirmed that BCL can undertake kitchen relocation from level 3 to the basement. NHS will raise a CEN.	1 <sup>st</sup> July 2010
6731	BCL-EW-017	Compatibility of the existing Kitchen cart/trolleys and the Proposed AGV Robotic System	15 <sup>th</sup> April 2010	AGV Strategy not signed off by FM. Karen Connelly to attend next meeting to update on all cart issues.	

Sypro ID	NHS Ref No.	Item	Date Raised	Status	Date Completed
6732	BCL-EW-018	Service drain to the side of the Laboratories Building	21 <sup>st</sup> April 2010	Board to review costs and advise BCL on way forward. There are two service drain issues: 1 – Children's hospital drainage – NHS confirmed the children's hospitals drainage works had been agreed. NHS will raise a CEN 2 – Attenuation. BCL will raise the attenuation issue as a separate EW. NHS confirmed that attenuation works could not be undertaken until post FBC.	1 <sup>st</sup> July 2010
					Attenuation EW to be raised separately.  BCL discussions ongoing.
6733	BCL-EW-019	Purchase of land from Scottish Water	21 <sup>st</sup> April 2010	District Valuer valuation awaited. Land acquisition will be progressed post FBC. Planning application submitted.  Communications have been received from District Valuer, still awaiting report.	
6734	BCL-EW-020	Contamination within Water System	21 <sup>st</sup> April 2010	Contamination issue dealt with.  BCL to check if this EW can be closed off.  DMcF agreed this EW should be closed off.	05 <sup>th</sup> August 2010
6735	BCL-EW-021	Discovery of Flammable Gas within Ground in Basement	7 <sup>th</sup> May 2010	BCL to provide extract from SI Report re ground gas information. BCL Consultants to produce a report. BCL and Board team to agree to a definition of what is 'significant'. BCL reports that SI stated very minimum pockets of gas however methane had been discovered in 9 out of 12 boreholes. The sampling works information provided by the Board was insufficient. BCL have identified the problem boreholes and they will provide further information.  Work in progress.	
6958	BCL-EW-022	Service diversion of street lights on site	21 <sup>st</sup> May 2010	Isolation works completed.	25/06/2010
6959	BCL-EW-023	Design development of the Substation within the car park resulting in a reduction of available parking space.	21 <sup>st</sup> May 2010	PMG agreed this EW should be closed off	25/05/2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6960	BCL-EW-024	Roof top Helipad	21 <sup>st</sup> May 2010	Revised report issued 16 <sup>th</sup> June 2010 (reflects proper flight paths and helicopter type). NHS confirmed that GCC Planners satisfied with distance of Helipad from local housing. BCL to instruct Jim Miller to provide report and summary of report findings to Jim Patrick. This EW to be closed off.	10/06/2010
6961	BCL-EW-025	Car Park 1 Conflict with Masterplan	21 <sup>st</sup> May 2010	NHS confirmed no conflict. EW to be closed off.	10/06/2010
6967	BCL-EW-026	External Walls: Copper Cladding to Columns	27 <sup>th</sup> May 2010	NHS to review cost information provided by BCL DR requesting reconciliation cost information re elevations, i.e. block work, granite etc	28/06/2010
6968	BCL-EW-027	Swisslog Robotics (stage 3)	27 <sup>th</sup> May 2010	BCL agreed to put in additional bay. BCL to check if this EW can be closed off. DMcF agreed this EW can be closed off.	
6972	BCL-EW-028	Moveable Vertical Fins to Laboratory Pod	2 <sup>nd</sup> June 2010	BCL to provide modeling information and demonstration re moveable fins v's static fins. BCL agreed to provide information by Friday 25 <sup>th</sup> June 2010  BCL indicated potential early cost saving calculation as £150K. NHS to raise PMI and EW to be closed off.  Cross reference with PMI / General / 025	23/07/10
6987	BCL-EW-029	Building Control concerns over sub-compartmentation exits from wards	29 <sup>th</sup> June 2010	Closed – Refers to NHS-EW-015 (6895)	30/06/2010
6993	BCL-EW-030	Proposal to change escape stair and mortuary stair handrails	16 <sup>th</sup> July 2010	Board to consider changing mortuary stair and escape stair handrails to painted stainless steel.  BCL to provide images/photos of painted handrails to NHS team. (DS to provide PM with samples).  Closed - Cross reference with PMI / General / 026	30/07/2010
6999	BCL-EW-031	Adult & Children's Hospitals Single Rooms - Bi-fold Doors En-suites.	30 <sup>th</sup> July 2010	Board wish to consider a possible change to their project requirements, with the removal of the bi-fold door arrangement to the en-suite shower rooms. BCL to trial alternative door solution in mock up.  Two leaf door has been constructed in mock up. User group visits scheduled, following which Board will draft response.	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6699	NHS-EW-001	Stage D to E Reconciliation	14 January 2010	DH to liaise with Paul Fairie and Manny Ajuwon. Equipment list to be reissued to BCL. The 6 'empty' rooms to be finalised. PS to agree final decision as proposed by DR at PMG  VE for glazed screens to be removed from Stage D to E reconciliation exercise – discussions on going as to glazed screens being a VE item.	
6701	NHS-EW-002	Testing of Building Board Material on Site	21 January 2010	Complete - CE 001 Issued	11/03/2010
6704	NHS-EW-003	Japanese Knotweed Survey	21 January 2010	Complete– CE 002 issued	11/03/2010
6705	NHS-EW-004	Excavated Building Materials/Spoil	21 January 2010	Complete PMI 004 issued CE 003 issued	11/03/2010
6706	NHS-EW-005	Live HV Cable – SGH Site	27 January 2010	Complete - disconnect live HV cable	7/02/2010
6952	NHS-EW-006	Borehole water	15 February 2010	Complete - PMI 020 issued	23/06/10
6953	NHS-EW-007	Adult Hospital – Haemato-Oncology Area	12 <sup>th</sup> March 2010	Complete - PMI 021 issued	23/06/10
6954	NHS-EW-008	Oncology Ward - Specialist ventilation	16 <sup>th</sup> April 2010	Complete - PMI 021 issued	23/06/10
	NHS-EW-009	REF NO – NOT USED			
6955	NHS-EW-010	Site Electrical Load	16 <sup>th</sup> April 2010	Complete - PMI 019 issued	23/06/10
6956	NHS-EW-011	Patient Hoists and Structural Support	16 <sup>th</sup> April 2010	BCL advised of omission of 100 (nr) patient hoist including structural support from wards. Response from BCL awaited by Board.  Board to issue PMI and request costs then close out this EW.  Board to confirm final no's. Work ongoing. PM will issue information.	
	NHS-EW-012	REF NO – NOT USED

334	PMI / General / 012	AGV System - Cart Washer	25 <sup>th</sup> March 2010	Cart Washer not required by Board. CE notified by BCL (CE 006) CE accepted by Board	9/06/2010
335	PMI / General / 013	Laboratory Project – Removal of Foundation from Old Rec Pavilion	8 <sup>th</sup> April 2010	Closed out No cost	08/04/2010
336	PMI / General / 014	Laboratory Project – Diversion of Water Main	8 <sup>th</sup> April 2010	CE notified by BCL (CE 004) CE accepted by Board	25/05/2010
337	PMI / General / 015	Removal of Japanese Knotweed (Bunded Area) Off Site	28 <sup>th</sup> April 2010	CE raised by BCL (CE 002) CE accepted by Board	10/06/2010
351	PMI / General / 016	Laboratory - Stage E - Mechanical and Electrical Drawings and Specification	17 <sup>th</sup> May 2010	Confirmation of drawing hierarchy as at 17 <sup>th</sup> May 2010 – stage D to E	
356	PMI / General / 017	Laboratory Block – Mortuary (Basement Level -1) Room L-1/B/027	31 <sup>st</sup> May 2010	CE notified by BCL (CE005) CE accepted by Board	24/06/2010
367	PMI / General / 018	Laboratory Project-Mortuary X Ray Room L1/B/027	17 <sup>th</sup> June 2010	To be read in conjunction with PMI / General / 017 New room layout to be designed Proposal received from Wallace Whittle, BCL to review. BCL review ongoing.	

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
368	PMI/General/019	Change to Electrical Load requirements	23rd June 2010	Linked to NHS-EW-010 and NHS-EW-013. BCL to provide costs. BCL instructed Mercury to provide quotes. BCL reported that they would need to check that the space remains	
369	PMI/General/020	Borehole Water Supply	23rd June 2010	Board reviewing cost information received from BCL CE event raised by BCL. Board pursuing confirmation letter from Business Stream. LM to ask Hugh McDerment to follow up on letter.	
370	PMI/General/021	HAEMATO-ONCOLOGY WARD	23rd June 2010	Links to NHS-EW-007 and NHS-EW-008 BCL to provide an indication of the cost saving to remove the additional filtration to the 8 No rooms and ensuites.	
375	PMI/General/022	New Children's Hospital – Theatre Recovery Area	30 <sup>th</sup> June 2010	Links to NHS-EW-014 (Sypro 6981) Board confirmed that they no longer require fixed solid partition walls between recovery bays (17 bays). BCL to provide updated 1:50 theatre plans and provide costs	
381	PMI / General /023	Stage 3 Adult Hospital CCU Bed Bay Dividers	8 <sup>th</sup> July 2010	BCL to provide revised layout omitting single bed bay glass screens for approval by the Board team BCL to provide cost saving for the removal BCL to provide drawing for review – work in progress.	
383	PMI/General/024	Laboratory Block – Fire Alarm Cable	09 <sup>th</sup> July 2010	BCL to provide costs to substitute Prysmian FP200 plus cable system in lieu of MICCE cable system. Cost uploaded to notes section by BCL and under review by NHS team	
384	PMI/General/025	Laboratory Project – Fixed Sun-shading Fins	23 <sup>rd</sup> July 2010	Links to BCL-EW-028 Board confirmed that Brookfield may proceed and install fixed sun shading fins to the office pod of the Laboratory Block in lieu of moveable fins.	
386	PMI/General/026	Laboratory Block Fire Stair Handrails and Balustrades.	30 <sup>th</sup> July 2010	Links to BCL-EW-030 BCL to provide potential VE saving if handrails and balustrades within the fire stairs is changed from stainless steel to mild steel painted.	

**COMPENSATION EVENTS**

The following Compensation Events have been submitted as at 05/08/2010:

				
Sypro ID No	NHS Ref No	Item	Date Issued	Status
4294	CE 001	Removal of Asbestos Building Board	10th March 2010	Agreed
4295	CE 002	Removal of Japanese Knotweed	10th March 2010	Agreed
4296	CE 003	Removal of Excess Spoil	10th March 2010	Agreed
4451	CE 004	Water Main within Basement Footprint	25 <sup>th</sup> May 2010	Agreed
4501	CE 005	PMI / General / 017 - Laboratory Block - Mortuary (Basement Level -1) Room L-1/B/027	3 <sup>rd</sup> June 2010	Agreed
4528	CE 006	AGV System - Cart Washer Removal	9 <sup>th</sup> June 2010	Agreed
4632	CE 007	Labs Project - Copper Cladding to external columns	28 <sup>th</sup> June 2010	Agreed
4660	CE 008	Kitchen Relocation from level 3 to Basement	02 <sup>nd</sup> July 2010	Agreed
4661	CE 009	Service drain to the side of the Laboratories Building (BCL-EW-018) Sypro 6732	02 <sup>nd</sup> July 2010	Agreed
4676	CE 010	Borehole water supply	7 <sup>th</sup> July 2010	Costs under consideration by NHS

## NEC3 – STATUS UPDATE

## EARLY WARNINGS

The following Early Warnings have been submitted to the NHS Board as at 12/08/2010:

<div>  </div>					
Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6715	BCL-EW-001	Brookfield Value Engineering Items	13 January 2010	Value impact work in progress Focus on Tunnel Arrangement – Pack received by Board 01/02/2010	10/02/2010 (PM PMI 003)
6716	BCL-EW-002	Mobile Phone Mast Location	8 <sup>th</sup> February 2010	Agreement in principle re Scottish Water Land Acquisition. Works on-going to purchase land. EW to be closed out	22/07/2010
6717	BCL-EW-003	Utilities (1MVA) Power	10 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6718	BCL-EW-004	Utilities (11kv Breaker)	10 Feb 2010	Part of Scottish Power Quotation	13/04/2010
6719	BCL-EW-005	Utilities (Moving 11KV Circuit Breakers) – Hospitals	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6720	BCL-EW-006	Utilities (Moving 11KV Circuit Breakers) – Labs	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6721	BCL-EW-007	Discovery of Foundations and Brickwork (Labs Site)	3 <sup>rd</sup> March 2010	Dunne's have removed foundations and brickwork.	8/04/2010 (PMI/General/013)
6722	BCL-EW-008	Planning Issues (Labs Render)	4 <sup>th</sup> March 2010	Agreed at EW Meeting 17/06/2010 to close EW out	17/06/2010
6723	BCL-EW-009	Planning Issues (Adult and Children's Render)	5 <sup>th</sup> March 2010	<p>BCL worked with Planning Dept to identify agreeable finishes. Indicative costs circa £500k and would like the Board to contribute to the cost. BCL progressed to ensure there was no delay to Planning.</p> <p>BCL to provide info re costs and % share requested from Board for AS to present to RC.</p> <p>BCL currently drafting report.</p> <p>Should be resolved by End September (Planning Process)</p>	
6724	BCL-EW-010	Repositioning of Labs Building	8 <sup>th</sup> March 2010	Cross reference with PMI / General / 008 and PMI / General / 009	10 <sup>th</sup> March 2010 (PMI/General/009) PART OF STAGE E
6725	BCL-EW-011	Water Main within Basement Footprint	9 <sup>th</sup> March 2010	Water main being diverted 13/03/2010	08/04/2010 (PMI/General/014)

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6726	BCL-EW-012	Access Road serving the laboratories	19 <sup>th</sup> March 2010	Request for instruction to extend the access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10 <sup>th</sup> June 2010
6727	BCL-EW-013	Laboratories Tunnel	29 <sup>th</sup> March 2010	Request to construct the Labs tunnel beyond the extents of the new access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10 <sup>th</sup> June 2010
6728	BCL-EW-014	Increase in Building Control Fees	14 <sup>th</sup> April 2010	BCL submitted Building Warrant Application. Expectation that receiving building warrant locks design into current legislation.  BCL identifying impending changes to legislation for discussion with the NHS team.  BCL negotiations with GCC to be concluded by 15 <sup>th</sup> July 2010.  Work ongoing by BCL. Early indication cost circa £1.1m. BCL working to reduce this cost (hopefully down to £750k)	
6729	BCL-EW-015	Junctions at Govan Road	14 <sup>th</sup> April 2010	NHS confirmed that SW have advised that they are unwilling to alter their junctions at Govan Road. WSP to be asked if GCC can serve a left turn only enforcement notice on SW.  Junction information indicated on Masterplan submitted end April and VISSIM model shows no impact on junction. RCC will conclude this issue.	
				Discussion re private or adopted road. PM view that road should be private but built to adoptable road standard. DS agreed to discuss with Jim Miller.  BCL to be instructed not to submit Section 56 application and instead do RCC.	

Sypro ID	NHS Ref No.	Item	Date Raised	Status	Date Completed
6730	BCL-EW-016	Kitchen Relocation from level 3 to Basement	14 <sup>th</sup> April 2010	NHS team obtaining still to obtain formal Board sign off however AS confirmed that BCL can undertake kitchen relocation from level 3 to the basement. NHS will raise a CEN.	1 <sup>st</sup> July 2010
6731	BCL-EW-017	Compatibility of the existing Kitchen cart/trolleys and the Proposed AGV Robotic System	15 <sup>th</sup> April 2010	AGV Strategy not signed off by FM. Karen Connelly advised that AGV compatible carts are available from suppliers. Costs and precise numbers of required carts being prepared. Anticipated cost £300k+  BCL to identify a contribution towards the costs of new carts in place of the costs to make carts adaptable.  BCL to arrange workshop to enable full description/presentation of system performance to NHS team.	
6732	BCL-EW-018	Service drain to the side of the Laboratories Building	21 <sup>st</sup> April 2010	Board to review costs and advise BCL on way forward. There are two service drain issues: 1 – Children's hospital drainage – NHS confirmed the children's hospitals drainage works had been agreed. NHS will raise a CEN 2 – Attenuation. BCL will raise the attenuation issue as a separate EW. NHS confirmed that attenuation works could not be undertaken until post FBC.	1 <sup>st</sup> July 2010
					Attenuation EW to be raised separately.  BCL discussions ongoing.
6733	BCL-EW-019	Purchase of land from Scottish Water	21 <sup>st</sup> April 2010	District Valuer valuation awaited. Land acquisition will be progressed post FBC. Planning application submitted.  Valuation received from District Valuer which is within budget. CLO progressing purchase of land. NHS will need to prepare a title plan. The Project will need to provide Scottish Water with a new access road.	
6734	BCL-EW-020	Contamination within Water System	21 <sup>st</sup> April 2010	Contamination issue dealt with.  BCL to check if this EW can be closed off.  DMcF agreed this EW should be closed off.	05 <sup>th</sup> August 2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6735	BCL-EW-021	Discovery of Flammable Gas within Ground in Basement	7 <sup>th</sup> May 2010	BCL to provide extract from SI Report re ground gas information. BCL Consultants to produce a report. BCL and Board team to agree to a definition of what is 'significant'. BCL reports that SI stated very minimum pockets of gas however methane had been discovered in 9 out of 12 boreholes. The sampling works information provided by the Board was insufficient.  BCL have identified the problem boreholes and they will provide further information to DR immediately. Item to be discussed at next meeting.	
6959	BCL-EW-023	Design development of the Substation within the car park resulting in a reduction of available parking space.	21 <sup>st</sup> May 2010	PMG agreed this EW should be closed off	25/05/2010
6960	BCL-EW-024	Roof top Helipad	21 <sup>st</sup> May 2010	Revised report issued 16 <sup>th</sup> June 2010 (reflects proper flight paths and helicopter type). NHS confirmed that GCC Planners satisfied with distance of Helipad from local housing. BCL to instruct Jim Miller to provide report and summary of report findings to Jim Patrick. This EW to be closed off.	10/06/2010
6961	BCL-EW-025	Car Park 1 Conflict with Masterplan	21 <sup>st</sup> May 2010	NHS confirmed no conflict. EW to be closed off.	10/06/2010
6967	BCL-EW-026	External Walls: Copper Cladding to Columns	27 <sup>th</sup> May 2010	NHS to review cost information provided by BCL DR requesting reconciliation cost information re elevations, i.e. block work, granite etc	28/06/2010
6968	BCL-EW-027	Swisslog Robotics (stage 3)	27 <sup>th</sup> May 2010	BCL agreed to put in additional bay. BCL to check if this EW can be closed off. DMcF agreed this EW can be closed off.	
6972	BCL-EW-028	Moveable Vertical Fins to Laboratory Pod	2 <sup>nd</sup> June 2010	BCL to provide modeling information and demonstration re moveable fins v's static fins. BCL agreed to provide information by Friday 25 <sup>th</sup> June 2010  BCL indicated potential early cost saving calculation as £150K. NHS to raise PMI and EW to be closed off.  Cross reference with PMI / General / 025	23/07/10
6987	BCL-EW-029	Building Control concerns over sub-compartmentation exits from wards	29 <sup>th</sup> June 2010	Closed – Refers to NHS-EW-015 (6895)	30/06/2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6993	BCL-EW-030	Proposal to change escape stair and mortuary stair handrails	16 <sup>th</sup> July 2010	<p>Board to consider changing mortuary stair and escape stair handrails to painted stainless steel.</p> <p>BCL to provide images/photos of painted handrails to NHS team. (DS to provide PM with samples).</p> <p>Closed - Cross reference with PMI / General / 026</p>	30/07/2010
7009	BCL-EW-031	Delay in Commencing Demolition works to Stage 3 Site	6 <sup>th</sup> August 2010	<p>Board to provide BCL with asbestos survey information, ongoing isolation of services and other decommissioning information to allow demolitions to commence.</p> <p>NHS have provided Asbestos Survey information to BCL re residencies A, B and D, Library and Walton Building. NHS will progress remaining isolations. Services survey completed and gas main identified – traced as only servicing the catering building.</p>	

## Potential Early Warnings to be raised by BCL

		External Windows (Tower) – Addition of obscure film to windows		<p>Suggested at User Group meeting that Board may wish to explore the addition of obscure film to windows. BCL confirmed this would be an additional cost. AS confirmed that Board would not be pursuing the addition of obscure film to windows as the windows will have interstitial blinds. NHS to confirm if window cills to be raised/windows to be made smaller.</p> <p>BCL to ensure that NHS Team involved in interstitial blinds to ensure they can be appropriately maintained.</p> <p>BCL to provide sight-line from the head of a person lying in bed.</p> <p>BCL to arrange meeting with Structural.</p>	
		Slanted cills/Secondary glazing flush windows		NHS confirmed that this item specifically relates to theatres. KC confirmed that the Theatres cannot have any ledges which would allow dust to collect. NHS reported that it is responsibility of BCL to comply with HAI.	

		Boxing Out – Media Panels		NHS team confirmed that this item relates specifically to the Renal ward as plans show 8 bed heads against the curtain walling. The bed heads will need to be able to be serviced. Design Development proposed boxing out as a way of achieving requirements (this is not a change to the Board's Requirements).

The following Early Warnings have been submitted to BCL as at 12/08/2010

					
Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6699	NHS-EW-001	Stage D to E Reconciliation	14 January 2010	DH to liaise with Paul Fairie and Manny Ajuwon. Equipment list to be reissued to BCL. The 6 'empty' rooms to be finalised. PS to agree final decision as proposed by DR at PMG  VE for glazed screens to be removed from Stage D to E reconciliation exercise – discussions on going as to glazed screens being a VE item.	
6701	NHS-EW-002	Testing of Building Board Material on Site	21 January 2010	Complete - CE 001 Issued	11/03/2010
6704	NHS-EW-003	Japanese Knotweed Survey	21 January 2010	Complete – CE 002 issued	11/03/2010
6705	NHS-EW-004	Excavated Building Materials/Spoil	21 January 2010	Complete PMI 004 issued CE 003 issued	11/03/2010
6706	NHS-EW-005	Live HV Cable – SGH Site	27 January 2010	Complete - disconnect live HV cable	7/02/2010
6952	NHS-EW-006	Borehole water	15 February 2010	Complete - PMI 020 issued	23/06/10
6953	NHS-EW-007	Adult Hospital – Haemato-Oncology Area	12 <sup>th</sup> March 2010	Complete - PMI 021 issued	23/06/10
6954	NHS-EW-008	Oncology Ward - Specialist ventilation	16th April 2010	Complete - PMI 021 issued	23/06/10
	NHS-EW-009	REF NO – NOT USED			
6955	NHS-EW-010	Site Electrical Load	16th April 2010	Complete - PMI 019 issued	23/06/10
6956	NHS-EW-011	Patient Hoists and Structural Support	16 <sup>th</sup> April 2010	BCL advised of omission of 100 (nr) patient hoist including structural support from wards. Response from BCL awaited by Board.  Board to issue PMI and request costs then close out this EW.	10/08/2010  Links to PMI/General/027

				Board to confirm final no's. Work ongoing. PM will issue information.	
	NHS-EW-012	REF NO – NOT USED			
6957	NHS-EW-013	HV Generators	16 <sup>th</sup> April 2010	Closed out - Links to NHS-EW-010. PMI 019 issued	16/06/2010
6981	NHS-EW-014	New Children's Hospital – Theatre Recovery Area	21 <sup>st</sup> June 2010	Closed out – links to PMI/General/022	30 <sup>th</sup> June 2010
6985	NHS-EW-015	Adult & Children's Hospitals Fire Strategy	23 <sup>rd</sup> June 2010	<p>Board wish to understand the BCL programme and plans to take forward the fire strategy</p> <p>Reports been submitted. Compartmentation drawings and fire report (minus atrium) being submitted the following week.</p> <p>Fire report has been submitted, awaiting response from Head of Building Control. BCL met with Raymond Barlow and progressing.</p>	
7010	NHS-EW-016	Appendix K Review and Programme	10 <sup>th</sup> August 2010	<p>Attend meeting to discuss and agree simplified process to ensure App K review completed within the timescale leading up to FBC and allow the Board adequate time to consider and review information.</p> <p>Board confirmed that they are not receiving the final documents for formal sign-off. Board required clarity of what needs signed off before FBC and focus on that is essential.</p>	
6999	NHS-EW-017	Adult & Children's Hospitals Single Rooms - Bi-fold Doors En-suites.	30 <sup>th</sup> July 2010	<p>Board wish to consider a possible change to their project requirements, with the removal of the bi-fold door arrangement to the en-suite shower rooms. BCL to trial alternative door solution in mock up.</p> <p>Two leaf door has been constructed in mock up. User group visits scheduled, following which Board will draft response. BCL to provide two leaf door option costs.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6988	NHS-EW-018	AGV System - Adult and Children's Hospitals	29 <sup>th</sup> June 2010	<p>The Board will require to see the integration of the proposed system in full compliance with the Board's stated requirements and set out within the 1:200 departmental layouts prior to the final sign off of the layouts.</p> <p>Work in progress. DS to liaise with Nightingales.</p> <p>BCL to liaise with Nightingales and provide drawings for review.</p> <p>Final layout plans awaited for formal sign-off by Board team. Clarification awaited from BCL re area allocated for AGV holds (differences in areas from floor to floor). Clarification awaited from BCL re impact on Fire Escape travel distance in light of recent AGV change (i.e. blocking up a door)</p>	
		IT Racks		<p>BCL to raise EW</p> <p>Board team currently mitigating the IT Racks issue. Board will confirm the IT requirements asap.</p> <p>BCL raising an RFI to Board re what is going on the racks</p> <p>AS organising a meeting with IT to discuss IT racks and requirements. DS to provide image of Peterborough data centre to NHS team.</p> <p>Meeting next week to discuss and confirm if EW is required.</p>	
		Vision panels		BCL to raise EW (Value Engineering item)	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BCL as at 12/08/2010:

					
Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
323	MB/PM/General/001	Stage 1 Laboratories - Start on Site Date	27th January 2010	Closed out	27/01/2010
324	MB/PMI/General/002	Revision to Contract Assessment Dates	8th February 2010.	Closed out	08/02/2010
325	LAB / PM / General / 003	Laboratory Block – Tunnel Reconfiguration	10th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
326	PMI / General / 004	Excavated Materials / Spoil	23rd February 2010	Closed out	10/03/2010
327	PMI / General / 005	Laboratory Project - Future Expansion	23rd February 2010	Ongoing assessment as part of Stage d to e reconciliation	
328	PMI / General / 006	Laboratory Project - Basement Floor Level	26th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
329	PMI / General / 007	Laboratory Project - Ventilation to PM tables	26th February 2010	Ongoing assessment as part of Stage d to e reconciliation	
330	PMI / General / 008	Laboratory - Stage E Civil & Structural Engineering Drawings	9th March 2010	Ongoing assessment as part of Stage d to e reconciliation	
331	PMI / General / 009	Laboratory Project - Relocation of Footprint	10th March 2010	Closed out	10/03/2010
332	PMI / General / 010	Laboratory project – Architectural drawings and NBS Specification	23 <sup>rd</sup> March 2010	Ongoing assessment as part of Stage d to e reconciliation. AL 70 series drawings to be confirmed	
333	PMI / General / 011	Laboratory Block – VE Review 1	25 <sup>th</sup> March 2010	Ongoing assessment as part of Stage d to e reconciliation M&E updated drawings to be provided	
334	PMI / General / 012	AGV System - Cart Washer	25 <sup>th</sup> March 2010	Cart Washer not required by Board. CE notified by BCL (CE 006) CE accepted by Board	9/06/2010
335	PMI / General / 013	Laboratory Project – Removal of Foundation from Old Rec Pavilion	8 <sup>th</sup> April 2010	Closed out No cost	08/04/2010
336	PMI / General / 014	Laboratory Project – Diversion of Water Main	8 <sup>th</sup> April 2010	CE notified by BCL (CE 004) CE accepted by Board	25/05/2010
337	PMI / General / 015	Removal of Japanese Knotweed (Bunded Area) Off Site	28 <sup>th</sup> April 2010	CE raised by BCL (CE 002) CE accepted by Board	10/06/2010
351	PMI / General / 016	Laboratory - Stage E - Mechanical and Electrical Drawings and Specification	17 <sup>th</sup> May 2010	Confirmation of drawing hierarchy as at 17 <sup>th</sup> May 2010 – stage D to E	
356	PMI / General / 017	Laboratory Block – Mortuary (Basement Level -1) Room L-1/B/027	31 <sup>st</sup> May 2010	CE notified by BCL (CE005) CE accepted by Board	24/06/2010
367	PMI / General / 018	Laboratory Project-Mortuary X Ray Room L1/B/027	17 <sup>th</sup> June 2010	To be read in conjunction with PMI / General / 017 New room layout to be designed Proposal received from Wallace Whittle, BCL to review. BCL review ongoing.	

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
368	PMI/General/019	Change to Electrical Load requirements	23rd June 2010	Linked to NHS-EW-010 and NHS-EW-013. BCL to provide costs. BCL instructed Mercury to provide quotes. BCL reported that they would need to check that the space remains. BCL confirmed costs uploaded to SYpro for review by NHS team.	
369	PMI/General/020	Borehole Water Supply	23rd June 2010	Board reviewing cost information received from BCL CE event raised by BCL. Board pursuing confirmation letter from Business Stream. LM to ask Hugh McDerment to follow up on letter. NHS Team to progress	
370	PMI/General/021	HAEMATO-ONCOLOGY WARD	23rd June 2010	Links to NHS-EW-007 and NHS-EW-008 BCL to provide an indication of the cost saving to remove the additional filtration to the 8 No rooms and ensuites. Discussion ongoing to clarify where filtration removal would occur i.e. in each room or at a central point. If filtration removal is from each room then cost saving 8 x £800. BCL will confirm.	
375	PMI/General/022	New Children's Hospital – Theatre Recovery Area	30 <sup>th</sup> June 2010	Links to NHS-EW-014 (Sypro 6981) Board confirmed that they no longer require fixed solid partition walls between recovery bays (17 bays). BCL to provide updated 1:50 theatre plans and provide costs. Work in progress.	
381	PMI / General /023	Stage 3 Adult Hospital CCU Bed Bay Dividers	8 <sup>th</sup> July 2010	BCL to provide revised layout omitting single bed bay glass screens for approval by the Board team BCL to provide cost saving for the removal BCL to provide drawing for review – work in progress.	
383	PMI/General/024	Laboratory Block – Fire Alarm Cable	09 <sup>th</sup> July 2010	BCL to provide costs to substitute Prysmian FP200 plus cable system in lieu of MICCE cable system. Cost uploaded to notes section by BCL and under review by NHS team Agreed PMI to be closed off. Cost saving circa £40k	12/08/2010

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
384	PMI/General/025	Laboratory Project – Fixed Sun-shading Fins	23 <sup>rd</sup> July 2010	Links to BCL-EW-028 Board confirmed that Brookfield may proceed and install fixed sun shading fins to the office pod of the Laboratory Block in lieu of moveable fins. Agreed PMI to be closed off	12/08/2010
386	PMI/General/026	Laboratory Block Fire Stair Handrails and Balustrades.	30 <sup>th</sup> July 2010	Links to BCL-EW-030 BCL to provide potential VE saving if handrails and balustrades within the fire stairs are changed from stainless steel to mild steel painted.	
391	PMI/General/027	New Adult and Children's Hospital Ceiling Mounted Hoist requirements	10 <sup>th</sup> August 2010	Links to NHS EW 011 (Sypro 6956) Board confirmed specifications and numbers of patient hoist requirements. BCL to provide cost.  Discussed whether this item would be a VE. NHS team confirmed that this would not be a VE and would be a change to target price.	

### COMPENSATION EVENTS

The following Compensation Events have been submitted as at 12/08/2010:

						
Sypro ID No	NHS Ref No	Item	Date Issued	Status		
4294	CE 001	Removal of Asbestos Building Board	10 <sup>th</sup> March 2010	Agreed		
4295	CE 002	Removal of Japanese Knotweed	10 <sup>th</sup> March 2010	Agreed		
4296	CE 003	Removal of Excess Spoil	10 <sup>th</sup> March 2010	Agreed		
4451	CE 004	Water Main within Basement Footprint	25 <sup>th</sup> May 2010	Agreed		
4501	CE 005	PMI / General / 017 - Laboratory Block - Mortuary (Basement Level -1) Room L-1/B/027	3 <sup>rd</sup> June 2010	Agreed		
4528	CE 006	AGV System - Cart Washer Removal	9 <sup>th</sup> June 2010	Agreed		
4632	CE 007	Labs Project - Copper Cladding to external columns	28 <sup>th</sup> June 2010	Agreed		
4660	CE 008	Kitchen Relocation from level 3 to Basement	02 <sup>nd</sup> July 2010	Agreed		
4661	CE 009	Service drain to the side of the Laboratories Building (BCL-EW-018) Sypro 6732	02 <sup>nd</sup> July 2010	Agreed		
4676	CE 010	Borehole water supply	7 <sup>th</sup> July 2010	Costs under consideration by NHS		

## NEC3 – STATUS UPDATE

## EARLY WARNINGS

The following Early Warnings have been submitted to the NHS Board as at 25/08/2010:

<div>  </div>					
Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6715	BCL-EW-001	Brookfield Value Engineering Items	13 January 2010	Value impact work in progress Focus on Tunnel Arrangement – Pack received by Board 01/02/2010	10/02/2010 (PM PMI 003)
6716	BCL-EW-002	Mobile Phone Mast Location	8 <sup>th</sup> February 2010	Agreement in principle re Scottish Water Land Acquisition. Works on-going to purchase land. EW to be closed out	22/07/2010
6717	BCL-EW-003	Utilities (1MVA) Power	10 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6718	BCL-EW-004	Utilities (11kv Breaker)	10 Feb 2010	Part of Scottish Power Quotation	13/04/2010
6719	BCL-EW-005	Utilities (Moving 11KV Circuit Breakers) – Hospitals	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6720	BCL-EW-006	Utilities (Moving 11KV Circuit Breakers) – Labs	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6721	BCL-EW-007	Discovery of Foundations and Brickwork (Labs Site)	3 <sup>rd</sup> March 2010	Dunne's have removed foundations and brickwork.	8/04/2010 (PMI/General/013)
6722	BCL-EW-008	Planning Issues (Labs Render)	4 <sup>th</sup> March 2010	Agreed at EW Meeting 17/06/2010 to close EW out	17/06/2010
6723	BCL-EW-009	Planning Issues (Adult and Children's Render)	5 <sup>th</sup> March 2010	<p>BCL worked with Planning Dept to identify agreeable finishes. Indicative costs circa £500k and would like the Board to contribute to the cost. BCL progressed to ensure there was no delay to Planning.</p> <p>BCL to provide info re costs and % share requested from Board for AS to present to RC.</p> <p>Planners still to agree elevations. NHS team to be more involved in the design process re frontage and landscaping. NHS to be provided with any iterations of the frontage.</p> <p>Should be resolved by End September (Planning Process)</p>	
6724	BCL-EW-010	Repositioning of Labs Building	8 <sup>th</sup> March 2010	Cross reference with PMI / General / 008 and PMI / General / 009	10 <sup>th</sup> March 2010 (PMI/General/009) PART OF STAGE E

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6725	BCL-EW-011	Water Main within Basement Footprint	9 <sup>th</sup> March 2010	Water main being diverted 13/03/2010	08/04/2010 (PMI/General/014)
6726	BCL-EW-012	Access Road serving the laboratories	19 <sup>th</sup> March 2010	Request for instruction to extend the access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10 <sup>th</sup> June 2010
6727	BCL-EW-013	Laboratories Tunnel	29 <sup>th</sup> March 2010	Request to construct the Labs tunnel beyond the extents of the new access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10 <sup>th</sup> June 2010
6728	BCL-EW-014	Increase in Building Control Fees	14 <sup>th</sup> April 2010	BCL submitted Building Warrant Application. Expectation that receiving building warrant locks design into current legislation.  BCL identifying impending changes to legislation for discussion with the NHS team.  BCL negotiations with GCC to be concluded by 15 <sup>th</sup> July 2010.  Work ongoing by BCL. Early indication cost circa £1.1m. BCL working to reduce this cost (hopefully down to £750k) by pursuing agreement for WSP self certification.	

Sypro ID	NHS Ref No.	Item	Date Raised	Status	Date Completed
6729	BCL-EW-015	Junctions at Govan Road	14 <sup>th</sup> April 2010	NHS confirmed that SW have advised that they are unwilling to alter their junctions at Govan Road. WSP to be asked if GCC can serve a left turn only enforcement notice on SW.  Junction information indicated on Masterplan submitted end April and VISSIM model shows no impact on junction. RCC will conclude this issue.	
				Discussion re private or adopted road. PM view that road should be private but built to adoptable road standard. DS agreed to discuss with Jim Miller.  BCL to be instructed not to submit Section 56 application and instead do RCC.  BCL furthering RCC discussions with GCC. Breaking down RCC into sequences.  BCL are in process of identifying items for Section 56 which Board needs to undertake.	
6730	BCL-EW-016	Kitchen Relocation from level 3 to Basement	14 <sup>th</sup> April 2010	NHS team obtaining still to obtain formal Board sign off however AS confirmed that BCL can undertake kitchen relocation from level 3 to the basement. NHS will raise a CEN.	1 <sup>st</sup> July 2010
6731	BCL-EW-017	Compatibility of the existing Kitchen cart/trolleys and the Proposed AGV Robotic System	15 <sup>th</sup> April 2010	AGV Strategy not signed off by FM. Karen Connelly advised that AGV compatible carts are available from suppliers. Costs and precise numbers of required carts being prepared. Anticipated cost £300k+  BCL to identify a contribution towards the costs of new carts in place of the costs to make carts adaptable.  BCL in discussion with Swisslog re Compliance of their original design. BCL meeting with Swisslog next week to go through AGV Strategy and will organise a workshop session with the NHS thereafter.	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6732	BCL-EW-018	Service drain to the side of the Laboratories Building	21 <sup>st</sup> April 2010	Board to review costs and advise BCL on way forward. There are two service drain issues: 1 – Children's hospital drainage – NHS confirmed the children's hospitals drainage works had been agreed. NHS will raise a CEN 2 – Attenuation. BCL will raise the attenuation issue as a separate EW. NHS confirmed that attenuation works could not be undertaken until post FBC.	1 <sup>st</sup> July 2010  Attenuation EW to be raised separately.  BCL discussions ongoing.
6733	BCL-EW-019	Purchase of land from Scottish Water	21 <sup>st</sup> April 2010	Valuation received from District Valuer which is within budget. CLO progressing purchase of land. NHS will need to prepare a title plan. The Project will need to provide Scottish Water with a new access road.	
6734	BCL-EW-020	Contamination within Water System	21 <sup>st</sup> April 2010	Contamination issue dealt with.  BCL to check if this EW can be closed off.  DMcF agreed this EW should be closed off.	05 <sup>th</sup> August 2010
6735	BCL-EW-021	Discovery of Flammable Gas within Ground in Basement	7 <sup>th</sup> May 2010	BCL to provide extract from SI Report re ground gas information. BCL Consultants to produce a report. BCL and Board team to agree to a definition of what is 'significant'. BCL reports that SI stated very minimum pockets of gas however methane had been discovered in 9 out of 12 boreholes. The sampling works information provided by the Board was insufficient.  BCL have identified the problem boreholes and they will provide further information to DR immediately.  BCL have met with Stent. Stent confirmed that they are still requesting cost. Information to be provided to DR asap.	
6959	BCL-EW-023	Design development of the Substation within the car park resulting in a reduction of available parking space.	21 <sup>st</sup> May 2010	PMG agreed this EW should be closed off	25/05/2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6960	BCL-EW-024	Roof top Helipad	21 <sup>st</sup> May 2010	Revised report issued 16 <sup>th</sup> June 2010 (reflects proper flight paths and helicopter type). NHS confirmed that GCC Planners satisfied with distance of Helipad from local housing. BCL to instruct Jim Miller to provide report and summary of report findings to Jim Patrick. This EW to be closed off.	10/06/2010
6961	BCL-EW-025	Car Park 1 Conflict with Masterplan	21 <sup>st</sup> May 2010	NHS confirmed no conflict. EW to be closed off.	10/06/2010
6967	BCL-EW-026	External Walls: Copper Cladding to Columns	27 <sup>th</sup> May 2010	NHS to review cost information provided by BCL DR requesting reconciliation cost information re elevations, i.e. block work, granite etc	28/06/2010
6968	BCL-EW-027	Swisslog Robotics (stage 3)	27 <sup>th</sup> May 2010	BCL agreed to put in additional bay. BCL to check if this EW can be closed off. DMcF agreed this EW can be closed off.	
6972	BCL-EW-028	Moveable Vertical Fins to Laboratory Pod	2 <sup>nd</sup> June 2010	BCL to provide modeling information and demonstration re moveable fins v's static fins. BCL agreed to provide information by Friday 25 <sup>th</sup> June 2010  BCL indicated potential early cost saving calculation as £150K. NHS to raise PMI and EW to be closed off.  Cross reference with PMI / General / 025	23/07/10
6987	BCL-EW-029	Building Control concerns over sub-compartmentation exits from wards	29 <sup>th</sup> June 2010	Closed – Refers to NHS-EW-015 (6895)	30/06/2010
6993	BCL-EW-030	Proposal to change escape stair and mortuary stair handrails	16 <sup>th</sup> July 2010	Board to consider changing mortuary stair and escape stair handrails to painted stainless steel.  Closed - Cross reference with PMI / General / 026	30/07/2010
7009	BCL-EW-031	Delay in Commencing Demolition works to Stage 3 Site	6 <sup>th</sup> August 2010	Board to provide BCL with asbestos survey information, ongoing isolation of services and other decommissioning information to allow demolitions to commence.  NHS have provided Asbestos Survey information to BCL re residencies A, B and D, Library and Walton Building. NHS will progress remaining isolations. Services survey completed and gas main identified – traced as only servicing the catering building.	

7010	BCL-EW-032	Discovery of Existing Gas Pipe Running Through Site	13 <sup>th</sup> August 2010	<p>An existing gas main has been discovered running through the Labs site. Further investigations are being undertaken by the Board to determine exact routing.</p> <p>NHS Team confirmed that arrangements to cap and terminate pipe would be made once old kitchen is closed down and confirmation received that new kitchen is fully operational.</p>	
7014	BCL-EW-033	External Windows (Tower) – Addition of obscure film to windows	18 <sup>th</sup> August 2010	<p>Suggested at User Group meeting that Board may wish to explore the addition of obscure film to windows. BCL confirmed this would be an additional cost of circa £210,000.00. AS confirmed that Board would not be pursuing the addition of obscure film to windows as the windows will have interstitial blinds.</p> <p>NHS to confirm if window sills to be raised/windows to be made smaller.</p> <p>BCL to ensure that NHS Team involved in interstitial blinds to ensure they can be appropriately maintained.</p> <p>BCL to provide sight-line from the head of a person lying in bed.</p> <p>BCL to arrange meeting with Structal.</p>	18/08/2010
7018	BCL-EW-034	Potential Value Engineering M & E items for consideration	19 <sup>th</sup> August 2010	NHS reviewing list	
7020	BCL-EW-035	Revised lift strategy for Adult & Children	23 <sup>rd</sup> August 2010	NHS reviewing proposal. BCL to provide drawing/key to location of lift cores.	

		IT Racks		<p>BCL to raise EW Board team currently mitigating the IT Racks issue. Board will confirm the IT requirements asap. BCL raising an RFI to Board re what is going on the racks AS organising a meeting with IT to discuss IT racks and requirements. DS to provide image of Peterborough data centre to NHS team.</p> <p>Meeting next week to discuss and confirm if EW is required.</p>	
		Vision panels		BCL to raise EW (Value Engineering item)	
		Ground contamination (remainder of site)		<p>2 hot spot areas (asbestos and fluorocarbon) have been identified. Potential for problems from SEPA. Ground gases identified and proposing to deal with on an on-going basis.</p> <p>Long chain hydro-carbons have been identified in 1 borehole and CO has been identified in a borehole at the Energy Centre location. WSP obtained readings consistently above 10% - concern raised that may be getting closer to the centre of increased gases.</p> <p>New directive indicated that GCC may refer ground gas and oil issue to SEPA.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6699	NHS-EW-001	Stage D to E Reconciliation	14 January 2010	Agreed to close out. Refer to CE 010	18/08/2010
6701	NHS-EW-002	Testing of Building Board Material on Site	21 January 2010	Complete - CE 001 Issued	11/03/2010
6704	NHS-EW-003	Japanese Knotweed Survey	21 January 2010	Complete- CE 002 issued	11/03/2010
6705	NHS-EW-004	Excavated Building Materials/Spoil	21 January 2010	Complete - PMI 004 issued, CE 003 issued	11/03/2010
6706	NHS-EW-005	Live HV Cable – SGH Site	27 January 2010	Complete - disconnect live HV cable	7/02/2010
6952	NHS-EW-006	Borehole water	15 February 2010	Complete - PMI 020 issued	23/06/10
6953	NHS-EW-007	Adult Hospital – Haemato-Oncology Area	12 <sup>th</sup> March 2010	Complete - PMI 021 issued	23/06/10
6954	NHS-EW-008	Oncology Ward - Specialist ventilation	16th April 2010	Complete - PMI 021 issued	23/06/10
	NHS-EW-009	REF NO – NOT USED			
6955	NHS-EW-010	Site Electrical Load	16th April 2010	Complete - PMI 019 issued	23/06/10
6956	NHS-EW-011	Patient Hoists and Structural Support	16 <sup>th</sup> April 2010	Refer to PMI 027 issued	10/08/2010
	NHS-EW-012	REF NO – NOT USED			
6957	NHS-EW-013	HV Generators	16 <sup>th</sup> April 2010	Closed out - Links to NHS-EW-010. PMI 019 issued	16/06/2010
6981	NHS-EW-014	New Children's Hospital – Theatre Recovery Area	21 <sup>st</sup> June 2010	Closed out – links to PMI/General/022	30 <sup>th</sup> June 2010
6985	NHS-EW-015	Adult & Children's Hospitals Fire Strategy	23 <sup>rd</sup> June 2010	<p>Board wish to understand the BCL programme and plans to take forward the fire strategy</p> <p>Reports been submitted. Compartmentation drawings and fire report (minus atrium) being submitted the following week.</p> <p>Fire report has been submitted, awaiting response from Head of Building Control. BCL meeting with Raymond Barlow on 19<sup>th</sup> August.</p> <p>BCL identified worst case scenario and potential solutions i.e. installing an extra set of doors, fire curtain. NHS requested that consideration be given to potential issue of someone being hurt if standing below the fire curtain when the alarm goes off.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
7010	NHS-EW-016	Appendix K Review and Programme	10 <sup>th</sup> August 2010	<p>Attend meeting to discuss and agree simplified process to ensure App K review completed within the timescale leading up to FBC and allow the Board adequate time to consider and review information.</p> <p>Board confirmed that they are not receiving the final documents for formal sign-off. Board required clarity of what needs signed off before FBC and focus on that is essential.</p> <p>BCL (DB) agreed to issue Appendix K list and tracker by the following day.</p>	
6999	NHS-EW-017	Adult & Children's Hospitals Single Rooms - Bi-fold Doors En-suites.	30 <sup>th</sup> July 2010	<p>Board wish to consider a possible change to their project requirements, with the removal of the bi-fold door arrangement to the en-suite shower rooms.</p> <p>BCL to trial alternative door solution in mock up.</p> <p>Two leaf door has been constructed in mock up. User group visits scheduled, following which Board will draft response. BCL to provide two leaf door option costs.</p>	
6988	NHS-EW-018	AGV System - Adult and Children's Hospitals	29 <sup>th</sup> June 2010	<p>The Board will require to see the integration of the proposed system in full compliance with the Board's stated requirements and set out within the 1:200 departmental layouts prior to the final sign off of the layouts.</p> <p>BCL to liaise with Nightingales and provide drawings for review.</p> <p>Final layout plans awaited for formal sign-off by Board team. Clarification awaited from BCL re area allocated for AGV holds (differences in areas from floor to floor). Clarification awaited from BCL re impact on Fire Escape travel distance in light of recent AGV change (i.e. blocking up a door).</p> <p>KC has reviewed drawings. Agreed to close off the EW.</p>	18/08/2010

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BCL as at 25/08/2010:

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
323	MB/PM/General/001	Stage 1 Laboratories - Start on Site Date	27th January 2010	Closed out	27/01/2010
324	MB/PMI/General/002	Revision to Contract Assessment Dates	8th February 2010.	Closed out	08/02/2010
325	LAB / PM / General / 003	Laboratory Block – Tunnel Reconfiguration	10th February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
326	PMI / General / 004	Excavated Materials / Spoil	23rd February 2010	Closed out	10/03/2010
327	PMI / General / 005	Laboratory Project - Future Expansion	23rd February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
328	PMI / General / 006	Laboratory Project - Basement Floor Level	26th February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
329	PMI / General / 007	Laboratory Project - Ventilation to PM tables	26th February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
330	PMI / General / 008	Laboratory - Stage E Civil & Structural Engineering Drawings	9th March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
331	PMI / General / 009	Laboratory Project - Relocation of Footprint	10th March 2010	Closed out	10/03/2010
332	PMI / General / 010	Laboratory project – Architectural drawings and NBS Specification	23 <sup>rd</sup> March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
333	PMI / General / 011	Laboratory Block – VE Review 1	25 <sup>th</sup> March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
334	PMI / General / 012	AGV System - Cart Washer	25 <sup>th</sup> March 2010	Cart Washer not required by Board. CE notified by BCL (CE 006) CE accepted by Board	9/06/2010
335	PMI / General / 013	Laboratory Project – Removal of Foundation from Old Rec Pavilion	8 <sup>th</sup> April 2010	Closed out No cost	08/04/2010
336	PMI / General / 014	Laboratory Project – Diversion of Water Main	8 <sup>th</sup> April 2010	CE notified by BCL (CE 004) CE accepted by Board	25/05/2010
337	PMI / General / 015	Removal of Japanese Knotweed (Bunded Area) Off Site	28 <sup>th</sup> April 2010	CE raised by BCL (CE 002) CE accepted by Board	10/06/2010
351	PMI / General / 016	Laboratory - Stage E - Mechanical and Electrical Drawings and Specification	17 <sup>th</sup> May 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
356	PMI / General / 017	Laboratory Block – Mortuary (Basement Level -1) Room L-1/B/027	31 <sup>st</sup> May 2010	CE notified by BCL (CE005) CE accepted by Board	24/06/2010
367	PMI / General / 018	Laboratory Project-Mortuary X Ray Room L1/B/027	17 <sup>th</sup> June 2010	To be read in conjunction with PMI / General / 017  Board to progress change through internal change control process. Board to raise CE once approved.	

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
368	PMI/General/019	Change to Electrical Load requirements	23rd June 2010	Linked to NHS-EW-010 and NHS-EW-013. BCL instructed Mercury to provide quotes. BCL reported that they would need to check that the space remains. BCL confirmed costs uploaded to Sypro. NHS team reviewed. BCL requested that Mercury undertake a further review. Current cost estimate £260,000.	
369	PMI/General/020	Borehole Water Supply	23rd June 2010	Board reviewing cost information received from BCL CE event raised by BCL. Board pursuing confirmation letter from Business Stream. Confirmation letter received. NHS to upload to Sypro. GW to review costs	
370	PMI/General/021	HAEMATO-ONCOLOGY WARD	23rd June 2010	Links to NHS-EW-007 and NHS-EW-008 BCL to provide an indication of the cost saving to remove the additional filtration to the 8 No rooms and ensuites. Discussion ongoing to clarify where filtration removal would occur i.e. in each room or at a central point. BCL confirmed cost saving as 8 x £800. NHS Team to confirm change to requirements.	
375	PMI/General/022	New Children's Hospital – Theatre Recovery Area	30 <sup>th</sup> June 2010	Links to NHS-EW-014 (Sypro 6981) Board confirmed that they no longer require fixed solid partition walls between recovery bays (17 bays). BCL to provide updated 1:50 theatre plans and provide costs. BCL provided costs for review by NHS Team.	
381	PMI / General /023	Stage 3 Adult Hospital CCU Bed Bay Dividers	8 <sup>th</sup> July 2010	BCL to provide revised layout omitting single bed bay glass screens for approval by the Board team BCL provided costs info which is under review by NHS team. BCL to provide drawing for review – work in progress. Early estimate of cost saving is £124.079.08	
383	PMI/General/024	Laboratory Block – Fire Alarm Cable	09 <sup>th</sup> July 2010	BCL to provide costs to substitute Prysmian FP200 plus cable system in lieu of MICCE cable system. Cost uploaded to notes section by BCL and under review by NHS team Agreed PMI to be closed off. Cost saving circa £40k	12/08/2010

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
384	PMI/General/025	Laboratory Project – Fixed Sun-shading Fins	23 <sup>rd</sup> July 2010	Links to BCL-EW-028 Board confirmed that Brookfield may proceed and install fixed sun shading fins to the office pod of the Laboratory Block in lieu of moveable fins. Agreed PMI to be closed off	12/08/2010
386	PMI/General/026	Laboratory Block Fire Stair Handrails and Balustrades.	30 <sup>th</sup> July 2010	Links to BCL-EW-030 BCL to provide potential VE saving if handrails and balustrades within the fire stairs are changed from stainless steel to mild steel painted.	
391	PMI/General/027	New Adult and Children's Hospital Ceiling Mounted Hoist requirements	10 <sup>th</sup> August 2010	Links to NHS EW 011 (Sypro 6956) Board confirmed specifications and numbers of patient hoist requirements. BCL to provide cost.  Discussed whether this item would be a VE. NHS team confirmed that this would not be a VE and would be a change to target price.  Board to confirm specification. BCL to consider RFI clarification re previous structural reduction however Equipment reduction to be based on bid doc.	

## COMPENSATION EVENTS

The following Compensation Events have been submitted as at 25/08/2010:

				
Sypro ID No	NHS Ref No	Item	Date Issued	Status
4294	CE 001	Removal of Asbestos Building Board	10th March 2010	Agreed
4295	CE 002	Removal of Japanese Knotweed	10th March 2010	Agreed
4296	CE 003	Removal of Excess Spoil	10th March 2010	Agreed
4451	CE 004	Water Main within Basement Footprint	25 <sup>th</sup> May 2010	Agreed
4501	CE 005	PMI / General / 017 - Laboratory Block - Mortuary (Basement Level -1) Room L-1/B/027	3 <sup>rd</sup> June 2010	Agreed
4528	CE 006	AGV System - Cart Washer Removal	9 <sup>th</sup> June 2010	Agreed
4632	CE 007	Labs Project - Copper Cladding to external columns	28 <sup>th</sup> June 2010	Agreed
4660	CE 008	Kitchen Relocation from level 3 to Basement	02 <sup>nd</sup> July 2010	Agreed
4661	CE 009	Service drain to the side of the Laboratories Building (BCL-EW-018) Sypro 6732	02 <sup>nd</sup> July 2010	Agreed
4864	CE 010	Laboratory Project Stage 1 - RIBA Stage D to E Reconciliation	18 <sup>th</sup> August 2010	Agreed
4676	CE 011	Borehole water supply	7 <sup>th</sup> July 2010	Costs under consideration by NHS

## NEC3 – STATUS UPDATE

## EARLY WARNINGS

The following Early Warnings have been submitted to the NHS Board as at 16/09/2010:

<div style="text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6715	BCL-EW-001	Brookfield Value Engineering Items	13 January 2010	Value impact work in progress Focus on Tunnel Arrangement – Pack received by Board 01/02/2010	10/02/2010 (PM PMI 003)
6716	BCL-EW-002	Mobile Phone Mast Location	8 <sup>th</sup> February 2010	Works on-going to purchase land. EW to be closed out	22/07/2010
6717	BCL-EW-003	Utilities (1MVA) Power	10 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6718	BCL-EW-004	Utilities (11kv Breaker)	10 Feb 2010	Part of Scottish Power Quotation	13/04/2010
6719	BCL-EW-005	Utilities (Moving 11KV Circuit Breakers) – Hospitals	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6720	BCL-EW-006	Utilities (Moving 11KV Circuit Breakers) – Labs	17 <sup>th</sup> February 2010	Part of Scottish Power Quotation	13/04/2010
6721	BCL-EW-007	Discovery of Foundations and Brickwork (Labs Site)	3 <sup>rd</sup> March 2010	Dunne's have removed foundations and brickwork.	8/04/2010 (PMI/General/013)
6722	BCL-EW-008	Planning Issues (Labs Render)	4 <sup>th</sup> March 2010	Agreed at EW Meeting 17/06/2010 to close EW out	17/06/2010
6723	BCL-EW-009	Planning Issues (Adult and Children's Render)	5 <sup>th</sup> March 2010	<p>BCL worked with Planning Dept to identify agreeable finishes. Indicative costs circa £500k and would like the Board to contribute to the cost. BCL progressed to ensure there was no delay to Planning.</p> <p>BCL to provide info re costs and % share requested from Board for AS to present to RC.</p> <p>Planners still to agree elevations. NHS team to be more involved in the design process re frontage and landscaping. NHS to be provided with any iterations of the frontage.</p> <p>Should be resolved by End September (Planning Process). Work in progress. Further meeting with GCC Planning Dept scheduled on 02/09/2010</p> <p>BCL currently collating material samples, working towards building mock ups. Board and GCC Planners to view once available. Work progressing.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6724	BCL-EW-010	Repositioning of Labs Building	8 <sup>th</sup> March 2010	Cross reference with PMI / General / 008 and PMI / General / 009	10/03/2010 (PMI/General/009) PART OF STAGE E
6725	BCL-EW-011	Water Main within Basement Footprint	9 <sup>th</sup> March 2010	Water main being diverted 13/03/2010	08/04/2010 (PMI/General/014)
6726	BCL-EW-012	Access Road serving the laboratories	19 <sup>th</sup> March 2010	Request for instruction to extend the access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10/06/2010
6727	BCL-EW-013	Laboratories Tunnel	29 <sup>th</sup> March 2010	Request to construct the Labs tunnel beyond the extents of the new access road.  NHS confirmed that this work will not be undertaken post FBC. This EW to be closed out	10/06/2010
6728	BCL-EW-014	Increase in Building Control Fees	14 <sup>th</sup> April 2010	BCL met with Building Control w/c 16/08/2010. GW has negotiated cost to circa £600k. BCL identifying stages of application. GW to discuss with DR utilising Stage 2 monies.  Agreed this EW to be closed out	26/08/2010
6729	BCL-EW-015	Junctions at Govan Road	14 <sup>th</sup> April 2010	NHS confirmed that SW have advised that they are unwilling to alter their junctions at Govan Road. WSP to be asked if GCC can serve a left turn only enforcement notice on SW.  Junction information indicated on Masterplan submitted end April and VISSIM model shows no impact on junction. RCC will conclude this issue.  Discussion re private or adopted road. PM view that road should be private but built to adoptable road standard. DS agreed to discuss with Jim Miller. BCL to be instructed not to submit Section 56 application and instead do RCC. BCL furthering RCC discussions with GCC. BCL are in process of identifying items for Section 56 which Board needs to undertake. Drawing prepared indicating phasing of RCC application. Meeting to be arranged with PM + AS w/c 13/09. BCL to arrange meeting with AS & PM to discuss WSP sketches regarding island on road and taxi rank.	

Sypro ID	NHS Ref No.	Item	Date Raised	Status	Date Completed
6730	BCL-EW-016	Kitchen Relocation from level 3 to Basement	14 <sup>th</sup> April 2010	NHS team obtaining still to obtain formal Board sign off however AS confirmed that BCL can undertake kitchen relocation from level 3 to the basement. NHS will raise a CEN.	1 <sup>st</sup> July 2010
6731	BCL-EW-017	Compatibility of the existing Kitchen cart/trolleys and the Proposed AGV Robotic System	15 <sup>th</sup> April 2010	<p>AGV Strategy not signed off by FM. Karen Connelly advised that AGV compatible carts are available from suppliers. Costs and precise numbers of required carts being prepared. Anticipated cost £300k+</p> <p>BCL to identify a contribution towards the costs of new carts in place of the costs to make carts adaptable.</p> <p>BCL in discussion with Swisslog re Compliance of their original design. BCL met with Swisslog. Presented with simulation which proves that the proposed system works. Sessions taken place with Project Team and FM Directorate</p> <p>GW confirmed that Swisslog had agreed to install transponder units at no extra cost as advised during a visit to Oslo.</p> <p>Board trying to identify alternative way to load NDC carts onto AGV sub-bases without the requirement of lifters. The Board are also trying to reduce the number of sub-bases required.</p> <p>DR advised that there was confusion over the cart lifter costs. Board team advised cart lifter cost is £20k. BCL agreed to confirm cost. DS advised that an operational management doc has been prepared for NHS and NHS will need to take ownership off. DR to get update on NDC carts.</p> <p>AGV presentation given to FM, BCL currently running alternative simulations. BCL to confirm numbers of cart lifters and conversion carts required.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6732	BCL-EW-018	Service drain to the side of the Laboratories Building	21 <sup>st</sup> April 2010	Board to review costs and advise BCL on way forward. There are two service drain issues: 1 – Children's hospital drainage – NHS confirmed the children's hospitals drainage works had been agreed. NHS will raise a CEN 2 – Attenuation. BCL will raise the attenuation issue as a separate EW. NHS confirmed that attenuation works could not be undertaken until post FBC.	1 <sup>st</sup> July 2010
6733	BCL-EW-019	Purchase of land from Scottish Water	21 <sup>st</sup> April 2010	No issues. CLO and Project team progressing land purchase. Agreed this EW to be closed out.	26/08/2010
6734	BCL-EW-020	Contamination within Water System	21 <sup>st</sup> April 2010	Agreed this EW should be closed off.	05/08/ 2010
6735	BCL-EW-021	Discovery of Flammable Gas within Ground in Basement	7 <sup>th</sup> May 2010	BCL to provide extract from SI Report re ground gas information. BCL Consultants to produce a report. BCL and Board team to agree to a definition of what is 'significant'. BCL reports that SI stated very minimum pockets of gas however methane had been discovered in 9 out of 12 boreholes. The sampling works information provided by the Board was insufficient.  BCL have identified the problem boreholes and they will provide further information to DR immediately.  BCL have met with Stent. Stent confirmed that they are still requesting costs (Estimated at £25k). Information provided to DR for review.  C&B liaising with URS. Should be closed out w/c 13/09.  CE 012 issued, EW to be closed.	16/09/10
6959	BCL-EW-023	Design development of the Substation within the car park resulting in a reduction of available parking space.	21 <sup>st</sup> May 2010	PMG agreed this EW should be closed off	25/05/2010
6960	BCL-EW-024	Roof top Helipad	21 <sup>st</sup> May 2010	Revised report issued 16 <sup>th</sup> June 2010 (reflects proper flight paths and helicopter type). NHS confirmed that GCC Planners satisfied with distance of Helipad from local housing. BCL to instruct Jim Miller to provide report and summary of report findings to Jim Patrick. This EW to be closed off.	10/06/2010
6961	BCL-EW-025	Car Park 1 Conflict with Masterplan	21 <sup>st</sup> May 2010	NHS confirmed no conflict. EW to be closed off.	10/06/2010

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6967	BCL-EW-026	External Walls: Copper Cladding to Columns	27 <sup>th</sup> May 2010	NHS to review cost information provided by BCL DR requesting reconciliation cost information re elevations, i.e. block work, granite etc	28/06/2010
6968	BCL-EW-027	Swisslog Robotics (stage 3)	27 <sup>th</sup> May 2010	BCL agreed to put in additional bay. BCL to check if this EW can be closed off. DMcF agreed this EW can be closed off.	
6972	BCL-EW-028	Moveable Vertical Fins to Laboratory Pod	2 <sup>nd</sup> June 2010	BCL to provide modeling information and demonstration re moveable fins v's static fins. BCL agreed to provide information by Friday 25 <sup>th</sup> June 2010  BCL indicated potential early cost saving calculation as £150K. NHS to raise PMI and EW to be closed off.	23/07/10 PMI / General / 025
6987	BCL-EW-029	Building Control concerns over sub-compartmentation exits from wards	29 <sup>th</sup> June 2010	Closed – Refers to NHS-EW-015 (6895)	30/06/2010
6993	BCL-EW-030	Proposal to change escape stair and mortuary stair handrails	16 <sup>th</sup> July 2010	Board to consider changing mortuary stair and escape stair handrails to painted stainless steel.  Closed - Cross reference with PMI / General / 026	30/07/2010
7009	BCL-EW-031	Delay in Commencing Demolition works to Stage 3 Site	6 <sup>th</sup> August 2010	Demolition works commenced on 31 <sup>st</sup> August 2010. May be an issue re amount of asbestos found in Management Annex. DMF to raise EW re Asbestos.  GW advised that there may be 1 power cable not signed off. DR agreed to check.  Adien survey issued to BCL, gas, water and comms currently being marked up on drawings showing services and isolation. Board to issue formal letter to confirm isolations this week.	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
7010	BCL-EW-032	Discovery of Existing Gas Pipe Running Through Site	13 <sup>th</sup> August 2010	<p>An existing gas main has been discovered running through the Labs site. Further investigations are being undertaken by the Board to determine exact routing.</p> <p>NHS Team confirmed that arrangements to cap and terminate pipe would be made once old kitchen is closed down and confirmation received that new kitchen is fully operational. Works anticipated to be carried out by w/e 10<sup>th</sup> September 2010.</p> <p>NHS to confirm gas pipe is terminated and thereafter close out.</p> <p>See BCL-EW-031</p>	
7014	BCL-EW-033	External Windows (Tower) – Addition of obscure film to windows	18 <sup>th</sup> August 2010	<p>Suggested at User Group meeting that Board may wish to explore the addition of obscure film to windows. BCL confirmed this would be an additional cost of circa £210,000.00. AS confirmed that Board would not be pursuing the addition of obscure film to windows as the windows will have interstitial blinds.</p> <p>NHS to confirm if window sills to be raised/windows to be made smaller.</p> <p>BCL to ensure that NHS Team involved in interstitial blinds to ensure they can be appropriately maintained.</p> <p>BCL to provide sight-line from the head of a person lying in bed.</p> <p>BCL to arrange meeting with Structal. ( DH and AS in Peterborough on 9<sup>th</sup>/10<sup>th</sup> September if Structal available)</p> <p>Sill height discussed at MPG &amp; TDG. Agreed that tower external unitized arrangement to remain unchanged. BCL to provide detail of windows and interstitial blinds.</p> <p>Agreed to close EW.</p>	<p>18/08/2010</p> <p>16/09/2010</p>
7018	BCL-EW-034	Potential Value Engineering M & E items for consideration	19 <sup>th</sup> August 2010	NHS reviewed list and prioritization exercised has been carried out. NHS will organize a meeting with Ian	

				<p>Powrie to discuss prioritization list.</p> <p>Reported that a decision on renal dialysis air change requirements is needed asap.</p> <p>Discussions ongoing</p>	
7020	BCL-EW-035	Revised lift strategy for Adult & Children	23 <sup>rd</sup> August 2010	<p>NHS requested drawing/key in order to clarify the proposal. BCL have provided drawing/key to location of lift cores. NHS to review this information. Meeting to be arranged to take Project Team through proposal. NHS team to provide respond.</p>	
7468	BCL-EW-036	Increased NCH Renal Plant (2900/L)-Stage 2-Childrens Hospital	2 <sup>nd</sup> September 2010	<p>The ITPD (Page 13 of Volume 2/1 appendix M&amp;E 6 Renal Water) states the following number of points of use:- Outpatient (30) + Ready Use (5) + Lab (8) = 43 Inpatients = 84 Critical Care = 10 For the adult hospital it appears that there are potentially 88 dialysis points in the inpatients wards (it is assumed that all bedrooms within the renal dialysis wards will have dialysis points (80 points), 4 dialysis stations and 4 points in the day trolley room), the outpatients area appears to have 44 dialysis points (30 outpatients + 6 lab + 8 ready use). Therefore the number of dialysis points for the adult hospital is equal to or greater than the points in M&amp;E 6, therefore there are no spare outlets for the children's hospital. In NCH Renal 1:50 UGM it was stated that the dialysis points are in 6 bedrooms, 3 day case cubicles, 1 isolation room, 3 lab area and also some ready use outlets and some for the PICU department. Before this meeting it was assumed that the number of points would be minimal and could be provided by point of use dialysis machines connected to the hospital domestic water supply. From the Appendix K Reviews – Children's dated 01/09/10, we understand there is a requirement to feed the Children's hospital from main plant for which there is no current allowance.</p> <p>NHS team to provide response.</p> <p>PMI to be issued detailing requirements.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
7473	BCL-EW-037	Fire Service Facilities – Laboratory Basement		<p>The current FFL of the basement within the labs (approximate area/location as shown on the attached) does not accord with the guidance within the Non Domestic Technical Hand Book. The mitigating measures are to be discussed with building control and the fire service to ascertain further requirements and or fire services facilities, if any.</p> <p>Awaiting formal confirmation from building control.</p>	
7475	BCL-EW-038	Vision panels – Touch down bases		<p>BCL propose to reduce the extent of the vision panels at touch down bases throughout the project. The proposed arrangement has been built at the mock up and visited by the NHS.</p> <p>PMI to be issued to confirm requirements.</p>	

#### Potential Early Warnings to be raised by BCL

		Ground contamination (remainder of site)		<p>2 hot spot areas (asbestos and fluorocarbon) have been identified. Potential for problems from SEPA. Ground gases identified and proposing to deal with on an on-going basis.</p> <p>Long chain hydro-carbons have been identified in 1 borehole and CO has been identified in a borehole at the Energy Centre location. WSP obtained readings consistently above 10% - concern raised that may be getting closer to the centre of increased gases.</p> <p>New directive indicated that GCC may refer ground gas and oil issue to SEPA.</p> <p>Board received summary report for review. Meeting required with BCL, Alex Lee, Board and URS. DH requested a copy of the appendix information. DH would provide feedback on the report asap.</p> <p>BCL had identified on-costs for the investigation works and for the gas monitoring. Issue re aquifer – found hazardous material however WSP do see this being an issue. New legislation indicates that SEPA will request monitoring. WSP don't see monitoring being required however SEPA may insist.</p>	
--	--	--	--	---	--

				<p>DR report that URS had received the WSP summary report and are undertaking a comparison exercise to confirm risks that have been triggered. BCL responsible for gas monitoring costs.</p> <p>BCL to provide report on costs and monitoring.</p>	
		Transformer, VIE and Linthouse Burn – Relocation		Discussed at PMG. Agreed that BCL should raise EW	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6699	NHS-EW-001	Stage D to E Reconciliation	14 January 2010	Agreed to close out. Refer to CE 010	18/08/2010
6701	NHS-EW-002	Testing of Building Board Material on Site	21 January 2010	Complete - CE 001 Issued	11/03/2010
6704	NHS-EW-003	Japanese Knotweed Survey	21 January 2010	Complete- CE 002 issued	11/03/2010
6705	NHS-EW-004	Excavated Building Materials/Spoil	21 January 2010	Complete - PMI 004 issued, CE 003 issued	11/03/2010
6706	NHS-EW-005	Live HV Cable – SGH Site	27 January 2010	Complete - disconnect live HV cable	7/02/2010
6952	NHS-EW-006	Borehole water	15 February 2010	Complete - PMI 020 issued	23/06/10
6953	NHS-EW-007	Adult Hospital – Haemato-Oncology Area	12 <sup>th</sup> March 2010	Complete - PMI 021 issued	23/06/10
6954	NHS-EW-008	Oncology Ward - Specialist ventilation	16th April 2010	Complete - PMI 021 issued	23/06/10
	NHS-EW-009	REF NO – NOT USED			
6955	NHS-EW-010	Site Electrical Load	16th April 2010	Complete - PMI 019 issued	23/06/10
6956	NHS-EW-011	Patient Hoists and Structural Support	16 <sup>th</sup> April 2010	Refer to PMI 027 issued	10/08/2010
	NHS-EW-012	REF NO – NOT USED			
6957	NHS-EW-013	HV Generators	16 <sup>th</sup> April 2010	Closed out - Links to NHS-EW-010. PMI 019 issued	16/06/2010
6981	NHS-EW-014	New Children's Hospital – Theatre Recovery Area	21 <sup>st</sup> June 2010	Closed out – links to PMI/General/022	30 <sup>th</sup> June 2010
6985	NHS-EW-015	Adult & Children's Hospitals Fire Strategy	23 <sup>rd</sup> June 2010	<p>Board wish to understand the BCL programme and plans to take forward the fire strategy Reports been submitted. Compartmentation drawings and fire report (minus atrium) being submitted the following week.</p> <p>Fire Strategy discussions ongoing with Building Control. Wards Fire Strategy now agreed with Building Control.</p>	
7010	NHS-EW-016	Appendix K Review and Programme	10 <sup>th</sup> August 2010	<p>Attend meeting to discuss and agree simplified process to ensure App K review completed within the timescale leading up to FBC and allow the Board adequate time to consider and review information. Board confirmed that they are not receiving the final documents for formal sign-off. Board required clarity of what needs signed off before FBC and focus on that is essential. Ongoing. M&amp;E process underway. Board to start signing off drawings. M&amp;E workshops very beneficial. DS reviewing comments received back from C&amp;B.</p> <p>Work progressing, BCL to issue Appendix K tracker to Board.</p>	

Sypro ID	NHS Ref No	Item	Date Raised	Status	Date Completed
6999	NHS-EW-017	Adult & Children's Hospitals Single Rooms - Bi-fold Doors En-suites.	30 <sup>th</sup> July 2010	Board to raise a PMI re two leaf doors in place of bi-fold doors to Adult & Children's Hospitals Single rooms. Agreed to be a value engineering item. BCL advised cost omission of £500k (based on same size door). Board to raise PMI to confirm ensuite door arrangements.  PMI/General/029 issued. EW closed.	16/09/2010
6988	NHS-EW-018	AGV System - Adult and Children's Hospitals	29 <sup>th</sup> June 2010	The Board will require to see the integration of the proposed system in full compliance with the Board's stated requirements and set out within the 1:200 departmental layouts prior to the final sign off of the layouts.  BCL to liaise with Nightingales and provide drawings for review.  Final layout plans reviewed by KC. Agreed to close off the EW.	18/08/2010

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BCL as at 16/09/2010:

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
323	MB/PM/General/001	Stage 1 Laboratories – Start on Site Date	27 <sup>th</sup> January 2010	Closed out	27/01/2010
324	MB/PMI/General/002	Revision to Contract Assessment Dates	8 <sup>th</sup> February 2010.	Closed out	08/02/2010
325	LAB / PM / General / 003	Laboratory Block – Tunnel Reconfiguration	10 <sup>th</sup> February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
326	PMI / General / 004	Excavated Materials / Spoil	23 <sup>rd</sup> February 2010	Closed out	10/03/2010
327	PMI / General / 005	Laboratory Project – Future Expansion	23 <sup>rd</sup> February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
328	PMI / General / 006	Laboratory Project – Basement Floor Level	26 <sup>th</sup> February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
329	PMI / General / 007	Laboratory Project – Ventilation to PM tables	26 <sup>th</sup> February 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
330	PMI / General / 008	Laboratory – Stage E Civil & Structural Engineering Drawings	9 <sup>th</sup> March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
331	PMI / General / 009	Laboratory Project – Relocation of Footprint	10 <sup>th</sup> March 2010	Closed out	10/03/2010
332	PMI / General / 010	Laboratory project – Architectural drawings and NBS Specification	23 <sup>rd</sup> March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
333	PMI / General / 011	Laboratory Block – VE Review 1	25 <sup>th</sup> March 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
334	PMI / General / 012	AGV System – Cart Washer	25 <sup>th</sup> March 2010	Cart Washer not required by Board. CE notified by BCL (CE 006) CE accepted by Board	9/06/2010
335	PMI / General / 013	Laboratory Project – Removal of Foundation from Old Rec Pavilion	8 <sup>th</sup> April 2010	Closed out No cost	08/04/2010
336	PMI / General / 014	Laboratory Project – Diversion of Water Main	8 <sup>th</sup> April 2010	CE notified by BCL (CE 004) CE accepted by Board	25/05/2010
337	PMI / General / 015	Removal of Japanese Knotweed (Bunded Area) Off Site	28 <sup>th</sup> April 2010	CE raised by BCL (CE 002) CE accepted by Board	10/06/2010
351	PMI / General / 016	Laboratory – Stage E – Mechanical and Electrical Drawings and Specification	17 <sup>th</sup> May 2010	Closed out as part of Stage d to e reconciliation. BCL to close out on Sypro. Ref CE 010	18/08/2010
356	PMI / General / 017	Laboratory Block – Mortuary (Basement Level -1) Room L-1/B/027	31 <sup>st</sup> May 2010	CE notified by BCL (CE005) CE accepted by Board	24/06/2010
367	PMI / General / 018	Laboratory Project-Mortuary X Ray Room L1/B/027	17 <sup>th</sup> June 2010	To be read in conjunction with PMI / General / 017 Board to progress change through internal change control process. Board to raise CE once approved. CE 013 raised.	09/09/2010
368	PMI/General/019	Change to Electrical Load requirements	23 <sup>rd</sup> June 2010	Linked to NHS-EW-010 and NHS-EW-013. BCL advised that revised costs uploaded. Costs circa £595k + OH & P. Board to raise CE. CE 014 raised	16/09/2010

A51679245

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
369	PMI/General/020	Borehole Water Supply	23 <sup>rd</sup> June 2010	Board reviewing cost information received from BCL CE event raised by BCL. Board pursuing confirmation letter from Business Stream. Confirmation letter received. NHS to upload to Sypro. GW to review costs NHS team need to understand at what point there is a risk i.e. to Labs. SI Survey rep to be asked for a response. NHS team awaiting advice from Alex Lee re water leeching round site. Once final advice received then change will be progressed through Board's CCP.	
370	PMI/General/021	HAEMATO-ONCOLOGY WARD	23 <sup>rd</sup> June 2010	Links to NHS-EW-007 and NHS-EW-008 BCL to provide an indication of the cost saving to remove the additional filtration to the 8 No rooms and ensuites. Discussion ongoing to clarify where filtration removal would occur i.e. in each room or at a central point. BCL confirmed cost saving as 8 x £800. NHS Team to confirm change to requirements. To be closed out. CE 014 raised	09/09/2010
375	PMI/General/022	New Children's Hospital – Theatre Recovery Area	30 <sup>th</sup> June 2010	Links to NHS-EW-014 (Sypro 6981) Board confirmed that they no longer require fixed solid partition walls between recovery bays (17 bays). BCL to provide updated 1:50 theatre plans and provide costs. NHS Team reviewed costs provided by BCL. DR advised that ADB sheet indicates that partition walls should be lead lined and these costs have not been included in the BCL costs. GW advised lead lined curtains not on Board's ER Equipment list. DR to confirm if lead lined curtains required.  CE 016 raised	16/09/10
381	PMI / General /023	Stage 3 Adult Hospital CCU Bed Bay Dividers	8 <sup>th</sup> July 2010	BCL to provide revised layout omitting single bed bay glass screens for approval by the Board team BCL provided costs info based on no glass or doors but with track size amended. Costs circa £ £180k. Board to confirm acceptance of costs.  CE 017 raised	16/09/10

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
383	PMI/General/024	Laboratory Block – Fire Alarm Cable	09 <sup>th</sup> July 2010	BCL to provide costs to substitute Prysmian FP200 plus cable system in lieu of MICCE cable system. Cost uploaded to notes section by BCL and under review by NHS team Agreed PMI to be closed off. Cost saving circa £40k	12/08/2010
384	PMI/General/025	Laboratory Project – Fixed Sun-shading Fins	23 <sup>rd</sup> July 2010	Links to BCL-EW-028 Board confirmed that Brookfield may proceed and install fixed sun shading fins to the office pod of the Laboratory Block in lieu of moveable fins. Agreed PMI to be closed off	12/08/2010
386	PMI/General/026	Laboratory Block Fire Stair Handrails and Balustrades.	30 <sup>th</sup> July 2010	Links to BCL-EW-030  NHS team confirmed that they did not wish to pursue this proposal and therefore handrails to general escape stairs and mortuary basement areas to remain as specified i.e. stainless steel The EW to be closed off.	26/08/2010
391	PMI/General/027	New Adult and Children's Hospital Ceiling Mounted Hoist requirements	10 <sup>th</sup> August 2010	Links to NHS EW 011 (Sypro 6956) Board confirmed specifications and numbers of patient hoist requirements.  Discussed whether this item would be a VE. NHS team confirmed that this would not be a VE and would be a change to target price.  GW indicated that initial costing identified as £2.2m (net). Identified that approx £9k remains in BCL cost plan to purchase the remainder of the hoists. Board to confirm acceptance of costs.	

Sypro ID	NHS Ref No	Item	Date Issued	Actions	Date Closed Out
395	PMI/General/028	New Laboratories IT review	26/08/2010	<p>Links to NHS–EW-017</p> <p>The Board have undertaken an IT review of Revision E 1:50 drawings, to ensure that all small power has been captured for IT and user requirements for the new facility.</p> <p>The attached 1:50 documents detail changes required within 9 rooms.</p> <p>Please review and re-issue with all changes. To be at no cost.</p> <p>BCL reported that there were problems relocating a few points. Costs for change being identified for submission to Board.</p> <p>BCL to report back to Board.</p>	
399	PMI/General/029	New Adult and Children's Hospital – Single Rooms Bi-fold doors to En-suites.	16/09/2010	<p>The Board wishes to investigate the feasibility of substituting bi-fold doors to the en-suits with a double leaf door set. BCL to design a workable design layout in conjunction with Project Manager's for A&amp;C Hospitals and report back to the Board with costs.</p>	

PMI to be raised by Board.

		Time Capsule (Labs Block)		<p>The Board to request that BCL make provision for a time capsule to be located in the entrance area of the Labs Block. To be at no cost.</p> <p>Agreed that time capsule will be located externally and will not be on critical path.</p>

## COMPENSATION EVENTS

The following Compensation Events have been submitted as at 10/09/2010:

Sypro ID No	NHS Ref No	Item	Date Issued	Status
4294	CE 001	Removal of Asbestos Building Board	10th March 2010	Agreed
4295	CE 002	Removal of Japanese Knotweed	10th March 2010	Agreed
4296	CE 003	Removal of Excess Spoil	10th March 2010	Agreed
4451	CE 004	Water Main within Basement Footprint	25th May 2010	Agreed
4501	CE 005	PMI / General / 017 - Laboratory Block - Mortuary (Basement Level -1) Room L-1/B/027	3rd June 2010	Agreed
4528	CE 006	AGV System - Cart Washer Removal	9th June 2010	Agreed
4632	CE 007	Labs Project - Copper Cladding to external columns	28th June 2010	Agreed
4660	CE 008	Kitchen Relocation from level 3 to Basement	02nd July 2010	Agreed
4661	CE 009	Service drain to the side of the Laboratories Building (BCL-EW-018) Sypro 6732	02nd July 2010	Agreed
4864	CE 010	Laboratory Project Stage 1 - RIBA Stage D to E Reconciliation	18th August 2010	Agreed
4676	CE 011	Borehole water supply	7th July 2010	Costs under consideration by NHS
5054	CE 012	Laboratory Project – Discovery of Ground Gas	16th September 2010	BCL to submit final quotation
5055	CE 013	Laboratory Project – Mortuary X-Ray Room L1/B/027	16th September 2010	BCL to submit final quotation
5056	CE 014	Adult Hospital – Haemato-Oncology Ward Air filtration	16th September 2010	BCL to submit final quotation
5057	CE 015	Change to Electrical Load Requirements	16th September 2010	BCL to submit final quotation
5058	CE 016	New Children's Hospital - Theatre Recovery Area	16th September 2010	BCL to submit final quotation
5061	CE 017	Adult Hospital – CCU Bed Dividers	16th September 2010	BCL to submit final quotation

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 22/09/2011:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	05/11/2010  11/08/2011 22/09/2011	As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to interrogate information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements.  DS advised that an SI would be undertaken when area becomes available. Agreed that extent of hotspot will be investigated once Biochemistry demolished	Work in progress. Not at apt point to undertake investigation
8951	BMCL-EW-068	Surgical Sub-station	14/01/2011	As discussed at PMG meeting the Surgical Sub-station and associated generator need to be relocated. The Board have agreed to this request being earlier in programme. BMCL & Board currently formulating scope of works / dates etc. PM reported further discussion required re HV s/s which may impact on the hammerhead. AS to provide date for s-station works (late September). AS has a range of logistics to sort out. AS & DP liaising to develop detailed plan AS advised that BMCL will be required to assist developing the scope. The NHS will be responsible to move the sub-station with full technical support from BMCL. DP was requested to take the NHS Team through the programme. Meeting organized for 18/04 to discuss surgical sub-station as on critical path. BMCL currently preparing programme, 30 <sup>th</sup> Sept 2011 backstop date. AS discussing tender process options with Alex McIntyre. Meeting held with AS, Project Team, Russell Johnson to review scope of works. Splitting the works into 2 parts i.e. HV and LV. The HV scope will be put out to tender in next couple of weeks. GW advised the DP was indicating that these works were becoming critical. DR advised that GT will review the programme of works working back from the backstop date. AS advised that the tenders for the LV Analysis works had been received. The analysis work would identify all the LV sub-current and where being supplied to. Capita had been requested to review the scope of works and BMCL comments then works to be procured. DP to provide sequenced drawings/logistics to co-ordinate the works. Noted that the NHS will need access to the fenced off area.	Works concluded and handover meeting held on Wednesday 28/09/2011

			<p>01/09/2011</p> <p>08/09/2011</p> <p>22/09/2011</p> <p>29/09/2011</p>	<p>Tenders out and due back 24<sup>th</sup> June 2011. Transformer available. Survey works commencing w/c 20<sup>th</sup> June 2011. Programme remains achievable. DP reported that he had a drawing to discuss with the NHS Team later that day. GT advised that the tenders were in and the preferred contractor would be identified by COP 1/07/2011. The works to dig round the cable so that it can be traced was 80% complete. FES appointed to complete these works. Reported that switch to be removed and this would indicate a cost reduction on tender. These works would be completed around 27<sup>th</sup> September.</p> <p>DP reported that BMCL intended to purchase the switch, with NHS adopting the meter temporarily to allow the unit costs to be kept to a minimum. Benefit to the site as this supply feeds to the main construction offices, surgical block and Laboratory construction site.</p> <p>DP advised that NHS had put in an extra cable for resilience which would need to be moved. AS suggested that this was a temp cable.</p> <p>Works ongoing and on programme.</p> <p>Works ongoing and on programme to complete by 27<sup>th</sup> September 2011 and the only element now to be transferred over is the CT scanner. DP advised that a meeting had been arranged for 10am on Wednesday for NHS to hand site over to BMCL and for BMCL to sign-off handover of site.</p> <p><b>Works completed item to be closed out</b></p>	
8990	BMCL-EW-78	Additional Utilities Surveys required	09/02/2011	<p>The additional utilities survey as provided by Adien, does not cover all areas of the masterplan. Area where additional utility survey information is required include: Govan Road Junction, Renfrew Road junction, Hardgate Road. The following works may be affected: Any works requiring alteration to existing road configuration and apparatus could be delayed due to encountering unidentified utilities. Diversion and/or protection of utilities within public roads tend to include a prolonged process which could affect time scales. AS reported that this was not part of the A&amp;C design. GW reported that BMCL should have got information pre-bid. AS concerned that WSP only flagging as issue now. PM reported that road junctions are part of BMCL works so BMCL responsible for determining services. Sub-scan services undertaken by NHS was not a commitment to try and capture all the services coming onto the site. NHS have given as much info as possible –if part of BMCL works then up to BMCL to identify services. DS reported that BMCL want opportunity to resolve and deal with. AS reported that his view was that this needed to be escalated. DR reported that ITPD 6.2.2 sets out contract obligations. DS agreed to review. GT advised that discussed with Paul McGuinness and will liaise with HMc w/c 28/02/2011. GW to provide marked up drawing of survey info to NHS team. Joint discussion to be had. Drawing provided to Board, further discussion on survey responsibility to be had. WIP. WSP provided update re responsibility to get surveys undertaken (CDMC Issue) PM agreed to review and provide feedback. DH and MS to discuss NHS perspective re having complied with obligations. DR confirmed ERs state any further surveys on site to be funded by BMCL, CDMC have stated Board are meeting their obligations. BMCL to source surveys for works external to site from public utilities. GT to check that all survey information available to Board has been passed to BMCL with Hugh McDerment. DS agreed that if further surveys required BMCL will state where and why – Board and BMCL will then discuss. GT and GW meeting 04.05.11 to discuss process. DS advised that BMCL were reviewing the contract. GT was requested to provide a pack of all the information provided to date. DS and GT to discuss after the EW meeting. GT to provide pack of all NHS survey information provided to BMCL so that DS can ensure that the BMCL request for additional surveys is correct. DS marked up a drawing with what information has been received and what information is needed. DS requested that Adien drawings to be uploaded to Aconex. The DSSR drawing is to be broken down into 4 areas and provided to BMCL. Dates of previous issue of drawings to be provided. DS suggested that he believed that there were still some survey works to be undertaken,</p>	Work in Progress

			<p>4/08/2011 11/08/2011  18/08/2011 25/08/2011  01/09/2011  08/09/2011  15/09/2011  22/09/2011  29/09/2011</p>	<p>potentially 4 but hopefully reducing to 2. GT advised that he had broken down the services drawing into 4 drawings and that it may still be slightly confusing so he proposed to provide a further broken down services drawing. GT advised that he had finalized the break down of the services drawings and he would meet with DS to discuss. DS advised that additional survey works may still be required and it would need to be agreed if the additional survey works will be defined cost. Meeting arranged with DS and GT on Tuesday 5<sup>th</sup> July. AS requested that AF be invited to attend this meeting. Advised that DS is still awaiting this information from GT. DH reported that GT would meet with DS on return from his leave. BMCL would identify if there were any timing issues. DH to ensure GT meets with DS asap. Drawings with Darren Smith – DH agreed to chase this item.</p> <p>DH advised GT will provide broken down drawings later that day.</p> <p>DH advised that there had been issues uploading the drawings to Aconex. An email had been sent to DS in the interim. The 2 areas known to require surveyed will be added to aconex i.e. area between car parks and at Langlands building.</p> <p>Info provided by GT to DS.</p> <p>DS confirmed that drawings not on aconex. AS agreed to get the drawings uploaded to aconex by midday.</p> <p>DS advised that he would request WSP and Paul McGuiness to identify what the areas are and he would identify a mechanism to agree these areas.</p> <p>DS advised info awaited from Paul McGuiness. Noted that Dunnes had raised an EW re discovery of Scottish Water pipes at boulevard – pipes not shown in correct location on Adien survey drawings. BMCL agreed to raise as an EW. Thereafter PMI to be provided from NHS. DH to discuss with H McDermont. Board currently tracing the pipes. It is thought that may be a ring main therefore can be terminated. Fire Hydrants will be sorted via connections as new pipe due to be installed on 5<sup>th</sup> October. BMCL have marked up a drawing to show the water pipes. Graham hinds doing tracing and HMcD is liaising with PMcG.</p> <p>NHS undertaking the diversion works re fire and water pipes. Discussed responsibility for undertaking the additional surveys. GW asked to provide the costs of the survey works. Discussed difference of opinion between CDMC information.</p> <p><b>DS agreed to forward information to Paul McGuiness. Outstanding surveys are the responsibility of the Board AS agreed to take this forward</b></p>	
8996	BMCL-EWN-79	BMCL request PMI due to planning condition change at junction of Shieldhall Road & Hardgate Rd	<p>22/02/2011          4/08/2011</p>	<p>BMCL request a PMI for the Works associated with the changes to the junction at Shieldhall Rd / Hardgate Rd as now required by LPA Condition 11 of permission 10/01779/DC, as this currently sits outwith BMCL Scope of Work. BMCL are aware that it is the Boards intent to pay for this additional work from the Section 75 agreed monies. BMCL will pursue this. DS advised that GCC have added an extra condition re upgrading junctions at Hardgate Road and Shieldhall Road. AS suggested that this was a) part of the BMCL planning design or b) Used for part of construction traffic therefore part of BMCL logistics. DR to provide form of words and confirm what is in Section 75. BMCL to liaise with Jim Miller and get him to go back to GCC Planners. DR advised if part of logistics then BMCL cost however further discussion would be required. BMCL will progress through Jim Miller. Advised that letter re Hardgate Rd/Shieldhall Road prepared for BMCL to issue at an appropriate time. Awaiting feedback from Blair Greenock. Linked to temp CP. WIP. AS advised that AK was continuing to liaise with GCC to get detail of changes that they require at the junction. Reported that WSP would work on getting costs. DC meeting with N McGrogan on 26/07. GCC written to requesting what needs to be done to get TRO. Continuing to liaise with GCC Planners. BMCL received indication of costs. Propose to get sign-off by GCC Planners.</p>	

			<p>11/08/2011 25/08/2011 01/09/2011</p> <p>08/09/2011 15/09/2011</p> <p>22/09/2011 29/029/2011</p>	<p>Liaising with Blair Greenock re sign-off of condition. Roads officer indicating circa £3k for left turn works.</p> <p>DS to draft letter on behalf of AS.</p> <p>AS provided letter and £4k cheque to DS for TRO. DS advised that the junction condition was outwith the BMCL contract. AS suggested that if GCC allow for the junction upgrades to be undertaken through section 75 monies then NHS would cover the costs. DS advised that he is awaiting confirmation that minimal works are acceptable.</p> <p>DS confirmed that Jim Miller is progressing condition 11 with Blair Greenock.</p> <p>DS meeting with Jim Miller to discuss way forward later that day.</p> <p>Confirmed AS will cover the £3k junction works in this instance.</p> <p><b>DS agreed to follow up with Jim Miller. BMCL to get confirmation from GCC Blair Greenock</b></p>	
9825	BMCL-EW-089	Temporary Generators to Labs (Interim Solution) - Confirmation of NHS date of availability	<p>14/04/2011</p> <p>4/08/2011</p> <p>18/08/2011</p> <p>25/08/2011</p> <p>01/09/2011</p>	<p>BMCL advise that in order to meet commissioning programme for the Lab building the temporary generators will require to be on site for commissioning along side the Scottish Power 33/11kV switchboard. BMCL forecast power on as being late August 2011. BMCL have received response from DR regarding a requirement to provide emergency generators for the Labs Building before Energy Centre complete. BMCL currently preparing comments back as at 28.04.11. BMCL advised that they are looking at options. Looking at using permanent generator on temporary basis to feed Labs – response awaited from Mercury. DP enquired when back power required = handover. AS advised to work towards end April. GW advised impacts on cashflow for 2011. JB advised that BMCL will provide the Energy Centre at a pace to get ready for the permanent generators in a temporary basis. BMCL had taken on board the no's req'd. Discussions with mercury ongoing. Confirmed 1<sup>st</sup> occupancy end March 2012. JB requested a definitive date for when the Labs Facility needed to have standby generation. AS reported that standby generation was required by end of March 2012. AS confirmed temp generation required by 1<sup>st</sup> April 2012. BMCL will provide a detailed plan. DP advised BMCL were hoping to get the generators ordered by August 2011 to allow delivery to site by mid Feb 2011. BMCL were concluding their report and would provide to the NHS Team asap thereafter for review. BMCL were proposing/recommending that the A side is brought on first. A discussion re liability, warranty, cashflow, construction sequencing , etc, would be required. DMF liaising with Mercury &amp; has requested costs re options for extending warranties. DMF has a follow-up meeting with Mercury on 25/07. DP planned to hold a meeting in early August to review specifications and technical issues and a report will be produced.</p> <p>Meeting organized for Thursday 11<sup>th</sup> August 2011. The programme for the 'A' side had been prepared. Advised that NHS met with BMCL previous week. Proposal generally acceptable. BMCL to provide benchmarking info. Meeting on 19/08 to agree way forward. Confirmed proposals to be based on level 3 (continuous running) and will ratify at meeting on 19/08. ZBP will finalise the spec for providing to Mercury. Anticipated during 3<sup>rd</sup> week September to provide details of specific generator kit. AS requested statement on basis of 500 hrs generation – NHS will then request Wallace Whittle to sign off proposal. End September is order date to supplier then 26 weeks to get on the site.</p> <p>DP advised that proposal tabled at meeting on 18/08/2011 and way forward agreed. Final construction spec being prepared. Looking at pre-ordering 10 but call initially on 5. Discussion is required regarding the controls. The infrastructure allowance was not part of the contract. JB to be contacted to check he has the emergency standby generation benchmark information.</p> <p>DP advised works remain on programme. AS advised he would contact JBushfield. AS advised that he wished to be a part of the equipment selection from a technical standpoint. Agreement regarding what starts and when required. DP advised that on probability it was not possible to get all the generators staring at the same time as there is a time delay synching each generator. BMCL were obtaining 6</p>	

			08/09/2011 15/09/2011 22/09/2011	quotes, would shortlist to 3 quotes and progress. AS advised he would need F Wrath to comment on the prioritization list. DS advised that BMCL need to understand the NHS Proposal for temp generator gap. Revised tender doc for generators being issued yesterday. Tenders to be received by BMCL on 27/09. Meeting being arranged for 4 <sup>th</sup> October to undertake scoring exercise. Once successful bidder awarded contract then BMCL will endeavor to accelerate the timescales. Concern raised re defect liability on the first 5 generators. JB reported that BMCL would want to extend the warranty on the first 5 generators.	
			29/09/2011	On course	
10106	BMCL - EWN - 096	Aviation / CAA - ERs 2.2.9.9	18/05/2011    11/08/2011  18/08/2011 25/08/2011 08/09/2011  15/09/2011 22/09/2011 29/09/2011	Brookfield have been advised that by their aviation consultant that it is not within their gift to obtain the relevant documentation from the CAA in respect of the helipad. This being a matter between the operator and the CAA to obtain the relevant written permission. AS to liaise with Chief Pilot. Meeting to be organized with Chief Pilot and BMCL Aviation consultant as required. AS advised that the Chief Pilot is on leave. He would make contact with the Chief Pilot as soon as he returns from his leave. Meeting arranged for 17 <sup>th</sup> June 2011. BMCL requested a PMI to cover the ERs re BMCL getting permission from CAA which is unachievable. CAA will not sign-off design/don't have an approval process. It is the operator who signs off. BMCL obligated to provide operational policies and technical info. PMI requested re varying the ER's in this matter. DH to liaise with DS re PMI. DH advised he was reviewing the report from Peter Rover and would draft a PMI thereafter. DH continuing to liaise with CAA and will confirm whether off-shore guidance applies. Anticipating will confirm by w/e 26/08. AS and DH to conclude on DHs return from leave. DH confirmed report by aviation consultant is required. CAA have nominated report writer – confirming that there is no requirement for on shore writer – confirming that Peter Rover is accepted as Independent. Confirmed that P Rover is Independent reporter. DS & DH to agree ERs statement re “relevant” DH to provide proposal to DS asap re ERs BMCL to respond to DH proposal	
10107	BMCL - EWN - 097	Helipad change in guidance	18/05/2011	Brookfield would note that changes in guidance to the design and assessment of helipads has resulted in such installations previously being considered by the experts in the field to be an acceptable installation, are being determined as unacceptable. BMCL Aviation consultant suggests that a wind tunnel or CFD Analysis be undertaken. BMCL reviewing criteria. DS to provide criteria to AS. DS to provide paper to NHS Team. To be progressed after EWN 096 (above). DS advised need to have discussion re undertaking CFD Analysis and who pays for these costs. DS was getting the scope and costs for the CFD analysis. DS agreed to compile a letter to Andy Rooney from Board and BMCL. DS advised early cost estimate for analysis is £30k for wind tunnel analysis. AR to be requested to confirm if analysis is necessary as current on-shore guidance does not require an analysis. AS agreed to liaise with AR. PM advised that AR suggesting that analysis does not need to be undertaken but that other helipad users would need to be consulted i.e. ASR and Navy. BMCL to continue obtaining costs. DH requested that BMCL check CPA 0.4.7 as is a tie-in to HTM 15-03. P Rover has provided details of a company who can undertake the analysis. CFD analysis? – Andy Rooney was not expecting to have to pay the costs for this analysis and noted that other users would be required to offer opinion. CFD costs were as yet unknown – Darren Smith would obtain these.	22/09/2011

			11/08/2011 18/08/2011 25/08/2011 01/09/2011 08/09/2011 15/09/2011 22/09/2011	DS advised that experts advising that CFD analysis on helipad cannot be done. DS investigating this further and investigating costs for wind tunnel and CFD analyses. DS pursuing cost info. Advised timeline for wind tunnel analysis is 6-8 weeks. DS will clarify WSP quote. DS advised that WDI quote received and looks okay. BMCL were pulling together dwgs etc to provide for CFD analysis. Discussions required re 3m clearance at lift shaft. NHS will contract with RWDI. DS advised that he had requested that RWDI confirm the flexibility of their model. NHS Order required to progress. Nightingales liaising with RWDI. DS liaising with RWDI re analysis of helipad at lowest level and higher location. Ongoing. AS to provide update re ramp slope. DH confirmed ramp slope to be no more than 1 in 20 Agreed to close off as no issues outstanding	
10108	BMCL - EWN - 098	Helipad	18/05/2011     15/09/2011	Brookfield's aviation consultant has advised that changes pursuant to planning requirements, to enclose the sides of the 3m gap beneath the helipad, has the potential to prevent air flow beneath the pad and may cause turbulent flow over the surface of the pad, which under certain conditions will be unacceptable. Cladding around the periphery should therefore be avoided. DS advised this will need to be discussed with GCC Planners. To be progressed after EWN 096 (above). DS has requested JM to liaise with the GCC Planners re guidance preventing cladding/skirt to be around structure of helipad. Nightingales are preparing updated drawings. DS to progress with PM. DS advised that BMCL are proposing to meet with the Planners to provide an update on all the changes and this change will be included in this discussion. NHS to be involved in discussions with GCC Planners. Awaiting outcome of EWN 097 above	Work In Progress
10110	BMCL - EWN - 100	Drop Slabs NCH Play Areas	18/05/2011    4/08/2011 25/08/2011 08/08/2011 15/09/2011 22/09/2011 29/09/2011	With reference to the issue of the architectural drawings indicating areas of dropped slabs to accommodate for example the NCH external play area the following EWN has been raised with regards the impact on the M&E services distribution and the ceiling heights. With the proposal to drop or recess slabs to accommodate the NCH play areas it may be necessary to reduce the required ceiling heights in rooms below the change in level of the slab. An initial assessment has been carried out and it is believed that in some areas this reduction in the services ceiling void will be accommodated but until the detailed design and co-ordination of the services in these areas has been undertaken this cannot be confirmed. It is therefore intended to address the ceiling heights on a department/floor by floor basis as the design progresses. The following works may be affected: It may be necessary to reduced the required ceiling heights below those required in the ER's to accommodate the reduce services ceiling void. BMCL would review the design to identify exactly which areas/rooms affected for discussion with the NHS team. Acknowledged this item will remain until design bottomed out. BMCL agreed to come back with a plan to forward discussion but noted that deadline was November 2011 for the ceiling height implications on play area and theatres to account for service ducts space. PM suggested that review is undertaken in September 2011 and BMCL identify 'Plan B'. Consultants been advised that they can review NCH play park but reduced ceiling heights is not accepted in certain areas. Darren Pike will progress an interim solution. BMCL will organize a meeting early September to discuss. Meeting arranged for 8 <sup>th</sup> September to discuss. Meeting postponed and to be rescheduled. Meeting rescheduled for 22 <sup>nd</sup> Sept at 11am Info provided to DH and meeting as cancelled. On subsequent review of information a meeting should be arranged as info does not close out all concerns i.e. lowering ceiling height in hospital street Schedule of areas interim report completed – DS to organize meeting with BMCL/PM/DH	Work in progress (Not at apt stage to progress)

10125	BMCL - EWN 102	Acoustic Performance Between WCs in Areas 1 and 2 (Levels 1-3) and Ground Floor of Pod	06/06/2011  11/08/2011 18/08/2011 25/08/2011  01/09/2011  08/08/2011  15/09/2011 22/09/2011	<p>We have been advised by our acoustic consultant that the installation as per the Stage E+ design information will provide limited acoustic performance between WCs in the above locations. Approx 15-20dB reduction is expected. Board to advise whether this is acceptable. BMCL currently identifying potential solutions. BMCL checking identified solution works in all areas i.e. putting in a partition. PM had discussed another option with DJ. BMJ were providing drawing to acoustic logic. BMCL need to understand what the acoustic requirements are. Manny Ajuwon is to prepare drawings for review and sign off by PM. PM advised that he was reviewing the Acoustic Logic report. PM would meet with Capita and C&amp;B to review the scope of works. Confirmation to be provided to BMCL by COP 29/07. Report reviewed and returned with C&amp;B and Capita Symonds comments. Acoustic performance of WCs being tested later that day. Ongoing</p> <p>Preliminary tests ongoing. Indicative results positive however toilets are 31db. BMCL are exploring options to increase acoustic performance. AS to discuss with DH/PM. BMCL to provide test results. DS advised that he was meeting with acoustic logic to see if an interim report could be provided to the NHS re the toilet acoustic performance.</p> <p>BMCL met Acoustic Logic to agree setting out of report. Agreed that Acoustic Logic will now issue an interim report. Confirmed there were no set requirement s- some HTML and Some Builder's bulletin – report would include this detail. BMCL would provide a proposals or solution.</p> <p>BMCL has seen report in final format version. MA progressing obtaining interim report</p> <p>Formal report received by BMCL. Report identified that 30db is minimum and testing indicates 31db is being achieved. BMCL identifying proposal to increase acoustic performance alongside issue of formal report.</p>	
10485	BMCL-EWN-106	May Exceptional Weather Conditions	26/07/2011	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during May.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notifiable under Clause 60.1(13) of the Contract. We will forward details of this in due course.</p>	
10486	BMCL-EWN-107	June Exceptional Weather Conditions	26/07/2011  18/08/2011 25/08/2011	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during June.</p> <p>We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notifiable under Clause 60.1(13) of the Contract. We will forward details of this in due course. Skanska report was reviewed. It was noted that none these delays were reported directly to the NHS. Only issues for delay known to NHS were the ground conditions and Bentonite. BMCL stated that ground conditions would be an indication of weather – DR disagreed further discussions would be required to resolve. Noted that these type of discussions should be brought up at Construction Meetings to allow early information BMCL were liaising with C&amp;B re weather recording/weather station info (paisley/bishopton)</p> <p>Presentation being provided re proposals for onsite weather station. BMCL have confirmation that info not available from Paisley weather station</p> <p>BMCL discussing EWs with Skanska/Cementation. Dunnes have also raised an EW. DR advised that against the Paisley records there had not been a 1 in 10 year event. DMF advised that against Bishopton records there had been a 1 in 10 year event.</p> <p>Confirmed that BMCL would be installing an on-site weather station but will use the Paisley historic data. DR and DMF to discuss the calculation of the 1 in 10 year event.</p>	

			08/09/2011	Onsite weather station currently being fitted. DMF advised that August is 1 in 10 year event. August adverse weather impacted upon piling mat and need to bring additional materials on site and impact on excavated materials being taken off site. DR and DMF to discuss 1 in 10 year calculation.	
			15/09/2011	Requested that BMCL detail impact of adverse weather. Enquired how BMCL could confirm that the additional piling materials had been brought onto site. GW advised that Dunnes had brought in a different material. Dunnes have back-up info. JB suggested looking at the daily photos. GW also advised that there was an element of double handling of the 'slurry'. Suggested that in future site inspections take place.	
			22/09/2011	NEC Docs identify different processes for 1 in 10 year event calc. DMF to obtain Paisley 1 in 10 info. DR and DMF to discuss. BMCL putting process in place whereby NHS advised immediately of any issues on site due to weather which may become an Adverse Weather claim	
			29/09/2011	BMCL obtaining data from the Met Office. GW and GT to meet and update next week – weather station now installed	
10501	BMCL-EWN-108	Laboratory Mortuary Walls and Ceilings	16/08/2011	The original Vinyl specification for the Laboratory Mortuary Walls and Ceilings is no longer viable due to the supplier (Polyclad) not being able to offer a warranty for the product being applied to Fermacel Board.	
			18/08/2011	BMCL to provide technical details and sample to PM.	
			01/09/2011	DMF advised that the sample had been signed off however awaiting paint colour matching to vinyl. PM to provide PMI	
			15/09/2011	DMF will chase up confirmation that paint colour matching ok	
			22/09/2011	DMF confirmed colour matching ok. PM to provide PMI	
			29/09/2011	PM to provide PMI then close off	
10514	BMCL - EWN - 109	Aquifer Borehole, Additional Monitoring	30/08/2011	Ongoing monitoring of the 4no aquifer boreholes has shown an increase in PAH. WSP Geotechnical have proposed increasing the frequency of monitoring from quarterly to monthly in order to identify any trends that could be associated with the readings, so that the Authorities are properly informed. This proposal will be put to the Authorities for acceptance, however it is noted that if statutory bodies have further requirements the NHS board will be notified accordingly. Cost associated with increase monitoring will be advised.	
			01/09/2011	BMCL to provide costs	
			16/09/2011	DS advised process up and running.	
			22/09/2011	PM to raise CE. BMCL to upload costs	
			23/09/2011	Cross reference with CE 029. Item closed	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 22/09/2011

Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
10114	NHS EW 033	Adult & Children's Hospitals -Secondary glazing panels	25 <sup>th</sup> May 2011  4/08/2011  18/08/2011 25/08/2011 01/09/2011  08/09/2011 16/09/2011 22/09/2011 29/09/2011	<p>The Board record their concern with the current design proposals for the removal or opening of the secondary glazing panels within single bedroom spaces. These panels are currently designed to be lift out and the Board consider that due to the size and weight of the 8mm glass panels (c2.1mx 1.2m) will represent a H&amp;S and maintenance access problem for the Board. The Board request that a mock-up is provided and other options put forward. Ongoing process with CDMC. Part of strategy meetings being organized by BMCL. JB confirmed that a mock-up of the window would be constructed over at the labs site. Advised that BMCL would a) set up a meeting, b) run through risk assessments, c) determine what needs to be done to make the NHS comfortable. BMCL were organizing for the CDMC to be involved. PM raised concern that as the mock-up is not full scale it would be difficult to understand the full weight of the glazing pane. BMCL had provided a method statement for the glazing removal which had allayed the NHS initial concern. This item would be closed out once the NHS review the mock-up. A query had been raised re operation (use of rod). BMCL would provide a further detailed drawing. DH reported that consideration needs to be given to hopper arrangement i.e. cannot be a dust/dirt collector. The method statement had been sent to the CDMC for comment.</p> <p>Work in progress until mock up produced. Drawing showing hopper arrangement to be produced and reviewed by NHS.</p> <p>NHS reviewed drawing re hopper arrangement and will review mock-up and provide comments back to DS. DS to provide date for NHS to undertake review. . JM will provide update to PM later that day.</p> <p>Advised that PM had provided confirmation to BMCL of what is to be built.</p> <p>DS requested partial sign-off of the mock-up panel whilst awaiting the Dunhouse buff. PM advised that DS would need to check that the GCC Planners were agreeable to sign off in stages. NHS requested to sign-off the new profile.</p> <p>Tertiary glazing mock-up to be provided by BMCL (2/3 rd sized).</p> <p>Glazing panel installed in samples room. PM requested panel be mocked up as will be in final state.</p> <p>Awaiting bulkhead and downstand to be formed. Concern re method statement for removal of panel</p> <p><b>Method statement not accepted and requires to be reviewed. BMCL to organize access strategy meeting with AS/DH/KC)</b></p>	Work in progress until NHS review mock-up.
10442	NHS EW 035	Laboratory Block Level 1- Integration of MSC Track Analyser Equipment	06/07/2011	<p>Preliminary details have been provided to show the location of track analysers and associated plant and these drawings suggest that space maybe required in Area 6 Level 1 plant room for compressors and water plant. Please review attached drawing and provide preliminary comment. MSC preliminary drawings have been issued and reviewed and an issue with space noted. It was noted that any additional costs for installation of Abbott equipment would not be a cost to the Board but should be directed to Abbott. BMCL are requested to report back to the Board any additions. Advised that the NHS were awaiting CAD drawings from the contractor (anticipated will take 6 weeks to receive). There was a reduction in benching requirements. NHS will identify from the CAD drawings if any impacts on installed drainage. PM requested that BMCL advised PM/AS when BMCL will cover in the ceiling.</p> <p>PM advised that Lorraine Peebles has equipment list databases for a) MSC already have and will transfer,</p>	

			<p>4/08/2011</p> <p>11/08/2011</p> <p>25/08/2011</p> <p>01/09/2011</p> <p>08/09/2011</p> <p>15/09/2011</p> <p>22/09/2011</p> <p>29/09/2011</p>	<p>b) MSC new equipment, c) other current equipment to transfer and d) anything which NHS will be buying new. The NHS team would match the equipment to specific rooms and would identify if any differences required to services (heating, lighting, power, etc). DP to flag dates when rooms are being closed off. DS suggested that the intricacies re actual location of sockets should also be cross-checked. As previously discussed with AS, there may be rooms in which the work needs to stop until details finally identified. BMCL were comfortable to work with the NHS to start/stop works to certain rooms.</p> <p>PM agreed to discuss with Abbott after the cooling off period and using the migration programme review when access would be granted. Insurance issues are still continuing with further discussion required by all involved. BMCL asked to see programmes in order to review and overlay with their own to understanding timing s and requirements of NHS.</p> <p>Discussion with Abbot will take place after 8<sup>th</sup> August (Contract signing). PM advised that the position of 1 receiving station for the pneumatic tube was not as planned and he would review and identify alternative position. Drawing had been provided to BMCL with a clouded out an area in area 1 where benching should not be fitted. LP had been requested to obtain a drawing from Abbot for track analyzer and confirmation of drainage pots. PM advised meeting with Haematology and Biochemistry and Swisslog and BMJ to identify location of track analyzer and receiving station had taken place. BMJ had been actioned to amend drawing to move 1 receiving station. NHS awaiting final CAD drawing from Abbot. PM advised that the full track will be installed and Abbot will try to work to existing drainage pots.</p> <p>Confirmed that a meeting had taken place to discuss the equipment list groups. The NHS Team would provide pre and post installation information. Anticipating that the Abbots drawings will be provided by Monday. DMF was requested to flag when becoming an issue for BMCL.</p> <p>WIP. Issued final CAD drawings to BMCL for BMJ to update drawings (31/08/2011). Track and supporting kit needs to be installed by 10<sup>th</sup> March 2012.</p> <p>PMI provided to release area – BMCL looking at implications – creating a schedule of changes</p> <p>BMCL have a schedule for internal review and will provide to NHS team early w/c 19/09/2011.</p> <p>DH awaiting exact detail from MA re changes to services. DMF advised that a schedule identifying the impacts of the various PMIs had been prepared. DMF, PM and AS to discuss</p> <p>Impact meetings to take place. Level 1 technical services details obtained PMI 105 issued noting tracking position. Date for Abbott to come in to tape of and ascertain areas for pipes. Details of works by Abbott to be syncd with programme to ensure no delays Abbots progress plan ready for next week vital to get programme clear so as to prevent any delays</p>	
10489	NHS EW 036	Adult & Children's Hospitals - Adult Vascul/Urology Theatre Room THE232	<p>27/07/2011</p> <p>4/08/2011</p> <p>11/08/2011</p> <p>25/08/2011</p> <p>08/09/2011</p> <p>15/09/2011</p> <p>29/09/2011</p>	<p>Brookfield are asked to investigate the cost and programme implications of enlarging theatre THE 232 as per the attached over-marked sketch, and reconfiguring the layout of the adjacent control room THE 240, X-Ray Bay THE 241 and single recovery bay THE 243. All re-planning must be contained within existing floor area. DMF advised indicative costs uploaded. NHS team to review costs. Meeting set-up with Project Team and Users 18/08/2011. AS checking activity of interventional procedures. Report received from Healthcare Planner to assist discussion with Director of Surgery and Users.</p> <p>AS advised that he would have decision by 5<sup>th</sup> September 2011.</p> <p>PMI to be provided re alterations to 1 theatre and removal of 1 recovery bay.</p> <p>DH advised have direction – absolute requirements will be defined on 27<sup>th</sup> September 2011 (Theatres UGM)</p> <p>Nightingales are completing drawings and will forward to BMCL for calculating any price difference</p>	
10495	NHS EW 038	Carbon Filters - A&C Hospitals	<p>09/08/2011</p> <p>11/08/2011</p>	<p>The Board advise that they do not want carbon filters installed in the new A &amp; C Hospitals. The Board however wish to retain the option to have carbon filters installed into the Air Handling Units. BMCL requested to provide indicative cost.</p>	

			18/08/2011	DR requested to check VE list	
			25/08/2011	DP currently investigating flexibility of drives for Labs. Anticipating that will be able to design appropriately for the A&C Hospitals. DP will confirm if any minor alterations to Labs is required.	
			01/09/2011	DP advised it was anticipated not having Carbon Filters is ok however there may be a few inverter drives needing tweaked.	
			15/09/2011	DP advised that design for A&C can be based upon there not being Carbon Filters	
			22/09/2011	BCML to provide cost saving info re removal of carbon filters in A&C Hospitals	
			29/09/2011	Cost saving still awaited for removal of carbon filters	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 22/09/2011:

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
444	PMI/General/052	Energy Centre - Visible Renewables	28/01/2011  4/08/2011  11/08/2011 18/08/2011  25/08/2011 01/09/2011 08/09/2011  15/09/2011 29/09/2011	The Board confirm the omission of the wind turbines currently proposed on the roof of the Energy Centre. BMCL to provide quote for deletion of turbines. NHS request BMCL to advise on other renewables which would fulfill ER's. BMCL to discuss with Board's Low Carbon Advisor and make proposals. BMCL have prepared a design proposal for discussion with the NHS Team. BMCL progressing discussions through Low Carbon meetings. BMCL have prepared proposals and are obtaining costs. Costs issued to NHS via Aconex re PV. Costs to be issued for omission of wind turbine (BMCL awaiting infrastructure costs from Mercury). BMCL awaiting confirmation to work up detailed design. Awaiting SL guidance where best to allocate resource. DP to ensure SL has info. DP to ask SL to discuss with AS. AS to email SL Advised agreed that PVs will be the option for visible renewables. Got indicative costs = need costs and design detailed. PMI to be issued re advancing PV design BMCL requested PMI to progress PV proposals and design <b>PMI written up and progress</b>	Work in progress
456	PMI/General/057	NCH Renal Water/Plant – Confirmation of requirements	02/02/2011	The Board would confirm the requirements for Renal Water as follows: Adult HDU/ICU as outlined in the ITPD Employers Requirements: confirm 5 locations in the isolation rooms nearest coronary care are to be provided. Additional requirements in Children's Hospital is the provision of a twin loop system with the following outlets: Wards: 6 bed locations and 4 dialysis stations; PICU: 3 locations; Labs: 3 locations; Ready to use stations outside lab: 2 locations = 18 in total BMCL to provide costs. BMCL requested a meeting to discuss renal points. DH provided a schedule of information as he had subsequently met with A&C Renal Reps. The A&C was largely unchanged however a no of points needed to be rebalanced. The acid concentrate was only required to 1 <sup>st</sup> 3 areas on list (Outpatients, Ready Use, Labs) – no need for acid concentrate on level 4 or critical care. NCH inpatient/outpatient/ready use/labs on 3 <sup>rd</sup> floor and PICU on 1 <sup>st</sup> floor. No acid concentrate reqd but twin loop is req'd. DP to provide proposal based on plant being on 2 <sup>nd</sup> floor. DR to discuss with GW. NHS need to prepare change control paper including reasoning why not adequate point included in initial brief. Adults Critical Care only requires a single loop but everything else requires twin loop. Proposing 1 plant room with resilience provided for each plant. DP to provide updated dwgs to FW & PM for approval. DH advised that the NHS Team still needed to get the drawings re location of renal plant. Confirmed that BMCL were updating the schematic. Once schematic reviewed, DP advised that schematic provided to DH and FW for review against schedule and meeting arranged for 1 <sup>st</sup> June to discuss. Schematic agreed. BMCL progressing. Further queries being raised as design progressing i.e. PICU loop. DP had met with FW and MM to mark-up the drawing. Schematic to be updated. Retained the pipework in NCH however PICU loop removed. DP would provide a final drawing and indicative cost. Drawing would be due this week. DP	Work in progress

			18/08/2011 15/09/2011 29/09/2011	<p>advised that BMCL were progressing on basis of what agreed with FW. He had a schematic with change hand-marked. The updated drawing would be provided through the RDD process. GW will provide indicative costs.</p> <p>Awaiting cost info from Mercury</p> <p>Awaiting cost info from Mercury – Mercury currently focusing on Equipment List pricing</p> <p>Still awaiting costs and progressed</p>	
471	PMI/General/064	Food Waste System - New Hospitals	14/03/2011	<p>The Board request BMCL to develop a proposal based on the traditional food waste disposal system incorporating Waste Disposal Units (food macerators) in all regen kitchens. The system must have its own pipe system which will initially feed into the Main Hospitals Drainage system(s) at basement level. The design must allow the opportunity to comply with future changes to regulation (i.e. not to connect into Hospitals drainage system) by ensuring that it is possible to configure all the waste disposal pipe system to be connected to an external mechanism for removing the waste from site, therefore, removing the connections to the hospital drains. This must include, easy access to pipes and installing appropriate valves and extension pieces to enable connection to an external system. There will be no requirement for the currently proposed collection/de-watering/cleaning arrangements situated at the waste compound (Labs Building). NHS to review and respond by cop nxt week. Board currently considering options, meeting supplier of potential solution 4<sup>th</sup> April. After the food waste meeting then meeting with Scottish Water should be organized to get their view on what can and cannot be put down the drains. Think still need to put in additional pipework to deal with regen kitchens with waste going into a separate system. If successful Board will confirm way forward and PMI will be issued to confirm no food waste to be stored within service yard. Trial organised to take place at IRH. NHS finalizing trial agreement. AS advised that KC had undertaken visits. System appears to be very impressive, simple to use and efficient. NHS identifying budget to install system at IRH. DP reported that option B has difficulties. If trial of system does not satisfy NHS requirements then need to identify a hybrid solution. DS commented that there was still space in basement to collect macerated waste. DP advised that he had spoken to KC. The trial at Inverclyde Royal was being progressed. The delivery of the unit was being organized for the Monday KC returns back from annual leave. Note required to say that BMCL would be buying the unit and NHS would be operating and installing the unit. NHS expecting machine to be fitted w/c 20/06. Fitting of machine delayed due to issue with valves. AS advised that W2O were undertaking the commissioning and training on 27/06/2011. System work okay – DP and AS to visit Inverclyde Royal Hospital to see machine working. AS reported that a visit to see the new machine in situ had taken place and that users were happy and AS agreed to advise the Facilities Director of comments. BMCL agreed that they would meet with the company Waste2 to discuss the possibility of fitting same system into A&amp;C and also discuss any implications ie Health and Safety. DP confirmed that the drain is sized for the macerator being installed. DP agreed to formally write to confirm. VE item – value to be added to VE schedule. DP to confirm how many machines will be required. DP advised that to meet the brief a machine per regen kitchen is required however some regen kitchens would not have enough activity to allow the machine to work properly. DP investigating whether the company could make a smaller machine. In addition, he did not think that all the regen kitchens had enough space for the machines to be fitted. DH advised that the Board were awaiting Environmental Health sign-off. If okay, then in principle the machines could be purchased. Key</p>	

			<p>4/08/2011 query remained as to whether manufacturer could provide a smaller sized machine. DH agreed to confirm if BMCL should continue discussions with manufacturer.</p> <p>11/08/2011 Environmental sign off required – PM agreed to chase confirmation of acceptance of the new system as invoice would be due for payment very shortly. BMCL noted they were still working on a unit size for the A&amp;C.</p> <p>18/08/2011 Design team review of regen kitchens based on current unit (size). 5 regen kitchens identified which would require a smaller unit. BMCL identifying solution.</p> <p>25/08/2011 DP providing solution proposal identifying how BMCL propose to meet ERs.</p> <p>01/09/2011 Work in progress</p> <p>08/09/2011 DP requested to confirm if machine needs to be licensed. DP to liaise with Richard Harland. AS confirmed that the machine would be left at Inverclyde.</p> <p>15/09/2011 Licensing requirements being investigated</p> <p>22/09/2011 BMCL to progress on basis of Inverclyde. KC + DP and James to liaise.</p> <p>29/09/2011 KC liaising with John Green (Board's H&amp;S Manager). View is licensing not required. JB advised BMCL have requested external legal advice.</p> <p>JB advised legal advised suggests that food waste machine will be interpreted as a waste transfer entity and will therefore need a license. Would need to demonstrate that grey water has no impact on water course. AS advised discussions ongoing with Scottish Government. Scottish Government want to use waste as food for creating energy – no waste does not fit with this position. BMCL requested to continue working on having Food Waste system. NHS investigating impacts and costs of having brock bins.</p> <p><b>KC is costing the different systems. BMCL instructed to continue with present plan</b></p>	
485	PMI / General / 065	Laboratory Block - Service Yard Management Proposals	<p>22/03/2011 The Board proposes to operate a secure service yard area and have developed a solution that will require the provision of automatic gates, fencing and signage. The attached drawings show the general arrangement of gates fences and the arm barrier into the service yard. Brookfield asked to convene a meeting with the Board's FM &amp; Project staff to review the drawings &amp; develop a scope of works for pricing. Brookfield are then asked to provide a price to supply &amp; install the relevant equipment. This PMI supersedes BMCL EW 055. DMF advised cost will be provided by cop 15/04. Costs received by Board, £74K excluding VAT. Board to progress. Confirmed that barrier is part of quote therefore revised costs reduced to circa £65k exc VAT. AS advised that KC will need to get agreement from Director of Facilities to progress on 13/05/2011. DMF suggested that decision re installing ducting was becoming time critical. PM advised to install ducting as per drawing at this time. Change control form with Director of Facilities for sign-off by COO. AS confirmed internal approval through Change Control process was not given. NHS to meet BMCL to revise the proposal to reduce costs.</p> <p>4/08/2011 NHS/BMCL require further discussion re spec and costs.</p> <p>11/08/2011 NHS Requirements being reviewed to minimize costs PM advised that he would be submitting a paper to the next ASSB for approval (September 2011).</p> <p>24/08/2011 AS advised that PM (BMJ) is checking out proprietary skids for service yard.</p> <p>01/09/2011 Cross reference with PMI 102</p> <p>22/09/2011 Revised Service Yard proposal agreed through Board's Change Control process. PM, DMF and DR to discuss</p> <p><b>PM to generate PMI approval to proceed</b></p>	
496	PMI/General/069	A& C - Provision of Fire	05/04/2011 The Board notes that in accordance with the Employer's Requirements (9.20 & 10.4) the	

		Extinguishers and Fire Blankets	11/08/2011 15/09/2011	contractor is to provide all fire extinguishers and fire blankets. GW advised 1200 sets at circa £50 per set. Total no of fire extinguishers to be identified. Total no of fire extinguishers required for touch-down spaces identified as 256. BMCL fire extinguisher info to be provided to NHS Team for review. Price had now been obtained and numbers to be reviewed. NHS reviewing indicative costs. AS and DR to discuss <b>NHS will confirm way forward post receipt of the Equipment List</b>	
529	PMI/General/082	Laboratory Project - Cafe Shell Space	25/05/2011  4/08/2011 18/08/2011 08/09/2011 22/09/2011	The Board confirm that they will use this space as a vending machine area, and require an indication of the cost alteration to provide the area as indicated on the attached sketch and as summarised in the description below. Omit the following; roller shutter door to space. Add the following; power points and water supply as indicated on the attached drawing. Floor finish and skirting as per adjacent atrium. Suspended ceiling with 4 no inlay 600x600 light fitments to suit area, ceiling set at 2.7m AFFL. Eggshell paint finish to walls. BMCL to provide costs. PM to check out change to paint spec = to be trade diamond. DS advised that the maximum width of door available is smaller than the opening. The floor finish could not be continued through as there is no recess. DS agreed to liaise with KC. BMCL early cost circa £5-6k. GT advised that the principles have been agreed i.e. egg shell to corridors and all other areas diamond matt. NHS to review costs. PM to discuss any costs with C&B BMCL agreed to obtain costs by close of July. BMCL uploaded costs to Sypro for review by NHS. BMCL reviewing quote as further costs may need to be added – not a critical programme issue. Costs uploaded by BMCL for NHS Review PM to provide PMI	
579	PMI/General/096	Laboratory Project - Adaptations to benching and gas points in Room L4/B/022	28/07/2011 01/09/2011 15/09/2011	Omission of laboratory benching and adaptations to gas points in main laboratory. BMCL to provide cost. Confirmed that BMCL received pricing – to be provided to PM <b>Cost provided by BMCL for NHS Review</b>	
581	PMI/General/098	Laboratory Block Level 2 - Adaptations for ASSAB benching in rooms L2/B/026, 027 & 029	01/08/2011 01/09/2011 08/09/2011	Omission of ASSAB worktop and some power and data points in 3 rooms within the Genetics area. <b>Confirmed that BMCL received pricing – to be provided to PM</b> <b>BMCL reviewing impact</b>	
584	PMI/General/099	Laboratory Block Level 1 Pod -Change of use 9 rooms - cancelled.	09/08/2011 08/09/2011 15/09/2011	The Board confirm the cancellation of PMI 079 and note that the use of these rooms should revert back to that as agreed at Stage E sign off. BMCL to provide price <b>Awaiting costs from mercury. Will be provided as soon as possible after the Equipment List had been priced</b>	
588	PMI/General/100	Laboratory Block - Level 4 CAT III Facility	17/08/2011  25/08/2011 01/09/2011 08/09/2011 15/09/2011	The Board confirm Brookfield Multiplex should proceed with builderswork to complete the CAT III suite based on BMJ drawing SK(70) 25.B issued 16th August 2011. BMCL to provide confirmation of controls and ventilation in the room. BMCL will provide a response to PM. PM cross checking against Biosafe reqs DS and PM to discuss Meeting being held later that day to discuss	

			22/09/2011	DH acknowledged response received from DS. On review response is confusing. DH and AS to discuss. DMF advised that in some instances would be better to leave items as in and install a second item in the preferred space to meet requirements i.e. IPS sink. JB advised that Atlas do not agree with all the Bio Safe requirements. Agreed that AS and DH to discuss in first instance, PM to be updated on return from leave and thereafter meeting to be arranged with NHS, BMCL, Biosafe and Atlas.	
			29/09/2011	Panels will require to be removed twice yearly for full inspection – not possible to create hinges to allow full removal	
593	PMI/General/102	Laboratory Project- Service yard Entrance Pockets for Gate Posts	23/08/2011 01/09/2011 29/09/2011	The Board confirm that pockets approximately 400x400x250mm deep should be formed to locate the proposed service yard gate posts. Cross reference with PMI 065 Close out	
595	PMI/General/103	Laboratory Block - ASSAB Benching	25/08/2011 08/08/2011	Rooms L2/B/055 & L3/B/021c Do not install ASSAB laboratory bench in arts of these rooms as indicated on the attached drawings. BMCL reviewing impact	
599	PMI/General/104	Laboratory Block - Level 4 Managed Service Contract Equipment Review	29/08/2011 08/09/2011	Adaptations to ASSAB benching after review of MSC equipment on Level 4. BMCL reviewing impact	
600	PMI/General/105	Laboratory Project - Level 1 Managed Service Contract Equipment Review	31/08/2011 08/09/2011	Adaptations and omission of ASSAB benching after review of MSC equipment on Level 1. BMCL reviewing impact	
601	PMI/General/106	Laboratory Block Level 1 Pod - Position of Sharps Boxes	06/09/2011 08/09/2011	Install Group II sharps boxes as per attached marked up drawings. BMCL to provide price – reason for costs for fit of new equipment	
603	PMI/General/108	NSGH Schedule of Cost Components	12/09/2011 29/09/2011	The Contract Schedule of Cost components has been amended to incorporate the following agreed post contract changes:-  1. lease costs, at reasonable market rates, of temporary office accommodation (outwith the Working Area) for use by the Project Team, prior to the Working Area offices being installed and commissioned 2. lease costs, at reasonable market rates, of land (off Hardgate Road) for use as temporary car parking 3. costs associated with the procurement and storage of materials off site as authorised by the Project Manager under a Project Managers Instruction Only requires to be accepted by BMCL to move forward	
606	PMI/General/109	Visible Renewables	23/09/2011	The Board requests that on the basis of the wind turbines being removed from the scheme (cross reference PMI/General/052) that Brookfield provide a detailed proposal for the use of photo-voltaics to achieve the Board's requirements for renewable energy. This PMI supercedes PMI/General/052.	

The following Compensation Events are awaiting close out as at 22/09/2011:

Sypro ID No	NHS Ref No	Item	Date Issued	Status
6043	CE 024  29/09/2011	Laboratory Block - Fume Cupboards and Safety Cabinets The Board confirm that Brookfield Multiplex should proceed and enter into contract with the lowest tender for the supply, installation and full commissioning of all the cabinets included within the Board's specification as tendered. Size of cupboards to be confirmed with users – drawings required as soon as possible DP advised that manufacturers build slot is 2 <sup>nd</sup> September.  Drawings returned to BMCL – only a few queries outstanding. 1 Fume cupboard still showing has a hepa filter. DP to provide details and thereafter PM to confirm.  Additional costs re mark-up drawings. DMF will provide costs asap DP confirmed hepa filter removed from all fume cupboards Closed	25 <sup>th</sup> May 2011	Closed
6261	CE 028  29/09/2011	Delay to Linthouse Burn Diversion (George Leslie Delay claim) The Board acknowledges that there was an element of delay to the Linthouse Burn diversion works which could be attributed to the NHS. This CE confirms that the Board agrees that the sum of £75k (inclusive of Overhead, profit and VAT) is attributed to the NHS. This CE closes out BMCL-EW-065. Closed	12/09/2011	Closed
6278	CE029  29/09/2011	The Board accepts the proposal to increase the groundwater monitoring from quarterly to monthly until May 2012 in order to identify any trends that could be associated with the PAH level as agreed with GCC. This CE closes BMCL - EWN – 109 (Sypro 10514) Closed	23/09/2011	Closed
		PMI to be issued for Service Yard security		

- 1) PM to provide PMI re clarification of SHTM compliance requirements in Labs Facility. Work in progress DH and DS to progress DP to provide list of where design meets SHTM . List with Wallace Whittle for review
- 2) A&C Ground Floor drainage design - BMCL to raise an EW. Proposal being prepared via Jim Murray for NHS approval – **input to Sypro**
- 3) Borehole report received. DP will provide to NHS team. List of queries to be identified and then meet with Business Stream. DP advised need to provide justification re meeting on-site water requirements. ZBP providing firm number to work within – **DP will conclude next week with Steve Pardy**
- 4) RDD Schedule – updated schedule required urgently by NHS Team – **to be forwarded to NHS by end of week**
- 5) **Multi-tone – AS further investigating quote/requirements – REMOVE complete**
- 6) Labs Plant rooms – BMCL requested to provide costs for a) tank all the plant rooms, b) tank only the plant rooms in the pod, c) tank wall/bund in mortuary

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 13/02/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			08/03/2012	with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.
			05/04/2012	GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.
			12/04/2012	BMCL have instructed Dunnes to produce method statement.
			31/05/2012	A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.
			27/06/2012	DS advised that final test can only be carried out once Biochemistry has been demolished.
			05/07/2012	Demolition access from 22 <sup>nd</sup> August 2012
				GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW
			02/08/2012	Biochemistry site investigation works will be undertaken.
			16/08/2012	BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28 <sup>th</sup> August 2012 NHS date – NHS to confirm 28 <sup>th</sup> August is ok
			23/08/12	DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs
			30/08/2012	BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.
			06/09/2012	Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.
			13/09/2012	Demolition works substantially complete – no issues raised thus far
			20/09/2012	DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.
			18/10/2012	Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.
			25/10/2012	DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.
			15/11/2012	DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected. Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC. Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.
			22/11/2012	DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K
			29/11/2012	DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.
			06/12/2012	DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide

			<p>13/12/2012</p> <p>20/12/2012</p> <p>10/1/2013</p> <p>17/01/2013</p> <p>24/01/2013</p> <p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p>	<p>an estimate of what needs to be dug out for AS by 07/12/2012</p> <p>DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&amp;A session would be beneficial. DS acknowledged that the report was difficult to read.</p> <p>DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.</p> <p>DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.</p> <p>DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.</p> <p>DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.</p> <p>DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.</p> <p>DH advised that a response from URS had been received and was under review by AS.</p> <p>DH advised that he had provided a draft response for AS to review</p>	
8996	BMCL-EWN-79	BMCL request PMI due to planning condition change at junction of Shieldhall Road & Hardgate Rd	<p>22/02/2011</p> <p>24/11/2011</p>	<p>BMCL request a PMI for the Works associated with the changes to the junction at Shieldhall Rd / Hardgate Rd as now required by LPA Condition 11 of permission 10/01779/DC, as this currently sits outwith BMCL Scope of Work. BMCL are aware that it is the Boards intent to pay for this additional work from the Section 75 agreed monies. BMCL will pursue this. DS advised that GCC have added an extra condition re upgrading junctions at Hardgate Road and Shieldhall Road.</p> <p>DS provided overview of how the filtering would work. DH advised that the Board had instructed the works direct therefore this item could be closed. DS advised that the filtering works had implications on the planning application condition 11 as the works needed to be concluded before this condition could be closed out. DH advised that the works had been instructed through Peter Toal. It was agreed that this item should remain on the tracker as a reminder.</p>	/11/2011 To remain on tracker as a reminder
12023	BMCL-EWN-118	Out of tolerance piles	31/01/2012	<p>Piling – NHS advised by BMCL that a crop of 3 piles were out of position and outwith tolerance. WSP saying foundation cannot move. On BMCL critical path. WSP have designed a mini-pile solution (9 mini-piles to be put in). Mitigation of programme early warning. Ongoing investigation of all pile locations and reason for some being out of position. Impact on defined cost. PM to advise Capita. Advised that BMCL had commissioned an independent survey to check the piling. Skanska been advised that they need to prove piles are in correct position. Mini piling rig coming on site on Wednesday 18<sup>th</sup> Jan. 3 locations had potentially been identified and no further locations were expected (12/01/2012) Confirmed that</p>	

			<p>mini-piling rig is now onsite and started however works not progressing as quickly as would have hoped. BMCL will have costs allocated against a separate cost line so can see the costs out and back in when the insurance comes through. JB confirmed that this issue is an insurance claim matter. DR suggested that AMc would need to be informed re cashflow. GW reported that BMCL would not move the £125m. BMCL will raise an EW as surveys have identified issues with 35 piles. GW reported that the supporting info would be uploaded as well i.e. insurance, Loys Surveys. DH raised concern that the works had been commenced before the design strategy had been signed off. GW advised this had not been the case and agreed to confirm the work commence and sign-off dates (26/01/2012) JB confirmed date of loss adjustor meeting (10<sup>th</sup> Feb). URS, DR and AS will attend from the NHS.</p> <p>27/09/2012 3 piles to be investigated. It was agreed to forward the drawings to Capita for information and WR will be instructed to liaise with BMC. WSP noted in their report that some of the piles being investigated were out of their concentric limits but within performance tolerance. Skanska had agreed to provide warranty for the affected pile and BMC will update Capita</p> <p>04/10/2012 JB advised that BMCL were meeting with Marcus Gresham later that day so that an update can be provided on the insurer's position re the claim. JB would provide an update to NHS thereafter.</p> <p>11/10/2012 JB provided an update re the insurance claim. AF advised that 1 pile in zone B and 2 piles in Zone L had been replaced with mini piles. The mini-piling rigs were now off site. Piling – still in hands of insurer. BMCL concern – less deductible – BMCL continuing to argue the case. BMCL consider should be £50k deductible but is dependent on what clause insurer decides to deal with the claim under. Spent £2m and think may only get 0.5m back less the £50k. Insurers meeting to discuss. BMCL still advising due to temp works. Told Dunne it is Dunnes/Dunes Engineer(OGI) who are responsible. All piles have now been checked. Previous surveys done on piles at risk (within batter). AS was requested to provide the no of piles outwith the batter v/s no of mini-piles (ratio) (11/10/2012)</p> <p>18/10/2012 JB advised that the Insurers market meeting had taken place the previous day and he would provide an update as soon as one had been received.</p> <p>25/10/2012 GW advised that the works were finished and BMCL were awaiting the report from the loss adjustor (expecting this to be received in a couple of weeks). JLT liaising with the 5 main principle insurers on BMCL behalf.</p> <p>08/11/2012 BMCL awaiting the outcome of the Insurer Market meeting</p> <p>22/11/2012 No information returned from insurance company</p> <p>06/12/2012 GW advised that JLT is still liaising with insurers.</p> <p>20/12/2012 JB advised that BMCL had recently provided a copy of the programme had mitigation measures not been taken i.e. 7 week delay (including float period). BMCL were pursuing this element of the policy.</p> <p>31/01/2013 JB advised that BMCL will chase for an update from the Brooker.</p> <p>07/02/2013 JB noted that he was meeting with Ian Wiltshire on 13/2 to receive an update on progress. A meeting with the loss adjustor is scheduled for later in Feb 2013. BMCL have received some compensation.</p> <p>14/02/2013 JB advised that he had met with Ian Wiltshire to review the information that had been previously sent in preparation for the forthcoming meeting with Marcus Gresham (25<sup>th</sup> Feb 2012 at 10am?) Date and time to be put in Alan and Douglas's diaries.</p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012 Workflow report showing overdue RDD documentation. We note that this late response may effect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been</p>	

			12/04/2012	returned. D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.
			22/11/12	DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.
			07/02/2013	DH advised that items are being addressed.
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting

				that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.	
15473	BMCL-EWN-128	Hardgate Road - Section 96	<p>21/06/2012</p> <p>04/10/2012</p> <p>11/10/2012</p> <p>11/10/2012</p> <p>18/10/2012</p> <p>25/10/2012</p> <p>08/11/2012</p> <p>15/11/2012</p> <p>22/11/2012</p> <p>29/11/2012</p>	<p>DS advised that he was going to organize a safety study on the two road access. GCC were requesting a discussion re resurfacing. AS noted that this was not a Board issue. DS advised that his view was to limit to 15m either side of the junction. JB enquired about the CP1 entrance road. DS advised that would be part of a separate discussion and suggested that a separate RCC for the CP1 entrance road would be required.</p> <p>DS advised that there had been communication between GCC and WSP re resurfacing work. BMCL do not have the budget to carry out these works and it was never expected that these works would need to be carried out by BMCL. BMCL will raise an EW. DR suggested that BMCL request their Planning Consultant to advise GCC that this not BMCL works. DR suggested that this was part of section 96 works. DS advised that the implications of refusing to do these works. PM suggested that BMCL should organize a meeting to discuss. DCampbell and J Miller to be asked for their thoughts.</p> <p>Section 96 costs attributable to resurfacing of hardgate road</p> <p>Noted that EW raised earlier that day re Section 96. Section 96 gives GCC the right to pursue someone who has used the roads excessively to pay for resurfacing works. AS advised that BMCL need to write to GCC advising not doing the roads as not liable. Discussion needs to be had re who is responsible as AS considers that BMCL responsible as Planning Risk is BMCL. JB noted that there is no budget for resurfacing roads outwith the site. DS advised that he did not believe that sorting road outwith site is part of Planning. DS would need to see the official response to/from GCC. WSP to advise that dilapidation surveys have been undertaken and the road(s) were never in a good condition.</p> <p>JB noted that WSP were to write to GCC reminding of previous correspondence and survey results. GW advised that the Planning Consents against the RCC were being checked. DH noted that the Act for 56 also gives opportunity for GCC to request/instruct reasonable works.</p> <p>DS advised that he had met with the WSP reps on Monday and would provide feedback to the NHS asap. AS requested copy letters of what sent to GCC. AS raised concern that WSP were not issuing letters to GCC timeously.</p> <p>PM advised that NMCGarry had confirmed at a meeting the previous day that the letter had been issued to GCC. PM requested a copy of the issued letter be provided to the NHS team. DS noted that AS had seen the draft letter prior to issue.</p> <p>Response awaited from GCC</p> <p>DS produced a letter from GCC received yesterday. The letter noted that they road had disproportionate wear for around 600m and that BMC would be required to contribute to repairs. DS wants to understand the reporting process in more detail. MS suggested that we should be prepared for an appeal and it would be advisable to prepare a strategy in advance of this being necessary. DS would liaise with WSP to prepare a response.</p> <p>DS advising that he was looking for GCC to show records i.e. condition of road before BMCL started on site. DH enquired if the repairs request referred only to Hardgate Road an DS confirmed that it related to 400m Renfrew/Govan Road and 200m Hardgate Road. DS advised that he was disappointed with GCC as BMCL had assisted GCC re the controlled parking on the basis of being provided with help re loading however GCC requested that BMCL submit an application for the loading and subsequently rejected the</p>	

			<p>06/12/2012</p> <p>13/12/2012</p> <p>20/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p> <p>24/01/2013</p> <p>31/01/2013</p> <p>08/02/2013</p> <p>14/02/2012</p>	<p>application. PM enquired if these works would take place at the end of the Project. DS suggested that the works would be much later in the job as consideration needed to be given to traffic lights, etc. DS would provide feedback re response from GCC.</p> <p>DS advised that GCC have been requested to provide proof that the road was in a good condition prior to BMCL starting on site. PM advised that NMCGarry had suggested at the Hospital Design Group meeting that the only way to resolve this may be to have all parties meet.</p> <p>AS confirmed that he had received a copy of the letter which had been issued to GCC re the road condition. DS noted that response to letter was awaited by BMCL.</p> <p>DS advised that he would progress ongoing discussion with GCC early in the new year i.e. GCC response to the BMCL letter. DS suggested that a joint NHS/BMCL meeting may be required.</p> <p>DS confirmed that there had been no response received from GCC. DS advised that he was pushing GCC for a response. Understood NHS meeting with GCC Planners soon. AS advised that the NHS were meeting with the GCC Planners to discuss a range of issues of which Hardgate Road issue will be raised. DS noted that AS had a meeting scheduled with GCC on 22/01/2013. BMCL were still pursuing a meeting with GCC through DCampbell. GCC have now advised another rep (3<sup>rd</sup> rep since trying to organize meeting). DCampbell had managed to get a hold of the recent GCC rep who appears to be happy to come down to the site to meet. AS suggested that WSP should meet with GCC and push back the roads issue to GCC. DS agreed to liaise with AS later that day.</p> <p>AS advised that he would ask HGriffin to write to Jim Fleming to seek confirmation that Fastlink will resurface the road between Thales and the new hospital site entrance. DS advised that DCampbell was meeting with GCC and it would be beneficial to get DCampbell the fastlink plans. DS was meeting with DCampbell on 25/01/2013 and would confirm whether DCampbell had managed to arrange a meeting with GCC.</p> <p>DS advised that a meeting with the GCC Roads rep was scheduled to take place on 14<sup>th</sup> Feb 2013. AS advised that a minute of the meeting between GCC and NHS had been prepared and the minute includes a point re the road to be resurfaced between Thales and the hospital site entrance by Fastlink. AS agreed to provide a copy of this para to DS for info and also to provide info re the 6 phases.</p> <p>AK advised that something needed to be done with the road at the gate. BMCL may fill in 1 or 2 pot holes. Temporary repairs would be carried out to Haul Road. AS requested that a complaint be lodged with GCC re the condition of the roads. DS advised that the condition of the road would be raised with the GCC rep when on site on 12<sup>th</sup> Feb 2013. DS advised that he had received the note from HG re NHS discussion on Fastlink and WSP asked to play back in their discussions that there is an expectation that GCC will be doing the roads.</p> <p>JB advised there was no further update to that provided at the recent PMG meeting i.e. meeting held on 12<sup>th</sup> February, GCC acknowledged they have a degree of responsibility, intimated GCC looking for 60/40 split, DS asked for a joint meeting to be arranged with GCC, BMCL quantifying the costs involved. It was understood that GCC was reviewing what needs to be done the road now.</p>	
15474	BMCL-EWN-129	Sub compartment Additional Fire Doors	<p>11/10/2012</p> <p>11/10/2012</p>	<p>Meetings ongoing with building control who are requesting additional sub compartment fire doors. Assistance from NHS Ops staff on operational restrictions such additional doors would impose.</p> <p>Noted that Building Control were requesting additional doors to be put in. AS was under the impression that BC had asked for 4 sets of doors (early areas) but that the number of doors had now doubled. A review of all areas identified, on the basis of the current request, that a total of 40 additional doors could be requested. DS noted that the additional door requirements need to be bottomed out asap. JB acknowledged that the additional doors were part of defined cost however the BMCL risk/contingency pot</p>	

			<p>18/10/2012</p> <p>25/10/2012</p> <p>08/11/2012</p> <p>15/11/2012</p> <p>22/11/2012</p> <p>29/11/2012</p> <p>06/12/2012</p> <p>13/12/2012</p> <p>20/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p>	<p>was getting low. AS suggested that BMCL should organize to meet with BC with Stephen Gallacher and Fiona McCluskey so that they can explain the operational difficulties which will occur should additional doors be put in. AS requested that DS mark-up plans/drawings of the possible additional doors and SF to organize meeting with DS, AS, PM, DH and FMc to go through. JMurray to prime BC that NHS will be attending the next meeting to discuss operational difficulties/safety which additional doors will create. DS advised that he has asked J MacLean to confirm that door furniture not required. AS suggested that the NHS should meet with J MacLean. DS advised that he would liaise with K Hamill re door furniture. DH noted that Building Control have confirmed to G Burnett that 1 door can be removed i.e. reduced no of doors from 8 to 7 in G&amp;D. AF advised that works were due to commence re cutting in and consideration would need to be given to putting dampers in. DH advised that the locations of potential additional doors had been identified. AS noted that there was a meeting scheduled for 19/10 and the NHS would await feedback from DS. DH noted that DS was identifying who was best placed to contact J MacLean. AS requested that DH liaise with DS on 22/10 re contacting J MacLean.</p> <p>DH advised that a meeting with Building Control had taken place on 23<sup>rd</sup> October. The doors in zones D&amp;G had been agreed with the exception of Coronary Care and BMCL/NHS were still attempting to get these additional 2 doors removed. Zones E&amp;H had been reviewed and agreed and GB was preparing a formal submission to GCC. Most of the requested additional doors are on ceiling lines to minimize disruption. The total number of additional doors (excluding the wards) was now circa 30nr. DS advised that he would be meeting with JMacLean the following week to discuss Ironmongery.</p> <p>DH noted that concluded G&amp;D additional doors discussion with GCC and 2 additional doors agreed to Critical Care. E&amp;H proposal being submitted. The rest of the building has been reviewed and the submission being pulled together. DS advised that JMurray being asked to submit info to GCC w/c 12/11/2012. DS suggested that there were still circa 30 doors. DH advised that the 30 doors were mostly upgrades.</p> <p>DH advised that GBurnett had provided the proposal to be given to Building Control. DH would review this asap. DS advised that he wanted the info to be sent to Building Control asap so that the forthcoming meeting with Building Control has a meaningful discussion.</p> <p>DS reported that an assessment has taken place with Building Control and is now awaiting report. DS will arrange a meeting with Raymond Barlow.</p> <p>DH advised that a submission for the full building had been provided to Building Control. The proposals had been discussed at various meeting with Building Control and no issues had been raised. It was not expected that Building Control would request any substantial changes. Feedback was awaited and once provided DS would update the group. DS was meeting with R Barlow on 6<sup>th</sup> December 2012. DS suggested that the total number of additional doors, including the tower, was circa 50.</p> <p>DH advised that comments regarding some fire doors/locations were awaited from Brian Tierney. BT had asked for some clarifications. It was hoped that the additional doors issue could be concluded before Xmas.</p> <p>DS advised that feedback was awaited however expected by w/e 14/12/2012.</p> <p>DS suggested that discussion re 6 doors was still to be concluded. DH suggested that JMurray had intimated that all the doors had been concluded however BMCL were awaiting confirmation re use of mag locks. DP concurred with DS that 6 doors were to be concluded. It was agreed that the total number of additional doors (circa 50)</p> <p>DS advised that there was a meeting arranged for 15/01/2013 to finalise points/rubber stamping exercise. DS advised that he was meeting with Building Control on 22/01/2013. GCC want to liaise with BTierney</p>	
--	--	--	---	---	--

			24/01/2013 31/01/2013 07/02/2013	before signing off – BTierney is off on leave until the end of January 2013. DH advised that 1 door in the the 23hr unit requires further work – GCC do not want a smoke bulkhead but want a door – for observation purposes the NHS would require a small glazed screen. DH would provide comments to GBurnett later that day re other GCC amendments. DS noted that Building Control need to do a statutory consultation with the Fire Service (21 days). An update is awaited in due course. DH noted that proposals with Building Control who were awaiting comments from the Strathclyde Fire Brigade.	
16593	BMCL-EWN-134 -	December Exceptional Weather Conditions.	23/01/2013 24/01/2013 07/02/2013 14/02/2013	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 12. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1(13) of the Contract. DR and GW to discuss. GW to confirm impacts. It was noted that JB had provided info to DR for review. BMCL were identifying the associated costs. GW noted that BMCL would be preparing a schedule of what measures had been taken to deal with the bad weather. AK reported that he had brought in extra men to help keep the plate clear. GW reported that the low temperatures were also having an impact on the rendering works as there is a minimum temperature for rendering. DH advised that BMCL needed to confirm how the adverse had impacted and noted that out of the 15 days adverse weather in December 2012 there had only been 5 of these days as working days. GW reported that the December bad weather had impacted on the January works.	
16740	BMCL-EWN-00135	Retained estate heating connection	31/01/2013 07/02/2013 14/02/2013	Change in location of retained estates future heating connection, please confirm your agreement and acceptance. Move the 150mm 1.4MW F&R from corner of children's hospital to the back of the crawl way/ corner of neo. natal as shown on the attached sketch SK-DPM-004 30/01/13 AS noted that this needed to be discussed DH provided an overview of the plan and advised that he had liaised with DP and would discuss with AS. DH agreed to provide a PMI to confirm the works. DP asked for the PMI soon as Mercury were holding back on ordering the pipe.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 15/02/2013

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
10114	NHS EW 033	Adult & Children's Hospitals -Secondary glazing panels	25 <sup>th</sup> May 2011	The Board record their concern with the current design proposals for the removal or opening of the secondary glazing panels within single bedroom spaces. These panels are currently designed to be lift out and the Board consider that due to the size and weight of the 8mm glass panels (c2.1mx 1.2m) will represent an H&S and maintenance access problem for the Board. The Board request that a mock-up is provided and other options put forward. Ongoing process with CDMC. Part of strategy meetings being organized by BMCL. JB confirmed that a mock-up of the window would be constructed over at the labs site. Advised that BMCL would a) set up a meeting, b) run through risk assessments, c) determine what needs to be done to make the NHS comfortable. BMCL were organizing for the CMDC to be involved. PM raised concern that as the mock-up is not full scale it would be difficult to understand the full weight of the glazing pane. BMCL had provided a method statement for the glazing removal which had allayed the NHS initial concern. This item would be closed out once the NHS review the mock-up. A query had been raised	Work in progress until NHS review mock-up.

A51679245

				re operation (use of rod). BMCL would provide a further detailed drawing. DH reported that consideration needs to be given to hopper arrangement i.e. cannot be a dust/dirt collector. The method statement had been sent to the CDMC for comment.	
			20/09/2012	DS advised he would liaise with MS and confirm mock-up date. JM advising NHS that mock-up may be 2 <sup>nd</sup> week October. AS advised that BMCL needed to ensure that any NHS comments/changes can be made.	
			27/09/2012	JB advised that mid October was programmed	
			04/10/2012	DS advised that he would raise an EW against Structal. PM advised that it had been suggested the mock-up would be available end of October 2012. There was concern if what is shown in the mock-up is not as expected then could cause serious difficulties. PM requested that BMCL confirm the date for the mock-up.	
			11/10/2012	AS noted that the NHS Team had been provided with a photo. Mock-up awaited.	
			25/10/2012	DS reported that he had been advised that the panels were en-route.	
			08/11/2012	DS advised that the mock-up was going through the QA process. PM advised that he would ask KC to mark-up a drawing of where the mock-up is to be located/fitted.	
			15/11/2012	Mock-up arrival anticipated w/c 19 <sup>th</sup> November.	
			22/11/2012	Location of sample agreed within service yard. Sample is scheduled for delivery to site on Saturday 24 <sup>th</sup> November	
			29/11/2012	PM noted that the tertiary glazing panel had arrived and that some NHS reps had a preliminary look at the sample. It is proposed to organize for the rest of the NHS Project Team to look at the mock-up. The NHS will provide feedback asap. AS has a concern re the extended length of the white cable. The mechanism appears to be a bit stiffer than the previous small mock-up however it was acknowledged that this may be due to the mock-up being full size. The NHS concern re the slat size had been resolved – mock-up provides good vision through.	
			06/12/2012	DS advised that SUK were due on site that day to review the wand and mechanism.	
			13/12/2012	Noted that a review of the mockup had been organize for later that day	
			20/12/2012	PM advised that the NHS had reviewed the blind mock-up. In summary, the NHS was agreeable to the blind colour, curvature and the NHS had seen the removal of the blind. The NHS was awaiting the mechanical fixing info. AK advised that he was checking if the window was sealed at the edges. AK commented that the panel was difficult to remove. JB enquired if it was worthwhile getting a sign-off sheet for the blind mock-up. DS advised that he would provide a copy of the AK marked up JB email to PM in order that PM can add/confirm comments. AS suggested that the wand fixing could be shortened.	
			10/01/2013	AK advised that he had met with Structal. Concern re shortening the flex as this could put more stress on. Securing of blind and clip under review. Revised arrangement should be ready by end of Jan for review by NHS.	
			17/01/2013	AK noted that there was no further update from discussion at PMG meeting on 15/01/2013. BMCL were pushing to have the mock-up complete by end of January 2013 however were awaiting confirmation from Structal.	
			24/01/2013	AK advised he was awaiting confirmation from Structal re date for finishing - panels due to start to be delivered 18 <sup>th</sup> February 2013. The first of the units should go in mid February 2013. DH enquired if the windows would be delivered with all the changes done. AS enquired if the access panel would be easier to remove. DH requested that AK confirm that the 18 <sup>th</sup> Feb delivery of windows will be with or without the blinds and requested that a method statement be provided for the fitting of the blinds. AK advised that he would progress the window issues before the next meeting.	
			31/01/2013	AK advised no change from the PMG discussion. AK had received clips for the wand and was trying to ascertain if there were any more samples awaited. AK wants to discuss to discuss fixing the clip to the	

			07/02/2013	<p>bead as it was his preference not to fit it to the bead. The brackets for fitting the panels had arrived on site the previous day.</p> <p>AK advised that Structal had identified a solution for securing the blind. BMCL were awaiting a demonstration. The wand retainer samples (1 sample in 3 different colours) had been received. Structal currently proposed to put the wand retained onto the window which AK was not happy with. AK proposed to show the wand retainer clips in different positions so the NHS can choose. The Structal rep is on site so BMCL can re-emphasize the importance of sorting issues. The first delivery of windows are due today (07/02/2013). The first delivery of windows are open so that the blinds can be put in. Once the blind solution is agreed the windows would have the blind incorporated for future deliveries.</p>	
			14/02/2013	<p>AK noted that he had received an email requesting the NHS review and would confirm the date/time as AK was wanting to ensure that the Structal rep was present during the NHS review.</p>	
15906	NHS - EW 047	Equipment List	28/11/2012	<p>The Board note that the updated equipment list originally due mid-October was issued on 27th November 2012 and is not in a format which can be readily checked as there is no location information other than NCH/NSGH and Podium/Tower.</p> <p>In order to be able to assess the updated list and respond, the Board require the room by room data as issued with previous iterations.</p>	
			29/11/2012	<p>GW advised that he was awaiting Nightingale's providing access to the database. GW had the same concern as the NHS Team however that the list provided by BMCL to the NHS was in a better format than that provided to BMCL. DH suggested that there appeared to be a formula error in the spreadsheet. GW advised that there was not a formula error as there were circa 7000 new items. DH suggested that BMCL should raise an EW back to Nightingale's. DH suggested that the list had 19 extra hoists. GW advised that there were not 19 extra hoists and that he would need to liaise with FW as Nightingale were suggesting that there was a room classification issue. DS agreed to raise the need for the Equipment List in a format that can be used with Neil Murphy.</p>	
			06/12/2012	<p>DH advised that he had reviewed the component schedule, deleted some headings and provided back to AKerr. GW advised that he thought the component schedule works for the NHS and that JW and AB understand the component schedule better and allows the NHS to analyse. PM enquired when the NHS would get a fully functioning Equipment List. DS advised that the Excel spreadsheet was the limiting factor – cannot be extended large enough to allow all the information to be input – the information has had to be put into an Access Database. DH enquired if the Access database was importable into ADB. PM suggested that the list could be broken down into Tower, podium and NCH. GW advised that he could provide as 3 lists as he had this however it could not be linked as doesn't show room names. DH raised concern that there appeared to be an additional 700 bedheads. GW requested that any obvious queries are provided to GGC. GW advised that access to the database and training has been offered. DS suggested giving access to Robert Stewart.</p>	
			13/12/2012	<p>GW advised that AKerr had spent a lot of time on preparing the equipment list. DH was requested to liaise with AK later that day to have a look at what had been done to the equipment list.</p>	
			20/12/2012	<p>DMF advised that BMCL were making good progress towards providing a fully functioning equipment list to the NHS. BMCL had returned to Nightingales. BMCL had prepared a co-ordinated component list and equipment list. It was thought that the current format worked for the NHS. BMCL had a conference call organized with Nightingales later that day in order to finalise discussion re discrepancies between previous separate lists and fully co-ordinated list. It was anticipated that the latest equipment list would be provided to the NHS by cop 21/12/2012. DS noted that the equipment lists is an iterative process therefore the equipment list reflects a point in time. The Equipment list had been updated to reflect the latest changes to</p>	

				<p>production group series drawings. DH noted that there were no major changes from the sweep-up. AS enquired what was the pressure after the new year for NHS and BMCL. DH advised that BMCL had provided a list of the group 2 equipment requirements for Critical care, theatres, etc. Need to agree where items are being delivered to. AS noted that there would need to be a continual overview of the cashflow. DS advised that it was proposed to add in a column to the Equipment List to note what drawing rev the information relates to. DH advised that the next stage in the process was to produce 'departmental' equipment lists so can go to users and get them to confirm how they can fulfill the items listed. JB advised that there were 2 iterations of the Equipment List remaining i.e. 1 after the sweep-up and 1 at the end of the job (as built).</p> <p>10/01/2013 DMF advised that latest Nightingale output is expected that day and would be provided to NHS on 11/01/2013. DH advised he had met with RS to advise what information would be provided. The issue was due to compatibility of the IT package. PM noted that RS needs to work it through. DMF suggested that everyone was more comfortable with the information to be provided. AS advised that it was imperative that there were no issues with RS.</p> <p>17/01/2013 DH advised that the Equipment list had been received. The NHS Team were working through the list. DH was concentrating on the group 1 equipment and FW was concentrating on the group 2 equipment. DH had priced the list. DH was awaiting the cost info and neutral databases. GW noted that AKerr was pushing to obtain the neutral databases. GW would liaise with AKerr re the pricing info and would liaise with DH re DH's pricing of the list. DH noted that there were a few anomalies i.e. a) hoists – asked for 300 and list identifies 310 and it is difficult to identify the erroneous 10 and b) Xray bariatric hoists – have 4 bays and 4 hoists – would most likely require only 1.</p> <p>24/01/2013 DH advised that the NHS are awaiting the cost detail however there is an agreed position with BMCL re key items. NHS need confirmation of what the list and costs are based on i.e. sign-off drawings with the comments included. GW advised that the equipment list provided the drawings no reference. JB suggested that the equipment list did not include all of the sweep-up. DH suggested that the equipment list was based on the signed off drawings but did not incorporate all of the amendments/comments to the drawings. It was acknowledged that a final and as-built lists would be run.</p> <p>DH advised that he was working through the equipment list review - knocking off key items i.e. hoists, canopies, pendants – currently looking at split sockets. The NHS would proceed to order on the basis of the of list and would continue to call items off –there were no issues moving forward. GW enquired what allowance had been made for damaged equipment and DH suggested that GW should ask RS this question at the next Equipment Group meeting.</p> <p>31/01/2013 DH noted that further to AS's email there had been no comment/statement from Nightingale re what drawings the information is based on. NHS still awaiting cost info. GW noted that he would meet with FW and DH to discuss the changes to equipment groupings further to HMc amendments (majority of change is from group 3 to 2).</p> <p>07/02/2013 It was noted that the costing for the Equipment List was expected on 08/02/2013. DH suggested that BMCL should put in allowances for some items i.e. monitors. DH raised concern that he was being advised that items have already been bought without the Users having signed off the equipment i.e.. Mercury having ordered monitors for theatres.</p> <p>14/02/2013 DH noted that the equipment list had been agreed and it was now understood what drawings the equipment list was based on. A meeting of NHS and BMCL had taken place the previous day and the groupings had been reviewed and some items regrouped (group 2 to 3). A commercial review would be undertaken. An exercise to identify the impact of the changes to the PG drawings since April 2012. GW</p>
--	--	--	--	---

suggested that DH liaise with Andy for assistance with this exercise. GW noted that Mercury are purchasing on the basis of the RDD drawings and not the current equipment list. GW enquired if BMCL would receive a PMI for a) sinks and taps and b) change of groups. DH confirmed that FW would provide a PMI in relation to the sinks/taps and DH would provide a PMI for the changes to groupings.

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 15/02/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1105	PMI 171	Food Waste	21/06/2012	The Board confirm agreement to install manual food waste management 13utilizing AGV transportation in lieu of piped/macerated systems. Infrastructure and spatial requirements at both kitchen and treatment locations to be agreed.	
			28/06/2012	On-going. Developing end product process.	
			05/07/2012	On-going	
			12/07/2012	WIP – through RDD process.	
			19/07/2012	Ongoing	
			26/07/2012	DP advised that BMCL would like to arrange for KC to modify the kitchen drawings for sign off. DP advised that he would organize a meeting.	
			02/08/2012	WIP (BMCL)	
			30/08/2012	DP to coordinate proposal	
			06/09/2012	DP advised this item was work in progress. DP was liaising with people who can supply the end system i.e. composters, etc. DP was liaising with KC.	
			13/09/2012	DP advised he was liaising with K Connelly. BMCL understood what direction progressing. KC has organized a site visit to Forth Valley and BMCL were intending to attend this visit.	
			18/10/2012	Noted that RFI had been received re the benching that the buckets will sit at, Infection control query.	
			25/10/2012	DP noted that a response to the query raised by KConnelly would be provided in due course.	
			08/11/2012	DP advised that he had liaised with KC and FW and received a response re the size of the bins changing dependent on contractor. BMCL will work within the confined of the agreed size. Will progress dwg/design and will continue to liaise with KC.	
			15/11/2012	DS advised that BMCL working on basis of agreed bin(s) size.	
			22/11/2012	DP noted BMCL are in the process of setting up meetings with potential suppliers. AS asked that KC be involved with these discussions as it would be useful for BMCL	
			29/11/2012	DP advised that contact had been made with each of the 3 manufacturers and meetings were being set-up. Colin Grindlay progressing and will continue to link in with KConnelly. A sample of the bin was in the sample room for sign-off by the NHS. DS requested that the NHS sign-off the bin sample asap as BMCL wanted to do setting out of the first floor. PM noted that KC was on annual leave and PM would check if this could be progressed in KC's absence. DP noted that KC had a query re the size of bin changing noting that BMCL had advised the 3 suppliers that they need to work to the bin size as per sample bin to be signed off.	
			06/12/2012	PM advised that he would ask KC to confirm/sign-off the bin later that day.	

			<p>13/12/2012 PM advised that the bin had been signed off.</p> <p>10/01/2013 DP advised -food waste system/proposals = WIP. Meetings being arranged with potential suppliers.</p> <p>17/01/2013 DP advised the food waste system/proposals were WIP. AS requested a high level programme to conclude this exercise.</p> <p>24/01/2013 DP advised that he would provide the high level programme to the NHS by cop 25/01/2013.</p> <p>31/01/2013 DP suggested that the programme had been sent by CGrindlay and would check this out</p> <p>07/02/2013 DP advised that he would liaise with CG to check that the programme had been issued. Food waste proposals are WIP. AS advised that KC has a rep hassling her and DP agreed to speak to this rep. DP noted that the schemes/proposals are being prepared in liaison with KC.</p> <p>14/02/2013 DP advised that BMCL had met with 2/3 suppliers. DP had spoken to the rep who was contacting KC which was one of the systems which had been discounted as is not suitable – the rep would be meeting with DP to discuss his system. PM acknowledged that the NHS had received the programme however raised a query regarding the training items/timetable.</p>	
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	<p>23/07/2012 The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install</p> <p>02/08/2012 BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>22/08/2012 Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>30/08/2012 AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased.</p> <p>06/09/2012 DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>13/09/2012 DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>20/09/2012 DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>04/10/2012 DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>11/10/2012 IP and HMc to review location of unit.</p> <p>18/10/2012 JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>25/10/2012 DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>08/11/2012 DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>22/11/2012 Installation confirmed for 28<sup>th</sup> January 2013</p> <p>29/11/2012 It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p>	

			10/01/2013 17/01/2013 24/01/2013	DP advised that this was WIP – no issues to be raised at this time. AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.) DP confirmed that the new date for the filtration unit installation is 22 <sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.	
1385	PMI 186	Main Server/Comms Rooms - Fibre and Copper Links	03/10/2012 04/10/2012 25/10/2012 15/11/2012 22/11/2012 29/11/2012  06/12/12 13/12/2012  20/12/2012  11/01/2013 17/01/2013 24/01/2013 31/01/2013 07/02/2013 14/02/2013	The Board request a budget cost for the supply and installation of fibre and copper links between cabinets within the main server/comms rooms as outlined in the recent IT Group meeting. Mercury providing costs DP agreed to chase up the costs from Mercury. DMF agreed to progress obtaining a cost DMF agreed to chase up Mercury DMF advised that he had spoken to Mercury who had advised that Boston were liaising with Mark Greig as there had been some confusion as to what was being asked for. This had now been resolved and a cost would be provided asap. DP advised that the cost from Mercury was to be provided to DMF asap DP noted that the clarity was re interlacing the cabinets and he had spoken to EMcl on Monday to progress. DMF advised that he had received a cost from Mercury and BMCL were reviewing the cost information and awaiting some further details. DH proposed that the costs be run past Mark Greig in the first instance. DMF advised that a spec had been provided to DH. DH advised that he had provided the spec to MGreig for checking. DMF noted that the description was ok with the NHS Team however the cost info did not appear to be correct. Mercury were liaising with Boston re the cost info. DMF advised that Mercury are chasing up the costing and will confirm back to BMCL. DMF advised that Mercury through Boston had liaised with MG and a cost on the basis of this discussion was awaited. JB advised that he was awaiting a schematic so that the cost info could be provided as a pack. AS advised that he would need to discuss with MG the way forward. <b>DH noted that he was awaiting the schematic from Boston to progress this item. DP agreed to obtain the schematic asap.</b>	
1478	PMI 190	Laboratory Block - Level 1 Room L1/B/014 Biochemistry Reception	07/11/2012  15/11/2012 22/12/2012 29/11/2012	Please proceed with works as set out in PMI 181 to replace glazed screen with roller shutter to reception area. Provide method statements and agree programme of works with Board Project Manager (Hugh McDermott) and lead laboratory technical manager (Colin Smith). Works to be undertaken as soon as possible but not to commence until after formal opening of Laboratory Block on 14th November 2012. Please provide separate invoice for these works as they will be paid from Laboratory Services account. PM advised this was WIP Instructions are out and BMCL to provide programme and schedule of works DMF advised this was WIP. A Keeley is progressing DS reported that there was a lead in time for the shutter therefore it was expected that works would be post Xmas. DMF noted that RDeb had suggested that Building Control should be contacted however the wall is not a fire wall.	14/02/13

			06/12/12	DS noted that the Architect would be requested to confirm whether an amendment to the warrant is required. GW to contact RDeb. AK would liaise with HMc to organize a suitable date for the works in the New Year.	
			13/12/2012	AK advised that the roller shutter has been manufacturer. TDSL wanted confirmation that not linked to fire alarm. Date for the works will be confirmed.	
			20/12/2012	AK advised that the confirmed date for the roller shutter works was 9 <sup>th</sup> February 2013 and he was continuing to liaise with HMcD.	
			10/01/2013	AK advised that there were no issues and he would provide a programme for the works.	
			17/01/2012.	AK advised that he had met with Mercury and TDSL and hoped to meet with the users of the area soon in order to identify what areas need to be cleared, etc.	
			24/01/2013	AK advised that the roller shutter works would commence 9 <sup>th</sup> February 2013.	
			07/02/2013	AK advised that the works had been organized to take place on 9/10 <sup>th</sup> Feb and AK was liaising with ASmith.	
			14/02/2013	AK noted that he proposed to get a painter into to tidy up some bits and pieces, i.e. work at the expansion joints, dado rail. It was agreed that this item could be closed.	
1482	PMI 191	Adult Hospital Patient Entertainment System	08/11/2012	Please provide costs for supply and installation of bedhead wall mounted TV/radio as described on the attached document. 1) Adult Ward Tower 2) Dermatology Ward 3)Cost for Patient Entertainment System	
			15/11/2012	DMF advised this was WIP	
			22/11/2012	DMF noted Mercury are sourcing	
			29/11/2012	DMF advised this was WIP. It had been hoped to get the order of cost for earlier that day. DMF would continue to pursue.	
			06/12/2012	DP advised that EMclntyre was putting pressure on Entertainment suppliers to provide costs.	
			13/12/2012.	GW advised that the cost was WIP by EMcl. EMcl has some queries. DP enquired if the patient entertainment system would be wanted in the renal area of the podium as this would be the next area to be fitted out.	
			20/12/2012	DMF advised that BMCL have received an order of cost but awaiting back-up detail. (presently circa £1.6m)	
			10/01/2013	DMF advised that he had cost proposals to provide (£1.534m including locating sockets, £1.164m not locating sockets). DMF would run through the proposals with DR/DH in the first instance.	
			17/01/2013	DMF provide hard copy info to DH for review.	
			24/01/2013	DH advised that he had received the costs from DMF and the NHS were discussing the costs.	
			31/01/2013	DMF advised that he was costing up the revised spec. AS noted that he needed the cost so could obtain sign-off for CEN. DMF suggested the cost was circa £39k	
			07/02/2013	AS advised that he would confirm the way forward asap.	
			14/02/2013	WIP – meeting scheduled to take place the next day (15 <sup>th</sup> Feb 2013)	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	

			24/01/2013 31/01/2013 07/02/2013 14/02/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included. DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4. IP was to be requested to confirm to DP that Nicola had requested no further changes . DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
1644	PMI 199	Door Openings - RNM 036 & RNM 037	23/01/2013  24/01/2013  31/01/2013 07/02/2013	The Board confirm that the door openings to RNM 036 & RNM 037 are on major delivery routes and as such should have removable over panels similar to room RNM 033. These are required in order to comply with the requirements set out in section 8 of the Clinical Output Specification NSGACL Nuclear Medicine NSG (Issue 1) for the delivery of heavy/bulky equipment DH advised that these door openings were on heavy plant routes. DS advised that this was signed off on the appendix k drawings. DH advised that the route goes all the way to the room doors - not into the room as no over panel therefore would be unable to get the equipment into the room. DS agreed to review. DH advised that he had discussed this with N Hollowell. DH advised that he had received any feedback. DS agreed to liaise with NHollowell. DH advised that feedback was awaited	
1691	PMI 200	UPS Provision to NCH Cardiology Ward	11/02/2013	The Board confirm acceptance of the proposal to provide UPS coverage from the existing design provision resulting in a reduction of the 25% spare capacity. This reduces the power losses resulting from the spare. BMCL to confirm remaining capacity.	

## COMPENSATION EVENTS

Mortuary Gulleys – JB enquired if AS had confirmed that these works would be covered by a CE.

**Additional Notes:**

- 1) Sedum Roof – PM advised that he may raise an EW re A&C Sedum Roof. PM had met with Gillespies. GW/DMF confirmed that Hospitals Sedum Roof is a different species/mix. AS asked that DJordan should be requested to reinstate roof once sealed. (16/08/2012) PM met with Gillespies to ensure that roof spec was different for A&C. Opinion on Labs asked and noted that it was thought that some of the roof may take but some areas had died and would require to be replaced. BMCL had asked Prater to review and replace necessary in order to clear defect. AS noted that areas of the roof were opened and required to be closed off again – BMCL agreed to pursue (23/08/2012) BMCL were advised that Labs has 4 leaks – raised as defects by Capita. JB noted that works were ongoing to improve the sedum roof. (30/08/2012) WIP (06/09/2012) DS advised that it was intended that D Jordan would organize for a joint inspection with the NHS. A full update would be provided at the next meeting. NHS need update on leaks ASAP. (13/09/2012) PM advised that he would be carrying out a site visit with DJ later that day. AS requested confirmation as to the number of leaks i.e. 4 or 5. (20/05/2012) PM will update at next meeting (27/09/2012) Awaiting meeting being organized by D Jordan with the Sedum Contractor. (04/10/2012) PM advised that he wanted a chat with the Sedum contractor to get view of what is wrong with it rather than waiting to next year. PM would not be singing off the roof next August if still in the same position (08/11/2012) AK advised he had met with DJordan and Praters – details awaited from Prater. AK is progressing. (15/11/2012) PM noted he was awaiting feedback (22/11/2012) DS advised that he had spoken to AK who was progressing and was liaising with the rep. Feedback will be provided as soon as available (29/11/2012) PM advised that he wanted the NHS to meet with the Sedum Contractor as want to see evidence that this will work on the A&C. (06/12/2012) AK advised that he would set up a meeting for the New Year (13/12/2012) AK advised that he had been specking to WMorrison and would be reviewing on site before the weekend. AK would confirm the meeting arrangements to PM (10/01/2013) AK advised that he had reviewed the Sedum roof with Prater. PM noted that the issue also had been that there are areas with no sedum – 1 large patch of weeds. PM was expecting a professional view of what needs to be done to bring the sedum back. PM noted that the sedum would remain as a defect – PM was comfortable with BMCL to continue with any remedial works until August 2013. (17/01/2013) AK advised that he had met with Praters and strenuously advised them to sort the sedum roof and to confirm how they will sort the sedum roof out. (24/01/2013) AK advised he was pursuing Praters for a rectification plan (31/01/2013) AK advised that he had spoken to William and requested formal confirmation of what works it is proposed to carry out (07/02/2013) **AK advised that he was awaiting a marked up drawing of what areas are being remedial works, programme for the works and a detailed proposal of the works to be carried out. AK had commitment from Alistair Hill that issues with sedum roof will be sorted. (14/02/2013)**
- 2) Services in pavement at Govan Road – Virgin advised it will cost £600 to look at. Now advised that there are also Cable & Wireless Fibre Cables in the pavement. Virgin saying can't drop the cables as not enough depth to do so (suggesting £110k for the works). Cable & Wireless advised that they want £6500 to look at and expecting a similar cost to that of Virgin to undertake the works. AK suggested that works may need to be resequenced. BMCL will issue an EW. (15/11/2012) DH awaiting information to work out what is required. RJohnston is prepping information and DP agreed to chase this up. It was suggested that Virgin and C&W are brought in for discussions. (22/11/2012) DH advised that GThomson had been liaising with Russell. DP advised that he would try to provide the information to the NHS by 14<sup>th</sup> December 2012 (06/12/2012) DH advised that he had received the drawing and contact with the 2 parties was being commenced. (13/12/2012) DH advised that GT was instigating discussions with Cable & Wireless and Virgin. (20/12/2012). DH advised that GT had contacted both C&W and Virgin. Virgin have advised that they require to carry out a C4 stage quote. GT is raising the paperwork to enable this to happen. GT scheduling meeting with C&W on 15/01/2013. GT will co-ordinate the attendees for this meeting (10/01/2013) DH advised that a meeting with Virgin had taken place and suggesting that Virgin cabling won't be crossing the road. Advised that this was the main run into the city centre therefore impact on notification period. (17/01/2013) **DH advised that the revised quote for review had been received from Virgin and an invoice is awaited from C&W (31/01/2013)** DH advised that he would liaise with GT for an update regarding obtaining the C&W invoice so that the cheque for the works can be raised (14/02/2013)
- 3) Sanitary Ware RDD Returns – Nightingale have raised an EW to BMCL. Cheaper sanitary ware however implication for drawings needing to be redone. GW advised that he wanted to meet with the NHS to discuss. LEdwards had also advised that she was unsure of some of the comments. DH advised that Colin Grindlay should liaise with FW to go over the comments being queried. (06/12/2012) DH advised that he had spoken to FW w/e 8/12/2012. CGrindlay is liaising with FW. DP agreed to chase up through CG. DH agreed to liaise with FW. Update to be provided asap (13/12/2012) DH advised this was wip between FW and CGrindlay. DP advised that CGrindlay will liaise with Nightingales. (20/12/2012) DP suggested that there were circa 4 pieces of sanitary ware with comments. (10/01/2013) DP advised that there are 5 pieces of kit and BMCL were awaiting a PMI. FW was checking back to see if NHS previously advised BMCL. DH suggested that the NHS did not regard this as a change as had come about as using some codes with no descriptions. (17/01/2013) DH advised that he had noticed from CGrindlay to FW and DH would liaise with DP to resolve (31/01/2013) DH advised that he would liaise with GWallace re a few items i.e. sit on sinks. (7/02/2013) **As previously discussed – PMI will be provided for the sinks. (14/02/2013)**

- 4) Peel Organisation – AS advised that the Peel were progressing their plans. Peel had requested confirmation that they (Peel) can issue the ZBP drawings. SF was requested to send the document to DP for review and confirmation. (20/12/2012) DP advised that he had provided comments to AS and suggested that the info had been provided to Peel. (10/01/2013) AS advised that he was meeting with Peel later that day (31/01/2013) AS advised that he had met with reps from Peel and Peel would be providing the commercial terms to the NHS for review. Peel may ask to link in with BMCL for site walkround, etc. The Peel procurement process had commenced (07/02/2013)
- 5) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013)
- 6) Boiler – AS advised that he may be asking for BMCL to purchase a further boiler. DP agreed to confirm the date when the NHS needed to confirm the requirement for an additional boiler. (24/01/2013) DP advised that confirmation re additional boiler is needed by March 2013. BMCL would need a PMI to confirm the number of boilers. It was agreed this item could be closed (31/01/2013) DP enquired if the instruction re no of boilers to be purchased could be provided sooner as BMCL were wanting to close up the Energy Centre face asap.(07/02/2013)
- 7) Room Numbering Description and Dept naming – DS advised that this information was required by 18<sup>th</sup> Feb 2013. PM reported that the NHS would meet this date and that HG only had the last dept to confirm. (07/02/2013) PM confirmed that this information had been provided by HGriffin. It was agreed this item could be closed (14/02/2013)
- 8) DCFP – DS advised that he had liaised with GBurnett who was keeping a schedule of the changes being made (i.e. screens being enlarged) and enquired if the NHS would be providing a PMI for these changes. AS advised that there was to be no extra cost for DCFP – need to work within the budget noting that anti-ligature and sprinkler heads were progressed under the design stage. DS advised that items had been purchased on the basis the 1:50s. PM and DH agreed to review the schedule of changes. DS was requested to provide the schedule and review the adds/omits. (07/02/2013) DH advised that he had requested a copy of the schedule for review. GW enquired how the NHS wanted this information to be presented – it was currently in the format of 1 column for a) the proper additions, b) the proper omissions and c) the would like to have. GW agreed to liaise with DH (14/02/2013)
- 9) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013)
- 10) Aseptic Suite – BMCL raised that changes to the Machair cost had been advised – change due to NHS URS – Lynne Morrison had asked for additional air handling unit. Machair say the additional air handling unit is a nice to have item but not necessary. DP advised that usually spare parts would be kept. PM requested that this issue be raised as an EW. (14/02/2013)
- 11) Arts - BMCL advised that Paul carrying out a review of Arts budget. Beacon Project budget is under pressure – electrical input i.e. dramatic increase to the no of lights (24 to circa 120). It was noted that AS had thought that BMCL carried out post meeting commercial reviews. GW noted that the lights wre originally a part of the equipment list. GW agreed to confirm the cost of the proposal against the budget. PM suggested that the 2 shelters were not achievable within the budget. The Beacon Project needs to financially managed by BMCL. BMCL will need to manage Ginkgo. The NHS would not be adding any other monies in. DP advised that number of lights in the proposals had previously been designed out by clever use of corridor lighting to light up the art on the walls – it had never been highlighted that additional lights were required. (14/02/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 10/07/2013:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.</p> <p>05/04/2012 GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>12/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>31/05/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>27/06/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>05/07/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>02/08/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>16/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>23/08/12 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>30/08/2012 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>06/09/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>13/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>20/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>18/10/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>25/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>15/11/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>22/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected.</p> <p>29/11/2012 Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC.</p> <p>06/12/2012 Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	---

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

			<p>04/04/2013</p> <p>18/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p> <p>16/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p> <p>13/06/2013</p> <p>20/06/2013</p> <p>04/07/2013</p>	<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p><b>It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</b></p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p> <p>22/11/12</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding.</p> <p>DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.</p> <p>DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date.</p>	

			29/11/2012	DS will catch up with DH to ensure that everything is updated and both sides are happy. DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.	
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.	
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]	
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.	
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.	
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.	
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.	
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.	
			07/02/2013	DH advised that items are being addressed.	
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.	
			21/02/2013	Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board	

Page 108

			<p>thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p> <p>Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p> <p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>JB noted that BMCL will provide samples of the atrium panel as requested by the NHS.</p> <p>DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet.</p> <p>Ceiling heights – DH continuing to liaise with GW</p> <p>DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.</p> <p>DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>DH noted that the return date issue (RDD tracker versus front sheet) had been resolved.</p> <p>DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p> <p>DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns.</p> <p>It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p>	
		28/02/2013		
		07/03/213		
		14/03/2013		
		04/04/2013		
		11/04/2013		
		18/04/2013		

		25/04/2013	DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue
		02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.
		16/05/2013	DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.
		24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used an project specific code.
		06/06/2013	DH advised that: <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>
		13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.
		20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.
		27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.
		04/07/2013	DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled.

				<p>Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.</p> <p>PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus.</p> <p>DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p>

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 03/07/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install</p> <p>BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased.</p> <p>DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p>	

A51679245

			20/09/2012	DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&C.
			04/10/2012	DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.
			11/10/2012	IP and HMc to review location of unit.
			18/10/2012	JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.
			25/10/2012	DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.
			08/11/2012	DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.
			22/11/2012	Installation confirmed for 28 <sup>th</sup> January 2013
			29/11/2012	It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.
			10/01/2013	DP advised that this was WIP – no issues to be raised at this time.
			17/01/2013	AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)
			24/01/2013	DP confirmed that the new date for the filtration unit installation is 22 <sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.
			22/02/2013	AK reported end of March was the target date – AK will provide a firm date once known
			06/03/2013	AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.
			04/04/2013	DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks
			11/04/2013	It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29 <sup>th</sup> April 2013.
			17/04/2013	DP noted that BMCL were awaiting on Siemens.
			25/04/2013	It was noted that contractors are due in on Monday for final commissioning
			02/05/2013	DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.
			16/05/2013	DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.
			24/05/2013	DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.
			06/06/2013	AS noted that he had been advised that the engineer would be on site on the 17 <sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.
			13/06/2013	DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17 <sup>th</sup> June 2013.

			20/06/2013	DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.	
			27/06/2013	DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day	
			04/07/2013	PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes .	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.	
				AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.	
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.	
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.	
			25/04/2013	DP agreed to chase the proposal	

			02/05/2013 16/05/2013 24/05/2013 06/06/2013 13/06/2013 20/06/2013 27/06/2013  04/07/2013	<p>DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room. DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>DP advised that he would chase up who is doing what and when it is planning to be carried out. DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p>	
1901	PMI 213	Energy Centre Side A Switchgear	02/05/2013  16/05/2013 24/05/2013 06/06/2013 13/06/2013 20/06/2013 27/06/2013  04/07/2013	<p>Please undertake the following works to the A-Side switchgear. On 'A' switch panel switches REA1 &amp; REA2 carry out the following operational changes: REA1 &amp; REA2 to be configured to trip open on mains failure, and remain open during generator running. On mains available return switches REA1 &amp; REA2 are to remain open. Only on either local control manual close or via ENMS return to mains manual instruction process both REA1 &amp; REA2 close back to mains.</p> <p>DP advised that he had chased this up the previous day and was in discussion with Schneider and ASmith.</p> <p>DP advised that he was awaiting information from Mercury to review. Schneider were due to be onsite w/c 27/05/2013 and BMCL may request that the works be carried out then (drop outs to the retained estate).</p> <p>DP advised that he will get Schneider to carry out the works but a PMI was needed from the NHS to state the works and state left in.</p> <p>DP noted that the Schneider works ongoing. A further issue had been identified which would be discussed separately with the NHS and had been raised with IP. It was anticipated that it would be 6-8 weeks until will be on the b-side.</p> <p>It was noted that a meeting to discuss the IP proposals would be had.</p> <p>AS noted that a meeting had been scheduled for 28/06/2013 and IP was suggesting that he may have a fix.</p> <p>AS noted that he had asked ASmith to confirm via DP that the NHS were satisfied with all the safety and operational aspects.</p>	
1952	PMI 214	YCF additions	10/05/2013	<p>Please find below (and attached) information in relation to the requirements for the Yorkhill Children's Foundation "added value" works</p> <p>I would be grateful if you could include these requests into the building and advise on the costs in order that the Board can bill the YCF accordingly</p> <ol style="list-style-type: none"> <li>1. Sky ceilings to be added in the following rooms: <ul style="list-style-type: none"> <li>• Child protection room CPS.004</li> <li>• ED majors staff base EMC.61</li> <li>• 2 dental rooms OPD.082 &amp; OPD.139</li> </ul> </li> </ol>	

			<ul style="list-style-type: none"> <li>• Plaster room OPD.073</li> <li>• Phlebotomy room OPD.193</li> <li>• Nuclear Medicine camera room RMN.033</li> <li>• Nuclear Medicine injection room RMN.027</li> <li>• Theatres holding areas THE.032, THE.033 &amp; THE.034</li> <li>• MRI rooms RCG.064 &amp; RCF.024</li> </ul> <p>2. Sky box in</p> <ul style="list-style-type: none"> <li>• Radiotherapy room in Schiehallion SCH.081</li> </ul> <p>3. Pattressing on wall in wait area of Observation ward OBS.054</p> <p>4. Information on Snoozelen rooms DCFP. 050 &amp; GW3.050</p> <p>5. Information on Family Centre room ENT.028- in particular the glass front that is required</p> <p>16/05/2013 GW advised that BMCL were currently pricing the works up. PM confirmed that this is a pricing exercise only, at this point.</p> <p>24/05/2013 GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.</p> <p>06/06/2013 AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.</p> <p>13/06/2013 GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.</p> <p>20/06/2013 AS agreed to liaise with MMacleod. GW suggested that if would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.</p> <p>27/06/2013 AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.</p> <p>04/07/2013 AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.</p>	
1977	PMI 216	Patient Self Check-in	<p>22/05/2013 /The Board request the installation of the infrastructure, power and data, for the patient self check-in kiosks and associated patient calling screens in the locations indicated on the previously submitted 'marked-up' plans.</p> <p>The revised layouts should be submitted for RDD approval in accordance with the standard processes.</p> <p>24/05/2013 It was noted that this item would be a CE. DH advised that the real time bus timetable proposal was progressed with GCC. DP suggested that this needed to be concluded to ensure that the real time bus timetable information is not expected to be included on the existing touch screens. DH noted that the real time timetables were expected to be located at 4 stops at the entrance area lay-by.</p> <p>DH noted that the NHS were organizing to meet with GCC to discuss the real time bus timetabling.</p> <p>06/06/2013 DP noted that it was expected that BMCL would only provide the cabling and the ducting. AS advised that the NHS would purchase the screens and GCC would need to provide the software &amp;</p>	

			13/06/2013	systems. DH noted that the location for the atrium repeater screen was to be identified. NHS to agree locations with GCC. DH advised that it was expected that the screens would be akin to airport arrival/departure screens. PM noted that he needed a copy of the WSP setting out drawing so he could identify location for the shelters and stops.	
			20/06/2013 27/06/2013	PM noted that he was awaiting the setting out drawings re shelters and stops from DS. It was noted that a CE was to be raised re patient self-check in. PM agreed to review the drawing. DH noted that GCC and SPT were unsure of how to feed the timetable into the atrium however they were working on this issue. (Cross ref CE 047)	
1978	PMI 217	MTHW System - Site ring	22/05/2013	The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. the pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.	
			24/05/2013	The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc	
			06/06/2013	DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.	
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.	
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.	
2009	PMI 220	PACs screens and keyboards	04/06/2013	The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory	

			06/06/2013 27/06/2013 04/07/2013	installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175 DP noted that he had progressed this with mercury GW noted that DMF was awaiting information from Mercury PM advised that he had received the quote. AS noted that DR would need to cross check the quote.	
2060	PMI 226	Review of Door signage - omission of LIG 073	02/07/2013  04/07/2013	Following a review of the project wide door signage/lights, the Board request the general omission of "illuminated signs - Room in use" (LIG 073) across the project. On the "agreed back-up to April 2013 CEN" there were 65 no LIG 073 included. This omission is to be included in the next equipment list iteration. It was agreed that this item should be closed as an equipment list change.	04/07/2013
2061	PMI 227	ENT and Ophthalmic Workstations	02/07/2013  04/07/2013	The Board confirm that there are in total 20 ENT/Ophthalmic workstations, all of which we propose to remove from Group 1 equipment list. These are located as follows: WOR 695 & WOR695R – Ophthalmic workstations (14 no.) Ground Floor (NCH) NCH-00-OPD-130 NCH-00-OPD-129 NCH-00-OPD-128 NCH-00-OPD-109 NCH-00-OPD-118 First Floor (NSGH) NSGH-01-OPD1-076 NSGH-01-OPD1-069 NSGH-01-OPD1-077 NSGH-01-OPD1-072 NSGH-01-OPD1-071 NSGH-01-OPD1-029 NSGH-01-OPD1-028 NSGH-01-OPD1-027 NSGH-01-OPD1-025 WOR1009 & WOR1009R - ENT workstations (6no.) Ground Floor (NCH) NCH-00-OPD-133 NCH-00-OPD-078 NCH-00-OPD-069 NCH-00-OPD-068 NCH-00-OPD-095 NCH-00-OPD-077 If removed, we propose to replace these workstations with standard consulting room desks (group 3) It was noted that this is an equipment list change. DH confirmed that the last line of the PMI i.e. "if removed, we propose...." will be updated to confirm removal and associated replacement.	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013  04/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013 GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	03/07/2013	The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a "future proofed" multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this,	

			04/07/2013	is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from; camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply a separate cost of a single video converter as additional units are likely to be needed. GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.	
2072	PMI 230	Adult Hospital – Porters Room ENT-022	08/07/2013	The Board confirm the location of screens as set out in the attachment.	
2073	PMI 231	Adult and Childrens Hospital – Commissioning & Handover	08/07/2013	The Board confirm amendments to the requirement for an Independent Commissioning Engineer	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013	The Board confirm change to sink specification.	

### COMPENSATION EVENTS

10017	CE 047	Adult Hospital – Patient Self check-ins	08/07/2013	Please proceed and install infrastructure as set out in PMI 216.	
-------	--------	---	------------	--	--

### Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013)

- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). **PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013)**
- 3) Renal Dialysis Day Ward – DP sought confirmation of the requirements for pattressing. PM agreed to confirm. (11/04/2013) AS requested that HG be asked if the Renal Dialysis Ward had been included in the original PMI. DP suggested that it may be included in the original PMI however may need to be placed. (17/04/2013). DH noted that a visit to site

will be required in order to pinpoint the locations of the patrising. This needs to be completed ASAP to ensure patient entertainment is in appropriate place (25/04/2013) DH and PM agreed to review on site (02/05/2013) It was noted that this had been accommodated within the original cost plan. PM I to be provided to BMCL. BMCL to confirm is within the cost plan. (06/06/2013) DH advised that he was progress with GW and a PMI would be subsequently provided (13/06/2013) PM advised that he had walked round the rooms and thought that a dropped pole could be installed at the ducting. DH had identified a suitable arm which could take a TV. PM noted that if required a drawing could be marked up. (20/06/2013) **DH advised that he had marked up 1 of the 8 bed areas to identify where the drops could be positioned. (27/06/2013) GW advised that he couldn't find the 8 bed area marked up drawing and DH agreed to re-markup and provide the mark-up to BMCL. (04/07/2013)**

- 4) Phasing Discussions – DH suggested that consideration needed to be given to the MTHW extension when BMCL are looking at phasing/changes to the site. AS advised that the NHS Team would be doing a MTHW ring however this currently needs to be planned out. (02/05/2013). GW advised that AK was awaiting a response from the NHS. DP advised that AK was looking to build in the MTHW works into the existing BMCL phasing plans but didn't have the info to progress. PM advised that he had received an informal copy of the marked up drawing and had met with AK but he had not received anything formally to comment on. DP advised that BMCL were awaiting info from the NHS re NHS Phasing. DH advised that a technical review identified buildings that are in the way of sections of the ring. T&L will have its own boiler plant. Financially, it would be advantageous for the NHS to have the works done early but technically it may be better to leave. There may be sections of the ring that can be put in early. DS suggested that it may be beneficial to arrange Phasing Handover workshops and this was agreed. (16/05/2013) AK enquired how the NHS expected to receive the drawing formally. DH agreed to liaise with PM and confirm the way forward. (24/05/2013) PM suggested that BMCL: should provide a range of questions and PM will respond (06/06/2013) PM noted that the NHS were awaiting a list of questions so that the NHS Team can provide responses. AK noted that he was removing his notes from the drawings before providing to the NHS. (13/06/2013) AK advised that he had taken the notes off the drawing and was writing up a list of queries for NHS response. AK agreed to provide the information to the NHS (27/06/2013) **AK advised that the information would be issued via RFI process would be issued later that day. PM noted that he would organize an internal meeting to review. AS advised that he would like to conclude discussions at the forthcoming ASSB meeting and enquired if KStewart had been asked to reconfigure the spaces to make better use of the car park available.**
- 5) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) **It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013)**
- 6) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) **DP to provide update on return from leave (04/07/2013)**
- 7) Fire incident on site. It was noted that BMCL would issue and EW regarding the fire incident. DP enquired if Capita had been onsite to review. PM agreed to liaise with John Redmond. DR noted that BMCL were awaiting the Fire and Loss Adjustor report. (20/06/2013) GW advised that BMCL were still awaiting the formal reports. AS advised that the NHS needed to get the Fire Service report for the record (27/06/2013) **AK advised that he was chasing for a copy of the formal fire service report. DMF advised that the site also has periodic visits from Chubb re Fire Safety. The Chubb rep had been provided with a tour of the site and taken through the lessons learned and DMF would ask for the Chubb report. AS advised that he needed to know that the incident had been fully captured including what had been done. (04/07/2013)**

- 8) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013)
- 9) Car park 1 – AS requested that BMCL provide a cost to put on an additional deck and enquired if this would be possible. AS noted that he expected the price to be of a similar pro-rata to costs already provided for the car park. DS suggested that an additional floor may require there to be a fire fighting core. AS requested that BMCL provide advice and cost by 5<sup>th</sup> July 2013. (27/06/2013) AK noted that putting another floor onto the structure for Car Park 1 was not possible (impacts on piling design, etc). GW advised that AHalliday had been continuing to price up the cost of putting on the additional floor. DS advised that BMCL would have an internal discussion re additional floor. AS suggested that should the costs for the additional floor be in excess of £2m then any proposal becomes unviable. (04/07/2013)
- 10) Energy Manager – DP noted that it was proposed that the Energy Manager appointment be fulfilled by David Wilson. AS agreed to this appointment.
- 11) Electricity Meter Readings – it was noted that a meeting had been organized to discuss the readings (04/07/2013)
- 12) Porter screens – EW to be raised. AS noted that MS had advised that the works would be carried out. GW enquired if the NHS wanted as per information from FW or whether an additional screen should be added. PM agreed to mark up a drawing (04/07/2013)
- 13) Changing Cabin for helipad – PM noted that the order for the helipad changing cabin was due to be placed however the NHS needed to understand when the deck is being installed and need to do water-proofing deck. AK agreed to confirm asap. NHS need to know whether ordering as flat pack or already made up. (04/07/2013)
- 14) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings and GW reported that he thought this had been provided by DP (04/07/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 121

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 17/07/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDermott had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.</p> <p>05/04/2012 GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>12/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>31/05/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>27/06/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>05/07/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>02/08/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>16/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>23/08/12 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>30/08/2012 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>06/09/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>13/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>20/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>18/10/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>25/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>15/11/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>22/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected.</p> <p>29/11/2012 Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC.</p> <p>06/12/2012 Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	---

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

			<p>04/04/2013</p> <p>18/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p> <p>16/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p> <p>13/06/2013</p> <p>20/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p>	<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding.</p> <p>DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings</p>	

			22/11/12	and identify level of risk in tender info package. DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.
			07/02/2013	DH advised that items are being addressed.
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by

			21/02/2013	BMCL. Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week
			28/02/2013	Bedheads – a further meeting has been organised for next week – feedback thereafter DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues. NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS. Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.
			07/03/213	Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM. NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided. Bedheads – FW had just been provided with the spreadsheet Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.
			14/03/2013	JB noted that BMCL will provide samples of the atrium panel as requested by the NHS. DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet. Ceiling heights – DH continuing to liaise with GW DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.
			04/04/2013	DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.
			11/04/2013	DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation & signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.
			18/04/2013	DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns.

			25/04/2013	<p>It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p>	
			02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.	
			16/05/2013	DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.	
			24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used an project specific code.	
			06/06/2013	<p>DH advised that:</p> <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>	
			13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.	
			20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.	
			27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to	

			04/07/2013	the car park to the end of the NCH park. DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3 <sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself. PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.	
			11/07/2013	DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vaccum plant information is awaited from MEL/HPI Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 10/07/2013

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 17/07/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012	The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit. Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however	

A51679245

				<p>formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>13/09/2012 DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>20/09/2012 DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDermont. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>04/10/2012 DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDermont/Estates thereafter.</p> <p>11/10/2012 IP and HMc to review location of unit.</p> <p>18/10/2012 JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>25/10/2012 DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>08/11/2012 DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>22/11/2012 Installation confirmed for 28<sup>th</sup> January 2013</p> <p>29/11/2012 It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>10/01/2013 DP advised that this was WIP – no issues to be raised at this time.</p> <p>17/01/2013 AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>24/01/2013 DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p> <p>22/02/2013 AK reported end of March was the target date – AK will provide a firm date once known</p> <p>06/03/2013 AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.</p> <p>04/04/2013 DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks</p> <p>11/04/2013 It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013.</p> <p>17/04/2013 DP noted that BMCL were awaiting on Siemens.</p> <p>25/04/2013 It was noted that contractors are due in on Monday for final commissioning</p> <p>02/05/2013 DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.</p> <p>16/05/2013 DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.</p> <p>24/05/2013 DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.</p>	
--	--	--	--	---	--

			06/06/2013	AS noted that he had been advised that the engineer would be on site on the 17 <sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.	
			13/06/2013	DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17 <sup>th</sup> June 2013.	
			20/06/2013	DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.	
			27/06/2013	DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day	
			04/07/2013	PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.	
			11/07/2013	Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes .	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.	
				AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation	

			<p>11/04/2013 re level 4 was awaited. DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>17/04/2013 DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p>	
1901	PMI 213	Energy Centre Side A Switchgear	<p>02/05/2013 Please undertake the following works to the A-Side switchgear. On 'A' switch panel switches REA1 &amp; REA2 carry out the following operational changes: REA1 &amp; REA2 to be configured to trip open on mains failure, and remain open during generator running. On mains available return switches REA1 &amp; REA2 are to remain open. Only on either local control manual close or via ENMS return to mains manual instruction process both REA1 &amp; REA2 close back to mains.</p> <p>16/05/2013 DP advised that he had chased this up the previous day and was in discussion with Schneider and ASmith.</p> <p>24/05/2013 DP advised that he was awaiting information from Mercury to review. Schneider were due to be onsite w/c 27/05/2013 and BMCL may request that the works be carried out then (drop outs to the retained estate).</p> <p>06/06/2013 DP advised that he will get Schneider to carry out the works but a PMI was needed from the NHS to state the works and state left in.</p> <p>13/06/2013 DP noted that the Schneider works ongoing. A further issue had been identified which would be discussed separately with the NHS and had been raised with IP. It was anticipated that it would be 6-8 weeks until will be on the b-side.</p> <p>20/06/2013 It was noted that a meeting to discuss the IP proposals would be had.</p> <p>27/06/2013 AS noted that a meeting had been scheduled for 28/06/2013 and IP was suggesting that he may have a fix.</p> <p>04/07/2013 AS noted that he had asked ASmith to confirm via DP that the NHS were satisfied with all the safety and operational aspects.</p> <p>11/07/2013 Meeting to be held and sketches reviewed</p>	

1952	PMI 214	YCF additions	10/05/2013	<p>Please find below (and attached) information in relation to the requirements for the Yorkhill Children's Foundation "added value" works</p> <p>I would be grateful if you could include these requests into the building and advise on the costs in order that the Board can bill the YCF accordingly</p> <ol style="list-style-type: none"> <li>1. Sky ceilings to be added in the following rooms: <ul style="list-style-type: none"> <li>• Child protection room CPS.004</li> <li>• ED majors staff base EMC.61</li> <li>• 2 dental rooms OPD.082 &amp; OPD.139</li> <li>• Plaster room OPD.073</li> <li>• Phlebotomy room OPD.193</li> <li>• Nuclear Medicine camera room RMN.033</li> <li>• Nuclear Medicine injection room RMN.027</li> <li>• Theatres holding areas THE.032, THE.033 &amp; THE.034</li> <li>• MRI rooms RCG.064 &amp; RCF.024</li> </ul> </li> <li>2. Sky box in <ul style="list-style-type: none"> <li>• Radiotherapy room in Schiehallion SCH.081</li> </ul> </li> <li>3. Pattressing on wall in wait area of Observation ward OBS.054</li> <li>4. Information on Snoozelen rooms DCFP. 050 &amp; GW3.050</li> <li>5. Information on Family Centre room ENT.028- in particular the glass front that is required</li> </ol>	
			16/05/2013	GW advised that BMCL were currently pricing the works up. PM confirmed that this is a pricing exercise only, at this point.	
			24/05/2013	GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.	
			06/06/2013	AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.	
			13/06/2013	GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.	
			20/06/2013	AS agreed to liaise with MMacleod. GW suggested that it would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.	
			27/06/2013	AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.	
			04/07/2013	AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.	
			11/07/2013	YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward	

1978	PMI 217	MTHW System - Site ring	<p>22/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p> <p>13/06/2013</p> <p>20/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p>	<p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. the pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p> <p>AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.</p> <p>DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p>	
2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter</p>	

				a PMI will be issued	
2061	PMI 227	ENT and Ophthalmic Workstations	02/07/2013  04/07/2013  11/07/2013	The Board confirm that there are in total 20 ENT/Ophthalmic workstations, all of which we propose to remove from Group 1 equipment list. These are located as follows: WOR 695 & WOR695R – Ophthalmic workstations (14 no.) Ground Floor (NCH) NCH-00-OPD-130 NCH-00-OPD-129 NCH-00-OPD-128 NCH-00-OPD-109 NCH-00-OPD-118 First Floor (NSGH) NSGH-01-OPD1-076 NSGH-01-OPD1-069 NSGH-01-OPD1-077 NSGH-01-OPD1-072 NSGH-01-OPD1-071 NSGH-01-OPD1-029 NSGH-01-OPD1-028 NSGH-01-OPD1-027 NSGH-01-OPD1-025 WOR1009 & WOR1009R - ENT workstations (6no.) Ground Floor (NCH) NCH-00-OPD-133 NCH-00-OPD-078 NCH-00-OPD-069 NCH-00-OPD-068 NCH-00-OPD-095 NCH-00-OPD-077 If removed, we propose to replace these workstations with standard consulting room desks (group 3) It was noted that this is an equipment list change. DH confirmed that the last line of the PMI i.e. “if removed, we propose....” will be updated to confirm removal and associated replacement.  PMI has been updated by Board	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013  04/07/2013  11/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013 GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.  Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed hat AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	03/07/2013	The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a “future proofed” multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this, is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from; camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply	

			04/07/2013	a separate cost of a single video converter as additional units are likely to be needed. GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.	
			11/07/2013	GW noted that Mercury to progress with Starkstrom for the 29 theatres. Final iteration of surgeons panels should not be delayed and the addition of the multi-input interface discussions should run parallel to allow contractual progression AS asked for a technical meeting in order to understand what is required and DP to arrange. DP/DH to review the status of the RDD	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013	The Board confirm change to sink specification.	
	PMI 233	Aseptic	10/07/2013	Sample sink reviewed on site confirmed okay, revised proposal for tables required from BMCL	
	PMI 207	Basement Sink	10/07/2013	Noted changes to equipment to be accounted for in August list	
			10/07/2013	Sink area added to prep area – noted in drawings and will appear within the next equipment list – updated - GW to take forward	
2097	PMI 234	Unistrut Support	15/07/2013	Adult Hospital Renal Outpatients Unistrut Support for patient entertainment	

### COMPENSATION EVENTS

10017	CE 047	Adult Hospital – Patient Self check-ins	08/07/2013 10/07/2013	Please proceed and install infrastructure as set out in PMI 216. PMI issued	
-------	--------	---	--------------------------	--	--

### Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013)
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team

would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013)

- 3) Renal Dialysis Day Ward – DP sought confirmation of the requirements for pattressing. PM agreed to confirm. (11/04/2013) AS requested that HG be asked if the Renal Dialysis Ward had been included in the original PMI. DP suggested that it may be included in the original PMI however may need to be placed. (17/04/2013). DH noted that a visit to site will be required in order to pinpoint the locations of the patressing. This needs to be completed ASAP to ensure patient entertainment is in appropriate place (25/04/2013) DH and PM agreed to review on site (02/05/2013) It was noted that this had been accommodated within the original cost plan. PM I to be provided to BMCL. BMCL to confirm is within the cost plan. (06/06/2013) DH advised that he was progress with GW and a PMI would be subsequently provided (13/06/2013) PM advised that he had walked round the rooms and thought that a dropped pole could be installed at the ducting. DH had identified a suitable arm which could take a TV. PM noted that if required a drawing could be marked

up.(20/06/2013) DH advised that he had marked up 1 of the 8 bed areas to identify where the drops could be positioned. (27/06/2013) GW advised that he couldn't find the bed area marked up drawing and DH agreed to re-markup and provide the mark-up to BMCL. (04/07/2013). **Information passed over to BMCL (11/07/2013)**

- 4) Phasing Discussions – DH suggested that consideration needed to be given to the MTHW extension when BMCL are looking at phasing/changes to the site. AS advised that the NHS Team would be doing a MTHW ring however this currently needs to be planned out. (02/05/2013). GW advised that AK was awaiting a response from the NHS. DP advised that AK was looking to build in the MTHW works into the existing BMCL phasing plans but didn't have the info to progress. PM advised that he had received an informal copy of the marked up drawing and had met with AK but he had not received anything formally to comment on. DP advised that BMCL were awaiting info from the NHS re NHS Phasing. DH advised that a technical review identified buildings that are in the way of sections of the ring. T&L will have its own boiler plant. Financially, it would be advantageous for the NHS to have the works done early but technically it may be better to leave. There may be sections of the ring that can be put in early. DS suggested that it may be beneficial to arrange Phasing Handover workshops and this was agreed. (16/05/2013) AK enquired how the NHS expected to receive the drawing formally. DH agreed to liaise with PM and confirm the way forward. (24/05/2013) PM suggested that BMCL should provide a range of questions and PM will respond (06/06/2013) PM noted that the NHS were awaiting a list of questions so that the NHS Team can provide responses. AK noted that he was removing his notes from the drawings before providing to the NHS. (13/06/2013) AK advised that he had taken the notes off the drawing and was writing up a list of queries for NHS response. AK agreed to provide the information to the NHS (27/06/2013) AK advised that the information would be issued via RFI process would be issued later that day. PM noted that he would organize an internal meeting to review. AS advised that he would like to conclude discussions at the forthcoming ASSB meeting and enquired if KStewart had been asked to reconfigure the spaces to make better use of the car park available. **DH responded and will forward drawing to GW – links within MTHW within stage 3A. Car Park 2 is now officially no longer being built and no additional deck will be added to CP1. Radius kerb – response awaited from WSP/BMCL to move the bus stop – PM/JM discussed BMCL/WSP. AS will have conversation with Kevin McCormick of GCC to ascertain if masterplan requires to be changed DP agreed to speak to Jim Miller and revert back to AS before he goes to GCC (11/07/2013)**
- 5) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). **Modified proposals response due in 2 weeks and to be approved by users (John Foster)**
- 6) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). **DP noted still chasing this (11/07/2013)**
- 7) Fire incident on site. It was noted that BMCL would issue and EW regarding the fire incident. DP enquired if Capita had been onsite to review. PM agreed to liaise with John Redmond. DR noted that BMCL were awaiting the Fire and Loss Adjustor report. (20/06/2013) GW advised that BMCL were still awaiting the formal reports. AS advised that the NHS needed to get the Fire Service report for the record (27/06/2013) AK advised that he was chasing for a copy of the formal fire service report. DMF advised that the site also has periodic visits from Chubb re Fire Safety. The Chubb rep had been provided with a tour of the site and taken through the lessons learned and DMF would ask for the Chubb

report. AS advised that he needed to know that the incident had been fully captured including what had been done. (04/07/2013). No report back as yet. AK to progress. Fire Risk Assessment carried out and remedial works underway. Incident plan now in place. AS asked AH to forward this to all the Board Team for information (11/07/2013)

- 8) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013)
- 9) Electricity Meter Readings – it was noted that a meeting had been organized to discuss the readings (04/07/2013)
- 10) Porter screens – PMI 230 issued with drawings indicating preferred location of screens
- 11) Changing Cabin for helipad – PM noted that the order for the helipad changing cabin was due to be placed however the NHS needed to understand when the deck is being installed and need to do water-proofing works. AK agreed to confirm asap. NHS need to know whether ordering as flat pack or already made up. (04/07/2013)
- 12) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings
- 13) Sedum – not signed off - will remain for next 12 months in hope sedum will establish itself further

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 24/07/2013:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDermott had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

			08/03/2012	with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.
			05/04/2012	GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.
			12/04/2012	BMCL have instructed Dunnes to produce method statement.
			31/05/2012	A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.
			27/06/2012	DS advised that final test can only be carried out once Biochemistry has been demolished.
			05/07/2012	Demolition access from 22 <sup>nd</sup> August 2012
				GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW
			02/08/2012	Biochemistry site investigation works will be undertaken.
			16/08/2012	BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28 <sup>th</sup> August 2012 NHS date – NHS to confirm 28 <sup>th</sup> August is ok
			23/08/12	DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs
			30/08/2012	BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.
			06/09/2012	Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.
			13/09/2012	Demolition works substantially complete – no issues raised thus far
			20/09/2012	DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.
			18/10/2012	Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.
			25/10/2012	DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.
			15/11/2012	DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected. Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC. Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.
			22/11/2012	DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K
			29/11/2012	DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.
			06/12/2012	DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

			<p>04/04/2013</p> <p>18/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p> <p>16/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p> <p>13/06/2013</p> <p>20/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p>	<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding.</p> <p>DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will</p>	

			<p>update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.</p> <p>22/11/12 DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.</p> <p>29/11/2012 DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.</p> <p>06/12/2012 DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&amp;B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review.</p> <p>13/12/2012 GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected. DH suggested that the only items outstanding was the 1<sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]</p> <p>20/12/2012 DH advised that he would pursue the return of the basement and restaurant drawings.</p> <p>10/01/2013 DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.</p> <p>17/01/2013 DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.</p> <p>24/01/2013 DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.</p> <p>31/01/2013 DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.</p> <p>07/02/2013 DH advised that items are being addressed.</p> <p>14/02/2013 DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these</p>
--	--	--	---

			<p>21/02/2013</p> <p>28/02/2013</p> <p>07/03/213</p> <p>14/03/2013</p> <p>04/04/2013</p> <p>11/04/2013</p>	<p>drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.</p> <p>Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p> <p>Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p> <p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>JB noted that BMCL will provide samples of the atrium panel as requested by the NHS.</p> <p>DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet.</p> <p>Ceiling heights – DH continuing to liaise with GW</p> <p>DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.</p> <p>DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>DH noted that the return date issue (RDD tracker versus front sheet) had been resolved.</p> <p>DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the</p>
--	--	--	--	--

			18/04/2013	document would need to be reviewed and a common position agreed. DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24 <sup>th</sup> April and thereafter will bring in the NHS Renal Reps.
			25/04/2013	DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue
			02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.
			16/05/2013	DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.
			24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.
			06/06/2013	DH advised that: <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>
			13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.
			20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.
			27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics

			04/07/2013	RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.	
			11/07/2013	DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3 <sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.	
			18/07/2013	PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.	
				DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vacuum plant information is awaited from MEL/HPI	
				Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays	
				DH reported on the items noted to be outstanding on the RDD tracker	
				Roof level lighting protection and metal composite panel cladding new additions to RDD	
				2 JTCs returned on Wednesday	
				2 JTCs under review	
				Group 1 – catheter cupboard omitted and PMI is drafted	
				Minor equipment – Electrical, pharmacy cabinet and renal water are WIP	
				Audiometry acoustic report is with users for feedback	
				Medical Air and Vacuum plant info required from BMCL	
				Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 24/07/2013

							
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
18924	NHS EW 048	- CHILDREN'S HOSPITAL ROOM REH-037 MOULD ROOM	22/07/2013	The Board advise that in reviewing door types in the NCH Rehab area, it has been found that the room usage and equipment contents of the Mould Room (REH-037) appear to have been overlooked when identifying fire hazard rooms. ADB code OVE1000 has 650 watt heat emitters and the process involves heating plastics. BMCE to review room categorisation and confirm requirements for both fire enclosure and services environment.			

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 24/07/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

			<p>22/02/2013 06/03/2013 04/04/2013 11/04/2013 17/04/2013 25/04/2013 02/05/2013  16/05/2013 24/05/2013 06/06/2013 13/06/2013 20/06/2013 27/06/2013 04/07/2013 11/07/2013 18/07/2013</p>	<p>AK reported end of March was the target date – AK will provide a firm date once known AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013. DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013. DP noted that BMCL were awaiting on Siemens. It was noted that contractors are due in on Monday for final commissioning DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve. DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill. DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for. AS noted that he had been advised that the engineer would be on site on the 17<sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted. DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17<sup>th</sup> June 2013. DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend. DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap. Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed <b>DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion</b></p>	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	<p>21/12/2012 10/01/2013 17/01/2013 24/01/2013 31/01/2013</p>	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage. DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost DP noted this was WIP and that there was a programme for the other areas. DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included. DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p>	

			07/02/2013 14/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes. DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013 28/02/2013	Progressing on programme AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed. AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.	
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.	
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.	
			25/04/2013	DP agreed to chase the proposal	
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.	
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.	
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.	
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.	
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.	
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.	
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.	
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.	
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement	

			<p>24/05/2013 exercise only, at this point. GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.</p> <p>06/06/2013 AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.</p> <p>13/06/2013 GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.</p> <p>20/06/2013 AS agreed to liaise with MMacleod. GW suggested that if would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.</p> <p>27/06/2013 AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.</p> <p>04/07/2013 AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.</p> <p>11/07/2013 YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward</p> <p>18/07/2013 PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>06/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>13/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>20/06/2013 AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p>	

			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back	
2009	PMI 220	PACs screens and keyboards	04/06/2013	The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175	
			06/06/2013	DP noted that he had progressed this with mercury	
			27/06/2013	GW noted that DMF was awaiting information from Mercury	
			04/07/2013	PM advised that he had received the quote. AS noted that DR would need to cross check the quote.	
			11/07/2013	DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued	
			18/07/2013	DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward	
2061	PMI 227	ENT and Ophthalmic Workstations	02/07/2013	The Board confirm that there are in total 20 ENT/Ophthalmic workstations, all of which we propose to remove from Group 1 equipment list. These are located as follows: WOR 695 & WOR695R – Ophthalmic workstations (14 no.) Ground Floor (NCH) NCH-00-OPD-130 NCH-00-OPD-129 NCH-00-OPD-128 NCH-00-OPD-109 NCH-00-OPD-118 First Floor (NSGH) NSGH-01-OPD1-076 NSGH-01-OPD1-069 NSGH-01-OPD1-077 NSGH-01-OPD1-072 NSGH-01-OPD1-071 NSGH-01-OPD1-029 NSGH-01-OPD1-028 NSGH-01-OPD1-027 NSGH-01-OPD1-025 WOR1009 & WOR1009R - ENT workstations (6no.) Ground Floor (NCH) NCH-00-OPD-133 NCH-00-OPD-078 NCH-00-OPD-069 NCH-00-OPD-068 NCH-00-OPD-095 NCH-00-OPD-077 If removed, we propose to replace these workstations with standard consulting room desks (group 3)	
			04/07/2013	It was noted that this is an equipment list change. DH confirmed that the last line of the PMI i.e. "if removed, we propose...." will be updated to confirm removal and associated replacement.	
			11/07/2013	PMI has been updated by Board	
			18/08/2013	PM confirmed that PMI wording had been revised – GW to accept PMI - CLOSED	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop	

			<p>04/07/2013</p> <p>11/07/2013</p> <p>17/07/2013</p>	<p>the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p> <p>Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL</p> <p>Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&amp;E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.</p>	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	<p>03/07/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p>	<p>The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a "future proofed" multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this, is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from; camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply a separate cost of a single video converter as additional units are likely to be needed.</p> <p>GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.</p> <p>GW noted that Mercury to progress with Starkstrom for the 29 theatres. Final iteration of surgeons panels should not be delayed and the addition of the multi-input interface discussions should run parallel to allow contractual progression AS asked for a technical meeting in order to understand what is required and DP to arrange. DP/DH to review the status of the RDD</p> <p>Meeting is scheduled for 18/07 with BMCL and NHS to review the equipment and understand the</p>	

				issues before a meeting with Startkstrom on Monday 22/07/13	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013 10/07/2013 18/07/2013	The Board confirm change to sink specification. Sample sink reviewed on site confirmed okay, revised proposal for tap required from BMCL <b>This was not a change to the type of tap but the same tap with a longer spout</b>	
2085	PMI 233	A&C Hospitals - Aseptic Suite Equipment	10/07/2013        18/07/2013	The Board confirm acceptance of the revised cost of £11,377.06 for aseptic ventilated cabinets (CAB-7016) in lieu of the provisional sum allowance included as part of CE 046. This cost change will be reflected in the next iteration of the equipment list. (Note: there are 6 @ CAB-7016 in the aseptic suite.  In addition, the Board confirm that STF-1005 should be Group 1 for all locations (25 total). BMCL to confirm costs for non aseptic suite locations. Again this cost will be reflected in the next iteration of the equipment list.  Noted changes to equipment to be accounted for in August list  CLOSED	18/07/2013
	PMI 207	Basement Sink	10/07/2013  18/07/2013	Sink area added to prep area – noted in drawings and will appear within the next equipment list – updated - GW to take forward CLOSED	18/07/2013
2097	PMI 234	ADULT HOSPITAL RENAL OUTPATIENTS - UNISTRUT SUPPORTS FOR PE ARMS	15/07/2013       18/07/2013	Please install 24 No Unistrut supports for patient entertainment arms in rooms RENO 028, 029 and 036.  The Board wish to incorporate the provision of 24 No. Unistrut supports in ceiling spaces above renal dialysis stations/treatment chairs into the works as instructed under PMI - 187, with no further cost impact following reduction of the original scope. There are 8 support points in each of the following rooms; RENO 028, RENO 029 and RENO 036 all located as close to the centre line of chair as possible (dependant on services) between 1800mm and 2000mm from the rear wall. Once positions established please confirm with Board representative prior to final fixing.  DH/DP will review on site to position and agreed CLOSED	18/07/2013
2108	PMI 235	ADULT & CHILDRENS HOSPITALS - EQUIPMENT CODES CUP 252 & CUP675	18/07/2013	The above items are to be transferred from equipment Group 2 to Group 1.  The above equipment is to be incorporated into the FF&E contract with JTC, all as per the attached schedule. This change will be incorporated into the next update of the equipment list in August 2013.	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users	

2121	PMI 238	Starkstrom - 01 Colposcope	24/07/2013	The Board instruct the inclusion of Starkstrom quotation Ref Q4428B - 01 Colposcope into the Group 1 equipment list and the omission of the provisional sum allowance for PEN1009.	
2122	PMI 239	PACs screens and keyboards	24/07/2013	The Board confirm the inclusion of the supply and installation of PACs screens and keyboards as an integral part of the Surgeons Panel installation as follows: 29 no. RAFI KS18295 keyboards 58 no. Barco MDRC 2120 21" PACs screens These items are to be added to the Group 1 equipment list	
2123	PMI 240	PICU Renal Panels: Clarification	24/07/2013	The Board confirm that the number of Renal Media Panels in PICU is 4no (four), in accordance with the priced equipment list rather than the 3no (three) noted on the points of use schedule. Equipment list to be amended at next update.	

### COMPENSATION EVENTS

10017	CE 047	Adult Hospital – Patient Self check-ins	08/07/2013 10/07/2013	Please proceed and install infrastructure as set out in PMI 216. PMI issued	CE accepted 24/07/2013
-------	--------	---	--------------------------	--	---------------------------

#### *Other items that require discussion:*

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) **DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will

always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) **Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013)**

- 3) Renal Dialysis Day Ward – DP sought confirmation of the requirements for patressing. PM agreed to confirm. (11/04/2013) AS requested that HG be asked if the Renal Dialysis Ward had been included in the original PMI. DP suggested that it may be included in the original PMI however may need to be placed. (17/04/2013). DH noted that a visit to site will be required in order to pinpoint the locations of the patressing. This needs to be completed ASAP to ensure patient entertainment is in appropriate place (25/04/2013) DH and PM agreed to review on site (02/05/2013) It was noted that this had been accommodated within the original cost plan. PM I to be provided to BMCL. BMCL to confirm is within the cost plan. (06/06/2013) DH advised that he was progress with GW and a PMI would be subsequently provided (13/06/2013) PM advised that he had walked round the rooms and thought that a dropped pole could be installed at the ducting. DH had identified a suitable arm which could take a TV. PM noted that if required a drawing could be marked up.(20/06/2013) DH advised that he had marked up 1 of the 8 bed areas to identify where the drops could be positioned. (27/06/2013) GW advised that he couldn't find the 8 bed area marked up drawing and DH agreed to re-markup and provide the mark-up to BMCL. (04/07/2013). Information passed over to BMCL (11/07/2013). **CLOSED 18/07/2013)**

- 4) Phasing Discussions – DH suggested that consideration needed to be given to the MTHW extension when BMCL are looking at phasing/changes to the site. AS advised that the NHS Team would be doing a MTHW ring however this currently needs to be planned out. (02/05/2013). GW advised that AK was awaiting a response from the NHS. DP advised that AK was looking to build in the MTHW works into the existing BMCL phasing plans but didn't have the info to progress. PM advised that he had received an informal copy of the marked up drawing and had met with AK but he had not received anything formally to comment on. DP advised that BMCL were awaiting info from the NHS re NHS Phasing. DH advised that a technical review identified buildings that are in the way of sections of the ring. T&L will have its own boiler plant. Financially, it would be advantageous for the NHS to have the works done early but technically it may be better to leave. There may be sections of the ring that can be put in early. DS suggested that it may be beneficial to arrange Phasing Handover workshops and this was agreed. (16/05/2013) AK enquired how the NHS expected to receive the drawing formally. DH agreed to liaise with PM and confirm the way forward. (24/05/2013) PM suggested that BMCL should provide a range of questions and PM will respond (06/06/2013) PM noted that the NHS were awaiting a list of questions so that the NHS Team can provide responses. AK noted that he was removing his notes from the drawings before providing to the NHS. (13/06/2013) AK advised that he had taken the notes off the drawing and was writing up a list of queries for NHS response. AK agreed to provide the information to the NHS (27/06/2013) AK advised that the information would be issued via RFI process would be issued later that day. PM noted that he would organize an internal meeting to review. AS advised that he would like to conclude discussions at the forthcoming ASSB meeting and enquired if KStewart had been asked to reconfigure the spaces to make better use of the car park available. DH responded and will forward drawing to GW – links within MTHW within stage 3A. Car Park 2 is now officially no longer being built and no additional deck will be added to CP1. Radius kerb – response awaited from WSP/BMCL to move the bus stop – PM/JM discussed BMCL/WSP. AS will have conversation with Kevin McCormick of GCC to ascertain if masterplan requires to be changed. DS agreed to speak to Jim Miller and revert back to AS before he goes to GCC (11/07/2013) **AS reported his conversation with Kevin McCormack and GCC happy with the omission of this part of the project and to progress with other options for parking as long as the ceiling limit was not exceeded there should be no issues. AS asked GW to include within their demolition programme the A&E, Management Building and therapy and outpatients. The back end of the AMB to be included but it was not clear the exact positions as there was consideration to be given to the IT connections included within outpatients and AMB. It was considered beneficial to the site if BMCL were able to cost this project within budget. Timing for this work will need some consideration (18/07/2013)**
- 5) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), **Proposals are awaited (18/07/2013)**
- 6) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) **DP progressing (18/07/2013)**
- 7) Fire incident on site. It was noted that BMCL would issue and EW regarding the fire incident. DP enquired if Capita had been onsite to review. PM agreed to liaise with John Redmond. DR noted that BMCL were awaiting the Fire and Loss Adjustor report. (20/06/2013) GW advised that BMCL were still awaiting the formal reports. AS advised that the NHS needed to get the Fire Service report for the record (27/06/2013) AK advised that he was chasing for a copy of the formal fire service report. DMF advised that the site also has periodic visits from Chubb re Fire Safety. The Chubb rep had been provided with a tour of the site and taken through the lessons learned and DMF would ask for the Chubb

report. AS advised that he needed to know that the incident had been fully captured including what had been done. (04/07/2013). No report back as yet. AK to progress Fire Risk Assessment carried out and remedial works underway. Incident plan now in place. AS asked AH to forward this to all the Board Team for information (11/07/2013) **Report awaited (18/07/2013)**

- 8) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). **AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013)**
- 9) Electricity Meter Readings – it was noted that a meeting had been organized to discuss the readings (04/07/2013). **A process has been agreed with AGS and BMCL until the end of June billing. AS requested a written process to be agreed and brought to the EW meeting on Thursday 25/07 (18/07/2013)**
- 10) Porter screens – PMI 230 issued with drawings indicating preferred location of screens – **CLOSED (18/07/2013)**
- 11) Changing Cabin for helipad – PM noted that the order for the helipad changing cabin was due to be placed however the NHS needed to understand when the deck is being installed and need to do water-proofing works. AK agreed to confirm asap. NHS need to know whether ordering as flat pack or already made up. (04/07/2013) **PM reported that order has been placed and site visit to survey area of construction is set for next week. This will also enable method statement requirements to be clarified and timelines known (18/07/2013)**
- 12) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. **DP has forward but AS/PM had not had opportunity to review (18/07/2013)**
- 13) Sedum – not signed off - will remain for next 12 months to allow it to establish itself further.
- 14) DH noted that there was a hazard room not identified REH037 within rehab of NCH – BMCL to note (18/07/2013)
- 15) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 159

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 31/07/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDermott had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			08/03/2012	with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.
			05/04/2012	GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.
			12/04/2012	BMCL have instructed Dunnes to produce method statement.
			31/05/2012	A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.
			27/06/2012	DS advised that final test can only be carried out once Biochemistry has been demolished.
			05/07/2012	Demolition access from 22 <sup>nd</sup> August 2012
				GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW
			02/08/2012	Biochemistry site investigation works will be undertaken.
			16/08/2012	BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28 <sup>th</sup> August 2012 NHS date – NHS to confirm 28 <sup>th</sup> August is ok
			23/08/12	DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs
			30/08/2012	BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.
			06/09/2012	Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.
			13/09/2012	Demolition works substantially complete – no issues raised thus far
			20/09/2012	DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.
			18/10/2012	Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.
			25/10/2012	DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.
			15/11/2012	DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected. Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC. Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.
			22/11/2012	DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K
			29/11/2012	DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.
			06/12/2012	DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

				<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>04/04/2013 Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>18/04/2013 DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>25/04/2013 DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>02/05/2013 JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>16/05/2013 GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>24/05/2013 JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>06/06/2013 Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>13/06/2013 DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>20/06/2013 AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>04/07/2013 It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>11/07/2013 Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>18/07/2013 WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p> <p>25/07/2013 DS advised that he had received the WSP summary report. DS enquired if the NHS wanted to send this to URS before WSP submit it to GCC. AS requested that the report be provided to NHS in the first instance. AS noted that Alee had met with GCC who had indicated that there is now no requirement to do the monitoring. AS advised that the NHS needed to understand if there is any other remediation on site as RC Calderwood needs risk update. DH advised that there was still the NCH Park and Stage 3a works. DS noted that this draws a line to the current monitoring and anything else would be dealt with as and when. JB noted that a negative CE would need to be issued. DR reported that as the billing was monthly there</p>
--	--	--	--	---

				was no need to pay. DS noted that need to take cognizance re BMCL protecting the project re downstream pollution claims.	
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			12/04/2012	D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.	
			22/11/12	DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.	
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.	
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.	
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]	
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.	
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.	
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.	
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.	
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.	
			07/02/2013	DH advised that items are being addressed.	
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was	

Page 164

				<p>awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.</p>
		21/02/2013		<p>Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p>
		28/02/2013		<p>Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p>
		07/03/213		<p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p>
		14/03/2013		<p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>JB noted that BMCL will provide samples of the atrium panel as requested by the NHS.</p> <p>DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet.</p> <p>Ceiling heights – DH continuing to liaise with GW</p> <p>DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD</p>

			04/04/2013	Signoff front sheets which accompanied the drawings, etc. DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.
			11/04/2013	DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation & signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.
			18/04/2013	DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24 <sup>th</sup> April and thereafter will bring in the NHS Renal Reps.
			25/04/2013	DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue
			02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.
			16/05/2013	DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.
			24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.
			06/06/2013	DH advised that: <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>
			13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec

			<p>had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.</p> <p>20/06/2013 PM advised that the workflow report from the 18<sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.</p> <p>27/06/2013 DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.</p> <p>04/07/2013 DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.</p> <p>PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p> <p>11/07/2013 DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vacuum plant information is awaited from MEL/HPI</p> <p>Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays</p> <p>18/07/2013 DH reported on the items noted to be outstanding on the RDD tracker</p> <p>Roof level lighting protection and metal composite panel cladding new additions to RDD</p> <p>2 JTCs returned on Wednesday</p> <p>2 JTCs under review</p> <p>Group 1 – catheter cupboard omitted and PMI is drafted</p> <p>Minor equipment – Electrical, pharmacy cabinet and renal water are WIP</p> <p>Audiometry acoustic report is with users for feedback</p> <p>Medical Air and Vacuum plant info required from BMCL</p> <p>Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked</p> <p>25/07/2013 DH provided the following update:</p> <p>Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments.</p> <p>Desk locations – reprints were to be requested</p> <p>JTC – wip and would be returned asap</p> <p>Audiometry – comments to be provided back by the end of the week.</p>

SyprolD	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
18924	NHS EW 048	- CHILDREN'S HOSPITAL ROOM REH-037 MOULD ROOM	22/07/2013	<p>The Board advise that in reviewing door types in the NCH Rehab area, it has been found that the room usage and equipment contents of the Mould Room (REH-037) appear to have been overlooked when identifying fire hazard rooms. ADB code OVE1000 has 650 watt heat emitters and the process involves heating plastics. BMCE to review room categorisation and confirm requirements for both fire enclosure and services environment.</p> <p>DS advised that BMCL were looking at this and identifying if there is anything in design terms which needed to change however needed to know the equipment spec. DH agreed to provide the equipment spec.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 31/07/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

			<p>22/02/2013 AK reported end of March was the target date – AK will provide a firm date once known</p> <p>06/03/2013 AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.</p> <p>04/04/2013 DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks</p> <p>11/04/2013 It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013.</p> <p>17/04/2013 DP noted that BMCL were awaiting on Siemens.</p> <p>25/04/2013 It was noted that contractors are due in on Monday for final commissioning</p> <p>02/05/2013 DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.</p> <p>16/05/2013 DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.</p> <p>24/05/2013 DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.</p> <p>06/06/2013 AS noted that he had been advised that the engineer would be on site on the 17<sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.</p> <p>13/06/2013 DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17<sup>th</sup> June 2013.</p> <p>20/06/2013 DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.</p> <p>27/06/2013 DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day</p> <p>04/07/2013 PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.</p> <p>11/07/2013 Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed</p> <p>18/07/2013 DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion</p> <p>25/07/2013 DP advised that the Siemens rep was due later that day</p>	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	<p>21/12/2012 Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>10/01/2013 DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>17/01/2013 DP noted this was WIP and that there was a programme for the other areas.</p> <p>24/01/2013 DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>31/01/2013 DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted</p>	

			07/02/2013 14/02/2013	that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4. IP was to be requested to confirm to DP that Nicola had requested no further changes.
			21/02/2013 28/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme. Progressing on programme AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed. AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.

			18/07/2013 25/07/2013	Agreed way forward – BMCL to plan and implement Instruction given to Mercury today and programme will be issued DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.	
1952	PMI 214	YCF additions	10/05/2013	<p>Please find below (and attached) information in relation to the requirements for the Yorkhill Children's Foundation "added value" works</p> <p>I would be grateful if you could include these requests into the building and advise on the costs in order that the Board can bill the YCF accordingly</p> <ol style="list-style-type: none"> <li>1. Sky ceilings to be added in the following rooms: <ul style="list-style-type: none"> <li>• Child protection room CPS.004</li> <li>• ED majors staff base EMC.61</li> <li>• 2 dental rooms OPD.082 &amp; OPD.139</li> <li>• Plaster room OPD.073</li> <li>• Phlebotomy room OPD.193</li> <li>• Nuclear Medicine camera room RMN.033</li> <li>• Nuclear Medicine injection room RMN.027</li> <li>• Theatres holding areas THE.032, THE.033 &amp; THE.034</li> <li>• MRI rooms RCG.064 &amp; RCF.024</li> </ul> </li> <li>2. Sky box in <ul style="list-style-type: none"> <li>• Radiotherapy room in Schiehallion SCH.081</li> </ul> </li> <li>3. Pattressing on wall in wait area of Observation ward OBS.054</li> <li>4. Information on Snoozelen rooms DCFP. 050 &amp; GW3.050</li> <li>5. Information on Family Centre room ENT.028- in particular the glass front that is required</li> </ol>	
			16/05/2013	GW advised that BMCL were currently pricing the works up. PM confirmed that this is a pricing exercise only, at this point.	
			24/05/2013	GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.	
			06/06/2013	AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.	
			13/06/2013	GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.	
			20/06/2013	AS agreed to liaise with MMacleod. GW suggested that it would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.	
			27/06/2013	AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.	
			04/07/2013	AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the	

			11/07/2013	way forward. YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward	
			18/07/2013 25/07/2013	PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2 PM noted that he was meeting with James Bailey later that day. PM needed to understand the final quote and the payment mechanism. A PMI would be issued in due course to confirm the way forward re YCF and YCF 2.	
1978	PMI 217	MTHW System - Site ring	22/05/2013	The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.	
			24/05/2013	The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc	
			06/06/2013	DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.	
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.	
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013 25/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will	

				need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.	
2009	PMI 220	PACs screens and keyboards	04/06/2013  06/06/2013 27/06/2013 04/07/2013  11/07/2013  18/07/2013	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013  04/07/2013  11/07/2013  17/07/2013  25/07/2013	<p>Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p> <p>Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL</p> <p>Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&amp;E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.</p> <p>PM advised that the CAD had been received and had been reviewed the previous day. The</p>	

				drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	03/07/2013  04/07/2013  11/07/2013  18/07/2013  25/07/2013	<p>The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a "future proofed" multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this, is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from; camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply a separate cost of a single video converter as additional units are likely to be needed.</p> <p>GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.</p> <p>GW noted that Mercury to progress with Starkstrom for the 29 theatres. Final iteration of surgeons panels should not be delayed and the addition of the multi-input interface discussions should run parallel to allow contractual progression AS asked for a technical meeting in order to understand what is required and DP to arrange. DP/DH to review the status of the RDD</p> <p>Meeting is scheduled for 18/07 with BMCL and NHS to review the equipment and understand the issues before a meeting with Starkstrom on Monday 22/07/13</p> <p>It was noted that this item was now closed as the NHS had provided the quote. Cross ref PMI 209. AS raised concern that the Starkstrom Theatre package was flawed. DP advised that the theatre works however perhaps not how the clinicians want/desire it to work for how they want to use it. AS suggested that if this is an enhancement then it would need to be a CE. DP noted that the cost was with Mercury for review.</p>	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013 10/07/2013 18/07/2013 25/07/2013	<p>The Board confirm change to sink specification.</p> <p>Sample sink reviewed on site confirmed okay, revised proposal for tap required from BMCL</p> <p>This was not a change to the type of tap but the same tap with a longer spout</p> <p>PM advised that he would review this on site at the first opportunity</p>	
2108	PMI 235	ADULT & CHILDRENS HOSPITALS - EQUIPMENT CODES CUP 252 & CUP675	18/07/2013  25/07/2013	<p>The above items are to be transferred from equipment Group 2 to Group 1.</p> <p>The above equipment is to be incorporated into the FF&amp;E contract with JTC, all as per the attached schedule. This change will be incorporated into the next update of the equipment list in August 2013.</p> <p>DMF advised that JTC had been asked to identify any implications</p>	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)	

			25/07/2013	DH noted that there had been a query re additional heat load and he suggested that DWilson should discuss this with FCarnie.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users 25/07/2013 DMF advised that he was awaiting the cost info.	
2121	PMI 238	Starkstrom - 01 Colposcope	24/07/2013	The Board instruct the inclusion of Starkstrom quotation Ref Q4428B - 01 Colposcope into the Group 1 equipment list and the omission of the provisional sum allowance for PEN1009. 25/07/2013 It was agreed that this item was now closed (Equipment list change)	
2122	PMI 239	PACs screens and keyboards	24/07/2013	The Board confirm the inclusion of the supply and installation of PACs screens and keyboards as an integral part of the Surgeons Panel installation as follows: 29 no. RAFI KS18295 keyboards 58 no. Barco MDRC 2120 21" PACs screens These items are to be added to the Group 1 equipment list 25/07/2013 It was agreed that this item was now closed (Equipment list change)	
2123	PMI 240	PICU Renal Panels: Clarification	24/07/2013	The Board confirm that the number of Renal Media Panels in PICU is 4no (four), in accordance with the priced equipment list rather than the 3no (three) noted on the points of use schedule. Equipment list to be amended at next update. 25/07/2013 It was agreed that this item was now closed (Equipment list change)	
2127	PMI 241	A&C Pneumatic Tube – Teaching & Learning Centre and Neuro-sciences	26/07/2013	The Board confirm that BMCL should proceed with the installation of the pneumatic tube system within the link bridges serving the Teaching and Learning and Neuro-sciences buildings in order to mitigate the risk of interface/warranty issues. Refer attached sketch layouts PT1 and PT2. It is noted that these works will be part of the project defined cost.	
2131	PMI 242	Generator provision at switch over from Energy Centre to A&C Hospitals	26/07/2013	Generator provision at switch over from Energy Centre to A&C Hospitals The Board confirm that subsequent to ongoing discussions, that BMCL should arrange for generator cover to the laboratories building for the period of switch over from the Energy Centre to the A&C Hospitals as part of the final commissioning process. It is noted that these works will be part of the project defined cost.	
2132	PMI 243	Energy Centre – Access Assistance to the NHS	26/07/2013	The Board confirm that the costs associated in providing access assistance (including Scaffolding and attendance by FES) to new energy centre in order that the NHS Board Contractor could carry out cabling works should form part of the project defined cost.	
2133	PMI 244	A & C Hospitals – Modification to Telephone System within A&C Hospital Lifts	26/07/2013	The Board confirm that for reasons of clinical safety that the communications protocol for these lifts should be converted from Schindler's e-alarm system to a universal Wincrest system which directs calls to the NHS GG&C Contact Centre at Hillington instead of Schindler. It is noted that BMCL will provide the PC and monitoring software. It is noted that these works will be part of the project defined cost.	

### COMPENSATION EVENTS

10017	CE 047	Adult Hospital – Patient Self check-ins	08/07/2013 10/07/2013	Please proceed and install infrastructure as set out in PMI 216. PMI issued	CE accepted 24/07/2013
-------	--------	---	--------------------------	--	---------------------------

**Other items that require discussion:**

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Dieselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Dieselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) **DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013.**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he

had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) **DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) **DS advised that he would chase up the proposals (25/07/2013)**
- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) **DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH**

noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013)

- 5) Fire incident on site. It was noted that BMCL would issue and EW regarding the fire incident. DP enquired if Capita had been onsite to review. PM agreed to liaise with John Redmond. DR noted that BMCL were awaiting the Fire and Loss Adjustor report. (20/06/2013) GW advised that BMCL were still awaiting the formal reports. AS advised that the NHS needed to get the Fire Service report for the record (27/06/2013) AK advised that he was chasing for a copy of the formal fire service report. DMF advised that the site also has periodic visits from Chubb re Fire Safety. The Chubb rep had been provided with a tour of the site and taken through the lessons learned and DMF would ask for the Chubb report. AS advised that he needed to know that the incident had been fully captured including what had been done. (04/07/2013). No report back as yet. AK to progress. Fire Risk Assessment carried out and remedial works underway. Incident plan now in place. AS asked AH to forward this to all the Board Team for information (11/07/2013) Report awaited (18/07/2013) **AK noted that he had received the report which was being review as the detail was confusing however the report summary stated that the fire had been caused by the accidental disposal of a lit cigarette.**
- 6) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) **DMF agreed to chase this up (25/07/2013)**
- 7) Changing Cabin for helipad – PM noted that the order for the helipad changing cabin was due to be placed however the NHS needed to understand when the deck is being installed and need to do water-proofing works. AK agreed to confirm asap. NHS need to know whether ordering as flat pack or already made up. (04/07/2013) **PM reported that order has been placed and site visit to survey area of construction is set for next week. This will also enable method statement requirements to be clarified and timelines known (18/07/2013) PM noted that a meeting with the cabin contractor had been scheduled for Monday 29/07/2013**
- 8) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) **DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overclad. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013)**
- 9) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review 0 looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013)
- 10) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion.
- 11) Delay to BMCL Fire road drainage connection as Maternity foul onto Hardgate Road is backing up. AK had contacted the Scottish Water rep to resolve. AS advised that if BMCL were not getting a response that he would be happy to assist. DH noted that although it was a Project problem it could become a public health problem if not dealt with in a timeous manner. (25/07/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 179

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 31/07/2013:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.</p> <p>05/04/2012 GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>12/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>31/05/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>27/06/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>05/07/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>02/08/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>16/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>23/08/12 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>30/08/2012 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>06/09/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>13/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>20/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>18/10/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>25/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>15/11/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>22/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected.</p> <p>29/11/2012 Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC.</p> <p>06/12/2012 Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	---

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

				<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>04/04/2013 Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>18/04/2013 DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>25/04/2013 DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>02/05/2013 JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>16/05/2013 GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>24/05/2013 JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>06/06/2013 Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>13/06/2013 DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>20/06/2013 AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>04/07/2013 It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>11/07/2013 Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>18/07/2013 WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p> <p>25/07/2013 DS advised that he had received the WSP summary report. DS enquired if the NHS wanted to send this to URS before WSP submit it to GCC. AS requested that the report be provided to NHS in the first instance. AS noted that Allee had met with GCC who had indicated that there is now no requirement to do the monitoring. AS advised that the NHS needed to understand if there is any other remediation on site as RC Calderwood needs risk update. DH advised that there was still the NCH Park and Stage 3a works. DS noted that this draws a line to the current monitoring and anything else would be dealt with as and when. JB noted that a negative CE would need to be issued. DR reported that as the billing was monthly there</p>
--	--	--	--	--

			01/08/2013	<p>was no need to pay. DS noted that need to take cognizance re BMCL protecting the project re downstream pollution claims.</p> <p>CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued.</p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p> <p>22/11/12</p> <p>29/11/2012</p> <p>06/12/2012</p> <p>13/12/2012</p> <p>20/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p> <p>24/01/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.</p> <p>DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.</p> <p>DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.</p> <p>DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&amp;B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review.</p> <p>GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected. DH suggested that the only items outstanding was the 1<sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]</p> <p>DH advised that he would pursue the return of the basement and restaurant drawings.</p> <p>DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.</p> <p>DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.</p> <p>DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead</p>	

			<p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p> <p>21/02/2013</p> <p>28/02/2013</p> <p>07/03/2013</p>	<p>out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out. DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.</p> <p>DH advised that items are being addressed.</p> <p>DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.</p> <p>Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p> <p>Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p> <p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built</p>	
--	--	--	---	--	--

			<p>14/03/2013</p> <p>04/04/2013</p> <p>11/04/2013</p> <p>18/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p> <p>16/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p>	<p>drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>JB noted that BMCL will provide samples of the atrium panel as requested by the NHS.</p> <p>DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet.</p> <p>Ceiling heights – DH continuing to liaise with GW</p> <p>DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.</p> <p>DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>DH noted that the return date issue (RDD tracker versus front sheet) had been resolved.</p> <p>DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p> <p>DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p> <p>DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.</p> <p>DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.</p> <p>DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.</p> <p>DH advised that:</p> <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> </ul>	
--	--	--	---	--	--

			<ul style="list-style-type: none"> <li>• JCT info to be provided later that day as confirmed to DH by FW</li> <li>• Final equipment list cost expected later that day</li> </ul>	
		13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.	
		20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.	
		27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.	
		04/07/2013	DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3 <sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.	
			PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.	
		11/07/2013	DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vacuum plant information is awaited from MEL/HPI	
			Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays	
		18/07/2013	DH reported on the items noted to be outstanding on the RDD tracker	
			Roof level lighting protection and metal composite panel cladding new additions to RDD	
			2 JTCs returned on Wednesday	
			2 JTCs under review	
			Group 1 – catheter cupboard omitted and PMI is drafted	
			Minor equipment – Electrical, pharmacy cabinet and renal water are WIP	
			Audiometry acoustic report is with users for feedback	
			Medical Air and Vacuum plant info required from BMCL	
			Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked	
		25/07/2013	DH provided the following update: Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion).	

			01/08/2013	<p>DH would return the RDD docs as a B status with comments.          Desk locations – reprints were to be requested          JTC – wip and would be returned asap          Audiometry – comments to be provided back by the end of the week.          DH noted that he had reviewed the tracker the previous night and provided the following update:          The first few dates appeared to be incorrect          Lead lining drawings returned 29/07/2013          MRI Breakout – to be returned later that day          Bedhead trunking – to be returned later that day          JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided)          Minor Equipment schedule – WIP          Medical Air Vacuum – awaiting info from DP (schematics)          Renal water – with DP          Desk locations – reprints awaited.</p>	
--	--	--	------------	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 31/07/2013

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
18924	NHS EW 048	- CHILDREN'S HOSPITAL ROOM REH-037 MOULD ROOM	22/07/2013  01/08/2013	<p>The Board advise that in reviewing door types in the NCH Rehab area, it has been found that the room usage and equipment contents of the Mould Room (REH-037) appear to have been overlooked when identifying fire hazard rooms. ADB code OVE1000 has 650 watt heat emitters and the process involves heating plastics. BMCE to review room categorisation and confirm requirements for both fire enclosure and services environment.          DS advised that BMCL were looking at this and identifying if there is anything in design terms which needed to change however needed to know the equipment spec. DH agreed to provide the equipment spec          DS advised that the drawings are being updated to reflect change – will be made a fire hazard room. BMCL are awaiting the oven info to conclude. DH suggested that the oven info had been provided and would check this out and re-provide.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 31/07/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

			22/02/2013 06/03/2013 04/04/2013 11/04/2013 17/04/2013 25/04/2013 02/05/2013  16/05/2013 24/05/2013  06/06/2013 13/06/2013 20/06/2013 27/06/2013 04/07/2013 11/07/2013 18/07/2013 25/07/2013 01/08/2013	<p>AK reported end of March was the target date – AK will provide a firm date once known</p> <p>AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.</p> <p>DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks</p> <p>It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013.</p> <p>DP noted that BMCL were awaiting on Siemens.</p> <p>It was noted that contractors are due in on Monday for final commissioning</p> <p>DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.</p> <p>DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.</p> <p>DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.</p> <p>AS noted that he had been advised that the engineer would be on site on the 17<sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.</p> <p>DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17<sup>th</sup> June 2013.</p> <p>DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.</p> <p>DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day</p> <p>PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.</p> <p>Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed</p> <p>DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion</p> <p>DP advised that the Siemens rep was due later that day</p> <p><b>DP to provide update by 05/08/2013. PM advised that he would get AGS to check out if operational.</b></p>	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012 10/01/2013 17/01/2013 24/01/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4</p>	

			31/01/2013	to be included. DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.
			21/02/2013	Progressing on programme
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed. AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further

			<p>04/07/2013 that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.</p> <p>11/07/2013 AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.</p> <p>18/07/2013 YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised</p> <p>25/07/2013 Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward</p> <p>PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2</p> <p>PM noted that he was meeting with James Bailey later that day. PM needed to understand the final quote and the payment mechanism. A PMI would be issued in due course to confirm the way forward re YCF and YCF 2.</p> <p>01/08/2013 PM advised that he had met with James Bailey. PM had emailed YCF CE and was awaiting confirmation of approval to proceed re proposals and payment mechanism. GW noted that confirmation was needed asap as would become critical soon. It was noted that BCM were not progressing anything re YCF2 at this time. PM agreed to email MMacleod requesting an update.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>06/06/2013 GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>13/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>20/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>27/06/2013 AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p> <p>04/07/2013 AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>AS advised that he was still to have a walkround so can understand what needs to be done before</p>	

			<p>11/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p>	<p>instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.</p> <p>DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p> <p>AS/DH and AK will walkround the proposed area on Friday 19th July and report back</p> <p>AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p><b>DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</b></p>	
2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>01/08/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p><b>PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</b></p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013</p> <p>04/07/2013</p>	<p>Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had</p>	

			11/07/2013	instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.	
			17/07/2013	Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL	
			25/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			01/08/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
				PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	03/07/2013	The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a "future proofed" multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this, is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from; camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply a separate cost of a single video converter as additional units are likely to be needed.	
			04/07/2013	GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.	
			11/07/2013	GW noted that Mercury to progress with Starkstrom for the 29 theatres. Final iteration of surgeons panels should not be delayed and the addition of the multi-input interface discussions should run parallel to allow contractual progression. AS asked for a technical meeting in order to understand what is required and DP to arrange. DP/DH to review the status of the RDD	
			18/07/2013	Meeting is scheduled for 18/07 with BMCL and NHS to review the equipment and understand the issues before a meeting with Starkstrom on Monday 22/07/13	
			25/07/2013	It was noted that this item was now closed as the NHS had provided the quote. Cross ref PMI 209. AS raised concern that the Starkstrom Theatre package was flawed. DP advised that the theatre works however perhaps not how the clinicians want/desire it to work for how they want to use it. AS	

			01/08/2013	suggested that if this is an enhancement then it would need to be a CE. DP noted that the cost was with Mercury for review. DH advised that a meeting to discuss the arm had taken place the previous day – the arm needs to accommodate 5 cables. The arm comes apart therefore can lay the cables in to it. Mercury and Starkstrom reps confirmed the 5 cables to be carried. Is is the intention to cancel this PMI and reissue a PMI to confirm the way forward re PACS solution and cabling from the pendant to the monitor. Cabling – an equipment cost. Mercury and Starkstrom are clear what is required.	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013 10/07/2013 18/07/2013 25/07/2013 01/08/2013	The Board confirm change to sink specification. Sample sink reviewed on site confirmed okay, revised proposal for tap required from BMCL This was not a change to the type of tap but the same tap with a longer spout PM advised that he would review this on site at the first opportunity PM noted that he was still to be asked to review the longer spout taps on site and he would liaise with P Norton.	
2108	PMI 235	ADULT & CHILDRENS HOSPITALS - EQUIPMENT CODES CUP 252 & CUP675	18/07/2013    25/07/2013 01/08/2013	The above items are to be transferred from equipment Group 2 to Group 1.  The above equipment is to be incorporated into the FF&E contract with JTC, all as per the attached schedule. This change will be incorporated into the next update of the equipment list in August 2013. DMF advised that JTC had been asked to identify any implications Agreed that this is an equipment list item therefore can be closed.	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013   25/07/2013  01/08/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)  DH noted that there had been a query re additional heat load and he suggested that DWilson should discuss this with FCarnie. Noted that costs have to be provided. Position of cabinet to be confirmed however understood that the room can accommodate the cabinet.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013    25/07/2013 01/08/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users DMF advised that he was awaiting the cost info. DMF agreed to chase this up. DH confirmed that load.	
2127	PMI 241	A&C Pneumatic Tube – Teaching & Learning Centre and Neuro-sciences	26/07/2013   01/08/2013	The Board confirm that BMCL should proceed with the installation of the pneumatic tube system within the link bridges serving the Teaching and Learning and Neuro-sciences buildings in order to mitigate the risk of interface/warranty issues. Refer attached sketch layouts PT1 and PT2. It is noted that these works will be part of the project defined cost. Agreed this item could be closed	01/08/2013
2131	PMI 242	Generator provision at switch over from Energy Centre to A&C Hospitals	26/07/2013	Generator provision at switch over from Energy Centre to A&C Hospitals The Board confirm that subsequent to ongoing discussions, that BMCL should arrange for generator cover to the laboratories building for the period of switch over from the Energy Centre to the A&C Hospitals as	01/08/2013

			01/08/2013	part of the final commissioning process. It is noted that these works will be part of the project defined cost. <i>Agreed this item could be closed</i>	
2132	PMI 243	Energy Centre – Access Assistance to the NHS	26/07/2013	The Board confirm that the costs associated in providing access assistance (including Scaffolding and attendance by FES) to new energy centre in order that the NHS Board Contractor could carry out cabling works should form part of the project defined cost. <i>Agreed this item could be closed</i>	01/08/2013
2133	PMI 244	A & C Hospitals – Modification to Telephone System within A&C Hospital Lifts	26/07/2013	The Board confirm that for reasons of clinical safety that the communications protocol for these lifts should be converted from Schindler's e-alarm system to a universal Wincrest system which directs calls to the NHS GG&C Contact Centre at Hillington instead of Schindler. It is noted that BMCL will provide the PC and monitoring software. It is noted that these works will be part of the project defined cost. <i>Agreed this item could be closed</i>	01/08/2013

## COMPENSATION EVENTS

NONE

### *Other items that require discussion:*

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Dieselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Dieselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) *DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013.*
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would

happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) **DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone.

PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) **DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).**

- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) **DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) **DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013)**
- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) **DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013)**
- 7) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review 0 looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) **It was noted that the meeting with WSP was being re-organised (01/08/2013)**
- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. **DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013)**
- 9) Delay to BMCL Fire road drainage connection as Maternity foul onto Hardgate Road is backing up. AK had contacted the Scottish Water rep to resolve. AS advised that if BMCL were not getting a response that he would be happy to assist. DH noted that although it was a Project problem it could become a public health problem if not dealt with in a

timeous manner. (25/07/2013 AK advised that he was awaiting SW to visit to deal with the issue. BMCL are checking the manholes regularly. AK may advise AGS to carry out the Board works whilst the SW drainage issue is being resolved. BMCL will have 1 more attempt to push the SW drainage works and if they don't get a positive response then will escalate this.

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 200

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 14/08/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds. GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>05/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>12/04/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>31/05/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>27/06/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>05/07/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>02/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>16/08/2012 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>23/08/12 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>30/08/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>06/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>13/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>20/09/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>18/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>25/10/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>15/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected. Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC. Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>22/11/2012 DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>29/11/2012 DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>06/12/2012 DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	--

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

				<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>04/04/2013 Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>18/04/2013 DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>25/04/2013 DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>02/05/2013 JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>16/05/2013 GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>24/05/2013 JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>06/06/2013 Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>13/06/2013 DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>20/06/2013 AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>04/07/2103 It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>11/07/2013 Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>18/07/2013 WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p> <p>25/07/2013 DS advised that he had received the WSP summary report. DS enquired if the NHS wanted to send this to URS before WSP submit it to GCC. AS requested that the report be provided to NHS in the first instance. AS noted that Allee had met with GCC who had indicated that there is now no requirement to do the monitoring. AS advised that the NHS needed to understand if there is any other remediation on site as RC Calderwood needs risk update. DH advised that there was still the NCH Park and Stage 3a works. DS noted that this draws a line to the current monitoring and anything else would be dealt with as and when. JB noted that a negative CE would need to be issued. DR reported that as the billing was monthly there</p>
--	--	--	--	--

			01/08/2013	was no need to pay. DS noted that need to take cognizance re BMCL protecting the project re downstream pollution claims. CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued.	
			08/08/2013	DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring.	
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			12/04/2012	D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.	
			22/11/12	DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.	
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.	
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.	
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]	
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.	
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.	
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.	

			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.
			07/02/2013	DH advised that items are being addressed.
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.
			21/02/2013	Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week
			28/02/2013	Bedheads – a further meeting has been organised for next week – feedback thereafter DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues. NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS. Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.
			07/03/213	Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM. NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided. Bedheads – FW had just been provided with the spreadsheet Post sweep up changes- GB had provided further drawings to the PM for review – changes were

				<p>insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>14/03/2013 JB noted that BMCL will provide samples of the atrium panel as requested by the NHS. DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet. Ceiling heights – DH continuing to liaise with GW</p> <p>04/04/2013 DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc. DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>11/04/2013 DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p> <p>18/04/2013 DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>25/04/2013 DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p> <p>02/05/2013 DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.</p> <p>16/05/2013 DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.</p> <p>24/05/2013 DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.</p> <p>06/06/2013 DH advised that:</p> <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> </ul>	
--	--	--	--	--	--

				<ul style="list-style-type: none"> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>	
			13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.	
			20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.	
			27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.	
			04/07/2013	DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3 <sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.	
				PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.	
			11/07/2013	DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vaccum plant information is awaited from MEL/HPI	
				Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays	
			18/07/2013	DH reported on the items noted to be outstanding on the RDD tracker	
				Roof level lighting protection and metal composite panel cladding new additions to RDD	
				2 JTCs returned on Wednesday	
				2 JTCs under review	
				Group 1 – catheter cupboard omitted and PMI is drafted	
				Minor equipment – Electrical, pharmacy cabinet and renal water are WIP	
				Audiometry acoustic report is with users for feedback	
				Medical Air and Vacuum plant info required from BMCL	
				Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked	
			25/07/2013	DH provided the following update:	

			<p>01/08/2013</p> <p>Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments.</p> <p>Desk locations – reprints were to be requested</p> <p>JTC – wip and would be returned asap</p> <p>Audiometry – comments to be provided back by the end of the week.</p> <p>DH noted that he had reviewed the tracker the previous night and provided the following update:</p> <p>The first few dates appeared to be incorrect</p> <p>Lead lining drawings returned 29/07/2013</p> <p>MRI Breakout – to be returned later that day</p> <p>Bedhead trunking – to be returned later that day</p> <p>JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided)</p> <p>Minor Equipment schedule – WIP</p> <p>Medical Air Vacuum – awaiting info from DP (schematics)</p> <p>Renal water – with DP</p> <p>Desk locations – reprints awaited.</p> <p>08/08/2013</p> <p>Internal finishes – SF trying to locate these – may request reprints.</p> <p>Interventional – information returned</p> <p>Pharmacy – BMCL instructed to fit the out cabinet</p> <p>Minor Equipment – WIP</p> <p>Schedule of low voltage – information returned</p> <p>Metal composite cladding – hard copy never received as was wrong rev no</p> <p>Medical Air and Vacuum plant – awaiting schematic</p> <p>Rack – wip to conclude</p> <p>Safe – instructed PMI to confirm is to be a group 3 item</p> <p>1st floor plans – desk locations – with FW</p> <p>Renal water – returned as a B status – response from Elgar expected 08/08/2013</p> <p>GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p>

SypriD	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
18924	NHS EW 048	- CHILDREN'S HOSPITAL ROOM REH-037 MOULD ROOM	22/07/2013  01/08/2013  08/08/2013	<p>The Board advise that in reviewing door types in the NCH Rehab area, it has been found that the room usage and equipment contents of the Mould Room (REH-037) appear to have been overlooked when identifying fire hazard rooms. ADB code OVE1000 has 650 watt heat emitters and the process involves heating plastics. BMCE to review room categorisation and confirm requirements for both fire enclosure and services environment.</p> <p>DS advised that BMCL were looking at this and identifying if there is anything in design terms which needed to change however needed to know the equipment spec. DH agreed to provide the equipment spec</p> <p>DS advised that the drawings are being updated to reflect change – will be made a fire hazard room. BMCL are awaiting the oven info to conclude. DH suggested that the oven info had been provided and would check this out and re-provide.</p> <p>DH advised that he confirmation that the REH037 to be classified as a Fire Hazard room. JB advised that there was no impact to programme, design or defined cost. It was agreed this item could be closed.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 14/08/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

			22/02/2013 06/03/2013 04/04/2013 11/04/2013 17/04/2013 25/04/2013 02/05/2013  16/05/2013 24/05/2013  06/06/2013 13/06/2013 20/06/2013 27/06/2013 04/07/2013 11/07/2013 18/07/2013 25/07/2013 01/08/2013  08/08/2013	<p>AK reported end of March was the target date – AK will provide a firm date once known</p> <p>AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.</p> <p>DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks</p> <p>It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013.</p> <p>DP noted that BMCL were awaiting on Siemens.</p> <p>It was noted that contractors are due in on Monday for final commissioning</p> <p>DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.</p> <p>DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.</p> <p>DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.</p> <p>AS noted that he had been advised that the engineer would be on site on the 17<sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.</p> <p>DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17<sup>th</sup> June 2013.</p> <p>DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.</p> <p>DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day</p> <p>PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.</p> <p>Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed</p> <p>DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion</p> <p>DP advised that the Siemens rep was due later that day</p> <p>DP to provide update by 05/08/2013. PM advised that he would get AGS to check out if operational.</p> <p><b>DMF noted that both Siemens and Schneider had visited the site. The issue was a controls issue. Reps will revisit that day to install new software. DH provided an overview of the process for installing the new software (delete, install ghost software, reload new software).</b></p>	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the</p>	

			cost
		17/01/2013	DP noted this was WIP and that there was a programme for the other areas.
		24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.
		31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.
		07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.
		14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.
		21/02/2013	Progressing on programme
		28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
		06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.
			AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.
		14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report.
			DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
		04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
		11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
		17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
		25/04/2013	DP agreed to chase the proposal
		02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
		16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
		24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
		06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
		13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
		20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
		27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling

			<p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p>	<p>GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.</p> <p>AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.</p> <p>AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.</p> <p>YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward</p> <p>PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2</p> <p>PM noted that he was meeting with James Bailey later that day. PM needed to understand the final quote and the payment mechanism. A PMI would be issued in due course to confirm the way forward re YCF and YCF 2.</p> <p>PM advised that he had met with James Bailey. PM had emailed YCF CE and was awaiting confirmation of approval to proceed re proposals and payment mechanism. GW noted that confirmation was needed asap as would become critical soon. It was noted that BCM were not progressing anything re YCF2 at this time. PM agreed to email MMacleod requesting an update. PM advised the he was awaiting clarity from YCF re payment mechanism. JB enquired if there was anything stopping BMCL getting the YCF1 CE. PM noted that there was nothing stopping BMCL getting the CE for YCF1. GW to liaise with SF.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013</p> <p>24/05/2013</p> <p>06/06/2013</p> <p>13/06/2013</p> <p>20/06/2013</p>	<p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p>	

			<p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p>	<p>AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.</p> <p>DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p> <p>AS/DH and AK will walkround the proposed area on Friday 19th July and report back</p> <p>AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p>DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</p> <p>DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&amp;E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.</p>	
2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>01/08/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p>PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</p>	

			08/08/2013	GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013	
			04/07/2013	GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.	
			11/07/2013	Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed hat AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL	
			17/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
			08/08/2013	DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 9 <sup>th</sup> September and the cost information will follow as soon as possible thereafter.	
2065	PMI 229	Surgical Image Viewing - Theatres (20 adults, 9 children's)	03/07/2013	The Board confirm their previous verbal request, following detailed discussions with MEL and Starkstrom, for a cost to provide a "future proofed" multi-input interface, to be positioned beside or within the surgeon's panel (please advise if configuration of surgeon's panel to accommodate this, is feasible), to allow the selection and transmission of video images from multiple outlets to the video monitor/s supported on the light anchorage and mounted on the surgical pendant (children's hospital only). This to include all associated cabling, outlets/connections, monitor input selector panel and any hardware. The monitor inputs discussed with Starkstrom are as follows - from;	Cross Ref PMI 246 which cancels this PMI.

			<p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p>	<p>camera in theatre light, PACS image, endoscopic camera system and an auxiliary input (any video output signal from medical device eg. Microscope, flexible endoscopic system, mobile X-ray etc). Cost of required video converters to be included, a minimum of one per theatre. Please also supply a separate cost of a single video converter as additional units are likely to be needed.</p> <p>GW advised that he had liaised with both Brendan and Ross the previous day. Brendan was aware and info awaited from Starkstrom. AS enquired if there would be any change to the panel ADB code and DH advised that the description could be updated to include. GW and DH to discuss way forward re ADB code. DS advised that it would be beneficial to change the ADB code on the Nightingale drawings. DH advised that the multi-input interface should be incorporated onto the panels therefore there was no major impact on the Nightingale drawings.</p> <p>GW noted that Mercury to progress with Starkstrom for the 29 theatres. Final iteration of surgeons panels should not be delayed and the addition of the multi-input interface discussions should run parallel to allow contractual progression. AS asked for a technical meeting in order to understand what is required and DP to arrange. DP/DH to review the status of the RDD</p> <p>Meeting is scheduled for 18/07 with BMCL and NHS to review the equipment and understand the issues before a meeting with Starkstrom on Monday 22/07/13</p> <p>It was noted that this item was now closed as the NHS had provided the quote. Cross ref PMI 209. AS raised concern that the Starkstrom Theatre package was flawed. DP advised that the theatre works however perhaps not how the clinicians want/desire it to work for how they want to use it. AS suggested that if this is an enhancement then it would need to be a CE. DP noted that the cost was with Mercury for review.</p> <p>DH advised that a meeting to discuss the arm had taken place the previous day – the arm needs to accommodate 5 cables. The arm comes apart therefore can lay the cables in to it. Mercury and Starkstrom reps confirmed the 5 cables to be carried. Is is the intention to cancel this PMI and reissue a PMI to confirm the way forward re PACS solution and cabling from the pendant to the monitor. Cabling – an equipment cost. Mercury and Starkstrom are clear what is required.</p> <p>DH advised that a joint meeting had been held, the way forward had been agreed. Mercury &amp; Starkstrom to confirm that cables fit into the proposed arm. DH had been advised that the arm was onsite however no-one had seen it. Once DH had reviewed then a PMI would be issues confirming way forward.</p>	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	<p>08/07/2013</p> <p>10/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p>	<p>The Board confirm change to sink specification.</p> <p>Sample sink reviewed on site confirmed okay, revised proposal for tap required from BMCL</p> <p>This was not a change to the type of tap but the same tap with a longer spout</p> <p>PM advised that he would review this on site at the first opportunity</p> <p>PM noted that he was still to be asked to review the longer spout taps on site and he would liaise with P Norton.</p> <p>DS advised that he had emailed PM further to discussion with CGrindlay. The proposals would be provided for review to PM asap. A few alternatives had been identified. Noted that alternatives include mixer taps and the NHS would need to check if mixer taps were acceptable.</p>	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	<p>22/07/2013</p> <p>25/07/2013</p>	<p>The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)</p> <p>DH noted that there had been a query re additional heat load and he suggested that DWilson</p>	

			01/08/2013  08/08/2013	should discuss this with FCarnie. Noted that costs have to be provided. Position of cabinet to be confirmed however understood that the room can accommodate the cabinet.  Awaiting finalization of cabinets – have a de-installation cost as 1 already fitted in the adults. FCarnie is identifying what to do with the 2 cabinets to be replaced. DH will arrange for the cabinets to be uplifted. DR noted that confirmation needed to be provided to BMCL asap. DH suggested that the cabinets could be relocated to the NCH Comms room in place of those which were still to be delivered to site and the NHS would confirm where to re-direct 2 of the still to be delivered cabinets.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013    25/07/2013 01/08/2013 08/08/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users DMF advised that he was awaiting the cost info. DMF agreed to chase this up. DH confirmed that load/weight. GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.	

## COMPENSATION EVENTS

### NONE

#### Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Dieselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Dieselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013. (25/08/2013) **Noted that DP had met with IP and AGS to progress. Another meeting had been scheduled on 15/08 to progress (08/08/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the

commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) **It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).(01/08/2013) **DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013)**
- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) **Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) **GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013)**
- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overclad. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) **DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013)**

- 7) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review 0 looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) **It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013)**
- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) **DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013)**
- 9) Delay to BMCL Fire road drainage connection as Maternity foul onto Hardgate Road is backing up. AK had contacted the Scottish Water rep to resolve. AS advised that if BMCL were not getting a response that he would be happy to assist. DH noted that although it was a Project problem it could become a public health problem if not dealt with in a timeous manner. (25/07/2013 AK advised that he was awaiting SW to visit to deal with the issue. BMCL are checking the manholes regularly. AK may advise AGS to carry out the Board works whilst the SW drainage issue is being resolved. BMCL will have 1 more attempt to push the SW drainage works and if they don't get a positive response then will escalate this. (08/08/2013) **AK advised that SW had been out the previous night jetting with 2 tankers (thought this was the 2<sup>nd</sup> time they had been out). BMCL will check the manholes to see if any improvement. BMCL will need to check out the size of the drain as a SW operative had suggested it may be a 450mm drain. AK was liaising with AGS re progressing the Board works. (08/08/2013)**
- 10) SGH Retained Estate Demolitions – PM noted that he would review the drawing provided by AK and add in dates, etc. PM was working on the basis of the BMCL Stage 3a works commencing August 2015. (08/08/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 222

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 21/08/2013:

<div style="float: right; text-align: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.</p> <p>05/04/2012 GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>12/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>31/05/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>27/06/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>05/07/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>02/08/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>16/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>23/08/12 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>30/08/2012 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>06/09/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>13/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>20/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>18/10/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>25/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>15/11/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>22/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected.</p> <p>29/11/2012 Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC.</p> <p>06/12/2012 Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	---

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

				<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>04/04/2013 Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>18/04/2013 DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>25/04/2013 DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>02/05/2013 JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>16/05/2013 GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>24/05/2013 JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>06/06/2013 Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>13/06/2013 DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>20/06/2013 AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>04/07/2103 It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>11/07/2013 Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>18/07/2013 WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p> <p>25/07/2013 DS advised that he had received the WSP summary report. DS enquired if the NHS wanted to send this to URS before WSP submit it to GCC. AS requested that the report be provided to NHS in the first instance. AS noted that Allee had met with GCC who had indicated that there is now no requirement to do the monitoring. AS advised that the NHS needed to understand if there is any other remediation on site as RC Calderwood needs risk update. DH advised that there was still the NCH Park and Stage 3a works. DS noted that this draws a line to the current monitoring and anything else would be dealt with as and when. JB noted that a negative CE would need to be issued. DR reported that as the billing was monthly there</p>
--	--	--	--	--

			01/08/2013	was no need to pay. DS noted that need to take cognizance re BMCL protecting the project re downstream pollution claims. CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued.	
			08/08/2013	DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring.	
			15/08/2013	Response awaited from GCC	
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			12/04/2012	D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.	
			22/11/12	DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.	
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.	
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.	
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]	
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.	
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.	
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS	

			<p>24/01/2013</p> <p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p> <p>21/02/2013</p> <p>28/02/2013</p> <p>07/03/2013</p>	<p>noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.</p> <p>DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.</p> <p>DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.</p> <p>DH advised that items are being addressed.</p> <p>DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.</p> <p>Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p> <p>Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p> <p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p>	
--	--	--	---	---	--

			<p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>14/03/2013 JB noted that BMCL will provide samples of the atrium panel as requested by the NHS. DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet. Ceiling heights – DH continuing to liaise with GW</p> <p>04/04/2013 DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc. DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>11/04/2013 DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p> <p>18/04/2013 DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>25/04/2013 DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p> <p>02/05/2013 DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.</p> <p>16/05/2013 DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.</p> <p>24/05/2013 DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.</p> <p>06/06/2013 DH advised that:</p>	
--	--	--	---	--

			<p>13/06/2013</p> <p>20/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p>	<ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul> <p>DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.</p> <p>PM advised that the workflow report from the 18<sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.</p> <p>DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.</p> <p>DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.</p> <p>PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p> <p>DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vaccum plant information is awaited from MEL/HPI</p> <p>Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays</p> <p>DH reported on the items noted to be outstanding on the RDD tracker</p> <p>Roof level lighting protection and metal composite panel cladding new additions to RDD</p> <p>2 JTCs returned on Wednesday</p> <p>2 JTCs under review</p> <p>Group 1 – catheter cupboard omitted and PMI is drafted</p> <p>Minor equipment – Electrical, pharmacy cabinet and renal water are WIP</p> <p>Audiometry acoustic report is with users for feedback</p> <p>Medical Air and Vacuum plant info required from BMCL</p>	
--	--	--	---	--	--

			25/07/2013	<p>Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked</p> <p>DH provided the following update:</p> <p>Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments.</p> <p>Desk locations – reprints were to be requested</p> <p>JTC – wip and would be returned asap</p> <p>Audiometry – comments to be provided back by the end of the week.</p>	
			01/08/2013	<p>DH noted that he had reviewed the tracker the previous night and provided the following update:</p> <p>The first few dates appeared to be incorrect</p> <p>Lead lining drawings returned 29/07/2013</p> <p>MRI Breakout – to be returned later that day</p> <p>Bedhead trunking – to be returned later that day</p> <p>JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided)</p> <p>Minor Equipment schedule – WIP</p> <p>Medical Air Vacuum – awaiting info from DP (schematics)</p> <p>Renal water – with DP</p>	
			08/08/2013	<p>Desk locations – reprints awaited.</p> <p>Internal finishes – SF trying to locate these – may request reprints.</p> <p>Interventional – information returned</p> <p>Pharmacy – BMCL instructed to fit the out cabinet</p> <p>Minor Equipment – WIP</p> <p>Schedule of low voltage – information returned</p> <p>Metal composite cladding – hard copy never received as was wrong rev no</p> <p>Medical Air and Vacuum plant – awaiting schematic</p> <p>Rack – wip to conclude</p> <p>Safe – instructed PMI to confirm is to be a group 3 item</p> <p>1<sup>st</sup> floor plans – desk locations – with FW</p> <p>Renal water – returned as a B status – response from Elgar expected 08/08/2013</p> <p>GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p>	
			15/08/2013	<p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
18924	NHS EW 048	- CHILDREN'S HOSPITAL ROOM REH-037 MOULD ROOM	22/07/2013  01/08/2013  08/08/2013	<p>The Board advise that in reviewing door types in the NCH Rehab area, it has been found that the room usage and equipment contents of the Mould Room (REH-037) appear to have been overlooked when identifying fire hazard rooms. ADB code OVE1000 has 650 watt heat emitters and the process involves heating plastics. BMCE to review room categorisation and confirm requirements for both fire enclosure and services environment.</p> <p>DS advised that BMCL were looking at this and identifying if there is anything in design terms which needed to change however needed to know the equipment spec. DH agreed to provide the equipment spec</p> <p>DS advised that the drawings are being updated to reflect change – will be made a fire hazard room. BMCL are awaiting the oven info to conclude. DH suggested that the oven info had been provided and would check this out and re-provide.</p> <p>DH advised that he confirmation that the REH037 to be classified as a Fire Hazard room. JB advised that there was no impact to programme, design or defined cost. It was agreed this item could be closed.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 21/08/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

			22/02/2013 06/03/2013 04/04/2013 11/04/2013 17/04/2013 25/04/2013 02/05/2013  16/05/2013 24/05/2013 06/06/2013 13/06/2013 20/06/2013 27/06/2013 04/07/2013 11/07/2013 18/07/2013 25/07/2013 01/08/2013 08/08/2013 15/08/2013	<p>AK reported end of March was the target date – AK will provide a firm date once known</p> <p>AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.</p> <p>DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks</p> <p>It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29<sup>th</sup> April 2013.</p> <p>DP noted that BMCL were awaiting on Siemens.</p> <p>It was noted that contractors are due in on Monday for final commissioning</p> <p>DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.</p> <p>DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.</p> <p>DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.</p> <p>AS noted that he had been advised that the engineer would be on site on the 17<sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.</p> <p>DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17<sup>th</sup> June 2013.</p> <p>DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.</p> <p>DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day</p> <p>PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.</p> <p>Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed</p> <p>DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion</p> <p>DP advised that the Siemens rep was due later that day</p> <p>DP to provide update by 05/08/2013. PM advised that he would get AGS to check out if operational.</p> <p>DMF noted that both Siemens and Schneider had visited the site. The issue was a controls issue. Reps will revisit that day to install new software. DH provided an overview of the process for installing the new software (delete, install ghost software, reload new software).</p> <p><b>DP advised that the filtration unit was now in use therefore this EW could be closed</b></p>	
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	

			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.
			21/02/2013	Progressing on programme
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.
			14/03/2013	AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported. AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.

			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.	
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.	
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement	
			18/07/2013	Instruction given to Mercury today and programme will be issued	
			25/07/2013	DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.	
			01/08/2013	PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013	
			08/08/2013	Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.	
			15/08/2013	DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.	
1952	PMI 214	YCF additions	10/05/2013	<p>Please find below (and attached) information in relation to the requirements for the Yorkhill Children's Foundation "added value" works</p> <p>I would be grateful if you could include these requests into the building and advise on the costs in order that the Board can bill the YCF accordingly</p> <ol style="list-style-type: none"> <li>1. Sky ceilings to be added in the following rooms: <ul style="list-style-type: none"> <li>• Child protection room CPS.004</li> <li>• ED majors staff base EMC.61</li> <li>• 2 dental rooms OPD.082 &amp; OPD.139</li> <li>• Plaster room OPD.073</li> <li>• Phlebotomy room OPD.193</li> <li>• Nuclear Medicine camera room RMN.033</li> <li>• Nuclear Medicine injection room RMN.027</li> <li>• Theatres holding areas THE.032, THE.033 &amp; THE.034</li> <li>• MRI rooms RCG.064 &amp; RCF.024</li> </ul> </li> <li>2. Sky box in <ul style="list-style-type: none"> <li>• Radiotherapy room in Schiehallion SCH.081</li> </ul> </li> <li>3. Pattressing on wall in wait area of Observation ward OBS.054</li> <li>4. Information on Snoozelen rooms DCFP. 050 &amp; GW3.050</li> <li>5. Information on Family Centre room ENT.028- in particular the glass front that is required</li> </ol>	
			16/05/2013	GW advised that BMCL were currently pricing the works up. PM confirmed that this is a pricing exercise only, at this point.	
			24/05/2013	GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.	
			06/06/2013	AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.	
			13/06/2013	GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.	

			20/06/2013	AS agreed to liaise with MMacleod. GW suggested that it would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.	
			27/06/2013	AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.	
			04/07/2013	AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.	
			11/07/2013	YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward	
			18/07/2013	PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2	
			25/07/2013	PM noted that he was meeting with James Bailey later that day. PM needed to understand the final quote and the payment mechanism. A PMI would be issued in due course to confirm the way forward re YCF and YCF 2.	
			01/08/2013	PM advised that he had met with James Bailey. PM had emailed YCF CE and was awaiting confirmation of approval to proceed re proposals and payment mechanism. GW noted that confirmation was needed asap as would become critical soon. It was noted that BCM were not progressing anything re YCF2 at this time. PM agreed to email MMacleod requesting an update.	
			08/08/2013	PM advised the he was awaiting clarity from YCF re payment mechanism. JB enquired if there was anything stopping BMCL getting the YCF1 CE. PM noted that there was nothing stopping BMCL getting the CE for YCF1. GW to liaise with SF.	
			15/08/2013	PM noted that confirmation was still awaited from SCardle. PM will take a view w/c 19/08 as to whether to split the YCF works into 2 CEs. PM requested that BMCL provide the drop dead date for the confirmation of the YCF2 works.	
1978	PMI 217	MTHW System - Site ring	22/05/2013	The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.	
			24/05/2013	The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc	
			06/06/2013	DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.	
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK	

			<p>20/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>25/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p> <p>15/08/2013</p>	<p>advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p> <p>AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.</p> <p>DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p> <p>AS/DH and AK will walkround the proposed area on Friday 19th July and report back</p> <p>AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p>DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</p> <p>DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&amp;E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.</p> <p>AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.</p>	
2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p>	

			04/07/2013	PM advised that he had received the quote. AS noted that DR would need to cross check the quote.	
			11/07/2013	DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued	
			18/07/2013	DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward	
			01/08/2013	PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.	
			08/08/2013	GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.	
			15/08/2013	DP advised that he was awaiting feedback from Mercury.	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013	
			04/07/2013	GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.	
			11/07/2013	Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL	
			17/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	

			25/07/2013 01/08/2013  08/08/2013  15/08/2013	PM advised that he would review this on site at the first opportunity PM noted that he was still to be asked to review the longer spout taps on site and he would liaise with P Norton. DS advised that he had emailed PM further to discussion with CGrindlay. The proposals would be provided for review to PM asap. A few alternatives had been identified. Noted that alternatives include mixer taps and the NHS would need to check if mixer taps were acceptable. PM advised that an alternative tap had been selected from within the BMCL cost range. BMCL were to provide a sample mock-up for review. As the tap has a longer spout then the Board's Infection Control will put in place a management process for using and maintaining these taps.	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013  25/07/2013 01/08/2013 08/08/2013  15/08/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)  DH noted that there had been a query re additional heat load and he suggested that DWilson should discuss this with FCarnie. Noted that costs have to be provided. Position of cabinet to be confirmed however understood that the room can accommodate the cabinet. Awaiting finalization of cabinets – have a de-installation cost as 1 already fitted in the adults. FCarnie is identifying what to do with the 2 cabinets to be replaced. DH will arrange for the cabinets to be uplifted. DR noted that confirmation needed to be provided to BMCL asap. DH suggested that the cabinets could be relocated to the NCH Comms room in place of those which were still to be delivered to site and the NHS would confirm where to re-direct 2 of the still to be delivered cabinets. DH to provide an update on return from leave.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013  25/07/2013 01/08/2013 08/08/2013  15/08/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users DMF advised that he was awaiting the cost info. DMF agreed to chase this up. DH confirmed that load/weight. GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height. DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have provided an RFI to BMCL requesting the exact requirements. There is a concern regarding the load.	
2163	PMI 245	A&C Hospitals - Equipment Codes SAF005, MSC1015, MSC1017	14/08/2013	The above items are to be transferred from Equipment Group 1 to Equipment Group 3.  The above equipment is to be omitted from the FF&E contract with JTC as per the attached schedule. In the case of SAF005 this was previously incorporated in the equipment list attached to CEN046. The other changes will be incorporated into the next update of the equipment list.	

2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	<p>The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol>

### COMPENSATION EVENTS

103466	CE 049	- Children's Hospital Yorkhill Children's Foundation Enhancement Works	21/08/2013	The Board confirm acceptance of the works specified in PMI 163 and 214 and instruct Brookfield Multiplex to proceed and incorporate YCF1 and YCF2 works into the project. Refer attachment for confirmation of YCF2 scope of works and updated cost. Please provide spec for the supply of original artwork for non standard sky ceilings to meet your programme.	Costs uploaded and accepted 2/08/2013
--------	--------	--	------------	---	---------------------------------------

## Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Dieselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Dieselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013. (25/08/2013) Noted that DP had met with IP and AGS to progress. Another meeting had been scheduled on 15/08 to progress (08/08/2013) **DP advised that a meeting with IP & AGS had been scheduled for later that day to progress (15/08/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by

cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed off the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) **DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).(01/08/2013) **DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013)**

- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) **Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) **DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legal are currently reviewing the legal info from AOS (15/08/2013)**
- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) **DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013)**
- 7) Radius kerb – JMurray/RNethery - DS will get this progressed (18/07/2013) DS advised that this was under review looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) **It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013) It was noted that a meeting with WSP had taken place on the 13<sup>th</sup> August and more detailed info re how the buses dock against the kerb is awaited from WSP. (15/08/2013)**
- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) **DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013)**
- 9) Delay to BMCL Fire road drainage connection as Maternity foul onto Hardgate Road is backing up. AK had contacted the Scottish Water rep to resolve. AS advised that if BMCL were not getting a response that he would be happy to assist. DH noted that although it was a Project problem it could become a public health problem if not dealt with in a timely manner. (25/07/2013) AK advised that he was awaiting SW to visit to deal with the issue. BMCL are checking the manholes regularly. AK may advise AGS to carry out the Board works whilst the SW drainage issue is being resolved. BMCL will have 1 more attempt to push the SW drainage works and if they don't get a positive response then will escalate this. (08/08/2013) AK advised that SW had been out the previous night jetting with 2 tankers (thought this was the 2<sup>nd</sup> time they had been out). BMCL will check the manholes to see if any improvement. BMCL will need to check out the size of the drain as a SW operative had suggested it may be a 450mm drain. AK was liaising with AGS re progressing the Board works. (08/08/2013) **AK advised that SW had been back out at the issue the previous day. AK been advised that it is a 450mm drain. AK would provide a sketch of what it is proposed to do. Meanwhile, AGS was commencing the tank removal works. (15/08/2013)**

- 10) SGH Retained Estate Demolitions – PM noted that he would review the drawing provided by AK and add in dates, etc. PM was working on the basis of the BMCL Stage 3a works commencing August 2015. (08/08/2013) PM noted that he had completed a series of drawings. An internal NHS review of the drawings would be commenced and thereafter would be provided to BMCL. PM anticipated that BMCL may be asked to take away OPD and Therapies buildings with the surgical demolitions. The Management Building and associated conglomerate of buildings would be a single demo package. The information will need to be presented to the ASSB in early September for approval.
- 11) Neuro cladding – noted that BMCL had taken the cladding package off but had been unable to carry-out an evasive survey as there appeared to be asbestos. DMF advised that BMCL would raise an EW regarding this and would provide pictures of the recent survey to the NHS. AK noted that PMcGuinness was suggesting that the full bay may need to be taken out, not just the single room. PM advised that it was be difficult to provide a full bay as all the rooms were in use. AK noted that BMCL could assist an Asbestos Surveyor with a cherry picker. (15/08/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 246

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 28/08/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>11/08/2011</p> <p>22/09/2011</p> <p>06/10/2011</p> <p>10/11/2011</p> <p>01/12/2011</p> <p>08/12/2011</p> <p>26/01/2012</p> <p>09/02/2012</p> <p>22/02/2012</p> <p>01/03/2012</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that an SI would be undertaken when area becomes available.</p> <p>Agreed that extent of hotspot will be investigated once Biochemistry demolished</p> <p>On-going</p> <p>BMCL requested to provide confirmation of reprogramming of Biochemistry</p> <p>AK will respond formally by email to AS</p> <p>AK has responded formally to AS re reprogramming of Biochemistry. AS confirmed acceptance of the 3 months.</p> <p>JB enquired if AK had spoken to PM re intrusive survey. PM advised that he had a brief discussion. JB enquired who would be instructing the survey works as BMCL cannot do whilst the building is in NHS possession. DH requested a backstop date from BMCL so can work programme back and identify when surveys required to be done. AS reported that the BMCL date was 8<sup>th</sup> October 2012. PM advised that it was jointly agreed to prepare a programme. JB advised he would confirm the BMCL date. PM advised that the NHS would get the services works tendered. It was agreed that it was the Board's responsibility to provide the survey information.</p> <p>JB reported that the date for handover was understood and that BMCL had been advised that H McDerment had commissioned the survey works.</p> <p>PM advised that information would be provided when available (Biochem)</p> <p>AS enquired whether the temp suds tank would be eventually used elsewhere on the site. GW advised that the suds tank was temp and sacrificial. AS enquired if it could be redesigned for use in the future and GW confirmed it could not. DH enquired if there was potential to reduce the size of the pond and combine</p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p>

A51679245

			<p>08/03/2012 with a tank. GW advised that he had been advised that it could not. DP advised that he would get DS to organize a meeting to discuss with WSP on return from leave re mitigating permanent suds.</p> <p>05/04/2012 GW advised that it is assumed that all temp suds pond crates will be trashed however Dunnes will salvage and reuse crates where possible.</p> <p>12/04/2012 BMCL have instructed Dunnes to produce method statement.</p> <p>31/05/2012 A Seabourne confirmed that the Board will trace the gas pipe and will then discuss possibility of leaving pipe in current location with BMCL.</p> <p>27/06/2012 DS advised that final test can only be carried out once Biochemistry has been demolished.</p> <p>05/07/2012 Demolition access from 22<sup>nd</sup> August 2012</p> <p>02/08/2012 GW forwarded information from WSP on dewatering costs. Some discussion on the reason for the continuing costs and this requires to be resolved and agreed. AS will review information and get back to GW</p> <p>16/08/2012 Biochemistry site investigation works will be undertaken.</p> <p>23/08/12 BMCL confirmed that instruction has been issued to Hunter Demolition on basis of 28<sup>th</sup> August 2012 NHS date – NHS to confirm 28<sup>th</sup> August is ok</p> <p>30/08/2012 DS noted delineation has commenced – AS agreed to wrap in within the Bio-chem costs</p> <p>06/09/2012 BMCL to provide info to NHS if any decontamination found. Noted – areas not already touched – car park, children's park.</p> <p>13/09/2012 Demolition of biochemistry ongoing and expected to be complete by end of this week. BMCL will advise if any contamination identified. Results awaited re delineation.</p> <p>20/09/2012 Demolition works substantially complete – no issues raised thus far</p> <p>18/10/2012 DS advised that he had provided an update via email to AS. The delineation had been carried out. Further spot of decontamination identified in preliminary report. Further clarification/investigation has been requested. AKeeley and PMcGuinness have been advised of potential issue and will identify the way to do delineation. It is being suggested that further investigation may need to wait until surgical substation demolished. 2 potential issues identified a) hydrocarbons and b) asbestos. AS requested that wrap up CE be discussed with DR.</p> <p>25/10/2012 Lab results for biochemistry samples awaited. 2 CEs to be raised –costs to be provided by GW. GW to confirm wording of remedial works re hotspot delineation.</p> <p>15/11/2012 DS advised that he had received a further update and was seeking confirmation of the asbestos results. DS will provide info to NHS asap. AS enquired if it was still the intention that the SUDS liner would be put in. DS advised that there was a need to revisit requirement for putting in liner dependent on the results.</p> <p>22/11/2012 DS advised that latest report received which indicates increases in August to September however relatively low in magnitude – trend as expected.</p> <p>29/11/2012 Hotspots – asbestos fibres – BMCL considering best way to formulate an argument to close out asbestos issue. DS will provide a copy of the argument to NHS in advance of submitting to GCC.</p> <p>06/12/2012 Ash – appears to extend all the way round – DS will discuss with AS how much further round to delineate. DS will discuss with AK and WSP the way forward.</p> <p>DS noted he was waiting for a report on the extent of work. AS agreed that SF will complete a compensation event for £5K</p> <p>DS advised that he had received the latest response from WSP re current status. DS will liaise with WSP re asbestos info and amending the report so that options can be left open. DS noted that this was a stage 3A issue.</p> <p>DS advised that a revised report is expected that day. He had spoken to WSP who were going to provide</p>
--	--	--	---

			13/12/2012	an estimate of what needs to be dug out for AS by 07/12/2012 DP confirmed that status update being scheduled for the new year re all ground issues. AS suggested that the WSP report was slightly convoluted so he wanted to get an idea of the contamination and remedial works and worst case scenario so that the NHS can have a greater understanding of the risks. The report would have been easier to read if it had been in chronological order. Rather than provide comments on the report it was felt that a Q&A session would be beneficial. DS acknowledged that the report was difficult to read.
			20/12/2012	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had asked Anna Daley to attend this meeting. It was proposed that a plan of the site be put on the wall to assist the discussion.
			10/1/2013	DS confirmed that a meeting had been scheduled for 15/01/2013. AS advised that he had provided an expectation for the meeting. DS advised he had received the communication regarding AS expectation and understood.
			17/01/2013	DS noted that meeting the WSP held and presentation from meeting emailed to AS. The most recent results were awaited in a format which can be opened and once received DS would forward to AS. AS suggested that there was a lack of co-ordination between the works and WSP sampling and AS had asked URS for a comment. DH noted that the presentation suggested that a liner was required. AS advised that he needed URS to confirm their view regarding the need for a liner.
			24/01/2013	DS advised that he understood that AS has all the information and has sent to URS for a view on the WSP report/info. AS advised that he was expecting URS to provide a view of what needs to be done re ground contamination and whether a liner is required.
			31/01/2013	DS advised that BMCL were awaiting an update from URS. DH advised that he had chased URS for a response.
			07/02/2013	DH advised that a response from URS had been received and was under review by AS.
			14/02/2013	DH advised that he had provided a draft response for AS to review
			21/02/2013	DH responded on behalf of the Board to DS. GW noted that he was still anticipating a CE for extension of ¼ monitoring and hotspot monitoring.
			28/02/2013	GW advised that BMCL have carried out a review and a CE for the continued monitoring from May 12 to March 2013 is outstanding however a PMI has been provided. GW noted that the delineation CE was for the WSP works only and did not include for the Dunne's works i.e. digging holes. AS noted that a meeting with URS, WSP, BMCL and NHS would need to be arrange once the Feb report has been provided. DS advised that he had received the February report however there appeared to be a further spike which could be the result of a problem with the borehole as DS thought the results had been compromised. BMCL were looking to install a further borehole and once in and settled would take a result from this new borehole. DS noted that he was unsure what type of review GCC were carrying out on the borehole results. AS suggested that a further month's results should be obtained prior to having a joint meeting. DS advised that it would be good to see the results flat-lining before submitting to GCC. It was suggested that a joint meeting should be held mid April. AK advised that he proposed to install the new borehole in an area which was better protected within the same vicinity as the compromised borehole. BMCL will make a proposal to WSP regarding the location of the new borehole.
			07/03/2013	AK advised that he was awaiting a date from WSP re borehole rig coming on site. Confirmation awaited from WSP that current borehole is redundant and new location is suitable. Revised position is in the corner of the biochem site.
			14/03/2013	JB noted that BMCL had received a request for the order of costs for Stage 3A deferment.

				<p>JB noted that the cost for the attendance of Dunne to re-do the trench needed a CE. AS noted that this should form part of the wrap-up CE. AK noted that a rig to install the new bore hole was expected to be on site on 18<sup>th</sup> March 2013. AS advised that a meeting to discuss the borehole results was to be arranged with AS, PM, WSP and URS.</p> <p>GW noted that WSP would need to be instructed to carry out the monitoring for the additional month as monitoring due to stop March 2013.</p> <p>04/04/2013 Awaiting results from replacement borehole. DS had discussed spike with WSP and how to explain spike whilst retaining the results as a flatline i.e. broken borehole so spike result inconclusive. It was anticipated that the results from the Labs for the most recent test would be end of April.</p> <p>18/04/2013 DS advised that he had received a report from Matthew (WSP). In summary, the borehole results had dropped, diminished concentrates identified – DS clarifying the response. Quarterly monitoring needs to take place however the timing of the quarterly needs to be agreed. DS suggested the he could request that WSP write to GCC to advise that monitoring is reverting back to quarterly. AS agreed that WSP should write to GCC advising that results are consistent so reverting back to quarterly. DS raised concern that the piling may impact on future results.</p> <p>25/04/2013 DS has forwarded WSP report to AS and is awaiting his response to this</p> <p>02/05/2013 JB noted that GW has an environmental proposal document from WSP. GW advised that it was proposed to carry on the monthly monitoring to June. DH advised that WSP propose carrying out additional sampling in April and May and if everything ok then saying to GCC in June that it is proposed to discontinue the sampling. GW was requested to provide the cost for the additional monitoring (2 extra months)</p> <p>16/05/2013 GW to provide costs for April &amp; May testing. Next sampling expected w/c 20/05/2013</p> <p>24/05/2013 JB noted that BMCL were to provide the costs for the April and May water sampling to the NHS asap. AS noted that a wrap up meeting should be organized for early June 2013.</p> <p>06/06/2013 Noted that CE to be raised to BMCL to cover additional 2 months monitoring.</p> <p>13/06/2013 DS advised he was waiting on a date from WSP to do the wrap up before going to GCC. The results are expected soon. DS suggested discussing the costs with WSP. AS noted that the CE for the additional 2 months monitoring would be limited to the value of the previous compensation event.</p> <p>20/06/2013 AS noted that if GCC agree to the stopping of the ongoing monitoring then there will be a saving and AS proposed that the outstanding costs be wrapped up into 1 CE. It was agreed that a wrap up meeting should be scheduled between the 8<sup>th</sup> – 11<sup>th</sup> July 2013.</p> <p>04/07/2013 It was noted that the wrap-up meeting had been scheduled for 11<sup>th</sup> July 2013. AS advised that that the additional monitoring CE should be raised for BMCL (circa £7k exc of BMCL OHP and VAT)</p> <p>11/07/2013 Discussion scheduled for 2pm today – update at next meeting – CE to be raised by SF on return from A/L</p> <p>18/07/2013 WSP to prepare summary report recommending termination of monitoring for review prior to submission to Glasgow City Council – item to remain open until concluded</p> <p>25/07/2013 DS advised that he had received the WSP summary report. DS enquired if the NHS wanted to send this to URS before WSP submit it to GCC. AS requested that the report be provided to NHS in the first instance. AS noted that Allee had met with GCC who had indicated that there is now no requirement to do the monitoring. AS advised that the NHS needed to understand if there is any other remediation on site as RC Calderwood needs risk update. DH advised that there was still the NCH Park and Stage 3a works. DS noted that this draws a line to the current monitoring and anything else would be dealt with as and when. JB noted that a negative CE would need to be issued. DR reported that as the billing was monthly there</p>
--	--	--	--	--

			<p>01/08/2013</p> <p>08/08/2013</p> <p>15/08/2013</p> <p>22/08/2013</p>	<p>was no need to pay. DS noted that need to take cognizance re BMCL protecting the project re downstream pollution claims.</p> <p>CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued.</p> <p>DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring.</p> <p>Response awaited from GCC</p> <p>DS noted that BMCL would continue to push GCC for a response</p>	
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p> <p>22/11/12</p> <p>29/11/2012</p> <p>06/12/2012</p> <p>13/12/2012</p> <p>20/12/2012</p> <p>10/01/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding.</p> <p>DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.</p> <p>DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.</p> <p>DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.</p> <p>DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&amp;B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review.</p> <p>GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected. DH suggested that the only items outstanding was the 1<sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]</p> <p>DH advised that he would pursue the return of the basement and restaurant drawings.</p> <p>DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.</p>	

			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.	
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.	
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.	
			07/02/2013	DH advised that items are being addressed.	
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.	
			21/02/2013	Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week	
			28/02/2013	Bedheads – a further meeting has been organised for next week – feedback thereafter DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues. NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS. Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet. Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.	
			07/03/213	NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of	

			<p>the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>14/03/2013 JB noted that BMCL will provide samples of the atrium panel as requested by the NHS. DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet. Ceiling heights – DH continuing to liaise with GW</p> <p>04/04/2013 DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc. DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>11/04/2013 DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p> <p>18/04/2013 DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>25/04/2013 DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p> <p>02/05/2013 DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.</p> <p>16/05/2013 DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.</p> <p>24/05/2013 DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.</p>	
--	--	--	---	--

			06/06/2013	<p>DH advised that:</p> <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>	
			13/06/2013	<p>DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.</p>	
			20/06/2013	<p>PM advised that the workflow report from the 18<sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.</p>	
			27/06/2013	<p>DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.</p>	
			04/07/2013	<p>DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.</p> <p>PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p>	
			11/07/2013	<p>DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vaccum plant information is awaited from MEL/HPI</p> <p>Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays</p>	
			18/07/2013	<p>DH reported on the items noted to be outstanding on the RDD tracker</p> <p>Roof level lighting protection and metal composite panel cladding new additions to RDD</p> <p>2 JTCs returned on Wednesday</p> <p>2 JTCs under review</p> <p>Group 1 – catheter cupboard omitted and PMI is drafted</p> <p>Minor equipment – Electrical, pharmacy cabinet and renal water are WIP</p> <p>Audiometry acoustic report is with users for feedback</p>	

			<p>25/07/2013</p> <p>Medical Air and Vacuum plant info required from BMCL Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked DH provided the following update: Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments. Desk locations – reprints were to be requested JTC – wip and would be returned asap</p> <p>01/08/2013</p> <p>Audiometry – comments to be provided back by the end of the week. DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP</p> <p>08/08/2013</p> <p>Desk locations – reprints awaited. Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1st floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p> <p>15/08/2013</p> <p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>2/08/2013</p> <p>PM noted provided an update re the RDD Workflow report: Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL Desk locations – WIP by FW and he would try to push this on Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p>

SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 28/08/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1223	PMI 178	New Laboratory Block - Membrane Filtration Unit	23/07/2012 02/08/2012 22/08/2012 30/08/2012 06/09/2012 13/09/2012 20/09/2012 04/10/2012 11/10/2012 18/10/2012 25/10/2012 08/11/2012 22/11/2012 29/11/2012 10/01/2013 17/01/2013 24/01/2013	<p>The Board requests that BMCL install a membrane filtration unit for town water to be run and cycled with the existing Memcor unit. Please provide drawn proposals for layout prior to install BMCL requested to confirm that spares had been fitted. BMCL to provide timescale for install of additional filtration unit.</p> <p>Proposal being put together and drawing plus detail to be forwarded to PM/HMcD for review final sign off will be IPowrie. AS ok'd order before check as delivery time was around 5-6 weeks but noted to raise the over capacity issue with the supplier and possibly down size</p> <p>AS advised current filtration compressor is too big. DP and AS have discussed. Mercury have been told that the kit is bought as a unit – if not right then needs to be corrected. JB suggested that the report does not accord with what is on site. AS – critical that the right compressor is purchased. DP advised that manufacturer verbally confirmed that the compressor is the correct size however formal written response awaited. DP had challenged the manufacturer re compressor sizing. JB noted that formal report re failure of 1<sup>st</sup> compressor is awaited. DP advised that delivery of new plant to site was WIP and he would chase on later that day.</p> <p>DP advised that he had got a written response from Memcor saying that the compressor was sized correctly. BMCL would now give proposal for further unit based on the current system.</p> <p>DP advised that proposal being prepared/finalized. AS asked DP to liaise with H McDerment. DP noted that it was currently not proposed to use Memcor on the A&amp;C.</p> <p>DP advised that he had received information from Memcor. DP had reviewed and submitted some queries back. Response to queries expected from Memcor 05/10/2012. DP would liaise with H McDerment/Estates thereafter.</p> <p>IP and HMc to review location of unit.</p> <p>JB noted that confirmation of delivery date awaited. AS advised that cost breakdown awaited.</p> <p>DP noted that BMCL would meet with HMc and Estates Reps to review what works needed to be done and the programme for the works.</p> <p>DP advised that delivery date for unit is now mid January. Works and programme discussed with Estates – all parties agreed to programme and works.</p> <p>Installation confirmed for 28<sup>th</sup> January 2013</p> <p>It was agreed to leave this EW on the sheet until the filtration unit has been installed – no change to the install date of 28/01/2013.</p> <p>DP advised that this was WIP – no issues to be raised at this time.</p> <p>AK noted this was WIP and he had a programme for the works (due to commence first week February 2013.)</p> <p>DP confirmed that the new date for the filtration unit installation is 22<sup>nd</sup> March 2013. AS confirmed that the spare compressor had been returned. JB suggested that the NHS arrange for the compressor to come back.</p>	

		22/02/2013	AK reported end of March was the target date – AK will provide a firm date once known
		06/03/2013	AK advised that DW was preparing a programme of the sequence of the works relative to the Memcor works. The programme would be provided to the NHS Team by cop 08/03/2013.
		04/04/2013	DP advised that the Unit is in position and commissioning due to commence w/c 16/04/2013. Expected that unit will become operational in circa 2 weeks
		11/04/2013	It was noted that the physical works were to be complete by cop 19/04/2013. BMCL were trying to organise for the Commissioning Engineer to attend site asap however Commissioning Engineer currently advising that he has no availability until 29 <sup>th</sup> April 2013.
		17/04/2013	DP noted that BMCL were awaiting on Siemens.
		25/04/2013	It was noted that contractors are due in on Monday for final commissioning
		02/05/2013	DP advised that the engineer had arrived on site however as he did not have the correct panel (panel needs to start the signal). DP was awaiting a timescale for when the engineer will return to resolve.
		16/05/2013	DP advised that he was awaiting confirmation of when the engineer will visit the site. AS advised that he would be happy to contact Siemens to push this on. DP advised that he had asked Mercury to check whether they had paid the final bill.
		24/05/2013	DP advised that he had been advised that Siemens were having an internal meeting and he had received nothing from Siemens. AS advised that he had contacted Siemens and he was told that the current request had never previously been asked for.
		06/06/2013	AS noted that he had been advised that the engineer would be on site on the 17 <sup>th</sup> June. DP advised that BMCL were awaiting confirmation of when the engineer will be on site. DP noted that the unit has a minor leak on it and he had told Mercury to get this sorted.
		13/06/2013	DP advised that the leak had been attended to – it was the intention to get Siemens to replace any parts as necessary. Siemens due to commence on site on 17 <sup>th</sup> June 2013.
		20/06/2013	DP noted that Siemens was on site from today (20/06/2013) and it was anticipated that the works should be completed over the weekend.
		27/06/2013	DP noted that Siemens had completed their works and Schneider were currently on site to finish the control logic and it was anticipated that it would be operational by later that day
		04/07/2013	PM advised that he understood that the unit had been commissioned however there had been an issue re condensation drip. AK advised that an update would be provided asap.
		11/07/2013	Clarity on whether commissioned – Original issue of drip from casing has been resolved. AS will clarify with AGS if all completed
		18/07/2013	DP reported a malfunction after start and commissioning. A service engineer to visit to remedy. No timescale given for completion
		25/07/2013	DP advised that the Siemens rep was due later that day
		01/08/2013	DP to provide update by 05/08/2013. PM advised that he would get AGS to check out if operational.
		08/08/2013	DMF noted that both Siemens and Schneider had visited the site. The issue was a controls issue. Reps will revisit that day to install new software. DH provided an overview of the process for installing the new software (delete, install ghost software, reload new software).
		15/08/2013	DP advised that the filtration unit was now in use therefore this EW could be closed
		22/08/2013	PM to confirm with AGSmith as thought unit not in full operation as yet.

1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.
			21/02/2013	Progressing on programme
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.
				AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that

			<p>20/06/2013 27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013 25/07/2013</p> <p>01/08/2013 08/08/2013</p> <p>15/08/2013</p>	<p>they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>Agreed way forward – BMCL to plan and implement</p> <p>Instruction given to Mercury today and programme will be issued</p> <p>DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p>	
1952	PMI 214	YCF additions	<p>10/05/2013</p> <p>16/05/2013</p> <p>24/05/2013</p>	<p>Please find below (and attached) information in relation to the requirements for the Yorkhill Children's Foundation "added value" works</p> <p>I would be grateful if you could include these requests into the building and advise on the costs in order that the Board can bill the YCF accordingly</p> <ol style="list-style-type: none"> <li>1. Sky ceilings to be added in the following rooms: <ul style="list-style-type: none"> <li>• Child protection room CPS.004</li> <li>• ED majors staff base EMC.61</li> <li>• 2 dental rooms OPD.082 &amp; OPD.139</li> <li>• Plaster room OPD.073</li> <li>• Phlebotomy room OPD.193</li> <li>• Nuclear Medicine camera room RMN.033</li> <li>• Nuclear Medicine injection room RMN.027</li> <li>• Theatres holding areas THE.032, THE.033 &amp; THE.034</li> <li>• MRI rooms RCG.064 &amp; RCF.024</li> </ul> </li> <li>2. Sky box in <ul style="list-style-type: none"> <li>• Radiotherapy room in Schiehallion SCH.081</li> </ul> </li> <li>3. Pattressing on wall in wait area of Observation ward OBS.054</li> <li>4. Information on Snoozelen rooms DCFP. 050 &amp; GW3.050</li> <li>5. Information on Family Centre room ENT.028- in particular the glass front that is required</li> </ol> <p>GW advised that BMCL were currently pricing the works up. PM confirmed that this is a pricing exercise only, at this point.</p> <p>GW advised that BMCL were currently pricing the proposal. DH advised that he had met with GB the previous week to discuss the BMCL queries. DH noted that there is nothing basically hard/fixed to be moved i.e. radiators.</p>	21/08/2013

			<p>06/06/2013 AS advised that AS needed to advise the NHS ASSB that he had instructed but that the Yorkhill budget needs to be transferred in.</p> <p>13/06/2013 GW noted that nightingale cost received the previous night. AS agreed to provide to MMacleod.</p> <p>20/06/2013 AS agreed to liaise with MMacleod. GW suggested that if would be useful if the NHS could identify if any of these areas are critical. AS reported that he would wrap these additions with the Science Centre works. GW advised that the Science Centre had requested assistance from nightingales and WSP to write the briefing document and asked how AS wanted to proceed. AS requested that GW provide a copy of the request to AS. AS noted that a CEN would be provided once change approved by the NHS Board. BMCL to continue to progress.</p> <p>27/06/2013 AS noted that the cost provided included the sky ceilings. MMacleod was meeting with Shona Cardle on 26/06/2013 to discuss. DS noted that the Science Centre had approached WSP for assistance and they propose to provide a fee quote for the works. DH advised that it was important that nothing impacted on the Fire Strategy for the building. DS advised that KHamill would provide the spec if the fee quote were to be accepted.</p> <p>04/07/2013 AS requested that MMacleod be emailed to request that she confirm to GW, DS, AS and PM the way forward.</p> <p>11/07/2013 YCF 1 agreed YCF 2 to be agreed but not yet determined. Once YCF2 agreed CE to be raised Family Centre – Fire compartment wall was to be temporary but YCF want to fit permanent wall and door – further meeting required to clarify way forward</p> <p>18/07/2013 PMI will be raised for YCF 2 and to confirm YCF1 payment Thereafter CE issue for 1 and 2</p> <p>25/07/2013 PM noted that he was meeting with James Bailey later that day. PM needed to understand the final quote and the payment mechanism. A PMI would be issued in due course to confirm the way forward re YCF and YCF 2.</p> <p>01/08/2013 PM advised that he had met with James Bailey. PM had emailed YCF CE and was awaiting confirmation of approval to proceed re proposals and payment mechanism. GW noted that confirmation was needed asap as would become critical soon. It was noted that BCM were not progressing anything re YCF2 at this time. PM agreed to email MMacleod requesting an update.</p> <p>08/08/2013 PM advised the he was awaiting clarity from YCF re payment mechanism. JB enquired if there was anything stopping BMCL getting the YCF1 CE. PM noted that there was nothing stopping BMCL getting the CE for YCF1. GW to liaise with SF.</p> <p>15/08/2013 PM noted that confirmation was still awaited from SCardle. PM will take a view w/c 19/08 as to whether to split the YCF works into 2 CEs. PM requested that BMCL provide the drop dead date for the confirmation of the YCF2 works.</p> <p>22/08/2013 Cross reference CE 049 – item closed</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence</p>	

			06/06/2013	works to install the duct w/c 27/05/2013. AK would have to review level differences, etc DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.

2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p> <p>15/08/2013</p> <p>22/08/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p>PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</p> <p>GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.</p> <p>DP advised that he was awaiting feedback from Mercury.</p> <p>DP confirmed that a 4gb pc was being provided. DP requested the provision of the free issue kit so that this could be provided to Starkstrom – is a neater job if fitted at the factory. PM agreed to liaise with EMc.</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013</p> <p>04/07/2013</p> <p>11/07/2013</p>	<p>Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p> <p>Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed hat AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL</p>	

			17/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
			08/08/2013	DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30 <sup>th</sup> September and the cost information will follow as soon as possible thereafter.	
			15/08/2013	DMF advised that it was proposed to provide the drawings to the NHS by 9 <sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for.	
2081	PMI 232	Adult and Childrens Hospitals Sit-in sinks	08/07/2013	The Board confirm change to sink specification.	22/08/2013
			10/07/2013	Sample sink reviewed on site confirmed okay, revised proposal for tap required from BMCL	
			18/07/2013	This was not a change to the type of tap but the same tap with a longer spout	
			25/07/2013	PM advised that he would review this on site at the first opportunity	
			01/08/2013	PM noted that he was still to be asked to review the longer spout taps on site and he would liaise with P Norton.	
			08/08/2013	DS advised that he had emailed PM further to discussion with CGrindlay. The proposals would be provided for review to PM asap. A few alternatives had been identified. Noted that alternatives include mixer taps and the NHS would need to check if mixer taps were acceptable.	
			15/08/2013	PM advised that an alternative tap had been selected from within the BMCL cost range. BMCL were to provide a sample mock-up for review. As the tap has a longer spout then the Board's Infection Control will put in place a management process for using and maintaining these taps.	
			22/08/2013	PM advised that sample reviewed and signed-off therefore this PMI could be closed.	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)	
			25/07/2013	DH noted that there had been a query re additional heat load and he suggested that DWilson should discuss this with FCarnie.	
			01/08/2013	Noted that costs have to be provided. Position of cabinet to be confirmed however understood that the room can accommodate the cabinet.	
			08/08/2013	Awaiting finalization of cabinets – have a de-installation cost as 1 already fitted in the adults. FCarnie is identifying what to do with the 2 cabinets to be replaced. DH will arrange for the cabinets to be uplifted. DR noted that confirmation needed to be provided to BMCL asap. DH suggested that the cabinets could be relocated to the NCH Comms room in place of those which were still to be delivered to site and the NHS would confirm where to re-direct 2 of the still to be delivered cabinets.	
			15/08/2013	DH to provide an update on return from leave.	
			22/08/2013	GW suggested that DH had provided this info before going on a/l	

2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013  25/07/2013 01/08/2013 08/08/2013  15/08/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users DMF advised that he was awaiting the cost info. DMF agreed to chase this up. DH confirmed that load/weight. GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height. <b>DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).</b>	
2163	PMI 245	A&C Hospitals - Equipment Codes SAF005, MSC1015, MSC1017	14/08/2013  22/08/2013	The above items are to be transferred from Equipment Group 1 to Equipment Group 3.  The above equipment is to be omitted from the FF&E contract with JTC as per the attached schedule. In the case of SAF005 this was previously incorporated in the equipment list attached to CEN046. The other changes will be incorporated into the next update of the equipment list. <b>Agreed item to be closed as is an equipment list change</b>	22/08/2013
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.  The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows: 1. In the 20no Adult Theatres a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters). c) 1 x SDI cable - proposed for auxiliary SDI input d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm. f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) & c) above.  2. In the 9no Children's Theatres a) All as above, plus	

			<p>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</p> <p>3. As an option, to replace the above in 4no children's theatres with:</p> <p>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</p> <p>22/08/2013 DMF noted that BMCL were working through the detail of this PMI.</p>	
--	--	--	---	--

## COMPENSATION EVENTS

NONE

### Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013. (25/08/2013) Noted that DP had met with IP and AGS to progress. Another meeting had been scheduled on 15/08 to progress (08/08/2013) **DP advised that a meeting with IP & AGS had been scheduled for later that day to progress (15/08/2013) DP noted that DP, AGS and IP are all in agreement re way forward. A paper would be provided to formalize the agreement via DMF as a BMCL EW. (22/08/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would

happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013) DP noted that he had received info from FW the previous evening and will review asap. Formal confirmation from Mercury re pressure valves awaited. (22/08/2013)

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).(01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) **SF noted that meeting with RNethery and JMiller organised (22/08/2013)**
- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) **DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS ( 15/08/2013) **PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013)**

- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) PM advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) **DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013)**
- 7) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013) It was noted that a meeting with WSP had taken place on the 13<sup>th</sup> August and more detailed info re how the buses dock against the kerb is awaited from WSP. (15/08/2013) **PM advised that he had met with JMurray and DCampbell and PM was awaiting more detailed info re how the buses dock against the kerb (22/08/2013)**
- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013) **JB advised that he had written to PM re insurability. PM advised that a response had been provided – BMCL to progress on basis of DH schedule. JB noted that BMCL would continue to progress the quote. (22/08/2013)**
- 9) Delay to BMCL Fire road drainage connection as Maternity foul onto Hardgate Road is backing up. AK had contacted the Scottish Water rep to resolve. AS advised that if BMCL were not getting a response that he would be happy to assist. DH noted that although it was a Project problem it could become a public health problem if not dealt with in a timely manner. (25/07/2013) AK advised that he was awaiting SW to visit to deal with the issue. BMCL are checking the manholes regularly. AK may advise AGS to carry out the Board works whilst the SW drainage issue is being resolved. BMCL will have 1 more attempt to push the SW drainage works and if they don't get a positive response then will escalate this. (08/08/2013) AK advised that SW had been out the previous night jetting with 2 tankers (thought this was the 2<sup>nd</sup> time they had been out). BMCL will check the manholes to see if any improvement. BMCL will need to check out the size of the drain as a SW operative had suggested it may be a 450mm drain. AK was liaising with AGS re progressing the Board works. (08/08/2013) AK advised that SW had been back out at the issue the previous day. AK been advised that it is a 450mm drain. AK would provide a sketch of what it is proposed to do. Meanwhile, AGS was commencing the tank removal works. (15/08/2013) **AK noted that the tanks were being pumped out the previous day – a second tanker had been required. The tanks were to be removed on 24/08 and the slab was to be taken away thereafter (22/08/2013).**
- 10) Neuro cladding – noted that BMCL had taken the cladding package off but had been unable to carry-out an evasive survey as there appeared to be asbestos. DMF advised that BMCL would raise an EW regarding this and would provide pictures of the recent survey to the NHS. AK noted that PMcGuinness was suggesting that the full bay may need to be taken out, not just the single room. PM advised that it was difficult to provide a full bay as all the rooms were in use. AK noted that BMCL could assist an Asbestos Surveyor with a cherry picker. (15/08/2013) **DMF noted that this item would be raised as an EW. AK noted that he would look at this when the asbestos rep visits site. AK indicated that BMCL will need to take 2 bays of cladding panels off. There was also concern re the canopy which appears to be attached to the main beam. PM advised that he had commissioned a piece of work to look at the potential of overcladding Neuro. (22/08/2013)**
- 11) VIE – AK noted that it looked like this would have to be piled. JB noted that an EW would be raised in due course. (22/08/2013)
- 12) Pendant details – anaesthetic machines – DP suggested that Starkstrom were saying that it was not possible to fit as the load is too heavy DP can request Starkstrom formal confirmation from Starkstrom if required. PM agreed to get a briefing from the NHS reps and liaise with DP. (22/08/2013).

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 04/09/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
8145	BMCL-EW-045	Liner to SUDS Pond	<p>05/11/2010</p> <p>01/08/2013</p> <p>08/08/2013</p> <p>15/08/2013</p> <p>22/08/2013</p>	<p>As a result of site investigations there may be a requirement for an impermeable liner to the SUDS feature within the main park. DR to provide queries from URS and advise Board. NHS require SI info re SUDS pond. DR confirmed that SI did not cover the SUDS pond area due to the location being under existing buildings and operational areas prior to the works commencing. DS meeting with WSP on 11/02 and checking if sufficient info in existence re suds pond. AS reported that he will request URS to check out the WSP info. The client needs the opportunity to organize information. DS reported that the amended highlight report covering gas, water and contamination would be provided to the NHS team. High level report received by BMCL. Ongoing. DS to advise if liner or membrane required. DS advised that the report identified gas in the main build area however not of a level to be an issue and there would be no requirement to tank. Information was being submitted to GCC. Ongoing, subject to further investigation at a later date. DS highlighted separate planning app was submitted re linkage of Labs drainage to burn if Labs were ever stand alone building – 7 conditions were attached to permission. DS has now written to Planners to advise BMCL do not intend to evoke these conditions as drainage will ultimately link to SUDS. Plan for temporary drainage – once excavated will gain an understanding of the permanent requirements. DS advised that the report had been provided to GCC and formal feedback awaited.</p> <p>CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued.</p> <p>DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring.</p> <p>Response awaited from GCC</p> <p><b>DS noted that BMCL would continue to push GCC for a response</b></p>	<p>Work in progress.</p> <p>Not at apt point to undertake investigation</p> <p><i>Notes from 11/08/2011 to 01/08/2013 removed</i></p>
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>12/04/2012</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding.</p> <p>DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>D Hall advised item ongoing, prioritization exercise between NHS and BMCL has been carried out. Will update on programme for return. RCP had first meeting (pre RDD), awaiting updated drawings for RDD</p>	

			<p>meeting, principles have been set for updated drawings. DS, GW and DH to meet to discuss drawings and identify level of risk in tender info package.</p> <p>22/11/12 DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.</p> <p>29/11/2012 DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.</p> <p>06/12/2012 DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&amp;B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review.</p> <p>13/12/2012 GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected. DH suggested that the only items outstanding was the 1<sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]</p> <p>20/12/2012 DH advised that he would pursue the return of the basement and restaurant drawings.</p> <p>10/01/2013 DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.</p> <p>17/01/2013 DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.</p> <p>24/01/2013 DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.</p> <p>31/01/2013 DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.</p> <p>07/02/2013 DH advised that items are being addressed.</p> <p>14/02/2013 DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a</p>	
--	--	--	---	--

			<p>later date. DH advised that FW and DH were progressing those drawings that were required soonest by BMCL.</p> <p>21/02/2013 Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward</p> <p>Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week</p> <p>28/02/2013 Bedheads – a further meeting has been organised for next week – feedback thereafter</p> <p>DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues.</p> <p>NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS.</p> <p>Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.</p> <p>Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM.</p> <p>07/03/213 NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided.</p> <p>Bedheads – FW had just been provided with the spreadsheet</p> <p>Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.</p> <p>14/03/2013 JB noted that BMCL will provide samples of the atrium panel as requested by the NHS.</p> <p>DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet.</p> <p>Ceiling heights – DH continuing to liaise with GW</p> <p>DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.</p> <p>04/04/2013 DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.</p> <p>DH noted that the return date issue (RDD tracker versus front sheet) had been resolved.</p> <p>11/04/2013 DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation &amp; signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.</p>	
--	--	--	---	--

A51679245	18/04/2013	DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns. It was noted that BMCL were meeting with Elgar on 24 <sup>th</sup> April and thereafter will bring in the NHS Renal Reps.
	25/04/2013	DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue
	02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.
	16/05/2013	DH noted hat the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.
	24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.
	06/06/2013	DH advised that: <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>
	13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.
	20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> june had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.
	27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by

			<p>04/07/2013</p> <p>PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to the car park to the end of the NCH park.</p> <p>DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself.</p> <p>PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p> <p>11/07/2013</p> <p>DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vacuum plant information is awaited from MEL/HPI</p> <p>Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays</p> <p>18/07/2013</p> <p>DH reported on the items noted to be outstanding on the RDD tracker</p> <p>Roof level lighting protection and metal composite panel cladding new additions to RDD</p> <p>2 JTCs returned on Wednesday</p> <p>2 JTCs under review</p> <p>Group 1 – catheter cupboard omitted and PMI is drafted</p> <p>Minor equipment – Electrical, pharmacy cabinet and renal water are WIP</p> <p>Audiometry acoustic report is with users for feedback</p> <p>Medical Air and Vacuum plant info required from BMCL</p> <p>25/07/2013</p> <p>Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked</p> <p>DH provided the following update:</p> <p>Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments.</p> <p>Desk locations – reprints were to be requested</p> <p>JTC – wip and would be returned asap</p> <p>Audiometry – comments to be provided back by the end of the week.</p> <p>01/08/2013</p> <p>DH noted that he had reviewed the tracker the previous night and provided the following update:</p> <p>The first few dates appeared to be incorrect</p> <p>Lead lining drawings returned 29/07/2013</p> <p>MRI Breakout – to be returned later that day</p> <p>Bedhead trunking – to be returned later that day</p> <p>JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided)</p> <p>Minor Equipment schedule – WIP</p> <p>Medical Air Vacuum – awaiting info from DP (schematics)</p> <p>Renal water – with DP</p> <p>Desk locations – reprints awaited.</p> <p>08/08/2013</p> <p>Internal finishes – SF trying to locate these – may request reprints.</p>	
--	--	--	--	--

				<p>Interventional – information returned  Pharmacy – BMCL instructed to fit the out cabinet  Minor Equipment – WIP  Schedule of low voltage – information returned  Metal composite cladding – hard copy never received as was wrong rev no  Medical Air and Vacuum plant – awaiting schematic  Rack – wip to conclude  Safe – instructed PMI to confirm is to be a group 3 item  1<sup>st</sup> floor plans – desk locations – with FW  Renal water – returned as a B status – response from Elgar expected 08/08/2013  GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p> <p>15/08/2013  AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>22/08/2013  PM noted provided an update re the RDD Workflow report:  Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL  Desk locations – WIP by FW and he would try to push this on  Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>29/08/2013  DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 2 weeks to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been</li> </ul>	
--	--	--	--	--	--

				provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.

SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/09/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012 10/01/2013 17/01/2013 24/01/2013 31/01/2013 07/02/2013 14/02/2013 21/02/2013 28/02/2013 06/03/2013 14/03/2013 04/04/2013 11/04/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and</p>	

A51679245

			<p>17/04/2013 progress as necessary.</p> <p>25/04/2013 DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>02/05/2013 DP agreed to chase the proposal</p> <p>DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>15/08/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>06/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>13/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize</p>	

			<p>20/06/2013 the need to remove trees. AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p> <p>27/06/2013 AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>04/07/2013 AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9<sup>th</sup> July the way forward.</p> <p>11/07/2013 DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p> <p>18/07/2013 AS/DH and AK will walkround the proposed area on Friday 19<sup>th</sup> July and report back</p> <p>25/07/2013 AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p>01/08/2013 DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</p> <p>08/08/2013 DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&amp;E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.</p> <p>15/08/2013 AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.</p> <p>22/08/2013 PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.</p> <p>29/08/2013 DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.</p>	
2009	PMI 220	PACs screens and keyboards	<p>04/06/2013 The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of</p>	

			<p>06/06/2013 technical submittal MER-XX-SL-TS-175</p> <p>27/06/2013 DP noted that he had progressed this with mercury</p> <p>04/07/2013 GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>11/07/2013 DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>18/07/2013 DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p>01/08/2013 PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</p> <p>08/08/2013 GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.</p> <p>15/08/2013 DP advised that he was awaiting feedback from Mercury.</p> <p>22/08/2013 DP confirmed that a 4gb pc was being provided. DP requested the provision of the free issue kit so that this could be provided to Starkstrom – is a neater job if fitted at the factory. PM agreed to liaise with EMc</p> <p>29/08/2013 PM advised EM that DP wanted to liaise re the obtaining the free issue equipment..</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013 Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>04/07/2013 GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p> <p>11/07/2013 Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed hat AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL</p> <p>17/07/2013 Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&amp;E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.</p>	

			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
			08/08/2013	DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30 <sup>th</sup> September and the cost information will follow as soon as possible thereafter.	
			15/08/2013	DMF advised that it was proposed to provide the drawings to the NHS by 16 <sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for.	
			29/08/2013	PMM noted that the RDD pack was to be provided 16 September, the NHS would review and return to BMCL within 1 week. Cost info anticipated to be circa 13 <sup>th</sup> September 2013. DS noted that there were minor alterations being done to the Nightingale drawings.	
2114	PMI 236	Main Computer Rooms - Data Comms cabinets	22/07/2013	The Board request a cost to replace the NHS4 800 x 1000mm data comms cabinet in each main computer room (2no. in total) with a 800 x 1200mm data comms cabinet with the front door aligned with adjacent cabinets (200mm projection into aisle at rear)	29/08/2013
			25/07/2013	DH noted that there had been a query re additional heat load and he suggested that DWilson should discuss this with FCarnie.	
			01/08/2013	Noted that costs have to be provided. Position of cabinet to be confirmed however understood that the room can accommodate the cabinet.	
			08/08/2013	Awaiting finalization of cabinets – have a de-installation cost as 1 already fitted in the adults. FCarnie is identifying what to do with the 2 cabinets to be replaced. DH will arrange for the cabinets to be uplifted. DR noted that confirmation needed to be provided to BMCL asap. DH suggested that the cabinets could be relocated to the NCH Comms room in place of those which were still to be delivered to site and the NHS would confirm where to re-direct 2 of the still to be delivered cabinets.	
			15/08/2013	DH to provide an update on return from leave.	
			22/08/2013	GW suggested that DH had provided this info before going on a/l	
			29/08/2013	DH confirmed a previous communication i.e. redirect the 2 comms cabinets to the comms room in the labs. It was agreed this item could be closed.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users	
			25/07/2013	DMF advised that he was awaiting the cost info.	
			01/08/2013	DMF agreed to chase this up. DH confirmed that load/weight.	
			08/08/2013	GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.	
			15/08/2013	DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).	

			29/08/2013	DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.	
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	<p>The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol> <p>DMF noted that BMCL were working through the detail of this PMI.</p> <p>DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p>	
			22/08/2013 29/08/2013		

## COMPENSATION EVENTS

NONE

A51679245

### Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Deselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Deselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013. (25/08/2013) Noted that DP had met with IP and AGS to progress. Another meeting had been scheduled on 15/08 to progress (08/08/2013) **DP advised that a meeting with IP & AGS had been scheduled for later that day to progress (15/08/2013) DP noted that DP, AGS and IP are all in agreement re way forward. A paper would be provided to formalize the agreement via DMF as a BMCL EW. (22/08/2013) DH noted that he needed to understand the BMCL commissioning process and how to handle handing back the a-side (dependent of the programme there may be abortive works). It was agreed that a meeting should be organized to progress this. (29/08/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the

tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed off the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013) DP noted that he had received info from FW the previous evening and will review asap. Formal confirmation from Mercury re pressure valves awaited. (22/08/2013) **HD advised that he needed formal confirmation by cop 30/08/2013 re pressure valves. DH was trying to set-up a meeting with Bill McCormack (AP for the SGH site) w/c 2/09/2013 and he cannot progress this while formal confirmation is outstanding. (29/08/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals

(25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) **DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013)**

- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) **DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) **GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013)**
- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overclad. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013) **DS advised that a proposal was being progressed. (29/08/2013)**
- 7) Radius kerb – JMurray/RNethery - DS will get this progressed (18/07/2013) DS advised that this was under review 0 looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013) It was noted that a meeting with WSP had taken place on the 13<sup>th</sup> August and more detailed info re how the buses dock against the kerb is awaited from WSP. (15/08/2013) **PM advised that he had met with JMurray and DCampbell and PM was awaiting more detailed info re how the buses dock against the kerb (22/08/2013) RNethery progressing. PM suggested that he would raise this as an EW as it had to be moved forward. (29/08/2013)**

- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013) JB advised that he had written to PM re insurability. PM advised that a response had been provided – BMCL to progress on basis of DH schedule. JB noted that BMCL would continue to progress the quote. (22/08/2013) **It was noted that BMCL are chasing their insurers for a quote. (29/08/2013)**
- 9) VIE – AK noted that it looked like this would have to be piled. JB noted that an EW would be raised in due course. (22/08/2013) **AK noted that the design was awaited. BMCL were reviewing the area to identify how best to work in this area (29/08/2013)**
- 10) **85 point partition tests – failure due to missing insulation – NHS are concerned that this is still continuing as a 'check-point' was added to the QA procedures. AK agreed to investigate. (29/08/2013).**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 11/09/2013:

			22/11/12	and identify level of risk in tender info package. DS reported this has significantly improved. DR reported on behalf of DH that drawings were up to date. DS will catch up with DH to ensure that everything is updated and both sides are happy.
			29/11/2012	DH advised that he had reviewed the recently released RDD tracker. There was one group of drawings which had been returned as there is a drawing missing from the pack. The BMS spec is being dealt with through the tracker arrangement with DP. Basement and FM drawings will be reviewed asap as was awaiting the CDS info to be uploaded to Aconex which had just been done. PM would review the digital vinyl drawings and return asap.
			06/12/2012	DH advised that the return of drawings was almost up to date. DH noted that the recently issued tracker could not be opened by either C&B or NHS therefore this tracker had not yet been reviewed. DS provided DH with a hard copy of the tracker for review. GW advised that CDS have written an Early Warning to BMCL re recently returned drawings which have further amendments i.e. request for a 1hr fire door and a double sink however there was no drainage in the space. DS advised that he thought that FW may have asked for a door in liaison with KC which so happens to be a 1hr fire wall. DS suggested that GW would need to check if the wall is 1hr fire protected.
			13/12/2012	DH suggested that the only items outstanding was the 1 <sup>st</sup> floor restaurant and the basement and he would liaise with FW re returning these documents. There were also a couple of workflows which were being checked out. [DH was also checking out the outstanding RFI's re RPA however FW had advised that there were no outstanding RFIs]
			20/12/2012	DH advised that he would pursue the return of the basement and restaurant drawings.
			10/01/2013	DH advised that the Basement and Restaurant drawings had been returned and he did not think there was very much outstanding. DP noted that he would like the renal plant information returned asap.
			17/01/2013	DH advised that he had received the latest workflow report the previous night and would review asap. DS noted that there were circa 75 drawings outstanding. DH agreed to check the status of the renal drawings. It was noted that FW had provided a response to the RPA RFI the previous afternoon.
			24/01/2013	DH advised that the RDD Returns were pretty much up to date. The renal plant sign-off was WIP as Bill Fiskin is leaving. DH noted that there was 1 room in the stroke ward where a column moves the bedhead out. DH had spoken to GBurnett and GBurnett was liaising with Nightingale's to check this out.
			31/01/2013	DH advised that the Environmental drawings had all been returned. The medical service trunking drawings were being progressed through the workshops. There is 1 acoustic strategy drawing to be located. The desk drawings were currently under review.
			07/02/2013	DH advised that items are being addressed.
			14/02/2013	DH advised that items were continuing to be addressed. Key issues were a) acoustic drawing – DH was awaiting an Astin detail which GB had been trying to obtain for him, b) unistrut ceilings – DH had received the drawings 2 days previous and noted that he was aware the works were starting on Monday and he would review these drawings asap. DH advised that meetings with the modality users were being scheduled for the next few weeks in order that what/where unistrut is needed. GW advised that Mercury were advising that the amendments to the Unistrut drawings were changing the Mercury RCP therefore updated drawings would need to be prepared. DP noted that it was always known that the RCP would change and GW acknowledged that there was an allowance for contingency however was highlighting that Mercury will need to amend their drawings. DH advised that he did not expect to make savings but was trying to redistribute the costs. c) Renal – FW was progressing review/sign-off and return of these drawings. DP noted that BMCL would progress on the current basis and sort out the RDD changes at a later date. DH advised that FW and DH were progressing those drawings that were required soonest by

			21/02/2013	BMCL. Acoustic drawings returned, unistrut meeting taking place 21/02/13. Clarification required on stage Board thought 1 and 2 fix drawings AF thought 3 fix – needs clarity. Renal panels – drawings being reviewed – new users on groups due to retirement and would hope to have returned next week. DH asked for a discussion with Elgar for the new users be organised - JB will take forward Visuals on Atrium were reviewed by Board and in principal accepted – feedback will be forwarded to BMCL next week
			28/02/2013	Bedheads – a further meeting has been organised for next week – feedback thereafter DP advised that he has been through the report from FW re renal panels and it was proposed that BMCL would meet with FW to discuss. AS enquired if the new NHS rep was causing any issues. DH advised that the new rep was being managed and DP noted that the new rep primarily needed clarification. DH reported that the new rep needed to be brought up to date with the previous discussions/agreements which would resolve the current issues. NCH Atrium Visuals – it was noted that a meeting to go through the NCH Atrium proposals had taken place the previous day and a formal response to BMCL on these proposals would be provided by the NHS. Bedheads – it was noted that a further meeting to discuss bedheads had taken place. FW and Static are now working on a simplified spreadsheet.
			07/03/213	Post sweep-up changes – DS advised that he had spoken to GBurnett regarding the post sweep-up changes and that FW appeared to be moving items on wheels and sending drawings back as B status – DS proposed to ask GBurnett to discuss this with PM. NCH Visuals – PM had provided a response via Aconex to BMCL. PM advised requested that the detail of the recess of the timber be provided. Bedheads – FW had just been provided with the spreadsheet Post sweep up changes- GB had provided further drawings to the PM for review – changes were insignificant – PM had made comment to GB. JB noted the concern was how many goes did the Board need to get it right, Nightingales had been asked if the latest changes could be left until the as-built drawings are prepared and LE saying that this is not the correct thing to do. JB noted that the changes were being dealt with on site.
			14/03/2013	JB noted that BMCL will provide samples of the atrium panel as requested by the NHS. DH noted that he understood that Fwrath had returned the Static bedhead spreadsheet. Ceiling heights – DH continuing to liaise with GW DH noted that the RDD Tracker was showing different dates from the dates being advised on the RDD Signoff front sheets which accompanied the drawings, etc.
			04/04/2013	DS advised that there were no architectural drawings causing any great issue. DH advised that Renal drawings may potentially be delayed and that there was a meeting to be arranged with Elgar. DP agreed to progress with FW asap.
			11/04/2013	DH noted that the return date issue (RDD tracker versus front sheet) had been resolved. DH noted that he had undertaken a quick review of the latest tracker – desk locations, circulation & signage and internal finishes were WIP to return back. Key drawings were renal plant. DP noted that he had received a response back from Elgar and he would review this and provide to DH and FW asap however there was 1 statement in the document which DP was concerned with. DH noted that the document would need to be reviewed and a common position agreed.
			18/04/2013	DS noted that there was starting to be a bit of creep coming into the 1:50 drawing returns.

			25/04/2013	<p>It was noted that BMCL were meeting with Elgar on 24<sup>th</sup> April and thereafter will bring in the NHS Renal Reps.</p> <p>DH reported that Elgar meeting has taken place and was positive. The next stage was to meet with users in the next week or so. DS reported that there were still outstanding RDD to be returned and DH noted that FW has been working through these this week. DS noted that there were 130 drawings 3 weeks overdue</p>	
			02/05/2013	DH advised that a further meeting was to be arranged. DH to push getting the arrangements. DH to check if physics reps have done the spec. DH noted that Starkstrom lights and pendants would be discussed in a joint meeting scheduled for later that day.	
			16/05/2013	DH noted that the Lig light RDD had been returned to document control and the pendant RDD would be provided later that day. DS requested that the outstanding 'sweep-up' RDD be returned asap. DH noted that there had been a dip in the sweep-up RDD return due to FW being focused on the group 5 information. JB and DS to discuss adding the VE changes (i.e. handrails) on to the strategy drawings then as-built rather than the 400 series dwgs.	
			24/05/2013	DH noted that the sweep-up information was being progressed and the group 5 floor information was being finalised for issue to BML. A meeting to progress the lights and pendants had taken place the previous day. DS noted that there were some items on the RDD tracker which were over 4 weeks late (circa 78) and some over 100 days late (circa 15) i.e. desk locations. AS requested that the desk location drawings be passed to HMc to progress asap. DS noted that BMCL needed the JCT info back asap and was advised that this would be returned early w/c 27/05/2013. GW enquired if any of the lig/pendant codes had changed which would require the equipment list to be updated and was informed that the hybrid had changed but that this used a project specific code.	
			06/06/2013	<p>DH advised that:</p> <ul style="list-style-type: none"> <li>the floor duct information had been provided to BMCL and a meeting to discuss had taken place. GW suggested that the floor recesses are deeper.</li> <li>the colposcopy pendant was the only pendant to be concluded</li> <li>Desk locations had been provided back to BMCL</li> <li>JCT info to be provided later that day as confirmed to DH by FW</li> <li>Final equipment list cost expected later that day</li> </ul>	
			13/06/2013	DH noted that the floor duct information was being reviewed. The colposcopy revised proposal was being costed by mercury. It was understood that the following information was to be returned to BMCL: Sit on sinks, JTC, lead penetration and dental chairs (FW had been awaiting a revised drawing re the dental chair). GW raised concern that BMCL had been waiting 4 weeks for approval re the dental chair, the spec had been changed and the proposals updated however BMCL had received the information as a C status. AS requested that BMCL liaise with PM and FW to resolve.	
			20/06/2013	PM advised that the workflow report from the 18 <sup>th</sup> June had been reviewed which identified there were circa 180 drawings to be returned. Of this 180 there were circa 93 with BMCL and 20 VIE related drawings with the NHS which required additional information to be provided to enable them to be reviewed. PM advised that it was intended that all the majority of the outstanding drawings would be returned back to BMCL by the end of the day however BMCL should advise which ones were most urgent.	
			27/06/2013	DH suggested that there were 8 items which were more than 1 day late. The renal water and acoustics RDD were to be returned later that week. AS noted that the WSP arrival space drawings were awaited by PM and DS agreed to progress this. PM advised that he needed a drawing which showed from the exit to	

			<p>04/07/2013</p> <p>the car park to the end of the NCH park. DH noted that attendance on site by Renal Water reps to review the renal panels had been scheduled. Comments had been provided back to CGrindlay re 3<sup>rd</sup> iteration of plant schedule. A meeting to conclude discussions with Elgar was being arranged for w/c 8/07/2013. DH noted that the outstanding queries related to connections not plant itself. PM advised he had received the arrival space drawing. Consideration was being given as to whether to raise an EW re the bus stop on the curve as SPT are concerned that they will be unable to dock a bus. DS advised that he thought that this query had been explained by WSP through the RCC process. DS agreed to arrange a meeting with WSP, PM and DH asap. DH provided an overview of the outstanding items i.e. safe and rack – omitted, recess vac – awaiting info from BMCL, JTC Drawings – to be returned 5/07/2013, lead screens – to be returned 05/07/2013, etc.</p> <p>11/07/2013</p> <p>DH noted the vast majority were now returned – Renal water meeting will take place on Friday 12/07/13. JTC return by end of week and vacuum plant information is awaited from MEL/HPI Medical Gas – agreement in principal – clarity around wording for alternative design solutions will be concluded following AE holidays</p> <p>18/07/2013</p> <p>DH reported on the items noted to be outstanding on the RDD tracker Roof level lighting protection and metal composite panel cladding new additions to RDD 2 JTCs returned on Wednesday 2 JTCs under review Group 1 – catheter cupboard omitted and PMI is drafted Minor equipment – Electrical, pharmacy cabinet and renal water are WIP Audiometry acoustic report is with users for feedback Medical Air and Vacuum plant info required from BMCL Critical Care desk locations and restaurant and atrium space locations are duplicates – to be checked</p> <p>25/07/2013</p> <p>DH provided the following update: Renal – site visit had taken place and the outstanding issues had been concluded with the exception of resilience which was awaiting the control panel proposal from Elgar to conclude (technical discussion). DH would return the RDD docs as a B status with comments. Desk locations – reprints were to be requested JTC – wip and would be returned asap Audiometry – comments to be provided back by the end of the week.</p> <p>01/08/2013</p> <p>DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.</p> <p>08/08/2013</p> <p>Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned</p>	
--	--	--	---	--

				<p>Pharmacy – BMCL instructed to fit the out cabinet</p> <p>Minor Equipment – WIP</p> <p>Schedule of low voltage – information returned</p> <p>Metal composite cladding – hard copy never received as was wrong rev no</p> <p>Medical Air and Vacuum plant – awaiting schematic</p> <p>Rack – wip to conclude</p> <p>Safe – instructed PMI to confirm is to be a group 3 item</p> <p>1<sup>st</sup> floor plans – desk locations – with FW</p> <p>Renal water – returned as a B status – response from Elgar expected 08/08/2013</p> <p>GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p> <p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>15/08/2013</p> <p>22/08/2013</p> <p>PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>29/08/2013</p> <p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation</li> </ul>	
--	--	--	--	--	--

			05/09/2013	and DH confirmed that a derogation would be provided as necessary. DH advised that there were no outstanding drawings of significance on the list.	
19183	BMCL-EWN-137	VIE Foundation Design	05/09/2013	Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.	
19236	BMCL-EWN-138	Modifications to take large gas meter/rig for main gas supply from Renfrew Road	09/09/2013	The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.  The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.  When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore installed.  The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/09/2013

NONE

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/09/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013  17/01/2013 24/01/2013  31/01/2013  07/02/2013 14/02/2013  21/02/2013 28/02/2013  06/03/2013  14/03/2013  04/04/2013  11/04/2013  17/04/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p>	

A51679245

			<p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>15/08/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p> <p>05/09/2013 DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>06/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>13/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize</p>	

			20/06/2013	the need to remove trees. AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9 <sup>th</sup> July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19 <sup>th</sup> July and report back	
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.	
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.	
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.	
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.	
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.	
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.	
			05/09/2013	DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.	

2009	PMI 220	PACs screens and keyboards	<p>04/06/2013</p> <p>06/06/2013</p> <p>27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013</p> <p>01/08/2013</p> <p>08/08/2013</p> <p>15/08/2013</p> <p>22/08/2013</p> <p>29/08/2013</p> <p>05/09/2013</p>	<p>The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>DP noted that he had progressed this with mercury</p> <p>GW noted that DMF was awaiting information from Mercury</p> <p>PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p>PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</p> <p>GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.</p> <p>DP advised that he was awaiting feedback from Mercury.</p> <p>DP confirmed that a 4gb pc was being provided. DP requested the provision of the free issue kit so that this could be provided to Starkstrom – is a neater job if fitted at the factory. PM agreed to liaise with EMc</p> <p>PM advised EM that DP wanted to liaise re the obtaining the free issue equipment</p> <p>DP advised he would liaise directly with EMcColl</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013</p> <p>04/07/2013</p> <p>11/07/2013</p>	<p>Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p> <p>Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was</p>	

			<p>17/07/2013 confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL</p> <p>25/07/2013 Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&amp;E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.</p> <p>01/08/2013 PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)</p> <p>08/08/2013 PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.</p> <p>15/08/2013 DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30<sup>th</sup> September and the cost information will follow as soon as possible thereafter.</p> <p>29/08/2013 DMF advised that it was proposed to provide the drawings to the NHS by 16<sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for.</p> <p>05/09/2013 PMM noted that the RDD pack was to be provided 16 September, the NHS would review and return to BMCL within 1 week. Cost info anticipated to be circa 13<sup>th</sup> September 2013. DS noted that there were minor alterations being done to the Nightingale drawings.</p> <p>DS noted that the Nightingale drawings may be available for providing to the NHS Team later that day and the WW drawings would be provided as soon as possible thereafter. DH noted that the Nightingale drawings were key to the sign-off and that the WW drawings could follow on it was expected that the WW would be co-ordinated with the Nightingale drawings.</p>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	<p>22/07/2013 In relation to TRA 8001, lighting tracks in MIL-010 &amp; MIL-006 the Board confirm the following:</p> <ul style="list-style-type: none"> <li>- ceiling height for these two rooms to be increased to 2800mm minimum</li> <li>- 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups</li> <li>- Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible</li> <li>- TRA8001 specification to be agreed with users</li> </ul> <p>25/07/2013 DMF advised that he was awaiting the cost info.</p> <p>01/08/2013 DMF agreed to chase this up. DH confirmed that load/weight.</p> <p>08/08/2013 GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.</p> <p>15/08/2013 DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).</p> <p>29/08/2013 DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.</p> <p>05/09/2013 DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.</p>	

2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	<p>The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol> <p>DMF noted that BMCL were working through the detail of this PMI. DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p> <p>DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team.</p>

NONE

## Other items that require discussion:

- 1) LV Step-ups – DP advised that he would be putting forward a proposal to remove 2 LV Step-ups (benefits i.e. using power un-necessarily and carbon savings). DP had initially discussed the proposal with ASmith. DH noted that the proposal appears reasonable. (10/01/2013) DP advised that he was trying to clarify the running costs. (17/01/2013) DP advised that he was awaiting costs from Dieselec and info re running costs. (24/01/2013) DP advised that he was awaiting information and would continue to progress (31/01/2013) DP advised this VE item was WIP. The LV step ups were for emergency purposes and to keep these in a ready state used power. BMCL had checked that in an emergency generators could be provided with transformer incorporated. The removal of 2 LV step-ups would provide a saving both in capital and energy costs. DP was awaiting transformer information from Schneider and awaiting written confirmation that generators can be provided with transformer (07/02/2013) DP advised that he was awaiting formal confirmation from both Aggreko and Dieselec that generators with LV steps are easy obtainable. (14/02/2013). Work in progress (21/02/2013) DP agreed to provide the proposal asap (14/03/2013). DP agreed to progress this (25/04/2013) DP advised that the proposal would be available before the next EW meeting (16/05/2013) DP advised that the information had been provided to the NHS via Sypro?. DP had run through the proposal with ASmith who had thought it was a good idea. DH enquired if the proposal included the spec for the generator with transformer so that the ease of obtaining this could be investigated. (24/05/2013) DP advised that he had obtained further information however he was just awaiting a couple of queries to be answered before providing to the NHS and that he would run through the proposal with AS in due course. (20/06/2013) DP agreed to present the LV step up proposal at the meeting on 28<sup>th</sup> June 2013. (27/06/2013). Tutorial set up for completeness AGS/IP happy with set up – DP to arrange tutorial (10/07/2013) DP agreed to forward write up to PM who will then check with AGS and IP for their comments (18/07/2013) DP advised that information would be ready for review in mid August 2013. (25/08/2013) Noted that DP had met with IP and AGS to progress. Another meeting had been scheduled on 15/08 to progress (08/08/2013) DP advised that a meeting with IP & AGS had been scheduled for later that day to progress (15/08/2013) DP noted that DP, AGS and IP are all in agreement re way forward. A paper would be provided to formalize the agreement via DMF as a BMCL EW. (22/08/2013) DH noted that he needed to understand the BMCL commissioning process and how to handle handing back the a-side (dependent of the programme there may be abortive works). It was agreed that a meeting should be organized to progress this. (29/08/2013) **DP advised that he had met with NHS Reps and a position had been agreed. DP advised that he would provide a write-up of the meeting. DH enquired about the timing of the A-side handover. DP reported that BMCL had no imminent need to have the A-side handed back. (05/09/2013)**
- 2) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as “Construction” drawings not RDD. (11/04/2013) AS confirmed that

A51679245

Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013) DP noted that he had received info from FW the previous evening and will review asap. Formal confirmation from Mercury re pressure valves awaited. (22/08/2013) **DH advised that he needed formal confirmation by cop 30/08/2013 re pressure valves. DH was trying to set-up a meeting with Bill McCormack (AP for the SGH site) w/c 2/09/2013 and he cannot progress this while formal confirmation is outstanding. (29/08/2013)**

- 3) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if

shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jams therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) **GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013)**

- 4) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**
- 5) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) **GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013)**
- 6) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013) DS advised that

a proposal was being progressed. (29/08/2013) DS advised that this would be discussed in the BMCL design team meeting later that day and an update would be provided w/c 09/09/2013. (05/09/2013)

- 7) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review 0 looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013) It was noted that a meeting with WSP had taken place on the 13<sup>th</sup> August and more detailed info re how the buses dock against the kerb is awaited from WSP. (15/08/2013) PM advised that he had met with JMurray and DCampbell and PM was awaiting more detailed info re how the buses dock against the kerb (22/08/2013) RNethery progressing. PM suggested that he would raise this as an EW as it had to be moved forward. (29/08/2013) DS advised that the NHS Have a drawing which shows is compliant. DH suggested that he did not think that the design was complaint and he had a meeting with DCampbell later that day to discuss. (05/09/2013)
- 8) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013) JB advised that he had written to PM re insurability. PM advised that a response had been provided – BMCL to progress on basis of DH schedule. JB noted that BMCL would continue to progress the quote. (22/08/2013) It was noted that BMCL are chasing their insurers for a quote. (29/08/2013) DH advised that he had received the insurance quote and was awaiting the T&C info. DL advised that C&B would be requested to check that the quote provides value for money in the market place. DH noted that it would not be possible to provide a list of all the items at this time and the info would need to be provided in batches, however the IT info could be provided now. DR suggested that an inventory should be able to be provided as it must be known what was being purchased, the inventory list should be provided on a worst case scenario basis. DH enquired if it would be possible to provide a list for the IT equipment now and provide the list for the other Group 5 equipment in October (group 5 installs wont be going in until March 2014. DL stressed that insurance coverage for the IT Equipment due to be installed in October was required asap. (05/09/2013)
- 9) VIE – AK noted that it looked like this would have to be piled. JB noted that an EW would be raised in due course. (22/08/2013) AK noted that the design was awaited. BMCL were reviewing the area to identify how best to work in this area (29/08/2013)
- 10) Building names/ward names – DP advised that BMCL will be starting to need with building/ward/helipad names and enquired about the NHS way forward/programme to provide name information. DL advised that the building/helipad naming was with RCalderwood. DH advised that the fire alarm naming had been carried out and the wards would have bedrooms named as 1 to circa 112. Wards will be named as A (Arran) and B (Bute) – HG has this information. DS enquired if this information had been provided to BMCL and DH suggested that it had. DS requested that building name(s) asap. (05/09/2013)

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 18/09/2013:

			01/08/2013	<p>DH noted that he had reviewed the tracker the previous night and provided the following update:</p> <p>The first few dates appeared to be incorrect</p> <p>Lead lining drawings returned 29/07/2013</p> <p>MRI Breakout – to be returned later that day</p> <p>Bedhead trunking – to be returned later that day</p> <p>JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided)</p> <p>Minor Equipment schedule – WIP</p> <p>Medical Air Vacuum – awaiting info from DP (schematics)</p> <p>Renal water – with DP</p> <p>Desk locations – reprints awaited.</p>	
			08/08/2013	<p>Internal finishes – SF trying to locate these – may request reprints.</p> <p>Interventional – information returned</p> <p>Pharmacy – BMCL instructed to fit the out cabinet</p> <p>Minor Equipment – WIP</p> <p>Schedule of low voltage – information returned</p> <p>Metal composite cladding – hard copy never received as was wrong rev no</p> <p>Medical Air and Vacuum plant – awaiting schematic</p> <p>Rack – wip to conclude</p> <p>Safe – instructed PMI to confirm is to be a group 3 item</p> <p>1<sup>st</sup> floor plans – desk locations – with FW</p> <p>Renal water – returned as a B status – response from Elgar expected 08/08/2013</p> <p>GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p>	
			15/08/2013	<p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p>	
			22/08/2013	<p>PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p>	
			29/08/2013	<p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> </ul>	

			05/09/2013 12/09/2013	<ul style="list-style-type: none"> <li>Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul> <p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>Vacuum plant schematics – awaited. DP suggested that these had been included in the pack. DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</li> </ul> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
19183	BMCL-EWN-137	VIE Foundation Design	05/09/2013  12/09/2013	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p>	
19236	BMCL-EWN-A51679245	Modifications to take large	09/09/2013	The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The	

	138	gas meter/rig for main gas supply from Renfrew Road	12/09/2013	<p>current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.</p> <p>The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.</p> <p>When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore installed.</p> <p>The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.</p> <p>GW advised that he had instructed Mercury to resolve however there would be a cost incurred (Mercury &amp; Dunne). DH raised a query regarding the difference between the sketch and the pictures and GW agreed to check this out. DH enquired about the need for the excavation and DP advised that it is so that the pipe can be brought through. DP noted that the gas board will not provide the drawing until the meter has been purchased therefore this issue could not have been foreseen.</p>

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 18/09/2013

					
SypID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage.	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013	Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 18/09/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013  17/01/2013 24/01/2013  31/01/2013  07/02/2013 14/02/2013  21/02/2013 28/02/2013  06/03/2013  14/03/2013  04/04/2013  11/04/2013  17/04/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p>	

			<p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>15/08/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p> <p>05/09/2013 DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>06/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>13/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize</p>	

			20/06/2013	the need to remove trees. AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9 <sup>th</sup> July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19 <sup>th</sup> July and report back	
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.	
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.	
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.	
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.	
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.	
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.	
			05/09/2013	DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.	
			12/09/2013	PM advised that he had appointed C&B to carry out a feasibility study.	

2009	PMI 220	PACs screens and keyboards	<p>04/06/2013 The Board request that BMCL provide a cost for the supply and installation of PACs screens and keyboards to the Theatre Control panels. These items are currently group 2 but to allow factory installation by Starkstrom would be more appropriately Group 1. Each control panel will require 2 no 22" screens as previously agreed. Total no of panels PAN 053 = 27, PAN 052 = 2, therefore in total 29 no. The PACs display monitors and keyboards should be as per item 7.1 and 7.2 of technical submittal MER-XX-SL-TS-175</p> <p>06/06/2013 DP noted that he had progressed this with mercury</p> <p>27/06/2013 GW noted that DMF was awaiting information from Mercury</p> <p>04/07/2013 PM advised that he had received the quote. AS noted that DR would need to cross check the quote.</p> <p>11/07/2013 DH will obtain additional info on PC specification from BMCL to ensure all compatible. Thereafter a PMI will be issued</p> <p>18/07/2013 DH had passed over specification to IT to confirm OK. Once that is confirmed a CE will be issued via equipment list (group 3) change to grouping will be carried out via PMI – DH to take forward</p> <p>01/08/2013 PM confirmed that the PMI had been issued. There would be no CE as this was wrapped up in the equipment list. DH noted that the PC was to be a 4GB and not 2GB and this IS A mark-UP on the RDD.</p> <p>08/08/2013 GW advised that DP had raised concern that a pc based on the original spec from IT May already have been purchased. DP is checking what has been purchased.</p> <p>15/08/2013 DP advised that he was awaiting feedback from Mercury.</p> <p>22/08/2013 DP confirmed that a 4gb pc was being provided. DP requested the provision of the free issue kit so that this could be provided to Starkstrom – is a neater job if fitted at the factory. PM agreed to liaise with EMc</p> <p>29/08/2013 PM advised EM that DP wanted to liaise re the obtaining the free issue equipment</p> <p>05/09/2013 DP advised he would liaise directly with EMcColl</p> <p>12/09/2013 DP advised that he had liaised with EMcColl and this item could be closed.</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013 Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013</p> <p>04/07/2013 GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.</p>	

			11/07/2013	Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL.	
			17/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
			08/08/2013	DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30 <sup>th</sup> September and the cost information will follow as soon as possible thereafter.	
			15/08/2013	DMF advised that it was proposed to provide the drawings to the NHS by 16 <sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for.	
			29/08/2013	PM noted that the RDD pack was to be provided 16 September, the NHS would review and return to BMCL within 1 week. Cost info anticipated to be circa 13 <sup>th</sup> September 2013. DS noted that there were minor alterations being done to the Nightingale drawings.	
			05/09/2013	DS noted that the Nightingale drawings may be available for providing to the NHS Team later that day and the WW drawings would be provided as soon as possible thereafter. DH noted that the Nightingale drawings were key to the sign-off and that the WW drawings could follow on it was expected that the WW would be co-ordinated with the Nightingale drawings.	
			12/09/2013	PM advised that the NHS Had spent time the previous day going through the drawings.. the drawings had been provided back to GBurnett and GBurnett had been advised of minor comments/items. The Commercial exercise by BMCL was to be carried out. JB noted that the Mercury confirmation of costs were to be provided from BMCL. DH suggested that the equipment be left in but BMCL should advise on any implications regarding the equipment. GW suggested that the BMCL costs would be provided by 20 <sup>th</sup> Sept 2013 and JB advised that he would confirm the drop dead date for the NHS confirmation re way forward.	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users	
			25/07/2013	DMF advised that he was awaiting the cost info.	
			01/08/2013	DMF agreed to chase this up. DH confirmed that load/weight.	
			08/08/2013	GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.	

			15/08/2013	DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).	
			29/08/2013	DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.	
			05/09/2013	DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.	
			12/09/2013	DH advised that he had provided a response and further feedback and DP and DH would liaise to bottom out the requirements.	
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	<p>The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol>	
			22/08/2013	DMF noted that BMCL were working through the detail of this PMI.	

			29/08/2013 05/09/2013 12/09/2013	DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team. GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom.	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
2226	PMI 248	Equipment Group Change - 5no.RAC420 racks in PICU (ECMO).	16/09/2013	The Board confirms that the 5no RAC420 located in NCH-01-CCW-015_1 (Utility/clinical area support facilities) will be transferred from Equipment Group 1 to Group 3.	

## COMPENSATION EVENTS

**NONE**

### Other items that require discussion:

- 1) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for

the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as "Construction" drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013) DP noted that he had received info from FW the previous evening and will review asap. Formal confirmation from Mercury re pressure valves awaited. (22/08/2013) DH advised that he needed formal confirmation by cop 30/08/2013 re pressure valves. DH was trying to set-up a meeting with Bill McCormack (AP for the SGH site) w/c 2/09/2013 and he cannot progress this while formal confirmation is outstanding. (29/08/2013) **DP advised that he had not received formal correspondence re moving the pressure valves however this work had started on site. DH enquired if the NHS could see this and DP advised that the NHS could see the works. (12/09/2013)**

- 2) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a

response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jams therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) **DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips.**

- 3) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**
- 4) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. **(05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013)**

- 5) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) PM advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013) DS advised that a proposal was being progressed. (29/08/2013) **DS advised that this would be discussed in the BMCL design team meeting later that day and an update would be provided w/c 09/09/2013. (05/09/2013) DS advised that the proposals had been discussed internally and that he would try and get the info to the NHS in the next few weeks. (12/09/2013)**
- 6) Radius kerb – JMurray/BNethery - DS will get this progressed (18/07/2013) DS advised that this was under review looking to see if can slide round noting that SPT were part of the original sign-off for the RCC process (official consultee). Meeting to be organized and DS to provide dates (25/07/2013) It was noted that the meeting with WSP was being re-organised (01/08/2013) DS noted that RNethery would be organizing a meeting to progress. (08/08/2013) It was noted that a meeting with WSP had taken place on the 13<sup>th</sup> August and more detailed info re how the buses dock against the kerb is awaited from WSP. (15/08/2013) PM advised that he had met with JMurray and DCampbell and PM was awaiting more detailed info re how the buses dock against the kerb (22/08/2013) RNethery progressing. PM suggested that he would raise this as an EW as it had to be moved forward. (29/08/2013) DS advised that the NHS have a drawing which shows is compliant. DH suggested that he did not think that the design was complaint and he had a meeting with DCampbell later that day to discuss. (05/09/2013) **DH advised that he would be meeting with PM on 16/09/2013 to provide feedback and thereafter feedback would be provided to BMCL. (12/09/2013)**
- 7) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013) JB advised that he had written to PM re insurability. PM advised that a response had been provided – BMCL to progress on basis of DH schedule. JB noted that BMCL would continue to progress the quote. (22/08/2013) It was noted that BMCL are chasing their insurers for a quote. (29/08/2013) DH advised that he had received the insurance quote and was awaiting the T&C info. DL advised that C&B would be requested to check that the quote provides value for money in the market place. DH noted that it would not be possible to provide a list of all the items at this time and the info would need to be provided in batches, however the IT info could be provided now. DR suggested that an inventory should be able to be provided as it must be known what was being purchased, the inventory list should be provided on a worst case scenario basis. DH enquired if it would be possible to provide a list for the IT equipment now and provide the list for the other Group 5 equipment in October (group 5 installs wont be going in until March 2014. DL stressed that insurance coverage for the IT Equipment due to be installed in October was required asap. (05/09/2013) **PM advised that he had received the policy and associated docs – this would now be discussed with RCalderswood and feedback would be provided to BMCL asap thereafter. (12/09/2013)**
- 8) Building names/ward names – DP advised that BMCL will be starting to need with building/ward/helipad names and enquired about the NHS way forward/programme to provide name information. DL advised that the building/helipad naming was with RCalderswood. DH advised that the fire alarm naming had been carried out and the wards would have bedrooms named as 1 to circa 112. Public cores will be named as A (Arran) and B (Bute) – HG has this information. DS enquired if this information had been provided to BMCL and DH suggested that it had. DS requested that building name(s) asap. (05/09/2013) **PM advised that the name for the helipad had been confirmed as Southern General Hospital. DH advised that he understood the numbering info had been fed thro to BMCL. The door numbering/signage had been discussed with Nigel – it was proposed to use similar to what had been used on the Labs project. The door numbering/signage should be discussed with KC, HG, FM and MM. GW advised that the samples would be provided to the NHS asap – BMCL were not happy with the current samples. (12/09/2013)**
- 9) GW enquired about PMI 226 (Review if the door signage – LIG73) and DH advised that the ones installed should be left in. DH was requested to provide confirmation of leaving the installed ones in. DS enquired if the drawings needed to be updated and GW noted that the changes would be caught on the as-builts and that Mercury knew that they weren't to install anymore.
- 10) PMI re estates being cross charged for the cable works – query if this could be captured in the equipment list. GW noted that BMCL will write off the £1800. Item closed

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 18/09/2013:

				returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.	
			22/08/2013	PM noted provided an update re the RDD Workflow report: Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL Desk locations – WIP by FW and he would try to push this on Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms	
			29/08/2013	DH advised that there were 12 items outstanding which would be worked through over the remained of the week. <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information</li> </ul>	

				<p>returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</p> <ul style="list-style-type: none"> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>	
		05/09/2013 12/09/2013		<p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
		19/09/2013		<p>PM provided the following update:</p> <p>Car Par –HMc will progress these</p> <p>3<sup>rd</sup> floor – FW to return by 23/09</p> <p>Fire Plans – DH to return by 23/09</p> <p>Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only</p> <p>Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.</p>	

				<p>Door Type schedule – HM progressing this</p> <p>Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.</p> <p>Medical Air &amp; Vacuum – with ISandford.</p>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013</p> <p>19/09/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p>	
19236	BMCL-EWN-138	Modifications to take large gas meter/rig for main gas supply from Renfrew Road	<p>09/09/2013</p> <p>12/09/2013</p> <p>19/09/2013</p>	<p>The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.</p> <p>The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.</p> <p>When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore installed.</p> <p>The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.</p> <p>GW advised that he had instructed Mercury to resolve however there would be a cost incurred (Mercury &amp; Dunne). DH raised a query regarding the difference between the sketch and the pictures and GW agreed to check this out. DH enquired about the need for the excavation and DP advised that it is so that the pipe can be brought through. DP noted that the gas board will not provide the drawing until the meter has been purchased therefore this issue could not have been foreseen.</p> <p>GW advised that BMCL had carried out work which was different from what anticipated – GW would liaise with DR. DP suggested that the slab would need to be extended to all 4 sides in order to get the governor, etc placed.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 18/09/2013

A51679245

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013  19/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013  19/09/2013	Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution. GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 18/09/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.	
				AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.	
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.	
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.	

A51679245

			<p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>15/08/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p> <p>05/09/2013 DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>19/09/2013 <b>DP noted that the final proposal was with IPowrie for agreement.</b></p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>06/06/2013 DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>13/06/2013 DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK</p>	

			20/06/2013	advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees. AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back	
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.	
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.	
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.	
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.	
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.	
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.	
			05/09/2013	DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.	
			12/09/2013	PM advised that he had appointed C&B to carry out a feasibility study.	
			19/09/2013	PM advised that the feasibility study was underway. It was anticipated that it would be circa 2	

weeks before the NHS received the report/info back.

2062	PMI 228	Change to NSGH Level 4 - hepa filtration	02/07/2013	Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013	
			04/07/2013	GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped.	
			11/07/2013	Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL	
			17/07/2013	Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion.	
			25/07/2013	PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms)	
			01/08/2013	PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise.	
			08/08/2013	DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30 <sup>th</sup> September and the cost information will follow as soon as possible thereafter.	
			15/08/2013	DMF advised that it was proposed to provide the drawings to the NHS by 16 <sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for.	
			29/08/2013	PM noted that the RDD pack was to be provided 16 September, the NHS would review and return to BMCL within 1 week. Cost info anticipated to be circa 13 <sup>th</sup> September 2013. DS noted that there were minor alterations being done to the Nightingale drawings.	
			05/09/2013	DS noted that the Nightingale drawings may be available for providing to the NHS Team later that	

A51679245

			12/09/2013	day and the WW drawings would be provided as soon as possible thereafter. DH noted that the Nightingale drawings were key to the sign-off and that the WW drawings could follow on it was expected that the WW would be co-ordinated with the Nightingale drawings.	
			19/09/2013	PM advised that the NHS Had spent time the previous day going through the drawings.. the drawings had been provided back to GBurnett and GBurnett had been advised of minor comments/items. The Commercial exercise by BMCL was to be carried out. JB noted that the Mercury confirmation of costs were to be provided from BMCL. DH suggested that the equipment be left in but BMCL should advise on any implications regarding the equipment. GW suggested that the BMCL costs would be provided by 20 <sup>th</sup> Sept 2013 and JB advised that he would confirm the drop dead date for the NHS confirmation re way forward. <b>M&amp;E – discussed within meeting and drawings marked up and given status (some were D status). GW noted that BMCL needed to double check the quote prepared by JBailey. DR requested that BMCL provide the quote to DR no later than cop 20/09/2013.</b>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users	
			25/07/2013	DMF advised that he was awaiting the cost info.	
			01/08/2013	DMF agreed to chase this up. DH confirmed that load/weight.	
			08/08/2013	GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.	
			15/08/2013	DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).	
			29/08/2013	DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.	
			05/09/2013	DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.	
			12/09/2013	DH advised that he had provided a response and further feedback and DP and DH would liaise to bottom out the requirements.	
			19/09/2013	<b>DP advised that CGrindley would meet with DH on return to the office. WIP</b>	
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.  The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows: 1. In the 20no Adult Theatres a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).	

			<p>c) 1 x SDI cable - proposed for auxiliary SDI input</p> <p>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</p> <p>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</p> <p>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</p> <p>2. In the 9no Children's Theatres</p> <p>a) All as above, plus</p> <p>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</p> <p>3. As an option, to replace the above in 4no children's theatres with:</p> <p>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</p> <p>22/08/2013 DMF noted that BMCL were working through the detail of this PMI.</p> <p>29/08/2013 DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p> <p>05/09/2013 DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team.</p> <p>12/09/2013 GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom.</p> <p>19/09/2013 <b>DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes.</b></p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	<p>16/09/2013 The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>19/09/2013 <b>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</b></p>	

2226	PMI 248	Equipment Group Change - 5no.RAC420 racks in PICU (ECMO).	16/09/2013	The Board confirms that the 5no RAC420 located in NCH-01-CCW-015_1 (Utility/clinical area support facilities) will be transferred from Equipment Group 1 to Group 3.	
2252	PMI 249	Adult and Children's Hospitals - Endoscopy Decontamination Suite	25/09/2013	<p>The Board confirm changes to rooms DCT-006 and DCT-010</p> <p>Due to the extended procurement process for endoscopy washers and the urgent requirement to progress the works in the above areas, the Board proposes to omit the following works from the main contract.</p> <p>1) Installation of 2 No. pass through hatches (HAT 1000) (hatches to be provided free issue).</p> <p>2) Internal partition providing sealed separation of DCT-006 and DCT-010 including openings for washers and pass through hatches. Note: this partition would be double walled to provide flush finish on both sides.</p> <p>In addition, the following works should be deferred until the washer procurement has been completed and final service connection details are available.</p> <p>3) Construction of a plinth to accommodate drainage.</p> <p>4) Installation of drainage including individual trapped wastes.</p> <p>5) Connection of extract ventilation from individual washers to wider ventilation system.</p> <p>In order to progress the remaining works, the ceiling and floor finishes should be progressed in accordance with the attached sketch, which confirms that vinyl should be continued under the proposed plinth. The 1200mm soffit constructed in moisture resistant plasterboard should be installed at the same level as the general ceiling with access maintained to the area above, via the adjacent ceiling for future ventilation/services connections.</p>	

## COMPENSATION EVENTS

**NONE**

### Other items that require discussion:

- 1) Medical Gas meeting – AS requested that FW attend this meeting. AS stressed that it was important that the Project Team and BMCL were as one in this meeting. Any issues are to be taken off the table. DP noted that he would liaise with DH re the meeting agenda and adds/omits. It was noted that a discussion re the commissioning process was wanted. (07/02/2013) It was agreed this item could be closed as the meetings had taken place (positive meeting). DH advised that he had asked for a programme of the commissioning tasks so that the NHS Team can discuss with Graeme Dunn. DP advised that he proposed to provide an indicative programme but noted that the NHS Team would need to be flexible. PM requested that the programme be provided that day. (14/02/2013). DH asked for fixed dates to be arranged in order to give witnesses time to arrange diaries – DP to take forward (21/02/2013) DP advised that BMCL would provide the first series of dates as fixed dates. BMCL would try to be as accommodating as possible. Any missed tests by NHS can be picked up during system tests/witnessing of full sectional tests. DH suggested that GD should also attend the full area testing. DH suggested that BMCL provide a w/c programme for the testing over the next 6 month then closer to the time BMCL can confirm the actual dates. DP advised that BMCL will always have done their pre-tests before GD witnesses the formal testing. AS noted that BMCL would be as flexible as possible regarding the testing but enquired what would happen if GD could not attend. DP advised that this would be ok as long as the test could still be carried out within the same week – if more than 1 week then there would be knock on issues as people are being stood out of the area for testing so if there is a delay then impact on operatives going back in to fit lights, etc. AS advised that the witness testing for the NHS would be going out to tender. DH advised that he was awaiting on drawings for the medical gases. DP advised that he had done the notes from the last

meeting and is awaiting the drawings so can issue out as a pack. (28/02/2013) DR noted that the NHS Tender document would be available later that day (14/03/2013) DP advised that he would issue the notes asap and will check for the final drawings. DP had 1 query awaiting response from FW. DH advised that the tender for the AE was due back 05/04/2013. PM noted that a meeting to discuss the compound was scheduled for later that day. (04/04/2013) DP advised that the drawings were with BMCL (received as a ZIP file) and the FW had answered a query. DH advised that the tender returns had been received 5<sup>th</sup> April 2013. Query responses had been provided to the reps tendering for the work. DH would prepare a report on the tender outcome. DP advised that the drawings will be provided as "Construction" drawings not RDD. (11/04/2013) AS confirmed that Hulley & Kirkwood had been awarded the medical gas validator contract. DP noted that the drawings were now all out with the NHS. DP had printed off a set for Ian Sandford and enquired if he could pass these directly to Ian Sandford. AS requested that the drawings be provided to SF for providing to ISandford. (17/04/2013). Hulleys meeting taken place and schematics to be forwarded to conclude design – DP to progress this. Hulleys planned to visit site next week for walkabout and any issues will be reverted back through EW as separate items. Atkins to sign off design and Hulleys will not revisit this as part of their work (25/04/2013) It was noted that the Medical Gas design is ongoing. (02/05/2013) DH advised that he was awaiting the outstanding schematic for sign-off by GDunne and as an aid for ISandford. DP advised that he was pursuing HPI for the information. DP acknowledged that the first response from HPI had been weak and he had discussed this with them and that this needed to be improved upon. DP advised that the spec on the tower units to add in the valve. The podium was complete. (16/05/2013) DH advised that the schematics were awaited so that the NHS could get sign-off by GDunne. The line valve details were needed so that this item could be closed out. DP advised that it was anticipated that the schematics would be available early w/c 27/05/2013. DP noted that he had met with HPI on 23/05/2013 and that he proposed that there should be a meeting with GDunne. (24/05/2013) DP noted that the schematic would be provided to DH by cop 11/006/2013. DH noted that GDunne was aware to expect the schematic from DH for sign-off (06/06/2013) DH advised that a meeting had been arranged to take place on 26<sup>th</sup> June. DP advised that he had 3 sets of schematics, calcs and meeting minutes (a set for each - Ian Sandford, Graeme Dunne, Lynn Morrison). The HPI response would also be discussed (13/06/2013) It was noted that a meeting to discuss the VIE installation had also been arranged to take place on 26<sup>th</sup> June 2013. AS suggested that Bill McCormack should be advised. DP advised that it was proposed to advise Bill McCormack as part of the familiarization (circa 6-8 months time) (20/06/2013) DP noted that there had been a good meeting on 26<sup>th</sup> June 2013. Discussion re Valves was positive. BMCL would need to alter some ground floor for fire compartmentation. AS noted that Bill McCormack would need to be taken through the plan. DP noted that the Dept valves were ok to be above the ceiling as otherwise a 2<sup>nd</sup> valve panel would be required and the pipe is too big. DH noted that the pressure switch was being brought back down into the panel so that it is easily accessible for testing. AS suggested that BMCL write up how had arrived at the current design and get GDunne and ISandford to agree. DH noted that there were only 2 derogations which was really good in relation to the scale of the medical gas system DH noted that 170 connected and 70 on standby was required. Racking for other small bottles/cylinders would be required. DP advised that the other small cylinders/bottles would need to be in a separate storage however this could be a cage. PM noted that the size of the VIE/bottle storage space. It was thought that there was a workable solution. PM agreed to provide the info to BMCL later that day. (27/06/2013). PM advised that he understood that the VIE/Bottle storage info was being reviewed by BMCL. DS noted that the planning application had been submitted and drawings were being updated. DH noted that sign-off of the design was awaited – outstanding query was in relation to BMCL confirming that the pressure switch will be brought down onto the AVSU panel. DH was drafting the 2 derogations. AS noted that after signed off then Bill McCormack needed to be advised of the system design and that the AE needed to be present at this meeting. AS enquired about cross connect at the top and DH advised that this had been included in GDunne's report which had been provided at the meeting. (04/07/2013) Design compliance wording will be forwarded to GDunne. HPI drawings to be reviewed by Board and BMCL through development and the design can be signed off (18/07/2013) DH advised that it was hoped to conclude the derogation wording with GDunne in the next few weeks and then this would be progressed with ISandford. DP advised that the zone D drawing had been revised with the AVSU amendments. Need to visit the site to look at the connections. AS advised that this should be done through HMc as the enabler but PM and DH needed to be kept in the loop. DH noted that ISandford signed of the medical gas and will be the person who confirms the design and informs Bill McCormack. JB enquired about the above ceiling sign-off and DH advised that he was awaiting confirmation that BMCL will be taking the pressure valves out of the above ceilings. (25/07/2013) DH noted that he was awaiting confirmation re the pressure valves being taken out of the ceiling (01/08/2013) It was noted that formal confirmation was awaited from Mercury re pressure valves – verbal confirmation received to date (08/08/2013) DP advised that he was awaiting formal confirmation from Mercury re pressure valves and would progress this (15/08/2013) DP noted that he had received info from FW the previous evening and will review asap. Formal confirmation from Mercury re pressure valves awaited. (22/08/2013) DH advised that he needed formal confirmation by cop 30/08/2013 re pressure valves. DH was trying to set-up a meeting with Bill McCormack (AP for the SGH site) w/c 2/09/2013 and he cannot progress this while formal confirmation is outstanding. (29/08/2013) DP advised that he had not received formal correspondence re moving the pressure valves however this work had started on site. DH enquired if the NHS could see this and DP advised that the NHS could see the works. (12/09/2013) **NHS to review the works on site (19/09/2013)**

- 2) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the

same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).(01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). **PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013)**

- 3) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**
- 4) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had

been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013)

- 5) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013) DS advised that a proposal was being progressed. (29/08/2013) DS advised that this would be discussed in the BMCL design team meeting later that day and an update would be provided w/c 09/09/2013. (05/09/2013) DS advised that the proposals had been discussed internally and that he would try and get the info to the NHS in the next few weeks. (12/09/2013)
- 6) Insurance – AS noted that the phased plan prepared by DH should be used and values put against so that this can be fed into GW for liaising with the BMCL insurer. Rounded figs to be used. DH noted that the cashflow was driving to put in as much equipment as possible early. AS suggested that the equipment dates re cashflow should be discussed with TC. DH noted that he had the IT costs for inclusion. DH noted that he had now received an estimate from John McGarrity and would provide all the info to BMCL by the end of the week (01/08/2013) DH advised that he had provided 2 alternative cashflows. GW advised that he had asked the insurer to concentrate on option 1. Anticipated that quote will be available in 2 weeks. (08/08/2013) DMF advised that it was hoped that the Insurer would have provided a quote by w/e 23/08/2013. (15/8/2013) JB advised that he had written to PM re insurability. PM advised that a response had been provided – BMCL to progress on basis of DH schedule. JB noted that BMCL would continue to progress the quote. (22/08/2013) It was noted that BMCL are chasing their insurers for a quote. (29/08/2013) DH advised that he had received the insurance quote and was awaiting the T&C info. DL advised that C&B would be requested to check that the quote provides value for money in the market place. DH noted that it would not be possible to provide a list of all the items at this time and the info would need to be provided in batches, however the IT info could be provided now. DR suggested that an inventory should be able to be provided as it must be known what was being purchased, the inventory list should be provided on a worst case scenario basis. DH enquired if it would be possible to provide a list for the IT equipment now and provide the list for the other Group 5 equipment in October (group 5 installs wont be going in until March 2014. DL stressed that insurance coverage for the IT Equipment due to be installed in October was required asap. (05/09/2013) PM advised that he had received the policy and associated docs – this would now be discussed with RCalderwood and feedback would be provided to BMCL asap thereafter. (12/09/2013)
- 7) Equipment List – GW noted that he had 1 outstanding response from Nightingale – received yesterday and is on manual change – due to staffing GW expected that the Equipment List could be provided to the NHS by 24/09/2013. PM noted that the deadline for receiving the equipment list needed to be 24/09/2013 as the Procurement Dept needed the list. This equipment list would be the 'line in the sand' list.

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 01/10/2013:

				returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.	
			22/08/2013	PM noted provided an update re the RDD Workflow report: Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL Desk locations – WIP by FW and he would try to push this on Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms	
			29/08/2013	DH advised that there were 12 items outstanding which would be worked through over the remained of the week. <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information</li> </ul>	

				<p>returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</p> <ul style="list-style-type: none"> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>	
		05/09/2013 12/09/2013		<p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
		19/09/2013		<p>PM provided the following update:</p> <p>Car Par –HMc will progress these</p> <p>3<sup>rd</sup> floor – FW to return by 23/09</p> <p>Fire Plans – DH to return by 23/09</p> <p>Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only</p> <p>Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.</p>	

			26/09/2013	<p>Door Type schedule – HM progressing this</p> <p>Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.</p> <p>Medical Air &amp; Vacuum – with ISandford.</p> <p>DH provided the following update:</p> <p>Medical Gas calcs – to be noted on register as 'For Info'</p> <p>Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds</p> <p>Car Park – info returned on 25/09</p> <p>Gillespies - info returned on 25/09</p> <p>Fire Design – WIP – will return by end of week</p> <p>Remaining drawings – to go back as D status and covered by a PMI</p>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevant – there may be a disconnect between the Design Team and Constructon team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined cost and that the NHS would not want to spend more money than needs to.</p>	
19236	BMCL-EWN-138	Modifications to take large gas meter/rig for main gas supply from Renfrew Road	09/09/2013	<p>The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.</p> <p>The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.</p> <p>When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore</p>	

			<p>installed.</p> <p>12/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p>	<p>The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.</p> <p>GW advised that he had instructed Mercury to resolve however there would be a cost incurred (Mercury &amp; Dunne). DH raised a query regarding the difference between the sketch and the pictures and GW agreed to check this out. DH enquired about the need for the excavation and DP advised that it is so that the pipe can be brought through. DP noted that the gas board will not provide the drawing until the meter has been purchased therefore this issue could not have been foreseen.</p> <p>GW advised that BMCL had carried out work which was different from what anticipated – GW would liaise with DR. DP suggested that the slab would need to be extended to all 4 sides in order to get the governor, etc placed.</p> <p>GW advised that he understood that the works are finished. GW accepted the query re cost for the works and suggested that the cost is circa £15k. DR suggested that £15k was expensive. DR and GW to liaise to resolve.</p>	
--	--	--	---	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 01/10/2013

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p>	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p>	<p>Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.</p> <p>GW noted that RNetherery had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.</p> <p>DH advised that a pre-meeting was scheduled for the 10<sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.</p>	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 18/09/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.	
				AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report.	
				DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.	
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and	

A51679245

			<p>17/04/2013 progress as necessary.</p> <p>25/04/2013 DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>02/05/2013 DP agreed to chase the proposal</p> <p>16/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>24/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>06/06/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>13/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>20/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>27/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>04/07/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>11/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>18/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>25/07/2013 Agreed way forward – BMCL to plan and implement</p> <p>01/08/2013 Instruction given to Mercury today and programme will be issued</p> <p>08/08/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>15/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>05/09/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>19/09/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP.</p> <p>26/09/2013 Consideration was being given to carrying out the works over weekends.</p> <p>DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>DP noted that the final proposal was with IPowrie for agreement.</p> <p><b>GW noted this was WIP and he was unsure if DP had received a reply from IP</b></p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>24/05/2013 The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>06/06/2013 GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>DH noted that the principle re what is wanted and expected to be done next year. AS raised</p>	

				concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.
			05/09/2013	DH advised that he had a proposal to discuss with PM on return from leave and thereafter would

			<p>12/09/2013 19/09/2013  26/09/2013</p>	<p>discuss with BMCL. PM advised that he had appointed C&amp;B to carry out a feasibility study. PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back. DH advised that he will liaise with SMcKechnie on his return from leave (1<sup>st</sup> Oct 2013).</p>	
2062	PMI 228	Change to NSGH Level 4 - hepa filtration	<p>02/07/2013  04/07/2013  11/07/2013  17/07/2013  25/07/2013  01/08/2013  08/08/2013  15/08/2013  29/08/2013</p>	<p>Further to the drawings and information previously provided by Heather Griffin identifying changes to NSGH level 4 the Board request that: a) BMCL stop the fit out works in this area b) BMCL provide an assessment of the works already carried out in this area c) BMCL and NHS to develop the design detail utilizing the RDD process in order to come to a design within the £700k (inc OH&amp;P) as currently identified by BMCL. Initial design meetings with HGriffin can commence w/c 8th July 2013 GW noted that the £700k quoted in the PMI was incorrect as the current costing was £720k. AS advised that he had previously been advised that the cost was £700k and this cost had been submitted to the NHS Board. AS advised that he needed to know what works had been done and what works would now be required and that he would need Capita to check the works done to date. AS noted that there should be no extension to the programme. AS noted that the £700k is a target price as had asked for a maximum price. BMCL to liaise with HGriffin and PM to progress. DH acknowledged that the cost is an estimate as at this time don't know the desk locations, etc and that the design would be to £700k. DS agreed to arrange a meeting. DH enquired if BMCL had instructed the stopping of the nurse base desks (potentially reducing from 2 to 1). GW agreed to check that both on-site and off-site works had been stopped. Work has stopped on level 4 SW leg. BMCL reviewing best way to provide additional AHU capacity to additional beds; this may involve over sized AHU currently planned for plantroom 31, this would avoid disruption to level 12 plantroom and additional ducting between 4 and 12. It was confirmed that AHU have double fan motors. BMCL/Board to meet and review design options for this area prior to final cost being prepared by BMCL Meeting to discuss design has taken place. Sketch layout approved and will now go via RDD process. It was agreed to sign off design and then take back for M&amp;E etc to be completed in order to progress this quickly. AS clear that the costs could not exceed that already agreed and PM will take this through to conclusion. PM advised that the CAD had been received and had been reviewed the previous day. The drawings would be provided back to BMCL asap with some comments (predominantly re retention of the renal panels in the rooms) PM advised that the drawings had been received and HG had returned these to BMCL. DMF advised that this was now in the design stage with Wallace Whittle. BMCL had targeted 3 weeks to have the design provided to them in 3 weeks so that BMCL can then carry-out the pricing verification exercise. DMF advised that it was anticipated to have the design available for NHS review 3 weeks before the 30<sup>th</sup> September and the cost information will follow as soon as possible thereafter. DMF advised that it was proposed to provide the drawings to the NHS by 16<sup>th</sup> September and it had been confirmed to DR when BMCL need the cost info for. PM noted that the RDD pack was to be provided 16 September, the NHS would review and return</p>	

			05/09/2013	to BMCL within 1 week. Cost info anticipated to be circa 13 <sup>th</sup> September 2013. DS noted that there were minor alterations being done to the Nightingale drawings.	
			12/09/2013	DS noted that the Nightingale drawings may be available for providing to the NHS Team later that day and the WW drawings would be provided as soon as possible thereafter. DH noted that the Nightingale drawings were key to the sign-off and that the WW drawings could follow on it was expected that the WW would be co-ordinated with the Nightingale drawings.	
			19/09/2013	PM advised that the NHS Had spent time the previous day going through the drawings.. the drawings had been provided back to GBurnett and GBurnett had been advised of minor comments/items. The Commercial exercise by BMCL was to be carried out. JB noted that the Mercury confirmation of costs were to be provided from BMCL. DH suggested that the equipment be left in but BMCL should advise on any implications regarding the equipment. GW suggested that the BMCL costs would be provided by 20 <sup>th</sup> Sept 2013 and JB advised that he would confirm the drop dead date for the NHS confirmation re way forward.	
			26/09/2013	M&E – discussed within meeting and drawings marked up and given status (some were D status). GW noted that BMCL needed to double check the quote prepared by JBailey. DR requested that BMCL provide the quote to DR no later than cop 20/09/2013. <b>Noted that price had been received from BMCL and there had been a quick discussion with JB after the PMG meeting. Meeting with JB later that day to discuss lump sum costs, etc. The NHS would work with BMCL to get the way forward confirmed asap.</b>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	22/07/2013	In relation to TRA 8001, lighting tracks in MIL-010 & MIL-006 the Board confirm the following: - ceiling height for these two rooms to be increased to 2800mm minimum - 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups - Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible - TRA8001 specification to be agreed with users	
			25/07/2013	DMF advised that he was awaiting the cost info.	
			01/08/2013	DMF agreed to chase this up. DH confirmed that load/weight.	
			08/08/2013	GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.	
			15/08/2013	DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).	
			29/08/2013	DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.	
			05/09/2013	DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.	
			12/09/2013	DH advised that he had provided a response and further feedback and DP and DH would liaise to bottom out the requirements.	
			19/09/2013	DP advised that CGrindley would meet with DH on return to the office. WIP	
			26/09/2013	<b>DH advised that he would liaise with CG. Feedback was awaited re the length of tracks being provided.</b>	

2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	14/08/2013	<p>The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol> <p>22/08/2013 DMF noted that BMCL were working through the detail of this PMI.</p> <p>29/08/2013 DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p> <p>05/09/2013 DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team.</p> <p>12/09/2013 GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom.</p> <p>19/09/2013 DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes.</p> <p>26/09/2013 <b>DH noted that the costs were under review by the NHS Team.</b></p>
------	---------	---	------------	---

2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
2226	PMI 248	Equipment Group Change - 5no.RAC420 racks in PICU (ECMO).	16/09/2013 26/09/2013	The Board confirms that the 5no RAC420 located in NCH-01-CCW-015_1 (Utility/clinical area support facilities) will be transferred from Equipment Group 1 to Group 3. It was agreed this item could be closed. GW noted that manual adjustment had been made to the equipment schedule	
2252	PMI 249	Adult and Children's Hospitals - Endoscopy Decontamination Suite	25/09/2013  26/09/2013	The Board confirm changes to rooms DCT-006 and DCT-010 Due to the extended procurement process for endoscopy washers and the urgent requirement to progress the works in the above areas, the Board proposes to omit the following works from the main contract. 1) Installation of 2 No. pass through hatches (HAT 1000) (hatches to be provided free issue). 2) Internal partition providing sealed separation of DCT-006 and DCT-010 including openings for washers and pass through hatches. Note: this partition would be double walled to provide flush finish on both sides. In addition, the following works should be deferred until the washer procurement has been completed and final service connection details are available. 3) Construction of a plinth to accommodate drainage. 4) Installation of drainage including individual trapped wastes. 5) Connection of extract ventilation from individual washers to wider ventilation system. In order to progress the remaining works, the ceiling and floor finishes should be progressed in accordance with the attached sketch, which confirms that vinyl should be continued under the proposed plinth. The 1200mm soffit constructed in moisture resistant plasterboard should be installed at the same level as the general ceiling with access maintained to the area above, via the adjacent ceiling for future ventilation/services connections. DH advised that before raising this PMI this issue had been discussed with DWilson and JMiller. Any issues please discuss with DH.	

## COMPENSATION EVENTS

Haemato-oncology – CE to be raised

Insurance – GW expecting confirmation re schedule. DH noted that the 1<sup>st</sup> equipment to be installed will commence 7<sup>th</sup> October 2013 (package circa £600k)

A51679245

- 1) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end).(01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013) **DH advised that he was expecting a response from JFoster on the 1<sup>st</sup> October – Jfoster indicating that earliest opportunity for a meeting is 14<sup>th</sup> October 2013. DH expected to be able to confirm the floor requirements. (26/09/2013)**
- 2) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**

- 3) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check.
- 4) Gas meter – cross sections – DH advised that he was awaiting the cross section drawings. DP has forward but AS/PM had not had opportunity to review (18/07/2013) DP advised that BMCL would need to consider how best to disguise the meter housing. DH suggested that it could be overlaid. It was noted that this item would be progressed through the RDD process therefore item closed for this group. DS agreed to progress through Gillespies. (25/07/2013) DS advised that he had emailed Gillespies and a meeting will be organized by RNethery (08/08/2013) DP noted that this was WIP and the Landscape proposals were to be provided by Gillespies to BMCL. (15/08/2013) DS advised that a proposal was being progressed. (29/08/2013) DS advised that this would be discussed in the BMCL design team meeting later that day and an update would be provided w/c 09/09/2013. (05/09/2013) DS advised that the proposals had been discussed internally and that he would try and get the info to the NHS in the next few weeks. (12/09/2013)

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 09/10/2013:

				returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.	
			22/08/2013	PM noted provided an update re the RDD Workflow report: Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL Desk locations – WIP by FW and he would try to push this on Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms	
			29/08/2013	DH advised that there were 12 items outstanding which would be worked through over the remained of the week. <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information</li> </ul>	

				<p>returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</p> <ul style="list-style-type: none"> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>	
		05/09/2013 12/09/2013		<p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
		19/09/2013		<p>PM provided the following update:</p> <p>Car Par –HMc will progress these</p> <p>3<sup>rd</sup> floor – FW to return by 23/09</p> <p>Fire Plans – DH to return by 23/09</p> <p>Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only</p> <p>Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.</p>	

			<p>26/09/2013</p> <p>03/10/2013</p>	<p>Door Type schedule – HM progressing this</p> <p>Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.</p> <p>Medical Air &amp; Vacuum – with ISandford.</p> <p>DH provided the following update:</p> <p>Medical Gas calcs – to be noted on register as 'For Info'</p> <p>Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds</p> <p>Car Park – info returned on 25/09</p> <p>Gillespies - info returned on 25/09</p> <p>Fire Design – WIP – will return by end of week</p> <p>Remaining drawings – to go back as D status and covered by a PMI</p> <p>PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items sitting with BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013 19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevant – there may be a disconnect between the Design Team and Construction team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined cost and that the NHS would not want to spend more money than needs to.</p> <p>AK advised that he was awaiting info re other jobs in Scotland – will chase this up. BMCL propose to commence the works on 28<sup>th</sup> Oct. (PM agreed to provide AK with a copy of a recent complaint).</p>	

19236	BMCL-EWN-138	Modifications to take large gas meter/rig for main gas supply from Renfrew Road	09/09/2013	<p>The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.</p> <p>The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.</p> <p>When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore installed.</p> <p>The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.</p>	
			12/09/2013	<p>GW advised that he had instructed Mercury to resolve however there would be a cost incurred (Mercury &amp; Dunne). DH raised a query regarding the difference between the sketch and the pictures and GW agreed to check this out. DH enquired about the need for the excavation and DP advised that it is so that the pipe can be brought through. DP noted that the gas board will not provide the drawing until the meter has been purchased therefore this issue could not have been foreseen.</p>	
			19/09/2013	<p>GW advised that BMCL had carried out work which was different from what anticipated – GW would liaise with DR. DP suggested that the slab would need to be extended to all 4 sides in order to get the governor, etc placed.</p>	
			26/09/2013	<p>GW advised that he understood that the works are finished. GW accepted the query re cost for the works and suggested that the cost is circa £15k. DR suggested that £15k was expensive. DR and GW to liaise to resolve.</p>	
			03/10/2013	<p>GW noted that he has information for discussion with DR. WIP to conclude.</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 09/10/2013

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL</p>	
			19/09/2013		
			26/09/2013		
			03/10/2013		

A51679245

				programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013  19/09/2013 26/09/2013 03/10/2013	<p>Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.</p> <p>GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.</p> <p>DH advised that a pre-meeting was scheduled for the 10<sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.</p> <p>PM noted that feedback from BMCL is awaited. AK advised he would review the drawing. DMF noted that RNetherey was progressing this item. AK advised that he had undertaken a review of the landscaping and BMCL propose to complete the areas starting with south, then east, then west so this area is the last area to be done.</p>	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 09/10/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013 17/01/2013 24/01/2013 31/01/2013 07/02/2013 14/02/2013  21/02/2013 28/02/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming</p>	

A51679245

			<p>couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>06/03/2013 AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>14/03/2013 AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>04/04/2013 PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>11/04/2013 DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>17/04/2013 DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p>
--	--	--	---

			15/08/2013	DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.	
			05/09/2013	DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.	
			19/09/2013	DP noted that the final proposal was with IPowrie for agreement.	
			26/09/2013	GW noted this was WIP and he was unsure if DP had received a reply from IP	
			03/09/2013	DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.	
1978	PMI 217	MTHW System - Site ring	22/05/2013	The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.	
			24/05/2013	The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc	
			06/06/2013	DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.	
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.	
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.	
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.	
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.	
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL	
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back	
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would	

			<p>01/08/2013 want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p>08/08/2013 DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</p> <p>15/08/2013 DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&amp;E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.</p> <p>22/08/2013 AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.</p> <p>29/08/2013 PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.</p> <p>05/09/2013 DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.</p> <p>12/09/2013 DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.</p> <p>19/09/2013 PM advised that he had appointed C&amp;B to carry out a feasibility study.</p> <p>26/09/2013 PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.</p> <p>03/10/2013 <b>DH advised that he will liaise with SMcKechne on his return from leave (1<sup>st</sup> Oct 2013). PM advised that WW are still working on the design as SMcKechne has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.</b></p>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	<p>22/07/2013 In relation to TRA 8001, lighting tracks in MIL-010 &amp; MIL-006 the Board confirm the following:</p> <ul style="list-style-type: none"> <li>- ceiling height for these two rooms to be increased to 2800mm minimum</li> <li>- 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups</li> <li>- Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible</li> <li>- TRA8001 specification to be agreed with users</li> </ul> <p>25/07/2013 DMF advised that he was awaiting the cost info.</p> <p>01/08/2013 DMF agreed to chase this up. DH confirmed that load/weight.</p> <p>08/08/2013 GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.</p> <p>15/08/2013 DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).</p> <p>29/08/2013 DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.</p>	

10606	CE 050	<p>Project Insurance for Group 5 and IT Equipment</p> <p>The Board require the project insurance policy to cover the installation of Group 5 imaging equipment and IT switches prior to completion. The values and timetable for installation of this equipment was made available to establish the value of the additional premium, this has been confirmed as £56,085.00 ex VAT by the insurers. This cover should be in place to meet the installation of the IT switches in October 2013.</p> <p>GW advised that there had been some queries. DH had provided a response which had been forwarded to the insurer. BMCL were awaiting the insurance policy amendment. GW agreed to check with Ian for an update.</p>	<p>23/09/2013</p> <p>03/10/2013</p>	BMCL to upload costs
10675	CE 051	<p>Adult Hospital - Level 4 Zones 512, 513 &amp; 514 HEPA Filtration</p> <p>The Board confirm acceptance of proposals set out in PMI 228 and confirm the design and adaptations to this are should be taken forward and incorporated into the finished building by the contract completion date for Stage 3. The agreed value for these works is £569,001.49 excluding VAT.</p>	02/10/2013	BMCL to upload costs

#### Other items that require discussion:

- 1) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1st floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26th as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20th September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20th September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market.

(05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013) DH advised that he was expecting a response from JFoster on the 1<sup>st</sup> October – JFoster indicating that earliest opportunity for a meeting is 14<sup>th</sup> October 2013. DH expected to be able to confirm the floor requirements. (26/09/2013) **GW enquired who from the NHS was pushing for the MRI info so that BMCL can do the infill works – BMCL awaiting PMI. DR advised that he had a draft PMI to be reviewed by JMcGarrity prior to issue via Sypro. PM advised that JMcG was in the process of checking the Siemens transfer requirements. (03/10/2013)**

- 2) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**
- 3) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HMRC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). **GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013)**
- 4) **Cables to be dropped at the Entrance – DP noted that there is 1 NHS cable and 1 BMCL cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013)**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 16/10/2013:

			08/08/2013	<p>Internal finishes – SF trying to locate these – may request reprints.  Interventional – information returned  Pharmacy – BMCL instructed to fit the out cabinet  Minor Equipment – WIP  Schedule of low voltage – information returned  Metal composite cladding – hard copy never received as was wrong rev no  Medical Air and Vacuum plant – awaiting schematic  Rack – wip to conclude  Safe – instructed PMI to confirm is to be a group 3 item  1<sup>st</sup> floor plans – desk locations – with FW  Renal water – returned as a B status – response from Elgar expected 08/08/2013  GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p>	
			15/08/2013	<p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p>	
			22/08/2013	<p>PM noted provided an update re the RDD Workflow report:  Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL  Desk locations – WIP by FW and he would try to push this on  Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p>	
			29/08/2013	<p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> </ul>	

			<ul style="list-style-type: none"> <li>DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>	
		05/09/2013 12/09/2013	<p>DH advised that there were no outstanding drawings of significance on the list. DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack. PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI. JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
		19/09/2013	<p>PM provided the following update: Car Park –HMc will progress these 3<sup>rd</sup> floor – FW to return by 23/09 Fire Plans – DH to return by 23/09 Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status. Door Type schedule – HM progressing this Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible. Medical Air &amp; Vacuum – with ISandford.</p>	
		26/09/2013	<p>DH provided the following update: Medical Gas calcs – to be noted on register as 'For Info' Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds Car Park – info returned on 25/09 Gillespies - info returned on 25/09 Fire Design – WIP – will return by end of week Remaining drawings – to go back as D status and covered by a PMI</p>	
		03/10/2013	<p>PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>38 items sitting with BMCL</li> </ul>	

			10/10/2013	<ul style="list-style-type: none"> <li>3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p>	
19183	BMCL-EWN-137	VIE Foundation Design	05/09/2013  12/09/2013 19/09/2013  26/09/2013  03/10/2013 10/10/2013	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevard – there may be a disconnect between the Design Team and Constructon team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined cost and that the NHS would not want to spend more money than needs to.</p> <p>AK advised that he was awaiting info re other jobs in Scotland – will chase this up. BMCL propose to commence the works on 28<sup>th</sup> Oct. (PM agreed to provide AK with a copy of a recent complaint).</p> <p>AK advised that he would chase up the sub-contractor for confirmation of date for a site visit. PM enquired if the NHS could be provided with the sub-contractor method statement for the piling works. PM requested that BMCL provide an overview list of the benefits of progressing this type of piling solution.</p>	
19236	BMCL-EWN-138	Modifications to take large gas meter/rig for main gas supply from Renfrew Road	09/09/2013	<p>The new large gas rig/meter to supply full gas flows to the hospital is due for delivery on 07/10/2013. The current arrangement on the Renfrew road side of the site is currently not suitable to take the proposed meter.</p> <p>The NHS took the decision to install a small temporary meter in the first instance. Brookfield made every effort to future proof the infrastructure at this point to accommodate the larger gas meter (see original correspondence 2011 attached) based on supplied generic information.</p>	

			<p>12/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p>	<p>When the large gas meter design eventually came through in May 2013 (see attached), the dimensions and the positioning of the in and out valves were different to what had been envisaged and therefore installed.</p> <p>The gas meter supplier would not release actual design information at the time because the board had not purchased the larger meter.</p> <p>GW advised that he had instructed Mercury to resolve however there would be a cost incurred (Mercury &amp; Dunne). DH raised a query regarding the difference between the sketch and the pictures and GW agreed to check this out. DH enquired about the need for the excavation and DP advised that it is so that the pipe can be brought through. DP noted that the gas board will not provide the drawing until the meter has been purchased therefore this issue could not have been foreseen.</p> <p>GW advised that BMCL had carried out work which was different from what anticipated – GW would liaise with DR. DP suggested that the slab would need to be extended to all 4 sides in order to get the governor, etc placed.</p> <p>GW advised that he understood that the works are finished. GW accepted the query re cost for the works and suggested that the cost is circa £15k. DR suggested that £15k was expensive. DR and GW to liaise to resolve.</p> <p>GW noted that he has information for discussion with DR. WIP to conclude.</p> <p>DR advised this had been discussed with BMCL and this item was now closed.</p>	
--	--	--	---	---	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 16/10/2013

					
SypID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	<p>16/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p>	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p>	

19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013	Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.	
			19/09/2013	GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.	
			26/09/2013	DH advised that a pre-meeting was scheduled for the 10 <sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.	
			03/10/2013	PM noted that feedback from BMCL is awaited. AK advised he would review the drawing. DMF noted that RNetherey was progressing this item. AK advised that he had undertaken a review of the landscaping and BMCL propose to complete the areas starting with south, then east, then west so this area is the last area to be done.	
			10/10/2013	DS advised that a response was awaited from WSP re compliance and costs associated with the SPT proposals. PM noted that the changes would need to be balanced i.e. taking out 2 sets of lights, etc. JB noted that BMCL are working to the agreed red line boundary drawing re street lighting however have concern that GCC will request additional street lighting out-with the red line boundary drawing. PM advised that the NHS concern re the SPT proposals is the potential impact on the star pipe, etc. The NHS need to understand the implications of the proposals.	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 16/10/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the	

A51679245

			<p>last item on the programme.</p> <p>21/02/2013 Progressing on programme</p> <p>28/02/2013 AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>06/03/2013 AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>14/03/2013 AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>04/04/2013 PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>11/04/2013 DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>17/04/2013 DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p>	
--	--	--	--	--

			01/08/2013 08/08/2013  15/08/2013  05/09/2013  19/09/2013 26/09/2013 03/09/2013  10/10/2013	PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement. DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends. DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week. DP noted that the final proposal was with IPowrie for agreement. GW noted this was WIP and he was unsure if DP had received a reply from IP DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited. <b>DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013.</b>	
1978	PMI 217	MTHW System - Site ring	22/05/2013   24/05/2013  06/06/2013  13/06/2013  20/06/2013  27/06/2013   04/07/2013	The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.  The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost. GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works. DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees. AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced. AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses. AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8 <sup>th</sup> /9 <sup>th</sup> July the way forward.	

			<p>11/07/2013 DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL</p> <p>18/07/2013 AS/DH and AK will walkround the proposed area on Friday 19<sup>th</sup> July and report back</p> <p>25/07/2013 AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.</p> <p>01/08/2013 DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.</p> <p>08/08/2013 DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&amp;E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.</p> <p>15/08/2013 AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.</p> <p>22/08/2013 PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.</p> <p>29/08/2013 DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.</p> <p>05/09/2013 DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.</p> <p>12/09/2013 PM advised that he had appointed C&amp;B to carry out a feasibility study.</p> <p>19/09/2013 PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.</p> <p>26/09/2013 DH advised that he will liaise with SMcKechne on his return from leave (1<sup>st</sup> Oct 2013).</p> <p>03/10/2013 PM advised that WW are still working on the design as SMcKechne has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.</p> <p>10/10/2013 PM advised that WW had undertaken a site visit on 8/10 and are currently in the process of finalizing their report. PM anticipated that it would be circa 3 weeks until the NHS will be in a position to confirm the way forward. AK noted that there were no issues with this timeline.</p>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	<p>22/07/2013 In relation to TRA 8001, lighting tracks in MIL-010 &amp; MIL-006 the Board confirm the following:</p> <ul style="list-style-type: none"> <li>- ceiling height for these two rooms to be increased to 2800mm minimum</li> <li>- 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups</li> <li>- Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible</li> <li>- TRA8001 specification to be agreed with users</li> </ul> <p>25/07/2013 DMF advised that he was awaiting the cost info.</p> <p>01/08/2013 DMF agreed to chase this up. DH confirmed that load/weight.</p>	

			<p>08/08/2013 GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.</p> <p>15/08/2013 DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).</p> <p>29/08/2013 DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.</p> <p>05/09/2013 DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.</p> <p>12/09/2013 DH advised that he had provided a response and further feedback and DP and DH would liaise to bottom out the requirements.</p> <p>19/09/2013 DP advised that CGrindley would meet with DH on return to the office. WIP</p> <p>26/09/2013 DH advised that he would liaise with CG. Feedback was awaited re the length of tracks being provided.</p> <p>03/10/2013 GW advised that an internal discussion is required to progress this item</p> <p>10/10/2013 DMF advised that the unistrut was either in the process of being installed or had now been installed. JB noted that this was an equipment list item. DP advised that when BMCL understand the lighting then will issue proposals through RDD process.</p>	
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	<p>14/08/2013 The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location</li> </ol> </li> </ol>	

				and operation of splitters to be advised and costed.	
			22/08/2013 29/08/2013 05/09/2013 12/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013	<p>3. As an option, to replace the above in 4no children's theatres with:</p> <p>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</p> <p>DMF noted that BMCL were working through the detail of this PMI.</p> <p>DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p> <p>DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team.</p> <p>GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom.</p> <p>DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes.</p> <p>DH noted that the costs were under review by the NHS Team.</p> <p>GW advised that BMCL had received a response which required to be reviewed.</p> <p>DMF noted this was work in progress.</p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013 19/09/2013 03/10/2013 10/10/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>PM noted this was WIP. GW advised that the sprinklers shouldn't have been fitted and everyone was verbally aware that this related to the whole suite and not just individual rooms.</p> <p>DS advised that confirmation was awaited from Building Control re the sprinkler omission.</p>	
2252	PMI 249	Adult and Children's Hospitals - Endoscopy Decontamination Suite	25/09/2013	<p>The Board confirm changes to rooms DCT-006 and DCT-010</p> <p>Due to the extended procurement process for endoscopy washers and the urgent requirement to progress the works in the above areas, the Board proposes to omit the following works from the main contract.</p> <p>1) Installation of 2 No. pass through hatches (HAT 1000) (hatches to be provided free issue).</p> <p>2) Internal partition providing sealed separation of DCT-006 and DCT-010 including openings for washers and pass through hatches. Note: this partition would be double walled to provide flush finish on both sides.</p> <p>In addition, the following works should be deferred until the washer procurement has been completed and final service connection details are available.</p> <p>3) Construction of a plinth to accommodate drainage.</p>	

			26/09/2013  10/10/2013	<p>4) Installation of drainage including individual trapped wastes.</p> <p>5) Connection of extract ventilation from individual washers to wider ventilation system.</p> <p>In order to progress the remaining works, the ceiling and floor finishes should be progressed in accordance with the attached sketch, which confirms that vinyl should be continued under the proposed plinth. The 1200mm soffit constructed in moisture resistant plasterboard should be installed at the same level as the general ceiling with access maintained to the area above, via the adjacent ceiling for future ventilation/services connections.</p> <p>DH advised that before raising this PMI this issue had been discussed with DWilson and JMiller. Any issues please discuss with DH.</p> <p><b>It was noted this is WIP</b></p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013	<p>Confirmation of requirements for floor screeds to 3 rooms.</p> <p>Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p>	

### COMPENSATION EVENTS

10606	CE 050	<p>Project Insurance for Group 5 and IT Equipment</p> <p>The Board require the project insurance policy to cover the installation of Group 5 imaging equipment and IT switches prior to completion. The values and timetable for installation of this equipment was made available to establish the value of the additional premium, this has been confirmed as £56,085.00 ex VAT by the insurers. This cover should be in place to meet the installation of the IT switches in October 2013.</p> <p>GW advised that there had been some queries. DH had provided a response which had been forwarded to the insurer. BMCL were awaiting the insurance policy amendment. GW agreed to check with Ian for an update.</p> <p><b>DMF advised that he was chasing up the certificate</b></p>	23/09/2013  03/10/2013  10/10/2013	BMCL to upload costs
10675	CE 051	<p>Adult Hospital - Level 4 Zones 512, 513 &amp; 514 HEPA Filtration</p> <p>The Board confirm acceptance of proposals set out in PMI 228 and confirm the design and adaptations to this are should be taken forward and incorporated into the finished building by the contract completion date for Stage 3. The agreed value for these works is £569,001.49 excluding VAT.</p>	02/10/2013	BMCL to upload costs

- 1) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jams therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster asap so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013) DH advised that he was expecting a response from JFoster on the 1<sup>st</sup> October – Jfoster indicating that earliest opportunity for a meeting is 14<sup>th</sup> October 2013. DH expected to be able to confirm the floor requirements. (26/09/2013) GW enquired who from the NHS was pushing for the MRI info so that BMCL can do the infill works – BMCL awaiting PMI. DR advised that he had a draft PMI to be reviewed by JMcGarrry prior to issue via Sypro. PM advised that JMcG was in the process of checking the Siemens transfer requirements. (03/10/2013) PM advised that a meeting to discuss the MRI rooms had been scheduled for later that day. PM had information for 3 of the rooms. Confirmation of the density of the steelwork is awaited by the NHS (this is being progressed by WSP via GBurnett). PM noted that he proposed to issue information for 3 rooms later that day. A discussion re the containment in the ceilings was required. DP suggested that KHall and RNethery should do an on-site visit with the NHS to agree the rooms. PM agreed to liaise with FW. AK noted that AFe may need to be present on the site visit. PM advised that he had issued an email to DP to confirm that mobile xray machines (not ceiling mounted) will be used in adult resus. (10/10/2013)
- 2) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still

chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliance. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is a query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) **DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013)**

- 3) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legals (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) **DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013)**
- 4) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) **DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013)**
- 5) Ground Water Monitoring - CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued. 01/08/2013 DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring. 08/08/2013 Response awaited from GCC 15/08/2013 DS noted that BMCL would continue to push GCC for a response (22/08/2013) DS noted that the GCC reps was on leave however BMCL had left a message for the rep to call asap (12/09/2013) Response from GCC advising that information has been lost however when they receive a further copy of the information would be recommending that the monitoring can stop. (19/09/2013) GW advised this was WIP – formal confirmation awaited from GCC (26/09/2013) **DS advised that he was checking out the planning condition to check that the condition can be discharged (10/10/2013)**
- 6) Car Park 1 – PM noted that the car park 1 construction is currently 4 weeks behind programme. AK advised that there were a few items to be resolved i.e. back propping, steel delivery dates, however BMCL would be discussing the programme with Dunne in order to identify how to accelerate the works to bring the programme back into line. **BMCL wanted to finish the Car Park as per the programme finish date (10/10/2013)**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 30/10/2013:

				<p>Interventional – information returned</p> <p>Pharmacy – BMCL instructed to fit the out cabinet</p> <p>Minor Equipment – WIP</p> <p>Schedule of low voltage – information returned</p> <p>Metal composite cladding – hard copy never received as was wrong rev no</p> <p>Medical Air and Vacuum plant – awaiting schematic</p> <p>Rack – wip to conclude</p> <p>Safe – instructed PMI to confirm is to be a group 3 item</p> <p>1<sup>st</sup> floor plans – desk locations – with FW</p> <p>Renal water – returned as a B status – response from Elgar expected 08/08/2013</p> <p>GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p> <p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>22/08/2013 PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>29/08/2013 DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been</li> </ul>	
--	--	--	--	---	--

				<p>provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</p>	
			<p>05/09/2013 12/09/2013</p>	<p>DH advised that there were no outstanding drawings of significance on the list. DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack. PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI. JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
			<p>19/09/2013</p>	<p>PM provided the following update: Car Park –HMc will progress these 3<sup>rd</sup> floor – FW to return by 23/09 Fire Plans – DH to return by 23/09 Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status. Door Type schedule – HM progressing this Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible. Medical Air &amp; Vacuum – with ISandford.</p>	
			<p>26/09/2013</p>	<p>DH provided the following update: Medical Gas calcs – to be noted on register as 'For Info' Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds Car Park – info returned on 25/09 Gillespies - info returned on 25/09 Fire Design – WIP – will return by end of week Remaining drawings – to go back as D status and covered by a PMI</p>	
			<p>03/10/2013</p>	<p>PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items sitting with BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> </ul>	

			<p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p>	<ul style="list-style-type: none"> <li>22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL. DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3  SAF 005 - PMI 245 issued now within Group 3  1 outstanding item is MSC1000 Pharmacy cabinet</p>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013 19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course  Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevard – there may be a disconnect between the Design Team and Construction team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined cost and that the NHS would not want to spend more money than needs to.</p> <p>AK advised that he was awaiting info re other jobs in Scotland – will chase this up. BMCL propose to commence the works on 28<sup>th</sup> Oct. (PM agreed to provide AK with a copy of a recent complaint).</p> <p>AK advised that he would chase up the sub-contractor for confirmation of date for a site visit. PM enquired if the NHS could be provided with the sub-contractor method statement for the piling works. PM requested that BMCL provide an overview list of the benefits of progressing this type of piling solution.</p> <p>JB advised that the MJ piling order is ready to issue noting that the NHS Team accepted the piling</p>	

			24/10/2013	<p>solution. PM advised that the piling method was accepted in principle however ask that the piling works do not start on site before 9am noting that there is potential for the works to have to stopped. AK advised that BMCL needed to get the result of 1 static test. PM advised that he would liaised with HMcDerment re providing a communication to the hospital site. AK advised that he would liaise with CDunlop to communicate with neighbours. AK noted that a meeting needed to be brokers with the neighbours as DHalliday was no longer the neighborhood rep. PM advised that he would attend the meeting as the NHS Rep. AK advised that he would confirm to PM the start on site date for the works.</p> <p>AK noted that piling would commence on Monday 18<sup>th</sup> November. Site would be required 1 week prior in order to erect secure hoarding. AK is in discussions with SGH FM staff and HMCD on requirements. Piling programmed to complete within week. Neighbours will be informed via MMCA/PM. Clarity on the hammer weight either 2 ton or 3 ton – AK will clarify this along with the arrangements for neighbourhood meeting.</p>	
20082	BMCL-EWN-13	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3  3.15 Node ICT server room cooling  3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 30/10/2013

						
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in</p>		

A51679245

Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.

19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013	Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.	
			19/09/2013	GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.	
			26/09/2013	DH advised that a pre-meeting was scheduled for the 10 <sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.	
			03/10/2013	PM noted that feedback from BMCL is awaited. AK advised he would review the drawing. DMF noted that RNetherey was progressing this item. AK advised that he had undertaken a review of the landscaping and BMCL propose to complete the areas starting with south, then east, then west so this area is the last area to be done.	
			10/10/2013	DS advised that a response was awaited from WSP re compliance and costs associated with the SPT proposals. PM noted that the changes would need to be balanced i.e. taking out 2 sets of lights, etc. JB noted that BMCL are working to the agreed red line boundary drawing re street lighting however have concern that GCC will request additional street lighting out-with the red line boundary drawing. PM advised that the NHS concern re the SPT proposals is the potential impact on the star pipe, etc. The NHS need to understand the implications of the proposals.	
			17/10/2013	DS advised that he had met with the engineering and landscape architects and had an idea of the costs for the consultants and the associated costs involved with the change. DS suggested that a separate meeting to discuss the changes and costs should be held. DS advised that there was a query regarding the potential need to redo the RCC. Consideration needed to be given to the bus stacking. PM advised that to accommodate the bus stacking it was expected that BMCL would need to reprofile the road. DH advised that the proposals had been discussed in a joint SPT, GCC and NHS meeting to resolve the issue and the RCC may need to be amended however it was thought that GCC would not have any issues and that GCC were not adopting the roads. DS advised that BMCL have proved that the transport hub works. DH advised that due to the design of the kerbs it had been suggested that there is potential for the buses to be damaged. The kerbs needed to be straight so that buses can dock – the curved design does not work. JB noted that there is a phasing issue re the start of the kerbs and buildings. PM advised that the NHS need confirmation that the revised proposal is workable i.e. no impact on starpipe, etc. If workable then a separate discussion re costs can happen at a later date. DS advised that he would liaise with AK re stage 3A works and will thereafter provide the documents to NHS and arrange a meeting to discuss.	
			24/10/2013	DS asked to produce a key issues list for PM prior to this meeting. Costing not required at this time.	

**PROJECT MANAGER'S INSTRUCTION**

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 30/10/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013  17/01/2013 24/01/2013  31/01/2013  07/02/2013 14/02/2013  21/02/2013 28/02/2013  06/03/2013  14/03/2013  04/04/2013  11/04/2013  17/04/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p>	

A51679245

			<p>25/04/2013 DP agreed to chase the proposal</p> <p>02/05/2013 DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>16/05/2013 DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>24/05/2013 DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>06/06/2013 DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>13/06/2013 DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>20/06/2013 DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>27/06/2013 DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>04/07/2013 AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>11/07/2013 This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>18/07/2013 Instruction given to Mercury today and programme will be issued</p> <p>25/07/2013 DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>01/08/2013 PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>08/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>15/08/2013 DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p> <p>05/09/2013 DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>19/09/2013 DP noted that the final proposal was with IPowrie for agreement.</p> <p>26/09/2013 GW noted this was WIP and he was unsure if DP had received a reply from IP</p> <p>03/09/2013 DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.</p> <p>10/10/2013 DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013.</p> <p>24/10/2013 <b>On schedule</b></p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>24/05/2013 GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence</p>	

			06/06/2013	works to install the duct w/c 27/05/2013. AK would have to review level differences, etc DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an

			<p>05/09/2013 instruction will be provided to BMCL. DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.</p> <p>12/09/2013 PM advised that he had appointed C&amp;B to carry out a feasibility study.</p> <p>19/09/2013 PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.</p> <p>26/09/2013 DH advised that he will liaise with SMcKechnie on his return from leave (1<sup>st</sup> Oct 2013).</p> <p>03/10/2013 PM advised that WW are still working on the design as SMcKechnie has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.</p> <p>10/10/2013 PM advised that WW had undertaken a site visit on 8/10 and are currently in the process of finalizing their report. PM anticipated that it would be circa 3 weeks until the NHS will be in a position to confirm the way forward. AK noted that there were no issues with this timeline.</p> <p>17/10/2013 DH advised that he would meet with SMcKechnie on 18<sup>th</sup> October for an update on findings. PM enquired if BMCL were ok with the timing for receiving confirmation of the way forward and AK advised that the O<sub>2</sub> works were to be carried out. DH enquired if BMCL had carried out any scans in that area and AK confirmed that they had not carried out any scans in that area as yet.</p> <p>24/10/2014 <b>This is not concluded and it is unlikely to connect to the neonatal as to connect to an older system will have its own issues. A more likely route is to cross "Lollipop Lane" and terminate close to the junction between the Neo-natal and Maternity buildings. BMCL will complete the pipework and valve off and pressure test and the pipe ends for connection will be located within a chamber for future connection. A PMI to be issued to that effect once the strategy has been ratified.</b></p>	
2115	PMI 237	Medical Illustration - Studio Lighting Supports	<p>22/07/2013 In relation to TRA 8001, lighting tracks in MIL-010 &amp; MIL-006 the Board confirm the following:</p> <ul style="list-style-type: none"> <li>- ceiling height for these two rooms to be increased to 2800mm minimum</li> <li>- 2 x 5.0m length of unistrut support to be installed 200mm above suspended ceiling, set out as per attached mark-ups</li> <li>- Projections (sprinklers/detectors) to be relocated outwith lighting gantry area where possible</li> <li>- TRA8001 specification to be agreed with users</li> </ul> <p>25/07/2013 DMF advised that he was awaiting the cost info.</p> <p>01/08/2013 DMF agreed to chase this up. DH confirmed that load/weight.</p> <p>08/08/2013 GW noted that the services in the room prohibit the install of the unistrut. Mercury is being asked how they proposed to fit the lighting track. There may be an issue re the 2.8m ceiling height.</p> <p>15/08/2013 DMF advised that he had met with DH the previous week to understand what the lighting actually is. Mercury have to provide an RFI to BMCL requesting the exact requirements. There is a concern regarding the load (weight).</p> <p>29/08/2013 DH advised that he had provided fully detailed info including part numbers to BMCL. Met with medical illustration and obtained the supplier quote which had been provided to BMCL.</p> <p>05/09/2013 DMF noted that an email response had been provided to DH. DH agreed to review the response and provide feedback.</p> <p>12/09/2013 DH advised that he had provided a response and further feedback and DP and DH would liaise to bottom out the requirements.</p> <p>19/09/2013 DP advised that CGrindley would meet with DH on return to the office. WIP</p> <p>26/09/2013 DH advised that he would liaise with CG. Feedback was awaited re the length of tracks being</p>	

			29/08/2013 05/09/2013 12/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2013	DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team. GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom. DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes. DH noted that the costs were under review by the NHS Team. GW advised that BMCL had received a response which required to be reviewed. DMF noted this was work in progress. DH advised that he had reviewed the revised costs received earlier that week and would discuss with PM and DL to identify/agree the way forward. <b>It was noted a meeting was scheduled for this pm to take forward. Instruction for 25 theatres with 4 in NCH on hold until OR1 issues is clarified</b>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013 19/09/2013 03/10/2013 10/10/2013 24/10/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. <b>Building Control information is awaited</b>	
2252	PMI 249	Adult and Children's Hospitals - Endoscopy Decontamination Suite	25/09/2013	The Board confirm changes to rooms DCT-006 and DCT-010 Due to the extended procurement process for endoscopy washers and the urgent requirement to progress the works in the above areas, the Board proposes to omit the following works from the main contract. 1) Installation of 2 No. pass through hatches (HAT 1000) (hatches to be provided free issue). 2) Internal partition providing sealed separation of DCT-006 and DCT-010 including openings for washers and pass through hatches. Note: this partition would be double walled to provide flush finish on both sides. In addition, the following works should be deferred until the washer procurement has been completed and final service connection details are available. 3) Construction of a plinth to accommodate drainage. 4) Installation of drainage including individual trapped wastes. 5) Connection of extract ventilation from individual washers to wider ventilation system. In order to progress the remaining works, the ceiling and floor finishes should be progressed in	

			26/09/2013 10/10/2013 24/10/2013	accordance with the attached sketch, which confirms that vinyl should be continued under the proposed plinth. The 1200mm soffit constructed in moisture resistant plasterboard should be installed at the same level as the general ceiling with access maintained to the area above, via the adjacent ceiling for future ventilation/services connections. DH advised that before raising this PMI this issue had been discussed with DWilson and JMiller. Any issues please discuss with DH. It was noted this is WIP <b>BMCL to accept then this item can be closed off</b>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013  17/10/2013  24/10/2013	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. <b>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013 24/10/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others <b>Price is awaited from Mercury on data and power install within the cabin</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these.	

10606	CE 050	<p>Project Insurance for Group 5 and IT Equipment</p> <p>The Board require the project insurance policy to cover the installation of Group 5 imaging equipment and IT switches prior to completion. The values and timetable for installation of this equipment was made available to establish the value of the additional premium, this has been confirmed as £56,085.00 ex VAT by the insurers. This cover should be in place to meet the installation of the IT switches in October 2013.</p> <p>GW advised that there had been some queries. DH had provided a response which had been forwarded to the insurer. BMCL were awaiting the insurance policy amendment. GW agreed to check with Ian for an update. DMF advised that he was chasing up the certificate</p>	<p>23/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p>	<p>Accepted on Sypro 29/10/2013</p>
10675	CE 051	<p>Adult Hospital - Level 4 Zones 512, 513 &amp; 514 HEPA Filtration</p> <p>The Board confirm acceptance of proposals set out in PMI 228 and confirm the design and adaptations to this are should be taken forward and incorporated into the finished building by the contract completion date for Stage 3. The agreed value for these works is £569,001.49 excluding VAT.</p>	<p>02/10/2013</p>	<p>Accepted on Sypro 29/10/2013</p>

#### Other items that require discussion:

- 1) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jambs therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster ASAP so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1st floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26th as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20th September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20th September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH

suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013) DH advised that he was expecting a response from JFoster on the 1<sup>st</sup> October – JFoster indicating that earliest opportunity for a meeting is 14<sup>th</sup> October 2013. DH expected to be able to confirm the floor requirements. (26/09/2013) GW enquired who from the NHS was pushing for the MRI info so that BMCL can do the infill works – BMCL awaiting PMI. DR advised that he had a draft PMI to be reviewed by JMcGarrity prior to issue via Sypro. PM advised that JMcG was in the process of checking the Siemens transfer requirements. (03/10/2013) PM advised that a meeting to discuss the MRI rooms had been scheduled for later that day. PM had information for 3 of the rooms. Confirmation of the density of the steelwork is awaited by the NHS (this is being progressed by WSP via GBurnett). PM noted that he proposed to issue information for 3 rooms later that day. A discussion re the containment in the ceilings was required. DP suggested that KHall and RNetherey should do an on-site visit with the NHS to agree the rooms. PM agreed to liaise with FW. AK noted that AFe may need to be present on the site visit. (10/10/2013) DH advised that the issue re the MRI room on the adult ground floor was that the 5 gauss line extended into the corridor and there had been a note on the drawing provided by BMCL which advised that there was an alternate proposal. This item needs to be concluded however it was proposed to move the machine by 50mm. DP suggested that FW and AStevens may already have visited the site. PM advised that there had been a meeting with FW and AStevens but there had not been a site visit. DP advised that he would liaise with AStevens for an update. PM advised that he would organize a walkround. It was understood that GFW had marked up drawings to give to BMCL (17/10/2013). PM advised that he had issued an email to DP to confirm that mobile xray machines (not ceiling mounted) will be used in adult resus. (10/10/2013) DP noted that he had received confirmation that gantries would not be required in the NCH Resus. PM advised that he would provide a PMI to confirm the omission. (17/10/2013). **Walk rounds being arranged should clarify and resolve any questions raised on mobile positions and power and data (24/10/2013)**

- 2) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 3) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legels are currently reviewing the legal info from AOS ( 15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this

out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). **Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013)**

- 4) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013) DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). **GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnstone are liaising to progress and also with FES/BMCL (24/10/2013)**
- 5) Ground Water Monitoring - CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued. 01/08/2013 DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring. 08/08/2013 Response awaited from GCC 15/08/2013 DS noted that BMCL would continue to push GCC for a response (22/08/2013) DS noted that the GCC reps was on leave however BMCL had left a message for the rep to call asap (12/09/2013) Response from GCC advising that information has been lost however when they receive a further copy of the information would be recommending that the monitoring can stop. (19/09/2013) GW advised this was WIP – formal confirmation awaited from GCC (26/09/2013) DS advised that he was checking out the planning condition to check that the condition can be discharged (10/10/2013). **Letter is anticipated from Glasgow City Council and it was noted that this could be closed out (24/10/2014)**
- 6) Fan coil units – DP advised that BMCL would be issuing an EW re fan coil units, cooling loads & IT – BMCL were having difficulty meeting the ER's and this would need to be discussed with the NHS. (17/10/2013). **DP was in the process of writing up heating and cooling for each of the relevant rooms along with solutions for the hub rooms (24/10/2013)**
- 7) **Finish to area at the NCH wall to atrium – PM asked what the finish was intended to be now that the “feature” has been removed. BMCL – line and paint as part of the design development therefore no cost implications. PMI to be written up by PM (24/10/2013)**
- 8) **Switches – DH raised the issue of £125K worth of additional switches having to be purchased by the Board for the hospitals. DP – it was a developing design and only best estimate information given to NHS for their tender. DP noted he was undertaking an audit to ascertain where the additional switches are required and what the key additions are for, and this information will be forwarded to DH. DP noted that it was known as an estimate and it was understood by all that it would change by either up or down in numbers. Unfortunately no possibility of reducing (24/10/2013)**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 06/11/2013:

				<p>Interventional – information returned  Pharmacy – BMCL instructed to fit the out cabinet  Minor Equipment – WIP  Schedule of low voltage – information returned  Metal composite cladding – hard copy never received as was wrong rev no  Medical Air and Vacuum plant – awaiting schematic  Rack – wip to conclude  Safe – instructed PMI to confirm is to be a group 3 item  1<sup>st</sup> floor plans – desk locations – with FW  Renal water – returned as a B status – response from Elgar expected 08/08/2013  GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.</p>	
		15/08/2013		<p>AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p>	
		22/08/2013		<p>PM noted provided an update re the RDD Workflow report:  Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL  Desk locations – WIP by FW and he would try to push this on  Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p>	
		29/08/2013		<p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been</li> </ul>	

				<p>provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</p>	
			<p>05/09/2013 12/09/2013</p>	<p>DH advised that there were no outstanding drawings of significance on the list. DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about. DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack. PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI. JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p>	
			<p>19/09/2013</p>	<p>PM provided the following update: Car Park –HMc will progress these 3<sup>rd</sup> floor – FW to return by 23/09 Fire Plans – DH to return by 23/09 Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status. Door Type schedule – HM progressing this Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible. Medical Air &amp; Vacuum – with ISandford.</p>	
			<p>26/09/2013</p>	<p>DH provided the following update: Medical Gas calcs – to be noted on register as 'For Info' Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds Car Park – info returned on 25/09 Gillespies - info returned on 25/09 Fire Design – WIP – will return by end of week Remaining drawings – to go back as D status and covered by a PMI</p>	
			<p>03/10/2013</p>	<p>PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> </ul>	

			<p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013</p>	<ul style="list-style-type: none"> <li>22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>2 marked up and returned to BMCL – fire safety design and atrium fire loads</p> <p>Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.</p> <p>Rack 420 – PMI 248 issued now within Group 3</p> <p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevant – there may be a disconnect between the Design Team and Construction team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined</p>	

			<p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013</p>	<p>cost and that the NHS would not want to spend more money than needs to.</p> <p>AK advised that he was awaiting info re other jobs in Scotland – will chase this up. BMCL propose to commence the works on 28<sup>th</sup> Oct. (PM agreed to provide AK with a copy of a recent complaint).</p> <p>AK advised that he would chase up the sub-contractor for confirmation of date for a site visit. PM enquired if the NHS could be provided with the sub-contractor method statement for the piling works. PM requested that BMCL provide an overview list of the benefits of progressing this type of piling solution.</p> <p>JB advised that the MJ piling order is ready to issue noting that the NHS Team accepted the piling solution. PM advised that the piling method was accepted in principle however ask that the piling works do not start on site before 9am noting that there is potential for the works to have to stopped. AK advised that BMCL needed to get the result of 1 static test. PM advised that he would liaised with HMcDerment re providing a communication to the hospital site. AK advised that he would liaise with CDunlop to communicate with neighbours. AK noted that a meeting needed to be brokers with the neighbours as DHalliday was no longer the neighborhood rep. PM advised that he would attend the meeting as the NHS Rep. AK advised that he would confirm to PM the start on site date for the works.</p> <p>AK noted that piling would commence on Monday 18<sup>th</sup> November. Site would be required 1 week prior in order to erect secure hoarding. AK is in discussions with SGH FM staff and HMcD on requirements. Piling programmed to complete within week. Neighbours will be informed via MMCA/PM. Clarity on the hammer weight either 2 ton or 3 ton – AK will clarify this along with the arrangements for neighbourhood meeting.</p> <p>DH advised that confirmation was awaited re size of hammer i.e. 2 tonne or 3 tonne. PM noted that discussion with the residents had taken place. PM acknowledged that it was accepted that BMCL will put blankets around the heras. It was proposed that the neighbours would be notified that the works are due to be progressed.</p>	
20082	BMCL-EWN-13	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3  3.15 Node ICT server room cooling  3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p>	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013	<p>Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.</p> <p>GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.</p> <p>DH advised that a pre-meeting was scheduled for the 10<sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.</p> <p>PM noted that feedback from BMCL is awaited. AK advised he would review the drawing. DMF noted that RNetherey was progressing this item. AK advised that he had undertaken a review of the landscaping and BMCL propose to complete the areas starting with south, then east, then west so this area is the last area to be done.</p> <p>DS advised that a response was awaited from WSP re compliance and costs associated with the SPT proposals. PM noted that the changes would need to be balanced i.e. taking out 2 sets of lights, etc. JB noted that BMCL are working to the agreed red line boundary drawing re street lighting however have concern that GCC will request additional street lighting out-with the red line boundary drawing. PM advised that the NHS concern re the SPT proposals is the potential impact on the star pipe, etc. The NHS need to</p>	

			17/10/2013	understand the implications of the proposals. DS advised that he had met with the engineering and landscape architects and had an idea of the costs for the consultants and the associated costs involved with the change. DS suggested that a separate meeting to discuss the changes and costs should be held. DS advised that there was a query regarding the potential need to redo the RCC. Consideration needed to be given to the bus stacking. PM advised that to accommodate the bus stacking it was expected that BMCL would need to reprofile the road. DH advised that the proposals had been discussed in a joint SPT, GCC and NHS meeting to resolve the issue and the RCC may need to be amended however it was thought that GCC would not have any issues and that GCC were not adopting the roads. DS advised that BMCL have proved that the transport hub works. DH advised that due to the design of the kerbs it had been suggested that there is potential for the buses to be damaged. The kerbs needed to be straight so that buses can dock – the curved design does not work. JB noted that there is a phasing issue re the start of the kerbs and buildings. PM advised that the NHS need confirmation that the revised proposal is workable i.e. no impact on starpipe, etc. If workable then a separate discussion re costs can happen at a later date. DS advised that he would liaise with AK re stage 3A works and will thereafter provide the documents to NHS and arrange a meeting to discuss.	
			24/10/2013 31/10/2013	DS asked to produce a key issues list for PM prior to this meeting. Costing not required at this time. DH confirmed receiving the BMCL feedback and recognised the challenges. A further meeting with SPT and GCC had taken place and a revised solution had been discussed. The revised solution was being checked through by the NHS Team and would be provided to BMCL in due course. DH provided an overview of the proposed revised changes. DH noted that he raised the query re RCC resubmission with GCC and confirmation was awaited. DH noted that as long as the RCC resubmission was not required that the additions and omissions should (or be very close to) balance out. DH agreed to liaise with DS. The revised information would be issued via a PMI to BMCL.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 06/11/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013  17/01/2013 24/01/2013  31/01/2013  07/02/2013 14/02/2013	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage. DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost DP noted this was WIP and that there was a programme for the other areas. DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included. DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4. IP was to be requested to confirm to DP that Nicola had requested no further changes. DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock	

A51679245

			through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.
		21/02/2013	Progressing on programme
		28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.
		06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.
		14/03/2013	AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.
		04/04/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
		11/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
		17/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
		25/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
		02/05/2013	DP agreed to chase the proposal
		16/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
		24/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room. DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
		06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
		13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
		20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
		27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.
		04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.
		11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement
		18/07/2013	Instruction given to Mercury today and programme will be issued
		25/07/2013	DP advised that the design was wip and a programme for the works would be issued asap. DP

			<p>01/08/2013 08/08/2013 15/08/2013 05/09/2013 19/09/2013 26/09/2013 03/09/2013 10/10/2013 24/10/2013</p>	<p>advise that BMCL would liaise with IP re the works. PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement. DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends. DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week. DP noted that the final proposal was with IPowrie for agreement. GW noted this was WIP and he was unsure if DP had received a reply from IP DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited. DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013. <b>On schedule</b></p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013 24/05/2013 06/06/2013 13/06/2013 20/06/2013 27/06/2013 04/07/2013</p>	<p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc</p> <p>DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.</p> <p>DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.</p> <p>AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.</p> <p>AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.</p> <p>AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS</p>	

			11/07/2013	advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			18/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			25/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
				AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.
			05/09/2013	DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.
			12/09/2013	PM advised that he had appointed C&B to carry out a feasibility study.
			19/09/2013	PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.
			26/09/2013	DH advised that he will liaise with SMcKechnie on his return from leave (1st Oct 2013).
			03/10/2013	PM advised that WW are still working on the design as SMcKechnie has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.
			10/10/2013	PM advised that WW had undertaken a site visit on 8/10 and are currently in the process of finalizing their report. PM anticipated that it would be circa 3 weeks until the NHS will be in a position to confirm the way forward. AK noted that there were no issues with this timeline.
			17/10/2013	DH advised that he would meet with SMcKechnie on 18th October for an update on findings. PM enquired if BMCL were ok with the timing for receiving confirmation of the way forward and AK advised that the O <sub>2</sub> works were to be carried out. DH enquired if BMCL had carried out any scans in that area and AK confirmed that they had not carried out any scans in that area as yet.
			24/10/2014	This is not concluded and it is unlikely to connect to the neonatal as to connect to an older system will have its own issues. A more likely route is to cross “Lollipop Lane” and terminate close to the

A51679245

			<p>necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24" monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</li> <li>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</li> </ol> </li> <li>2. In the 9no Children's Theatres <ol style="list-style-type: none"> <li>a) All as above, plus</li> <li>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</li> </ol> </li> <li>3. As an option, to replace the above in 4no children's theatres with: <ol style="list-style-type: none"> <li>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</li> </ol> </li> </ol> <p>22/08/2013 29/08/2013 05/09/2013 12/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2013</p> <p>DMF noted that BMCL were working through the detail of this PMI. DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team. GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom. DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes. DH noted that the costs were under review by the NHS Team. GW advised that BMCL had received a response which required to be reviewed. DMF noted this was work in progress. DH advised that he had reviewed the revised costs received earlier that week and would discuss with PM and DL to identify/agree the way forward.</p> <p>It was noted a meeting was scheduled for this pm to take forward. Instruction for 25 theatres with</p>

				<b>4 in NCH on hold until OR1 issues is clarified</b>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013 03/10/2013 10/10/2013 24/10/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. <b>Building Control information is awaited</b>	
2252	PMI 249	Adult and Children's Hospitals - Endoscopy Decontamination Suite	25/09/2013  26/09/2013 10/10/2013 24/10/2013	The Board confirm changes to rooms DCT-006 and DCT-010 Due to the extended procurement process for endoscopy washers and the urgent requirement to progress the works in the above areas, the Board proposes to omit the following works from the main contract. 1) Installation of 2 No. pass through hatches (HAT 1000) (hatches to be provided free issue). 2) Internal partition providing sealed separation of DCT-006 and DCT-010 including openings for washers and pass through hatches. Note: this partition would be double walled to provide flush finish on both sides. In addition, the following works should be deferred until the washer procurement has been completed and final service connection details are available. 3) Construction of a plinth to accommodate drainage. 4) Installation of drainage including individual trapped wastes. 5) Connection of extract ventilation from individual washers to wider ventilation system. In order to progress the remaining works, the ceiling and floor finishes should be progressed in accordance with the attached sketch, which confirms that vinyl should be continued under the proposed plinth. The 1200mm soffit constructed in moisture resistant plasterboard should be installed at the same level as the general ceiling with access maintained to the area above, via the adjacent ceiling for future ventilation/services connections. DH advised that before raising this PMI this issue had been discussed with DWilson and JMiller. Any issues please discuss with DH. It was noted this is WIP <b>BMCL to accept then this item can be closed off</b>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under	

			17/10/2013	the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACflooding will carry-out the works.	
			24/10/2013	Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to be checked for clarity	
			31/10/2013	DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill.	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others	
			24/10/2013	Price is awaited from Mercury on data and power install within the cabin	
			31/10/2013	DMF advised that he would pursue Mercury for the price information	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these.	
			31/10/2013	DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres.	
2310	PMI 253	MRI Control Room Floor Upfill	04/11/2013	The Board confirm that the floors of MRI Control rooms, listed below, should be up-filled with concrete to finish level with the general finished floor level ready to receive vinyl in accordance with the agreed finished schedule. A short length of floor trunking, 150mm wide x min 80mm deep should be installed on the viewing window wall from the corner of the room to the centre of the window as shown on the attached mark-ups to facilitate cable entry from the MRI room itself should this be required by the Group 5 specialist supplier.	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response. <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> </ul>	

				<p>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</p> <p>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</p> <p>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</p> <p>* Altered road markings</p> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p>	
2318	PMI 255	NCH ED - Bedhead buffer/docking	06/11/2013	<p>Bedhead buffer/docking code 'BED7001' appears to have been omitted from the following bed bays in NCH ED:- * EMC - 023 * EMC - 087 * EMC - 025 Please fit BED7001 in line with the agreed room elevations NA-SZ-XX-AS-400-633 and NA-SZ-XX-AS-400-207</p>	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- 1) MRI Shielding – DH noted that he had received the tender doc which appeared to be a quote rather than a spec and enquired if the calcs were still to be provided. GW advised that the full contract could not be provided without giving information and that BMCL were proposing to award a consultancy contract so way forward can be agreed with NHS reps. AS noted that BMCL needed to have a full understanding of what was to be done before meeting with NHS reps. GW advised that the 2 specialist had provided almost the same proposals. DS suggested that the process to agree the way forward should be discussed. DH comments that the basement cannot be considered as in a controlled zone. PM suggested that the calcs should be discussed with Capita. AS noted that this would need to be discussed with Michael Bradnam. DH advised that he had been unable to locate the slab recess drawings (13/06/2013) AS advised that a 1.5T machine would be transferred however DH was future proofing for a 3T machine. PM noted that the ERs stated that the shielding was to be for a 3T machine. It was noted that if put in steel for a 3t machine that this is not good for a 1.5t machine. AS agreed to liaise with DH and a response would be provided to BMCL by w/e 28/06/2013. DH advised that there was an internal meeting to be had with John Foster and then meeting with BMCL consultant. AS requested that BMCL ask their consultant if he can determine the shielding if don't know the strength of the magnet. DH advised that the BMCL consultant should be asked that if shielding for a 3T machine is installed whether there are any implications should a 1.5T machine be installed instead. GW advised that the BMCL drop dead date is August 2013. GW agreed to liaise with the consultant and provide a response asap. (27/06/2013) It was noted that a meeting with BMCL consultant had been scheduled for 9/07/2013. The NHS were awaiting confirmation of the implications of 3t shielding on a 1.5T machine. GW advised that Bob Nethery was awaiting feedback. DH advised that he was hoping to get an internal meeting in advance of the EEP meeting. DS agreed to liaise with Bob Nethery and requested that the NHS provide a list of queries. RPA – DH advised that he had received an email from AB advising of issues with door jams therefore RPO only able to carry out tests in one area however the visit had went well. (04/07/2013). Modified proposals response due in 2 weeks and to be approved by users (John Foster), Proposals are awaited (18/07/2013) DS advised that he would chase up the proposals (25/07/2013) DH noted that proposals are awaited – informed that there had been a problem with the calcs. Need to get info to John Foster ASAP so he doesn't lose confidence. DH advised that there is a query re shielding/rooms which sits over the large freezer (1<sup>st</sup> floor NCH and another room at the top end). (01/08/2013) DH noted that the proposals had been submitted earlier that week. A flaw had been identified in relation to 1 room and a revised proposal was awaited by lunchtime 09/08/2013. DS was requested to confirm the deadline date for the return of the info to BMCL. DH advised that he would set-up the meeting on the 26<sup>th</sup> as soon as he gets the doc. (08/08/2013) SF noted that meeting with RNethery and JMiller organised (22/08/2013) DH noted that 20<sup>th</sup> September is the proposed date and confirmation is awaited that Ian King can attend. DH would try to get info from John Foster in advance of the meeting. DS requested confirmation that the information was currently being reviewed by John Foster. (29/08/2013) GW noted that the cost info had been received and the design info

would be checked against the design info provided to JFoster. DH advised the NHS had provided information re 3 machines at the outset of the project. DH was awaiting the confirmation of the 20<sup>th</sup> September meeting timing. DS enquired if there was any benefit to be had re difference in shielding versus purchase of other machines. DH suggested that this would not be possible and DS requested that this be considered. DH noted that the parameters provided to BMCL will be provided to the market. (05/09/2013) DH advised that the revised document had been received, JFoster had now returned back from leave and DH would get JFoster to review the revised document. Meeting to be scheduled on the 20<sup>th</sup> Sept - DH would try and get early feedback from JFoster in advance of the meeting. DH would discuss the shielding requirement for the Siemens versus GE and Philips. (12/09/2013). PM advised that confirmation was still awaited from JFoster re revised meeting date as 20<sup>th</sup> Sep is now not possible. GW requested that a PMI be provided to confirm BMCL requirements re concrete fill/screed to the MRI room (19/09/2013) DH advised that he was expecting a response from JFoster on the 1<sup>st</sup> October – Jfoster indicating that earliest opportunity for a meeting is 14<sup>th</sup> October 2013. DH expected to be able to confirm the floor requirements. (26/09/2013) GW enquired who from the NHS was pushing for the MRI info so that BMCL can do the infill works – BMCL awaiting PMI. DR advised that he had a draft PMI to be reviewed by JMcGarrity prior to issue via Sypro. PM advised that JMcG was in the process of checking the Siemens transfer requirements. (03/10/2013) PM advised that a meeting to discuss the MRI rooms had been scheduled for later that day. PM had information for 3 of the rooms. Confirmation of the density of the steelwork is awaited by the NHS (this is being progressed by WSP via GBurnett). PM noted that he proposed to issue information for 3 rooms later that day. A discussion re the containment in the ceilings was required. DP suggested that KHall and RNetherey should do an on-site visit with the NHS to agree the rooms. PM agreed to liaise with FW. AK noted that AFe may need to be present on the site visit. (10/10/2013) DH advised that the issue re the MRI room on the adult ground floor was that the 5 gauss line extended into the corridor and there had been a note on the drawing provided by BMCL which advised that that there was an alternate proposal. This item needs to be concluded however it was proposed to move the machine by 50mm. DP suggested that FW and AStevens may already have visited the site. PM advised that there had been a meeting with FW and AStevens but there had not been a site visit. DP advised that he would liaise with AStevens for an update. PM advised that he would organize a walkround. It was understood that GFW had marked up drawings to give to BMCL (17/10/2013). PM advised that he had issued an email to DP to confirm that mobile xray machines (not ceiling mounted) will be used in adult resus. (10/10/2013) DP noted that he had received confirmation that gantries would not be required in the NCH Resus. PM advised that he would provide a PMI to confirm the omission. (17/10/2013). Walk rounds being arranged should clarify and resolve any questions raised on mobile positions and power and data (24/10/2013) **DH suggested that this item could be closed as he was not aware of any outstanding MRI issues. (31/10/2013)**

- 2) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 3) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legels are currently reviewing the legal info from AOS ( 15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification,

accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). **Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled.**

- 4) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). **GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnstone are liaising to progress and also with FES/BMCL (24/10/2013)**
- 5) Ground Water Monitoring - CE for current extension to be wrapped up in negative CE for stopping the further monitoring. DH noted that he understood that a verbal response had been received from GCC however the report needed to be finalized and submitted to GCC therefore EW should remain open. DS advised that the liner to the suds pond requirements (Stage 3a) were to be identified. The Alex Lee final report was being concluded and would be submitted to GCC in due course. BMCL were as confident as can be that GCC are happy that the monitoring does not need to be continued. 01/08/2013 DS advised that the report had been provided to GCC and formal feedback awaited. SF and GW to liaise re compensation event for the 3 no. additional monthly monitoring. 08/08/2013 Response awaited from GCC 15/08/2013 DS noted that BMCL would continue to push GCC for a response (22/08/2013) DS noted that the GCC reps was on leave however BMCL had left a message for the rep to call asap (12/09/2013) Response from GCC advising that information has been lost however when they receive a further copy of the information would be recommending that the monitoring can stop. (19/09/2013) GW advised this was WIP – formal confirmation awaited from GCC (26/09/2013) DS advised that he was checking out the planning condition to check that the condition can be discharged (10/10/2013). Letter is anticipated from Glasgow City Council and it was noted that this could be closed out (24/10/2014) **It was agreed that this item could be closed as letter received from GCC. A wrap-up CE for the Ground Water monitoring would be issued in due course by the NHS Team. (31/10/2013)**
- 6) **Finish to area at the NCH wall to atrium – PM asked what the finish was intended to be now that the “feature” has been removed. BMCL – line and paint as part of the design development therefore no cost implications. PMI to be written up by PM (24/10/2013)**
- 7) **Switches – DH raised the issue of £125K worth of additional switches having to be purchased by the Board for the hospitals. DP – it was a developing design and only best estimate information given to NHS for their tender. DP noted he was undertaking an audit to ascertain where the additional switches are required and what the key additions are for, and this information will be forwarded to DH. DP noted that it was known as an estimate and it was understood by all that it would change by either up or down in numbers. Unfortunately no possibility of reducing the total point count however configurations will be reviewed to ensure appropriate switches are purchased. (24/10/2013)**
- 8) **Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 409

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 13/11/2013:

<div style="float: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final	

A51679245

			<p>22/08/2013</p> <p>29/08/2013</p> <p>05/09/2013 12/09/2013</p>	<p>proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul> <p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about.</p> <p>DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also</p>	
--	--	--	--	--	--

			<p>be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p> <p>19/09/2013 PM provided the following update:  Car Park –HMc will progress these  3<sup>rd</sup> floor – FW to return by 23/09  Fire Plans – DH to return by 23/09  Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only  Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.  Door Type schedule – HM progressing this  Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.  Medical Air &amp; Vacuum – with ISandford.</p> <p>26/09/2013 DH provided the following update:  Medical Gas calcs – to be noted on register as 'For Info'  Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds  Car Park – info returned on 25/09  Gillespies - info returned on 25/09  Fire Design – WIP – will return by end of week  Remaining drawings – to go back as D status and covered by a PMI</p> <p>03/10/2013 PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>10/10/2013 DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>17/10/2013 DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>24/10/2013 2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3</p>	
--	--	--	--	--

			<p>31/10/2013</p> <p>07/11/2013</p>	<p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>• One group of M&amp;E information which was to be returned later that day.</li> <li>• CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>• Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul>	
19183	BMCL-EWN-137	VIE Foundation Design	<p>05/09/2013</p> <p>12/09/2013</p> <p>19/09/2013</p> <p>26/09/2013</p> <p>03/10/2013</p> <p>10/10/2013</p> <p>17/10/2013</p>	<p>Further to carrying out recent bore hole survey at the new VIE location, it has become apparent that we now require a piled solution due to existing ground conditions. It was previously anticipated that this would be a raft slab solution. We will advise cost and programme implications in due course</p> <p>Noted that BMCL seeking alternate piling solution. Once BMCL have a technical response will discuss this with the NHS. DH advised that he had met with JMurray and would discuss with PM on return from leave.</p> <p>WIP – BMCL are in discussions re piling solution.</p> <p>AK advised that BMCL were getting responses from Contractors – the prices were mainly based on driven piles – 3 day operation. PM raised concern about having driven piles – there were no driven piles on the main build so as not to impact the operational site and neighbours. AK noted that at this time he did not have detail as to whether the driven piles were to be hammered in or pushed in. There would be circa 24 piles in total. It was anticipated that the works would commence mid October. PM noted that planning permissions had been granted.</p> <p>GW advised that AK is meeting with the piling contractor (MJ Piling) to identify a site to visit. DH noted the JM had mentioned Roger Boulevant – there may be a disconnect between the Design Team and Construction team. PM advised that there has always been concern re impact driven piles. GW noted that the Board SI info provided is 20m away and WSP have advised that it is the worst ground conditions found on site. DR noted that BMCL would need to demonstrate that the ground conditions are materially different. BMCL need to put forward a case for driven piles. GW noted that he understood that AK is in discussion with MJ to identify a site for the NHS to visit. It was acknowledged that the piling is a defined cost and that the NHS would not want to spend more money than needs to.</p> <p>AK advised that he was awaiting info re other jobs in Scotland – will chase this up. BMCL propose to commence the works on 28<sup>th</sup> Oct. (PM agreed to provide AK with a copy of a recent complaint).</p> <p>AK advised that he would chase up the sub-contractor for confirmation of date for a site visit. PM enquired if the NHS could be provided with the sub-contractor method statement for the piling works. PM requested that BMCL provide an overview list of the benefits of progressing this type of piling solution.</p> <p>JB advised that the MJ piling order is ready to issue noting that the NHS Team accepted the piling solution. PM advised that the piling method was accepted in principle however ask that the piling works</p>	07/11/2013

			<p>24/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p>	<p>do not start on site before 9am noting that there is potential for the works to have to stopped. AK advised that BMCL needed to get the result of 1 static test. PM advised that he would liaised with HMcDerment re providing a communication to the hospital site. AK advised that he would liaise with CDunlop to communicate with neighbours. AK noted that a meeting needed to be brokers with the neighbours as DHalliday was no longer the neighborhood rep. PM advised that he would attend the meeting as the NHS Rep. AK advised that he would confirm to PM the start on site date for the works.</p> <p>AK noted that piling would commence on Monday 18<sup>th</sup> November. Site would be required 1 week prior in order to erect secure hoarding. AK is in discussions with SGH FM staff and HMcD on requirements. Piling programmed to complete within week. Neighbours will be informed via MMCA/PM. Clarity on the hammer weight either 2 ton or 3 ton – AK will clarify this along with the arrangements for neighbourhood meeting.</p> <p>DH advised that confirmation was awaited re size of hammer i.e. 2 tonne or 3 tonne. PM noted that discussion with the residents had taken place. PM acknowledged that it was accepted that BMCL will put blankets around the heras. It was proposed that the neighbours would be notified that the works are due to be progressed.</p> <p><b>Noted that BMCL had confirmed will be a 2 tonne hammer – agreed item could be closed.</b></p>	
20082	BMCL-EWN-13	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p><b>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</b></p>	

SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p>	
19335	NHS EW 050	Alterations to Arrival Square to achieve workable bus stop geometry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013	<p>Following a visit to site, Strathclyde Partnership for Transport (SPT) have identified that the large radius bus lay-by to the north-east of the adult entrance would be incompatible with the majority of vehicles and would not allow parallel parking to the kerb to enable easy access for all passengers. As they understand the advanced stage of the project and in the knowledge that major changes to the layout are not possible, they have reviewed the operation of the area, in light of Fast-link developments, in order to assist the design team and have proposed alterations to achieve a workable solution for all stakeholders. The attached mark-up indicates their proposed solution.</p> <p>GW noted that RNetherey had reviewed the warrants and has some queries to be discussed with DS before putting back to the NHS.</p> <p>DH advised that a pre-meeting was scheduled for the 10<sup>th</sup> October and feedback from BMCL is required for this meeting. The NHS will meet with SPT at the end of October 2013.</p> <p>PM noted that feedback from BMCL is awaited. AK advised he would review the drawing. DMF noted that RNetherey was progressing this item. AK advised that he had undertaken a review of the landscaping and BMCL propose to complete the areas starting with south, then east, then west so this area is the last area to be done.</p> <p>DS advised that a response was awaited from WSP re compliance and costs associated with the SPT proposals. PM noted that the changes would need to be balanced i.e. taking out 2 sets of lights, etc. JB noted that BMCL are working to the agreed red line boundary drawing re street lighting however have</p>	06/11/2013

			<p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p>	<p>concern that GCC will request additional street lighting out-with the red line boundary drawing. PM advised that the NHS concern re the SPT proposals is the potential impact on the star pipe, etc. The NHS need to understand the implications of the proposals.</p> <p>DS advised that he had met with the engineering and landscape architects and had an idea of the costs for the consultants and the associated costs involved with the change. DS suggested that a separate meeting to discuss the changes and costs should be held. DS advised that there was a query regarding the potential need to redo the RCC. Consideration needed to be given to the bus stacking. PM advised that to accommodate the bus stacking it was expected that BMCL would need to reprofile the road. DH advised that the proposals had been discussed in a joint SPT, GCC and NHS meeting to resolve the issue and the RCC may need to be amended however it was thought that GCC would not have any issues and that GCC were not adopting the roads. DS advised that BMCL have proved that the transport hub works. DH advised that due to the design of the kerbs it had been suggested that there is potential for the buses to be damaged. The kerbs needed to be straight so that buses can dock – the curved design does not work. JB noted that there is a phasing issue re the start of the kerbs and buildings. PM advised that the NHS need confirmation that the revised proposal is workable i.e. no impact on starpipe, etc. If workable then a separate discussion re costs can happen at a later date. DS advised that he would liaise with AK re stage 3A works and will thereafter provide the documents to NHS and arrange a meeting to discuss.</p> <p>DS asked to produce a key issues list for PM prior to this meeting. Costing not required at this time.</p> <p>DH confirmed receiving the BMCL feedback and recognised the challenges. A further meeting with SPT and GCC had taken place and a revised solution had been discussed. The revised solution was being checked through by the NHS Team and would be provided to BMCL in due course. DH provided an overview of the proposed revised changes. DH noted that he raised the query re RCC resubmission with GCC and confirmation was awaited. DH noted that as long as the RCC resubmission was not required that the additions and omissions should (or be very close to) balance out. DH agreed to liaise with DS. The revised information would be issued via a PMI to BMCL.</p> <p>Item closed as PMI 254 issued on 06/11/2013</p>	
--	--	--	---	---	--

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 13/11/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	<p>21/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p> <p>24/01/2013</p> <p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p> <p>21/02/2013</p> <p>28/02/2013</p> <p>06/03/2013</p> <p>14/03/2013</p> <p>04/04/2013</p> <p>11/04/2013</p> <p>17/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p>	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>DP agreed to chase the proposal</p> <p>DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that</p>	

A51679245

			<p>16/05/2013 24/05/2013</p> <p>06/06/2013 13/06/2013</p> <p>20/06/2013 27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013 25/07/2013</p> <p>01/08/2013 08/08/2013</p> <p>15/08/2013</p> <p>05/09/2013</p> <p>19/09/2013 26/09/2013 03/09/2013</p> <p>10/10/2013 24/10/2013 07/11/2013</p>	<p>the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>Agreed way forward – BMCL to plan and implement</p> <p>Instruction given to Mercury today and programme will be issued</p> <p>DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP.</p> <p>Consideration was being given to carrying out the works over weekends.</p> <p>DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>DP noted that the final proposal was with IPowrie for agreement.</p> <p>GW noted this was WIP and he was unsure if DP had received a reply from IP</p> <p>DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.</p> <p>DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013.</p> <p>On schedule</p> <p>DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013</p> <p>24/05/2013</p>	<p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what can be done. AK noted that the works could not be done just now as BMCL were due to commence</p>	

			06/06/2013	works to install the duct w/c 27/05/2013. AK would have to review level differences, etc DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.
			13/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.
			20/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.
			27/06/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.
			04/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			11/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			18/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
			25/07/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			01/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			08/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			15/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			22/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.
			29/08/2013	DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and would confirm their appointment shortly. Once WW have review has been undertaken an

			<p>05/09/2013 instruction will be provided to BMCL.</p> <p>12/09/2013 DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.</p> <p>19/09/2013 PM advised that he had appointed C&amp;B to carry out a feasibility study.</p> <p>26/09/2013 PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.</p> <p>03/10/2013 DH advised that he will liaise with SMcKechnie on his return from leave (1<sup>st</sup> Oct 2013).</p> <p>10/10/2013 PM advised that WW are still working on the design as SMcKechnie has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.</p> <p>17/10/2013 PM advised that WW had undertaken a site visit on 8/10 and are currently in the process of finalizing their report. PM anticipated that it would be circa 3 weeks until the NHS will be in a position to confirm the way forward. AK noted that there were no issues with this timeline.</p> <p>24/10/2014 DH advised that he would meet with SMcKechnie on 18<sup>th</sup> October for an update on findings. PM enquired if BMCL were ok with the timing for receiving confirmation of the way forward and AK advised that the O<sub>2</sub> works were to be carried out. DH enquired if BMCL had carried out any scans in that area and AK confirmed that they had not carried out any scans in that area as yet.</p> <p>31/10/2013 This is not concluded and it is unlikely to connect to the neonatal as to connect to an older system will have its own issues. A more likely route is to cross "Lollipop Lane" and terminate close to the junction between the Neo-natal and Maternity buildings. BMCL will complete the pipework and valve off and pressure test and the pipe ends for connection will be located within a chamber for future connection. A PMI to be issued to that effect once the strategy has been ratified.</p> <p>13/11/2013 DH advised this was WIP with DH, IP and Wallace Whittle and would provide an update w/c 04/11/2013.</p> <p>DH advised this was WIP. DH had drawings for Maternity and WW are confirming that the room can take the plant. AK advised that BMCL needed to be provided with an instruction for any works by end of November so that works can be co-ordinated.</p>	
2164	PMI 246	A&C Hospitals - Surgical Image Viewing - Theatres (20 Adult + 9 Children's)	<p>14/08/2013 The PMI replaces PMI 229, which should be cancelled following the work undertaken to confirm that the proposed monitor arm is indeed capable of accommodating the various AV power cables required to achieve the necessary connections.</p> <p>The Board request separate costs for those additional items which are required to complete the necessary connections, which are as follows:</p> <ol style="list-style-type: none"> <li>1. In the 20no Adult Theatres <ol style="list-style-type: none"> <li>a) 1 x S-Video cable for operating light SD camera – un-terminated (Note: SD operating light camera to be cabled direct to the monitor and not via a wall mounted output) – this item is included within the current scope and is not additional</li> <li>b) 1 x Cat5 cable - proposed for DVI over Cat5 – un-terminated (requires converters).</li> <li>c) 1 x SDI cable - proposed for auxiliary SDI input</li> <li>d) 1 x 24V power cable (6mm) - 24" medical grade monitor – un-terminated – this item is included within the current scope and is not additional</li> <li>e) 1 x SDI or CAT5 for PACs. Eventual cable type will be determined by what inputs the 24"</li> </ol> </li> </ol>	30/10/2013

				<p>monitor can accommodate. Preference from DH/JM was SDI as more flexible in terms of functionality but also smaller in diameter and probably a little easier to work with and longer lasting. This should include the necessary hardware to ensure that the PACs images are orientated consistently on both the surgeons' panel and the monitor mounted on the operating light arm.</p> <p>f) Plates for AV connections on the pendant with plates for DVI and SDI sockets for b) &amp; c) above.</p> <p>2. In the 9no Children's Theatres</p> <p>a) All as above, plus</p> <p>b) these theatres have at least two screens, one on theatre light anchorage and one on arm mounted on surgical pendant. Only PACs image not required on pendant mounted arm. Location and operation of splitters to be advised and costed.</p> <p>3. As an option, to replace the above in 4no children's theatres with:</p> <p>a) Conversion of AV signals, in 1a, 1b, 1c and 1e above to single high quality signal. Display on monitors (possibly up to 3 monitors) via unified modular video input system. Control panel for selection of inputs to be mounted in, or next to, the surgeons' panel. System to be capable of multiple outputs. (users to select source of input to each monitor independently)</p> <p>22/08/2013 DMF noted that BMCL were working through the detail of this PMI.</p> <p>29/08/2013 DMF advised that he was meeting with AMoore (Mercury) later that day and he would obtain an update re the mercury review</p> <p>05/09/2013 DMF noted that Mercury were liaising with Starkstrom and he would progress this item. JB noted that there was now a clear direction. DH noted that there was still a decision to be made by the NHS Team.</p> <p>12/09/2013 GW advised that BMCL are chasing Mercury and Mercury are chasing Starkstrom.</p> <p>19/09/2013 DP advised that the quote had been received back from Mercury however BMCL needed to review. Early indication is £13k – adult theatre and £23k – NCH theatre. GW noted that FW had previously proposed utilizing the money released from the ophthalmology and ENT desk changes.</p> <p>26/09/2013 DH noted that the costs were under review by the NHS Team.</p> <p>03/10/2013 GW advised that BMCL had received a response which required to be reviewed.</p> <p>10/10/2013 DMF noted this was work in progress.</p> <p>17/10/2013 DH advised that he had reviewed the revised costs received earlier that week and would discuss with PM and DL to identify/agree the way forward.</p> <p>24/10/2013 It was noted a meeting was scheduled for this pm to take forward. Instruction for 25 theatres with 4 in NCH on hold until OR1 issues is clarified</p> <p>30/10/2013 <b>Cross reference PMI 252 – Item closed</b></p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p>	

			19/09/2013 03/10/2013 10/10/2013 24/10/2013 07/11/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. <b>Building Control information is awaited</b> <b>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</b>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013  17/10/2013  24/10/2013  31/10/2013 07/11/2013	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. <b>It was agreed this item was now closed.</b>	07/11/2013
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013 24/10/2013 31/10/2013 07/11/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information <b>GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin.</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013  31/10/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these. DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres.	Cross reference PMI 246

			07/11/2013	DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DS agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS.	
2310	PMI 253	MRI Control Room Floor Upfill	04/11/2013	The Board confirm that the floors of MRI Control rooms, listed below, should be up-filled with concrete to finish level with the general finished floor level ready to receive vinyl in accordance with the agreed finished schedule. A short length of floor trunking, 150mm wide x min 80mm deep should be installed on the viewing window wall from the corner of the room to the centre of the window as shown on the attached mark-ups to facilitate cable entry from the MRI room itself should this be required by the Group 5 specialist supplier.	
			07/11/2013	Confirmed as WIP	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p>	
			07/11/2013	Noted that BMCL will review the PMI and provide feedback.	
2318	PMI 255	NCH ED - Bedhead buffer/docking	06/11/2013	Bedhead buffer/docking code 'BED7001' appears to have been omitted from the following bed bays in NCH ED:- * EMC - 023 * EMC - 087 * EMC - 025 Please fit BED7001 in line with the agreed room elevations NA-SZ-XX-AS-400-633 and NA-SZ-XX-AS-400-207	
			07/11/2013	DH noted that this appeared to be an oversight on the nightingale drawings. DS advised that BMCL would do. DH noted that this was an equipment list change therefore needed to be added onto the drawings so is counted.	
2326	PMI 256	New Children's Hospital - Soffit to Medicinema	13/11/2013	<p>Confirmation of finish to concrete wall at soffit</p> <p>In lieu of globe feature, run through metal lathing and plasterboard finish to soffit and face of Medicinema and finish with paint specification as per surrounding area.</p>	

CE for Ground Water monitoring to be concluded

**Other items that require discussion:**

- 1) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 2) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legels are currently reviewing the legal info from AOS ( 15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). **Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013)**
- 3) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). **GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013)**

- 4) Finish to area at the NCH wall to atrium – PM asked what the finish was intended to be now that the “feature” has been removed. BMCL – line and paint as part of the design development therefore no cost implications. PMI to be written up by PM (24/10/2013) **PM noted that confirmation of way forward re plaster board at children’s ball to be provided by NHS. (07/11/2013)**
- 5) Switches – DH raised the issue of £125K worth of additional switches having to be purchased by the Board for the hospitals. DP – it was a developing design and only best estimate information given to NHS for their tender. DP noted he was undertaking an audit to ascertain where the additional switches are required and what the key additions are for, and this information will be forwarded to DH. DP noted that it was known as an estimate and it was understood by all that it would change by either up or down in numbers. Unfortunately no possibility of reducing the total point count however configurations will be reviewed to ensure appropriate switches are purchased. (24/10/2013) **DP advised that the issue had been reviewed in detail. The point count was marginally down - switches been procured as small, medium and large. In circa 6 locations there had been a change to the switch requirements from medium to large. In the locations where the point count was down it was not enough of a decrease to change from the larger switch to a smaller size switch. A number of points had been rationalized. Impact had been reduced by 40-50%. Item closed for BMCL and BMCL understand that Capita are working with the NHS to resolve (07/11/2013)**
- 6) Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) **PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL’s intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013)**
- 7) **Group 5 Specialist Areas Containment – GW advised that he had provided a response to PM. DH noted that the NHS needed to understand the intent i.e. ceiling grids not up. PM advised that information would be provided on a room by room basis and suggested that BMCL and NHS carry out a site walkround (07/11/2013)**

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 425

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 20/11/2013:

<div style="float: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final	

A51679245

			<p>22/08/2013</p> <p>29/08/2013</p> <p>05/09/2013 12/09/2013</p>	<p>proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul> <p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about.</p> <p>DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also</p>	
--	--	--	--	--	--

			<p>be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p> <p>19/09/2013 PM provided the following update:  Car Park –HMc will progress these  3<sup>rd</sup> floor – FW to return by 23/09  Fire Plans – DH to return by 23/09  Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only  Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.  Door Type schedule – HM progressing this  Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.  Medical Air &amp; Vacuum – with ISandford.</p> <p>26/09/2013 DH provided the following update:  Medical Gas calcs – to be noted on register as 'For Info'  Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds  Car Park – info returned on 25/09  Gillespies - info returned on 25/09  Fire Design – WIP – will return by end of week  Remaining drawings – to go back as D status and covered by a PMI</p> <p>03/10/2013 PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>10/10/2013 DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>17/10/2013 DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>24/10/2013 2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3</p>	
--	--	--	--	--

			<p>31/10/2013</p> <p>07/11/2013</p> <p>17/11/2013</p>	<p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>• One group of M&amp;E information which was to be returned later that day.</li> <li>• CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>• Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <p>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</p> <p>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</p> <p>c) Pharmacy Cupboard – PM progressing</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3</p> <p>3.15 Node ICT server room cooling</p> <p>3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e.</p>	

number of ports on the unit or number of active ports.

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 20/11/2013

							
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p>			

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 20/11/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	<p>21/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p> <p>24/01/2013</p> <p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p> <p>21/02/2013</p> <p>28/02/2013</p> <p>06/03/2013</p> <p>14/03/2013</p> <p>04/04/2013</p> <p>11/04/2013</p> <p>17/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p>	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>DP agreed to chase the proposal</p> <p>DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that</p>	

A51679245

			<p>16/05/2013 24/05/2013</p> <p>06/06/2013 13/06/2013</p> <p>20/06/2013 27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013 25/07/2013</p> <p>01/08/2013 08/08/2013</p> <p>15/08/2013</p> <p>05/09/2013</p> <p>19/09/2013 26/09/2013 03/09/2013</p> <p>10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013</p>	<p>the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.</p> <p>DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.</p> <p>DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>DP advised that he would chase up who is doing what and when it is planning to be carried out.</p> <p>DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.</p> <p>DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.</p> <p>This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.</p> <p>Agreed way forward – BMCL to plan and implement</p> <p>Instruction given to Mercury today and programme will be issued</p> <p>DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013</p> <p>Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP.</p> <p>Consideration was being given to carrying out the works over weekends.</p> <p>DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>DP noted that the final proposal was with IPowrie for agreement.</p> <p>GW noted this was WIP and he was unsure if DP had received a reply from IP</p> <p>DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.</p> <p>DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013.</p> <p>On schedule</p> <p>DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works.</p> <p>GW advised that the works were due to commence on 16/11/2013.</p>	
1978	PMI 217	MTHW System - Site ring	<p>22/05/2013</p> <p>24/05/2013</p>	<p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point at the site boundary adjacent to Neo-natal. The pipework should be extended up the fire path on the North Side of neo-natal and turned to the south at the north-west corner, for future extension to the maternity boiler house.</p> <p>The works should be programmed to coincide with the installation of the telecoms ducts which are due to be installed in this area, thus minimising disruption and cost.</p> <p>GW advised that he would provide a marked-up copy to DH which identifies what is there and what</p>	

			06/06/2013	can be done. AK noted that the works could not be done just now as BMCL were due to commence works to install the duct w/c 27/05/2013. AK would have to review level differences, etc
			13/06/2013	DH noted that the principle re what is wanted and expected to be done next year. AS raised concern that this may not fit with the NHS Cashflow. DP agreed to check with AK re indicative date for the works.
			20/06/2013	DH advised that the timing had been discussed with BMCL i.e. end phase of works (oxygen). AK advised that BMCL were liaising with the designers so can ensure all co-ordinated and minimize the need to remove trees.
			27/06/2013	AS proposed that a walk-round should be organized. PM advised that these discussions were tied into the AK drawing discussion. GW noted that the PMI requested that the works be carried out in conjunction with the data cabling works which could not be done as the data cabling works had already commenced.
			04/07/2013	AK noted that 1 of the boreholes will be in the way of the medium temperature hot water pipe (at Fire Road). DH noted that MTHW works should be aligned with the oxygen pipe works. AK noted that the oxygen works were down for be carried out this year. DP noted that the joints for the oxygen pipe will be accessible – a single pipe meets the regulations and the MGPS rep was ok with their only being 1 pipe. DH suggested that it made sense to put 2 pipes into the duct. AK advised that BMCL needed to look at the levels as have a 1m step. AS suggested that BMCL install 2 pipes for resilience. AS noted that he wanted to walk the route /proposals to the 2 boiler houses.
			11/07/2013	AS advised that he was still to have a walkround so can understand what needs to be done before instructing BMCL. AK noted that he did not want to dig up something that had been completed. AS advised that the works should not upset any BMCL completed works. AS agreed to confirm on either 8th/9th July the way forward.
			18/07/2013	DH and AS to take forward. Ring main after 2015 with link in for maternity – AS agreed to update BMCL
			25/07/2013	AS/DH and AK will walkround the proposed area on Friday 19th July and report back
			01/08/2013	AK advised that he would draw up a plan following the walkround discussions however AK would want written confirmation of what is required. AS advised that BMCL need to provide cost which will need to be provided to the NHS Board for approval. DH advised that he would provide a sketch and was checking out the viability later that day.
			08/08/2013	DH advised that he and IP were to carry-out an inspection of the roof. It was noted that BMCL were to do site investigations.
			15/08/2013	DH advised that he had undertaken a site visit and identified route and location for the plate heat exchangers in a redundant plantroom – info provided to PM. DH enquired when BMCL needed to have the works confirmed as he suggested that the NHS proposals would need a high level review by M&E consultant. AK advised that the BMCL were not being held up. AK would liaise with HMc re the services drawings. DH requested that BMCL provide an estimated date for when BMCL would want to carry out the works.
			22/08/2013	AK noted that the design needed to be sorted out and anticipated that the works would not be able to be carried out before Xmas. DP noted that DH was to confirm the connections. DH to be asked to provide an update on return from leave.
			29/08/2013	PM noted that progressing the NHS proposal was incumbent on PM to appoint a specialist to sense check the proposals. PM suggested that this exercise may take 2-3 weeks.
				DH advised he had met with Wallace Whittle (Glasgow) – he briefed them on the requirements and

			<p>05/09/2013 would confirm their appointment shortly. Once WW have review has been undertaken an instruction will be provided to BMCL.</p> <p>12/09/2013 DH advised that he had a proposal to discuss with PM on return from leave and thereafter would discuss with BMCL.</p> <p>19/09/2013 PM advised that he had appointed C&amp;B to carry out a feasibility study.</p> <p>26/09/2013 PM advised that the feasibility study was underway. It was anticipated that it would be circa 2 weeks before the NHS received the report/info back.</p> <p>03/10/2013 DH advised that he will liaise with SMcKechne on his return from leave (1<sup>st</sup> Oct 2013).</p> <p>10/10/2013 PM advised that WW are still working on the design as SMcKechne has been on leave. It was thought that AK was doing a survey of the soft ground. AK noted that the survey had not been undertaken as yet as was awaiting feedback from Wallace Whittle. PM advised that GT would provide feedback to WW that the information is needed for AK to progress works.</p> <p>17/10/2013 PM advised that WW had undertaken a site visit on 8/10 and are currently in the process of finalizing their report. PM anticipated that it would be circa 3 weeks until the NHS will be in a position to confirm the way forward. AK noted that there were no issues with this timeline.</p> <p>24/10/2014 DH advised that he would meet with SMcKechne on 18<sup>th</sup> October for an update on findings. PM enquired if BMCL were ok with the timing for receiving confirmation of the way forward and AK advised that the O<sub>2</sub> works were to be carried out. DH enquired if BMCL had carried out any scans in that area and AK confirmed that they had not carried out any scans in that area as yet.</p> <p>31/10/2013 This is not concluded and it is unlikely to connect to the neonatal as to connect to an older system will have its own issues. A more likely route is to cross "Lollipop Lane" and terminate close to the junction between the Neo-natal and Maternity buildings. BMCL will complete the pipework and valve off and pressure test and the pipe ends for connection will be located within a chamber for future connection. A PMI to be issued to that effect once the strategy has been ratified.</p> <p>13/11/2013 DH advised this was WIP with DH, IP and Wallace Whittle and would provide an update w/c 04/11/2013.</p> <p>20/11/2013 DH advised this was WIP. DH had drawings for Maternity and WW are confirming that the room can take the plant. AK advised that BMCL needed to be provided with an instruction for any works by end of November so that works can be co-ordinated.</p> <p>DH advised that he was working to provide the information before the end November target date.</p> <p>Cross ref PMI 257</p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	<p>16/09/2013 The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>19/09/2013 DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>03/10/2013 PM noted this was WIP.</p>	

			10/10/2013 24/10/2013 07/11/2013  14/11/2013	DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.  <b>Response awaited from Building Control</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013  24/10/2013 31/10/2013 07/11/2013  14/11/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin.  <b>GW advised that price information awaited from Mercury and he would pursue.</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013    31/10/2013 07/11/2013  14/11/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these. DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres. <b>DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS.</b> <b>DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL.</b>	Cross reference PMI 246
2310	PMI 253	MRI Control Room Floor Upfill	04/11/2013   07/11/2013 14/11/2013	The Board confirm that the floors of MRI Control rooms, listed below, should be up-filled with concrete to finish level with the general finished floor level ready to receive vinyl in accordance with the agreed finished schedule. A short length of floor trunking, 150mm wide x min 80mm deep should be installed on the viewing window wall from the corner of the room to the centre of the window as shown on the attached mark-ups to facilitate cable entry from the MRI room itself should this be required by the Group 5 specialist supplier. Confirmed as WIP <b>Agreed Item can be closed</b>	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.	

			07/11/2013 14/11/2013	<p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p>	
2318	PMI 255	NCH ED - Bedhead buffer/docking	06/11/2013  07/11/2013  14/11/2013	<p>Bedhead buffer/docking code 'BED7001' appears to have been omitted from the following bed bays in NCH ED:- * EMC - 023 * EMC - 087 * EMC - 025 Please fit BED7001 in line with the agreed room elevations NA-SZ-XX-AS-400-633 and NA-SZ-XX-AS-400-207</p> <p>DH noted that this appeared to be an oversight on the nightingale drawings. DS advised that BMCL would do. DH noted that this was an equipment list change therefore needed to be added onto the drawings so is counted.</p> <p>GW advised that Gradus had been instructed to do the works and the equipment list had been amended. It was agree this item could be closed.</p>	
2326	PMI 256	New Children's Hospital - Soffit to Medicinema	13/11/2013  14/11/2013	<p>Confirmation of finish to concrete wall at soffit</p> <p>In lieu of globe feature, run through metal lathing and plasterboard finish to soffit and face of Medicinema and finish with paint specification as per surrounding area..</p> <p>It was agree this item could be closed.</p>	
2330	PMI 257	MTHW System – Site Ring	20/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p>	

CE for Ground Water monitoring to be concluded

**Other items that require discussion:**

- 1) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 2) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013) **JB noted that he would write to CUK/AOS seeking a meeting urgently as the NHS are putting pressure on BMCL saying that they will not be paying for the security services. (14/11/2013)**
- 3) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) **GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for**

all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. The NHS are expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013)

- 4) Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013)
- 5) YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013)
- 6) Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)
- 7) PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps..

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 27/11/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final	

			22/08/2013	proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.
			29/08/2013	<p>PM noted provided an update re the RDD Workflow report:  Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL  Desk locations – WIP by FW and he would try to push this on  Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms  DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>
			05/09/2013 12/09/2013	<p>DH advised that there were no outstanding drawings of significance on the list.  DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about.  DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.  PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also</p>

			<p>be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p> <p>19/09/2013 PM provided the following update:  Car Park –HMc will progress these  3<sup>rd</sup> floor – FW to return by 23/09  Fire Plans – DH to return by 23/09  Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only  Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.  Door Type schedule – HM progressing this  Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.  Medical Air &amp; Vacuum – with ISandford.</p> <p>26/09/2013 DH provided the following update:  Medical Gas calcs – to be noted on register as 'For Info'  Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds  Car Park – info returned on 25/09  Gillespies - info returned on 25/09  Fire Design – WIP – will return by end of week  Remaining drawings – to go back as D status and covered by a PMI</p> <p>03/10/2013 PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>10/10/2013 DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>17/10/2013 DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>24/10/2013 2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3</p>	
--	--	--	--	--

			<p>31/10/2013</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p>	<p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>• One group of M&amp;E information which was to be returned later that day.</li> <li>• CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>• Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>c) Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPEC</li> </ol>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3</p> <p>3.15 Node ICT server room cooling</p> <p>3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with</p>	

			14/11/2013	Wallace Whittle prior to providing a formal solution to the NHS for review. DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.	
			21/11/2013	DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu o the associated ER. DP agreed to provide the schedule to DH.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 27/11/2013

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p>	

# PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 27/11/2013

Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	<p>21/12/2012</p> <p>10/01/2013</p> <p>17/01/2013</p> <p>24/01/2013</p> <p>31/01/2013</p> <p>07/02/2013</p> <p>14/02/2013</p> <p>21/02/2013</p> <p>28/02/2013</p> <p>06/03/2013</p> <p>14/03/2013</p> <p>04/04/2013</p> <p>11/04/2013</p> <p>17/04/2013</p> <p>25/04/2013</p> <p>02/05/2013</p>	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.</p> <p>AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.</p> <p>AS noted that the works were WIP however there appeared to be no issues to report.</p> <p>DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs b identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.</p> <p>PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.</p> <p>DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.</p> <p>DP advised that IPowrie and DW had discussed the level 4 requirements.</p> <p>DP agreed to chase the proposal</p> <p>DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that</p>	

A51679245

			<p>16/05/2013 24/05/2013</p> <p>06/06/2013 13/06/2013</p> <p>20/06/2013 27/06/2013</p> <p>04/07/2013</p> <p>11/07/2013</p> <p>18/07/2013 25/07/2013</p> <p>01/08/2013 08/08/2013</p> <p>15/08/2013</p> <p>05/09/2013</p> <p>19/09/2013 26/09/2013 03/09/2013</p> <p>10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013 21/07/2013</p>	<p>the proposals re location of plant, etc would need to be identified for sign-off by IPowrie. DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room. DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.</p> <p>DP advised that he would chase up who is doing what and when it is planning to be carried out. DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&amp;E and BMCL were providing the remedial works to Microbiology.</p> <p>DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal. DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.</p> <p>AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected. This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement</p> <p>Instruction given to Mercury today and programme will be issued DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.</p> <p>PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013 Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.</p> <p>DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.</p> <p>DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.</p> <p>DP noted that the final proposal was with IPowrie for agreement. GW noted this was WIP and he was unsure if DP had received a reply from IP DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.</p> <p>DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013. On schedule DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works. GW advised that the works were due to commence on 16/11/2013.</p> <p>DP suggested that the works may be complete but that he would need to liaise with IP.</p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type</p>	

			19/09/2013 03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013	II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control <b>Noted that Jim Murray had been asked to chase up a response from BControl.</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013  24/10/2013 31/10/2013 07/11/2013  14/11/2013 21/11/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin. GW advised that price information awaited from Mercury and he would pursue. <b>GW advised that it was anticipated that the price would be received by cop 22/11/2013</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013    31/10/2013 07/11/2013  14/11/2013 21/11/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these. DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres. DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS. DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL. <b>DP agreed to chase up Starkstrom for the drop dead date.</b>	Cross reference PMI 246
2317	PMI 254	Alterations to Arrival Square	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.	

			<p>07/11/2013 14/11/2013</p> <p>21/11/2013</p>	<p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p><b>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</b></p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>21/11/2013</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p><b>DP advised that he would re-provide the drawing for NHS sign-off.</b></p>	
2338	PMI 258	HDU Light Fittings in NSGH MDU	<p>27/11/2013</p>	<p>Due to a clash between wall mounted light fittings (LIG005) and external windows the Board confirm that it is acceptable to omit LIG 005 and substitute an HDU fitting (R04D) for 1 no. ceiling fitting (R40) in each of the bays listed below.</p> <p>The R04D fitting will be controlled via the bedhead switch and patient handset to provide variable lighting.</p> <p>The commercial rationalisation will be addressed via the equipment list with the LIG 005's omitted and the extra over light fitting cost added to the 'Recovery Bay Lighting Upgrade. Overall cost is nil.</p>	

				Affected bays (9no.): MDU 013 MDU 014 MDU 015 MDU 022 MDU 023 MDU 024 MDU 025 MDU 026 MDU 027

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- 1) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 2) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re

way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013) **JB noted that he would write to CUK/AOS seeking a meeting urgently as the NHS are putting pressure on BMCL saying that they will not be paying for the security services. (14/11/2013)**

- 3) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) **GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. The NHS are expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013)**
- 4) Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) **PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013)**
- 5) YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) **GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013)**
- 6) Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP) 14/11/2013. **Noted that this is WIP. (21/11/2013)**
- 7) PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) **DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013)**
- 8) Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so can install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013)
- 9) Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013)

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 04/12/2013:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final	

			<p>22/08/2013</p> <p>29/08/2013</p> <p>05/09/2013 12/09/2013</p>	<p>proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.</p> <p>PM noted provided an update re the RDD Workflow report:</p> <p>Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL</p> <p>Desk locations – WIP by FW and he would try to push this on</p> <p>Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms</p> <p>DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul> <p>DH advised that there were no outstanding drawings of significance on the list.</p> <p>DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about.</p> <p>DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.</p> <p>PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also</p>	
--	--	--	--	--	--

			<p>be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p> <p>19/09/2013 PM provided the following update:  Car Park –HMc will progress these  3<sup>rd</sup> floor – FW to return by 23/09  Fire Plans – DH to return by 23/09  Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only  Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.</p> <p>26/09/2013 Door Type schedule – HM progressing this  Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.  Medical Air &amp; Vacuum – with ISandford.  DH provided the following update:  Medical Gas calcs – to be noted on register as 'For Info'  Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds  Car Park – info returned on 25/09  Gillespies - info returned on 25/09  Fire Design – WIP – will return by end of week  Remaining drawings – to go back as D status and covered by a PMI</p> <p>03/10/2013 PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>10/10/2013 DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>17/10/2013 DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>24/10/2013 2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3</p>	
--	--	--	--	--

			<p>31/10/2013</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p>	<p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>• One group of M&amp;E information which was to be returned later that day.</li> <li>• CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>• Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>c) Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3</p> <p>3.15 Node ICT server room cooling</p> <p>3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive</p>	

			07/11/2013 14/11/2013 21/11/2013 28/11/2013	<p>racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	04/12/2013	We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 04/12/2013

							
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the</p>			

A51679245

			24/10/2012	Commercial Reps to provide a list of queries to the NHS. AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.	
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.	
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 04/12/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed. AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	

A51679245

			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs be identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement
			18/07/2013	Instruction given to Mercury today and programme will be issued
			25/07/2013	DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.
			01/08/2013	PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013
			08/08/2013	Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.
			15/08/2013	DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.
			05/09/2013	DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.
			19/09/2013	DP noted that the final proposal was with IPowrie for agreement.
			26/09/2013	GW noted this was WIP and he was unsure if DP had received a reply from IP
			03/09/2013	DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.

			10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/07/2013 28/11/2013	DP advised that the works have been re-programmed to commence on 9 <sup>th</sup> November 2013. On schedule DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works. GW advised that the works were due to commence on 16/11/2013. DP suggested that the works may be complete but that he would need to liaise with IP. <b>DP advised that the physical works substantially complete with some tweaking to controls to be undertaken.</b>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013    19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. <b>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013 24/10/2013 31/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin. GW advised that price information awaited from Mercury and he would pursue. GW advised that it was anticipated that the price would be received by cop 22/11/2013 <b>DH advised that the costs had been received and were under review by PM.</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>20 Adult Theatres</li> <li>5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November.	Cross reference PMI 246

			<p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p>	<p>BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these.</p> <p>DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres.</p> <p>DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS.</p> <p>DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL.</p> <p>DP agreed to chase up Starkstrom for the drop dead date.</p> <p>DP advised that delivery date for NCH equip awaited. DP advised that he would need to meet with DH, FW and ISandford to discuss the proposal for resolving the 3 gases into 2 issue i.e. use a Y piece.</p>	
2317	PMI 254	Alterations to Arrival Square	<p>06/11/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p>	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p>	

			28/11/2013	DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by BControl to revisit the vissim model. DS advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
2330	PMI 257	MTHW System – Site Ring	20/11/2013  28/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p>	
2338	PMI 258	HDU Light Fittings in NSGH MDU	27/11/2013  28/11/2013	<p>Due to a clash between wall mounted light fittings (LIG005) and external windows the Board confirm that it is acceptable to omit LIG 005 and substitute an HDU fitting (R04D) for 1 no. ceiling fitting (R40) in each of the bays listed below.</p> <p>The R04D fitting will be controlled via the bedhead switch and patient handset to provide variable lighting.</p> <p>The commercial rationalisation will be addressed via the equipment list with the LIG 005's omitted and the extra over light fitting cost added to the 'Recovery Bay Lighting Upgrade. Overall cost is nil.</p> <p>Affected bays (9no.):</p> <p>MDU 013 MDU 014 MDU 015 MDU 022 MDU 023 MDU 024 MDU 025 MDU 026 MDU 027</p> <p>DH noted this is an equipment list (below the line) item so therefore was of nil cost to the project.</p>	

CE for Ground Water monitoring to be concluded

**Other items that require discussion:**

- 1) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 2) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legels are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013) JB noted that he would write to CUK/AOS seeking a meeting urgently as the NHS are putting pressure on BMCL saying that they will not be paying for the security services. (14/11/2013) **It was noted that a meeting with the CUK MD had been scheduled to take place on 4<sup>th</sup> December. GW had also spoken to the CUK Financial Director to advise them what information was required for the meeting. (28/11/2013)**
- 3) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson.

AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm.

- 4) Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013)
- 5) YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013) GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).
- 6) Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP) 14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013)
- 7) PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013).
- 8) Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013)

- 9) Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013).

**NEW SOUTH GLASGOW HOSPITALS AND LABS PROJECT  
NEC3 – STATUS UPDATE**

Page 463

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 11/12/2013:

<div style="float: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	05/04/2012	Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.	
			01/08/2013	DH noted that he had reviewed the tracker the previous night and provided the following update: The first few dates appeared to be incorrect Lead lining drawings returned 29/07/2013 MRI Breakout – to be returned later that day Bedhead trunking – to be returned later that day JTC – PM working through – feedback re pharmacy internal cabinet awaited however outer cabinet can be fitted (response re Aconex provided) Minor Equipment schedule – WIP Medical Air Vacuum – awaiting info from DP (schematics) Renal water – with DP Desk locations – reprints awaited.	
			08/08/2013	Internal finishes – SF trying to locate these – may request reprints. Interventional – information returned Pharmacy – BMCL instructed to fit the out cabinet Minor Equipment – WIP Schedule of low voltage – information returned Metal composite cladding – hard copy never received as was wrong rev no Medical Air and Vacuum plant – awaiting schematic Rack – wip to conclude Safe – instructed PMI to confirm is to be a group 3 item 1 <sup>st</sup> floor plans – desk locations – with FW Renal water – returned as a B status – response from Elgar expected 08/08/2013 GW enquired about the dental chair info as FW advised that she thought she had provided the info to BMCL but BMCL are unable to locate. FW had recommended the chair to be purchased. Need FW to confirm that what previously said still stands.	
			15/08/2013	AK noted that DS had advised that there were no issues. DP noted that response from Elgar had been discussed with DH before DH went on leave. There were a couple of minor points to be addressed. A final	

A51679245

			22/08/2013	proposal would be provided to DH on his return from leave. The meeting had also allowed for the formalization of circa 90/95% of the works.
			29/08/2013	<p>PM noted provided an update re the RDD Workflow report:  Pharmacy cab internal discussions was nearing conclusion for return of the RDD to BMCL  Desk locations – WIP by FW and he would try to push this on  Group 5 info – meeting being organized to discuss the BMCL schedule. PM would provide the floor channel info. DP noted that the screeding was due to be carried out therefore that floor channel info was needed asap. GW noted that he needed to know who would be doing the screed for the MRI rooms  DH advised that there were 12 items outstanding which would be worked through over the remained of the week.</p> <ul style="list-style-type: none"> <li>• Desk location info had been returned.</li> <li>• Grp 5 – significant volumes returned, there were a couple of areas to resolve i.e. transfer equipment. It was the same suppliers in tender process for group 5 equipment supply – now tenders returned the suppliers can now survey/review transfer equipment and their draughtsmen. Meeting re group 5 tracker to be held on Tuesday, majority of the information returned and with Julie Miller for review. Once receive feedback then will know what the meeting is to discuss.</li> <li>• Endoscopy washer – discussed re way forward – will take circa 1 year to choose the equipment, plan to do as a schedule of omissions</li> <li>• MRI room screed – DH noted that BMCL should carry out the works as per ERs. GW noted that BMCL would never have expected to do the screed – is a 350mm screed and BMCL have a drawing with 'rough' duct routes. GW noted that he would raise an EW as information is late to complete. DH noted that BMCL had always been advised that the information would be provided early September. DH noted that this had informed discussions with RN – tender process due to conclude end of September then 10 day standstill - need to agree with BMCL what room information is needed first. DS requested that a schedule of dates for BMCL to receive the information from the NHS. AK reported that it would be able to confirm the order of the rooms very quickly.</li> <li>• DS noted that there was Xray kit going into a theatre. DH advised that the detail had been provided. DS reported that if going to core then the NHS would need to provide a derogation and DH confirmed that a derogation would be provided as necessary.</li> </ul>
			05/09/2013 12/09/2013	<p>DH advised that there were no outstanding drawings of significance on the list.  DH advised that circa 50% of the drawings on the list are Medical Gas pipe calcs which are with ISandford. DP noted that there was further info to be provided and enquired if this should be sent as an RDD package or for information. DH advised that he was happy for the calcs to be provided as information. DP advised that the calcs were currently being design reviewed and he was happy to provide the calcs as info. DH noted that both the Medical Gas AEs had suggested that the pipes are too big and are trying to VE with the designers.</p> <ul style="list-style-type: none"> <li>• Vacuum plant schematics – awaited. DP suggested that these had been included in the pack.</li> </ul> <p>DS noted that there were 34 items outstanding under 6 days which he was not concerned about.  DH reported that reprints of the finishes plans would be required. The metal composite RDD was still to be provided as this had been excluded as part of the hard copy pack.  PM advised that the NHS would very shortly provide a spec for the cupboard. A confirmation would also</p>

			<p>be issued to BMCL re not fitting JTC cupboard in the ward stack – an alternate spec would be provided for this – there was no requirement to double cupboard. DS suggested that this may be a derogation as he had understood that pharmacy cabinets need to be a locked cupboard within a locked cupboard. PM advised that confirmation re way forward would be provided asap via a PMI.</p> <p>JB enquired about the way forward re the MRI Concrete build-up and DH advised that a PMI would be provided to BMCL confirming the way forward – it was the intention to get the MRI Contractor to finish off the screed as part of their works package.</p> <p>19/09/2013 PM provided the following update:  Car Park –HMc will progress these  3<sup>rd</sup> floor – FW to return by 23/09  Fire Plans – DH to return by 23/09  Piped medical gas – with ISandford. DP noted that these were all calcs and were to be sent back to BMCL as d status – DP would put a line on the register to say sent for info only  Racks and Wall safes – PMIs issued to cover these. DS requested that these RDD be sent back as D status.</p> <p>26/09/2013 Door Type schedule – HM progressing this  Pharmacy cabinets – will provide a schedule to BMCL indicating what BMCL is to do. BMCL to continue to progress as is and NHS will provide schedule as soon as possible.  Medical Air &amp; Vacuum – with ISandford.  DH provided the following update:  Medical Gas calcs – to be noted on register as 'For Info'  Medical Air &amp; Vacuum – IS is content with the plant however has a query re some manifolds  Car Park – info returned on 25/09  Gillespies - info returned on 25/09  Fire Design – WIP – will return by end of week  Remaining drawings – to go back as D status and covered by a PMI</p> <p>03/10/2013 PM provided the following update against the RDD schedule</p> <ul style="list-style-type: none"> <li>• 38 items returned to BMCL</li> <li>• 3 items re elevations/CP1 – returned 1<sup>st</sup> October</li> <li>• 22 Medical Gas calcs and 1 spec with ISandford which are under review with HPI. DP noted that he expected the calc sheets to be returned as status D then going forward will be issued for information only purposes</li> <li>• Pharmacy cupboards – survey started to identify what has already been fitted and advise way forward.</li> </ul> <p>10/10/2013 DS noted that the items at the bottom of the list needed to be cleared off. DP advised that the medical gas and air drawings needed to be returned so can be removed from the list. The medical gas and air drawings/items are being progressed through meetings. DP advised he would liaise with DH on return from leave. PM acknowledged that there were 49 items on the list to be returned to BMCL.</p> <p>17/10/2013 DH advised that the RDD Tracker had been reviewed with only the Pharmacy Cabinet and Beacon Project RDD outstanding. The bottom 2 items of the tracker are covered by PMIs. DS requested confirmation of which 2 PMIs addressed these 2 items.</p> <p>24/10/2013 2 marked up and returned to BMCL – fire safety design and atrium fire loads  Intravascular catheter cupboard (CUP1054) now moved to group 3 on the current equipment list.  Rack 420 – PMI 248 issued now within Group 3</p>	
--	--	--	--	--

			<p>31/10/2013</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p>	<p>SAF 005 - PMI 245 issued now within Group 3</p> <p>1 outstanding item is MSC1000 Pharmacy cabinet</p> <p>5 Car Park drawings returned on 30/10/2013</p> <p>CUP 1054 – way forward confirmed at the equipment meeting on 30/10/2013</p> <p>Pharmacy cupboard – WIP to conclude</p> <p>JB enquired if a position had been jointly agreed to allow a PMI to be provided. DH advised that agreement was close to being achieved. There are some group 2 items which will be transferred into be a group 3 item. FW and AR were liaising to conclude. It was expected that the position will be finalized by 01/11/2013. DH noted that there was a query with Mercury.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>• One group of M&amp;E information which was to be returned later that day.</li> <li>• CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>• Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>c) Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>a) Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>b) Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3</p> <p>3.15 Node ICT server room cooling</p> <p>3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive</p>	

			07/11/2013 14/11/2013 21/11/2013 28/11/2013	<p>racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	04/12/2013	We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 11/12/2013

							
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status		Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the</p>			

A51679245

			24/10/2012	Commercial Reps to provide a list of queries to the NHS. AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.	
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.	
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 11/12/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012	Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.	
			10/01/2013	DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost	
			17/01/2013	DP noted this was WIP and that there was a programme for the other areas.	
			24/01/2013	DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.	
			31/01/2013	DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9 <sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.	
			07/02/2013	IP was to be requested to confirm to DP that Nicola had requested no further changes.	
			14/02/2013	DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.	
			21/02/2013	Progressing on programme	
			28/02/2013	AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.	
			06/03/2013	AK advised that the next 2 weekends should see the works completed with the exception of level 4 as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed. AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	

A51679245

			14/03/2013	AS noted that the works were WIP however there appeared to be no issues to report. DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs be identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.
			04/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.
			11/04/2013	DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.
			25/04/2013	DP agreed to chase the proposal
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time. Agreed way forward – BMCL to plan and implement
			18/07/2013	Instruction given to Mercury today and programme will be issued
			25/07/2013	DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.
			01/08/2013	PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013
			08/08/2013	Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.
			15/08/2013	DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP. Consideration was being given to carrying out the works over weekends.
			05/09/2013	DP advised that the design was WIP in conjunction with WW, working to agreed programme, contractor to be on board by mid week.
			19/09/2013	DP noted that the final proposal was with IPowrie for agreement.
			26/09/2013	GW noted this was WIP and he was unsure if DP had received a reply from IP
			03/09/2013	DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited.

			10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/07/2013 28/11/2013	DP advised that the works have been re-programmed to commence on 9 <sup>th</sup> November 2013. On schedule DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works. GW advised that the works were due to commence on 16/11/2013. DP suggested that the works may be complete but that he would need to liaise with IP. <b>DP advised that the physical works substantially complete with some tweaking to controls to be undertaken.</b>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013    19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. <b>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013 24/10/2013 31/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin. GW advised that price information awaited from Mercury and he would pursue. GW advised that it was anticipated that the price would be received by cop 22/11/2013 <b>DH advised that the costs had been received and were under review by PM.</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: • 20 Adult Theatres • 5 Childrens' Theatres The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November.	Cross reference PMI 246

			28/11/2013	DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by BControl to revisit the vissim model. DS advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
2330	PMI 257	MTHW System – Site Ring	20/11/2013  28/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p>	
2338	PMI 258	HDU Light Fittings in NSGH MDU	27/11/2013  28/11/2013	<p>Due to a clash between wall mounted light fittings (LIG005) and external windows the Board confirm that it is acceptable to omit LIG 005 and substitute an HDU fitting (R04D) for 1 no. ceiling fitting (R40) in each of the bays listed below.</p> <p>The R04D fitting will be controlled via the bedhead switch and patient handset to provide variable lighting.</p> <p>The commercial rationalisation will be addressed via the equipment list with the LIG 005's omitted and the extra over light fitting cost added to the 'Recovery Bay Lighting Upgrade. Overall cost is nil.</p> <p>Affected bays (9no.):</p> <p>MDU 013 MDU 014 MDU 015 MDU 022 MDU 023 MDU 024 MDU 025 MDU 026 MDU 027</p> <p>DH noted this is an equipment list (below the line) item so therefore was of nil cost to the project.</p>	

2351	PMI 259	Mechanical Ventilation – NSGH-04-HOW-03 Pentamidine Treatment Room	11/12/2013	Following identification of conflicting information within the Works Information, the Board wish to clarify that the requirement for a negatively pressured treatment room as set out in the attached "Update on the Isolation Rooms for the New South Glasgow (Adult) Hospital issued during dialogue takes precedence over the room data sheet, which states a balanced regime. The current ventilation layout indicates both supply and extract at 125 litres/sec and the Board requests adjustment to deliver the negative pressure required.	
------	---------	---	------------	---	--

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- 1) DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- 2) Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legels are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013) JB noted that he would write to CUK/AOS seeking a meeting

urgently as the NHS are putting pressure on BMCL saying that they will not be paying for the security services. (14/11/2013) It was noted that a meeting with the CUK MD had been scheduled to take place on 4<sup>th</sup> December. GW had also spoken to the CUK Financial Director to advise them what information was required for the meeting. (28/11/2013)

- 3) Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm.
- 4) Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013)
- 5) YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013) GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).
- 6) Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013)
- 7) PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the

retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013).

- 8) Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013)
- 9) Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013).

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 18/12/2013:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p><b>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</b></p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling</p>	

				3Kw racks – 1Kw per sq m (on N+1 redundancy where n<4)	
			31/10/2013	Full description of issue contained in attached documents DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m <sup>2</sup> . BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.	
			07/11/2013	DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.	
			14/11/2013	DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.	
			21/11/2013	DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.	
			28/11/2013	DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.	
			12/12/2013	DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2 <sup>nd</sup> PDU which would need to be supplied by Capita.	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	04/12/2013	We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached). <i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i>	
			12/12/2013	GW advised that the additional requirements had now been agreed and a quote was being prepared (up	

				<p>to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).</p> <p>DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.</p>	
--	--	--	--	--	--

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 18/12/2013

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs</p>	
A51679245					

				<p>under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	
--	--	--	--	---	--

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 18/12/2013

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
1590	PMI 197	Laboratory Block - Adaptations to environmental controls	21/12/2012  10/01/2013  17/01/2013 24/01/2013  31/01/2013  07/02/2013 14/02/2013  21/02/2013 28/02/2013  06/03/2013	<p>Monitor and undertake adaptations heating/cooling system in 10 rooms, as agreed with the Board, as result of increased heat loads from installed MSC kit not identified by user group at design stage.</p> <p>DP advised this is WIP. DP would provide an update on the timings, etc. DMF was to check the cost</p> <p>DP noted this was WIP and that there was a programme for the other areas.</p> <p>DP advised this was WIP – works due to commence 28/01/2013. NHS to confirm whether level 4 to be included.</p> <p>DP advised that the NHS requested the programme be re-jigged and a later start date. AK noted that the works would now start on 9<sup>th</sup> Feb 2013. BMCL were awaiting confirmation re level 4.</p> <p>IP was to be requested to confirm to DP that Nicola had requested no further changes.</p> <p>DP advised that work ongoing. DP hadn't received confirmation regarding the proposals to knock through 2 rooms to make 1 room. PM agreed to provide confirmation. DP advised that this was the last item on the programme.</p> <p>Progressing on programme</p> <p>AK advised this was WIP. It was anticipated that the works may be completed over the coming couple of weekend. AS reported that he had advised the Level 4 rep that the DNA machine rep had confirmed that normal air conditioning can be used – further instruction from the level 4 rep was awaited.</p> <p>AK advised that the next 2 weekends should see the works completed with the exception of level 4</p>	12/12/2013

A51679245

				as confirmation of the NHS requirement for level 4 are awaited. PM noted that the works were substantially complete with the exception of level 4 however all the works were to be completed by April and this was confirmed.	
			14/03/2013	AK noted that he organised a meeting to discuss the snags identified in the labs noting that there were very few snags now being reported.	
				AS noted that the works were WIP however there appeared to be no issues to report.	
			04/04/2013	DP noted that Capita had written to BMCL re lighting controls in the large lab area. DWilson has written back to Capita. Capita further responded citing safe working practices. DP thought that DWilson had further responded to Capita on this point. AS requested that the costs be identified to resolve the lighting issue. Responsibility for the costs can be discussed once costs identified.	
			11/04/2013	PM noted that the works almost all finished with the exception of level 4. JB noted that confirmation re level 4 was awaited.	
				DP noted that all the remedial works were finished with the exception of level 4. JB noted that BMCL did not have a scheme for the reduced requirements for level 4. DP agreed to check out and progress as necessary.	
			17/04/2013	DP advised that IPowrie and DW had discussed the level 4 requirements.	
			25/04/2013	DP agreed to chase the proposal	
			02/05/2013	DP advised that he had done an outline with IPowrie – nothing had moved yet. It was noted that the proposals re location of plant, etc would need to be identified for sign-off by IPowrie.	
			16/05/2013	DP advised that DW was visiting the Labs on 17/05 in order to review the routes to the plant room.	
			24/05/2013	DP advised that DW had visited the Labs the previous week and BMCL were in agreement with IP.	
			06/06/2013	DP advised that he would chase up who is doing what and when it is planning to be carried out.	
			13/06/2013	DP noted that he had an outline plan and DW had been struggling to match diaries with IP so that they can go over to the labs. AS noted that this was part of the Labs M&E and BMCL were providing the remedial works to Microbiology.	
			20/06/2013	DP noted that DWilson and IPowrie were still to meet to discuss the BMCL proposal.	
			27/06/2013	DP noted that IP and DW had discussed the BMCL proposal. There was a concern re the cooling drifting across the lab and it was suggested that a cooler draft should be put at 1 end of the Lab and the unit mounted so that it drifts across the equipment.	
			04/07/2013	AS noted that IP and DP were both on leave therefore he did not expect this item had been further progressed. AS stressed that he was against a partition wall being erected.	
			11/07/2013	This is sitting with BMCL and Mercury to resolve – no complaints noted from Labs staff at this time.	
				Agreed way forward – BMCL to plan and implement	
			18/07/2013	Instruction given to Mercury today and programme will be issued	
			25/07/2013	DP advised that the design was wip and a programme for the works would be issued asap. DP advise that BMCL would liaise with IP re the works.	
			01/08/2013	PM advised this was wip to conclude. DL requested an update from DP by 05/08/2013	
			08/08/2013	Noted that design has been progressed. Mercury progressing procurement and will link with IP. It is anticipated that it will take 1 month to conclude the design for procurement.	
			15/08/2013	DP noted that this was wip. The design and procurement was anticipated to be complete in 4 weeks. The install was anticipated to take circa 1 week. The works would be programmed with IP.	
				Consideration was being given to carrying out the works over weekends.	
			05/09/2013	DP advised that the design was WIP in conjunction with WW, working to agreed programme,	

			<p>19/09/2013 26/09/2013 03/09/2013</p> <p>10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013 21/07/2013 28/11/2013</p> <p>12/12/2013</p>	<p>contractor to be on board by mid week. DP noted that the final proposal was with IPowrie for agreement. GW noted this was WIP and he was unsure if DP had received a reply from IP DP noted that the works were due to commence 12/13 October and final confirmation from Labs staff re this date was awaited. DP advised that the works have been re-programmed to commence on 9<sup>th</sup> November 2013. On schedule DP advised that the works had been deferred by a week as 2 of the cooling units had not arrived on site by the due date. BMCL have liaised with IP and Labs Staff to reschedule the works. GW advised that the works were due to commence on 16/11/2013. DP suggested that the works may be complete but that he would need to liaise with IP. DP advised that the physical works substantially complete with some tweaking to controls to be undertaken.</p> <p>Works have been completed therefore item to be closed</p>	
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	<p>16/09/2013</p> <p>19/09/2013 03/10/2013 10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013 21/11/2013 28/11/2013</p> <p>12/12/2013</p>	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	<p>21/10/2013 24/10/2013 31/10/2013 07/11/2013</p> <p>14/11/2013 21/11/2013</p>	<p>Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin. GW advised that price information awaited from Mercury and he would pursue. GW advised that it was anticipated that the price would be received by cop 22/11/2013</p>	

			28/11/2013 12/12/2013	DH advised that the costs had been received and were under review by PM. DH enquired if there was any comment from BMCL re the CCTV. DP advised that the CCTV requirements needed to be discussed with KC and DH in order that BMCL can understand what the NHS want this camera to see noting that there was nothing above the helipad which could be used to locate a camera.	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013    31/10/2013  07/11/2013  14/11/2013  21/11/2013 28/11/2013	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these. DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres. DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS. DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL. DP agreed to chase up Starkstrom for the drop dead date. DP advised that delivery date for NCH equip awaited.	Cross reference PMI 246
2317	PMI 254	Alterations to Arrival Square	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.  The key features are now: <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.	

			<p>07/11/2013 14/11/2013</p> <p>21/11/2013 28/11/2013</p> <p>12/12/2013</p>	<p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p> <p>DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p>	
2351	PMI 259	Mechanical Ventilation – NSGH-04-HOW-03 Pentamidine Treatment Room	<p>11/12/2013</p> <p>12/12/2013</p>	<p>Following identification of conflicting information within the Works Information, the Board wish to clarify that the requirement for a negatively pressured treatment room as set out in the attached "Update on the Isolation Rooms for the New South Glasgow (Adult) Hospital issued during dialogue takes precedence over the room data sheet, which states a balanced regime. The current ventilation layout indicates both supply and extract at 125 litres/sec and the Board requests adjustment to deliver the negative pressure required.</p> <p>DP noted that he would advise how BMCL proposed to achieve negative pressure in the treatment room – there was no physical change required.</p>	

2369	PMI 260	PMI 260 LANGLANDS DRIVE - PROPOSED ADDITIONAL WORKS	18/11/2013	Please provide a price to design and undertake works to Langlands Drive and adjacent parking areas, to be complete by 31st March 2014. These works are to dovetail with similar works to langlands Drive, included with you contract.	
------	---------	---	------------	---	--

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- Security – AS noted that the signage was being changed and the NHS hadn't been formally told of the change of security. GW advised that BMCL were awaiting legal advice and BMCL were continuing to pay CUK. (27/06/2013) AK advised that AOS and CUK were the same company. GW advised that it appeared that the company had done a voluntary CVA and the owner had bought the company back and rebranded it as AOS. AS advised that he needed a formal letter from BMCL advising of the name change and confirming that AOS meets SIA (04/07/2013). DH to check contract for any liabilities for the NHS for security contract change (11/07/2013). AS asked for a statement to confirm that there are no issues for the Board with the change in security provider – GW to provide to DH (18/07/2013) DMF agreed to chase this up (25/07/2013) DMF noted that BMCL had received a request from AOS re assigning contract to CUK – this request was with the BMCL legal's (01/08/2013) GW advised that he had spoken to Director of CUK/AOS, letter awaited from HMRC. BMCL were obtaining a copy of the AOS so that they can carry out due diligence check. AOS is asking for the contract to be novated rather than assigned. BMCL are checking that AOS have the necessary accreditation in place. (08/08/2013) DMF agreed to provide an update asap. It was noted that DL had asked for a report to be provided regarding the recent incidents on site. BMCL Legals are currently reviewing the legal info from AOS (15/08/2013) PM noted that the security certificate had been received. JB noted that BMCL were validating the AOS accounts. The BMCL Legal Advisor is currently on leave. BMCL have AOS accounts for 3 years. BMCL still paying CUK (22/08/2013) GW advised that the BMCL Legal rep was currently on leave. BMCL had received copies of the certification, accounts, financials and were still paying CUK. GW agreed to progress (29/08/2013) GW advised this was WIP to conclude – awaiting on CVA confirmation. (05/09/2013) GW advised that BMCL were awaiting the CV Agreement from HRMC. (12/09/2013) DR suggested that AOS was listed on the BMCL CHEOPS and GW agreed to check this out. GW noted that BMCL had not novated or assigned the security contract to AOS. (19/09/2013) GW advised that the CVA agreement had been received. It would appear that the assets had been transferred from CUK to AOS as AOS is their parent company. BMCL are continuing to pay CUK. Awaiting confirmation from BMCL Legal team re way forward. DH enquired if all the CUK registrations are still valid and GW agreed to check (26/09/2013). GW advised that the AOS meeting would be meeting with GW on site at the end of October. CUK are still in existence with all the necessary registrations, accreditations, etc. (03/10/2013) DMF advised that BMCL would be meeting with AOS at the end of October 2013 (10/10/2013). Nothing further to report until meeting concluded with AOS. Board will be updated as soon as BMCL have an update (24/10/2013) It was noted that the meeting between AOS and BMCL was to be rescheduled. (31/10/2013) JB noted that he would write to CUK/AOS seeking a meeting urgently as the NHS are putting pressure on BMCL saying that they will not be paying for the security services. (14/11/2013) **It was noted that a meeting with the CUK MD had been scheduled to take place on 4<sup>th</sup> December. GW had also spoken to the CUK Financial Director to advise them what information was required for the meeting.**

(28/11/2013) GW advised that all the certificates had been received. BMCL had met with AOS. GW noted that he would provide a copy of the letter received as to what had happened to bring about the name change. (11/12/2013)

- Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm. (28/11/2014) DH noted that there was 1 cable inside the site (Board own) and FES were being instructed to carry out the works w/c 20<sup>th</sup> Jan 2014. Liaison was ongoing with SPEN re getting them to drop their cable in the existing location rather than move their cable (11/12/2013)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13)
- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013)
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013)

- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013)
- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013)
- Practical Completion/Final Certificate – DS advised that he had met with Raymond Barlow to discuss the final certification as BMCL will not be able to complete all the works by handover of the hospitals i.e. SUDS. It was confirmed that BC cannot provide final occupation certification as works are ongoing however they will provide a temporary occupation certification and the NHS are requested to confirm this is acceptable. PM requested that this matter be provided via an EW on Sypro noting that he did not that having temporary occupation certification would not be an issue for the NHS. (12/12/2013)
- Signage/Wayfinding – DS noted that BMCL were reviewing the design however they had a number of B status fire exit signage drawings and the signage meets the code i.e. sign to 1 point of exit. GDonnelly is of a different view and BMCL need the NHS to confirm how many additional signs are required. PM advised that the GD proposals would be reviewed on 13/12/13 and providing that the BMCL proposals meet the guidance/SHTMs, etc then BMCL will be able to progress with their proposals. DS advised that the issue is that the current drawings are B status. DH advised that a way to provide the drawings back as A status with comments marked up will be identified. DH advised that GD had provided a copy of the Fire Action Signs that the NHS want to use across the South Glasgow sites. DS requested that this info be issued to DS, Nigel Hollowell and GBurnett. (12/12/13)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 08/01/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p><i>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</i></p> <p><i>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</i></p>	

				Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	04/12/2013	We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power	

			12/12/2013	<p>outlets and 30 no double data points (drawings attached).  <i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i></p> <p>GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).</p>	
			19/12/2013	<p>DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.</p> <p><b>DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.</b></p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 08/01/2014

						
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status	
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p>		

A51679245

			24/10/2012	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.	
			07/11/2013	AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.	
			21/11/2013	AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion.	
			12/12/2013	AK advised that he was getting a programme plotted for discussion.	
				AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26 <sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.	
			19/12/2013	Meeting of AK and PM to be arranged to discuss AK queries.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 08/01/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room	
			19/09/2013	DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.	
			03/10/2013	PM noted this was WIP.	

A51679245

			<p>10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013 21/11/2013 28/11/2013</p> <p>12/12/2013 19/12/2013</p>	<p>DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</p> <p>Response awaited from Building Control</p> <p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p><b>DS confirmed that response still awaited from Building Control</b></p>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	<p>21/10/2013 24/10/2013 31/10/2013 07/11/2013</p> <p>14/11/2013 21/11/2013 28/11/2013 12/12/2013</p> <p>19/12/2013</p>	<p>Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others</p> <p>Price is awaited from Mercury on data and power install within the cabin</p> <p>DMF advised that he would pursue Mercury for the price information</p> <p>GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin.</p> <p>GW advised that price information awaited from Mercury and he would pursue.</p> <p>GW advised that it was anticipated that the price would be received by cop 22/11/2013</p> <p>DH advised that the costs had been received and were under review by PM.</p> <p>DH enquired if there was any comment from BMCL re the CCTV. DP advised that the CCTV requirements needed to be discussed with KC and DH in order that BMCL can understand what the NHS want this camera to see noting that there was nothing above the helipad which could be used to locate a camera.</p> <p><b>DH advised that a response was awaited re what the camera was to look at however the camera requirement had been part of the ERs. GW requested confirmation of the way forward.</b></p>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p>	<p>Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to:</p> <ul style="list-style-type: none"> <li>• 20 Adult Theatres</li> <li>• 5 Childrens' Theatres</li> </ul> <p>The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November.</p> <p>BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these.</p> <p>DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres.</p> <p>DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS.</p> <p>DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL.</p>	Cross reference PMI 246

			19/12/2013	there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC. DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.	
2330	PMI 257	MTHW System – Site Ring	20/11/2013  28/11/2013  12/12/2013 19/12/2013	This PMI replaces PMI-217 which should be cancelled. The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge. The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser. It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing). DH advised that a PMI would be provided to confirm the way forward. AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.	
2351	PMI 259	Mechanical Ventilation – NSGH-04-HOW-03 Pentamidine Treatment Room	11/12/2013  12/12/2013  19/12/2013	Following identification of conflicting information within the Works Information, the Board wish to clarify that the requirement for a negatively pressured treatment room as set out in the attached "Update on the Isolation Rooms for the New South Glasgow (Adult) Hospital issued during dialogue takes precedence over the room data sheet, which states a balanced regime. The current ventilation layout indicates both supply and extract at 125 litres/sec and the Board requests adjustment to deliver the negative pressure required. DP noted that he would advise how BMCL proposed to achieve negative pressure in the treatment room – there was no physical change required. DP noted that the works would be carried out as part of commissioning/balancing activities. It was agreed this item could be closed.	19/12/2013
2369	PMI 260	PMI 260 LANGLANDS DRIVE - PROPOSED ADDITIONAL WORKS	18/12/2013  19/12/2013	Please provide a price to design and undertake works to Langlands Drive and adjacent parking areas, to be complete by 31st March 2014. These works are to dovetail with similar works to Langlands Drive, included with you contract. DS advised this needed to be discussed as he had undertaken discussions with BMCL consultants. The background of the as-built drawing is not quite right. Members discussed the drawings which were tabled. DH advised that the enquiry was on the basis of maximizing spaces and would need to be predominantly completed and if BMCL can't do the works before the end of March then the NHS will not go-ahead with the works. DS suggested that a section 56 may be required however BMCL could stop the works 5m back from the junction if this would assist. DH advised that the pricing and assessment of the programme was urgent in order to identify what is	

				achievable.	
2379	PMI 261	Helipad Changing Room Supplies & CCTV	24/12/2013	<p>The Board confirm the requirement for 2no. CCTV cameras, one above the entrance door to Core G viewing the access ramp and one to cover the helipad (exact position to be agreed).</p> <p>The Board instruct the provision of power, data and fire alarm in accordance with the quote submitted under PMI 251. The total cost of £7072.86 (ex VAT) to be added to the Group 1 Equipment List.</p>	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	24/12/2013	<p>Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms.</p> <p>Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list.</p>	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). **DP confirmed that this was a WIP (24/10/2013)**
- Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm. (28/11/2014) DH noted that there was 1 cable inside the site (Board own) and FES were being instructed to carry out the works w/c 20<sup>th</sup> Jan 2014. Liaison was ongoing with SPEN re getting them to drop their cable in the existing location rather than move their cable (11/12/2013) **DH advised that he had considerable communication with SPEN and saw no issue with the 20<sup>th</sup> Jan 2014 – SPEN just closing out the paperwork. DH queried the change of access to the site and AK suggested that this would most likely be mid/end Feb. AK noted that tarmac would need to be put onto the Fire Road. AK would have an action plan for the change in access by end of Jan 2014. (19/12/2013)**

- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) **DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCaldenwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013)**
- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) **DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). **DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013)**
- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) **It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013)**

- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013) **AK noted that other trades had now started and there were others to start January 2014. BMCL progressing on the basis of the revised programme based on 12<sup>th</sup> May. Temporary escape route to be identified (19/12/2013)**
- Practical Completion/Final Certificate – DS advised that he had met with Raymond Barlow to discuss the final certification as BMCL will not be able to complete all the works by handover of the hospitals i.e. SUDS. It was confirmed that BC cannot provide final occupation certification as works are ongoing however they will provide a temporary occupation certification and the NHS are requested to confirm this is acceptable. PM requested that this matter be provided via an EW on Sypro noting that he did not that having temporary occupation certification would not be an issue for the NHS. (12/12/2013) **DS advised that he would provide an EW on this matter (19/12/2013)**
- Signage/Wayfinding – DS noted that BMCL were reviewing the design however they had a number of B status fire exit signage drawings and the signage meets the code i.e. sign to 1 point of exit. GDonnelly is of a different view and BMCL need the NHS to confirm how many additional signs are required. PM advised that the GD proposals would be reviewed on 13/12/13 and providing that the BMCL proposals meet the guidance/SHTMs, etc then BMCL will be able to progress with their proposals. DS advised that the issue is that the current drawings are B status. DH advised that a way to provide the drawings back as A status with comments marked up will be identified. DH advised that GD had provided a copy of the Fire Action Signs that the NHS want to use across the South Glasgow sites. DS requested that this info be issued to DS, Nigel Hollowell and GBurnett. (12/12/13) **DS advised that he will amend the drawings and include the GDonnelly re type of signs. (19/12/2013)**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 15/01/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p>	

			12/12/2013	DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2 <sup>nd</sup> PDU which would need to be supplied by Capita.	
			19/12/2013	DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.	
			08/01/2014	Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	04/12/2013	We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached). <i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i>	
			12/12/2013	GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).	
			19/12/2013	DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations. DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.	
			08/01/2014	GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 08/01/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e.information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	

A51679245

			19/12/2013 14/01/2014	Meeting of AK and PM to be arranged to discuss AK queries. <b>Meeting to be scheduled to review some aspects of the work</b>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 08/01/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013  12/12/2013  19/12/2013 09/01/2014	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>PM noted this was WIP.</p> <p>DS advised that confirmation was awaited from Building Control re the sprinkler omission.</p> <p>Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</p> <p>Response awaited from Building Control</p> <p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p><b>DS reported that no information was anticipated from GCC before March. DS agreed to follow up.</b></p>	

A51679245

				<b>No impact to BMCL programme whilst awaiting information</b>	
2292	PMI251	Adult Hospital – Services to changing room for helipad	21/10/2013 24/10/2013 31/10/2013 07/11/2013 14/11/2013 21/11/2013 28/11/2013 12/12/2013 19/12/2013 09/01/2014	Further to PMI 147, the Board confirm service requirement to the level 13 fire fighters changing room routed into the cabin once construction by others Price is awaited from Mercury on data and power install within the cabin DMF advised that he would pursue Mercury for the price information GW advised that price information awaited from Mercury and he would pursue. DP enquired whether Mercury should be pricing for the testing of the electricity in the changing cabin. GW advised that price information awaited from Mercury and he would pursue. GW advised that it was anticipated that the price would be received by cop 22/11/2013 DH advised that the costs had been received and were under review by PM. DH enquired if there was any comment from BMCL re the CCTV. DP advised that the CCTV requirements needed to be discussed with KC and DH in order that BMCL can understand what the NHS want this camera to see noting that there was nothing above the helipad which could be used to locate a camera. DH advised that a response was awaited re what the camera was to look at however the camera requirement had been part of the ERs. GW requested confirmation of the way forward. <b>DH noted that a PMI has already been issued and that this issue was now resolved – this item to be closed.</b>	
2307	PMI 252	Group 1 Equipment: Surgical Image Viewing	30/10/2013 31/10/2013 07/11/2013 14/11/2013 21/11/2013 28/11/2013 19/12/2013 09/01/2014	Further to PMI 246 and referring to the revised priced submission for the installation of infrastructure cabling and associated hardware for Image viewing in Theatres, the Board wish to proceed with the installation to: • 20 Adult Theatres • 5 Childrens' Theatres The selection of the four Theatres to be omitted at this time will be advised by the Board not later than Friday 01 November. BMCE to provide an end-stop date for the instruction of cabling and hardware into any of the four Theatres omitted at this time, should the Board decide not to proceed with the alternative installations to any or all of these. DP advised that he would provide a back-stop date for confirmation to be provided to BMCL re 4 NCH theatres. DH requested that BMCL advise the latest date that the NHS can confirm that 4 NCH Theatres. DP agreed to review the Starkstrom programme and confirm the latest date to receive information from the NHS. DH advised that he was waiting on confirmation from BMCL of the end stop date by which confirmation re 4 NCH Theatres needed to be provided to BMCL. DP agreed to chase up Starkstrom for the drop dead date. DP advised that delivery date for NCH equip awaited. DP noted that he had liaised with Mercury on 18/12, it was suggested that the delivery date for the NCH Equipment was soon and he would confirm this date asap. <b>DP reported that dates for installation have been agreed – this item can now be closed</b>	Cross reference PMI 246
2317	PMI 254	Alterations to Arrival Square	06/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but	

				<p>eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>07/11/2013 14/11/2013</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>21/11/2013</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p> <p>28/11/2013</p> <p>DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>12/12/2013</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>19/12/2013</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>09/01/2014</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p>	
2330	PMI 257	MTHW System – Site Ring	20/11/2013	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along</p>	

			<p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p>	<p>the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p><b>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</b></p>	
2351	PMI 259	Mechanical Ventilation – NSGH-04-HOW-03 Pentamidine Treatment Room	<p>11/12/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Following identification of conflicting information within the Works Information, the Board wish to clarify that the requirement for a negatively pressured treatment room as set out in the attached “Update on the Isolation Rooms for the New South Glasgow (Adult)Hospital issued during dialogue takes precedence over the room data sheet, which states a balanced regime. The current ventilation layout indicates both supply and extract at 125 litres/sec and the Board requests adjustment to deliver the negative pressure required.</p> <p>DP noted that he would advise how BMCL proposed to achieve negative pressure in the treatment room – there was no physical change required.</p> <p>DP noted that the works would be carried out as part of commissioning/balancing activities. It was agreed this item could be closed.</p>	19/12/2013
2369	PMI 260	PMI 260 LANGLANDS DRIVE - PROPOSED ADDITIONAL WORKS	<p>18/12/2013</p> <p>19/12/2013</p>	<p>Please provide a price to design and undertake works to Langlands Drive and adjacent parking areas, to be complete by 31st March 2014. These works are to dovetail with similar works to Langlands Drive, included with you contract.</p> <p>DS advised this needed to be discussed as he had undertaken discussions with BMCL consultants. The background of the as-built drawing is not quite right. Members discussed the drawings which were tabled. DH advised that the enquiry was on the basis of maximizing spaces and would need to be predominantly completed and if BMCL can't do the works before the end of March then the NHS will not go-ahead with the works. DS suggested that a section 56 may be required however BMCL could stop the works 5m back from the junction if this would assist. DH advised that the pricing and assessment of the programme was urgent in order to identify what is achievable.</p>	
2379	PMI 261	Helipad Changing Room Supplies & CCTV	24/12/2013	The Board confirm the requirement for 2no. CCTV cameras, one above the entrance door to Core G viewing the access ramp and one to cover the helipad (exact position to be agreed).	

				The Board instruct the provision of power, data and fire alarm in accordance with the quote submitted under PMI 251. The total cost of £7072.86 (ex VAT) to be added to the Group 1 Equipment List.	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	24/12/2013  09/01/2014	Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms. Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list.  It was decided that a meeting would be arranged in order to ascertain the correct cabinets to be ordered and a further PMI issued	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). DP confirmed that this was a WIP (24/10/2013). **No change to status (09/01/201)**
- Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm. (28/11/2014) DH noted that there was 1 cable inside the site (Board own) and FES were being instructed to carry out the works w/c 20<sup>th</sup> Jan 2014. Liaison was ongoing with SPEN re getting them to drop their cable in the existing location rather than move their cable (11/12/2013) DH advised that he had considerable communication with SPEN and saw no issue with the 20<sup>th</sup> Jan 2014 – SPEN just closing out the paperwork. DH queried the change of access to the site and AK suggested that this would most likely be mid/end Feb. AK noted that tarmac would need to be put onto the Fire Road. AK would have an action plan for the change in access by end of Jan 2014. (19/12/2013) **item can now be removed as information has been received (09/01/2014)**

- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RC Calderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AH Alliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). **A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014)**
- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP) 14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie.
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). **DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014)**
- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). **DH reported that FWraith was planning meetings for several of the specialist areas and liaising with**

AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014)

- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013) AK noted that other trades had now started and there were others to start January 2014. BMCL progressing on the basis of the revised programme based on 12<sup>th</sup> May. Temporary escape route to be identified (19/12/2013). **AK reported that he was preparing proposals for NHS to ensure that fire escape on to site was in situ for the use of the car park as this is hope to be in use before the hospitals are handed over. Programme for completion of the car park is under review after the recent Christmas break and AK will update D/H (09/01/2014)**
- Practical Completion/Final Certificate – DS advised that he had met with Raymond Barlow to discuss the final certification as BMCL will not be able to complete all the works by handover of the hospitals i.e. SUDS. It was confirmed that BC cannot provide final occupation certification as works are ongoing however they will provide a temporary occupation certification and the NHS are requested to confirm this is acceptable. PM requested that this matter be provided via an EW on Sypro noting that he did not that having temporary occupation certification would not be an issue for the NHS. (12/12/2013) DS advised that he would provide an EW on this matter (19/12/2013). **DS noted that he has requested a copy of the pro-forma of the certificates in order that these can be discussed at the PMG on 21<sup>st</sup> January (09/01/2014)**
- Signage/Wayfinding – DS noted that BMCL were reviewing the design however they had a number of B status fire exit signage drawings and the signage meets the code i.e. sign to 1 point of exit. GDonnelly is of a different view and BMCL need the NHS to confirm how many additional signs are required. PM advised that the GD proposals would be reviewed on 13/12/13 and providing that the BMCL proposals meet the guidance/SHTMs, etc then BMCL will be able to progress with their proposals. DS advised that the issue is that the current drawings are B status. DH advised that a way to provide the drawings back as A status with comments marked up will be identified. DH advised that GD had provided a copy of the Fire Action Signs that the NHS want to use across the South Glasgow sites. DS requested that this info be issued to DS, Nigel Hollowell and GBurnett. (12/12/13) DS advised that he will amend the drawings and include the GDonnelly re type of signs. (19/12/2013). **DS anticipated the single direction of escape signage returned information by end of January. BMCL will comply with all statutory requirements as necessary (09/01/2014)**

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 22/01/2014:

<div style="float: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			15/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p>	
			31/10/2013	<p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p>	
			07/11/2013	<p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p>	
			14/11/2013	<p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4</p>	

			<p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014 16/01/2014</p>	<p>items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p><b>DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</b></p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	<p>04/12/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).</p> <p><i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i></p> <p>GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).</p> <p>DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.</p> <p>DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.</p>	

		09/01/2014	GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.	
		16/01/2014	DH noted that no further back-up had been received by the NHS so the Board had undertaken their own assessment and re-issued this back to BMCL for review.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 22/01/2014

					
SyproID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that</p>	

A51679245

			19/12/2013 09/01/2014 16/01/2014	<p>BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>Meeting to be scheduled to review some aspects of the work</p> <p><b>Noted that AK and PM were meeting later that day to discuss BMCL queries.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014          16/01/2014	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p><b>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</b></p>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 22/01/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013       19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>PM noted this was WIP.</p> <p>DS advised that confirmation was awaited from Building Control re the sprinkler omission.</p> <p>Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</p>	

A51679245

			<p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>15/01/2014</p>	<p>to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no authority issue for BMCL.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>15/01/2014</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p>	
2369	PMI 260	PMI 260 LANGLANDS DRIVE - PROPOSED ADDITIONAL WORKS	18/12/2013	<p>Please provide a price to design and undertake works to Langlands Drive and adjacent parking areas, to be complete by 31st March 2014. These works are to dovetail with similar works to Langlands Drive, included with you contract.</p>	

			19/12/2013	DS advised this needed to be discussed as he had undertaken discussions with BMCL consultants. The background of the as-built drawing is not quite right. Members discussed the drawings which were tabled. DH advised that the enquiry was on the basis of maximizing spaces and would need to be predominantly completed and if BMCL can't do the works before the end of March then the NHS will not go-ahead with the works. DS suggested that a section 56 may be required however BMCL could stop the works 5m back from the junction if this would assist. DH advised that the pricing and assessment of the programme was urgent in order to identify what is achievable.	
			16/01/2014	PM advised that subject to a meeting w/c 6 <sup>th</sup> Jan 13 it had been agreed that the NHS would do these works direct therefore this PMI would be cancelled.	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	24/12/2013	Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms. Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list.	
			09/01/2014	It was decided that a meeting would be arranged in order to ascertain the correct cabinets to be ordered and a further PMI issued	
			16/01/2014	PM noted that there were 6/7 cabinets in radiology. PM would liaise with FW to check if confirmation had been provided to BMCL re these cabinets. DS noted that he had thought that a meeting was to be arranged. PM advised that he had a discussion with GW and AKerr and had offered to meet with BMCL if needed and had no request for a meeting as yet. DS & GW agreed to liaise with AKerr and RNetherey re need for a meeting. It was noted that the drug cabinets will be dealt with through the equipment list.	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). DP confirmed that this was a WIP (24/10/2013). No change to status (09/01/2014) **DP advised that he had a meeting scheduled with JBushfield. (16/01/2014)**
- Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson.

AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm. (28/11/2014) DH noted that there was 1 cable inside the site (Board own) and FES were being instructed to carry out the works w/c 20<sup>th</sup> Jan 2014. Liaison was ongoing with SPEN re getting them to drop their cable in the existing location rather than move their cable (11/12/2013) DH advised that he had considerable communication with SPEN and saw no issue with the 20<sup>th</sup> Jan 2014 – SPEN just closing out the paperwork. DH queried the change of access to the site and AK suggested that this would most likely be mid/end Feb. AK noted that tarmac would need to be put onto the Fire Road. AK would have an action plan for the change in access by end of Jan 2014. (19/12/2013) **item can now be removed as information has been received (09/01/2014) AK noted that FES had started their works and SPEN were due to commence works w/c 20/01/2014. (16/01/2014)**

- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) **PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014)**
- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie. (?) **DH advised that it was proposed to meet w/c 20/01/2014 and GW agreed to confirm asap that Fraser can attend the proposed meeting (16/01/2014)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application

had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) **DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014)**

- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). DH reported that FWraith was planning meetings for several of the specialist areas and liaising with AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014) **DH advised that the NHS are meeting with a supplier on 17/01/2014. Af noted that he did not have any dates for meetings and that it was critical that meetings happen as BMCL need to understand the NHS delivery dates. DP advised that BMCL needed to understand an services requirements. DH reported that the 3 MRIs were due to be delivered 30/31<sup>st</sup> March 2014. GW advised that he needed an understanding of all the group 5 equipment for insurance purposes. (16/01/2014)**
- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013) AK noted that other trades had now started and there were others to start January 2014. BMCL progressing on the basis of the revised programme based on 12<sup>th</sup> May. Temporary escape route to be identified (19/12/2013). **AK reported that he was preparing proposals for NHS to ensure that fire escape on to site was in situ for the use of the car park as this is hope to be in use before the hospitals are handed over. Programme for completion of the car park is under review after the recent Christmas break and AK will update D/H (09/01/2014) AK noted that he had a proposal to review with DS before presenting to the NHS. PM noted that the NHS needed to understand when BMCL would be carrying out the junction works. (16/01/2014)**
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014)
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 29/01/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			<p>08/01/14</p> <p>16/01/2014</p> <p>23/01/2014</p>	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p> <p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p> <p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg</p>	

			<p>07/11/2013 target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>14/11/2013 DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>21/11/2013 DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>28/11/2013 DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>12/12/2013 DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>19/12/2013 DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>09/01/2014 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>16/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>23/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.  DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	<p>04/12/2013 We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).  <i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i></p> <p>12/12/2013 GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).</p>	

			19/12/2013	DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.	
			09/01/2014	DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.	
			16/01/2014	GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.	
			23/01/2014	DH noted that no further back-up had been received by the NHS so the Board had undertaken their own assessment and re-issued this back to BMCL for review.	
				GW noted that a compromise solution was required. DH noted that the additional data points were point to point and the power is on a ring. GW noted that an additional board needed to be put in. DH requested that BMCL justify the costs provided to the NHS. GW noted that operatives will need to go back into areas to put in the additional power and data. DH and GW to discuss.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 29/01/2014

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage.	
			19/09/2013	PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.	
			26/09/2013	WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.	
			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing.	
			10/10/2013	AK noted that he was assuming that all buildings would be emptied at the same time.	
			17/10/2013	WIP by BMCL	
			24/10/2012	AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.	
			07/11/2013	AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.	
				AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.	

A51679245

			<p>21/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p>	<p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p> <p>Meeting of AK and PM to be arranged to discuss AK queries.</p> <p>Meeting to be scheduled to review some aspects of the work</p> <p>Noted that AK and PM were meeting later that day to discuss BMCL queries.</p> <p><b>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue.</p> <p>An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required.</p> <p>DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS.</p> <p><b>DP advised that he had put the alert to Mercury and Balmoral. DP suggested that the support structure for the lid could be drilled and make it into a colander. DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Balmoral.</b></p>	

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 29/01/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013       19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013   12/12/2013  19/12/2013 09/01/2014  23/01/2014	<p>The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room</p> <p>DS advised that BMCL were reviewing the building regs application as will need to submit an amendment.</p> <p>PM noted this was WIP.</p> <p>DS advised that confirmation was awaited from Building Control re the sprinkler omission.</p> <p>Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission.</p> <p>Response awaited from Building Control</p> <p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p>DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p><b>DS was scheduled to meet with Raymond Barlow.</b></p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	11/10/2013	<p>Confirmation of requirements for floor screeds to 3 rooms.</p> <p>Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p>	07/11/2013

			<p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013</p> <p>07/11/2013</p> <p>23/01/2013</p> <p>28/01/2013</p>	<p>PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACflooding will carry-out the works.</p> <p>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed.</p> <p>DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.</p>	
2317	PMI 254	Alterations to Arrival Square	<p>06/11/2013</p> <p>07/11/2013</p> <p>14/11/2013</p>	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p> <p>Noted that BMCL will review the PMI and provide feedback.</p> <p>PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there</p>	

			<p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p>	<p>being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.</p> <p>DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and</p>	

			09/01/2014	route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire. It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area	
			16/01/2014	AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.	
			23/01/2014	DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	24/12/2013	Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms. Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list.	
			09/01/2014	It was decided that a meeting would be arranged in order to ascertain the correct cabinets to be ordered and a further PMI issued	
			16/01/2014	PM noted that there were 6/7 cabinets in radiology. PM would liaise with FW to check if confirmation had been provided to BMCL re these cabinets. DS noted that he had thought that a meeting was to be arranged. PM advised that he had a discussion with GW and AKerr and had offered to meet with BMCL if needed and had no request for a meeting as yet. DS & GW agreed to liaise with AKerr and RNetherey re need for a meeting. It was noted that the drug cabinets will be dealt with through the equipment list.	
			23/01/2014	PM noted that he was meeting with AKerr and RNetherey on 28/01/2014 to close out any outstanding issues.	
2410	PMI 264	Adult & Children's Hospital Aseptic Unit Clarification on requirement for Illuminated Sig	29/01/2014	Aseptic Unit - additional room in use sign lights. Confirmation of RDD return 17.12.13; supply and install additional 'room in use' lights LIG073 required to clean changing areas. As a result of this a further 6 No. light switches SWC076 are also required to operate sign lights. Group 1 equipment list to be updated to suit.	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	Clarification of Requirements for Renal Installation Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.  Panel locations: NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH. NSGH OPD Nurses Base - 2 mimic panels. NSGH Critical Care - 1 indicator panel. NCH Workshop - 2 mimic panels. NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011. NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.	

				Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). DP confirmed that this was a WIP (24/10/2013). No change to status (09/01/2014) DP advised that he had a meeting scheduled with JBushfield. (16/01/2014) **DP noted that the meeting with JBushfield had not taken place and needed to be rescheduled. (23/01/2014)**
- Cables to be dropped at the Car Park Entrance – DP noted that there is 1 NHS cable and 1 SPEN cable to be dropped. DP noted that previously the NHS organized to have FES present on site when the works were being carried out. AK agreed to provide further detail to the NHS (03/10/2013) DP noted that it was WIP to identify a date for these works – BMCL wanted to co-ordinate these works with other works to be carried out in that area (10/10/2013). DP advised that ASmith was liaising with FES and RJohnson. AK advised that the cheque had been provided to SPEN. AK advised that the cable works linked into the changes which were required to the hoarding lines (17/10/2013). GW noted a PO is raised for £13K to drop cable. – sign off is in progress – ASmith and RJohnson are liaising to progress and also with FES/BMCL (24/10/2013) GW advised that he had requested a copy of the drawing which identified the SPEN cable. DH agreed to locate a copy of the drawing. DH noted that BMCL were responsible for all the cables outwith the boundary. GW suggested that the cable had never been shown on the drawing. (14/11/2013) DH noted that the cables were part of the car park works. GW noted that the cables needed to be shown to BMCL. DH noted that the Board was responsible for providing the services detail within the site. GW reported that it is for the Board to advise all tenders where cables are located. DH noted that public road services is a contractor responsibility. DH accepted that BMCL may not have included an allowance in their tender. DH enquired whether FES could be contracted to move the SPEN cable. DH advised that he would discuss this with PM and ASm. (28/11/2014) DH noted that there was 1 cable inside the site (Board own) and FES were being instructed to carry out the works w/c 20<sup>th</sup> Jan 2014. Liaison was ongoing with SPEN re getting them to drop their cable in the existing location rather than move their cable (11/12/2013) DH advised that he had considerable communication with SPEN and saw no issue with the 20<sup>th</sup> Jan 2014 – SPEN just closing out the paperwork. DH queried the change of access to the site and AK suggested that this would most likely be mid/end Feb. AK noted that tarmac would need to be put onto the Fire Road. AK would have an action plan for the change in access by end of Jan 2014. (19/12/2013) item can now be removed as information has been received (09/01/2014) AK noted that FES had started their works and SPEN were due to commence works w/c 20/01/2014. (16/01/2014) **AK noted that works to both cables were on-going. AK suggested that the gate change would be in circa 2-3 weeks. DH enquired if BMCL understood the car park connections and DP advised that KH and ASmith were discussing this. (23/01/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM

noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) **PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DH would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014)**

- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie. (?) DH advised that it was proposed to meet w/c 20/01/2014 and GW agreed to confirm asap that Fraser can attend the proposed meeting (16/01/2014) **DH noted that there had been a meeting with BMCL the previous day. Some gaps in the information provided had been identified and the NHS Team await an update. DH had asked for a plan of what is being done and when. (23/01/2014)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) **DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014)**
- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms.

(21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). DH reported that FWraith was planning meetings for several of the specialist areas and liaising with AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014) DH advised that the NHS are meeting with a supplier on 17/01/2014. Af noted that he did not have any dates for meetings and that it was critical that meetings happen as BMCL need to understand the NHS delivery dates. DP advised that BMCL needed to understand any services requirements. DH reported that the 3 MRIs were due to be delivered 30/31<sup>st</sup> March 2014. GW advised that he needed an understanding of all the group 5 equipment for insurance purposes. (16/01/2014) **It was noted that further to an internal NHS meeting that the MRIs will now be scheduled to be delivered later 2014 however there were further meetings regarding the Group 5 equipment taking place over the remainder of the week. DP advised that BMCL are pulling together a schedule of key dates (23/01/2014)**

- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013) AK noted that other trades had now started and there were others to start January 2014. BMCL progressing on the basis of the revised programme based on 12<sup>th</sup> May. Temporary escape route to be identified (19/12/2013). AK reported that he was preparing proposals for NHS to ensure that fire escape on to site was in situ for the use of the car park as this is hope to be in use before the hospitals are handed over. Programme for completion of the car park is under review after the recent Christmas break and AK will update D/H (09/01/2014) AK noted that he had a proposal to review with DS before presenting to the NHS. PM noted that the NHS needed to understand when BMCL would be carrying out the junction works. (16/01/2014) **PM advised that he was awaiting an indication of when the hammerhead works to be carried out. AK noted that a date for these works had not been set and he needed to liaise with Dunne. AK suggested that the works would be carried out early to mid Feb. A further programme of the Car Park works had been produced on the 12<sup>th</sup> May 2014 target date. The berri barrier works would be commenced 3<sup>rd</sup> Feb 2014. (23/01/2014)**
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) **DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014)**
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014)
- Power supply for MRI chillers – DH sought clarification about the BMCL proposals to terminate (23/01/2014)
- LIG 073 – NHS putting some LIG 073 back into aseptic and BMCL to confirm quantity of LO73 then PMI to be provided (23/01/2014)
- Resus Gantries - DP requested confirmation of the way forward re resus gantries. DH confirmed that resus gantries no longer required however unistrut to remain. (23/01/2014)

- Power and data/Bus Realtime Information points (inside the atrium) – DP requested that a schematic of how this will work is to be provided i.e. inside and outside points.  
(23/01/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 05/02/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p>	
			31/10/2013	<p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg</p>	

			<p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p>	<p>target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	<p>04/12/2013</p> <p>12/12/2013</p>	<p>We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).</p> <p><i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</i></p> <p>GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be</p>	

			19/12/2013	advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).	
			09/01/2014	DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.	
			16/01/2014	DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.	
			23/01/2014	GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.	
			30/01/2014	DH noted that no further back-up had been received by the NHS so the Board had undertaken their own assessment and re-issued this back to BMCL for review.	
				GW noted that a compromise solution was required. DH noted that the additional data points were point to point and the power is on a ring. GW noted that an additional board needed to be put in. DH requested that BMCL justify the costs provided to the NHS. GW noted that operatives will need to go back into areas to put in the additional power and data. DH and GW to discuss.	
				JB noted that definitive information was awaited from Mercury re circuitry. DH noted that the NHS Had received the costs and that DR and GW should discuss. GW noted that he was awaiting information from Mercury for the discussion with DR.	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 05/02/2014

					
Syproid	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013	The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage.	
			19/09/2013	PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.	
			26/09/2013	WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.	
			03/10/2013	AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing.	

A51679245

			<p>10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013  19/12/2013 09/01/2014 16/01/2014 23/01/2014</p>	<p>AK noted that he was assuming that all buildings would be emptied at the same time. WIP by BMCL AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS. AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc. AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time. AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion. AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through. Meeting of AK and PM to be arranged to discuss AK queries. Meeting to be scheduled to review some aspects of the work Noted that AK and PM were meeting later that day to discuss BMCL queries. <b>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</b></p>	
20424	NHS EW 051	Cold Water Storage Tanks	<p>15/01/2014  16/01/2014 23/01/2014</p>	<p>An Estates &amp; Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required. DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS. <b>DP advised that he had put the alert to Mercury and Balmoral. DP suggested that the support structure for the lid could be drilled and make it into a colander. DH requested that this be provided as a formal</b></p>	

			30/01/2014	proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Balmoral. DP noted that he would push Mercury and Balmoral for a response. DP had liaised with Mercury the previous day.

## PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 05/02/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013  03/10/2013 10/10/2013 24/10/2013 07/11/2013  14/11/2013 21/11/2013 28/11/2013  12/12/2013 19/12/2013 09/01/2014  23/01/2014 30/01/2014	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap. DS noted that BMCL had met with Building Control on 10 <sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded. DS confirmed that response still awaited from Building Control DS reported that a response was anticipated from GCC before 14 <sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised. DS was scheduled to meet with Raymond Barlow. DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI	11/10/2013	Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation	07/11/2013

A51679245

		ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013 07/11/2013 23/01/2013</p> <p>28/01/2013</p> <p>30/01/2014</p>	<p>of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works.</p> <p>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed.</p> <p>DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish.</p> <p><b>Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.</b></p>	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul>	

			<p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>07/11/2013 14/11/2013</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown. Noted that BMCL will review the PMI and provide feedback. PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.</p> <p>21/11/2013 28/11/2013</p> <p>WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing. DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>12/12/2013</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>19/12/2013</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>09/01/2014</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>16/01/2014</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>23/01/2014</p> <p>DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p> <p>30/01/2014</p> <p>DH noted this is wip and there is a meeting with SPT on the 5<sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>This PMI replaces PMI-217 which should be cancelled. The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge. The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity</p>	

			<p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p>	<p>and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p> <p>AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs.</p> <p>DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014.</p> <p><b>DR advised that he had provided comment back to GW – DR and GW to discuss.</b></p>	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	<p>24/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p>	<p>Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms. Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list.</p> <p>It was decided that a meeting would be arranged in order to ascertain the correct cabinets to be ordered and a further PMI issued</p> <p>PM noted that there were 6/7 cabinets in radiology. PM would liaise with FW to check if confirmation had been provided to BMCL re these cabinets. DS noted that he had thought that a meeting was to be arranged. PM advised that he had a discussion with GW and AKerr and had offered to meet with BMCL if needed and had no request for a meeting as yet. DS &amp; GW agreed to liaise with AKerr and RNetherey re need for a meeting. It was noted that the drug cabinets will be dealt with through the equipment list.</p> <p>PM noted that he was meeting with AKerr and RNetherey on 28/01/2014 to close out any outstanding issues.</p> <p><b>PM advised that he had met with AKerr and RNetherey to agree the way forward. PM would provide a PMI to clarify the way forward. PM noted that there was no commercial issues.</b></p>	
2410	PMI 264	Adult & Children's Hospital Aseptic Unit Clarification on requirement for Illuminated Sign Lights	29/01/2014	<p>Aseptic Unit - additional room in use sign lights.</p> <p>Confirmation of RDD return 17.12.13; supply and install additional 'room in use' lights LIG073 required to clean changing areas. As a result of this a further 6 No. light switches SWC076 are also required to operate sign lights. Group 1 equipment list to be updated to suit.</p>	
2411	PMI 265	Adult & Children's Hospital	29/01/2014	Clarification of Requirements for Renal Installation	

		- Renal Installation		<p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:  NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.  NSGH OPD Nurses Base - 2 mimic panels.  NSGH Critical Care - 1 indicator panel.  NCH Workshop - 2 mimic panels.  NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.  NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p>	
2424	PMI 266	Clock (CLO003) Connection	05/02/2014	<p>The Board wish to confirm that there is no requirement to connect the clocks (CLO003) in NCH Anaesthetic rooms to the Theatre Suite central clock system.</p> <p>CLO003 is a group 2 item and will be provided by the Board</p>	
2425	PMI 267	Hoist tracks - Wards - Level 6 upwards	05/02/2014	<p>The Board confirm that hoist tracks in wards from level 6 upwards should be set a minimum of 1165mm from the bedhead wall, providing consistency of location across the rooms on these levels.</p>	

## COMPENSATION EVENTS

CE for Ground Water monitoring to be concluded

### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). DP confirmed that this was a WIP (24/10/2013). No change to status (09/01/2014) DP advised that he had a meeting scheduled with JBushfield. (16/01/2014) **DP noted that the meeting with JBushfield had not taken place and needed to be rescheduled. (23/01/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural

drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMCGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) **PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014)**

- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie. (?) DH advised that it was proposed to meet w/c 20/01/2014 and GW agreed to confirm asap that Fraser can attend the proposed meeting (16/01/2014) DH noted that there had been a meeting with BMCL the previous day. Some gaps in the information provided had been identified and the NHS Team await an update. DH had asked for a plan of what is being done and when. (23/01/2014) **JB advised that JB and GW had met with Doig & Smith and an update would be provided to DH further to the email sent from JB to DH (30/1/2014)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) **DH advised that the preparation of the application pack was progressing well. SEPA**

were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014)

- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). DH reported that FWrath was planning meetings for several of the specialist areas and liaising with AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014) DH advised that the NHS are meeting with a supplier on 17/01/2014. Af noted that he did not have any dates for meetings and that it was critical that meetings happen as BMCL need to understand the NHS delivery dates. DP advised that BMCL needed to understand any services requirements. DH reported that the 3 MRIs were due to be delivered 30/31<sup>st</sup> March 2014. GW advised that he needed an understanding of all the group 5 equipment for insurance purposes. (16/01/2014) It was noted that further to an internal NHS meeting that the MRIs will now be scheduled to be delivered later 2014 however there were further meetings regarding the Group 5 equipment taking place over the remainder of the week. DP advised that BMCL are pulling together a schedule of key dates (23/01/2014) It was noted that the same carrier is delivering all the equipment. The Method statements, risk assessments and dates for delivery will be provided w/c 03/02/2014. FW is liaising with Alan Stephen. AFe was looking at an option to locate all the equipment into a few rooms – there are 3 rooms that are lockable. GW enquired if there would be any change to the insurance coverage. DH noted that the NHS were finalizing the list of equipment which will be delivered to site. The contractor will be responsible for protection to the vinyl from the department doors to the storage/holding room. AFe advised that BMCL needed 1 point of contact through Peter. (30/01/2014)
- Car Park – AK advised there had been no improvement to the Dunne programme as yet – the programme continues to be under review. AK wanted to get the first berry barriers installed so can assess the duration of the berry barrier install works. BMCL will re-programme the car park programme. (21/11/2013) JB noted that BMCL were still to identify the recovery programme. DL advised that he was advising the NHS Board Committees that BMCL had advised that the completion date was unchanged. (28/11/2013). AK noted that progress was not as desired and the programme was being reviewed. (12/12/2013) AK noted that other trades had now started and there were others to start January 2014. BMCL progressing on the basis of the revised programme based on 12<sup>th</sup> May. Temporary escape route to be identified (19/12/2013). AK reported that he was preparing proposals for NHS to ensure that fire escape on to site was in situ for the use of the car park as this is hope to be in use before the hospitals are handed over. Programme for completion of the car park is under review after the recent Christmas break and AK will update D/H (09/01/2014) AK noted that he had a proposal to review with DS before presenting to the NHS. PM noted that the NHS needed to understand when BMCL would be carrying out the junction works. (16/01/2014) PM advised that he was awaiting an indication of when the hammerhead works to be carried out. AK noted that a date for these works had not been set and he needed to liaise with Dunne. AK suggested that the works would be carried out early to mid Feb. A further programme of the Car Park works had been produced on the 12<sup>th</sup> May 2014 target date. The berri barrier works would be commenced 3<sup>rd</sup> Feb 2014. (23/01/2014) AK advised that Saturday 1<sup>st</sup> Feb was the date identified to break out the concrete. (30/01/2014)
- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014)

- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014)
- Power and data/Bus Realtime Information points (inside the atrium) – DP requested that a schematic of how this will work is to be provided i.e. inside and outside points. (23/01/2014) DH agreed to provide a schematic to BMCL. (30/01/2014)
- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014)
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale have worked up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014)
- Hoists/Slings/Charging points – DH and BMCL to discuss (30/01/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 12/02/2014:

<div style="float: right;">   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			<p>08/01/14</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>06/02/2014</p>	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p> <p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet. DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p> <p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be</p>	

			<p>07/11/2013</p> <p>14/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p>	<p>provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	<p>04/12/2013</p>	<p>We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).</p> <p><i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a</i></p>	

			12/12/2013	cost for the additional points. NHS will then liaise with YCF. (21/11/2013)) GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).	
			19/12/2013	DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations. DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.	
			09/01/2014	GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.	
			16/01/2014	DH noted that no further back-up had been received by the NHS so the Board had undertaken their own assessment and re-issued this back to BMCL for review.	
			23/01/2014	GW noted that a compromise solution was required. DH noted that the additional data points were point to point and the power is on a ring. GW noted that an additional board needed to be put in. DH requested that BMCL justify the costs provided to the NHS. GW noted that operatives will need to go back into areas to put in the additional power and data. DH and GW to discuss.	
			30/01/2014	JB noted that definitive information was awaited from Mercury re circuitry. DH noted that the NHS Had received the costs and that DR and GW should discuss. GW noted that he was awaiting information from Mercury for the discussion with DR.	
			06/02/2014	PM advised that the NHS were awaiting confirmation from YCF re payment. JB noted that all apties had agreed the numerical implications/equipment list change. JB advised that BMCL would expect a PMI and CE so that BMCL can instruct the works as scaffolding is being taken down in that area.	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	31/01/2014	In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.	
			06/02/2014	It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 12/02/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	

A51679245

			19/12/2013 09/01/2014 16/01/2014 23/01/2014	Meeting of AK and PM to be arranged to discuss AK queries. Meeting to be scheduled to review some aspects of the work Noted that AK and PM were meeting later that day to discuss BMCL queries. <b>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</b>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014 23/01/2014  30/01/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required. DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS. <b>DP advised that he had put the alert to Mercury and Balmoral. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury &amp; Balmoral.</b> <b>DP noted that he would push Mercury and Balmoral for a response. DP had liaised with Mercury the previous day.</b>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 12/02/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013 03/10/2013 10/10/2013 24/10/2013 07/11/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP. DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything	

A51679245

			<p>14/11/2013 21/11/2013 28/11/2013</p> <p>12/12/2013 19/12/2013 09/01/2014</p> <p>23/01/2014 30/01/2014</p>	<p>untoward about the Building Control submission. Response awaited from Building Control Noted that Jim Murray had been asked to chase up a response from BControl. DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap. DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded. DS confirmed that response still awaited from Building Control DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised. DS was scheduled to meet with Raymond Barlow. <b>DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</b></p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>11/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013 07/11/2013 23/01/2013</p> <p>28/01/2013</p> <p>30/01/2014</p>	<p>Confirmation of requirements for floor screeds to 3 rooms. Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room. PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works. Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed. DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top. Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish. <b>Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss.</b></p>	07/11/2013

2307	PMI 252	Group 1 Equipment Surgical Image Viewing	13/11/2013	Amendment to existing PMI (added 12/02/2014): The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE - 092	
2317	PMI 254	Alterations to Arrival Square	06/11/2013	<p>Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.</p> <p>The key features are now:</p> <ul style="list-style-type: none"> <li>* omission of signals to prioritise Fastlink over other buses (6 columns)</li> <li>* omission of raised pedestrian crossing and replacement with drop-kerbs and road markings</li> <li>* Omission of lay-by immediately outside Adult entrance and infill with granite to match</li> <li>* Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT</li> <li>* Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs</li> <li>* Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping</li> <li>* Altered road markings</li> </ul> <p>GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.</p> <p>Please provide comments on the revised proposals and updated costs to amend the external works as shown.</p>	
			07/11/2013	Noted that BMCL will review the PMI and provide feedback.	
			14/11/2013	PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit.	
			21/11/2013	WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing.	
			28/11/2013	DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.	
			12/12/2013	DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being	

			<p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p>	<p>no requirement to revisit the RCC.</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p> <p>DH noted this is wip and there is a meeting with SPT on the 5<sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.</p> <p>PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.</p>	
2330	PMI 257	MTHW System – Site Ring	<p>20/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p>	<p>This PMI replaces PMI-217 which should be cancelled.</p> <p>The Board requests a quotation for the extension of the 'site ring' star pipe MTHW system from the current end point, at the site boundary adjacent to the neo-natal building, to a point further along the east elevation of the neo-natal building beneath the proposed first floor link bridge.</p> <p>The new end point should terminate in an access chamber located, as per the attached mark-up, close to the existing dry-riser terminal. At a future time, the Board intend to connect the maternity and neo-natal buildings to the ring main and will install pipe-work from the new chamber which will follow the dry-riser pipe-work into the building below the ground floor and will rise to the third floor plant room in the escape stair lobbies alongside the dry riser.</p> <p>It was noted that DH and DP were going to review and agree the way forward. DH will update the PMI to formalize the way forward (inc updating the drawing).</p> <p>DH advised that a PMI would be provided to confirm the way forward.</p> <p>AK advised that BMCL need a PMI to confirm the BMCL works. Early December was the date by which the confirmation was needed by AK – confirmation needed asap as may start to impact on the BMCL external works package – the pipes would need to be ordered asap. GW advised that the cost info from Mercury had been received and suggested that GW, DR and AMoore meet to go through the costs and in the meantime BMCL undertakes the work. DH noted that the housing and route were approximate positions. The start point was known and the end point had been indicated and BMCL could route to this end point however they desire.</p> <p>It was noted that costs were required. GW has requested costs from MEL and these will be forwarded to NHS by next Wednesday. Pipes are on 8 weeks delivery and it was thought not possible to programme in before the end of March. Price is key to progressing this from the NHS point of view but BMCL need to ensure that no impact to other programmed works in the surrounding area</p>	

			16/01/2014  23/01/2014 30/01/2014 06/02/2014	AK advised that he needed to know the NHS info soon so he could ensure no impact to other programmed work in the surrounding area. GW noted that he had part costs and will chase Dunne for their costs. DH noted that the costs had been received and DR would discuss with BMCL on 24/12/2014. DR advised that he had provided comment back to GW – DR and GW to discuss. PM advised that the Board did not wish the works to be taken forward at this time. DH noted that BMCL are to review the proposed route and associated costs. DH and GW will work on a simplified route to minimize costs. AK raised concern regarding the purchase of the pipes and PM advised that it was ok for BMCL to purchase the pipes as the works would need to be carried out at some point. AK and GW to discuss the works and programme.	
2380	PMI 262	ADULT & CHILDRENS HOSPITALS CONTROLLED DRUGS CABINETS	24/12/2013  09/01/2014  16/01/2014   23/01/2014  30/01/2014	Confirmation of requirements for metal controlled drugs cabinets in clean utility rooms. Please install metal CD cabinets as per the attached schedule. Amendment to requirements to be accommodated through the Group 1 equipment list. It was decided that a meeting would be arranged in order to ascertain the correct cabinets to be ordered and a further PMI issued PM noted that there were 6/7 cabinets in radiology. PM would liaise with FW to check if confirmation had been provided to BMCL re these cabinets. DS noted that he had thought that a meeting was to be arranged. PM advised that he had a discussion with GW and AKerr and had offered to meet with BMCL if needed and had no request for a meeting as yet. DS & GW agreed to liaise with AKerr and RNetherey re need for a meeting. It was noted that the drug cabinets will be dealt with through the equipment list. PM noted that he was meeting with AKerr and RNetherey on 28/01/2014 to close out any outstanding issues. PM advised that he had met with AKerr and RNetherey to agree the way forward. PM would provide a PMI to clarify the way forward. PM noted that there was no commercial issues.	
2410	PMI 264	Adult & Children's Hospital Aseptic Unit Clarification on requirement for Illuminated Sign Lights	29/01/2014  06/02/2014	Aseptic Unit - additional room in use sign lights. Confirmation of RDD return 17.12.13; supply and install additional 'room in use' lights LIG073 required to clean changing areas. As a result of this a further 6 No. light switches SWC076 are also required to operate sign lights. Group 1 equipment list to be updated to suit. It was agreed that this item could be closed.	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	Clarification of Requirements for Renal Installation Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.  Panel locations: NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH. NSGH OPD Nurses Base - 2 mimic panels. NSGH Critical Care - 1 indicator panel. NCH Workshop - 2 mimic panels. NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011. NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.	

				Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.	
2424	PMI 266	Clock (CLO003) Connection	05/02/2014  06/02/2014	The Board wish to confirm that there is no requirement to connect the clocks (CLO003) in NCH Anaesthetic rooms to the Theatre Suite central clock system. CLO003 is a group 2 item and will be provided by the Board <b>The panels should be indicated on the 400 series drawings/ as built drawings as CLO001. DS agreed to check this with Nightingale before being closed off.</b>	
2425	PMI 267	Hoist tracks - Wards - Level 6 upwards	05/02/2014  06/02/2014	The Board confirm that hoist tracks in wards from level 6 upwards should be set a minimum of 1165mm from the bedhead wall, providing consistency of location across the rooms on these levels. DP noted that there had been a major exercise done re sprinkler locations. DH advised that he had discussed the matter with GB – only moving the tracks 100mm and only 3 brackets installed so far and nothing else installed.	
2427	PMI 268 -	Bus Timetable Information Screens	06/02/2014	The Board request a cost for the provision of power and data to 3no. bus timetable information screens. one twin (OUT010) 13A socket and one twin data (OUT131) to be provided at each location as shown on the attached mark-ups. Allowance to be included, where necessary, for pattressing to support large 54"/70" monitors as noted.	
2428	PMI 269	EMC-129 - Additional Power & Data	06/02/2014	The Board request the provision of additional power & data (DATA1000) to the second desk position in room EMC-129 (office) within Adult Emergency Dept. The provision will include an additional length of TRU1000 in order to provide the outlets at the correct location. Costs to be agreed in advance of the works and allocated to the Group 1 Equipment List.	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER & DATA	07/02/2014	Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity.	
2432	PMI 271	ADULT HOSPITAL LEVEL 2 ENTRANCE DOOR TO THEATRE SUITE	07/02/2014	At entrance door from atrium walkway to theatre suite (to corridor THE-005) reposition cable to existing OUT-131 outlet in Room THE-004 to adjacent to entrance door on atrium side, connect to OUT121 outlet plate. Refer attached sketch, outlet to be set at standard height for wall phone. Point to be picked up on Group 1 equipment list.	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014	Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification.	

CE for Ground Water monitoring to be concluded

#### Other items that require discussion:

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage which was nearing close out. The NHS and BMCL were in agreement re the way forward. DP advised that John Bushfield would be visiting the site to discuss (06/06/2013) DP to provide update on return from leave (04/07/2013). DP noted still chasing this (11/07/2013) DP progressing (18/07/2013) DP advised that he had spoken to John (Wallace Whittle – Glasgow) and he was ok re life safety compliancy. John had asked that a risk assessment be carried out. DP noted that the risk assessment was required as the HV is in a trench. A risk assessment re fire compartmentation needed to be done. DH noted that BMCL needed to ensure that the risk assessment is specific. AS requested that DP ask John to write to NHS and confirm that the system is compliant however he would want a risk assessment provided to the client for review. (25/07/2013) Noted that DP doesn't agree with JB writing to the NHS – NHS need to do a risk assessment. DH suggested that it is query re interpretation of the guidance. DH and DP to discuss – item not time critical. (08/08/2013) DP noted this was WIP – anticipate being able to provide NHS with info in circa 1 month. (22/08/2013) DP advised that this was WIP and a draft would be provided to the NHS as a draft for discussion. (05/09/2013). DP confirmed that this was a WIP (24/10/2013). No change to status (09/01/2014) DP advised that he had a meeting scheduled with JBushfield. (16/01/2014) **DP noted that the meeting with JBushfield had not taken place and needed to be rescheduled. (23/01/2014)**
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHalliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) **MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014)**
- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013)

GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie. (?) DH advised that it was proposed to meet w/c 20/01/2014 and GW agreed to confirm asap that Fraser can attend the proposed meeting (16/01/2014) DH noted that there had been a meeting with BMCL the previous day. Some gaps in the information provided had been identified and the NHS Team await an update. DH had asked for a plan of what is being done and when. (23/01/2014) JB advised that JB and GW had met with Doig & Smith and an update would be provided to DH further to the email sent from JB to DH (30/1/2014) **Noted that JB and DH had met on 05/02/2014 and DH would meet with IP later that day (06/02/2014)**

- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) **DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014)**
- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). DH reported that FWrath was planning meetings for several of the specialist areas and liaising with AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014) DH advised that the NHS are meeting with a supplier on 17/01/2014. Af noted that he did not have any dates for meetings and that it was critical that meetings happen as BMCL need to understand the NHS delivery dates. DP advised that BMCL needed to understand any services requirements. DH reported that the 3 MRIs were due to be delivered 30/31<sup>st</sup> March 2014. GW advised that he needed an understanding of all the group 5 equipment for insurance purposes. (16/01/2014) It was noted that further to an internal NHS meeting that the MRIs will now be scheduled to be delivered later 2014 however there were further meetings regarding the Group 5 equipment taking place over the remainder of the week. DP advised that BMCL are pulling together a schedule of key dates (23/01/2014) It was noted that the same carrier is delivering all the equipment. The Method statements, risk assessments and dates for delivery will be provided w/c 03/02/2014. FW is liaising with Alan Stephen. AFe was looking at an option to locate all the equipment into a few rooms – there are 3 rooms that are lockable. GW enquired if there would be any change to the insurance coverage. DH noted that the NHS were finalizing the list of equipment which will be delivered to site. The contractor will be

responsible for protection to the vinyl from the department doors to the storage/holding room. AFe advised that BMCL needed 1 point of contact through Peter. (30/01/2014)  
 Noted that a BMCL/NHS meeting was scheduled to take place on Friday. DH advised that he was updating the information for the insurance coverage. (06/02/2014)

- Pseudonomas in taps. DH noted that there had been a CEL issues relating to Pseudonomas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014)
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decasts are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014)
- Power and data/Bus Realtime Information points (inside the atrium) – DP requested that a schematic of how this will work is to be provided i.e. inside and outside points. (23/01/2014) DH agreed to provide a schematic to BMCL. (30/01/2014) Noted that PMI to be provided and followed up with a schematic based on a drawing from DP. (06/02/2014)
- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014)
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014)
- Hoists/Slings/Charging points – DH and BMCL to discuss (30/01/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 19/02/2014:

<div>   </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			08/01/14	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p>	
			16/01/2014	<p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p>	
			23/01/2014	<p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p>	
			06/02/2014	<p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p>	
			13/02/2014	<p><b>It was noted that there was no drawings currently outstanding</b></p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	30/10/2013	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3  3.15 Node ICT server room cooling  3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p>	
			31/10/2013	<p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m². BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the NHS are agreeable to changing the classification of these areas from office environment to back of house environment then the requirements could be met for all but 2 rooms. DH advised that he needed to be</p>	

			<p>07/11/2013 provided with an explanation of the issue and options in detail so that he can liaise with the NHS IT reps. DH noted that IT would need to accept the rise in temp from 25 to 27 and agree way forward re passive racks. DH noted that consideration needed to be given to discussing aspects that impact on the 80kg target. DP agreed to meet with DH in preparation for a joint discussion with IT.</p> <p>14/11/2013 DP noted that agreement in principle had been achieved and BMCL would run through the numbers with Wallace Whittle prior to providing a formal solution to the NHS for review.</p> <p>21/11/2013 DH advised that he had received a headline proposal from DP and reviewed this with IT Reps. 3 of the 4 items had been resolved and a meeting to discuss the remaining issue had been scheduled for w/c 17/11/2013. The remaining item relates to the starting point to measure the 25% resilience from i.e. number of ports on the unit or number of active ports.</p> <p>28/11/2013 DP advised that he had met with the NHS and formulated a plan which he would get WWhittle to progress. All the points and heat loads had been scheduled out. DP suggested that the NHS should PMI the schedule in lieu of the associated ER. DP agreed to provide the schedule to DH.</p> <p>12/12/2013 DP noted that he had provided the schedule to DH. Subsequently FCarnie had provided information and DP would meet with FC to review. DL advised that IT have been requested to work with BMCL to resolve any issues however they need to ensure future-proofing is allowed for. DP advised that once the schedule is agreed that the NHS issue the schedule to BMCL via a PMI.</p> <p>19/12/2013 DP advised that WWhittle were running the calcs. There are a couple that have long runs of pipework and 2 x 18°/15° circuits. It was anticipated that there was only a handful of rooms. DH enquired about power (7.2kw/9kw) and DP advised that BMCL were looking at the simplest way which would be 2<sup>nd</sup> PDU which would need to be supplied by Capita.</p> <p>09/01/2014 DP advised that he was meeting with Wallace Whittle later that day and would provide info to FCarnie in due course.</p> <p>16/01/2014 Wallace Whittles proposal had been received and DP will arrange a meeting with FCarnie</p> <p>23/01/2014 DP advised that the hub room cooling proposal would be provided to the DH &amp; FC later that day.</p> <p>30/01/2014 DP advised that a proposal had been provided to FCarnie on 22/01/2014. The blue dots indicate the ones the NHS needs to consider more closely. DP proposed to meet with the NHS to discuss as required. DH agreed to review with FCarnie and feedback to DP.</p> <p>06/02/2014 DH advised that he would liaise with FCarnie later that week. DP noted that some of the proposals requires BMCL to go back in and change the cooling, etc. DH agreed to confirm acceptance of the proposals asap.</p> <p>13/02/2014 DH noted that FC and DH had jointly reviewed the BMCL submission and a meeting to discuss/agree the proposal had been scheduled to take place on 7/2/2014  DP noted that the heat loads had changed and BMCL &amp; WW were reviewing the revised data. Anything with a twin chasis is being queried. WW were meeting with BMCL later that day to discuss.</p>	
20262	BMCL-EWN-140	Increased power and data requirements to NCH atrium interactive screens and pods	<p>04/12/2013 We have been advised by Nightingales and Graham Rose of the Glasgow Science Centre that the power and data requirements currently being provided for the board supplied interactive screens and pods in the NCH atrium is inadequate. BMCE originally allowed for 20 no power outlets and 20 no data points based on the limited information provided under PMI 163. The current scheme shows 40 no double power outlets and 30 no double data points (drawings attached).</p> <p><i>(Lifted from Additional Notes - YCF1/YCF2 – BMCL are concerned that additional power and data sockets had been discussed with JBailey. A schedule was being prepared of what had been previously asked for against the potential new requirements as it was difficult to understand the need for the 'doubling' of points. It was noted that the number of screens had decreased from 20 to 16. The need for the additional</i></p>	

			<p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>points would need to be challenged as the scheme had allowed for double power and data. (14/11/2013) GW advised that there had been agreement re what the additional points are. BMCL were obtaining a cost for the additional points. NHS will then liaise with YCF. (21/11/2013))</p> <p>GW advised that the additional requirements had now been agreed and a quote was being prepared (up to 4 double extras for power and data). DS raised concern that the Science Centre was contacting Nightingale directly. DL advised that BMCL should request that Nightingale do not accept any direct communication from the Science Centre. DS suggested that the Science Centre changes should be advised to BMCL by the Project Team and it would be useful if the NHS Team could confirm to the Science Centre that they should not contact Nightingale direct. (28/11/2013).</p> <p>DH noted that the cost is required so the NHS can feed back to YCF. GW agreed to progress. DS noted that BMCL will need to get the Nightingale drawings updated. PM requested that BM provide a drawing showing the revised requirements. GW noted that BMCL only had a drawing which JBaillie had marked up. DH advised that it was additional points not new locations.</p> <p>DH advised that a revised cost was awaited by the NHS and the current quote was under review however the NHS did not consider it was reasonable.</p> <p>GW noted that costs had now been received and each point will cost £330 as these are now out of sequence for the contractor and will require to be carried out during overtime and weekend periods. DH has asked GW for justification for costs as it was anticipated that it was not a new electrical ring being created but some additional points being added.</p> <p>DH noted that no further back-up had been received by the NHS so the Board had undertaken their own assessment and re-issued this back to BMCL for review.</p> <p>GW noted that a compromise solution was required. DH noted that the additional data points were point to point and the power is on a ring. GW noted that an additional board needed to be put in. DH requested that BMCL justify the costs provided to the NHS. GW noted that operatives will need to go back into areas to put in the additional power and data. DH and GW to discuss.</p> <p>JB noted that definitive information was awaited from Mercury re circuitry. DH noted that the NHS Had received the costs and that DR and GW should discuss. GW noted that he was awaiting information from Mercury for the discussion with DR.</p> <p>PM advised that the NHS were awaiting confirmation from YCF re payment. JB noted that all apties had agreed the numerical implications/equipment list change. JB advised that BMCL would expect a PMI and CE so that BMCL can instruct the works as scaffolding is being taken down in that area.</p> <p>Item closed. Cross ref with PMI 270</p>	
20519	BMCL-EWN-141	December 13 Exceptional weather conditions	<p>31/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>In accordance with our contractual obligations, we are writing to notify you that we have experienced an exceptional weather event during December 13. We consider these events to be such that it would be expected less than 1 in every 10 years and therefore notify under Clause 60.1 (13) of the Contract.</p> <p>It was noted that BMCL were preparing the information pack of the impacts of the adverse weather.</p> <p>GW to discuss info with DR</p>	

The following Early Warnings have been submitted to BMCL and are awaiting close out as at 19/02/2014

					
SypnoID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Closed out /Status
19334	NHS EW 049	Phase 3A - Additional Demolition & Associated Works, Cost Enquiry	16/09/2013 19/09/2013 26/09/2013 03/10/2013 10/10/2013 17/10/2013 24/10/2012 07/11/2013 21/11/2013 12/12/2013	<p>The Board wish to explore the synergies of incorporating additional buildings into the Phase 3A demolition contract with Brookfield Multiplex. Please refer the attached descriptive and drawn information. Note this enquiry is for budget costs, the Board do not see the requirement for any drawn information at this stage. PM noted that it was assumed that BMCL would be applying for the demolition warrants for the buildings under the stage 3a contract. The NHS would obtain the demo warrants for the additional buildings. DS advised that he would review this.</p> <p>WIP – AK looking at the programme to identify when the works can be done and with what other BMCL other works.</p> <p>AK advised that he had carried out a walkround. GW noted that BMCL need to understand the BMCL programme and review the information provided by NHS so can identify what other information is missing. AK noted that he was assuming that all buildings would be emptied at the same time.</p> <p>WIP by BMCL</p> <p>AK advised that he had carried out a good review of the information provided and would liaise with the Commercial Reps to provide a list of queries to the NHS.</p> <p>AK asked for clarity on who will be responsible for the checking/clearing asbestos. Tight programme for BMCL if taken on as an unknown – noted slight delay to BAM programme due to asbestos issues in Mental Health Building. Timing for handovers? – clear once the buildings are handed over and commissioning complete as this will all tie in with migration etc.</p> <p>AK noted that BMCL would need to prepare a list of the assumptions taken i.e. information requirements, programme assumptions, etc. GW advised that BMCL were unable to provide a price at this time.</p> <p>AK noted that HMcD had been discussing the demolitions with AK and has asked for a further discussion. AK advised that he was getting a programme plotted for discussion.</p> <p>AK advised that he had discussed with HMcD. HMcD had advised about the gas pipe/main which runs under some of the 3a demolition buildings. PM reported that the Boards Asbestos Policy stipulates that a separate asbestos removal company should be used from the surveying company. PM enquired when BMCL anticipated being able to provide feedback. AK noted that there were a number of queries to be considered i.e. when is handover to BMCL, will all the asbestos be removed in advance of handover to BMCL, etc. PM noted that the Project Team plan for migration/vacating buildings needed to be confirmed. PM advised that it was suspected that there would be asbestos in some of the buildings (both notifiable and non-notifiable). PM requested that AK provide a list of the queries to the NHS. DH suggested that BMCL could prepare a duration programme and AK advised that a programme based on the dates provided had been prepared. GW advised that it was difficult to provide a price when BMCL did not have any survey information. PM suggested that a meeting should be scheduled with AK for early January 2014. DS suggested that as one of the buildings is listed that an application would need to be lodged. PM advised that at the GCC meeting on 26<sup>th</sup> Nov the demolition of a listed building had been raised with them. PM reported that there is a requirement for a full listed building demolition consent application and a SHEP test and it was anticipated that it would take circa 9 months to get the application through.</p>	

A51679245

			19/12/2013 09/01/2014 16/01/2014 23/01/2014	Meeting of AK and PM to be arranged to discuss AK queries. Meeting to be scheduled to review some aspects of the work Noted that AK and PM were meeting later that day to discuss BMCL queries. <b>Noted that PM and AK have agreed that BMCL need to go ahead with costing and caveat any potential matters with the costs. BMCL should price the temp car park. PM expected that it will take 3-4 weeks for the cost to be available.</b>	
20424	NHS EW 051	Cold Water Storage Tanks	15/01/2014  16/01/2014 23/01/2014  30/01/2014  13/02/2014	An Estates & Facilities Alert has been issued by Health Facilities Scotland relating to the use of hollow PVC-U pipes (or similar) within cold water tanks as a support structure for the lid. It notes that these are likely to harbour stagnant water and consequently harmful micro-organisms. The actions required by the alert include tank inspections and replacement of supports with solid members as the preferred option. It also states that suppliers should be alerted to this issue. An initial, joint, review undertaken has identified that the supports in the new water storage tanks are indeed hollow pipes as described and therefore corrective action is required. DP advised that BMCL were identifying what could be carried out with minimal change/disruption and would provide a proposal to the NHS. DP advised that he had put the alert to Mercury and Balmoral. DP suggested that the support structure for the lid could be drilled and make it into a "colander effect". DH requested that this be provided as a formal proposal. Consideration needed to be given to how many holes can be drilled before impacting on the structural integrity. DP noted that he would wait for a formal response from Mercury & Balmoral. DP noted that he would push Mercury and the Tank Manufacturer for a response. DP had liaised with Mercury the previous day. <b>DP advised that the tank manufacturer had been on site and reviewed the tanks and a formal report is awaited re proposals to have the tanks in line with the EF alert..</b>	

### PROJECT MANAGER'S INSTRUCTION

The following Project Manager's Instructions have been submitted to BMCL and are awaiting close out as at 19/02/2014

					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Actions	Date Closed Out/Status
2225	PMI 247	A&C Hospitals - Aseptic Suite - Sprinkler Omission	16/09/2013  19/09/2013  03/10/2013	The Board confirm that the rooms within the Aseptic suite where sprinklers have to be omitted are as below: ASU-002 Changing room ASU-003 Changing room ASU-004 Support room ASU-005 Isolators room ASU-006 Changing room ASU-007 Changing room ASU-014 Changing room ASU-015 Lobby ASU-016 Changing room ASU-017 Changing room ASU-018 Changing room ASU-019 Laminar flow room type II ASU-020 Lobby ASU-022 Laminar flow room ASU-023 Support room ASU-024 Support room ASU-025 Changing room ASU-026 Changing room ASU-027 Changing room ASU-028 Changing room ASU-029 Lobby ASU-030 Lobby ASU-031 Laminar flow room type II ASU-032 Laminar flow room DS advised that BMCL were reviewing the building regs application as will need to submit an amendment. PM noted this was WIP.	

A51679245

			<p>10/10/2013 24/10/2013 07/11/2013</p> <p>14/11/2013 21/11/2013 28/11/2013</p> <p>12/12/2013 19/12/2013 09/01/2014</p> <p>23/01/2014 30/01/2014</p> <p>13/02/2014</p>	<p>DS advised that confirmation was awaited from Building Control re the sprinkler omission. Building Control information is awaited</p> <p>DS advised this was WIP – response awaited from Building Control. BMCL had not heard anything untoward about the Building Control submission. Response awaited from Building Control</p> <p>Noted that Jim Murray had been asked to chase up a response from BControl.</p> <p>DS advised that he had met with RBarlow on 27/11 who had apologies about the delay in BControl providing a response. Request for response from BControl has been escalated and response requested asap.</p> <p>DS noted that BMCL had met with Building Control on 10<sup>th</sup> Dec 2013 who intimated that everything was okay however the paperwork needed for the amendment was to be concluded.</p> <p>DS confirmed that response still awaited from Building Control</p> <p>DS reported that a response was anticipated from GCC before 14<sup>th</sup> March. DS agreed to follow up. No impact to BMCL programme whilst awaiting information as long as Building Control do not change what they have previously advised.</p> <p>DS was scheduled to meet with Raymond Barlow.</p> <p>DP advised that DS had met with Raymond Barlow and asked him to escalate the amendment approval.</p> <p>DS advised that approval is still awaited and he would raise this again with RBarlow if not received soon.</p>	
2282	PMI 250	ADULT & CHILDRENS HOSPITALS - MRI ROOMS RAG 109 & 112; RCG 064 AND RCF 024	<p>11/10/2013</p> <p>17/10/2013</p> <p>24/10/2013</p> <p>31/10/2013 07/11/2013 23/01/2013</p> <p>28/01/2013</p>	<p>Confirmation of requirements for floor screeds to 3 rooms.</p> <p>Further to EEP Report ref 2854, dated 6th September 2013, and whilst awaiting final confirmation of any impacts from installed concrete reinforcement (from WSP) on the transfer MRI for room RCF-024, the Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG 064 to a level 80mm below the general FFL for the room. The specialist Group 5 supplier will then install containment and build up the floor including the Faraday cage to be level with the general floor level. This instruction is predicated on the EEP report which confirms that no floor shielding is required to these three rooms (RAG 109, RAG 112 and RCG 064) as the areas under the rooms are either solid ground or, in the case of RAG 109, the void over a refrigerated room.</p> <p>PM noted that a walk-round of the site with AFe, etc was required in order to discuss/agree the ceilings/containment. PM noted that for room RCF-024 – this would be transfer equipment and was work in progress to conclude. The NHS was currently awaiting info from BMCL. JB noted that ACFlooring will carry-out the works.</p> <p>Meeting taking place on Friday and responses to queries to be available on Monday and thereby confirming progress. It was noted that there was no low level cabling from MRI to control room – not clear why there is a delay in completing the rooms – installation information from manufacturers to checked for clarity</p> <p>DH acknowledged that a check was to be made to the control rooms re trunking/floor recess fill. It was agreed this item was now closed.</p> <p>DH noted that he would be amending the PMI to change the infill in the MRI. DH had liaised with AFe who had advised that the works had not been progressed in this area as yet. Request will be to screed to 30mm below FFL then put on a SR1 latex top.</p> <p>Additional Note added to Sypro as follows: The Board instruct BMCE to proceed with concrete upfill to rooms RAG 109, RAG 112 and RCG</p>	07/11/2013

			30/01/2014 13/02/2014	064 to a level 23mm below the general FFL for the room. Level across the room to be +/- 3mm and by agreement this is to be achieved by upfilling with concrete to FFL - 30mm and a self leveling screed to provide SR1 finish. Noted that work had commenced/ongoing. GW raised concern that BMCL now needed to put in an additional 50mm of screed. DH and GW to discuss. <b>GW advised that there was ongoing review of the requirements and asked that the NHS amend the PMI to be HD Screed and to include the thickness. PM advised he would discuss with DH.</b>	
2307	PMI 252	Group 1 Equipment Surgical Image Viewing	12/02/2014 13/02/2014	Amendment to existing PMI raised 13/11/2013: The two theatres to be omitted at this time are THE 114 and THE 109. The Board confirm that BMCL should install the surgical image viewing wiring to THE - 085 and THE - 092 <b>GW advised that BMCL would review the implications of the amendment.</b>	
2317	PMI 254	Alterations to Arrival Square	06/11/2013          07/11/2013 14/11/2013  21/11/2013 28/11/2013	Further to Brookfield Multiplex response to the EWN on Tuesday 29th October, the Board met with SPT and GCC to undertake a further review of how the area can be adjusted to accommodate all anticipated vehicles without conflict between the hard landscaping and the vehicles. The attached mark-up depicts a revised proposal which incorporates some of the original suggested changes but eliminates the requirement to extend the curved drop-off bay which was the area of most concern from the design team, as outlined in the response.  The key features are now: * omission of signals to prioritise Fastlink over other buses (6 columns) * omission of raised pedestrian crossing and replacement with drop-kerbs and road markings * Omission of lay-by immediately outside Adult entrance and infill with granite to match * Revised locations for 4no. bus shelters. Exact positions will be confirmed by GCC/SPT * Alteration of kerb in curved lay-by from "Kassel" to dropped kerbs * Addition of two short lengths of paving and local "Kassel" kerbs to form disembarkation points from bus stand. This will require an adjustment to the soft landscaping * Altered road markings  GCC have been asked to confirm that there will be no requirement to resubmit the RCC application.  Please provide comments on the revised proposals and updated costs to amend the external works as shown. Noted that BMCL will review the PMI and provide feedback. PM advised that feedback and cost information was awaited from BMCL. JB advised that BMCL were going through the hard and soft landscape tenders re roads works. JB enquired if a safety audit would be required. DH advised that formal confirmation was awaited from GCC re there being no requirement to resubmit the RCC application. DH advised that he was not concerned about the need to carry out a safety audit. WSP take on the proposals awaited and BMCL will chase up. George reviewing the AK marked-up drawing. DH advised that the costs had been received and were under review by PM. DH enquired if the technical response was available. DS advised that BMCL/WSP were going through the revised proposals. DS had discussed the proposals with JMiller i.e. trees. DH advised that it was proposed	

			<p>12/12/2013</p> <p>19/12/2013</p> <p>09/01/2014</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>30/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>to provide the arrival square proposed plan back to SPT and GCC later that day. DS enquired if there was any intention by LES to revisit the vissim model. DH advised that there were no changes to the movement of cars only buses so there was no intention to revisit the vissim model.</p> <p>DH advised that comments and costs had been received and that the drawing would be submitted to GCC/SPT and the NHS will meet with reps to finalise the agreement. DS advised that WSP were lined up to progress the work and that fees would start to be incurred. DH acknowledged that there would be drawing changes. DH advised that GCC had not answered the query re there being no requirement to revisit the RCC.</p> <p>DH advised that he had escalated the RCC query with MMcAllister who was going to be liaising with Jim Fleming.</p> <p>Meeting arranged for 27<sup>th</sup> January but hoped to arrange something earlier – it was anticipated that this item would be closed after this meeting is held</p> <p>DH noted that an earlier meeting was not possible therefore the 27<sup>th</sup> Jan remained as the meeting date. DS noted that there was no risk on BMCL for authority changes.</p> <p>DH noted that there were meetings scheduled for 27<sup>th</sup> Jan and 5<sup>th</sup> Feb. In relation to the physical aspects i.e. omission of layby – none of the parties are disagreeing. Waiting point for buses to be concluded. DS advised that he would liaise with WSP re getting design finalised. AK noted that there is a raised platform and enquired if this was to come out and DH suggested changing to a dropped kerb.</p> <p>DH noted this is wip and there is a meeting with SPT on the 5<sup>th</sup> Feb 2014. GW sought confirmation that BMCL had been instructed to carry-out the design work and DH confirmed that BMCL were to carry-out the design work.</p> <p>PM advised that the meeting with GCC had taken place and he could confirm that he would be issuing a PMI to request the omission of a) road crossing, b) bus bay at adult hospital and c) 2 sets of lights. The ducting/conduit for the lights would still need to be installed. JB requested that PM provide an over-marked drawing with the PMI. DS agreed to provide a drawing which is to be over-marked. DH and GW to review the proposals for costing.</p> <p>PM agreed to locate the drawing and mark-up. DS advised that he could resend the drawing if required. PM advised that the next step was to have a meeting with SPT, GGC and the road designers in order to get a consensus view. PM advised he would issue a PMI to confirm the way forward i.e. take out raised crossing, build a straight dock, etc. DS noted that the raised table had already been taken out. DS raised concern re timelines for approval and potential impact and BMCL were looking at the traffic lights. DS enquired if there had been any suggestion of additional works being required noting that the £6k was for the design work as previously discussed however this cost would raise to £12k if GCC revisit the RCC</p> <p>PM enquired if BMCL are buying the bus shelters and GW advised that there is 4 bus shelters for BMCL to purchase for the arrival square however these shelters did not include the real time bus info. There was also 3 shelters which needed to be relocated from the existing campus and confirmation was required from the NHS as to where these are to be moved to. PM noted that on previous contracts the Contractor had purchased the shelters from SPT. DP raised concern that GCC and SPT have already reviewed the scheme which had been a lengthy process to get to the agreed plan.</p> <p>It was noted that the previous costing proposals had been agreed and BMCL and NHS would need to meet to discuss the implications of the new PMI to be provided. GW noted that liaison with GCC</p>	
--	--	--	---	--	--

A51679245

			<p>23/01/2014</p> <p>30/01/2014</p> <p>13/02/2014</p>	<p>meeting was to be arranged. PM advised that he had a discussion with GW and AKerr and had offered to meet with BMCL if needed and had no request for a meeting as yet. DS &amp; GW agreed to liaise with AKerr and RNetherey re need for a meeting. It was noted that the drug cabinets will be dealt with through the equipment list.</p> <p>PM noted that he was meeting with AKerr and RNetherey on 28/01/2014 to close out any outstanding issues.</p> <p>PM advised that he had met with AKerr and RNetherey to agree the way forward. PM would provide a PMI to clarify the way forward. PM noted that there was no commercial issues.</p> <p>Updated PMI issued therefore item closed.</p>	
2411	PMI 265	Adult & Children's Hospital - Renal Installation	29/01/2014	<p>Clarification of Requirements for Renal Installation</p> <p>Confirmation of Board's final response returned as RDD 12.12.2013, in respect of alarm panels.</p> <p>Panel locations:</p> <p>NSGH OPD Workshop - mimic panels to cover all SGH areas and repeat from NCH.</p> <p>NSGH OPD Nurses Base - 2 mimic panels.</p> <p>NSGH Critical Care - 1 indicator panel.</p> <p>NCH Workshop - 2 mimic panels.</p> <p>NCH Ward Areas - 1 mimic panel and 1 indicator panel in main nurse base of GW1 and 2 indicator panels in touchdown base GW1-011.</p> <p>NSGH Wards 4th Floor - 1 mimic panel and 1 indicator panel at each ward (4 No) main nurse base and these are RENW300, RENW247, RENW239 and RENW232. Sketches attached show locations.</p> <p>Panel references: Board users have stated preference for panel installation to be similar to that installed at Western Infirmary; given the distance from the plant rooms, the override switches must be on the mimic panels and not located outside plant rooms.</p>	
2424	PMI 266	Clock (CLO003) Connection	<p>05/02/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>The Board wish to confirm that there is no requirement to connect the clocks (CLO003) in NCH Anaesthetic rooms to the Theatre Suite central clock system.</p> <p>CLO003 is a group 2 item and will be provided by the Board</p> <p>The panels should be indicated on the 400 series drawings/ as built drawings as CLO001. DS agreed to check this with Nightingale before being closed off.</p> <p>DS requested that this item remains on the tracker until feedback from Nightingale had been obtained noting that the RDS would need to be amended.</p>	
2425	PMI 267	Hoist tracks - Wards - Level 6 upwards	<p>05/02/2014</p> <p>06/02/2014</p> <p>13/02/2014</p>	<p>The Board confirm that hoist tracks in wards from level 6 upwards should be set a minimum of 1165mm from the bedhead wall, providing consistency of location across the rooms on these levels.</p> <p>DP noted that there had been a major exercise done re sprinkler locations. DH advised that he had discussed the matter with GB – only moving the tracks 100mm and only 3 brackets installed so far and nothing else installed.</p> <p>DS advised that BMCL have reviewed and issued to the designers and Arjo to check that there are no issues.</p>	

2427	PMI 268 -	Bus Timetable Information Screens	06/02/2014  13/02/2014	The Board request a cost for the provision of power and data to 3no. bus timetable information screens. one twin (OUT010) 13A socket and one twin data (OUT131) to be provided at each location as shown on the attached mark-ups. Allowance to be included, where necessary, for pattressing to support large 54"/70" monitors as noted. GW noted that BMCL had requested a cost for the works and there was concern re location for the adult screens (i.e. no wall)	
2428	PMI 269	EMC-129 - Additional Power & Data	06/02/2014  13/02/2014	The Board request the provision of additional power & data (DATA1000) to the second desk position in room EMC-129 (office) within Adult Emergency Dept. The provision will include an additional length of TRU1000 in order to provide the outlets at the correct location. Costs to be agreed in advance of the works and allocated to the Group 1 Equipment List. GW noted that BMCL had requested a cost for the works noting that this was a finished room.	
2430	PMI 270	CHILDRENS HOSPITAL - SCIENCE CENTRE INSTALLATION YCF1 ADDITIONAL POWER & DATA	07/02/2014  13/02/2014	Proposed Board funded (YCF) Group 5 installed furniture and fitments. Addition power and data points requested by Science Centre on behalf of Yorkhill Children's Charity. GW advised that Mercury had been instructed to do the works and BMCL were awaiting a CEN for the works	
2432	PMI 271	ADULT HOSPITAL LEVEL 2 ENTRANCE DOOR TO THEATRE SUITE	07/02/2014  13/02/2014	At entrance door from atrium walkway to theatre suite (to corridor THE-005) reposition cable to existing OUT-131 outlet in Room THE-004 to adjacent to entrance door on atrium side, connect to OUT121 outlet plate. Refer attached sketch, outlet to be set at standard height for wall phone. Point to be picked up on Group 1 equipment list. GW noted that BMCL had requested a cost for the works	
2434	PMI 272	ADULT HOSPITAL EMERGENCY DEPT. 10 No. ASSESSMENT BAYS	10/02/2014  13/02/2014	Proposed alterations to Group 1 fitted furniture in 10 No. generic assessment and treatment bays. Please provide cost to reconfigure furniture as set out in the attached specification. PM advised that he would provide trolley dimensions to GB and DS asap.	

CE for Ground Water monitoring to be concluded

**Other items that require discussion:**

- DP advised that he was in discussion with Wallace Whittle re HV separation/sprinkler coverage (06/06/2013)
- Link Bridge – PM acknowledged that the Nightingale link bridge drawing had been signed off in (circa) June and some time later a WSP stick steel drawing had been signed off. The NHS had not received the updated Nightingale drawing and what has been installed is larger than expected i.e. 1.5m bigger than the signed off architectural drawing. Concern was raised about the appearance of the link bridge installed and the NHS need to understand why the structure is larger than expected. (31/10/2013) PM noted that the final span had been lifted into place on 2<sup>nd</sup> November. It was understood that it was BMCL's intention to look at the appearance. DH noted that he had asked for a statement from the architect that they are content with the design. DH noted that JMurray had shown him some sketches. DS advised that the BMCL position is that what has been installed is as per the drawings. (07/11/2013) DH enquired which drawings the bridge had been installed to as the NHS had never received a final architectural drawing for approval. DH noted that he was awaiting confirmation from the Architect to confirm that they were content with the design intent. (14/11/2013) PM advised that a statement had been received from NA and PM would liaise with DL re the way forward. (21/11/2013) The NHS is expecting a proposal from BMCL re improving the appearance of the bridge. (14/11/2013) PM noted that DL had discussed the link bridge with MS. DS noted that a proposal from Nightingale had been provided to MS for review prior to liaising with the NHS Team. DS requested that the NHS review all the signed off drawings for Neo-natal. It was agreed that a meeting to discuss the neo-natal link bridge and review all the drawings should be organized – attendees to be DS, JMurray, AK and DH, DL and PM. (12/12/13) DS advised that Nightingale were identifying a proposal and that Nightingale had received the mark-up. It was anticipated to have a proposal by the end of the week so it can be discussed with RCalderwood on the 6<sup>th</sup> Jan 2014. DS noted that the NHS needed to review the neo-natal steelwork drawings. GW noted that AHAlliday had advised that the steelwork was in and being constructed. DH advised that was a query re the bracing. DS advised that he would provide a copy of the email from NMcGarry who suggested that the bracing is for wind. (19/12/2013). A meeting with the CE of NHS GG&C along with project team and BMCL members and architect will take place on 20<sup>th</sup> January 2014 both neonatal bridge and link to neurosciences will be discussed (09/01/2014) PM noted that a meeting had been arranged to discuss the link bridge. DS noted that DL had advised that BMCL can purchase the steelwork for the Neo-natal link bridge. PM advised that he had made some minor comments on the neo-natal link bridge drawing. PM noted that the NHS would be reviewing the Neuro link later that day. (16/01/2014) PM noted that there had been a meeting on 20<sup>th</sup> Jan and BMCL were putting some thoughts down. DS noted that NMurphy had emailed him and DS would set up a meeting to provide a presentation of the proposal(s). AK noted that it was proposed to start work to the floor of the neuro link bridge. (23/01/2014) PM advised that a meeting had been scheduled to take place on 17<sup>th</sup> Feb 2014. PM requested an advance copy of what will be presented on the 17<sup>th</sup> Feb. (30/01/2014) MS had provided sketches to DL who would show these to RCalderwood in advance of the meeting on 17<sup>th</sup> Feb 2014. DS advised that BMCL were looking at the build-ability of the proposals and were awaiting initial feedback from the NHS. (06/02/2014) **PM advised that he had received drawings from BMCL and the NHS has provided comments back to BMCL. RC is on annual leave so unable to comment at this time. Meeting arranged for 17<sup>th</sup> Feb with RCalderwood. (13/02/2014)**

- Lifecycle Costing – DH advised that he had requested the lifecycle costing as the NHS want to understand the allowances/assumptions made (i.e. includes the CHP)14/11/2013. Noted that this is WIP. (21/11/2013) GW advised that the rep (Fraser) was on annual leave and GW would follow this up w/c 2<sup>nd</sup> Dec 2013 (28/11/2013) GW advised that Fraser was reviewing the A&C however BMCL had the Energy Centre lifecycle costing information if required. (12/12/2013) DH advised that he had received the document however he needed Doig & Smith to explain how the document had been built up – GW agreed to organize a meeting. (19/12/2013). Grant Wallace to confirm availability of Fraser Dunlop (D&S) and arrange meeting to review Lifecycle Costs content with Ian Powrie. (?) DH advised that it was proposed to meet w/c 20/01/2014 and GW agreed to confirm asap that Fraser can attend the proposed meeting (16/01/2014) DH noted that there had been a meeting with BMCL the previous day. Some gaps in the information provided had been identified and the NHS Team await an update. DH had asked for a plan of what is being done and when. (23/01/2014) JB advised that JB and GW had met with Doig & Smith and an update would be provided to DH further to the email sent from JB to DH (30/1/2014) Noted that JB and DH had met on 05/02/2014 and DH would meet with IP later that day (06/02/2014) **GW advised that BMCL had provided all the information available. DH to discuss with GW what they want BMCL to do (13/02/2014)**
- PPC Permit – A meeting on-site had been scheduled with SEPA to take place on 22<sup>nd</sup> November 2013. This meeting would be attending by PM and IPowrie and BMCL reps. (14/11/2013) DP noted that he would provide a site visit to the SEPA rep prior to the meeting. BMCL want to put 1 boiler on and this will not breach the threshold. It was agreed that BMCL and NHS would have a pre-meet. (21/07/2013) DP advised that a meeting with SEPA had taken place the previous Friday and a site visit had also been provided. The meeting had been positive. Initial view is that the permit should be written as now but with a slant for the 2015 requirements. Guidance to write the application had been received. Permit to be in place by June next year. There is a bit of work to do to prepare the application. Rep was looking for the site investigation survey for the retained estate. DH advised that over and above the information provided to BMCL there is some further information available for the retained estate i.e. information from the additional boreholes and the BAM site. (28/11/2013). DH noted that there is a recommendation going from IP to DL as to how best to take forward. DH will provide feedback to BMCL as soon as DL approval rec'd. Potential to have consultant in place by 17/12/2013. DP advised that SEPA have advised of the plant/equipment limit that BMCL can use until the PPC has been obtained. (12/12/2013) DP advised that the process to prepare the permit had been commenced however as it was considered that there may an issue re retained estate SI's. GW reported that ALee was advising that 95% of the rigs were already booked out for Jan 2014 and BMCL needed information asap. (19/12/2013). DH reported that consultant support is now in place. SEPA are scheduled to visit site next Thursday (16<sup>th</sup> January) to determine what investigative works are required to be carried out (09/01/2014) DH noted that SEPA were carrying out a full walk-round of the full site later that day. DH had met with URS re pulling together all the documentation. (16/01/2014) DH noted that the application was continuing to be auctioned. SI were on-site that day to undertake survey at the oil storage. DP noted that he had drawings of the energy centre bund, etc and he would send these to IP. It was noted SEPA were asking for drainage info at the Energy Centre suggesting that this was to do with what happens if a spill at the fill point. (23/01/2014) DH advised that the preparation of the application pack was progressing well. SEPA were looking for the site wide drainage solution – DH suggested that SEPA may request a bund or similar at the Energy Centre. The survey at the oil tank had been undertaken. (30/01/2014) **DH noted that this was WIP however on target to submit the draft application in 10 days time and application by the end of the month. (06/02/2014)**
- Specialist Fit out areas – there are some rooms which have group 5 specialist fit-out and as BMCL do not know the programme for fit out then they are unable to carry out the group 1 fit out i.e. no wall so cannot install shelves. BMCL proposed that the NHS specialist contractor should be requested to carry out the group 1 fit out in the MRI rooms. (21/11/2013) GW suggested that PM had advised that he would confirm to BMCL the way forward (28/11/2013) DH noted that BMCL were to provide confirmation that the cabinets were non-ferrous. If confirmation is that they are non-ferrous then these can be purchased and handed over to the fit-out contractor. Discussion required between NHS and BMCL as to how BMCL can accommodate the delivery and storage of group 5 equipment. (12/12/2013) It was noted that discussion with suppliers would commence 1<sup>st</sup> week January 2014 however a meeting of the NHS with the MRI supplier had been scheduled for 20/12/2013 in order to understand what can and cannot do for all 3 MRIs. DP reported that there would not be stable environmental conditions in March 2014. DH noted that the general X-ray rooms equipment was from a single supplier and the CT Scanners is from a single supplier. (19/12/2013). DH reported that FWraith was planning meetings for several of the specialist areas and liaising with AFernie to ensure areas would be prepared appropriate for works to take place. Specifications are in preparation to ensure rooms are appropriately kitted to accept equipment. DP to be involved in this process (09/01/2014) DH advised that the NHS are meeting with a supplier on 17/01/2014. Af noted that he did not have any dates for meetings and that it was critical that meetings happen as BMCL need to understand the NHS delivery dates. DP advised that BMCL needed to understand any services requirements. DH reported that the 3 MRIs were due to be delivered 30/31<sup>st</sup> March 2014. GW advised that he needed an understanding of all the group 5 equipment for insurance purposes. (16/01/2014) It was noted that further to an internal NHS meeting that the MRIs will now be scheduled to be delivered later 2014 however there were

further meetings regarding the Group 5 equipment taking place over the remainder of the week. DP advised that BMCL are pulling together a schedule of key dates (23/01/2014). It was noted that the same carrier is delivering all the equipment. The Method statements, risk assessments and dates for delivery will be provided w/c 03/02/2014. FW is liaising with Alan Stephen. AFe was looking at an option to locate all the equipment into a few rooms – there are 3 rooms that are lockable. GW enquired if there would be any change to the insurance coverage. DH noted that the NHS were finalizing the list of equipment which will be delivered to site. The contractor will be responsible for protection to the vinyl from the department doors to the storage/holding room. AFe advised that BMCL needed 1 point of contact through Peter. (30/01/2014) Noted that a BMCL/NHS meeting was scheduled to take place on Friday. DH advised that he was updating the information for the insurance coverage. (06/02/2014) **PM noted that the MRIs and Spec CT will no longer be delivered before 31<sup>st</sup> March therefore no need for BMCL to put in measures to ensure environmental controls are suitable for these machines. (13/02/2014)**

- Pseudomonas in taps. DH noted that there had been a CEL issues relating to Pseudomonas in taps and specifically the flow straighteners in the taps. The NHS had related this back to the NHS Board centrally. It was understood that industry wide this issue is being reviewed. DH enquired if Horne and Shanks are undertaking a review of their design/have any comments about their taps. DH noted that there was no specific action for the Project Team at this time. (16/01/2014) DP advised that he had forwarded the information to Mercury. DH noted that Armitage Shanks have changed the flow straighteners to the Marquick taps. The CEL only relates to high risk areas. The high risk areas will need to be discussed with Infection Control reps. (23/01/2014) DP advised that he was pushing Mercury for a response. Mercury has passed the enquiry to Horne for an update re the current status of design. (30/01/2014) DH requested that Horne be pushed for a response (06/02/2014) **DP advised that he is awaiting a response from Horne (13/02/2014)**
- Medigas – design has been completely signed off. DH had received a request for the oxygen flow rate information relative to the retained estate. DP noted that need to make sure that the services no longer to be used i.e. demolitions/decants are not included in the figure. (16/01/2014) DH noted this was work in progress and there had been a meeting earlier in the week and a subsequent walk-round with ISandford and BMcCormack re retained estate so that the tanks can be ordered. (23/01/2014) DH noted that the litre/min had been agreed and IP was to confirm the order with Air Products (06/02/2014) **It was noted that there was a meeting scheduled to take place on the 20<sup>th</sup> Feb to discuss and sign-off the size of the tanks and that BMCL wanted to progress the shed and cladding works and get the pipes across the road. PM advised that there was concern that there is no drain point(s) and water inevitably gets into ducts. AK advised that he would review this. AK noted that where the duct comes across the ambulance bay the duct covers will be concrete. PM noted that he was comfortable with the principles being adopted. (13/02/2014)**
- Equipment List – GW advised that he would provide the equipment list to the NHS for review/agreement of current status. If agreeable then the NHS should formally provide the equipment list to BMCL via Sypro. GW noted that there was only 1 equipment list to be run by Nightingales which would be the as-built list. (30/01/2014) GW and DH to discuss (06/02/2014) **GW noted that GW and DH had jointly discussed the equipment list and agreed the list and cost. DH and FW to confirm that they have nothing else to be included. (13/02/2014)**
- Fill point renal acid tank – Elgar has discussed the distance from the drop off bay to the fill point and advise that there is not an adequate header. DP noted that Nightingale are involved in working up an alternate solution/re-co-ordination exercise was ongoing. (30/01/2014) PM enquired how many ambulances the bay could take. DH suggested that there was provision for 2 ambulances. DP noted that it was WIP to review (06/02/2014) **DH to check tank deliveries (13/02/2014)**
- Hoists/Slings/Charging points – DH and BMCL to discuss (30/01/2014) – DH and GW having ongoing discussions. Feedback from meeting with Cameron Raeburn awaited (13/02/2014).
- AK noted that BAM are connecting into the BMCL fire main and will need to make a drain connection. The road traffic management will need to start to be co-ordinated and it was anticipated that this would be through the interface meetings. (13/02/2014)
- Gas points in anaesthetic rooms – PM noted that during inspections of theatres area it had been observed that there is only 1 set of gas points in the anaesthetic rooms and 2 sets of pints are needed. The room data sheets advise that there should be 2 sets of points. DP noted that the 1<sup>st</sup> medigas design had been based on the 1<sup>st</sup> RDS – he had carried out a check of one room and the design of that room hadn't been changed. The NHS have taken out dual circuitry, etc therefore not fully complying with the STHMs. DP reported that it had been agreed that the medigas drawings should take precedent. (13/02/2014)

- Finishes – PM noted that in the offices the trunking is nicely sealed to the wall however in the theatres there is gaps between the grilles and wall and ducting not sealed. DP noted that the light fittings and grilles had not been sealed as yet but would be sealed in due course. PM acknowledged that he hadn't seen the schedule of exceptions.  
(13/02/2014)

**EARLY WARNINGS**

The following Early Warnings have been submitted to the NHS Board and are awaiting close out as at 26/02/2014:

<div style="float: right; text-align: right;">  </div>					
Sypro ID	NHS Ref No	Item	Date Raised /Discussed	Status	Date Completed/ Status
13069	BMCL-EWN-122	Late return of RDD submission	<p>05/04/2012</p> <p>07/11/2013</p> <p>17/11/2013</p> <p>21/11/2013</p> <p>28/11/2013</p> <p>12/12/2013</p> <p>19/12/2013</p>	<p>Workflow report showing overdue RDD documentation. We note that this late response may affect BM programme and Works and will advise in due course any consequence that we are unable to mitigate. This report does not include the access control strategy which is also outstanding. DH and DS have discussed and agreed priorities: agreed following order: Door Types – Floor Finishes – Ceiling Finishes – Wall Protection. DH will check and confirm if Access Control Strategy has been returned.</p> <p>DH advised that</p> <ul style="list-style-type: none"> <li>One group of M&amp;E information which was to be returned later that day.</li> <li>CUP 1050 – equipment list – will be confirmed via the Equipment List PMI when issued. DS requested that the drawing be returned as a D status. DH requested that the drawing be re-provided to DH for marking as D status.</li> <li>Pharmacy – PM is suggesting that the double cabinet/double lock may not be needed. PM will confirm the way forward asap.</li> </ul> <p>DH advised that there were 3 items outstanding:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford has been chased up – DH proposed providing the response to BMCL be cop 18/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – DH would chase these up</li> <li>Pharmacy Cupboard – PM progressing</li> </ol> <p>PM advised that:</p> <ol style="list-style-type: none"> <li>Medical Air &amp; Vacuum – ISandford to return to NHS BY COP 22/11/2013</li> <li>Aseptic Suite – drawings are with Lynn Morrison – EXPECTED EARLY NEXT WEEK</li> </ol> <p>DH advised that FW had met with Pharmacy as a team the previous week and FW was chasing up return of the drawings. DP noted that woks had commenced in the Aseptic Suite area. DS requested the Pharmacy Cabinet information.</p> <p>DH agreed to liaise with FW re return of the aseptic drawings by cop 13/12/2013. PM reported that BMCL should continue with the Pharmacy cabinets in accordance with the drawings.</p> <p>It was noted that the Aseptic drawings had now been returned to BMCL and had subsequently been discussed with FW. DP noted that there had been a couple of matters to be resolved i.e. 2 lig lights which had been added on (resolved). DS noted that the door locks were now aligned to the Locking Strategy. An explanation to the queries can be provided at the side of the drawings. It was noted that a meeting to discuss the cabinets was scheduled to take place on 6<sup>th</sup> Jan 2014.</p> <p>Pharmacy Cabinets – it was noted that PM would conclude the PMI on 20/12/2013. PM had liaised with RNetherey on 18/12/2013 re locations and numbers. (see PMI 262 issued 24/12/2013)</p>	

			<p>08/01/14</p> <p>16/01/2014</p> <p>23/01/2014</p> <p>06/02/2014</p> <p>13/02/2014</p> <p>20/02/2014</p>	<p>Pneumatic Tube drawings – these were currently being worked on for return to BMCL. It was noted that there were very few returned drawings outstanding from the NHS.</p> <p>DH noted that register issued shows several items outstanding as the tracker formulae included no allowance for the festive shutdown. DH advised that Board were working to the dates on the Design acceptance cover sheets as the dates on the tracker were not notified until its issue on 08/01/14. DS noted that he was unaware of the issue. DH noted that SF had spoken to staff within document control to clarify the position and DH further advised that the majority of outstanding drawings will be returned this week to BMCL. 20 days late items noted on the register were returned to BMCL on 18<sup>th</sup> December. DH noted that Car Park drawings were to be returned and DH will chase these up for return. Aseptic DQ (electronic format) had been returned on 23<sup>rd</sup> December and it was noted that the electronic version had been different from the printed version. The electronic version will be printed off, including comments, and returned today to close out the process. Medical vacuum drawings – discussions on-going via MGPS group. Pharmacy cabinets – PM had issued a PMI</p> <p>DH advised that the Neonatal drawings had been returned on 15/01. The 2 outstanding Car park electrical drawings had been reprinted by Doc Control as NHS unable to find. The documents relating to WF4515 had been returned. The aseptic Suite RDD had been discussed with DS. DS noted that he had gone through the report and were working with DH to identify how best to close the loop as the returned doc is pre-rdd as never received formal RDD with comments/sign-off. DP proposed that FW meets with JMiller to transfer the comments across from the pre-RDD to the formal RDD document. Medical Air – information will be returned on 17/12/2014. The Pharmacy Cabinet drawings had been returned as D status as PMI covers the NHS requirements. DS noted that Anne had changed the return dates to assist the NHS returning documents over the festive period however going forward there would be no repeat of extending dates for any other holidays. The return dates going forward will be as per RDD Tracker sheet.</p> <p>DH noted that the Medical Air document would need to be reprinted as Ian Sandford has the hard copy. DH would return the Med Air as soon as reprint provided. DS advised that the DQ had been tracked changed and issued back to FW for sign-off.</p> <p>DH noted that the documents referred to above i.e. Medical Air and Aseptic DQ had been returned to BMCL document control. DH reported that the 2 documents referred to on the RDD tracker i.e. Carbon report and RCP had been returned to document control the previous day.</p> <p>It was noted that there was no drawings currently overdue</p> <p><b>It was noted that there was no drawings currently overdue</b></p>	
20082	BMCL-EWN-139	IT Hub Room Cooling	<p>30/10/2013</p> <p>31/10/2013</p>	<p>We confirm the design as currently produced may not meet the ER requirements for IT Hub room cooling under the following clause:</p> <p>Volume 2/1 Appendix M&amp;E 3 3.15 Node ICT server room cooling 3Kw racks – 1Kw per sq m (on N+1 redundancy where n&lt;4)</p> <p>Full description of issue contained in attached documents</p> <p>DP advised that the focus had been on low carbon and minimizing loads. The IT Hub room cooling had not been designed to the above clause. None of the rooms hit 1Kw per m<sup>2</sup>. BMCL had tried to look at the actual loadings for each of the rooms and identify which rooms did and did not achieve the requirements of the clause. For those rooms that do not meet the clause BMCL have been considering options. If the</p>
