Roof area and water demand patterns affect storage tank size and economics.

Choosing Sustainable Materials

The PSC will assess the sustainability of both source and manufacture when selecting materials. Reused and recycled materials will be given preference where performance requirements are equal to less sustainable alternatives.

Materials used will be assessed to test if their embodied energy is higher than other alternatives and heavy materials will be sourced from local sources wherever possible to reduce energy lost through transportation.

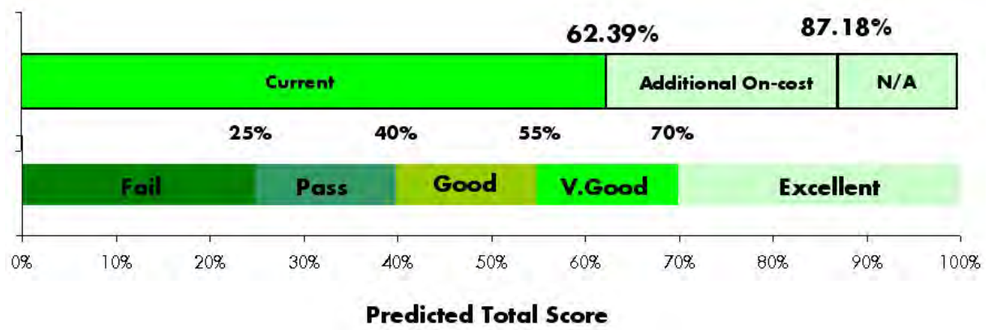
Selection of more environmentally sound materials requires to be balanced against other economic issues. However, if sustainability is to be a real consideration rather than an attractive "bolt on", funding bodies and other key decision makers will have to show a real commitment to the design decisions being made to help balance short term capital cost issues against longer term environmental advantages.

Providing Sustainable Solutions

As the design develops the studies already undertaken to consider sustainable alternatives will be developed further to test the decisions that have been made. Work with other bodies including energy suppliers and expert Governmental Advisory bodies should be undertaken to assess the viability of alternative solutions. A flagship public project of this scale provides an opportunity to test and develop more lateral ideas but this can only be achieved with the support and agreement of funding authorities. Engaging the decision makers at the earliest stage in understanding the issues and problems associated with low Carbon development is essential if real solutions, rather than "Green Washing", are to be delivered.

Neat Pre Assessment

An estimate of the score which the current proposals would achieve under the NEAT scheme has been made. It is estimated that the current proposals would achieve a score of 62.39%, which lies comfortably within the "Very Good" Rating band. The proposals would enable an additional 24.79% of credits to be achieved at an on-cost, which would bring the total score to 87.18%. This lies comfortably within the "Excellent" banding. The credits assumed within the "Current" proposals and the additional "On-cost" credits are listed in Appendix D



Future Directions of NEAT

The NEAT scheme is due to be updated in 2008, to bring it in line with the other BREEAM schemes, although the Department of Health is expected to retain ownership of the scheme. The current benchmarks are significantly out of date. Significant changes are expected to the scheme. As this is still under consultation, we have no advance information on these changes. Where possible we have allowed for this in our estimate and measured performance for the current credit set against current benchmarks in order to future-proof our estimate.

6.3.27 Energy Assessment

Energy & Part L2

The design of the hospitals has been carried out to reduce their energy consumption, and associated carbon emissions.

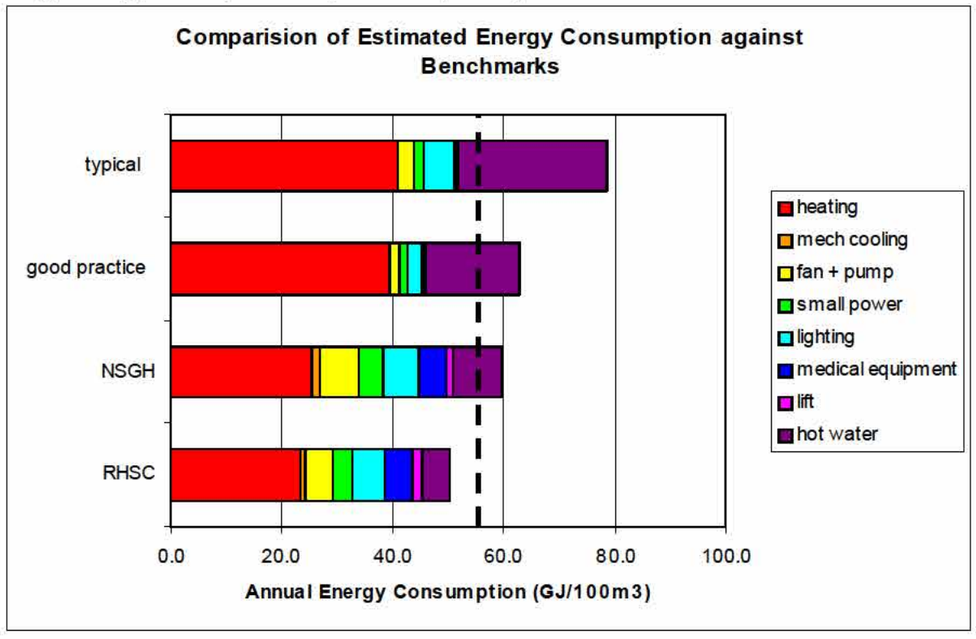
The hospitals must achieve the following energy targets:

NHS target of 55GJ/100m$^3$ of heated space,
the requirements of the Scottish Building Regulations, Section 6.0 'energy'.

Our preliminary energy model of the buildings in appendix E shows that the NHS target can be achieved by the following means:

- 20% improvement on the Building Regulations minimum u-values
- heat recovery on the ventilation systems
- variable speed pumps and fans with demand controls
- combined heat and power (CHP) generation to meet base electrical and heat loads
- good daylight and artificial lighting controls
- good small power and equipment controls
- high quality design, construction, quality control, testing, commissioning, operation and maintenance of the building
- building energy management

The chart below compares the estimated performance of the hospitals against typical and best practice figures from Action Energy's 'Energy Consumption in Hospitals Guide' (ECG 72).



Please note the bold dashed line at the NHS target level of 55GJ/100m$^3$ pa. Although the consumption figure for the Adult Hospital exceeds this level, it should be noted that the hot water production for the two hospitals will be from the combined heat and power plant; it is essentially a free by-product of electricity generation and so should not be taken into account when comparing against the target level.
The estimated annual energy consumed by fans and pumps in the new hospitals is greater per heated volume than the typical and good practice levels. This is because the hospitals are to be mechanically ventilated throughout. However, the ability to reclaim heat in a mechanically ventilated system mean that heating energy is significantly lower than good practice

The revised energy section of the Scottish Building Regulations came into effect in May 2007. Section 6.0 is now similar to Part L in England and Wales, and adopts a 'whole building' approach requiring an assessment of $CO_2$ emissions. For buildings with mechanical ventilation or air conditioning a 28% reduction in $CO_2$ emissions over a 'notional building' of the same size and shape as the actual building and built to the previous regulation standards (2002) is required.
Compliance with Section 6.0 requires detailed modelling of the building using dedicated software incorporating the Simplified Building Energy Model (SBEM). As the building is not fully developed, it is not possible to carry out detailed modelling. However, we have modified our preliminary energy model to indicate whether the requirements of the Building Regulations are likely to be met. (Please note that as the SBEM algorithms have not yet been released by the Building Research Establishment it is not possible to compare our model with them).
Our preliminary model compares the annual carbon consumption of a 'notional' hospital against the 'actual' hospital. To comply with the Building Regulations the 'actual' hospital must emit at least 28% less carbon dioxide than the 'notional' hospital.
The table below lists the key parameters of the 'notional' buildings, and of the assumed 'actual' buildings:

| | 'notional' building | 'actual' building |
|---|---|---|
| building regulations u-values | National Calculation Method (NCM) figures | 20% improvement on NCM figures |
| glazing as a percentage of facade | 40% | 30% |
| heat exchange | no heat exchange | heat exchange with 50% efficiency |
| chiller COP | 2.25 | 3.0 |
| general lighting efficacy | 5.2W/100lux | 3W/100lux |
| pumps & fans | fixed speed | variable speed |

Preliminary calculations indicate that the carbon emissions of the 'actual' buildings are lower than the 'notional' buildings by greater than 28%, and so comply with Section 6.0 of the Scottish Building Regulations.

Potential Renewable Obligations

Currently neither Section 6 of the Scottish Building Regulations or Glasgow Planning Guidance require low or zero carbon (LZC) systems to be included with the building design.

It is likely that Glasgow Planning Guidance will require up to 20% LZC energy systems to be included within the scheme before the hospitals are built; although whether it would be on an energy (kWh) or carbon dioxide ($CO_2$) basis is unclear at this point. Generally it is more difficult to meet an carbon based target because it takes into account the inefficiencies of mains supplied electricity, raising the overall $CO_2$ consumption relative to energy used.
The proposed, or an enhanced, CHP scheme can provide this proportion of LZC energy which is classified as "renewable" under the Building Regulations and the London Plan developed for planning guidance within London, and frequently by other local authorities.

It is not clear at this time whether building integrated renewable energy systems such as solar PV or wind turbines will provide a cost effective and viable source of additional renewable energy. Scotland already has a high proportion of renewable electrical energy supply (hydro and wind ) which it is planning to expand. For Scotland this may prove a more effective approach.

It is clear that passively reducing the energy demand from a building to as low as possible is currently more economic than many active building renewable energy systems, and in the short term, can make a bigger contribution to the reduction in energy consumption and carbon dioxide emissions.

Annual Consumption
The 2005-06 returns for the hospitals in the Glasgow area indicate the proportion of energy used by electricity to that of fossil fuels, primarily natural gas.

| | Total | Fossil | Electric | | |
|---|---|---|---|---|---|
| | GJ | GJ | GJ | % fossil | % electric |
| SOUTHERN GENERAL HOSPITAL | 179,580 | 126,886 | 52,694 | 71% | 29% |
| ROYAL HOSPITAL FOR SICK CHILDREN YORKHILL | 80,056 | 53,504 | 26,552 | 67% | 33% |
| VICTORIA INFIRMARY | 75,905 | 59,307 | 16,598 | 78% | 22% |
| WESTERN INFIRMARY | 142,467 | 105,055 | 37,412 | 74% | 26% |
| Average | | | | 72% | 28% |

As an indicator this data and the energy target of 55GJ/100m$^3$/annum for NSGH can be used to estimate the figures for electricity and fossil fuels consumption in terms of energy and $CO_2$.

| NSGH Energy use per annum | Fossil (boilers) | Electric (grid) | Total |
|---|---|---|---|
| GJ | 164,720 | 62,980 | 227,700 |
| MWh | 45,755 | 17,495 | 63,250 |
| 10% MWh | | | 6,325 |
| 20% MWh | | | 12,650 |

| NSGH Carbon emissions per annum | Fossil (boilers) | Electric (grid) | Total |
|---|---|---|---|
| Tonnes CO2 | 8,694 | 7,523 | 16,216 |
| 10% Tonnes CO2 | | | 1,622 |
| 20% Tonnes CO2 | | | 3,243 |

Note that it is likely that for the new hospitals the traditional 70:30 split between fossil fuel and electricity consumption may be nearer 60:40. The reasons for this are that better levels of insulation, air-tightness and greater use of heat recovery will generally reduce fossil fuel consumption, whereas increased density and power of specialist medical equipment will increase electrical consumption.
A change in this split would marginally raise overall carbon emissions and savings targets.

Biomass
This is generally seen as the most straightforward option to meet renewable energy requirements. However there are issues with quantities of supply, transport and storage of woodchip or other fuels. Developers may not take this into account as they will generally provide complete backup with gas supply, and current regulations do not actually require the running of biomass plant, thereby potentially negating the carbon savings. The Scottish Forestry Commission along with the Scottish Executive have developed a 'Biomass Action Plan' with a view to establishing biomass supply chains within Scotland to respond to the growing demand for biomass technologies .
One option is for straightforward biomass boilers to provide thermal energy. They could be run continuously to meet base load or provide peak load heating alongside a gas fired CHP unit

| Biomass Boiler | |
|---|---|
| Typical installation | 2 x 500kW |
| Size | 2.5m x 3m each |
| Feed | Wood chip or pellet |
| Cost | £98000 |
| Storage (7 days fuel) | 60m3 |
| Delivery capacity (40ft container) | 26,500kg or approx 5 days fuel |

The emissions from the biomass boilers would not adversely affect the stack height required for NSGH. There may be issues with dust from wood chip storage or deliveries.

BIOMASS CHP
Wood fired CHP schemes are more common in Europe but are still relatively new technology. Larger units in the 0.5 – 2.5MW range can operate using thermal oil or steam to operate an electricity generating turbine. A steam turbine CHP could be combined to provide the process steam requirements of the hospital. ESCO's could be set up to cover the supply and operation of such plant with Scottish government support likely to be favourable for this biomass based technology. Another option may be to run a standard CHP that could also run on biogas (see section on anaerobic digestion) with backup boilers running on wood chip.

Fuel Cells
Fuel cells have a number of applications from small to large scale, with a number of different technologies – some requiring pure hydrogen while others can run on a number of fuels from methanol, natural gas or biogas. A site of this size would be suitable for a large scale stationary application with the added possibility of a combined fuel cell transport infrastructure for hospital vehicles.
Large scale fuel cells are currently in use in many sectors across the world with established technology that is improving constantly. It is not cost competitive compared to traditional CHP, but funding is available through DTI demonstration schemes and there are organisations willing to finance and run an installation on an ESCO basis.
An outline of stationary fuel cells is shown below:

| Supplier | Electrical output | Thermal output | Combined unit size | Technology | Efficiency | Comments |
|---|---|---|---|---|---|---|
| Rolls Royce | 1 MWe | - | 1 MWe | Solid Oxide | ~60% e | No heat output |
| Fuel Cell Energy | 250 - 300kWe | 210-270 kWth | 1 MWe | Molten Carbonate | ~38% e | Steam heating, not load following |
| UTC Power | 200kWe | 250 kWth | 600 kWe | Phosphoric Acid | ~37% e | Low grade heat, load following |

CO2 emissions can be reduced significantly (~30%) using these technologies, while all other emissions are reduced to virtually zero. They are often run as CHP units producing either high or low grade heat depending on the technology or the application. Reliability is generally improved with less moving parts, for this reason can be used as uninterruptible power supplies.
Currently typical costs for the supply, installation and commissioning of the 200 – 300kW MCFC or PAFC units listed above are in the region of £850 – 950k.

DTI DEMONSTRATION PROGRAMME

According to the DTI 'The overall aim of the scheme is to reduce barriers to the introduction of cost-effective, low carbon fuel cell, hydrogen and carbon abatement technologies by demonstrating these technologies in real applications'. This translates to £15M in funding over a 4 year period commencing April 2007 for 25% of the eligible costs, additional funding of up to 10% is available for projects meeting certain criteria. The first £5M has been allocated already from an application call in October 2006. The remaining £10M allocated by a second application call for later in early 2008 and possibly a third call at a later date. The application process for call 1 was in two stages consisting of an online prequalification questionnaire and then a detailed technical and economic proposal with a presentation in front of the DTI independent assessment panel.

ESCO PROVIDER

This method of energy provision is quite often used for large scale PFI developments whereby the client will buy their energy from an outside contractor known as an Energy Service Company or ESCO. The ESCO performs the auditing, design, installation and monitoring of the installation. The ESCO also assumes financial risk for the success of the installation. Companies exist to provide this service for stationary fuel cells and can work in conjunction with other ESCO's on site if need be. This approach could allow a reduction in carbon emissions while aiding the development of new technologies.

FUEL CELL & TRANSPORT APPLICATIONS

There have been a number of pilot schemes across Europe with hydrogen fuelled buses or similar transport. These rely on hydrogen filling stations to be set up for purpose. A scheme of this kind could work well in the large hospital environment, particularly with the infrastructure in place for the delivery and storage of medical gases. The filling station could feasibly serve a number of hospital based vehicles such as shuttle buses, a fleet of pool cars or even patient transport. The only direct emission from fuel cell vehicles is water vapour, providing a cleaner local environment while also developing the hydrogen economy within the UK.

Hydrogen is predominantly produced from fossil fuels by steam reformation or electrolysis – both very energy intensive processes. Some trials have taken place in the US for Wal-Mart whereby the stationary solid oxide fuel cell has been oversized to around 3MWe and 6-7MWth producing excess hydrogen by reforming natural gas within the fuel cell. This is a more efficient method of hydrogen production providing there is a use for the heat output of the fuel cell. In the trials, the hydrogen was used to power warehouse vehicles via on-board fuel cells, usually powered by lead acid batteries. A similar approach could be applied to hospital vehicles such as in the laundry/equipment loading areas or shuttle buses, however significant support would be required from private and government funding to realise the initiative.

Anaerobic digestion and waste treatment

Currently there is a large waste water treatment works around 400m from the hospital site. The odour problem to be addressed is another issue, but if the treatment plant was updated to include sealed tanks for the anaerobic digestion of waste, a possible source of renewable energy could arise. Anaerobic digestion is the process of breaking down waste in the absence of oxygen with the by-products being liquid, sludge and biogas. The biogas produced can provide a significant amount of energy when burnt either in a traditional CHP unit or even within a stationary fuel cell for practically zero emissions.

*Source: DEFRA New technologies for landfill diversion*

Investment will have to be made by Scottish Water to address the odour issues from the site which could present the

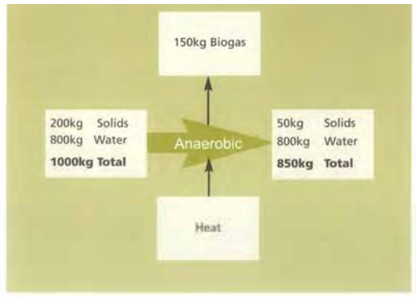


Figure 31 Typical Anaerobic Digestion

opportunity for a linked scheme between the NSGH and Shieldhall treatment works to provide energy from waste while cutting the carbon emissions in the area.

Food and paper waste can also be recycled by means of anaerobic digestion. An AD system for NSGH could also source waste from other hospitals in the area, producing energy from biogas but with the added advantage of selling the liquid and sludge products as fertiliser for use in surrounding agriculture. Some study would need to be made on waste flows and transport options from the hospitals to assess the suitability of such a scheme. However, this holistic approach to waste recycling is becoming an increasingly attractive option to local authorities with the ever increasing taxes and restrictions on waste entering landfill sites.

Underground Thermal Energy Storage

This technology known as UTES involves using separate boreholes as energy stores with one providing heat and the other cooling alternately over the seasons. This is different from ground source heat pumps which rely on the relatively constant temperature of the ground or aquifer at ~10°C . UTES actually raises or lowers the temperature of the aquifers by a relatively small degree over time to create a massive thermal energy store. At the end of each season, the aquifer temperature change is not altered significantly, meeting environmental definitions of sustainability.

An optimal UTES system would have balanced heating and cooling demands, cooling being a key factor in terms of payback times. Preliminary load calculations show that although there is a reasonable cooling demand, the choice of an all mechanical ventilation system with high air change rates could reduce the cooling input required. It will be necessary to make sure the HVAC system generally matches the output profile of the UTES system before a proper assessment can be made.

Initial contact with Deerns and IF technologies suggest that the geology in the Glasgow area is carboniferous limestone and could be suitable for the application of UTES. Initial investigations by these specialists could assess the likely costs and benefits of such a scheme before proceeding with a test borehole to confirm the suitability of the site. It is a staged process whereby the design, specification and EA licensing issues can be co-ordinated to ensure the test borehole can be incorporated into the finished system if the results are favourable. It would be important to begin investigation at an early stage due to the nature of the technology and the groundwork involved.

6.3.28 Impact from Climate Change

It appears likely that both the mean and peak summer temperatures are likely to rise over the coming century.

The Design Solution anticipates that the peak summer temperature will increase by up to two degrees Celsius over the anticipated twenty year life span of the mechanical and electrical plant, after which time, plant of additional capacity can be installed as required. Cooling and ventilation plant has been sized to anticipate this two degrees temperature increase.

Higher peak summertime temperatures make buildings prone to overheating more uncomfortable. Naturally ventilated buildings correctly designed and specified with good solar control, control of summer electrical gains from lighting and small power and with adequate thermal mass can still be adequately designed to be comfortable with rising temperatures. This assumes that internal temperatures will rise no more than ambient external temperatures and that the adaptive nature of comfort will be such that the buildings are still perceived to be comfortable.

Pressure to reduce carbon dioxide emissions from the burning of fossil fuels is likely to increase with legislation requiring further investment in LZC technologies.

The predicted impact to the site from climate change to 2050 for the NSGH site includes increased incidences of high/torrential rainfall with consequent impact on hard-surface run-off, catchment run-off, river and estuary/sea levels and ground water levels; increased wind loading and winter storm frequency as well as hotter and drier summers.

The civil and structural implications of these scenarios should be addressed in the design of the foundations and structural system for the new facility by ensuring that all designs recognise the implications of the implications in the UK of climate change.

For foundations systems this would include an allowance for raised water table, increased risk of wash-out of loose material and the long-term saturation of the piles with increased mobility of ground water and greater tidal influence and reach. Hotter and drier summer conditions may potentially give risk to ground shrinkage due to it drying out. This may lead to ground shrinkage and potential movement or loss of support. All foundations should make full allowance for this to accommodate all consequential loads and anticipated ground behaviour.

The building structure would be required to resist more frequent extreme wind loading events with potential higher loads from short–term gust duration. The ground level effects of the podium and tower should be assessed to ensure that appropriate wind and tunnelling effects are constrained as well as vibration or oscillation effects with regard to noise or vibration consequences.

Flooding consequences have been addressed in separate studies and do not have direct impact on the site itself but will have an impact on access and egress to the site from the north, via the Clyde tunnel and also from other directions to a lesser extent in the immediate locality.

Section 7 – Compliance and Implementation

7.1 Managed Construction Phase

Considered Construction

The Board and its advisors envisage that the Construction team will be given an unencumbered site as described in section 7.4 below.

They will however be required to perform while taking due consideration of working adjacent to an operating Hospital and within the cartilage of the existing hospital campus.

The existing Southern General Hospital will be operational at all times during the construction process. The construction team will ensure that they set in place a liaison process with the Board and its advisors to minimise the effect of the construction process on the operation of the hospital, this will include but not be limited to:

Provision of controlled and separate ingress & egress to the site

Vehicular Access

The staff, agents and contractors of the Construction team shall use only the designated entry points to gain vehicular access to and egress from the Site. The Construction team shall agree with the Board the designated entry prior to commencement of the works such that the works may regularly proceed in accordance with the Contract.

Security provisions

The Construction team shall provide security arrangements for the Works and where this impacts on the Board's existing security arrangements provision shall be made to co-ordinate these security provisions. All arrangements including costs associated with such events shall be dealt with in accordance with the Contract.

Interaction with standard blue light operation

The Construction team shall ensure that a plan is produced and implemented to ensure that ambulances and other blue light vehicles are not hindered by the construction process.

Site Establishment

The Construction team will be responsible for the provision of site accommodation. None of the existing board facilities will be made available for this purpose.

Water / Electricity / Gas

Temporary utility services for all construction and Technical Commissioning operations shall be provided by the Construction team at its sole cost.

Telephones

Temporary telephone services for its own usage shall be provided by the Construction team at its sole cost.

Signs

The Construction team shall provide effective and comprehensive sign posting both for construction traffic and for any alterations to existing access and egress arrangements for Boards staff, patients and visitors.

Fire precautions

The Construction team shall provide a comprehensive fire precautions policy and procedures to the reasonable satisfaction of the Board, the Board's Fire Officer and the Local Fire Authority. This shall include 'no smoking' rules, notification and monitoring of staff, risk assessment obviating measures and approvals from fire authorities and from the Board's Works Adviser where appropriate.

Regarding existing accommodation, risk assessments and fire precautions shall be established before any work is undertaken and maintained thereafter. Where appropriate, this shall be subject to Local Fire Authority approval. Where such risk extends to currently used patient areas and evacuation procedures the Board's Works Advisers approval, not to be unreasonably withheld or delayed to alternative measures shall be specifically obtained.

Use of Board Equipment

Use of existing Board equipment, without the prior written consent of the Board, for construction purposes is not acceptable.

Site cleanliness

Damping down

The Construction team shall take all reasonable precautions to procure that dust and other airborne debris are kept to a minimum. All such reasonable precautions shall be taken to prevent dust and dirt from being transferred to areas of the Hospital not affected by the Works.

Wheel Washing

The Construction team shall ensure that adequate wheel washing and other facilities are available so as to prevent the escape of mud and other detritus on to the Hospital and the public highway.

Noisy plant

The Construction team shall use reasonable endeavours to limit the impact of noisy and/or vibrating plant, particularly continuously operated plant such as internal combustion engine driven hoists or concrete mixers.

Site delivery procedures

The Construction team shall use reasonable endeavours to limit the disruption created by the delivery of construction materials to the site.

Disruption Of and Inconvenience to Existing Buildings

The following procedure shall not apply in the case of emergencies which shall be dealt with immediately by the Construction team.

Advance notice (as much as reasonably practicable depending upon the nature of the relevant work) of potentially inconveniencing and/or disruptive activity in relation to engineering services to the existing buildings is to be given to the Board.

Communications

The impact of the construction Works on staff, patients, visitors and other contractors, psychological or otherwise, shall be mitigated so far as reasonably possible by the operation of a good communications strategy. The Construction team shall make provision for information leaflets, programmes etc. as appropriate.

Environmental Strategy

The Construction team shall discuss with the board the provision of a comprehensive environmental strategy for the works. This shall include, but shall not be limited to consideration of:

Prudent environmental management;
Consumption of raw material;
Minimising consumption of energy;

Environmentally friendly design;
Recycling;
Minimising of waste streaming;
Computer based monitoring and control.

The Construction team shall make provision for the environmental strategy, its development, implementation, evaluation and on-going monitoring to be fully documented.

Design Development Procedure

The Building Contractor Design Development Procedure shall be as set out in a separate schedule.

Conduct of site operatives

The conduct of the Building Contractor's staff, agents and contractors toward staff, patients, visitors and other contractors shall be courteous, respectful and shall seek to assist them as they go about their business.

Complaints procedure

The Building Contractor shall ensure that measures are in place for dealing with complaints from the public quickly and effectively with a view to trying to resolve complaints to the satisfaction of the complainants.

7.2 Health and Safety and CDM

CDM REGULATIONS & THE DESIGN PROCESS

The designers will be required to give an appropriate level of consideration to health and safety during the design stages and be in regular communication regarding CDM matters to ensure the principles of the CDM Regulations have been followed, namely:

Eliminate hazards wherever reasonable practicable to do so.
Introduce alternatives that reduce the risk presented by the hazards.
Determine whether there are suitable means by which the potential for residual hazards to cause harm may be controlled during the installation of the works and future use of the structure.

The design team will be asked to consider the Health & Safety/CDM issues and this will be achieved by
Prioritising the health and safety objectives of the designers
Coordinating the design process
Identifying the residual hazards in the form of Risk Assessments for inclusion into the Health & Safety Plan to be incorporated with the tender documents.

Factors influencing the design are:-

Location
Concept
Size, height and bulk of the buildings(s)
Proximity of adjacent buildings
Future use of the remaining parts of the site
Local infrastructure including location and capacity of services
Planning matters (proposed future development)
Proposed positioning site access
Ground conditions
Site topography
Local issues

The key Health & Safety/CDM issues to consider during the design stages are: -
Avoidance of the requirement of working at height
Avoidance of the use of heavy materials and products to minimise manual handling
Avoidance of using hazardous materials or processes
Avoidance of use of service risers
Avoidance of the need for working under or over other trades and operations
Avoid the use of heavy/eccentrically balanced items
Avoidance of the need for drilling and chasing concrete and masonry to minimise hand-arm vibration syndrome (HAVS)
Minimise the generation of noise, dust and fumes
Consideration of the requirement for and design of temporary works
Consideration of the location and access requirements of the Mechanical and Electrical installations
Consideration of maintenance requirements (means of access, equipment etc)
Consideration of the use of prefabricated components to reduce the number of site based activities
Provide suitable and safe means of access for maintenance and cleaning operations
Provide sufficient space and facilities to safely carry out the construction works (site accommodation and welfare, site roads, storage, etc)
Provide sufficient space and facilities for lifting operations
Programming to reduce use of temporary works (e.g. early installation of roof parapets, staircases etc)
The subsequent demolition of the building(s)

The key Health & Safety/CDM issues relating to the environment surrounding this project are: -

Working within an existing hospital site
Working adjacent to other construction activities
Working on extremely large projects
Working on a tall building

Hazard Elimination Schedule

Hazards and risks will be identified during each stage of the design process. These risks will be recorded on a Hazard Elimination Schedule which will be developed and maintained by the CDM Coordinator.

The schedule will identify the measures taken to eliminate or reduce the risks and therefore provides an auditable trail of the health and safety issues addressed during the design stage process.

The schedule also communicates the information relating to the residual risks to the other designers.

The Hazard Elimination Schedule will be reviewed during each of the design team project review meetings. Residual hazards in the form of Risk Assessments will be incorporated into the Health & Safety Plan that will be part of the tender documents.

CDM REGULATIONS & THE CONSTRUCTION PROCESS

The Principal Contractor will be required to give an appropriate level of consideration to health and safety during the construction stages and be in regular communication regarding CDM matters to ensure the principles of the CDM Regulations have been followed, namely:

Plan, manage and monitor construction phase in liaison with contractors;
Prepare, develop and implement a written plan and site rules. (Initial plan completed before the construction phase begins.)
Give contractors relevant parts of the plan
Make sure suitable welfare facilities are provided from the start and maintained throughout the construction phase.
Check competence of all their appointees
Ensure all workers have site inductions and any further information and training needed for the work
Consult with the workers
Liase with CDM co-ordinator re ongoing design and design changes
Provide a safe and secure site
Provide any information needed for the health and safety file
Inform CDM co-ordinator of any incidents, near-misses, non-reportable and reportable accidents, diseases and dangerous occurrences
Set health and safety initiatives and targets with proactive monitoring and rewards
Establish site safety training programme

The Principal Contractor will be required to actively review the construction activities to minimise risks.

The key Health & Safety/CDM issues to consider during the construction stages are:

Avoidance of using hazardous materials or processes
Avoidance of one activity occurring under or over other trades and operations
Avoidance of the need for drilling and chasing concrete and masonry to minimise hand-arm vibration syndrome (HAVS)
Minimise the generation of noise, dust and fumes
Consideration of the requirement for and design of temporary works
Consideration of the use of prefabricated components to reduce the number of site based activities
Provide sufficient space and facilities to safely carry out the construction works (site accommodation and welfare, site roads, storage, etc)
Provide sufficient space and facilities for lifting operations
Segregate and protect persons from moving vehicles and plant
Programming to reduce use of temporary works (e.g. early installation of roof parapets, handrails, staircases etc)

7.3 Demolition and Managing Waste

Surplus excavated material and general building rubbish shall be disposed of to a Local Authority licensed tip and shall comply fully with the requirements of all current legislation governing the control of tipping of refuse. No such materials shall be disposed of on Site by any means.

All materials arising from demolition of the existing buildings shall be recycled wherever reasonably practicable.

7.4 Construction Phasing – see Appendix A and B

In conjunction with the Board's management team at the SGH, the TA team have developed a phasing strategy which aims to provide a clear unencumbered site for the new Adult Acute Hospital, Children's Hospital and Laboratories building. This includes advanced site clearance, remediation if required, demolition of all structures within the proposed PSC footprint and the decentralisation of site services. The latter will avoid as far as possible the need for enabling works to be included as part of the main new build programme.

The sequence of architectural phasing drawings contained in Appendix A show the PSC phasing strategy for the decanting and demolition of buildings leading up to the start of the new build. The PSC site access and set up areas area are shown, with a build sequence running anticlockwise starting with the Labs, Energy Centre and FM areas: leading to the Children's Hospital and followed by the completion of the adult build.

The PSC proposes that whilst the programme for substructures and super structures run in parallel for all areas, the fit out and commissioning of the smaller Children's hospital can be completed in advance of adults allowing an earlier handover. The positioning of the FM areas allows this end of the basement service access system to be brought into operation before the Adult's part is complete. Whilst the development proposed is a single phase build, a phased handover is therefore possible.

The architectural phasing plans are accompanied in Appendix B by matching M&E and drainage plans that show the service modification sequence.

It has been identified that the existing biochemistry building, and surgical wards and Ortho theatres overlap with the new open landscaped space associated with the PSC. Once the new facilities are operating and services have been transferred, these blocks can be demolished (either by the Board or the development construction team) and the landscaped frontage completed.

Thereafter, the Board will redevelop the remaining site, including the refurbishment of the listed buildings to provide administration and teaching accommodation.

The Trust is already undertaking enabling works in relation to the site infrastructure. These works are detailed on the drawings incorporated into appendix B. Outline descriptions have already been described in the Services sections above.

In principle the Trust's enabling works will remove the existing services that are currently in the PFI construction site and, where required, install new plant to the site boundary to re-feed the existing buildings that are to remain in operation during the construction phase. The objective of this is to provide a clear site for the successful contractor and also to ensure that the supplies to the buildings that are to remain in operation are under the control of the Trust, with no services within the contractor's site.

Every effort is to be made to provide dedicated new utility supplies to serve the new development. This will avoid potential interface issues with the existing infrastructure. This will mean some PFI installation work will be required on the hospital site, outside of the PFI site boundary and this process will require detailed planning and programming by the successful contractor team in conjunction with the Trust. It should be noted that at the time of writing, the Utility connections are subject to agreement with the providers.

As part of the PFI works a new centralised energy centre is to be constructed to serve both the Children's and Adult's hospitals. This will incorporate the heating plant, CHP, HV infrastructure and associated standby generation plant, with the centralised medical gas plant located in a nearby external space. The energy centre will be required to be operational for the completion of the Children's hospital as this will be in use during the continuing construction of the Adult's hospital. The HV ring around the PFI site will also be required to be installed at this early stage, although not necessary all of the transformers will be required. Cooling, air handling and water services plant is to be located on the related hospital building (Adult's or Children's) and hence can be installed to suit the related programme. The related services infrastructure (gas, water, power) will be installed to suit the earlier completion of the Children's hospital.

7.5 Prefabrication in Design

The potential for prefabrication will depend upon the final structural form and materials adopted. The Southern General hospital site will remain an operational hospital facility during all phases of the staged decant to the New Southern General Hospital over the full extent of the construction programme. The new buildings will be immediately adjacent to the maternity unit, neurology departments and care for the elderly facilities. The former two will be fully integrated with the new build and the new Children's hospital. As a consequence the minimisation of noise and general disruption is a primary requirement for the works on site and this can be facilitated through extensive prefabrication of structural and building components offsite and the development and implementation of low noise/vibration impact methods of installation.

Ground works and piling can be especially noisy depending upon the type of system selected. Driven piles or driven sheet piling would prove unacceptable for the site works and therefore a system of continuous flight auger piles or similar would be required. Certain components of this system can be prefabricated including the reinforcement cage. However in-situ concrete works will be required and while underground, will require generating plant and air compression equipment to be in operation for concrete placing works.

An in-situ reinforced concrete structural frame is not amenable to prefabrication other than for the reinforcement cages. Pre-cast concrete structural components can be brought to site and assembled in-situ. Similarly, structural steelwork can be brought to site completely prefabricated with connections ready to accept site fixed bolts for all primary and secondary column and beam components.

Floor systems can be pre-fabricated using pre-cast concrete floor units to accept in-situ toppings, all supported from structural steelwork or pre-cast concrete frames.

Prefabrication and design modularisation can reduce the cost of the project, improve the quality of the installation, reduce the number of operatives on site, improve on site health and safety and reduce the defects related to the installation. The value of off site fabrication is not generally found in the capital cost of the product, which is generally equivalent or higher, but in the reduced total project programme (installation and commissioning) and hence cost. The PFI process will allow all members of the contractor team, including manufacturers in their supply chain, to contribute and to ensure that all costs are considered e.g. cranage may not be considered as an additional cost associated to pre fabricated roof plant, if a suitable crane is already on site at that time.

The weak point in relation to prefabrication is often in the management of the interfaces between multiple trades. The key is to decide at the commencement of the detailed design which areas/products will provide suitable advantages so that these can be designed and selected on this basis from day one. The interfaces of these can then be understood, simplified and agreed at an early stage.

Careful consideration into the affect on other design members is also required, examples of this are to coordinate the structure and services design to size riser shafts to accommodate pre fabricated sections and their associated pre fabricated support structures and to allow for the weight of prefabricated plant rooms incorporating internal steel framework solutions and a concrete base.

Prefabricated solutions considered for this project are listed in the table below.

Prefabricated solutions considered:

| Solution Considered | Advantages of Prefabrication | Considerations |
|---|---|---|
| Operating theatres | Off site will provide better quality/cleanliness. | Location unlikely to provide programme advantage. |
| Pre assembled roof top plant rooms – chilled water plant (pumps, pressurisation etc.), possibly ventilation? | Allows construction of plant room to run concurrently with building structure then drop on, programme saving. | Potential additional weight.<br>AHUs trade off of weatherproof units Vs cost of enclosing. |
| Modular heat station solution – repetitive Heating & HWS plant rooms (on floor) using prefabricated plant solutions. | Replication will allow faster installation and commissioning and easier maintenance/understanding. Also minimises need for spares. | Repetitive solution required, should be possible to wards will require consideration for other areas so as not to undersize or oversize. |
| Risers | Reduced site work otherwise it will not commence until structure is finalised to provide complete riser. | Not particularly repetitive.<br>Structural frame and support may dictate larger riser area. |
| Modular electrical wiring | Will speed up installation if risers not pre fabricated or floor layout is repetitive. | Future flexibility/adaptability will require building in at day one as hard to alter at later date. |
| Pre fabricated/modular sanitary accommodation solutions. | Off site pre fabrication quality and reduced number of operatives in area of limited space. | Sanitary accommodation solutions required to be repetitive. |
| Pre assembled lift motor rooms | Allows construction of room to run concurrently with building structure then drop in, programme saving? | Would become more advantageous for roof top motor room solutions rather than basement. |
| Pre fabrication of distribution systems (ductwork, pipework, electrical) | Reduces operatives in circulation spaces, improves quality, improved understanding for maintenance. | Requires repetition, should be possible to ward areas. |
| Pre assembly of terminal units for repetitive installations. | Reduces operatives in spaces, improved quality, reduced commissioning, improved understanding for maintenance. | Limited opportunities for terminal units as will require repetition or use of off shelf solution. |
| Packaged plant solutions incorporating self contained controls e.g. boilers, booster sets etc. | Reduced interfaces saves on commissioning and maintenance. | Interface to centralised communications e.g. BMS. Compatibility with other systems. |

7.6 Standardised Construction

Standardisation of civil and structural engineering elements will assist speed of installation of construction and can assist in site quality control and assurance as well as providing a degree of flexibility within installation and construction activities. Such standardisation also has an effect on minimising waste and hence environmental benefits when duly evaluated using such methods as BREEAM or ENVEST.

Piling beneath the tower and podium areas can be standardised within these two areas subject to variations in the depth to rock-head or sound rock. The extent of the basement area is less than the full footprint of the tower, thereby giving rise to localised variability in the piling requirements. The grid is currently assumed to be 8 x 8 metres, but may be different in the final design scheme with a consequent change in the numbers and capacity of the piles and pile groups.

The storey heights in parts of the tower and podium are likely to vary, depending upon the function within each area. For local areas this will not lend itself to repetition, but for the majority of the remaining structure we note that it is likely to be amenable to structural rationalisation and standardisation.

The Architect's plans for the new hospital reflect functional groupings i.e. ward blocks. This will allow similarity in structural requirements which can further assist in standardisation of beams, columns and slab configurations.

7.7 Robust Construction

The New South Glasgow hospital will be designed to meet the requirements of all design and construction codes to ensure that all factors of safety for ultimate limits and serviceability limit states are fully achieved. Avoidance of progressive collapse, sufficient structural redundancy and horizontal and vertical ties will all provide the means to construct a robust building.

The facility is to be designed to ensure that all dead, live and dynamic load cases and factored load-case combinations are incorporated within the structural and civil analysis and design to ensure the facility achieves its design life whilst remaining fully serviceable and provides maximum utility.

The long term entity of the hospital building and the nature of it being a densely used public building dictates a robust and durable building services installation, particularly where the services are installed exposed within an occupied space. Robustness is required due to the risk of damage through normal use and accidental collisions. The additional movements of equipment and furniture around the hospital also adds to the risk of damaging services and hence the need for robust installations.

The design solution is initially to limit the extent of services installed in the occupied space, particularly those that are not concealed and run at low level. Due to the nature of some of the services and the function that they are providing, there will be areas where this is not possible. In these locations the correct specification/selection is to provide long term value rather than a low initial capital cost.

An example will be the taps installed in the public toilets, these will be regularly and repetitively used and hence a good quality product will outlive a cheaper version that will wear and require replacing very quickly. Consideration to automatic/presence activated taps could be a solution.

7.8 Maintenance

The building services design must allow adequate space around all installations to allow for future maintenance activities including replacement of plant and the related distribution systems, including valves etc. This maintenance space provision is not limited to that around the systems but must also include the route to them, transferring the components or plant items and the associated tools and personnel to complete the maintenance.

The design solution is to provide a low maintenance solution that allows the efficient and cost effective replacement of plant and equipment with minimal disruption to ongoing hospital operations.

The use of modular construction will allow easier and rapid withdrawal and replacement of the system/equipment using quick fix connections. Off the shelf solutions are to be utilised to allow for quick and easy replacement.

Repetitive design solutions are to be utilised to minimise the requirement to stock spares and specialist tools/equipment. A repetitive solution also allows easier understanding and familiarity for the maintenance engineers.

7.9 Life Cycle and Maintenance Costs

Lifecycle/FM Costs

Costs submitted represents anticipated LCC expenditure on a typical NHS PFI hospital, suitable for business case purposes, or equivalent indicative costs.

Costs are based on the acute PFI schemes in the Davis Langdon database.

Cost levels are brought to benchmark national average figures for January 2007. No allowance for Inflation. Assumes hospital is constructed as a new build single phase and is in use for approximately 30 years (the PFI shadow tariff period). No allowance for transitional LCC on any existing facilities.

The Lifecycle budget would cover planned major repairs and replacement to the proposed facility; day to day maintenance is covered by the FM Estates Service, etc.

No allowance is made in Lifecycle for:

* Day to day maintenance, cleaning, utility charges, administrative costs and overheads e.g. rates

* NHS Group 2, 3 and 4 equipment maintenance or replacement

* IM&T systems, hardware or software maintenance or replacement

* Any work in connection with conversion or adaptation of the facility to suit a different use or occupier

* VAT or other taxation

Other Assumptions

All costs have been uplifted to January 2007 using BMI Health Service Maintenance Cost Indices - General

All costs in £ sterling

Full Mechanical Ventilation and comfort cooling

Service costs based on standards of service delivery outlined in DoH Standard FM output specifications

Based on average service costs for acute hospital facilities taken from Davis Langdon's internal database

Caveats

Estates

i. Benchmark costs exclude rates / capital charges.
ii. Little detail with regard to proposed M&E plant
iii. Service costs only include for maintenance and replacement of equipment for categories 1 & 2.

The benchmark data allows for an element of risk e.g. possible higher labour equivalent on site to limit /mitigate deductions against the payment mechanism, but doesn't allow for a risk cost for such items as pure financial deductions against the payment mechanism, change of law etc. which bidders will be required to take risk on. This we would expect to be developed and costed into the PSC via a risk workshop.

Hard FM costs exclude –
Obligations contained within General services Specifications, provision of grounds maintenance, pest control, energy and utilities provision and provision of a helpdesk.

7.10 Capital Costs

The Capital Cost of the PSC is estimated at £ 725,041,510 and is based on the PSC Departmental area and Plant area schedule prepared by Avanti Architects and Max Fordham. Details of the Capital Cost Estimate are included in separate cost report to the report. The capital cost estimate includes costs for Departmental Construction, On-Costs, Fees, Non-Works, Equipment, Planning Contingency, Optimism Bias, VAT and Future Inflation.

Departmental Costs

All cost allowances whether standard, derived or ad hoc are rooted in DCA's for both price level and specification level as included in the current NHSE cost guidance "Healthcare Capital Investment" Version 2.1 dated 2002. Cost allowances have been generated on a basis of the areas contained in the PSC area schedule and have been updated in accordance with the firm MIPS indices contained in the "Estates and Facilities Division Quarterly Briefing Volume 15/Number 3/Winter 06/07".

On-Costs

On-costs have been assessed in relation to anticipated requirements and reflect the design intent of the PSC design. On-Costs are based on market rates where applicable. In the absence of information percentage allowances have been based on anticipated “benchmark” norms.

Fees

An allowance for fees associated with the project has been included as advised by the client.

Non-Works

In the absence of definitive costs, an allowance has been included to cover this element of the works. Decanting/decommissioning/commissioning of existing buildings are excluded and if required, we understand would be covered by a separate client budget.

Equipment Cost

All cost allowances whether standard, derived or ad hoc are rooted in ECA's for both price level and specification level as included in the current NHSE cost guidance "Healthcare Capital Investment" Version 2.1 dated 2002. Cost allowances have been generated on a basis of the areas contained in the PSC area schedule and have been updated in accordance with the “Equipment Cost Index” contained in the “Estates and Facilities Division Quarterly Briefing Volume 15/Number 3/Winter 06/07”. The cost allowance generated on the cost /m2 basis has been capped as advised by the Client, as their internal procurement department has confirmed this capped allowance.

Planning Contingency

The amount included against this heading is as detailed in the Quantified Risk Analysis appended to the estimate. The TA team reviewed the potential risks associated with the project and provisional cost allowances have been included to cover for the risk.

Optimism Bias

The allowance for Optimism Bias has been derived through the application of mitigation factors to the Upper Limit Calculation in accordance with NHS guidance..

VAT

VAT has been applied at the standard rate, to all components of cost with the exception of Fees on the basis that this is recoverable.

Future Inflation

For the purposes of comparison cost allowances are rooted in MIPS 466 and updated to 4Q 2006. An allowance for future inflation to the mid-points of construction – 4Q 2010 for the ‘Children’s’ Phase and 3Q 2011 for the ‘Adult’ Phase has been included.

Allowances updated in accordance with the ASPSAB Cost Index and Equipment Price Index as contained in the “Estates and Facilities Division Quarterly Briefing Volume 15/Number 3/Winter 06/07”.

## Foreword from the Chairman

As Chair of NHS Greater Glasgow and Clyde I am delighted to present our Design Action Plan. This document recognises the important role that good design plays in improving the health and well-being of our patients and staff and reflects our commitment and contribution to ensuring health care facilities improve the services we deliver, and impact positively on the economic, social and environmental well-being of our communities in which they are located.

The design action plan has been developed at a time when NHS Greater Glasgow and Clyde is undertaking an unparalleled period of development and refurbishment updating our substantial range of health centres, hospitals and care facilities. Our aspiration is one of achieving the highest quality healthcare possible for the population of Greater Glasgow and Clyde, ensuring health services are delivered in public buildings that the city is proud of.

I believe this Design Action Plan builds on recent successful developments such as the Beatson West of Scotland Cancer Centre, New Gartnavel Royal Hospital and Partick Centre for Community Health and sets a number of actions that will ensure an ongoing commitment to excellence in design, in which the quality of space and functionality work together, the environment in which health care is delivered provides reassurance and inspiration and is sensitive to personal nature and needs associated with the use of health services. While welcoming these examples of large scale new developments, we have not ignored the principles of good design in refurbishing and extending existing health centres.

I believe the design action plan provides a unique opportunity to work in partnership with our patients, communities, staff and partner organisations to deliver world class medical care in world class buildings and provide an appropriate legacy for the citizens of Greater Glasgow and Clyde.

## Executive Summary

This document sets out the Design Action Plan for NHS Greater Glasgow and Clyde (NHSGGC) and outlines the Board's vision for achieving design quality. It was developed in partnership with local authorities, staff and patient representatives and aims to develop the capacity of NHSGGC to support the delivery of design quality in healthcare facilities and services.

In setting out a vision for design quality, we have attempted to provide context and background to the development of the Plan, as well as outlining the key principles that will inform the planning and design process.

The aim is to be realistic in what can be achieved and to set out, in detail, a Plan that will seek to influence the delivery of the Board's vision for design quality. It is important also to recognise the progress already made by NHSGGC in delivering quality healthcare facilities and seeks to build on existing good practice.

The document sets out a direction of travel for NHS Greater Glasgow and Clyde, specifying a series of actions and responsibilities that are needed to strengthen the capacity of the organisation to deliver design quality.

## 1. Introduction

1.1 In 2006 the Scottish Executive Health Department (SEHD) set out in HDL 58 'A Policy on Design Quality for NHS Scotland' the requirement for all Health Boards to produce a Design Action Plan in recognition that good design in healthcare buildings makes a measurable difference to the experience of staff, patients and visitors. In NHS Greater Glasgow and Clyde (GGC) the Design Action Plan outlines both our commitment to quality design and also reinforces our commitment to ensuring healthcare buildings are cornerstones within our communities.

1.2 The concept of design established within the Action Plan has been defined locally and reflects the views of many stakeholders and partners. Our definition is comprehensive and reflects a balance between the aesthetic and the functional, the ambience, the accessibility and the environmental impact of new and refurbished buildings. The plan is also mindful of the need to ensure that projects deliver best value and that the overall affordability of capital projects is not compromised.

1.3 In striking this balance, the intentions is to build on existing practice, and develop the systems already in place within NHSGGC. The strategic objectives outlined will support the organisation to deliver our vision.

## 2. Purpose

2.1 The purpose of the Design Action Plan is to:

- Articulate the aspirations that NHSGGC wishes to achieve through any design process;
- Build the capacity of NHSGGC to deliver design quality by using existing resources more effectively.
- Analyse the process currently used to commission / refurbish buildings and facilities and optimise design quality by building on best practice and learning from others.
- Support a systems based approach to Service Development and Capital Development plans;
- Describe the actions required to enable NHSGGC to deliver the aspirations;
- Describe a clear process that supports the development of good design.

## 3. Context

3.1 NHSGGC is the biggest single healthcare system in the UK, employing 44,000 people and providing primary care, community and acute care to a population of 1.2 million people. A number of Community Health (and Care) Partnerships have joint structures with local authorities delivering integrated social care. The property portfolio is extensive.

3.2 The acute services and mental health strategies for NHSGGC support an unparalleled level of new development and offers significant opportunity to achieve quality design as we move to modern 'state of the art' healthcare facilities and service design. An extensive programme of refurbishment and development is underway to modernise many primary care facilities.

3.3 A NHSGGC Design Network has been established with a remit to develop the Design Action Plan and integrate the implementation of the Action Plan into the operation of NHSGGC. In doing so, the Network was clear that the Plan should be delivered within existing resources, recognise and incorporate current guidance and be responsive to the local political and economic context. This includes:

- Existing Procurement Policy;
- National specifications and standards for clinical space and function (Scottish Health Planning Note, Scottish Health Building Note, Scottish Health Technical Memorandum);
- Local Planning Context - 8 Local Authorities;
- Financial planning, models and resource allocation;
- Process and nature of external assessment;
- Legislative requirements including Fire / Disability, etc.
- Equalities Impact Assessment
- Scottish Arts Council /NHSGGC Arts programme

3.4 The network was also mindful that the needs of all of the groups identified in our single equality scheme require to be taken into account in the design of new buildings or refurbishment of existing facilities.

3.5 It is recognised that NHSGGC currently has a robust financial and planning structure in place to deliver major capital schemes. However, a number of issues were identified within these existing structures for further consideration as part of this Design Action Plan. These include ensuring that the knowledge and skills within the organisation are used effectively in delivering the Board's broader corporate objectives, putting capacity in place to support earlier engagement of stakeholders (clinical and non-clinical) at key stages of the project and that the project plan builds in adequate time and resource to deliver the key elements of the Board's vision for design quality.

3.6 However, the Design Network was also clear that NHSGGC is making significant progress in delivering quality buildings and already applying a number of principles outlined in the Design Action Plan. Examples include:

- Partick Centre for Community Health
- The New Stobhill and Victoria: New Ambulatory Care Hospitals
- The Beatson West of Scotland Cancer Centre
- The New Gartnavel Royal Hospital

3.7 To build on this, the Plan will identify and agree good practice tools to be used as part of capital projects and demonstrate compliance with recognised standards for health service design and redesign. In addition, the Plan has sought to incorporate a number of existing Board policies that should be integral to the delivery of all capital projects from the outset. Therefore the Design Action Plan has sought to build on the inherent skills, expertise and support within the organisation and our partners (statutory, voluntary and charitable organisations) and the learning from earlier projects and our partners is captured and embedded within the development and implementation process for future projects. Appendix 1 summarises a number of lessons learned and implications for future practice.

3.8 The Network also recognised that a number of structures were in place or emerging that would be important in delivering the design vision. The Plan has sought to build on these and develop their role in delivering design quality. These include the:

- Capital Planning Group (and agreed scheme of delegation);
- Better Access to Health Group; Involving People Committee
- Art, Architecture and Environment Steering Group; and
- Clinical Reference Groups.

3.9 The Capital Planning Group has already made significant progress in developing criteria for approved new capital developments and put in place arrangements to support effective governance and accountability extending to all organisational entities (more detail about the Capital Planning Group is provided in appendices 2a) and 2b)).

3.10 The initial development phase of the action plan was instigated in June 2007 when NHSGGC hosted a development session at Hampden Stadium. The event was widely attended with representation from hospital access panels, patient groups, local authority planners, facility managers, capital planners, clinicians, senior managers, architects, Glasgow art and health network, Board members, and other NHSGGC staff. The event was supported by Architecture and Design Scotland. The event generated considerable debate and discussion and ultimately produced the content now reflected in the Design Action Plan.

3.11 The draft Design Action Plan was then circulated for comment to the membership from the event and the Policy, Planning and Performance Group. A facilitated session for patient representatives was also undertaken before a final raft was submitted to the Board for approval.

3.12 A local definition of Design has been achieved as a result of the development process where by the term Design reflects the breadth of issues described within the vision below.

## 4. Our Vision

4.1 The importance of good design is paramount to the development and delivery of efficient and effective health care services.

4.2 NHS buildings need to be clinically functional, with the needs of patients, public and staff at the heart of this. Buildings should be fit for purpose, but also be flexible, progressive and adapt alongside advancing health care developments and the changing needs of the population.

4.3 NHS buildings should be an accessible resource to staff, patients and the public; presenting an infrastructure that feels welcoming, safe and inspiring of confidence. There should be an emphasis on therapeutic design which includes imaginative use of light, access to green space, intelligent arrangement of internal spaces and facilities, use of sustainable materials and the inclusion of art and creative activity. NHS buildings should provide an environment that reduces anxiety, improves health, retains staff and encourages healthier habits.

4.4 Buildings should be easy to navigate, and should consider and be responsive to the accessibility needs of all staff and visitors. In doing so, buildings should be fully integrated with public transport infrastructure as well as encouraging physical activity through effective design of walking and cycling routes.

4.5 The regeneration of surrounding communities should be integral to all projects, with sensitivity and responsiveness to the needs of local communities and environments. Buildings should be a resource for the wider community, encouraging interaction and participation, and creating a focal point and identity with the community.

4.6 To ensure NHS buildings are sustainable and offer good value for money, not just in the short term, but in the long term, the principles of sustainable design, low carbon design and wider environmental impact should be considered from the outset and integrated throughout the life of all design projects, making effective use of natural and sustainable resources where possible.

4.7 NHS buildings will be key to the effective and efficient delivery of 21st century health care, where the role of good design and a clear process to support good design will be a vital factor in ensuring the needs of staff, patients and the public are met now and in the future.

## 5. Principles of the Design Action Plan

5.1 The Design Action Plan will be used to support the development of any physical space or building within NHSGGC and deliver the vision of the design action plan. The Design Action Plan reflects the following principles:

- The need for development or refurbishment should be clearly articulated through a specification of Clinical or Service redesign;
- The functional design, construction and operation of a building should be clearly described and considered primarily within the process and articulated in a design brief (business case and brief);
- The wider environmental impact and design enhancements to the building will be considered alongside financial and clinical considerations;
- There will be a transparent and inclusive process to support any development;
- Improved partnership working will be instigated to support additional value for service users, staff and communities.

5.2 While the Plan specifies those responsible for individual elements of the scope and objectives, it is built on the concept of continuous team-working and the need to have effective communication throughout.

## 6. The Scope

6.1 The Scope of the Design Action Plan will include:

| Scope | This includes |
|---|---|
| ♦ Ethos and 'supportive ambiance' conveyed within the building | ♦ Welcoming reception / inviting / safe / information centre / clear way finding<br>♦ Comfortable / reduce anxiety / pleasant / not intimidating<br>♦ Inspirational / beautiful / imaginative / art and physical enhancements<br>♦ Health promoting environment<br>♦ Strong identity and purpose<br>♦ Ambient temperature |
| ♦ Internal spaces and the use of non clinical and clinical space | ♦ Functional / efficient and effective service delivery / infection control measures<br>♦ Light / windows / maximising views<br>♦ Quality of space<br>♦ Equalities Legislation<br>♦ Finishes / stimulating senses / colour<br>♦ Adaptable space / utility / flexibility / hard wearing<br>♦ Allocation of defined non-clinical space for various users including staff / patients / visitors including libraries / visitor rooms / quiet rooms / relaxation / privacy / continuing education / spiritual care / recreational<br>♦ Consideration of each space and function and service / identifiable staff<br>♦ Physical enhancements / arts<br>♦ Fixtures and fittings supportive of therapeutic environments and activity such as stair walking |
| ♦ External environment and outdoor space | ♦ Links to natural environment<br>♦ Sympathetic use of retained buildings<br>♦ Landscaping / usable greenspace / linked outside space / seating<br>♦ Sensitive to local landscape<br>♦ Architecture of building<br>♦ Accessible |
| ♦ Movement in and around a building or site | ♦ Way finding / clear navigation / defined pathways connecting services<br>♦ Signage and enabling equipment<br>♦ On site transport / disabled parking spaces<br>♦ Internal Accessibility / power doors / ramps / adaptations (including weight bearing) / quality walkways / bathrooms / Disability Discrimination Act compliance<br>♦ A front door / clear entrances<br>♦ Separate public and service areas |

| | |
|---|---|
| ♦ Impact and relationship of a building to and on the local community | ♦ Environmental impact assessment (major projects) / consideration of waste segregation and recycling / renewable energy / water<br>♦ Public perception 'proud' / ownership<br>♦ Including partners in delivery- artists / voluntary sector agencies / range of services available<br>♦ Local jobs / local economy / locally sourced materials / supplies<br>♦ Use of site by community<br>♦ Health impact and health improvement<br>♦ Interface with community |
| ♦ Inclusion of staff, patients and users within the design development process | ♦ Engaging partners<br>♦ Engaging clinicians<br>♦ Engaging patients / patient reps / user groups / volunteers<br>♦ Generating awareness of design |
| ♦ Supporting infra-structure and access to the building or site | ♦ Sustainable design / cost effective / energy efficient and environmentally friendly and safe construction process and materials (low carbon design)<br>♦ Quality workmanship<br>♦ Regeneration / stimulate other developments<br>♦ Travel plans / public transport / green travel / walkable<br>♦ Safe to visit / work<br>♦ Close to amenities / provision of amenities - shops / coffee facilities<br>♦ Accessible in location / car parking |

The Project Leader (as described in appendix 2a) will be responsible for ensuring that the scope of the policy, as outlined above is applied to and described within the Project Brief for individual capital projects.

## 7. Action Plan Objectives

7.1 NHSGGC requires to undertake the following the actions to enable the organisation to deliver the aspirations described within the vision and scope of this plan.

| Objective | Elements | Action | Lead | Timescale |
|---|---|---|---|---|
| **1. Establish effective project governance systems to deliver best value and Board's vision for design quality** | • Effective and equitable use of resources<br>• Effective project governance<br>• Implementation of Design Action Plan | Ensure Project Steering Groups are established for each project (see description in appendix 2a) with clear leadership from a senior manager with responsibility for commissioning the project is identified for all projects | Capital Planning Group | Ongoing |
| | | Capital Planning Group monitors and reviews implementation of Design Action Plan. | Director Acute Services Strategy, Implementation and Planning | From February 2008 |
| **2. Ensure that all capital projects deliver the boards strategic objectives including service delivery, property strategy and health improvement.** | • Supporting redesign through engagement of clinical staff<br>• Improving health and regenerating communities<br>• Agreeing capital projects criteria | Engage with clinical staff to agree core considerations in relation to clinical redesign and functionality to be agreed by capital planning group. | Project leaders / Head of Acute Planning and Redesign | March 2008 |
| | | Develop policy on health improvement for capital projects to be agreed by capital planning group. | Health Improvement and Inequalities Manager – Acute Planning | March 2008 |
| | | Capital planning group to agree project initiation pro-forma for all capital projects to ensure fit with strategic objectives and Design Action Plan. | Head of Capital Planning | March 2008 |
| | | Capital Planning Group to approve supplementary guidance (handbook) for project teams to ensure delivery of design quality in line with Design Action Plan. | Director Acute Services Strategy, Implementation and Planning | April 2008 |

| | | | | |
|---|---|---|---|---|
| **3. Establish mechanisms to support effective project management, ensuring projects deliver the boards vision for design quality.** | ♦ Agreeing the project brief<br>♦ Communicating the brief<br>♦ Managing and reviewing the brief<br>♦ Procurement<br>♦ Corporate working<br>♦ Supporting project leads | In line with Capital Planning process, ensure all Capital Plan proposals are in line with Design Action Plan vision, principles and scope. | Directors / Capital Planning Group / Project Leaders | April 2008 |
| | | Agree criteria for consideration in determining how the procurement model can best support delivery of the Board's vision for design quality. | Head of Capital Planning | April 2008 |
| | | Project leads to utilise supplementary guidance (handbook) to ensure that project briefs are compatible with vision for design quality and capital projects criteria. | Head of Capital Planning | April 2008 |
| | | Capital planning group to agree supplementary criteria for consideration in assessing tender documentation for capital projects to ensure compatibility with Design Action Plan. | Head of Capital Planning | April 2008 |
| | | Provide process flowchart and supporting guidance (handbook) to project leads / partners to support project management and delivery of key milestones in line with vision for design quality. | Head of Capital Planning | April 2008 |
| | | Develop clear policy outline in relation to each element of the Design Action Plan scope and key actions to support project leads for inclusion in the supplementary guidance (handbook). | Leads to be identified | April 2008 |
| | | Capital planning team to agree design tools to be used by NHSGGC project teams and guidance for their use | Head of Capital Planning | April 2008 |
| **4 Work in formal partnership with stakeholders to ensure projects deliver vision for design quality** | ♦ Engage stakeholders in formulation of project briefs<br>♦ Ensure design brief reflects external environment and demonstrates analysis e.g. Health Impact | As part of project initiation process project leads will evidence that stakeholders have been engaged in formulation of project brief. | Project Leaders | Ongoing |
| | | Undertake review of opportunities for joint capital planning arrangements with local authority partners to ensure joint working arrangements in place to support delivery of design vision. | Head of Capital Planning | March 2008 |

| | | | | |
|---|---|---|---|---|
| | Assessment, Environmental Impact Assessment<br>♦ Assessing potential opportunities<br>♦ Agreeing shared objectives | Provide guidance as part of process flowchart and accompanying documentation to support project teams to engage with partners. | Head of Capital Planning | April 2008 |
| | | Provide guidance to project leads on the availability of external assessment tools to support projects deliver the vision for design quality. | Head of Capital Planning | April 2008 |
| | | Where appropriate work with partners to undertake supporting analysis of individual projects to support delivery of vision for design quality and identify shared objectives. | Project Leaders | Ongoing |
| **5. Ensure that projects have the appropriate skills and resources in place to deliver the boards vision for design quality.** | ♦ Establishing effective multidisciplinary project teams<br>♦ Ensuring project teams have the right skills mix<br>♦ Engaging and connecting with stakeholders appropriately<br>♦ Building capacity within the organisation to deliver design quality<br>♦ Embedding best practice within the organisation<br>♦ Identifying the appropriate tools to support project teams<br>♦ Putting in place training to deliver design quality | Senior manager with responsibility for commissioning project to identify multidisciplinary project team (project steering group) appropriate to size and nature of the project. | Project Leaders | Ongoing |
| | | Ensure appropriate information in relation to the Design Action Plan is available at project initiation stage. | Head of Learning and Development / Project Leaders | Ongoing |
| | | Establish a programme of continuous professional development for capital planning and facilities directorate to support delivery of design quality. | Head of Capital Planning / Director of Facilities / Head of Organisational Development Acute | Ongoing |
| | | Establish a programme of continuous professional development to build clinical capacity for capital planning and design quality linked to clinical redesign activity. | Heads of OD / Learning and Development / Project Leaders | Ongoing |
| | | Agree a portfolio of learning and networking opportunities to support delivery of design vision and support programme of continuous professional development. | Head of Learning and Development | April 2008 |

| | | | | |
|---|---|---|---|---|
| **6. Establish mechanisms to ensure that project process and outcomes are measured effectively and lessons learned.** | • Establish key stage reviews<br>• Ensure projects undertake Post Project Evaluation reviews<br>• Establish annual review process | Agree as part of process flowchart and supporting documentation milestones for additional key stage reviews to ensure compatibility with brief and design vision. | Head of Capital Planning | November 2007 |
| | | Provide annual report to Capital Planning Group on progress and project compliance with Design Action Plan for new capital projects based on project steering group feedback. | Head of Capital Planning | March 2008 (Ongoing) |
| | | Agree process to ensure that Post Project Evaluations include design quality and are undertaken on completed capital schemes no later that 12 months following commissioning. | Head of Facilities | March 2008 |
| **7. Ensure that projects engage stakeholders appropriately and timeously in the delivery of capital schemes.** | • Involving Patients/ Public<br>• Involving staff<br>• Involving partners<br>• Building working relationships<br>• Communicating effectively<br>• Consultation | Agree minimum standards and guidance for project teams for the engagement of patients, staff and users | Head of Community Engagement | April 2008 |
| | | Provide pro-forma as part of project initiation stage requiring project leads to demonstrate appropriate communication plan is in place for each project. | Director of Communications | April 2008 |
| | | Implement corporate communication plan to ensure profile of Design Action Plan is raised and stakeholders are aware of plans key messages. | Director of Communications / Design Network | April 2008 |
| **8. Ensure design action plan supports the delivery of vision of design quality** | • Pilot Design Action Plan | Identify current project to test applicability of Design Action Plan. | Project leaders | January 2008 |
| | | Undertake evaluation and review of Design Action Plan in relation to impact and usability in delivering our vision of design quality. Feedback initial report to Board. | Capital Planning Group | October 2008 |

## 8. Describing the Process

An initial goal for the Design Action Plan was to be able to describe a process for Capital Projects that supports quality design and is widely accessible and easily understood across NHSGGC. The process flow chart will be supported in more detail through the production of further supplementary guidance (handbook). The process outline is detailed in appendix 3. It is the responsibility of the commissioning manager / project leader to apply the process outline with sensible and reasonable judgement dependant on the size and requirements of a given project.

## 9. Conclusion

9.1 In conclusion, the intended outputs from the Design Action Plan will be:

- A clear Capital Project Governance Framework and Capital Development Proforma / Project initiation documentation with clear capital project criteria that addresses the vision in Design Action Plan
- Production of supplementary guidance (handbook) resource to support capital projects
- Capital project design process flowchart to guide activity at each stage
- Core list of NHSGGC tools to support design quality
- Portfolio of design learning and development opportunities
- Evaluation Report of implementation process.

**Appendix 1 – Lessons Learned and Implications for Future Practice**

**Current Good Practice**

- **Design Quality** – AEDET Evolution Design Toolkit has been used for briefing and design assessment at various stages on the Beatson Oncology Centre and the New Stobhill and Victoria Hospitals.

- **Sustainability**- the inclusion of the Carbon Trust in assisting in the design of the Beatson Oncology Centre environmental systems and consideration of options for low carbon design. Ensuring all new buildings meet minimum energy requirements in the Scottish Building Technical Standards from May 2007.

- **Environmental** - major schemes are audited against the NHS **NEAT** assessment Toolkit to ensure they meet minimum criteria

- **External Design Teams** - are selected not just based on financial bid but on their track record on design and delivery of similar projects, this must feed through into a better end result.

- **Functionality** – all of our projects utilise the standard NHSiS design guidance to ensure uniformity across the service and compliance with current guidance.

- **Design Awards** - a number of the Board's recent commissions have received design awards or are acknowledged with the design community as being good examples of their type, most notably new Health centres within Glasgow.

**Improvements for the Future Practice**

- **Briefing Documents** - historically our briefs have focused on functional aspects such as rooms, room sizes, environmental conditions, room relationships more technical brief. We should consider how best to develop more aspirational for example, thinking more creatively about the use of space and light.

- **Briefing Documents**- should be more fully developed at OBC stage, to establish design priorities and project objectives at the earliest possible stage. Ensuring external organisations spend meaningful time in current buildings to understand our needs.

- **Design assessment and review** - should be extended to smaller value projects, we currently focus on larger value schemes.

- **Leadership** - a design lead to be identify for all major projects to ensure aspects of the design action plan are incorporated, always working within the financial envelope approved.

- **Monitor and Evaluation** – Lessons from the implementation of the Design Action Plan will be incorporated into the design process and future iterations of the plan to inform future developments.

- **Design Competition** - consider the introduction of design competition to select design teams, this would hopefully feed through to finished buildings. This would depend on form of procurement. For PPP we need to clearly develop output specifications including design quality as part of the evaluation and selection process.

- **Project Team** - ensure projects are adequately staffed on all sides, especially from clinical side ensuring engagement from beginning to assist wider understanding of principles and philosophies of project at later stage.

- **Project Management** - a standard project plan (even if nothing more than a checklist for each stage) should be developed for all projects to ensure uniformity and standard delivery of good project management and communication.

- **Organisation** - establish clear and committed leadership for the project, identify project management structure, roles, decision making and accountability arrangements. Ensure continuous information flow between project sub-groups and project lead. Communicate clearly when a decision has been finalised.

**Appendix 2a) – Capital Planning Group**

The Capital Planning Group (CPG) was established in May 2006. This group meets every three months and is responsible for development and implementation of the Board's capital plan, in 2007/08 worth approximately £140m. Membership comprises Directors from each of the organisational entities across the Board. The CPG is responsible for submission of the capital plan outlining year on year plans to the Board.

The CPG has established a framework of accountability and a clear scheme of delegation for projects for all schemes including those up to £1.5m, projects between £1.5 to £5m, projects between £5m – £10m and projects over £10m.

It has been agreed that a Project Steering Group should be established for each individual project. This group will involve key stakeholders and vary in size depending on the value and complexity of the project. The key roles in the Project Steering Group are as follows:

- A Project Leader - should be appointed to manage and oversee the project as a whole and chair the Project Steering Group.

- To support the Project Leader, the Head of Capital Planning, or his designated lead, will be appointed as Project Manager to take forward the project and implement a regime of sound project management controls.

- To support the Project, a Lead Accountant would also be identified, who would ensure a financial monitoring system is in place for the project and would provide regular update reports on spend/slippage etc.

The Project Steering Group will be responsible for the development of the Project's Capital Plan. This will be prepared at the outset of each project and updated as appropriate to take account of changes in planned expenditure due to timing changes, changes to specifications/expenditure and other factors. This is presented graphically in appendix 3. The design plan has sought to build on these structures and views them as key delivery mechanisms. It is acknowledged that this incorporates local capital planning arrangements in Partnerships that feed into the system wide Capital Planning Group.

**Appendix 2b) - Capital Planning Structure**

Glenda

I tried to send the attached to Mike on Friday, just received a notification was undelivered.

Wonder if you could pass to him, its regarding the procurement workshop for new South Glasgow Hospitals in Glasgow tomorrow.

Thanks

Peter Moir

**Subject:** NEW SOUTH GLASGOW HOSPITALS - PROCUREMENT WORKSHOP 19th FEBRUARY 2008. @ PROJECT OFFICE, HILLINGTON

All

Please find attached briefing pack for Tuesdays workshop, sandwich lunch available from 1.30pm with start soon afterwards, 2pm latest. There's a lot of ground to cover, hopefully this will involve some lively discussion. I expect the workshop could run to at least 5pm if not later.

Attached are the following;

- Agenda
- Position paper – highlighting key areas of progress to date.
- Long list of procurement options - a number will probably be discounted early on in the session.
- The Board requirements have been loaded into the scoring sheet under key headings of cost, programme, quality, risk and others. We will wish to consider how a few operational / FM issues could be factored in.
- Scoring sheet – note we have suggested weightings and these are included in the sheet, these can be reviewed and amended during discussion prior to scoring.

If anyone has specific concern about any aspect of the workshop please contact me on [redacted].

Regards

Peter

**NEW SOUTH GLASGOW HOSPITALS PROJECT** **PROCUREMENT ROUTE - EVALUATION FORM**

**PROCUREMENT WORKSHOP**

Objective: To determine the most appropriate public finance procurement route that meets the Board's key objectives.

| Procurement Route / Evaluation Criteria | Suggested Weighting | Agreed Weighting* | Traditional | | Design & Build Single Stage | | Design & Build Two Stage | | Management Contracting | | Construction Management | | Design Build Manage Operate | | Alliancing | | Prime | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score | Score 1-5 | Weighted Score |
| **Cost** | | | | | | | | | | | | | | | | | | |
| Meet the Board's and Scottish Governments annual cashflow requirements. | | | | | | | | | | | | | | | | | | |
| Cost certainty as early as possible, at latest pre-contract award. | 40 | | | | | | | | | | | | | | | | | |
| Risk transfer on cost over run if no changes. | | | | | | | | | | | | | | | | | | |
| Work within contract budget and achieve best value for money | | | | | | | | | | | | | | | | | | |
| **Programme** | | | | | | | | | | | | | | | | | | |
| Delivers facilities to meet Board's site start, completion and operational dates. (SOS 2nd qtr 2010). | | | | | | | | | | | | | | | | | | |
| Early transfer of programme risk. | 20 | | | | | | | | | | | | | | | | | |
| Incentivise to achieve early completion. | | | | | | | | | | | | | | | | | | |
| Acieve early programme certainty. | | | | | | | | | | | | | | | | | | |
| **Quality** | | | | | | | | | | | | | | | | | | |
| High degree of control over detailed design and design quality | | | | | | | | | | | | | | | | | | |
| Control of sustainability and whole life issues. | 17 | | | | | | | | | | | | | | | | | |
| Integrated design and construction solution. | | | | | | | | | | | | | | | | | | |
| Ability to deliver against Board's quality benchmarks | | | | | | | | | | | | | | | | | | |
| **Risk** | | | | | | | | | | | | | | | | | | |
| Flexibility for change post contract and post completion. | | | | | | | | | | | | | | | | | | |
| Shift design and construction risk to contractor early as possible. | 15 | | | | | | | | | | | | | | | | | |
| Collaborative approach to cost risk, continuous review and mitigation. | | | | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | | | | |
| **Others** | | | | | | | | | | | | | | | | | | |
| Is procurement route suitable for this value of project. | | | | | | | | | | | | | | | | | | |
| Early involvement of contractor for buildability and programme advice. | | | | | | | | | | | | | | | | | | |
| Procurement route is proven and attractive to market. | 8 | | | | | | | | | | | | | | | | | |
| Design development process to have least disruptive interface with user groups( staff availability). | | | | | | | | | | | | | | | | | | |
| Total Weighted Score | 100 | | | | | | | | | | | | | | | | | |

Notes:
Score: 1 - 5 = Poor - Good
Weighting should add up to 100%
* = Actual weighting to be agreed at workshop.

NEW SOUTH GLASGOW HOSPITALS PROJECT

PUBLIC FINANCE - LONG LIST OF PROCUREMENT OPTIONS

Traditional

Management Contracting

Construction Management

Design & Build - Single stage

Design & Build – Two stage

Prime

There are a number of ‘variations or bolt on’s’ to some of the contract forms listed above, these will be considered during the workshop.

# CURRENT POSITION

For the purposes of the workshop this is a reminder of the current position with regard to the project.

**Outline Business Case (OBC)**

The OBC has been submitted to the Health Board for approval at its meeting on 19 February 2008. The Scottish Government's Capital Investment Group will consider it on 26 February 2008, and then if approved at both these stages to the Cabinet for consideration.

**Town Planning**

Glasgow City Council gave Outline Planning consent to the project on 15 January 2008.

A Campus Development Plan has been developed and was submitted as part of the Outline Planning application. The Outline application has been referred to the Scottish Government for approval by the end of February 2008.

**Exemplar Design**

An exemplar design has been developed for both the Children's and Adult hospitals. There are 1:500 layouts (clinical adjacencies) agreed in principle, 1:200 plans (dept layouts) developed for 5 departments in each hospital (A&E, Imaging, a generic ward, Intensive Care and front entrances).

Further work will be required with clinicians to develop the hospital plans. More detailed work on how FM services will operate within the complex and on the retained estate is also required.

**Constraints**

The information below is a list of the constraints of the project:

- The site has to continue to operate as an acute hospital
- The building requirements are complex
- The site will be congested
- Interface with enabling work on existing estate
- High rise construction
- Equipment integration
- Design complexity
- There will be other building works – Labs, car parking, skills & education centre
- Access restrictions for construction staff (at peak there will be 1000-1500 staff on site)

**Technical Advisers**

Once the Procurement route has been agreed a team of technical advisers will need to be appointed for the next stage of the project, at the moment we do not have a team we can access – at the moment we seek advice when it is required.

NHS GREATER GLASGOW & CLYDE
NEW SOUTH GLASGOW HOSPITALS PROJECT

PROCUREMENT WORKSHOP

Date: Tuesday 19 February 2008.
Time: 2-5 pm (1.30 sandwich lunch available)
Venue: Project office Jubilee Court, Hillington.

AGENDA

| | | |
|---|---|---|
| 1. | Introduction and setting scene | Sheppard & Wedderburn (S+W) |
| 2. | Board requirements | Peter Moir |

# Greater Glasgow & Clyde NHS Board

## Performance Review Group

**Tuesday, 16th September 2008** **PRG Paper No.**

**Report of the Director of Acute Services Strategy, Implementation and Planning / Chief Operating Officer**

**Procurement Strategy to develop the Southern General Hospital Site – New Adult & Children's Hospitals and new Laboratory facility.**

### RECOMMENDATION

The Performance Review Group is asked to note the attached report from Ernst and Young which sets out the latest work in developing a procurement method to procure the new hospitals and laboratory developments on the Southern General Hospital site. This proposed method is to be further discussed and tested with the newly appointed Technical Advisers and Partnerships UK (PUK) and will be subject to Board approval at the Board meeting in October 2008.

### 1.0 PURPOSE OF THIS PAPER

This paper provides both an overview of the work undertaken since March 2008 in developing a procurement method and sets out the proposed procurement method to take forward the new hospitals and laboratory developments on the Southern General Hospital site, subject to further discussion with the Technical Advisers (TA) and PUK and subject to Board approval in October 2008.

### 2.0 BACKGROUND

The Board embarked upon a plan to determine how best to deliver the new hospitals and laboratory developments on the Southern General Hospital campus prior to the approval of the OBC. This plan included taking soundings from a range of Technical Advisers known to the Board and seeking their initial thoughts on the best way to deliver the new facilities.

Following on from this, Board Officers, supported by the Board's Legal & Financial Advisers and with Scottish Government representation, held a formal workshop with a number of Technical Advisers to carry out further analysis and evaluation to develop the most appropriate procurement plan. The Board's Financial Advisers (Ernst & Young) undertook a market sounding exercise to test out attractiveness and robustness of the proposed procurement plan.

The aim of the Market Sounding exercise was to establish the market view on a) how the New South Glasgow Hospitals Project should be procured and b) what the market bidding intentions may be. It was also to determine those factors which would reduce the attractiveness of the project and the market views on how these issues should be addressed.

The attached report from Ernst and Young sets out the findings of the market consultation and outlines a procurement method that it is believed, will maximise interest from potential bidders and achieve the Board's key objective of identifying a procurement process which:

- Allows for a significant degree of design development discussions to occur prior to the appointment of a single contractor;
- Offers the possibility of market innovation in the design development process;
- Provides for competition up to the point where the Guaranteed Maximum Price is largely established;
- Meets the delivery timescales.

The points in the report to note are as follows:

- Of the nine companies approached, three: Carillion PLC; Laing O'Rourke; and Balfour Beatty Ltd, indicated that they were sufficiently interested in the project to take part in the consultation process
- Given the size and complexity of this project there is risk of significant abortive costs being incurred by unsuccessful bidders. Two of the three companies who have an interest in the project have estimated the bid cost between £10m-£20m and have indicated that this sum at risk may prevent their participation. This would significantly reduce the competitive tension available to drive innovation and provide value for money.
- In order to enhance the market attractiveness of the project the companies identified a range of options. These included the Health Board underwriting some, if not all, of the bid costs for the unsuccessful bidders or the rapid selection of a single preferred bidder reducing the initial bidder input and therefore the bid costs at risk.
- In developing the revised procurement process, the risks and opportunities of applying different procurement paths were analysed. The key factors are:
    a) Ensuring there is sufficient market interest by reducing the risk to the bidder at the outset thereby achieving value for money through competition. A Target Price Contract and process which reduces the number of bidders to one at the 1st stage with a reasonable level of design requires significantly lower bidder input, and therefore bid costs at risk, than producing a fully detailed design.
    b) The nature of the procurement selected. The benefits and disbenefits of both the restricted and competitive dialogue process were analysed. The competitive dialogue route was considered to provide the degree of dialogue necessary to achieve design innovation, final contract form and financial arrangements to meet the Board's affordability profile.
- The outcome of the procurement analysis therefore proposes that the most appropriate procurement method to achieve the Board's objectives is a two stage Design and Build process with rapid selection to a single preferred bidder at stage one using the competitive dialogue procedure. At stage two, the preferred bidder develops the detailed design in conjunction with the Board. This requires now to be tested with the TA and PUK, work which will be completed to enable a report to be submitted to Board in October 2008.

## 3.0 CONCLUSION

The Project Team, supported by advisers and other Board Officers, have carried out a robust process to develop, what is proposed as, the most appropriate delivery vehicle for the construction of a New Adult Hospital, New Children's Hospital and Laboratory Facility on the Southern General Hospital Campus.

This is now subject to a final review by newly appointed Technical Advisers and PUK. A report will be submitted to October Board for approval.

## RECOMMENDATION

The Performance Review Group is asked to note the attached report from Ernst and Young which sets out the latest work in developing a procurement method to procure the new hospitals and laboratory developments on the Southern General Hospital site. This proposed method is to be further discussed and tested with the newly appointed Technical Advisers and Partnerships UK (PUK) and will be subject to Board approval at the Board meeting in October 2008.

# 1.0 INTRODUCTION

## 1.1 The Project

NHS Greater Glasgow & Clyde (the Board) require the services of a Lead Consultant and full technical support team to co-ordinate and manage the procurement process for the re-development of the Southern General Hospital campus. The new facilities will include a new 1109 bed Adult Acute Hospital for the south of Glasgow, a new 240 bed Children's Hospital for the West of Scotland and a new Laboratory Project providing Biochemistry, Haematology and city wide mortuary services.

Approval to proceed and develop the project was confirmed on 24th April 2008, by agreement of the Scottish Government that the Board should proceed and develop proposals to Full Business Case (FBC), and confirmed that funding would be provided through public finance. The project budget has been confirmed at £842m and this sum includes works costs, fees, equipment, contingency, VAT and an allowance for inflation to middle 2012. Broken down, this figure equates to a capital build allowance of circa £550m this figure includes fees, equipment and VAT but excludes inflation allowance and contingency.

The Board require to have their FBC completed by 2nd quarter 2010. A start on site is proposed early 3rd quarter 2010 and completion of all works by 4th quarter 2014, although if the procurement process permits, an early start on ground works and sub-structure packages would be advantageous. A more detailed timetable is included within this document in Section 2.7.

## 1.2 Current Position

The Board have received Outline Business Case (OBC) approval from the Scottish Government to proceed and develop detailed proposals prior to Full Business Case for a new Children's Hospital, a new Adult Acute Hospital and new Laboratory Facilities on the site at the Southern General Hospital.

Design and project work undertaken to prepare the OBC was based on the project being procured through the PPP process, but this route proved to be unaffordable and so a public finance solution has been confirmed. The Board have therefore developed a full Public Sector Comparator (PSC) design for OBC purposes, including schedules of accommodation, project cost plan and design drawings at 1:500 (all areas) and 1:200 (10 selected departments). A full Technical Adviser team have been assisting the Board to develop the PSC design and capital cost plan, this work culminating in the preparation of the Design Solution Report in July 2007. The change of procurement route and other issues has resulted in the need to re-advertise the commission.

The Board have secured Outline Planning Consent for the project, conditional on a Section 75 agreement being concluded on transportation issues, there are also around 40 planning conditions a number of which will need to be addressed with the assistance of the Lead Consultant team. The Board are actively pursuing the conclusion of the Section 75 agreement and the final confirmation of planning consent. It is hoped to have this work substantially completed prior to the appointment of the Lead Consultant.

The Board will expect the appointed Lead Consultant team to work with the established project network, including all appointed advisers; all project related documentation, PSC designs and specification, PSC /OBC budgets and programmes developed to date, subject to any changes agreed with the Project Director or their nominee. The Board wish to stress that the design intent of the PSC design is not open for wholesale change. However, the site plan does require to be adapted to meet the requirements of OBC Option 1A this option retains a number of existing buildings not envisaged in OBC Option 1 and will require the architect to revise the site plan, which may also impact on the footprint of the podium. This re planning will be at 1:500.

The Lead Consultant will be appointed by the Board under one appointment to fulfil the following roles from commencement of Stage 1A through to a fully commissioned and operational building based on the stages and tasks listed later in this document: -

- Lead Consultant / Project Management
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Procurement and Construction Management advice.
- Landscape Architect.
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

The purpose of this ITT document is to obtain concise responses from parties who have pre-qualified as part of the OJEU process. The cost of preparation of your proposal, and associated documentation is entirely at the discretion of the bidder and bid costs will not be reimbursed.

## 1.3 Background

### 1.3.1 Strategic Context & Direction
### Description of the Organisation – NHS GG&C

NHS Greater Glasgow and Clyde (NHS GG&C) was formed in April 2006 and is Scotland's newest and largest Health Authority. The Board has 44,000 staff serving a total population of 1.2million people, with a total budget of £2.2 billion. The new Health Board joins the urban centres of the former Argyll & Clyde with the former Greater Glasgow, to create NHS Greater Glasgow and Clyde. The organisation provides a comprehensive range of services from community based care (midwives, dental services and various outreach services) to the full range of general hospital services. In addition the organisation hosts some of the most specialised health services in the country, including: cardiothoracic services, the Beatson Oncology Centre, the new West of Scotland Cancer Care Centre, the Institute of Neurological Sciences, transplant services, world-class paediatricians and obstetricians and cardiothoracic services.

There is also an active and dynamic teaching, research and development environment with contributions being made at National, UK and international levels.

### 1.3.2 The Acute Services Strategy

#### Acute Adult Services

Over the last 10 years the Health Board has been developing an acute services strategy to modernise the acute adult health service in Glasgow. The proposals were agreed by the Health Minister, Malcolm Chisholm, in 2002. In brief the strategy is to reduce the number of adult inpatients sites from the current 5 hospital sites to three, two with A&E and trauma facilities and the third providing acute receiving. The A&E and trauma services will be located at the Glasgow Royal Infirmary and the Southern General sites and the acute receiving facility at Gartnavel General. This will involve building a new inpatient hospital on the Southern General site and refurbishment/smaller builds at the Glasgow Royal and Gartnavel General sites.

The Acute Strategy is composed of four distinct phases. New build Ambulatory Care Hospitals are currently in construction at the Victoria Infirmary and Stobhill sites, these are the first stage in Glasgow's Acute Strategy and due for completion in March 2009. When commissioned, the outpatient and day case services will transfer from the existing Stobhill Hospital and Victoria Infirmary into the new Ambulatory Care hospitals. This will effectively leave two Victorian Hospitals operating below capacity with inpatient services only.

The New South Glasgow Hospital project forms the second phase of the acute strategy. This will allow the inpatient services in the Victoria Infirmary to transfer into a new build hospital on the Southern General site thus vacating the Victoria Infirmary site. The new build will also allow inpatient services currently housed in dilapidated buildings on the Southern General site to be relocated into a modern facility. Finally there will be a proportion of the Accident and Emergency and associated beds at the Western Infirmary services transferring into the Southern General new build.

Phase 3 and 4 of the Acute Services Strategy involve smaller builds/refurbishment at the Glasgow Royal Infirmary and Gartnavel General.

### 1.3.3 Children's Services

Hospital services for children in Glasgow are provided by the Royal Children for Sick Children which is sited at Yorkhill and co-located to the Queen Mother's (Maternity) Hospital. The Queen Mother's Hospital is one of three maternity hospitals in Glasgow, the others being located at the Southern General and Glasgow Royal sites. Following a fall in birth rate and difficulties in the sustainability of staffing complement and rotas the Health Board is reducing the number of maternity hospitals to two. The recognised gold standard of care is to achieve triple co-location of children services, maternity and adult acute services. Following a review of options around the future location of the children's services the Minister for Health agreed in 2006 to proposals to re-locate the children's hospital at the Southern General site.

### 1.3.4 Laboratory Services

At present there are laboratory services on each acute site. As part of the Acute Strategy Review a review of laboratory services across Glasgow was undertaken to explore how the service might best support the future reconfigured clinical services. The preferred option is to centralise laboratory services onto two main sites these being the Southern General Hospital site and the Glasgow Royal Infirmary site, the remaining sites would have a laboratory presence for essential services and rapid results only. It is hoped to have the new laboratory build on the Southern General site substantially complete before the new adult and children's build commences on site. The new Laboratory Project will be developed within the same area of land and will be linked by an underground route to the hospitals. The Lead Consultant team will be responsible for the masterplanning of the two projects to ensure the Laboratory Building, the service yard, links to the Mortuary, links to the main Energy Centre and the underground link to the main hospitals are all fully coordinated, and works to provide the service yard are allocated to the most appropriate project .

## 1.4 Project Management Structure

The Board has established a project organisation structure to oversee the implementation of the Acute Services Strategy, including this project. (Appendix A). The Acute Services (ASR) Programme Board will be responsible for the implementation of the Strategy. The Programme Board consists of the Chief Executive, Divisional Managers, Finance Director, Executive Medical and Nursing Directors, Partnership Representation and a Senior Civil Servant.

A Project Director has been appointed who has Executive responsibility for the Implementation Plan. The New South Glasgow Hospitals Executive Group has been established to ensure that all the governance and project milestones are achieved.

The Project Team includes a range of staff from clinical, operational, planning, facilities, finance and estates areas. The Project Team is led by the Project Director and is supported by legal, financial and technical advisors.

A number of groups have been set up to support the project as noted in the following sections, and the Lead Consultant will be expected to attend and participate in the works of the Executive Board, the Procurement and Finance Group and the Site Programme Co-coordinating Group.

### 1.4.1 New South Glasgow Hospitals Executive Board

The New South Glasgow Hospitals Executive Board will have delegated authority to make executive decisions on critical points in the project process. The role of the Board will be to oversee the overall process of the project and to co-ordinate the work streams of the two groups. The Board will meet bi-monthly or more frequently depending upon the stage of the project and will report into the ASR Programme Board.

### 1.4.2 ASR Systems Redesign Group

The development of the New South Glasgow Hospitals will result in a number of radical changes not just in reconfiguring clinical services across Glasgow but also in working practices and the way in which patients receive their treatment. A comprehensive and co-ordinated process will be developed to take forward the re-design aspects and work hand in glove with staff, human resources and workforce planning to ensure both staff involvement and that the right number of staff and skills are available to support the new ways of working.

### 1.4.3 Procurement and Finance

Once the model (design and build method) of procurement has been identified and authorisation to proceed has been given there will be a requirement for specialist skills in relation to taking the procurement process forward. Skills will also be required with regard to the funding, affordability and value for money aspects. A high level of risk management and scrutiny will be needed to assure the Health Board of appropriate delivery.

### 1.4.4 Site Programme Co-ordinating Group

There is a very substantial construction programme planned over the next six years at the Southern General Hospital. The site will continue to operate during the full construction programme and therefore there is a requirement to establish a group to monitor, co-ordinate and control all on-site works. Refer Appendix A for further detail on roles, remit and membership of these groups.

### 1.4.5 Gateway Review Process

The project will be subject to regular review as part of the Government's Gateway process with key milestone reviews at Gateways 0, 2, 3, 4 and 5, the Lead Consultant team will be expected to participate and assist the Board to a successful conclusion at all these stages.

The Board have already completed Gateway 1 (January 2008), and a team of 4 reviewers have been selected to overview the project at various stages through to conclusion of Gateway 5.

## 1.5 Procurement Strategy

In parallel with the review and approval of the OBC on 24th April 2008, the Board have been considering a range of procurement options to deliver the main new build project. Subject to Government Gateway approval, the Board have selected a Design and Build contract form, utilising a two stage tender process as it best meets the Board's key requirements on programme, cost, quality and risk transfer.

The Board have decided to batch the new build Laboratory project within the scope of service of this appointment, in other words the appointed Lead Consultant team will manage the delivery of the Adult Acute Hospital, the New Children's Hospital and the new Laboratory Project. The Board believe that these large and complex projects are best managed by a single Lead Consultant team, albeit the delivery of the projects may differ. The Lead Consultants commission will therefore be sub-divided into two projects as below; the projects have been sub-divided due to programme and cashflow requirements.

- New Adult Acute Hospital & New Children's Hospital – Two stage Design & Build.
- New Laboratory Project – Single stage Design & Build.

In tandem with the first stage of the process to select and appoint a Lead Consultant, the Board have been sounding out the market in terms of the appetite to compete in a two stage D&B process, and initial feedback is positive. Concern has been raised at the potential high bid cost to D&B consortia relative to the number of parties being asked to develop fully worked up bids. This has raised questions on reimbursement of bid costs, if say two teams were taken to a level of detail expected for example at financial close for a PPP project.

The Board have considered how best to progress the selection and appointment of the lead Consultant while the final confirmation of the procurement route remains under discussion. It should be noted that the main item to be resolved is whether the two stage process is down selected on a 3-2-1 or 3-1 basis, each route will generate its own particular levels of input during the second stage of design and tender. To simplify this process, the Board have prepared this document on a first stage engagement with 3 D&B consortia, with down selection to one and this team would then work up detailed proposals with the Board on an open book basis.

The Lead Consultant, once appointed will be required to advise the Board on structuring the selected tender process, and advise the Board on how to maximise competition whilst securing the maximum level of market interest. A key feature will also be to advise the Board on how best to incetivise the D&B team, to ensure best value for money is achieved and how to maintain true competition during the package procurement stages.

## 1.6 Scope of Appointment

The scope of the Lead Consultant and technical team service will be to take the project from OBC approval, supported by a PSC design and cost plan through, design and brief development, development of full Employer's Requirements documentation, full two stage tender process as described in Section 6 to include package tender process and negotiations, agree GMP, construction phase, commissioning, into full operation.

The Board will expect the appointed Lead Consultant team to work with the established project network, including all appointed advisers; all project related documentation, designs and specification, budgets and programmes developed to date as part of the OBC/PSC stage, subject to any changes agreed with the Project Director or their nominee.

The Board will not novate the role of the Lead Consultant, this applies to both projects. Further it is confirmed that the support design roles (architect, M&E Engineer, C&S Engineer), within the Lead Consultant team will not be novated as part of the main Adult Acute and Children's Hospitals, but maybe considered as part of the new build Laboratory Project, post RIBA Stage E. Team submissions should be structured as per the schedules and information in Section 6.0, which at present do not anticipate any novation on either project. The team role is that of developing and managing the process, and advising the Board on all technical aspects related to the procurement of the new builds.

The key stages are currently seen as follows, for more detail refer Section 6.0: -

Two Stage D&B

| Project Stage | Key Tasks (Refer Section 6.0 for full detail on expected scope of service). |
|---|---|
| Stage 1A | Review existing project data. Design development of PSC departmental relationship drawings and site masterplan to conclude revised masterplan and full departmental relationship drawings with the Board. Preparation of full Employer's Requirements (ER) documentation (detailed elsewhere). Manage selection of D&B consortia to include OJEU, Information Memorandum, PQQ and design and management of the evaluation process through to selection of maximum 3 bidders. Design the bid evaluation process, confirm bid deliverables and include in ER document. Package and issue all ER documentation, drawings and specifications. Manage the undertaking of site investigation and other ground surveys relative to the full development site for the new projects. Participate in Gateway 2 review. |

| | |
|---|---|
| Stage 1B | Manage design and tender development process with 3 bidders, manage interface with user groups, structured around a series of open days (2 or 3) throughout this stage. Manage the bid evaluation process through a series of internal meetings and presentations of bid proposals. Prepare full report and recommendation for Board on preferred bidder for approval, post confirmation of all deliverables being met by preferred bidder, the selection will be made on a commercial, financial and qualitative basis. During this stage the Lead Consultant team would develop further detailed information to supplement the ER's for the next stage if required. |
| Stage 2 | Design and bid development with the preferred contractor team to develop full Contractors Proposals (CP's). This process is envisaged as being 'open book', perhaps using NEC3 contract form with aspects such as prelims, contractor's overheads and profits, pre-construction fees etc., all being agreed prior to conclusion of Stage 1B, indeed being part of the evaluation and selection criteria for that stage. Manage the detailed design development of both projects with NHS user groups through a formal approval and sign off process, developed and managed by the Lead Consultant. Test the CP's against the ER's and negotiate and manage the process to a conclusion with the submission of a formal report to the Board to include as a minimum - design and specification compliance, cost and agreement on GMP, programme, site organisation, risk transfer and lifecycle issues. Assist as required to help the bidder apply and secure detailed planning consent, although securing consent will be a bidder risk. Assist with the preparation, submission and negotiation of the Full Business Case and eventual contract close with bidder post FBC approval. Participate in Gateway 3 review. |
| Stage 3 | Construction works – full Employer's Agent role to manage the build process on site and confirm compliance with ER's or Contractors Proposals (whatever is agreed at contract) over 4 year period. Develop and manage a process to record change, cost control and risk throughout the build phase. Manage the work and direct site inspectorate team on site. Manage interface with operational site at SGH and any other building projects ongoing on site. Manage and co-ordinate the ongoing design development process. Equipping Group 1& 2. Participate in Gateway 4 review. Technical commissioning and hand-over at practical completion. |
| Stage 4 | Operational commissioning, equipping Group 3 & 4, orientation of staff, staff and service relocation to new facilities transitional operation. |
| Stage 5 | Post project evaluation and defect liability period. |

For the new Laboratory project, the single stage D&B process will broadly follow the format above with exception that the initial stage with multiple bidders may last longer and the final selection of the design/cost proposal and D&B team will be made prior to securing detailed planning consent, confirmation of final price and agree contract will be post receipt of planning consent, post this FBC / GMP will need agreement prior to signature and final award of contract.

The Board will expect the appointed Lead Consultant team to work with the established project network, including all appointed advisers; all project related documentation, PSC designs and specification, PSC /OBC budgets and programmes developed to date, subject to any changes agreed with the Project Director or their nominee.

### 1.7 Tendering Procedure

It is the Board's intention to appoint a single Lead Consultant team, with this person in a managing role for all consultancy work undertaken by the team. All fee, PII arrangements will be channelled through this lead company. It will be the Lead Consultant's responsibility to prepare a comprehensive team response to this enquiry document, including costs for each sub-consultant member of the team by stage, as well as a schedule of hourly rates for all participants. The bid should therefore reflect a full team submission by work stage and by discipline. The team must also include as part of their submission in Section 6.7 a narrative of the tasks and activities which they understand necessary to undertake and successfully complete this commission by work stage.

These documents are issued as a composite set to the Lead Consultant of each team short-listed and invited to prepare a second stage ITT submission. It is the Lead Consultant's responsibility to divide up and distribute the relevant information to each member of the team, to enable a comprehensive response to be made.
Each team response and fee offer should be formatted into a single co-ordinated document. The Board require 1 paper copy and 1 electronic copy of the teams submission returned to the address in Section 1.9 by the date and time noted.

The Board wish to procure the new Laboratory project as part of this commission, although as a separate contract, and by a single stage D&B process. Tenders are asked to amplify their bids and provide a clear fee and team structure for both projects as listed below;

- A bid for the New Adult and Children's Hospital Project – two stage D&B process.
- A bid for the New Laboratory Project – single stage D&B process.

Both bids should be based on the general information in earlier sections and Section 6.0 on scop,e timetable and budget cost. For evaluation purposes the two financial fee bids will be added together and taken as a composite bid.

The following information should be included as part of your bid;

- Clear diagram of team structure, including proposed leads for individual projects and CV's for each senior team member who will deliver the services to the Board, including membership of professional organisations and relevant project experience. In other words a clear organisational diagram of how your team will be structured between the new Adult, Children's and new Laboratory projects.
- Schedules of Lump Sum Fee Offer – for all disciplines by work stage (Section 6.0).
    - Lumps sum fee offer for new Adult and Children's Hospital Project.
    - Lump sum fee offer for new Laboratory Project.
- Schedule of Hourly Rates.
- Certificate of Bona Fide Tender – signed by Partner/Director's for the Project Manager.
- Detailed methodology and understanding of tasks and actions, which are anticipated throughout the period of each work stage based on the schedules included in Section 6. Note these schedules are included as a guide and you may wish to expand on, or include additional tasks within your fee proposal if you consider necessary or indeed beneficial to the project.
- Detailed comment on enclosed project timetable, with elaboration on tasks/timescale.

Fee offers received after the date and time specified in the covering letter will be rejected, in absence of any exceptional circumstances.

Bidders maybe treated as ineligible and maybe excluded from the evaluation of tenders on the grounds listed in Regulation 23, the Public Contracts (Scotland) Regulations 2006.

## 1.8 Points of Clarification

Prospective responders can raise points of clarification prior to the submission date for responses by contacting;

Peter Moir
Head of Major Projects
Project Offices
1 Jubilee Court
Hillington
Glasgow G52 4LB
Tel: [redacted]
Email: [redacted] If unavailable please contact Mr Andy Bell at same address.

The Board are available to meet and discuss the project during the ITT bid process and arrangements can be made by contacting the individuals in 1.8 above.

## 1.9 Tender Return

Your completed tender package with all related supporting information should be delivered by 12 noon on Wednesday 6th August 2008 to;

Mr Gordon Beattie
Head of Procurement
NHS Greater Glasgow & Clyde
1st Floor, Walton Building Annexe
Glasgow Royal Infirmary
84 Castle Street
Glasgow G4 0SF.

All documents must be sealed in envelopes provided using labels supplied (Appendix E). No package should bear on the outside the name or mark by which a team can be identified.

## 1.10 Evaluation of Tender

Respondents must complete all the lump sum and time charge fee schedules in Section 6.0 and return these with the Statement of Bona Fide Tender and the offer qualification form. If you have no qualifications please confirm by stating 'no qualifications' on this form and return as part of your submission.

In overall terms, submissions will be evaluated on the following criteria, the numbers in brackets against criteria provides a guide range to the weighting, and the total will be 100.

Fee Proposal - the teams fee proposals both lump sum and time charge rates. (60-65%)

Methodology - A detailed response by way of written understanding and description of the roles responsibilities of the team and named input by key individuals against each of the projects, and the tasks to be undertaken and deliverables to be provided by the team. This narrative should be provided for each stage of the process and respondents must ensure that their lump sum fee covers all aspects within the narrative. (15-20%)

Programme – prepare a programme as part of your submission to cover all stages assuming your appointment commences 1st September 2008. Provide commentary on the Board's indicative timeline in Section 2.4, noting areas which you consider challenging, and what steps could be taken to ensure the key date for FBC can be met. (10-15%)

Sustainability - Response to the question set on sustainability in Appendix B . (3-5%)

Note: respondents are asked to re-affirm the names of key staff within their team, and confirm their availability at short notice. The Board are aware that key business development managers and business unit directors are listed in roles requiring considerable time input on the project and wish to clarify and confirm that these individuals will indeed deliver the services to the Board on a daily basis. The teams appointment will require clarity on this issue.

Respondents must also identify any elements of the 'Scope of Advice Required' that they are unable to provide in full, and detail any sub-contracting proposals, clearly stating business relationship for this commission.

The Board may wish to interview up to 3 teams and respondents attending for interview will be invited to give a short presentation during their interview (note a provisional date has been set for 18th August). The presentation should focus on your past experience, the individuals involved, approach, methodology and benefits your company and/or team will bring to the procurement of this project and your teams understanding of a two-stage Design & Build procurement process.

Prior to your interview the Board can make available for teams to review, the documents prepared during Stage 1the OBC/PSC stage of the process. These documents include schedules of accommodation; PSC design; capital costs and associated campus and town planning documentation. Again arrangements can be made by contacting the individuals noted in 1.8.

The Board is not obliged to accept the lowest tender. The Lead Consultant's commission will be awarded on the basis of the most economically advantageous offer, taking account of price, technical merit, quality and overall value for money.

## 2.0 Scheme Particulars

### Scope of appointment / scheme

### 2.1 Location:

Southern General Hospital,
1345 Govan Rd.
Glasgow G51 4TF

### 2.2 General description:

The services are required to assist the Board to develop a full brief, tender and all Employer's Requirements documentation to enable engagement in a public finance procurement for the New South Glasgow Hospital Project, to provide the hospital facilities as listed below. The service is to include the management of the Building Contract with a D&B consortia, through to the successful completion of the works, commissioning and equipping, transfer and occupation.

Key elements of the project are (for information);

- Development of an integrated adult acute and children's hospital proving the full range of acute health services.
- Development of a new Laboratory facility including Mortuary and Post-Mortem Services, Biochemistry, Haematology and Blood Transfusion.
- Provision of a rooftop helipad.
- Possible provision of non-clinical services such as Hard FM services to the new facilities by the D&B contractor for an initial 3-5 year period.
- The supply and installation of Group 1 equipment and location and/or fitting of Group 2 equipment supplied by the Board.
- Information Management and Technology (IM&T) – Out with this project, the Board is procuring software and end-use hardware as part of a separate IM&T project.

The Board requires the provision of integrated facilities that are readily adaptable to changing clinical practice and makes the best use of new technologies. The functional content of the project is envisaged to include the following new build accommodation, note there will be some flexibility around the content noted below as the scope of the scheme is further developed during Stage 1A.

### 2.3 The New South Glasgow Hospital - Adult Acute

1109 in-patient beds and 12 bed medical day unit planned within the New South build.

- In Patient Accommodation

435 surgical beds (gen. Surgery, orthopaedics, urology, vascular, ENT, renal); 571 medical beds. ITU/HDU/CCU – 77 beds total. Acute Stroke – 26 beds

- Out Patient Accommodation

Full range of General outpatient clinics including, among others, diabetic unit, respiratory, haematology, urology etc.

- Day Services

12 medical day bed area; 30 stationed dialysis unit

- Treatment & Diagnostic Services

Accident & Emergency, 20 operating theatres, imaging, Endoscopy and rehabilitation.

- Clinical Support Services

Pharmacy dispensary, medical physics, medical illustration. (laboratory services linked to hospital by underground route and pneumatic tube system, aseptic unit within the children's hospital.)

- Non Clinical Support Services

Main entrance, medical records, administration, chaplaincy, social work, staff changing, switchboard, estates, facilities, security, catering, portering, domestic, management and energy centre.

## 2.4 New Children's Hospital – Acute

There are circa 240 beds planned within the new build. About 20% of the beds will be for day patents and the rest inpatients. The hospital will provide DGH services, tertiary and some national services.

Outpatient Accommodation

Full range of Children's outpatient clinics including audiology, general paediatrics, orthopaedics, ENT etc

Day Services

Circa 10 medical day beds; 4 dialysis stations and circa 25 day surgery beds.

Treatment & Diagnostic

Accident and Emergency, minor injuries, Imaging, 7 theatres, rehabilitation

Clinical Support Services

Aseptic unit, pharmacy, medical physics, medical illustration

Non Clinical Support Services

Facilities, ancillary services, administration, spiritual services, medical records, staff change, staff dining.

## 2.5 New Laboratory Building

This build will be one of two major Laboratory sites in Glasgow. The services planned to be delivered from the new Laboratory build at Southern General Hospital are as follows: Biochemistry, Haematology, Blood Transfusion, mortuary and post mortem services. It is worth noting that the mortuary and post mortem facilities will include the re-provision of the Glasgow City mortuary which also provides forensic services for the City of Glasgow.

The Board propose to procure the new laboratory project through a single stage D&B process. The Lead Consultant team will be responsible for developing an exemplar design to 1:200 with user groups for inclusion in a full set of Employers Requirements documentation. The Board will require a separate design team from within the Lead Consultant's team to develop these proposals and provide a full Employer's Agent role during construction phase.

The current planned floor areas are as follows; Haematology 1,800 sq.m, Biochemistry 1,900 sq.m, Mortuary and City Mortuary 1,500 sq.m.

The current timetable for the new Laboratory Block is as follows;

| Milestone/Process | Target Date |
|---|---|
| Appoint Lead Consultant | 1 Sept 2008 |
| User group meetings, brief and design development | Sept / Nov2008 |
| Further Design Development | Dec 2008 / Jan 2009 |
| Prepare Employers Requirements documentation | Oct 2008 / Jan 2009 |
| OJEU – D&B consortia | Nov / Dec 2008 |
| Issue ER's and Tender | February 2009 |
| Tender period | Feb /May 2009 |
| Evaluation | June 2009 |
| Construction - start | July 2009 |
| Construction - complete | Sept 2010 |
| Commission | Oct/Nov 2010 |
| Operational | Dec 2010 |

## 2.6 New Build Floor Areas

As a guide to the extent of the build proposals, the current gross internal floor area for the new build proposals are noted below; these figures include allowances for departmental circulation and building wide communications. Plans also include a remote Energy Centre and Service yard with sub-terranian link to the basement of the new Adult and Children's Hospital.

| | |
|---|---|
| Adult Acute Hospital | 100,624 sq.m |
| Children's Hospital | 33,007 sq.m |
| Laboratory Facility | 5,200 sq.m |
| **Total** | 138,831 sq.m |

The redevelopment of the campus and clinical services at the Southern General Hospital will most likely be undertaken through a multi phase programme of refurbishment, decant, demolition and new build over a works period of at least 4-5 years. The Board are currently initiating a programme of enabling work over the next 2 years to establish a un-encumbered site for the new hospital development. These works involve the relocation of hospital services, diversion of main hospital M&E services, demolition of redundant buildings and general site clearance and preparation works. These enabling works will be funded from the Board's ordinary capital programme. The Lead Consultant will be required to co-ordinate with design teams delivering these projects to ensure all works are sequenced to meet the desired start date on site of Summer 2010.

## 2.7 Project Target dates

The timetable below indicates the Board's indicative timetable for the procurement. Provisional dates for a two stage D&B process have been included for information only at this stage.

| Milestone/Process | Target Date |
|---|---|
| Publication of OJEU Notice | 6th May 2008 |
| Deadline for receipt of requests to participate/submission of responses to the Pre-Qualification Questionnaire (PQQ) | 5th June 2008 |
| Issue of Invitation to Tender (ITT) Documentation to selected Applicants | 19th June 2008 |
| Deadline for submission of response to ITT | 31st July 2008 |
| Evaluation of ITT Submissions | 12th August 2008 |
| Appointment of Technical Adviser | 22nd August 2008 |
| Brief Development / Masterplan | September-November 2008 |
| Employers Requirements - Stage 1 | September- December 2008 |
| OJEU Construction Teams | October – Dec 2008 |
| Stage 1 Tender Period | January-May 2009 |
| Stage 1 Evaluation – Selection Preferred Bidder | June 2009 |
| Stage 2 Tender Development - Planning application | July 2009 |
| Stage 2 Evaluation | April 2010 |
| Negotiate GMP, FBC and Contract Close | July 2010 |
| Phase 1 Complete – New Children's Hospital | Ist qtr 2013 |
| Phase 2 Complete – New Adult Acute Hospital | 3rd qtr 2014 |
| Commissioning | 4-5 months |
| 12 Months Defects Period – Acute Hospital | 3rd qtr 2015 |

## 2.8 Estimated cost

The current estimated capital cost of the new Adult Acute, Children's Hospital and Laboratory project as of April 2008 is c. £550 million, this cost includes equipment, VAT, and fees but excludes inflation to mid build and contingencies. The split between the projects of this cost is approximately New Adult and Children's Hospital - £530m; new Laboratory Project £21m. Teams may wish take account of these figures for fee tendering purposes.

## 2.9 Programme Sponsor

Ms Helen Byrne
Director of Acute Services Strategy, Implementation and Planning
NHS Greater Glasgow & Clyde
Acute Services Strategy Implementation and Planning Directorate
Management Building
1345 Govan Road
Glasgow G51 4TF

## 2.10 Project Director

Mr Alan Seabourne
Project Director - New South Glasgow Hospitals Project
Project Offices
1 Jubilee Court, Hillington
Glasgow, G52 4LB
[redacted]

## 2.11 Board Technical Lead

Mr Peter Moir
Head of Major Projects
Project Offices
1 Jubilee Court, Hillington
Glasgow, G52 4LB
[redacted]

## 2.12 Lead Consultant Team

It is the Board's intention to appoint the following disciplines as part of the Lead Consultant team. The team will be lead by the Lead Consultant/Project Manager; a single appointment will be made with this company for the whole team. Billing on behalf of the whole team will undertaken by the Lead Consultant, in short fee notes will be from single source and not individual team members.

- Lead Consultant / Project Management
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)
- Procurement and Construction Management Advice
- Landscape Architect

The Board will expect the appointed Lead Consultant to work with the established project network, including all appointed advisers; all project related documentation, designs and specification, budgets and programmes developed to date as part of Stage 1, subject to any changes agreed with the Project Director or their nominee.

The Board have existing Consultancy agreements for the supply the following services, these appointments have been made and do not form part of this commission. The Lead Consultant team will be expected to work with these advisers, and acceptance of the commission will be conditional on this.

- Legal – Shepherd & Wedderburn LLP.
- Financial – Ernst & Young LLP.
- Town Planning Consultant – Keppie Planning.
- Enviromental Consultant– Ironside Farrar.
- Transportation Consultant – JMP Consultants Ltd.
- The Carbon Trust and sub-consultant.

## 2.13 Contract Strategy

The following contract strategy is currently proposed by the Board, this is subject to Government Gateway review and approval.

- New Adult Acute and Children's Hospital Project – Two stage Design & Build.
- New Laboratory Project – Single stage Design & Build

## 2.14 Site Inspection Staff

It is the Board's intention to make direct appointments for the under-noted roles, some will be made for the duration of the works contract others for particular stages, the appointments will be full-time. The Lead Consultant team will be required to structure and manage the selection and appointment process for all site inspection staff on behalf of the Board, although the contractual and payment arrangements will be between the Board and the respective companies.

- Building Clerk of Works (4)
- M&E Clerk of Works (3)
- Site Engineer (2) – sub-structure, drainage, groundworks and frame.

The Lead Consultant will manage and direct the work of the site inspectorate staff. Site Inspectorate staff will be based on site for the duration of the works contract.

## 2.15 Details of documentation

The client requires two paper copies of all documents, reports, budgets, programmes, drawings, maps, 3-D graphics and animations, photographs and other documents or reports produced by the consultant. In addition, all the above must be provided in electronic format as noted below;

| | |
|---|---|
| Cost plan | MS Excel at all stages |
| Text | MS Word, MS Excel, MS Access. |
| Programmes | MS Project. |
| Drawings | Autocad at all stages. |
| 3D / Animations | Various. |

Working documents will require to be in base software programme format e.g. not Adobe Acrobat. Consultants may use Adobe Acrobat for working use and for email while providing final versions of documents, drawings etc., in base software as noted above.

## 2.16 Client's procedures / requirements

- NHS GG&C PSC / OBC documentation and OBC Stage Design Report as prepared by others, including all associated drawings, specifications and project costs.
- Scottish Capital Investment Manual (SCIM).
- SEHD – Procode V 2.0
- The Board's Design Action Plan
- Health Facilities Scotland – SHPN and/or NHS HBN and HTM's.
- NHS Estates and others guidance documents such as AEDET, NHS NEAT, or BREEAM.
- Government Gateway reviews will be undertaken at various stages (see separate section).
- OGC Guidance on Competitive Dialogue and general project delivery.(use of CD unlikely).
- FBC

## 2.17 OGC Gateway Reviews

The project will be subject to external review by a Gateway Review Panel at various stages of the project and the Lead Consultant team will be expected to assist the Board's Project Team at the following stages;

Gateway Review 0 – Strategy assessment (2 reviews)
Gateway Review 2 – Procurement strategy.
Gateway Review 3 – Investment Decision.
Gateway Review 4 – Readiness for Service.
Gateway Review 5 – Benefits Realisation.

Input from the Lead Consultant will be focussed to technical elements associated with each review, and cover matters such as programme, cost management, procurement strategy and structure, project specification and buildability. Each Gateway Review will last approximately 2- 3 days and it is likely that the Lead Consultant will need to prepare a status report on technical elements and be available for interview for 2-3 hours.

## 2.18 Meetings

The Lead Consultant team will be required to attend regular progress and associated briefing meetings at each stage of the project, which are typical for this form of procurement and consultancy service. These meetings will generally be held within one of the Board's project offices within the Glasgow conurbation, costs for attendance at all meetings should be included within your capped lump sum fee proposal.

During key stages of the procurement process the Board will requires some or all of the TA team to be based in the ASR Project Offices at Hillington, to ensure good continuity and communication is maintained at critical times of the programme. During the construction phase, the Board's Project Team will have a presence within the site compound, and suitable project offices accommodation will be provided for key members of the Lead Consultant team as well.

The Lead Consultant will require to be suitably represented at all meetings throughout the duration of the project. Regular meetings will be held throughout the commission, some of the key meetings will be;

- The Lead Consultant will meet at least once a week with the Project Director or their nominee throughout all stages of the project from commencement to completion of the commission.
- Open days and presentations during bidder selection Stage 1A.

- 2-3 meetings a week throughout Stage 1A to develop the Employer's Requirements documentation, note this may run into multiple daily meetings at certain stages.
- Weekly meetings throughout Stage 1A to develop and adapt the current PSC design solution with the Board's Project Team and departmental user groups. This will involve the further development of the existing PSC departmental relationship drawings(1:500) as well as the site master plan (1:500) to reflect changes to the Board's phasing of the overall re-development proposals. (See section 6.0)
- Regular meetings during Stage 1B bid process to suit number of bidders (3) to ensure adequately briefed, for design and bid development and for commercial and financial negotiations.
- Regular meetings during Stage 2 process during bid and design development. Again meetings will frequently be held with Project Team, user groups to assist design development with bidder design team, for commercial meetings with bid team
- Regular meetings during Stage 2 preferred bidder stage, and evaluation process to include weekly bidder meetings up to contract close.
- Weekly in house bid team meeting up to contract close.
- Provide technical input, review and comment and take active involvement in the room layout review and approval process both before and after contract close. Note, room layout drawings will be developed for all room types and variants on a room type.
- Monthly Project Executive and Procurement & Finance meetings for duration of commission, including regular reporting and progress update reports for these meetings.
- Monthly project progress/technical meetings during construction & commissioning phase and one site meeting per month.
- Bi-weekly for 3 months then weekly commissioning team meetings for 12 months prior to completion.
- User consultation/design development meetings, at least weekly during Stage 1 & 2.

The meetings listed above are for guidance only and the team should make their own judgement on the type and frequency of meetings to deliver the commission including attendance. This should be confirmed as part of your submission in the response on methodology, possibly tabulated.

Meetings with Planners, Roads Department, Local Authority Flood prevention, SEPA, Scottish Water and Fire Brigade as well as NHS Fire Officer, Health Protection Agency . With the exception of meetings with the Planning Authority, meetings with these individuals should be infrequent.

The team may also be called up to support the Board and Project Team at public presentations out with normal working hours, this should be an infrequent occurrence.

Meetings with the Hospital Manager and Operational Estates staff to confirm operational issues and co-ordinate with site infrastructure.

Presentations to a number of internal stakeholders i.e. Board Members, Clinical Groups, etc.

### 2.19 Continuity with other projects and site operations

The team will be responsible for ensuring the maintenance and safe operation of the hospital site in respect of the various projects they are managing, as well as full co-ordination with any associated works contracts. The team will be responsible for planning and programming of any associated works to maintain access to all areas. All works programmes must be fully consulted with the Project Director or their nominee and approved by same.

### 2.20 Post Project Evaluation (PPE)

The team will actively assist the Board to develop and undertake the PPE process throughout the life of the project, and assist in the preparation and completion of this documentation no later than 9 months post occupation of the new facilities.

## 2.21 Further Development of the Board's OBC/PSC Design Exemplar

As stated in Section 1.0 the Board have developed a PSC design exemplar through the first stage of a PPP procurement strategy. While this strategy has now changed course towards a public finance route, a good deal of the design and information prepared for OBC is still valid.

As part of the development of the OBC the Board looked at alternative options to re-use some of the existing buildings on the campus for administration and support functions, this was driven by capex cost pressures, although these building may eventually be replaced by new build's at a later date.

The PSC design therefore requires to be revised and updated before it can be used as the design exemplar and form part of the Employers Requirements documentation. Copies of site plans for Option 1 and Option1A (Preferred option) are included in Appendix G, Option 1A will require the re-design of some of the roadways to the main frontage of the planned new hospitals, with resultant impact on the podium footprint. The location of the new Laboratory Project and the design and layout of the Service yard and Energy Centre all require further work before the design exemplar is complete. This work is likely to take 4-5 months from commencement up to the issue of the Stage 1 Employer's Requirements tender, the Board have decided to provide Stage 1 bidders with an exemplar design on which to develop their bid proposals.

## 2.22 Masterplan

In drafting the conditional planning report for Committee, Glasgow City Council Planners have made a condition of the first reserved matters application on campus that……..

'a finalised masterplan which re-affirms an overall vision, set within a clear design and development framework, reflecting the strategic design guidance on built form and landscape contained in the South Glasgow Hospitals Campus Development Plan, April 2007 shall be submitted and agreed in writing by the Planning Authority. The submission shall include (i) an audit of the changes between the finalised masterplan and the indicative Campus Plan ref 05017-02-100 Development Option C; identified in the Campus Development Plan and (ii) an assessment of the extent to which the finalised masterplan accords with the Environmental Statement (ES) submitted as part of the outline planning application. Thereafter the Council will determine whether the finalised masterplan accords with the outline consent and whether a reserved matters/full planning application accompanied by an EA is required.

The Board will therefore require the site plan to be updated to incorporate the retention of the Surgical Blocks and re-routing of the main entrance road, and Fastlink routes. This reflects the change from Option 1 to Option 1A referred to above and as indicated on drawings included within Appendix G. For the avoidance of doubt, the Lead Consultant team will be required to revise the site plan to reflect the layout Option 1A which has never been fully developed to scale 1:500.

On completion the team will need to update the Campus Development Plan, the Board are unclear quite when this should be undertaken, as it will need to reflect the final proposals developed by the preferred bidder as they enter the detailed planning process for their scheme with Glasgow City Council.

## 3.0 Conditions of Appointment

This part describes the conditions, which normally apply to a consultant's appointment. If different or additional conditions apply, they are set out in the Memorandum of Agreement.

### Generally

Note, while reference is made to the 'consultant' throughout this section, this refers to the Project Manager and the technical advisory team as a whole.

### 3.1 Duration of commission

The appointment of the consultant will commence from the date of notification from the Board and the commission, unless suspended or terminated, shall be deemed to be completed on the conclusion of the duties by stage, as set out in Schedule 1 of the Memorandum of Agreement. Note this will be a staged appointment, the Board reserve the right to terminate the commission at the end of each and every stage from 1A - 5. Progression from one stage to another will be subject to written confirmation by the Project Director.

### Objectives and obligations of the consultant

### 3.2 Scope of duties

The duties to be performed by the consultant are those recorded in Section 6.0 Schedule 1 of the Memorandum of Agreement.

### 3.3 Attendance at meetings

In performing the duties recorded in Schedule 1 of the Memorandum of Agreement – 6.12, the consultant shall arrange and attend all meetings necessary to their proper execution, and as a minimum those listed in 2.11.

### 3.4 Additional duties

The consultant is to include within their fee proposal for all normal duties expected for the provision of technical advisory services for a project procured using a two stage design and build process. The Board does not anticipate any additional duties out with normal duties, no advisers should undertake any work which they consider additional to normal duties without the written agreement of the Project Director or their nominee. Any such approval shall indicate the maximum budget for fees and works where appropriate, which should not be exceeded without further approval having been obtained. These shall be conditions precedent to any payment being due from the Board.

### 3.5 Information from the consultant

The consultant shall provide information to the Project Director or their nominee in accordance with the target dates defined in clause 2.4. The consultant will be expected to prepare and actively manage a detailed project programme as per Clause 3.12.

### 3.6 Duty of care

The consultant is to exercise reasonable skill, care and diligence in the discharge of the duties agreed to be performed by him in relation to this commission. Submission of drawings, calculations, specification and other documentation produced by the consultant for comment by the Project Director or their nominee shall not relieve the consultant of this responsibility. If in the performance of his/her duties the consultant has a discretion exercisable as between the client and any other body the consultant shall exercise his/her discretion fairly.

3.7 Co-ordination of consultant's services

Co-ordination and integration of the activities of technical advisory team, however employed, shall be the responsibility of the lead consultant/project manager, as identified in article 6.3 of the Memorandum of Agreement. This includes co-ordination of the works by planning, environmental and transportation consultants.

3.8 Collaboration between consultants

All consultant's shall take account of the role of the lead consultant/project manager and collaborate with other members of the technical advisory team and with other professional consultants employed by the Board and in the Board's employment. Note the team may require to undertake preliminary meetings with the current technical advisory team, to establish work undertaken to date.

3.9 Changes caused by the Project Director or their nominee

The consultant shall provide the Project Director or their nominee with the cost and programme consequences of any material alteration, addition to or omission from the project caused or proposed by the Project Director. This information is to be provided before the Project Director or their nominee takes a final decision.

3.10 Changes not caused by the Project Director or their nominee

The consultant shall not cause to be made any material alteration, addition to or omission from the approved project documentation. The consultant shall promptly inform the Project Director or their nominee in writing of anything that the likely effect of which the consultant believes would be to either vary the project, or to materially change the financial viability, quality or function of the project.

3.11 Progression between work stages

The consultant shall obtain approval in writing from the Project Director or their nominee before proceeding between the work stages described in clause Schedule 1 of the Memorandum of Agreement. Only those stages authorised shall be eligible for payment. The Board reserve the right to terminate the commission at each individual stage.

3.12 Master Programme

The consultant shall undertake to fulfil the current project and maintain a detailed project programme for the commencement of Stage 1A to the conclusion of the Project based on the key stages, breaking down tasks and times for all participants within each stage. The programme will be submitted to the Project Director for review and approval prior to issue. The consultant will be responsible for maintaining the programme and to review on a regular basis with the Project Director or their nominee to monitor progress and the implementation of any corrective action agreed by the Project Director or their nominee. The first draft of the Master Programme will require to be in place by no later than 4th September 2008, and is to be considered as a working document to structure the activities of the Board's Project team, and the Lead Consultant team. This programme will also require to be actively monitored against the progress of the project at all stages.

3.13 Site Inspection

The member consultants of the Lead Consultant Shadow Design Team shall visit the site at regular intervals as appropriate to the stage of construction and generally inspect the works for compliance with the Employer's Requirements documents. This tender should also include for any site staff directly employed by the Lead Consultant team and in direct support of their duties and responsibilities .

The Lead Consultant team will be expected to make frequent visits to site during construction stage, suitable accommodation will be provided, as noted below.

Obligation of the Board

3.14 Duties of the Board

The Board shall nominate a Project Director or their nominee, to enable the proper performance of the Lead Consultant's duties as stated in Schedule 1 of the Memorandum of Agreement.

Construction (Design and Management) Regulations 2007

3.15 The Board shall appoint a CDM Co-ordinator and a Principal Contractor, in accordance with the provision of the Construction (Design and Management) Regulations.

Information from the Board

3.16 The Project Director or their nominee will be responsible for providing information and making such decisions as are necessary for the proper performance of the agreed duties as recorded in Section 6.0 - Schedule 1 of the Memorandum of Agreement, all in accordance with the programme.

Provision of site accommodation and facilities during construction stage

3.17 The Board will be responsible for the provision of suitable site based accommodation for the Lead Consultant team, for the use of consultant's staff associated with the project. The provision of these facilities will be for the duration of the works on site and funded through the construction contract prelims.

Ownership of documents and copyright

Copyright entitlement

3.18 The copyright and all other intellectual property rights in all drawings, documents reports, specifications, pricing documents, calculations and other documents provided by the consultant in connection with the works shall be vested in the Board.

Documentation provided by the client

3.19 Where standard documentation, including drawings, is provided by the client, copyright of such documentation and drawings shall remain vested in the Board.

Client's Licence and Restrictions

3.20a The Board shall have a licence to copy and use such drawings, reports, specifications, pricing documents, calculations and other information to facilitate future extension, alteration, maintenance or repair of the works. The Lead Consultant team shall not be liable for any such use by the Board or its appointee of any drawings or other documents for any purpose other than for which the same were prepared and provided by the consultant.

Consultant's rights of publication

3.20b The consultant shall not communicate with the media or any outside body or publish or display alone or in conjunction with any other person, any articles, photographs or other illustrations relating to the Project without prior written consent from the Project Director or their nominee, which consent shall not be unreasonably withheld.

3.21 Client's use of priced documents

Priced documents may be used by the client for the Project, without prior approval by the Lead Consultant.

3.22 Freedom of Information

The consultant acknowledges that the Board is obliged to comply with the Freedom of Information (Scotland) Act 2002 ("the Act") and any codes of practice applicable from time to time relating to access to public authorities' information. The Consultant shall (and shall procure that each of its Sub-Consultants shall) co-operate, facilitate, support and assist the Board to comply with the Act and any codes of practice applicable from time to time relating to access to public authorities' information including by providing documents and other information relating to the Project within the timescales necessary to allow the Board to comply with its obligations and duties under the Act and the codes of practice.

All information submitted to the Board may need to be disclosed and/or published by the Board. Without prejudice to the foregoing generality, the Board may disclose information in compliance with the Act, (the decisions of the Board in the interpretation thereof shall be final and conclusive in any dispute, difference or question arising in respect of disclosure under its terms), any other law, or, as a consequence of judicial order, or order by any court or tribunal with the authority to order disclosure. Further, the Board may also disclose all information submitted to them to the Scottish or the United Kingdom Parliament or any other office or agency of Her Majesty's Government in Scotland or the United Kingdom, and their servants or agents. When disclosing such information to either the Scottish Parliament or the United Kingdom Parliament it is recognised and agreed by both parties that the Board shall if they see fit disclose such information but are unable to impose any restriction upon the information that they provide to Members of the Scottish Parliament, or Members of the United Kingdom Parliament; such disclosure shall not be treated as a breach of this Agreement.

Professional Indemnity insurance

3.23 Extent of insurance cover

The consultant shall (and shall procure that each of its Sub-Consultants shall) in respect of their services, obligations and liabilities arising out of this Agreement take out and maintain throughout the period, from the date of commencement of their services under this commission, professional indemnity insurance.. The professional indemnity insurance shall be maintained until the expiration of Twelve (12) years, provided that it can be obtained at reasonable market rates, from the date of completion of his commission. The level of indemnity shall be a minimum of £10m GBP per individual team member. The level of professional indemnity insurance for Sub-Consultants (other than Principal Sub-Consultants) shall be a level to agreed by the Board on an individual basis.

PII cover will be required for all aspects of the consultants (and Sub-Consultants) work from date of appointment.

3.24 Professional indemnity insurance certificate

The consultant team shall provide a certificate (including for each of its Sub-Consultants), signed by or on behalf of the insurers on an annual basis and present to the Project Director.

Certification

3.24 Certification generally

The consultant shall provide the Project Director or their nominee with completed certificates when required to do so.

Assignment and sub-contracting

3.25 Assignment by the Lead Consultant

The Lead Consultant shall not assign the whole or part of the benefit or in any way transfer the obligations of this agreement or any part thereof without the written consent of the Board.

3.26 Assignment by the client

The Board reserves the right to assign the whole or any part of the benefits or transfer obligations of the agreement or any part thereof to another Scottish NHS organisation without the consent of the consultant. (Note this covers re-organisation of NHS within lifecycle of project).

3.27 Sub-contracting

The consultant shall not sub-contract any of the duties under this agreement without the written consent of the Project Director or their nominee. The consultant shall be fully responsible and liable for the performance of the services to be performed in Section 6.0 Schedule 1 of the Memorandum of Agreement by any Sub-Consultant notwithstanding that the consent of the Project Director or their nominee has been obtained.

The consultant shall enter into Sub-Consultancy Agreements with each Sub-Consultant engaged by it in connection with the Project in substantially equivalent terms to this Agreement and shall within 14 days of execution of the Sub-Consultancy Agreement deliver 2 certified true copies of such Sub-Consultancy Agreements to the Project Director or their nominee.

The consultant shall comply with its obligations and shall ensure compliance by each Sub-Consultant with their respective obligations in the Sub-Consultancy Agreement(s). The consultant shall not waive any of the Sub-Consultants obligations or liabilities, or release the Sub-Consultant of its obligations or compromise or settle any claims against or from the Sub-Consultant without the prior written consent of the Project Director or their nominee. Such Sub-Consultancy Agreement shall not be assignable by either party to it without the prior written consent of the Project Director or their nominee, (which consent may be granted or withheld at the absolute discretion of the Project Director or their nominee).

The consultant shall be responsible for any fees or expenses claimable by the Sub-Consultants in terms of the Sub-Consultancy Agreement. Such fees and expenses shall be deemed to be included in the consultants remuneration including its fees and expenses in terms of this Agreement. The consultant shall not (i) vary, release or waive in whole or in part any of the obligations of the Sub-Consultants arising out or in connection with the Sub-Consultancy Agreements nor terminate any of the Sub-Consultancy Agreements, or any Sub-Consultant's employment thereunder, in whole or in part without the prior written consent of the Project Director or their nominee; and / or (ii) prejudice any rights or remedies which the Board may have under a collateral warranty granted by a Sub-Consultant.

3.28 Sub-Consultant collateral warranties

The consultant shall within 30 days of appointment of a Sub-Consultant deliver to the Project Director or their nominee collateral warranty agreements (incorporating step-in rights) from each Sub-Consultant (duly executed in a self proving manner by both parties) in favour of the Board in terms of the draft collateral warranty agreement set out in Appendix F.

3.29 Commercial Interests

Any commercial interests held by Partners/Directors/Principals of the Lead Consultant team in firms engaged in manufacturing, contracting or commissioning in building and engineering services, other services or construction, shall be declared to the Project Director prior to conclusion of this agreement, or if appointed without delay should such event occur.

Variation, extension, suspension or termination

3.30 Variation or extension by the client
The Board may vary or extend in time the performance of the whole or part of the agreed duties by giving reasonable notice in writing to the Lead Consultant. In such notice the Project Director or their nominee shall specify the duties affected.

3.31 Suspension or termination by the client
The Board may suspend or terminate the performance of the whole or part of the agreed duties by giving reasonable notice in writing to the consultant. In such notice the Board shall specify the duties affected and the reason for suspension or termination.

3.32 Suspension or termination by the Board shall be permitted in the following circumstances:
- the Board has decided to suspend or terminate the scheme;
- non-performance by the Lead Consultant;
- breach of the provisions of this agreement by the Lead Consultant;
- the Lead Consultant becoming bankrupt or insolvent;
- the Board has decided to terminate the appointment at the conclusion of a stage.

3.33 Resumption of duties
If the Lead Consultant has not been given instruction to resume any work suspended under clauses 3.31 and 3.32 within six months from the date of suspension, the consultant may make written request for such instructions, which must be given in writing. If these have not been received within 30 days of the date of such request the Lead Consultant shall have the right to treat the appointment as terminated.

3.34 Suspension or termination by the Lead Consultant
The Lead Cconsultant may suspend or terminate the performance of the agreed duties on the expiry of reasonable notice given in writing to the Board. In such notice the consultant shall specify the duties affected and the reason for suspension or termination.

3.35 Suspension or termination by the Lead Consultant shall be permitted on the following circumstances:

- the client has not provided an instruction to resume work under clause 3.31;

- breach of the provisions of this agreement by the Board.

3.36 Death or incapacity of the Lead Consultant's key personnel
Should the Lead Consultant through death or incapacity be unable to perform the whole or part of agreed duties, this agreement shall thereby be terminated.

3.37 Delivery of documents
On determination of the performance of the whole or part of the agreed duties and on satisfactory delivery of all drawings, reports, calculations, production information and any other documentation prepared by the Lead Consultant to the Project Director or their nominee, the Lead Consultant shall be paid all due fees and expenses.

Settlement of disputes

3.38 Adjudication
Any difference or dispute arising out of this agreement shall be referred to an adjudicator within 28 days of either party being made aware of the occurrence of the difference or dispute.

3.39 The party that is first made aware of the occurrence of the difference or dispute shall send a notice to the adjudicator with a copy of the notice being sent to the other party. The notice shall specify the matter in dispute and set out all the principal facts and arguments relating to it. Copies of all relevant documentation shall be attached to the notice.

3.40 The party to whom a copy of the notice required under clause 3.39 has been sent shall send representations to the adjudicator within 14 days of receipt of the copy of the notice.

3.41 The adjudicator shall notify his/her decision to the parties within 28 days from the date of receipt of the notice required under clause 3.39. The adjudicator may extend this period by 14 days should he require to do so.

3.42 The decision of the adjudicator on any matter will be binding until completion, suspension or determination of the commission.

3.43 The adjudicator shall not be liable to the parties for breach of duty.

3.44 Payment of the adjudicator's fees shall be shared equally between the parties.

3.45 During the process of adjudication the performance of the agreed duties shall continue as if there were no difference or dispute.

3.46 If the adjudicator resigns or is unable to act, the parties shall choose a new adjudicator jointly.

3.47 If the parties have not chosen a new adjudicator jointly within 28 days of the adjudicator resigning or becoming unable to act, then the President or Vice President of the RIAS shall be requested to nominate a new adjudicator.

## Discrimination and Equal Opportunities

3.48 The consultant shall not, and shall take all reasonable steps to ensure that all employees, workers, agents, or sub-contractors of the consultant shall not, unlawfully discriminate within the meaning and scope of the provisions of the following legislation, or any statutory modifications or re-enactment thereof:

- The Equal Pay Act 1970;
- The Sex Discrimination Act 1975;
- The Race Relations Act 1976;
- The Disability Discrimination Act 1995;
- The Employment Equality (Religion or Belief) Regulations 2003;
- The Employment Equality (Sexual Orientation) Regulations 2003; and
- The Employment Equality (Age) Regulations 2006.

3.49 The consultant shall observe, and shall take all reasonable steps to ensure that all employees, workers, agents, or sub-contractors of the consultant shall observe, any relevant codes of practice (and any amended or replacement codes from time to time in place) in respect of employment issued by any of the following bodies:

- The Commission for Racial Equality;
- The Disability Rights Commission; or
- The Equal Opportunities Commission;

or any replacement codes of practice issued by the Commission for Equality and Human Rights."

## Governing laws

3.50 The application of these conditions shall be governed by the laws of Scotland.

## 4.0 Provision for Fees and Expenses

This part defines fees in relation to the Lead Consultant and describes the methods of payment for the consultant's services and expenses.

### 4.1 Lump Sum Fees

Lump sum fees will be payable on a staged basis as agreed at date of appointment, and as set out in Section 6.5 – 6.7 of the Memorandum of Agreement.

Time charge fees will be based on rates supplied and agreed at appointment, and as set out in Section 6.8 of the Memorandum of Agreement. Time charge work should not be undertaken without the prior written agreement of the Project Director or their nominee.

### Payment for duties

### 4.2 Methods of payment

The fees, except for those on a time-charge basis, shall be deemed to include the provision of all services necessary to perform the duties listed in Section 6.0 Schedule 1 of the Memorandum of Agreement – Scope of Services.

### 4.3 Payment on a percentage basis

No fee proposal will be accepted on a percentage basis.

### 4.4 Payment on a lump sum basis

Where payable on a lump sum basis, the fees shall be calculated for each work stage in accordance with the apportionment recorded in article 6.5 of the Memorandum of Agreement. The lump sum bid will be fixed and capped for each stage in respect of this agreement.

### 4.5 Payment on a time-charge basis

Where payment is on a time-charge basis the scale of charges shall be set out as below. The consultant team will regularise their hourly rates across the team to the effect that all similar grades have the same hourly rates across all respective disciplines in the team.

#### Principals - hourly rates:

a) where a principal is specifically nominated by the Project Director or nominee to perform the duties, the principal's time shall be reimbursed at the rate per hour quoted in article 6.8a of the Memorandum of Agreement, or at such other rate as may be agreed between the Project Director or nominee and the consultant. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

b) principals doing work which they consider would normally be done by another member of staff shall be reimbursed at the rate per hour quoted in article 6.8b of the memorandum of agreement or such other rate as may be agreed between the Project Director or nominee and the consultant. For the purposes of this clause, the rate for a principal's time shall be calculated at the rate applicable to a senior professional member of staff in the firm. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

4.6 Professional and technical staff - hourly rates

Professional and technical staff time shall be reimbursed at the rate per hour quoted by the consultant in article 6.8b of the Memorandum of Agreement in the categories stated or such other rate as may be agreed between the Project Director or nominee and the consultant. The rate per hour shall include salary, payroll and other costs of employment. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

4.7 Travelling time:

Time spent by principals, professional and technical staff on travelling in connection with the duties set out in Schedule 1 of the Memorandum of Agreement shall include allowance for travel time to the Greater Glasgow conurbation from the consultants place of work, or travel within the Glasgow area.

4.8 Supervisory duties:

The supervisory duties of a principal shall be deemed to be included in the rate per hour quoted by the consultant in article 6.8b of the Memorandum of Agreement.

4.9 Secretarial and administrative staff

Time charges rates shall include the cost of providing secretarial staff or staff engaged on general accountancy or administrative staff.

4.10 Consultant's records

The consultant shall maintain records of time spent on services performed on a time-charge basis. The consultant shall make such records available to the Project Director upon request.

4.11 Travelling, subsistence and other expenses

Travelling, subsistence and other expenses shall be deemed to be included within lump sum fee shall be deemed to include the cost of:

a) telex, facsimile and telephone calls;

b) postage and similar delivery charges;

c) travelling, hotel and other similar expenses;

d) all printing, reproduction and purchase of all documentation, drawings, maps, photographs, manuals needed by the consultant and other members of the design team insofar as they are produced by the consultant for the proper performance of the duties relating to this particular commission.

e) the cost of all office equipment and site related protective clothing.

4.12 Additional expenses

The consultant shall be reimbursed for all expenses properly incurred in connection with the following:

a. advertising for tenders and site staff;

b. disbursements required by the client, such as planning and building warrant fees, special surveys by third parties instructed by the client.

c. Travel out with the Greater Glasgow conurbation on business agreed in advance with the Project Director or nominee.

Payment for additional duties

4.14 Fees for additional duties required by the client

For additional duties not normally necessary such as those in connection with prolonged contractor's claims and all similar duties where the Project Director specifically instructs the consultant in writing, the charges shall be an agreed lump sum in accordance with the scale of charges as described in clause 6.8.

Use of computers and/or special equipment

4.15 Computers and/or other special equipment - where no extra fees are payable

Where the consultant in performing his/her duties decides to use a computer and/or other special equipment it shall be at no extra charge to the client unless the Project Director or nominee has specifically requested the development and/or use of special programs.

4.16 Where extra fees are payable

No extra fees will be incurred by the consultant without the prior written agreement of the Project Director or their nominee

Statutory fees

4.17 Payment of statutory fees

The Board shall pay all fees in respect of applications under planning and other statutory requirements.

Suspension, resumption and termination

4.18 Fees on suspension or termination

On suspension or termination of the consultant's appointment under clauses 3.29, 3.30a or 3.34, the consultant shall be entitled to fees for all work completed at the date of suspension or termination.

4.19 Reimbursement during suspension

During any period of suspension the consultant shall be reimbursed by the Board for costs necessarily incurred under the appointment up to the date of resumption or termination, always with prior agreement with the Project Director or their nominee.

4.20 Fees on resumption

On resumption within six months of suspension, previous payments shall be regarded as payments on account towards the total fee.

4.21 Reimbursement on termination by the client

Where the consultant's appointment is terminated by the Board under clause 3.32, the Lead Consultant shall be reimbursed by the Board for costs, excluding loss of profit, necessarily incurred in connection with work up to the date of termination or arising as a result of the termination.

4.22 Fees where the scheme does not proceed beyond Stage 1A

Where the scheme does not proceed beyond Stage 1A, the Lead Consultant shall be paid in accordance with article 6.4 of the memorandum of agreement.

4.23 Reimbursement on termination by the consultant

Where the consultant terminates the appointment under clause 3.32, the client shall be responsible for costs necessarily incurred by the consultant arising as a result of the termination.

Payment of accounts

4.24 Submission of accounts and documentary evidence

Accounts for payment of fees and/or expenses and disbursements shall be submitted to the Project Director or their nominee at the intervals stated in article 6.6 of the Memorandum of Agreement. Interim payments of fees shall be proportionate to the extent to which the commissioned duties have been discharged. Accounts for time-charge based duties and/or travelling, subsistence and other expenses shall be accompanied by documentary evidence of the time and expenses incurred. Such time charges and/or travelling, subsistence and other expenses shall be in respect of the whole of the period since the preceding interim payment.

4.25 Payment of accounts

All sums due from the Board to the Lead Consultant under the agreement shall be paid by the due date, which is 30 days from submission by the Lead Consultant of his account to the Project Director.

Where the Lead Consultant sub-contracts any of the duties forming part of this agreement there shall be included in the conditions of appointment of the sub-contractor a term which requires that payment be made to the sub-contractor within a period not exceeding 30 days from receipt of a fee account by the consultant from the sub-contractor.

The Board shall give notice not later than 5 days after the date on which payment becomes due to the consultant, or would have become due if:-

(a) the Lead Consultant has carried out his obligations under the agreement; and

(b) no set off or abatement was permitted by sequence to any sum claimed to be due under one or more other agreements, specifying the amount of the payment made or proposed to be made and the basis on which the amount was calculated.

The Board shall not withhold payment after its due date for payment of a sum due under the agreement, unless the Board has given notice of intention to withhold payment.

A notice of intention to withhold payment shall specify:

a) the amount proposed to be withheld, and the ground for withholding payment; or

b) if there is more than one ground, each ground and the amount attributable to it; and must be give not later than 7 days before the due date for payment of the relevant sum.

### Value Added Tax - in relation to fees and expenses

All fees and expenses set out in this agreement are exclusive of Value Added Tax, the amount of which, at the rate and in the manner prescribed by law, shall be paid by the Board to the Lead Consultant.

### Other requirements

Respondents must provide a detailed breakdown for individuals who will work on each stage of the project and provide details of their experience. Respondents must identify the hourly charge rate and estimated input hours of each individual. Respondents must also identify an hourly Time Charge for undertaking additional work at the request of the Project Director or their nominee.

Respondents must provide details of how they propose to self audit their time and resource input. The Board must be provided with accurate input time invoices.

# 5 Definitions

This part contains a list of terms used throughout this agreement and in understanding this agreement the following expressions shall have the meaning hereby assigned to them except where the context otherwise requires.

Activity data

Information sheets describing:

a. tasks and activities performed in health buildings and having planning significance;

b. environmental and spatial requirements;

c. the equipment and engineering terminals required.

Ad hoc departments

Health building departments without a Scottish Hospital Planning Note or Health Building Note and associated cost allowance.

Adjudicator

The individual agreed between the consultant and the client to whom all disputes in connection with this agreement shall be referred until completion of the commission.

Agreement

This agreement shall comprise the following parts:

Scheme particulars;

Conditions of appointment;

Provision for fees and expenses;

Specimen certificates;

Definitions;

Memorandum of agreement.

Approved sum

The overall capital sum for construction work on a scheme (including main contract, enabling and preliminary work necessary to bring planned facilities into use) approved by the client NHSiS body at work stage 3B prior to agreeing contract and approved in Full Business Case. This sum will be calculated on the basis of tenders received or prices negotiated. Once the contract is let, the approved sum should not be increased without further fresh approval obtained in accordance with a NHSiS body's standing orders/instructions. The approved sum is exclusive of fluctuations allowable under the contract and Value Added Tax.

Architect

The person, partnership, company or firm appointed by the client to act as the architect for the scheme described in the memorandum of agreement.

Asset register

A record of data on each capital asset or group of capital assets (for example, land, buildings, fixed plant and other assets). The register consists of a number of structured records, each of which holds details of an asset.

Brief

*a)* *Consultant's brief*

A document issued to consultants containing information about the scheme, the client's procedure etc to enable them to understand exactly the extent of the service they are required to provide.

*b)* *Appraisal brief*

A document containing guidelines, instructions and information to act as a basis for the appraisal of options and the outline business case submission at stage 0.

*c)* *Initial brief*

A document prepared at stage 0 or 1, which shall include the following:

I. objectives of the scheme;

II. cost parameters;

III. outline requirements for the scheme including content, accommodation, location and town planning statement;

IV. management control plan;

V. procurement strategy;

VI. full business case submission;

VII. any additional information about the site which has become available since stage 0;

VIII. functional content.

*d)* *Full brief*

A document containing instructions to the design team at stage 2A stating the essential detailed requirements of the client that the scheme must meet, including the following:

confirmation of any changes to the parameters set down in the scheme brief, especially regarding programme, planning operational and cost criteria;

detailed design briefing;

any updating of the initial brief.

*e)* *Commissioning brief*

The operational concomitant to the full brief, containing the essential operational/implementation, programming and budgeting requirements for bringing the scheme into operation.

Budget cost

An estimated cost of the whole of the anticipated capital expenditure and value added tax for the project, including:

a. departmental costs;

b. on-costs;

c. work costs (total of departmental and on-costs);

d. location adjustment;

e. fees;

f. non-work costs;

g. equipment; and

h. contingencies.

Once approved within the full business case submission the total of these costs become the "Approved Budget Cost". In order to estimate the total outturn cost for the project the Scottish Executive Health Department will add an additional amount for inflation.

Building surveyor

The person, partnership, company or firm appointed by the client to act as the building surveyor for the scheme described in the memorandum of agreement.

Capital budget

The capital costs component of the budget cost.

Client

The NHSiS body named in the memorandum of agreement.

Commissioning brief

See "Brief".

Commissioning officer

The individual responsible for the overall management, supervision and co-ordination of commissioning by the client who is accountable to NHSiS body management.

Commissioning team

A team comprising a core of officers responsible to the commissioning officer, and concerned with the management and supervision of commissioning for the client necessary to being the scheme into effective and efficient operation, representatives of those responsible for managing and running services may be co-opted into the commissioning team.

Construction (Design and Management) Regulations

These Regulations enact into UK law the requirements of the EC Temporary or Mobile Construction Sites Directive (92/57/EEC). They place responsibilities for health and safety on all those involved in the process of procuring a building (clients, designers and contractors).

There are certain basic requirements, for example the appointment of a planning supervisor and principal contractor, the preparation and maintenance of a health and safety plan for the project, the preparation and maintenance of a health and safety plan for the life of the building.

Consultant

A person, partnership, company or firm employed by the client in connection with the design and administration of contract(s) for construction work.

Contract administrator

The consultant with particular additional responsibilities for administering the building contract.

Contract Strategy

The method by which the building project is to be achieved, determining:

The relations between the clients, the design team and the consultants team;

The methods of financing and management; and

The form of construction contract.

Contractor

Any person or persons, firm or company under contact to the client to perform work and/or supply goods in connection with the scheme.

Contractor's proposals

That part of the tender documents submitted by a contractor detailing the proposals to meet the employer's requirements.

Contract sum analysis

That part of a design and build tender detailing the breakdown of costs as specified by the client in the employer's requirements.

Co-ordination of design

i. *Of design generally - means:*

The production of a complete and integrated design solution that provides a satisfactory standard of accommodation and accords with the full brief.

ii. *Of user outlets and terminals - means the following activities:*

a. Provision by the architect/building surveyor of drawings, either at 1:50 or appropriate larger scale, showing the location of all fixtures, furniture and equipment together with all user outlets both in plan and in elevation.

b. Provision by the architect/building surveyor of general and, if necessary, particular information relating to the location of all terminals. This will cover unacceptable locations and may be in the form of drawn or written guidance.

c. Where the public health services are designed by the architect/building surveyor or other independent designer, inclusion by the architect/building surveyor under b. above, details of restrictions on all terminals which relate to services.

d. The examination of the drawings supplied by the architect/building surveyor and comments on them by the services engineer. These comments will refer not only to location, but where appropriate will indicate dimensions and support requirements. The comments supplied will be on the basis of preferred solutions.

e. Examination by the architect/building surveyor of the services engineer's comments and relocation of all terminals as indicated or the initiation of discussions with the services engineer to agree and record an acceptable alternative solution as necessary. Issue by the architect/building surveyor of the total final

agreement with the services engineer on co-ordination of user outlets and all terminals so that the latter may complete his designs and undertake the preparation of the production drawings and other documentation.

iii. *Of engineering design - means:*

a. The process of arranging the engineering service works such that each individual item can be physically installed, operated and subsequently maintained.

b. Showing such arrangements on building and engineering services production information so that the objectives of a. can be achieved and to enable detailed structural provision to be made for the engineering works.

iv. *Of the lead consultant and other members of the design team - means:*

a. Co-ordinating and integrating the activities of all the other consultants.

b. The production of a complete and integrated design solution that provides a satisfactory standard of accommodation and accords with the design brief.

Cost analysis

An analysis of the accepted tender using a form of cost analysis for health building work suitable for the requirements of the Scottish Capital Investment Manual.

Cost checking

An estimate of the probable cost of the developing design in comparison with the cost included in the cost plan.

Cost management

A continuous process of cost management throughout the duration of the project or scheme from initial brief to payment of the final certificate to enable expenditure to match specific defined cost targets. It can be considered in two parts:

pre-contract cost management during design/preparation of employer's requirements, the object of which is to obtain a tender within the updated budget costs;

post-contract cost management during execution, the object of which is to obtain a final account within the approved sum (excluding fluctuations).

Cost plan

A statement of the cost of the proposals prepared by the professional design team, presented in elemental format in accordance with NHS in Scotland guidance.

Cost planning

The process of assisting the design team to produce a cost effective solution and controlling the cost of the scheme within the sum approved by the client during all stages up to the placing of the contract.

Defects liability period

The period of time stated in the contract and starting from the date of practical completion of the works, during which the contractor is liable for making good defects attributable to workmanship or materials not having been made in accordance with the contract.

Departmental Cost Allowance Guides (DCAG's)

The guidance on capital sums calculated for the provision of a defined amount of functional accommodation. DCAG's are produced by the Scottish Executive Health Department. Cost allowance guides may be reduced or exceeded where an investment appraisal has demonstrated that within the context of an economical and efficient overall design, further running cost savings and/or measurable service benefits may be obtained from the decreased or increased capital provision.

Departmental cost

The capital sum allowed for functional provisions based on (or derived from) Scottish Office cost allowance guides. Where cost allowances are not appropriate, the costs for individual departments should be justified on the basis of similar accommodation in other schemes.

Design/cost reports

Reports on design development and cost consequences to demonstrate fulfilment of the design brief and adherence to the budget cost. Costs must be reported at a known cost datum.

Design team

A team comprising consultants or an NHSiS body's design staff responsible for design of the scheme, inspection of its construction, adjustment of accounts and the issue of the final certificate.

Development Control Plan

A series of drawings comprising site plans with contours (or spot levels), schematic plans and sections of buildings, showing existing properties and proposed cycle of site development, identifying individual schemes, outline of engineering service networks, functional relationships and main communications within and between buildings. The development control plan should not pre-empt the appraisal of options at stages 0 and 1 and may be revised as a consequence of Full Business Case approval for the scheme.

Employer's agent

The consultant with the particular responsibility for administration of the contract when using a design and building contract strategy.

Employer's requirements

A document prepared by the client, project, manager and consultants for obtaining tenders when using a design and building contract strategy.

Engineering services commissioning

Bringing the entire engineering service works together into full normal working condition and handing over the whole to the client a an operating entity capable of meeting the levels of load and/or performance specified.

Engineering services works

The engineering services in connection with which the client has engaged the services engineer to perform the professional duties.

Equipment

Equipment is classified into four groups:

Group 1: items usually supplied and fixed by the contractor;

Group 2: items, having a significant effect on space or structural requirements, which are supplied by the NHSiS body and fixed by the contractor;

Group 3: items, having a significant effect on space or structural requirements, which are supplied by the NHSiS body and put into position by them or their agents outside the general contract (for example includes x-ray equipment, linear accelerators and other medical equipment);

Group 4: small items, usually storage items, supplied and put into position by the NHSiS body.

Final account

The document to arrive at the total remuneration due to the contractor under the terms of the contract.

Full business case submission

A document whose objective is to confirm in detail the viability of the preferred option for the project and make recommendations as to the methods to be used to deliver the project on time, cost and quality. This document is used to obtain final approval to the funding of the project.

Functional content

The service/departmental capacity of a health building scheme expressed in terms of functional units.

Functional unit

A unit for measuring the capacity of health building accommodation in terms of service related content. For example, the functional unit for measuring the capacity of wards is the bed.

Health and safety file

This is the document referred to in the Construction (Design and Management) Regulations which contains information on the design of the scheme together with information added during construction to provide "as built" records. The information contained in the file is handed to the project director and is used to assist any persons carrying out work on the scheme after its completion (eg maintenance, extensions, refurbishment, demolition).

Health and safety plan

This is the document referred to in the Construction (Design and Management) Regulations which is prepared for a specific scheme. It sets out the health and safety policies to be adopted together with methods for monitoring Health and Safety Performance, identified the principal health and safety hazards that may be encountered during construction together with precautions where appropriate, requires work to be carried out to recognised standards and in accordance with published guidelines as specified in the plan.

Lead consultant

The consultant member of the design team appointed by the client to act as the lead consultant for the scheme described in the memorandum of agreement.

Management Control Plan

The overall programme and plan of work for the execution and commissioning of a scheme. The plan must take account of Scottish Capital Investment Manual activities and a scheme's requirements in terms of resources and timing. It will normally be expressed in a diagrammatic form (network or bar chart) and will be updated regularly to reflect progress made.

Management staff categories

For the purpose of time charge rates, the definitions of the project management staff grades listed in Article 6.7b of the Memorandum of Agreement are:

*Senior professional*: a person who has held corporate membership of a professional body recognised by the NHSiS body for a period of at least five years.

*Professional*: a person who has held corporate membership of a professional body recognised by the NHSiS body.

*Senior technician*: a person not holding corporate membership of a professional body with ten years or more relevant work experience.

*Technician*: a person not holding corporate membership of a professional body with less than ten years relevant work experience.

Material(s) - (in relation to copyright)

Any document, item, material or the work produced for the purpose of the scheme or in connection with the scheme by the consultant, any of its employees or any third party engaged by the consultant or working under the direction or supervision of the consultant.

NHSiS Body

This includes Scottish NHS Trusts, Health Board and any other centrally funded bodies.

On-costs

Capital costs arising from the interaction between the functional departmental units and the total building and site complex (for example the cost of communications between departments, external works and services, additional energy saving measures, auxiliary buildings and abnormals).

Operating manuals

Sets of documentation which shall include the operating instructions, servicing and maintenance instructions, spare parts lists and test reports dealing with the building and engineering systems provided under the commission. The manuals shall cover in an orderly fashion each item of equipment and each system in the works.

Outline business case submission

A document whose objective is to demonstrate the viability of the project (this includes investigation and evaluation of strategic planning, service planning and capital planning) and obtain initial approval to funding of the preferred option, subject to confirmation of viability in the full business case submission. The preparation of the outline business case submission involves a systematic analysis of the relative advantages and disadvantages of alternative options in meeting specific health objectives. Both monetary and non-monetary consequences are considered.

Outline plans

Drawings prepared by the architect/building surveyor to a scale of not less than 1:100 of the layouts of the departments for the purposes of consultation with external local interests, other consultants and the client.

Participant

A person, partnership, company or firm involved in the scheme and making a contribution to its completion, operation or occupation.

Planning supervisor

The firm, professional discipline or individual name in clause 1.8 if the scheme particulars to perform the duties ascribed to the planning supervisor in the Construction (Design and Management) Regulations.

Post-contract changes (stage 4 onwards)

The alteration or modification of the design, quality or quantity of the work shown on the contract drawings and described by or referred to in the contract bills, priced documents or other production information for main and sub-tender; the addition, alteration or omission of any obligations or restrictions imposed by the client in the contract bills or priced documents.

Practical completion (certificate of)

Document certifying that a scheme or specified part of a scheme has in the opinion of the contract administrator/employer's agent achieved practical completion of the works in accordance with the contract, the date of this certificate marks the commencement of the defects liability period (maintenance period) and of the period of final measurement for the purposes of the final account.

Principal

Member of firm generally in overall charge of the policy and conduct of the firm's business who is able to commit the firm to undertake commissions.

Principal contractor

The contractor selected to be responsible under the provision of the Construction (Design and Management) Regulations for the maintenance, implementation and development of the health and safety plan during construction and co-ordinating the activities of all contractors and sub-contractor (including the self-employed) to ensure that they comply with the relevant health and safety legislation.

Production information

The co-ordinated drawings, specification/employer's requirements, schedules and bills of quantities or priced documents needed for tendering, co-ordination and construction of the building and its services.

Professional advisor

An individual or form appointed by the project director to provide advice on:

a) actions, decisions and approvals from the NHSiS body;

b) interpretation or reports and recommendations submitted by the project manager and advice on when, and what action is needed as a result;

c) the adequacy and contents of the project execution plan; and

d) internal NHSiS body matters affecting the project.

Project

The complete cycle of development work envisaged for an individual hospital or NHSiS site. A project may include a number of building schemes.

Project director

The individual, usually an employee of the client, who represents, and has the authority of the client in respect of the specific scheme. All instructions given by the project director are deemed to be given by the client. All advice given to the project director is deemed to have been given to the client. More detailed information is provided in the Scottish Capital Investment Manual; Project Organisation.

Project execution plan

A manual prepared by the project manager and agreed with the project sponsor, acting as a common control document for the scheme including, inter alia, the following subjects:

a) management and organisational structure;

b) identification of all participants;

c) summary of duties of all participants;

d) responsibilities of all participants;

e) delegated authority limits of all participants;

f) lines of communications;

g) administrative procedures;

h) client/project director approval/instruction procedures;

i) progress procedures;

j) reporting procedures and formats (including cost control and reporting);

k) financial procedures (including risk and sensitivity analysis, change and cost management procedures);

l) meetings structure;

m) quality assurance/control;

n) construction procedures;

o) technical and operational commissioning procedures;

p) post project evaluation procedures.

Post information manuals

Sets of documentation, which shall include all essential information about the construction of the building, together with all the necessary sources of information for its proper maintenance, for example, information regarding safety and fire integrity.

Project manager

The person, partnership, company or firm named in the memorandum of agreement and appointed by the client to act as the project manager for the scheme described in the memorandum of agreement.

Quantity surveyor

The person, partnership, company or firm appointed by the client to act as the quantity surveyor for the project/scheme described in the memorandum of agreement.

Record drawings

Drawings showing the building and service installation as erected at the date of practical completion.

Revenue/running costs

The annual operational costs element of the outline/full business case submission, for example, maintenance and staffing costs.

Scheme

All planning, design and construction work and commissioning activity necessary to bring planned facilities into use (including essential preliminary and enabling works) referred to in the memorandum of agreement.

Scottish Capital Investment Manual

The document published by the Scottish Executive Health Department in the version current at the date of this agreement. It comprises the following sections:

- Overview
- Project Organisation
- Business Case Guide
- Private Finance Guide
- Management of the Construction Project
- Commissioning a Health Care Facility
- IM & T Guidance
- Post-Project Evaluation

Services engineer

The person, partnership, company or firm appointed by the client to act as the services engineer for the scheme described in the memorandum of agreement.

Shop drawings

Drawings and documentation prepared by the contractor or sub-contractor or suppliers to supplement the production information for use in manufacturing of components or installation or on-site assemblies.

Site inspection staff

Staff resident on site on a full or part-time basis to inspect the progress and quality of the work and to determine that the works are being executed in accordance with the contract documents.

Stage payments

Payments made on completion of pre-determined stages of the work.

Structural engineer

The person, partnership company or firm appointed by the client to act as the structural engineer for the scheme described in the memorandum of agreement.

Structural engineering works

Those works for which the structural engineer is require to prepare calculations and generality give advice and otherwise perform professional duties.

Sub-contractor

Any person, partnership, company or firm under contract to the contractor to perform work and/or supply goods and/or services in connection with the scheme.

Sub-programme

Detail programme based on the constraints of the management control plan, relating to a particular stage or part of the scheme.

Tender documents

All the documents used to invite tenders for the execution of the works.

User panel

A group representing the end users of the scheme comprising representatives of the NHSiS body's finance department, medical staff and those responsible for operating the various ancillary services.

These representatives will be authorised to define their department's needs and to renew and to review and agree how those needs will be met whilst ensuring that the scheme remains financially viable. The user panel will communicate its requirements and decisions to the project manager through the project director.

Works

The construction works relative to the scheme.

A49342285

# 6.0 Memorandum of Agreement

This part comprises the Memorandum of Agreement between the NHS Greater Glasgow & Clyde and the Lead Consultant team.

Consultancy Service:

Lead Consultant and Technical Team services for the procurement of hospital facilites utilising public finance and a two stage Design & Build process.

Memorandum of Agreement

This agreement is made on the _____day of _____2008

between

NHS Greater Glasgow and Clyde

of

Dalian House, 350 St Vincent Street, Glasgow G3 8YZ (hereinafter called the 'Board') of the one part

and

(hereinafter called the lead consultant) of the other part

WHEREAS

the Board intends to proceed with (the 'scheme')

New South Glasgow Hospitals Project

and has appointed ……..to be their Lead Consultant and Technical Advisory Team to complete the project services and has requested the consultant and their team to perform professional duties in connection with the items stated in this Memorandum.

NOW IT IS HEREBY AGREED AS FOLLOWS:

6.1 The Board agrees to engage the Lead Consultant and the Lead Consultant agrees to perform the professional duties subject to and in accordance with Parts 2-6 including any specific requirements listed at clause 2.15 – 2.22 of the scheme particulars.

6.2 This Memorandum of Agreement, together with parts 2-6 of this agreement shall together constitute the agreement between the Board and the Lead Consultant.

6.3 The Lead Consultant will be the Technical Advisory Team Leader as further amplified in the Memorandum of Agreement.

## 6.4 Payment of duties

The Lead Consultant's duties shall be as set out in Schedule 1 of the Memorandum of Agreement and any additional services incorporated within the Lead Consultant's fee proposal, as agreed with the Project Director or his nominee at the date of appointment.

Payment of fees will be a set out in the following schedule.

Payment shall be based on the capped fee bids for each stage, with interim payments based thereon within each stage, to be agreed between the Project Director and the Lead Consultant prior to commencement.

There is no obligation for the Board to continue with the project beyond each key stage (this includes 1A and 1B as separate stages), and the consultant shall seek written authority from the Project Director or their nominee to proceed to Stage 1B duties, and all subsequent stages, before doing so.

Respondents must identify individuals who will work on each stage of the project and provide details of their experience with associated CV's. Respondents must identify the hourly charge rate and estimated input hours of each individual. Respondents must also identify an hourly Time Charge for undertaking additional work at the request of the Project Director or their nominee.

Respondents must provide details of how they propose to self audit their time and resource input at each stage. The Board must be provided with accurate input of time with each and every invoice.

Respondents must confirm that work to be completed by a designated individual will not be delegated to anyone else without advanced discussion and agreement with the Project Director.

The fee bid for all stages must be inclusive of all travel, accommodation expenses, sub-commissions and reflect the output requirements and project timetable.

Respondents should assume all meetings will be held within the Glasgow city area.

If any work is undertaken without the prior knowledge and approval of the Project Director or their nominee, either within a commissioned stage of the project or as preparatory work for a subsequent stage, there will be no ability to seek to recover that cost on a quantum meruit basis should the project change or be aborted.

Capped fee bids for all stages of the project must be based on the outline programme in 2.7.

Respondents should note that project continuation is subject to successful completion of project milestones. Failure to meet project milestones could result in project cessation at any stage.

Fees will be paid on a staged basis but only on completion of complete packages of work as set out in the billing schedules 6.5 and 6.6.

All fees set out in this agreement are exclusive of Value Added Tax. VAT will be recovered at the current prevailing rate.

Fees for all stages should include inflationary uplift, no additional request for uplift at any stage will be considered while the project runs to programme. Please ensure the inflationary uplift for each stage is included and identified within your bid submission, the Board will not make calculations on behalf of bidders who supply % figures per annum, in short bids provided without % uplift incorporated will be void.

6.5 Apportionment of Fee Stages – Summary for Full Team

Please insert the total lump sum fees by stage, to include all normal project disbursements, out of pocket expenses, subsistence, photocopying, printing, support staff and office equipment required to undertake this commission. This table summarises the stage schedules in 6.7.

Please note - the schedules have been prepared to form a basis for the consultant's fee proposal, and include the key stages and some of the activities required to undertake this commission. The Consultant is required as part of this submission to list all activities they consider necessary for each stage to complete the commission and include the associated costs and resources required. Respondents may wish to tabulate their fee bid by an alternative method and the Board have no objection to this provided the base information is provided on a stage by stage basis.

| Stage | Description<br>Refer Schedule 6.12 for detail | Lump Sum Fees ex VAT.<br><br>(incl. expenses & inflation) |
|---|---|---|
| 1A | Preparation of Employers Requirements Documentation<br><br>Preparation of PQQ, OJEU, MOI and Employers Requirements documentation and full Stage 1B tender and contract information, PSC design development. | |
| 1B | Stage One Design & Bid Development<br><br>Issue of ER's design and bid development proposals, with 3 D&B consortia, including evaluation and short listing for next stage down selection (3-1). | |
| 2 | Stage Two Design & Bid Development<br><br>Design and bid development with a single D&B consortia based on open book process to design and tender all packages and agree commercial arrangements to conclude a GMP within the Board's cost budget. | |
| 3 | Stage Three – Construction Phase<br><br>Implementation and Construction with continued design development. | |
| 4 | Stage Four – Operational commissioning and equipping | |
| 5 | Stage Five – Post Project Evaluation and Defects. | |
| | Total £ | |

Bidders are asked to prepare separate fee responses for the following projects, although your bid will be evaluated as a composite offer. This reflects differing contract arrangements for the projects.

- New Adult and Children's Hospitals.
- New Laboratory Project.

6.6 Apportionment of Fee Stages – Frequency of Payment of Staged Fees

Please insert the frequency of payment of the lump sum fee for each stage, this could be, for example, single payment at end of stage, or 6 interim equal payments at two month intervals.

| Stage | Description<br><br>Refer Schedule 6.12 for detail. | Frequency and Value of Payments |
|---|---|---|
| 1A | Preparation of Employers Requirements Documentation<br><br>Preparation of PQQ, OJEU, MOI and Employers Requirements documentation and full Stage 1B tender and contract information, PSC design development. | |
| 1B | Stage One Design & Bid Development<br><br>Issue of ER's design and bid development process, with 3 D&B consortia, including evaluation and short listing for next stage down selection (3-1). | |
| 2 | Stage Two Design & Bid Development<br><br>Design and bid development with a single D&B consortia based on open book process to design and tender all packages and agree commercial arrangements to conclude a GMP within the Board's cost budget. | |
| 3 | Stage Three – Construction Phase<br><br>Implementation and Construction with continued design development. | |
| 4 | Stage Four – Operational commissioning and equipping | |
| 5 | Stage Five – Post Project Evaluation and Defects. | |
| | Total £ | |

6.7 LUMP SUM FEE SCHEDULE

Also read in conjunction with Section 1.6

Stage 1A - Preparation of Employers Requirements Documentation

Preparation of PQQ, OJEU, MOI and Employers Requirements documentation and full Stage 1B tender and contract information, PSC design development.

For list of key activities refer schedules in section 6.12, note you must complete the following page listing the key activities and inputs for this stage for the whole of your team. This information maybe supplied in a different format if desired, but requires to be part of your submission.

6.8 Time charge rates.

For those duties where fees are payable on a time charge basis, the rates referred to in clause 4.5 of the agreement shall be:

| | | |
|---|---|---|
| a. | principal (clause 4.5a): | £_____per hour |
| b. | professional and technical staff (clause 4.6): | |
| | senior professional | £_____per hour |
| | professional | £_____per hour |
| | senior technician | £_____per hour |
| | technician | £_____per hour |

Note: every category of the above as entered by the Board, is to be completed by the consultant.

Teams are asked regularise the hourly rates for each grade of staff, and ensure that all staff included within your fee proposal are allocated a appropriate grade as noted above and that this information is included within the team submission.

6.9 Travelling, subsistence and other expenses

Travelling, subsistence and other expenses referred to in part 3 of this agreement shall be deemed to be included in the capped fees.

Attendance at meetings required by the client specified in clause 2.18 shall be deemed to be included in the capped fee.

6.10 Site accommodation and equipment

The Lead Consultant team will have access to Health Board accommodation at Hillington in Glasgow. Site accommodation will be available to the Lead Consultant team throughout the duration of the works on site. All members of the Lead Consultants team will be responsible for the provision of their own protective clothing for site visits.

6.11 Accounts and interim payments

The intervals at which accounts shall be submitted and interim payments made in accordance with Schedule 6.6 reckoned from the commencement of the consultant's appointment.

6.12 SCHEDULE ONE – MEMORANDUM OF AGREEMENT
LEAD CONSULTANT TECHNICAL ADVISORY TEAM – SCOPE OF SERVICES

The requirements of this section should be used as a basis of your team response and should be amplified and extended within your ITT tender response. The Lead Consultant / Technical Advisory team will provide guidance, advice and active input to the Board in the following key area's throughout the duration of the commission, the Lead Consultant team will be expected to manage and direct the process on behalf of the Board. The Team will be responsible for the procurement of;

- The New Adult and Children's Hospital Project – two stage D&B process.
- The New Laboratory Project – single stage D&B process.

The Board require the following consultancy services as a minimum;

- Lead Consultant / Project Manager
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Procurement and Construction Management advice.
- Landscape Architect.
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

Note: the process described in this section envisages a two stage process, with down selection 3-1 at the end of Stage 1B. If the review of procurement strategy determines a 3-2-1 process, with 2 bidders fully participating in Stage 2, then Board reserve the right to negotiate the lump sum fees with the Lead Consultant team.

General Duties of the Team

- Attend relevant meetings of Project Executive & Project Team and support the Board as required. Refer Section 2.18.
- Remain up to date and responsive to changes in legislation or guidance on all matters relative to the project.
- Be responsive to demands for input at short notice.
- Advise the Board on general issues of on-going advice on government policy; compliance with SCIM, SEHD, DoH, OGC and Treasury procedures; compliance with Local Council planning procedures. Compliance with legislation and NHS Design Guidance.
- Ensure that advice is consistent with SEHD, DoH, NEC, SOPC4 standard form contract and Treasury Taskforce model contract templates.
- Work closely with other advisors, legal, financial, planning, transportation etc.
- Assist the Board with developing strategies for FM & lifecycle improvements and monitoring on a 1) non PPP contract, 2) installation of Group 2, 3 and 4 equipment, and 3) existing, retained estate and its linkage to the new build projects.
- Participate in SGHD review at various stages throughout the life of the project, teams should anticipate to be involved in:
  PUK – 3 reviews
  Gateway – 4 reviews
  Architecture+Design Scotland – 2 reviews
- Team to familiarise themselves with all existing site data, all project related design and technical data developed during PSC / OBC stage.

- All technical data related to Board funded enabling works which will be underway during period 2008 -2010. Note the Lead Consultant team will not be delivering these projects, but need to be aware of them for any impact on NSGH projects.

As stated earlier in the document, the Board wish to procure the new Laboratory project as part of this commission, although as a separate contract, and by a single stage D&B process. As there will be a good deal of repetition in some of the process and information developed by the team for both this and the bigger project only the two stage process has been developed in detail in the following pages. Bidders are asked to amplify their methodology and provide a clear fee and team structure for both projects as listed below;

- A bid for the New Adult and Children's Hospital Project – two stage D&B process.
- A bid for the New Laboratory Project – single stage D&B process.

Both bids should be based on the general information in earlier sections on scope, timetable and budget cost. For evaluation purposes the two financial fee bids will be added together and taken as a composite fee bid.

The Lead Consultant team will be responsible for the following tasks and deliverables, this list is seen as a minimum, and you are asked to supplemented this in your ITT tender response to reflect your proposal to manage the complete the procurement process for the new hospitals project.

## Key Team Activities and Tasks for Stage 1A - Preparation of Employers Requirements Documentation

Preparation of OJEU, PQQ, MOI for D&B consortia; Employers Requirements documentation and full Stage 1B tender and contract information. Design development of site masterplan and OBC/PSC design exemplar.

1) Manage the compilation and publication of a comprehensive set of Employers Requirements documents for the approval of the Project Director. The contents should include as a minimum the items list below, and the bulk of the work will be undertaken by your team.

- Board's ASR Strategy and clinical strategy.
- Whole SGH site development brief.
- Functional content and schedules of accommodation.
- Whole hospital; clinical and non clinical output specifications.
- ADB room data information. ( provide 4 page ADB information for each individual room type).
- Sustainability and low carbon strategy.
- PSC design and other spatial planning drawings at 1:500 @ 1:200 ( further developed by your team).
- Project specification – Architectural/ building; Building Services, energy saving / lifecycle / cost in use; structural & civils; externals works/landscaping; other performance parameters;
- Construction and site procedures.
- Requirements for post contract design development.
- Details of commissioning process and requirements for handover, training, H&S file.
- CDM & Health & safety requirements.
- Board's general design requirements/ design action plan.
- Board's PSC Design Solution – as updated by your team Oct-Jan 2009.
- Cost information – amended and updated from OBC by your team.
- Design and Tender Evaluation - The process, criteria and scoring.
- Details of D&B response requirements for Stage 1 and 2.

### General Tender Information

- Project execution plan.
- Contract conditions and terms.
- Project programme and other works inter dependencies.
- Suggested forms for bonds, warranties, guarantees and other legals.
- Site survey and site investigation reports.
- Preliminaries requirements and pricing structure for Stage 1B bid response by D&B consortia.

A49342285

- Stage 1 Design Report – updated by your team to provide exemplar design info for bidders.
- Cost plan prior to tender.
- Copies of statutory approvals secured by Board.
- Health & Safety Plan and questionnaire.
- Pricing schedules for pre-construction services.
- Pricing schedules for profit, overheads.
- Board's FM requirements.
- Board's lifecycle requirements.
- Project insurance arrangements.

2) Develop and manage a process through OJEU to advertise the project (in association with the Board's legal adviser), and then to evaluate and shortlist interested D&B consortia, to include preparation of a PQQ and Information Memorandum. Provide advice and guidance to the Board on all aspects of this process including timetable. The Board hope to engage a maximum of 3 D&B teams in this process. Assist the Board's Project Team with responses to request for further information during pre-qualification process.

3) Prepare full design and financial evaluation process for the Stage One Bid process.

4) Prepare and submit a review of the contract options to develop the Stage 2 bid process on an open book basis with a single D&B consortia, to include recommendation on contract form and process. This will be for approval by the Project Director, and included within the Stage 1 bid documentation.

5) Review the PSC Cost Plan and associated OBC cost information prepared by others. Update plan to format your team are comfortable working with, but general format to remain same. Continuously update cost plan for the Board throughout this and successive stages. Submit for approval by the Project Director.

6) Develop the Board's existing risk register for the project and assist the Board to review and update on a monthly basis throughout the full project. Manage cost allocated against risk in respect of the project cost plan. Submit for approval by the Project Director.

7) Develop a project Master Programme for the duration of your commission (Sept 2008 – Dec 2015), which may require short term sub programmes to be developed for individual stages. Submit for approval by the Project Director or their nominee.

8) Development of the Board's OBC/PSC design exemplar to produce a workable site masterplan at 1:500 for the campus in light of the retention of some of the hospitals existing building stock. This will also involve the reworking of the floor plans for each level at 1:500, and studies of typical ward layouts at 1:200. This will involve periodic interaction with Glasgow City Council and A+DS to reach agreement on a revised site masterplan, and also provide workable design exemplar for the Employer's requirements package.

9) In conjunction with the Laboratory Project team/users group, develop a project brief, schedules of accommodation and prepare 1:500 departmental relationship drawings for the new build Laboratory Block. In conjunction with this team and the Project Team for the Adult and Children's Hospitals further develop proposals for FM service yard / Energy Centre and agree a structured layout for the site planning of this part of the site. Take account of the block plan design and linkage to main hospital block. Review new build schedules of accommodation for the Laboratory Project as they develop to ensure that space is optimally used and tested to optimise value for money.

10) Develop a process to manage the Stage One design and bid development process and interaction between the Board and the three D&B consortia to ensure that adequate knowledge flows between the parties to ensure

11) Assist the Board's Project Manager's for the Adult Acute Hospital and New Children's Hospital to develop and provide for the Stage 1 tender package a full clinical briefing pack which will involve user group meetings to review and sign off operational policy and clinical output specifications.

12) Develop ADB room data sheets for key rooms within all departments to be included in Stage 1 bid documentation, reduce number where repetition but all major room types with variations to be developed during this stage. Allow for review with users and update prior to issue with bid documents. ADB format to be used.
13) Attend project launch day, and prepare suitable presentation material, assist with presentations

14) In conjunction with NHS Project Team and Planning Adviser, continue dialogue with Glasgow City Council, Architecture+Design Scotland and public/private utility bodies to conclude discussion on site wide issues, and conclusion on any outstanding matters on the master plan process.

15) Lead and manage dialogue with providers for power and gas service supplies and establish main supplies for the new facilities and site wide for maintenance of existing estate.

16) Develop and cost a technical solution for a roof top helipad to be included within the ER's for the new Adult and Children's Hospital, directly linked to the A&E trauma reception of both hospitals.

17) At the conclusion of Stage 1A, prepare a progress report by Lead Consultant team, to include a full review of Stage 1A, the progress with exemplar design, tender process, project budget and cost plan, timetable and confirm readiness to proceed to tender. Await approval from Project Director to proceed to next stage.

Key Team Activities and Tasks for Stage 1B – Stage One Design and Bid Development and Evaluation, selection of a preferred bidder D&B team.

1) Produce, print, package and issue Employer's Requirements tender documentation to selected D&B consortia – max 3. During this stage further develop any tender documentation and information for this or next stage that maybe outstanding. Note much of this information will be developed in conjunction with the Board's Project Team and user groups and ongoing development and detail of the project requirements.

2) Generally maintain and update project management documents, schedules, cost plan and programmes to take account of progress and change as project evolves through stage.

3) Manage the interface between the three D&B Consortia and the Board. The process developed by you in Stage 1A should provide a mechanism where by the bid teams can have access to the Board's user groups at intervals throughout the Stage 1 bid development phase to inform design development. This process will require to be carefully managed.

4) Manage all requests for information from the bid consortia during the tender process and provide responses timeously.

5) Attend bidders meetings and presentations throughout stage.

6) Manage the receipt of Stage 1 bids from three D&B Consortia, and commence and manage the full process to evaluate the bids with full involvement of the Board's Project Team and the eventual involvement of user groups perhaps by way of open day presentations by each D&B bid team. Below is a suggested content of a Stage 1 bid response;

- Details of contractor's team and structure.
- Relevant experience & reference sites.
- Key personnel and management structure.
- Legal framework for team, parent company.
- Company financial and commercial information.
- Response to PSC design, high level proposals.
  - 1:500 phased site plans for duration of works.
  - 1:500 floor plans all levels, 5@ 1:200 floor plans.
- 3-D visualization of design intent.

- Healthcare planning solution.
- Typical specification for building and engineering aspects.
- Approach to building design proposals.
- Commentary on buildability.
- Detailed review and commentary of project cost plan.
- Project risk assessment and management.
- Contractors proposals on quality and lifecycle costs.
- Detailed method statement for delivery of the project.
- Design and procurement timetable.
- Construction timetable.
- Contract management proposals.
- Manpower and resourcing proposals.
- Proposals for low carbon design and sustainable issues.
- Proposals for building commissioning and handover.
- Preliminaries, overheads and profit costs for project
- Priced schedules for any advanced works, and pre-construction services at next stage.
- Fixed % for mark-up on provisional sums for trade works.
- Cost plan at Stage 1.
- Pricing matrix for Stage 1, needs more thought on scoring on cost.
- Contractor's draft tendering protocol.

7) On completion of the evaluation of bids, prepare a full report giving the Project Director a recommendation based on (exact criteria will be confirmed later) value for money, design solution / functionality, healthcare design and technical specifications and systems and all financial and commercial aspects. The report should also include any significant areas of deviation from the Employer's Requirements and compliance statement and detailed 'technical' and 'user' evaluations.

8) Present recommendations to the Project Director and subject to approval, the Executive Board.

9) End of Stage 1B prepare a progress report by Lead Consultant team, with recommendation for next stage, await approval from Project Director to proceed to next stage.

10) The successful conclusion of this stage will be the selection of a preferred bid team through an equitable process, to progress to the next stage of bid development on a 'open book' basis.

Key Team Activities and Tasks for Stage 2 – Stage 2 Design and Bid Development, package tender through to agreement of a Guaranteed Maximum Price, Full Business Case preparation and approval and contract sign off.

1) Complete and issue any further information in respect of the Employers Requirements.

2) Engage with preferred bidder and develop and agree a structured programme to allow the design and work packages to be fully developed for tender issue.

3) Fully manage the process of item 2) above on behalf of the Board, to include detailed negotiations.

4) Respond to D&B Consortia queries and attend briefing meetings with teams throughout Stage 2 bid development stage.

5) Support the Board in the 'user' evaluation of the design proposals as they develop, by developing approaches to enable users to fully understand the design, technical and clinical operational issues implicit in the preferred bidders design proposals.

6) Participate in SGHD stage review and any associated design and environmental review.

7) Participate in review and evaluation of all aspects of Stage 2 bid response, provide clarification as required on all design and technical matters. Prepare technical report on Stage 2 bid submission, including evaluation

process and giving recommendation to the Project Director and Executive Board. The report should also include any significant areas of deviation from the output specification and compliance statement and detailed 'technical' and 'user' evaluations.

8) Based on the format/content for Stage 2 tender response, developed by your team and included for information in the Stage 1 tender documents, secure a full Stage 2 tender submission from the D&B consortia. While the detail of this package will be complex we reproduce below a minimum requirement to assist you to prepare your bid. The bulk of this evaluation will be undertaken by your team, and the output included in a formal report to the Project Director.

Content

- By end of stage – full clinical sign off;
- Agreed functional content.
- Agreed and audited schedule of accommodation.
- Agreed audit of communication and circulation areas.
- Audit of scheme against infection control requirements.
- Audit of actual design versus brief.
- Whole site development control plans (incl. phasing).
- Site analysis of access and transport for design.
- 1:500 departmental relationship drawings and stacking diagrams.
- 1:200 department layout plans for all individual departments and wards.
- 1:200 elevations and sections.
- 1:50 typical room layouts (say 50 rooms in each facility).
- ADB Room data sheets for all departments.
- Equipment lists for all departments.
- Confirmation on all Group I & II equipment related costs.
- Typical construction details for envelope, floors, walls.
- Interior design proposals including sample boards.
- Landscape proposals.
- 3-D design and computer studies.
- Wayfinding strategy.
- Fire evacuation and safety strategy, full fire risk assessment – risk with D&B designer.
- Demonstrate low carbon design strategy.
- Flexibility of design to change.
- Demonstrate FM services have been incorporated into design.
- Integration of sustainable issues, waste management, recycling.
- Demonstrate lifecycle on materials and equipment.
- Schedules for all architectural, building, M&E engineering, C&S engineering and IT infrastructure proposals.
- Details of finishes, components, fixtures, fittings.
- Engineering strategy, specification, schematics and schedules.
- Design programme.
- Programme to secure detailed planning consent.
- Project management and quality management arrangements.
- Construction programme, methodology phasing etc.
- Contractor's overhead and profit percentages (as Stage 1).
- Agreement on LADS.
- Agreement on contract form and willingness to enter into contract.
- Project insurance.
- Finalised tendering protocol
- FBC forms.
- Secure detailed planning consent, prior to contract close.
- Final submission and review of contractor's proposals.
- Agree GMP and cashflow forecast.
- Detailed review of clinical functionality, space, accommodation schedules.
- Detailed review of project specification and quality, detailed review of lifecycle issues.
- Finalise all contract matters, insurance, bonds, warranties etc.
- Finalise and agree all sub contract packages and agree GMP.

- Finalise any enabling / service disconnections.
- Finalise site establishment and layout.
- Finalise FBC, clarify all outstanding contract issues in advance.
- Continue with design development and sign off within cost envelope.

Note: teams should make adequate allowance within their bid for the likely high frequency of meeting by various key team members in the run up to contract close.

9) Undertake and manage a full technical, financial and commercial review of the preferred bidders final tender submission, provide clarification as required on all technical matters, prepare a full report giving the Project Director a recommendation for approval or otherwise. The report should also include any significant areas of deviation from the Employer's Requirements and detailed 'technical' and 'user' evaluations. Await approval from Project Director to proceed to next stage.

Key Team Activities and Tasks for Stage 3 – Implementation and Construction, Design Development.

1) Manage the process to agree all outstanding design matters at contract close which may include the balance of 1:50 detailed layouts, room data sheets and drawings. Liaise with Clinicians and user groups as required to secure sign off.

2) Undertake the role of Employers Agent for the duration of the works contract and manage the interface between the Board and the D&B contractor.

Meetings – the following are an indication of frequency

- Monthly progress meetings on site.
- Monthly technical meetings.
- Frequent design development and package development meetings.
- Monthly cost control meetings with Board.
- Monthly cost control meetings with D&B contractor.
- Frequent design development meetings with Board user groups - room layouts.
- Monthly Project Executive meetings with Board.
- Monthly procurement and Finance Group meetings.
- Monthly Gp. II equipment meetings, as required.

3) On a monthly basis prepare and submit a Lead Consultants technical report on progress on site in respect of programme, cost / cost control, change control and design change / development and other relevant procurement related matters.

4) Actively manage the change and cost control process to ensure that the works remain within budget, advise the Project Director on the implications of change on programme, cost and quality parameters.

5) Manage and administer building contract and associated processes on behalf of the Board.

6) Visit the works on a weekly basis and ensure that the new facilities are being constructed in compliance with all the approved and agreed contract documentation, drawings, specifications, the ER's or CP's, whichever have been confirmed as the basis for the project at contract close.

7) Direct the work of the Site Inspectorate team for the duration of the works contract, incorporate key output from their weekly reports into the Lead Consultants monthly progress report as required.

8) In association with Board technical estates staff, manage the process on behalf of the Board to overview and sign off of the full technical commissioning of the building, building engineering plant and equipment and provide the Board with a full report and recommendation for the acceptance and handover of the building from the D&B contractor to the Board. (Note - due to the scale and technical complexity of the building and engineering services, the Board are receptive to the inclusion of some form of operational management of the facilities by the D&B contracting team for a period of 3-5 years. This will allow NHS staff to shadow and learn

operation and function of the buildings systems). This aspect will be further considered by the Board during Stage 1 A for inclusion in the Employer's requirements.

9) Inspect the project at practical completion, agree schedule of outstanding items/defects with D&B contractor, including remedial action. Monitor progress/quality of remedial works.

Key Activities and Tasks for Stage 4 – Equipping and Operational Commissioning

1) Participate as an active member of the Board's Commissioning Team to enable migration of staff from old to new facilities. This will involve equipment and logistics, migration plan, orientation of staff to new facilities and keeping staff up to date on progress on a regular basis. This input will be required from mid 2012 for the Children's Hospital through to Summer 2015 by which time most of the moves into the new builds will be complete.

2) Assist the Project Director to develop a fully structured Commissioning Plan for the operational commissioning and equipping of the following projects in chronological order;

- New Laboratory Project
- New Children's Hospital
- New Adult Acute Hospital

This work will involve the setting up of a range of groups by the Board, associated with the management, staffing and operation of the new facilities, groups will include;

- Building Commissioning
- Service Migration
- Clinical Transition
- Clinical Systems/IT
- Equipment Procurement
- Communications
- Human Resources
- Community Engagement
- Operational Management

Bidders should assume that they will develop the process and populate a number of the teams but that the Board will project manage the commissioning process with Board staff.

Key Activities and Tasks for Stage 5 – Post Project Evaluation and 12 Months Defects Period

1) Participate in the preparation of PPE documentation for the project, in accordance with the NHS Scottish Capital Investment Manual. This will commence post operational opening of facilities and will be undertaken over a period of 2-3 months, likely to complete circa 9 months after opening.

2) Participate in 12 months defects inspection on behalf of the Board, prepare comprehensive lists and participate in any associated negotiations to conclude. Include an allowance you consider appropriate for this function and an assessment of hours based on date for final inspection.

LEAD CONSULTANT / PROJECT MANAGER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Project Manager's role:-

- Manage the work and output of your team, and act as main point of contact reporting direct to the Board's Project Director or nominee.
- Represent Technical Advisory team at all key meetings (e.g Local Council, NHS, legal, contractor), or as delegated by prior agreement with the Board's Project Director or nominee.
- Development and management of project plan/programme, with regular review and update as required.
- Prepare a full project Execution Plan for the project early in Stage 1A for Project Director approval.
- Develop and manage risk register from start of Stage 1A to completion of works.
- Co-ordinate interface with operational hospital staff, and adjacent works projects as required.
- Resource management of Lead Consultant team through all stages of the project, to ensure proper delivery of service to the Board.
- In discussion with the Boards Project Director, develop lists of key project activities, programme and actively manage each stage of project delivery, advising PD on corrective action as required.
- Prepare monthly progress reports on Lead Consultant team activity, project procurement and works activity, for the Project Director, to be circulated 5 workings days in advance of TA monthly Project Team meetings.
- At the end of each stage, prepare a technical progress report for approval by the Project Director, with recommendations on actions to proceed to next stage, to include comment on timetable, costs, site, estates, facilities, build and construction, planning and design, risk and value management, compliance of contractor's proposals, technical evaluations, site infrastructure, town planning and progress with negotiations prior to contract sign.
- Fully lead, manage and develop works contract change and cost control procedures for approval by the Project Director or his nominee.
- Meet regularly with Project Director to review progress, timetable, costs, design and bid development.
- Lead the preparation and structuring of all key documents for the D&B process to provide a 'designed' published output e.g. it looks like a single document.
- Manage the technical review of D&B bidder proposals during the procurement process for Stage 1 and Stage 2 final bid at Contract Close.
- Carry out and deliver the duties of Employers Agent throughout the construction phase, manage interface with D&B contractor, manage and administer contract and associated processes.
- Collaboratively work with the Board's existing consultant's and other associated organisations such as The Carbon Trust.
- Provide full shadow design team service throughout the duration of the works contract.
- Provide procurement and construction management advice on behalf of the TA team.

ARCHITECT / SITE MASTERPLANNER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Architects role:-

- Take lead on all matters relative to architectural, building and site master planning, interior design, room layouts, fire engineering, fire escape and fire safety, fabric, components and their life-cycle, phasing and construction.
- Redraw the existing 1:500 departmental relationship drawings.
- Update PSC design through to FBC as required. Initially integrate Client changes to departmental layouts and adapt the1:500 departmental relationship diagrams.
- Develop a full set of exemplar design drawings for inclusion in the Employer's requirements documentation.

- Develop alternative options for 28 Bed Ward layouts (100% single rooms), layouts to reflect height of building, means of escape and fire compartmentation and escape issues. This work will parallel the development of the brief and Employer's Requirements documentation as part of Stage 1A.
- Review and adapt the current Development Control Plan to incorporate current proposals to retain additional existing buildings post completion of the new builds in 2014.
- Assist the Board with any design related discussion with Architecture and Design Scotland relative to the PSC design and the designs developed by D&B consortia.
- Lead the preparation and submission to Glasgow City Council of a Site Masterplan document in conjunction with the Board's Town Planning Advisor.
- Actively participate in room layout development and sign off process.
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages. Note the Board intend developing a palette of standardised room layouts for as many repeat rooms as possible to reduce the workload at the early stage.
- Manage and lead the AEDET review and any related architectural design led review processes as required at relevant stages.
- Participate and assist with the development of ADB room data sheets for Employer's Requirements document. This is a team responsibility which will be led and managed by the Healthcare Planner.
- Develop a full Building specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, take team lead with any discussions with Architecture + Design Scotland.
- Review design proposals developed at OBC/PSC stage, allow for personalisation as and if required.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Provide full shadow design team architectural and building service throughout the duration of the works contract.
- In conjunction with Board, manage activities of Board appointed Clerks of Works during construction phase.
- Provide monthly reports on compliance of project with Employer's Requirements.
- Input to the Lead Consultant's monthly reports to the Project Director on architectural design, healthcare design and building related matters.

HEALTHCARE PLANNER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Healthcare Planners role:-

- Take lead on all matters relative to clinical design, clinical output specifications, operational policies, functional content, schedules of accommodation, within Technical Advisory team.
- Review the schedules of accommodation prepared as part of OBC stage, and comment as required. Assist Board to further develop key areas of their current design through briefing stage and through to completion of Employer's Requirements and updated Departmental Relationship drawings and Site Development Control Plan in conjunction with the Architect.
- Lead in development, preparation and review of ADB room data sheets for Employer's Requirements/Tender documentation, to include 1 iteration with user groups. This will assist with the preparation of equipment lists for the Board's internal use. It is the intention to provide RDS/ADB information for all key rooms on basis of standardising rooms to avoid a prolonged exercise.
- Lead on behalf of the TA team and assist the Project Managers for the Adult and Children's Hospitals with the development of Clinical Output Specs / Operational Policies for all departments within the new facilities, working closely with NHS staff to agree and sign off a standard reference document for the Employer's Requirements briefing process and documents. In other words ensure full briefing packs are prepared for all departments to a suitable level for the project.

- Actively participate in design development process between user groups and bidder design teams through the various stages of tender through to contract close.
- Lead in clinical and healthcare planning design reviews from bidders and evaluation meetings at each stage of the process.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for FBC submission by the Board.
- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical reports at the end of each stage, to include aspects on healthcare planning and design, good practice, compliance with National healthcare quality, infection control and design standards.
- Provide full shadow design team 'due diligence' service on healthcare planning and design matters throughout the duration of the works contract.

BUILDING SERVICES ENGINEER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Building Services Engineer's role:-

- Take lead on all matters relative to mechanical and electrical engineering services, energy and environmental matters, renewables, carbon neutral design, integration with existing hospital and other main utility services.
- Establish and lead discussions with main utility providers for gas electricity and water
- Assist with the Design Development process and input to the ADB room data and room layout processes by the supply of building engineering information for the sheets to focus on environmental conditions, air changes, room temperatures, humidity any specialist filtration, negative or positive pressure systems. Also review and advise on M&E equipment, including the location of M&E apparatus such as light and power switches, light fitments, air handling grillage, appropriate types of heating systems, powered medical equipment, telecoms and IT.
- Fully participate in the design development/briefing Stages 1&2, assist the Board to prepare a comprehensive Employers Requirements document which fully reflects the Board's desire to reduce lifecycle / running costs by providing high quality specification for/and equipment at outset.
- Provide advice and guidance on the integration of large scale Group II equipment such as specialist imaging, PACS, MRI, CT and any special shielding requirements. Ensure all relevant standards are met.
- Review bidders proposals at all stages for compliance with tender requirements, participate in the production of technical reports at the end of each stage, to include aspects on building services.
- Required to be based in the Board's Project Office at critical stages of project to be determined by the Board.
- Ensure environmental and sustainable design concepts and practices are incorporated into the Boards Employer's Requirements specification and are demonstrated by bidders in their responses through to contract close.
- Provide advice to the Board, to include visits to reference sites to review integrated building management systems suitable to run facilities of this size on a daily basis, linkage with CDM advisor for linkage to as built info and building systems.
- Provide full shadow design team service throughout the duration of the works contract.
- Fully participate in the technical commissioning of the new facilities in conjunction with Board estates staff and the contractor.

COST CONSULTANT / QUANTITY SURVEYOR – KEY ROLE AND RESPONSIBILITIES

Key aspects of Cost Consultants role:-

- Provide advice on building and life cycle costs throughout briefing and development of Employer's requirements through to completion of works, and update as required, assist with negotiations with contractors on cost and contract matters.
- Review and fully update the OBC/PSC stage DCAG cost plan and provide the Project Director with a new format to suit you working practice, to take forward for the project. The coast plan was last updated to Dec 2007 cost base, the £842m budget ceiling is inflated to mid build as follows

New Children's Hospital – 3rd qtr 2011.
New Adult Acute Hospital – 2nd qtr 2012.

- Review contractors proposals at all stages and benchmark against PSC capital cost plan.
- Continually update Project Cost plan.
- In association with the Lead Consultant, develop a robust cost control and change management processes for approval by the Project Director, establish regular monitoring and reporting process throughout the life of the project. Reports will be required for the Procurement and Finance Group on a monthly basis at all stages of the project.
- Review bidders programme for construction and any associated works at all stages.
- Provide detailed input on construction management aspects of bidders proposals at all stages.
- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical/cost reports at the end of each stage, to include aspects related to capital costs, lifecycle costs and general construction / build management and programme.
- Prepare and maintain a costed risk register for regular review by Project Director.
- Preparation of all cost information to assist with completion of FBC documentation.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- In conjunction with Lead Consultant, lead negotiations with bidders at all stages regarding all financial and commercial matters. Lead the detailed review and negotiations associated with the Stage II package tenders to secure final agreement on the cost plan within the Board's financial envelope.
- Detailed financial negotiations on costs with bidders at end of each key stage, concluding with negotiation and agreement of GMP pre contract sign.
- Provide risk and value management advice on behalf of the Lead Consultant team. Provide full shadow design team cost management service throughout the duration of the works contract, including monthly valuations and cost control and reporting.
- In conjunction with Board's project staff engage and agree final account with contractor.

CIVIL AND STRUCTURAL ENGINEER – KEY ROLE AND RESPONSIBILITIES

Key aspects of civil and structural engineer's role:-

- Take lead on all matters relative to structure, site external works, roads, main drainage, drainage and structural fabric connections to existing buildings and demolitions within Lead Consultant team.
- Assist with preparation of Employer's Requirements documentation in respect of Civil and structural engineering matters, during the bid process and evaluation at all stages.
- Develop PSC structural solution further, based on further SI work confirm cost plan requirements.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Manage a full site investigation and remediation project to clear the site of debris, review for ground contaminants, and manage the undertaking of a full site investigation of ground conditions across the whole development site to provide a full report for inclusion in the Employer's Requirements documentation and further inform the Board's cost plan. Note cost of surveys will be paid by Board direct to contractor. This work needs to be taken forward as soon as possible and results available for inclusion in the Employer's Requirements.
- The development site is covered with large piles of building debris, old trees, tyres, and concrete. The Board require a package of works to be developed following on from the site investigation results to clear the site. These works should minimise any potential costs for landfill tax, and post crush/grade stock pile materials for re-use for bottoming etc.
- The OBC / PSC design option incorporates a basement over much of the podium area, as well as a subterrainian link from the Energy Centre/Service Yard to the new builds. The cost plan includes for 900mm diameter CFA piles on a 7.5m grid, 22.5m long. The site conditions of alluvial soil over rock head some 16-27m below, and a high water table make this solution challenging, and de-watering maybe required during the ground works package. The Engineer will further review the situation

during preparation of the Employer's Requirements and undertake further flood / water table studies to inform design solution and cost plan allowance.

- Review bidders proposals at all stages for compliance with Employers Requirements/tender documents, participate in the production of technical reports at the end of each stage, to include all project related aspects of civil and structural engineering, site infrastructure and drainage.
- Provide full shadow design team inspection service throughout the duration of the works contract; manage the work of site based engineering staff employed separately by Board.

FACILITIES MANAGEMENT DESIGN ADVICE

Key aspects of this role:-

- The Board require the Lead Consultant team to provide an individual to give detailed input on aspects relative to Hard FM and perhaps Soft FM services throughout the Employers Requirements stage, through to detailed negotiations with bidders. This will be in conjunction with the Board's Facilities Department.
- The adviser will also be actively involved in preparation of specifications, for inclusion in the Employer's Requirements which will incorporate lifecycle and running cost/maintenance issues. In other words the Board wish to incorporate within their specification aspects which will drive down future running and operational costs, for example integration of robotics, lifecycle of materials and building systems and modularisation of construction.
- The Board also wish to investigate the option of including a period of operational maintenance for the new facilities within the bid, say 3-5 years, with incentivisation to provide a bedding in period for their staff , and also to assign the risk of problems with Building Systems to the builder.
- Meetings between Board staff and bidders at all stages.
- Evaluation of bids at all stages.
- Evaluation of buildings and compliance with Employer's Requirements.
- Active participation in building commissioning phase, providing advice on operational issues to the Project Director.

PLANNING SUPERVISOR – KEY ROLE AND RESPONSIBILITIES

Key aspects of the CDM Co-ordinator's role:-

- Take lead on all matters relative the CDM Regulations and Health & Safety matters generally within Technical Advisory team.
- Point of contact with HSE for Technical Advisory team.
- Assist with the preparation of a robust Employer's Requirements document and tender package in respect of CDM & H/S matters.
- Preparation of H&S pre tender plan.
- Manage all aspects of CDM in partnership with Board. Regularly liase with Board H&S staff based at the Southern General site, ensure any operational matters / interfaces are raised and satisfactorily dealt with.
- Fully advise the Board on their duties and responsibilities in respect CDM Regulations.
- Ensure full H&S file and related submissions made at conclusion of contract works.
- In conjunction with M&E Engineer, give advice on suitable building management system for estates data to run and manage a building of this size and complexity in daily use by estates staff once complete and operational.
- Provide full site related service during contract works, providing monthly reports on site management operation and safety issues as part of team.

LANDSCAPE ARCHITECT

Key aspects of Landscape Architects role:-

- Take lead on all matters relative to landscape architecture, external environment and external works.
- Prepare landscape specification and design for revised site masterplan to be developed as part of Stage 1A, assist Architect with development, and discussions with Glasgow City Council on Masterplan.
- In respect of OutlinePlanning Condition 3, the Board are required to prepare a landscape and visual impact assessment for the site ( Based on Landscape Inst. Guidelines 2002), to feed into work to develop and agree a revised masterplan. This task will probably take 3-4 months to complete, you are asked to detail in your response you view on scope and content.
- Assist with adaptation of the current Development Control Plan to incorporate current proposals to retain additional existing buildings post completion of the new builds in 2014. (eg Adapt Option 1 to Option 1A, see site plans in Appendix G).
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages.
- Participate in the AEDET review and any related design led review processes as required at relevant stages.
- Develop a full landscape and external works (not roads) specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, participate in discussions with Architecture + Design Scotland.
- Review design proposals developed at all stages.
- Provide full shadow design team service throughout the duration of the works contract, including inspection of the works onsite for compliance.
- Input monthly reports on compliance of project with Employer's Requirements on landscape and externals matters.

APPENDIX A

PROJECT MANAGEMENT REPORTING STRUCTURES

A49342285

ASR PROGRAMME BOARD

Role and Remit

The ASR Programme Board (ASRPB) is responsible for overseeing the delivery of the Acute Services Review. This includes the planning and implementation of the individual elements identified as necessary to achieve the strategic change and also the quantification of outcomes to ensure they are in line with the agreed aims and objectives of the Acute Services Strategy.

The ASRPB will ensure that all activities are in line with agreed principles and timescales. The ASRPB will receive updates regarding all aspects of planning and implementation of the Acute Services Review.

The ASRPB will ensure that the strategic direction is reviewed and confirmed as still appropriate.

The ASRPB will consider the wider implications of implementing the Acute Services Review including: the impact on local communities; providing direction and advice on liaising and working with the many interested parties, maximising local benefit through advocating good community planning processes are adhered to and ensuring that political sensitivities are managed appropriately.

The ASRPB will ensure the necessary linkages between elements of the strategy are in place to allow delivery of the strategy.

The ASRPB will ensure overall financial control is being managed and is kept within the parameters of the Board's expenditure.

The ASRPB will approve and monitor the appropriate governance is in place to ensure a successful outcome for each major element of the Acute Services Plan.

The ASRPB ensure that the performance of all aspects of planning and implementing the Acute Services Review is monitored and progressed at the appropriate level for a successful outcome.

The ASRPB will consider and approve specific aspects/proposals of the planning and implementation process to the agreed level of delegation.

NEW SOUTH GLASGOW HOSPITALS EXECUTIVE BOARD

Role and Remit

The New South Glasgow Executive Board (NSGEB) will ensure that all activities of the ASR Systems Redesign Group and Procurement & Finance Group (PFG) are co-ordinated and achieving the appropriate progress.

The NSGEB will have appropriate delegated authority to take forward necessary negotiations to ensure objectives are achieved, progress is maintained and business is concluded especially where time is critical to the ASR2 viability with respect to financial aspects and the implementation programme.

The NSGEB will report and advise the Acute Services Review Board (ASRPB) on all aspects of the implementation of ASR2.

The NSGEB will monitor all aspects of performance of the implementation of ASR2.

The NSGEB will provide change management control in that any change which impacts upon the project must be authorised by this Board before it can be implemented.

The NSGEPB will meet regularly (every 2 months) to assess programme progress. The NSGEPB will also meet as often as necessary when critical factors that may be detrimental to the progress of implementation of ASR2 require to be addressed.

## ASR SYSTEMS REDESIGN GROUP

### Role and Remit

The ASR Systems Redesign Group will oversee the impact of implementing the Acute Services Review (ASR) on the whole organisation and drive forward the service transformation programme which will include changes in activity, models of care and new ways of working.

As the project progresses the remit of this group will evolve from a strategic clinical redesign focus to a more operational focus. On this basis it is proposed that the chair will change to reflect the evolving remit. The ASR Systems Redesign Group will ensure that external and internal stakeholder involvement is at the heart of planned change and that a development plan for staff is fully supported and implemented to enable change to happen appropriately.

The ASR Systems Redesign Group will report to the New South Glasgow Hospital Executive Board and be accountable for ensuring a fully co-ordinated approach is adopted to completing the work to achieve the objectives of the ASR.

The ASR Systems Redesign Group will approve and commission all aspects of clinical/service redesign in order to provide assurance to the ASRPB that the programme of transformation and change is on target and achieving agreed objectives.

The ASR Systems Redesign Group will monitor the stakeholder management plan to assure it interfaces with the following organisations and manages these links appropriately.

- Scottish Government
- MP's/MSP's (Local politicians)
- City Council Members and Offices
- Town Planning/Heritage Groups/Architect and Design Scotland
- Neighbourhood Groups
- Patient Groups
- Local/National media, safety and sustainability

The ASR Systems Redesign Group will approve or make recommendations to ASRPB all aspects of;

- Clinical Output Specs
- User Interface
- Bid Evaluation – (Service Based)
- Assure clinical functionality, safety and sustainability

## PROCUREMENT AND FINANCE GROUP

The Procurement & Finance Group (PFG) will be responsible to New South Glasgow Hospitals Executive Board.

### Role and Remit

The following describes the group's remit in respect of a) the procurement aspects and b) financial aspects.

#### a) Procurement aspects

The PFG is accountable for the planning and delivery of all procurement measures required to deliver the identified investment and services that fall within the scope of the whole project.

The PFG will ensure the following are completed to the satisfaction of the Acute Services Review Project Board (ASRPB):-

- Procurement Plan and timetable
- Procurement Administration
- Bid evaluation process and administration
- Procurement budget control
- Issues, risks, dependency logs administration
- Change control administration

The PFG will take forward and complete all aspects of:

- Negotiating commercial issue
- Draft Contracts/Final Contracts
- Report on issues affecting affordability to the Investment Board
- Examine financing proposals and make recommendations to the ASRPB.
- Bid evaluation
- Monitor funding competition
- Develop and report Value for Money (VfM) proposals.

The PFG will be responsible for attending to all technical requirements and issues which arise during the full procurement programme and hence oversee and approve the:

- Technical Output Specs
- Bid Evaluation Process
- Test technical viability of solutions
- All planning issues
- All changes to contract/design/specification

The PFG will oversee all aspects of commissioning and agree main programme interface with equipment installations.

The PFG will have specific NHS Board delegated authority to conduct and conclude negotiations at time critical and project critical moments of the procurement process.

b) Financial aspects

The PFG will oversee the whole investment programme associated with the implementation of ASR and will be responsible for the planning and completion of the procurement programmes including:

- New Adult and Children's Hospital complex
- Medical and Non-Medical Equipment
- IT Equipment
- All enabling schemes
- All advisor procurements (financial, legal & technical).

It will also be responsible for ensuring that critical expenditure forecasting for the project is in line with agreed income levels supporting the roll-out of the project and this will include:

- Approval, monitoring and reporting savings plans required to fund the project
- Income forecasting
- Financial risk management assessments
- Capital cost control approval, monitoring and reporting
- Incorporation of any new service developments are matched with income sources

The PFG will advise the Acute Services Review Project Board (ASRPB) on all major financial aspects of the project ensuring that any financial concerns are raised immediately.

The PFG will consider and approve all aspects of achieving Value for Money (VfM).

The PFG will ensure all Standing Financial Instructions (SFI's) are adhered to and that all financial transactions are enacted within the appropriate financial convention of accepted practice.

The PFG will monitor financial model and affordability and examine financing proposals to advise and make recommendations to ASRPB

SITE PROGRAMME CO-ORDINATING GROUP

The role of the Site Programme Co-ordinating Group (SPCG) will be to ensure that all construction projects on the Southern General Hospital Site are planned, developed and constructed in a co-ordinated matter to ensure that all potential impacts and risks that may occur in delivering a multi construction project environment are appropriately managed. The SPCG will report to the Procurement & Finance Group.

The SPCG will ensure that:-

- There is an overall site development plan which identifies every aspect of change being planned for the Southern General Hospital Site.

- There is an agreed critical path which identifies the key actions necessary to be taken to ensure all construction takes place in accordance with the agreed programming and the appropriate level of Health & Safety, cost, time and quality are delivered at all times.

- There is a Project Steering Group managing all individual projects on the Southern General Site and an accountable officer identified to deliver the project and take account of all other projects on the site.

- Priority is given to those aspects of the site development which will provide the least overall risk (including:- Health & Safety, cost, time and service implications).

- The SPCG will sign off all planned activity to ensure the agreed critical path for site development can be met taking account of:

    - Current clinical services requirements
    - Health & Safety
    - Cost
    - Time
    - Overall programme requirement

PROJECT TEAM

The Project Team are responsible for managing the planning and delivery of all aspects of the project up to Full Business Case and the following construction and commissioning process.

NEW ADULT HOSPITAL

ACH and New South Glasgow Hospital Directors Group (Subject to Consultation)
The Group membership will include the Acute Directors and senior clinicians and its key role will be to:

- Act as a focus in driving and overseeing the user input and signing off the outputs, e.g. patient models, design plans and equipment.
- Provide drive and strategic vision for the clinical redesign, co-ordinating work from different specialties.

- Act as a first stage change management control considering financial and non-financial impacts before deciding whether or not the request proceed to the NSGEB for authorisation or otherwise.
- Act as a conduit for keeping staff groups up to date (medical, nursing, AHP's, technical, auxillary).

NEW CHILDREN'S HOSPITAL

Clinical Transition Group

The New Children's Hospital Clinical Transition Group delivers a programme of work agreed and directed by the Project Team. It operates within a clear framework of delegated decision making, bringing together the strands of work being led by the Project Team and the Clinical Advisory Group.

It ensures that there is positive and consistent involvement of the public and staff. It is informed by the views of children and young people.

APPENDIX B

Questions on Sustainability

Five questions to included as part of your response.

The Board wish to incorporate a whole range of sustainable technologies and low carbon design into their new project. This project will produce the flagship hospital for Scotland, the project must be seen to demonstrate the use of the most appropriate and affordable technologies, low lifecycle cost with value for money, design excellence, we need to set the bar high.

The following questions are intended to secure you thoughts and views and also capability to advise the Board on the wide range of topics that come under the heading of sustainability.

You will note from the evaluation process set out in Section 1.10 that your response will be scored. Your response should focus on your views and where possible illustrate with examples from projects you have worked on. You are asked to keep you response to a maximum of a single side of A4 paper for each question, photographs illustrating examples would be useful.

1) Summer overheat – provide evidence of your experience of design consideration to minimise summer overheat via passive means such as solar shading, thermal mass of fabric and free overnight cooling.

2) Internal planning and quality of internal environment – your thoughts and views on the need to achieve a high quality internal environment, whilst achieving clinical planning objectives.

3) Energy & Sustainable Cooling – provide details of your understanding with an example where sustainable cooling has been used in a healthcare building and state the consequential reduction to conventional mechanical cooling.

4) Ventilation – what is your experience and what are the opportunities to maximise natural ventilation in a project of this size, especially where 100% single room provision is confirmed.

5) Minimisation of maintenance – your experience and proposals for this project whereby the Board can drive down the future costs of maintenance at the strategic and detail design stages.

APPENDIX F

Draft Collateral Warranty Agreement for Sub-Consultants

COLLATERAL WARRANTY AGREEMENT

between

GREATER GLASGOW HEALTH BOARD (known as NHS Greater Glasgow and Clyde)

and

[INSERT SUB-CONSULTANT DETAILS]

and

[INSERT "CONSULTANT" DETAILS]

Re: New South Glasgow Hospitals Project

COLLATERAL WARRANTY

between

(1) [The Firm of [ ] and the partners thereof individually and as partners and trustees for said firm, having its principal place of business at [ ]], [incorporated under the Companies Acts (Company No. [ ]) and having their registered office at [ ]] (the "Sub-Consultant");

(2) NHS GREATER GLASGOW AND CLYDE, of Dalian House, 350 St Vincent Street, Glasgow, G3 8YZ (together with its permitted successors and assignees referred to as the "Beneficiary"); and

(3) [ ], incorporated under the Companies Acts (Company No. [ ]) and having their registered office at [ ] (the "Consultant").

WHEREAS: -

A The Beneficiary has appointed the Consultant in terms of an Appointment dated [•] [(hereinafter referred to as "the Main Appointment") to carry out certain obligations and perform services in connection with the Project (as defined in Section 6.0 Schedule 1 of the Memorandum of Agreement forming part of the Main Appointment);

B The Sub-Consultant has entered or intends to enter into an agreement ("the Sub-Consultant Agreement") with the Consultant for the provision of certain services (forming part of the Services to be provided by the Consultant under the Main Appointment) ("the Services") in connection with the Project;

C It is a condition of the Sub-Consultant Agreement that the Consultant procures that the Sub-Consultant enters into this agreement with the Beneficiary; and

D words and expressions used in this agreement shall bear the same meaning ascribed to them in the Main Appointment unless the context otherwise requires.

THE SUB-CONSULTANT AND THE BENEFICIARY AND THE CONSULTANT HEREBY AGREE as follows: -

1 PROFESSIONAL RESPONSIBILITY

1.1 The Sub-Consultant warrants and undertakes to the Beneficiary that in performing any services under the Sub-Consultant Agreement, any agreement entered into under the Sub-Consultant Agreement, or this Agreement, the Sub-Consultant has exercised, and will continue to exercise reasonable skill, care and diligence in the discharge of the duties agreed to be performed by him under any such agreements.

1.2 The Sub-Consultant acknowledges that it is aware of the terms of the Main Appointment.

1.3 The Sub-Consultant undertakes to the Beneficiary to perform and observe the obligations and warranties on the part of the Sub-Consultant contained in the Sub-Consultant Agreement.

1.4 The Sub-Consultant warrants and undertakes to the Beneficiary that it has the requisite competence and resources to fulfil the requirements and obligations pursuant to the CDM Regulations insofar as same apply to the Sub-Consultant in connection with the Sub-Consultant Agreement or the Services.

2 DUTY OF CARE/UNDERTAKINGS

2.1 By entering into this agreement, the Sub-Consultant acknowledges that the Beneficiary has relied upon the Sub-Consultant's skill and judgement in respect of those matters relating to the Project and to each Build which lie within the scope of the Sub-Consultant's express and/or implied responsibilities arising under the Sub-Consultant Agreement, and the Sub-Consultant acknowledges and extends its duty of care to the Beneficiary. The Sub-Consultant agrees and undertakes that it owes to the Beneficiary no greater duty of care than the Sub-Consultant would have owed to the Beneficiary if the Sub-Consultant had been appointed by the Beneficiary instead of the Sub-Consultant being appointed by the Consultant in respect of the Services and its duties under the Sub-Consultant Agreement.

2.2 The Sub-Consultant acknowledges that the Beneficiary has relied or will rely upon, *inter alia*, all information and certificates (if any) issued or approved by the Sub-Consultant pursuant to the Main Appointment or the Sub-Consultant Agreement.

2.3 Where the Sub-Consultant is a firm, the duties and obligations of the Sub-Consultant under the Sub-Consultant Agreement and this agreement shall be binding jointly and severally on all persons who are or become partners of the Sub-Consultant's firm at any time after commencement of the Project or the Services provided thereunder whichever is the earlier and their respective executors and representatives whomsoever as well as on the Sub-Consultant's firm and its whole stock, funds, assets and estate without the necessity of discussing them in their order and such duties and obligations shall subsist and remain in full force and effect notwithstanding any change or changes which may take place in the Sub-Consultant's firm whether by the assumption of a new partner or by the retiral, bankruptcy, apparent insolvency or death of any individual partner.

3 INSURANCE

3.1 The Sub-Consultant shall in respect of their services, obligations and liabilities under the Sub-Consultant Agreement, any agreement entered into under the Sub-Consultant Agreement or this Agreement take out and maintain throughout the period, from the date of commencement of their services under this commission, professional indemnity insurance. The professional indemnity insurance shall be maintained until the expiration of Twelve (12) years, provided that it can be obtained at reasonable market rates, from the date of completion of his commission. The level of indemnity shall be a minimum of £[TO BE AGREED BY THE BOARD] GBP per individual team member.

PII cover will be required for all aspects of the Sub-Consultants work from date of appointment.

3.2 If such insurance is not available or ceases to be available at commercially reasonable rates or upon commercially reasonable terms, or if there is a material change in such insurance cover, the Sub-Consultant shall inform the Beneficiary immediately and the Sub-Consultant shall use its best endeavours to effect and maintain such insurances as are available and in doing so, the Sub-Consultant shall be under a duty to: -

3.2.1 have regard to the commercial position of the Beneficiary in terms of this agreement; and

3.2.2 use reasonable endeavours to see that the Beneficiary's commercial position under this agreement is fully protected by such insurance.

3.3 The Sub-Consultant shall exhibit to the Beneficiary satisfactory evidence of such insurance cover prior to or contemporaneously with delivery of this agreement and on each subsequent renewal date of such insurance together with evidence that such insurance is in place, that the premiums are fully paid and that the Sub-Consultant's potential liability under this agreement is covered. The Sub-Consultant shall procure the delivery of a letter from its insurers, brokers or underwriters to the Beneficiary confirming details of such insurance duly completed and signed. The Sub-Consultant shall pass a copy of this agreement to its insurers or underwriters and exhibit evidence to the Beneficiary.

4 INTELLECTUAL PROPERTY

4.1 Copyright and design rights in all the Documents produced by, or on behalf of the Consultant in relation to the Project shall be vested in the Beneficiary.

4.2 The Consultant shall provide the originals of and/or copies of the Documents to the Beneficiary upon reasonable request.

5 ASSIGNATION/ DELEGATION

5.1 The Beneficiary's interest in this agreement may be assigned in whole or in part to another Scottish NHS Organisation without the consent of the Sub Consultant.

5.2 The Sub-Consultant shall not be entitled to assign its rights, obligations and/or liabilities under this agreement.

5.3 The Sub-Consultant shall not be entitled to delegate further any aspect of the Services in relation to the Project without the consent of the Beneficiary.

6 NOTIFICATION OF DELAY

6.1 The Sub-Consultant shall immediately inform the Beneficiary if they have reason to suspect that it may prove impossible or impracticable to complete the Project, or any Services within

the period required by the Beneficiary or the Consultant, or that the Sub-Consultant may be unable to complete the discharge of their duties under this agreement, the Sub-Consultant Agreement or that there is likely to be any delay in completing the Project.

7 TERMINATION AND STEP-IN

7.1 Not later than twenty-one days prior to the Sub-Consultant terminating the Sub-Consultant Agreement with the Consultant for any reason whatsoever, the Sub-Consultant shall notify the Beneficiary in writing of the Sub-Consultant 's intention to do so.

7.2 The Sub-Consultant confirms that this agreement is independent of the Sub-Consultant Agreement and the Main Appointment and shall endure notwithstanding completion of the Services or the Sub-Consultant and/or Consultant being entitled to rescind or terminate the Sub-Consultant Agreement or doing so or the Sub-Consultant Agreement or the Appointment being defective, unenforceable or ceasing to be enforceable.

7.3 The Sub-Consultant's right to terminate the Sub-Consultant Agreement or treat it as terminated by the Consultant or to discontinue performance of any obligations under the Sub-Consultant Agreement shall cease if within the period of 21 days: -

7.3.1 the Beneficiary gives written notice to the Sub-Consultant requiring it to fulfil the terms of the Sub-Consultant Agreement as if the Beneficiary and not the Consultant were the employer;

7.3.2 the Beneficiary acknowledges in such notice that it is assuming all of the obligations of the Consultant under the Sub-Consultant Agreement, including without prejudice to the foregoing generality payment of any fees outstanding at the date of the notice and notified by the Sub-Consultant to the Beneficiary or which may subsequently become due under the Sub-Consultant Agreement.

7.4 In the event of notice being given by the Beneficiary as aforesaid and/or in accordance with clause 8.3, the Sub-Consultant Agreement will continue in full force and effect as if no right to terminate the Sub-Consultant Agreement or treat it as terminated had arisen, and the Sub-Consultant shall assume liability to the Beneficiary in terms of the Sub-Consultant Agreement in lieu of liability to the Consultant.

7.5 By its signature hereof, the Consultant confirms that the Beneficiary shall be entitled to assume that, as between the Sub-Consultant and the Consultant circumstances have occurred which entitle the Sub-Consultant to give notice under Clause 7.1. The Consultant acknowledges that the Sub-Consultant shall incur no liability to the Consultant when acting in accordance with the provisions of this Clause 7 provided the Sub-Consultant acted properly in giving notice to the Beneficiary in accordance with Clause 7.1.

7.6 The Sub-Consultant shall, if required by the Beneficiary following determination of the Sub-Consultant Agreement with the Consultant, contract direct with the Beneficiary by novation or otherwise on the same terms, *mutatis mutandis*, as are contained in the Sub- Consultant Agreement.]

8 NOTICES

8.1 Any notice to be given by the Sub-Consultant shall be deemed to be duly given if it is delivered by hand at or sent by registered post or recorded delivery to the Beneficiary at the address specified in this agreement or such other address as may be specified from time to time and any notice given by the Beneficiary pursuant to this agreement shall be deemed to be duly given if it is delivered by hand at or sent by registered post or recorded delivery to the Sub-Consultant at its registered or principal office.

8.2 Notices sent by registered post or recorded delivery shall be deemed to have been received forty-eight hours after being posted.

8.3 All notices to be given under this agreement shall be in writing. All notices given to or by the Beneficiary or the Consultant or the Sub-Consultant under Clause 7.3 shall be copied to the other parties.

9 LAW AND JURISDICTION

9.1 This agreement shall be governed by the law of Scotland.

9.2 The parties' prorogate the non-exclusive jurisdiction of the Scottish courts.

11 FURTHER WARRANTIES

11.1 Within the timescale set out in the Sub-Consultant Agreement, upon each written request from the Beneficiary to do so, the Sub-Consultant shall execute in a self proving manner and deliver to the Beneficiary, collateral warranties in favour of each party entitled to such collateral warranties in equivalent terms to this Agreement but that only in so far as not already granted.

12 WAIVER

12.1 The Sub-Consultant warrants and undertakes to the Beneficiary that it shall not vary or depart from any or all of the terms and conditions of the Sub-Consultant Agreement or discharge or waive such terms and conditions in such a way as to reduce or extinguish the rights and remedies of the Beneficiary hereunder without the prior written consent of the Beneficiary and the Sub-Consultant agrees that any such variation, departure, discharge or waiver made or accepted without such consent shall not be binding on the Beneficiary or affect or prejudice the Beneficiary's rights and remedies hereunder or under the Sub-Consultant Agreement or in any other way.

13 FREEDOM OF INFORMATION

13.1 The Sub-Consultant shall co-operate, facilitate, support and assist the Beneficiary to comply with the Freedom of Information (Scotland) Act 2002 and any codes of practice applicable from

time to time relating to access to public authorities' information, including by providing Documents and other information relating to Builds, the Project, the Sub-Consultant, etc. within the timescales necessary to allow the Beneficiary to comply with its obligations and duties under the Act and codes of practice.

13.2 All information submitted to the Beneficiary (directly or indirectly) may need to be disclosed and/or published by the Beneficiary. Without prejudice to the foregoing generality, the Beneficiary may disclose information in compliance with the Freedom of Information (Scotland) Act 2002, (the decisions of the Beneficiary in the interpretation thereof shall be final and conclusive in any dispute, difference or question arising in respect of disclosure under its terms), any other law, or, as a consequence of judicial order, or order by any court or tribunal with the authority to order disclosure. Further, the Beneficiary may also disclose all information submitted to them to the Scottish or the United Kingdom Parliament or any other department, office or agency of Her Majesty's Government in Scotland or the United Kingdom, and their servants or agents. When disclosing such information to either the Scottish Parliament or the United Kingdom Parliament it is recognised and agreed by both parties that the Beneficiary shall if they see fit disclose such information but are unable to impose any restriction upon the information that they provide to Members of the Scottish Parliament, or Members of the United Kingdom Parliament; such disclosure shall not be treated as a breach of this agreement.]

14 WARRANT

14.1 The Sub-Consultant and the Beneficiary [and the Consultant] consent to the registration of this agreement for preservation: IN WITNESS WHEREOF these presents and the preceding [#] pages are executed as follows:

[to be executed in a self-proving manner]

APPENDIX G

1) PSC Design Drawings - Site Plans for

Site masterplans;

Options 1

Option 1A – Preferred option

2) Departmental Relationship Drawings

All levels for New Adult Acute Hospital and new Children's Hospital.

Note – respondents may wish to meet with the Board and review the PSC Design Report in more detail. Arrangements can be made by contacting the individual in Section 1.8.

06 August 2008

Dear Mr Beattie

**NHS Greater Glasgow & Clyde**
**Acute Services Strategy 2**
**Appointment of Lead Consultant**

With regard to the above, I would like to confirm the importance of this key strategic project to Currie & Brown UK Limited. The Company and in particular our senior management team have shown total commitment and support to the bid which, should we be successful, we will continue into the implementation and delivery stages.

The Currie & Brown project team in Glasgow have already been working well in partnership with the NHS Greater Glasgow & Clyde team on the first phase of the Acute Services Strategy at the Victoria and Stobhill Hospitals, as well as on the schemes at Stobhill (Rowanbank) and Gartnavel Hospitals.

The Acute Services Strategy Phase 2 scheme is of prime importance to myself and the Board at Currie & Brown, as well as to the local office in Glasgow. I can confirm the utmost commitment to the success of this project from all at our organisation, including the availability of the individuals named in our bid, and you can be assured that any work undertaken will be in line with one of our Key Values – Striving for Excellence.

Yours sincerely
For and on behalf of

Dear Mr. Hackett

**NEW SOUTH GLASGOW HOSPITAL PROJECT**
**APPOINTMENT OF LEAD CONSULTANT**

On behalf of NHS Greater Glasgow and Clyde, I write to confirm acceptance of your tender dated 6th August 2008 and as further clarified in your letter dated 13th August.

The contract commencement date will be Tuesday 2nd September 2008, and your team are appointed to undertake the role of Lead Consultant as set out in the Board's Invitation to Tender document dated 26th June 2008. The appointment is initially for Stage 1A – Preparation of Employer's Requirements Documentation, with appointment to successive stages subject to approval from the Board, all as set out in our ITT documentation.

With regard to completion of the Memorandum of Agreement, I will have the documents prepared for signature over the next week and send to you for signature. I would also be obliged if you could confirm your acceptance of this letter in writing by return.

As you will appreciate, the Board are keen to proceed with the project to develop the design and procurement streams over the forthcoming months and I look forward to working with you and your team over the coming months and years.

Yours sincerely,

Ref: DJR/PB/GW4854M

26 February 2010

Dear Peter

**New South Glasgow Hospitals**
**Technical Advisor Appointment**

We acknowledge receipt of your letter dated 18 January 2010 and confirm agreement to the changes to our appointment and fee structure for Brookfield Construction Contract Stage 1 and Stage 2.

We would confirm key changes to appointment scope as follows:-

1. Responsibility for managing and administering the Building Contract sits with the Board as the designated Project Manager under the Contract and we will accept Delegated Duties as directed.

2. The requirement to direct the work of the Site Inspectorate team is no longer required. The required role of Supervisor under the NEC3 Contract will be procured separately.

With regard to the role of Supervisor we note the Board are proposing to utilise the Health Facilities Scotland Framework for the selection of a Supervisor. We would request that the Board consider ourselves for Supervisor duties alongside the HFS process as a variation to our TA appointment. The management of the Site Inspectorate Team was part of our original appointment and consider Supervisor Services to be a variation to same. We are operating a similar dual role for NHS Lanarkshire and delivering an efficient and streamlined service.

We have significant experience in the role and confirm recent projects where a Supervisor / Independent Certifier role has been undertaken:

| | |
|---|---|
| • NHS Forth Valley Acute Hospital | £300M |
| • NHS Lanarkshire Airdrie Resource Centre | £15M |
| • NHS Lanarkshire Coatbridge Resource Centre | £20M |
| • NHS Bundling Projects | £25M |
| • Highbury Hospital | £100M |
| • West Dunbartonshire Schools PPP | £120M |
| • Aberdeen Schools PPP | £100M |

Regulated by the RICS
Registered in England no 1300409
Registered Office
Dashwood House
69 Old Broad Street
London EC2M 1QS

Our lump sum fee for the required services would be:-

| | |
|---|---|
| Stage 1 | £150,000 |
| Stage 3 | £935,000 |
| Stage 3A | £15,000 |
| Defect Periods | £150,000 |
| | **£1,250,000 excluding VAT** |

We would re-affirm our commitment to support the Board to deliver the New South Glasgow Hospitals Project and in addition hope that our Supervisor Fee proposal can be considered.

Yours sincerely
For and on behalf of
Currie & Brown UK Limited

[redacted]

D J Ross
Director - Glasgow

The "Supervisor" is a person or firm, directly appointed by the employer to check that the works are constructed in accordance with the contract.

This is not unlike the role of a "Clerk of Works" or "Resident Engineer" in other types of contracts, however the Supervisor has a distinct level of authority that is not delegated to him by others.

NEC 3 separates the functions of contract administration and supervision. It does this not by delegation of powers but by specifying different roles for the project manager and supervisor.

Although those appointed as Project Manager can be the same as those appointed as Supervisor, the roles are significantly different and should be independent of one another whilst working together in tandem.

The Supervisor's role is to monitor and inspect the quality of work and defects for the project. To do this NEC 3 gives the Supervisor certain powers such as the ability to inspect and test materials, works and plant involved on the project or off site.

The following is a summary of the core clauses that outline the express duties and obligations of the supervisor:

- 10.1 – to act as stated in the contract and in a spirit of mutual trust and co-operation
- 13.1 – to communicate in a form which can be read, copied and recorded
- 13.3 – to reply to a communication within the period for reply
- 13.6 – to issue certificates to the project manager and the contractor
- 40.3 – to notify the contractor of his tests and inspections before they start and afterwards of the results
- 40.5 – to do tests and inspections without causing unnecessary delay
- 41.1 – to notify the contractor when plant and materials have passed pre-delivery tests and inspections
- 42.1 – to give reasons for searches which are instructed
- 42.2 – to notify the contractor of defects found
- 43.3 – to issue the defects certificate
- 71.1 – to mark equipment, plant and materials outside the working areas for payment purposes

As can be seen from the previous, the Supervisor's role is more of a technical role rather than administrative, yet, the Supervisor has one contractual responsibility. The Supervisor issues the Defects Certificate. This is significant as it largely ends the obligations of the parties involved in the contract.

It must be noted however, that although the Supervisor issues the defects certificate, it is the Project Manager who decides upon acceptance of defects.

Email:

Dear Mr. Ross

**NEW SOUTH GLASGOW HOSPITALS – LEAD CONSULTANT AND TECHNICAL TEAM**
**FEES FOR STAGE 1 LABORATORY PROJECT AND STAGE 2 DESIGN DEVELOPMENT MAIN BUILD**

I refer to recent dialogue regarding fees for the next stages of the project and write to confirm the agreed fee envelope for the key stages as follows.

**New Laboratory Project**

The fee allocation for a period of 116 weeks commencing Tuesday 5th January 2010 are as follows;

| Activity | Fee Allowance | Remarks |
|---|---|---|
| Project Management support | [redacted] | Based on input of 2 days (15hrs) per week by Mark Baird. |
| Cost Management | [redacted] | Based on input of 2 cost managers each for 2days (15hrs) per week. |
| **Agreed Budget Total** | [redacted] | |

**New Adult & Children's Hospitals**

The fee allocation for a period of 57 weeks commencing Tuesday 5th January 2010 are as follows;

| Activity | Fee Allowance | Remarks |
|---|---|---|
| Conclusion of Contract | [redacted] | This work is complete. |
| Project Management support | [redacted] | Based on input of 3 days (22hrs) per week by David Hall. |
| Cost Management | [redacted] | Based on input of 2 cost managers each for 2days (15hrs) per week. In addition input from Director at 2 days per week (15hrs). |
| PM Support - Commissioning | [redacted] | This a sum of money is allocated for provision of advice and support as provided by Paul Fairie [redacted] on a call off basis and only by instruction by either the Project Director or Project Manager. This sum may not be fully expended over the 57 week period. |
| CDMC service | [redacted] | Support provided by URS Corporation as part of your team for the period. Fee split [redacted] - Hospitals / Laboratories. |
| Healthcare Planning support | [redacted] | Input as required at key stages during design development, input subject to agreement with Project Director/Manager. |
| Building Services support | [redacted] | Input as required during design and package development in line with Appendix K of ITPD requirements, input subject to agreement with Project Director/Manager. |
| **Agreed Budget Total** | [redacted] | |

**Project Management Support**
The inputs by David Hall and Mark Baird will be developed over the next 2-3 weeks based on the attached schedules for both Design Development (Schedule A) and construction works on the Laboratory Project (Schedule B).

**Cost Management**
Inputs by the Cost Managers will generally follow the requirements listed in the attached Schedule C.

**Monthly Look Ahead**
As previously discussed the Board want to ensure that the input by Currie & Brown is managed within an agreed cost envelope, and that any pressures are highlighted and additional work agreed in advance of this being undertaken. I propose that we meet on a monthly basis to review progress and deal with any specific areas of concern. We can jointly agree the most appropriate time to do this, and I suggest this is tagged onto the monthly Commercial Group meetings.

**Work Outwith the Agreed Budgets**
The agreed budgets are considered as a ceiling subject to additional activities being agreed with the Project Director / Manager. On this basis, it is the responsibility of Currie & Brown staff to manage their time and input within these allowances, work undertaken without approval will be at your risk. It is understood that workload may fluctuate by week and the agreed allowances are an average input over the period.

**Delegation of Duties**
As the Board are undertaking the role of Project Manager we require to delegate a range of duties which will most likely mirror the attached schedules A-C. I propose that David and Mark meet with myself and Alan Seabourne to agree duties for both Project Manager and Cost Advisor, please let me know if you wish to undertake this task.

To conclude, I would like to be clear that the Board value the work and support the Currie & Brown team have brought to the project up to this stage, and look forward to jointly taking the project into the construction stage.

Yours sincerely

[redacted]

**Peter J. Moir**

**Head of Major Projects**

Cc Alan Seabourne Project Director

**New South Glasgow Hospitals and Laboratory Project**

**Project Management Support – Schedule A** (This reference not NEC related)

**Design Development Stage for Main Hospitals**

Key activities and tasks to be undertaken during the 57 week programme commencing 5th January 2010.

- Support the Project Director/ Manager to ensure that the Design Programme is progressing on schedule and to flag and action necessary requirements to ensure the milestones of project programme(s) are achieved.
- Participate in the design development user group sessions as required to support the Hospital Project Managers to deliver their objectives within time and cost.
- In conjunction with the Project Manager, control all early warning issues arising from design development and manage, control, report these warnings to relevant staff/groups. Provide mitigation advice to Project Director/Manager to mitigate all potential cost increases and prolongations to the works programme.
- Liaise with cost advisers to keep them aware of all potential cost issues.
- Liaise with the project Manager to keep him aware of all potential cost and programme issues.
- Oversee, manage and control other Technical Adviser input to Stage 2, ensuring that the Project Director/Manager is aware of all activities and resource requirements.
- Set out programme of work for Technical Adviser input to ensure Design is developed and compliant with contract (Employer's Requirements and Works Information).
- Attend meetings, groups as required to complete stage 2, ensure adequate liaison and co-ordination is made regarding programme of works, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Attend risk management and reduction meetings as directed by the Project Director/Manager and assist with the review and update of the project risk register.
- Input to Full Business Case development and completion for submission to NHS Board.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies
    - Accept particulars of the Contractor's design or to give reason for non-acceptance.
    - Accept particulars of the design of equipment or to give reasons for non-acceptance.

- Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
- Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties
- Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.
- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.
- Assist the PM to review potential effects to programme and assist with development of strategies to mitigate any prolongation as required.

This schedule generally summarises the key Project Manager supporrt services required by the Board commencing 5th January 2010, for periods;

Stage 2 – Design Development of Main Hospitals Duration 57 weeks.

.

**New South Glasgow Hospitals and Laboratory Project**

**Project Management Support – Schedule B** (This reference not NEC related)

**Laboratory Project – Site Works**

**Type of Support**

- Management of Construction programme and to accept any revisions in association with the Project Manager.
- Co-ordination of all Technical Adviser requirements (Advise on their input level and resource)
- Attend meetings as agreed with Project Director/Manager.
- Active management of all technical actions required to complete project.
- Close liaison with contractor to provide Project Manager with information on raising Early Warnings and managing these through the construction programme, providing Project Manager with mitigation strategies
- Liaising with the client to develop and deliver all interface issues such as: equipment/IT plans and commissioning plans, etc.
- Working in conjunction with Project Manager and Cost Advisor(s) to ensure adequate liaison and co-ordination is provided to assure progress is made regarding works, costs, payments, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Support Project Manager to manage project risks and monitor and report on risk register items.
- To support the Project Manager in monitoring and controlling testing and inspection process.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies
    - Accept particulars of the Contractor's design or to give reason for non-acceptance.
    - Accept particulars of the design of equipment or to give reasons for non-acceptance.
    - Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
    - Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties
    - Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.

- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.

Work in a collaborative manner with the Project Director/Manager, Cost Advisor, Supervisor, NHS Client Team and the Contractor.

This schedule generally summarises the key Project Manager support services required by the Board commencing 5th January 2010, for periods;

Stage 1 – Laboratory Project Site Works Duration 116 weeks.

**New South Glasgow Hospitals and Laboratory Project**

**Cost Management – Schedule C** (This reference not NEC related)

**Design Development Stage for Main Hospitals – Works Stage for Laboratory Project**

**NEC3 Engineering and Construction Contract - Option 'C' target contract with activity schedule; scheme contract)**

The Cost Advisor will report to the named Project Manager for the NEC Contract.
Note the full services are listed below, those not required have been struck through.

~~1. Assist with investigation into and evaluation of procurement strategy~~

2. Advise on VAT liability. Utilising the free VAT advisory service provided by Department of Health

3. Monitor VAT advice and the application of that advice and provide ad-hoc reports to Department of Health liaising with the free Department of Health VAT assessment & advisory section. Also liase with the Board's VAT advisor and Board Finance Manager.

4. Provide the NHS Client with general advice on the NEC3 ECC Contract.

5. Assist in establishing key dates for the proposed scheme and advise the NHS Client on programme and completion strategy for inclusion in the Scheme Contract.

~~6. Advise on the capital costs associated with any proposed contract phasing~~

~~7. Assist in preparation or validation of a conceptual scheme total construction cost, if possible, to establish financial scope of work for inclusion in the scheme pack and contract.~~

~~8. Assist in establishing appropriate level of Delay damages for the *works* and Sections~~

~~9. Provide the NHS Client with advice on NEC3 insurance provisions and Scheme specific options.~~

~~10. Assist in preparation of a Scheme Pack to be issued for return of expression of interest by the Principal Supply Chain Partner (PSCP)~~

- ~~Scope of work generally~~
- ~~Prepare Draft Scheme Contract and Agreement The National Integrated Construction Framework for NHS Scotland Template for the Scheme Contract~~
- ~~Include Works Information and Site Information in draft scheme contract document~~
- ~~Advise NHS Client on use of standard options in Scheme Contract~~

~~11. Participate in open day and selection of PSCP and PSCM's.~~

~~12. Finalise draft Scheme Contract for acceptance and issue by NHS Client to selected PSCP~~

~~13. Prepare letter of appointment for NHS Client to engage PSCP.~~

14. Attend regular (usually monthly) NHS Client meetings.

15. Provide cost review advice service during design development stage for main hospitals specifically assisting the Project Manager to review both early warnings and compensation events and any cost related processes.

**Post Contract**

1. Provide and maintain appropriate support for the Client's *Project Manager*, including assist the *Project Manager* to carry out the following during the life the scheme

    - Compile reports and recommendations for submission to the Project Steering Group and Project Board.
    - Prepare Management Control forms (MCP) as required by Capital Investment Manual for submission to NHS Client on monthly/quarterly programme as appropriate.
    - Maintain appropriate communications with the contractor (Brookfield).
    - Maintain appropriate communications with the Board's Director of Finance and the Board's Finance Team, provide guidance and information relative to cashflow, valuation as required.
    - Validation of the proposals for risk management & transfer, and corresponding contingency adjustments.
    - Participate in DART workshop to establish scheme specific analysis of risks leading to a cost effective and jointly owned Risk Register
    - Provide advice on all aspects of insurance for the project.
    - Assist with the validation of cost components other than construction.
    - Participation in Value Management & Value Engineering process lead by the contractor – ~~based on a one half-day workshop and validation of cost impacts arising as submitted by the *Contractor*.~~
    - ~~Prepare priced submission for indexation, send to DTI who will carry out indexation and analyse and report on same.~~
    - Validation of Life Cycle Cost advice prepared by the contractor.
    - ~~Participate in development of the target Price up to setting of Target Total of the Prices by checking and substantiating the PSCP's proposal in context of 'open book accounting'~~
    - Monitor and review performance of contract administration by the contractor.

- Assist with the implementation of an Early Warning and other contractual procedures using the pro forma documentation pack, work with project Manager and Project Management support to maintain up to date and accurate system.
- Monitor VAT advice and the application of that advice and provide ad-hoc reports to NHS Client.
- Assist the Project Manager to establish and manage an internal Change Control Reporting Procedure, which is compatible with contractual procedures, for all potential Compensation Events (change) whether initiated by the Client through the *Project Manager*, the *Project Manager* or by the contractor. The purpose of this procedure being to :
    - Alert all parties to <u>all</u> change whether considered having any implications or not.
    - Circulate the relevant information to all parties.
    - Facilitate the assessment (with contractor, NHS Client and Client Advisors input where appropriate) of the implications of all change – scheme cost, programme and quality - in advance of instruction to the contractor.
    - Enable decisions to be taken by the NHS Client whether to approve (i.e. proceed with) or not approve (i.e. abandon) the proposed changes and to identify actions needed to accommodate the implications of both actual and approved potential changes.
    - Facilitate the central registering of <u>all</u> change.
- Attend monthly progress meetings chaired by the *Project Manager*
- Attend regular (usually monthly) Client meetings

2. Assist the *Project Manager* during Stage 3 FBC to

    a. Administer the ECC contract

    - Monitor the Accepted Programme
    - Monitor expenditure against the contractors FBC expenditure profile
    - Review *Contractor* forecast of Defined Cost
    - Perform acceptance of proposed subcontractors
    - Perform early warning duties
    - ~~Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.~~
    - Validation of Price Model.
    - Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme

- Perform assessment duties,
- Review contractors assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Prepare compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the contractor
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability

~~b. Work with the PSCP to develop a realistic target (for the design completion, construction commissioning and handover Stage of the scheme) that can be used as the foundation for agreeing the Prices (target for stage 4).~~

~~c. To arrive at a mutually acceptable stage 4 total of the Prices (target) for proposal to the NHS Client; including participating in DART workshop to establish levels and apportion responsibilities for identified risk—~~

~~d. Work with the PSCP to establish proposals in respect of documentation and procedures in anticipation of completing the scheme:~~

e. Completion of FBC

Assist the Project Manager to agree total of Defined Cost of the Stage for updating of the FBC *Activity Schedule* and adjustment to the Summary Total of the Prices.

If the scheme is terminated assist the *Project Manager* and advise the NHS Client on the Termination Procedure.

3. Assist the *Project Manager* during the construction and handover to

a. Administer the NEC3 ECC contract

- Monitor the Accepted Programme
- Monitor expenditure against the contractors FBC expenditure profile
- Review contractors forecast of Defined Cost
- Perform acceptance of proposed subcontractors
- Perform early warning duties
    - Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.
    - Validation of Price Model.
- Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
- Perform assessment duties including, assess the price of work done (PWDD) through the

validation of records of Defined Cost submitted by the contractor and compliance with the Schedule of Cost Components. Take site particulars as necessary; assess progress against programme and liaise with the *Project* Manager to determine any disallowed costs that may apply. Agree with contractor the amount due and report same to the *Project Manager*

- Review contractors assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Assist with preparation of compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the contractor.
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability
- Monitoring work related to Provisional Amounts in the contract and adjusting same.
- Validate construction cost profiles – as prepared by the contractor – following monthly or other event driven programme reviews
- Monthly reporting of the financial status of the project bringing together and summarising the construction cost all Compensation Events (change), advised to date, together with anticipated change and incorporating the construction expenditure profile.
- Validate, negotiate and agree the final account including *share* calculations.
- Assist the *Project Manager* in the administration of the contract during the Defects period and calculations for the Final Amount Due at the end of the *Defects Date*.

Work with Supervisor to review implications of rectifying defects in terms of cost and programme.

Work in a collaborative manner with the Project Director/Manager, Project Manager support team, Supervisor, NHS Client Team and the Contractor.

This schedule generally summarises the key Cost Advisor services required by the Board commencing 5th January 2010, for periods;

FILE FOR REF 15/01/10

## Currie and Brown – Areas of Work

### Construction Programme – Stage 1 (Labs)

PM support to Project Manager – 2 days per week

### Type of Support

- Management of Construction programme and to accept any revisions in association with the Project Manager
- Co-ordination of all Technical Adviser requirements (Advise on their input level and resource)
- Attend meetings as agreed with Project Director and Project Manager
- Active management of all technical actions required to complete project
- Close liaison with contractor to provide Project Manager with information on raising Early Warnings and managing these through the construction programme, providing Project Manager with mitigation strategies
- Liaising with the client to develop and deliver all interface issues such as: equipment/IT plans and commissioning plans, etc.
- Working in conjunction with Project Manager and Cost Advisor(s) to ensure adequate liaison and co-ordination is provided to assure progress is made regarding works, costs, payments, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Support Project Manager to manage project risks and monitor and report on risk register items.
- To support the Project Manager in monitoring and controlling testing and inspection process.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies

- Accept particulars of the Contractor's design or to give reason for non-acceptance.
- Accept particulars of the design of equipment or to give reasons for non-acceptance.
- Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
- Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties
- Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.
- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.

Include Scheme header as required by the NHS Health Board

**NEC3 Duty of the *Project Manager***

10.1 To act as stated in the contract and in a spirit of mutual trust and co-operation.

13.1 To communicate in a form, which can be read, copied and recorded.

13.3 To reply to a communication within the period for reply.

13.4 To reply to a communication submitted or resubmitted for acceptance. To state reasons for non-acceptance.

13.5 To notify any agreed extension to the period for reply.

13.6 To issue certificates to the *Employer* and to the *Contractor*.

13.7 To communicate notifications separately from other communications.

13.8 To state reasons for withholding an acceptance of a submission by the *Contractor*

16.1 To give early warning of matters with delay, cost or performance implications.

16.3 To co-operate at risk reduction meetings.

16.4 To revise the Risk Register to record the decisions made at each risk reduction meeting and issue the revised Risk Register

17.1 To give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies

18.1 If he agrees with a *Contractor's* notification of considered illegal or impossible requirements in Works Information; give instruction to change Works Information

21.2 To accept particulars of the *Contractor's* design or to give reasons for non-acceptance

23.1 To accept particulars of the design of equipment or to give reasons for non-acceptance

24.1 To accept replacements persons proposed by the *Contractor* or to give reasons for non- acceptance.

25.3 Assess the additional cost to the *Employer* for recovery when a Key Date is not met

~~26.2 To accept proposed subcontractors or to give reasons for non-acceptance.~~

~~26.3 To accept proposed subcontract conditions or to give reasons for non-acceptance.~~

30.2 To decide the date of Completion. To certify completion within one week of Completion

31.3 To accept the *Contractor's* programme within two weeks of submission or to give reasons for non-acceptance.

32.2 To accept a revised programme or to give reasons for non-acceptance.

35.3 To certify within one week the date when the *Employer* takes over any part of the works.

40.6 To assess the cost incurred by the *Employer* in repeating a test or inspection after a defect is found.

43.4 To arrange for the *Employer* to allow the *Contractor* access and use to of a part of the works which he has taken over if they are needed for the correcting a Defect.

44.2 To change the Works Information, the prices and the completion date if a quotation for not correcting Defects is accepted.

45.1 To assess the cost to the *Employer* of having Defects corrected by other people if the *Contractor* is given access but has not corrected a notified Defect within the defect correction period.

45.2 To assess the cost to the *Contractor* of correcting a Defect if he is not given access to correct it.

50.1 To assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties.

50.4 To consider any application from the *Contractor* when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.

51.1 To certify payment within one week of each assessment date.

61.1 To notify the *Contractor* of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the *Contractor* to submit quotations unless the event arises from a fault of the *Contractor*..

61.4 To decide within one week of notification (or such longer period as the *Contractor* agrees) whether the prices and the completion date should be changed when the *Contractor* notifies a compensation event. To instruct the *Contractor* to submit quotations for change prices and the completion date.

61.5 To decide whether the *Contractor* did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.

61.6 To state assumptions for the assessment of compensation events in the event that the effects are too uncertain to be forecast reasonably. To correct any assumptions later found to have been wrong.

62.3 To reply within two weeks to quotations for compensation events submitted by the *Contractor*.

62.4 To give reasons to the *Contractor* when instructing the submission of a revised quotation.

62.5 To extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the *Contractor* of any agreed extensions for the submission of quotations or replies.

63.9 If a change to Works Information makes the description of the Condition for a Key Date incorrect the *Project Manager* corrects the description.

64.1 To assess a compensation event:

- If, the *Contractor* has not submitted a quotation within the time allowed.
- If, the *Project Manager* decides the contractor has not assessed the compensation event correctly in a quotation and he does not instruct the *Contractor* to submit a revised quotation.
- If, when the *Contractor* submits quotations for a compensation event he has not submitted a programme or alterations to a programme which this contract requires him to submit or
- If, when the *Contractor* submits quotations for a compensation event the *Project Manager* has not accepted the *Contractor's* latest programme

64.2 To assess compensation event using his own assessment of the programme for the remaining work:

- If there is no Accepted Programme
- If the contractor has not submitted a programme or alterations to a programme for acceptance as required

64.3 To notify the *Contractor* of any assessments made of a compensation event within the period allowed to the *Contractor* for his quotation.

73.1 To instruct the *Contractor* how to deal with objects of value, historical or other interest found within the Site.

85.1 To accept policies and certificates of insurance submitted by the contractor or to give reasons for non-acceptance

87.1 To submit to the *Contractor* policies and certificates for insurances to be provided by the *Employer*.

90.1 Issue to both Parties a termination certificate if the reason complies with this contract.

90.4 To certify final payments within 13 weeks of termination.

W2.3((9) Unless and until the *Adjudicator* has notified the Parties of his decision, to proceed as if the matter disputed was not disputed.

**Hospitals – Design Development**

- Support the Project Director to ensure that the Design Programme is progressing on schedule and to flag and action necessary requirements to ensure the milestones of project programme(s) are achieved.
- Participate in the design development user group sessions as required to support the Hospital Project Managers to deliver their objectives within time and cost.
- Take control of all early warning issues and manage, control, report these warnings to relevant staff/groups. Provide mitigation advice to Project Director/Construction to mitigate all potential cost increase.
- Liaise with cost advisers to keep them aware of all potential cost issues.
- Oversee, manage and control other Technical Adviser input to Stage 2, ensuring that the Project Director is aware of all activities and resource requirements.
- Set out programme of work for Technical Adviser input to ensure Design is developed and compliant with contract (Employer's Requirements).
- Attend meetings, groups as required to complete stage 2, ensure adequate liaison and co-ordination is made regarding programme of works, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Input to Full Business Case development and completion for submission to NHS Board.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies
    - Accept particulars of the Contractor's design or to give reason for non-acceptance.
    - Accept particulars of the design of equipment or to give reasons for non-acceptance.
    - Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
    - Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties

- Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.
- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.

Include Scheme header as required by the NHS Health Board

**Schedule of key duties of Cost Advisor acting as client adviser for Frameworks Scotland scheme contracts**

**Pre-contract (before appointment of the Principal Supply Chain Partner (PSCP) to NEC3 Engineering and construction contract - Option 'C' target contract with activity schedule; scheme contract)**

Note:

It is assumed the NHS Client will decide and state, in the scheme specific scope of work for the Cost Advisor Professional Services Contract (PSC), whom the Cost Advisor reports to and / or works with in the pre-contractor appointment stage, either the Project Director or, if appointed the scheme *Project Manager*.

1. ~~Assist with investigation into and evaluation of procurement strategy~~

2. Advise on VAT liability. Utilising the free VAT advisory service provided by Department of Health

3. Monitor VAT advice and the application of that advice and provide ad-hoc reports to Department of Health liaising with the free Department of Health VAT assessment & advisory section.

4. Provide the NHS Client with general advice on the NEC3 ECC Contract.

5. Assist in establishing key dates for the proposed scheme and advise the NHS Client on programme and completion strategy for inclusion in the Scheme Contract.

6. ~~Advise on the capital costs associated with any proposed contract phasing~~

7. ~~Assist in preparation or validation of a conceptual scheme total construction cost, if possible, to establish financial scope of work for inclusion in the scheme pack and contract.~~

8. ~~Assist in establishing appropriate level of Delay damages for the works and Sections.~~

9. ~~Provide the NHS Client with advice on NEC3 insurance provisions and Scheme specific options.~~

10. ~~Assist in preparation of a Scheme Pack to be issued for return of expression of interest by the Principal Supply Chain Partner (PSCP)~~

    - ~~Scope of work generally.~~
    - ~~Prepare Draft Scheme Contract and Agreement The National Integrated Construction Framework for NHS Scotland Template for the Scheme Contract.~~
    - ~~Include Works Information and Site Information in draft scheme contract document.~~
    - ~~Advise NHS Client on use of standard options in Scheme Contract~~

Include Scheme header as required by the NHS Health Board

~~11. Participate in open day and selection of PSCP and PSCM's.~~

~~12. Finalise draft Scheme Contract for acceptance and issue by NHS Client to selected PSCP.~~

~~13. Prepare letter of appointment for NHS Client to engage PSCP.~~

14. Attend regular (usually monthly) NHS Client meetings

Include Scheme header as required by the NHS Health Board

**Post Contract**

Note:

To avoid conflict with the Engineering and Construction Contract conditions of contract it is advisable that, in the post contract Stage Professional Services Contract (PSC) the Cost Advisor is designated as an assistant to the *Project Manager*.

1. Provide and maintain appropriate support for the Client's *Project Manager*, including assist the *Project Manager* to carry out the following during the life the scheme

    - Compile reports and recommendations for submission to the NHS Client
    - Prepare Management Control forms (MCP) as required by Capital Investment Manual for submission to NHS Client on monthly/quarterly programme as appropriate
    - Maintain appropriate communications with the PSCP.
    - Validation of the proposals for risk management & transfer, and corresponding contingency adjustments.
    - Participate in DART workshop to establish scheme specific analysis of risks leading to a cost effective and jointly owned Risk Register
    - Provide advice on all aspects of insurance for the project.
    - Assist with the validation of cost components other than construction.
    - Participation in Value Management & Value Engineering process lead by ~~PSCP – based on a one half-day workshop and validation of cost impacts arising as submitted by the *Contractor*.~~
    - ~~Prepare priced submission for indexation, send to DTI who will carry out indexation and analyse and report on same.~~
    - Validation of Life Cycle Cost advice prepared by the PSCP.
    - ~~Participate in development of the target Price up to setting of Target Total of the Prices by checking and substantiating the PSCP's proposal in context of 'open book accounting'~~
    - Monitor and review performance of contract administration by the *PSCP*
    - Implementation of an Early Warning and other contractual procedures using the pro forma documentation pack
    - Monitor VAT advice and the application of that advice and provide ad-hoc reports to NHS Client.
    - Propose, and manage an internal Change Control Reporting Procedure, which is compatible with contractual procedures, for all potential Compensation Events (change) whether initiated by the Client through the *Project Manager*, the *Project Manager* or by the PSCP. The purpose of this procedure being to :

Include Scheme header as required by the NHS Health Board

- Alert all parties to all change whether considered having any implications or not.
- Circulate the relevant information to all parties.
- Facilitate the assessment (with PSCP, Client and Client Advisors input where appropriate) of the implications of all change – scheme cost, programme and quality - in advance of instruction to the PSCP.
- Enable decisions to be taken by the Client whether to approve (i.e. proceed with) or not approve (i.e. abandon) the proposed changes and to identify actions needed to accommodate the implications of both actual and approved potential changes.
- Facilitate the central registering of all change.

- Attend monthly progress meetings chaired by the *Project Manager*
- Attend regular (usually monthly) Client meetings

2. ~~Assist the *Project Manager* and PSCP to prepare and agree the formal Scheme Contract document and its stage updates based on The National Integrated Construction Framework for NHS Scotland Template for the appropriate stages of the scheme, in 3 to 9 following:~~

3. ~~Initiation of Stage 1 – IA~~

   a. Commencement of IA – assist in preparation and agreement of contract documentation:

      - Programme for the scheme stage
      - Identify PSCP resources for the stage
      - Transfer of TRS information into the contract documentation
      - Establish activity schedule for IA - the Prices including Fee
      - Completion of PSCP Form of Proposal, including Appendix *Activity Schedule* and supporting Attachments
      - Revision of Contract Data Part one – Data provided by the *Employer*
      - Completion of Contract Data Part two – Data provided by the *Contractor*
      - Form of Agreement for signature of the *Employer* and *Contractor*.

4. Assist the *Project Manager* during Stage1 IA to

   a. Administer the NEC3 ECC contract

      - Validation against The National Integrated Construction Framework for NHS Scotland agreements
      - Monitor the Accepted Programme
      - Monitor expenditure against the PSCP's IA expenditure profile
      - Review PSCP forecast of Defined Cost

Include Scheme header as required by the NHS Health Board

- Perform acceptance of proposed subcontractors
- Perform early warning duties
- Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.
- Validation of Price Model.
- Proposed key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
- Perform assessment duties, including agree assessment date based on the *assessment interval*
- Review PSCP's assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Prepare compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the PSCP
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability

b. During Stage 1 IA, in consultation with the PSCP prepare programme proposals and forecast Defined Cost for Stage 2 OBC stage for *Project Manager* submission to NHS Client and implementation if commencement of OBC is approved.

Documentation and procedures as follows:

- Programme for the scheme stage
- Identify PSCP resources for the stage
- Update TRS information into the contract documentation if necessary
- Establish activity schedule for OBC - the Prices including Fee
- Initiating PSCP Form of Proposal Appendix *Activity Schedule* and supporting Attachments, ensure understanding and completion by the PSCP
- Revision of Contract Data Part one – Data provided by the *Employer* if necessary
- Updating of Contract Data Part two – Data provided by the *Contractor*
- Form of Agreement Appendix for signature of the *Employer*.

c. Completion of Stage - IA

- Agree total of Defined Cost of the stage for updating of the IA *Activity Schedule* and adjustment to the Summary Total of the Prices.
- If the scheme is terminated assist the *Project Manager* and advise the NHS Client on the Termination Procedure.

Include Scheme header as required by the NHS Health Board

5. Assist the *Project Manager* and establish documentation for OBC Form of Agreement Appendix, where IA is accepted and confirmation to proceed with OBC is given by the NHS Client

    - Form of Agreement Appendix - signed by *Employer* and issued to the *PSCP* as agreement to proceed with Stage 2 OBC

6. Assist the *Project Manager* during Stage 2 OBC to

    a. Administer the NEC3 ECC contract

    - Monitor the Accepted Programme
    - Monitor expenditure against the *Contractor's* OBC expenditure profile
    - Review PSCP forecast of Defined Cost
    - Perform acceptance of proposed subcontractors
    - Perform early warning duties
    - Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.
    - Validation of Price Model.
    - Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
    - Perform assessment duties,
    - Review PSCP's assessment application
    - Prepare assessment documents and certification for issue by the *Project Manager*
    - Prepare compensation event notifications for the *Project Manager*
    - Advice to the *Project Manager* on compensation events notified by the PSCP
    - Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability

    b. During OBC and in consultation with the PSCP prepare programme proposals and forecast Defined Cost for Stage 3 FBC for *Project Manager* submission to NHS Client and implementation if commencement of FBC is approved.

    Documentation and procedures as follows:

    - Programme for the scheme Stage
    - Identify PSCP resources for the Stage
    - Update Framework information into the contract documentation if necessary
    - Establish activity schedule for FBC - the Prices including Fee
    - Initiating PSCP Form of Proposal Appendix *Activity Schedule* and supporting Attachments, ensure understanding and completion by the PSCP.

Include Scheme header as required by the NHS Health Board

- Revision of Contract Data Part one – Data provided by the *Employer* if necessary
- Updating of Contract Data Part two – Data provided by the *Contractor*
- Form of Agreement Appendix B for signature of the *Employer*.

d. Completion of OBC

- Agree total of Defined Cost of the Stage for updating of the OBC *Activity Schedule* and adjustment to the Summary Total of the Prices.
- If the scheme is terminated assist the *Project Manager* and advise the NHS Client on the Termination Procedure

7. Assist the *Project Manager* and establish documentation for FBC Form of Agreement Appendix, where OBC is accepted and confirmation to proceed with FBC is given by the NHS Client

- Form of Agreement Appendix - signed by *Employer* and issued to the *Contractor* as agreement to proceed with FBC

8. Assist the *Project Manager* during Stage 3 FBC to

a. Administer the ECC contract

- Monitor the Accepted Programme
- Monitor expenditure against the PSCP's FBC expenditure profile
- Review *Contractor* forecast of Defined Cost
- Perform acceptance of proposed subcontractors
- Perform early warning duties
- ~~Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.~~
- ~~Validation of Price Model.~~
- Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
- Perform assessment duties,
- Review PSCP's assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Prepare compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the PSCP
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability

~~b. Work with the PSCP to develop a realistic target (for the design completion, construction commissioning and handover Stage of the scheme) that can be used.~~

~~as the foundation for agreeing the Prices (target for stage 4).~~

~~c. To arrive at a mutually acceptable stage 4 total of the Prices (target) for proposal to the NHS Client, including participating in DART workshop to establish levels and apportion responsibilities for identified risk.~~

~~d. Work with the PSCP to establish proposals in respect of documentation and procedures in anticipation of completing the scheme:~~

Full hierarchy of programmes, including procurement, design, construction, commissioning and handover.

Identify PSCP resources including proposed subcontractors for the stage

Update Framework information into the contract documentation if necessary

Establish activity schedule for the Prices including Fee

Initiating PSCP Form of Proposal *Activity Schedule* and supporting Attachments, ensure understanding and completion by the *Contractor*

Revision of Contract Data Part one – Data provided by the *Employer* if necessary

Updating of Contract Data Part two – Data provided by the *Contractor*

Form of Agreement Appendix C for signature of the *Employer* and *Contractor* if the scheme is to proceed to completion

e. Completion of FBC

~~Agree total of Defined Cost of the Stage for updating of the FBC *Activity Schedule* and adjustment to the Summary Total of the Prices.~~

~~If the scheme is terminated assist the *Project Manager* and advise the NHS Client on the Termination Procedure.~~

9. Assist the *Project Manager* during the construction and handover to

a. Administer the NEC3 ECC contract

- Monitor the Accepted Programme
- Monitor expenditure against the PSCP's FBC expenditure profile
- Review *PSCP* forecast of Defined Cost
- Perform acceptance of proposed subcontractors
- Perform early warning duties
  - Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.
  - Validation of Price Model.
- Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
- Perform assessment duties including, assess the price of work done (PWDD) through the validation of records of Defined Cost submitted by the *PSCP* and compliance with the Schedule of Cost Components. Take site particulars as necessary; assess progress against programme and liaise with the *Project* Manager to determine any disallowed costs that may apply. Agree with PSCP the amount due and report same to the *Project Manager*

Include Scheme header as required by the NHS Health Board

- Review PSCP's assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Prepare compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the PSCP
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability
- Monitoring work related to Provisional Amounts in the contract and adjusting same.
- Validate construction cost profiles – as prepared by the PSCP – following monthly or other event driven programme reviews
- Monthly reporting of the financial status of the project bringing together and summarising the construction cost all Compensation Events (change), advised to date, together with anticipated change and incorporating the construction expenditure profile.
- Validate, negotiate and agree the final account including *share* calculations.
- Assist the *Project Manager* in the administration of the contract during the Defects period and calculations for the Final Amount Due at the end of the *Defects Date.*

**Subject:** FW: CURRIE & BROWN ADDITIONAL FEES

Alan

As discussed on 15 July 2009, I agreed to provide a file note to you on the additional fees paid to Currie and Brown in relation to the new Hospitals and Laboratory project

You advised that the additional work required of Currie & Brown falls to be treated as a "waiver to tender" in terms of SFIs (para 10.9 refers). As the responsible Director, I authorised the "waiver to tender".

The attached document sets out the additional work for which the additional fees were paid to Currie and Brown.

helen

1.11.

**New South Glasgow Hospitals Project – Consultant's Fees**

**Additional Fees for Stage 1A – Development of Exemplar Design and Tender (ITPD) Documentation**

**1 - Additional Work by Lead Consultant Team to Complete the Site Investigation (SI)**
The Lead Consultant's brief required the team to tender and manage the SI contractor to undertake the survey of the development site for the new hospitals and laboratory block.

During the SI tender process it became clear that it would be beneficial to survey other development sites within the SGH campus at the same time and take advantage of economies of scale of the single package rather than tender these surveys at a later date. The additional sites were;

- Ronald MacDonald
- Education Block
- Mental health Unit

The additional fee of [redacted]s for the tender, management and reporting on findings arising from these additional sites by the Lead Consultant team, the bulk of the work being undertaken by URS Corporation.

**2 – Red Day Review**
This review was proposed by James Stewart of Partnerships UK as a 'third party' overview or audit of the Board's ITPD documentation prior to issue. The proposal was floated at the NSGH Executive Board meeting in March 2009, and the review took place during April 2009, prior to issue of the Board's ITPD documents on 29th April 2009.

The additional fee of [redacted]accounts for time of senior members of the Lead Consultant's team to brief the Red Day Reviewers (Atkins) and generally respond to their questions. The Red day Review was not included as part of the Lead Consultant's brief.

**3 – Site Wide Energy Strategy**
The exemplar design and OBC document developed by the Davis Langdon team did not include for the connection of the retained estate to the new Energy Centre. The brief for the new Lead Consultant team reflected the same arrangement.

During the Competitive Dialogue process the Board decided that key elements of the retained estate should be serviced by the new Energy Centre, and the Lead Consultant team were instructed to adapt their design and specification to reflect this.

The additional fee of [redacted] covers the cost of additional design work, primarily undertaken by Wallace Whittle, to adapt the exemplar design and ITPD documentation issued to the three bidding teams.

**4 – Retained Estate Space Study**
At the conclusion of the construction works the Board require to transfer hospital services from a number of sites into the new builds. The new builds will not accommodate all the space requirements from the transfer, the outstanding space relates to office accommodation, Doctor's offices and some associated educational support accommodation.

While some preliminary work had been undertaken by the Project Team in 2008, no definitive document exists that records in detail, space available in retained estate set against space requirements with any shortfall of over capacity identified. To complete this work the Lead Consultant team were commissioned in April 2009 to undertake this study in conjunction with the Project Team to conclude this piece of work and establish any costs arising.

This work was not part of the Lead Consultant's brief, and the additional fees to date amount to [redacted] with an anticipated maximum cost of [redacted] for the task.

**5 – Acoustics Specification**

The Lead Consultant's brief for development of the ITPD documentation did not provide for a detailed review and development of design and specification requirements for acoustics and general sound reduction requirements for bidder design.

The cost of [redacted] accounts for work undertaken by a specialist acoustics consultant to prepare Appendix S of the ITPD documentation.

**6 – ADB Activity Database Codes for Equipment**

The brief requirement for ADB information allows for 50 rooms per hospital to help develop the full ADB code requirements, these codes then derive the equipment lists by room that are then passed to our Procurement Department to develop equipment requirements for the new facilities. In hindsight, 50 rooms per facility did not adequately cover the project need to develop a full equipment requirement for the new hospitals.

The Lead Consultant team were asked to develop ADB codes for all room types within both facilities to allow the full Group II, III and IV equipment lists to be developed and provided to the bid teams to allow more robust tenders to be returned. This work has predominantly been undertaken by HLM Architects. The cost for this work is [redacted] and would need to have been completed at some stage during the process, we had assumed this would be by the bid team. Either way this work would come under the professional fees banner for the project whether undertaken by our directly employed team or through design fees through the contract.

**Additional Fees for Stage 1B – Competitive Dialogue Stage 1 Tender Response**

**1 – Competitive Dialogue Process**

The Lead Consultants brief was prepared in May 2008 while the Board was still developing its procurement strategy, while the brief reflects a two stage design and build process it did not anticipate the use of competitive dialogue during the first stage of the tender process.

The competitive dialogue is far more labour intensive than traditional two stage D&B, and the additional fees arising relate primarily to additional input by the Lead Consultant team in attendance at the four streams of meetings over the twelve week period of dialogue. The four streams relate to Design, Logistics, Laboratory Block and Commercial issues and are undertaken with each of the three bid teams on a rolling programme, based on three to three and a half hour sessions.

The project team have assessed the work allowance within the original bid and set this against the resource requirement for the CD process, the resultant on cost after discussion with the team has been established at [redacted]

# Memorandum of Agreement

This part comprises the Memorandum of Agreement between the Greater Glasgow Health Board and Currie & Brown UK Limited

**Consultancy Service:**

Lead Consultant and Technical Team services for the procurement of hospital facilities utilising public finance and a two stage Design & Build process.

**Memorandum of Agreement**

This agreement is made

between

**GREATER GLASGOW HEALTH BOARD** of J B Russell House, Gartnavel Royal Hospital, One thousand and fifty five Great Western Road, Glasgow G12 0XH (formerly at Dalian House, 350 St Vincent Street, Glasgow G3 8YZ) (hereinafter called the 'Board') of the one part

and

**CURRIE & BROWN UK LIMITED** a company incorporated under the Companies Acts (Company Number 01300409) and having its registered office at Dashwood House, 69 Old Broad Street, London EC2M 1QS (formerly at 140 London Wall, London EC27 5DN) (hereinafter called the 'Lead Consultant') of the other part

WHEREAS

the Board intends to proceed with the New South Glasgow Hospitals Project (the 'Scheme')

and has appointed Currie & Brown UK Limited to be their lead consultant and to lead the Technical Advisory Team by performing the Duties in connection with the Scheme.

NOW IT IS HEREBY AGREED AS FOLLOWS:

1.1 The Board agrees to engage the Lead Consultant and the Lead Consultant agrees to perform the Duties subject to and in accordance with the terms of the Agreement.

1.2 This Memorandum of Agreement, together with Parts A-G of the Appendix shall together constitute the Agreement between the Board and the Lead Consultant.

1.3 The Lead Consultant will be the Technical Advisory Team Leader as further amplified in the Memorandum of Agreement.

1.4 **Payment of Duties**

The fee payable for performance of the duties set out in Part C of the Appendix is set out in the Lead Consultants Fee Proposal in Part D of the Appendix and payment shall be made in accordance with the following.

Payment shall be based on the capped fee bids for each Work Stage, with interim payments based thereon within each Work Stage. Payments shall be due on the issue of the Lead Consultant's account. The final date for payment of the Lead Consultant's account by the Board shall be 30 days from the date of issue of the Lead Consultant's account. The Lead Consultant is entitled to render monthly accounts.

The Board shall not withhold payment of any amount stated to be due as set out in the preceding paragraph unless it has given written notice not less than 7 days before the final date for payment to the Lead Consultant of the Boards intention to withhold payment and specifies the amount which it is proposed to withhold and the grounds for making the withholding. If there is a more than one ground the notice shall specify each ground and the amount attributable to it.

There is no obligation for the Board to continue with the Scheme beyond each Work Stage (this includes 1A and 1B as separate Work Stages), and the Consultant shall seek written authority from the Board to proceed to Work Stage 1B duties, and all subsequent Work Stages, before doing so.

If any work is undertaken without the prior knowledge and approval of the Board, either within a commissioned Work Stage of the project or as preparatory work for a subsequent Work Stage, there will be no ability to seek to recover that cost on a quantum merit basis should the project change or be aborted.

All fees set out in this Agreement are exclusive of Value Added Tax, VAT will be recovered at the current prevailing rate.

**IN WITNESS WHEREOF** these presents consisting of this and the preceding 2 pages together with the Appendix (in Parts A – G) are executed as follows:

## APPENDIX PART A – CONDITIONS OF APPOINTMENT

### Conditions of Appointment

This part describes the conditions, which normally apply to a lead consultant's appointment. Different or additional conditions are set out in the Memorandum of Agreement. If there is any discrepancy between the terms of the Memorandum of Agreement and this Part A of the Appendix, the terms of the Memorandum of Agreement shall prevail.

### Generally

Note, where reference is made to the 'Consultant' throughout this section, this refers to the Lead Consultant and the Technical Advisory Team as a whole.

**1.1 Duration of commission**

The appointment of the Consultant will commence from the date that the Consultant commenced carrying out the Duties and the commission, unless suspended or terminated, shall be deemed to be completed on the conclusion of the duties by Wok Stage, as set out in Part C of the Appendix.

Note this will be a staged appointment, the Board reserves the right to terminate the commission at the end of each and every Work Stage from 1A - 5. Progression from one Work Stage to another will be subject to written confirmation by the Board (which may be via the Project Director).

### Objectives and obligations of the Consultant

**1.2 Scope of duties**

The duties to be performed by the Consultant are those listed at Part C of the Appendix, as amplified by the Consultants' Bid Submission, (provided always that where there is a conflict between the duties listed at Part C of the Appendix and deliverables and methodologies contained within the Consultants' Bid Submission that the duties listed at Part C of the Appendix shall prevail) and any Additional Duties.

**1.3 Attendance at meetings**

In performing the Duties, the Consultant shall arrange and attend all meetings necessary to their proper execution, and as a minimum those listed in Clause 1.18 of the Scheme Particulars set out in Part B of the Appendix.

**1.4 Additional Duties**

The Consultant shall not undertake any work, which they consider additional to the Duties listed at Part C of the Appendix without the prior written agreement of the Board. Any such approval shall indicate the maximum budget for fees and works where appropriate, which should not be exceeded without further approval having been obtained. These shall be conditions precedent to any payment being due from the Board for Additional Duties.

**1.5 Information from the Consultant**

The Consultant shall provide information to the Board in accordance with the indicative target dates defined in Clause 1.7 of the Scheme Particulars set out in Part B of the Appendix. The Consultant will be expected to prepare and actively manage a detailed project programme as per Clause 1.12 of these Conditions of Appointment.

**1.6 Duty of care**

The Consultant is to exercise reasonable skill, care and diligence in the discharge of the Duties. Submission of drawings, calculations, specification and other documentation produced by the Consultant for comment by the Board shall not relieve the Consultant of this responsibility. If in the performance of the Duties the Consultant has discretion exercisable as between the Board and any other body the Consultant shall exercise its discretion fairly.

**1.7 Co-ordination of consultant's services**

Co-ordination and integration of the activities of Technical Advisory Team, however employed, shall be the responsibility of the Lead Consultant. This includes co-ordination of the works by planning, environmental and transportation consultants.

**1.8 Collaboration between consultants**

The Consultant shall collaborate with other professional consultants employed by the Board.

The Consultant shall procure that its Sub-Consultants appointed pursuant to Clause 1.29 of these Conditions of Appointment shall take account of the role of the Lead Consultant and collaborate with other members of the Technical Advisory Team and with other professional consultants employed by the Board.

**1.9 Changes caused by the Board**

The Consultant shall provide the Board with the cost and programme consequences of any material alteration, addition to or omission from the project caused or proposed by the Project Director. This information is to be provided before the Board takes a final decision.

**1.10 Changes not caused by the Board**

The Consultant shall not cause to be made any material alteration, addition to or omission from the approved Project Documentation. The Consultant shall promptly inform the Board in writing of anything that the likely effect of which the Consultant believes would be to either vary the Scheme, or to materially change the financial viability, quality or function of the Scheme.

**1.11 Progression between Work Stages**

The Consultant shall obtain approval in writing from the Board before proceeding between the Work Stages described in Part C of the Appendix. Only those Work Stages authorised shall be eligible for payment. Without prejudice to clause 1.33, the Board reserves the right to terminate the commission at the end of each individual Work Stage.

**1.12 Master Programme**

The Consultant shall prepare and maintain a detailed project programme for (i) each Work Stage and (ii) the overall procurement timetable and programme until appointment of the Contractor (the "Programme"). The Programme shall break down tasks and times for all participants within each Work Stage. The Programme will be submitted to the Project Director for review and approval prior to issue. The Consultant will be responsible for maintaining the Programme and to review on a regular basis with the Board to monitor progress and the implementation of any corrective action agreed by the Board.

**1.13 Site Inspection**

From Work Stage 3 the Consultant will be expected to make frequent visits to site during construction stage, suitable accommodation will be provided, as noted below.

**1.14 Construction (Design and Management) Regulations 2007**

Insofar as the same apply to the performance of the Duties the Lead Consultant warrants and undertakes to the Board that it has and shall maintain for the duration of the Project the competence and resources to fulfill the obligations of a designer and CDM Co-ordinator pursuant to the CDM Regulations and shall comply with all the requirements of the CDM Regulations and shall co-operate with other consultants and the Contractor to allow such parties to fulfill the obligations incumbent on them pursuant to the CDM Regulations.

**Obligations of the Board**

**1.15 Duties of the Board**

The Board shall nominate a Board, to enable the proper performance of the Duties.

**Construction (Design and Management) Regulations 2007**

**1.16** The Board shall appoint a Principal Contractor, in accordance with the provision of the Construction (Design and Management) Regulations 2007

**Information from the Board**

**1.17** The Project Director will be responsible for providing information and the giving of instructions on behalf of the Board under this Agreement. Unless and until the Board notifies the Consultant otherwise, the Project Director shall be deemed to have the full authority of the Board under the Agreement and the Board may replace the Project Director from time to time by notice to the Consultant. .

**Provision of site accommodation and facilities during construction stage**

**1.18** The Board will be responsible for the provision of suitable site based accommodation for the Lead Consultant team, for the use of Consultant's staff associated with the Scheme. The provision of these facilities will be for the duration of the works on site and funded through the construction contract.

**Ownership of documents and copyright**

**Copyright entitlement**

**1.19** The copyright and all other intellectual property rights in all drawings, documents reports, specifications, pricing documents, calculations and other documents provided by the Consultant in connection with the Scheme ("Documents") shall be vested in the Consultant. The Consultant hereby grants to the Board an irrevocable, royalty-free, non-exclusive licence to copy, use and reproduce all Documents and the designs contained within them (including electronically stored information) prepared or to be prepared by or on behalf of the Consultant (the "Copyright Materials") for any purpose whatsoever related to the Scheme and/or the site of the Scheme. The Consultant warrants that no Copyright Materials shall infringe any third party rights whatsoever. The Consultant shall provide to the Board such copies of the Copyright Materials as the Board may reasonably require. The Consultant hereby waives in favour of the Board all moral rights which they might be deemed to possess as authors of the Copyright Materials under the Copyright Designs and Patents Act 1988. For the avoidance of doubt, the provisions of this clause 1.19 shall survive termination of this Agreement or the Consultant's engagement hereunder for any reason whatsoever.

**Documentation provided by the Board**

**1.20** Where the Board provides standard documentation, including drawings, copyright of such documentation and drawings shall remain vested in the Board.

**Consultant's Licence and Restrictions**

**1.21(a)** The Consultant and its Sub-Consultants shall have a licence to copy and use such drawings, reports, specifications, pricing documents, calculations and other information required for performance of the Duties. The Board shall not be liable for any such use by the Consultant of any drawings or other documents for any purpose other than for which the same were prepared and provided by the Board.

**Consultant's rights of publication**

**1.21(b)** The Consultant shall not communicate with the media or any outside body or publish or display alone or in conjunction with any other person, any articles, photographs or other illustrations relating to the Scheme without prior written consent from the Board, which consent shall not be unreasonably withheld.

**1.22 Board's use of priced documents**

The Board may use priced documents for the Scheme, without prior approval by the Consultant.

**1.23 Freedom of Information**

The Consultant acknowledges that the Board is obliged to comply with the Freedom of Information (Scotland) Act 2002 ("the Act") and any codes of practice applicable from time to time relating to access to public authorities' information. The Consultant shall (and shall procure that each of its Sub-Consultants shall) co-operate, facilitate, support and assist the Board to comply with the Act and any codes of practice applicable from time to time relating to access to public authorities' information including by providing documents and other information relating to the Scheme within the timescales necessary to allow the Board to comply with its obligations and duties under the Act and the codes of practice.

All information submitted to the Board may need to be disclosed and/or published by the Board. Without prejudice to the foregoing generality, the Board may disclose information in compliance with the Act, (the decisions of the Board in the interpretation thereof shall be final and conclusive in any dispute, difference or question arising in respect of disclosure under its terms), any other law, or, as a consequence of judicial order, or order by any court or tribunal with the authority to order disclosure. Further, the Board may also disclose all information submitted to them to the Scottish or the United Kingdom Parliament or any other office or agency of Her Majesty's Government in Scotland or the United Kingdom, and their servants or agents. When disclosing such information to either the Scottish Parliament or the United Kingdom Parliament it is recognised and agreed by both parties that the Board shall if they see fit disclose such information but are unable to impose any restriction upon the information that they provide to Members of the Scottish Parliament, or Members of the United Kingdom Parliament; such disclosure shall not be treated as a breach of this Agreement.

The Board acknowledges that it is incumbent upon it to timeously pass on any request for information under the Act to enable the Consultant comply with its obligations under this clause.

**Professional Indemnity insurance**

**1.24 Extent of insurance cover**

The Lead Consultant shall take out and maintain from the date of commencement of the Duties professional indemnity insurance of not less than £10 million pounds in respect of each and every claim. The professional indemnity insurance shall be maintained until the expiration of Twelve (12) years, provided that it can be obtained at reasonable market rates and terms, from the date of completion of the Scheme

**1.24A** The Lead Consultant shall procure that each person (which includes a firm or company) forming the Technical Advisory Team take out and maintain from the date of commencement of their individual professional duties, professional indemnity insurance. The professional indemnity insurance shall be maintained until the expiration of twelve (12) years, provided that it can be obtained at reasonable market rates and terms, from the date of completion of the project. The minimum level of professional indemnity insurance cover required for each person shall be as set out in the table below:

| Team Role | Insurance level in respect of each and every claim |
|---|---|
| HLM Architects | £10million |
| Buchan Associates – healthcare planning | £5million |
| URS – civil and structural engineer | £10million |
| Wallace Whittle – building services | £10million |

For the purposes of Clause 1.24 and 1.24A the claims and financial history of the Consultant shall be disregarded in ascertaining whether or not rates and terms are reasonable.

**1.25 Professional indemnity insurance broker's certificate**

The Consultant shall annually provide to the Board a broker's certificate or similar and shall procure that

each member of the Technical Advisory Team provide a broker's certificate or similar as evidence that professional indemnity insurance is being maintained.

## Certification

**1.26 Certification generally**

The Consultant shall provide the Board with completed certificates issued by the Consultant pursuant to the building contract when required to do so.

## Assignment and sub-contracting

**1.27 Assignation by the Consultant**

The Consultant shall not assign the whole or part of the benefit or in any way transfer the obligations of this Agreement or any part thereof without the written consent of the Board.

**1.28 Assignation by the Board**

The Board reserves the right to assign the whole or any part of the benefits or transfer obligations of the Agreement or any part thereof to another Scottish NHS organisation without the consent of the Consultant.

**1.29 Sub-contracting**

The Lead Consultant shall not sub-contract any of the Duties without the written consent of the Board. The Lead Consultant shall be fully responsible and liable for the performance of the Duties by any Sub-Consultant notwithstanding that the consent of the Board has been obtained.

The Lead Consultant shall enter into Sub-Consultant Agreements with each Sub-Consultant engaged by it in connection with the Scheme in substantially equivalent terms to this Agreement and shall within 14 days of execution of the Sub-Consultant Agreement deliver 2 certified true copies of such Sub-Consultant Agreements to the Board.

The Lead Consultant shall comply with its obligations and shall ensure compliance by each Sub-Consultant with their respective obligations in the Sub-Consultant Agreement(s). The Lead Consultant shall not waive any of the Sub-Consultants obligations or liabilities, or release the Sub-Consultant of its obligations or compromise or settle any claims against or from the Sub-Consultant without the prior written consent of the Board. Such Sub-Consultant Agreement shall not be assignable by either party to it without the prior written consent of the Board, (which consent may be granted or withheld at the absolute discretion of the Board).

The Lead Consultant shall be responsible for any fees or expenses claimable by the Sub-Consultants in terms of the Sub-Consultant Agreement. Such fees and expenses shall be deemed to be included in the Lead Consultants remuneration including its fees and expenses in terms of this Agreement. The Board shall not be obliged to make any payment attributable to Duties performed by a Sub-Consultant where the written consent of the Board was not obtained in respect of such Sub-Consultants appointment. The Lead Consultant shall not (i) vary, release or waive in whole or in part any of the obligations of the Sub-Consultants arising out or in connection with the Sub-Consultant Agreements nor terminate any of the Sub-Consultant Agreements, or any Sub-Consultant's employment thereunder, in whole or in part without the prior written consent of the Board; and / or (ii) prejudice any rights or remedies which the Board may have under a collateral warranty granted by a Sub-Consultant.

Notwithstanding the foregoing the Lead Consultant shall not require to obtain consent from the Board in respect of the appointment of the following Sub-Consultants and organisations forming part of the Technical Advisory Team or delivering services to the Technical Advisory Team:

- HLM Architects – architect for the adult and children's hospital (sub-contracting to BMJ Architects – architect for the laboratory block and all projects; Hirst Landscape Architects –

landscape architect; and Buro Happold – fire engineers);
- Buchan Associates – healthcare planning for all projects;
- URS – civil and structural engineer for all projects; and
- Wallace Whittle – building services for the adult and children's hospital and laboratory (sub-contracting to Harley Haddow - building services for the adult and children's hospital).

**1.30 Sub-Consultant collateral warranties**

The Consultant shall within 30 days of appointment of a Sub-Consultant deliver to the Board collateral warranty agreements (incorporating step-in rights) from each Sub-Consultant (duly executed in a self proving manner by both parties) in favour of the Board in terms of the draft collateral warranty agreement set out in Appendix F.

**1.31 Commercial Interests**

Any commercial interests held by Partners/Directors/Principals of the Consultant in firms engaged in manufacturing, contracting or commissioning in building and engineering services, other services or construction, shall be declared to the Project Director prior to conclusion of this Agreement, or if appointed without delay should such event occur.

**Variation, extension, suspension or termination**

**1.32 Variation or extension by the Board**

The Board may vary or extend in time the performance of the whole or part of the agreed Duties by giving reasonable notice in writing to the Consultant. In such notice the Board shall specify the Duties affected.

**1.33 Suspension or termination by the Board**

The Board may suspend or terminate the performance of the whole or part of the Duties by giving reasonable notice in writing to the Consultant. In such notice the Board shall specify those of the Duties affected and the reason for suspension or termination. On suspension or termination of Agreement and subject to Clause 1.39 of these Conditions of Appointment payment shall be made in accordance with Clause 1.16 of Part D of the Appendix.

**1.34 Suspension or termination by the Board shall be permitted in the following circumstances:**

- the Board has decided to suspend or terminate the Scheme;
- non-performance by the Consultant;
- breach of the provisions of this Agreement by the Consultant;
- the Consultant becoming bankrupt or insolvent;
- the Board has decided to terminate the Agreement at the conclusion of a Work Stage.

**1.35 Resumption of Duties**

If the Consultant has not been given instruction to resume any work suspended under Clauses 1.33 or 1.34 of these Conditions of Appointment within six months from the date of suspension, the Consultant may make written request for such instructions, which must be given in writing. If these have not been received within 30 days of the date of such request the Consultant shall have the right to treat the Agreement as terminated.

**1.36 Suspension or termination by the Consultant**

The Lead Consultant may suspend or terminate the performance of the Duties on the expiry of reasonable notice given in writing to the Board. In such notice the Consultant shall specify the duties affected and the reason for suspension or termination.

**1.37 Suspension or termination by the Consultant shall be permitted on the following circumstances:**

- the Board has not provided an instruction to resume work under Clause 1.35 of these

Conditions of Appointment;

- breach of the provisions of this Agreement by the Board.

**1.38 Death or incapacity of the Consultant's key personnel**

Should the Consultant through death or incapacity be unable to perform the whole or part of agreed duties, this Agreement shall thereby be terminated.

**1.39 Delivery of documents**

On termination of the performance of the whole or part of the Duties and on satisfactory delivery of all drawings, reports, calculations, production information and any other documentation prepared by or on behalf of the Lead Consultant to the Board, the Lead Consultant shall be paid all due fees and expenses in accordance with Clause 1.16 of Part D of the Appendix.

**Settlement of disputes**

**1.40 Adjudication**

**1.40.1** Any difference or dispute arising out of this Agreement may be referred to an adjudicator.

**1.40.2** The party that is first made aware of the occurrence of the difference or dispute shall give notice to the other party of their intention to refer such dispute or difference to adjudication and shall then refer the dispute to an adjudicator agreed between the parties, or failing agreement within 5 days, appointed by RICS, Scottish Branch. A copy of the notice sent to the Adjudicator shall be sent to the other party. The notice shall specify the matter in dispute and set out all the principal facts and arguments relating to it. Copies of all relevant documentation shall be attached to the notice.

**1.40.3** The parties shall use reasonable endeavors to ensure that the Adjudicator is appointed as soon as possible and in any event within 7 days of the reference to adjudication.

**1.40.4** The Adjudicator shall notify his/her decision to the parties within 28 days from the date of receipt of the notice required under Clause 1.40.2 of these Conditions of Appointment or such longer period agreed by the parties.

**1.40.5** Without prejudice to Clause 1.40.4 the Adjudicator may extend the 28-day period by 14 days, with the consent of the party by whom the dispute was referred.

**1.40.6** The Adjudicator shall be obliged to act impartially in determining any dispute referred to him under Clause 1.40.2 of these Conditions of Appointment and shall be entitled to take the initiative in ascertaining the facts and the law.

**1.40.7** The decision of the Adjudicator on any matter will be binding until the dispute is finally determined by legal proceedings or by agreement.

**1.40.8** The Adjudicator shall not be liable to the parties for breach of duty unless in bad faith.

**1.40.9** Payment of the Adjudicator's fees shall be shared equally between the parties.

**1.40.10** During the process of adjudication the performance of the Duties shall continue as if there were no difference or dispute.

**1.40.11** If the Adjudicator resigns or is unable to act, the parties shall choose a new adjudicator jointly.

**1.40.12** If the parties have not chosen a new adjudicator jointly within 28 days of the Adjudicator resigning or becoming unable to act, then the President or Vice President of the RICS shall be requested to

nominate a new adjudicator.

**Discrimination and Equal Opportunities**

**1.41** The Consultant shall not, and shall take all reasonable steps to ensure that all employees, workers, agents, or Sub-Consultants of the Consultant shall not, unlawfully discriminate within the meaning and scope of the provisions of the following legislation, or any statutory modifications or re-enactment thereof:

- The Equal Pay Act 1970;
- The Sex Discrimination Act 1975;
- The Race Relations Act 1976;
- The Disability Discrimination Act 1995;
- The Employment Equality (Religion or Belief) Regulations 2003;
- The Employment Equality (Sexual Orientation) Regulations 2003;
- The Employment Equality (Age) Regulations 2006 and
- The Equality Act 2010.

**1.42** The Consultant shall observe, and shall take all reasonable steps to ensure that all employees, workers, agents, or sub-contractors of the Consultant shall observe, any relevant codes of practice (and any amended or replacement codes from time to time in place) in respect of employment issued by any of the following bodies:

- The Commission for Racial Equality;
- The Disability Rights Commission; or
- The Equal Opportunities Commission;

or any replacement codes of practice issued by the Commission for Equality and Human Rights.

**Governing laws**

**1.43** The laws of Scotland shall govern the application of these conditions.

**Limitation of Liability**

**1.44** Subject to clause 1.45, the liability of the Consultant in respect of breach of contract or in delict (including negligence) shall not exceed £10,000,000 in respect of each and every claim, save in respect of any liability relating to: death or personal injury; wilful misconduct and/or fraud.

**1.45** The liability of the Consultant in respect of breach of contract or in delict directly relating to acts or omissions of Buchan Associates shall not exceed £5,000,000, save in respect of any liability relating to: death or personal injury; gross negligence, willful misconduct and/or fraud.

APPENDIX PART B – SCHEME PARTICULARS

**Scheme Particulars**

**Scope of Agreement / Scheme**

**1.1 Location**
Southern General Hospital
1345 Govan Road
Glasgow G51 4TF

**1.2 General description**
The Duties are required to assist the Board to develop a full brief, tender and all Employer's Requirements documentation to enable engagement in a public finance procurement for the New South Glasgow Hospital Project, to provide the hospital facilities as listed below. The Duties include the management of the Building Contract with a D&B consortia, through to the successful completion of the works, commissioning and equipping, transfer and occupation.

Key elements of the project are (for information):

- Development of an integrated adult acute and children's hospital proving the full range of acute health services.
- Development of a new Laboratory facility including Mortuary and Post-Mortem Services, Biochemistry, Haematology and Blood Transfusion.
- Provision of a rooftop helipad.
- Possible provision of non-clinical services such as Hard FM services to the new facilities by the D&B contractor for an initial 3-5 year period.
- The supply and installation of Group 1 equipment and location and/or fitting of Group 2 equipment supplied by the Board.
- Information Management and Technology (IM&T) – Out with this project, the Board is procuring software and end-use hardware as part of a separate IM&T project.

The Board requires the provision of integrated facilities that are readily adaptable to changing clinical practice and makes the best use of new technologies. The functional content of the project is envisaged to include the following new build accommodation, note there will be some flexibility around the content noted below as the scope of the Scheme is further developed during Work Stage 1A.

**1.3 The New South Glasgow Hospital - Adult Acute**
1109 in-patient beds and 12-bed medical day unit planned within the New South build.

- In Patient Accommodation

435 surgical beds (gen. Surgery, orthopaedics, urology, vascular, ENT, renal); 571 medical beds. ITU/HDU/CCU – 77 beds total. Acute Stroke – 26 beds

- Out Patient Accommodation

Full range of General outpatient clinics including, among others, diabetic unit, respiratory, haematology, urology etc.

- Day Services

12 medical day bed area; 30-stationed dialysis unit

- Treatment & Diagnostic Services

Accident & Emergency, 20 operating theatres, imaging, Endoscopy and rehabilitation.

- Clinical Support Services

Pharmacy dispensary, medical physics, medical illustration. (laboratory services linked to hospital by underground route and pneumatic tube system, aseptic unit within the children's hospital.)

- Non Clinical Support Services

Main entrance, medical records, administration, chaplaincy, social work, staff changing, switchboard, estates, facilities, security, catering, portering, domestic, management and energy centre.

### 1.4 New Children's Hospital – Acute

There are circa 240 beds planned within the new build. About 20% of the beds will be for day patents and the rest inpatients. The hospital will provide DGH services, tertiary and some national services. Outpatient Accommodation
Full range of Children's outpatient clinics including audiology, general paediatrics, orthopaedics, ENT etc

Day Services
Circa 10 medical day beds; 4 dialysis stations and circa 25 day surgery beds.

Treatment & Diagnostic
Accident and Emergency, minor injuries, Imaging, 7 theatres, rehabilitation

Clinical Support Services
Aseptic unit, pharmacy, medical physics, medical illustration

Non-Clinical Support Services
Facilities, ancillary services, administration, spiritual services, medical records, staff change, staff dining.

### 1.5 New Laboratory Building

This build will be one of two major Laboratory sites in Glasgow. The services planned to be delivered from the new Laboratory build at Southern General Hospital are as follows: Biochemistry, Haematology, Blood Transfusion, mortuary and post mortem services. It is worth noting that the mortuary and post mortem facilities will include the re-provision of the Glasgow City mortuary, which also provides forensic services for the City of Glasgow.

The Board proposes to procure the new laboratory project through a single stage D&B process. The Lead Consultant team will be responsible for developing an exemplar design to 1:200 with user groups for inclusion in a full set of Employers Requirements documentation. The Board will require a separate design team from within the Lead Consultant's team to develop these proposals and provide a full Employer's Agent role during construction phase.

The current planned floor areas are as follows; Haematology 1,800 sq.m, Biochemistry 1,900 sq.m, Mortuary and City Mortuary 1,500 sq.m.

The current timetable for the new Laboratory Block is as follows;

| Milestone/Process | Target Date |
|---|---|
| Appoint Lead Consultant | 1 Sept 2008 |
| User group meetings, brief and design development | Sept / Nov2008 |
| Further Design Development | Dec 2008 / Jan 2009 |
| Prepare Employers Requirements documentation | Oct 2008 / Jan 2009 |
| OJEU – D&B consortia | Nov / Dec 2008 |
| Issue ER's and Tender | February 2009 |
| Tender period | Feb /May 2009 |
| Evaluation | June 2009 |
| Construction – start | July 2009 |
| Construction – complete | Sept 2010 |
| Commission | Oct/Nov 2010 |
| Operational | Dec 2010 |

### 1.6 New Build Floor Areas

As a guide to the extent of the build proposals, the current gross internal floor area for the new build proposals are noted below; these figures include allowances for departmental circulation and building wide communications. Plans also include a remote Energy Centre and Service yard with subterranean link to the basement of the new Adult and Children's Hospital.

| | |
|---|---|
| Adult Acute Hospital | 100,624 sq.m |
| Children's Hospital | 33,007 sq.m |
| Laboratory Facility | 5,200 sq.m |
| **Total** | 138,831 sq.m |

The redevelopment of the campus and clinical services at the Southern General Hospital will most likely be undertaken through a multi phase programme of refurbishment, decant, demolition and new build over a works period of at least 4-5 years. The Board is currently initiating a programme of enabling work over the next 2 years to establish an un-encumbered site for the new hospital development. These works involve the relocation of hospital services, diversion of main hospital M&E services, demolition of redundant buildings and general site clearance and preparation works. These enabling works will be funded from the Board's ordinary capital programme. The Lead Consultant will be required to co-ordinate with design teams delivering these projects to ensure all works are sequenced to meet the desired start date on site of Summer 2010.

### 1.7 Project Target dates

The timetable below indicates the Board's indicative timetable for the procurement. Provisional dates for a two-stage D&B process have been included for information only at this stage.

| Milestone/Process | Target Date |
|---|---|
| Publication of OJEU Notice | 6th May 2008 |
| Deadline for receipt of requests to participate/submission of responses to the Pre-Qualification Questionnaire (PQQ) | 5th June 2008 |
| Issue of Invitation to Tender (ITT) Documentation to selected Applicants | 19th June 2008 |
| Deadline for submission of response to ITT | 31st July 2008 |
| Evaluation of ITT Submissions | 12th August 2008 |
| Appointment of Technical Adviser | 22nd August 2008 |
| Brief Development / Masterplan | September-November 2008 |
| Employers Requirements - Stage 1 | September- December 2008 |
| OJEU Construction Teams | October – Dec 2008 |
| Stage 1 Tender Period | January-May 2009 |
| Stage 1 Evaluation – Selection Preferred Bidder | June 2009 |
| Stage 2 Tender Development - Planning application | July 2009 |
| Stage 2 Evaluation | April 2010 |
| Negotiate GMP, FBC and Contract Close | July 2010 |
| Phase 1 Complete – New Children's Hospital | Ist qtr 2013 |
| Phase 2 Complete – New Adult Acute Hospital | 3rd qtr 2014 |
| Commissioning | 4-5 months |
| 12 Months Defects Period – Acute Hospital | 3rd qtr 2015 |

**1.8 Estimated cost**

The current estimated capital cost of the new Adult Acute, Children's Hospital and Laboratory Project as of April 2008 is c. £550 million, this cost includes equipment, VAT, and fees but excludes inflation to mid build and contingencies. The split between the Projects of this cost is approximately New Adult and Children's Hospital - £530m; new Laboratory Project £21 m.

**1.9 Programme Sponsor**

Ms Helen Byrne
Director of Acute Services Strategy, Implementation and Planning
NHS Greater Glasgow & Clyde
Acute Services Strategy Implementation and Planning Directorate
Management Building
1345 Govan Road
Glasgow G51 4TF

**1.10 Project Director**

Mr Alan Seabourne
Project Director - New South Glasgow Hospitals Project
Project Office
St Andrew's House
80 Queen Elizabeth Avenue
Hillington
Glasgow
G52 4NQ
[redacted]

**1.11 Board Technical Lead**

Mr Peter Moir
Head of Major Projects
Project Offices
St Andrew's House
80 Queen Elizabeth Avenue
Hillington
Glasgow
G52 4NQ
[redacted]

**1.12 Lead Consultant Team**

It is the Board's intention to appoint the following disciplines as part of the Lead Consultant team. The team will be lead by the Lead Consultant/Project Manager; a single appointment will be made with this company for the whole team. Billing on behalf of the whole team will undertaken by the Lead Consultant, in short fee notes will be from single source and not individual team members.

- Lead Consultant / Project Management
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

- Procurement and Construction Management Advice
- Landscape Architect

The Board will expect the appointed Lead Consultant to work with the established Project network, including all appointed advisers; all Project related documentation, designs and specification, budgets and programmes developed to date as part of Stage 1, subject to any changes agreed with the Project Director or their nominee.

The Board has existing Consultancy agreements for the supply the following services, these appointments have been made and do not form part of this commission. The Lead Consultant team will be expected to work with these advisers, and acceptance of the commission will be conditional on this.

- Legal – Shepherd & Wedderburn LLP.
- Financial – Ernst & Young LLP.
- Town Planning Consultant – Keppie Planning.
- Environmental Consultant– Ironside Farrar.
- Transportation Consultant – JMP Consultants Ltd.
- The Carbon Trust and sub-consultant.

**1.13**

The Board currently proposes the following Contract Strategy, this is subject to Government Gateway review and approval.

- New Adult Acute and Children's Hospital Project – Two stage Design & Build.
- New Laboratory Project – Single stage Design & Build

**1.14 Site Inspection Staff**

It is the Board's intention to make direct appointments for the under-noted roles, some will be made for the duration of the works contract others for particular stages, the appointments will be full-time. The Lead Consultant team will be required to structure and manage the selection and appointment process for all site inspection staff on behalf of the Board, although the contractual and payment arrangements will be between the Board and the respective companies.

- Building Clerk of Works (4)
- M&E Clerk of Works (3)
- Site Engineer (2) – sub-structure, drainage, groundworks and frame.

The Lead Consultant will manage and direct the work of the site inspectorate staff. Site Inspectorate staff will be based on site for the duration of the works contract.

**1.15 Details of documentation**

The Board requires two paper copies of all documents, reports, budgets, programmes, drawings, maps, 3-D graphics and animations, photographs and other documents or reports produced by the Consultant. In addition, all the above must be provided in electronic format as noted below;

| | |
|---|---|
| Cost plan | MS Excel at all stages |
| Text | MS Word, MS Excel, MS Access. |
| Programmes | MS Project. |
| Drawings | Autocad at all stages. |
| 3D / Animations | Various. |

Working documents will require being in base software programme format e.g. not Adobe Acrobat. Consultants may use Adobe Acrobat for working use and for email while providing final versions of documents, drawings etc., in base software as noted above.

**1.16 Board's procedures / requirements**

- NHS GG&C PSC / OBC documentation and OBC Stage Design Report as prepared by others, including all associated drawings, specifications and Project costs.

- Scottish Capital Investment Manual (SCIM).
- SEHD – Procode V 2.0
- The Board's Design Action Plan
- Health Facilities Scotland – SHPN and/or NHS HBN and HTM's.
- NHS Estates and others guidance documents such as AEDET, NHS NEAT, or BREEAM.
- Government Gateway reviews will be undertaken at various stages (see separate section).
- OGC Guidance on Competitive Dialogue and general project delivery. (use of CD unlikely).
- FBC

### 1.17 OGC Gateway Reviews

The Scheme will be subject to external review by a Gateway Review Panel at various stages of the Scheme and the Lead Consultant team will be expected to assist the Board's Project Team at the following stages;

Gateway Review 0 – Strategy assessment (2 reviews).
Gateway Review 2 – Procurement strategy.
Gateway Review 3 – Investment Decision.
Gateway Review 4 – Readiness for Service.
Gateway Review 5 – Benefits Realisation.

Input from the Lead Consultant will be focused to technical elements associated with each review, and cover matters such as programme, cost management, procurement strategy and structure, project specification and buildability. Each Gateway Review will last approximately 2- 3 days and it is likely that the Lead Consultant will need to prepare a status report on technical elements and be available for interview for 2-3 hours.

### 1.18 Meetings

The Lead Consultant team will be required to attend regular progress and associated briefing meetings at each stage of the Scheme, which are typical for this form of procurement and consultancy service. These meetings will generally be held within one of the Board's project offices within the Glasgow conurbation, costs for attendance at all meetings should be included within your capped lump sum fee proposal.

During key stages of the procurement process the Board will requires some or all of the TA team to be based in the ASR Project Offices at Hillington, to ensure good continuity and communication is maintained at critical times of the programme. During the construction phase, the Board's Project Team will have a presence within the site compound, and suitable project offices accommodation will be provided for key members of the Lead Consultant team as well.

The Lead Consultant will require to be suitably represented at all meetings throughout the duration of the project. Regular meetings will be held throughout the commission, some of the key meetings will be;

- The Lead Consultant will meet at least once a week with the Project Director or their nominee throughout all stages of the project from commencement to completion of the commission.
- Open days and presentations during bidder selection Stage 1A.
- 2-3 meetings a week throughout Stage 1A to develop the Employer's Requirements documentation, note this may run into multiple daily meetings at certain stages.
- Weekly meetings throughout Stage 1A to develop and adapt the current PSC design solution with the Board's Project Team and departmental user groups. This will involve the further development of the existing PSC departmental relationship drawings(1:500) as well as the site master plan (1:500) to reflect changes to the Board's phasing of the overall redevelopment proposals. (See section 6.0)
- Regular meetings during Stage 1B bid process to suit number of bidders (3) to ensure adequately briefed, for design and bid development and for commercial and financial negotiations.
- Regular meetings during Stage 2 process during bid and design development. Again meetings will frequently be held with Project Team, user groups to assist design development with bidder design team, for commercial meetings with bid team
- Regular meetings during Stage 2 preferred bidder stage, and evaluation process to include weekly bidder meetings up to contract close.

- Weekly in house bid team meeting up to contract close.
- Provide technical input, review and comment and take active involvement in the room layout review and approval process both before and after contract close. Note, room layout drawings will be developed for all room types and variants on a room type.
- Monthly Project Executive and Procurement & Finance meetings for duration of commission, including regular reporting and progress update reports for these meetings.
- Monthly project progress/technical meetings during construction & commissioning phase and one site meeting per month.
- Bi-weekly for 3 months then weekly commissioning team meetings for 12 months prior to completion.
- User consultation/design development meetings, at least weekly during Stage 1 & 2.

Meetings with Planners, Roads Department, Local Authority Flood prevention, SEPA, Scottish Water and Fire Brigade as well as NHS Fire Officer, Health Protection Agency . With the exception of meetings with the Planning Authority, meetings with these individuals should be infrequent.

The team may also be called up to support the Board and Project Team at public presentations out with normal working hours, this should be an infrequent occurrence.

Meetings with the Hospital Manager and Operational Estates staff to confirm operational issues and co-ordinate with site infrastructure.

Presentations to a number of internal stakeholders i.e. Board Members, Clinical Groups, etc.

### 1.19 Continuity with other projects and site operations

The team will be responsible for ensuring the maintenance and safe operation of the hospital site in respect of the various projects they are managing, as well as full co-ordination with any associated works contracts. The team will be responsible for planning and programming of any associated works to maintain access to all areas. All works programmes must be fully consulted with the Project Director or their nominee and approved by same.

### 1.20 Post Project Evaluation (PPE)

The team will actively assist the Board to develop and undertake the PPE process throughout the life of the project, and assist in the preparation and completion of this documentation no later than 9 months post occupation of the new facilities.

### 1.21 Further Development of the Board's OBC/PSC Design Exemplar

The Board have developed a PSC design exemplar through the first stage of a PPP procurement strategy. While this strategy has now changed course towards a public finance route, a good deal of the design and information prepared for OBC is still valid.

As part of the development of the OBC the Board looked at alternative options to re-use some of the existing buildings on the campus for administration and support functions, this was driven by capex cost pressures, although these building may eventually be replaced by new build's at a later date.

The PSC design therefore requires to be revised and updated before it can be used as the design exemplar and form part of the Employers Requirements documentation. Copies of site plans for Option 1 and Option1A (Preferred option) are included in Appendix G, Option 1A will require the redesign of some of the roadways to the main frontage of the planned new hospitals, with resultant impact on the podium footprint. The location of the new Laboratory Project and the design and layout of the Service yard and Energy Centre all require further work before the design exemplar is complete. This work is likely to take 4-5 months from commencement up to the issue of the Stage 1 Employer's Requirements tender, the Board have decided to provide Stage 1 bidders with an exempar design on which to develop their bid proposals.

## 1.22 Masterplan

In drafting the conditional planning report for Committee, Glasgow City Council Planners have made a condition of the first reserved matters application on campus that .....

'a finalised masterplan which re-affirms an overall vision, set within a clear design and development framework, reflecting the strategic design guidance on built form and landscape contained in the South Glasgow Hospitals Campus Development Plan, April 2007 shall be submitted and agreed in writing by the Planning Authority. The submission shall include (i) an audit of the changes between the finalised masterplan and the indicative Campus Plan ref 05017-02-100 Development Option C; identified in the Campus Development Plan and (ii) an assessment of the extent to which the finalised masterplan accords with the Environmental Statement (ES) submitted as part of the outline planning application. Thereafter the Council will determine whether the finalised masterplan accords with the outline consent and whether a reserved matters/full planning application accompanied by an EA is required.

The Board will therefore require the site plan to be updated to incorporate the retention of the Surgical Blocks and re-routing of the main entrance road, and Fastlink routes. This reflects the change from Option 1 to Option 1A referred to above and as indicated on drawings included within Appendix G. For the avoidance of doubt, the Lead Consultant team will be required to revise the site plan to reflect the layout Option 1A which has never been fully developed to scale 1:500.

On completion the team will need to update the Campus Development Plan, the Board are unclear quite when this should be undertaken, as it will need to reflect the final proposals developed by the preferred bidder as they enter the detailed planning process for their Scheme with Glasgow City Council.

## APPENDIX PART C – CONSULTANTS' DUTIES

### Lead Consultant Technical Advisory Team – Scope Of Services

The Lead Consultant / Technical Advisory Team will provide guidance, advice and active input to the Board in the following key area's throughout the duration of the commission, the Lead Consultant team will be expected to manage and direct the process on behalf of the Board. The Team will be responsible for the procurement of;

- The New Adult and Children's Hospital Project – two stage D&B process.
- The New Laboratory Project – single stage D&B process.

The Board require the following consultancy services as a minimum;

- Lead Consultant / Project Manager
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Procurement and Construction Management advice.
- Landscape Architect.
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

**Note: the process described in this section envisages a two stage process, with down selection 3-1 at the end of Stage 1 B. If the review of procurement strategy determines a 3-2-1 process, with 2 bidders fully participating in Stage 2, then Board reserve the right to negotiate the lump sum fees with the Lead Consultant team.**

---

### General Duties of the Team

- Attend relevant meetings of Project Executive & Project Team and support the Board as required. Refer Section 1.18 of the Scheme Particulars set out in Part B of the Appendix.
- Remain up to date and responsive to changes in legislation or guidance on all matters relative to the project.
- Be responsive to demands for input at short notice.
- Advise the Board on general issues of on-going advice on government policy; compliance with SCIM, SEHD, DoH, OGC and Treasury procedures; compliance with Local Council planning procedures. Compliance with legislation and NHS Design Guidance.
- Ensure that advice is consistent with SEHD, DoH, NEC, SOPC4 standard form contract and Treasury Taskforce model contract templates.
- Work closely with other advisors, legal, financial, planning, transportation etc.
- Assist the Board with developing strategies for FM & lifecycle improvements and monitoring on a 1) non PPP contract, 2) installation of Group 2, 3 and 4 equipment, and 3) existing, retained estate and its linkage to the new build projects.
- Participate in SGHD review at various stages throughout the life of the project, teams should anticipate to be involved in:
  - PUK – 3 reviews
  - Gateway – 4 reviews
  - Architecture+Design Scotland – 2 reviews
- Team to familiarise themselves with all existing site data, all project related design and technical data developed during PSC / OBC stage.
- All technical data related to Board funded enabling works which will be underway during period 2008 – 2010. Note the Lead Consultant team will not be delivering these projects, but need to be aware of

them for any impact on NSGH projects.

**Key Team Activities and Tasks for Stage 1A - Preparation of Employers Requirements Documentation**

Preparation of OJEU, PQQ, MOI for D&B consortia; Employers Requirements documentation and full Stage 1 B tender and contract information. Design development of site masterplan and OBC/PSC design exemplar.

1) Manage the compilation and publication of a comprehensive set of Employers Requirements documents for the approval of the Project Director. The contents should include as a minimum the items list below, and the bulk of the work will be undertaken by your team.

- Board's ASR Strategy and clinical strategy.
- Whole SGH site development brief.
- Functional content and schedules of accommodation.
- Whole hospital; clinical and non clinical output specifications.
- ADB room data information. (provide 4 page ADB information for each individual room type).
- Sustainability and low carbon strategy.
- PSC design and other spatial planning drawings at 1:500 @ 1:200 (further developed by your team).
- Project specification – Architectural/ building; Building Services, energy saving / lifecycle / cost in use; structural & civils; externals works/landscaping; other performance parameters;
- Construction and site procedures.
- Requirements for post contract design development.
- Details of commissioning process and requirements for handover, training, H&S file.
- CDM & Health & safety requirements.
- Board's general design requirements/ design action plan.
- Board's PSC Design Solution – as updated by your team Oct-Jan 2009.
- Cost information – amended and updated from OBC by your team.
- Design and Tender Evaluation - The process, criteria and scoring.
- Details of D&B response requirements for Stage 1 and 2.

<u>General Tender Information</u>

- Project execution plan.
- Contract conditions and terms.
- Project programme and other works inter dependencies.
- Suggested forms for bonds, warranties, guarantees and other legals.
- Site survey and site investigation reports.
- Preliminaries requirements and pricing structure for Stage 1 B bid response by D&B consortia.
- Stage 1 Design Report – updated by your team to provide exemplar design info for bidders.
- Cost plan prior to tender.
- Copies of statutory approvals secured by Board.
- Health & Safety Plan and questionnaire.
- Pricing schedules for pre-construction services.
- Pricing schedules for profit, overheads.
- Board's FM requirements.
- Board's lifecycle requirements.
- Project insurance arrangements.

2) Develop and manage a process through OJEU to advertise the project (in association with the Board's legal adviser), and then to evaluate and shortlist interested D&B consortia, to include preparation of a PQQ and Information Memorandum. Provide advice and guidance to the Board on all aspects of this process including timetable. The Board hope to engage a maximum of 3 D&B teams in this process. Assist the Board's Project Team with responses to request for further information during pre-qualification process.

3) Prepare full design and financial evaluation process for the Stage One Bid process.

4) Prepare and submit a review of the contract options to develop the Stage 2 bid process on an open book basis with a single D&B consortia, to include recommendation on contract form and process. This will be for approval by the Project Director, and included within the Stage 1 bid documentation.

5) Review the PSC Cost Plan and associated OBC cost information prepared by others. Update plan to format your team are comfortable working with, but general format to remain same. Continuously update cost plan for the Board throughout this and successive stages. Submit for approval by the Project Director.

6) Develop the Board's existing risk register for the project and assist the Board to review and update on a monthly basis throughout the full project. Manage cost allocated against risk in respect of the project cost plan. Submit for approval by the Project Director.

7) Develop a project Master Programme for the duration of your commission (Sept 2008 – Dec 2015), which may require short term sub programmes to be developed for individual stages. Submit for approval by the Project Director or their nominee.

8) Development of the Board's OBC/PSC design exemplar to produce a workable site masterplan at 1:500 for the campus in light of the retention of some of the hospitals existing building stock. This will also involve the reworking of the floor plans for each level at 1:500, and studies of typical ward layouts at 1:200. This will involve periodic interaction with Glasgow City Council and A+DS to reach agreement on a revised site masterplan, and also provide workable design exemplar for the Employer's requirements package.

9) In conjunction with the Laboratory Project team/users group, develop a project brief, schedules of accommodation and prepare 1:500 departmental relationship drawings for the new build Laboratory Block. In conjunction with this team and the Project Team for the Adult and Children's Hospitals further develop proposals for FM service yard / Energy Centre and agree a structured layout for the site planning of this part of the site. Take account of the block plan design and linkage to main hospital block. Review new build schedules of accommodation for the Laboratory Project as they develop to ensure that space is optimally used and tested to optimise value for money.

10) Develop a process to manage the Stage One design and bid development process and interaction between the Board and the three D&B consortia to ensure that adequate knowledge flows between the parties to ensure

11) Assist the Board's Project Manager's for the Adult Acute Hospital and New Children's Hospital to develop and provide for the Stage 1 tender package a full clinical briefing pack which will involve user group meetings to review and sign off operational policy and clinical output specifications.

12) Develop ADB room data sheets for key rooms within all departments to be included in Stage 1 bid documentation, reduce number where repetition but all major room types with variations to be developed during this stage. Allow for review with users and update prior to issue with bid documents. ADB format to be used.

13) Attend project launch day, and prepare suitable presentation material, assist with presentations

14) In conjunction with NHS Project Team and Planning Adviser, continue dialogue with Glasgow City Council, Architecture+ Design Scotland and public/private utility bodies to conclude discussion on site wide issues, and conclusion on any outstanding matters on the master plan process.

15) Lead and manage dialogue with providers for power and gas service supplies and establish main supplies for the new facilities and site wide for maintenance of existing estate.

16) Develop and cost a technical solution for a roof top helipad to be included within the ER's for the new Adult and Children's Hospital, directly linked to the A&E trauma reception of both hospitals.

17) At the conclusion of Stage 1A, prepare a progress report by Lead Consultant team, to include a full review of Stage 1A, the progress with exemplar design, tender process, project budget and cost plan, timetable and confirm readiness to proceed to tender. Await approval from Project Director to proceed to next stage.

**Key Team Activities and Tasks for Stage 1 B – Stage One Design and Bid Development and Evaluation, selection of a preferred bidder D&B team.**

1) Produce, print, package and issue Employer's Requirements tender documentation to selected D&B consortia – max 3. During this stage further develop any tender documentation and information for this or next stage that maybe outstanding. Note much of this information will be developed in conjunction with the Board's Project Team and user groups and ongoing development and detail of the project requirements.

2) Generally maintain and update project management documents, schedules, cost plan and programmes to take account of progress and change as project evolves through stage.

3) Manage the interface between the three D&B Consortia and the Board. The process developed by you in Stage 1A should provide a mechanism where by the bid teams can have access to the Board's user groups at intervals throughout the Stage 1 bid development phase to inform design development. This process will require to be carefully managed.

4) Manage all requests for information from the bid consortia during the tender process and provide responses timeously.

5) Attend bidders meetings and presentations throughout stage.

6) Manage the receipt of Stage 1 bids from three D&B Consortia, and commence and manage the full process to evaluate the bids with full involvement of the Board's Project Team and the eventual involvement of user groups perhaps by way of open day presentations by each D&B bid team. Below is a suggested content of a Stage 1 bid response;

- Details of contractor's team and structure.
- Relevant experience & reference sites.
- Key personnel and management structure.
- Legal framework for team, parent company.
- Company financial and commercial information.
- Response to PSC design, high level proposals.
  1:500 phased site plans for duration of works. 1:500 floor plans all levels, 5@ 1:200 floor plans.
- 3-D visualization of design intent.
- Healthcare planning solution.
- Typical specification for building and engineering aspects.
- Approach to building design proposals.
- Commentary on buildability.
- Detailed review and commentary of project cost plan.
- Project risk assessment and management.
- Contractors proposals on quality and lifecycle costs.
- Detailed method statement for delivery of the project.
- Design and procurement timetable.
- Construction timetable.
- Contract management proposals.
- Manpower and resourcing proposals.
- Proposals for low carbon design and sustainable issues.
- Proposals for building commissioning and handover.
- Preliminaries, overheads and profit costs for project
- Priced schedules for any advanced works, and pre-construction services at next stage.
- Fixed % for mark-up on provisional sums for trade works.
- Cost plan at Stage 1.
- Pricing matrix for Stage 1, needs more thought on scoring on cost.
- Contractor's draft tendering protocol.

7) On completion of the evaluation of bids, prepare a full report giving the Project Director a recommendation based on (exact criteria will be confirmed later) value for money, design solution / functionality, healthcare design and technical specifications and systems and all financial and commercial aspects. The report should also include any

significant areas of deviation from the Employer's Requirements and compliance statement and detailed 'technical' and 'user' evaluations.

8) Present recommendations to the Project Director and subject to approval, the Executive Board.

9) End of Stage 1B prepare a progress report by Lead Consultant team, with recommendation for next stage, await approval from Project Director to proceed to next stage.

10) The successful conclusion of this stage will be the selection of a preferred bid team through an equitable process, to progress to the next stage of bid development on a 'open book' basis.

**Key Team Activities and Tasks for Stage 2 – Stage 2 Design and Bid Development, package tender through to agreement of a Guaranteed Maximum Price, Full Business Case preparation and approval and contract sign off.**

1) Complete and issue any further information in respect of the Employers Requirements.

2) Engage with preferred bidder and develop and agree a structured programme to allow the design and work packages to be fully developed for tender issue.

3) Fully manage the process of item 2) above on behalf of the Board, to include detailed negotiations.

4) Respond to D&B Consortia queries and attend briefing meetings with teams throughout Stage 2 bid development stage.

5) Support the Board in the 'user' evaluation of the design proposals as they develop, by developing approaches to enable users to fully understand the design, technical and clinical operational issues implicit in the preferred bidders design proposals.

6) Participate in SGHD stage review and any associated design and environmental review.

7) Participate in review and evaluation of all aspects of Stage 2 bid response, provide clarification as required on all design and technical matters. Prepare technical report on Stage 2 bid submission, including evaluation process and giving recommendation to the Project Director and Executive Board. The report should also include any significant areas of deviation from the output specification and compliance statement and detailed 'technical' and 'user' evaluations.

8) Based on the format/content for Stage 2 tender response, developed by your team and included for information in the Stage 1 tender documents, secure a full Stage 2 tender submission from the D&B consortia. While the detail of this package will be complex we reproduce below a minimum requirement to assist you to prepare your bid. The bulk of this evaluation will be undertaken by your team, and the output included in a formal report to the Project Director.

<u>Content</u>

- By end of stage – full clinical sign off;
- Agreed functional content.
- Agreed and audited schedule of accommodation.
- Agreed audit of communication and circulation areas.
- Audit of Scheme against infection control requirements.
- Audit of actual design versus brief.
- Whole site development control plans (incl. phasing).
- Site analysis of access and transport for design.
- 1:500 departmental relationship drawings and stacking diagrams.
- 1:200 department layout plans for all individual departments and wards.

- 1:200 elevations and sections.
- 1:50 typical room layouts (say 50 rooms in each facility).
- ADB Room data sheets for all departments.
- Equipment lists for all departments.
- Confirmation on all Group I & II equipment related costs.
- Typical construction details for envelope, floors, walls.
- Interior design proposals including sample boards.
- Landscape proposals.
- 3-D design and computer studies.
- Wayfinding strategy.
- Fire evacuation and safety strategy, full fire risk assessment – risk with D&B designer.
- Demonstrate low carbon design strategy.
- Flexibility of design to change.
- Demonstrate FM services have been incorporated into design.
- Integration of sustainable issues, waste management, recycling.
- Demonstrate lifecycle on materials and equipment.
- Schedules for all architectural, building, M&E engineering, C&S engineering and IT infrastructure proposals.
- Details of finishes, components, fixtures, fittings.
- Engineering strategy, specification, schematics and schedules.
- Design programme.
- Programme to secure detailed planning consent.
- Project management and quality management arrangements.
- Construction programme, methodology phasing etc.
- Contractor's overhead and profit percentages (as Stage 1).
- Agreement on LADS.
- Agreement on contract form and willingness to enter into contract.
- Project insurance.
- Finalised tendering protocol
- FBC forms.
- Secure detailed planning consent, prior to contract close.
- Final submission and review of contractor's proposals.
- Agree GMP and cashflow forecast.
- Detailed review of clinical functionality, space, accommodation schedules.
- Detailed review of project specification and quality, detailed review of lifecycle issues.
- Finalise all contract matters, insurance, bonds, warranties etc.
- Finalise and agree all sub contract packages and agree GMP.
- Finalise any enabling / service disconnections.
- Finalise site establishment and layout.
- Finalise FBC, clarify all outstanding contract issues in advance.
- Continue with design development and sign off within cost envelope.

9) Undertake and manage a full technical, financial and commercial review of the preferred bidders final tender submission, provide clarification as required on all technical matters, prepare a full report giving the Project Director a recommendation for approval or otherwise. The report should also include any significant areas of deviation from the Employer's Requirements and detailed 'technical' and 'user' evaluations. Await approval from Project Director to proceed to next stage.

**Key Team Activities and Tasks for Stage 3 – Implementation and Construction, Design Development.**

1) Manage the process to agree all outstanding design matters at contract close which may include the balance of 1:50 detailed layouts, room data sheets and drawings. Liaise with Clinicians and user groups as required to secure sign off.

2) Undertake the role of Employers Agent for the duration of the works contract and manage the interface between the Board and the D&B contractor.

Meetings – the following are an indication of frequency

- Monthly progress meetings on site.
- Monthly technical meetings.
- Frequent design development and package development meetings.
- Monthly cost control meetings with Board.
- Monthly cost control meetings with D&B contractor.
- Frequent design development meetings with Board user groups - room layouts.
- Monthly Project Executive meetings with Board.
- Monthly procurement and Finance Group meetings.
- Monthly Gp. II equipment meetings, as required.

3) On a monthly basis prepare and submit a Lead Consultants technical report on progress on site in respect of programme, cost / cost control, change control and design change / development and other relevant procurement related matters.

4) Actively manage the change and cost control process to ensure that the works remain within budget, advise the Project Director on the implications of change on programme, cost and quality parameters.

5) Manage and administer building contract and associated processes on behalf of the Board.

6) Visit the works on a weekly basis and ensure that the new facilities are being constructed in compliance with all the approved and agreed contract documentation, drawings, specifications, the ER's or CP's, whichever have been confirmed as the basis for the project at contract close.

7) Direct the work of the Site Inspectorate team for the duration of the works contract, incorporate key output from their weekly reports into the Lead Consultants monthly progress report as required.

8) In association with Board technical estates staff, manage the process on behalf of the Board to overview and sign off of the full technical commissioning of the building, building engineering plant and equipment and provide the Board with a full report and recommendation for the acceptance and handover of the building from the D&B contractor to the Board. (Note - due to the scale and technical complexity of the building and engineering services, the Board are receptive to the inclusion of some form of operational management of the facilities by the D&B contracting team for a period of 3-5 years. This will allow NHS staff to shadow and learn operation and function of the buildings systems). This aspect will be further considered by the Board during Stage 1 A for inclusion in the Employer's requirements.

9) Inspect the project at practical completion, agree schedule of outstanding items/defects with D&B contractor, including remedial action. Monitor progress/quality of remedial works.

**Key Activities and Tasks for Stage 4 – Equipping and Operational Commissioning**

1) Participate as an active member of the Board's Commissioning Team to enable migration of staff from old to new facilities. This will involve equipment and logistics, migration plan, orientation of staff to new facilities and keeping staff up to date on progress on a regular basis. This input will be required from mid 2012 for the Children's Hospital through to Summer 2015 by which time most of the moves into the new builds will be complete.

2) Assist the Project Director to develop a fully structured Commissioning Plan for the operational commissioning and equipping of the following projects in chronological order;

- New Laboratory Project
- New Children's Hospital
- New Adult Acute Hospital

This work will involve the setting up of a range of groups by the Board, associated with the management, staffing and operation of the new facilities, groups will include;

- Building Commissioning
- Service Migration

- Clinical Transition
- Clinical Systems/IT
- Equipment Procurement
- Communications
- Human Resources
- Community Engagement
- Operational Management

**Key Activities and Tasks for Stage 5 – Post Project Evaluation and 12 Months Defects Period**

1) Participate in the preparation of PPE documentation for the project, in accordance with the NHS Scottish Capital Investment Manual. This will commence post operational opening of facilities and will be undertaken over a period of 2-3 months, likely to complete circa 9 months after opening.

2) Participate in 12 months defects inspection on behalf of the Board, prepare comprehensive lists and participate in any associated negotiations to conclude. Include an allowance you consider appropriate for this function and an assessment of hours based on date for final inspection.

## LEAD CONSULTANT / PROJECT MANAGER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Project Manager's role:-

- Manage the work and output of your team, and act as main point of contact reporting direct to the Board's Project Director or nominee.
- Represent Technical Advisory Team at all key meetings (e.g. Local Council, NHS, legal, contractor), or as delegated by prior agreement with the Board's Project Director or nominee.
- Development and management of project plan/programme, with regular review and update as required.
- Prepare a full project Execution Plan for the project early in Stage 1A for Project Director approval.
- Develop and manage risk register from start of Stage 1A to completion of works.
- Co-ordinate interface with operational hospital staff, and adjacent works projects as required.
- Resource management of Lead Consultant team through all stages of the project, to ensure proper delivery of service to the Board.
- In discussion with the Boards Project Director, develop lists of key project activities, programme and actively manage each stage of project delivery, advising PD on corrective action as required.
- Prepare monthly progress reports on Lead Consultant team activity, project procurement and works activity, for the Project Director, to be circulated 5 workings days in advance of TA monthly Project Team meetings.
- At the end of each stage, prepare a technical progress report for approval by the Project Director, with recommendations on actions to proceed to next stage, to include comment on timetable, costs, site, estates, facilities, build and construction, planning and design, risk and value management, compliance of contractor's proposals, technical evaluations, site infrastructure, town planning and progress with negotiations prior to contract sign.
- Fully lead, manage and develop works contract change and cost control procedures for approval by the Project Director or his nominee.
- Meet regularly with Project Director to review progress, timetable, costs, design and bid development.
- Lead the preparation and structuring of all key documents for the D&B process to provide a 'designed' published output e.g. it looks like a single document.
- Manage the technical review of D&B bidder proposals during the procurement process for Stage 1 and Stage 2 final bid at Contract Close.
- Carry out and deliver the duties of Employers Agent throughout the construction phase, manage interface with D&B contractor, manage and administer contract and associated processes.
- Collaboratively work with the Board's existing consultant's and other associated organisations such as The Carbon Trust.
- Provide full shadow design team service throughout the duration of the works contract.
- Provide procurement and construction management advice on behalf of the TA team.

## ARCHITECT / SITE MASTERPLANNER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Architects role:-

- Take lead on all matters relative to architectural, building and site master planning, interior design, room layouts, fire engineering, fire escape and fire safety, fabric, components and their life-cycle, phasing and construction.
- Redraw the existing 1:500 departmental relationship drawings.
- Update PSC design through to FBC as required. Initially integrate Board changes to departmental layouts and adapt the 1:500 departmental relationship diagrams.
- Develop a full set of exemplar design drawings for inclusion in the Employer's requirements documentation.
- Develop altemative options for 28 Bed Ward layouts (100% single rooms), layouts to reflect height of building, means of escape and fire compartmentation and escape issues. This work will parallel the development of the brief and Employer's Requirements documentation as part of Stage 1A.
- Review and adapt the current Development Control Plan to incorporate current proposals to retain

additional existing buildings post completion of the new builds in 2014.

- Assist the Board with any design related discussion with Architecture and Design Scotland relative to the PSC design and the designs developed by D&B consortia.
- Lead the preparation and submission to Glasgow City Council of a Site Masterplan document in conjunction with the Board's Town Planning Advisor.
- Actively participate in room layout development and sign off process.
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages. Note the Board intend developing a palette of standardised room layouts for as many repeat rooms as possible to reduce the workload at the early stage.
- Manage and lead the AEDET review and any related architectural design led review processes as required at relevant stages.
- Participate and assist with the development of ADB room data sheets for Employer's Requirements document. This is a team responsibility which will be led and managed by the Healthcare Planner.
- Develop a full Building specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, take team lead with any discussions with Architecture + Design Scotland.
- Review design proposals developed at OBC/PSC stage, allow for personalisation as and if required.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Provide full shadow design team architectural and building service throughout the duration of the works contract.
- In conjunction with Board, manage activities of Board appointed Clerks of Works during construction phase.
- Provide monthly reports on compliance of project with Employer's Requirements.
- Input to the Lead Consultant's monthly reports to the Project Director on architectural design, healthcare design and building related matters.

**HEALTHCARE PLANNER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Healthcare Planners role:-

- Take lead on all matters relative to clinical design, clinical output specifications, operational policies, functional content, schedules of accommodation, within Technical Advisory Team.
- Review the schedules of accommodation prepared as part of OBC stage, and comment as required. Assist Board to further develop key areas of their current design through briefing stage and through to completion of Employer's Requirements and updated Departmental Relationship drawings and Site Development Control Plan in conjunction with the Architect.
- Lead in development, preparation and review of ADB room data sheets for Employer's Requirements/Tender documentation, to include 1 iteration with user groups. This will assist with the preparation of equipment lists for the Board's internal use. It is the intention to provide RDS/ADB information for all key rooms on basis of standardising rooms to avoid a prolonged exercise.
- Lead on behalf of the TA team and assist the Project Managers for the Adult and Children's Hospitals with the development of Clinical Output Specs / Operational Policies for all departments within the new facilities, working closely with NHS staff to agree and sign off a standard reference document for the Employer's Requirements briefing process and documents. In other words ensure full briefing packs are prepared for all departments to a suitable level for the project.
- Actively participate in design development process between user groups and bidder design teams through the various stages of tender through to contract close.
- Lead in clinical and healthcare planning design reviews from bidders and evaluation meetings at each stage of the process.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in

respect of healthcare planning solutions, and as required for FBC submission by the Board.

- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical reports at the end of each stage, to include aspects on healthcare planning and design, good practice, compliance with National healthcare quality, infection control and design standards.
- Provide full shadow design team 'due diligence' service on healthcare planning and design matters throughout the duration of the works contract.

**BUILDING SERVICES ENGINEER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Services Engineer's role:-

- Take lead on all matters relative to mechanical and electrical engineering services, energy and environmental matters, renewables, carbon neutral design, integration with existing hospital and other main utility services.
- Establish and lead discussions with main utility providers for gas electricity and water
- Assist with the Design Development process and input to the ADB room data and room layout processes by the supply of building engineering information for the sheets to focus on environmental conditions, air changes, room temperatures, humidity any specialist filtration, negative or positive pressure systems. Also review and advise on M&E equipment, including the location of M&E apparatus such as light and power switches, light fitments, air handling grillage, appropriate types of heating systems, powered medical equipment, telecoms and IT.
- Fully participate in the design development/briefing Stages 1&2, assist the Board to prepare a comprehensive Employers Requirements document which fully reflects the Board's desire to reduce lifecycle / running costs by providing high quality specification for/and equipment at outset.
- Provide advice and guidance on the integration of large scale Group II equipment such as specialist imaging, PACS, MRI, CT and any special shielding requirements. Ensure all relevant standards are met.
- Review bidders proposals at all stages for compliance with tender requirements, participate in the production of technical reports at the end of each stage, to include aspects on building services.
- Required to be based in the Board's Project Office at critical stages of project to be determined by the Board.
- Ensure environmental and sustainable design concepts and practices are incorporated into the Boards Employer's Requirements specification and are demonstrated by bidders in their responses through to contract close.
- Provide advice to the Board, to include visits to reference sites to review integrated building management systems suitable to run facilities of this size on a daily basis, linkage with CDM advisor for linkage to as built info and building systems.
- Provide full shadow design team service throughout the duration of the works contract.
- Fully participate in the technical commissioning of the new facilities in conjunction with Board estates staff and the contractor.

**COST CONSULTANT / QUANTITY SURVEYOR – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Cost Consultants role:-

- Provide advice on building and life cycle costs throughout briefing and development of Employer's requirements through to completion of works, and update as required, assist with negotiations with contractors on cost and contract matters.
- Review and fully update the OBC/PSC stage DCAG cost plan and provide the Project Director with a new format to suit you working practice, to take forward for the project. The cost plan was last updated to Dec 2007 cost base, the £842m budget ceiling is inflated to mid build as follows
  New Children's Hospital – 3rd qtr 2011.
  New Adult Acute Hospital – 2nd qtr 2012.
- Review contractors proposals at all stages and benchmark against PSC capital cost plan.
- Continually update Project Cost plan.
- In association with the Lead Consultant, develop a robust cost control and change management

processes for approval by the Project Director, establish regular monitoring and reporting process throughout the life of the project. Reports will be required for the Procurement and Finance Group on a monthly basis at all stages of the project.

- Review bidders programme for construction and any associated works at all stages.
- Provide detailed input on construction management aspects of bidders proposals at all stages.
- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical/cost reports at the end of each stage, to include aspects related to capital costs, lifecycle costs and general construction / build management and programme.
- Prepare and maintain a costed risk register for regular review by Project Director.
- Preparation of all cost information to assist with completion of FBC documentation.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- In conjunction with Lead Consultant, lead negotiations with bidders at all stages regarding all financial and commercial matters. Lead the detailed review and negotiations associated with the Stage II package tenders to secure final agreement on the cost plan within the Board's financial envelope.
- Detailed financial negotiations on costs with bidders at end of each key stage, concluding with negotiation and agreement of GMP pre contract sign.
- Provide risk and value management advice on behalf of the Lead Consultant team. Provide full shadow design team cost management service throughout the duration of the works contract, including monthly valuations and cost control and reporting.
- In conjunction with Board's project staff engage and agree final account with contractor.

**CIVIL AND STRUCTURAL ENGINEER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Civil and Structural Engineer's role:-

- Take lead on all matters relative to structure, site extemal works, roads, main drainage, drainage and structural fabric connections to existing buildings and demolitions within Lead Consultant team.
- Assist with preparation of Employer's Requirements documentation in respect of Civil and structural engineering matters, during the bid process and evaluation at all stages.
- Develop PSC structural solution further, based on further SI work confirm cost plan requirements.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Manage a full site investigation and remediation project to clear the site of debris, review for ground contaminants, and manage the undertaking of a full site investigation of ground conditions across the whole development site to provide a full report for inclusion in the Employer's Requirements documentation and further inform the Board's cost plan. Note cost of surveys will be paid by Board direct to contractor. This work needs to be taken forward as soon as possible and results available for inclusion in the Employer's Requirements.
- The development site is covered with large piles of building debris, old trees, tyres, and concrete. The Board require a package of works to be developed following on from the site investigation results to clear the site. These works should minimise any potential costs for landfill tax, and post crush/grade stock pile materials for re-use for bottoming etc.
- The OBC / PSC design option incorporates a basement over much of the podium area, as well as a subterranean link from the Energy Centre/Service Yard to the new builds. The cost plan includes for 900mm diameter CFA piles on a 7.5m grid, 22.5m long. The site conditions of alluvial soil over rock head some 16-27m below, and a high water table make this solution challenging, and de-watering maybe required during the ground works package. The Engineer will further review the situation during preparation of the Employer's Requirements and undertake further flood / water table studies to inform design solution and cost plan allowance.
- Review bidders proposals at all stages for compliance with Employers Requirements/tender documents, participate in the production of technical reports at the end of each stage, to include all project related aspects of civil and structural engineering, site infrastructure and drainage.

- Provide full shadow design team inspection service throughout the duration of the works contract; manage the work of site based engineering staff employed separately by Board.

**FACILITIES MANAGEMENT DESIGN ADVICE – KEY ROLE AND RESPONSIBILITIES**

Key aspects of this role:-

- The Board require the Lead Consultant team to provide an individual to give detailed input on aspects relative to Hard FM and perhaps Soft FM services throughout the Employers Requirements stage, through to detailed negotiations with bidders. This will be in conjunction with the Board's Facilities Department.
- The adviser will also be actively involved in preparation of specifications, for inclusion in the Employer's Requirements which will incorporate lifecycle and running cost/maintenance issues. In other words the Board wish to incorporate within their specification aspects which will drive down future running and operational costs, for example integration of robotics, lifecycle of materials and building systems and modularisation of construction.
- The Board also wish to investigate the option of including a period of operational maintenance for the new facilities within the bid, say 3-5 years, with incentivisation to provide a bedding in period for their staff , and also to assign the risk of problems with Building Systems to the builder.
- Meetings between Board staff and bidders at all stages.
- Evaluation of bids at all stages.
- Evaluation of buildings and compliance with Employer's Requirements.
- Active participation in building commissioning phase, providing advice on operational issues to the Project Director.

**CDM CO-ORDINATOR – KEY ROLE AND RESPONSIBILITIES**

Key aspects of the CDM Co-ordinator's role:-

- Take lead on all matters relative the CDM Regulations and Health & Safety matters generally within Technical Advisory Team.
- Point of contact with HSE for Technical Advisory Team.
- Assist with the preparation of a robust Employer's Requirements document and tender package in respect of CDM & H/S matters.
- Preparation of H&S pre tender plan.
- Manage all aspects of CDM in partnership with Board. Regularly liaise with Board H&S staff based at the Southern General site, ensure any operational matters / interfaces are raised and satisfactorily dealt with.
- Fully advise the Board on their duties and responsibilities in respect CDM Regulations.
- Ensure full H&S file and related submissions made at conclusion of contract works.
- In conjunction with M&E Engineer, give advice on suitable building management system for estates data to run and manage a building of this size and complexity in daily use by estates staff once complete and operational.
- Provide full site related service during contract works, providing monthly reports on site management operation and safety issues as part of team.

**LANDSCAPE ARCHITECT**

Key aspects of Landscape Architects role:-

- Take lead on all matters relative to landscape architecture, external environment and external works.
- Prepare landscape specification and design for revised site masterplan to be developed as part of Stage 1A, assist Architect with development, and discussions with Glasgow City Council on Masterplan.
- In respect of Outline Planning Condition 3, the Board are required to prepare a landscape and visual impact assessment for the site (Based on Landscape Inst. Guidelines 2002), to feed into work to develop and agree a revised masterplan. This task will probably take 3-4 months to complete, you are asked to detail in your response you view on scope and content.

- Assist with adaptation of the current Development Control Plan to incorporate current proposals to retain additional existing buildings post completion of the new builds in 2014. (e.g. Adapt Option 1 to Option 1A, see site plans in Appendix G).
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages.
- Participate in the AEDET review and any related design led review processes as required at relevant stages.
- Develop a full landscape and external works (not roads) specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, participate in discussions with Architecture + Design Scotland.
- Review design proposals developed at all stages.
- Provide full shadow design team service throughout the duration of the works contract, including inspection of the works onsite for compliance.
- Input monthly reports on compliance of project with Employer's Requirements on landscape and externals matters.

# Memorandum of Agreement

This part comprises the Memorandum of Agreement between Currie & Brown UK Limited and Wallace Whittle Limited

**Consultancy Service:**

Building Services Engineering & IT infrastructure services for the procurement of hospital facilities utilising public finance and a two stage Design & Build process. The end-user being **Greater Glasgow Health Board** of JB Russell House, Gartnavel Royal Hospital, One thousand and fifty five Great Western Road, Glasgow G12 OXH (hereinafter called the 'Board')

**Memorandum of Agreement**

This agreement is made

between

**CURRIE & BROWN UK LIMITED** a company incorporated under the Companies Acts (Company Number 01300409) and having its registered office at Dashwood House, 69 Old Broad Street, London EC2M 1QS (hereinafter called the 'Lead Consultant') of the one part

and

**Wallace Whittle Limited** and the partners thereof individually and as partners and trustees for said firm, having its principal place of business at 8 Elmbank Gardens, Glasgow G2 4NQ, incorporated under the Companies Acts (Company No. 11930) and having their registered office at 8 Elmbank Gardens, Glasgow G2 4NQ (hereinafter called the 'Consultant') of the other part

WHEREAS

the Board intends to proceed with the New South Glasgow Hospitals Project (the 'Scheme') and has appointed Currie & Brown UK Limited to be their lead consultant and to lead the Technical Advisory Team by performing the Duties in connection with the Scheme.

and the Lead Consultant has employed the Consultant to carry out the Duties in connection with the Scheme.NOW IT IS HEREBY AGREED AS FOLLOWS:

1.1 The Lead Consultant agrees to engage the Consultant and the Consultant agrees to perform the Duties subject to and in accordance with the terms of the Agreement.

1.2 This Memorandum of Agreement, together with Parts A-G of the Appendix shall together constitute the Agreement between the Lead Consultant and the Consultant.

1.3 The Lead Consultant will be the Technical Advisory Team Leader as further amplified in the Memorandum of Agreement.

A49342285

1.4 **Payment of Duties**

The fee payable for performance of the duties set out in Part C of the Appendix is set out in the Lead Consultants Fee Proposal in Part D of the Appendix and payment shall be made in accordance with the following.

Payment shall be based on the capped fee bids for each Work Stage, with interim payments based thereon within each Work Stage. Payments shall be due on the issue of the Consultant's account. The final date for payment of the Consultant's account by the Lead Consultant shall be 90 days from the date of issue of the Consultant's account. The Lead Consultant is entitled to render monthly accounts.

There is no obligation for the Board to continue with the Scheme beyond each Work Stage (this includes 1A and 1B as separate Work Stages), and the Lead Consultant shall seek written authority from the Board to proceed to Work Stage 1B duties, and all subsequent Work Stages, before doing so.

If any work is undertaken by the Consultant without the prior knowledge and approval of the Lead Consultant, either within a commissioned Work Stage of the project or as preparatory work for a subsequent Work Stage, there will be no ability to seek to recover that cost on a quantum merit basis should the project change or be aborted.

A49342285

All fees set out in this Agreement are exclusive of Value Added Tax, VAT will be recovered at the current prevailing rate.

**IN WITNESS WHEREOF** these presents consisting of this and the preceding Page together with the Appendix (in Parts A – G) are executed as follows:

## APPENDIX PART A – CONDITIONS OF APPOINTMENT

### Conditions of Appointment

This part describes the conditions, which normally apply to a consultant's appointment. Different or additional conditions are set out in the Memorandum of Agreement. If there is any discrepancy between the terms of the Memorandum of Agreement and this Part A of the Appendix, the terms of the Memorandum of Agreement shall prevail.

### Generally

**1.1 Duration of commission**

The appointment of the Consultant will commence from the date that the Consultant commenced carrying out the Duties and the commission, unless suspended or terminated, shall be deemed to be completed on the conclusion of the duties by Work Stage, as set out in Part C of the Appendix.

Note this will be a staged appointment, the Lead Consultant reserves the right to terminate the commission at the end of each and every Work Stage from 1A - 5. Progression from one Work Stage to another will be subject to written confirmation by the Board (which may be via the Project Director).

### Objectives and obligations of the Consultant

**1.2 Scope of duties**

The duties to be performed by the Consultant are those listed at Part C of the Appendix, as amplified by the Consultants' Bid Submission, (provided always that where there is a conflict between the duties listed at Part C of the Appendix and deliverables and methodologies contained within the Consultants' Bid Submission that the duties listed at Part C of the Appendix shall prevail) and any Additional Duties.

**1.3 Attendance at meetings**

In performing the Duties, the Consultant shall arrange and attend all meetings necessary to their proper execution, and as a minimum those listed in Clause 1.18 of the Scheme Particulars set out in Part B of the Appendix.

**1.4 Additional Duties**

The Consultant shall not undertake any work, which they consider additional to the Duties listed at Part C of the Appendix without the prior written agreement of the Lead Consultant. Any such approval shall indicate the maximum budget for fees and works where appropriate, which should not be exceeded without further approval having been obtained. These shall be conditions precedent to any payment being due from the Lead Consultant for Additional Duties.

**1.5 Information from the Consultant**

The Consultant shall provide information to the Lead Consultant in accordance with the indicative target dates defined in Clause 1.7 of the Scheme Particulars set out in Part B of the Appendix. The Consultant will be expected to prepare and actively manage a detailed project programme as per Clause 1.12 of these Conditions of Appointment.

**1.6 Duty of care**

The Consultant is to exercise reasonable skill, care and diligence in the discharge of the Duties. Submission of drawings, calculations, specification and other documentation produced by the Consultant for comment by the Lead Consultant and/or Board shall not relieve the Consultant of this responsibility. If in the performance of the Duties the Consultant has discretion exercisable as between the Lead Consultant and any other body the Consultant shall exercise its discretion fairly.

**1.7 Co-ordination of consultant's services**

Co-ordination and integration of the activities of Technical Advisory Team, however employed, shall be the

A49342285

responsibility of the Lead Consultant. This includes co-ordination of the works by planning, environmental and transportation consultants.

**1.8 Collaboration between consultants**

The Consultant shall collaborate with other professional consultants employed by the Board.

The Consultant shall procure that its Sub-Consultants appointed pursuant to Clause 1.29 of these Conditions of Appointment shall take account of the role of the Lead Consultant and collaborate with other members of the Technical Advisory Team and with other professional consultants employed by the Board.

**1.9 Changes caused by the Board**

The Consultant shall provide the Lead Consultant with the cost and programme consequences of any material alteration, addition to or omission from the project caused or proposed by the Project Director. This information is to be provided before the Board takes a final decision.

**1.10 Changes not caused by the Board**

The Consultant shall not cause to be made any material alteration, addition to or omission from the approved Project Documentation. The Consultant shall promptly inform the Lead Consultant in writing of anything that the likely effect of which the Consultant believes would be to either vary the Scheme, or to materially change the financial viability, quality or function of the Scheme.

**1.11 Progression between Work Stages**

The Consultant shall obtain approval in writing from the Lead Consultant before proceeding between the Work Stages described in Part C of the Appendix. Only those Work Stages authorised shall be eligible for payment. Without prejudice to clause 1.32, the Lead Consultant reserves the right to terminate the commission at the end of each individual Work Stage.

**1.12 Master Programme**

The Lead Consultant shall prepare and maintain a detailed project programme for (i) each Work Stage and (ii) the overall procurement timetable and programme until appointment of the Contractor (the "Programme"). The Programme shall break down tasks and times for all participants within each Work Stage. The Programme will be submitted to the Project Director for review and approval prior to issue. The Consultant will be responsible for supporting the maintenance of the Programme as requested by the Lead Consultant and to review on a regular basis with the Lead Consultant and the Board to monitor progress and the implementation of any corrective action agreed by the Board.

**1.13 Site Inspection**

From Work Stage 3 the Consultant will be expected to make frequent visits to site during construction stage, suitable accommodation will be provided, as noted below.

**Obligations of the Board**

**1.14 Duties of the Board**

The Board shall nominate a Board, to enable the proper performance of the Duties.

**Construction (Design and Management) Regulations 2007**

**1.15** The Board shall appoint a Principal Contractor, in accordance with the provision of the Construction (Design and Management) Regulations 2007

**Information from the Board**

**1.16** The Project Director will be responsible for providing information and the giving of instructions on behalf

A49342285

of the Board under this Agreement. Unless and until the Lead Consultant notifies the Consultant otherwise, the Project Director shall be deemed to have the full authority of the Board under the Agreement and the Board may replace the Project Director from time to time by notice to the Consultant. .

**Provision of site accommodation and facilities during construction stage**

**1.17** The Board will be responsible for the provision of suitable site based accommodation for the Lead Consultant team, for the use of Consultant's staff associated with the Scheme. The provision of these facilities will be for the duration of the works on site and funded through the construction contract.

**Ownership of documents and copyright**

**Copyright entitlement**

**1.18** The copyright and all other intellectual property rights in all drawings, documents reports, specifications, pricing documents, calculations and other documents provided by the Consultant in connection with the Scheme ("Documents") shall be vested in the Consultant. The Consultant hereby grants to the Lead Consultant an irrevocable, royalty-free, non-exclusive licence to copy, use and reproduce all Documents and the designs contained within them (including electronically stored information) prepared or to be prepared by or on behalf of the Consultant (the "Copyright Materials") for any purpose whatsoever related to the Scheme and/or the site of the Scheme (including providing and passing to the Board for their use). The Consultant warrants that no Copyright Materials shall infringe any third party rights whatsoever. The Consultant shall provide to the Lead Consultant such copies of the Copyright Materials as the Lead Consultant may reasonably require. The Consultant hereby waives in favour of the Lead Consultant all moral rights which they might be deemed to possess as authors of the Copyright Materials under the Copyright Designs and Patents Act 1988. For the avoidance of doubt, the provisions of this clause 1.18 shall survive termination of this Agreement or the Consultant's engagement hereunder for any reason whatsoever.

**Documentation provided by the Board**

**1.19** Where the Board provides standard documentation, including drawings, copyright of such documentation and drawings shall remain vested in the Board.

**Consultant's Licence and Restrictions**

**1.21(a)** The Consultant and its Sub-Consultants shall have a licence to copy and use such drawings, reports, specifications, pricing documents, calculations and other information required for performance of the Duties. The Lead Consultant shall not be liable for any such use by the Consultant of any drawings or other documents for any purpose other than for which the same were prepared and provided by the Lead Consultant.

**Consultant's rights of publication**

**1.21(b)** The Consultant shall not communicate with the media or any outside body or publish or display alone or in conjunction with any other person, any articles, photographs or other illustrations relating to the Scheme without prior written consent from the Board, which consent shall not be unreasonably withheld.

**1.21 Board's use of priced documents**
The Board may use priced documents for the Scheme, without prior approval by the Consultant.

**1.22 Freedom of Information**
The Consultant acknowledges that the Board is obliged to comply with the Freedom of Information (Scotland) Act 2002 ("the Act") and any codes of practice applicable from time to time relating to access

A49342285

to public authorities' information. The Consultant shall (and shall procure that each of its Sub-Consultants shall) co-operate, facilitate, support and assist the Board to comply with the Act and any codes of practice applicable from time to time relating to access to public authorities' information including by providing documents and other information relating to the Scheme within the timescales necessary to allow the Board to comply with its obligations and duties under the Act and the codes of practice.

All information submitted to the Board may need to be disclosed and/or published by the Board. Without prejudice to the foregoing generality, the Board may disclose information in compliance with the Act, (the decisions of the Board in the interpretation thereof shall be final and conclusive in any dispute, difference or question arising in respect of disclosure under its terms), any other law, or, as a consequence of judicial order, or order by any court or tribunal with the authority to order disclosure. Further, the Board may also disclose all information submitted to them to the Scottish or the United Kingdom Parliament or any other office or agency of Her Majesty's Government in Scotland or the United Kingdom, and their servants or agents. When disclosing such information to either the Scottish Parliament or the United Kingdom Parliament it is recognised and agreed by both parties that the Board shall if they see fit disclose such information but are unable to impose any restriction upon the information that they provide to Members of the Scottish Parliament, or Members of the United Kingdom Parliament; such disclosure shall not be treated as a breach of this Agreement.

The Board acknowledges that it is incumbent upon it to timeously pass on any request for information under the Act to enable the Consultant comply with its obligations under this clause.

**Professional Indemnity insurance**

**1.23 Extent of insurance cover**

The Consultant shall take out and maintain from the date of commencement of the Duties professional indemnity insurance of not less than £10 million pounds in respect of each and every claim. The professional indemnity insurance shall be maintained until the expiration of Twelve (12) years, provided that it can be obtained at reasonable market rates and terms, from the date of completion of the Scheme

For the purposes of Clause 1.23 the claims and financial history of the Consultant shall be disregarded in ascertaining whether or not rates and terms are reasonable.

**1.24 Professional indemnity insurance broker's certificate**

The Consultant shall annually provide to the Lead Consultant a broker's certificate or similar as evidence that professional indemnity insurance is being maintained.

**Certification**

**1.25 Certification generally**

The Consultant shall provide the Lead Consultant with completed certificates issued by the Consultant pursuant to the building contract when required to do so.

**Assignment and sub-contracting**

**1.26 Assignation by the Consultant**

The Consultant shall not assign the whole or part of the benefit or in any way transfer the obligations of this Agreement or any part thereof without the written consent of the Lead Consultant.

**1.27 Assignation by the Board**

The Lead Consultant reserves the right to assign the whole or any part of the benefits or transfer obligations of the Agreement or any part thereof to another party including to a Scottish NHS organisation without the consent of the Consultant.

A49342285

**1.28 Sub-contracting**

The Consultant shall not sub-contract any of the Duties without the written consent of the Lead Consultant. The Consultant shall be fully responsible and liable for the performance of the Duties by any Sub-Consultant notwithstanding that the consent of the Lead Consultant has been obtained.

**1.29 Consultant collateral warranty**

The Consultant shall within 5 days of appointment deliver to the Lead Consultant collateral warranty agreements (incorporating step-in rights) (duly executed in a self proving manner by both parties) in favour of the Board in terms of the collateral warranty agreement set out in Appendix F.

**1.30 Commercial Interests**

Any commercial interests held by Partners/Directors/Principals of the Consultant in firms engaged in manufacturing, contracting or commissioning in building and engineering services, other services or construction, shall be declared to the Project Director prior to conclusion of this Agreement, or if appointed without delay should such event occur.

**Variation, extension, suspension or termination**

**1.31 Variation or extension by the Lead Consultant**

The Lead Consultant may vary or extend in time the performance of the whole or part of the agreed Duties by giving reasonable notice in writing to the Consultant. In such notice the Lead Consultant shall specify the Duties affected.

**1.32 Suspension or termination by the Lead Consultant**

The Lead Consultant may suspend or terminate the performance of the whole or part of the Duties by giving reasonable notice in writing to the Consultant. In such notice the Lead Consultant shall specify those of the Duties affected and the reason for suspension or termination. On suspension or termination of Agreement and subject to Clause 1.38 of these Conditions of Appointment payment shall be made in accordance with Clause 1.16 of Part D of the Appendix.

**1.33 Suspension or termination by the Lead Consultant shall be permitted in the following circumstances:**

- the Board has decided to suspend or terminate the Scheme;
- non-performance by the Consultant;
- breach of the provisions of this Agreement by the Consultant;
- the Consultant becoming bankrupt or insolvent;
- the Board has decided to terminate the Agreement at the conclusion of a Work Stage;
- the Board has decided to deploy the Lead Consultant and Technical Team in a varied manner than the fee proposal or duties.

**1.34 Resumption of Duties**

If the Consultant has not been given instruction to resume any work suspended under Clauses 1.32 or 1.33 of these Conditions of Appointment within six months from the date of suspension, the Consultant may make written request for such instructions, which must be given in writing. If these have not been received within 30 days of the date of such request the Consultant shall have the right to treat the Agreement as terminated.

**1.35 Suspension or termination by the Consultant**

The Consultant may suspend or terminate the performance of the Duties on the expiry of reasonable notice given in writing to the Lead Consultant. In such notice the Consultant shall specify the duties affected and the reason for suspension or termination.

A49342285

**1.36 Suspension or termination by the Consultant shall be permitted on the following circumstances:**

- the Lead Consultant has not provided an instruction to resume work under Clause 1.34 of these Conditions of Appointment;
- breach of the provisions of this Agreement by the Lead Consultant.

**1.37 Death or incapacity of the Consultant's key personnel**

Should the Consultant through death or incapacity be unable to perform the whole or part of agreed duties, this Agreement shall thereby be terminated.

**1.38 Delivery of documents**

On termination of the performance of the whole or part of the Duties and on satisfactory delivery of all drawings, reports, calculations, production information and any other documentation prepared by or on behalf of the Lead Consultant to the Board, the Lead Consultant shall be paid all due fees and expenses in accordance with Clause 1.16 of Part D of the Appendix.

**Settlement of disputes**

**1.40 Adjudication**

**1.40.1** Any difference or dispute arising out of this Agreement may be referred to an adjudicator.

**1.40.2** The party that is first made aware of the occurrence of the difference or dispute shall give notice to the other party of their intention to refer such dispute or difference to adjudication and shall then refer the dispute to an adjudicator agreed between the parties, or failing agreement within 5 days, appointed by RICS, Scottish Branch. A copy of the notice sent to the Adjudicator shall be sent to the other party. The notice shall specify the matter in dispute and set out all the principal facts and arguments relating to it. Copies of all relevant documentation shall be attached to the notice.

**1.40.3** The parties shall use reasonable endeavors to ensure that the Adjudicator is appointed as soon as possible and in any event within 7 days of the reference to adjudication.

**1.40.4** The Adjudicator shall notify his/her decision to the parties within 28 days from the date of receipt of the notice required under Clause 1.40.2 of these Conditions of Appointment or such longer period agreed by the parties.

**1.40.5** Without prejudice to Clause 1.40.4 the Adjudicator may extend the 28-day period by 14 days, with the consent of the party by whom the dispute was referred.

**1.40.6** The Adjudicator shall be obliged to act impartially in determining any dispute referred to him under Clause 1.40.2 of these Conditions of Appointment and shall be entitled to take the initiative in ascertaining the facts and the law.

**1.40.7** The decision of the Adjudicator on any matter will be binding until the dispute is finally determined by legal proceedings or by agreement.

**1.40.8** The Adjudicator shall not be liable to the parties for breach of duty unless in bad faith.

**1.40.9** Payment of the Adjudicator's fees shall be shared equally between the parties.

**1.40.10** During the process of adjudication the performance of the Duties shall continue as if there were no difference or dispute.

**1.40.11** If the Adjudicator resigns or is unable to act, the parties shall choose a new adjudicator jointly.

A49342285

**1.40.12** If the parties have not chosen a new adjudicator jointly within 28 days of the Adjudicator resigning or becoming unable to act, then the President or Vice President of the RICS shall be requested to nominate a new adjudicator.

**Discrimination and Equal Opportunities**

**1.41** The Consultant shall not, and shall take all reasonable steps to ensure that all employees, workers, agents, or Sub-Consultants of the Consultant shall not, unlawfully discriminate within the meaning and scope of the provisions of the following legislation, or any statutory modifications or re-enactment thereof:

- The Equal Pay Act 1970;
- The Sex Discrimination Act 1975;
- The Race Relations Act 1976;
- The Disability Discrimination Act 1995;
- The Employment Equality (Religion or Belief) Regulations 2003;
- The Employment Equality (Sexual Orientation) Regulations 2003;
- The Employment Equality (Age) Regulations 2006 and
- The Equality Act 2010.

**1.42** The Consultant shall observe, and shall take all reasonable steps to ensure that all employees, workers, agents, or sub-contractors of the Consultant shall observe, any relevant codes of practice (and any amended or replacement codes from time to time in place) in respect of employment issued by any of the following bodies:

- The Commission for Racial Equality;
- The Disability Rights Commission; or
- The Equal Opportunities Commission;

or any replacement codes of practice issued by the Commission for Equality and Human Rights.

**Governing laws**

**1.43** The laws of Scotland shall govern the application of these conditions.

**Limitation of Liability**

**1.44** The liability of the Consultant in respect of breach of contract or in delict (including negligence) shall not exceed £10,000,000 in respect of each and every claim, save in respect of any liability relating to: death or personal injury; wilful misconduct and/or fraud.

A49342285

## APPENDIX PART B – SCHEME PARTICULARS

### Scheme Particulars

### Scope of Agreement / Scheme

**1.1 Location**
Southern General Hospital
1345 Govan Road
Glasgow G51 4TF

**1.2 General description**
The Duties are required to assist the Board to develop a full brief, tender and all Employer's Requirements documentation to enable engagement in a public finance procurement for the New South Glasgow Hospital Project, to provide the hospital facilities as listed below. The Duties include the management of the Building Contract with a D&B consortia, through to the successful completion of the works, commissioning and equipping, transfer and occupation.

Key elements of the project are (for information):

- Development of an integrated adult acute and children's hospital proving the full range of acute health services.
- Development of a new Laboratory facility including Mortuary and Post-Mortem Services, Biochemistry, Haematology and Blood Transfusion.
- Provision of a rooftop helipad.
- Possible provision of non-clinical services such as Hard FM services to the new facilities by the D&B contractor for an initial 3-5 year period.
- The supply and installation of Group 1 equipment and location and/or fitting of Group 2 equipment supplied by the Board.
- Information Management and Technology (IM&T) – Out with this project, the Board is procuring software and end-use hardware as part of a separate IM&T project.

The Board requires the provision of integrated facilities that are readily adaptable to changing clinical practice and makes the best use of new technologies. The functional content of the project is envisaged to include the following new build accommodation, note there will be some flexibility around the content noted below as the scope of the Scheme is further developed during Work Stage 1A.

**1.3 The New South Glasgow Hospital - Adult Acute**
1109 in-patient beds and 12-bed medical day unit planned within the New South build.

- <u>In Patient Accommodation</u>

435 surgical beds (gen. Surgery, orthopaedics, urology, vascular, ENT, renal); 571 medical beds. ITU/HDU/CCU – 77 beds total. Acute Stroke – 26 beds

- <u>Out Patient Accommodation</u>

Full range of General outpatient clinics including, among others, diabetic unit, respiratory, haematology, urology etc.

- <u>Day Services</u>

12 medical day bed area; 30-stationed dialysis unit

- <u>Treatment & Diagnostic Services</u>

Accident & Emergency, 20 operating theatres, imaging, Endoscopy and rehabilitation.

- <u>Clinical Support Services</u>

Pharmacy dispensary, medical physics, medical illustration. (laboratory services linked to hospital by underground route and pneumatic tube system, aseptic unit within the children's hospital.)

A49342285

- Non Clinical Support Services

Main entrance, medical records, administration, chaplaincy, social work, staff changing, switchboard, estates, facilities, security, catering, portering, domestic, management and energy centre.

### 1.4 New Children's Hospital – Acute

There are circa 240 beds planned within the new build. About 20% of the beds will be for day patents and the rest inpatients. The hospital will provide DGH services, tertiary and some national services. Outpatient Accommodation
Full range of Children's outpatient clinics including audiology, general paediatrics, orthopaedics, ENT etc

Day Services
Circa 10 medical day beds; 4 dialysis stations and circa 25 day surgery beds.

Treatment & Diagnostic
Accident and Emergency, minor injuries, Imaging, 7 theatres, rehabilitation

Clinical Support Services
Aseptic unit, pharmacy, medical physics, medical illustration

Non-Clinical Support Services
Facilities, ancillary services, administration, spiritual services, medical records, staff change, staff dining.

### 1.5 New Laboratory Building

This build will be one of two major Laboratory sites in Glasgow. The services planned to be delivered from the new Laboratory build at Southern General Hospital are as follows: Biochemistry, Haematology, Blood Transfusion, mortuary and post mortem services. It is worth noting that the mortuary and post mortem facilities will include the re-provision of the Glasgow City mortuary, which also provides forensic services for the City of Glasgow.

The Board proposes to procure the new laboratory project through a single stage D&B process. The Lead Consultant team will be responsible for developing an exemplar design to 1:200 with user groups for inclusion in a full set of Employers Requirements documentation. The Board will require a separate design team from within the Lead Consultant's team to develop these proposals and provide a full Employer's Agent role during construction phase.

The current planned floor areas are as follows; Haematology 1,800 sq.m, Biochemistry 1,900 sq.m, Mortuary and City Mortuary 1,500 sq.m.

The current timetable for the new Laboratory Block is as follows;

| Milestone/Process | Target Date |
|---|---|
| Appoint Lead Consultant | 1 Sept 2008 |
| User group meetings, brief and design development | Sept / Nov2008 |
| Further Design Development | Dec 2008 / Jan 2009 |
| Prepare Employers Requirements documentation | Oct 2008 / Jan 2009 |
| OJEU – D&B consortia | Nov / Dec 2008 |
| Issue ER's and Tender | February 2009 |
| Tender period | Feb /May 2009 |
| Evaluation | June 2009 |
| Construction – start | July 2009 |
| Construction – complete | Sept 2010 |
| Commission | Oct/Nov 2010 |
| Operational | Dec 2010 |

### 1.6 New Build Floor Areas

As a guide to the extent of the build proposals, the current gross internal floor area for the new build proposals are noted below; these figures include allowances for departmental circulation and building wide communications. Plans also include a remote Energy Centre and Service yard with subterranean link to the basement of the new Adult and Children's Hospital.

| | |
|---|---|
| Adult Acute Hospital | 100,624 sq.m |
| Children's Hospital | 33,007 sq.m |
| Laboratory Facility | 5,200 sq.m |
| **Total** | 138,831 sq.m |

The redevelopment of the campus and clinical services at the Southern General Hospital will most likely be undertaken through a multi phase programme of refurbishment, decant, demolition and new build over a works period of at least 4-5 years. The Board is currently initiating a programme of enabling work over the next 2 years to establish an un-encumbered site for the new hospital development. These works involve the relocation of hospital services, diversion of main hospital M&E services, demolition of redundant buildings and general site clearance and preparation works. These enabling works will be funded from the Board's ordinary capital programme. The Lead Consultant will be required to co-ordinate with design teams delivering these projects to ensure all works are sequenced to meet the desired start date on site of Summer 2010.

### 1.7 Project Target dates

The timetable below indicates the Board's indicative timetable for the procurement. Provisional dates for a two-stage D&B process have been included for information only at this stage.

| Milestone/Process | Target Date |
|---|---|
| Publication of OJEU Notice | 6th May 2008 |
| Deadline for receipt of requests to participate/submission of responses to the Pre-Qualification Questionnaire (PQQ) | 5th June 2008 |
| Issue of Invitation to Tender (ITT) Documentation to selected Applicants | 19th June 2008 |
| Deadline for submission of response to ITT | 31st July 2008 |
| Evaluation of ITT Submissions | 12th August 2008 |
| Appointment of Technical Adviser | 22nd August 2008 |
| Brief Development / Masterplan | September-November 2008 |
| Employers Requirements - Stage 1 | September- December 2008 |
| OJEU Construction Teams | October – Dec 2008 |
| Stage 1 Tender Period | January-May 2009 |
| Stage 1 Evaluation – Selection Preferred Bidder | June 2009 |
| Stage 2 Tender Development - Planning application | July 2009 |
| Stage 2 Evaluation | April 2010 |
| Negotiate GMP, FBC and Contract Close | July 2010 |
| Phase 1 Complete – New Children's Hospital | Ist qtr 2013 |
| Phase 2 Complete – New Adult Acute Hospital | 3rd qtr 2014 |
| Commissioning | 4-5 months |
| 12 Months Defects Period – Acute Hospital | 3rd qtr 2015 |

A49342285

**1.8 Estimated cost**

The current estimated capital cost of the new Adult Acute, Children's Hospital and Laboratory Project as of April 2008 is c. £550 million, this cost includes equipment, VAT, and fees but excludes inflation to mid build and contingencies. The split between the Projects of this cost is approximately New Adult and Children's Hospital - £530m; new Laboratory Project £21 m.

**1.9 Programme Sponsor**

Ms Helen Byrne
Director of Acute Services Strategy, Implementation and Planning
NHS Greater Glasgow & Clyde
Acute Services Strategy Implementation and Planning Directorate
Management Building
1345 Govan Road
Glasgow G51 4TF

**1.10 Project Director**

Mr Alan Seabourne
Project Director - New South Glasgow Hospitals Project
Project Office
St Andrew's House
80 Queen Elizabeth Avenue
Hillington
Glasgow
G52 4NQ
[redacted]

**1.11 Board Technical Lead**

Mr Peter Moir
Head of Major Projects
Project Offices
St Andrew's House
80 Queen Elizabeth Avenue
Hillington
Glasgow
G52 4NQ
[redacted]

**1.12 Lead Consultant Team**

It is the Board's intention to appoint the following disciplines as part of the Lead Consultant team. The team will be lead by the Lead Consultant/Project Manager; a single appointment will be made with this company for the whole team. Billing on behalf of the whole team will undertaken by the Lead Consultant, in short fee notes will be from single source and not individual team members.

- Lead Consultant / Project Management
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

- Procurement and Construction Management Advice
- Landscape Architect

The Board will expect the appointed Lead Consultant to work with the established Project network, including all appointed advisers; all Project related documentation, designs and specification, budgets and programmes developed to date as part of Stage 1, subject to any changes agreed with the Project Director or their nominee.

The Board has existing Consultancy agreements for the supply the following services, these appointments have been made and do not form part of this commission. The Lead Consultant team will be expected to work with these advisers, and acceptance of the commission will be conditional on this.

- Legal – Shepherd & Wedderburn LLP.
- Financial – Ernst & Young LLP.
- Town Planning Consultant – Keppie Planning.
- Environmental Consultant– Ironside Farrar.
- Transportation Consultant – JMP Consultants Ltd.
- The Carbon Trust and sub-consultant.

**1.13**

The Board currently proposes the following Contract Strategy, this is subject to Government Gateway review and approval.

- New Adult Acute and Children's Hospital Project – Two stage Design & Build.
- New Laboratory Project – Single stage Design & Build

**1.14 Site Inspection Staff**

It is the Board's intention to make direct appointments for the under-noted roles, some will be made for the duration of the works contract others for particular stages, the appointments will be full-time. The Lead Consultant team will be required to structure and manage the selection and appointment process for all site inspection staff on behalf of the Board, although the contractual and payment arrangements will be between the Board and the respective companies.

- Building Clerk of Works (4)
- M&E Clerk of Works (3)
- Site Engineer (2) – sub-structure, drainage, groundworks and frame.

The Lead Consultant will manage and direct the work of the site inspectorate staff. Site Inspectorate staff will be based on site for the duration of the works contract.

**1.15 Details of documentation**

The Board requires two paper copies of all documents, reports, budgets, programmes, drawings, maps, 3-D graphics and animations, photographs and other documents or reports produced by the Consultant. In addition, all the above must be provided in electronic format as noted below;

| | |
|---|---|
| Cost plan | MS Excel at all stages |
| Text | MS Word, MS Excel, MS Access. |
| Programmes | MS Project. |
| Drawings | Autocad at all stages. |
| 3D / Animations | Various. |

Working documents will require being in base software programme format e.g. not Adobe Acrobat. Consultants may use Adobe Acrobat for working use and for email while providing final versions of documents, drawings etc., in base software as noted above.

**1.16 Board's procedures / requirements**

- NHS GG&C PSC / OBC documentation and OBC Stage Design Report as prepared by others, including all associated drawings, specifications and Project costs.

A49342285

- Scottish Capital Investment Manual (SCIM).
- SEHD – Procode V 2.0
- The Board's Design Action Plan
- Health Facilities Scotland – SHPN and/or NHS HBN and HTM's.
- NHS Estates and others guidance documents such as AEDET, NHS NEAT, or BREEAM.
- Government Gateway reviews will be undertaken at various stages (see separate section).
- OGC Guidance on Competitive Dialogue and general project delivery. (use of CD unlikely).
- FBC

### 1.17 OGC Gateway Reviews

The Scheme will be subject to external review by a Gateway Review Panel at various stages of the Scheme and the Lead Consultant team will be expected to assist the Board's Project Team at the following stages;

Gateway Review 0 – Strategy assessment (2 reviews).
Gateway Review 2 – Procurement strategy.
Gateway Review 3 – Investment Decision.
Gateway Review 4 – Readiness for Service.
Gateway Review 5 – Benefits Realisation.

Input from the Lead Consultant will be focused to technical elements associated with each review, and cover matters such as programme, cost management, procurement strategy and structure, project specification and buildability. Each Gateway Review will last approximately 2- 3 days and it is likely that the Lead Consultant will need to prepare a status report on technical elements and be available for interview for 2-3 hours.

### 1.18 Meetings

The Lead Consultant team will be required to attend regular progress and associated briefing meetings at each stage of the Scheme, which are typical for this form of procurement and consultancy service. These meetings will generally be held within one of the Board's project offices within the Glasgow conurbation, costs for attendance at all meetings should be included within your capped lump sum fee proposal.

During key stages of the procurement process the Board will requires some or all of the TA team to be based in the ASR Project Offices at Hillington, to ensure good continuity and communication is maintained at critical times of the programme. During the construction phase, the Board's Project Team will have a presence within the site compound, and suitable project offices accommodation will be provided for key members of the Lead Consultant team as well.

The Lead Consultant will require to be suitably represented at all meetings throughout the duration of the project. Regular meetings will be held throughout the commission, some of the key meetings will be;

- The Lead Consultant will meet at least once a week with the Project Director or their nominee throughout all stages of the project from commencement to completion of the commission.
- Open days and presentations during bidder selection Stage 1A.
- 2-3 meetings a week throughout Stage 1A to develop the Employer's Requirements documentation, note this may run into multiple daily meetings at certain stages.
- Weekly meetings throughout Stage 1A to develop and adapt the current PSC design solution with the Board's Project Team and departmental user groups. This will involve the further development of the existing PSC departmental relationship drawings(1:500) as well as the site master plan (1:500) to reflect changes to the Board's phasing of the overall redevelopment proposals. (See section 6.0)
- Regular meetings during Stage 1B bid process to suit number of bidders (3) to ensure adequately briefed, for design and bid development and for commercial and financial negotiations.
- Regular meetings during Stage 2 process during bid and design development. Again meetings will frequently be held with Project Team, user groups to assist design development with bidder design team, for commercial meetings with bid team
- Regular meetings during Stage 2 preferred bidder stage, and evaluation process to include weekly bidder meetings up to contract close.

A49342285

- Weekly in house bid team meeting up to contract close.
- Provide technical input, review and comment and take active involvement in the room layout review and approval process both before and after contract close. Note, room layout drawings will be developed for all room types and variants on a room type.
- Monthly Project Executive and Procurement & Finance meetings for duration of commission, including regular reporting and progress update reports for these meetings.
- Monthly project progress/technical meetings during construction & commissioning phase and one site meeting per month.
- Bi-weekly for 3 months then weekly commissioning team meetings for 12 months prior to completion.
- User consultation/design development meetings, at least weekly during Stage 1 & 2.

Meetings with Planners, Roads Department, Local Authority Flood prevention, SEPA, Scottish Water and Fire Brigade as well as NHS Fire Officer, Health Protection Agency . With the exception of meetings with the Planning Authority, meetings with these individuals should be infrequent.

The team may also be called up to support the Board and Project Team at public presentations out with normal working hours, this should be an infrequent occurrence.

Meetings with the Hospital Manager and Operational Estates staff to confirm operational issues and co-ordinate with site infrastructure.

Presentations to a number of internal stakeholders i.e. Board Members, Clinical Groups, etc.

### 1.19 Continuity with other projects and site operations

The team will be responsible for ensuring the maintenance and safe operation of the hospital site in respect of the various projects they are managing, as well as full co-ordination with any associated works contracts. The team will be responsible for planning and programming of any associated works to maintain access to all areas. All works programmes must be fully consulted with the Project Director or their nominee and approved by same.

### 1.20 Post Project Evaluation (PPE)

The team will actively assist the Board to develop and undertake the PPE process throughout the life of the project, and assist in the preparation and completion of this documentation no later than 9 months post occupation of the new facilities.

### 1.21 Further Development of the Board's OBC/PSC Design Exemplar

The Board have developed a PSC design exemplar through the first stage of a PPP procurement strategy. While this strategy has now changed course towards a public finance route, a good deal of the design and information prepared for OBC is still valid.

As part of the development of the OBC the Board looked at alternative options to re-use some of the existing buildings on the campus for administration and support functions, this was driven by capex cost pressures, although these building may eventually be replaced by new build's at a later date.

The PSC design therefore requires to be revised and updated before it can be used as the design exemplar and form part of the Employers Requirements documentation. Copies of site plans for Option 1 and Option1A (Preferred option) are included in Appendix G, Option 1A will require the redesign of some of the roadways to the main frontage of the planned new hospitals, with resultant impact on the podium footprint. The location of the new Laboratory Project and the design and layout of the Service yard and Energy Centre all require further work before the design exemplar is complete. This work is likely to take 4-5 months from commencement up to the issue of the Stage 1 Employer's Requirements tender, the Board have decided to provide Stage 1 bidders with an exempar design on which to develop their bid proposals.

## 1.22 Masterplan

In drafting the conditional planning report for Committee, Glasgow City Council Planners have made a condition of the first reserved matters application on campus that .....

'a finalised masterplan which re-affirms an overall vision, set within a clear design and development framework, reflecting the strategic design guidance on built form and landscape contained in the South Glasgow Hospitals Campus Development Plan, April 2007 shall be submitted and agreed in writing by the Planning Authority. The submission shall include (i) an audit of the changes between the finalised masterplan and the indicative Campus Plan ref 05017-02-100 Development Option C; identified in the Campus Development Plan and (ii) an assessment of the extent to which the finalised masterplan accords with the Environmental Statement (ES) submitted as part of the outline planning application. Thereafter the Council will determine whether the finalised masterplan accords with the outline consent and whether a reserved matters/full planning application accompanied by an EA is required.

The Board will therefore require the site plan to be updated to incorporate the retention of the Surgical Blocks and re-routing of the main entrance road, and Fastlink routes. This reflects the change from Option 1 to Option 1A referred to above and as indicated on drawings included within Appendix G. For the avoidance of doubt, the Lead Consultant team will be required to revise the site plan to reflect the layout Option 1A which has never been fully developed to scale 1:500.

On completion the team will need to update the Campus Development Plan, the Board are unclear quite when this should be undertaken, as it will need to reflect the final proposals developed by the preferred bidder as they enter the detailed planning process for their Scheme with Glasgow City Council.

## APPENDIX PART C – CONSULTANTS' DUTIES

### Lead Consultant Technical Advisory Team – Scope Of Services

The Lead Consultant / Technical Advisory Team will provide guidance, advice and active input to the Board in the following key area's throughout the duration of the commission, the Lead Consultant team will be expected to manage and direct the process on behalf of the Board. The Team will be responsible for the procurement of;

- The New Adult and Children's Hospital Project – two stage D&B process.
- The New Laboratory Project – single stage D&B process.

The Board require the following consultancy services as a minimum;

- Lead Consultant / Project Manager
- Employer's Agent role (construction stage)/Contract Administration
- Architectural Design and Site Masterplanning
- Healthcare Planning
- Civil and Structural Engineering
- Building Services Engineering & IT Infrastructure
- Cost Consultant/Quantity Surveying/Lifecycle costing
- CDM Co-ordinator
- Procurement and Construction Management advice.
- Landscape Architect.
- Risk and Value Management advice
- Facilities Management advice (soft and hard FM)

**Note: the process described in this section envisages a two stage process, with down selection 3-1 at the end of Stage 1 B. If the review of procurement strategy determines a 3-2-1 process, with 2 bidders fully participating in Stage 2, then Board reserve the right to negotiate the lump sum fees with the Lead Consultant team.**

---

**General Duties of the Team**

- Attend relevant meetings of Project Executive & Project Team and support the Board as required. Refer Section 1.18 of the Scheme Particulars set out in Part B of the Appendix.
- Remain up to date and responsive to changes in legislation or guidance on all matters relative to the project.
- Be responsive to demands for input at short notice.
- Advise the Board on general issues of on-going advice on government policy; compliance with SCIM, SEHD, DoH, OGC and Treasury procedures; compliance with Local Council planning procedures. Compliance with legislation and NHS Design Guidance.
- Ensure that advice is consistent with SEHD, DoH, NEC, SOPC4 standard form contract and Treasury Taskforce model contract templates.
- Work closely with other advisors, legal, financial, planning, transportation etc.
- Assist the Board with developing strategies for FM & lifecycle improvements and monitoring on a 1) non PPP contract, 2) installation of Group 2, 3 and 4 equipment, and 3) existing, retained estate and its linkage to the new build projects.
- Participate in SGHD review at various stages throughout the life of the project, teams should anticipate to be involved in:
  - PUK – 3 reviews
  - Gateway – 4 reviews
  - Architecture+Design Scotland – 2 reviews
- Team to familiarise themselves with all existing site data, all project related design and technical data developed during PSC / OBC stage.
- All technical data related to Board funded enabling works which will be underway during period 2008 – 2010. Note the Lead Consultant team will not be delivering these projects, but need to be aware of

them for any impact on NSGH projects.

**Key Team Activities and Tasks for Stage 1A - Preparation of Employers Requirements Documentation**

Preparation of OJEU, PQQ, MOI for D&B consortia; Employers Requirements documentation and full Stage 1 B tender and contract information. Design development of site masterplan and OBC/PSC design exemplar.

1) Manage the compilation and publication of a comprehensive set of Employers Requirements documents for the approval of the Project Director. The contents should include as a minimum the items list below, and the bulk of the work will be undertaken by your team.

- Board's ASR Strategy and clinical strategy.
- Whole SGH site development brief.
- Functional content and schedules of accommodation.
- Whole hospital; clinical and non clinical output specifications.
- ADB room data information. (provide 4 page ADB information for each individual room type).
- Sustainability and low carbon strategy.
- PSC design and other spatial planning drawings at 1:500 @ 1:200 (further developed by your team).
- Project specification – Architectural/ building; Building Services, energy saving / lifecycle / cost in use; structural & civils; externals works/landscaping; other performance parameters;
- Construction and site procedures.
- Requirements for post contract design development.
- Details of commissioning process and requirements for handover, training, H&S file.
- CDM & Health & safety requirements.
- Board's general design requirements/ design action plan.
- Board's PSC Design Solution – as updated by your team Oct-Jan 2009.
- Cost information – amended and updated from OBC by your team.
- Design and Tender Evaluation - The process, criteria and scoring.
- Details of D&B response requirements for Stage 1 and 2.

**General Tender Information**

- Project execution plan.
- Contract conditions and terms.
- Project programme and other works inter dependencies.
- Suggested forms for bonds, warranties, guarantees and other legals.
- Site survey and site investigation reports.
- Preliminaries requirements and pricing structure for Stage 1 B bid response by D&B consortia.
- Stage 1 Design Report – updated by your team to provide exemplar design info for bidders.
- Cost plan prior to tender.
- Copies of statutory approvals secured by Board.
- Health & Safety Plan and questionnaire.
- Pricing schedules for pre-construction services.
- Pricing schedules for profit, overheads.
- Board's FM requirements.
- Board's lifecycle requirements.
- Project insurance arrangements.

2) Develop and manage a process through OJEU to advertise the project (in association with the Board's legal adviser), and then to evaluate and shortlist interested D&B consortia, to include preparation of a PQQ and Information Memorandum. Provide advice and guidance to the Board on all aspects of this process including timetable. The Board hope to engage a maximum of 3 D&B teams in this process. Assist the Board's Project Team with responses to request for further information during pre-qualification process.

3) Prepare full design and financial evaluation process for the Stage One Bid process.

A49342285

4) Prepare and submit a review of the contract options to develop the Stage 2 bid process on an open book basis with a single D&B consortia, to include recommendation on contract form and process. This will be for approval by the Project Director, and included within the Stage 1 bid documentation.

5) Review the PSC Cost Plan and associated OBC cost information prepared by others. Update plan to format your team are comfortable working with, but general format to remain same. Continuously update cost plan for the Board throughout this and successive stages. Submit for approval by the Project Director.

6) Develop the Board's existing risk register for the project and assist the Board to review and update on a monthly basis throughout the full project. Manage cost allocated against risk in respect of the project cost plan. Submit for approval by the Project Director.

7) Develop a project Master Programme for the duration of your commission (Sept 2008 – Dec 2015), which may require short term sub programmes to be developed for individual stages. Submit for approval by the Project Director or their nominee.

8) Development of the Board's OBC/PSC design exemplar to produce a workable site masterplan at 1:500 for the campus in light of the retention of some of the hospitals existing building stock. This will also involve the reworking of the floor plans for each level at 1:500, and studies of typical ward layouts at 1:200. This will involve periodic interaction with Glasgow City Council and A+DS to reach agreement on a revised site masterplan, and also provide workable design exemplar for the Employer's requirements package.

9) In conjunction with the Laboratory Project team/users group, develop a project brief, schedules of accommodation and prepare 1:500 departmental relationship drawings for the new build Laboratory Block. In conjunction with this team and the Project Team for the Adult and Children's Hospitals further develop proposals for FM service yard / Energy Centre and agree a structured layout for the site planning of this part of the site. Take account of the block plan design and linkage to main hospital block. Review new build schedules of accommodation for the Laboratory Project as they develop to ensure that space is optimally used and tested to optimise value for money.

10) Develop a process to manage the Stage One design and bid development process and interaction between the Board and the three D&B consortia to ensure that adequate knowledge flows between the parties to ensure

11) Assist the Board's Project Manager's for the Adult Acute Hospital and New Children's Hospital to develop and provide for the Stage 1 tender package a full clinical briefing pack which will involve user group meetings to review and sign off operational policy and clinical output specifications.

12) Develop ADB room data sheets for key rooms within all departments to be included in Stage 1 bid documentation, reduce number where repetition but all major room types with variations to be developed during this stage. Allow for review with users and update prior to issue with bid documents. ADB format to be used.

13) Attend project launch day, and prepare suitable presentation material, assist with presentations

14) In conjunction with NHS Project Team and Planning Adviser, continue dialogue with Glasgow City Council, Architecture+ Design Scotland and public/private utility bodies to conclude discussion on site wide issues, and conclusion on any outstanding matters on the master plan process.

15) Lead and manage dialogue with providers for power and gas service supplies and establish main supplies for the new facilities and site wide for maintenance of existing estate.

16) Develop and cost a technical solution for a roof top helipad to be included within the ER's for the new Adult and Children's Hospital, directly linked to the A&E trauma reception of both hospitals.

17) At the conclusion of Stage 1A, prepare a progress report by Lead Consultant team, to include a full review of Stage 1A, the progress with exemplar design, tender process, project budget and cost plan, timetable and confirm readiness to proceed to tender. Await approval from Project Director to proceed to next stage.

**Key Team Activities and Tasks for Stage 1 B – Stage One Design and Bid Development and Evaluation, selection of a preferred bidder D&B team.**

1) Produce, print, package and issue Employer's Requirements tender documentation to selected D&B consortia – max 3. During this stage further develop any tender documentation and information for this or next stage that maybe outstanding. Note much of this information will be developed in conjunction with the Board's Project Team and user groups and ongoing development and detail of the project requirements.

2) Generally maintain and update project management documents, schedules, cost plan and programmes to take account of progress and change as project evolves through stage.

3) Manage the interface between the three D&B Consortia and the Board. The process developed by you in Stage 1A should provide a mechanism where by the bid teams can have access to the Board's user groups at intervals throughout the Stage 1 bid development phase to inform design development. This process will require to be carefully managed.

4) Manage all requests for information from the bid consortia during the tender process and provide responses timeously.

5) Attend bidders meetings and presentations throughout stage.

6) Manage the receipt of Stage 1 bids from three D&B Consortia, and commence and manage the full process to evaluate the bids with full involvement of the Board's Project Team and the eventual involvement of user groups perhaps by way of open day presentations by each D&B bid team. Below is a suggested content of a Stage 1 bid response;

- Details of contractor's team and structure.
- Relevant experience & reference sites.
- Key personnel and management structure.
- Legal framework for team, parent company.
- Company financial and commercial information.
- Response to PSC design, high level proposals.
  1:500 phased site plans for duration of works. 1:500 floor plans all levels, 5@ 1:200 floor plans.
- 3-D visualization of design intent.
- Healthcare planning solution.
- Typical specification for building and engineering aspects.
- Approach to building design proposals.
- Commentary on buildability.
- Detailed review and commentary of project cost plan.
- Project risk assessment and management.
- Contractors proposals on quality and lifecycle costs.
- Detailed method statement for delivery of the project.
- Design and procurement timetable.
- Construction timetable.
- Contract management proposals.
- Manpower and resourcing proposals.
- Proposals for low carbon design and sustainable issues.
- Proposals for building commissioning and handover.
- Preliminaries, overheads and profit costs for project
- Priced schedules for any advanced works, and pre-construction services at next stage.
- Fixed % for mark-up on provisional sums for trade works.
- Cost plan at Stage 1.
- Pricing matrix for Stage 1, needs more thought on scoring on cost.
- Contractor's draft tendering protocol.

7) On completion of the evaluation of bids, prepare a full report giving the Project Director a recommendation based on (exact criteria will be confirmed later) value for money, design solution / functionality, healthcare design and technical specifications and systems and all financial and commercial aspects. The report should also include any

significant areas of deviation from the Employer's Requirements and compliance statement and detailed 'technical' and 'user' evaluations.

8) Present recommendations to the Project Director and subject to approval, the Executive Board.

9) End of Stage 1B prepare a progress report by Lead Consultant team, with recommendation for next stage, await approval from Project Director to proceed to next stage.

10) The successful conclusion of this stage will be the selection of a preferred bid team through an equitable process, to progress to the next stage of bid development on a 'open book' basis.

**Key Team Activities and Tasks for Stage 2 – Stage 2 Design and Bid Development, package tender through to agreement of a Guaranteed Maximum Price, Full Business Case preparation and approval and contract sign off.**

1) Complete and issue any further information in respect of the Employers Requirements.

2) Engage with preferred bidder and develop and agree a structured programme to allow the design and work packages to be fully developed for tender issue.

3) Fully manage the process of item 2) above on behalf of the Board, to include detailed negotiations.

4) Respond to D&B Consortia queries and attend briefing meetings with teams throughout Stage 2 bid development stage.

5) Support the Board in the 'user' evaluation of the design proposals as they develop, by developing approaches to enable users to fully understand the design, technical and clinical operational issues implicit in the preferred bidders design proposals.

6) Participate in SGHD stage review and any associated design and environmental review.

7) Participate in review and evaluation of all aspects of Stage 2 bid response, provide clarification as required on all design and technical matters. Prepare technical report on Stage 2 bid submission, including evaluation process and giving recommendation to the Project Director and Executive Board. The report should also include any significant areas of deviation from the output specification and compliance statement and detailed 'technical' and 'user' evaluations.

8) Based on the format/content for Stage 2 tender response, developed by your team and included for information in the Stage 1 tender documents, secure a full Stage 2 tender submission from the D&B consortia. While the detail of this package will be complex we reproduce below a minimum requirement to assist you to prepare your bid. The bulk of this evaluation will be undertaken by your team, and the output included in a formal report to the Project Director.

**Content**

- By end of stage – full clinical sign off;
- Agreed functional content.
- Agreed and audited schedule of accommodation.
- Agreed audit of communication and circulation areas.
- Audit of Scheme against infection control requirements.
- Audit of actual design versus brief.
- Whole site development control plans (incl. phasing).
- Site analysis of access and transport for design.
- 1:500 departmental relationship drawings and stacking diagrams.
- 1:200 department layout plans for all individual departments and wards.

A49342285

- 1:200 elevations and sections.
- 1:50 typical room layouts (say 50 rooms in each facility).
- ADB Room data sheets for all departments.
- Equipment lists for all departments.
- Confirmation on all Group I & II equipment related costs.
- Typical construction details for envelope, floors, walls.
- Interior design proposals including sample boards.
- Landscape proposals.
- 3-D design and computer studies.
- Wayfinding strategy.
- Fire evacuation and safety strategy, full fire risk assessment – risk with D&B designer.
- Demonstrate low carbon design strategy.
- Flexibility of design to change.
- Demonstrate FM services have been incorporated into design.
- Integration of sustainable issues, waste management, recycling.
- Demonstrate lifecycle on materials and equipment.
- Schedules for all architectural, building, M&E engineering, C&S engineering and IT infrastructure proposals.
- Details of finishes, components, fixtures, fittings.
- Engineering strategy, specification, schematics and schedules.
- Design programme.
- Programme to secure detailed planning consent.
- Project management and quality management arrangements.
- Construction programme, methodology phasing etc.
- Contractor's overhead and profit percentages (as Stage 1).
- Agreement on LADS.
- Agreement on contract form and willingness to enter into contract.
- Project insurance.
- Finalised tendering protocol
- FBC forms.
- Secure detailed planning consent, prior to contract close.
- Final submission and review of contractor's proposals.
- Agree GMP and cashflow forecast.
- Detailed review of clinical functionality, space, accommodation schedules.
- Detailed review of project specification and quality, detailed review of lifecycle issues.
- Finalise all contract matters, insurance, bonds, warranties etc.
- Finalise and agree all sub contract packages and agree GMP.
- Finalise any enabling / service disconnections.
- Finalise site establishment and layout.
- Finalise FBC, clarify all outstanding contract issues in advance.
- Continue with design development and sign off within cost envelope.

9) Undertake and manage a full technical, financial and commercial review of the preferred bidders final tender submission, provide clarification as required on all technical matters, prepare a full report giving the Project Director a recommendation for approval or otherwise. The report should also include any significant areas of deviation from the Employer's Requirements and detailed 'technical' and 'user' evaluations. Await approval from Project Director to proceed to next stage.

**Key Team Activities and Tasks for Stage 3 – Implementation and Construction, Design Development.**

1) Manage the process to agree all outstanding design matters at contract close which may include the balance of 1:50 detailed layouts, room data sheets and drawings. Liaise with Clinicians and user groups as required to secure sign off.

2) Undertake the role of Employers Agent for the duration of the works contract and manage the interface between the Board and the D&B contractor.

A49342285

Meetings – the following are an indication of frequency

- Monthly progress meetings on site.
- Monthly technical meetings.
- Frequent design development and package development meetings.
- Monthly cost control meetings with Board.
- Monthly cost control meetings with D&B contractor.
- Frequent design development meetings with Board user groups - room layouts.
- Monthly Project Executive meetings with Board.
- Monthly procurement and Finance Group meetings.
- Monthly Gp. II equipment meetings, as required.

3) On a monthly basis prepare and submit a Lead Consultants technical report on progress on site in respect of programme, cost / cost control, change control and design change / development and other relevant procurement related matters.

4) Actively manage the change and cost control process to ensure that the works remain within budget, advise the Project Director on the implications of change on programme, cost and quality parameters.

5) Manage and administer building contract and associated processes on behalf of the Board.

6) Visit the works on a weekly basis and ensure that the new facilities are being constructed in compliance with all the approved and agreed contract documentation, drawings, specifications, the ER's or CP's, whichever have been confirmed as the basis for the project at contract close.

7) Direct the work of the Site Inspectorate team for the duration of the works contract, incorporate key output from their weekly reports into the Lead Consultants monthly progress report as required.

8) In association with Board technical estates staff, manage the process on behalf of the Board to overview and sign off of the full technical commissioning of the building, building engineering plant and equipment and provide the Board with a full report and recommendation for the acceptance and handover of the building from the D&B contractor to the Board. (Note - due to the scale and technical complexity of the building and engineering services, the Board are receptive to the inclusion of some form of operational management of the facilities by the D&B contracting team for a period of 3-5 years. This will allow NHS staff to shadow and learn operation and function of the buildings systems). This aspect will be further considered by the Board during Stage 1 A for inclusion in the Employer's requirements.

9) Inspect the project at practical completion, agree schedule of outstanding items/defects with D&B contractor, including remedial action. Monitor progress/quality of remedial works.

**Key Activities and Tasks for Stage 4 – Equipping and Operational Commissioning**

1) Participate as an active member of the Board's Commissioning Team to enable migration of staff from old to new facilities. This will involve equipment and logistics, migration plan, orientation of staff to new facilities and keeping staff up to date on progress on a regular basis. This input will be required from mid 2012 for the Children's Hospital through to Summer 2015 by which time most of the moves into the new builds will be complete.

2) Assist the Project Director to develop a fully structured Commissioning Plan for the operational commissioning and equipping of the following projects in chronological order;

- New Laboratory Project
- New Children's Hospital
- New Adult Acute Hospital

This work will involve the setting up of a range of groups by the Board, associated with the management, staffing and operation of the new facilities, groups will include;

- Building Commissioning
- Service Migration

A49342285

- Clinical Transition
- Clinical Systems/IT
- Equipment Procurement
- Communications
- Human Resources
- Community Engagement
- Operational Management

**Key Activities and Tasks for Stage 5 – Post Project Evaluation and 12 Months Defects Period**

1) Participate in the preparation of PPE documentation for the project, in accordance with the NHS Scottish Capital Investment Manual. This will commence post operational opening of facilities and will be undertaken over a period of 2-3 months, likely to complete circa 9 months after opening.

2) Participate in 12 months defects inspection on behalf of the Board, prepare comprehensive lists and participate in any associated negotiations to conclude. Include an allowance you consider appropriate for this function and an assessment of hours based on date for final inspection.

A49342285

## LEAD CONSULTANT / PROJECT MANAGER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Project Manager's role:-

- Manage the work and output of your team, and act as main point of contact reporting direct to the Board's Project Director or nominee.
- Represent Technical Advisory Team at all key meetings (e.g. Local Council, NHS, legal, contractor), or as delegated by prior agreement with the Board's Project Director or nominee.
- Development and management of project plan/programme, with regular review and update as required.
- Prepare a full project Execution Plan for the project early in Stage 1A for Project Director approval.
- Develop and manage risk register from start of Stage 1A to completion of works.
- Co-ordinate interface with operational hospital staff, and adjacent works projects as required.
- Resource management of Lead Consultant team through all stages of the project, to ensure proper delivery of service to the Board.
- In discussion with the Boards Project Director, develop lists of key project activities, programme and actively manage each stage of project delivery, advising PD on corrective action as required.
- Prepare monthly progress reports on Lead Consultant team activity, project procurement and works activity, for the Project Director, to be circulated 5 workings days in advance of TA monthly Project Team meetings.
- At the end of each stage, prepare a technical progress report for approval by the Project Director, with recommendations on actions to proceed to next stage, to include comment on timetable, costs, site, estates, facilities, build and construction, planning and design, risk and value management, compliance of contractor's proposals, technical evaluations, site infrastructure, town planning and progress with negotiations prior to contract sign.
- Fully lead, manage and develop works contract change and cost control procedures for approval by the Project Director or his nominee.
- Meet regularly with Project Director to review progress, timetable, costs, design and bid development.
- Lead the preparation and structuring of all key documents for the D&B process to provide a 'designed' published output e.g. it looks like a single document.
- Manage the technical review of D&B bidder proposals during the procurement process for Stage 1 and Stage 2 final bid at Contract Close.
- Carry out and deliver the duties of Employers Agent throughout the construction phase, manage interface with D&B contractor, manage and administer contract and associated processes.
- Collaboratively work with the Board's existing consultant's and other associated organisations such as The Carbon Trust.
- Provide full shadow design team service throughout the duration of the works contract.
- Provide procurement and construction management advice on behalf of the TA team.

## ARCHITECT / SITE MASTERPLANNER – KEY ROLE AND RESPONSIBILITIES

Key aspects of Architects role:-

- Take lead on all matters relative to architectural, building and site master planning, interior design, room layouts, fire engineering, fire escape and fire safety, fabric, components and their life-cycle, phasing and construction.
- Redraw the existing 1:500 departmental relationship drawings.
- Update PSC design through to FBC as required. Initially integrate Board changes to departmental layouts and adapt the 1:500 departmental relationship diagrams.
- Develop a full set of exemplar design drawings for inclusion in the Employer's requirements documentation.
- Develop alternative options for 28 Bed Ward layouts (100% single rooms), layouts to reflect height of building, means of escape and fire compartmentation and escape issues. This work will parallel the development of the brief and Employer's Requirements documentation as part of Stage 1A.
- Review and adapt the current Development Control Plan to incorporate current proposals to retain

A49342285

additional existing buildings post completion of the new builds in 2014.

- Assist the Board with any design related discussion with Architecture and Design Scotland relative to the PSC design and the designs developed by D&B consortia.
- Lead the preparation and submission to Glasgow City Council of a Site Masterplan document in conjunction with the Board's Town Planning Advisor.
- Actively participate in room layout development and sign off process.
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages. Note the Board intend developing a palette of standardised room layouts for as many repeat rooms as possible to reduce the workload at the early stage.
- Manage and lead the AEDET review and any related architectural design led review processes as required at relevant stages.
- Participate and assist with the development of ADB room data sheets for Employer's Requirements document. This is a team responsibility which will be led and managed by the Healthcare Planner.
- Develop a full Building specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, take team lead with any discussions with Architecture + Design Scotland.
- Review design proposals developed at OBC/PSC stage, allow for personalisation as and if required.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Provide full shadow design team architectural and building service throughout the duration of the works contract.
- In conjunction with Board, manage activities of Board appointed Clerks of Works during construction phase.
- Provide monthly reports on compliance of project with Employer's Requirements.
- Input to the Lead Consultant's monthly reports to the Project Director on architectural design, healthcare design and building related matters.

**HEALTHCARE PLANNER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Healthcare Planners role:-

- Take lead on all matters relative to clinical design, clinical output specifications, operational policies, functional content, schedules of accommodation, within Technical Advisory Team.
- Review the schedules of accommodation prepared as part of OBC stage, and comment as required. Assist Board to further develop key areas of their current design through briefing stage and through to completion of Employer's Requirements and updated Departmental Relationship drawings and Site Development Control Plan in conjunction with the Architect.
- Lead in development, preparation and review of ADB room data sheets for Employer's Requirements/Tender documentation, to include 1 iteration with user groups. This will assist with the preparation of equipment lists for the Board's internal use. It is the intention to provide RDS/ADB information for all key rooms on basis of standardising rooms to avoid a prolonged exercise.
- Lead on behalf of the TA team and assist the Project Managers for the Adult and Children's Hospitals with the development of Clinical Output Specs / Operational Policies for all departments within the new facilities, working closely with NHS staff to agree and sign off a standard reference document for the Employer's Requirements briefing process and documents. In other words ensure full briefing packs are prepared for all departments to a suitable level for the project.
- Actively participate in design development process between user groups and bidder design teams through the various stages of tender through to contract close.
- Lead in clinical and healthcare planning design reviews from bidders and evaluation meetings at each stage of the process.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in

A49342285

respect of healthcare planning solutions, and as required for FBC submission by the Board.

- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical reports at the end of each stage, to include aspects on healthcare planning and design, good practice, compliance with National healthcare quality, infection control and design standards.
- Provide full shadow design team 'due diligence' service on healthcare planning and design matters throughout the duration of the works contract.

**BUILDING SERVICES ENGINEER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Services Engineer's role:-

- Take lead on all matters relative to mechanical and electrical engineering services, energy and environmental matters, renewables, carbon neutral design, integration with existing hospital and other main utility services.
- Establish and lead discussions with main utility providers for gas electricity and water
- Assist with the Design Development process and input to the ADB room data and room layout processes by the supply of building engineering information for the sheets to focus on environmental conditions, air changes, room temperatures, humidity any specialist filtration, negative or positive pressure systems. Also review and advise on M&E equipment, including the location of M&E apparatus such as light and power switches, light fitments, air handling grillage, appropriate types of heating systems, powered medical equipment, telecoms and IT.
- Fully participate in the design development/briefing Stages 1&2, assist the Board to prepare a comprehensive Employers Requirements document which fully reflects the Board's desire to reduce lifecycle / running costs by providing high quality specification for/and equipment at outset.
- Provide advice and guidance on the integration of large scale Group II equipment such as specialist imaging, PACS, MRI, CT and any special shielding requirements. Ensure all relevant standards are met.
- Review bidders proposals at all stages for compliance with tender requirements, participate in the production of technical reports at the end of each stage, to include aspects on building services.
- Required to be based in the Board's Project Office at critical stages of project to be determined by the Board.
- Ensure environmental and sustainable design concepts and practices are incorporated into the Boards Employer's Requirements specification and are demonstrated by bidders in their responses through to contract close.
- Provide advice to the Board, to include visits to reference sites to review integrated building management systems suitable to run facilities of this size on a daily basis, linkage with CDM advisor for linkage to as built info and building systems.
- Provide full shadow design team service throughout the duration of the works contract.
- Fully participate in the technical commissioning of the new facilities in conjunction with Board estates staff and the contractor.

**COST CONSULTANT / QUANTITY SURVEYOR – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Cost Consultants role:-

- Provide advice on building and life cycle costs throughout briefing and development of Employer's requirements through to completion of works, and update as required, assist with negotiations with contractors on cost and contract matters.
- Review and fully update the OBC/PSC stage DCAG cost plan and provide the Project Director with a new format to suit you working practice, to take forward for the project. The cost plan was last updated to Dec 2007 cost base, the £842m budget ceiling is inflated to mid build as follows
  New Children's Hospital – 3rd qtr 2011.
  New Adult Acute Hospital – 2nd qtr 2012.
- Review contractors proposals at all stages and benchmark against PSC capital cost plan.
- Continually update Project Cost plan.
- In association with the Lead Consultant, develop a robust cost control and change management

A49342285

processes for approval by the Project Director, establish regular monitoring and reporting process throughout the life of the project. Reports will be required for the Procurement and Finance Group on a monthly basis at all stages of the project.

- Review bidders programme for construction and any associated works at all stages.
- Provide detailed input on construction management aspects of bidders proposals at all stages.
- Review bidders proposals at all stages for compliance with Employer's Requirements, participate in the production of technical/cost reports at the end of each stage, to include aspects related to capital costs, lifecycle costs and general construction / build management and programme.
- Prepare and maintain a costed risk register for regular review by Project Director.
- Preparation of all cost information to assist with completion of FBC documentation.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- In conjunction with Lead Consultant, lead negotiations with bidders at all stages regarding all financial and commercial matters. Lead the detailed review and negotiations associated with the Stage II package tenders to secure final agreement on the cost plan within the Board's financial envelope.
- Detailed financial negotiations on costs with bidders at end of each key stage, concluding with negotiation and agreement of GMP pre contract sign.
- Provide risk and value management advice on behalf of the Lead Consultant team. Provide full shadow design team cost management service throughout the duration of the works contract, including monthly valuations and cost control and reporting.
- In conjunction with Board's project staff engage and agree final account with contractor.

**CIVIL AND STRUCTURAL ENGINEER – KEY ROLE AND RESPONSIBILITIES**

Key aspects of Civil and Structural Engineer's role:-

- Take lead on all matters relative to structure, site external works, roads, main drainage, drainage and structural fabric connections to existing buildings and demolitions within Lead Consultant team.
- Assist with preparation of Employer's Requirements documentation in respect of Civil and structural engineering matters, during the bid process and evaluation at all stages.
- Develop PSC structural solution further, based on further SI work confirm cost plan requirements.
- Input to reports on bids at various stages of the D&B process and Contract Close stages of the project in respect of healthcare planning solutions, and as required for OBC and FBC submissions by the Board.
- Manage a full site investigation and remediation project to clear the site of debris, review for ground contaminants, and manage the undertaking of a full site investigation of ground conditions across the whole development site to provide a full report for inclusion in the Employer's Requirements documentation and further inform the Board's cost plan. Note cost of surveys will be paid by Board direct to contractor. This work needs to be taken forward as soon as possible and results available for inclusion in the Employer's Requirements.
- The development site is covered with large piles of building debris, old trees, tyres, and concrete. The Board require a package of works to be developed following on from the site investigation results to clear the site. These works should minimise any potential costs for landfill tax, and post crush/grade stock pile materials for re-use for bottoming etc.
- The OBC / PSC design option incorporates a basement over much of the podium area, as well as a subterranean link from the Energy Centre/Service Yard to the new builds. The cost plan includes for 900mm diameter CFA piles on a 7.5m grid, 22.5m long. The site conditions of alluvial soil over rock head some 16-27m below, and a high water table make this solution challenging, and de-watering maybe required during the ground works package. The Engineer will further review the situation during preparation of the Employer's Requirements and undertake further flood / water table studies to inform design solution and cost plan allowance.
- Review bidders proposals at all stages for compliance with Employers Requirements/tender documents, participate in the production of technical reports at the end of each stage, to include all project related aspects of civil and structural engineering, site infrastructure and drainage.

A49342285

- Provide full shadow design team inspection service throughout the duration of the works contract; manage the work of site based engineering staff employed separately by Board.

**FACILITIES MANAGEMENT DESIGN ADVICE – KEY ROLE AND RESPONSIBILITIES**

Key aspects of this role:-

- The Board require the Lead Consultant team to provide an individual to give detailed input on aspects relative to Hard FM and perhaps Soft FM services throughout the Employers Requirements stage, through to detailed negotiations with bidders. This will be in conjunction with the Board's Facilities Department.
- The adviser will also be actively involved in preparation of specifications, for inclusion in the Employer's Requirements which will incorporate lifecycle and running cost/maintenance issues. In other words the Board wish to incorporate within their specification aspects which will drive down future running and operational costs, for example integration of robotics, lifecycle of materials and building systems and modularisation of construction.
- The Board also wish to investigate the option of including a period of operational maintenance for the new facilities within the bid, say 3-5 years, with incentivisation to provide a bedding in period for their staff , and also to assign the risk of problems with Building Systems to the builder.
- Meetings between Board staff and bidders at all stages.
- Evaluation of bids at all stages.
- Evaluation of buildings and compliance with Employer's Requirements.
- Active participation in building commissioning phase, providing advice on operational issues to the Project Director.

**CDM CO-ORDINATOR – KEY ROLE AND RESPONSIBILITIES**

Key aspects of the CDM Co-ordinator's role:-

- Take lead on all matters relative the CDM Regulations and Health & Safety matters generally within Technical Advisory Team.
- Point of contact with HSE for Technical Advisory Team.
- Assist with the preparation of a robust Employer's Requirements document and tender package in respect of CDM & H/S matters.
- Preparation of H&S pre tender plan.
- Manage all aspects of CDM in partnership with Board. Regularly liaise with Board H&S staff based at the Southern General site, ensure any operational matters / interfaces are raised and satisfactorily dealt with.
- Fully advise the Board on their duties and responsibilities in respect CDM Regulations.
- Ensure full H&S file and related submissions made at conclusion of contract works.
- In conjunction with M&E Engineer, give advice on suitable building management system for estates data to run and manage a building of this size and complexity in daily use by estates staff once complete and operational.
- Provide full site related service during contract works, providing monthly reports on site management operation and safety issues as part of team.

**LANDSCAPE ARCHITECT**

Key aspects of Landscape Architects role:-

- Take lead on all matters relative to landscape architecture, external environment and external works.
- Prepare landscape specification and design for revised site masterplan to be developed as part of Stage 1A, assist Architect with development, and discussions with Glasgow City Council on Masterplan.
- In respect of Outline Planning Condition 3, the Board are required to prepare a landscape and visual impact assessment for the site (Based on Landscape Inst. Guidelines 2002), to feed into work to develop and agree a revised masterplan. This task will probably take 3-4 months to complete, you are asked to detail in your response you view on scope and content.

A49342285

- Assist with adaptation of the current Development Control Plan to incorporate current proposals to retain additional existing buildings post completion of the new builds in 2014. (e.g. Adapt Option 1 to Option 1A, see site plans in Appendix G).
- Assist with preparation of Employer's Requirements documentation, the bid process and evaluation at all stages.
- Participate in the AEDET review and any related design led review processes as required at relevant stages.
- Develop a full landscape and external works (not roads) specification and construction requirements for inclusion in the Employer Requirements/Tender document.
- Review bidders proposals at all stages for compliance with Employer's Requirements document, participate in the production of technical reports at the end of each stage, to include aspects on architectural, building construction, healthcare design, interior design, landscape and master planning.
- In conjunction with Project Director or his nominee, participate in discussions with Architecture + Design Scotland.
- Review design proposals developed at all stages.
- Provide full shadow design team service throughout the duration of the works contract, including inspection of the works onsite for compliance.
- Input monthly reports on compliance of project with Employer's Requirements on landscape and externals matters.

## APPENDIX PART D – LEAD CONSULTANTS FEE PROPOSAL/PROVISION OF FEES AND EXPENSES

**ADULT ACUTE & CHILDREN'S HOSPITAL**

**FEE SUMMARY**

A49842285
G:\...\...\...

**ADULT ACUTE & CHILDREN'S HOSPITAL (See separate Fee Proposal for Laboratories)**

**6.5 Apportionment of Fee Stage**

**Summary for CURRIE & BROWN**

**Assumed Start Date of Commission = 1st September 2008**

| Stage | Description | Start | Complete | Weeks | Lump Sum Fees ex VAT (incl. Expenses and inflation) | Hours |
|---|---|---|---|---|---|---|
| 1A | **Preparation of Employers Requirements Documentation** (Preparation of PQQ, OJEU, MOI and Employers Requirements documentation and full Stage 1B tender and contract information, PSC design development) | 1-Sep-08 | 2-Jan-09 | 18 | £714,732 | 9,097 |
| 1B | **Stage One Design and Bid Development** (Issue of ER's design and bid proposals, with 3 D&B consortia, including evaluation and short listing for next stage down selection (3-1) | 5-Jan-09 | 26-Jun-09 | 26 | £306,102 | 3,673 |
| 2 | **Stage Two Design & Bid Development** (Design and bid development with a single D&B consortia based on open book process to design and tender all packages and agree commercial arrangements to conclude a GMP within the Board's cost budget) | 29-Jun-09 | 30-Jul-10 | 57 | £773,301 | 9,025 |
| 3 | **Stage Three - Construction Phase** (Implementation and Construction with continued design development) | 2-Aug-10 | 26-Sep-14 | 217 | £490,026 | 5,751 |
| 4 | **Stage Four - Operational commissioning and equipping** | 1-Oct-12 | 29-May-15 | 139 | £83,258 | 776 |
| 5 | **Stage Five - Post Project Evaluation and Defects** | 29-Sep-14 | 25-Sep-15 | 52 | £28,974 | 290 |
| | | | | **Total** | **£2,396,393** | **28,612** |

**ADULT ACUTE & CHILDREN'S HOSPITAL**

**FEE STAGE BREAKDOWN & DETAILS**

New South Glasgow Hospitals Project - Acute Services Strategy - Phase II
Lead Consultant and Technical Team Fee Proposal

**ADULT ACUTE & CHILDREN'S HOSPITAL (See separate Fee Proposal for Laboratories)**

**6.6 Apportionment of Fee Stage - Frequency of Payment of Staged Fees** **Summary for CURRIE & BROWN**

| Stage | Description | Start | Complete | Weeks | Frequency of Payments | Value of Payments | Number of Payments | Total Value of Payments |
|---|---|---|---|---|---|---|---|---|
| 1A | Preparation of Employers Requirements Documentation (Preparation of PQQ, OJEU, MOI and Employers Requirements documentation and full Stage 1B tender and contract information, PSC design development) | 1-Sep-08 | 2-Jan-09 | 18 | Equal Monthly Payments | £178,683 | 4 | £714,732 |
| 1B | Stage One Design and Bid Development (Issue of ER's design and bid proposals, with 3 D&B consortia, including evaluation and short listing for next stage down selection (3-1) | 5-Jan-09 | 26-Jun-09 | 26 | Equal Monthly Payments | £51,017 | 6 | £306,102 |
| 2 | Stage Two Design & Bid Development (Design and bid development with a single D&B consortia based on open book process to design and tender all packages and agree commercial arrangements to conclude a GMP within the Board's cost budget) | 29-Jun-09 | 30-Jul-10 | 57 | Equal Monthly Payments | £59,485 | 13 | £773,301 |
| 3 | Stage Three - Construction Phase (Implementation and Construction with continued design development) | 2-Aug-10 | 26-Sep-14 | 217 | Equal Monthly Payments | £9,801 | 50 | £490,026 |
| 4 | Stage Four - Operational commissioning and equipping | 1-Oct-12 | 29-May-15 | 139 | Equal Monthly Payments | £2,602 | 32 | £83,258 |
| 5 | Stage Five - Post Project Evaluation and Defects | 29-Sep-14 | 25-Sep-15 | 52 | Single Payment at end of Stage | £28,974 | 1 | £28,974 |
| | | | | | | | Total | £2,396,393 |

New South Glasgow Hospitals Project - Acute Services Strategy - Phase II
Lead Consultant and Technical Team Fee Proposal
ADULT ACUTE & CHILDREN'S HOSPITAL (See separate Fee Proposal for Laboratories)

6.7 LUMP SUM FEE SCHEDULE

STAGE 1A - Preparation of Employers Requirements Documentation

| Start | Complete | Weeks |
|---|---|---|
| 1-Sep-08 | 2-Jan-09 | 18 |

RESOURCE SCHEDULE FOR ALL TEAM MEMBERS FOR THIS STAGE

| Name | Discipline | Grade | Rate/hr | Hours | Total | | |
|---|---|---|---|---|---|---|---|
| Jim Hackett | Project Management | Senior Professional (1) | £101.76 | 202.5 | £20,607 | | |
| Douglas Ross | Commercial Manager | Principal | £121.28 | 40.5 | £4,912 | | |
| David Hall | Project Management | Senior Professional (1) | £101.76 | 202.5 | £20,607 | | |
| Mark Baird | Project Management | Senior Professional (1) | £101.76 | 243.0 | £24,728 | | |
| Alastair Stewart | Project Management | Senior Professional (1) | £101.76 | 6.1 | £624 | | |
| David Scott | Cost Management | Senior Professional (2) | £84.63 | 162.0 | £13,711 | | |
| Gary Stevenson | Cost Management | Senior Professional (1) | £101.76 | 162.0 | £16,485 | | |
| Colin Sunderland | Cost Management | Senior Professional (1) | £101.76 | 0.0 | £0 | | |
| Simon Miller | FM | Senior Professional (2) | £84.63 | 40.5 | £3,428 | | |
| Christine Allan | Transition Manager | Senior Professional (1) | £101.76 | 0.0 | £0 | | |
| Simon Miller | Life Cycle Costing | Senior Professional (2) | £84.63 | 40.5 | £3,428 | | |
| Ian Wyper | Risk Management | Senior Professional (1) | £101.76 | 20.3 | £2,061 | | |
| Paul Fairie | Project Management | Senior Professional (2) | £84.63 | 0.0 | £0 | | |
| David Speirs | Project Management | Professional | £64.42 | 0.0 | £0 | | |
| Not Used | CDM Co-ordinator | Senior Professional (2) | £84.63 | 0.0 | £0 | | |
| Avril Saunders | Transition Manager | Professional | £64.42 | 0.0 | £0 | | |
| Lynne Bradford | Document Manager | Senior Technician | £44.58 | 162.0 | £7,238 | £118,027 | Currie & Brown |
| Leslie Welch | Director | Principal | £110.00 | 50.3 | £5,659 | | |
| Andrew Anderson | Associate | Senior Professional | £90.00 | 356.0 | £32,049 | | |
| Harry Smith | Associate | Senior Professional | £90.00 | 278.2 | £25,039 | | |
| Carole Crane | Healthcare Architect | Professional | £74.00 | 432.4 | £31,995 | | |
| Jo Dorling | Architectural Assistant | Senior Technician | | 336.4 | £0 | | |
| S Grieve Stuart | Director | Principal | £110.00 | 22.8 | £2,511 | | |
| S Scottish Austin | Associate | Senior Professional | £90.00 | 120.5 | £10,845 | | |
| Robert Menzies | Architect | Senior Professional | £90.00 | 160.2 | £14,418 | | |

**Provision of Fess and Expenses**

**Provision of Fee and Expenses**

This part defines fees in relation to the Lead Consultant and describes the methods of payment for the consultant's services and expenses.

**1.1 Lump Sum Fees**

Lump sum fees will be payable on a staged basis as agreed at date of the Agreement, and as set out in Sections 6.5-6.7 of the Lead Consultants Fee Proposal set out in this Appendix.

Time charge fees will be based on rates supplied and agreed at date of the Agreement, and as set out in Section 6.8 of the Lead Consultants Fee Proposal set out in this Appendix. Time charge work should not be undertaken without the prior written agreement of the Project Director or their nominee.

**Payment for duties**

**1.2 Methods of payment**

The fees, except for those on a time-charge basis, shall be deemed to include the provision of all services necessary to perform the duties listed in Part C of the Appendix (Consultant's Duties).

**1.3 Payment on a lump sum basis**

Where payable on a lump sum basis, the fees shall be calculated for each work stage in accordance with the apportionment recorded in Section 6.6 of the Lead Consultants Fee Proposal set out in this Appendix. The lump sum bid will be fixed and capped for each stage in respect of this Agreement.

**1.4 Payment on a time-charge basis**

Where payment is on a time-charge basis the scale of charges shall be set out as below. The Consultant team will regularise their hourly rates across the team to the effect that all similar grades have the same hourly rates across all respective disciplines in the team.

**Principals - hourly rates:**

a) where a principal is specifically nominated by the Project Director or nominee to perform the duties, the principal's time shall be reimbursed at the rate per hour quoted in Section 6.8a of the Lead Consultants Fee Proposal set out in this Appendix, or at such other rate as may be agreed between the Project Director or nominee and the consultant. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

b) principals doing work which they consider would normally be done by another member of staff shall be reimbursed at the rate per hour quoted in Section 6.8b of the Lead Consultants Fee Proposal set out in this Appendix or such other rate as may be agreed between the Project Director or nominee and the consultant. For the purposes of this Clause, the rate for a principal's time shall be calculated at the rate applicable to a senior professional member of staff in the firm. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

**1.5 Professional and technical staff – hourly rates**

Professional and technical staff time shall be reimbursed at the rate per hour quoted by the consultant in Section 6.8b of the Lead Consultants Fee Proposal set out in this Appendix in the categories stated or such other rate as may be

A49342285

agreed between the Project Director or nominee and the consultant. The rate per hour shall include salary, payroll and other costs of employment. Hourly rates should include allowance for travel time within the Greater Glasgow conurbation.

### 1.6 Travelling Time

Time spent by principals, professional and technical staff on travelling in connection with the duties set out in Part C of the Appendix shall include allowance for travel time to the Greater Glasgow conurbation from the consultants place of work, or travel within the Glasgow area.

### 1.7 Supervisory duties

The supervisory duties of a principal shall be deemed to be included in the rate per hour quoted by the consultant in Section 6.8b of the Lead Consultants Fee Proposal set out in this Appendix.

### 1.8 Secretarial and administrative staff

Time charges rates shall include the cost of providing secretarial staff or staff engaged on general accountancy or administrative staff.

### 1.9 Consultant's records

The consultant shall maintain records of time spent on services performed on a time-charge basis. The consultant shall make such records available to the Project Director upon request.

### 1.10 Travelling, subsistence and other expenses

Travelling, subsistence and other expenses shall be deemed to be included within lump sum fee shall be deemed to include the cost of:

a) telex, facsimile and telephone calls;

b) postage and similar delivery charges;

c) travelling, hotel and other similar expenses;

d) all printing, reproduction and purchase of all documentation, drawings, maps, photographs, manuals needed by the consultant and other members of the design team insofar as they are produced by the consultant for the proper performance of the duties relating to this particular commission;

e) the cost of all office equipment and site related protective clothing.

### 1.11 Additional expenses

The consultant shall be reimbursed for all expenses properly incurred in connection with the following:

a. advertising for tenders and site staff;
b. disbursements required by the Board, such as planning and building warrant fees, special surveys by third parties instructed by the Board.
c. travel out with the Greater Glasgow conurbation on business agreed in advance with the Project Director or nominee.

**Payment for additional duties**

### 1.12 Fees for additional duties required by the Board

For additional duties not normally necessary such as those in connection with prolonged contractor's claims and all similar duties where the Project Director specifically instructs the consultant in writing pursuant to Clause 1.32 of the Conditions of Appointment, the charges shall be an agreed lump sum in accordance with the scale of charges as described in Section 6.8 of the Lead Consultants Fee Proposal set out in this Appendix.

**Use of computer and/or special equipment**

**1.13 Computers and/or other special equipment – where no extra fees are payable**

Where the Consultant in performing its duties decides to use a computer and/or other special equipment it shall be at no extra charge to the Board unless the Project Director or nominee has specifically requested the development and/or use of special programs.

**1.14 Where extra fees are payable**

No extra fees will be incurred by the Consultant without the prior written agreement of the Project Director or their nominee.

**Statutory fees**

**1.15 Payment of statutory fees**

The Board shall pay all fees in respect of applications under planning and other statutory requirements.

**Suspension, resumption and termination**

**1.16 Fees on suspension or termination**

On suspension or termination of the Lead Consultant's appointment under Clauses 1.33, 1.34, 1.36 or 1.37 of the Conditions of Appointment set out in Part A of the Appendix, the consultant shall be entitled to fees for all work completed at the date of suspension or termination.

**1.17 Reimbursement during suspension**

During any period of suspension the consultant shall be reimbursed by the Board for costs necessarily incurred under the Agreement up to the date of resumption or termination, always with prior agreement with the Project Director or their nominee.

**1.18 Fees on resumption**

On resumption within six months of suspension, previous payments shall be regarded as payments on account towards the total fee.

**1.19 Reimbursement on termination by the Board**

Where the Lead Consultant's appointment is terminated by the Board under Clause 1.33 or 1.34 of the Conditions of Appointment set out in Part A of the Appendix, the Lead Consultant shall be reimbursed by the Board for costs, excluding loss of profit, necessarily incurred in connection with work up to the date of termination or arising as a result of the termination.

**1.20 Fees where the Scheme does not proceed beyond Stage 1A**

Where the Scheme does not proceed beyond Stage 1A, the Lead Consultant shall be paid in accordance with Clause 1.4 of the Memorandum of Agreement.

### 1.21 Reimbursement on termination by the Consultant

Where the Lead Consultant terminates the Appointment under Clause 1.36 or 1.37 of the Conditions of Appointment set out in Part A of the Appendix, the Board shall be responsible for costs necessarily incurred by the Consultant arising as a result of the termination.

**Payment of accounts**

### 1.22 Submission of accounts and documentary evidence

Accounts for payment of fees and/or expenses and disbursements shall be submitted to the Project Director or their nominee at the intervals stated in Section 6.6 of the Lead Consultants Fee Proposal set out in this Appendix. Interim payments of fees shall be proportionate to the extent to which the commissioned duties have been discharged. Accounts for time-charge based duties and/or travelling, subsistence and other expenses shall be accompanied by documentary evidence of the time and expenses incurred. Such time charges and/or travelling, subsistence and other expenses shall be in respect of the whole of the period since the preceding interim payment.

### 1.23 Payment of accounts

All sums due from the Board to the Lead Consultant under the Agreement shall be paid by the due date, which is 45 days from submission by the Lead Consultant of his account to the Project Director.

Where the Lead Consultant sub-contracts any of the duties forming part of this Agreement there shall be included in the Conditions of Appointment of the sub-contractor a term which requires that payment be made to the sub-contractor within a period not exceeding 45 days from receipt of a fee account by the consultant from the sub-contractor.

The Board shall give notice not later than 5 days after the date on which payment becomes due to the consultant, or would have become due if:-

(a) the Lead Consultant has carried out his obligations under the Agreement; and
(b) no set off or abatement was permitted by sequence to any sum claimed to be due under one or more other agreements, specifying the amount of the payment made or proposed to be made and the basis on which the amount was calculated.

The Board shall not withhold payment after its due date for payment of a sum due under the Agreement, unless the Board has given notice of intention to withhold payment.
A notice of intention to withhold payment shall specify:

a) the amount proposed to be withheld, and the ground for withholding payment; or
b) if there is more than one ground, each ground and the amount attributable to it; and must be give not later than 7 days before the due date for payment of the relevant sum.

**Value Added Tax - in relation to fees and expenses**

All fees and expenses set out in this Agreement are exclusive of Value Added Tax, the amount of which, at the rate and in the manner prescribed by law, shall be paid by the Board to the Lead Consultant.

## APPENDIX PART E – DEFINITIONS

### Definitions

This part contains a list of terms used throughout this Agreement and in understanding this Agreement the following expressions shall have the meaning hereby assigned to them except where the context otherwise requires.

**Activity data**

Information sheets describing:

a. tasks and activities performed in health buildings and having planning significance;

b. environmental and spatial requirements;

c. the equipment and engineering terminals required.

**Additional Duties**

Means any duties additional to those listed at Part C of the Appendix instructed by the Project Director or their nominee pursuant to Clause 1.4 of the Conditions of Appointment.

**Ad hoc departments**

Health building departments without a Scottish Hospital Planning Note or Health Building Note and associated cost allowance.

**Adjudicator**

The individual agreed between the consultant and the Board to whom all disputes in connection with this Agreement shall be referred until completion of the commission.

**Agreement**

This agreement shall comprise the following parts:

Memorandum of Agreement;
Appendix Part A - Conditions of Appointment;
Appendix Part B – Scheme Particulars;
Appendix Part C - Consultants Duties;
Appendix Part D – Lead Consultants Fee Proposal / Provision of Fees and Expenses;
Appendix Part E – Definitions;
Appendix Part F – Collateral Warranty for Sub-Consultants; and
Appendix Part G – Site Masterplan

**Approved sum**

The overall capital sum for construction work on a Scheme (including main contract, enabling and preliminary work necessary to bring planned facilities into use) approved by the Board NHSiS body at work stage 3B prior to agreeing contract and approved in Full Business Case. This sum will be calculated on the basis of tenders received or prices negotiated. Once the contract is let, the approved sum should not be increased without further fresh approval obtained in accordance with a NHSiS body's standing orders/instructions. The approved sum is exclusive of fluctuations allowable under the contract and Value Added Tax.

**Architect**

The person, partnership, company or firm appointed by the Lead Consultant to act as

the architect for the Scheme described in the Memorandum of Agreement.

**Asset register**

A record of data on each capital asset or group of capital assets (for example, land, buildings, fixed plant and other assets). The register consists of a number of structured records, each of which holds details of an asset.

**Board**

The NHSiS body named in the Memorandum of Agreement.

**Brief**

a) *Consultant's Brief*

A document issued to consultants containing information about the Scheme, the Board's procedure etc to enable them to understand exactly the extent of the service they are required to provide.

6) *Appraisal Brief*

A document containing guidelines, instructions and information to act as a basis for the appraisal of options and the outline business case submission at stage 0.

c) *Initial 6rief*

A document prepared at stage 0 or 1, which shall include the following:

I. objectives of the Scheme;

II. cost parameters;

III. outline requirements for the Scheme including content, accommodation, location and town planning statement;

IV. management control plan;

V. procurement strategy;

VI. full business case submission;

VII. any additional information about the site which has become available since stage 0;

VIII. functional content.

d) *Full Brief*

A document containing instructions to the design team at stage 2A stating the essential detailed requirements of the Board that the Scheme must meet, including the following:

confirmation of any changes to the parameters set down in the Scheme brief, especially

regarding programme, planning operational and cost criteria; detailed design briefing;

any updating of the initial brief.

e) *Commissioning Brief*

The operational concomitant to the full brief, containing the essential operational/implementation, programming and budgeting requirements for bringing the Scheme into operation.

**Budget cost**

An estimated cost of the whole of the anticipated capital expenditure

and value added tax for the project, including:

a. departmental costs;

b. on-costs;

c. work costs (total of departmental and on-costs);

d. location adjustment;

e. fees;

f. non-work costs;

g. equipment; and

h. contingencies.

Once approved within the full business case submission the total of these costs become the "Approved Budget Cost". In order to estimate the total outturn cost for the project the Scottish Executive Health Department will add an additional amount for inflation.

**Building surveyor**

The person, partnership, company or firm appointed by the Lead Consultant to act as the building surveyor for the Scheme described in the Memorandum of Agreement.

**Capital budget**

The capital costs component of the budget cost.

**CDM Co-ordinator**

The firm, professional discipline or individual appointment by the Lead Consultant to perform the duties ascribed to the CDM Co-ordinator in the Construction (Design Management) Regulations.

**CDM Regulations**

The Construction (Design and Management Regulations 2007 and the Approved Code of Practice and any industry guidance issued thereunder by the Health and Safety Executive all as may be amended, replaced., modified re-enacted or extended from time to time and are current at the time of provision of the Services.

**Commissioning**

**brief** See "Brief".

**Commissioning officer**

The individual responsible for the overall management, supervision and co-ordination of commissioning by the Board who is accountable to NHSiS body management.

**Commissioning team**

A team comprising a core of officers responsible to the commissioning officer, and concerned with the management and supervision of commissioning for the Board necessary to being the Scheme into effective and efficient operation, representatives of those responsible for managing and running services may be co-opted into the commissioning team.

**Consultants Bid Submission**

Means the document entitled NHS Greater Glasgow & Clyde, New South Glasgow Hospitals Project Acute Services Strategy – Phase 2, Submission for the Appointment of a Lead Consultant and a Technical Team, dated August 2008.

**Contract administrator**

The consultant with particular additional responsibilities for administering the building contract.

**Contract Strategy**

The method by which the Scheme is to be achieved, determining:

The relations between the Board, the Lead Consultant and the Technical Advisory Team;

The methods of financing and management; and

The form of construction contract.

**Contractor**

Any person or persons, firm or company under contact to the Board to perform work and/or supply goods in connection with the Scheme.

**Contractor's proposals**

That part of the tender documents submitted by a contractor detailing the proposals to meet the employer's requirements.

**Contract sum analysis**

That part of a design and build tender detailing the breakdown of costs as specified by the Board in the employer's requirements.

**Co-ordination of design**

i. *Of design generally - means:*

The production of a complete and integrated design solution that provides a satisfactory standard of accommodation and accords with the full brief.

ii. *Of user outlets and terminals - means the following activities:*

a. Provision by the architect/building surveyor of drawings, either at 1:50 or appropriate larger scale, showing the location of all fixtures, furniture and equipment together with all user outlets both in plan and in elevation.

b. Provision by the architect/building surveyor of general and, if necessary, particular information relating to the location of all terminals. This will cover unacceptable locations and may be in the form of drawn or written guidance.

c. Where the public health services are designed by the architect/building surveyor or other independent designer, inclusion by the architect/building surveyor under b. above, details of restrictions on all terminals which relate to services.

d. The examination of the drawings supplied by the architect/building surveyor and comments on them by the services engineer. These comments will refer not only to location, but where appropriate will indicate dimensions and support requirements. The comments supplied will be on the basis of preferred solutions.

e. Examination by the architect/building surveyor of the services engineer's comments and relocation of all terminals as indicated or the initiation of discussions with the services engineer to agree and record an acceptable alternative solution as necessary. Issue by the architect/building surveyor of the total final agreement with the services engineer on co-ordination of user outlets and all terminals so that the latter may complete his designs and undertake the preparation of the production drawings and other documentation.

iii. *Of engineering design - means:*

a. The process of arranging the engineering service works such that each individual item can be physically installed, operated and subsequently maintained.

b. Showing such arrangements on building and engineering services production information so that the objectives of a. can be achieved and to enable detailed structural provision to be made for the engineering works.

iv. *Of the Lead Consultant and other members of the design team - means:*

a. Co-ordinating and integrating the activities of all the other consultants.

b. The production of a complete and integrated design solution that provides a satisfactory standard of accommodation and accords with the design brief.

**Cost analysis**

An analysis of the accepted tender using a form of cost analysis for health building work suitable for the requirements of the Scottish Capital Investment Manual.

**Cost checking**

An estimate of the probable cost of the developing design in comparison with the cost included in the cost plan.

**Cost management**

A continuous process of cost management throughout the duration of the project or Scheme from initial brief to payment of the final certificate to enable expenditure to match specific defined cost targets. It can be considered in two parts:

pre-contract cost management during design/preparation of employer's requirements, the object of which is to obtain a tender within the updated budget costs; post-contract cost management during execution, the object of which is to obtain a final account within the approved sum (excluding fluctuations).

**Cost plan**

A statement of the cost of the proposals prepared by the professional design team, presented in elemental format in accordance with NHS in Scotland guidance.

**Cost planning**

The process of assisting the design team to produce a cost effective solution and controlling the cost of the Scheme within the sum approved by the Board during all stages up to the placing of the contract.

**Defects liability period**

The period of time stated in the contract and starting from the date of practical completion of the works, during which the contractor is liable for making good defects attributable to workmanship or materials not having been made in accordance with the contract.

**Departmental Cost Allowance Guides (DCAG's)**

The guidance on capital sums calculated for the provision of a defined amount of functional accommodation. DCAG's are produced by the Scottish Executive Health Department. Cost allowance guides may be reduced or exceeded where an investment appraisal has demonstrated that within the context of an economical and efficient overall design, further running cost savings and/or measurable service benefits may be obtained from the decreased or increased capital provision.

**Departmental cost**

The capital sum allowed for functional provisions based on (or derived from) Scottish Office cost allowance guides. Where cost allowances are not appropriate, the costs for individual departments should be justified on the basis of similar accommodation in other schemes.

**Design/cost reports**

Reports on design development and cost consequences to demonstrate fulfillment of the design brief and

adherence to the budget cost. Costs must be reported at a known cost datum.

**Design team**

A team comprising consultants or an NHSiS body's design staff responsible for design of the Scheme, inspection of its construction, adjustment of accounts and the issue of the final certificate.[1]

**Development Control Plan**

A series of drawings comprising site plans with contours (or spot levels), schematic plans and sections of buildings, showing existing properties and proposed cycle of site development, identifying individual schemes, outline of engineering service networks, functional relationships and main communications within and between buildings. The development control plan should not pre-empt the appraisal of options at stages 0 and 7 and may be revised as a consequence of Full Business Case approval for the Scheme.

**Duties**

Means the duties to be performed by the Consultant listed at Part C of the Appendix, as amplified by the Consultants Bid Submission, provided always that where there is a conflict between the duties listed at Part C of the Appendix and any deliverables and methodologies contained within the Consultants Bid Submission that the duties listed at Part C of the Appendix shall prevail, and any Additional Duties.

**Employer's agent**

The consultant with the particular responsibility for administration of the contract when using a design and building contract strategy.

**Employer's requirements**

A document prepared by the Board, Lead Consultant / Project Manager and consultants for obtaining tenders when using a design and building contract strategy.

**Engineering services commissioning**

Bringing the entire engineering service works together into full normal working condition and handing over the whole to the Board a an operating entity capable of meeting the levels of load and/or performance specified.

**Engineering services works**

The engineering services in connection with which the Board has engaged the services engineer to perform the professional duties.

**Equipment**

Equipment is classified into four groups:

| | |
|---|---|
| Group 1: | items usually supplied and fixed by the contractor; |
| Group 2: | items, having a significant effect on space or structural requirements, which are supplied by the NHSiS body and fixed by the contractor; |
| Group 3: | items, having a significant effect on space or structural requirements, which are supplied by the NHSiS body and put into position by them or their agents outside the general contract (for example includes x-ray equipment, linear accelerators and other medical equipment); |
| Group 4: | small items, usually storage items, supplied and put |

into position by the NHSiS body.

**Final account**

The document to arrive at the total remuneration due to the contractor under the terms of the contract.

**Full business case submission**

A document whose objective is to confirm in detail the viability of the preferred option for the project and make recommendations as to the methods to be used to deliver the project on time, cost and quality. This document is used to obtain final approval to the funding of the project.

**Functional content**

The service/departmental capacity of a health building scheme expressed in terms of functional units.

**Functional unit**

A unit for measuring the capacity of health building accommodation in terms of service related content.

For example, the functional unit for measuring the capacity of wards is the bed.

**Health and safety file**

This is the document referred to in the Construction (Design and Management) Regulations which contains information on the design of the Scheme together with information added during construction to provide "as built" records. The information contained in the file is handed to the project director and is used to assist any persons carrying out work on the Scheme after its completion (eg maintenance, extensions, refurbishment, demolition).

**Lead Consultant**

The consultant member of the Technical Advisory Team appointed by the Board to act as

the Lead Consultant for the Scheme described in the Memorandum of Agreement.

**Management Control Plan**

The overall programme and plan of work for the execution and commissioning of a scheme. The plan must take account of Scottish Capital Investment Manual activities and a scheme's requirements in terms of resources and timing. It will normally be expressed in a diagrammatic form (network or bar chart) and will be updated regularly to reflect progress made.

**Management staff categories**

For the purpose of time charge rates, the definitions of the project management staff grades listed in Article 6.8 Schedule 2 of the Memorandum of Agreement are: Senior professional: a person who has held corporate membership of a professional body recognised by the NHSiS body for a period of at least five years. Professional: a person who has held corporate membership of a professional body recognised by the NHSiS body.

*Senior technician*: a person not holding corporate membership of a professional body with ten years or more relevant work experience. Technician: a person not holding corporate membership of a professional body with less than ten years relevant work experience.

**Material(s) - (in relation to copyright)**

Any document, item, material or the work produced for the purpose of the Scheme or in connection with the Scheme by the consultant, any of its employees or any third party engaged by the consultant or working under the direction or supervision of the consultant.

A49342285

**NHSiS Body**

This includes Scottish NHS Trusts, Health Board and

any other centrally funded bodies.

**On-costs**

Capital costs arising from the interaction between the functional departmental units and the total building and site complex (for example the cost of communications between departments, external works and services, additional energy saving measures, auxiliary buildings and abnormals).

**Operating manuals**

Sets of documentation which shall include the operating instructions, servicing and maintenance instructions, spare parts lists and test reports dealing with the building and engineering systems provided under the commission. The manuals shall cover in an orderly fashion each item of equipment and each system in the works.

**Outline business case submission**

A document whose objective is to demonstrate the viability of the project (this includes investigation and evaluation of strategic planning, service planning and capital planning) and obtain initial approval to funding of the preferred option, subject to confirmation of viability in the full business case submission. The preparation of the outline business case submission involves a systematic analysis of the relative advantages and disadvantages of alternative options in meeting specific health objectives. Both monetary and non-monetary consequences are considered.

**Outline plans**

Drawings prepared by the architect/building surveyor to a scale of not less than 1:100 of the layouts of the departments for the purposes of consultation with external local interests, other consultants and the Board.

**Participant**

A person, partnership, company or firm involved in the Scheme and making a contribution to its completion, operation or occupation.

**Post-contract changes (stage 4 onwards)**

The alteration or modification of the design, quality or quantity of the work shown on the contract drawings and described by or referred to in the contract bills, priced documents or other production information for main and sub-tender; the addition, alteration or omission of any obligations or restrictions imposed by the Board in the contract bills or priced documents.

**Practical completion (certificate of)**

Document certifying that a scheme or specified part of a scheme has in the opinion of the contract administrator/employer's agent achieved practical completion of the works in accordance with the contract, the date of this certificate marks the commencement of the defects liability period (maintenance period) and of the period of final measurement for the purposes of the final account.

**Principal**

Member of firm generally in overall charge of the policy and conduct of the firm's

business who is able to commit the firm to undertake commissions.

**Principal contractor**

The contractor appointed by the Board to perform the roles and responsibilities of the Principle Contractor under the Construction (Design and Management) Regulations 2007.

**Production information**

The co-ordinated drawings, specification/employer's requirements, schedules and bills of quantities or priced

documents needed for tendering, co-ordination and construction of the building and its services.

**Professional advisor**

An individual or firm appointed by the project director to provide advice on:

a) actions, decisions and approvals from the NHSiS body;

b) interpretation or reports and recommendations submitted by the Project Manager and advice on when, and what action is needed as a result;

c) the adequacy and contents of the project execution plan; and

d) internal NHSiS body matters affecting the project.

**Project**

The complete cycle of development work envisaged for an individual hospital or NHSiS site. A project may include a number of building schemes.

**Project director**

The individual, usually an employee of the Board, who represents, and has the authority of the Board in respect of the specific scheme. All instructions given by the project director are deemed to be given by the Board. All advice given to the project director is deemed to have been given to the Board. More detailed information is provided in the Scottish Capital Investment Manual; Project Organisation.

**Project Documentation**

Means any documentation produced by or on behalf of the Consultant, which has been approved by the Board for use in the Scheme.

**Project execution plan**

A manual prepared by the Project Manager and agreed with the project sponsor, acting as a common control document for the Scheme including, inter alia, the following subjects:

a) management and organisational structure;

b) identification of all participants;

c) summary of duties of all participants;

d) responsibilities of all participants;

e) delegated authority limits of all participants;

f) lines of communications;

g) administrative procedures;

h) Board/project director approval/instruction procedures;

i) progress procedures;

j) reporting procedures and formats (including cost control and reporting);

k) financial procedures (including risk and sensitivity analysis, change and cost management procedures);

l) meetings structure;

m) quality assurance/control;

n) construction procedures;

o) technical and operational commissioning procedures;

p) post project evaluation procedures.

**Post information manuals**

Sets of documentation, which shall include all essential information about the construction of the building, together with all the necessary sources of information for its proper maintenance, for example, information regarding safety and fire integrity.

**Project Manager**

The person, partnership, company or firm named in the Memorandum of Agreement and appointed by the Board to act as the project manager for the Scheme described in the Memorandum of Agreement.[2]

**Quantity surveyor**

The person, partnership, company or firm appointed by the Lead Consultant to act as the quantity surveyor for the Scheme described in the Memorandum of Agreement.

**Record drawings**

Drawings showing the building and service installation as erected at the date of practical completion.

**Revenue/running costs**

The annual operational costs element of the outline/full business case submission, for example, maintenance and staffing costs.

**Scheme**

All planning, design and construction work and commissioning activity necessary to bring planned facilities into use (including essential preliminary and enabling works) referred to in the Memorandum of Agreement.

**Scottish Capital Investment Manual**

The document published by the Scottish Executive Health Department in the version current at the date of this Agreement. It comprises the following sections:

- Overview
- Project Organisation
- Business Case Guide
- Private Finance Guide
- Management of the Construction Project
- Commissioning a Health Care Facility
- IM & T Guidance
- Post-Project Evaluation

**Services engineer**

The person, partnership, company or firm appointed by the Lead Consultant to act as the services engineer for the Scheme described in the Memorandum of Agreement.

**Shop drawings**

Drawings and documentation prepared by the contractor or sub-contractor or suppliers to supplement the production information for use in manufacturing of components or installation or on-site assemblies.

**Site inspection staff**

Staff resident on site on a full or part-time basis to inspect the progress and quality of the work and to determine that the works are being executed in accordance with the contract documents.

**Stage payments**

Payments made on completion of pre-determined stages of the work.

**Structural engineer**

The person, partnership company or firm appointed by the Lead Consultant to act as the structural engineer for the Scheme described in the Memorandum of Agreement.

**Structural engineering works**

Those works for which the structural engineer is require to prepare calculations and generality give advice and otherwise perform professional duties.

**Sub-consultant**

Any person, partnership, company or firm appointed by the Lead Consultant to perform and / or supply goods and / or services in connection with the Scheme.

**Sub-consultant Agreement**

An agreement entered or to be entered into between the Lead Consultant and a Sub-Consultant appointed to perform work and / or supply goods and / or services in connection with the Scheme, in substantially equivalent terms to the Agreement.

**Sub-contractor**

Any person, partnership, company or firm under contract to the contractor to perform work and/or supply goods and/or services in connection with the Scheme.

**Sub-programme**

Detail programme based on the constraints of the management control plan, relating to a particular stage or part of the Scheme.

**Technical Advisory Team**

Means the team of consultants appointed by the Lead Consultant to deliver the Duties required by the Board in connection with the Scheme.

**Tender documents**

All the documents used to invite tenders for the execution of the works.

**User panel**

A group representing the end users of the Scheme comprising representatives of the NHSiS body's finance department, medical staff and those responsible for operating the various ancillary services.

These representatives will be authorised to define their department's needs and to renew and to review and agree how those needs will be met whilst ensuring that the Scheme remains financially viable. The user panel will communicate its requirements and decisions to the Project Manager through the project director.

**Works**

The construction works relative to the Scheme.

**Work Stage**

Means the discreet stages of work from 1A – 5 identified in Part C of the Appendix.

## APPENDIX PART F – DRAFT COLLATERAL WARRANTY FOR SUB-CONSULTANTS

**(attached separately)**

**APPENDIX PART G – SITE MASTERPLAN**

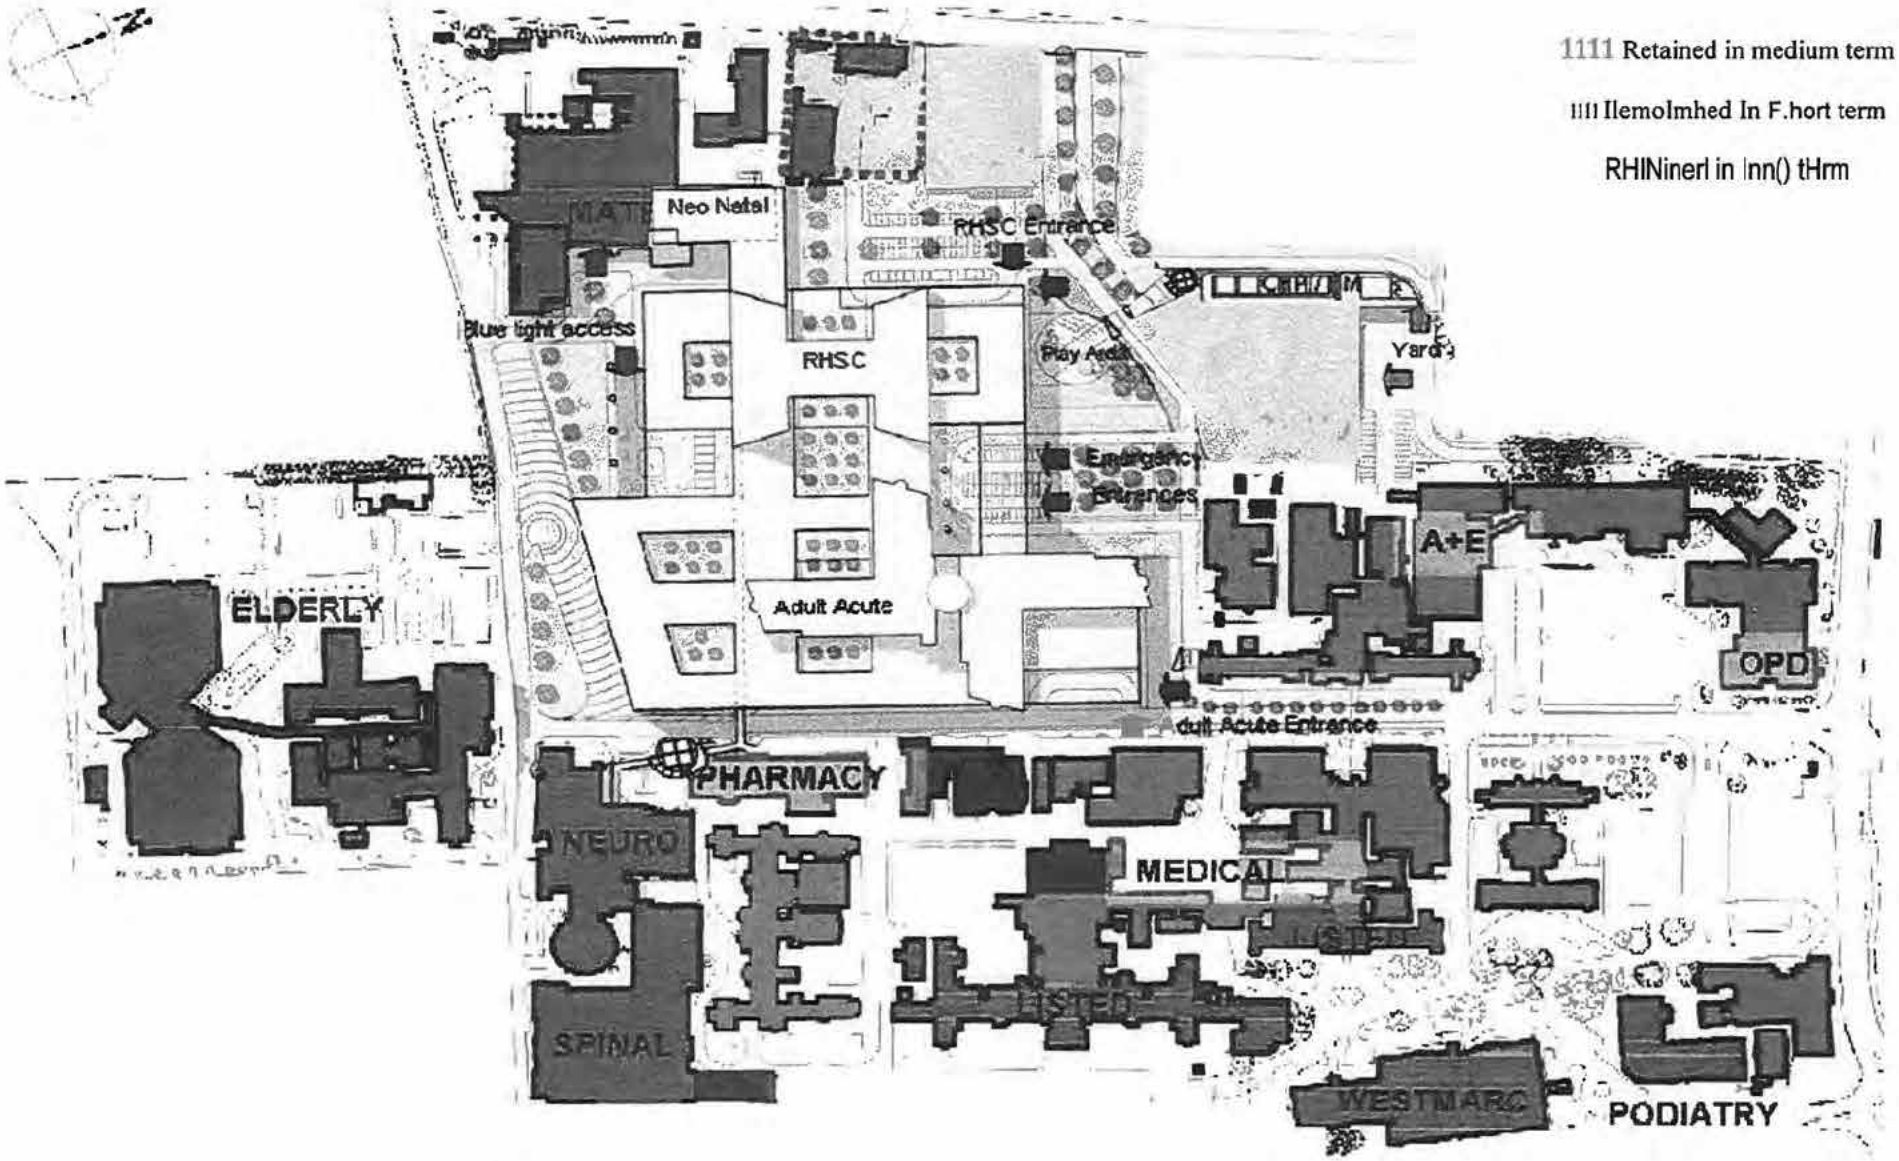
OBC Scheme Proposed Campus Master Plan

New South Glasgow Hospitals

1111 Retained in medium term

IIII IIemoImhed In F.hort term

RHINinerI in Inn() tHrm



Option 1a Single phased integrated Adult and Children's Hospital with 1100 and 240 beds respectively. Fast link access.

**New South Glasgow Hospitals**
**Technical / ER's Meeting – Friday 30 January 2009 (Offices of HLM)**

**MINUTE of MEETING**

**Attendees:** Peter Moir (PM) NHSGG&C, Steve Allan (SA) HLM, Graham Annandale (GA) URS, John Bushfield (JB) and Stewart McKechnie (SM) Wallace Whittle, Bob Menzies (BM) BMJ, David Hall (DH) and Mark Baird (MGB)

**Apologies:** Harry Smith and Andy Anderson, HLM

**Circulation:** Attendees + Apologies + Jim Hackett + Douglas Ross + Scott Grier

| Item | Agenda | Status/Purpose | Minute/Action | Action |
|---|---|---|---|---|
| 1.0 | Gateway Update | C&B to give an update on the Gateway outcome and report to the team. | C&B confirmed that Gateway 2 was concluded and the project had successfully passed the review with a limited number of 'amber' notifications. | |
| 2.0 | Clarification of importance and standing of ERs | Clarification of bidding and appointment process and use of the ERs. | The process to appointment of the contractor and site operations was re-stated to the team. This confirmed that the prequalification process will run to 20 March 2009, with the bid period (using competitive dialogue) running from 14 April 2009 for 18 weeks. The contract award will then take place in October 2009 comprising design and construction of the laboratories concurrent with design development of the Adult and Children's hospital.<br><br>The importance of the Employer's Requirements (ERs) being generated by the team was stressed. These (the ERs) will require to capture all of the requirements of the Board and all relevant standards to be met and will be the output basis to be met by the developing design. Robust ERs are therefore essential for each area of design/input.<br><br>The target price comprising three priced activity schedules was also explained to the team.<br><br>**Action: C&B to meet with the Board and present the NEC/Target Price approach, w/c 02 February 2009.** | C&B |

| | | | | |
|---|---|---|---|---|
| 3.0 | Previous Actions | Review actions from last meeting. | Outstanding actions from the previous meeting (not covered by other agenda items) are:<br><br>**Landscaping** – updated landscaping proposals to be provided, this to be an amplification of the list of headings/areas provided by Hirsts.<br>**Information due:** included in next ER update from HLM.<br><br>**Appendices** – all to review appendix list and consider extent and coverage of proposed items. Feedback to C&B views (either coverage fine or items to be added). **Information due:** prior to next ER meeting. | HLM<br><br>All |
| 4.0 | Compliance (SHTMs/HTMs) | Concur that list is currently 'complete' – seek client views and approval. Agree requirement to close out HLM narrative items. | Updated design team list of derogations provided by HLM and circulated to client + team.<br><br>**Action:** Board to review listing and provide comments and approvals as necessary. Concluded listing requires to be signed off. Particular consideration of areas with narrative on HLM listing (see 'Key Ergonomic Space Standards').<br><br>**Information/sign-off due:** prior to next ER/Technical Meeting, 13 February 2009.<br><br>**Action:** Board to arrange for copies of the under noted to be circulated, as discussed, plus provide clarification on the status of SHTM 61 Flooring - this document was circulated recently for comment/consultation but is not listed on the HFS website. Can the Board (via HFS) confirm the status/likely date of publication of this document?<br><br>* SHPN 06 Part 2: Facilities for diagnostic imaging;<br><br>* SHPN 23: Hospital accommodation for children and young people;<br><br>* SHPN 28: Facilities for cardiac services; and<br><br>* SHPN 57: Facilities for critical care.<br><br>**Information due**: w/c 02 February 2009. | Board<br><br>Board |

| | | | | |
|---|---|---|---|---|
| 5.0 | Other documents and standards + information captures. | RDS and 1:50 layouts – status and content.<br><br>Environmental conditions matrix – status and content.<br><br>Naming of manufacturers and 'kit'.<br><br>Achieving relevant quality and performance standards. | Dates being programmed for RDS and 1:50 meetings.<br><br>WW to provide draft of environmental matrix.<br><br>Except in very particular circumstances naming of manufacturers not allowed (see attached briefing note from the Board's legal advisors).<br><br>This to be drafted into ERs to assist in the physical build, to give provision for the Board supervisor and team to act and to assist in the quality of product and commissioning. | <br><br>WW |
| 6.0 | Planning | C&B to update following recent presentation (incl S75 update). Agree planning matrix and current + ongoing/future team actions and owners. | **Action:** Planning matrix generated. This to be updated and issued by C&B for next ER meeting. | C&B |
| 7.0 | Utilities | WW to update on status and actions – discuss impacts on project/ER drafting/time/cost. | WW advise that the current draft narrative will be turned into a 'storyboard' for each area and incorporated into the ERs. In order to complete this exercise meetings are required with several Board reps, including Voice/Data, Medical Gases, Pneumatic systems.<br><br>**Action:** DHall and WW to meet separately w/c 02 February 2009 to update Queries List and also identify meetings required. | <br><br>C&B/WW |
| 8.0 | Fire | Update on BH inputs and actions arising from joint HLM/BH/WW meeting.<br><br>Clarifications of inputs and process to ensure design and ERs inputs are achieved. | HLM confirmed that they have queries from Buro Happold and that the overall fire strategy work was progressing. This would involve ensuring that the podium layout 'works' in evacuation terms and working up the fire requirements.<br><br>**Action:** Buro queries to be issued by HLM and fire section of ERs updated for next issue of ERs. | <br><br>HLM |
| 9.0 | Sustainability/BREEAM / Energy / Carbon Trust | URS to update on SWater meeting – SUDS etc.<br>BREEAM roles to be considered (inputs identified).<br>Update from all on tracker actions and discuss + agree what to be incorporated in ERs (incl energy targets). | URS confirmed initial meetings with SWater, but that further meeting required to progress matters. **Action:** URS to issue note of subsequent meetings to advise on progress.<br><br>BREEAM bids due for return on 20 February 2009.<br><br>**Action**: update from all to C&B on tracker actions to allow further progress on energy and targets etc. Information to be provided by 09 February 2009. | URS<br><br><br><br>All |

| | | | | |
|---|---|---|---|---|
| 10.0 | Robotics | How are we incorporating this into ERs, what has been included in masterplan/floorplates? | Gordon Beattie, Head of Procurement at the Board taking robotics issue forward.<br><br>**Action:** C&B to query with Gordon as to progress as well as requirements for other 'new' or leading edge equipment and systems. | <br><br>C&B |
| 11.0 | Acoustics | HLM to advise of status. | Board agree that an acoustics input and overview will be of benefit.<br><br>**Action:** Scope/brief and potential providers to be provided by HLM and WW to allow consideration and award. | <br><br>HLM/WW |
| 12.0 | Carbon Trust | C&B to update re tracker – concur re requirements on team and clarify what is to be included in ERs. | See item 9.0, above. | |
| 13.0 | Helipad | WW have provided M&E inputs/considerations, HLM to advise of status and other design/information requirements to conclude. | Board advised that a previous Emergency planning type report had considered rooftop provision.<br>**Action:** this document to be provided by the Board.<br><br>**Action:** C&B to re-issue HBN 15:03: Hospital Helipads and seek CAA contact for designers to liaise with.<br><br>**Action:** URS to provide costed design information on the provision of a rooftop helipad. | Board<br><br>C&B<br><br>URS |
| 14.0 | Loading Bays | Are these sized appropriately. | URS confirmed that this issue was in-hand and would be reviewed and appropriately concluded. | |
| 15.0 | Sealed/Non-Sealed Building | Concur around what we are saying in this regard and knock-on implications and impacts (incl environmental conditions matrix – treatment of temperatures and upper temperatures etc). | It was noted that a double skinned provision is being considered, this to create an environmentally controlled situation.<br><br>Designers considered that the only other building types to have double skin approach are offices.<br><br>WW noted that they are retesting the assumptions around air quality and it was agreed that a sample area of double skin scenario would be modelled/tested.<br><br>**Action**: WW to feedback on progress and outcome of further analysis at next ER/Tech meeting. | <br><br><br><br><br><br>WW |

| | | | | |
|---|---|---|---|---|
| 16.0 | Bariatrics | What requires to be included in the ERs to address this requirement? | **Action:** Board to advise what specific requirements are to be included in the ERs (e.g. mortuary and other equipment sizing/spacing). | Board |
| 17.0 | Resilience | Comments from circulated document. | **Action:** all to review and comment on consultation copy of SHPN 00-07: Resilience planning for the healthcare estate. Comments to identify areas for consideration/input to ERs as well as implications (cost/area etc) of adopting proposals.<br>Board to specifically identify areas of resilience planning and emergency planning that the hospital requires to incorporate, e.g. chemical, biological incidents, hyperbaric chamber facilities (this via Alan Doran at the Board).<br><br>**Information due:** comments from designers due prior to next ER meeting, 13 Feb 2009.<br><br>**Post Meeting Note:** Board have confirmed no hyperbaric chamber facilities are required. | Contact with Alan Doran by C&B<br><br>All |
| 18.0 | Queries Log | Clarification meetings with client to conclude ER drafting. | This to be addressed separately with C&B and WW to allow updating and then circulation. | C&B |
| 19.0 | ER document sections | Comments and status of each section to be considered. | Updated sections confirmed as being worked on by all designers.<br><br>**Post Meeting Note**: confirmed at TA Board meeting of 06 February 2009 that updated drafts to be issued to C&B by noon on 11 February 2009 with 'finalised' ER sections from each designer by 27 February 2009. Appreciated that 'finalised' draft may have some info gaps to be slotted in, but the document to be concluded with all sections and information loaded up with spacing for any confirmations or concluded info to slot in. | All |
| 20.0 | Return Bid Requirements | Discuss what will be returned with action to be taken from meeting for team to provide list of requirements. | **Action:** all to consider what they will request in return bid (end of 18 week bid period) as well as for completion of FBC stage. Attached pro-forma to be filled in with this information and provided to C&B by 20 February 2009. | All |

| | | | | |
|---|---|---|---|---|
| 21.0 | AOCB | | Control of Infection: confirmed that CoI have been reviewing and inputing to work to date. Board confirmed that there will be a CoI sign-off prior to the bid being issued.<br><br>Liaison with Strathclyde Police to be commenced.<br><br>**Action:** C&B to engage via architectural department contact at the Police. | Board<br><br><br><br>C&B |
| 22.0 | Subsequent Meetings | Friday 13 February 2009;<br>Friday 27 February 2009;<br>Friday 13 March 2009;<br>Friday 27 March 2009;<br>Friday 10 April 2009. | For information only. | |

**Post Meeting Notes:**

A) Board to provide copy of site boundary provided by CLO. – **Board to provide.**

B) Discussed and agreed with the Board that a site walk-round is necessary to agree definitive boundary lines and highlight + agree specific areas of sensitivity with the SGH users as well as other interested parties. This will require the CLO boundary to be available to firstly cross-check against the drawn boundary. Areas of particular consideration are the Maternity/Neo-natal blue light route and access (also considering that the build will have to extend into the zone between neo-natal and the new hospital to provide the physical link) and the facilities drop-off/access at the rear of Surgical Block. C&B to contact Frances Wrath to arrange attendance by Jim McFadden (Estates), Ronnie Clinton (Facilities) and Gibby Donnelly (Fire Officer). HLM to lead TA team input to inform masterplanning/ER layouts on 'blue-light' and other essential routes/areas. Once Board/TA team position is agreed, Strathclyde Fire and Rescue and Scottish Ambulance Service to be taken through proposals for agreement. – **C&B to initiate, HLM to lead.**

**New South Glasgow Hospitals**
**Technical / ER's Meeting – Friday 13 February 2009**

**MINUTE of MEETING**

**Attendees:** Hugh McDerment (HM) NHS GG&C (part), Steve Allan (SA) HLM, Graham Annandale (GA) URS, John Bushfield (JB), Wallace Whittle, David Hall (DBH) and Mark Baird (MGB)

**Apologies:** Peter Moir (PM) NHSGG&C, Bob Menzies (BM) BMJ, Stewart McKechnie (SM) WW.

**Circulation:** Attendees + Apologies + Jim Hackett + Douglas Ross + Scott Grier + Harry Smith + Andy Anderson

| Item | Agenda | Status/Purpose | Minute/Action of 30 Jan | Action | 13 February 2009 Minute | Action |
|---|---|---|---|---|---|---|
| 1.0 | Gateway Update | C&B to give an update on the Gateway outcome and report to the team. | C&B confirmed that Gateway 2 was concluded and the project had successfully passed the review with a limited number of 'amber' notifications. | | | |
| 2.0 | Clarification of importance and standing of ERs | Clarification of bidding and appointment process and use of the ERs. | The process to appointment of the contractor and site operations was re-stated to the team. This confirmed that the prequalification process will run to 20 March 2009, with the bid period (using competitive dialogue) running from 14 April 2009 for 18 weeks. The contract award will then take place in October 2009 comprising design and construction of the laboratories concurrent with design development of the Adult and Children's hospital.<br><br>The importance of the Employer's Requirements (ERs) being generated by the team was stressed. | | | | | | | |
|---|---|---|---|---|---|---|
| 4.0 | Compliance (SHTMs/HTMs) | Concur that list is currently 'complete' – seek client views and approval. Agree requirement to close out HLM narrative items. | Updated design team list of derogations provided by HLM and circulated to client + team.<br><br>**Action:** Board to review listing and provide comments and approvals as necessary. Concluded listing requires to be signed off. Particular consideration of areas with narrative on HLM listing (see 'Key Ergonomic Space Standards').<br><br>**Information/sign-off due:** prior to next ER/Technical Meeting, 13 February 2009.<br><br>**Action:** Board to arrange for copies of the under noted to be circulated, as discussed, plus provide clarification on the status of SHTM 61 Flooring - this document was circulated recently for comment/consultation but is not listed on the HFS website. Can the Board (via HFS) confirm the status/likely date of publication of this document?<br><br>* SHPN 06 Part 2: Facilities for diagnostic imaging;<br><br>* SHPN 23: Hospital accommodation for children and young people;<br><br>* SHPN 28: Facilities for cardiac services; and<br><br>* SHPN 57: Facilities for critical care.<br><br>**Information due**: w/c 02 February 2009. | Board<br><br>Board | HTM/SHTM list discussed and highlighted that Board are aware of the 16.5sqm versus 19sqm issue in relation to bedroom sizing but that the current drawn requirement (which is greater than 16.5) complies with the required standard, has been approved by the Users and is affordable.<br><br>Board to review Compliance list and raise any queries or confirm/approve by end of w/c 16 February 2009.<br><br>HLM to issue post-meeting the listing of allowances and allocations in the current exemplar design and highlight any conflict with the potential new HBN on ergonomics.<br><br>WW to issue post-meeting the narrative on particular M&E related SHTM/HTMs (this was previously issued to the Board but not the design/TA team).<br><br>Board to issue the requested consultation draft SHPNs and provide clarification on SHTM61 (Flooring).<br><br>HLM to liaise with the Board to close out the Compliance (SHTM/HTM etc) aspect of the ERs asap, this also to allow their schedule of minimum standards for corridor widths, ceiling heights etc (incl treatment of handrails, bump protection and the like) to be completed and provided to C&B.<br><br>Agreed that the Compliance list will be issued in the ERs with no mention or request for derogations. | <br><br>Board<br><br>HLM<br><br>WW<br><br>Board<br><br>HLM/Board |
| 5.0 | Other documents and standards + information captures. | RDS and 1:50 layouts – status and content.<br><br>Environmental conditions matrix – status and content.<br><br>Naming of manufacturers and 'kit'.<br><br>Achieving relevant quality and performance standards. | Dates being programmed for RDS and 1:50 meetings.<br><br>WW to provide draft of environmental matrix.<br><br>Except in very particular circumstances naming of manufacturers not allowed (see attached briefing note from the Board's legal advisors).<br><br>This to be drafted into ERs to assist in the physical build, to give provision for the Board supervisor and team to act and to assist in the quality of product and commissioning. | WW | HLM to confirm post meeting that the listing of meetings has been concluded and issued back to Mairi and Heather at the Board. The programme of meetings to be circulated by HLM.<br><br>WW to provide draft of environmental matrix, this to identify room temperature requirements. To be provided w/c 17/02. (Treatment of room temperatures to be discussed thereafter: C&B/WW/Board).<br><br>As manufacturers and suppliers are not able to be listed, any specific requirements to be raised with the Board for consideration and agreement. For relevant items, specific specification requirements will require to be drafted and included in the ERs – e.g. imaging equipment – that will steer the bidders to a particular product/range.<br><br>**Post Meeting Note**: List of any such items/equipment to be circulated by CoP 19 Feb to allow discussion with the Board.<br><br>The relevant quality and performance standards are to be incorporated into the ERs by the design team where relevant. | HLM<br><br>WW<br><br>HLM/WW/ URS<br><br>HLM/WW/ URS |
| 6.0 | Planning | C&B to update following recent presentation (incl S75 update). Agree planning matrix and current + ongoing/future team actions and owners. | **Action:** Planning matrix generated. This to be updated and issued by C&B for next ER meeting. | C&B | Updated matrix issued at the meeting.<br><br>Comments by return from the Board and TA team by CoP 18/02 to C&B. | <br><br>All/Board |

| | | | | | | |
|---|---|---|---|---|---|---|
| 7.0 | Utilities | WW to update on status and actions – discuss impacts on project/ER drafting/time/cost. | WW advise that the current draft narrative will be turned into a 'storyboard' for each area and incorporated into the ERs. In order to complete this exercise meetings are required with several Board reps, including Voice/Data, Medical Gases, Pneumatic systems.<br><br>**Action:** DHall and WW to meet separately w/c 02 February 2009 to update Queries List and also identify meetings required. | C&B/WW | C&B advised that a Utilities meeting/discussion was required with the Board and that this would be Thurs 19/02 [or Fri 20/02 (tbc)]. This to review strategy and decisions + assumptions to allow Utilities to be closed out.<br><br>It was noted that meetings have been requested with the Board in relation to Voice/Data, the Medical Gases information and requirements provided by Frances Wrath had been included in the updated ERs and that no info had been received as yet with regard to pneumatic systems. Meetings and confirmations of information from the relevant Board reps is urgently required to allow these areas to be informed and closed out.<br><br>**Post Meeting Note**: Jane Gibb may be Board rep re pneumatic requirements (she is handling present queries on ACAD scheme) – Board to confirm.<br><br>WW confirmed that they had visited the Manchester Royal site, although the Board reps who were to attend unfortunately called off. WW have notes and recommendations from the visitation and shall issue these for digestion and Board approval where necessary. WW advised their view remains that the FM control room be housed in the FM building and not remote from the site. Relevant information to be circulated by CoP 17/02. | C&B<br><br>Board<br><br>Board<br><br>WW |
| 8.0 | Fire | Update on BH inputs and actions arising from joint HLM/BH/WW meeting.<br><br>Clarifications of inputs and process to ensure design and ERs inputs are achieved. | HLM confirmed that they have queries from Buro Happold and that the overall fire strategy work was progressing. This would involve ensuring that the podium layout 'works' in evacuation terms and working up the fire requirements.<br><br>**Action:** Buro queries to be issued by HLM and fire section of ERs updated for next issue of ERs. | HLM | HLM confirmed that they had received the list of BH queries back from C&B and would update this and re-issue as necessary.<br><br>It was noted that the fire consultation, checks and output drafting requires to move progressively to be aligned with the developing podium/masterplan work and this was acknowledged by HLM.<br><br>Fire co-ordination and lead with HLM – update on progress and confirmation to be provided to C&B. | HLM |
| 9.0 | Sustainability/BREEAM / Energy / Carbon Trust | URS to update on SWater meeting – SUDS etc.<br>BREEAM roles to be considered (inputs identified).<br>Update from all on tracker actions and discuss + agree what to be incorporated in ERs (incl energy targets). | URS confirmed initial meetings with SWater, but that further meeting required to progress matters. **Action:** URS to issue note of subsequent meetings to advise on progress.<br><br>BREEAM bids due for return on 20 February 2009.<br><br>**Action**: update from all to C&B on tracker actions to allow further progress on energy and targets etc. Information to be provided by 09 February 2009. | URS<br><br>All | URS provided a verbal update of the recent meeting with Scottish Water and this confirmed that SW were considering the hospital plans and would revert to URS with any specific comments or requirements. Write up of position to be issued by URS by CoP 17/02.<br><br>C&B expressed the need for a continued focus around the SW/drainage issue, with URS to pursue a joint SW/GCC/SEPA discussion to purge out any potential problems/views/requirements from the combined group.<br><br>Confirmed that the energy targets for the building have now been set following the carbon trust discussions.<br><br>C&B to confirm the coverage of sustainability issues in the ERs – URS sustainability resource/team to provide inputs to ER drafting. | URS<br><br>URS<br><br>C&B/URS |
| 10.0 | Robotics | How are we incorporating this into ERs, what has been included in masterplan/floorplates? | Gordon Beattie, Head of Procurement at the Board taking robotics issue forward.<br><br>**Action:** C&B to query with Gordon as to progress as well as requirements for other 'new' or leading edge equipment and systems. | C&B | Agreed that Board require to confirm robotics requirement by end of w/c 16 Feb 09.<br><br>Potential for variant bid outlook, however requirement of Board for robotics needed in any event. | Board |

| | | | | | | |
|---|---|---|---|---|---|---|
| 11.0 | Acoustics | HLM to advise of status. | Board agree that an acoustics input and overview will be of benefit.<br><br>**Action:** Scope/brief and potential providers to be provided by HLM and WW to allow consideration and award. | HLM/WW | HLM confirmed that they have acoustics consultant attending their office w/c 16 Feb 09 to assess requirement and proposal.<br><br>**Post Meeting Note**: HLM to liaise with WW re requirement and provide C&B with costed proposal by CoP 20/02 to allow issue to the Board for approvals. | <br><br>HLM |
| 12.0 | Carbon Trust | C&B to update re tracker – concur re requirements on team and clarify what is to be included in ERs. | See item 9.0, above. | | | |
| 13.0 | Helipad | WW have provided M&E inputs/considerations, HLM to advise of status and other design/information requirements to conclude. | Board advised that a previous Emergency planning type report had considered rooftop provision.<br>**Action:** this document to be provided by the Board.<br><br>**Action:** C&B to re-issue HBN 15:03: Hospital Helipads and seek CAA contact for designers to liaise with.<br><br>**Action:** URS to provide costed design information on the provision of a rooftop helipad. | Board<br><br>C&B<br><br>URS | Report to be provided by the Board.<br><br>Document issued, Tony Eagles was original CAA contact, he has passed to Kevin Payne (01293 57 3696). HLM to co-ordinate and lead helipad feasibility.<br><br>URS to provide costed structural proposals for options on helipad structure to (i) manage the air-ambulance and (ii) manage the air sea rescue provision. | Board<br><br>HLM<br><br>URS |
| 14.0 | Loading Bays | Are these sized appropriately. | URS confirmed that this issue was in-hand and would be reviewed and appropriately concluded. | | Confirmed by URS as WiP. C&B re-confirmed concern about this area of the planning presently – URS to provided updated plans w/c 16/02 to reflect the elements of the masterplan that have been updated, this to demonstrate the turning circles, logistics etc. | URS |
| 15.0 | Sealed/Non-Sealed Building | Concur around what we are saying in this regard and knock-on implications and impacts (incl environmental conditions matrix – treatment of temperatures and upper temperatures etc). | It was noted that a double skinned provision is being considered, this to create an environmentally controlled situation.<br><br>Designers considered that the only other building types to have double skin approach are offices.<br><br>WW noted that they are retesting the assumptions around air quality and it was agreed that a sample area of double skin scenario would be modelled/tested.<br><br>**Action**: WW to feedback on progress and outcome of further analysis at next ER/Tech meeting. | <br><br><br><br><br><br>WW | HLM and WW to liaise and identify the sealed/non-sealed proposal. This to consider the pros and cons of the double-skinned consideration, with particular attention and clarification around air quality (incl modelling) and cross-talk checks.<br><br>Information and proposals to be provided to C&B for discussion with the Board by end of w/c 16/02. | HLM/WW |
| 16.0 | Bariatrics | What requires to be included in the ERs to address this requirement? | **Action:** Board to advise what specific requirements are to be included in the ERs (e.g. mortuary and other equipment sizing/spacing). | Board | Board to advise. | Board |
| 17.0 | Resilience | Comments from circulated document. | **Action:** all to review and comment on consultation copy of SHPN 00-07: Resilience planning for the healthcare estate. Comments to identify areas for consideration/input to ERs as well as implications (cost/area etc) of adopting proposals.<br>Board to specifically identify areas of resilience planning and emergency planning that the hospital requires to incorporate, e.g. chemical, biological incidents, hyperbaric chamber facilities (this via Alan Doran at the Board).<br><br>**Information due:** comments from designers due prior to next ER meeting, 13 Feb 2009.<br><br>**Post Meeting Note:** Board have confirmed no hyperbaric chamber facilities are required. | Contact with Alan Doran by C&B<br><br>All | Board to confirm with Alan Doran both any particular aspects of the consultation draft that are to be adopted as well as the position with regard to any specific current and future Majax or emergency and contingent planning requirements.<br><br>Noted none received to date. List of comments and observations require to be issued to C&B by CoP 17/02. | Board<br><br>All |

| | | | | | | |
|---|---|---|---|---|---|---|
| 18.0 | Queries Log | Clarification meetings with client to conclude ER drafting. | This to be addressed separately with C&B and WW to allow updating and then circulation. | C&B | C&B to issue updated log and pursue Board items. | C&B |
| 19.0 | ER document sections | Comments and status of each section to be considered. | Updated sections confirmed as being worked on by all designers.<br><br>**Post Meeting Note**: confirmed at TA Board meeting of 06 February 2009 that updated drafts to be issued to C&B by noon on 11 February 2009 with 'finalised' ER sections from each designer by 27 February 2009. Appreciated that 'finalised' draft may have some info gaps to be slotted in, but the document to be concluded with all sections and information loaded up with spacing for any confirmations or concluded info to slot in. | All | See item 2.0, above. | |
| 20.0 | Return Bid Requirements | Discuss what will be returned with action to be taken from meeting for team to provide list of requirements. | **Action:** all to consider what they will request in return bid (end of 18 week bid period) as well as for completion of FBC stage. Attached pro-forma to be filled in with this information and provided to C&B by 20 February 2009. | All | Stage C+ position to be considered in terms of design information to be returned.<br><br>The importance of requesting information to be returned in the bids that allows assessment of coverage and compliance with the ERs was highlighted. This to extend to and include, but not be limited to, the listing of manufacturers, kit, materials etc in order that a quality/compliance type assessment can be made.<br><br>Date for return of pro-forma to C&B remains by 20/02. | All |
| 21.0 | AOCB | | Control of Infection: confirmed that CoI have been reviewing and inputing to work to date. Board confirmed that there will be a CoI sign-off prior to the bid being issued.<br><br>Liaison with Strathclyde Police to be commenced.<br><br>**Action:** C&B to engage via architectural department contact at the Police. | Board<br><br>C&B | Actual sign-off coverage and process to be agreed by C&B and the Board.<br><br>Alan Seabourne advised 11/02 that he had the list of SP personnel and would contact the relevant Superintendent (arch liaison?)<br><br>Meeting Schedule issued to all by C&B.<br><br>Other parties who may require to be consulted prior to tender issue to be considered by all in order that pre-warning is provided where possible. E.g. Strathclyde Fire and Rescue. Any other bodies/individuals to be listed to C&B (incl coverage of matters for discussion with them) by end of w/c 16/02.<br><br>Noted that some aspects of roads into the site may require to be formed to access the labs and install utilities/comms – this to be monitored and re-assessed when roads updated by URS in the coming week.<br><br>URS confirmed roads to be constructed to adoptable standards.<br><br>URS to check if any of the current boreholes are over roadway areas, this will be a consideration/feature for adoption (sub-strata).<br><br>Request for access to the SAS site to visually assess workshop, tanks, fuel storage etc to be made.<br><br>The cross-reference checking/reading of the Clinical Output Specifications by the designers was highlighted. Also a system for checking the technical standards noted in the CoS are covered by the ERs, are appropriate and then (only then) the technical standards (e.g. SHTM/HTM references) | C&B/Board<br><br>Board<br><br>All<br><br>C&B/URS<br><br>URS<br><br>C&B<br><br>HLM |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | removed from the CoS to be agreed between HLM and IBuchAssoc.<br><br>AEDET of exemplar design and facilitation of this to be considered. HLM to have internal discussion on this and ASPECT and report back to C&B 18/19 Feb. | HLM |
| 22.0 | Subsequent Meetings | Friday 13 February 2009;<br>Friday 27 February 2009;<br>Friday 13 March 2009;<br>Friday 27 March 2009;<br>Friday 10 April 2009. | For information only. | | | |

**Post Meeting Notes (from meeting of 30 Jan):**

A) Board to provide copy of site boundary provided by CLO. – **Board to provide.**

B) Discussed and agreed with the Board that a site walk-round is necessary to agree definitive boundary lines and highlight + agree specific areas of sensitivity with the SGH users as well as other interested parties. This will require the CLO boundary to be available to firstly cross-check against the drawn boundary. Areas of particular consideration are the Maternity/Neo-natal blue light route and access (also considering that the build will have to extend into the zone between neo-natal and the new hospital to provide the physical link) and the facilities drop-off/access at the rear of Surgical Block. C&B to contact Frances Wrath to arrange attendance by Jim McFadden (Estates), Ronnie Clinton (Facilities) and Gibby Donnelly (Fire Officer). HLM to lead TA team input to inform masterplanning/ER layouts on 'blue-light' and other essential routes/areas. Once Board/TA team position is agreed, Strathclyde Fire and Rescue and Scottish Ambulance Service to be taken through proposals for agreement. – ~~**C&B to initiate, HLM to lead.**~~ **Frances Wrath will provide diary date(s) for Board attendees, TA team to then confirm which date is suitable.**

**Post Meeting Note (from meeting of 13 Feb):**

C) The benefit of selecting areas/rooms for appraisal and coverage in respect of various aspects of design detail and HAI~Scribe compliance was discussed. This resulted in the agreement that a bedroom and theatre layout will both be considered at the next ER/Technical meeting in order that areas of detailing can be discussed, agreed and written up. This to include joints, junctures etc and treatment and protection of surfaces – e.g. coving, skirting, bump rails etc.
**Action: HLM to liaise with WW as necessary and prepare layout/log for consideration and agreement on 27 Feb 09.**

**New South Glasgow Hospitals**
**Technical / ER's Meeting – Friday 27 February 2009**

**MINUTE of MEETING**

**Attendees:** Peter Moir (PM) NHS GG&C, Stewart McKechnie (SM) WW (part), John Bushfield (JB) WW, Graham Annandale (GA) URS, Bob Menzies (BM) BMJ, Steve Allan (SA) HLM, David Hall (DBH) C&B, Mark Baird (MGB) C&B

**Apologies:** Hugh McDerment NHS GG&C

**Circulation:** Attendees + Apologies + Jim Hackett + Douglas Ross + Scott Grier + Harry Smith + Andy Anderson

| Item | Agenda | Status/Purpose | 13 February 2009 Minute | Action | 27 February 2009 Minute | Action |
|---|---|---|---|---|---|---|
| 1.0 | Gateway Update | C&B to give an update on the Gateway outcome and report to the team. | | | | |
| 2.0 | Clarification of importance and standing of ERs | Clarification of bidding and appointment process and use of the ERs. | Civils and Structural updated sections received 12 February 2009.<br><br>M&E handed over at meeting – electronic copy to be issued post meeting.<br><br>HLM update (incl fire and landscaping) to be issued post-meeting.<br><br>Final versions of ER text for 27 February 2009 was re-confirmed to the technical team, that along with the importance of the robustness of the documents to capture all output requirements and provide the standards for design to be assessed against and to achieve during the design development stage.<br><br>It is appreciated that some sections of the ERs may have info to be concluded to complete at 27/02, all headings and sections to be drafted as far as possible with [identification] where reference/x-ref/item of information is to be added to conclude. Also, some aspects that have not yet been concluded may be captured in an appendix – e.g. ergonomics (corridor widths etc) from HLM – by agreement with C&B.<br><br>HLM to issue the matrix of room types versus RDS type headings to WW, URS and C&B. This to allow each design discipline to complete the relevant information for bid purposes. | <br><br>WW<br><br>HLM<br><br>All<br><br>All<br><br>HLM – all to complete | <br><br>C&B and WW meeting Monday 02 March 2009 to discuss and review ERs + close out.<br><br>HLM reported that liaison with Buro Happold continues and that HLM intend to have the relevant drawings to BH to allow written ER info from w/c 09 March 2009 with any drawn info to follow from BH thereafter.<br><br>Post Meeting Note: C&B and HLM in ADB and room coding discussions – to revert to the Board. | <br><br>C&B/WW<br><br>BH<br><br>C&B/HLM |
| 3.0 | Previous Actions | Review actions from last meeting. | Landscaping to be included in HLM updated section (see item 2.0 above).<br><br>Feedback on Appendix list awaited from all. To be provided by close of play Tuesday 17 February 2009.<br><br>Appendices to be added to capture specific items (see item 2.0, above).<br><br>Agreed no tolerance on bedroom size and dimensions needs to be enforced (other than positive movement). Location and coverage of tolerance (design + BS) in document to be confirmed by C&B. | HLM<br><br>All<br><br>C&B | C&B have fed comments on latest landscaping section – HLM to co-ordinate update in next ER draft.<br><br>Received from WW and HLM, awaited from URS and the Board. | HLM<br><br>URS/Board |

| | | | | | | |
|---|---|---|---|---|---|---|
| 4.0 | Compliance (SHTMs/HTMs) | Concur that list is currently 'complete' – seek client views and approval. Agree requirement to close out HLM narrative items. | HTM/SHTM list discussed and highlighted that Board are aware of the 16.5sqm versus 19sqm issue in relation to bedroom sizing but that the current drawn requirement (which is greater than 16.5) complies with the required standard, has been approved by the Users and is affordable.<br><br>Board to review Compliance list and raise any queries or confirm/approve by end of w/c 16 February 2009.<br><br>HLM to issue post-meeting the listing of allowances and allocations in the current exemplar design and highlight any conflict with the potential new HBN on ergonomics.<br><br>WW to issue post-meeting the narrative on particular M&E related SHTM/HTMs (this was previously issued to the Board but not the design/TA team).<br><br>Board to issue the requested consultation draft SHPNs and provide clarification on SHTM61 (Flooring).<br><br>HLM to liaise with the Board to close out the Compliance (SHTM/HTM etc) aspect of the ERs asap, this also to allow their schedule of minimum standards for corridor widths, ceiling heights etc (incl treatment of handrails, bump protection and the like) to be completed and provided to C&B.<br><br>Agreed that the Compliance list will be issued in the ERs with no mention or request for derogations. | <br><br><br><br><br>Board<br><br><br>HLM<br><br><br>WW<br><br><br>Board<br><br><br>HLM/Board | PM gave comments on planning note 004 (key ergonomics) to HLM post masterplan meeting of 20 feb 2009.<br><br>PM advised that he is meeting Estates in relation to several matters related to the Project.<br><br>Post Meeting Note: as at 04 March 2009 – list to be re-issued for review. HLM checking to allow issue.<br><br>HLM to provide overall building measure as well as confirm allowances and allocations (e-mail MGB to SA 04 March 2009 clarifies requirement).<br><br>WW have provided notice, but this does not make clear any particular cost or area or other implications that need to be considered by the Board.<br><br>Post Meeting Note: received by the Board 03 March 2009 and circulated to designers. Comments from all required by CoP 06 March 2009.<br><br>Agreed by all that a 'watch-list' or 'lessons learned' sheet would be generated to highlight and close off issues that have been problematic or challenging on previous projects.<br><br>Pro-forma for watchlist issued by C&B 02 March 2009 – to be returned by CoP 04 March 2009. | <br><br><br><br><br>HLM<br><br><br>HLM<br><br><br>WW<br><br><br>All<br><br><br><br><br>All |
| 5.0 | Other documents and standards + information captures. | RDS and 1:50 layouts – status and content.<br><br>Environmental conditions matrix – status and content.<br><br>Naming of manufacturers and 'kit'.<br><br>Achieving relevant quality and performance standards. | HLM to confirm post meeting that the listing of meetings has been concluded and issued back to Mairi and Heather at the Board. The programme of meetings to be circulated by HLM.<br><br>WW to provide draft of environmental matrix, this to identify room temperature requirements. To be provided w/c 17/02. (Treatment of room temperatures to be discussed thereafter: C&B/WW/Board).<br><br>As manufacturers and suppliers are not able to be listed, any specific requirements to be raised with the Board for consideration and agreement. For relevant items, specific specification requirements will require to be drafted and included in the ERs – e.g. imaging equipment – that will steer the bidders to a particular product/range.<br><br>**Post Meeting Note**: List of any such items/equipment to be circulated by CoP 19 Feb to allow discussion with the Board.<br><br>The relevant quality and performance standards are to be incorporated into the ERs by the design team where relevant. | HLM<br><br><br><br>WW<br><br><br><br>HLM/WW/ URS<br><br><br><br><br><br>HLM/WW/ URS | HLM to provide the list prioritised to show the 120 in green (any others amber/red) to identify the list we are to progress with – URGENTLY REQUIRED.<br><br>Received.<br><br>PM mentioned that Ironside Farrah may be required to reappraise aspects of the masterplan.<br><br>None received as at 04 March 2009 (WW picking up in meetings with the Board – IT dept etc – to be arranged by the Board). | HLM<br><br><br><br><br>Board<br><br><br><br><br><br>HLM/URS/ Board |
| 6.0 | Planning | C&B to update following recent presentation (incl S75 update). Agree planning matrix and current + ongoing/future team actions and owners. | Updated matrix issued at the meeting.<br><br>Comments by return from the Board and TA team by CoP 18/02 to C&B. | <br><br>All/Board | Comments required from all.<br><br>C&B have prepared a planning matrix to identify the status and responsibility of each condition for incorporation in the ERs. A 'clean' copy of the outline planning doc is required from the Board. | All<br><br><br>Received 03 March 2009. |

| | | | | | | |
|---|---|---|---|---|---|---|
| 7.0 | Utilities | WW to update on status and actions – discuss impacts on project/ER drafting/time/cost. | C&B advised that a Utilities meeting/discussion was required with the Board and that this would be Thurs 19/02 [or Fri 20/02 (tbc)]. This to review strategy and decisions + assumptions to allow Utilities to be closed out.<br><br>It was noted that meetings have been requested with the Board in relation to Voice/Data, the Medical Gases information and requirements provided by Frances Wrath had been included in the updated ERs and that no info had been received as yet with regard to pneumatic systems. Meetings and confirmations of information from the relevant Board reps is urgently required to allow these areas to be informed and closed out.<br><br>**Post Meeting Note**: Jane Gibb may be Board rep re pneumatic requirements (she is handling present queries on ACAD scheme) – Board to confirm.<br><br>WW confirmed that they had visited the Manchester Royal site, although the Board reps who were to attend unfortunately called off. WW have notes and recommendations from the visitation and shall issue these for digestion and Board approval where necessary. WW advised their view remains that the FM control room be housed in the FM building and not remote from the site. Relevant information to be circulated by CoP 17/02. | C&B<br><br>Board<br><br>Board<br><br>WW | Noted that this meeting had not yet been able to be arranged with IT – WW would be including certain guestimates and considerations in the ERs, but a meeting to go through their queries and close out issues remains urgent – the Board acknowledged this and are endeavouring to get meeting dates.<br><br>WW confirmed that other utilities/site type items incl gases and pneumatics were being addressed via Frances Wrath.<br><br>WW further confirmed that a presentation/meeting with Satchwell re BMS was to be arranged. Post Meeting Note: 13 March 2009 at 2pm (post Technical/ERs meeting) is proposed. | Board<br><br>C&B/WW/ Board |
| 8.0 | Fire | Update on BH inputs and actions arising from joint HLM/BH/WW meeting.<br><br>Clarifications of inputs and process to ensure design and ERs inputs are achieved. | HLM confirmed that they had received the list of BH queries back from C&B and would update this and re-issue as necessary.<br><br>It was noted that the fire consultation, checks and output drafting requires to move progressively to be aligned with the developing podium/masterplan work and this was acknowledged by HLM.<br><br>Fire co-ordination and lead with HLM – update on progress and confirmation to be provided to C&B. | HLM | HLM co-ordinating and confirmed on target for drawing release and BH inputs to ERs – see also item 2.0, above. | HLM |
| 9.0 | Sustainability/BREEAM / Energy / Carbon Trust | URS to update on SWater meeting – SUDS etc.<br>BREEAM roles to be considered (inputs identified).<br>Update from all on tracker actions and discuss + agree what to be incorporated in ERs (incl energy targets). | URS provided a verbal update of the recent meeting with Scottish Water and this confirmed that SW were considering the hospital plans and would revert to URS with any specific comments or requirements. Write up of position to be issued by URS by CoP 17/02.<br><br>C&B expressed the need for a continued focus around the SW/drainage issue, with URS to pursue a joint SW/GCC/SEPA discussion to purge out any potential problems/views/requirements from the combined group.<br><br>Confirmed that the energy targets for the building have now been set following the carbon trust discussions.<br><br>C&B to confirm the coverage of sustainability issues in the ERs – URS sustainability resource/team to provide inputs to ER drafting. | URS<br><br>URS<br><br>C&B/URS | Updated ERs section from URS to capture and identify progressed status on all areas now due.<br><br>DH confirmed that the Carbon Trust would be reviewing ER items on 18 March 2009.<br><br>URS advised that SEPA now want a joint Swater/SEPA/GCC meeting – URS/Board to liaise once date set re attendance of the Board.<br><br>The GCC flood risk assessment aspect of the masterplan requires to be concluded – the masterplan storage provision to be identified also.<br><br>PM confirmed that Swater had issued an e-mail stating that they have no objections 'in principle' to the land provision to the NHS. NHS Property Advisors to discuss with Swater as well as provide for the necessary wayleave (potential) for Swater pipes over the new access road to Govan Road (the boulevard).<br><br>Board taking Swater forward, agenda requires to include the provision of a new mobile mast | URS<br><br>URS/Board<br><br>URS<br><br>Board<br><br>Board |

| | | | | | | |
|---|---|---|---|---|---|---|
| 10.0 | Robotics | How are we incorporating this into ERs, what has been included in masterplan/floorplates? | Agreed that Board require to confirm robotics requirement by end of w/c 16 Feb 09.<br><br>Potential for variant bid outlook, however requirement of Board for robotics needed in any event. | Board | PM confirmed that he is meeting with Gordon Beattie on Wednesday 04 March 2009 and would update on progress/requirement etc.<br><br>PM confirmed that robotics are definitely required in some fashion, and that a Board Policy (requirement) would be generated.<br><br>PM advised that the Board had some videos and drawings of robot provision elsewhere and would make that available to the team.<br><br>WW/HLM require to consider and prepare a notional x-section of the tunnel. | Board<br><br>Board<br><br>Board<br><br>WW/HLM |
| 11.0 | Acoustics | HLM to advise of status. | HLM confirmed that they have acoustics consultant attending their office w/c 16 Feb 09 to assess requirement and proposal.<br><br>**Post Meeting Note**: HLM to liaise with WW re requirement and provide C&B with costed proposal by CoP 20/02 to allow issue to the Board for approvals. | <br><br>HLM | Noted that Martin Butterfield of Arup Acoustics is proposed to carry out the work. Understood that Martin wrote the relevant HTM.<br><br>HLM to provide a costed proposal to the Board for consideration and approval to carry out this work – URGENTLY REQUIRED. | HLM |
| 12.0 | Carbon Trust | C&B to update re tracker – concur re requirements on team and clarify what is to be included in ERs. | | | | |
| 13.0 | Helipad | WW have provided M&E inputs/considerations, HLM to advise of status and other design/information requirements to conclude. | Report to be provided by the Board.<br><br>Document issued, Tony Eagles was original CAA contact, he has passed to Kevin Payne (01293 57 3696). HLM to co-ordinate and lead helipad feasibility.<br><br>URS to provide costed structural proposals for options on helipad structure to (i) manage the air-ambulance and (ii) manage the air sea rescue provision. | Board<br><br>HLM<br><br>URS | PM advised that he has to meet Alan Doran and will provide the necessary report on emergency planning.<br><br>HLM confirmed that they are progressing and co-ordinating this aspect. To discuss headline CAA requirements and views and provide ER inputs. Board to provide contact at Bond helicopters. Air Sea Rescue to also be contacted.<br><br>URS to provide this information. | Board<br><br>HLM<br><br>Board<br><br>URS |
| 14.0 | Loading Bays | Are these sized appropriately. | Confirmed by URS as WiP. C&B re-confirmed concern about this area of the planning presently – URS to provided updated plans w/c 16/02 to reflect the elements of the masterplan that have been updated, this to demonstrate the turning circles, logistics etc. | URS | Noted that this items interacts with the labs work to an extent.<br><br>C&B requested that this aspect of design/validation is progressed urgently. | <br><br>URS |
| 15.0 | Sealed/Non-Sealed Building | Concur around what we are saying in this regard and knock-on implications and impacts (incl environmental conditions matrix – treatment of temperatures and upper temperatures etc). | HLM and WW to liaise and identify the sealed/non-sealed proposal. This to consider the pros and cons of the double-skinned consideration, with particular attention and clarification around air quality (incl modelling) and cross-talk checks.<br><br>Information and proposals to be provided to C&B for discussion with the Board by end of w/c 16/02. | HLM/WW | The ER provision for this item was discussed. WW explained the outlook that they are developing a mixed mode type narrative with 'reasoning' as to how and why this is considered. Any departure or alternatives will therefore require to address the same areas and facets of design and operation and explain those in terms of the alternative – this should allow assessment and evaluation. | WW |
| 16.0 | Bariatrics | What requires to be included in the ERs to address this requirement? | Board to advise. | Board | Board to confirm. | Board |
| 17.0 | Resilience | Comments from circulated document. | Board to confirm with Alan Doran both any particular aspects of the consultation draft that are to be adopted as well as the position with regard to any specific current and future Majax or emergency and contingent planning requirements. | Board | Noted that the Board had previously advised that the building was to be considered/classified as a terrorist target, and that the application of the adjacent car parking and underground car parking was acceptable. Reconfirmed that 'airport' style bollards are to be provided to prevent direct vehicle access/proximity to entrances – HLM/Hirst to consider. | HLM/Hirst |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | Noted none received to date. List of comments and observations require to be issued to C&B by CoP 17/02. | All | PM confirmed that he is to meet Alan Doran. Majax type information as well as emergency and contingent planning requirements to be provided from the Board (this to consider the future planning requirements – i.e. Southern and GRI will be the only 2 A&E depts for the city). | Board |
| 18.0 | Queries Log | Clarification meetings with client to conclude ER drafting. | C&B to issue updated log and pursue Board items. | C&B | Meetings to be arranged with IT to conclude. | Board |
| 19.0 | ER document sections | Comments and status of each section to be considered. | See item 2.0, above. | | PM provided some initial comments and advised that he will send through further comments. (Further comments received 03 March 2009 – additional comments may follow also.) | Board |
| 20.0 | Return Bid Requirements | Discuss what will be returned with action to be taken from meeting for team to provide list of requirements. | Stage C+ position to be considered in terms of design information to be returned.<br><br>The importance of requesting information to be returned in the bids that allows assessment of coverage and compliance with the ERs was highlighted. This to extend to and include, but not be limited to, the listing of manufacturers, kit, materials etc in order that a quality/compliance type assessment can be made.<br><br>Date for return of pro-forma to C&B remains by 20/02. | <br><br><br><br><br><br>All | Bid return information provided by WW and HLM.<br><br>Urgently required from URS. | <br><br>URS |
| 21.0 | AOCB | | Actual sign-off coverage and process to be agreed by C&B and the Board.<br><br>Alan Seabourne advised 11/02 that he had the list of SP personnel and would contact the relevant Superintendent (arch liaison?)<br><br>Meeting Schedule issued to all by C&B.<br><br>Other parties who may require to be consulted prior to tender issue to be considered by all in order that pre-warning is provided where possible. E.g. Strathclyde Fire and Rescue. Any other bodies/individuals to be listed to C&B (incl coverage of matters for discussion with them) by end of w/c 16/02.<br><br>Noted that some aspects of roads into the site may require to be formed to access the labs and install utilities/comms – this to be monitored and re-assessed when roads updated by URS in the coming week.<br><br>URS confirmed roads to be constructed to adoptable standards.<br><br>URS to check if any of the current boreholes are over roadway areas, this will be a consideration/feature for adoption (sub-strata).<br><br>Request for access to the SAS site to visually assess workshop, tanks, fuel storage etc to be made.<br><br>The cross-reference checking/reading of the Clinical Output Specifications by the designers was highlighted. Also a system for checking the technical standards noted in the | C&B/Board<br><br>Board<br><br><br>All<br><br>C&B/URS<br><br>URS<br><br>C&B<br><br>HLM | This requires to be agreed.<br><br>Board to progress.<br><br>None noted.<br><br>Running utilities along the new Govan road access (the boulevard) was discussed. The combination of road, tram, pedestrian, traffic and utilities was debated. URS and WW to consider and provide a notional section for the roadway to show the various requirements and the potential location(s) of utilities.<br><br>URS gave an update on the SI situation. The SI is on programme, with the areas over the site being carried out first of all. This has provided initial information that the boulder clay may by higher than originally thought. Information to be sought from Nuttal re roads as they have carried out some SI work in relation to the car parking etc.<br><br>PM confirmed that he is meeting SAS w/c 02 March and would advise if approach for access was OK. | Board / C&B<br><br>Board<br><br><br>URS / WW<br><br><br>URS<br><br>Board |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | CoS are covered by the ERs, are appropriate and then (only then) the technical standards (e.g. SHTM/HTM references) removed from the CoS to be agreed between HLM and IBuchAssoc.<br><br>AEDET of exemplar design and facilitation of this to be considered. HLM to have internal discussion on this and ASPECT and report back to C&B 18/19 Feb. | <br><br>HLM | HLM will action this.<br><br>AEDET with some limitations agreed as route forward – further discussion on ASPECT required. | HLM<br><br>C&B / HLM / Board |
| 22.0 | Subsequent Meetings | Friday 13 February 2009;<br>Friday 27 February 2009;<br>Friday 13 March 2009;<br>Friday 27 March 2009;<br>Friday 10 April 2009. | | | | |

**Post Meeting Notes (from meeting of 30 Jan):**

A) Board to provide copy of site boundary provided by CLO. – ~~**Board to provide.**~~ **Received from PM – forwarded to HLM. To be utilised with meeting on site: see item B, below.**

B) Discussed and agreed with the Board that a site walk-round is necessary to agree definitive boundary lines and highlight + agree specific areas of sensitivity with the SGH users as well as other interested parties. This will require the CLO boundary to be available to firstly cross-check against the drawn boundary. Areas of particular consideration are the Maternity/Neo-natal blue light route and access (also considering that the build will have to extend into the zone between neo-natal and the new hospital to provide the physical link) and the facilities drop-off/access at the rear of Surgical Block. C&B to contact Frances Wrath to arrange attendance by Jim McFadden (Estates), Ronnie Clinton (Facilities) and Gibby Donnelly (Fire Officer). HLM to lead TA team input to inform masterplanning/ER layouts on 'blue-light' and other essential routes/areas. Once Board/TA team position is agreed, Strathclyde Fire and Rescue and Scottish Ambulance Service to be taken through proposals for agreement. – ~~**C&B to initiate, HLM to lead.**~~ **Frances Wrath will provide diary date(s) for Board attendees, TA team to then confirm which date is suitable. Meeting dates required – urgent to inform site boundary conclusion.**

**Post Meeting Note (from meeting of 13 Feb):**

C) The benefit of selecting areas/rooms for appraisal and coverage in respect of various aspects of design detail and HAI~Scribe compliance was discussed. This resulted in the agreement that a bedroom and theatre layout will both be considered at the next ER/Technical meeting in order that areas of detailing can be discussed, agreed and written up. This to include joints, junctures etc and treatment and protection of surfaces – e.g. coving, skirting, bump rails etc.
**Action: HLM to liaise with WW as necessary and prepare layout/log for consideration and agreement on 27 Feb 09. Date to be arranged as aspect of ER close out.**

**Post Meeting Notes (from meeting of 27 February 2009):**

D) Potential dates for meetings with Facilities – 13 March and 20 March – as part of Technical/ER sessions.

**New South Glasgow Hospitals**
**Technical / ER's Meeting – Friday 13 March 2009**

**RUNNING AGENDA and ACTIONS**

**Attendees:** Peter Moir (PM) NHSGG&C, Bob Menzies (BM) BMJ, Steve Allan (SA) HLM, Graham Annandale (GA) URS, John Bushfield (JB) WW, Stewart McKechnie (SW) WW, Simon Miller (SM) C&B, David Hall (DBH) C&B, Mark Baird (MGB) C&B.

**Apologies:** Alan Seabourne, Hugh McDerment (both NHS GG&C)

**Circulation:** Attendees + Apologies + Jim Hackett + Douglas Ross + Scott Grier + Harry Smith + Andy Anderson

| Item | Agenda Point | Remaining Action | Action | Minute 13 March 2009 | Action |
|---|---|---|---|---|---|
| 1.0 | Gateway Update | | | | |
| 2.0 | Clarification of importance and standing of ERs | ADB room coding and equipment scheduling – to be concluded between HLM/C&B and the Board. | HLM / C&B / Board | Discussed post meeting. Content and coverage debated and agreed. Costed proposal to be issued to the Board by C&B. | C&B |
| 3.0 | Previous Actions | Board to provide comments on the list of Appendices once the updated list is provided to them. To be provided early w/c 16 March 2009. | C&B / Board | Updated list to be issued early w/c 16 March 2009. | C&B |
| 4.0 | Compliance (SHTMs/HTMs) | Feedback from Board in relation to meeting(s) with Estates.<br><br>Updated SHTM/HTM list attached to Agenda – to be reviewed by all with any comments to be provided to C&B by CoP Wed 18 March 2009.<br><br>Clarity on SHTM/HTM items provided by WW where there is potential area/cost impact to be issued to support review of overall SHTM/HTM listing.<br><br>HLM to provide overall building measure as well as confirm allowances and allocations for key ergonomics. To be measured upon completion of dwgs 13 March 2009.<br><br>Comments on consultation draft documents received (HLM to confirm) – to be issued for review and Board consideration. C&B will issue early w/c 16 March 2009.<br><br>'Lessons learned' watchlists require to be provided by Board and WW. | Board<br><br>All<br><br>WW<br><br>HLM<br><br>C&B<br><br>WW / Board | PM has arranged meetings w/c 16 March 2009, DBH from C&B will attend.<br><br>Issued post meeting – deadline for response CoP Tues 17 March 2009.<br><br>WW clarified that their recommendation is that the newer HTM are prioritised in the ERs per their listing. (Therefore no cost/area/other impacts specifically raised by WW). WW have produced Ventilation and Electrical Distribution Schematics reflecting the updated standards and are to provide to the Board for review.<br><br>As 'Remaining Action' – to be provided asap w/c 16 March 2009.<br><br>Table to be issued for review and agreement/action as necessary.<br><br>Current watchlist attached to Minute. Board to review and add their items by CoP Wed 18 March. C&B to review and progress responses and actions. | <br><br>All<br><br>WW<br><br>HLM<br><br>C&B<br><br>Board / C&B |
| 5.0 | Other documents and standards + information captures. | Agreement of 50/50 rooms for 1:50s and RDS.<br><br>Ironside Farrah to reappraise aspects of the masterplan (environmental impacts)?<br><br>Specific discussions required to 'scope-up' the MRI and other relevant Imaging areas as well as similar aspects/requirements where we do not know the kit that will be purchased at this stage but we need to make suitable provision in the building. This to include, for example, coverage of fit out by the Board, interaction with structure re location, quench pipes, chillers etc as well as cooling requirements (endoscopy for example) and volume requirements where relevant. This requires to also consider the provision of perf specs that replicate 'named' systems or manufacturers. | HLM<br><br>Board<br><br>All | Discussed post meeting: Harry Smith (HLM) advised that a number of common rooms to both hospitals have been agreed and the with then individual rooms to each hospital. This therefore provides for more room coverage than the original arrangement. HLM to finalise list with HG and MM Friday 13 or Monday 16 March at the latest.<br><br>Jim Miller (Ironside F) will agree inputs and review with the Board.<br><br>Principles of MRI 'packaging' discussed and agreed to follow ACAD route in this regard. C&B will provide further briefing for design team and Board input.<br><br>Post Meeting Note: Other items/areas/departments for this type of analysis and detailing to be highlighted to C&B by CoP Wed 18 March 2009. | HLM<br><br>Board<br><br>C&B<br><br>All |

| | | | | | |
|---|---|---|---|---|---|
| | | | | WW updated re outcomes from the renal meeting – this included that the Renal Institute spec was to be utilised (not the HTM) that Stewart Campbell (Board) would provide feedback and requirements (taking lessons learned from ACADs), that proprietary panels were required and that a lay-by/access is required for renal chemicals. It was proposed that a dual purpose lay-by to accommodate hardstanding for renal as well as drop-offs for GP referrals to ED would be considered across from new carpark/existing neurosciences area. PM noted that flow rates for clean water require to be checked – 800l/m was not sufficient – 1,400 l/m may be required. | Designers to including in ERs and masterplan |
| 6.0 | Planning | Comments received on planning matrix. Update discussion required as well as 'ordering' of planning risks as element of overall risk profiling. | All | DBH meeting planners 20 March 2009. | |
| 7.0 | Utilities | Meeting with Board IT representative to be arranged.<br><br>Update on progress on utilities, gases, pneumatics etc – any residual information requirements?<br><br>BMS presentation – date to be discussed and agreed – 20 March 2009? | Board<br><br>WW<br><br>All | Board hoping to arrange for w/c 16 March 2009. Fall-back position is review of WW draft spec and agreement on a 'coverage' allowance in specification/requirement terms.<br><br>WW advised that meeting requires to be arranged with Frances Wrath to close out gases, pneumatics etc. SPower have identified the route for their service, a quote will be c3months from now – middle of bid period when this is therefore anticipated. Gas have provided a quotation and water loads have been provided.<br><br>C&B to co-ordinate BMS date/time – this to be at Hilington, Jim McFadden to be invited along with others from his staff. | Board<br><br>WW<br><br>C&B |
| 8.0 | Fire | HLM co-ordinating – drawing release to Buro Happold 13 March 2009. | HLM | Confirmed that BH have provided some queries and have been in liaison with HLM. Drawings to be provided to BH to allow progression of fire strategy requirements. | HLM/BH |
| 9.0 | Sustainability/BREEAM / Energy / Carbon Trust | Confirmed that the Carbon Trust will be reviewing ER items on 18 March 2009.<br><br>Progress update from URS required on SEPA joint meeting requirement as well as GCC flood risk assessment aspect of the masterplan.<br><br>Board property advisor taking forward Scottish Water land take as well as mobile mast relocation – update? | C&B<br><br>URS<br><br>Board | Proposed that this follows on from the Facilities meeting. Post Meeting Note: timing of Facilities meeting extended – check timing for Carbon Trust. HLM and URS sections on sustainability to be provided to sit alongside the WW section and the WRAP information.<br><br>PM advised that he had a meeting with GCC and it was agreed that URS would take the lead on contact with the Council in relation to drainage issues (Scott Wilson therefore to feed into URS with any relevant aspects/items etc). Noted that planning will be required to carry out any work to the culvert. This to be considered re Masterplan (condition to masterplan perhaps?).<br><br>URS advised that the previous Halcrow information addressed flood risk from the Clyde etc, whereas a requirement of the Council is for the 1 in 1000 year occurrence to be studied and submitted.<br><br>PM advised that the Scottish Water and mobile mast issues are being taken forward by Moira Anderson from the Board. | C&B/HLM/URS<br><br>URS<br><br>Board |
| 10.0 | Robotics | PM confirmed that he is meeting with Gordon Beattie on Wednesday 04 March 2009 and would update on progress/requirement etc.<br><br>PM confirmed that robotics are definitely required in some fashion, and that a Board Policy (requirement) would be generated.<br><br>PM advised that the Board had some videos and drawings of robot provision elsewhere and would make that available to the team.<br><br>WW/HLM require to consider and prepare a notional x-section of the tunnel. | Board<br><br>Board<br><br>Board<br><br>WW/HLM | PM advised that the group have been on a visitation to France to view robotics provision. Awaits feedback and will distribute to the technical team.<br><br>To be provided.<br><br>Noted that BMJ have been provided with information regarding Birmingham hospital robotics, including drawings and a DVD. To be distributed.<br><br>The B'ham information to support production of this information. PM queried route for the tunnel, under the road or under the building?<br>Views that tunnel should not be under the road to be considered by design team and concluded. | Board<br><br>Board<br><br>BMJ<br><br>HLM/WW/URS |
| 11.0 | Acoustics | Noted that Martin Butterfield of Arup Acoustics is proposed to carry out the work. Understood that Martin wrote the relevant HTM. Costed proposal required from AA via HLM. | HLM | Anticipated 13 March 2009 | HLM |
| 12.0 | Carbon Trust | See item 9.0. | | | |

| | | | | | |
|---|---|---|---|---|---|
| 13.0 | Helipad | PM advised that he has to meet Alan Doran and will provide the necessary previous report that included helipads. Board to note previous Bond helicopters contact.<br><br>HLM are including helipad drafting in updated ERs (due Monday 16 March 2009). CAA confirmed to HLM that they (CAA) had heavily inputted to the relevant HBN and that document was the brief to follow – HLM confirmed that they made CAA aware of proximity to Glasgow Airport.<br><br>URS have provided structural considerations of helipad options (12 March) C&B to assess costs. | Board<br><br>HLM<br><br>C&B | Meeting 3pm Friday 13 March 2009 at Dalian House.<br><br>URS confirmed the helipad sizing requirements for the pad itself – Board request that the provision for the larger helicopter is progressed such that this can be assessed (technical requirement, structural implications and cost). URS to provide impact to core structure information to support costing. WW have noted services considerations.<br><br>Feasibility of helipad in 'open space' adjacent to the new hospital to be considered (area where fastlink comes in). | Board/C&B<br><br>URS/C&B<br><br>HLM |
| 14.0 | Loading Bays | Meeting with FM next week to take forward? – discuss status. | URS | Ongoing in tandem with laboratory development. To be reviewed post meeting via lab work from BMJ. Lay down space to be considered – is there sufficient provision in the immediacy of drop off to hold before storage/movement when considered with level/volume of deliveries? | All |
| 15.0 | Sealed/Non-Sealed Building | WW have provided their addendum document regarding this topic. Currently being reviewed and relevant options/decisions for the Board arising will be tailored and addressed. (incl environmental conditions matrix and treatment of temperatures and upper temperatures). | C&B/WW | Options/reasoning to be explained in architectural terms to compliment the M&E narrative. | HLM |
| 16.0 | Bariatrics | PM e-mail of 05 March 2009 attachment from HFS was not appended – to be provided and Board requirement to be established. | Board | PM will re-issue. | Board |
| 17.0 | Resilience | Noted that the Board had previously advised that the building was <u>not</u> to be considered/classified as a terrorist target, and that the application of the adjacent car parking and underground car parking was acceptable. Reconfirmed that 'airport' style bollards are to be provided to prevent direct vehicle access/proximity to entrances – HLM including in ERs.<br><br>(Note: this narrative has been restated in this agenda as the previous document stated that the building was to be considered a terrorist target, that should have read, per the attached under lined 'not' at terrorist target).<br><br>PM confirmed that he is to meet Alan Doran. Majax type information as well as emergency and contingent planning requirements to be provided from the Board (this to consider the future planning requirements – i.e. Southern and GRI will be the only 2 A&E depts for the city). | HLM/Hirst<br><br>Board | Meeting 3pm Friday 13 March 2009 at Dalian House. | |
| 18.0 | Queries Log | Meetings to be arranged with IT to conclude. | Board | See item 7.0, above. | |
| 19.0 | ER document sections | PM provided some initial comments and advised that he will send through further comments. (Further comments received 03 March 2009 – additional comments may follow also.) | Board | PM would prefer to see a more progressed combined document to review. | |
| 20.0 | Return Bid Requirements | Bid return requirements from URS to be assimilated into the overall bid return document – to be distributed for approvals and weighted for Volume 3 inclusion. | URS/C&B | URS to provide. | URS |
| 21.0 | AOCB | Infection Control sign-off requires to be agreed.<br><br>Board to contact Strathclyde Police (architectural liaison).<br><br>Section through new Govan Road access ('the Boulevard') prepared by URS and tabled + discussed at TA Board meeting w/e 06 March 2009. To be issued electronically by URS. | Board / C&B<br><br>Board<br><br>URS | <br><br>Board to contact police. Not considered that a police space/room is presently included. May be required, with space in A&E.<br><br>URS to issue current drawings to all. | Board/C&B<br><br>Board/HLM<br><br>URS |

| | | | | | |
|---|---|---|---|---|---|
| | | Current site investigation covers some road areas, but not all. Roads will be designed to GCC guidelines which caters for items such as capping layers (thickness etc). URS have confirmed that they have enough SI information to complete exemplar design/ERs. | | Confirmed by URS. | |
| | | PM confirmed that he is meeting SAS w/c 02 March and would advise thereafter if approach for access for the technical team (to consider potential for fuel or other contaminants from the present workshop use) would be acceptable. | Board | PM confirmed that he is seeking a meeting with Graham Kirkland of SAS. Understood that Operations are moving out of the building, but perhaps Risk and Resilience moving in? PM will advise status once he has had the meeting with GK of SAS. | |
| | | HLM will liaise with B+A and action the CoS x-check. | HLM | Confirmed by HLM. | |
| | | AEDET with some limitations agreed as route forward – further discussion on ASPECT required. | C&B / HLM / Board | Considered that this should take place, May date? – C&B to consider date. PM noted that an A+DS review would be forthcoming. | |
| 22.0 | Subsequent Meetings | Friday 27 March 2009<br><br>Friday 10 April 2009<br><br>Consider moving 10/04 date as that is Good Friday and add additional specific close out dates/sessions. | | | |

**Post Meeting Notes (from meeting of 30 Jan):**

A) Board to provide copy of site boundary provided by CLO. – ~~**Board to provide.**~~ **Received from PM – forwarded to HLM. To be utilised with meeting on site: see item B, below.**

B) Discussed and agreed with the Board that a site walk-round is necessary to agree definitive boundary lines and highlight + agree specific areas of sensitivity with the SGH users as well as other interested parties. This will require the CLO boundary to be available to firstly cross-check against the drawn boundary. Areas of particular consideration are the Maternity/Neo-natal blue light route and access (also considering that the build will have to extend into the zone between neo-natal and the new hospital to provide the physical link) and the facilities drop-off/access at the rear of Surgical Block. C&B to contact Frances Wrath to arrange attendance by Jim McFadden (Estates), Ronnie Clinton (Facilities) and Gibby Donnelly (Fire Officer). HLM to lead TA team input to inform masterplanning/ER layouts on 'blue-light' and other essential routes/areas. Once Board/TA team position is agreed, Strathclyde Fire and Rescue and Scottish Ambulance Service to be taken through proposals for agreement. – ~~**C&B to initiate, HLM to lead.**~~ **Frances Wrath will provide diary date(s) for Board attendees, TA team to then confirm which date is suitable. Meeting dates required – urgent to inform site boundary conclusion.**

**Post Meeting Note (from meeting of 13 Feb):**

C) The benefit of selecting areas/rooms for appraisal and coverage in respect of various aspects of design detail and HAI~Scribe compliance was discussed. This resulted in the agreement that a bedroom and theatre layout will both be considered at the next ER/Technical meeting in order that areas of detailing can be discussed, agreed and written up. This to include joints, junctures etc and treatment and protection of surfaces – e.g. coving, skirting, bump rails etc.
**Action: HLM to liaise with WW as necessary and prepare layout/log for consideration and agreement on 27 Feb 09. Date to be arranged as aspect of ER close out.**

**Post Meeting Notes (from meeting of 27 February 2009):**

D) Potential dates for meetings with Facilities – 13 March and 20 March – as part of Technical/ER sessions. **18 and 20 March 2009 – to be confirmed, with times and locations.**

Dates confirmed as:

**Meeting 1 = 18 March 0830hrs to 1300hrs – C&B to confirm location and agenda – WW to provide list of key items PM of 13 March.**

**Meeting 2 = 20 March 1430hrs to 1700hrs – FM routes in buildings – location and attendees to be advised.**

**Meeting 3 = 26 March 0900hrs to 1145hrs – follow up to Meeting # 1.**

The under noted are the current listing of Board Actions arising from the ongoing Technical / ER meetings.

The ‘Item’ numbering refers to the original agenda item the action arises from.

**Item 3.0** – Board to provide feedback on the list of Appendices to the ERs.
**Response:** (C&B) – this to be actioned by the Board once the updated list of Contents and Appendices is issued.

**Item 4.0** – meeting with Estates in relation to technical matters – feedback to be provided to the technical team.
**Response:**

**Item 4.0** – Board to provide their inputs to the ‘lessons learned’ watchlist of issues that have arisen on previous projects (pro-forma attached for reference).
**Response:**

**Item 5.0** – Ironside Farrah to re-appraise aspects of the Masterplan.
**Response:**

**Item 7.0** – Meeting with Board IT dept to be arranged.
**Response:**

**Item 7.0** – Meetings to conclude utilities type issues as well as gases and pneumatics to be progressed with the Board (Frances Wrath). BMS presentation with Satchwell to be arranged.
**Response:** (C&B) – status and actions/areas to conclude to be discussed with technical team.

**Item 9.0** – Joint SWater/SEPA/GCC meeting to be arranged – potential Board attendance.
**Response:** (C&B) – status and actions/areas to conclude to be discussed with technical team.

**Item 9.0** – Board property advisors to progress SWater land take requirement, as well as wayleave requirement and reprovision of mobile mast.
**Response:**

**Item 10.0** – Meeting with Gordon Beattie on 04 March 2009 – to update on thereafter on progress with regard to robotics requirements.
**Response:**

**Item 10.0** – A Board Policy on scope and functionality (of robotics) to be generated and provided to the technical team.
**Response:**

**Item 10.0** – Video footage and drawings of robot provision on other sites to be provided to the technical team.
**Response:**

**Item 13.0** – Meeting with Alan Doran – copy of previous report on helipad/helicopter landings to be provided to the technical team.
Response:

**Item 13.0** – contact at Bond helicopters familiar with Board/site to be provided.
**Response:**

**Item 16.0** – requirement for bariatrics to be provided (PM e-mail of 05 March 2009 to Peter Henderson re HSE document Bariatric Patient Handling did not have document attached). Board to confirm their requirements.
**Response:**

**Item 17.0** – Meeting with Alan Doran – contingency planning and Majax requirements to be identified and provided to the technical team (this to consider the future planning requirements – i.e. Southern and GRI will be the only 2 A&E depts for the city).
**Response:**

**Item 19.0** – draft ER sections – initial comments received, further comments to be provided.
**Response:**

**Item 21.0** – Infection Control sign-off to be agreed,
**Response:** (C&B) – to be discussed C&B/Board to conclude.

**Item 21.0** – Board to contact relevant Strathclyde Police Superintendent (architectural liaision).
**Response:**

**Item 21.0** – meeting Scottish Ambulance Service w/c 02 March – post meeting to advise if approach from technical team re access to the SAS site is acceptable (technical team wish to consider potential for fuel or other contaminants from the present workshop use).
**Response:**

**Post Meeting Note B** – site walk round to agree definitive boundary + treatment of sensitive areas (e.g. blue light zones, 24hr access to maternity, proximity of MRI, loading back to rear of Surgical Block [AL]) – potential dates to be arranged by Frances Wrath and proposed to technical team.
**Response:**

[Complete: 11 March 2009]

**APPENDIX D – Request for Information Pro-Forma**

| Ref No: **038** Date Raised: 05/06/09 |

Clarification required on AHU plant and distribution strategy:

Appendix M&E 3 - 2.4.2 states "Each hospital department is to contain its own dedicated air handling plant". We would propose that, subject to size, location and function of departments, that like type accommodation would be served from common AHU plant. Please confirm this is an acceptable strategy.

**Response**

Not acceptable. Please comply with M&E 3.

| Please deliver response via: BUILDONLINE | Letter | | E-mail | |

# Proposed Meeting Query List in Support of Agenda Items

## 2.1 Health Planning (Tribal)

| | |
|---|---|
| Agenda Item 2.1<br><br>Query 1 | • Review of Adult Acute Hospital adjacency / flows diagram to ensure our understanding of the model of care and healthcare planning objectives [departmental adjacencies / relationships and flows (clinical, visitor, FM) between and within departments]<br>• Specific individual queries to support this agenda item include the following:<br>o Identification of the Adult Outpatient services located on levels 01 and 02 of the adult hospital design exemplar and discussion of any perceived advantages / disadvantages of these locations<br>o Is there any scope to split adult and paediatric Nuclear Medicine to facilitate clinical planning opportunities for both Adult and Children's Hospitals (or is this prohibitive in terms of space and staffing implications?)<br>o Is there any scope to split pharmacy dispensing between adult and paediatric hospitals to facilitate clinical planning opportunities for both Adult and Children's Hospitals (or is this prohibitive in terms of space and staffing implications?)<br>o Staff change policy for the hospital: would it be possible to centralise staff changing currently located within the shared ward accommodation to an appropriate location within the hospital?<br>o Is there a fixed requirement for a link between the new adult hospital and the existing Neurosciences building? If so, what is the purpose of this link (patient transfer, staff transfer, both?)<br>o Is a dedicated entrance to Acute Assessment wards required?<br>o Is there any further clarification regarding the debate on 100% single bedrooms in Critical Care?<br>o Is there any further clarification regarding on the number of isolation bedrooms required in adult inpatient wards?<br>o Would it be acceptable if the required essential adjacencies between imaging and inpatients can be achieved via appropriate vertical links?<br>o Opportunities / preferences for flexible use of functional content (Theatres, Imaging etc) between Adult and Children's hospitals<br><br>• Review of Children's Hospital adjacency / flows diagram to ensure our understanding of the model of care and healthcare planning |

| | |
|---|---|
| | objectives [departmental adjacencies / relationships and flows (clinical, visitor, FM) between and within departments]<br>• Specific individual queries to support this agenda item include the following:<br>o Identification of the Children's Outpatient services located on levels 00 and 01 of the children's hospital design exemplar and discussion of any perceived advantages / disadvantages of these locations<br>o Is there a fixed requirement for a link between the new children's hospital and the existing Neonatal / Maternity departments building? If so, what is the purpose of this link (patient transfer, staff transfer, both?)<br>o Parent access to Children's Observation ward. Is access via the Children's Emergency department a requirement or can access be via another route that does not pass through other clinical areas?<br>o Preferred level location for the Dept of Child Forensic Psychology<br>o Discuss the Boards policy / strategy for FM processes within clinical areas. Board overview of existing practice and discussion around opportunities to integrate supporting FM services in line with best practice |

## Proposed Meeting Query List in Support of Agenda Items

## 2.3 M&E (ZBP)

| | |
|---|---|
| Agenda Item 2.3<br><br>Query 1 | Sustainability and Energy<br><br>Discussions of our proposals and views of Board |
| Agenda Item 2.3<br><br>Query 2 | Energy targets/strategy<br><br>Review of targets, incorporation of LZC solutions and effect on 'site' energy usage |
| Agenda Item 2.3<br><br>Query 3 | Approach to BREEAM<br><br>Review of daylighting to exemplar building in general and daylighting levels in single bed wards |
| Agenda Item 2.3<br><br>Query 4/1 | Energy centre strategy<br><br>Intention of two energy centre option and preferred approach. |

| | |
|---|---|
| Query 4/2 | Clarification on dealing with existing site energy loads, re-provision of existing boilerhouse and extent of building served from new energy centre(s) |
| Agenda Item 2.3<br><br>Query 5/1<br><br>Query 5/2 | Distribution principles / resilience / redundancy. Discussion of ERs eg:<br><br>Requirement for N+1 redundancy on **all** M&E plant and dual distribution paths for **all** M&E systems.<br><br>Discussion on apparent requirement for services to be configured to ensure isolation can be carried out in **each** room without taking other rooms out of use. (RFI raised) |
| Agenda Item 2.3<br><br>Query 6/1<br><br>Query 6/2<br><br>Query 6/3 | Mechanical and Electrical Flexibility (base loads)<br><br>We will seek guidance on the make up of M&E base loads eg: do the electrical loads in Appendix M&E2 include or exclude the required 25% growth?<br><br>HTM06-01 states that electrical loads in hospitals are growing by 3% to 6% per year. At 6% growth the spare capacity would be used within 5 years. Does the Board have a view on whether the allowance of 25% for future growth is adequate? (RFI raised)<br><br>General discussion on allowance for future flexibility |
| Agenda Item 2.3<br><br>Query 7/1 | Thermal comfort<br><br>Statement on 26degC / 28degC target. |
| Agenda Item 2.3<br><br>Query 8/1<br><br>Query 8/2<br><br>Query 8/2 | Miscellaneous issues<br><br>Discussion of the definition of “Clinical Areas” from an M&E perspective eg:<br><br>ERs prohibit luminaires from protruding below the ceiling in “clinical areas”.<br><br>ERs require manual override of automatic lighting control in “clinical areas”. |

| **Proposed Meeting Agenda**<br>**2.4 Landscaping (Gillespies)** | **Objectives** |
|---|---|
| | |

| | |
|---|---|
| 2.4. Masterplan<br><br>• Review of key elements and decisions which define the basic form of the masterplan, including roads<br>• Opportunities associated with alternative masterplan layout(s)<br>• Response to listed buildings (including scale and future use)<br>• Value of defining within the masterplan the potential for *future expansion* of the children's & acute buildings (& potentially also FM) – where possible. Is this a material consideration at this point?<br>• Future expansion options within the full extent of the masterplan site – exploration of potential<br>• Redevelopment potential for the northern boundary<br>• Parking provision associated with (potential) future education centre<br>• Site entrances<br>• Open space priorities & optimisation of potential<br><br>Circulation/Wayfinding<br><br>• Orientation related to public access to the site and the visibility of the discrete building entrances<br>• Site entrances and designation of key movement routes<br>• Vehicle movements and car parking<br>• Hierarchy of public spaces<br>• Optimisation of public wayfinding and site access<br><br>Car Parking<br><br>• Rationalisation of vehicle movements<br>• Opportunities for consideration following further peer review<br>• Car parking locations in response to masterplan opportunities<br><br>Green Spaces<br><br>• Character of green spaces<br>• Future management intentions for green space<br>• Importance of green spaces as a location for hospital events (if any)<br>• Potential for recreational open spaces for | |

| | |
|---|---|
| use by staff (such as jogging route, trim trail [noted within employer's requirements], ball court etc) – in the interests of creating a high quality working environment is there considered to be any demand for this, or any value in this kind of provision<br>• Where would green spaces for informal use by staff ideally be located in the future? | |

# Proposed Meeting Query List in Support of Agenda Items 2.5 Structure and Civils (WSP)

| | |
|---|---|
| Agenda Item 2.5 | Site Drainage |
| Query 1/1 | Clarification as to the scope of drainage on-site and whether the surface drainage scheme is to include for the entire site or for elements within the “red-line” of the contract. |
| Query 1/2 | Hydraulic Model of the Linthouse Burn – has this been undertaken? |
| Query 1/3 | What discussions have taken place with Scottish Water regards capacity? |
| Query 1/4 | What discussions have taken place with SEPA in connection with the existing culverted watercourses through the site? |
| Query 1/5 | Scottish Water are quoted as undertaking a detailed Drainage Strategy Report – can this be provided? |
| Agenda Item 2.5 | Fire Strategies |
| Query 2/1 | Can copies of the existing fire strategies be provided? |
| Query 2/2 | What are the drivers for the new fire strategy to mirror the existing. |
| Agenda Item 2.5 | Demolition & Site Clearance |
| Query 3/1 | Can you confirm the extent of grubbing-up being undertaken within the site clearance and demolition? |
| Query 3/2 | Will the site clearance include the Japanese Knotweed on-site? |
| Query 3/3 | Will the demolition include the removal of all underground structures and services, including redundant drainage etc? |
| Query 3/4 | Will the demolition and site clearance include removal of all material from site? |

**Commercial Competitive Dialogue – Action List**
**Update from CD Session Nr 2 5th June 2009**
**Bidder B**

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 1-1 | Action | Board | 22/5/9 | Overview of £590M budget given, BE to review and provide commentary on any perceived issues by next meeting. Initial view is budget is robust.<br><br>4/6/09 Update: BE provided outline cost plan. Flagged concern over area of new hospitals and cost allowance for new Labs. Budget under pressure, but with control of area and design issues, budget generally achievable. | BE | 02/06/09 | Complete |
| 1-2 | Action | Board | 22/5/9 | BE to provide indicative cashflow based on £590M. This is to provide additional view to Board in assessing and discussing with Scottish Government likely drawdown of committed funds<br><br>4/6/09 Update: BE provided indicative cashflow. Board will review and consider for any discussion with Scottish Government. | BE | 02/06/09 | Complete |
| 1-3 | Action | BE | 22/5/9 | BE queried the £2m threshold for sub-contractors and the application of NEC3 open book principles. Board stressed want principles to flow through supply chain where it will deliver best value. BE to provide alternative proposals for next meeting. | BE | 26/06/09 | |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| | | | | 4/6/09 Update: BE tabled proposal to limit to Designers and Key Sub-Contractors. Proposal generally acceptable. Final list to be issued for next meeting. | | | |

Minutes from Design Meeting # 3.5 on 15 June (Bidder B)

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Own | Date | |
|---|---|---|---|---|---|---|---|
| 3-1 | Info | n/a | n/a | **Children's**<br><br>Updated children's ward block plan tabled with narrative of approach and ethos explained. | n/a | n/a | n/a |
| 3-2 | Query | Bidder | 15/06/09 | Bidder Query: is reception before entry to children's ward (per bubble diagram for ward entry) required?<br><br>Board Response: noted that the wards are three eight bedded units within a ward. Noted that there is no 'reception' as such – the staff base will carry out this function with 'buzzer'/video entry from the ward entry door (it is noted that the children's visiting is not restricted to the set times as the adult ward regime, with parents coming and going at varied times of day and night to children's wards). | | | |
| 3-3 | Action | Bidder | 15/06/09 | Bidder Query: Do the Board require the two isolation rooms in each ward to be adjacent to each other? | Board | 23/06/09 | |
| 3-4 | Action | Bidder | 15/06/09 | Bidder Query: Touch-down proposals – large or a higher number of smaller spaces to be considered by the Board. | Board | 23/06/09 | |
| 3-5 | Info | n/a | n/a | Cardio and CCU adjacency noted by the Board as important for potential expansion. | n/a | n/a | n/a |
| 3-6 | Info | n/a | n/a | CCU/Radiolology/Theatres links and flows are noted by the Board as important. Clear separation and no cross-over between adult and children Critical Care depts noted by the Board (due to physical adjacency of accommodation on plan). | n/a | n/a | n/a |
| 3-7 | Info | n/a | n/a | Emergency department to radiology flow noted by the Board as important and may require more focus as the design develops. | n/a | n/a | n/a |
| 3-8 | Info | n/a | n/a | Updated proposals for main entrance space, use and environment tabled. This noted amenity of space for meeting, gathering, waiting in a less | n/a | n/a | n/a |

Formatted Table

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Own | Date | |
|---|---|---|---|---|---|---|---|
| | | | | institutional setting.<br><br>The Board noted that the approach and consideration for this space is appropriate. | | | |
| 3-9 | Info | n/a | n/a | Confirmed that first floor links are present to both neuro and neo-natal. | n/a | n/a | n/a |
| 3-10 | Info | n/a | n/a | Acute<br><br>Identified that the dining area is moved to first floor. | n/a | n/a | n/a |
| 3-11 | Info | n/a | n/a | Option presented where lift access from helipad direct to resus tabled. This gives a more direct helipad access but less direct AAU to resus outcome. It was noted that the AAU to resus link could be used frequently and the layout should be reviewed to enable rapid access. | n/a | n/a | n/a |
| 3-12 | Info | n/a | n/a | Noted by bidder that clean/dirty solution and routes will progress with developing design of theatres. | n/a | n/a | n/a |
| 3-13 | Action | Bidder | 15/06/09 | Comments on 1:200 ward layout include that no reception distant from ward required, staff base with satellite touch-down spaces required (ratio of 1 touch-down per 4 or 6 beds) – Board to confirm ratio. | Board | 25/06/09 | |
| 3-14 | Action | Board | 15/06/09 | FM flows (clean in~dirty out) to be illustrated to the Board for generic wards. | Bidder | DD#4 | |
| 3-15 | Info | n/a | n/a | The bidder identified some development work around 4-bed clusters for children's accommodation as well as potential proposals for bed-spaces, fold-down parent beds/easy chair and similar innovation that they would like to introduce to the scheme. | n/a | n/a | n/a |
| 3-16 | Info | n/a | n/a | Noted that in acute setting 2-generic grouped together would be possible, but all specialist areas must be attached to allow flexibility. | n/a | n/a | n/a |
| 3-17 | Info | Bidder | | Children's Renal areas could be located within free-form space in central core. | n/a | n/a | n/a |

## Contents

## Masterplan update

Western Car Park - Options Study [process of determining location]

Transport & pedestrian movement routes

Design Development

External character & function – Arrival Square/Children's Park/Central Park

Review of arrival square/ transport hub

Children's Hospital – entrance/park/play

Existing site plan & ecological character – as a base for enhancement

Roof gardens – overview [work in progress]

# Western Car Park

## Options Study

Based upon required capacity of 1,028 spaces

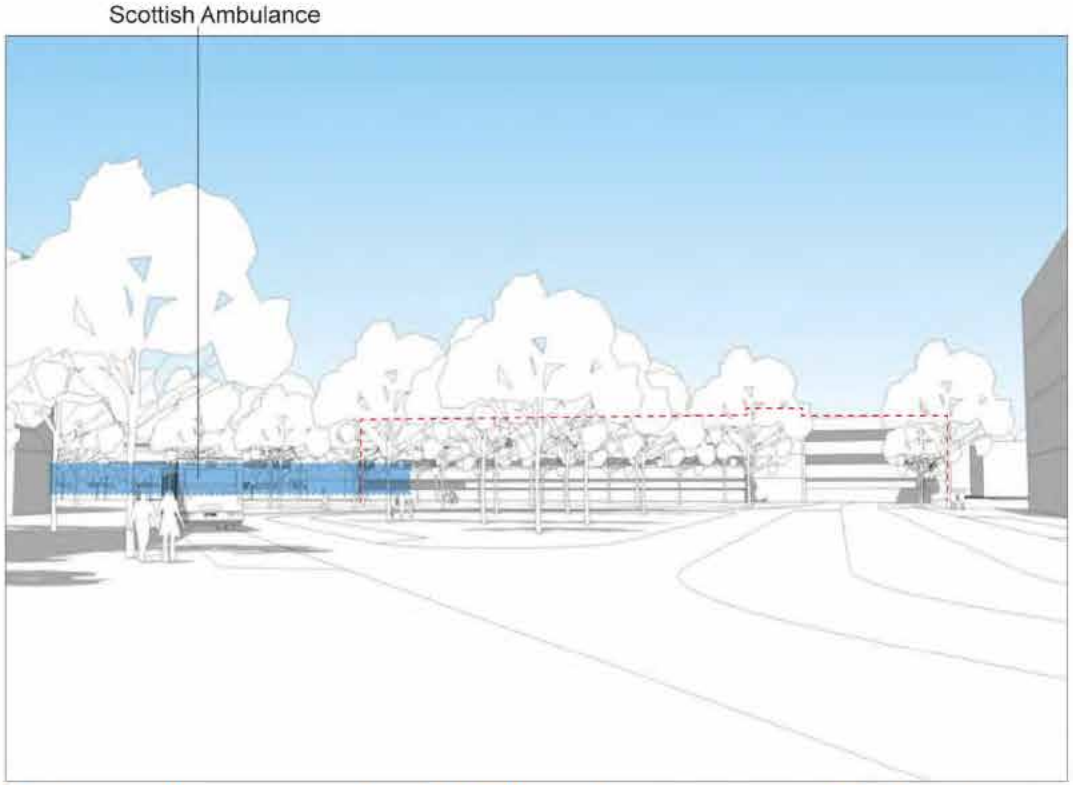
Option A - with minimum height (and extended footprint)

Option B – with minimum footprint (and increased height)

Reviewed for efficiency and impact of building massing adjacent to entrances

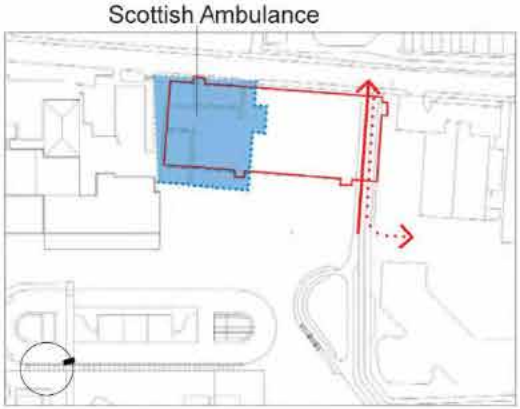
# Western Car Park

## Options Study



### A01

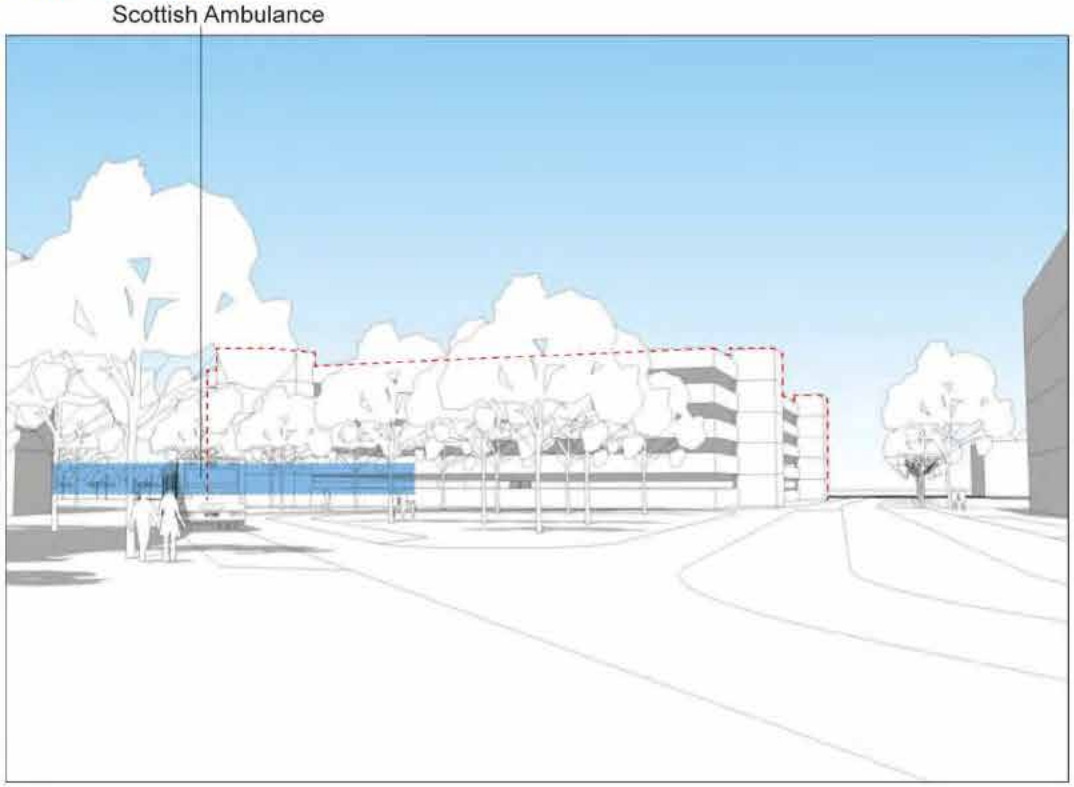
4 lane road
4 floors
12m height



Option with minimum height & therefore maximum footprint
4 traffic lanes required through structure (incl. FM access)
Occupies significant footprint including extensive Scottish Ambulance land
Extends along full extent of western boundary

# Western Car Park

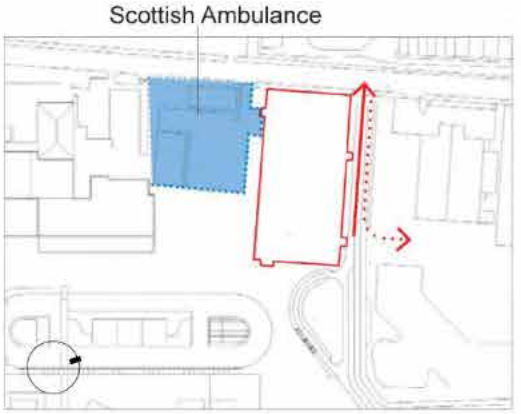
## Options Study



## A02

5 floors

15m height



5 floor option – allowing 20% reduction in footprint

No traffic through structure, which is much closer to Children's entrance

Rotation avoids Scottish Ambulance land

Less containment of arrival square – road runs through

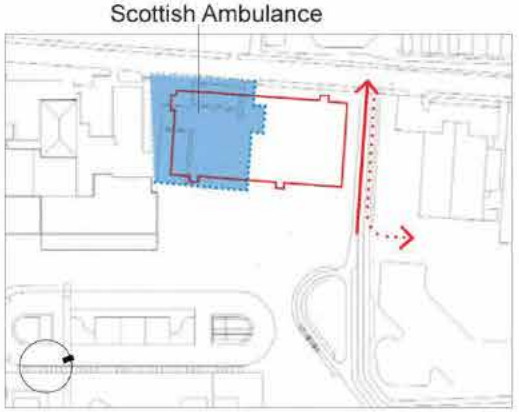
# Western Car Park

## Options Study

## A03

5 floors

15m height



5 floor option – allowing 20% reduction in footprint

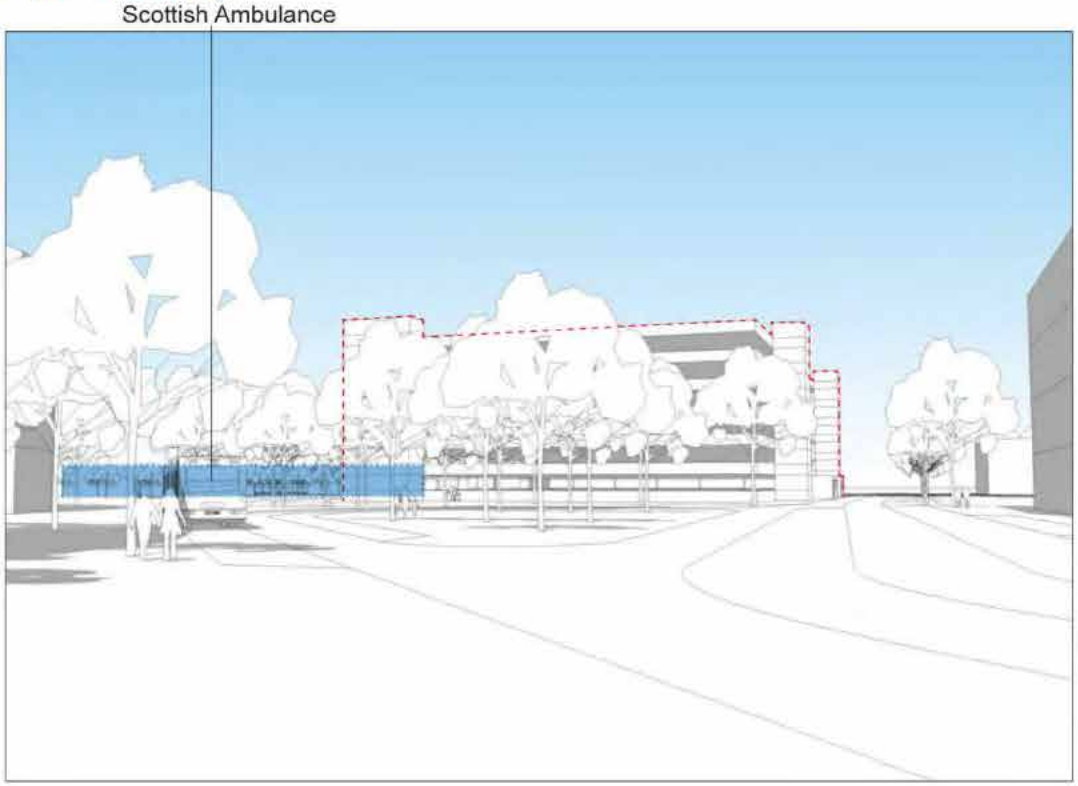
No traffic through structure, which is along the western boundary

Sits extensively within Scottish Ambulance land

Less containment of arrival square & further from entrance to car park

# Western Car Park

## Options Study



7 floors – inclusive of sub station footprint

No traffic through structure

Footprint avoids Scottish Ambulance land

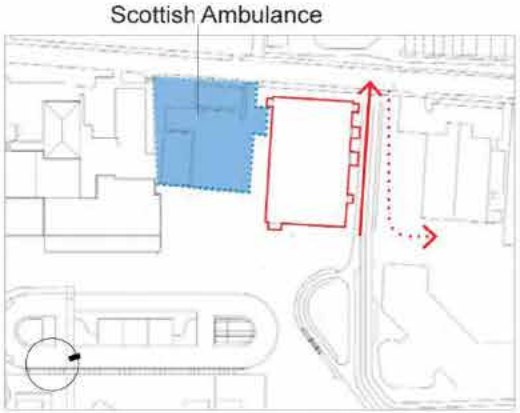
Provides a defined edge to the arrival square

## B01

7 floors

21m height

Excludes road



PREFERRED OPTION

# Western Car Park

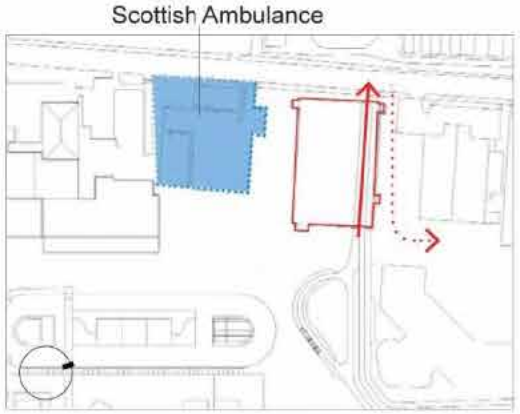
## Options Study

## B02

8 floors

24m height

3 lane road



8 floors – requiring additional height to maintain limited footprint

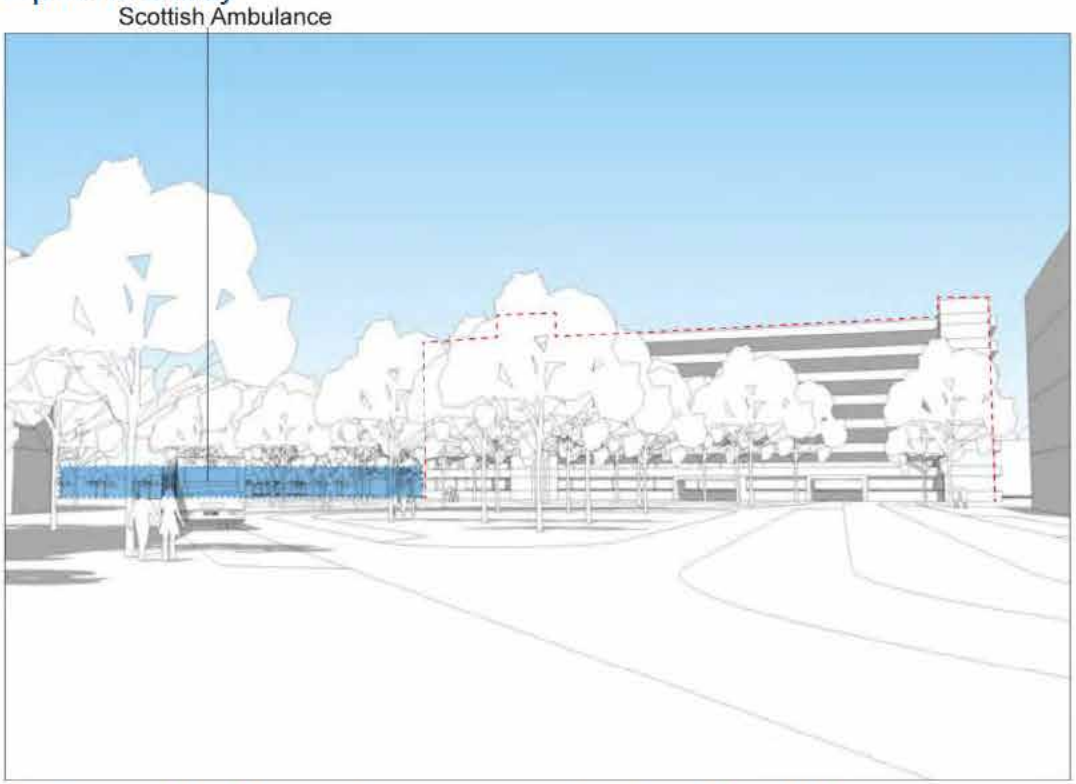
Traffic through structure, to enable move to north

Footprint avoids Scottish Ambulance land

Provides a defined edge and additional containment to the arrival square

# Western Car Park

## Options Study

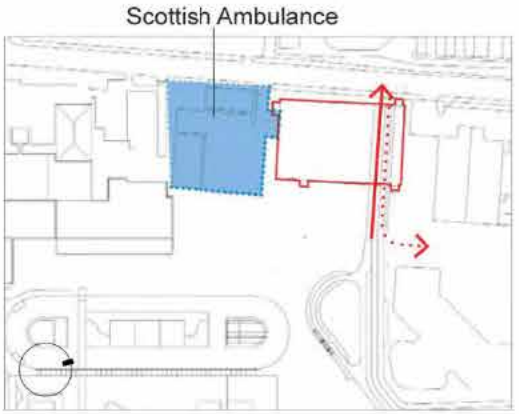


## B03

4 lane road

8 floors

24m height



Option rotated to explore minimum/efficient land take

4 traffic lanes required through structure (incl. FM access)

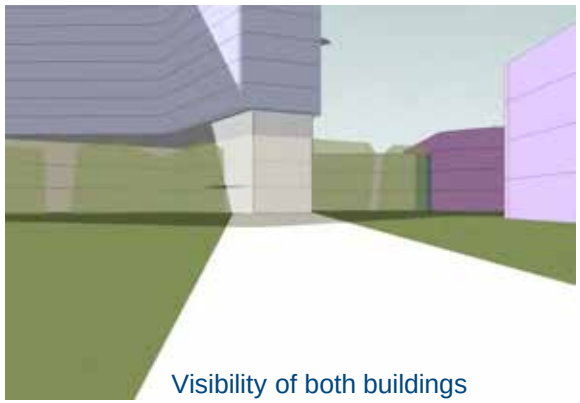
Avoids Scottish Ambulance land

Sits well back fro entrance to Children's hospital – impact of height reduced

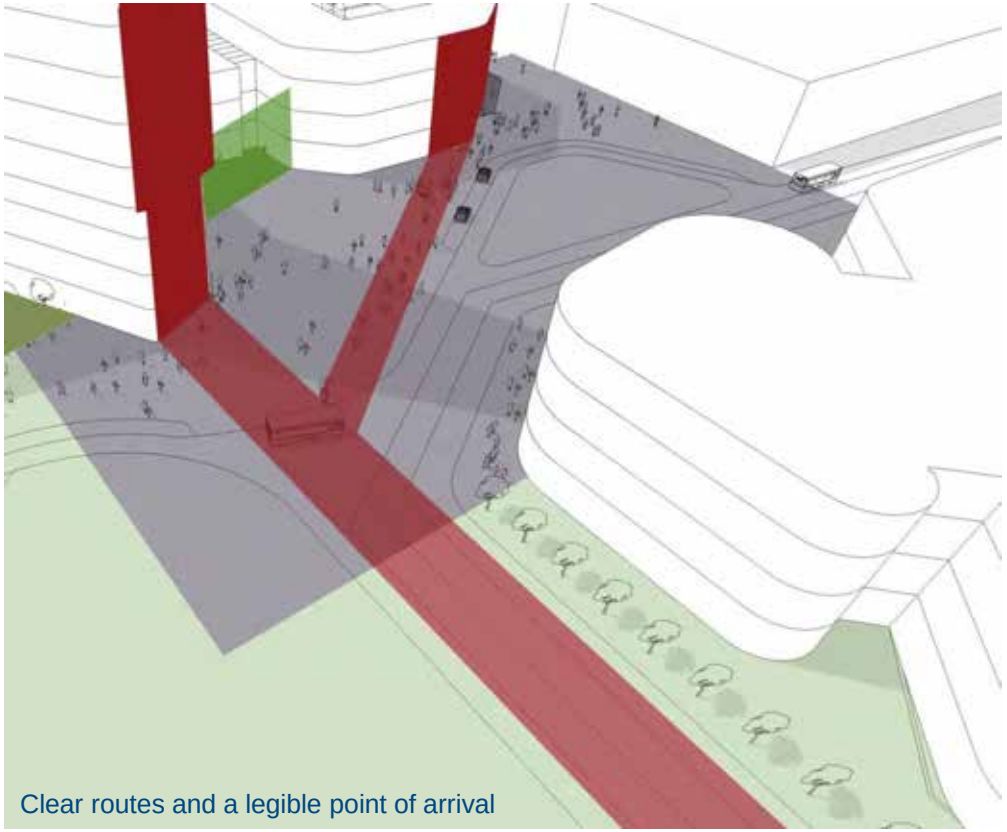
# Masterplan Structure Principles

## Orientation and Wayfinding

Visibility of main entrance from avenue



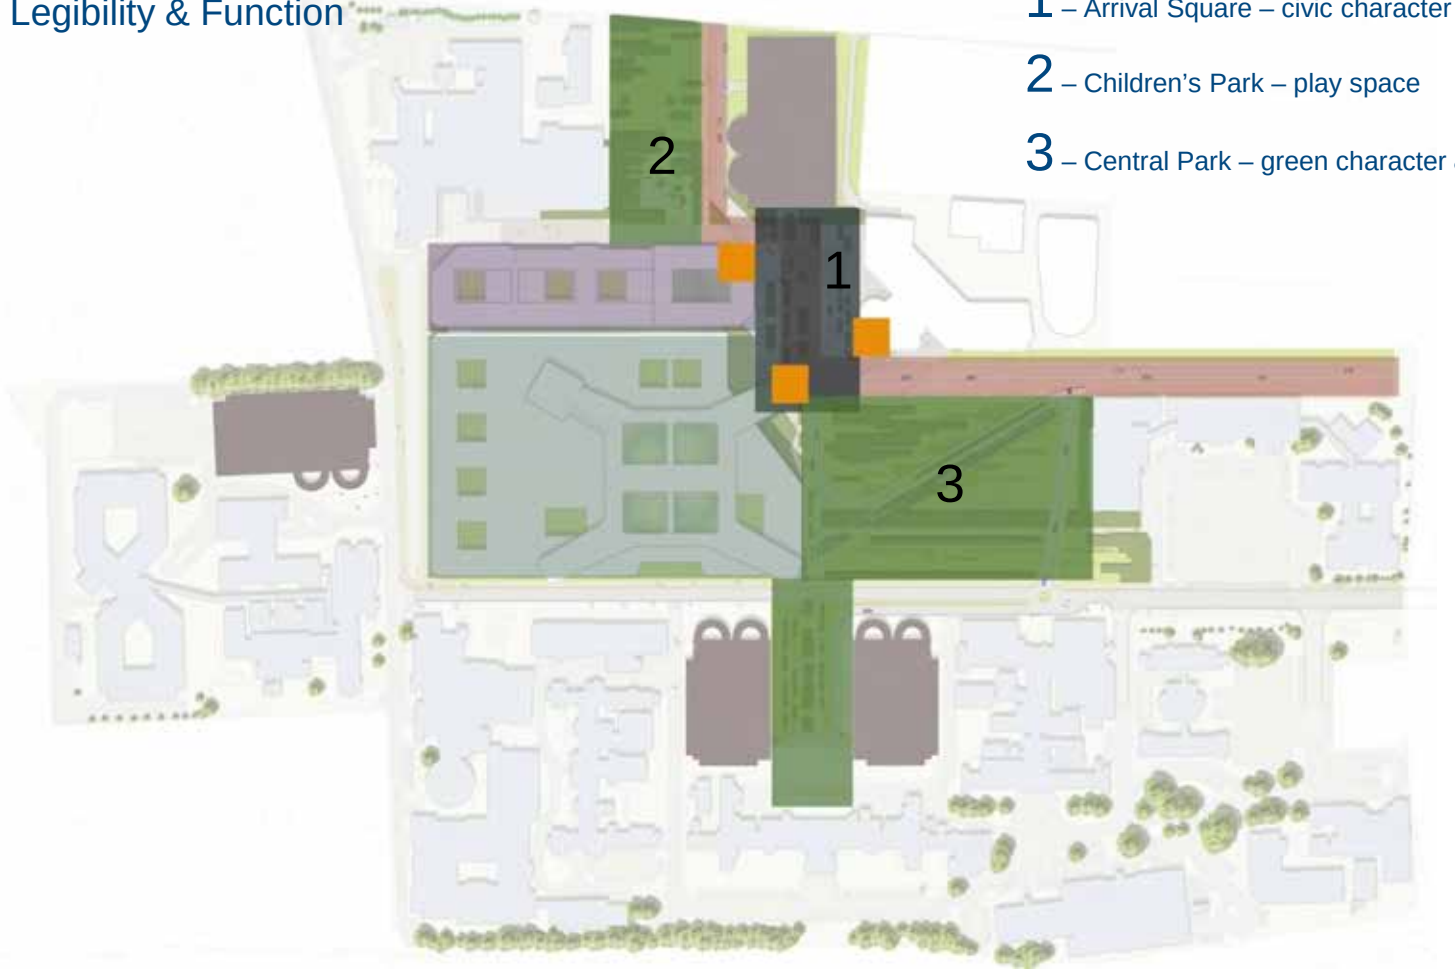
Visibility of both buildings



Clear routes and a legible point of arrival

# Masterplan Structure Principles

## Definition of Character Areas
## Legibility & Function

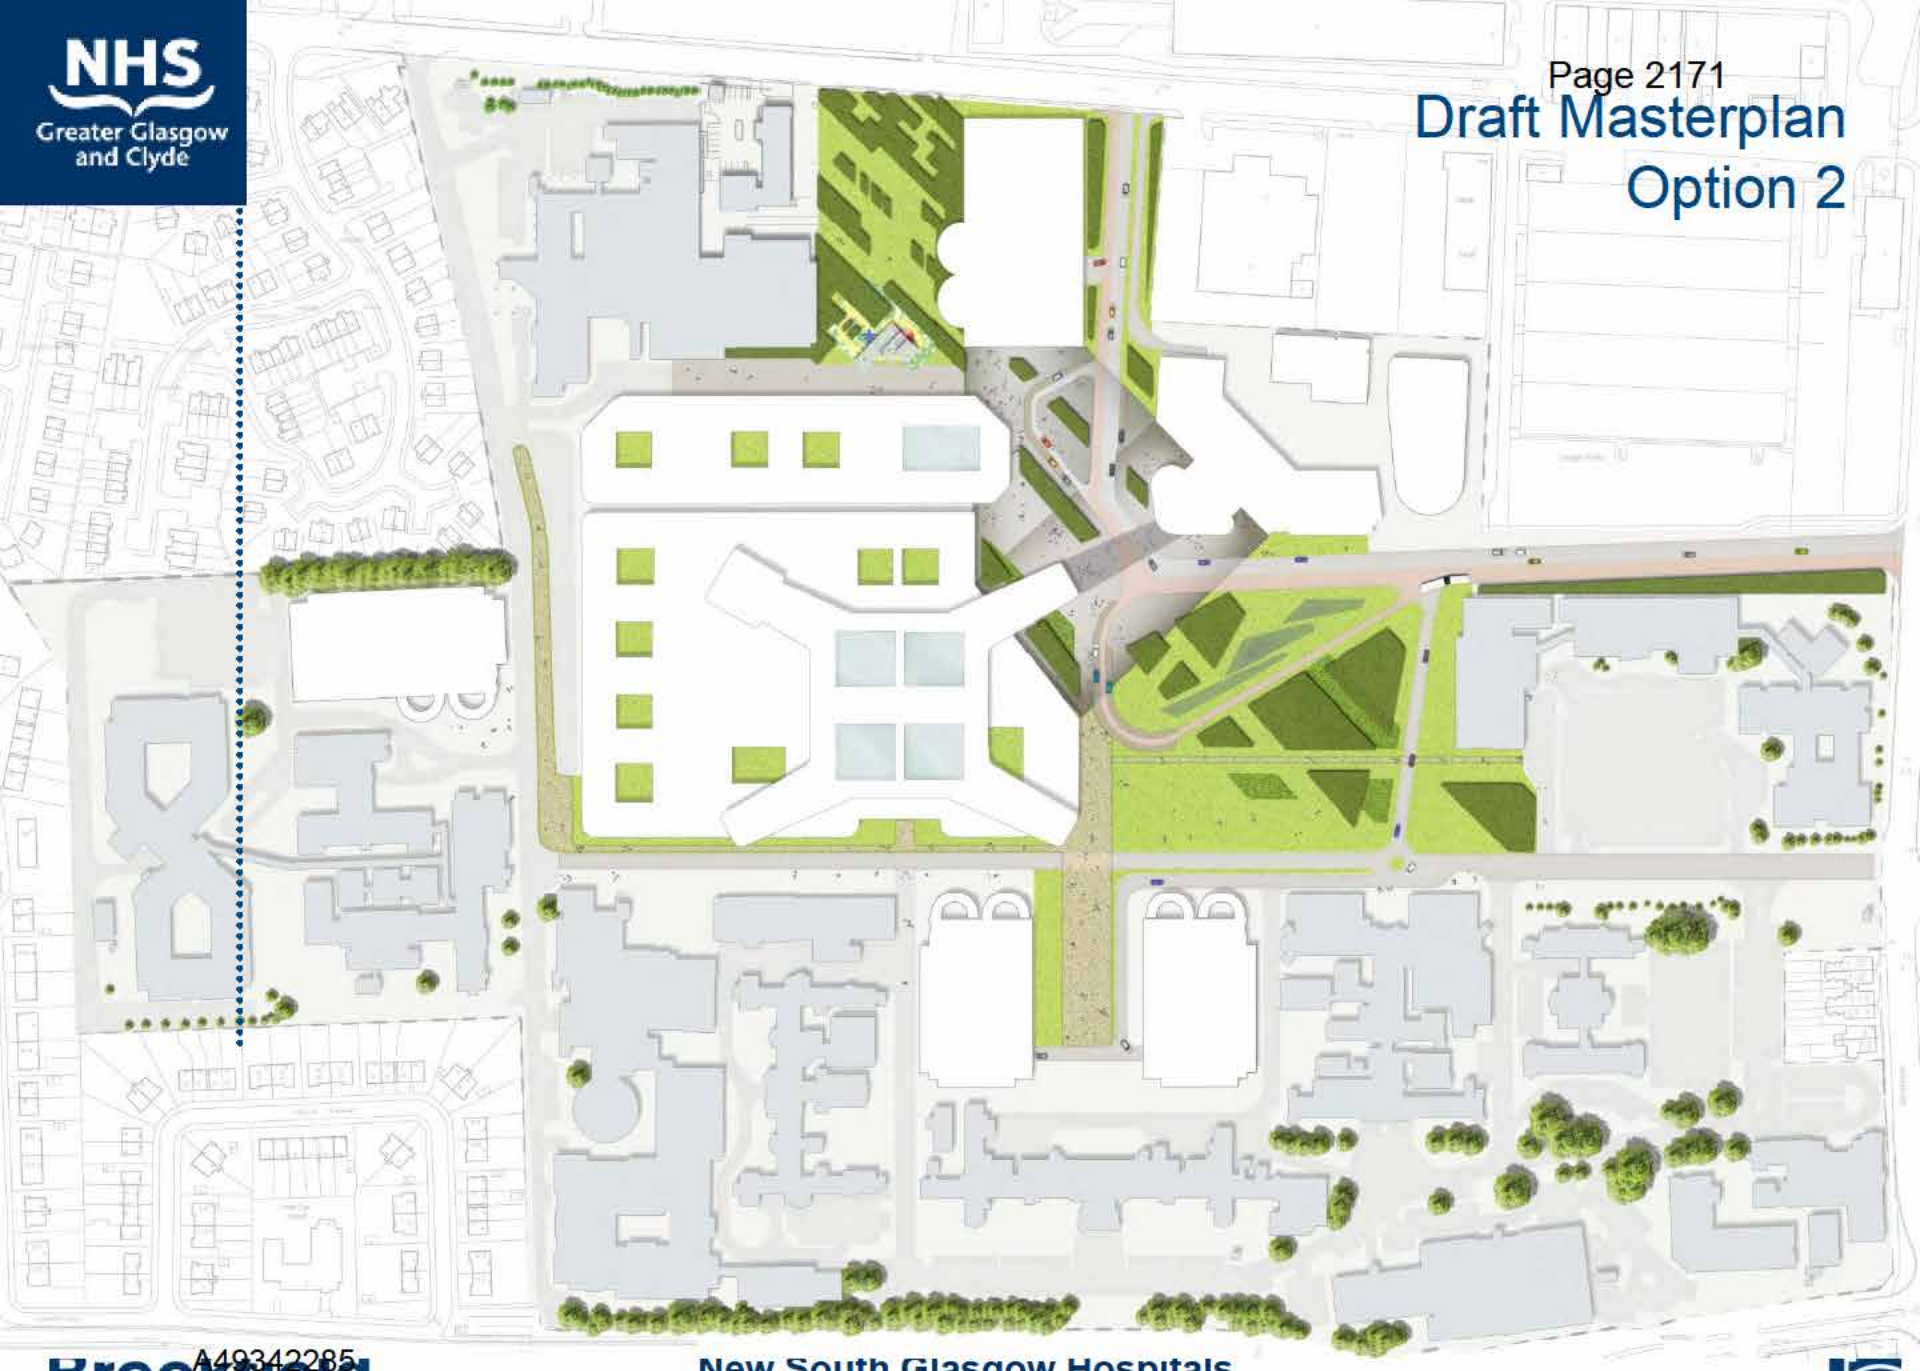


1 – Arrival Square – civic character

2 – Children's Park – play space

3 – Central Park – green character & variety

# Draft Masterplan Option 2

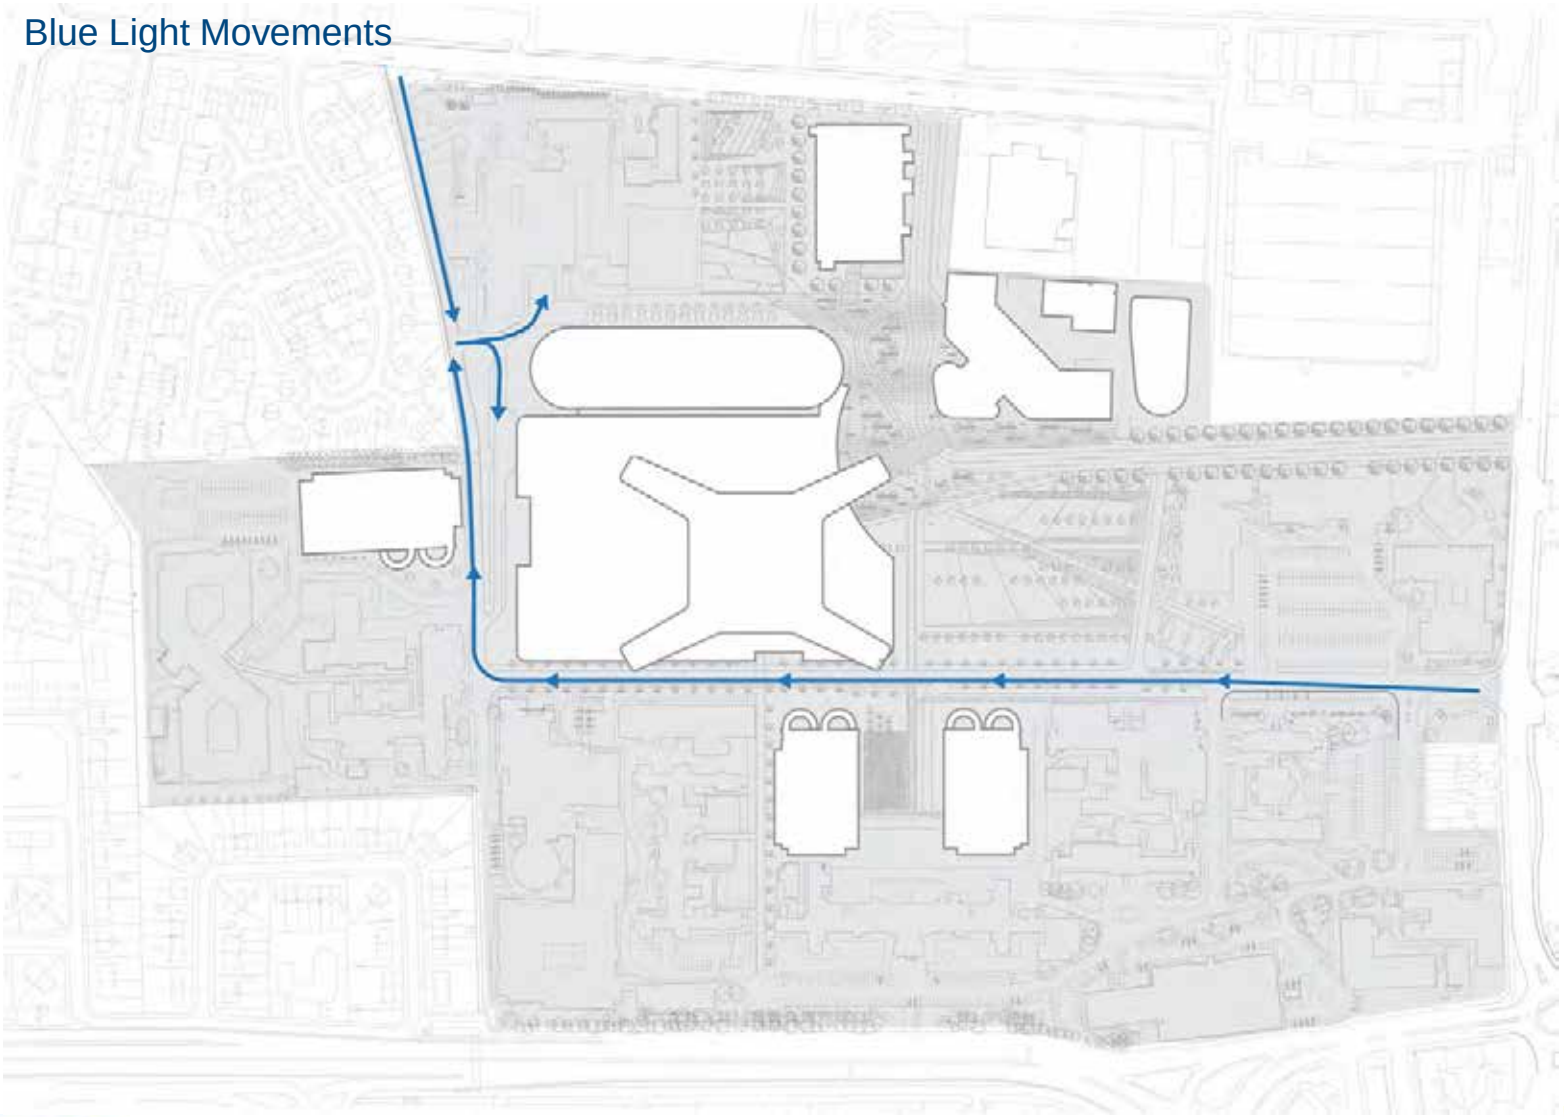


# Masterplan

## Current Plan

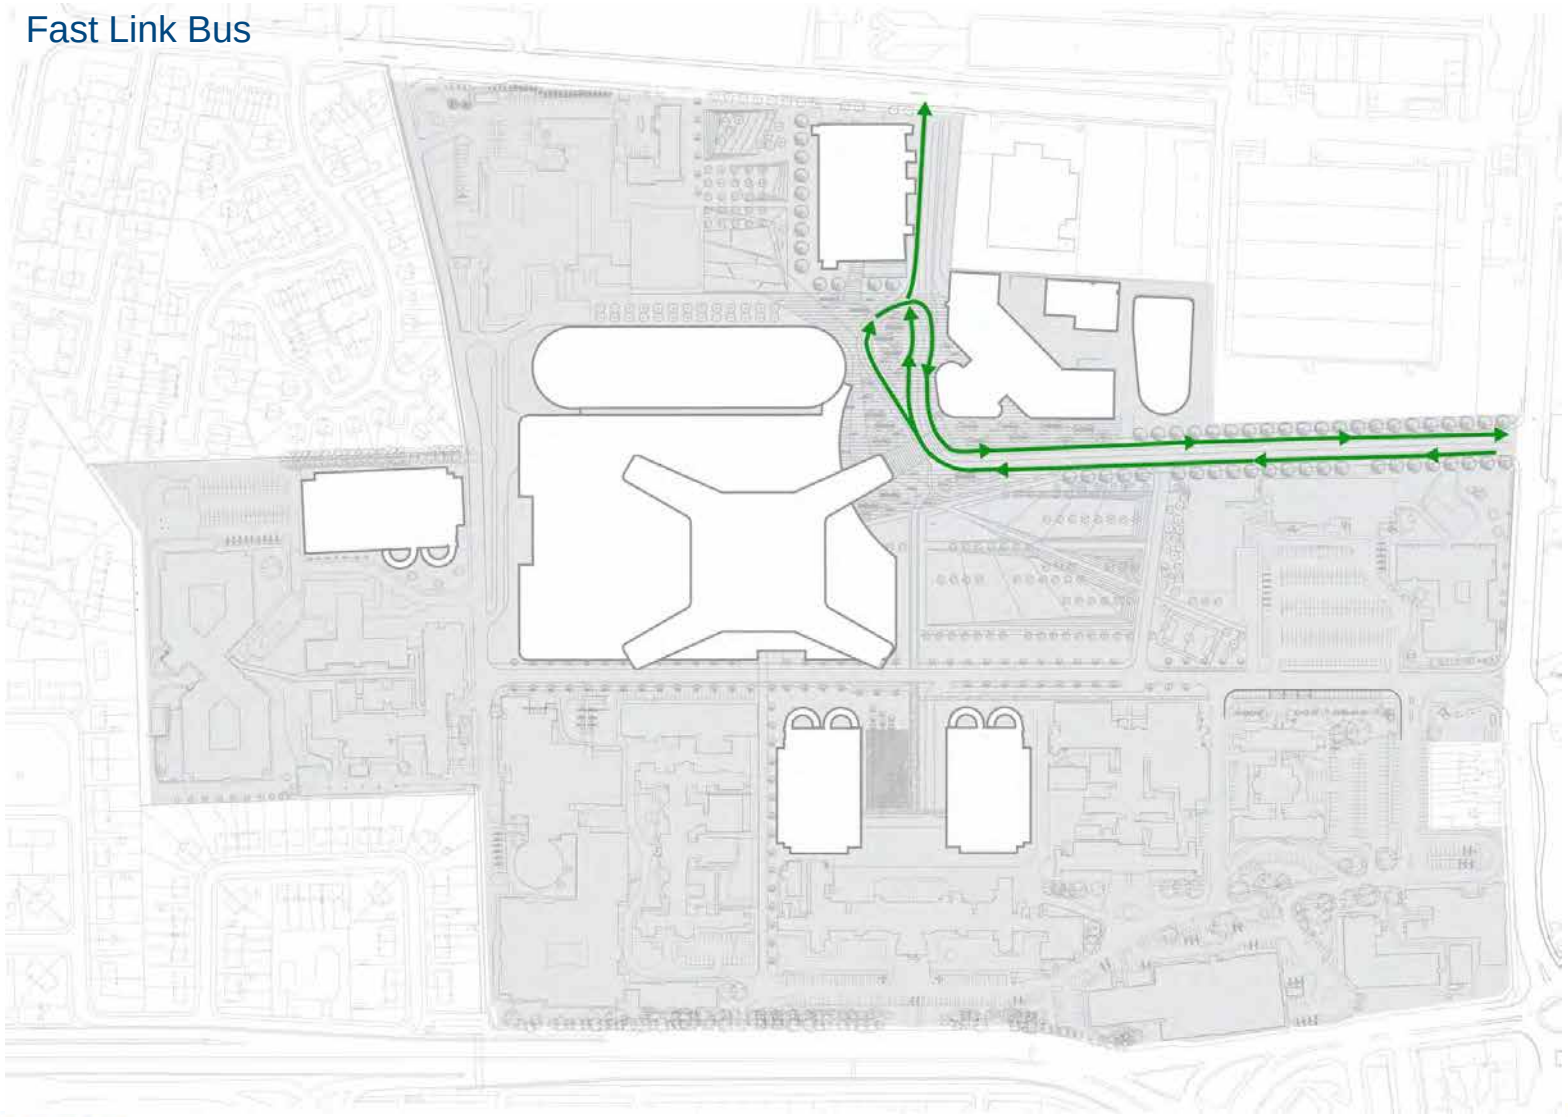
# Movement & Function

## Blue Light Movements



# Movement & Function

## Fast Link Bus

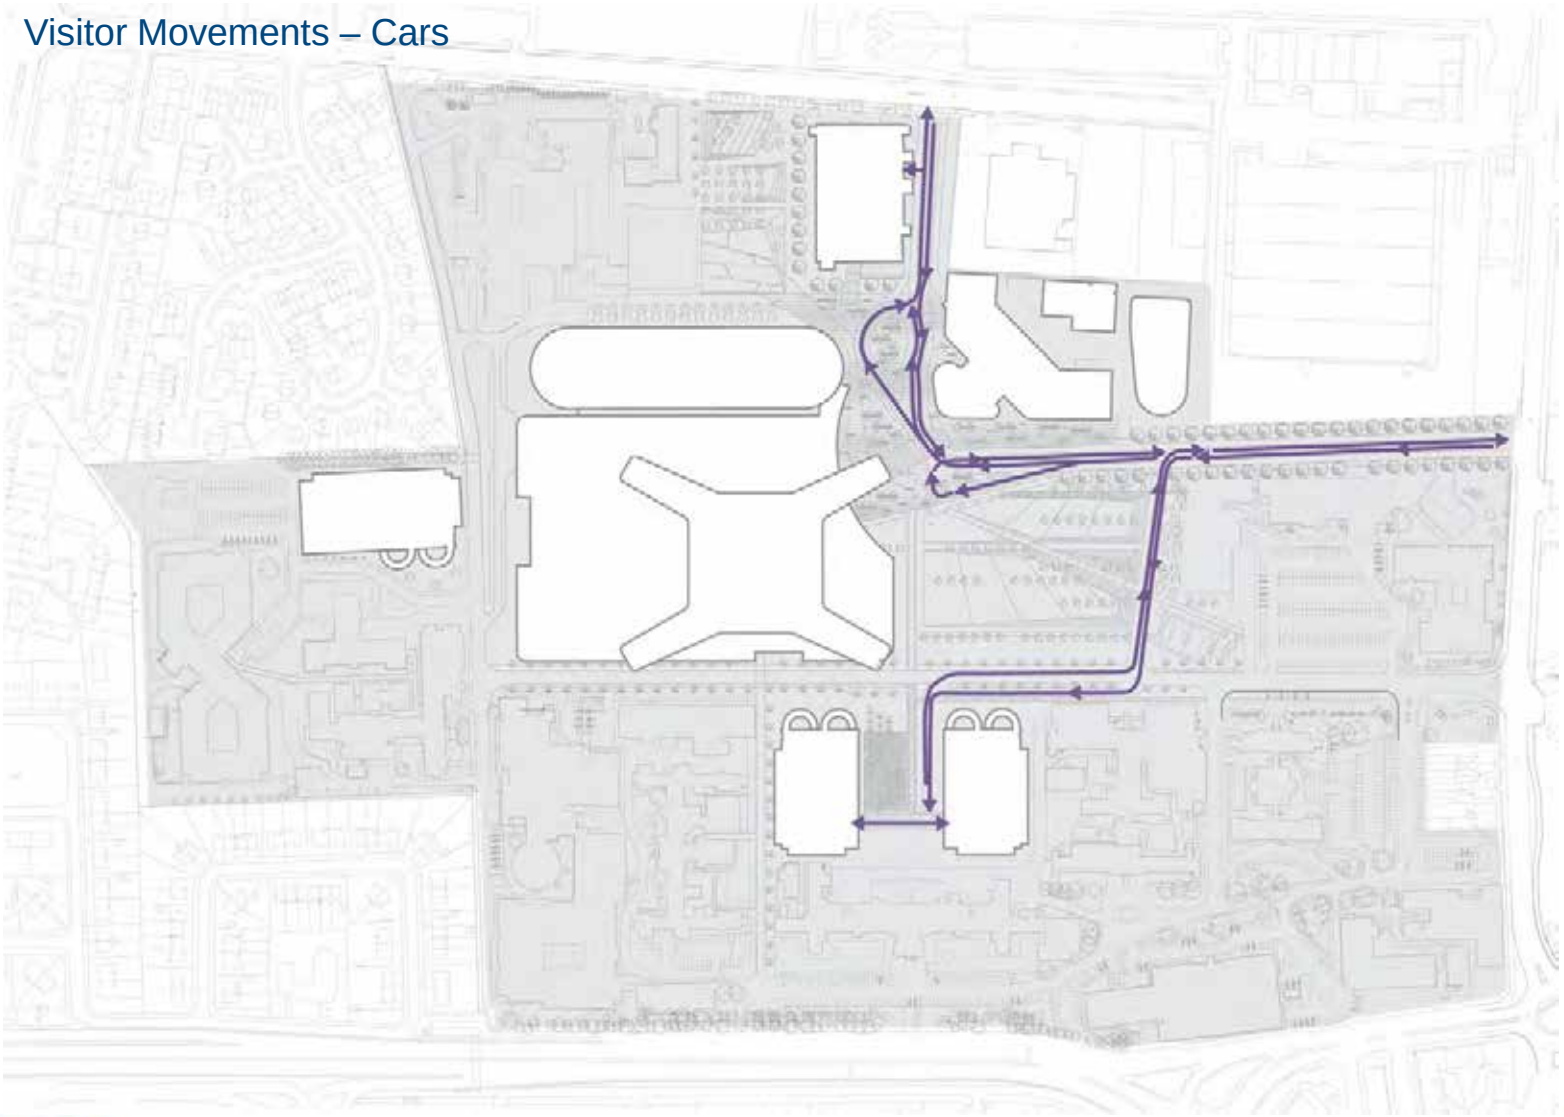


# Movement & Function

## Retention of Existing Bus Route

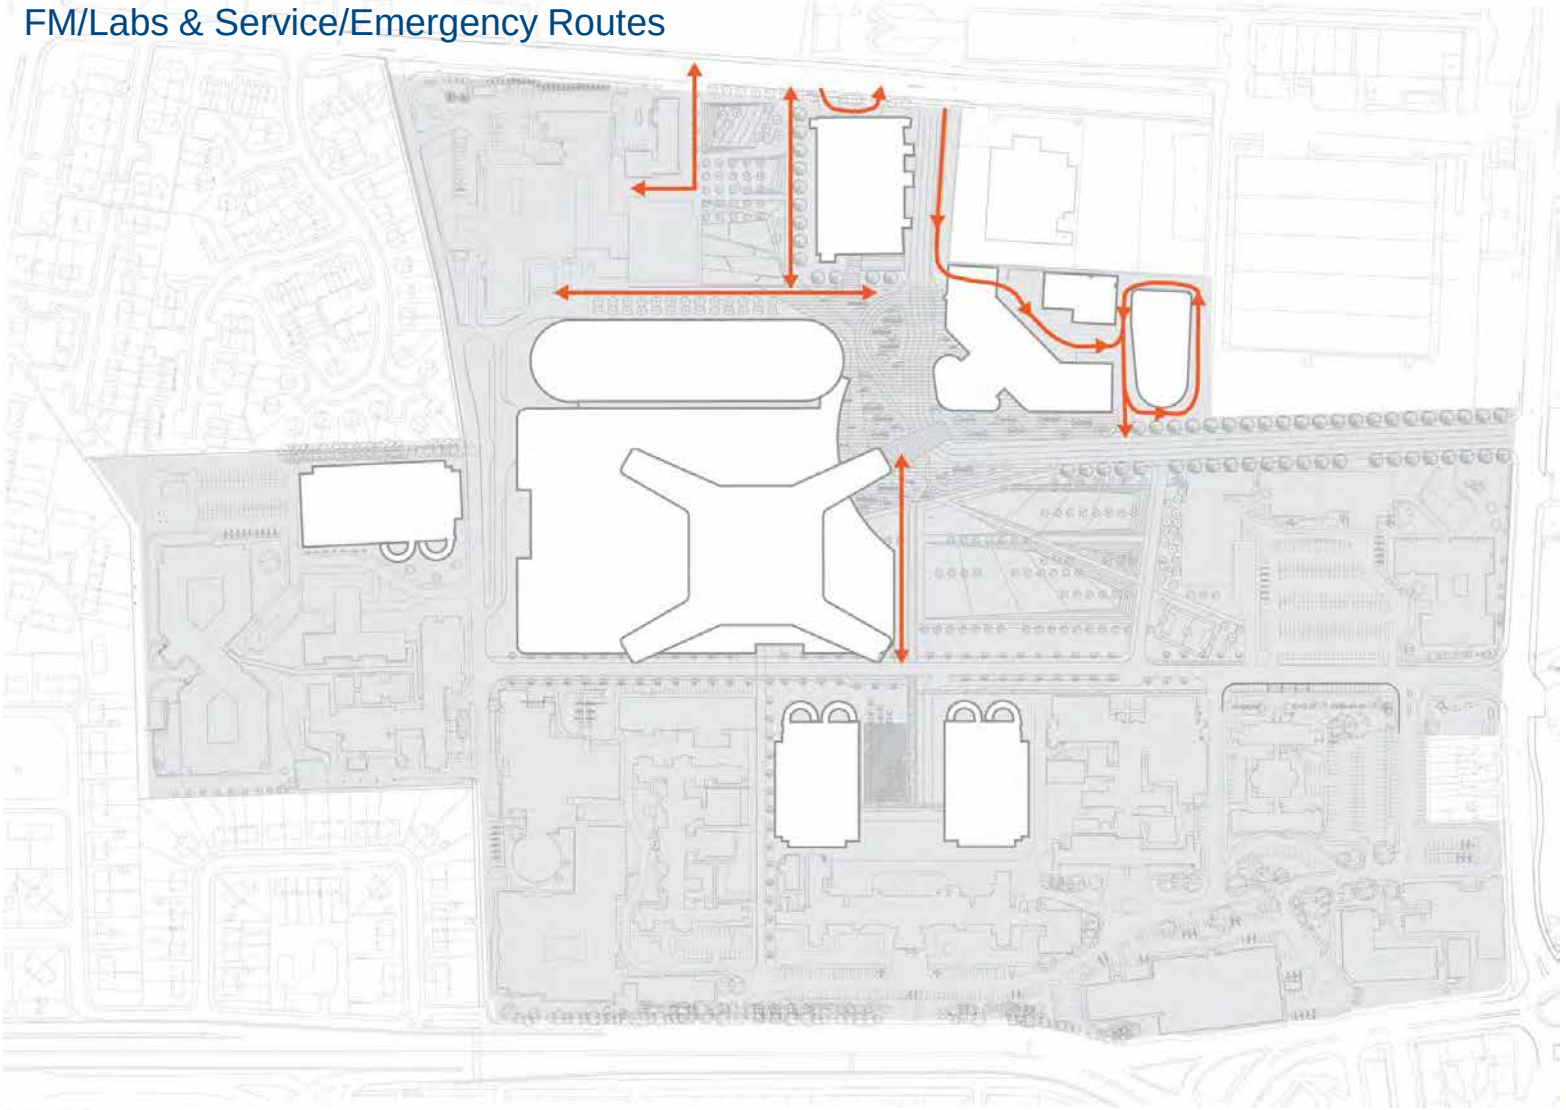
# Movement & Function

## Visitor Movements – Cars



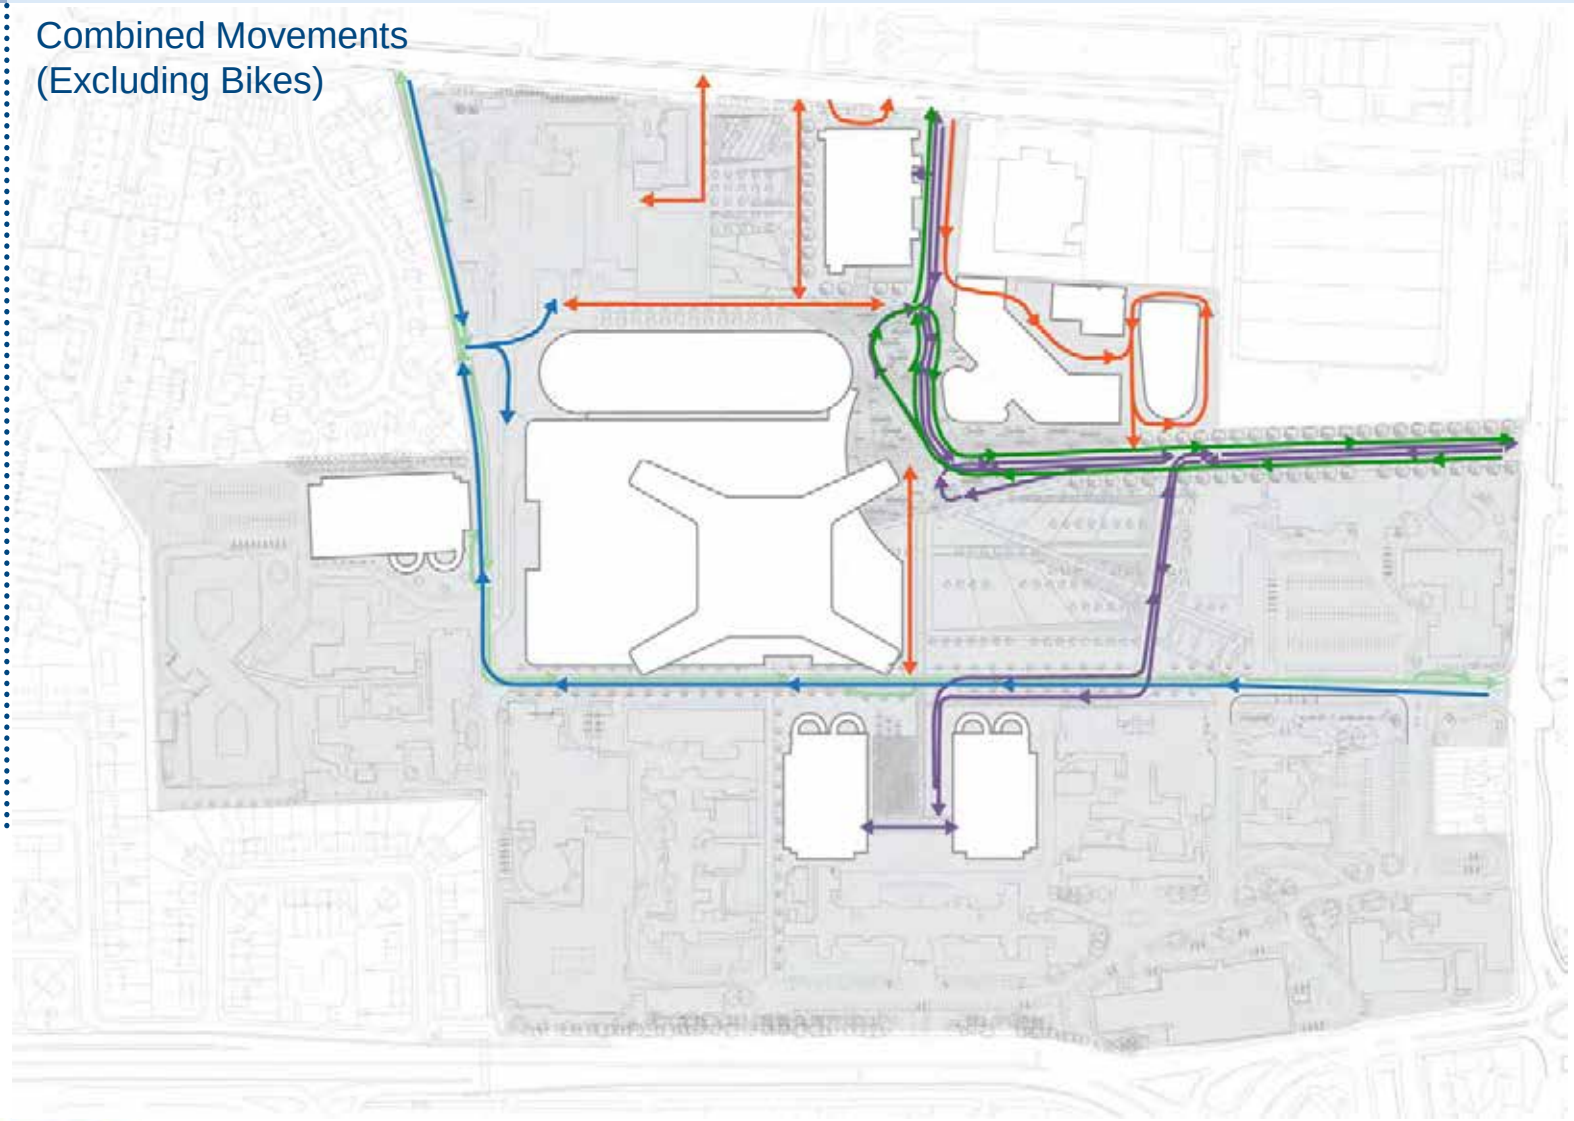
# Movement & Function

## FM/Labs & Service/Emergency Routes



# Movement & Function

## Combined Movements (Excluding Bikes)



# Movement & Function

## Primary Entrance

# Movement & Function

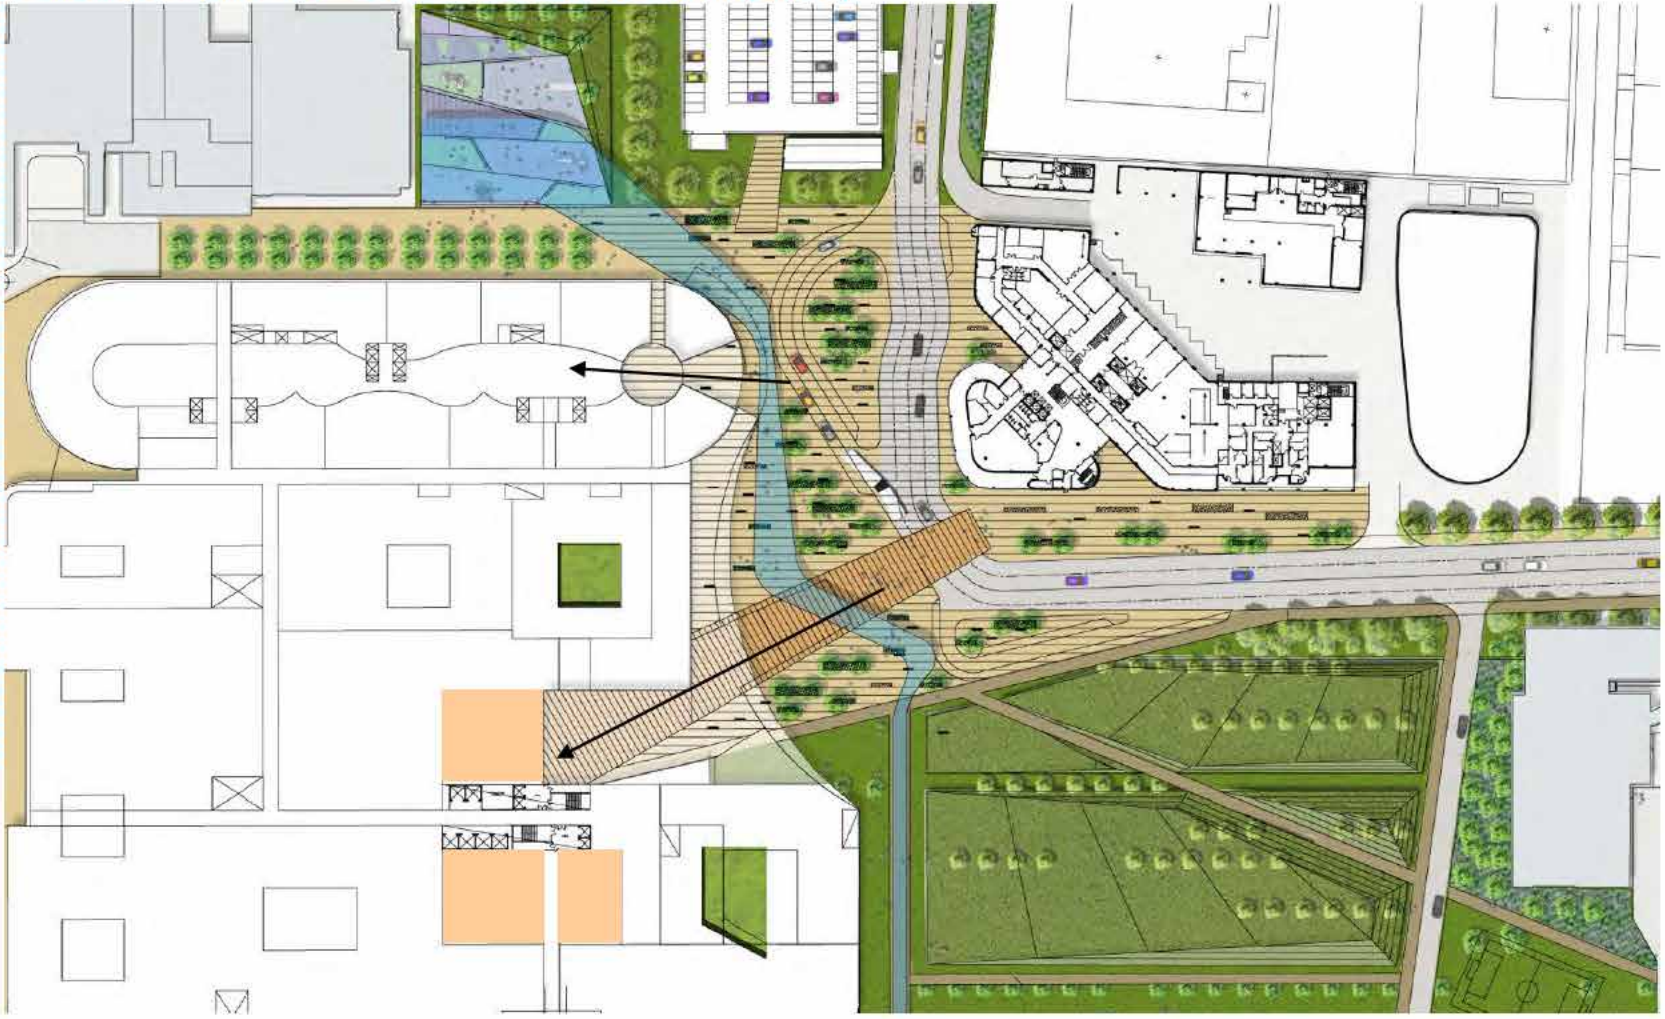
## Pedestrian Movements

# Masterplan

## Central Area Plan – Access & Connections

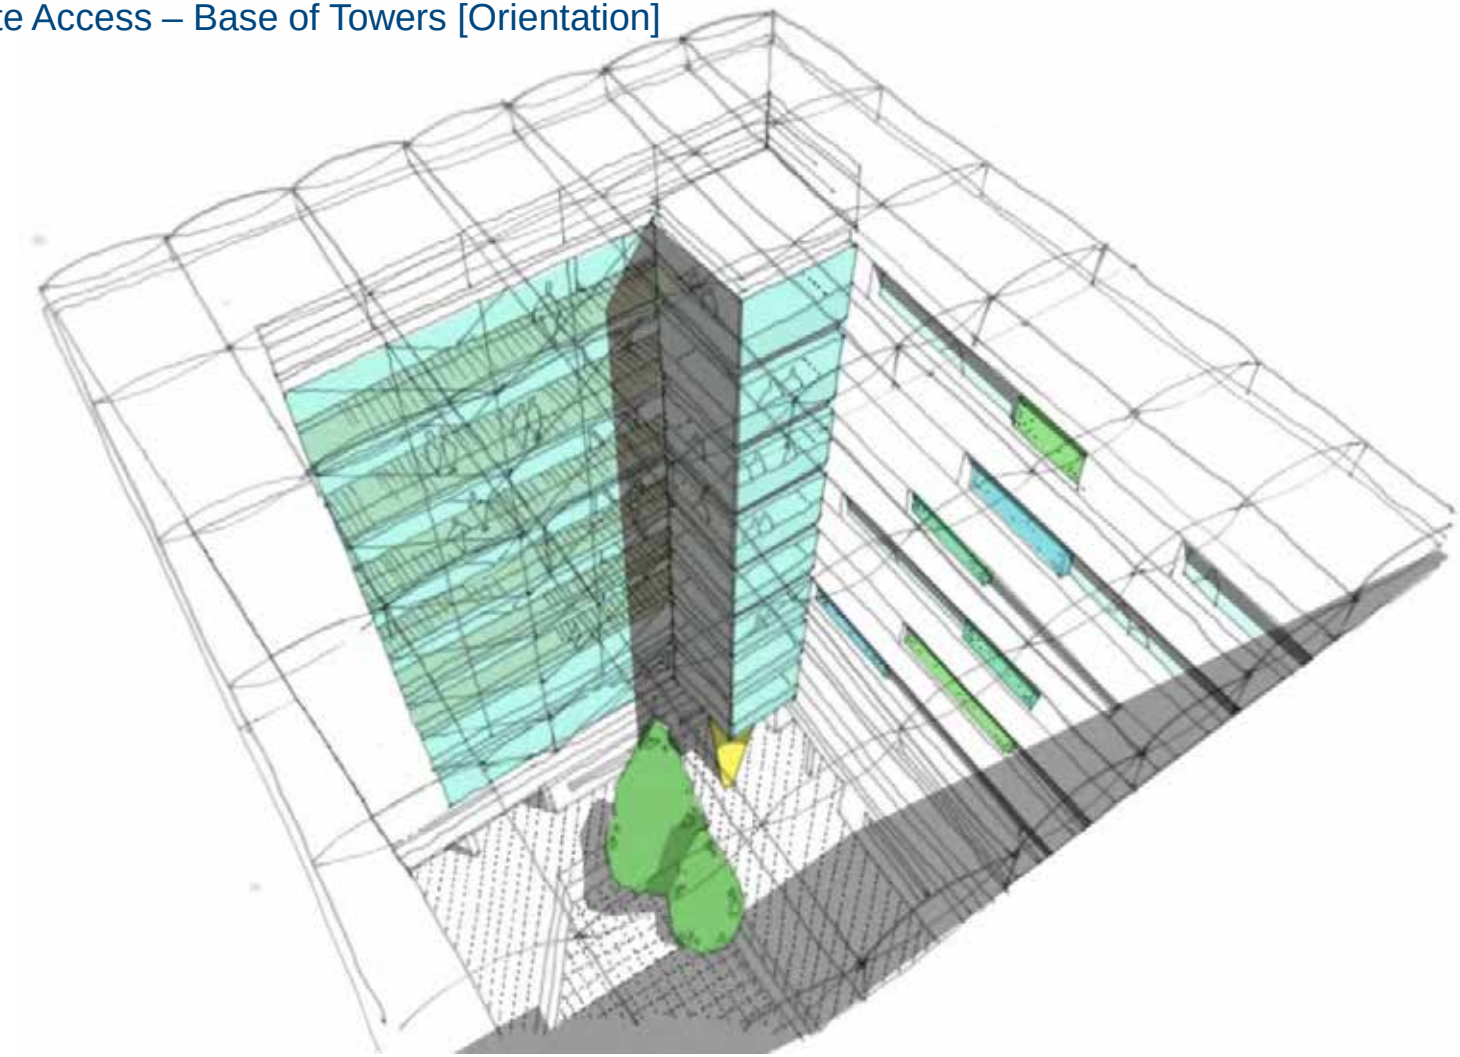
# Movement & Function

## Ground Floor Plan – Access & Connections [Draft]



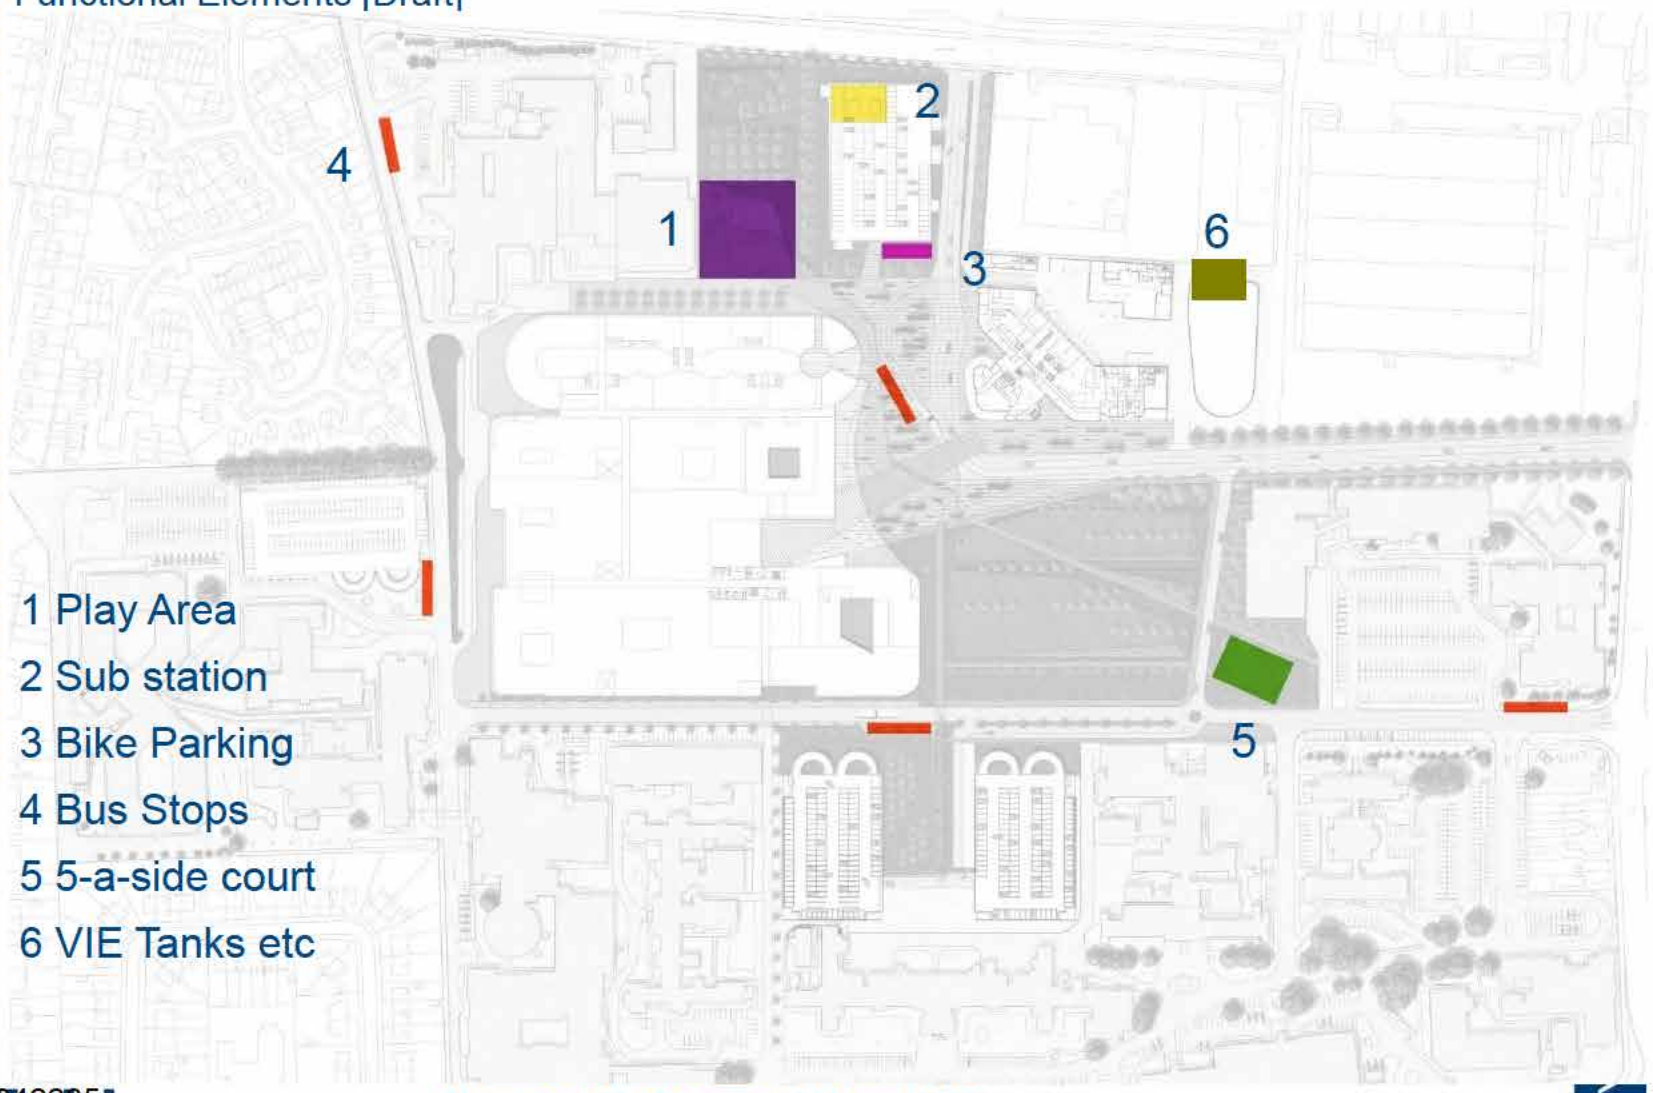
# Movement & Function

## Acute Access – Base of Towers [Orientation]



# Masterplan Components

## Functional Elements [Draft]



1 Play Area
2 Sub station
3 Bike Parking
4 Bus Stops
5 5-a-side court
6 VIE Tanks etc

# Movement & Function

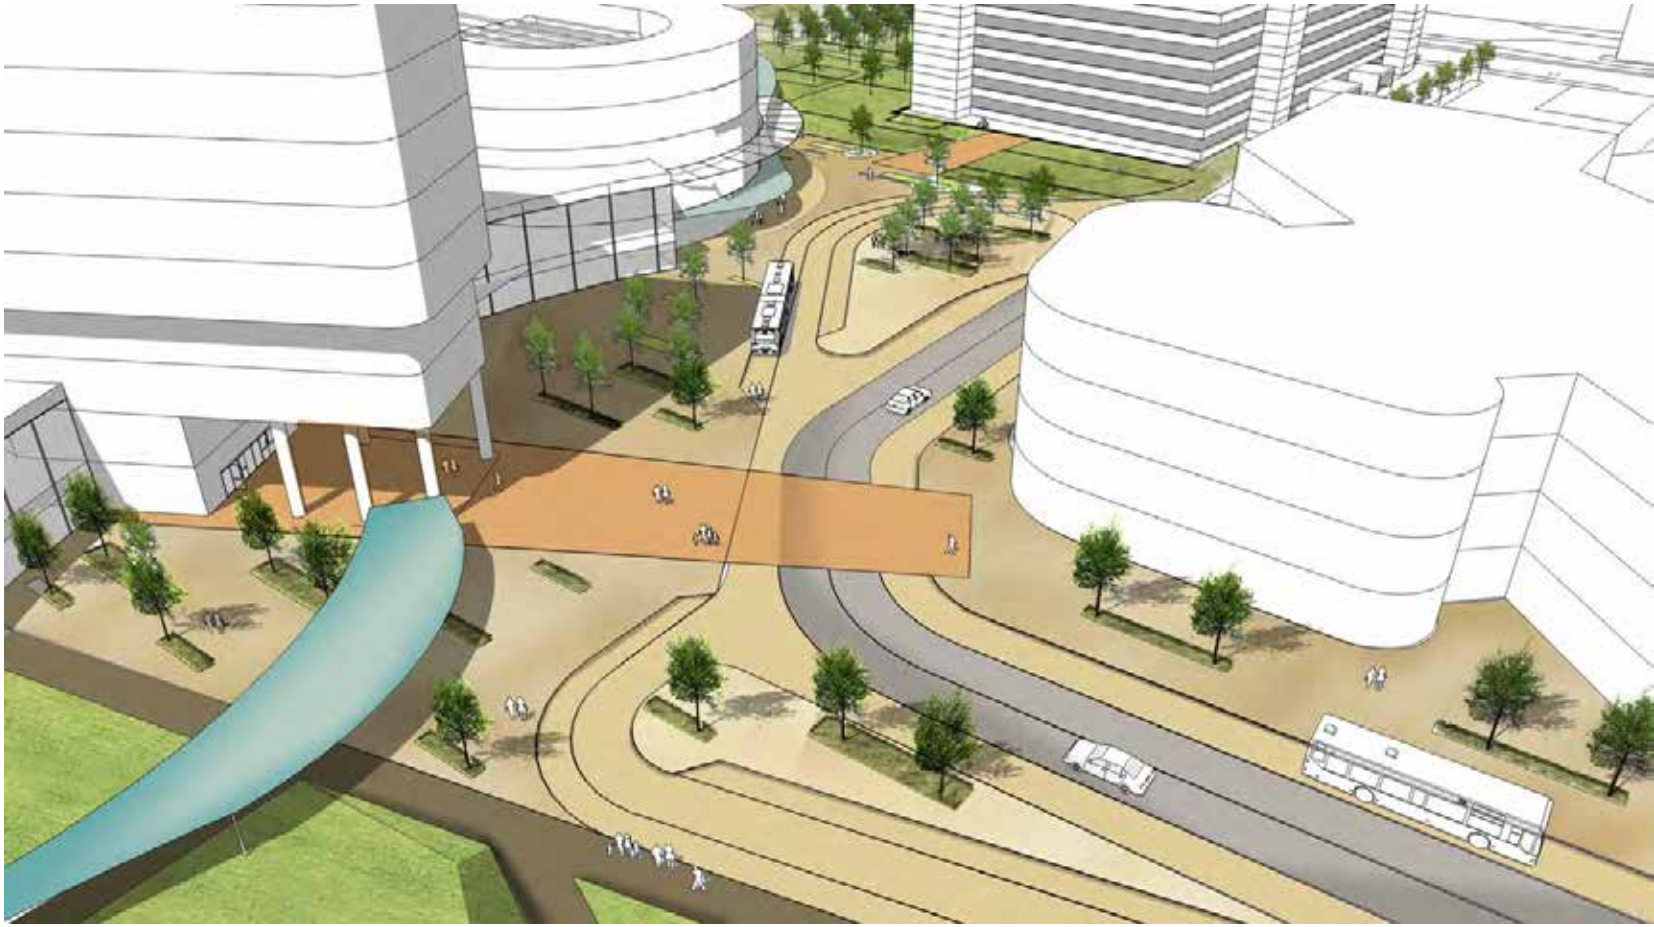
## Ground Floor Plan – Access & Connections [Draft]

# Character & Function

## Main Entrance Route

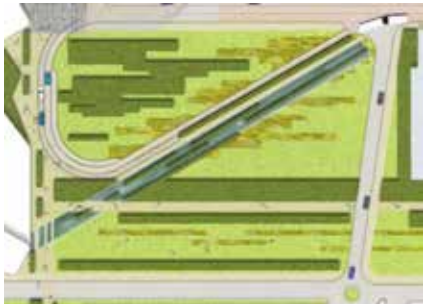
# Movement & Function

## Arrival Square – Scale & Character

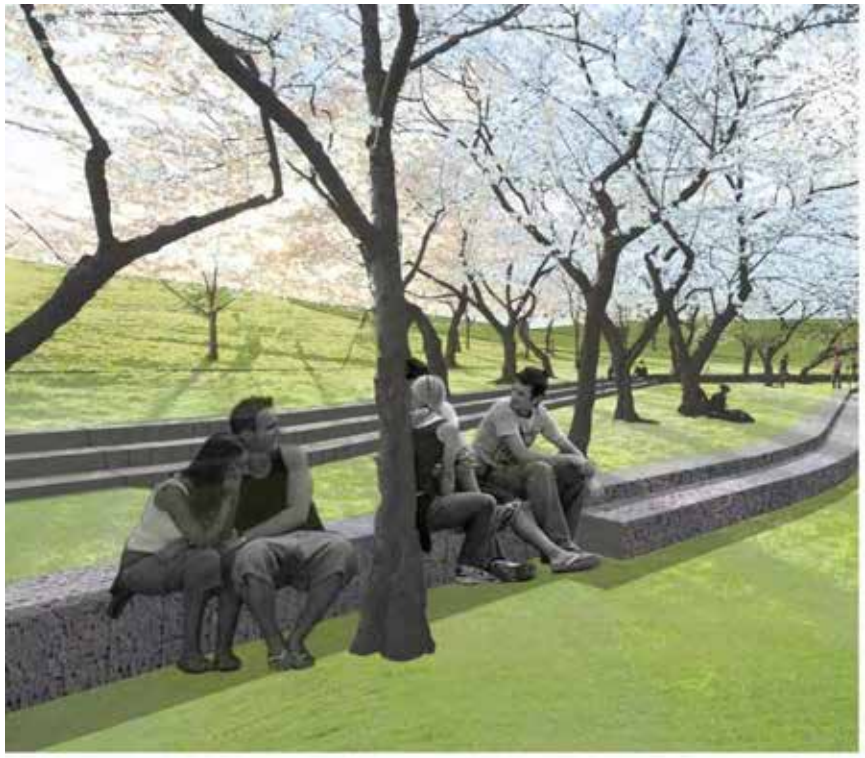


# Design Intent

## Central Park



- Simple materials
- Predominantly grass & trees
- Seasonal character
- Blossom
- Shelter
- Sports/recreation

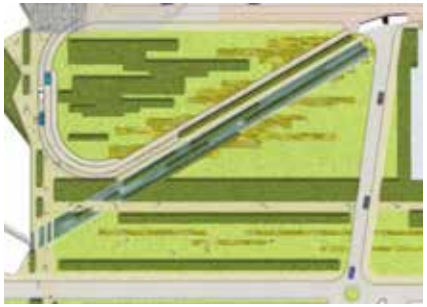


# Character & Function

## Pedestrian Movement – Diagonal Route

# Design Intent

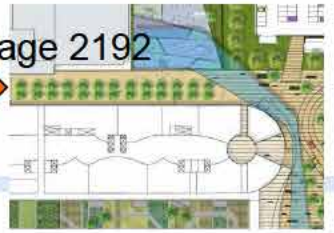
## Central Park



- Inviting
- Potential undulations
- Links to external café?
- Largely informal
- Legible network of paths
- Clear wayfinding
- Visibility of key buildings

# Character & Function

## Pedestrian Movements – Route from Car Parks [1a & 1b]

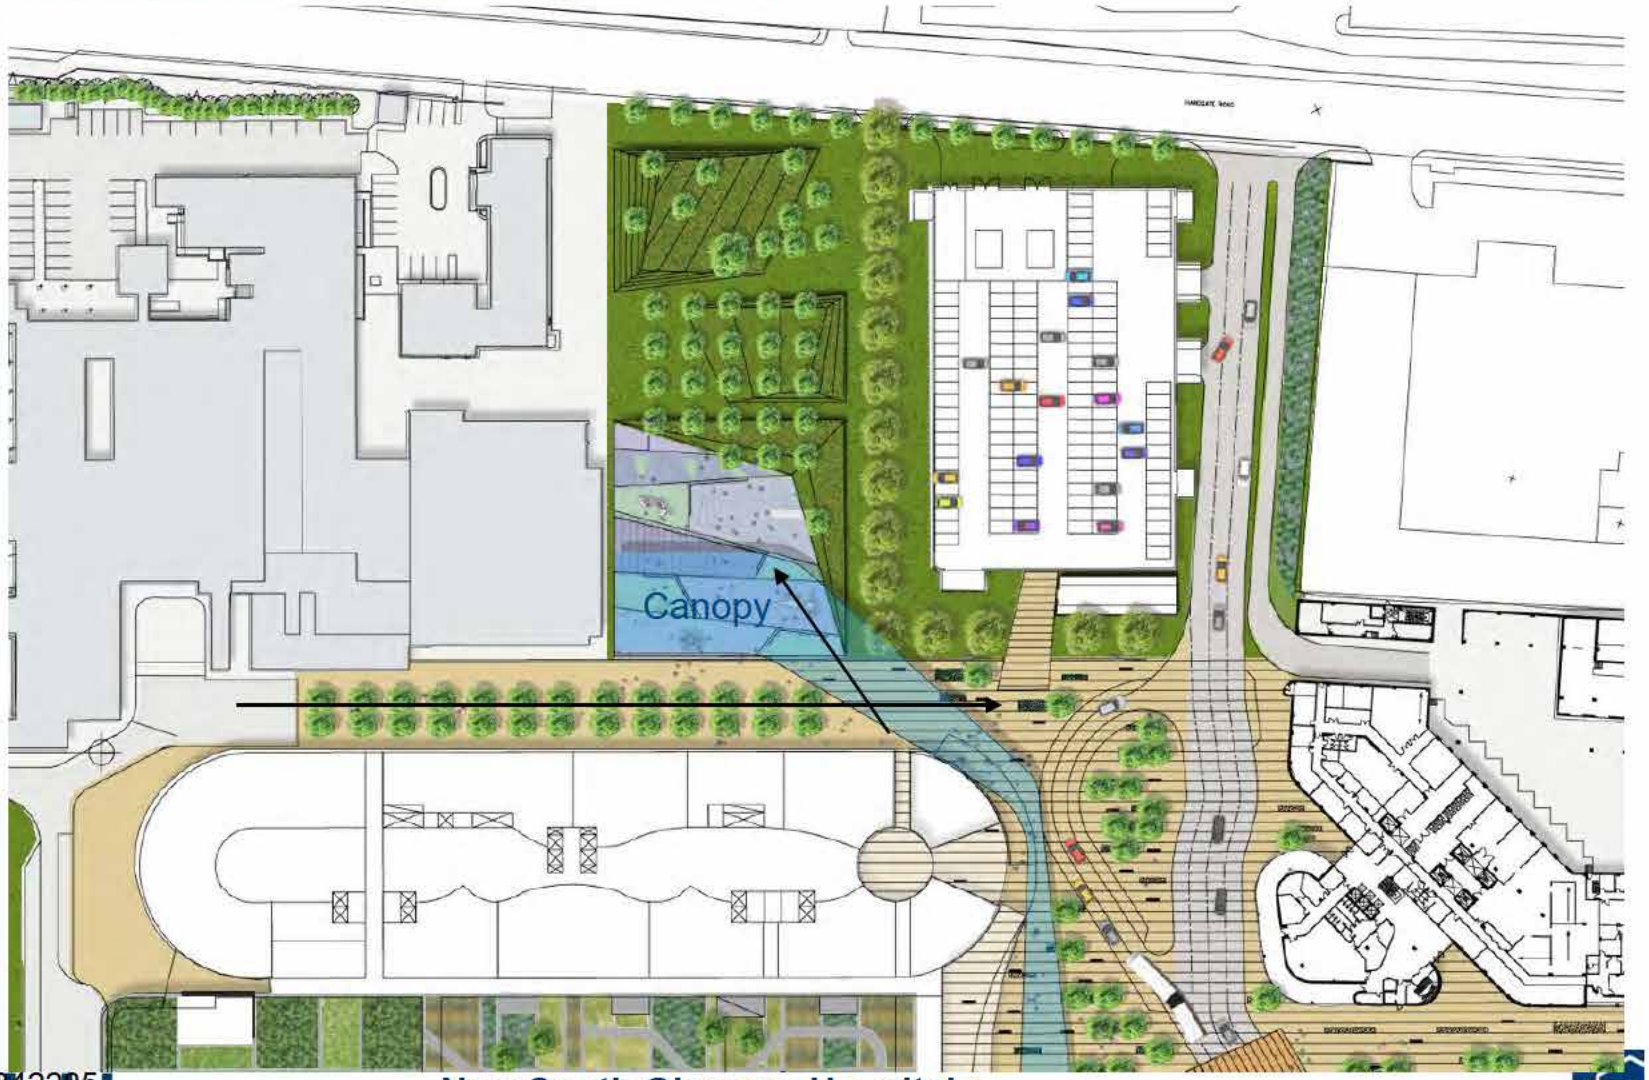


# Character & Function

## Maternity/Children's Street – Flexible Use

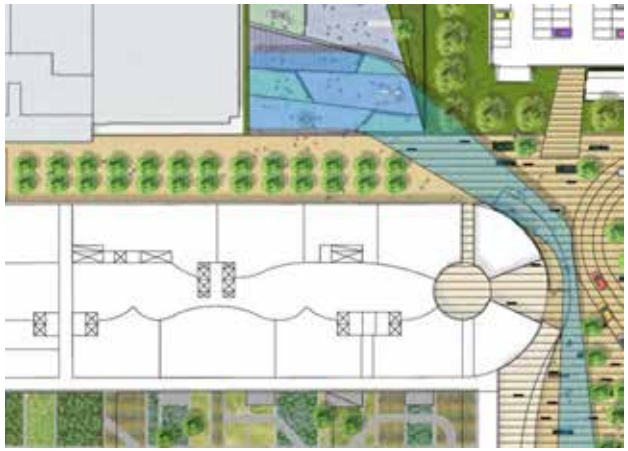
# Character & Function

## Maternity/Children's Street & Park – Flexible Use



# Movement & Function

## Children's Building



# Design Precedents

## Courtyards & Green Roof Potential

# Roof Terraces

## Rooftop Play & Accessible Garden

# Roof Terraces

- Intensive vs low maintenance
- Proportions to be determined
- Play space with canopies
- Quieter seating areas

# Design Intent

## Children's Park

- Interesting elements
- Variety
- Covered play areas
- Space for flexible uses
- Colour
- Interactivity

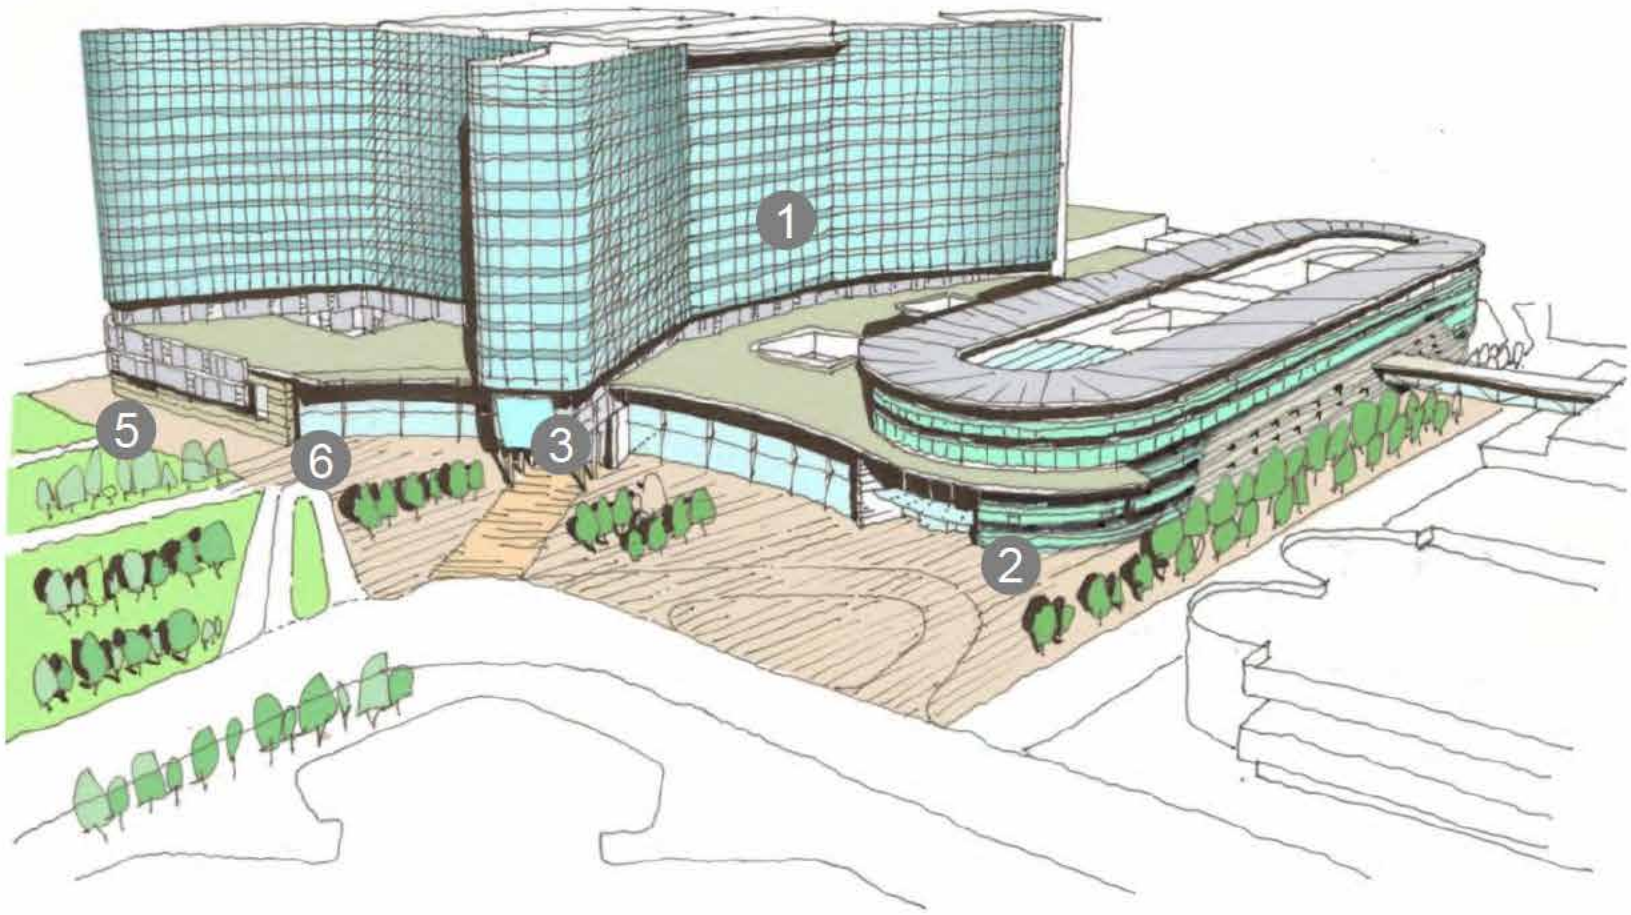
# Existing Site

Site Character
Habitat & Ecology

# Design Intent

## Central Park

# Clinical Breakout Sessions- Acute and Children's



# New South Glasgow Hospitals (NSGH) Project

## Dialogue Meeting Agenda – Bidder B

## Date: 07 July 2009

## Time: 1330 - 1700hrs

## Venue: Glynhill Hotel

Minutes from Design Meeting # 5 on 07 July (Bidder B)

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-1 | Info | n/a | n/a | Masterplan development from DD#4 to DD#5 – required to get a better balance to entrances and<br><br>This has been approached by re-orientating the children's entrance. | n/a | n/a | n/a |
| 5-2 | Info | n/a | n/a | Board confirmed that a meeting was held 06 July 2009 with SPT around the masterplan. SPT have a requirement for a single point on the site for a transport hub/interchange. | n/a | n/a | n/a |
| 5-3 | Info | n/a | n/a | A semi-basement option (some above some below ground) being considered by the bidder. | n/a | n/a | n/a |
| 5-4 | Info | n/a | n/a | Public Art – collaborative principles (embedded design process) outlook of the bidder.<br><br>Andy Scott – Art Champion – introduced by the bidder.<br><br>Considered that the current development is strategy related rather than pictures/displays of potential art. | n/a | n/a | n/a |
| 5-5 | Info | n/a | n/a | External environment – children's roof garden has been developed further. | n/a | n/a | n/a |
| 5-6 | Info | n/a | n/a | At ground floor the bidder has re-introduced the central street per the exemplar. | n/a | n/a | n/a |
| 5-7 | Info | n/a | n/a | First floor – OPD to nuclear medicine link created. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-8 | Info | n/a | n/a | Structure development has identified 3% daylighting achieved and modelled.<br><br>Structure of tower continues all the way down to the ground rather than transfer platform. | n/a | n/a | n/a |
| 5-9 | Info | n/a | n/a | Importance of art and destigmatism of healthcare is highlighted by the bidder. | n/a | n/a | n/a |
| 5-10 | Info | n/a | n/a | Public Art<br><br>Not considered as a heritage project (e.g. shipbuilding focus) rather building links with the community – a landmark and beacon in the community.<br><br>Arts for adult and children separately catered for (two approaches for two buildings).<br><br>Hospital = Beacon (security and stability)<br>Children's – Vessel (dynamic and flowing) | n/a | n/a | n/a |
| 5-11 | Info | n/a | n/a | Layered approach to public art is proposed:<br><br>NHS client group<br>Community representation<br>Contractor and design team<br>Strategic team<br>Public Arts Champion | n/a | n/a | n/a |
| 5-12 | Info | n/a | n/a | Public Arts Champion, examples of buildings and structure with art = BBC, Liverpool, one off bespoke reception desk. Believing we are worth it 20m high structure in Belfast.<br><br>Civic pride and input is outlook ~ community input and consultation. | | | |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-13 | Info | n/a | n/a | External Environment<br><br>Bidder will give focus to maintenance and growth patterns/requirements of the external space and green spaces.<br><br>Outlook that the incoming boulevard and other access routes will develop over time into mature tree-line spaces/avenues. | n/a | n/a | n/a |
| 5-14 | Info | n/a | n/a | 1:200 ward analysis<br><br>Revisited/questioned previous proposal:<br><br>1) Use – significant usage?<br>2) Daylight – will you actually get light down the 14storey shafts?<br><br>This has opened up the shafts to create only two nr split by one link with ward support off of this creating rooms/pods supported off of the link into the atrium. | n/a | n/a | n/a |
| 5-15 | Info | n/a | n/a | Ground Floor<br><br>Have tried to introduce other functions to make a more active space and not sterile – dining and associated functions moved to centre of space.<br><br>Have introduced central street – improved wayfinding and orientation achieved. | n/a | n/a | n/a |
| 5-16 | Info | n/a | n/a | First Floor<br><br>Introduced hospital chapel to this level. | . | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-17 | Info | n/a | n/a | Second Floor<br><br>Have adjusted external envelope to get light in horizontal from outside to support/complement light from shaft. | | | |
| 5-18 | Info | n/a | n/a | Adult Sub-Group<br><br>Critical Care layout tabled to identify the corrective measures and developed layout in response to the comments noted at DD#4.<br><br>This notes ordered CCU, HDU clusters, with improved observation from staff base, ability to flex CCU to HDU and more central yet discrete dirty utility spaces.<br><br>Noted that some (5+ rooms) do not have an external window – proposed that skylights can be integrated to these rooms as plant covers part of the floor above and this would be possible. | | | |
| 5-19 | Action | Board | 07/07/09 | Visitor waiting and relative room accommodation to swap places in the critical care department. | Bidder | Bid | n/a |
| 5-20 | Action | Board | 07/07/09 | Around 25% of rooms in acute assessment do not have access to direct daylight.<br><br>Only one room in complex needs does not have direct daylight.<br><br>Noted that Acute Assessment has made good progress although improved daylight to rooms would be beneficial/welcomed – this is particularly true for general receiving. | Bidder | Bid | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-21 | Action | Board | 07/07/09 | A&E<br><br>Potential for introduction of a corridor giving more direct access from minors triage to radiology to be considered. | Bidder | Bid | n/a |
| 5-22 | Action | Board | 07/07/09 | Theatres<br><br>Route from AoDoS to theatres without movement through Recovery to be considered.<br><br>Travel distances from theatres to Recovery (esp from furthest theatres) to be reviewed by the bidder.<br><br>Egress from theatres direct to corridor to avoid additional turns (side exit in current proposal) would be preferred.<br><br>Passing workstations etc from theatre to Recovery to be revisited.<br><br>Resilient (secondary) route for incoming clean FM to theatres to be considered.<br><br>Doors to be added to give more direct route from lifts to decontamination to provide for scopes etc from areas other than theatres.<br><br>Trolley access from endoscopy to recovery required. | Bidder | Bid | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-23 | Info | n/a | n/a | Ward<br><br>Chute for disposal removed.<br><br>Clean and dirty flows illustrated. | n/a | n/a | n/a |
| 5-24 | Info | n/a | n/a | Fire Strategy<br><br>Noted that over the 100beds for two stairways.<br><br>Given separation and sprinkler system bidder will be seeking relaxation on this. | n/a | n/a | n/a |
| 5-25 | Info | n/a | n/a | Travel distance (evacuation) is over the 60m hose length – again relaxation on requirement will be sought. | n/a | n/a | n/a |
| 5-26 | Info | n/a | n/a | Two potential solutions to fire being roof material that burns off to create an open space or ventilation around the perimeter. | n/a | n/a | n/a |
| 5-27 | Info | n/a | n/a | Other relaxations:<br><br>Not many on the lower levels due to number of staircases.<br><br>Atrium design will be fully fire engineered design.<br><br>Smoke screens to prevent spread of fire (combined with sprinklers) through atrium and to other areas has been considered and will be fire engineered.<br><br>Bidder is comfortable at retail space below clinical accommodation.<br><br>Bidder is reviewing fire requirements of helipad. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-28 | Action | Board | 07/07/09 | Healthcare planning summary:<br><br>Children's – theatre<br><br>Access to dining room.<br><br>Access to outside space.<br><br>Access to discharge lounge.<br><br>Adults<br><br>Theatres – per comments at 5-22 above.<br><br>Acute Assessment - % of rooms with access to natural light.<br><br>A&E – access from minor triage to radiology.<br><br>Critical Care – flip relative rooms and waiting area. | Bidder | Bid | n/a |
| 5-29 | Action | Board | 07/07/09 | M&E summary:<br><br>Schematics were tabled, will be reviewed and fed back. | Board | 16/07/09 | n/a |
| 5-30 | Action | Board | 07/07/09 | BREEAM – nothing to report.<br><br>Energy target – work in progress, more emphasis on operational energy rather than design energy. | Bidder | Bid | n/a |

# New South Glasgow Hospitals (NSGH) Project

## Dialogue Meeting Agenda – Bidder B

## Date: 07 July 2009

## Time: 1330 - 1700hrs

## Venue: Glynhill Hotel

**Workstream:** **Design/Site # 5**

NHS Greater Glasgow & Clyde Attendees: [Complete at Meeting]

[Bidder Name] Attendees: [Complete at Meeting]

| Proposed Meeting Agenda | Objectives |
|---|---|
| **1.0 General Group Session – Overview of Agenda Items** | Approx. 15-20 minutes<br><br>Powerpoint presentation by Bidder B to summarise:<br><br>• The design development and response to Design Dialogue Meeting 4.<br>• An outline/introduction to our Agenda Items, including a summary of Master Planning and Architecture/Health Planning Sub-Group. |
| **2.0 Design Workshop Sub Groups** | Approx. 3 hours |
| Bidder B proposes to have 2 subgroups:<br>1. Master planning, Architecture and Health Planning (including sub-groups | |

| | |
|---|---|
| for the Adult and Children's Hospitals during the 1:200 Department Reviews, and Structure/Civil and Cladding<br>2. M&E<br>(Sub groups - Fire Engineering, Acoustic Strategy Principles, FM) | |
| **2.1 Design & Healthcare Planning** | |
| **Master planning:** | |
| 1. Brief Overview | A review of the process to date, including our response to the site and buildings, and their association with public art, cultural and environmental issues. |
| 2. Master Plan Concept | To present the updated Master Plan, including the key movement routes within the site |
| 3. Review of Key Areas, including the Arrival Square, the Children's Park | To present the design development of the key areas since DDM 04. |
| 4. Views and Entrances | To present updated visuals of the site views and entrance concept development. |
| 5. Public Art & Cultural Strategy | To open the Dialogue with the Board's representative, including the linkage of the external and internal Art strategies |
| **Architecture and Health Planning:** | |
| 1. Architectural Concept – Scale and Character | To present the development of the architecture including massing and 3D modelling for the internal feature spaces, entrances and key areas. |
| 2. 1:500 Concept Plans<br>- Department adjacencies<br>- Stacking Diagrams<br>- Main circulation flows<br>- Separation of flows | A summary of the clinical design solution for Opportunity E, demonstrating the proposed resolution of the Board's DDM 04 comments. |
| 3. Children's Hospital 1:200 Department Detailed Design<br>- Children's Ward<br>- Children's Ground Floor OPD/Atrium<br>- Children's Theatres<br>- Children's Radiology | To present the revised detailed clinical plans for Opportunity E Children's Hospital demonstrating the proposed resolution of the Board's DDM 04 comments. |
| 4. Adult Hospital 1:200 Department | To present the revised detailed clinical plans for |

# Proposed Meeting Query List in Support of Agenda Items

| | |
|---|---|
| Agenda Item 1 | BREEAM, Sustainability and Energy |
| Query 1/1 | Review of BREEAM status and credits achieved |
| Query 1/2 | Review of energy model and solutions to achieve carbon target |
| Agenda Item 2 | Engineering Principles |
| Query 2/1 | Review of major system schematics |
| Agenda Item 3 | Energy centre strategy and Primary Distribution |
| Query 3/1 | Discussion of layout proposals developed and resilience of systems |
| Agenda Item 4 | Distribution principles. |
| Query 4/1 | Presentation of developed proposals at 1:500 scale. |
| Query 4/2 | M&E Risers. |
| Query 4/3 | Plant room sizes / locations. |
| Agenda Item 5 | Environment |
| Query 5/1 | Daylighting levels |
| Query 5/2 | Approach to Tower |
| Query 5/3 | Thermal comfort within ward tower |
| Agenda Item 6 | Responses to RFIs |
| Query 6/1 | UPS Autonomy |

# Minutes from NHS Greater Glasgow & Clyde Meeting

**Workstream: Design # 5 Bidder: B**

Date: 07 July 2009 at 1330hrs to 1700hrs

Venue Glynhill Hotel

## Attendees

| **Bidder B** | |
|---|---|
| Ross Ballingall: Brookfield<br>Paul Serkis Brookfield<br>John Ko Brookfield<br>Chris Lovejoy Brookfield<br>Alan Keeley Brookfield<br>Manny Ajuwon Brookfield<br>Neil Murphy Nightingale associates<br>Paul Britton Tribal<br>Pete Dunbar WSP<br>Jim McGonigal WSP<br>Neil McGarry WSP<br>Alastair Leighton Gillespies | Andy Scott (Arts)<br>Steve Pardy ZBP<br>Michael Frain ZBP<br>Matthew Palavidis Acoustic Logic<br>Gary Howard Nightingale associates<br>Jonathan Kendrik Nightingale associates<br>Jamie Brewster Nightingale associates<br>Richard Mazuk Nightingale associates<br>Graham Harris Nightingale associates<br>Ed McIntyre Mercury Engineering<br>David Bowness WSP (Sustainability) |

Apologies: Alex McIntyre

Minutes from Design Meeting # 5 on 07 July (Bidder B)

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-1 | Info | n/a | n/a | Masterplan development from DD#4 to DD#5 – required to get a better balance to entrances.<br><br>This has been approached by re-orientating the children's entrance. | n/a | n/a | n/a |
| 5-2 | Info | n/a | n/a | Board confirmed that a meeting was held 06 July 2009 with SPT around the masterplan. SPT have a requirement for a single point on the site for a transport hub/interchange. This requires to be reflected in the development of the design by bidders.<br><br>Noted that this is not different from planning conditions/information in the ERs, rather SPT highlighting their view/requirement within that. | n/a | n/a | n/a |
| 5-3 | Info | n/a | n/a | A semi-basement option (some above some below ground) being considered by the bidder. | n/a | n/a | n/a |
| 5-4 | Info | n/a | n/a | Public Art – collaborative principles (embedded design process) outlook of the bidder.<br><br>Andy Scott – Art Champion – introduced by the bidder.<br><br>Considered that the current development is strategy related rather than pictures/displays of potential art. | n/a | n/a | n/a |
| 5-5 | Info | n/a | n/a | External environment – children's roof garden has been developed further. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-6 | Info | n/a | n/a | At ground floor the bidder has re-introduced the central street per the exemplar although it was noted that this is a 'hospital street corridor link' and not a full width 'mall'. | n/a | n/a | n/a |
| 5-7 | Info | n/a | n/a | First floor – OPD to nuclear medicine link created. | n/a | n/a | n/a |
| 5-8 | Info | n/a | n/a | Structure development has identified 3% daylighting achieved and modelled.<br><br>Structure of tower continues all the way down to the ground rather than transfer platform. | n/a | n/a | n/a |
| 5-9 | Info | n/a | n/a | Importance of art and destigmatism of healthcare is highlighted by the bidder. | n/a | n/a | n/a |
| 5-10 | Info | n/a | n/a | Public Art<br><br>Not considered as a heritage project (e.g. shipbuilding focus) rather building links with the community – a landmark and beacon in the community.<br><br>Arts for adult and children separately catered for (two approaches for two buildings).<br><br>Hospital = Beacon (security and stability)<br>Children's – Vessel (dynamic and flowing) | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-11 | Info | n/a | n/a | Layered approach to public art is proposed including the following and further sub-sets/workgroups:<br><br>NHS client group<br>Community representation<br>Contractor and design team<br>Strategic team<br>Public Arts Champion | n/a | n/a | n/a |
| 5-12 | Info | n/a | n/a | Public Arts Champion, examples of buildings and structure with art = BBC, Liverpool, one off bespoke reception desk, *"Believing we are worth it"* 20m high structure in Belfast.<br><br>Civic pride and input is outlook ~ community input and consultation. | n/a | n/a | n/a |
| 5-13 | Info | n/a | n/a | External Environment<br><br>Bidder will give focus to maintenance and growth patterns/requirements of the external space and green spaces.<br><br>Outlook that the incoming boulevard and other access routes will develop over time into mature tree-line spaces/avenues. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-14 | Info | n/a | n/a | 1:200 ward analysis<br><br>Revisited/questioned previous proposal:<br><br>1) Use – significant usage?<br>2) Daylight – will you actually get light down the 14storey shafts?<br><br>This has opened up the shafts to create only two nr split by one link with ward support off of this creating rooms/pods supported off of the link into the atrium. | n/a | n/a | n/a |
| 5-15 | Info | n/a | n/a | Ground Floor<br><br>Have tried to introduce other functions to make a more active space and not sterile – dining and associated functions moved to centre of space.<br><br>Have introduced central street – improved wayfinding and orientation achieved. | n/a | n/a | n/a |
| 5-16 | Info | n/a | n/a | First Floor<br><br>Introduced hospital chapel to this level. | .n/a | n/a | n/a |
| 5-17 | Info | n/a | n/a | Second Floor<br><br>Have adjusted external envelope to get light in horizontal from outside to support/complement light from shaft. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-18 | Info | n/a | n/a | **Adult Sub-Group**<br><br>Critical Care layout tabled to identify the corrective measures and developed layout in response to the comments noted at DD#4.<br><br>This notes ordered CCU, HDU clusters, with improved observation from staff base, ability to flex CCU to HDU and more central yet discrete dirty utility spaces.<br><br>Noted that some (5+ rooms) do not have an external window – proposed that skylights can be integrated to these rooms as plant covers part of the floor above and this would be possible. | n/a | n/a | n/a |
| 5-19 | Info | n/a | n/a | Preference is for visitor waiting and relative room accommodation to swap places in the critical care department. | n/a | n/a | n/a |
| 5-20 | Info | n/a | n/a | Around 25% of rooms in acute assessment do not have access to direct daylight.<br><br>Only one room in complex needs does not have direct daylight.<br><br>Noted that Acute Assessment has made progress although improved daylight to rooms would be beneficial/welcomed – this is particularly true for general receiving. | n/a | n/a | n/a |
| 5-21 | Info | n/a | n/a | A&E<br><br>Potential for introduction of a corridor giving more direct access from minors triage to radiology to be considered. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-22 | Info | n/a | n/a | Theatres<br><br>Route from AoDoS to theatres without movement through Recovery to be considered.<br><br>Travel distances from theatres to Recovery (esp from furthest theatres) to be reviewed by the bidder.<br>Egress from theatres direct to corridor to avoid additional turns (side exit in current proposal) would be preferred.<br><br>Passing workstations etc from theatre to Recovery to be revisited.<br><br>Resilient (secondary) route for incoming clean FM to theatres to be considered.<br><br>Doors to be added to give more direct route from lifts to decontamination to provide for scopes etc from areas other than theatres.<br><br>Trolley access from endoscopy to recovery required. | n/a | n/a | n/a |
| 5-23 | Info | n/a | n/a | Ward<br><br>Chute for disposal removed.<br><br>Clean and dirty flows illustrated. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-24 | Info | n/a | n/a | Fire Strategy<br><br>Noted that over the 100beds for two stairways.<br><br>Given separation and sprinkler system bidder will be seeking relaxation on this (bidder risk). | n/a | n/a | n/a |
| 5-25 | Info | n/a | n/a | Travel distance (evacuation) is over the 60m hose length – again relaxation on requirement will be sought (bidder risk). | n/a | n/a | n/a |
| 5-26 | Info | n/a | n/a | Two potential solutions to fire being roof material that burns off to create an open space or ventilation around the perimeter. | n/a | n/a | n/a |
| 5-27 | Info | n/a | n/a | Other relaxations that the bidder will seek (bidder risk):<br><br>Not many on the lower levels due to number of staircases.<br><br>Atrium design will be fully fire engineered design.<br><br>Smoke screens to prevent spread of fire (combined with sprinklers) through atrium and to other areas has been considered and will be fire engineered.<br><br>Bidder is comfortable at retail space below clinical accommodation.<br><br>Bidder is reviewing fire requirements of helipad. | n/a | n/a | n/a |

| Ref No. | Type (Info / Action / Risk / Q) | Raised By | Date | Description | Owner | Due Date | Status |
|---|---|---|---|---|---|---|---|
| 5-28 | Info | n/a | n/a | Healthcare planning summary:<br><br>Children's<br><br>Adjacency of Cardiac Theatre and Interventional Radiology should be reviewed<br><br>Access to dining room.<br><br>Access to roof gardens from wards.<br><br>Proximity of Discharge Lounge to outdoor space.<br><br>Adults<br><br>Theatres – per comments at 5-22 above.<br><br>Acute Assessment - % of rooms with access to natural light.<br><br>A&E – access from minor triage to radiology.<br><br>Critical Care – flip relative rooms and waiting area. | n/a | n/a | n/a |
| 5-29 | Action | Board | 07/07/09 | M&E summary:<br><br>Schematics were tabled, will be reviewed and any headline issues fed back. | Board | 24/07/09 | n/a |
| 5-30 | Info | n/a | n/a | BREEAM – nothing to report.<br><br>Energy target – work in progress, more emphasis on operational energy rather than design energy. | n/a | n/a | n/a |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| | | | | **FM and M&E Breakout Session** | | | |
| 5-31 | Info | n/a | n/a | FM: Options were presented relative to relocation of identified facilities from the Laboratories area to the main hospital building, but principally it was noted that potential cost and programme savings were in the labs were to be negated by equivalent additional costs in the main hospital build. | n/a | n/a | n/a |
| 5-32 | Action | Bidder | 07/07/09 | Bidder has identified an option to relocate the Hard FM workshops and associated offices from the Ground Floor of the Laboratories build, to the Ground Floor of the Energy Centre. Bidder to raise RFI requesting agreement in principle and also requesting areas which could move over. | Bidder | 13/07/09 | |
| 5-33 | Info | n/a | n/a | Asset Management Application:<br><br>Presentation on proposed web based application evidencing its holistic capabilities from design to operation. | n/a | n/a | n/a |
| 5-34 | Info | n/a | n/a | Breeam Variances:<br>- Innovation: Bidder anticipates one additional credit<br>- HEA1 Daylighting: Bidder not confident, at this stage of the design process of achieving required daylighting to 80% of floor area in the podium.<br>- Indoor Air Quality: Bidder proposes additional credit<br>- ENE1: Bidder to consider wards and podium as two separate areas.<br>- Bidder to assume that Biogas supply from Scottish Water will not be available at point of opening.<br>- Bidder principal concern is ability to deliver carbon Target.<br>- Currently investigating provision of off-site | n/a | n/a | n/a |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| | | | | renewables (wind turbine).<br>- small scale wind turbines to be installed on Energy Centre roof.<br>- Current assessments are based upon statutory requirements for Building Fabric U-values. SL/CA noted requirement to significantly exceed these statutory requirements.<br>Re-use of Land: to be reviewed upon receipt of Ecology survey.<br>ENE15: Bidder to assume zero score at this time. Board will endeavour to procure appropriate equipment but cannot guarantee full compliance at this point., | | | |
| 5-35 | Action | Board | 07/07/09 | SL to update Breeam boundaries upon receipt of Ecology Report | Board | 24/07/09 | |
| 5-36 | Action | Bidder | 07/07/09 | HMcD confirmed that the Ecology Survey has been completed and the report will be made available via upload to BIW. | Board | w/c 20/07/09 | |
| 5-37 | Action | Bidder | 07/07/09 | Bidder to raise an RFI re Thermal Modelling | Bidder | 17/07/09 | |
| 5-38 | Info | n/a | n/a | Active chilled beams are proposed for ward areas.<br><br>Option to utilise ground water for cooling is still under consideration. | n/a | n/a | n/a |
| 5-39 | Info | n/a | n/a | Business Stream Solutions report on water extraction is due by end July and will be uploaded to BIW. This will include yields. | n/a | n/a | n/a |
| 5-40 | Info | n/a | n/a | Drawings identifying distribution principles were passed to WW for perusal. | n/a | n/a | n/a |
| 5-41 | Info | n/a | n/a | Bidder confirmed proposal to mechanically ventilate sub-stations to reduce standing losses by keeping transformers cool. | n/a | n/a | n/a |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 5-42 | Info | n/a | n/a | MTHW to retained estate: propose to be direct to retained estate rather than via new build. | n/a | n/a | n/a |
| 5-43 | Action | Bidder | 07/07/09 | Bidder proposes that services will be via ducts to new build rather than via tunnel. Board to comment. | Board | w/c 20/07/09 | |
| 5-44 | Info | n/a | n/a | Bidder proposes to locate water storage in main hospital build rather than in Energy Centre. | n/a | n/a | n/a |
| 5-45 | Info | n/a | n/a | Bidder proposal: Wards: Top 3 floors to be sealed due to helicopter down-draught. | n/a | n/a | n/a |

**UPDATE ON THE ISOLATION ROOMS FOR THE NEW SOUTH GLASGOW (ADULT) HOSPITAL**

The following indicates the isolation rooms required for the New Adult Hospital.

**Haemato-Oncology Ward**

Sealed ward with hepa filtration positive to the rest of the hospital and all highly filtered air to H13 i.e. 99.95%

(NB - requires a negatively pressurised Treatment Room within the Haemato-Oncology Unit for administration of pentamidine inhalations.)

**Respiratory Wards (serving rest of medical)**

3 negatively pressurised sealed rooms (without ante rooms) - located together

**Renal inpatient wards**

2 positively pressurised sealed rooms with negatively pressurised ante-room/s – located within the 20 bedded higher acuity ward

**A&E (Emergency Department)**

2 negatively pressurised sealed rooms (without ante-rooms) - location as described within the Clinical Output Specification

**Critical Care (includes ICU/Surgical and Medical HDU)**

10 negatively pressurised sealed rooms with ante-rooms – location as described within the Clinical Output Specification

All in accordance with SHPN4 and SHTM 03-01

**Maximum Temperature Variant.**

The mandatory variant bid was partially removed from the ER's and the references have been highlighted under separate cover.

The Variant bid allowed the Board to take a decision on maximum temperature prior to contractor appointment based on fully costed schemes.

This has been discussed at length with Currie and Brown, we believe that uncontrolled removal has increased the risk that the bidders will not provide an environmental scheme with sufficient flexibility to allow for future requirements and will increase pressure on bidders to provide lowest construction cost solutions.

We have been advised that thermal comfort is still a high priority of the Board, late removal of the maximum temperature variant bid appears to have signaled some of the bidders to reduce the importance of avoidance of overheating.

We suggest that this issue is clarified and guidance given to avoid difficulties comparing unlike schemes and possible reduction in cost control created by amendments to the bidders proposals after Contractor appointment.

At this stage we suggest that the bidders are reminded of the importance of thermal comfort and the avoidance of over heating, this could be achieved by issuing a response in the Technical Query process in line with the attached or similar wording.

We recommend that this is circulated and considered by all parties with agreement reached prior to issue to the bidders.

***Removal of Mandatory Maximum Temperature Variant.***

*The maximum temperature variant has been removed from the bid requirements, the bidders shall put forward schemes to ensure thermal comfort and avoid overheating.*

*Sustainability has a major input into the project and all solutions must seek to minimize $C0_2$ and energy usage, however this must not be at the expense of thermal comfort and avoidance of over heating.*

For design purposes the level of thermal comfort shall be:
Room temperatures should not go below 18 $^{o}$C in winter for longer than 2 hours at a time, or higher than 26$^{o}$C in summer for more that 50 hours in total, but not on successive days.

*Feasibility studies are to be carried out into the potential use of low and zero carbon technologies to reduce carbon emissions associated with the operation of the building.*

*The bidder's attention is drawn to the Employers Requirements and in particular the following sections:*

***Appendix M&E3***
***Paragraph (Extracts)***

*2.4.3 Chilled Beams*

*The use of active chilled beams should be considered within all ward areas.*

*Active chilled beams will provide tempered, filtered air together with heating and comfort cooling of the space; thus providing effective local control of the environmental conditions.*

*2.4.4 Thermal Comfort*

*High levels of comfort are required for all users; in particular staff and patients.*

*Openable windows can be used as part of the ventilation strategy, and it is necessary to ensure that other, often contradictory requirements such as restricting openings for safety reasons, are met.*

*In perimeter spaces where mechanical ventilation is provided for functional reasons a mixed mode approach is a possible solution.*

*2.4.5 General Chilled Water*

*Sustainable cooling shall be used were possible with conventional chilling (with free cooling coils) used as required as a top up and to provide system*

*resilience, all lower carbon means of supplying cooling such as bore holes, piling systems and absorption chilling must be fully investigated and chosen if there is a carbon advantage over conventional cooling.*

*Chillers shall be selected to operate at design duty with an external ambient temperature of 30$^{o}$C dry bulb.*

*Chillers to have variable speed head pressure control with load and efficiency optimized head pressure and chilled water flow temperature control to improve seasonal efficiency.*

*3.1 External Design Temperatures*

| | | |
|---|---|---|
| *Summer* | *26.2°C DB* | *18.5°C WB* |
| *Winter* | *- 6°C* | |

*Global warming potential shall be considered and the Contractor shall provide suggestions for dealing with this under the innovation section of the tender return documents.*

***Appendix M&E2***
***Paragraph (Extracts)***

2.3 Cooling Load

The Cooling requirement shall be developed by the Contractor for the ~~standard and max temp mandatory variant~~ bid~~s~~, all cooling shall be provided by the most efficient method including, absorption chillers, free cooling etc.

5.0 25% uplift for power to main hospitals.

***Section 8***
***Paragraphs***

8.1.7 Thermal Comfort – (full contents)

8.1.8 Air Quality – (full contents)

8.2.11.3 The need to maintain the specified comfort conditions in all areas but particularly in clinical areas is of paramount importance and the Contractor shall develop strategies for achieving the specified environmental conditions with minimum energy consumption.

8.2.11.5 It is essential that the Contractor designs and provides ventilation and air conditioning systems which will ensure occupants comfort. This shall be achieved by use of well tested design principals and suitable plant selection. Air flow problems must be avoided by accurate system balancing, correct selection and location of air diffusers to prevent high air velocities and stratification together with adequate air volumes and accurate temperature control.

8.2.11.8 Air changes shall be in accordance with CIBSE guides, SHTM's, HTM's and Building Regulations.

8.2.11.10 Ensure heat gain from all Equipment and personnel is allowed for in sizing and selection of the systems.

8.1.25 In accordance with Good Industry Practice, all plant, plant spaces and building services systems shall be specifically designed and provided with defined reserve capacity allowances and future expansion capabilities for the Facilities (e.g. distribution boards with 25% spare capacity, 25% additional containment, 25% spare capacity in distribution Pipework, 25% additional plant capacity, 25% additional cooling capacity, 25% additional air handling capacity etc. for the buildings as designed).

**New South Glasgow Hospitals Project**
**Bid Submission Clarifications**
**Bidder: 1 (Brookfield)**
**Technical Clarification: 1 (issued 23 September 2009)**

**PRIVATE & CONFIDENTIAL**

| Item | Topic/Bid Reference | Board Clarification | Bidder Response |
|---|---|---|---|
| | | | |
| **General** | | | |
| | | | |
| **Logistics** | | | |
| | Site Parking | You have options but no firm plans for site parking, please confirm that the provision for site parking (incl any delivery area/holding area/lay-down areas off site) for all phases are included in your priced bid. | |
| | Delivery Team | Several of your proposed delivery team appear to have commitments to another healthcare scheme (i.e. Peterborough). Please confirm how your delivery team will be deployed in line with the NSGH timescales and your programme requirements. | |
| **Design/HP** | | | |
| | Entrances | Confirm your proposals for significant entrances to the site per ER requirement in this regard. | |
| | Specification | Confirm your proposals for electronic information points per ER requirement (7.15.4) in this regard. | |
| | Interstitial Blinds | Confirm your strategy for interstitial blinds to external windows/façade and internal observation screens (this to include a cross-section detail of your proposal(s)). | |
| **M&E Services** | | | |
| | | | |

| Renewables/Sustainability/BREEAM | | | |
|---|---|---|---|
| | Carbon | You noted at the presentation of 21 September you're your variant 2 for Laboratories will achieve the 80Kg CO2m2 – can you confirm that your compliant bid achieves this target also. | |
| | BREEAM | Clarify BREEAM Ene 1 score – 8 and 11 referred to in different sections. | |
| | Renewables | Confirm which LZC and renewables are included in the bid. | |
| | Energy Model | Confirm that the energy model is fully compatible with the servicing strategies set out in volume 3 in particular the use of a sealed building with chilled beams. | |
| | Energy Monitoring | Confirm that the energy monitoring system illustrated is included in the bid. | |
| | Energy Management | Has active energy management been included for by BE post construction as per clarification? | |

**New South Glasgow Hospitals Project**
**Bid Submission Clarifications**
**Bidder: 1 (Brookfield)**
**Technical Clarification: 2 (issued 30 September 2009 – return by 5pm Monday 05 October 2009)**

**PRIVATE & CONFIDENTIAL**

| Item | Topic/Bid Reference | Board Clarification | Bidder Response |
|---|---|---|---|
| - | - | - | - |
| **General** | | | |
| 1.0 | Bid Return Section 5 – Component / Product & Manufacturer Schedule | Noted that M&E related items do not appear in Section 5.<br><br>Clarification required of M&E component/product and manufacturers as well as (for all elements) that listed names will be utilised or "equal and approved" component/product manufacturers. | |
| 2.0 | Bid Return Section 7 – SHTM Compliance | **Mandatory Section** – clarification is required with regard to the following items:<br><br>**SHTM85 and SHTM86** – these are relevant as the design joins the existing hospitals, what are the proposals to comply in this regard.<br><br>**Health and Safety Action Notices (HSANs)** – require to confirm will comply with rather than "with reference to".<br><br>**NHSE10 and SN(01)01** – confirmation that anti-ligature is included in A&E as well as DFCP.<br><br>**NHSE HN04** – confirmation that anti-ligature is included in A&E as well as DFCP.<br><br>**SFPN3** – clarification required of how compliance with updated document will be achieved/documented.<br><br>**SHTM2010** – confirmation required that design will comply with rather than "with reference to". | |

| | | | |
|---|---|---|---|
| | | **SHTM2003** – notes that the services follow the principles set down in the HTM – clarification of compliance with the SHTM required (and specifically compliance with the services dimensions to be provided).<br><br>**SHTM2024 Part 4** – confirmation required that original maintenance provisions are included and priced in the bid. | |
| 3.0 | Bid Return Section 7 – SHTM Compliance | Where no specific options have been listed in your bid return (ref ERs 5.2.3) clarify that all options remain available to the Board with no additional costs to the Board. | |
| **Logistics** | | | |
| - | - | No items in this TC. | |
| **Design/HP** | | | |
| 4.0 | H+S Landscape | Courtyards – clarify what is intended by white gravel? | |
| 5.0 | H+S Landscape | Aside from the separately identified therapy courtyards is there any access or intended function for the remaining courtyards indicated? | |
| 6.0 | H+S Landscape | External Works Layout Dwg No. CD-WS-00-PL-711-01 indicates concrete blocks to the front of the hospital. The masterplan Dwg No. GIL-WS-00-PL-100 indicates exposed aggregate concrete paving. The Outline Specification for roads, car parks, pavements and cycle paths suggests paving in these areas will be natural stone granite. Can we clarify actual proposals for these areas? | |
| 7.0 | H+S Landscape | The drawings indicate a limited number of bike shelter locations (2No.)? Is this correct or are other bike shelter locations intended? | |
| **M&E Services** | | | |
| 8.0 | M&E Services | Please indicate any deviations from M&E elements of the ER's. | |
| 9.0 | M&E Services | Please confirm that racks will be provided for Client's active equipment. | |

| | | | |
|---|---|---|---|
| 10.0 | M&E Services | Please confirm that BMS IP network will be fully stand alone and that all active equipment has been included. | |
| 11.0 | M&E Services | Please confirm that asset tagging system has been included and that all services equipment shall be tagged. | |
| 12.0 | M&E Services | What function does scaffolding platform have in plant replacement strategy for transformers and generators. | |
| 13.0 | M&E Services | Confirm that reference to BOC should be “Air Products”. | |
| 14.0 | M&E Services | Please provide luminaire details to supplement pictorial views | |
| 15.0 | M&E Services | Please confirm light switches will be selected to suit lighting control system. | |
| 16.0 | M&E Services | Please confirm that bedside adjustable luminaires will be a modern low energy high output units. | |
| 17.0 | M&E Services | Please confirm fire alarm PC includes incident location graphics. | |
| 18.0 | M&E Services | Please confirm that 4 CHP units have been proposed as the narrative (schedule indicates 3). | |
| 19.0 | M&E Services | Television outlets on equipment schedule (are these back up for the CAT6A for digital distribution via the patient entertainment system? | |
| 20.0 | M&E Services | Please provide details on the proposed patient entertainment systems. | |
| 21.0 | M&E Services | Please advise how Renal & Specialist Departments water temperature requirements will be achieved. | |
| 22.0 | M&E Services | Confirm reference to 5A Switches equipment schedule should be 20A. | |
| 23.0 | M&E Services | Please confirm that metering will be provided to meet BREEAM requirements. | |

| | | | |
|---|---|---|---|
| 24.0 | M&E Services | Please advise proposals for water spillage protection from fan coils in secondary comms room. | |
| 25.0 | M&E Services | Please confirm compliance with maintainability and area isolation requirements. | |
| 26.0 | M&E Services | Please confirm that the renal Central Concentrate Delivery system is included (adult hospital). | |
| 27.0 | M&E Services | Please confirm that all services comply with HAI – SCRIBE. | |
| 28.0 | M&E Services | Please confirm that all plant and equipment will be suitably isolated to prevent transmission of noise and vibration. | |
| 29.0 | M&E Services | Please confirm that full environmental proving off all rooms will be provided. | |
| 30.0 | M&E Services | Please confirm that all metering requirements will be provided in accordance with the ER's and BREEAM requirements. | |
| 31.0 | M&E Services | Please confirm that all services elements are included to meet the fire engineering solution, e.g. stair pressurisation, smoke control etc. | |
| 32.0 | M&E Services | Please confirm that ICT cooling has been included and provide details. | |
| 33.0 | M&E Services | Please confirm that specialist drainage has been included. | |
| 34.0 | M&E Services | Please confirm that leak detection has been included. | |
| 35.0 | M&E Services | Please indicate percentage capacity of all water service pipework mains from the energy centre to the main buildings for resilience. | |
| **Renewables/Sustainability/BREEAM** | | | |

between

**BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S1JB ("the *Employer*"); and

**NIGHTINGALE ARCHITECTS LIMITED** (Company No. 04440612) having its Registered Office at 87-91 Newman Street, London W1T3EY (the "*Consultant*").

WHEREAS: -

The *Employer* has been appointed to carry out the design and construction of the New South Glasgow Hospital ("the Project") and wishes to have the *Consultant* Provide the *services* in connection with the same as follows: -

| Stage | Heading | Outline Activities |
|---|---|---|
| Stage 1 | Design and Construct Laboratories | Detailed design and construction of the Laboratories and FM Hub. Concurrent with Stage 2. |
| Stage 2 | Design Development - New Hospitals Building | Detailed design of New Adult Acute and New Children's Hospitals to Full Business Case Submission. Concurrent with Stage 1. |
| Stage 3 | Final Design of the New Hospitals Building | Final design of New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of |

| Stage | Heading | Outline Activities |
|---|---|---|
| | | soft landscaping. |

**NOW IT IS AGREED THAT**

1. The *Consultant* will Provide the Services in accordance with the NEC Professional Services Contract, Option A: Priced Contract with activity schedule June 2005 (as the same are amended by the Contract Data) ("*the conditions of contract*") and the principles stated in Appendix 1 of this Agreement.

2. The *Employer* will pay the *Consultant* in accordance with Section 5 of the *conditions of contract.*

3. The *Consultant* acknowledges and agrees that as at the Contract Date the Consultant shall be authorised to proceed with the *services* in connection with Stages 1 and 2 only. The *Consultant* is authorised to commence and proceed with Stages 3 and 3A upon written authorisation given by the *Employer* in the form attached as Appendix 2 hereto. In the event that the *Consultant* undertakes any work in connection with Stages 3 and 3A without such written authority from the *Employer*, the *Consultant* does so at his own cost and risk.

6. The documents forming part of this contract are:

   6.1 this Agreement

   6.2 the *conditions of contract*,

   6.3 Contract Data part one — data provided by the *Employer*

   6.4 Contract Data part two - Data provided by the *Consultant*

7. In the event of conflict between the documents forming part of this contract the following order of priority will apply:-

   7.1 This Agreement (excluding Appendix 1)

   7.2 The *conditions of contract*,

   7.3 Contract Data Part One (including the Scope).

   7.4 Contract Data Part Two

   7.5 Appendix 1 of this Agreement

IN WITNESS WHEREOF these presents consisting of this and the 2 preceding pages together with Appendices 1 and 2 and the Contract Data part one (including its Appendices) and Contract Data part two are executed as follows: -

**This is Appendix 1 to the foregoing Agreement between Brookfield Construction (UK) Limited**

**and**

**Nightingale Architects Limited**

**Principles governing the Agreement**

**Definitions**

| **Defined Term** | **Definition** |
|---|---|
| "Building Contract" | means the contract between or to be entered into between the Employer and Greater Glasgow and Clyde Health Board in relation to the design and construction of the New South Glasgow Hospital. |
| "Overriding Objective" | means the objective set out in Paragraph 4. |
| "Overriding Principle" | means principle set out in Paragraph 1. |
| "Professional Advisor" | means any party providing specialist advice to the *Employer*. |

1. The Overriding Principle of this Agreement is to work together with the *Employer* and its Professional Advisers in a co-operative and collaborative manner to achieve the Overriding Objective acting in good faith and in the spirit of mutual trust and respect.
2. In order to work together in co-operative and collaborative manner the *Employer* and the *Consultant* agree that they should each give to and welcome from each other, and any Professional Adviser, feedback on performance and shall share information openly and highlight any difficulties at the earliest practical time. The parties shall support collaborative behaviour and confront behaviour that does not comply with the Overriding Principle.
3. The terms of the Agreement shall be interpreted according to their natural meaning but in the event of any ambiguity in their natural meaning they shall be interpreted so as to give best effect to the Overriding Principle.
4. In entering into the Agreement the parties' Overriding Objective is by working together in accordance with the terms of the Agreement to achieve the successful delivery by the *Consultant* of the *services*: -

4.1 to the standard and functionality defined or as reasonably inferred from the Client's requirements set out in the Building Contract to a quality which meets or exceeds these requirements;

4.2 at a cost that offers best value for money taking into account whole life (as well as capital) costs over the proposed design life of the *works* through the application of the principles of value engineering; and

4.3 to the timescale acceptable to the *Employer* and agreed between the parties without compromising health and safety or the *Employer*'s required standards and the quality of the completed *works* and in any event before the Completion Dates set out in the Building Contract.

5. The *Consultant* shall carry out the management and be responsible for the delivery of the *services* in accordance with the Agreement and shall work and liaise with the *Employer* and any of its Professional Advisers as necessary or appropriate or as requested by the *Employer* in order to achieve the Overriding Objective.

6. The *Consultant* shall engage persons from the key people set out in the Contract Data — Part two in the performance of the *services* to be provided by the *Consultant* under the Agreement and shall not replace any of the key people without the approval of the *Employer* (such approval not to be unreasonably withheld). The *Consultant* will ensure that where a member of its key personnel is replaced that they have the skills, qualifications, experience and ability to provide the best service to the *Employer*.

7. Throughout the period of the Agreement the performance of the *Consultant* shall in relation to the *services* be monitored against the Key Performance Indicators defined in the Scope and/or the Contract Data and/or the Contract Data to the Building Contract.

8. During the period of the Agreement amendments may be made to the Key Performance Indicators by agreement between the *Employer* and the *Consultant* except where the Client is required by the Scottish Government or regulatory bodies to provide Key Performance Indicators. In such cases the *Employer* will provide information on any requirements to the *Consultant* as soon as reasonably practicable.

9. At 2 monthly intervals or at such other intervals as the parties may agree during the performance of the Agreement, the *Employer* and the *Consultant* shall undertake formal reviews of the performance of the *Consultant* against its Key Performance Indicators. The *Employer* and the *Consultant* will discuss any way in which the performance of the *Consultant* may be improved.

10. The *Consultant* shall keep a comprehensive record as specified by the *Employer* of all performance monitoring carried out under the Agreement in such form as the *Employer* may reasonably request for a period of 6 years after the expiry or earlier termination of this

Agreement and shall provide copies of such records to the *Employer* for the *services* to enable him to record, disseminate and compare the performance of the *Consultant*. Each record shall be retained in a format that can be read and copied and kept with the IT requirements on an electronic based database.

11. The *Consultant* shall throughout the period of the Agreement look for and seek to achieve continuous improvement in the quality of the *services* while reducing whole life costs, wastage (in accordance with WRAP guidance), and the time taken to deliver the *services*. Innovation and best practice will be shared with the *Employer*.

12. To achieve the aim set out in Clause 11 the *Consultant* shall actively participate in the continuous improvement "learning sets" with the Employer in relation to the Agreement. This commitment is likely to involve meetings at least once every 3 months in relation to the *services* and meetings at least once every 6 months in relation to the lessons to be learned. The *Consultant* shall also use reasonable endeavours to procure the involvement of any of its subconsultants in such learning sets where considered appropriate.

**This is Appendix 2 to the foregoing Agreement between Brookfield Construction (UK) Limited**

**and**

**Nightingale Architects Limited**

**BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S1JB ("the *Employer*"); and

**NIGHTINGALE ARCHITECTS LIMITED** (Company No. 04440612) having its Registered Office at 87-91 Newman Street, London W1T3EY (the "*Consultant*").

WHEREAS

1. The *Employer* and the *Consultant* entered into the Agreement dated [ ] whereby the *Consultant* is to Provide the Services in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Consultant* to continue to Provide the Services by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3 | Final design of the New Hospitals Building | Final design of the New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of soft landscaping. |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Consultant* to commence and carry out Stages 3 and 3A of the *services* ie the Final design of the New Adult Acute and New Children's Hospitals and New Children's Hospitals and *services* in connection with the demolition of the surgical block and associated buildings.
2. The *Consultant* will continue to Provide the Services in accordance with the Agreement.
3. The Agreement is amended and modified to the following extent:-

[*Any amendments to the Scope and/or Contract Data which will have come about during Stage 2*]

**CONTRACT DATA PART ONE —**

**DATA PROVIDED BY *THE EMPLOYER***

**Contract Data Part one - Data provided by the *Employer***

**1. General**

- The *conditions of contract* are the core clauses for main Option A, dispute resolution Option W2 and Secondary Options — X2, X5, X8, X18.3, Y(UK)2 and Z of the NEC3 Engineering and Construction Contract (June 2005).
- The services are management and delivery of design services for the New South Glasgow Hospital Project as the *services* are more specifically referred to in the Scope.
- The *Employer* is

  Name: Brookfield Construction (UK) Limited

  Address: 23 Hanover Square, London, United Kingdom W1S1JB
- The *Adjudicator* is: to be nominated by the Nominating Body
- The *Services* are: set out in Schedule 2.
- The Scope is in: Schedule 2.
- The *language* of the contract is English.
- The *law of the contract* is the law of Scotland subject to the jurisdiction of the Courts of Scotland.
- The *period for reply* to a communication is
  - to *Consultant's* submission of particulars of design for acceptance - Four (4) weeks
  - Reply to all other communications unless otherwise stated in this contract three (3) weeks
- The *Adjudicator* nominating body is:

  The Scottish Branch of the Royal Institute of Chartered Surveyors
- The *tribunal* is the Scottish Courts

2. **The Parties' main responsibilities:**

Not used

**3. Time**

- The *starting date* is 18 December 2009

- The Consultant submits revised programmes at intervals no longer than three (3) weeks.

**4. Quality**

- The quality policy statement and quality plan are provided within 3 weeks of the Contract Date.
- The *defects date* is 104 Weeks after Completion of the *services*.

**5. Payment**

- The *assessment interval* is four (4) weeks alternatively calendar monthly in accordance with the Cashflow set out in Contract Data Part Two.
- The *currency of this contract* is the pound sterling (£)
- The interest rate is 5% per annum

**8. Indemnity, insurance and liability**

The minimum limit of indemnity for insurance in respect of loss of or damage to property (except the works, Plant and Materials and Equipment) and liability for bodily injury to or death of a person (not an employee of the Consultant) caused by activity in connection with this contract for any one event is

**£10,000,000.00 (ten million pounds sterling)**

The minimum limit of indemnity for insurance in respect of death or bodily injury to employees of the *Consultant* arising out of and in the course of their employment in connection with this contract for any one event is

**£10,000,000.00 (ten million pounds sterling)**

The amount of the minimum limit of indemnity for Professional Indemnity Insurance for design liability in connection with this contract is **£10,000,000 (ten million pounds sterling)** for each and every claim plus **US$32,000,000** for each and every claim and in the annual aggregate in excess coverage for a period from the date of commencement of the *services* until the date which is twelve years after Completion of the whole of the *services*.

Consultant to provide documentary evidence to which insurance option is being provided

The *Consultant* provides all other insurances required by the *law of the contract*

**Optional Statements**

**If the Employer has decided the completion date for the whole of the *works***

The *completion date* for the whole of the *services* is 19th July 2016

**If no programme is identified in part two of the Contract Data**

The Consultant is to comply with the programme contained in Schedule 2 Part Three as amended from time to time.

**If the Employer has identified work which is to meet a stated *condition* by a *key date***

The *key dates* and *conditions* to be met are

| **Condition to be met** | **key date** |
|---|---|
| Stage 2: Completion of Detailed design to allow FBC to be submitted to Scottish Government by 8 November 2010. | 31 October 2010 |

**If Option A is used**

- The *Consultant* prepares forecasts of the total *expenses* at intervals no longer than 4 weeks.

**If Option X5 is used**

- The *completion date* for each *section* of the *services* is

| Section | Description | *completion date* |
|---|---|---|
| 1 – Stage 1 | Laboratories | 10 March 2012 |
| 2 - Stage 2 | Design of Adult and Childrens for FBC | 8 Nov 2010 |
| 3 - Stage 3 | New Hospital | 31st January 2015 |
| 4 – Stage 3A | Demolition of surgical block | 19 July 2016 |

**If Option X8 is used**

- The *collateral warranty agreements* are:

| Agreement reference | Third Party |
|---|---|
| Form as set out in Schedule 1 | Greater Glasgow Health Board |

Others as required by the Client and requested by the *Employer*

**If Option X18 is used**

The *end of liability date* is twelve (12) years after the Completion of the whole of the *services.*

**If Option Z is used**

*The additional conditions of contract are*

**Amendments and additions to existing Clauses:**

**Z 1 Additions to Clause 11.2 - Identified and Defined Terms**

11.2(14) "Agreement" is the form of agreement entered into between the *Employer* and the *Consultant* in respect of the services forming part of this contract

11.2(15) "the Client" is the Greater Glasgow Health Board.

11.2(16) "Full Business Case" is the Client's submission to the Scottish Government for approval to proceed with Stage 3.

11.2(17) "Laboratories" is the new laboratory block as the same is more particularly described in the Scope.

11.2(18) "Stage" has the meaning ascribed to it in the recital to the Agreement.

11.2(19) "*conditions of contract*" is the NEC Professional Services Contract, Option A: Priced contract with activity schedules, June 2005 (as the same are amended in by the Contract Data.

11.2(20) "Design Deliverables" are those elements of design to be delivered by the *Consultant* to the *Employer* during Stage 2 as set out in Schedule 3.

11.2(21) "Documents" includes, without limitation, all technical information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things provided or to be provided by or on behalf of the *Consultant* in connection with the *services*.

**Z2 Amendment to clause 11.2 (4) - Identified and Defined Terms**

Delete and replace with "the Contract Date is the date of execution of this contract"

**Z3 Amendment to Clause 16.1 – Ambiguities and inconsistencies**

Add the following sentence to the end of Clause 16.1

"Instructions issued under this clause do not necessarily give rise to a compensation event"

**Z4 Addition to Clause 16 – Ambiguities and inconsistencies**

"16.2 Inconsistencies and ambiguities between (a) the NHS Mandatory Documentation and NHS Guidance Documentation and building control or (b) between the NHS Mandatory Documentation and NHS Guidance Documentation and the Schedules of Accommodation or (c) between the NHS Mandatory Documentation and NHS Guidance Documentation and any information issued to the Consultant by the Employer, are to be dealt with in accordance with the procedures set out in the Scope."

**Z5 Amendment to Clause 18 – Prevention**

Add new Clause 18.2

"Notwithstanding the provisions of Clause 60 and subject to Clause 18.4, the *Consultant*'s sole right to payment in respect of the occurrence of an event under Clause 18.1 is as provided in Clause 92."

Add new Clause 18.3

"The *Consultant* and the *Employer* take all reasonable steps to mitigate the effect of the occurrence of an event under Clause 18.1."

Add new Clause 18.4

"If the *Employer* instructs the *Consultant* to take steps to Provide the Services in a manner not prevented by the occurrence of an event under Clause 18.1, and such instruction changes the Scope, the *Consultant* is entitled to notify a compensation event under clause 60."

**Z6 Amendment to Clause 21.2 - The *Consultant's* design**

Delete and replace with: "The *Consultant's* obligation is to perform the *services* using the degree of skill and care that would reasonably be expected of a competent professional designer experienced in carrying out design activities of a similar nature, scope and complexity to those comprised in the *services*.

**Z7 Addition to Clause 31 – The programme**

"31.4 The *Consultant* complies with section 6.8 of Volume 2/1 of the Employers Requirements Section of the Works Information in the Building Contract in connection with commissioning and handover for the whole of the *works*. "

**Z 8 Addition to Clause 51 - Payment**

51.6 If the amount to be paid at an assessment date exceeds the amount for the assessment interval as shown in the *Consultant*'s cash flow forecast (as set out in the Activity Schedule), then the *Employer* certifies payment up to the amount forecast. Any amount exceeding the forecast is not certified but held over to the next assessment interval, where if amount to be paid at the next assessment date again exceeds the *Consultant*'s cash flow forecast for the assessment interval the process is repeated. This clause does not apply where the *Consultant* provides a valid and acceptable reason for an exception to the limitation of the *Employer's* assessment certification.

**Z9 Amendment to Clause 60.1(11)**

Add new bullet point 6, "does not arise from a sub-consultant ceasing to trade or becoming insolvent (or other equivalent event)"

Add at the end, "provided that the occurrence of such event only entitles the Consultant to a change to the Completion Date or a change to a Key Date and not to a change in the Prices and Clauses 61 – 65 are interpreted accordingly."

**Z10 Amendment to Clause 61.4 - Notifying of Compensation events**

In line 15 delete "two" and substitute "four"

**Z11 Amendment to Clause 70 – the Parties' use of material**

Delete and replace with: -

"70.1 The copyright and all intellectual property rights in the Documents remain vested in the *Consultant* or the person responsible for the production (as the case may be).

70.2 Where documentation (including drawings) is (or are) provided by the *Employer* copyright and such documentation and drawings remain vested in the *Employer*.

70.3 The *Employer* has an irrevocable, non-exclusive royalty free licence to copy and use the Documents and to reproduce the designs contained in them for

any purpose relating to the *works* including (but without limitation) the construction, completion, maintenance, promotion, advertisement, reinstatement, repair, any extension of the *works* and for dissemination within the NHS as part of the feedback of information to better or enable the NHS to realise improvements in its methods and practice of construction and in the design and procurement of its construction.

70.4 The *Consultant* shall not be liable for any use of the *Employer* of the Documents for any purpose other than that for which the same is prepared and provided."

**Z12 Addition to Clause 81.1 – Insurance cover**

Add to the Insurance Table:

| | |
|---|---|
| Liability for negligent management or design – professional indemnity insurance | The amount specified in the Contract Data for any one claim or series of claims arising out of one single incident during any period of insurance which shall not be more than 12 months from the date the *Consultant* starts to Provide the Services for a period of twelve years from Completion of the whole of the *services*, with insurers of good repute carrying on business in the European Union provided always that such insurance is available at rates and terms which are commercially reasonable to Consultants of a similar size and standing in the UK In determining whether or not insurance is available as aforesaid, the financial characteristics and claims' record of the Consultant shall be ignored. |

**Z13 Amendment to Clause 82.1**

Delete and replace with "Notwithstanding any other term of this contract the total aggregate liability of the *Consultant* to the *Employer* under, arising out of or in connection with this contract , whether in contract (either claims under the contract or for breach of the contract ), tort (including negligence), liquidated and ascertained damages or otherwise, shall be limited to an amount equal to £10 million save where the *Consultant* is able to take the benefit of additional insurance cover as required by Contract Data Part One clause 8. Where the *Consultant* is able to take the benefit of cover as required by Contract Data Part One clause 8 the *Consultant*'s cap on liability shall be limited to the aggregate of that cover and the £10m cover provided for in Contract Data Part One clause 8. This Clause 82.1 shall not apply to any liability for or in respect of personal injury or death".

**Z14 Amendment to Clause 90.4 – Reasons for Termination**

Add at the end "notwithstanding that a delay to the Completion Date has previously been notified to the *Consultant* in respect of such event"

**Z15 Addition to Clause 90**

90.5 The *Employer* may terminate the *Consultant's* obligations to Provide the Services for Stage 3 and 3A either (i) upon termination of the Building Contract or (ii) if the Full Business Case is not approved by the Scottish Government.

**Z16 Addition to 91 - Procedures on termination**

"91.2 The *Consultant* hands over to the *Employer* all hard copy and electronic data for the *Consultant*'s design including material prepared by a sub-consultant, so far as prepared at termination. At such termination the *Employer* has the right to use such material for completion of the *services*.

**Z17 Amendment to Clause 92 - Payment on Termination**

92.3 : - "On termination the *Employer* shall not be liable to the *Consultant* for loss of profit, loss of expectation of profit, loss of use, loss of production or indirect and consequential damages."

**Z18 Addition to Clause W2.1(1) – Dispute Resolution**

Add at the end: - "The word "dispute" in this Clause W2 includes any difference under or in connection with this contract".

**Z19 Addition to Clause W2.3(8) – the adjudication**

After "reasons" add the words, "(which will be in writing)"

**Z20 Addition to Clause W2.3(11) – The adjudication**

Delete the first sentence and replace with, "The decision of the *Adjudicator* is binding until the dispute is finally determined by the *tribunal* or by agreement."

**Z21 Amendment to Clause X8 – Collateral Warranty Agreements**

Add at the end: "and provides them to the *Employer* within 5 days of the *Employer*'s written request".

**Z22 New Clause - Confidentiality**

Z22.1 The *Consultant* shall not append their name or give authority to the appending of their name to any publicity concerning this agreement or the services or indulge in any publicity concerning the services without the prior written consent of the *Employer*.

Z22.2 The *Consultant* shall immediately notify the *Employer* in writing regarding any matter that has arisen which may materially adversely affect the *Consultant's* ability to perform the *services*.

Z22.3 The *Consultant* undertakes to treat any information derived from or obtained in the course of the Agreement as confidential and to take all the necessary precautions to ensure that its employees and sub-consultants and their employees treat any information as confidential and in doing so the *Consultant* shall reasonably ensure that its employees and sub-consultants and their employees keep secret and do not disclose information of a confidential nature by him or them by reason of the Agreement. The *Consultant* shall be entitled to disclose such information as required by law or where it is already within the public domain.

**Z23 New Clause – Data Protection**

Z23.1 The *Consultant* warrants and will at all times comply with the provisions of the Data Protection Act 1998 ("the 1998 Act") and any other subordinate legislation enacted pursuant thereto.

Z23.2 The *Consultant* shall only undertake such processing of personal data as is reasonably required in connection with the performance of its obligations under pursuant to the Agreement. To the extent required by the 1998 Act

the *Consultant* shall notify the Information Commissioner of any processing which is being carried out and maintain any such notification in full force and effect.

Z23.3 The *Consultant* in its role as Data Processor undertakes to comply with the obligations imposed on a Data Controller under the 7th Data Protection Principle as set out in Part 1 of Schedule 1 of the 1998 Act in respect of all personal data processed pursuant to this Contract.

Z23.4 The *Consultant* shall not, other than in accordance with the 1998 Act, transfer any personal data to any country or territory outside the European Economic Area.

Z23.5 Terms defined within the 1998 Act shall have the same meaning when used in this clause.

**Z24 New Clause – Failure to deliver Collateral Warranty Agreements**

When any Collateral Warranty Agreement is not delivered as required pursuant to Clause X8, one quarter of any amount due to the *Consultant* is retained in assessments of the amount due until the *Consultant* has delivered such Collateral Warranty Agreement to the *Employer*.

**Z25 New Clause – Third Parties**

The *Consultant* performs its obligations under this contract in such a manner and at such times that no act, omission or default of the *Consultant* in relation thereto constitutes, causes or contributes to any breach by the *Employer* of any third party agreement or any other obligation it may owe to a third party relating to the works or the Project, details of which the *Consultant* was made aware of prior to the Contract Date.

**Z26 New Clause - Inconsistencies**

In the case of any inconsistency between these *additional conditions of contract* and the other terms of the contract, the *additional conditions of contract* prevail. In the event of any inconsistency between the Core Clauses and any other term of this contract (except these *additional conditions of contract*) the Core Clauses prevail.

**Z27 New Clause – Approval**

No inspection, testing, approval or review nor any omission to inspect, test, approve or review on the part of the *Employer* diminishes any duty or liability under this contract of the *Consultant*.

**Z28 New Clause – Set off**

Without derogating from its rights under this contract or under the *law of the contract*, whenever any sum of money is recoverable by the *Employer* against the *Consultant*, such sum is deducted from any sum due or which may become due to the *Consultant* under this or any other contract with the *Employer*.

**Z29 New Clause – Security**

Z29.1 The *Consultant* acknowledges that the Site forms part of the larger Southern General Hospital site and that the Southern General Hospital is a live and functioning acute hospital. The Consultant takes measures to prevent its employees, sub-consultants and suppliers of the Consultant from entering into or otherwise interfering with the operation of the existing Southern General hospital, except for access to or egress from the Site.

Z29.2 The *Employer* may instruct the *Consultant* to take measures to prevent unauthorised persons being admitted on the Site.

Z29.3 The *Consultant* does not take photographs of the Site or the works or any part of them unless he has obtained the approval of the *Employer*.

Z29.4 The *Consultant* takes the measures needed to prevent his and his sub-consultants' people taking, publishing or otherwise circulating such photographs.

**Z30 New Clause – Retention**

In respect of each invoice issued by the *Consultant* pursuant to Clause 5 during Stage 2 the *Employer* shall be entitled to retain 10% of the amount due which shall be released on delivery of the Design Deliverables to the *Employer*. No amount shall be retained by the *Employer* following the completion of the *services* relating to Stage 2.

**SCHEDULE 1**

**FORM OF COLLATERAL WARRANTY AGREEMENT**

**CONSULTANT'S COLLATERAL WARRANTY**

This Agreement is among

(1) **GREATER GLASGOW HEALTH BOARD** of Dalian House, 350 St Vincent Street Glasgow, G3 8YZ ("the Beneficiary" which expression shall include its successors in title or permitted assignees under this Agreement)

(2) **BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S1JB (Registered number 3808946) ("Main Contractor" which term shall include any successor including any parties taking over the obligations of Main Contractor. under the Project Agreement)

(3) **NIGHTINGALE ARCHITECTS LIMITED** (Company No. 04440612) having its Registered Office at 87-91 Newman Street, London W1T3EY (the "*Consultant*")

WHEREAS:

A The Beneficiary has entered or is about to enter into an agreement with the Main Contractor (°the Building Contract") in connection with the design and construction of the New South Glasgow Hospital, Govan, Glasgow ("the Project").

B The Main Contractor has engaged or is about to engage the Consultant under an appointment ("the Appointment), which expression shall include all documents incorporated therein and any agreed amendment thereto, to carry out architectural design services as more particularly described in the Appointment ("the Services"), which expression shall include any additional services performed by the Consultant under the Appointment including in connection with any modifications or variations made thereunder.

C It is a condition precedent of the Building Contract that the Consultant, the Main Contractor and the Beneficiary enter into this agreement ("this Agreement").

NOW IT IS AGREED:

1. The Consultant warrants and undertakes to the Beneficiary that it has complied and will continue to comply with all the terms and obligations under the Appointment on the Consultant's part to be performed and observed and shall complete the Services in

accordance with the Appointment.

2. Without prejudice to Clause 1 of this Agreement, the Consultant further warrants and undertakes to the Beneficiary that:

2.1 it has exercised and will continue to exercise all the reasonable skill, care and diligence to be expected from a competent and qualified professional designer experienced in carrying out services similar in nature, size and complexity to the Services including in the selection of goods and materials for the Project; and

2.2 it has not and will not specify for use in relation to the Project any products or materials not in conformity with relevant British or European standards or Codes of Practice or which are at the time of specification generally known within the United Kingdom to an experienced professional designer of works such as the Project to be deleterious to health and safety or to the durability of buildings and/or other structures and/or finishes and/or plant and machinery in the particular circumstances in which they are used;

Provided that:

2.3.1 the obligations of the Consultant under this Agreement shall be no greater in extent or quantity than if the Beneficiary had been named as joint employer with Main Contractor under the Appointment; and

2.3.2 the Consultant shall be entitled in any action or proceedings brought by the Beneficiary to rely on any limitation in the Appointment and to raise the equivalent rights in defence of liability (excluding counterclaim and set-off in respect of amounts due to the Consultant under the Appointment) as it would have if the Beneficiary had been named as joint employer with the Main Contractor under the Appointment.

3 The Beneficiary has no authority to issue any direction or instruction to the Consultant in relation to the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5 below. The Beneficiary or its appointee has no liability to the Consultant in relation to

amounts due under the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5.

4 The Consultant agrees that it will, if so required by notice in writing given by the Beneficiary, subject to Clause 6, below, accept the instructions of the Beneficiary or its appointee, as the case may be, (which for the avoidance of doubt and without limitation may include a third party appointed by the Beneficiary to act as "the Employer" under this Appointment) to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of the Appointment. The Main Contractor acknowledges that the Consultant shall be entitled to rely on a notice given to the Consultant by the Beneficiary under this Clause 4 and further acknowledges that such acceptance of the instructions of the Beneficiary or its appointee, as the case may be, to the exclusion of the Main Contractor shall not constitute any breach of the Consultant's obligations to the Main Contractor under the Appointment.

5 The Consultant further agrees that it will not without first giving the Beneficiary not less than 35 days notice in writing exercise any right or purported right it may have to determine its employment tinder the Appointment, treat the same as having been repudiated by the Main Contractor, or discontinue the performance of any duties or obligations thereunder. Further, the Consultant shall within 14 days of giving the said notice, provide statements to the Beneficiary containing the following:

5.1 all amounts properly due and payable to the Consultant under the Appointment on or before the date of issue of the said notice which remain unpaid;

5.2 in the reasonable estimation of the Consultant, the amount of any monetary claim (it any) asserted by the Consultant against the Main Contractor under the Appointment arising out of or in connection with the breach for which the said notice was served; and

5.3 where the Consultant intends to terminate the Appointment due to some default or breach of contract of a non-financial nature:

5.3.1 the provision of the Appointment alleged to have been breached or not

fulfilled;

5.3.2 supporting information in reasonable detail to enable the Beneficiary to identify the material facts;

5.3.3 the steps reasonably required to remedy the specified breaches or conditions not fulfilled;

5.3.4 the time within which the specified steps can reasonably be expected to be taken;

5.3.5 (if applicable) the amount of damages claimed and the basis of their calculation; and

5.3.6 (if applicable) the relief to be sought.

The Consultant warrants to the Beneficiary that to the best of the Consultant's knowledge and belief, having made all proper and appropriate enquiries, the statements submitted under this Clause 5 shall be true, complete and accurate statements of the amounts to which the Consultant considers itself entitled. In the event that the Consultant shall delay in giving such notice and information within the said 14 days, the period of 35 days shall be extended to correspond with the period of any such delay. The Consultant's right to determine its employment under the Appointment or to treat the same as having been repudiated or to discontinue performance shall cease if, within the said 35 day period (extended as appropriate) and subject to Clause 8 the Beneficiary shall give notice in writing to the Consultant requiring the Consultant to accept the instructions of the Beneficiary or its appointee to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of the Appointment.

6 It shall be a condition of any notice given by the Beneficiary under Clauses 4 or 5 above, that the Beneficiary or its appointee, as the case may be, accepts liability for payment of the sums due under the Appointment and detailed in the statement provided under Clause 5 (and makes payment within a period of 28 days of such notice from the Beneficiary), and for subsequent performance of the Main Contractor's obligations. Upon the issue of any notice by the Beneficiary under Clauses 4 or 5, the Appointment shall remain in full force and effect as if no right of determination of its employment under the Appointment, or any right of the

Consultant to treat the Appointment as having been repudiated by the Main Contractor had arisen and the Consultant shall be liable to the Beneficiary and/or its appointee, as the case may be, under the Appointment in lieu of its liability to the Main Contractor.

7 The Beneficiary may at any time following the issue of any notice by the Beneficiary under Clauses 4 or 5, serve a further notice that following the expiry of 28 days from the giving of such notice the Beneficiary will have no liability (save in respect of the Beneficiary's antecedent breach) for any sums due or to become due to the Consultant in respect of the period following expiry of the last mentioned 28 day period. The Beneficiary may exercise any of its rights pursuant to Clauses 4 or 5 on more than one occasion.

8 The Consultant shall maintain for the period expiring 12 years after completion of the Services or until termination of the Consultant's employment under the appointment, Professional Indemnity Insurance in an amount of not less than £10m (ten million pounds) sterling for any one claim or series of claims arising out of one single incident during any period of insurance which shall not be more than 12 months with insurers of good repute canting on business in the European Union provided always that such insurance is available at rates and terms which are commercially reasonable to consultants of a similar size and standing in the UK. In determining whether or not insurance is available as aforesaid, the financial characteristics and claims' record of the Consultant shall be ignored. The Consultant shall immediately inform the Beneficiary if such insurance ceases to be available at rates and terms which are commercially reasonable in order that the Consultant and the Beneficiary can consider alternative means of best protecting their respective positions in respect of the Project In the absence of such insurance provided that the Beneficiary shall be entitled to require the Consultant to maintain such lesser amount of Professional Indemnity Insurance as is available to the Consultant at rates and terms which are commercially reasonable. As and when it is reasonably requested to do so by the Beneficiary (but not more than once in any period of insurance) the Consultant shall produce; for inspection documentary evidence satisfactory to the Beneficiary (acting reasonably) that its Professional Indemnity Insurance Is being maintained.

9 The Consultant hereby grants to the Beneficiary or its appointee and all those authorised by the Beneficiary an irrevocable, non-exclusive and royalty-free licence (which shall be capable

of assignation) to use and reproduce all technical information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things whatsoever provided or to be provided by the Consultant in connection with the Project (the 'documents") for any purpose relating to the Project including (but without limitation) the construction, completion, maintenance, promotion, advertisement, reinstatement, repair and any extension of the project and for dissemination within the NHS as part of the feedback of information to better or enable the NHS to realise improvements in its methods and practice of construction and in the design and procurement of its construction. Such licence shall carry the right to grant sub-licenses and shall subsist notwithstanding that the Appointment is terminated or the obligations and duties thereunder have been completed. For the avoidance of doubt, the grant of such licence or sub-licences shall not impose any additional liability on the Consultant. The Consultant will not assign or agree to assign the copyright in any of the documents without the prior written consent of the Beneficiary. The Consultant shall on reasonable demand provide to the Beneficiary or its appointee and those authorised by the Beneficiary additional copies of any documents on receipt of reasonable copying costs. The Consultant shall not be liable for any use by the Beneficiary of any of the documents for any purpose other than those authorised by this clause.

10 This Agreement may be assigned on a maximum of two occasions in whole or in part by the Beneficiary to any party to whom the Beneficiary's interest in the Main Contract or any part thereof is assigned or disposed of without the consent of the Main Contractor or the Consultant being required and any such assignation shall be effective upon written notice thereof being given to the Main Contractor and to the Consultant. No other or further assignation of this Agreement, other than permitted by this Clause, by the Beneficiary or any other party shall be permitted. The Consultant shall not be entitled to assign or transfer any rights or obligations hereunder without the consent of the Beneficiary.

11 The Consultant undertakes that it will not raise as a defence to any action by the Beneficiary for alleged breach of this Agreement the fact that the obligations of the Main Contractor to the Beneficiary in respect of the services have been released as a result of the termination of the Building Contract.

12 No failure, approval, act or forbearance on the part of the Beneficiary in respect of any right of the Beneficiary pursuant to this Agreement shall constitute any waiver of any right of the Beneficiary under raising out of this Agreement nor relieve the Consultant of any of its duties or obligations under or arising out of this Agreement.

13 Any notice, consent or demand to be given or made by any party under this Agreement (hereinafter called a "Notice") shall only be validly served if In writing and delivered personally or sent by pre-paid first class recorded delivery post to the following address and marked for the attention of the following person in the case of each party:

| Party: | Address: | Person: |
|---|---|---|
| Beneficiary | Dalian House, 350 St Vincent Street Glasgow, G3 8YZ | Head of Board Administration |
| Main Contractor | 23 Hanover Square, London W1S1JB | Paul Serkis |
| Consultant | 87-91 Newman Street, London W1T3EY | Andrew Jackson |

Any party may by Notice to the other party/parties change its address or the title of the person for whose attention Notices are to be given or made pursuant to this Clause. Any such Notice shall be deemed to have been received:

13.1 if delivered personally, at the time of delivery;

13.2 in the case of pre-paid first class recorded delivery post, on the first Business Day after the date of posting.

If any Notice Is delivered after 5 p.m. on a Business Day, or at any time during a day which is not a Business Day, that Notice shall be deemed to have been received at 9 a.m., on the next Business Day. For the purposes of this Clause, "Business Day" means any day which is not a Saturday, a Sunday or a public holiday in Scotland. In proving service it shall be sufficient to

prove that the envelope containing such Notice was properly addressed to the relevant party and either delivered personally to that address or delivered into the custody of the postal authorities as a pre-paid first class recorded delivery letter. For the avoidance of doubt, Notices shall not be validly served if sent by email or fax.

14 No action or proceedings for any breach of this Agreement shall be commenced against the Consultant after the expiry of twelve years from Completion or earlier termination of the Consultant's employment under the Appointment.

15 The definitions of words and phrases used in this Agreement shall be those set out in the Appointment except where expressly defined in this Agreement.

16 This Agreement shall be governed by and construed in accordance with Scots Law and the parties hereto submit to the exclusive jurisdiction of the Scottish Courts.

# 1. OUTLINE

## Introduction

1.1 The New South Glasgow Hospitals (NSGH) Project consists of new adult acute and children's hospitals, new laboratories, energy centre, car parks and associated support facilities and infrastructure for the NHS Greater Glasgow and Clyde (the Client/Board).

The Project is located on the existing hospital site at the Southern General in Govan, Glasgow which is required to remain operational during the execution of the Works. The Project is to provide in the order of 175,000m2 of internal area comprising approximately 1,400 beds in addition to the development of the external spaces.

This Scope of Services excludes the new laboratory block and car parks (which comprises of the laboratories building and the FM facility to its rear), unless highlighted as otherwise.

1.2 The Services shall be the provision of professional labour, supplies, systems and other resources as necessary to design, specify, document, inspect (in regards to generally in accordance with the design) report and certify the architectural elements of the Works for the Project. The Services outlined herein are the basic scope of works specifically applicable for this Project and are completely allowed for in the initial total fee unless specifically noted as otherwise.

1.3 Key Performance Indicators (KPIs) – The quantitive KPIs for Stage 2 Works (leading to the Full Business Case) are defined in the Contract Data Part 1 Appendix 3 in addition to the Design Programme contained in Contract Data Part 1 Appendix 2 Schedule 3 and the Cost Plan referenced in the Building Contract. This Scope of Services represents the qualititive KPIs to be achieved by the Consultant.

1.4 The Architect is vested with the responsibilities inherent in the role of the Lead Consultant for the Project. To this end, the Architect is responsible for leading the timely coordination, cooperation, integration and liaison of the design and documentation work with other consultants, subcontractors, suppliers, authorities and other relevant parties/stakeholders to define clearly the design of the Project working within the Project costs, time and risk parameters. Some of the specific Lead Consultant tasks are highlighted below.

The Lead Consultant shall:

a) In conjunction with the Consultant's own design and documentation requiring to be coordinated and integrated with all relevant designs and advice from other consultants, subcontractors and the Statutory requirements, the Lead Consultant shall be responsible for the integration of the activities of the engaged and likely to be engaged consultants (as reasonably expected for a project of this type) to ensure that their design and documentation are coordinated. In other words, the Lead Consultant is to manage the sequence of design and documentation production including those by other consultants.

b) Represent the design team in all formal communications with the Employer in connection with the Project delivery.

c) Produce the Design Programmes (and Documentation Schedules as applicable) which must be coordinated with other consultants to identify the design documents to be provided, the allocation of resources and the release date for each document.

d) Monitor the design release against the Programmes and the performance of the other consultants to produce the information at the required time.

e) Ensure that the design and detail complies with the Statutory requirements and assist in the timely approval and certification.

f) Advise the Employer of any requirement more onerous than the Statutory requirements once known by the Consultant.

g) Ensure that all relevant submissions and amendments are submitted and assist in discharging the Planning consent reserved matters and other Statutory conditions of approval in sufficient time to obtain timely approval.

h) Manage that all of the approvals necessary for the Works required by the Employer from all Statutory Authorities have been obtained either by themselves or by other consultants as necessary.

i) Advise on the need for any Specialist consultants to the Employer in addition to those already engaged for the Project and if reasonably required, assist in their selection.

j) Instigate, prepare, chair and produce minutes of all design team meetings and advise the Employer with respect to the results thereof and any decisions, instructions or information required. In addition, the Consultant shall attend all other reasonable meetings requested by the Employer and/or the Board in relation to the Project.

k) Advise the Employer throughout the Project of any information which may be required from third parties including but not limited to from the Board, to enable the Project to progress.

l) Assist in achieving the WRAP ratings as required by the Employer.

m) Investigate and analyse value engineering and value management opportunities throughout the Project in respect to alternative designs, materials or products as examples including those proposed/specified by others. This is subject to the implementation timing of the value engineering proposal which may attract reimbursement for the redesign work to be discussed and agreed between the Consultant and the Employer on a case by case basis.

n) Establish and manage the documentation standard protocols such as the drawing templates and the like.

o) Manage the User Groups' consultations and sign off process taking into consideration the timescale constraints.

p) Liaise with the Employer and lead other consultants in assisting the achievement of the Full Business Case, the development of the total Project value and the subsequent design in compliance with the Cost Plan.

q) Assist the Employer (and its designate as applicable) by leading the consultants in contributing to, monitoring and managing the Project risk schedules, list of derogations and assumptions/clarifications associated with the design matters as reasonably required by the Employer.

r) Notwithstanding the generality of the foregoing, the Consultant shall carry out potential services which it is required to perform pursuant to the Building Contract and such other services as the Employer may from time to time reasonably require.

1.5 The Services are to be provided in the following Work Stages:

- Concept Design and Design Development
- Construction Documentation and Construction Phase
- Commissioning, Completion and Post Completion

Note: Notwithstanding the entry point to an individual scheme or design task, the Consultant is required to review all the previous information for the scheme made available in a timely manner

by the Employer in addition to those sourced by the Consultant and undertake the Services and lead other consultants in order to enable the Employer to complete the Works.

**Performance Standards**

1.6 The Consultant shall submit its Quality Plan for review by the Employer. The Consultant shall amend its Quality Plan as reasonably required by the Employer. The Quality Plan shall explain how the design and documentation work are to be planned to the standard specified in ISO 9001:2008 particularly the Section 7.3 and shall include:

- The design and documentation stages
- The review, verification and validation that are appropriate to each design and documentation stages
- The responsibilities and authority for design and documentation

The Consultant is to assist (where to be discussed and agreed) in reviewing and commenting on the Quality Plans (especially the Quality Inspection and Test Plans) from the subcontractors and suppliers as reasonably required by the Employer.

1.7 The Documentation (or Documents) to be provided by the Consultant shall be all that is required in order that the Project can be completed in the most time and cost efficient manner and shall include but not be limited to:

- Drawings (including 3D sketches as required)
- Schedules
- Specifications
- Working models, and other visualization presentation materials – this is subject to additional fees to be discussed and agreed between the Employer and the Consultant as the need arise
- Calculations and sketches
- Reports (including Progress Status)
- Certifications (including Compliance) in a format to be agreed between the Consultant and the Employer
- Meeting minutes, file notes etc.

1.8 Conform with the Project specific documentation protocols as updated from time to time by the Employer (or its designate) including the CAD parameters and electronic documentation transfer facilities such as the FTP websites or as requested by the Employer. The Consultant as the Lead Consultant will be required to set up and provide access to others, a FTP site should it be requested by the Employer.

1.9 In respect of all Work Stages, the Consultant shall:

a) Not used.

b) Ensure that it has the necessary skill and resources to provide the Services.

c) Take all necessary steps on an ongoing basis so that all persons engaged for the Services are properly qualified, competent and experienced for the size, scope and complexity of the Project.

d) Inform itself of the Project requirements by regularly consulting with other relevant parties and the Employer. Review all relevant documents and immediately inform the Employer (once becoming aware) of any apparent errors or ambiguities contained in such documents and make recommendations for the correction of such ambiguities.

e) Keep secure the Employer materials and documents and return them at the end of this Appointment.

f) Strictly remain within the scope of the authority granted by the Employer and not act beyond its authority or hold out that it has authority beyond this Appointment.

g) Seek the Employer's prior consent to any proposed sub-letting and notify the Employer should the need arise to employ an outside agency and/or self employed staff.

h) Comply with all policies relating to the use of the Employer office premises and facilities when using them as made aware to the Consultant.

i) Permit the Employer to carry out agreed and scheduled visits to the Consultant's business premises in connection with the Services.

j) Keep proper commercial records and accounts for any claims it makes on the Employer including if applicable, for reimbursement of expenses and remuneration of fees based on time charged billing and permit the Employer auditors to inspect such records and accounts.

k) Not used.

l) Liaise and cooperate with the other consultants employed (and likely to be employed as reasonably expected for a project of this type) by the Employer for the purpose fulfilling its obligation that the Project shall be designed in compliance with the Project requirements.

m) Manage the coordination and sequence of design work tasks.

**Performance Obligations**

1.10 The Consultant is to ensure that:

a) The Services shall be carried out using proven best up-to-date practice and to appropriate standards (having regard to the nature of the Project).

b) The Services and all Documentation comply with the requirements of Planning consent for the Project and with all Statutory Authorities requirements and regulations and with all other legislation applicable to the Services and/or to the Works.

c) The Services and all Documentation comply with all specific standards contained in this Appointment. If no such standards are stated in this Appointment and if they cannot be reasonably inferred from the Project Documents, the standards shall be those required by relevant British Standards and/or UK Building Regulations and/or any relevant applicable legislation and/or relevant local Statutory Authority requirements.

d) The Services and any Documentation prepared by the Consultant in relation thereto shall comply with and meet the requirements of the consented Planning submission, the Employer's Requirements and the Contractor's Proposals.

e) Not used.

f) All Consultant's Documentation and any other documentation included within the ambit of the Services are progressively submitted to the Employer by the agreed dates specified in the Programme or if no dates are specified, in accordance with the progress of the Works and the Employer's reasonable requirements.

g) All drawings that are produced as part of the Documentation are to be computer generated and capable of being transferred into 'tiff', 'pdf, and 'dwg' formats or other format approved

by the Employer. The Consultant shall send and receive written correspondence, drawings, schedules and specifications and any other relevant documentation by a controlled web based document management system (Aconex) in accordance with the rules and procedures (updated from time to time) as provided by the Employer.

h) Specifications as referred to in the definition of Documentation shall be A4, double sided and comprising of two bound copies and one copy on a portable memory storage device. The Consultant shall also upload one copy onto a web based document control system (Aconex). The specifications shall be in full compliance with the Project requirements and shall be complete and coordinated with all other consultants in a format agreed with the Employer. The specifications shall be in the NBS formats that are capable and suitable for the Employer to invite tenders for the various packages of work and for the subsequent construction and completion of the Project. The specifications shall also incorporate, but not be limited to, materials, finishes workmanship and quality standards and other items as may be reasonably required by the Employer.

i) Not used.

j) The Consultant's design and documentation specifying the materials and its method of use, fixing or working must not infringe any patent, registered design, copyright or other protection rights.

k) The Services include reviewing and commenting on relevant temporary works as reasonably requested by and agreed with the Employer in completing the Project.

l) The Consultant shall send, receive, review and comment on architectural information in relation to O&M manuals which may be by a controlled web based management system.

m) The Consultant provides advice and documents as reasonably required to assist the Employer in the maintenance of the building to ensure whole-life costs are minimised.

n) The Consultant provides information as requested by the Employer for use by the Building Owner, Funders, Facilities Manager, Operators and the like. The level of such information to be reasonably agreed between the Consultant and the Employer on a case by case basis.

o) The Consultant coordinates, incorporate and document all fire protection and acoustic treatment measures in respect to the architectural elements in consultation with the Fire Engineer and Acoustic Engineer respectively to satisfy the Statutory Authority requirements.

p) The Consultant proactively endeavours to maximise the BREEAM rating of the Project and develop energy efficient strategies.

q) The Consultant evaluates, design, specify and document Secure by Design and the like.

r) In reference to CDM 2007 Regulations and in particular Regulation 11, the Consultant shall produce information to the Employer, other Designers and (sub)Contractors in respect to the residual design risks and where possible this information shall be included in all Documentation especially the drawings issued by the Consultant.

s) The Consultant submits evidence of competence to comply with the CDM 2007 Regulations as per Regulation 4 and as set out in Appendix 4 of the Regulations.

t) In providing the Services, the Consultant shall aim to minimise any adverse impacts that construction has on the environment. This shall be through the design process, materials selection, construction techniques and operational methods. Specific information on the Employer's policy which the Consultant is required to comply is set out in the Environmental Policy Statement (as set out below).

The Consultant shall work towards to reduce waste and use materials efficiently and proactively assist in reaching the Employer's objective as outlined in the Waste Policy Statement (as set out below). The Consultant shall support this Policy by:

- Assist in developing the Site Waste Management Plan from an early design stage, including waste forecasts and data on reduction targets and actions.
- Assist in implementing the Site Waste Management Plans throughout the design and construction period that comply with the applicable Regulatory requirements and include in such Plans project-specific targets for waste recovery and reused and recycled content and for waste reduction;
- Identifying methods to reduce waste and waste to landfill and increase reused and recycled content, throughout the duration of providing the Services and report to the Employer. In this regard, the Consultant shall use site waste management software nominated by the Employer which shall be WRAP's Designing out Waste Tools or Net Waste Tool (accessible at www.wrap.org.uk/nwtool) unless notified otherwise;
- Work with the Project team to ensure that design actions to reduce construction waste and increase reused / recycled content are implemented;
- Agree with the Employer which level of waste reduction and reuse to pursue.

Note: The Consultant should refer to the WRAP Designing out Waste guidance to identify, prioritise and implement ways of meeting Project targets for waste.

# BROOKFIELD CONSTRUCTION (UK) LTD

# ENVIRONMENTAL POLICY STATEMENT

This policy statement is valid from May 2010 to 31st December 2010.

## Introduction

Brookfield Construction (UK) Ltd is focused on the construction of significant landmark projects. Our overall mission is to build high quality construction projects using materials and processes that respect the environment.

We firmly believe that the delivery of high quality construction projects requires active consideration of the environmental and social impacts associated with construction. High standards of environmental performance in these areas can also deliver benefits to the environment, society and economy.

## Environmental Policy

At Brookfield Construction (UK) Ltd, our aim is to:

- Work to prevent pollution and minimise the overall impact of our activities on the environment, from the sourcing of our materials to the recycling and disposal of wastes.
- Make more efficient use of energy and natural resources and minimise emissions and waste, focusing on those activities which have the most significant impacts.
- Comply with applicable legal requirements and other requirements to which Brookfield subscribes which relate to its environmental aspects. Such requirements include WRAP's (Waste & Resources Action Programme) initiative for "Halving construction waste to landfill", BREEAM, Considerate Constructors and Considerate Contractors in London.
- Apply environmental management practices across the business which protect and enhance our reputation and meet the expectations of our stakeholders.
- Pursue continual improvement in our environmental performance.

In order to deliver this aim we will:

- Implement a formal Environment Management System.
- Provide information and training to enable environmental impacts and opportunities to be identified, prioritised and managed effectively.
- Promote joint consultation with employees, contractors, the Environment Agency, Environmental Health Officers and other relevant organisations.
- Work proactively with the local communities in which we operate.
- Set environmental objectives and targets relevant to our significant environmental aspects and monitor our progress against these; year on year.

## Organisation and General Responsibilities

The UK Health and Safety Manager and UK Environmental Advisor are responsible for environmental issues and report to the Brookfield Europe Safety Director. Environment, Health and Safety Managers are allocated to projects and report to the Project Director whilst retaining a functional reporting link to the UK Health and Safety Manager.

Detailed descriptions of our organisation and responsibilities are available in the Environmental Management System which is integrated with the Health and Safety Management System. This integrated system forms a part of a larger suite of documents which also includes the Quality Management System. This larger system is referred to as "CoSHEQ". This document is available on the Brookfield Europe Intranet, which is accessible to all employees.

**Brookfield** **Environmental Policy Statement** UK/EHS/F/001a rev 07

**Arrangements**

*Management Systems*
The Environmental Management System sets out through Procedures, Forms, Risk Registers, Management Plan Templates and Best Practice Standards (the "Supervisors Manual") the way in which environmental issues are managed on our projects.

*Sustainability Strategy*
Our appointed designers are required to meet the guidance given in the Brookfield Europe Sustainability Strategy.

*Third Party Certification*
The company is third party certified to ISO 14001:2004 Environmental Management Systems.

*Code of Conduct*
The behaviour expected from Brookfield employees and our subcontractors is set out in our Code of Conduct. Copies of this are displayed on notice boards at Head Office and at each project.

This document is available to the public on the Brookfield Europe website and is communicated to all employees.

**12 month objectives January 2010 to December 2010 for Environment and Sustainability**

- As signatories to WRAP's initiative for halving construction waste to landfill by 2012, taking 2009 as the baseline year, we will take measures to divert construction waste from landfill sites.
  **Target** – For construction, demolition and excavation waste corporate targets see our Waste Policy Statement

- Promoting the ethical and environmentally sustainable management of the world's forests we will endeavour as far as practicable to only use FSC-certified timber products on all our projects.
  **Target** – Publish percentage of FSC-certified timber employed on our projects

- In order to reduce our environmental impact we will reduce the amount of our office waste going to landfill. A new office waste management strategy will be introduced and implemented in 2010 that will involve segregating recyclable waste at source and phasing out individual desk bins.
  **Target** – 90% of all office waste to be diverted from landfill and relevant data to be published

# BROOKFIELD CONSTRUCTION (UK) LTD

## WASTE POLICY STATEMENT

**Scope**
This Policy Statement applies to Brookfield Construction (UK) Ltd for 2010 and must be read in conjunction with the Brookfield Construction Environmental Policy Statement.

**Introduction**
Brookfield Construction (UK) Ltd is focused on the development, construction, management and ownership of significant landmark projects. In all of its development work, Brookfield aims to minimise any adverse impacts that construction has on the environment. We seek this through the design process, materials selection, construction techniques, and operational methods.

From 2010 all organisations appointed to work on our behalf are required to work in accordance with these principles.

**Achievements**
We have set waste targets since 2007. Each year the target for recycling has been increased as follows:

2007 to recycle 70% waste concrete, bricks and ceramics over the course of a project and 50% of general waste over the course of a project.

2008 and 2009 to recycle 80% of construction waste (combined Construction, Refurbishment, Demolition and Excavation).

The company has succeeded in meeting these targets.

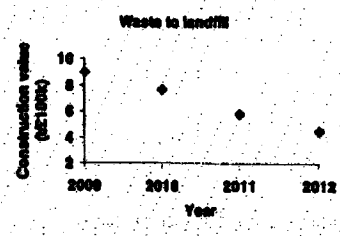
**The WRAP Initiative**
Committed to continual improvement in 2009 Brookfield Construction (UK) Ltd became a signatory to the "Halve waste to landfill by 2012" initiative for the construction industry of the Waste and Resources Action Programme, (WRAP) a government-backed body set up to facilitate waste minimisation in the UK. There are two strands to this commitment:

1 To generally reduce the amount of waste generated from a construction project by exploring possibilities in design and procurement.

2 Following on from this, to increase the percentage of residual waste that is recycled.

WRAP proposes that waste data is measured against each £100k construction value[1]. This will then capture both reductions that are obtained from design and procurements in addition to the residual waste figures.

**The Baseline Year: 2009**
To meet the WRAP Commitment, Brookfield Construction has selected 2009 as its baseline year. The WRAP typical figure for waste sent to landfill was 10 tonnes per £100k and the Brookfield Construction target waste figure to be sent to landfill was 9 tonnes per £100k.



**Our target for 2012**
Brookfield Construction will set a 2012 target of 50% of the 2009 target. This is 4.5 tonnes per £100k.

The targets for 2010 and 2011 will be based on a linear progression from 2009 through to 2012.

[1] Construction value is the price in the accepted tender or, if there is no tender, the cost of labour, plant and materials, overheads and profit.

**Brookfield** **Waste Policy Statement** UK/EHS/F/001c rev 01

We will work to adopt and implement standards for good practice in reducing waste, recycling and reusing more. This will support national policy goals e.g. halving waste to landfill by 2012, adopted in England by the Government's Strategy for Sustainable Construction and Zero Waste in Scotland, and will be achieved by reducing waste, recovering more materials and using more recovered material in new construction.

**Policy**
Any contractual and client requirements will be taken into account to form the project-specific requirements, but as a minimum on projects commencing in 2010 our design and construction project teams will be required to:

- forecast waste quantities and waste recovery and set targets for waste reduction from an early design stage (for instance by using WRAP's Designing out Waste Tools and Net Waste Tool[2] or the Building Research Establishment's SMARTWaste benchmark calculator[3]).
- before starting on site, the project team shall submit a copy of the Site Waste Management Plan identifying the actions to be taken to reduce waste and increase recovery, as well as the corresponding roles and responsibilities, and quantifying the resulting changes.
- implement Site Waste Management Plans throughout the design and construction period that comply with regulatory requirements and include in such Plans project-specific targets for waste recovery and for waste reduction.
- where there is sufficient space the project teams should plan for and implement waste segregation on site. Otherwise the volume of waste that is recovered will be maximised by using third party contractors.
- measure and report progress against the corporate targets for the quantity of waste produced and the quantity of waste sent to landfill (in tonnes per £100k construction value). The information will be annually reported on the WRAP Waste to Landfill Reporting Portal[4] and guidance.
- on completion of the Works, the project team shall submit a copy of the completed Site Waste Management Plan, reporting the forecast and actual performance for waste quantities, disposal routes, and reused and recycled content used in construction.

**Target for 2010**
- recover at least 83% of construction materials demolition, strip-out and excavation materials.

[3] The SMARTWaste Plan is freely accessible at http://www.smartwaste.co.uk/swmp

[4] Accessible at www.wrap.org.uk/reportingportal

**Meetings**

1.11 The Consultant shall:

a) Attend and issue records of the design team meetings and workshops for those in relation to the design, construction and co-ordination as required by the Employer. Attend value engineering and risk management meetings throughout the duration of the Project.

b) Attend construction site meetings and subcontractor meetings as reasonably required by the Employer. Attendance may be required for factory visits and design and or construction meetings at off site locations. Travel and associated expenses within the UK are generally allowed for by the Consultant. However, the travel costs outside the UK if required to be agreed between the Consultant and the Employer on a case by case basis.

c) Attend and issue records of the design meetings with other consultants as necessary to integrate, coordinate and clarify the Works during the Project as reasonably required by the Employer.

d) Attend and issue records of the meetings with Statutory Authorities as reasonably required by the Employer.

e) Attend and issue records of the meetings with the Employer as reasonably required on all relevant Project design related issues.

f) Provide draft minutes for all of the above meetings, workshops and the like as reasonably required for review by the Employer or distribute as requested by the Employer.

**Reports**

1.12 The Consultant shall:

a) Provide periodic status reports (monthly or to be agreed with the Employer) in a form reasonably required by the Employer which shall include as a minimum, a summary documenting the progress of the Services against the Design Programme and Documentation Schedules. Highlight areas of difficulty being experienced with progress of the Services, design co-ordination issues, Statutory Authority approvals status and the like including the proposed mitigating measures.

b) Undertake site inspection as reasonably required or as requested by the Employer. Provide defects and non conformance reports in relation to the construction works when requested by the Employer in a workable electronic format including photographs.

c) Prepare report or documentation required for the assessment of design alternatives and in contemplation of envisaged change to the Project requirements that has impact on the architectural elements as reasonably requested by the Employer.

d) Provide reports and information to reasonably assist the Employer in its preparation of application for payment and in the settlement of the final account.

e) Progressively compile and provide design risk registers in reference to the CDM.

f) Not used.

g) Not used.

h) Provide draft reports for all of the above as reasonably requested for review by the Employer prior to the formal issue.

**Certification**

1.13 On a periodic basis or when requested by the Employer in agreement with the Consultant, provide a progress certification that the design and documentation work done to that period is in accordance with and complies with the Project requirements such as the Employer's Requirements, the Cost Plan, the Programme, Contractor's Proposals and with all relevant Statutory Authority requirements.

**Authorities**

1.14 The Consultant shall:

a) Liaise with the Employer, other consultants and all relevant Statutory Authorities for the purpose of ensuring that the design complies with all Planning consent conditions.

b) Liaise with the Employer, other consultants, and others involved in the Works, including without limitation the CDM Coordinator, subcontractors and all relevant Statutory Authorities for the purpose of ensuring that the design complies with all relevant Statutory Authority requirements and for obtaining all necessary permits and approvals. Incorporate all relevant Statutory Authority requirements into the design and documentation.

c) Advise on the need to obtain further Planning permissions, Building Regulation approvals and any other Statutory approvals and prepare all necessary architectural associated applications for consideration by the Employer.

d) Liaise with other consultants who are the lead in dealing with all relevant utility companies, service providers and others involved in the identification, relocation and modification of utility services affected by the Project.

e) Prepare coordinated Documentation in conjunction with other consultants for submission to the relevant Authorities. All such Documentation is to be discussed with the Employer prior to submission to the Statutory Authority.

f) Revise and re-submit submissions to the Planning Authority as required where the development of the design has varied from the original Planning consented scheme which may be subject to additional fee to be discussed and agreed between the Consultant and the Employer. Amend Documentation in conjunction with other consultants for resubmission to other relevant Statutory Authorities arising from any directives, requirements or comments from the Employer or Statutory Authorities including those on the previous submissions.

g) Assist in the review of all relevant Planning Authority approvals and conditions and in the preparation of schedule/checklist for review by the Employer to monitor timely discharge of all conditions.

h) Liaise with all relevant Authorities for expeditious approval and attend all meetings as reasonably required by the Employer. Update and amend documentation in conjunction with others as required, to obtain all regulation modifications, approvals and permits.

i) Highlight opportunities to the Employer in respect to alternative means of achieving the Statutory compliance for the benefit of the Project including waivers, relaxations and dispensations. Where requested by the Employer, negotiate the same with the Authorities. Should this task be considered as extensive, additional fee may be applicable for which the Consultant and the Employer are to discuss and agree on a case by case basis.

j) Revise documentation as necessary to reflect the outcome of the negotiations with the Statutory Authorities subject to the timing of this outcome. Otherwise, the Employer and the Consultant are to discuss and agree on potential additional fee on a case by case basis.

k) Reasonably assist the Employer with any relevant tests and inspections required by the Statutory Authorities and in obtaining all permits, approvals and certificates required for the lawful use of the Project.

l) Complete all relevant certificates associated with the Services as and when required by the Employer and liaise with Statutory Authorities for the purpose of assisting in obtaining staged building permits and other approvals.

m) Prepare design certification (in a format to be reasonably agreed between the Consultant and the Employer) necessary for the completion of the Project and/or the granting of relevant Statutory Authority for Completion, occupancy and title.

n) Review all relevant Building Regulations approvals and conditions. Prepare a schedule/checklist for review by the Employer to monitor timely discharge of all conditions.

**Architectural Design Elements**

1.15 The Services are required for the following elements of the Works, as examples:

- Building outline including concrete outline, slab soffit profiles, formed penetrations, walls, columns, beams. The primary set out of all structural elements in consultation with other consultants
- Not used
- External cladding including façade, precast, windows, louvres, screens and doors
- External building maintenance units and fall protection systems
- Roofing including canopies
- Masonry, brickwork and blockwork
- Plasterboard wall linings and wall systems including shaftwalls
- Internal walls and partitioning systems including operable walls
- Ceilings including bulkheads, access openings (as defined by others) and setting
- Glazing including the aluminium glazing and doors
- Roller shutters, screens, steel doors and internal fencing and gates
- Toilet finishes including the partition systems and toilet accessories
- Doors, frames and ironmongery including master keying
- Architectural metalwork including handrails, balustrades and security barriers
- Granolithic and stone flooring and walls including marble and granite finishes
- Floor finishes including the raised flooring, carpet and the resilient flooring such as vinyl, epoxy and other special floor coatings
- Tiling including wall and floor
- Window treatments
- Joinery
- Painting and decorating
- Signage (illuminated and non-illuminated) including statutory, operational and wayfinding
- Not used

- Fire strategy and acoustic treatment documentation
- Interior fit out design including lift car finishes
- FF&E layouts and elevations for each exemplar room type in addition to standard wall elevations for the remaining rooms
- Sundry fittings
- Artwork integration

# 2. Concept Design and Design Development

## Overview

2.1 It is a fundamental requirement that all Documentation produced during the Concept Design and Design Development stages are in full compliance with the parameters of the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the Programmes as these may be amended from time to time (the Programme to be the version as agreed between the Consultant and the Employer).

2.2 The Design Development stage involves the development of the Concept Design and enables the tendering and construction of the Project to be executed, particularly for the enabling works and the early release packages. Consequently the particulars highlighted below require the Consultant to undertake iterative Services and revisit the work carried out under Concept Design which must be amended or otherwise.

## Tasks

The Consultant shall:

2.3 Supplement Project details provided by the Employer by sourcing relevant information about the Site as reasonably expected from the Consultant. Based on these documents make appraisals and establish constraints for the Works.

2.4 Seek clarification or direction on Project requirements as necessary from the Employer.

2.5 Visit site in addition to as requested reasonably by the Employer.

2.6 Contribute to site appraisals and surveys and (re)evaluate Project requirements including the preparation of options/recommendations for consideration by the Employer highlighting advantages and disadvantages (financial and technical) and where relevant any long lead-in procurement building elements.

2.7 Evaluate proposed amendments to the Project requirements and advise the Employer on options for development of the design having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

2.8 As when requested by the Employer, provide a Documentation Schedule for review by the Employer. This Documentation Schedule shall support the Full Business Case timeline, the Employer's tender letting schedule and construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for the production of same.

2.9 Update or amend the Documentation Schedule in consultation with the Employer. Complete/populate the master documentation matrix if utilised by the Employer. This matrix indicates to which tender package each of the Consultant's documents relates to.

2.10 Provide assistance and support the Structural Engineer, the Mechanical and Electrical Engineer and other consultants in the preparation, design, specification and installation details of their respective discipline.

2.11 Prepare the Documentation incorporating the structural, services and other consultants' requirements and/or information into the architectural design having regards at all times to the Planning constraints, the Employer's Requirements, the Cost Plan and the construction programme. In conjunction with the other consultants, establish all relevant Statutory Authority requirements and incorporate into the design.

2.12 Prepare design studies as discussed and agreed with the Employer and make presentations to the Employer. The Consultant shall take account of any comments from the Employer and amend the Documentation as necessary. The Consultant shall also consult with local or other Statutory Authorities and with other interest groups as reasonably required by the Employer.

2.13 In accordance with the agreed Documentation Schedule, prepare and submit to the Employer in accordance with the Programme, the adequately coordinated and progressed design and as the Lead Consultant for the specific design responsibilities, coordinate tasks and submissions from other consultants. Note: all CAD drawings are to be at an appropriate scale as reasonably required by the Employer.

2.14 In conjunction with the other consultants, develop the design incorporating the design solutions and where required, provide documentation for submissions to the relevant Statutory Authorities including for the discharge of Planning consent conditions and/or to seek conditions of approval for Building Regulations compliance.

2.15 Liaise with other consultants and coordinate the provision of information and data as reasonably required by the Cost consultant and the Employer for use in connection with the Cost Plan.

2.16 Prepare and provide Documentation in respect of alternative designs and/or construction solutions for the purpose of value engineering and reviewing costs. Repeat the process as instructed by the Employer to ensure that the construction costs remain within the Cost Plan.

2.17 Assess and provide comment on alternatives offered by the Employer, its subcontractors and suppliers. Provide design details and information as required by the Cost consultant in pricing options / alternatives. Develop and amend the design as required to ensure the design remains within the Cost Plan.

2.18 Provide studies and information on maintenance, lifecycle and other costs for the Project as reasonably required by the Employer.

2.19 Assist the Employer in the preparation of Scope of Work packages on a trade by trade basis for inclusion in subcontract and supply procurement.

2.20 Prepare and issue drawings, specifications (in NBS format), schedules and the like as required by the Employer for market testing, tender and costing purposes.

2.21 Prepare internal and external finishes schedules, sample boards, source mock-ups as appropriate, perspectives, computer generated images, models and other presentation materials as reasonably required by the Employer to illustrate the proposed design.

2.22 Assist in the development and finalization of the Schedule of Accommodation (SoA) for the Full Business Case (FBC). After the FBC, maintain and update the SoA by undertaking the necessary calculations of the floor areas such as the gross and net highlighting the clinical department, plant, circulation, support facility etc spaces including any variances from the Project requirements.

2.23 Review and comment on the temporary works in relation to such activities as the crane locations, materials handling areas, storage and compound areas and the like insofar as it being associated with the architectural design.

2.24 Regularly review the design against the Project requirements including the Employer's Requirements and all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

2.25 Prepare and issue a coordinated set of Documentation for these design stages in a report format to be agreed with the Employer. The Documentation shall be dimensioned at suitable scales - Drawings and schedules (as applicable) to indicate all penetrations greater than 100mm diameter area, setdowns, rebates (as coordinated with others) and builders work in connection details including coordination information such as the overlay drawings as requested by the Employer.

# 3. Construction Documentation and Construction Phase

## Overview

3.1 This Work Stage shall be the Construction Documentation and Construction Phase of the Project. This Work Stage continues from the Concept Design and Design Development Work Stage and shall enable the remaining tendering and construction of the Project to be progressed. This Work Stage is undertaken in conjunction with the ongoing design development tasks as identified on the Programme. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development (and where necessary, Concept Design) Work Stage(s) and to the extent that any of the Services carried out under Design Development (and where necessary, Concept Design) must be amended or otherwise, such work shall be deemed to be part of/concurrent to this Work Stage.

3.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage is suitable for properly constructing the Project and shall fully reflect the developed design in full compliance with the parameters of the Project requirements such as the Planning consents, Employer's Requirements, the Cost Plan and the Programme as these may be amended from time to time, especially the construction programme.

## Tasks

The Consultant shall:

3.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant as reasonably expected from the Consultant, make further appraisals of Project constraints.

3.4 Evaluate proposed amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements

3.5 Visit site in addition to as requested reasonably by the Employer.

3.6 As when requested by the Employer, update and issue the Documentation Schedule for review by the Employer. The Documentation Schedule shall be consistent with the Employer's construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for production of same.

3.7 Liaise with other consultants to provide integrated and coordinated design information and data as required by the Employer to comply with the construction programme to assist in ensuring that there is no delay in providing information to subcontractors or in constructing the Works.

3.8 Update or amend the Documentation Schedule as required by the Employer. Update the master documentation matrix in a format requested by the Employer.

3.9 Produce update of the Documentation Schedule at agreed intervals or at other times as reasonably required by the Employer, showing the Consultant's actual and proposed delivery against the programmed issue dates for each Documentation including the details of the mitigation measures.

3.10 Provide Documentation in accordance with the Documentation Schedule. All Documentation to be in compliance with the Project requirements. The Documentation shall be suitable for inviting tenders from trade subcontractors and updated to provide adequate details to allow each design element to be constructed which must for example, take due regard of good health and safety practices, buildability requirements such as construction sequencing and access and construction tolerances.

3.11 Provide support to the Employer in reviewing all relevant subcontractors and/or suppliers' tender returns and submissions of samples and technical data in respect of compliance with the Project requirements.

3.12 Evaluate alternatives proposed by the trade subcontractors and in conjunction with other consultants, coordinate and integrate all such preferred alternatives into the Documentation as instructed by the Employer.

3.13 In conjunction with the other consultants, review and comment on all shop drawings, specifications, prototypes, samples and technical data submissions and other information prepared by potential and/or engaged subcontractors or suppliers for compliance with the Project requirements. Provide such comments within 7 days of receipt. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.14 Review and comment on the documentation of other consultants and subcontractors within 7 days of receipt and ensure that all Consultant's Documentation is fully updated where necessary. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.15 Notify the Employer in writing for any amendments or additions/deletions in the Documentation which may increase the cost of construction and/or whole life cost of the Project.

3.16 Redesign any aspects of the work that falls outside the Cost Plan allowances or as proposed by the Employer as instructed.

3.17 Provide updated, coordinated and dimensioned drawings at suitable scales in a timely manner including coordination information such as the overlay drawings as requested by the Employer. The Consultant is to review and comment on design information in relation to the temporary works required to construct the Works.

3.18 Produce supplementary documentation as may be required by the Employer to clarify the Documentation during construction, including issuing sketches, details, clarifications, further Documentation, investigating site based construction issues related to the Documentation and preparing and issuing design solutions in conjunction with other consultants where applicable. Such supplementary documentation to be issued so as not to delay the progress of the construction works.

3.19 Provide Construction Documentation ("For Construction") drawings incorporating all information issued as advices or sketches so that the latest information is shown on the Documentation to be used for construction. All Documentation must be completed and issued in compliance with the Programme and with the general progress of the Works to ensure that such progress is not delayed and/or disrupted.

3.20 Issue updated drawings, specifications, schedules, details and other design information as the Employer may require.

3.21 Revise and resubmit Planning consent submissions to the Planning Authority as required where the progressed design has varied from the original permit approval.

3.22 Regularly check the Documentation against the Project requirements such as the Employer's Requirements all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

3.23 Assist in the updating of design and construction programmes as required by the Employer.

3.24 Respond to all correspondence including (but not limited to) Requests for Information within 5 days. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.25 Undertake any off-site inspections reasonably requested by the Employer. Travel and associated expenses within the UK are generally allowed for by the Consultant. However, the travel costs outside the UK if required to be agreed between the Consultant and the Employer on a case by case basis.

3.26 Review mock-ups and samples for compliance with the Project requirements such as the Planning consent and the Employer's Requirements and recommend benchmarks for finish and workmanship with the Employer in respect of subcontractors, suppliers and manufacturers.

3.27 Undertake regular inspections of the Works and provide report on same to the Employer in addition to the defects inspections as required by the Employer. Provide inspection reports and attend re-inspections as required. Defect inspections of the Project may commence well before the Completion. Ensure dedicated resources to any reasonable defects inspection / sign off procedure required by the Employer.

3.28 Prepare documentation for a marketing and display facilities as appropriate for the Project or as reasonably required by the Employer.

# 4. Documentation Deliverables

## Overview

4.1 The Employer intends to engage specialist subcontractors for the following trades to design (For Construction details only) and construct that part of the Works. Some of these are early release packages. For these trades, the Consultant is to provide documentation as relevant to each particular discipline that outline the design intent and the performance requirements from which the subcontractor(s) will prepare their construction design (ie. shop drawings):

- Piling
- Structural steel (connection design only)
- Architectural precast concrete
- Major building (M&E) services
- Medical gases
- Lifts and escalators
- Unitised curtain wall system
- Special/feature glazing such as the entrance glass doors and canopy
- Courtyard cladding including ribbon windows
- Podium (rainscreen) cladding
- Plantroom cladding
- Louvres
- ETFE roof coverings
- Glass roof structures
- BMU/Cleaning cradle and gantry systems
- Robotics

The Lead Consultant for a given package (refer to the Design Consultant Responsibility Matrix) is to coordinate with other consultants in reviewing the design by these specialist subcontractors and confirm that they are acceptable for coordination with the Services and that the design intent and performance specification has been satisfied.

4.2 The level/extent of the design information to be shown on the Consultant's documentation must be adequate and capable of being constructed on site. For example: The Architect as the Lead Consultant shall manage the coordination and document the set out of all critical building elements of the Project. This includes but is not limited to the following:

- All formed penetrations over 100mm.
- All visible services elements on walls and ceilings.
- All required movement joints and construction joints

Reflected Ceiling Plans shall include as a minimum the following details:

- Ceiling types and reduced levels
- Acoustic and fire rating treatments as required

- Setting out of movement joints
- Setting out of bulkheads
- Coordinate setting out of all lights, air conditioning / ventilation registers, speakers, smoke detectors, sensors, sprinkler heads, nurse calls and the like
- Setting out of mounted linear bar grilles
- Cross referencing to relevant other drawings and details

Floor Plans shall include as a minimum the following details:

- Architectural layout including furniture, fittings and equipment layout
- Space/room names and number
- Reference tags linked to relevant drawings and schedules
- Reference tags for all wall types linked to wall type details
- Door numbers and swings
- Cross reference to relevant enlarged plan and section details
- Setting out of external cladding
- Setting out of walls, nibs and door openings
- Setting out of wall and floor services points
- Setting out of floor finishes

**Documentation**

4.3 The Documentation Deliverables shall be coordinated with other consultants and other relevant parties prior to issue.

In addition to the above, please note the following general principal requirements:

a) Drawings are to be prepared in a digital form on standard A size sheet (ie. A0, A1, A2, A3). Drawings are not to be any larger than the A0 size.

b) Building Orientation: North to top of sheet, part floors details to be drawn with North to top of sheet – in case where the Consultant consider this to be impractical, the Consultant is to advise the Employer with alternative recommendation(s) as necessary. North arrow must be shown on the drawing title block with a key plan to enable orientation.

c) Each Documents must contain/show:

- Unique document number
- Full title with no abbreviation
- Drawn (or prepared) by and checked by – sign offs
- All details to have scale identified for each
- Denote full (sheet) size
- Changes from the previous drawing revision are to be numbered individually and highlighted with a bold cloud. Once the drawing is revised again, these clouds will be removed and new/latest clouds added to highlight the new drawing amendments

- Detailed description of the change(s) under each number with a date in the title block (to match the cloud number) so that the change(s) can be easily understood from the previous issue
- All documents to be prepared in black and white and not colour unless advised otherwise by the Employer
- The orientation of all drawings when submitted electronically shall be checked that they are landscape and uploaded in the correct orientation (e.g. not scanned upside down)

d) The text on all Documents including the drawings shall be in UK English. All dimensions shall be given in metric format. Calendar dates shall follow the Day/Month/Year format.

e) When revising a document, such as specifications, the full version is to be issued (ie. do not issue just an addenda/extract of the pages that changed).

f) Revisions to text documents will have the revised text in bold and italics (***this is an example***). Text that has been deleted will be in italics and struck through (~~*another example*~~). The Table of Contents shall also highlight in bold italic sections modified. Revised text highlighted must be removed by the Originator prior to issuing the next revision or prior to issuing a document For Tender/Contract and For Construction purposes.

g) Text documents will be prepared on standard A4 size sheets. All text documents will have a title page displaying the relevant information. Each page of the document must show (as a minimum) - document number and its revision, the page number and the total number of pages (ie. page X of Y).

4.4 The following sample list of documents for the architectural design as provided by the Consultant indicates the level of design documentation proposed. However, the Consultant shall provide agreed additional documentation which is not listed below which would be required by the Employer to construct the Works in addition to the Design Development and Overall Design Document Deliverables required by the Board as listed under Appendix K of the Building Contract which includes those Deliverables required in advance of (Stage 2) Full Business Case:

| Drawing No. | Description / Title | Scale | Size |

# 5. Commissioning, Completion and Post Completion

## Overview

5.1 This Work Stage shall be the Commissioning, Completion and Post Completion Phase of the Project and shall enable the Project to be commissioned and occupied. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development, the Construction Documentation and the Construction Phases Work Stages.

5.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage are suitable for properly constructing, commissioning and completing the Project in full compliance with the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the construction and completion programmes.

## Tasks

The Consultant shall:

5.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant as reasonably expected from the Consultant, make further appraisals of Project constraints.

5.4 Visit site in addition to as requested reasonably by the Employer.

5.5 Evaluate proposed amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

5.6 In conjunction with the other consultants, review as reasonably required by the Employer all subcontractor proposed commissioning procedures and report to the Employer.

5.7 Provide assistance to the Employer during the defects liability period in closing-out the defects.

5.8 Review and comment on all relevant guarantees, warranties and O & M manuals prepared by subcontractors and suppliers.

5.9 In preparation for Completion, inspect the Works as required by the Employer and provide inspection reports that in the opinion of the Consultant might prevent the Works being certified as completed together with recommendations for rectification of those defects. If required by the Employer and in conjunction with the Employer, the Consultant shall re-inspect the Works to verify that the defects have been rectified. These tasks are to be provided in a timely manner and where requested by the Employer, make appropriate representations on Employer's behalf to the Board in regards to the defects and their remedial works.

5.10 Review and comment within 10 days, all relevant "As-Built" documents as prepared by the subcontractors including drawings, specifications, schedules, manuals and maintenance instructions or any other documents as required by the Employer.

5.11 Attend commissioning and witness testing to review the satisfactory function and completion of relevant systems for compliance with the Consultant's design intent and specifications in accordance with the Project requirements.

5.12 Assist the Employer with the preparation and provision of the Project operation and maintenance manuals and the like as necessary for the Completion of the Project.

5.13 Assist in the preparing and updating the completion programmes as required by the Employer.

5.14 Liaise with other consultants and coordinate the provision of information and data as required by the Employer to comply with the construction and/or commissioning programme to ensure that there is no delay in providing information to the relevant parties.

5.15 Check the Documentation produced during this Work Stage against the Planning consents and other Project requirements such as the Employer's Requirements. Report on any non-compliance and provide mitigation recommendations on same.

5.16 Provide all necessary information to the CDM Coordinator to be included in the Health and Safety File for the purposes of the CDM Regulations.

5.17 Provide final "As-Designed" Documentation drawings and other documents incorporating all latest information including those issued as advices or sketches by the Consultant and the relevant information and submittals from the subcontractors. The architectural "As-Designed" drawings are to include information provided by others such as all plumbing, sanitary, rainwater and drainage installations. All "As-Designed" Documentation must be completed and issued in compliance with the Programme and with the general progress of the Works to ensure that such progress is not delayed and disrupted.

5.18 Provide other Architectural and Lead Consultant duties that may be required by the Employer to secure the Completion of the Works.

5.19 Provide the Employer with a written statement in a format to be agreed certifying that the Works are consistent with the Consultant's latest design Documentation and the Project requirements such as the Employer's Requirements.

5.20 Participate in inspections which shall be conducted throughout the first 52 weeks, if not at 52 weeks after the date of Completion.

5.21 Assist the Employer in the settlement of any differences in relation to the Works that may arise between the Board and the Employer or between the Employer and any subcontractor or supplier up to and prior to entering into formal dispute resolution mechanism such as adjudication or arbitration.

**SCHEDULE 2, PART 2**

**CONSULTANT COORDINATION MATRIX**

Contract Data Part 1

Schedule 2

Part 2

# DESIGN CONSULTANT RESPONSIBILITY MATRIX

NEW SOUTH GLASGOW HOSPITALS (NSGH)

June 2010

NHS GREATER GLASGOW AND CLYDE
NEW SOUTH GLASGOW HOSPITALS (NSGH)

BROOKFIELD CONSTRUCTION (UK)

# Design Consultant Responsibility Matrix

## June 2010

**NHS GREATER GLASGOW AND CLYDE**
**NEW SOUTH GLASGOW HOSPITALS (NSGH)**

**BROOKFIELD CONSTRUCTION (UK)**

The Consultant with the primary lead responsibilities including the overall coordination for the various design tasks are as follows, but not necessarily limited to:

Note:

1. All other Consultants are required to assist by providing definitive and complete design advice and information in a timely manner to the Lead Consultant responsible for that design task.
2. The responsibilities below exclude the design tasks associated with the Laboratory Building.

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | Notes |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.42 | Lightning protection design intent | | L | | | | | | | | | | | | | | | | | | | Detailed design by Supply Chain |
| 3.43 | Structure corrosion protection design | | | | L | | | | | | | | | | | | | | | | | Helicopter Consultant to provide input for the helipad |
| 3.44 | Structural fire protection design | | | | L | | | | | | | | | | | | | | | | | Input from other Consultants as necessary |
| 3.45 | Plant support design and co-ordination with primary structure | | | | L | | | | | | | | | | | | | | | | | |
| 3.46 | Integration of temporary works design into permanent works where required | | | | L | | | | | | | | | | | | | | | | | |
| 3.47 | Secondary steelwork design | | | | | | | | | | | | | | | | | | | | L | Subcontractor's design. Structural Engineer to check and confirm acceptable to the primary structure |
| 3.48 | Masonry wall stability design including wind posts | | | | L | | | | | | | | | | | | | | | | | |
| 3.49 | Lintel specification | | | | L | | | | | | | | | | | | | | | | | Supply Chain to detail the Lintel schedule if necessary |
| 3.50 | Movement joint design (in structure) | | | | L | | | | | | | | | | | | | | | | | |
| 3.51 | Movement joint design (in finishes) | L | | | | | | | | | | | | | | | | | | | | Structural Engineer input required |
| 3.52 | Fire engineered solutions including reports, design notes and deviation requests | | | | | | | | | L | | | | | | | | | | | | |
| 3.53 | Incorporation of the fire engineering related design onto the documentation eg. compartmentation and fire zones etc | L | L | | L | | | | | | | | | | | | | | | | | For their respective design discipline with input from the Fire Engineer |
| 3.54 | Incorporation of acoustic, noise and vibration design into the design documentation | L | L | | L | | | | | | | | | | | | | | | | | For their respective design discipline with input from the Acoustic Engineer |
| 3.55 | Fire extinguisher and exit sign location and quantity | | | | | | | | | L | | | | | | | | | | | | Fire Engineer to draft brief. Architect to provide drawings |

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | Notes |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.56 | Wind load study and design | | | | L | | | | | | | | | | | | | | | | | CFD and wind tunnel testing if required is an additional scope |
| 3.57 | Façade (external cladding, roofing etc) and envelope design coordination | L | | | | | | | | | | | | | | | | | | | | Input from Supply Chain and Other Consultants |
| 3.58 | Roofing purlins and wall cladding girts design (eg. for plantrooms) | | | | | | | | | | | | | | | | | | | | L | Detailed design from Supply Chain |
| 3.59 | Enabling works and project staging documentation | | | | | | | | | | | | | | | | | | | | L | Architect and Landscape Architect to assist with documentation |
| 3.60 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 3.61 | Incorporation of major services builders work in connection in structure | | | | L | | | | | | | | | | | | | | | | | Major builders work penetrations are those equivalent to and larger than 100mm diameter area. Input from Supply Chain and Other Consultants |
| 3.62 | Incorporation of services in connection with finishes | L | | | | | | | | | | | | | | | | | | | | Input from the Services Engineer and the Supply Chain |
| 3.63 | Production of co-ordinated BWIC services information | | | | | | | | | | | | | | | | | | | | L | Subcontractor's design |
| 3.64 | Integration of special fixings into design | L | | | L | | | | | | | | | | | | | | | | | Depending on the stage of the project. Based on Subcontractor information. |
| 3.65 | Lift performance/ type/spec design | | | | | | | | | | | | | | L | | | | | | | |
| 3.66 | Lift car interior and other finishes accessories | L | | | | | | | | | | | | | | | | | | | | |
| 3.67 | Building Services drawings for ceiling mounted services | | L | | | | | | | | | | | | | | | | | | | Input from Supply Chain. Services Engineer will show grilles, chilled beams and radiant panels |
| 3.68 | Reflected ceiling plans | L | | | | | | | | | | | | | | | | | | | | Architect to specify grid setout, type, height. MEP Subcontractor to coordinate and provide details and positions of all ceiling mounted services for Architect's coordination review. |

Dear Paul

**New South Glasgow Hospital Project**

We acknowledge receipt of the instruction document (Appendix 2 of the Agreement for the above project) from you to continue to provide the *services*, as defined in the Agreement dated 18 June 2010, by commencing and carrying out Stage 3 and Stage 3A of the *services*.

Please find attached a copy of this document, duly signed by Nightingale Associates.

We would refer to our discussion during week commencing 06 June 2011, and in particular our email to you dated 09 June 2011, regarding the ongoing resolution of the programme. Notwithstanding the reference and attachment to this instruction, of programme 'BCL-GS3-PR3-0004', Brookfield Multiplex and Nightingale Associates are working together to establish the exact timings for the delivery of Stage 3 and Stage 3A *services*.

Yours sincerely

[redacted]

**Paul Hewes**
UK Business Director
Nightingale Associates

Att

cc: Neil Murphy, Principal – London Office, Nightingale Associates (letter and attachment)

**This is Appendix 2 to the foregoing Agreement between Brookfield Construction (UK) Limited**

**and**

**Nightingale Associates Limited**

**BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S1JL ("the *Employer*"); and

**NIGHTINGALE ASSOCIATES LTD** having its Registered Office at 87-91 Newman Street, London, W1T 3EY (the "*Consultant*").

WHEREAS

1. The *Employer* and the *Consultant* entered into the Agreement dated 18 June 2010 whereby the *Consultant* is to Provide the Services in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Consultant* to continue to Provide the Services by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3 | Final design and construction of the New Hospitals Building | Final design and construction of the New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of soft landscaping. |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Consultant* to commence and carry out Stage 3 and Stage 3A of the *services* ie the Final design and construction of the New Adult Acute and New Children's Hospitals and *services* in connection with the demolition of the surgical block and associated buildings.

**This is Appendix 2 & 3 to the foregoing Agreement between Greater Glasgow and Clyde Health Board**

**and**

**Brookfield Construction (UK) Limited**

**GREATER GLASGOW AND CLYDE HEALTH BOARD** of J B Russell House, Gartnavel Royal Hospital, 1055 Great Western Road, Glasgow G12 0XH ("the *Employer*"); and

**BROOKFIELD CONSTRUCTION (UK) LIMITED** having its principal place of business at 23 Hanover Square, London, W1S 1JB (the "*Contractor*").

WHEREAS

1. The *Employer* and the *Contractor* entered into the Agreement dated 18th December 2009 whereby the *Contractor* is to Provide the Works in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Contractor* to continue to Provide the Works by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3 | Design and Construct New Hospitals Building | Design and Construction of the New Adult Acute and Children Hospitals Building and Energy Centre. |
| Stage 3A | Demolition of Surgery Block | Demolition of surgical block and associated buildings and completion of soft landscaping |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Contractor* to commence and carry out Stage 3 and Stage 3 A of the *works* i.e. the Design and Construction of the New Hospitals Building, and demolition of the surgical block and associated buildings and completion of soft landscaping.
2. The *Contractor* will continue to Provide the Works in accordance with the Agreement.

3. The Agreement Is amended and modifled to the followlng extent:-

i. The Base Date for monitoring the *Employer* Accepted Risk on Inflation for all Stages will be 1st January 2011.

ii. The Start on Site date for Stage 3 Is amended from 28th February 2011 to 28th March 2011 at which point the *Employer* will ensure the provision of a totally clear site for access by the *Contractor*. It is accepted by the *Employer* that the *Contractor* shall be entitled to undertake enablIng works prior to this date.

iii. The Start on Site Date for Stage 3A is amended from 20th July 2015 to 17th August 2015

iv. Option X5 Clause, the Completion Date for Section 2 (Stage 3 New Hospital) is amended from 31st January 2015 to 28th February 2015 and the Completion Date for Section 3 (Stage 3A Demolition) Is amended from 19th July 2016 to 16th August 2016

v. Contract Data Part One and Contract Data Part Two forming part of executed Contract dated 18th December 2009, is amended and supplemented as follows:-

Employers Requirements Supplemental Information –

- BIW Log (as included within Folder B1 of the Instruction to Proceed Bible titled The BIW Log (2010 ItP) – (FINAL) )
- RFI Log (as included within Folder B1 of the Instruction to Proceed Bible titled The RFI Log (2010 ItP) – (FINAL) )
- Clarification Log (as included withIn Folder B1 of the Instruction to Proceed Bible titled The Clarification Log (2010 ItP) – (FINAL))
- M+E Clarification Log (as included within Folder B1 of the Instruction to Proceed Bible titled The M&E Clarification Log (2010 ItP) – (FINAL))
- Laboratory Log (as Included withIn Folder B1 of the Instruction to Proceed BIble) (as executed Agreement 18th December 2009)
- Sustainability Log (as included within Folder B1 of the Instruction to Proceed Bible titled The Sustainability Log (2010 ItP) – (FINAL))

- Stage 3 Instruction to Proceed Log December 2010 (new) (as included within Folder S of the Instruction to Proceed Bible)

Contractors Proposals –

- Volume 1 (as included with Folder C1 of the Instruction to Proceed Bible) – Schedule of Accommodation titled SOA 1:200 Drawings. By reference to the 1:200 drawings included within Volume 13 of this agreement the areas denoted on the drawings represent the agreed position between the Parties to the Contract. The Parties agree to use reasonable endeavours to prove functionality and to maintain the overall areas as currently indicated and the *Employer* agrees that any adjustments to areas during the remaining 1:50 review process (excluding Plantrooms and Service Risers with the exception of those adjustments due to a change within the Employer's Requirements) that cannot be accommodated within the Departmental areas or within the overall building envelope that give rise to an increase in area will be an additional Employer Risk. The Parties accept that the 0.5% risk accepted by the Contractor within the Agreement of 18th December 2009 has already been absorbed by the Contractor.
- Volume 2 (as included within Folder D1 of the Instruction to Proceed Folder) – Drawings.
- Volume 3 (as included within Folder F1 of the Instruction to Proceed Bible) – Design Narratives
- Volume 4 (as included within Folder G1 of the Instruction to Proceed Bible) – Specifications
- Volume 5 (as included within Folder H1 of the Instruction to Proceed Bible) – Components titled 2010 ItP Project Bible - Folder H1 – Components (FINAL)
- Volume 6 (as included within Folder T of the Instruction to Proceed Bible) – Equipment (as amended 16th December 2010). These revised Equipment Schedules define the current position agreed between the Parties to the Contract and thus the quantities and coding identified therein take precedence over the Drawings included

within Volumes 2, 13, 14, and 15 of this Appendix 2 and 3 agreement. For purpose of clarity any change in quantity or coding will be an Employer Risk pursuant to Risk Items 25, 39 and 40 on the Stage 3 NSGH Board Risk Schedule included within the Contract.

- Volume 7 (as included within Folder I1 of the Instruction to Proceed Bible) – SHTM (as executed Agreement 18th December 2009)
- Volume 8 (as Included within Folder J1 of the Instruction to Proceed Bible) – ADB titled EDS ItP Batch 1 - ZBP updates_141210" & "EDS ItP Batch 2 - ZBP updates_141210" & "2900-NSGH-Environmental matrix_comments-011210 (Final)
- Volume 9 (as included within Folder K1 of the Instruction to Proceed Bible) – Programme titled Stage 3 Summary Master Programme, BCL-GSM-CN02-0001 (FINAL)
- Volume 10 (as included within Folder L1 of the Instruction to Proceed Bible) – Logistics (as amended 16th December 2010)
- Volume 11 – Not Used
- Volume 12 – Commercial (as executed Agreement 18th December 2009 unless amended by this Appendix 2 & 3, or Compensation Event already issued, or Project Managers Instruction already issued)
- Volume 13 (as Included within Folder U of the Instruction to Proceed Bible) (new) – Masterplan & Architecture Proposals (Agreed Appendix k drawing schedule)
- Volume 14 (as included within Folder V of the Instruction to Proceed Bible) (new) – M&E Engineering Proposals (Agreed Appendix k drawing schedule)
- Volume 15 (as included within Folder W of the Instruction to Proceed Bible) (new) – Civil / Structural Engineering Proposals (Agreed Appendix k drawing schedule)
- Volume 16 Critical Failures (as included within Folder X of the Instruction to Proceed Bible titled Appendix X1 (FINAL)

- Volume 17Planning Consents Pack (as included within Folder Y of the Instruction to Proceed Bible)

vi. Compensation Events and Project Managers Instructions as issued prior to execution date of this Appendix 2 & 3

**AGREEMENT**

between

**BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S 1IB ("the *Employer*"); and

**ZISMAN BOWYER & PARTNERS LLP** having its Registered Office at 1 Eton Street, Richmond, Surrey TW91EF (the "*Consultant*").

WHEREAS: -

The *Employer* has been appointed to carry out the design and construction of the New South Glasgow Hospital ("the Project") and wishes to have the *Consultant* Provide the *services* in connection with the same as follows: -

| Stage | Heading | Outline Activities |
|---|---|---|
| Stage 1 | Design and Construct Laboratories | Detailed design and construction of the Laboratories and FM Hub. Concurrent with Stage 2. |
| Stage 2 | Design Development - New Hospitals Building | Detailed design of New Adult Acute and New Children's Hospitals to Full Business Case Submission. Concurrent with Stage 1. |
| Stage 3 | Final Design of the New Hospitals Building | Completion of detailed design of New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final | Demolition of surgical block and |

| Stage | Heading | Outline Activities |
|---|---|---|
| | Landscaping | associated buildings and completion of soft landscaping. |

**NOW IT IS AGREED THAT**

1. The *Consultant* will Provide the Services in accordance with the NEC Professional Services Contract, Option A: Priced Contract with activity schedule June 2005 (as the same are amended in by the Contract Data) ("*the conditions of contract*") and the principles stated in Appendix 1 of this Agreement.
2. The *Employer* will pay the *Consultant* in accordance with Section 5 of the *conditions of contract.*
3. The *Consultant* acknowledges and agrees that as at the Contract Date the Consultant shall be authorised to proceed with the *services* in connection with Stage 2 only. The *Consultant* is authorised to commence and proceed with Stages 3 and 3A upon written authorisation given by the *Employer* in the form attached as Appendix 2 hereto. In the event that the *Consultant* undertakes any work in connection with Stages 3 or 3A without such written authority from the *Employer*, the *Consultant* does so at his own cost and risk.
6. The documents forming part of this contract are:
   - 6.1 this Agreement
   - 6.2 the *conditions of contract*,
   - 6.3 Contract Data part one — data provided by the *Employer*
   - 6.4 Contract Data part two - Data provided by the *Consultant*
7. In the event of conflict between the documents forming part of this contract the following order of priority will apply:-
   - 7.1 This Agreement (excluding Appendix 1)
   - 7.2 The *conditions of contract*,
   - 7.3 Contract Data Part One (including the Scope).
   - 7.4 Contract Data Part Two
   - 7.5 Appendix 1 of this Agreement

IN WITNESS WHEREOF these presents consisting of this and the 2 preceding pages together with Appendices 1 and 2 and the Contract Data part one (including its Appendices) and Contract Data part two are executed as follows: -

**This is Appendix 1 to the foregoing Agreement between Brookfield Construction (UK) Limited**

**and**

**Zisman Bowyer & Partners LLP**

**Principles governing the Agreement**

**Definitions**

| **Defined Term** | **Definition** |
|---|---|
| "Building Contract" | means the contract between or to be entered into between the Employer and Greater Glasgow and Clyde Health Board in relation to the design and construction of the New South Glasgow Hospital. |
| "Overriding Objective" | means the objective set out in Paragraph 4. |
| "Overriding Principle" | means principle set out in Paragraph 1. |
| "Professional Advisor" | means any party providing specialist advice to the *Employer*. |

1. The Overriding Principle of this Agreement is to work together with the *Employer* and its Professional Advisers in a co-operative and collaborative manner to achieve the Overriding Objective acting in good faith and in the spirit of mutual trust and respect.
2. In order to work together in co-operative and collaborative manner the *Employer* and the *Consultant* agree that they should each give to and welcome from each other, and any Professional Adviser, feedback on performance and shall share information openly and highlight any difficulties at the earliest practical time. The parties shall support collaborative behaviour and confront behaviour that does not comply with the Overriding Principle.
3. The terms of the Agreement shall be interpreted according to their natural meaning but in the event of any ambiguity in their natural meaning they shall be interpreted so as to give best effect to the Overriding Principle.
4. In entering into the Agreement the parties' Overriding Objective is by working together in accordance with the terms of the Agreement to achieve the successful delivery by the *Consultant* of the *services*: -

4.1 carry out the services exercising reasonable skill and care having due regard to the standard and functionality defined within the Employer's Requirements as set out in the Building Contract;

4.2 at a cost that offers best value for money taking into account whole life (as well as capital) costs over the proposed design life of the *works* through the application of the principles of value engineering; and

4.3 to use reasonable endeavours to achieve the timescale acceptable to the *Employer* and agreed between the parties without compromising health and safety or the *Employer*'s required standards and the quality of the completed *works* and in any event before the Completion Dates set out in the Building Contract.

5. The *Consultant* shall carry out the management and be responsible for the delivery of the *services* in accordance with the Agreement and shall work and liaise with the *Employer* and any of its Professional Advisers as necessary or appropriate or as requested by the *Employer* in order to achieve the Overriding Objective.

6. The *Consultant* shall engage persons from the key people set out in the Contract Data — Part two in the performance of the *services* to be provided by the *Consultant* under the Agreement and shall not replace any of the key people without the approval of the *Employer* (such approval not to be unreasonably withheld). The *Consultant* will ensure that where a member of its key personnel is replaced that they have the skills, qualifications, experience and ability to provide the best service to the *Employer*.

7. Throughout the period of the Agreement the performance of the *Consultant* shall in relation to the *services* be monitored against the Key Performance Indicators defined in the Scope and/or the Contract Data and/or the Contract Data to the Building Contract.

8. During the period of the Agreement amendments may be made to the Key Performance Indicators by agreement between the *Employer* and the *Consultant* except where the Client is required by the Scottish Government or regulatory bodies to provide Key Performance Indicators. In such cases the *Employer* will provide information on any requirements to the *Consultant* as soon as reasonably practicable.

9. At 2 monthly intervals or at such other intervals as the parties may agree during the performance of the Agreement, the *Employer* and the *Consultant* shall undertake formal reviews of the performance of the *Consultant* against its Key Performance Indicators. The *Employer* and the *Consultant* will discuss any way in which the performance of the *Consultant* may be improved.

10. The *Consultant* shall keep a comprehensive record as specified by the *Employer* of all performance monitoring carried out under the Agreement in such form as the *Employer* may reasonably request for a period of 6 years after the expiry or earlier termination of this

Agreement and shall provide copies of such records to the *Employer* for the *services* to enable him to record, disseminate and compare the performance of the *Consultant*. Each record shall be retained in a format that can be read and copied and kept with the IT requirements on an electronic based database.

11. The *Consultant* shall throughout the period of the Agreement look for and seek to achieve continuous improvement in the quality of the *services* while reducing whole life costs, wastage (in accordance with WRAP guidance), and the time taken to deliver the *services*. Innovation and best practice will be shared with the *Employer*.

12. To achieve the aim set out in Clause 11 the *Consultant* shall actively participate in the continuous improvement "learning sets" with the Employer in relation to the Agreement. This commitment is likely to involve meetings at least once every 3 months in relation to the *services* and meetings at least once every 6 months in relation to the lessons to be learned. The *Consultant* shall also use reasonable endeavours to procure the involvement of any of its subconsultants in such learning sets where considered appropriate.

3

**If the Employer has identified work which is to meet a stated *condition* by a *key date***

The *key dates* and *conditions* to be met are

| **Condition to be met** | **key date** |
|---|---|
| Stage 2: Completion of Detailed design to allow FBC to be submitted to Scottish Government by 8 November 2010. | 31 October 2010 |

•

**If Option X5 is used**

- The *completion date* for each *section* of the *services* is

| Section | Description | *completion date* |
|---|---|---|
| 1 – Stage 1 | Laboratories | 10 March 2012 |
| 1 - Stage 2 | Design of Adult and Childrens for FBC | 8 Nov 2010 |
| 2 - Stage 3 | New Hospital | 31st January 2015 |
| 4 – Stage 3A | Demolition of surgical block | 19 July 2016 |

**If Option X8 is used**

- The *collateral warranty agreements* are:

| Agreement reference | Third Party |
|---|---|
| Form as set out in Schedule 1 | Greater Glasgow Health Board<br>Others as required by the Client and requested by the *Employer* |

**If Option X18 is used**

The *end of liability date* is twelve (12) years after the Completion of the whole of the *services*.

**If Option Z is used**

*The additional conditions of contract are*

**Amendments and additions to existing Clauses:**

**Z 1 Additions to Clause 11.2 - Identified and Defined Terms**

11.2(14) "Agreement" is the form of agreement entered into between the *Employer* and the *Consultant* in respect of the services forming part of this contract

11.2(15) "the Client" is the Greater Glasgow Health Board.

11.2(16) "Full Business Case" is the Client's submission to the Scottish Government for approval to proceed with Stage 3.

11.2(17) "Laboratories" is the new laboratory block as the same is more particularly described in the Scope.

11.2(18) "Stage" has the meaning ascribed to it in the recital to the Agreement.

11.2(19) "*conditions of contract*" is the NEC Professional Services Contract, Option A: Priced contract with activity schedules, June 2005 (as the same are amended in by the Contract Data.

11.2(20) "Design Deliverables" are those elements of design to be delivered by the *Consultant* to the *Employer* during Stage 2 as set out in Schedule 3.

11.2(21) "Documents" includes, without limitation, all technical information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things provided or to be provided by or on behalf of the *Consultant* in connection with the *services*.

**Z2 Amendment to clause 11.2 (4) - Identified and Defined Terms**

Delete and replace with "the Contract Date is the date of execution of this contract"

**Z3 Amendment to Clause 16.1 – Ambiguities and inconsistencies**

Add the following sentence to the end of Clause 16.1

"Instructions issued under this clause do not necessarily give rise to a compensation event"

**Z4 Addition to Clause 16 – Ambiguities and inconsistencies**

"16.2 Inconsistencies and ambiguities between (a) the NHS Mandatory Documentation and NHS Guidance Documentation and building control or (b) between the NHS Mandatory Documentation and NHS Guidance Documentation and the Schedules of Accommodation or (c) between the NHS Mandatory Documentation and NHS Guidance Documentation and any information issued to the Consultant by the Employer, are to be dealt with in accordance with the procedures set out in the Scope."

**Z5 Amendment to Clause 18 – Prevention**

Add new Clause 18.2

"Notwithstanding the provisions of Clause 60 and subject to Clause 18.4, the *Consultant*'s sole right to payment in respect of the occurrence of an event under Clause 18.1 is as provided in Clause 92."

Add new Clause 18.3

"The *Consultant* and the *Employer* take all reasonable steps to mitigate the effect of the occurrence of an event under Clause 18.1."

Add new Clause 18.4

"If the *Employer* instructs the *Consultant* to take steps to Provide the Services in a manner not prevented by the occurrence of an event under Clause 18.1, and such instruction changes the Scope, the *Consultant* is entitled to notify a compensation event under clause 60."

**Z6 Amendment to Clause 21.2 - The *Consultant's* design**

Delete and replace with: "The *Consultant's* obligation is to perform the *services* using the degree of skill and care that would reasonably be expected of a competent professional designer experienced in carrying out design activities of a similar nature, scope and complexity to those comprised in the *services*.

**Z7 Addition to Clause 31 – The programme**

"31.4 The *Consultant* complies with section 6.8 of Volume 2/1 of the Employers Requirements Section of the Works Information in the Building Contract in connection with commissioning and handover for the whole of the *works*. "

**Z 8 Addition to Clause 51 - Payment**

51.6 If the amount to be paid at an assessment date exceeds the amount for the assessment interval as shown in the *Consultant*'s cash flow forecast (as contained in Contract Data Part Two), then the *Employer* certifies payment up to the amount forecast. Any amount exceeding the forecast is not certified but held over to the next assessment interval, where if amount to be paid at the next assessment date again exceeds the *Consultant*'s cash flow forecast for the assessment interval the process is repeated. This clause does not apply where the *Consultant* provides a valid and acceptable reason for an exception to the limitation of the *Employer's* assessment certification.

**Z9 Amendment to Clause 60.1(11)**

Add new bullet point 6, "does not arise from a sub-consultant ceasing to trade or becoming insolvent (or other equivalent event)"

Add at the end, "provided that the occurrence of such event only entitles the Consultant to a change to the Completion Date or a change to a Key Date and not to a change in the Prices and Clauses 61 – 65 are interpreted accordingly."

**Z10 Amendment to Clause 61.4 - Notifying of Compensation events**

In line 15 delete "two" and substitute "four"

**Z11 Amendment to Clause 70 – the Parties' use of material**

Delete and replace with: -

"70.1 The copyright and all intellectual property rights in the Documents remain vested in the *Consultant* or the person responsible for the production (as the case may be).

70.2 Where documentation (including drawings) is (or are) provided by the *Employer* copyright and such documentation and drawings remain vested in the *Employer*.

70.3 The *Employer* has an irrevocable, non-exclusive royalty free licence to copy and use the Documents and to reproduce the designs contained in them for any purpose relating to the *works* including (but without limitation) the

construction, completion, maintenance, promotion, advertisement, reinstatement, repair, any extension of the *works* and for dissemination within the NHS as part of the feedback of information to better or enable the NHS to realise improvements in its methods and practice of construction and in the design and procurement of its construction.

70.4 The *Consultant* shall not be liable for any use of the *Employer* of the Documents for any purpose other than that for which the same is prepared and provided."

**Z12 Addition to Clause 81.1 – Insurance cover**

Add to the Insurance Table:

| | |
|---|---|
| Liability for negligent management or design – professional indemnity insurance | The amount specified in the Contract Data for any one claim or series of claims arising out of one single incident (save in relation to claims relating to pollution and contamination, date recognition, and asbestos for which the indemnity limit is £5 million in the aggregate) during any period of insurance which shall not be more than 12 months from the date the *Consultant* starts to Provide the Services for a period of twelve years from Completion of the whole of the *services*, with insurers of good repute carrying on business in the European Union provided always that such insurance is available at rates and terms which are commercially reasonable to Consultants of a similar size and standing in the UK In determining whether or not insurance is available as aforesaid, the financial |

| | |
|---|---|
| | characteristics and claims' record of the Consultant shall be ignored. |

**Z13 Amendment to Clause 82.1**

Delete.

**Z14 Amendment to Clause 90.4 – Reasons for Termination**

Add at the end "notwithstanding that a delay to the Completion Date has previously been notified to the *Consultant* in respect of such event"

**Z15 Addition to Clause 90**

90.5 The *Employer* may terminate the *Consultant's* obligations to Provide the Services for Stages 3 and/or 3A either (i) on completion of Stage 2 or (ii) if the Full Business Case is not approved by the Scottish Government.

**Z16 Addition to 91 - Procedures on termination**

"91.2 The *Consultant* hands over to the *Employer* all hard copy and electronic data for the *Consultant's* design including material prepared by a sub-consultant, so far as prepared at termination. At such termination the *Employer* has the right to use such material for completion of the *services.*

**Z17 Amendment to Clause 92 - Payment on Termination**

92.3 : - "On termination the *Employer* shall not be liable to the *Consultant* for loss of profit, loss of expectation of profit, loss of use, loss of production or indirect and consequential damages."

**Z18 Addition to Clause W2.1(1) – Dispute Resolution**

Add at the end: - "The word "dispute" in this Clause W2 includes any difference under or in connection with this contract".

**Z19 Addition to Clause W2.3(8) – the adjudication**

After "reasons" add the words, "(which will be in writing)"

**Z20 Addition to Clause W2.3(11) – The adjudication**

Delete the first sentence and replace with, "The decision of the *Adjudicator* is binding until the dispute is finally determined by the *tribunal* or by agreement."

**Z21 Amendment to Clause X8 – Collateral Warranty Agreements**

Add at the end: "and provides them to the *Employer* within 5 days of the *Employer's* written request".

**Z22 New Clause - Confidentiality**

Z22.1 The *Consultant* shall not append their name or give authority to the appending of their name to any publicity concerning this agreement or the services or indulge in any publicity concerning the services without the prior written consent of the *Employer*.

Z22.2 The *Consultant* warrants the accuracy of all information of a legal, commercial or financial nature provided by them to the *Employer*. Details must be provided by the *Consultant* to the *Employer* regarding any matter as and when they take place, which affects the legal, commercial or financial standing of the *Consultant*.

Z22.3 The *Consultant* undertakes to treat any information derived from or obtained in the course of the Agreement as confidential and to take all the necessary precautions to reasonably ensure that its employees and sub-consultants and their employees treat any information as confidential and in doing so the *Consultant* shall ensure that its employees and sub-consultants and their employees keep secret and do not disclose information of a confidential nature by him or them by reason of the Agreement.

**Z23 New Clause – Data Protection**

Z23.1 The *Consultant* warrants and will at all times comply with the provisions of the Data Protection Act 1998 ("the 1998 Act") and any other subordinate legislation enacted pursuant thereto.

Z23.2 The *Consultant* shall only undertake such processing of personal data as is reasonably required in connection with the performance of its obligations under pursuant to the Agreement. To the extent required by the 1998 Act the *Consultant* shall notify the Information Commissioner of any processing which is being carried out and maintain any such notification in full force and effect.

Z23.3 The *Consultant* in its role as Data Processor undertakes to comply with the obligations imposed on a Data Controller under the 7th Data Protection Principle as set out in Part 1 of Schedule 1 of the 1998 Act in respect of all personal data processed pursuant to this Contract.

Z23.4 The *Consultant* shall not, other than in accordance with the 1998 Act, transfer any personal data to any country or territory outside the European Economic Area.

Z23.5 Terms defined within the 1998 Act shall have the same meaning when used in this clause.

**Z24 New Clause – Failure to deliver Collateral Warranty Agreements**

When any Collateral Warranty Agreement is not delivered as required pursuant to Clause X8, one quarter of any amount due to the *Consultant* is retained in assessments of the amount due until the *Consultant* has delivered such Collateral Warranty Agreement to the *Employer*.

**Z25 New Clause – Third Parties**

The *Consultant* performs its obligations under this contract in such a manner and at such times that no act, omission or default of the *Consultant* in relation thereto constitutes, causes or contributes to any breach by the *Employer* of any third party agreement or any other obligation it may owe to a third party relating to the works or the Project, details of which the *Consultant* was made aware of prior to the Contract Date.

**Z26 New Clause - Inconsistencies**

In the case of any inconsistency between these *additional conditions of contract* and the other terms of the contract, the *additional conditions of contract* prevail. In the event of any inconsistency between the Core Clauses and any other term of this contract (except these *additional conditions of contract*) the Core Clauses prevail.

**Z27 New Clause – Approval**

No inspection, testing, approval or review nor any omission to inspect, test, approve or review on the part of the *Employer* diminishes any duty or liability under this contract of the *Consultant*.

**Z28 New Clause – Set off**

Without derogating from its rights under this contract or under the *law of the contract*, whenever any sum of money is recoverable by the *Employer* against the *Consultant*, such sum is deducted from any sum due or which may become due to the *Consultant*.

**Z29 New Clause – Security**

Z29.1 The *Consultant* acknowledges that the Site forms part of the larger Southern General Hospital site and that the Southern General Hospital is a live and functioning acute hospital. The Consultant takes measures to prevent its employees, sub-consultants and suppliers of the Consultant from entering into or otherwise interfering with the operation of the existing Southern General hospital, except for access to or egress from the Site.

Z29.2 The *Employer* may instruct the *Consultant* to take reasonable measures to prevent unauthorised persons being admitted on the Site.

Z29.3 The *Consultant* does not take photographs of the Site or the works or any part of them unless he has obtained the approval of the *Employer*.

Z29.4 The *Consultant* takes the reasonable measures needed to prevent his and his sub-consultants' people taking, publishing or otherwise circulating such photographs.

**Z30 New Clause – Retention**

In respect of each invoice issued by the *Consultant* pursuant to Clause 5 during Stage 2 the *Employer* shall be entitled to retain 10% of the amount due which shall be released on delivery of the Design Deliverables to the *Employer*. No amount shall be retained by the *Employer* following the completion of the *services* relating to Stage 2.

**SCHEDULE 1**

**FORM OF COLLATERAL WARRANTY AGREEMENT**

22

**CONSULTANT'S COLLATERAL WARRANTY**

This Agreement is among

(4) **GREATER GLASGOW HEALTH BOARD** of Dalian House, 350 St Vincent Street Glasgow, G3 8YZ ("the Beneficiary" which expression shall include its successors In title or permitted assignees under this Agreement)

(5) **BROOKFIELD CONSTRUCTION (UK) LIMITED** (Registered number 3808946 of 23 Hanover Square, London, United Kingdom, W1S 1JB ("Main Contractor" which term shall include any successor including any parties taking over the obligations of Main Contractor. under the Project Agreement)

(8) **ZISMAN BOWYER & PARNERS LLP**, (registered number OC310053) whose registered office is at 1 Eton Street, Richmond, Surrey, TW19 1EF ("the Consultant")

WHEREAS:

A The Beneficiary has entered or is about to enter into an agreement with the Main Contractor (°the Building Contract") In connection with the design and construction of the New South Glasgow Hospital, Govan, Glasgow ("the Project").

B The Main Contractor has engaged or is about to engage the Consultant under an appointment ("the Appointment), which expression shall Include all documents incorporated therein and any agreed amendment thereto, to carry out mechanical and electrical design services as more particularly described in the Appointment ("the Services"), which expression shall Include any additional services performed by the Consultant under the Appointment including In connection with any modifications or variations made thereunder.

C It is a condition precedent of the Building Contract that the Consultant, the Main Contractor and the Beneficiary enter into this agreement ("this Agreement").

NOW IT IS AGREED:

1. The Consultant warrants and undertakes to the Beneficiary that it has compiled and will continue to comply with all the terms and obligations under the Appointment on the Consultant's part to be performed and observed and shall complete the Services in accordance with the Appointment.

2. Without prejudice to Clause 1 of this Agreement, the Consultant further warrants and

undertakes to the Beneficiary that:

2.1 it has exercised and will continue to exercise all the reasonable skill, care and diligence to be expected from a competent and qualified professional designer experienced in carrying out services similar in nature, size and complexity to the Services including in the selection of goods and materials for the Project; and

2.2 it has not and will not specify for use in relation to the Project any products or materials not in conformity with relevant British or European standards or Codes of Practice or which are at the time of specification generally known within the United Kingdom to an experienced professional designer of works such as the Project to be deleterious to health and safety or to the durability of buildings and/or other structures and/or finishes and/or plant and machinery in the particular circumstances in which they are used;

Provided that:

2.3.1 the obligations of the Consultant under this Agreement shall be no greater in extent or quantity than if the Beneficiary had been named as joint employer with Main Contractor under the Appointment; and

2.3.2 the Consultant shall be entitled in any action or proceedings brought by the Beneficiary to rely on any limitation in the Appointment and to raise the equivalent rights in defence of liability (excluding counterclaim and set-off in respect of amounts due to the Consultant under the Appointment) as it would have if the Beneficiary had been named as joint employer with the Main Contractor under the Appointment.

3. The Beneficiary has no authority to issue any direction or Instruction to the Consultant in relation to the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5 below. The Beneficiary or its appointee has no liability to the Consultant in relation to amounts due under the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5.

4. The Consultant agrees that it will, if so required by notice in writing given by the Beneficiary, subject to Clause 6, below, accept the Instructions of the Beneficiary or its appointee, as the case may be, (which for the avoidance of doubt and without limitation may include a third party appointed by the Beneficiary to act as "the Employer" under this Appointment) to the

exclusion of the Main Con tractor in respect of the Project upon the terms and conditions of the Appointment. The Main Contractor acknowledges that the Consultant shall be entitled to rely on a notice given to the Consultant by the Beneficiary under this Clause 4 and further acknowledges that such acceptance of the Instructions of the Beneficiary or its appointee, as the case may be, to the exclusion of the Main Contractor shall not constitute any breach of the Consultant's obligations to the Main Contractor under the Appointment.

5. The Consultant further agrees that It MI not without first giving the Beneficiary not less than 35 days notice in writing exercise any right or purported right it may have to determine its employment tinder the Appointment, treat the same as having been repudiated by the Main Contractor, or discontinue the performance of any duties or obligations thereunder. Further, the Consultant shall within 14 days of giving the said notice, provide statements to the Beneficiary containing the following:

5.1 all amounts properly due and payable to the Consultant under the Appointment on or before the date of Issue of the said notice which remain unpaid;

5.2 in the reasonable estimation of the Consultant, the amount of any monetary claim (it any) asserted by the Consultant against the Main Contractor under the Appointment arising out of or in connection with the breach for which the said notice was served; and

5.3 where the Consultant intends to terminate the Appointment due to some default or breach of contract of a non-financial nature:

5.3.1 the provision of the Appointment alleged to have been breached or not fulfilled;

5.3.2 supporting information In reasonable detail to enable the Beneficiary to Identify the material facts;

5.3.3 the steps reasonably required to remedy the specified breaches or conditions not fulfilled;

5.3.4 the time within which the specified steps can reasonably be expected to be taken;

5.3.5 (if applicable) the amount of damages claimed and the basis of their calculation; and

5.3.6 (if applicable) the relief to be sought.

The Consultant warrants to the Beneficiary that to the best of the Consultant's knowledge and belief, having made all proper and appropriate enquiries, the statements submitted under this Clause 5 shall be true, complete and accurate statements of the amounts to which the Consultant considers Itself entitled. In the event that the Consultant shall delay in giving such notice and Information within the said 14 days, the period of 35 days shall be extended to correspond with the period of any such delay. The Consultant's right to determine its employment under the Appointment or to treat the same as having been repudiated or to discontinue performance shall cease if, within the said 35 day period (extended as appropriate) and subject to Clause 8 the Beneficiary shall give notice in writing to the Consultant requiring the Consultant to accept the instructions of the Beneficiary or its appointee to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of the Appointment.

6. It shall be a condition of any notice given by the beneficiary under clauses 4 or 5 above, that the beneficiary or its appointee, as the case may be, accepts liability for payment of the sums due under the appointment and detailed in the statement provided under clause 5 (and makes payment within a period of 28 days of such notice from the beneficiary), and for subsequent performance of the main contractor's obligations. Upon the Issue of any notice by the beneficiary under clauses 4 or 5, the appointment shall remain in full force and effect as if no right of determination of its employment under the appointment, or any right of the consultant to treat the appointment as having been repudiated by the main contractor. Had arisen and the consultant shall be liable to the beneficiary and/or its appointee, as the case may be, under the appointment in lieu of its liability to the main contractor.

7. The beneficiary may at any time following the issue of any notice by the beneficiary under clauses 4 or 5, serve a further notice that following the expiry. of 28 days from the giving of such notice the beneficiary will have no liability (save in respect of the beneficiary's antecedent breach) for any SUMB due or to become due to the consultant in respect of the period following expiry of the last mentioned 28 day period. The beneficiary may exercise any of its rights pursuant to clauses 4 or 5 on more than one occasion.

8. The consultant shall maintain for the period expiring 12 years after completion of the services

or until termination of the consultant's employment under the appointment, professional Indemnity insurance in an amount of not less than £.(101m [(ten million pounds)] sterling for any one claim or series of claims arising out of one single incident during any period of insurance which shall not be more than 12 months with insurers of good repute canting on business in the European union provided always that such insurance is available at rates and terms which are commercially reasonable to consultants of a similar size and standing in the UK. In determining whether or not insurance is available as aforesaid, the financial characteristics and claims' record of the consultant shall be ignored. The consultant shall immediately Inform the beneficiary if such insurance ceases to be available at rates and terms which are commercially reasonable in order that the consultant and the beneficiary can consider alternative means of best protecting their respective positions in respect of the project In the absence of such insurance provided that the beneficiary shall be entitled to require the consultant to maintain such lesser amount of professional Indemnity insurance as is available to the consultant at rates and terms which are commercially reasonable. As and when it Is reasonably requested to do so by the beneficiary (but not more than once in any period of Insurance) the consultant shall produce; for inspection documentary evidence satisfactory to the beneficiary (acting reasonably) that its professional indemnity insurance Is being maintained.

9. The consultant hereby grants to the beneficiary or Its appointee and all those authorised by the beneficiary an irrevocable, non-exclusive and royalty-free licence (which shall be capable of assignation) to use and reproduce all technical Information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things whatsoever provided or to be provided by the sub-contractor in connection with the project (the 'documents") for any purpose relating to the project including (but without limitation) the construction, completion, maintenance, promotion, advertisement, reinstatement, repair and any extension of the project and for dissemination within the NHS as part of the feedback of Information to better or enable the NHS to realise improvements in its methods and practice of construction and In the design and procurement of its construction. Such licence shall carry the right to grant sub-licenses and shall subsist notwithstanding that the appointment is terminated or the obligations and duties thereunder have been completed. For the avoidance of doubt, the grant of such licence or sub-licences shall not impose any additional liability on the

consultant. The consultant not assign or agree to assign the copyright in any of the documents without the prior written consent of the beneficiary. The consultant shall on reasonable demand provide to the beneficiary or its appointee and those authorised by the beneficiary additional copies of any documents on receipt of reasonable copying costs. The consultant shall not be liable for any use by the beneficiary of any of the documents for any purpose other than those authorised by this clause.

10. This agreement may be assigned on a maximum of two occasions in whole or in part by the beneficiary to any party to whom the beneficiary's interest In the main contract or any part thereof is assigned or disponed to without the consent of the main contractor or the consultant being required and any such assignation shall be effective upon written notice thereof being given to the main contractor and to the consultant. No other or further assignation of this agreement, other than permitted by this clause, by the beneficiary or any other party shall be permitted. The consultant shall not be entitled to assignor transfer any rights or obligations hereunder without the consent of the beneficiary.

11. The consultant undertakes that it will not raise as a defence to any action by the beneficiary far alleged breach of this agreement the fact that the obligations of the main contractor to the beneficiary in respect of the services have been released as a result of the termination of the building contract.

12. No failure, approval, act or forbearance on the part of the beneficiary in respect of any right of the beneficiary pursuant to this agreement shall constitute any waiver of any right of the beneficiary under raising out of this agreement nor relieve the consultant of any of its duties or obligations under or arising out of this agreement.

13. Any notice, consent or demand to be given or made by any party under this agreement (hereinafter called a "notice") shall only be validly served if In writing and delivered personally or sent by pre-paid first class recorded delivery post to the following address and marked for the attention of the following person in the case of each party:

| Party: | Address: | Person: |
|---|---|---|

| | | |
|---|---|---|
| Beneficiary | Dalian House, 350 St Vincent Street Glasgow, G3 8YZ | Head of Board Administration |
| Main Contractor | 23 Hanover Square, London W1S!JB | Paul Serkis |
| Consultant | 1 Eton Street, Richmond, Surrey, TW19 1EF | Steven Pardy |

Any party may by Notice to the other party/parties change its address or the title of the person for whose attention Notices are to be given or made pursuant to this Clause. Any such Notice shall be deemed to have been received:

13.1 if delivered personally, at the time of delivery;

13.2 in the case of pre-paid first class recorded delivery post, on the first Business Day after the date of posting.

If any Notice Is delivered after 5 p.m. on a Business Day, or at any time during a day which is not a Business Day, that Notice shall be deemed to have been received at 9 am, on the next Business Day. For the purposes of this Clause, "Business Day" means any day which is not a Saturday, a Sunday or a public holiday in Scotland. In proving service it shall be sufficient to prove that the envelope containing such Notice was properly addressed to the relevant party·and either delivered personally to that address or delivered into the custody of the postal authorities as a pre-paid first class recorded delivery letter. For the avoidance of doubt, Notices shall not be validly served if sent by email or fax.

14. No action or proceedings for any breach of this Agreement shall be commenced against the Consultant after the expiry of twelve years from Completion or earlier termination of the Consultant's employment under the Appointment.

15. The definitions of words and phrases used in this Agreement shall be those set out in the Appointment except where expressly defined in this Agreement.

16. This Agreement shall be governed by and construed in accordance with Scots Law and the parties hereto submit to the exclusive jurisdiction of the Scottish Courts.

# 1. OUTLINE

## Introduction

1.1 The New South Glasgow Hospitals (NSGH) Project consists of new adult acute and children's hospitals, new laboratories, energy centre and associated support facilities and infrastructure for the NHS Greater Glasgow and Clyde (the Client/Board).

The Project is located on the existing hospital site at the Southern General in Govan, Glasgow which is required to remain operational during the execution of the Works. The Project is to provide in the order of 175,000m2 of internal area comprising approximately 1,400 beds in addition to the development of the external spaces.

This Scope of Services excludes the new laboratory block (which comprises of the laboratories building and the FM facility to its rear), unless highlighted as otherwise.

1.2 The Services shall be the provision of professional labour, supplies, systems and other resources as necessary to design, specify, document, inspect, report and certify the building services elements of the Works for the Project. The Services outlined herein are the basic scope of works specifically applicable for this Project and are completely allowed for in the initial total fee.

1.3 Key Performance Indicators (KPIs) – The quantitive KPIs for Stage 2 Works (leading to the Full Business Case) are defined in the Contract Data Part 1 Appendix 3 in addition to the Design Programme contained in Contract data Part 1 Appendix 4 and the Cost Plan referenced in the Building Contract. This Scope of Services represents the qualititive KPIs to be achieved by the Consultant.

1.4 The Consultant shall adequately and timely coordination, cooperation and liaison with other consultants, subcontractors, suppliers, Authorities and other relevant parties/stakeholders to clearly define the relevant Project works, which minimises the Project costs, time and risk.

1.5 The Consultant's coordinated design and documentation shall be fully integrated with all relevant designs and advice from other consultants, the subcontractors (where arranged by the Employer) and Statutory Authorities.

1.6 The Services are to be provided in the following Work Stages:

- Concept Design and Design Development
- Construction Documentation and Construction Phase
- Commissioning, Completion and Post Completion

Note: Notwithstanding the entry point to an individual scheme or design task, the Consultant is required to review all the previous information for the scheme made available by the Employer in addition to those sourced by the Consultant and undertake the Services irrespective of where the Services is listed in order to enable the Employer to complete the Works.

## Performance Standards

1.7 The Consultant shall submit its Quality Plan for review by the Employer. The Consultant shall amend its Quality Plan as reasonably required by the Employer. The Quality Plan shall explain

how the design and documentation work are to be planned to the standard specified in ISO 9001:2008 particularly the Section 7.3 and shall include:

- The design and documentation stages
- The review, verification and validation that are appropriate to each design and documentation stages
- The responsibilities and authority for design and documentation

The Consultant shall review and comment on the Quality Plans (especially the Quality Inspection and Test Plans) from the subcontractors and suppliers as reasonably required by the Employer.

1.8 The Documentation (or Documents) to be provided by the Consultant shall be all that is required in order that the Project can be completed in the most time and cost efficient manner and shall include but not be limited to:

- Drawings (including 3D as required)
- Schedules
- Specifications
- Working models, illustrations and other presentation materials
- Calculations and sketches
- Reports (including Progress Status)
- Certifications (including Compliance)
- Meeting minutes, file notes etc.

1.9 Conform with the Project specific documentation protocols as updated from time to time by the Employer (or its designate) including the CAD parameters and electronic documentation transfer facilities such as the FTP websites or as requested by the Employer.

1.10 In respect of all Work Stages, the Consultant shall:

a) Perform the Services in a diligent manner with the standard of skill and care and undertake any work falling within the level of Services to be reasonably expected of a Consultant appointed for a Project of a similar size, scope and complexity.

b) Ensure that it has the necessary skill and resources to provide the Services and acknowledges that in reliance on this obligation, the Employer has agreed to engage the Consultant to perform the Services.

c) Take all necessary steps on an ongoing basis so that all persons engaged for the Services are properly qualified, competent and experienced for the size, scope and complexity of the Project.

d) Inform itself of the Project requirements by regularly consulting with other relevant parties and the Employer. Review all relevant documents and immediately inform the Employer of any apparent errors or ambiguities contained in such documents and make recommendations for the correction of such ambiguities.

e) Keep secure the Employer materials and documents and return them at the end of this Appointment.

f) Strictly remain within the scope of the authority granted by the Employer and not act beyond its authority or hold out that it has authority beyond this Appointment.

g) Seek the Employer's prior consent to any proposed sub-letting or employing outside agency and/or self employed staff.

h) Comply with all policies relating to the use of the Employer office premises and facilities when using them.

i) Permit the Employer to carry out agreed and scheduled visits to the Consultant's business premises in connection with the Services.

j) Keep proper commercial records and accounts for any claims it makes on the Employer including if applicable, for reimbursement of expenses and remuneration of fees based on time charged billing and permit the Employer auditors to inspect such records and accounts.

k) Nominate a person or persons who have authority to receive notices and take instruction under this Appointment and not change such nominees without the consent of the Employer.

l) Liaise and cooperate with the other consultants employed (and likely to be employed) by the Employer for the purpose fulfilling its obligation that the Project shall be designed in compliance with the Project requirements.

m) Coordinate and manage the sequence of design and documentation production.

n) Provide Technical Advisory role to the Employer for design works provided by others associated with the Project.

**Performance Obligations**

1.11 The Consultant shall:

a) Carry out the Services using proven best up-to-date practice and to appropriate standards (having regard to the nature of the Project) and consistent with the intended use of the Project.

b) Comply with the requirements of Planning consent for the Project and with all Statutory Authorities requirements and regulations and with all other legislation applicable to the Services and/or to the Works.

c) Comply with all specific standards contained in this Appointment. If no such standards are stated in this Appointment and if they cannot be reasonably inferred from the Project Documents, the standards shall be those required by relevant British Standards and/or UK Building Regulations and/or any relevant applicable legislation and/or relevant local Statutory Authority requirements.

d) Comply with the Employer's Requirements and the Contractor's Proposals.

e) In the event of any discrepancies, ambiguities and inconsistencies within and/or between the Project documents, such discrepancies shall be decided on by the Employer and the Consultant shall at no cost to the Employer and that the Services and any Documentation prepared by the Consultant in relation thereto shall comply with and meet the requirements as decided by the Employer.

f) Progressively submit the Consultant's Documentation and any other documentation included within the ambit of the Services to the Employer by the dates specified in the Programme or if no dates are specified, in accordance with the progress of the Works and the Employer's reasonable requirements.

g) In respect to all drawings produced as part of the Documentation are computer generated and capable of being transferred into 'tiff', 'pdf, and 'dwg' formats or other format approved by the Employer. The Consultant shall send and receive written correspondence, drawings, schedules and specifications and any other relevant documentation by a controlled web

based document management system (Aconex) in accordance with the rules and procedures (updated from time to time) as provided by the Employer.

h) In reference to the specifications as referred to in the definition of Documentation are in A4, double sided and comprising of two bound copies and one copy on a portable memory storage device. The Consultant shall also upload one copy onto a web based document control system (Aconex). The specifications shall be in full compliance with the Project requirements and shall be complete and coordinated with all other consultants in a format agreed by the Employer. The specifications shall be in trade sections and capable and suitable for the Employer to invite tenders for the various packages of work and for the subsequent construction and completion of the Project. The specifications shall also incorporate, but not be limited to, materials, finishes workmanship and quality standards and other items as may be reasonably required by the Employer.

i) Include all those duties that are set out in this Schedule together with those duties that can be reasonably expected from the Consultant, preparing design and documentation for works of a similar size, scope, nature, value and complexity of the Project.

j) Specify the materials and its method of use, fixing or working that do not infringe any patent, registered design, copyright or other protection rights.

k) Review and comment on all relevant temporary works as reasonably requested by the Employer in completing the Project.

l) Send, receive, review and comment all information in relation to O&M manuals which may be by a controlled web based management system.

m) Provide advice and documents as required to assist the Employer in the maintenance of the building to ensure whole-life costs are minimised.

n) Provide information as requested by the Building Owner, Funders, Facilities Manager, Operators and the like.

o) Coordinate, incorporate and document where relevant to the building services, all fire protection and acoustic treatment measures in consultation with the Fire Engineer and Acoustic Engineer respectively.

p) Proactively endeavours to maximise the BREEAM rating of the Project and develop energy efficient strategies.

q) Evaluate, design, specify and document Secure by Design, acoustical and fire protection measures related to their Services and where applicable to satisfy building insurance requirements. Should there be exceptional insurance requirements, such information to be made available to the Consultant in a timely manner during the design period.

r) In reference to CDM 2007 Regulations and in particular Regulation 11 that requires the Designers to eliminate hazards which may give rise to risks to those undertaking construction work or subsequently using the building, and to reduce any hazards which cannot be eliminated. The Consultant shall produce information to the Employer, other Designers and Contractors in this regard and where possible this information shall be included in all Documentation especially the drawings issued by the Consultant.

s) Submit evidence of competence to comply with the CDM 2007 Regulations as per Regulation 4 and as set out in Appendix 4 of the Regulations.

t) In providing the Services, the Consultant shall aim to minimise any adverse impacts that construction has on the environment. This shall be through the design process, materials selection, construction techniques and operational methods. Specific information on the Employer's policy which the Consultant is required to comply is set out in the Environmental Policy Statement (as set out below).

The Consultant shall work towards to reduce waste and use materials efficiently and

proactively assist in reaching the Employer's objective as outlined in the Waste Policy Statement (as set out below). The Consultant shall support this Policy by:

- Assist in developing the Site Waste Management Plan from an early design stage, including waste forecasts and data on reduction targets and actions.
- Assist in implementing the Site Waste Management Plans throughout the design and construction period that comply with the applicable Regulatory requirements and include in such Plans project-specific targets for waste recovery and reused and recycled content and for waste reduction;
- Identifying methods to reduce waste and waste to landfill and increase reused and recycled content, throughout the duration of providing the Services and report to the Employer. In this regard, the Consultant shall use site waste management software nominated by the Employer which shall be WRAP's Designing out Waste Tools or Net Waste Tool (accessible at www.wrap.org.uk/nwtool) unless notified otherwise;
- Work with the Project team to ensure that design actions to reduce construction waste and increase reused / recycled content are implemented;
- Agree with the Employer which level of waste reduction and reuse to pursue.

Note: The Consultant should refer to the WRAP Designing out Waste guidance to identify, prioritise and implement ways of meeting Project targets for waste.

**Brookfield** Environmental Policy Statement UK/EHS/F/001a rev 07

# BROOKFIELD CONSTRUCTION (UK) LTD

# ENVIRONMENTAL POLICY STATEMENT

This policy statement is valid from May 2010 to 31st December 2010.

## Introduction

Brookfield Construction (UK) Ltd is focused on the construction of significant landmark projects. Our overall mission is to build high quality construction projects using materials and processes that respect the environment.

We firmly believe that the delivery of high quality construction projects requires active consideration of the environmental and social impacts associated with construction. High standards of environmental performance in these areas can also deliver benefits to the environment, society and economy.

## Environmental Policy

At Brookfield Construction (UK) Ltd, our aim is to:

- Work to prevent pollution and minimise the overall impact of our activities on the environment, from the sourcing of our materials to the recycling and disposal of wastes.
- Make more efficient use of energy and natural resources and minimise emissions and waste, focusing on those activities which have the most significant impacts.
- Comply with applicable legal requirements and other requirements to which Brookfield subscribes which relate to its environmental aspects. Such requirements include WRAP's (Waste & Resources Action Programme) initiative for "Halving construction waste to landfill", BREEAM, Considerate Constructors and Considerate Contractors in London.
- Apply environmental management practices across the business which protect and enhance our reputation and meet the expectations of our stakeholders.
- Pursue continual improvement in our environmental performance.

In order to deliver this aim we will:

- Implement a formal Environment Management System.
- Provide information and training to enable environmental impacts and opportunities to be identified, prioritised and managed effectively.
- Promote joint consultation with employees, contractors, the Environment Agency, Environmental Health Officers and other relevant organisations.
- Work proactively with the local communities in which we operate.
- Set environmental objectives and targets relevant to our significant environmental aspects and monitor our progress against these; year on year.

## Organisation and General Responsibilities

The UK Health and Safety Manager and UK Environmental Advisor are responsible for environmental issues and report to the Brookfield Europe Safety Director. Environment, Health and Safety Managers are allocated to projects and report to the Project Director whilst retaining a functional reporting link to the UK Health and Safety Manager.

Detailed descriptions of our organisation and responsibilities are available in the Environmental Management System which is integrated with the Health and Safety Management System. This integrated system forms a part of a larger suite of documents which also includes the Quality Management System. This larger system is referred to as "CoSHEQ". This document is available on the Brookfield Europe Intranet, which is accessible to all employees.

**Brookfield** **Environmental Policy Statement** UK/EHS/F/001a rev 07

**Arrangements**

*Management Systems*
The Environmental Management System sets out through Procedures, Forms, Risk Registers, Management Plan Templates and Best Practice Standards (the "Supervisors Manual") the way in which environmental issues are managed on our projects.

*Sustainability Strategy*
Our appointed designers are required to meet the guidance given in the Brookfield Europe Sustainability Strategy.

*Third Party Certification*
The company is third party certified to ISO 14001:2004 Environmental Management Systems.

*Code of Conduct*
The behaviour expected from Brookfield employees and our subcontractors is set out in our Code of Conduct. Copies of this are displayed on notice boards at Head Office and at each project.

This document is available to the public on the Brookfield Europe website and is communicated to all employees.

**12 month objectives January 2010 to December 2010 for Environment and Sustainability**

- As signatories to WRAP's initiative for halving construction waste to landfill by 2012, taking 2009 as the baseline year, we will take measures to divert construction waste from landfill sites.
  **Target** – For construction, demolition and excavation waste corporate targets see our Waste Policy Statement

- Promoting the ethical and environmentally sustainable management of the world's forests we will endeavour as far as practicable to only use FSC-certified timber products on all our projects.
  **Target** – Publish percentage of FSC-certified timber employed on our projects

- In order to reduce our environmental impact we will reduce the amount of our office waste going to landfill. A new office waste management strategy will be introduced and implemented in 2010 that will involve segregating recyclable waste at source and phasing out individual desk bins.
  **Target** – 90% of all office waste to be diverted from landfill and relevant data to be published

Ashley Muldoon
Managing Director
Brookfield Construction (UK) Ltd
May 2010

**Brookfield** Waste Policy Statement UK/EHS/F/001c rev 01

# BROOKFIELD CONSTRUCTION (UK) LTD

## WASTE POLICY STATEMENT

**Scope**
This Policy Statement applies to Brookfield Construction (UK) Ltd for 2010 and must be read in conjunction with the Brookfield Construction Environmental Policy Statement.

**Introduction**
Brookfield Construction (UK) Ltd is focused on the development, construction, management and ownership of significant landmark projects. In all of its development work, Brookfield aims to minimise any adverse impacts that construction has on the environment. We seek this through the design process, materials selection, construction techniques, and operational methods.

From 2010 all organisations appointed to work on our behalf are required to work in accordance with these principles.

**Achievements**
We have set waste targets since 2007. Each year the target for recycling has been increased as follows:

**2007** to recycle 70% waste concrete, bricks and ceramics over the course of a project and 50% of general waste over the course of a project.

**2008 and 2009** to recycle 80% of construction waste (combined Construction, Refurbishment, Demolition and Excavation).

The company has succeeded in meeting these targets.

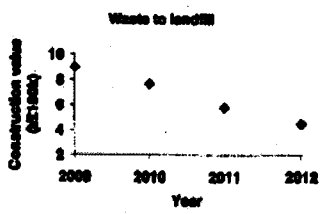
**The WRAP Initiative**
Committed to continual improvement in 2009 Brookfield Construction (UK) Ltd became a signatory to the "Halve waste to landfill by 2012" initiative for the construction industry of the Waste and Resources Action Programme, (WRAP) a government-backed body set up to facilitate waste minimisation in the UK. There are two strands to this commitment:

1 To generally reduce the amount of waste generated from a construction project by exploring possibilities in design and procurement.

2 Following on from this, to increase the percentage of residual waste that is recycled.

WRAP proposes that waste data is measured against each £100k construction value[1]. This will then capture both reductions that are obtained from design and procurements in addition to the residual waste figures.

**The Baseline Year: 2009**
To meet the WRAP Commitment, Brookfield Construction has selected 2009 as its baseline year. The WRAP typical figure for waste sent to landfill was 10 tonnes per £100k and the Brookfield Construction target waste figure to be sent to landfill was 9 tonnes per £100k.



**Our target for 2012**
Brookfield Construction will set a 2012 target of 50% of the 2009 target. This is 4.5 tonnes per £100k.

The targets for 2010 and 2011 will be based on a linear progression from 2009 through to 2012.

[1] Construction value is the price in the accepted tender or, if there is no tender, the cost of labour, plant and materials, overheads and profit.

**Brookfield** **Waste Policy Statement** UK/EHS/F/001c rev 01

We will work to adopt and implement standards for good practice in reducing waste, recycling and reusing more. This will support national policy goals e.g. halving waste to landfill by 2012, adopted in England by the Government's Strategy for Sustainable Construction and Zero Waste in Scotland, and will be achieved by reducing waste, recovering more materials and using more recovered material in new construction.

**Policy**
Any contractual and client requirements will be taken into account to form the project-specific requirements, but as a minimum on projects commencing in 2010 our design and construction project teams will be required to:

- forecast waste quantities and waste recovery and set targets for waste reduction from an early design stage (for instance by using WRAP's Designing out Waste Tools and Net Waste Tool[2] or the Building Research Establishment's SMARTWaste benchmark calculator[3]).
- before starting on site, the project team shall submit a copy of the Site Waste Management Plan identifying the actions to be taken to reduce waste and increase recovery, as well as the corresponding roles and responsibilities, and quantifying the resulting changes.
- implement Site Waste Management Plans throughout the design and construction period that comply with regulatory requirements and include in such Plans project-specific targets for waste recovery and for waste reduction.
- where there is sufficient space the project teams should plan for and implement waste segregation on site. Otherwise the volume of waste that is recovered will be maximised by using third party contractors.
- measure and report progress against the corporate targets for the quantity of waste produced and the quantity of waste sent to landfill (in tonnes per £100k construction value). The information will be annually reported on the WRAP Waste to Landfill Reporting Portal[4] and guidance.
- on completion of the Works, the project team shall submit a copy of the completed Site Waste Management Plan, reporting the forecast and actual performance for waste quantities, disposal routes, and reused and recycled content used in construction.

**Target for 2010**
- recover at least 83% of construction materials demolition, strip-out and excavation materials.

**Meetings**

1.12 The Consultant shall:

a) Attend and issue records of the meetings and workshops for those in relation to the design, construction, value engineering, risk management and co-ordination of the building services as required by the Employer.

b) Attendance may be required for factory visits and design and or construction meetings at off site locations.

c) Attend and issue records of the design meetings with other consultants as necessary to integrate, coordinate and clarify the Works during the Project as reasonably required by the Employer.

d) Attend and issue records of the meetings with Statutory Authorities as reasonably required by the Employer.

e) Attend and issue records of the meetings with the Employer as reasonably required on all relevant Project issues.

f) Provide draft minutes for all of the above meetings, workshops and the like as required for review by the Employer or distribute as requested by the Employer.

**Reports**

1.13 The Consultant shall:

a) Provide periodic status reports (fortnightly and/or monthly to be agreed with the Employer) in a form reasonably required by the Employer which shall include as a minimum, a summary documenting the progress of the Services against the Design Programme and Documentation Schedules. Highlight areas of difficulty being experienced with progress of the Services, design co-ordination issues, Statutory Authority approvals status and the like including the proposed mitigating measures.

b) Undertake site inspection as reasonably required or as requested by the Employer and provide inspection reports including tracker schedules to monitor close-out of issues identified which will require revisiting the site.

c) Prepare report or documentation required (on a reasonable and realistic basis) for the assessment of design alternatives and in contemplation of envisaged change to the Project requirements.

d) Not used.

e) Progressively compile and provide design risk registers.

f) Provide compliance reports confirming compliance with the Project documents such as the Employer's Requirements and other compliance reports as requested by the Employer.

g) Provide non compliance reports in relation to the construction works when requested by the Employer in a workable electronic format including photographs.

h) Provide draft reports for all of the above for review by the Employer prior to the formal issue.

i) Not used.

j) Provide reports on energy performance during the 24 months Defect Liability Period based on the information provided by the Employer.

**Certification**

1.14 On a periodic basis (once a month as a minimum) or when requested by the Employer, provide a progress certification that the design and documentation work done to that period is in accordance with and complies with the Project requirements such as the Employer's Requirements, the Cost Plan, the Programme, Contractor's Proposals and with all relevant Statutory Authority requirements.

**Authorities**

1.15 The Consultant shall:

a) Liaise with the Employer, other consultants and all relevant Statutory Authorities for the purpose of confirming that the design complies with all Planning consent conditions.

b) Liaise with the Employer, other consultants, and others involved in the Works, including without limitation the CDM Coordinator, subcontractors and all relevant Statutory Authorities for the purpose of confirming that the design complies with all relevant Statutory Authority requirements and for obtaining all necessary permits and approvals. Incorporate all relevant Statutory Authority requirements into the design and documentation.

c) Advise on the need to obtain further Planning permissions, Building Regulation approvals and any other Statutory approvals and prepare all necessary associated applications for consideration by the Employer.

d) Liaise closely with all relevant utility companies, service providers and others involved in the identification, relocation and modification of utility services affected by the Project.

e) Prepare coordinated Documentation in conjunction with other consultants for submission to the relevant Authorities. All such Documentation is to be discussed with the Employer prior to submission to the Statutory Authority.

f) Revise and re-submit submissions to the Planning Authority as required where the development of the design has varied from the original Planning consented scheme. Amend Documentation in conjunction with other consultants for resubmission to other relevant Statutory Authorities arising from any directives, requirements or comments from the Employer or Statutory Authorities including those on the previous submissions.

g) Review all relevant Statutory Authority approvals and conditions. Contribute to a schedule/checklist for review by the Employer to monitor timely discharge of all conditions and actions to be carried out by the Consultant in conjunction with other consultants and to be incorporated into the Project.

h) Liaise with all relevant Authorities for expeditious approval and attend all meetings as required by the Employer. Update and amend documentation in conjunction with others as required, to obtain all regulation modifications, approvals and permits.

i) Highlight opportunities to the Employer in respect to alternative means of achieving the Statutory compliance for the benefit of the Project including waivers, relaxations and dispensations. Where requested by the Employer, negotiate the same with the Authorities.

j) Revise documentation as necessary to reflect the outcome of the negotiations with the Statutory Authorities.

k) Assist the Employer with any relevant tests and inspections required by the Statutory Authorities and in obtaining all permits, approvals and certificates required for the lawful use of the Project.

l) Complete all relevant certificates associated with the Services as and when required by the Employer and liaise with Statutory Authorities for the purpose of assisting in obtaining staged building permits and other approvals.

m) Prepare design certification necessary for the completion of the Project and/or the granting of relevant Statutory Authority for Completion, occupancy and title.

**Specific Designs**

1.16 The Services to be provided by the Consultant shall include the design and documentation for the following elements of the Works but not necessarily be limited to:

**Mechanical and Public Health Systems**

The Consultant's design shall cover all works associated with the mechanical and public health systems to comply with the fire strategy, acoustic requirements and all systems necessary as set out below for a fully operational building.

- Chilled water system including high efficient chillers, pumps, heat exchangers etc.
- MTHW & LTHW systems including plant and equipment, valves and pipe systems and interfaces with the Stage 1 Laboratory / FM buildings.
- CHP system with all plant and equipment including interface connections with the Stage 1 Laboratory & FM building.
- Condensate drainage systems including all condensate pumps, pipework and traps.
- Air conditioning systems including all air handling units, chilled beams, fan coil units, distributed ducted system, diffusers, return air plenums, fresh air intake and exhaust etc.
- Under floor heating systems including all pipework and valves.
- Thermal insulation applied to the engineering services systems.
- Heat recovery systems.
- Consideration of borehole water, ground source energy.
- Renewable energy systems integrated with electrical systems including wind turbines, photovoltaic systems and the like.
- Generator cooling.
- Lift pressure relief and pressurisation systems as required.
- Staircase pressurisation systems as required.
- Lift motor room cooling systems.
- Electrical and UPS ventilation and cooling systems.
- Packaged split air conditioning systems including all pipework, electrical systems between fan coil and condenser units.
- Communications rooms and ICT Node rooms cooling systems and ventilation.
- The main communications and secondary communication rooms containing network core switches and main servers to be provided with positive pressurised filtered fresh air systems.
- High specification air conditioning systems.

- Smoke extract system including all fire rated ductwork, smoke dampers, and smoke damper control and power interface with the fire alarm system.
- Misc ventilation systems such as toilets, storage areas, plant rooms, generator ventilation, gas meter room etc.
- Local exhaust ventilation systems.
- Basement mechanical ventilation systems including all plant, equipment, ductwork, dampers.
- Natural ventilation systems where practical.
- Water filtration systems.
- Not used.
- Hot water calorifiers, pumps, valves, piped distribution systems and dead leg (legionnaires) protection.
- Cold water storage tanks, pumps, valves and piped distribution systems including dead leg (legionnaires) protection.
- Mechanical water systems, including all pipework and valves.
- Softened water treatment systems where required.
- Rainwater and roof drainage systems including all pipework, roof outlets.
- Power, water and drainage to Green roof water feed and any fertiliser systems as required by the Green roof specialist.
- Landscape water supply and drain systems (if necessary) including automatic irrigation system.
- Internal soil vent, waste drainage systems including acid resistant systems connected to below ground drainage connections points provided.
- Basement level drainage systems including all sump pumps, pipework and control system.
- Assist in designing the integrated plumbing solutions systems, if any.
- Above ground specialist drainage systems.
- Floor wastes in suspended floors for all wet areas, design coordinated with plant locations etc.
- Automatic flushing systems, pipework, valves and sensors.
- Gas suppression system serving communication and ICT nodal rooms as required.
- Helipad intrinsically safe electrical and fire protection systems.
- Any special medical fixtures and fittings (eg. Pendants).
- Bulk fuel oil storage system including all pipework, valves, filling points and control system.
- Gas distribution systems.
- Compressed air systems.
- Distributed medical gas systems.
- Steam and condensate systems as required.
- Cleaning, flushing and treatment systems.
- Acoustic and vibration treatments and systems.
- Utilities gas, water including interface with Stage 1 Laboratory requirements.

**Electrical Systems**

The Consultant's design shall cover all works associated with the electricity supply and reticulation including incoming supply, all ducting and supply from the Supply Authority's network. The incoming supplies from the Supply Authority's network are to be reviewed for the substation requirements and mains, power factor correction and power quality. The electrical reticulation system will be provided with an electrical management control system.

- HV electrical systems from primary substation HV switchboard including protection requirements and coordination with utility provider and local authority requirements.
- HV consumer network electrical systems including all protection, electrical distribution system, cables/busbar, switchgear, distribution boards etc.
- LV electrical systems including all busbar/cables, distribution boards etc.
- Electrical HV / LV management control systems.
- Earthing & bonding systems.
- Lightning protection system.
- Power factor and power quality requirements.
- HV Generators and LV to HV step up transformers for temporary LV generator interface with electrical system.
- Lighting control system using presence and absence lighting control.
- Emergency lighting.
- Aircraft warning lights system.
- External lighting and secondary external lighting system.
- Electrical and control systems containment.
- BMU (Cradle) power and water supplies and communications systems (terminated at BMU landing points).
- Services to the automatic barriers where relevant.
- Utilities including electrical power including interface with Stage 1 Laboratory / FM building requirements and communications conduit systems.

**Other**

The Consultant shall contribute to the design coordination and documentation including all interface requirements and Technical Advice for the following, but not necessarily be limited to:

- Group 1, 2 and interface where applicable with Group 3 Equipments.
- Lighting layout design.
- Development of reflective ceiling plans.
- Pneumatic tube system.
- Medical gas.
- Renal water systems including de-ionised water systems.
- Coordination with Radiation protection specialist requirements.

- X-ray systems interface including all associated systems such as warning lights.
- Catering equipment and layout.
- Robotics.
- Food waste processing system.
- Vertical transportation systems.
- Sprinkler protection system, including all plant and equipment, pipework and valves.
- Gas suppression systems electrical rooms including; all plant and equipment, gas bottles, and control systems.
- Wet / Dry riser systems including all plant and equipment, pipework and valves.
- Sprinkler and wet riser water storage tanks including water level control.
- Fire protection electrical installation from control panels to all plant and equipment.
- Main and secondary fire control panels.
- Fireman's general smoke ventilation override system and panel.
- Cause and effect matrix developed by relevant subcontractor(s) which is to outline the interfaces with the relevant systems such as the mechanical control panels, control of smoke dampers, generator control panel, security Access Control remote panels, sprinkler system, building management control system, electrical management control system, disabled alarm system, lift and escalator control systems etc.
- Fire Hydrants.
- Fire alarms and detection system
- Integrated extra low voltage systems.
- Information communication technology and distribution systems.
- Access control and Intruder detection system.
- External and Internal CCTV.
- Building Management Control system Interfaces with the building management control system, fire alarm system and the like
- Mechanical electrical systems including motor control panels etc.
- Public Address
- Telecommunication systems.
- Optic fibre backbone network system.
- IT / Data systems network and systems.
- Telephone distribution system including the fire telephone system.
- Not used.
- Equipment alarms systems.
- Nurse call system.
- Disabled alarm system interfaced with the fire alarm network.
- Induction loops and hand held portable system.
- Television system.

- Central dictation systems.
- Paging and personal attack system.
- Tagging system.
- Telemedicine system.
- Leak detection system.
- Energy metering management system.
- Cold rooms including all plant and equipment

**Compliance and Compatibility**

The Consultant's design and documentation shall ensure compliance with and/or encompass the following, but not necessarily be limited to:

- Employer's Requirements.
- Compliance with Health Service Notes and Memorandums such as the SHTM's, HTM's, HBN's, SHBN's, SHGN's SHPN's and HGN's.
- Codes and Standards.
- Local authority requirements.
- CIBSE guides.
- IEE regulations.
- Utility provider requirements.
- Compliance with Planning and Building Regulations.
- HVCA TR17.
- Health & Safety.
- Aircraft authority and specialist.
- Specialist medical.
- NHS/ Board objectives.
- Quality Assurance and Quality Control.
- Environmental management plan including WRAP waste management organisation system.
- Fire strategy.
- Cold water system to comply with Hai-Scribe infection control requirements.
- Acoustic and vibration requirements.
- Radio Frequency and Electro Magnetic Frequency requirements.
- Not used.
- Carbon foot print compliance.
- BREEAM Excellence rating compliance.
- Input to life cycle analysis and selection.
- Interface with Laboratory / FM buildings.

- Plant, equipment, materials and ICT, including IELVS systems to be compatible with Stage 1 Laboratory systems.
- MEP building services systems configured to promote flexibility to enable future maintenance, re-modelling, re-planning and replacement without disruption to adjacent areas.

# 2. Concept Design and Design Development

## Overview

2.1 It is a fundamental requirement that all Documentation produced during the Concept Design and Design Development stages are in full compliance with the parameters of the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the Programmes as these may be amended from time to time.

2.2 The Design Development stage involves the development of the Concept Design and enables the tendering and construction of the Project to be executed, particularly for the enabling works and the early release packages. Consequently the particulars highlighted below require the Consultant to undertake iterative Services and revisit the work carried out under Concept Design which must be amended or otherwise.

## Tasks

The Consultant shall:

2.3 Supplement Project details provided by the Employer by sourcing relevant information about the Site. Based on these documents make appraisals and establish constraints for the Works.

2.4 Seek clarification or direction on Project requirements as necessary.

2.5 Visit site in addition to as requested by the Employer.

2.6 Contribute to site appraisals and surveys and (re)evaluate Project requirements including the preparation of options/recommendations for consideration by the Employer highlighting advantages and disadvantages (financial and technical) and where relevant any long lead-in procurement building elements.

2.7 Evaluate any amendments to the Project requirements and advise the Employer on options for development of the design having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

2.8 As when requested by the Employer, provide a Documentation Schedule for review by the Employer. This Documentation Schedule shall support the Full Business Case timeline, the Employer's tender letting schedule and construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for the production of same.

2.9 Update or amend the Documentation Schedule as required by the Employer. Complete/populate the master documentation matrix if utilised by the Employer. This matrix indicates to which tender package each of the Consultant's documents relates to.

2.10 Provide assistance and support the Architect, Structural Engineer and other consultants in the preparation, design, specification and installation details of their respective discipline.

2.11 Prepare the Documentation incorporating the architectural, structural and other consultants' requirements and/or information into the building services design having regards at all times to the Planning constraints, the Employer's Requirements, the Cost Plan and the construction

programme. In conjunction with the other consultants, establish all relevant Statutory Authority requirements and incorporate into the design.

2.12 Prepare design studies and make presentations to the Employer. The Consultant shall take account of any comments from the Employer and amend the Documentation as necessary. The Consultant shall also consult with local or other Statutory Authorities and with other interest groups as reasonably required by the Employer.

2.13 In accordance with the agreed Documentation Schedule, prepare and submit to the Employer in a timely manner, the adequately coordinated and progressed design and as the Lead Consultant for the specific design responsibilities, coordinate tasks and submissions from other consultants. Note: all CAD drawings are to be at an appropriate scale as reasonably required by the Employer.

2.14 In conjunction with the other consultants, develop the design incorporating the design solutions and where required, provide documentation for submissions to the relevant Statutory Authorities including for the discharge of Planning consent conditions and/or to seek conditions of approval for Building Regulations compliance.

2.15 Liaise with other consultants and coordinate the provision of information and data as reasonably required by the Cost consultant and the Employer for use in connection with the Cost Plan.

2.16 Prepare and provide Documentation (on a reasonable and realistic basis) in respect of alternative designs and/or construction solutions for the purpose of value engineering and reviewing costs. Repeat the process as reasonably required by the Employer in terms of the construction costs remaining within the Cost Plan.

2.17 Assess and provide comment on alternatives offered by the Employer, its subcontractors and suppliers. Provide design details and information as required by the Cost consultant in pricing options / alternatives. This may be subject to additional fee to be discussed and agreed between the Consultant and the Employer on a case by case basis.

2.18 Provide studies and information on maintenance, lifecycle and other costs for the Project as required by the Employer.

2.19 Assist the Employer in the preparation of Scope of Work packages on a trade by trade basis for inclusion in subcontract and supply procurement.

2.20 Prepare and issue drawings, specifications, schedules and the like as required by the Employer for market testing, tender and costing purposes. The specification is to include the requirements for testing, commissioning, benchmarks and workmanship standards.

2.21 Prepare schedules, perspectives, computer generated images and other similar presentation materials as reasonably required by the Employer to illustrate the proposed design.

2.22 Review and comment on the temporary works in relation to such activities as the crane locations, materials handling areas, storage and compound areas and the like. It is noted that the Consultant have made allowances in the permanent state design to accommodate the normally envisaged temporary loads during the course of the construction works.

2.23 Continuously review the design against the Project requirements including the Employer's Requirements and all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

2.24 Prepare and issue a fully coordinated set of Documentation for these design stages in a report format to the Employer. The Documentation shall be at suitable including coordination information such as the overlay drawings as requested by the Employer.

# 3. Construction Documentation and Construction Phase

## Overview

3.1 This Work Stage shall be the Construction Documentation and Construction Phase of the Project. This Work Stage continues from the Concept Design and Design Development Work Stage and shall enable the remaining tendering and construction of the Project to be progressed. Where necessary, this Work Stage is undertaken in conjunction with the ongoing design development tasks. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development (and where necessary, Concept Design) Work Stage(s) and to the extent that any of the Services carried out under Design Development (and where necessary, Concept Design) must be amended or otherwise, such work shall be deemed to be part of/concurrent to this Work Stage.

3.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage is suitable for properly constructing the Project and shall fully reflect the developed design in full compliance with the parameters of the Project requirements such as the Planning consents, Employer's Requirements, the Cost Plan and the Programme as these may be amended from time to time, especially the construction programme.

## Tasks

The Consultant shall:

3.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant, make further appraisals of Project constraints.

3.4 Evaluate any amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements

3.5 Visit site in addition to as requested reasonably by the Employer.

3.6 As when requested by the Employer, update and issue the Documentation Schedule for review by the Employer. The Documentation Schedule shall be consistent with the Employer's construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for production of same.

3.7 Liaise with other consultants to provide integrated and coordinated design information and data as required by the Employer to comply with the Employer's tender letting schedule and with the construction programme to ensure that there is no delay in providing information to subcontractors or in constructing the Works.

3.8 Update or amend the Documentation Schedule as required by the Employer. Update the master documentation matrix in a format requested by the Employer.

3.9 Produce a monthly update of the Documentation Schedule, or at other times as reasonably required by the Employer, showing the Consultant's actual and proposed delivery against the programmed issue dates for each Documentation including the details of the mitigation measures where the Consultant has fallen behind in providing the design information and/or the Documentation was inadequate.

3.10 Provide Documentation in accordance with the Documentation Schedule. All Documentation to be in compliance with the Project requirements. The Documentation shall be suitable of being used for preparing trade packages (including trade bills of quantities) and used for inviting tenders from trade subcontractors and updated to provide adequate details to allow each design element to be constructed which must for example, take due regard of good health and safety practices, buildability requirements such as construction sequencing and access and construction tolerances.

3.11 Review all relevant subcontractors and/or suppliers' submissions of samples and technical data as requested and report to the Employer in respect of compliance with the Project requirements.

3.12 Evaluate alternatives proposed by the trade subcontractors and in conjunction with other consultants, coordinate and integrate all such preferred alternatives into the Documentation as requested by the Employer. This may be subject to additional fee to be discussed and agreed between the Consultant and the Employer on a case by case basis.

3.13 In conjunction with the other consultants, review and comment on shop drawings, specifications, prototypes, samples and technical data submissions and other information prepared by potential and/or engaged subcontractors or suppliers for compliance with the Project requirements where relevant to the building services design. Provide such comments within 7 days of receipt. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.14 Review and comment on the documentation of other consultants and subcontractors within 7 days of receipt and where warranted, fully update all Consultant's Documentation where necessary. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.15 Notify the Employer in writing, once the Consultant becomes aware of any amendments or additions/deletions in the Documentation which may increase the cost of construction and/or whole life cost of the Project.

3.16 Not used.

3.17 Provide updated, coordinated and dimensioned drawings at suitable scales showing all major in a timely manner for services and other builder's works in connection details including coordination information such as the overlay drawings as requested by the Employer.

3.18 Produce supplementary documentation as may be required by the Employer to clarify the Documentation during construction, including issuing sketches, details, clarifications, further Documentation, investigating site based construction issues related to the Documentation and preparing and issuing design solutions in conjunction with other consultants where applicable.

3.19 Provide Construction Documentation ("For Contract") drawings incorporating all information issued as advices or sketches so that the latest information is shown on the Documentation to be used for construction. All Documentation must be completed and issued in compliance with the Programme and with the general progress of the Works to ensure that such progress is not delayed and/or disrupted.

3.20 Issue updated drawings, specifications, schedules, details and other design information as the Employer may require.

3.21 Revise and resubmit Planning consent submissions to the Planning Authority as required where the progressed design has varied from the original permit approval.

3.22 Regularly check the Documentation against the Project requirements such as the Employer's Requirements all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

3.23 Assist in the updating of design and construction programmes as required by the Employer.

3.24 Respond to all correspondence including (but not limited to) Requests for Information within 5 days. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.25 Undertake any off-site inspections reasonably requested by the Employer.

3.26 Review mock-ups and samples for compliance with the Project requirements such as the Planning consent and the Employer's Requirements and recommend benchmarks for finish and workmanship with the Employer in respect of subcontractors, suppliers and manufacturers.

3.27 Undertake regular inspections of the Works and provide non conformance report on same to the Employer.

3.28 Assist in the preparation of full documentation and detailing for a marketing and display facilities as appropriate for the Project or as reasonably required by the Employer.

# 4. Documentation Deliverables

## Overview

4.1 The Employer intends to engage specialist subcontractors for the following trades to design (For Construction details only) and construct that form part of the Works. Some of these are early release packages. For these trades, the Consultant is to provide documentation that outline the design intent and the performance requirements from which the subcontractor(s) will prepare their construction design (ie. shop drawings):

- Piling
- Structural steel (connection design only)
- Architectural precast concrete
- Major building (M&E) services
- Medical gases (including Pneumatic tube system and Renal water systems)
- Lifts and escalators
- Unitised curtain wall system
- Special/feature glazing such as the entrance glass doors and canopy
- Courtyard cladding including ribbon windows
- Podium (rainscreen) cladding
- Plantroom cladding
- Louvres
- ETFE roof coverings
- Glass roof structures
- BMU/Cleaning cradle and gantry systems
- Robotics
- Radiation protection
- Catering

The Lead Consultant for a given package (refer to the Design Consultant Responsibility Matrix) is to coordinate with other consultants in reviewing the design by these specialist subcontractors and confirm that they are acceptable for coordination with the Services and that the design intent and performance specification has been satisfied.

4.2 Not used.

4.3 In some instances, it is intended that elements of the design are undertaken by specialist subcontractors whereby the subcontractor will assume responsibility for the installation documentation of the Consultant's design intent. However, the Consultant will retain responsibility to review and comment on such design proposals and documentation. For example:

- Spacial coordination – The Consultant shall provide in sufficient detail to establish and confirm the coordinated zoning requirement such as the ceiling voids, risers and the like. The detailed design information from the Consultant is to show the spatial inter-relationship of the

engineering systems for the production of installation drawings by the relevant subcontractor(s).

- Selection plant and equipment – The Consultant shall provide a description of the main/critical performance requirements and essential design features of plant and equipment. For example: Input/output capacities of plant, the range of operating duties, details of the required quality of construction and finishes, any essential energy saving features, the acoustic performance and the availability of spares. Based on these parameters, the relevant subcontract(s) will propose their plant and equipment selection.
- Commissioning – The Consultant shall incorporate into various systems designs and provide specifications outlining the essential components and features necessary to enable proper preparation and commissioning of the building services.
- Handover information – The Consultant shall provide specifications that define the scope, content and format of operating and maintenance manuals and record drawings appropriate to the Project. The Consultant shall also define the level of documentation, commissioning results and other information to be made available by the relevant subcontract(s) for a proper handover of the Works.

This design task demarcation between the (MEP) Services Engineer (ie. the Consultant) and the subcontractor(s) is further clarified below as a guide:

| No. | Specific Design Task Examples | (MEP) Services Engineer Shall Provide: | MEP Subcontractor Shall Undertake: | Notes |
|---|---|---|---|---|
| 1 | Acoustical design and treatment for engineering services | All plant and equipment selection criteria based on internal and external noise limitations. Acoustic attentuators and anti-vibration treatment specifications based on insertions losses and vibration limitation. Ducting and pipe systems to comply with limiting velocities. Specify acoustic sealant treatment and locations | Final equipment selection based on Engineer's criteria | Site and internal acoustic parameters by Acoustic Consultant |
| 2 | Air compressors and compressed air supplies | Performance specification, distribution strategy and detailed design coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 3 | Air-conditioning and mechanical ventilation systems | Schematic arrangements for each of the systems required for the facility. Block planning for plantrooms and risers to departmental boundaries. Floor GAs, plantroom and riser ductwork layouts. Sizing and routing indicated on detailed design drawings showing positions of grilles, dampers and other in-line components. Specify plant and equipment duty performance criteria | Selection of plant and scheduling of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | Fire strategy by Fire Consultant |

| | | | | |
|---|---|---|---|---|
| 4 | Automatic blinds and shutters | Coordinate power supplies, BMS and any fire alarm interface points. Provide solar control blinds operational performance requirements | Coordinate final location including controls and power wiring | |
| 5 | Bedpan washing or disposal equipment | Coordinate power supplies, drainage and water supplies to suit equipment requirements | Final coordination and preparation of installation drawings | |
| 6 | Boiler plant and auxiliaries | Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Specify pump duty performance criteria | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 7 | Building management system and automatic controls | Detailed functional description of operation for all system including typical AHUs and plant details. Detailed performance specification and a system schematics, block diagrams giving operational requirements. Design arterial containment route requirements | Installation design of systems, points schedule, location of sensors, sizing and routing of containment and power cabling to motor drives, etc. Coordination of protective devices. Final coordination and preparation of installation drawings | |
| 8 | Calorifiers and heat exchangers | Specification, design and resilience criteria and sizing of plant and coordination on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 9 | Clocks | Performance specification giving operational requirements. Applicable to operating theatre panels only. All other clocks battery operated | Installation design of systems and coordinate location of components | Groups 1 and 2 only |
| 10 | Cold water service | External - pipe sizes and routes, schematic arrangements and coordinated layout drawings. Internal - schematic arrangements for each plant area with indicative main pipe sizes. Location of key main risers. Specification, design criteria and resilience, sizing of plant and coordination of spatial constraints on plantrooms and layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing all terminal positions | Selection of plant and scheduling of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 11 | Combined heat and power plant/s | Analysis of sizes, integration into schematics and GA drawings. Specification, design criteria and sizing of plant and coordination on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 12 | Chilled water system/s | Primary Chilled Water - Major pipe sizes and routes, schematic arrangements. Equipment schedules for chillers, pumps and pressurisation equipment, heat exchangers. Secondary Chilled Water – schematic arrangements. Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing positions of terminal devices and valves | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 13 | Generator plant and systems including fuel oil | Sizes, schematics and GA drawings. Detailed description of operation. Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 14 | Electric lighting and power installation/s, including luminaries | Detailed design drawings showing luminaire layouts, circuitry and switching arrangements. Performance specification giving key design criteria.. | All calculations based on requirements of Room Data Sheets, selection and scheduling of luminaires to meet design criteria and photometric data confirmation. Layout drawings and switching/control appearance. Detailed lighting layouts complete with CFD lux level modelling and emergency lighting levels, locations and switching | |
| 15 | Electric small power installation/s | Circuitry details and medical equipment supplies | Final coordination and preparation of installation drawings | |
| 16 | Electrical distribution system | Detailed specification of HV and LV switchgear, cable/busbar sizing, distribution boards and all HV and LV schematics. Detailed design drawings for all plant rooms and layouts. Theoretical HV/LV discrimination study based on generic protection devices and design cable lengths. Provide HV protection grading philosophy. Provide final calculations and study report based on as installed information from the MEP Subcontractor | Final selection of switchgear, final HV/LV discrimination study and coordination of protective devices based on final selection of protective devices and installed cable lengths. Final coordination and preparation of installation drawings | |
| 17 | Electrical sub-station | Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Transformer sizes, cable/busbar sizes and routes, switchgear details, schematics and GA drawings. HV/LV control systems and interface requirements with utility provider. | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 18 | Escape lighting and fixed medical lighting | Detailed design drawings showing circuitry and switching arrangements. Performance specification giving key design criteria. Review and comment on proposals for compliance with design criteria | All calculations based on requirements of Room Data Sheets, selection and scheduling of luminaires to meet design criteria and photometric data confirmation. Layout drawings and switching/control appearance. Coordinated lighting layouts completed with CFD lux level modelling and emergency lighting levels, locations and switching. | |
| 19 | Exhaust gas handling systems/flues/chimneys | Clean Air Act submission. Specify sizes and routing for coordination on plantroom layout drawings at scale 1:50. Chimney height calculations and location on plans | Final chimney sizing, structural support information including any cladding. Final coordination and preparation of installation drawings | |
| 20 | Fire detection and alarm system/s | Performance specification giving operational requirements. Design arterial containment routes. | Design of systems, selection of components to meet Engineer's criteria, and the final location of components to be coordinated with the Architect. Provision of Fire Certificate. Develop fire alarm cause and effect. Design coordination drawings for all plant rooms and layouts. Coordinate all equipment required to be located on the reflective ceilings | Fire strategy by Fire Consultant |
| 21 | Fire fighting/protection system/s (including gas suppression system) | Performance specification and distribution strategy including coordination of pipe runs. Study into potential consequential damage associated with discharge of sprinklers (e.g floors below) and operational impact | Fire water tank sizing and location, pump sizing. Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings. | Fire strategy by Fire Consultant |
| 22 | Food preparation, cooking, conveying and serving equipment | Sizing of services to meet catering specialist's requirements. Routing of services to suit specialist's equipment layout | Final location of supplies to suit specialist's requirements. Final coordination and preparation of installation drawings | Catering specialist responsible for selection of equipment, layout. Termination, and sizing of final connections. Extract hood air volumes |
| 23 | Fuel gas supply and distribution | Specification and design criteria, sizing and routing for coordination of spatial constraints at scale 1:100 showing positions of valves meters, etc. Pipe sizes, routes and schematic arrangement. | Selection of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 24 | Fuel oil supply and distribution system/s | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Specify pump duty performance criteria. Pipe sizing and routing for coordination at scale 1:100 showing positions of valves, pumps and fuel oil tank locations. Schematic arrangement for oil delivery system with pipe sizes. | Selection of plant and equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 25 | Fume extract/handling system/s | Air volumes to suit equipment supplier's requirements. Sizing and routing of ductwork considering the spatial constraints as for ventilation systems. Location and heights of discharges | Selection of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 26 | Heating system/s | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing positions of terminal devices and valves. LTHW Heating System schematic arrangements for each plant area and main system | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings. Coordination of reflected ceiling plans locating all services items for example, luminaries, grilles, smoke detectors etc | |
| 27 | Hot water service | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing for coordination showing positions of valves. Schematic arrangements for each plant area with pipe sizes and main system schematic. Location of key main risers. | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 28 | 11kV System / HV Distribution | Specification, design and resilience criteria, sizing of plant, switchgear, main distribution, cables/busbar and coordination of spatial constraints on plantroom and layout drawings. Functional description and detailed design of HV /LV control system. Coordinate routing outside plantrooms and the requirements of the utility provider. Theoretical HV/LV discrimination study based on generic protection devices and design cable lengths. Provide HV protection grading philosophy. Provide final calculations and study report based on as installed information from the MEP Subcontractor | Final selection of switchgear, HV/LV control system, final discrimination study and coordination of protective devices based on final selection of protective devices and installed cable lengths. Final coordination and preparation of installation drawings | |
| 29 | Incoming electrical supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | | |

| | | | | |
|---|---|---|---|---|
| 30 | Incoming water supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | | |
| 31 | Incoming gas supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | | |
| 32 | Information technology (IT) systems | Coordination of containment to specialist's requirements. Power and cooling provision to specialist's requirements. Liaison with the Client/Board IT representatives | Final siting/location of hub rooms and cooling and power requirements. Final coordination and preparation of installation drawings. Liaise with the Client/Board IT representatives | |
| 33 | Intruder detection/alarm systems | Performance specification. | Design of systems, location of components to be coordinated with the Architect in accordance with the performance specification. Schedule all required system components and hardware. Coordinate in developing the door schedule | |
| 34 | Laboratory gases | Performance specification. Coordination and routing of pipework, plant and equipment to specialist's requirements. | Final coordination and preparation of installation drawings | |
| 35 | Lifts, hoists, escalators & travelators | Power supplies, ventilation, pressure relief lift pressurisation and lift motor room cooling in accordance with Lift Subcontractor's requirements | Fire alarm, security and access control, BMS interfaces. Final coordination and location of supply point with Lift Subcontractor | All ventilation and cooling of lift cars within Lift subcontractor's package |
| 36 | Lightning protection | Performance specification giving operational requirements, lighting protection routes, conductor sizing, test points and connections to earth requirements | Final coordination and preparation of installation drawings | |
| 37 | Weather louvres | Coordination with cladding specialist on connection details. Provide performance criteria; free area, pressure drop and size based on assumed free area ratio | Final coordination with cladding specialist on connection details and preparation of installation drawings | Aesthetics selected by the Architect. Final selection by cladding specialist |
| 38 | Medical equipment - pre-installation works | Sizing of services to meet medical equipment specialist's requirements. Attendance at relevant 'Equipment Selection Group' meetings | Final location of supplies to suit specialist's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 39 | Medical gas services including medical vacuum, AGSS and dental services | Performance specification, distribution strategy and coordination of pipe runs and plant. Coordinate location and size of accommodation for VIE plant and manifold rooms. Develop a distribution strategy for the main medical gas systems | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 40 | Nurse call installation | Performance specification, coordination of containment to specialist's requirements. Provide details of the arterial containment routes | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 41 | Pneumatic-tube conveying installation | Distribution strategy and coordination of pipe runs and plant | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 42 | Power operated smoke louvres | Performance specification and accompanying system schematics giving operational requirements. Provide details of power supplies, BMS and fire alarm interfaces | Final location coordinated with the Architect. Integration with specialist providers requirements. Control and interface wiring installation drawings | Size and location by Fire Consultant |
| 43 | Public address, personnel-location and call system/s | Performance specification giving detailed operational requirements. Coordination of arterial containment routes to specialist's requirements. | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 44 | Public health above ground sanitary plumbing | Specification and design criteria, sizing and routing for coordination at scale 1:100. Design to show flow rates and drainage connection points. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | |
| 45 | Public health above ground chemical drainage | Specification and design criteria, sizing and routing for coordination at scale 1:100. Design to show flow rates and drainage connection points. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | |
| 46 | Public health above ground rain water installation | Coordinate roof discharge rates and outlet locations. Specification and design criteria, sizing and routing for coordination at scale 1:100. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | Roof finishes and falls by Architect. |
| 47 | Public health below ground foul drainage | Provide flow rate information and positions of connection points in relation to sanitaryware and partitions | Coordinate final position of connection points to suit setting out of sanitaryware and partitions | Based on the information from Services Engineer, the Civil Engineer to design drainage reticulation below ground |

| | | | | |
|---|---|---|---|---|
| 48 | Public health below ground storm water drainage | Provide flow rate information and positions of connection points | Coordinate final position of connection points to suit setting out and partitions | Based on the information from Services Engineer, the Civil Engineer to design drainage reticulation below ground |
| 49 | Radio and television installation/s | Performance specification, coordination of containment to specialist's requirements. Coordinate power supplies to specialist's requirements | Installation design of systems. Coordinate location of components and prepare installation drawings | |
| 50 | Refrigeration installation and cold stores | Coordination of pipework/containment to specialist's requirements. Power supplies, BMS interfaces etc to specialist's requirements. | Installation design of systems, sizing of refrigerant pipework, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | For DX system and the like (eg. in server rooms) |
| 51 | Renewable energy sources | Develop strategy to successfully comply with the project objectives. Specification, design and resilience criteria, sizing of plant and coordination on plantroom layout drawings at scale 1:50. | Installation design of systems. Coordinate location of components and prepare installation drawings | |
| 52 | Sanitary fittings and fixtures | Provide connection arrangement details for each type or equipment. Detail all automatic flushing systems sensor requirements including power supplies locations | Final coordination and preparation of installation drawings | Architect to specify sanitary fittings and fixtures |
| 53 | Security Access and Control Systems | Performance specification, coordination of containment to specialist's requirements. Power supplies to specialist's requirements. Provide details of arterial containment routes indicating all access controlled doors and head ends. Specifications for all required systems components and hardware. Coordinate in developing the door schedule | Installation design of systems, final coordination of the location of component. Interfaces to external control centre if applicable. Final coordination and location of supply point in agreement with specialist. Final coordination and preparation of installation drawings. Schedule all required systems components and hardware. Coordinate in developing the door schedule | |
| 54 | Smoke extract/clearance systems | Specification and sizing duct system and fans to meet performance criteria and spatial constraints | Selection of plant and equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | Design strategy and criteria by Fire Consultant |
| 55 | Sound attenuation of services equipment | Equipment selection criteria and location | Final selection and attenuator schedules against procured plant details. Final coordination and preparation of installation drawings | Overall performance criteria by Acoustic Consultant |
| 56 | Specialist water services (e.g Renal RO) | Performance specification, distribution strategy and coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 57 | Steam and condensate system/s | Performance specification, distribution strategy and coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 58 | Street/external lighting/floodlighting | Carry out lighting level calculations. Specification and design criteria. Locate power supplies in relation to the CCTV and lighting locations | Final coordination of power supplies and CCTV locations. Final coordination and preparation of installation drawings | Selection by Landscape Architect |
| 59 | Telephone equipment and wiring | Coordination of containment to specialist's requirements. Power and cooling provision to specialist's requirements. Liaison with Client representatives. | Final coordination of siting/location of hub rooms, cooling and power requirements. Final coordination and preparation of installation drawings. Liaise with Client/Board representatives | |
| 60 | Thermal insulation for services | Specifications | Final selection to meet specifications | |
| 61 | Vibration control | Specifications and equipment selection criteria | Final selection and schedules against procured plant and equipment details | Overall performance criteria by Acoustic Consultant |
| 62 | Water treatment and filtration | Specification, design criteria and sizing of plant including water storage tanks, filtration plant and coordination on plantroom and layout drawing | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements | |
| 63 | Window cleaning trolleys etc. | Power, water and communication supplies to specialist's requirements | Final coordination and location of supply point. Preparation of installation drawings | Specialist to provide power supply requirements and characteristics and location of interface point(s) |
| 64 | Specifications | Final specifications as described under the individual service elements. All systems to be provided with specifications based on NBS to reflect extent of design | Final coordination | |
| 65 | Thermal modelling, Part L Compliance Report, EPC | Undertake thermal modelling using IES Virtual Environment software to obtain heat loss and gain requirements. Use model to assess the thermal performance of the building fabric and summertime temperature predictions. Prepare a SPP6 Compliance Report. IES CFD model to be updated during the project design phase and upon project completion. At the end of detailed design update the model to incorporate plant specifications and use the model to produce an Energy Performance Certificate (EPC) for use by the Client | Final selection to meet specifications | |

| | | | | |
|---|---|---|---|---|
| 66 | Energy Consumption Modelling | Energy model in line with design development and prepare specifications to match assumptions. Energy model to be updated upon completion of design and during commissioning prior to project completion | Final coordination and preparation of installation drawings | |
| 67 | Structural Builder's work | Define and coordinate builder's work critical for the structural integrity of the building(s). This normally applies to all openings, trenches, ducts in concrete. This typically applies to vertical stacks, downpipes. Assist in sanitaryware setout | Define and coordinate all builder's work not critical for the structural integrity of the building(s). This normally applies to all chases, plant bases and openings less than 100mm | Architect to specify grid setout, type, height. MEP Subcontractor to |
| 69 | Reflected Ceiling Plans | Agree and coordinate types of ceilings and heights with the Architect. | Coordinate criteria/rules and grid for setting out. Final coordination and setting out regarding lighting, heating, cooling and ventilation, nurse call, security, CCTV and other specialist designed systems. Provide final details and positions of all ceiling mounted services for Architect's coordination review. Provide final coordinated CAD layer for the Architect to import/issue the final RCP. . | |
| 70 | Detailed design drawings | Detailed design drawings will show the coordinated locations of plant items and service routes in such detail as to indicate the design intent. The main features of detailed design drawings will be as follows:<br><br>• Plan layouts will be to a scale of at least 1:100. Plant areas will be to a scale of at least 1:50, and will be accompanied by cross sections.<br><br>• The drawings will indicate the position of services that are feasible to install and spatially coordinated. It will be possible to produce the final installation drawings without major re-routing of the services.<br><br>• Pipework and cable containment will be represented by single line layouts. Ductwork will be represented by either double line or single line layouts as required to demonstrate that the routes indicated are feasible.<br><br>• The drawing will indicate the space available for major service routing in both horizontal and vertical planes. | Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 71 | Installation and shop drawings | Review and comment on all subcontractor produced coordinated installation drawings | Installation and shop drawings will show the inter-relationship of two or more engineering services and their relation to the structure and building fabric. The main features of coordinated working drawings will be as follows:<br><br>• Plan layouts will be to a scale of at least 1:50 and be accompanied by cross sections to a scale of at least 1:20 for all congested areas.<br><br>• The drawing will make allowance for installation working space and space to facilitate commissioning and maintenance.<br><br>• The drawings will be spatially coordinated and there should be no physical clashes between the system components when installed. Critical dimensions, datum levels and invert levels will be provided.<br><br>• The spaces between pipe and duct runs shown on the drawing will make allowance for the service at its widest points considering the insulation, standard fitting dimensions and joint widths.<br><br>• The drawing will indicate positions of all fixing points and supports necessary to install the works, and where they have significance to the structural design or spatial constraints. | |
| 72 | (As-Built) Record drawings | Review and comment on all subcontractor produced as-built drawings | Prepare record drawings based upon the installation drawings which are marked up on site to reflect any changes occurring during construction. Incorporate these changes to generate the As-Built drawings | |
| 73 | Drain and vent point locations and pipe work gradients | Specification stating venting, drain points and required pipe fall for all building services | Final coordination and preparation of installation drawings | |
| 74 | Locations of brackets and supports | To be defined within the specifications | Final coordination and preparation of installation drawings | |
| 75 | Expansion joints, anchors and guide locations | Specify and indicate locations of expansion joints and anchor points required for major services runs | Final coordination and preparation of installation drawings | |
| 76 | Valve, damper and access point locations | To be defined within the specifications | Final coordination and preparation of installation drawings | |
| 77 | Final fan and pump system resistances | Design resistances based on detailed design drawings and specifications | Verify resistances following completion of the installation drawings and selection of all materials and prior to final procurement of plant items | |

| | | | | |
|---|---|---|---|---|
| 78 | Selection of plant and equipment | Specify main performance requirements and essential design features of plant items. Specify values for the nominal capacities of plant, the range of operating duties anticipated, details of the expected quality of construction and finishes, any essential energy saving features, and the acoustic performance. | Selection of plant and equipment in accordance with the essential design features specified, taking account of final system characteristics once coordinated installation drawings have been adequately developed. Provision of all detailed information in support of proposed selections including, where appropriate, associated system resistance calculations. | |
| 81 | Operational and departmental policies | Review and incorporate requirements into engineering services designs | For performance specified systems, review and incorporate requirements into engineering services designs. Final coordination and preparation of installation drawings | |
| 84 | Major plant and equipment selections | Review and comment on subcontractor's submissions for compliance with key performance requirements as set out in the Equipment Schedules | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |
| 85 | Specialist performance specified systems | Review and comment on specialist's technical submissions for compliance with key performance criteria as set out in the specifications | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |
| 86 | Monitoring the installation for compliance | Attend site to inspect ongoing construction works to confirm that the design intent is generally complied with and to report any observations | | |
| 87 | Commissioning | Agree a commissioning plan and review commissioning data for compliance with the specifications. Attend commissioning activities and meetings in order to witness and sign off key commissioning results | Submit proposals with supporting information. Consider review comments from the Consultant and undertake commissioning | |
| 88 | Energy metering monitoring system | Strategy and performance specification. Indicate all meter locations. | Final coordination and preparation of installation drawings | |
| 89 | BREEAM Excellence rating | Provide all management and input for all aspects of compliance with BREEAM Excellence rating. | Final coordination and preparation of installation drawings | |
| 90 | User Group meetings | Attend key User Group meetings to receive briefing information and input from the building services design aspect | Attend key User Group meetings to receive briefing information and input from the building services design aspect | |

| | | | | |
|---|---|---|---|---|
| 91 | Technical and sample submissions | Review and comment all subcontractor technical and sample submissions to confirm compliance with design intentions, BREEAM rating, energy model, quality etc. | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |

**Documentation**

4.4 The Documentation Deliverables shall be fully coordinated with other consultants and other relevant parties prior to issue. The Deliverables are to be provided in trade package format.

In addition to the above, please note the following general principal requirements:

a) Drawings are to be prepared in a digital form on standard A size sheet (ie. A0, A1, A2, A3). Drawings are not to be any larger than the A0 size.

b) Building Orientation: North to top of sheet, part floors details to be drawn with North to top of sheet. North arrow must be shown on the drawing title block.

c) Each Documents must contain/show:

- Unique document number
- Full title with no abbreviation
- Drawn (or prepared) by and checked by – sign offs
- All details to have scale identified for each
- Denote full (sheet) size
- Changes from the previous drawing revision are to be numbered individually and highlighted with a bold cloud. Once the drawing is revised again, these clouds will be removed and new/latest clouds added to highlight the new drawing amendments
- Detailed description of the change(s) under each number with a date in the title block (to match the cloud number) so that the change(s) can be easily understood from the previous issue
- All documents to be prepared in black and white and not colour unless advised otherwise by the Employer
- The orientation of all drawings when submitted electronically shall be checked that they are landscape and uploaded in the correct orientation (e.g. not scanned upside down)

d) The text on all Documents including the drawings shall be in UK English. All dimensions shall be given in metric format. Calendar dates shall follow the Day/Month/Year format.

e) When revising a document, such as specifications, the full version is to be issued (ie. do not issue just an addenda/extract of the pages that changed).

f) Revisions to text documents will have the revised text in bold and italics (***this is an example***). Text that has been deleted will be in italics and struck through (~~*another example*~~). The Table of Contents shall also highlight in bold italic sections modified. Revised text highlighted must be removed by the Originator prior to issuing the next revision or prior to issuing a document For Tender/Contract and For Construction purposes.

g) Text documents will be prepared on standard A4 size sheets. All text documents will have a title page displaying the relevant information. Each page of the document must show (as a minimum) - document number and its revision, the page number and the total number of pages (ie. page X of Y).

4.5 The following sample list of documents for the building services design as provided by the Consultant indicates the level of design documentation proposed. However, the Consultant shall provide any additional documentation which is not listed below which would be required by the Employer to construct the Works in addition to the Design Development and Overall Design Document Deliverables required by the Board as listed under the agreed Appendix K of the Building Contract which includes those Deliverables required in advance of (Stage 2) Full Business Case:

| Documentation | Scale (indicative) |
|---|---|
| **Appendix K Deliverables** | |
| Mechanical Services Drawings | |
| Medical Gases Layouts | |
| Plantrooms Medical Gases | |
| Medical Gas Services Schematics | |
| Heating System Zoning Philosophy | |
| Chilled Water System Zoning Philosophy | |
| HTG and CHW Layouts | |
| Plantrooms HTB and CHW | |
| MTHW Heating Schematics | |
| Secondary Heating Schematics Plantrooms | |
| Primary Chilled Water Schematics | |
| Secondary Chilled Water Schematics Plantrooms | |
| Ventilation System Zoning Philosophy | |
| Ventilation Layouts | |
| Plantrooms Ventilation | |
| Ventilation Schematics | |
| Environmental Treatment Layouts | |
| Pneumatic Tube System Schematics | |
| Food Waste System Schematics | |
| Electrical Systems Zoning Philosophy | |
| Plantrooms LV Power | |

| Oil System Schematics | |
| Natural Gas System Schematics | |
| Energy Centre Sections | |
| External Services and Energy Centre Electrical Services | |
| Utility Primary Intake Substation Schematics | |
| MV Power Schematics | |
| Energy Centre LV Schematics Substations | |
| External Services and Energy Centre Public Health Services | |
| External Services and Energy Centre Site Services | |
| | |
| | |
| | |
| **Drawings** | |
| **Electrical, Communication and Security Services:** | |
| Legend and symbols | |
| Existing services diversion plans, sections and details | 1:100 / 1:50 |
| Floor plans | 1:100 |
| Plant room and service area layouts | 1:100 |
| Service areas | 1:100 |
| Toilets, tearooms, breakout areas and showers | 1:100 |
| External areas | 1:100 |
| Transformer schedules | |

| | |
|---|---|
| Fire services schematic | |
| Substation | 1:100 / 1:50 |
| Equipment and containment for PABX/communications systems | |
| HV and LV distribution | |
| Main switch rooms | 1:50 |
| Cable tray reticulation | 1:100 |
| Power, communication and security services riser layouts (if applicable) | 1:50 |
| Services reticulation such as cable tray layout | 1:100 |
| Power, lighting and access control layout including to plant and distribution boards for each level | 1:100 |
| Single line diagrams – main switchboards | |
| Riser details | |
| Electrical control systems | |
| Earthing and bonding | |
| UPS and other back-up power management system | |
| Induction loops containment shown on general power drawings | |
| Essential and non-essential fire services switchboards | |
| Emergency lighting | |
| Riser coordination documentation | 1:50 |
| Façade blinds and windows control schematic | |
| BMU provisions (as per Specialist requirements) | |
| Small power and ancillary services circuitry for each level including 'add-in' supplies shown on Architects 1:50s | |
| Room layouts, sections and elevations | |
| | |
| **Public Health and Fire Protection Services:** | |
| Legend and symbols | |
| Existing services diversion plans, sections and details | 1:100 / 1:50 |
| Floor plans indicating sewer; storm water; rainwater; tundishes; and down pipes. | 1:100 |
| Plant room and service area layouts | 1:100 |
| Basement services layouts | 1:100 |
| Toilets, tearooms, breakout areas and showers | 1:100 |
| External areas | 1:100 |
| Public health and fire protection services schematic | |
| Public health and fire protection services riser layouts | 1:100 |
| Services reticulation layout | 1:100 |
| Public health and fire protection services layout - all levels | 1:100 |
| Riser schematic | |

| | |
|---|---|
| Entry lobby and public spaces | 1:100 |
| Public health and fire protection services control systems | |
| Awnings and canopies rainwater drainage | 1:100 |
| Typical drainage details | 1:100 |
| Wet or Dry Riser | |
| Sanitary pipework | |
| Stormwater pipework | |
| Water tank room layout | |
| Foul drainage pump room layout | |
| Water intake and meter room layout | |
| Hot water diagram | |
| Cold water diagram | |
| Riser co-ordination documentation indicated on mechanical core drawings | |

# 5. Commissioning, Completion and Post Completion

## Overview

5.1 This Work Stage shall be the Commissioning, Completion and Post Completion Phase of the Project and shall enable the Project to be commissioned and occupied. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development, the Construction Documentation and the Construction Phases Work Stages.

5.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage are suitable for properly constructing, commissioning and completing the Project in full compliance with the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the construction and completion programmes.

## Tasks

The Consultant shall:

5.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant, make further appraisals of Project constraints.

5.4 Visit site in addition to as requested reasonably by the Employer.

5.5 Evaluate any amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

5.6 In conjunction with the other consultants, review as reasonably required by the Employer all subcontractor proposed commissioning procedures and report to the Employer.

5.7 Not used.

5.8 Review and comment on all relevant guarantees, warranties and O & M manuals prepared by subcontractors and suppliers.

5.9 In preparation for Completion, inspect the benchmark areas as required by the Employer and prepare non conformance reports to describe in the opinion of the Consultant the Works that may prevent them to be certified as completed together with recommendations for rectification of them. If required by the Employer and in conjunction with the Employer, the Consultant shall re-inspect the Works to verify that the non conformances have been rectified. These tasks are to be provided in a timely manner and where requested by the Employer, make appropriate representations on Employer's behalf to the Board in regards to the non conformances and their remedial works.

5.10 Review and comment within 7 days, all relevant "As-Built" documents as prepared by the other consultants and/or subcontractors including drawings, specifications, schedules, manuals and maintenance instructions or any other documents as required by the Employer.

5.11 Attend commissioning and witness testing to review the satisfactory function and completion of relevant systems for compliance with the Consultant's design intent and specifications in accordance with the Project requirements.

5.12 Assist the Employer with the preparation and provision of the Project operation and maintenance manuals and as-built record information and the like as necessary for the Completion of the Project.

5.13 Assist in the preparing and updating of completion programmes as required by the Employer.

5.14 Liaise with other consultants and coordinate the provision of information and data as required by the Employer to comply with the construction and/or commissioning programme to ensure that there is no delay in providing information to the relevant parties.

5.15 Check the Documentation produced during this Work Stage against the Planning consents and other Project requirements such as the Employer's Requirements. Report on any non-compliance and provide mitigation recommendations on same.

5.16 Provide all necessary information to the CDM Coordinator to be included in the Health and Safety File for the purposes of the CDM Regulations.

5.17 Provide the updated specifications to reflect the as-built building services works..

5.18 Not used.

5.19 Provide the Employer with a written statement certifying that the Works are consistent with the Consultant's latest design Documentation and the Project requirements such as the Employer's Requirements as demonstrated on the testing and commissioning results.

5.20 Participate in inspections which shall be conducted at reasonable points during the first 52 weeks, if not at 52 weeks after the date of Completion.

5.21 Reasonably assist the Employer in the settlement of differences in relation to the building services works that may arise between the Board and the Employer or between the Employer and any subcontractor or supplier. Should such differences enter into adjudication or arbitration, the Consultant's assistance may be subject to additional fee which is to be discussed and agreed between the Consultant and the Employer on a case by case basis.

**End**

**SCHEDULE 2, PART 2**

**CONSULTANT COORDINATION MATRIX**

NHS GREATER GLASGOW AND CLYDE
NEW SOUTH GLASGOW HOSPITALS (NSGH)

BROOKFIELD CONSTRUCTION (UK)

# Design Consultant Responsibility Matrix

## June 2010

**NHS GREATER GLASGOW AND CLYDE**
**NEW SOUTH GLASGOW HOSPITALS (NSGH)**

**BROOKFIELD CONSTRUCTION (UK)**

The Consultant with the primary lead responsibilities including the overall coordination for the various design tasks are as follows, but not necessarily limited to:

Note:

1. All other Consultants are required to assist by providing definitive and complete design advice and information in a timely manner to the Lead Consultant responsible for that design task.
2. The responsibilities below exclude the design tasks associated with the Laboratory Building.

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **1.0 Overall Duties** | | | | | | | | | | | | | | | | | | | | | | |
| 1.1 | Design brief development and confirmation | | | | | | | | | | | | | | | | | | | | L | |
| 1.2 | Design brief compliance | L | L | L | L | L | L | L | L | L | L | L | | L | L | | | | | | | For their respective design discipline |

NHS GREATER GLASGOW AND CLYDE
NEW SOUTH GLASGOW HOSPITALS (NSGH)

BROOKFIELD CONSTRUCTION (UK)

# Design Consultant Responsibility Matrix

## June 2010

**NHS GREATER GLASGOW AND CLYDE**
**NEW SOUTH GLASGOW HOSPITALS (NSGH)**

**BROOKFIELD CONSTRUCTION (UK)**

The Consultant with the primary lead responsibilities including the overall coordination for the various design tasks are as follows, but not necessarily limited to:
Note:

1. All other Consultants are required to assist by providing definitive and complete design advice and information in a timely manner to the Lead Consultant responsible for that design task.
2. The responsibilities below exclude the design tasks associated with the Laboratory Building.

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **1.0 Overall Duties** | | | | | | | | | | | | | | | | | | | | | | |
| 1.1 | Design brief development and confirmation | | | | | | | | | | | | | | | | | | | | L | |
| 1.2 | Design brief compliance | L | L | L | L | L | L | L | L | L | L | L | | L | L | | | | | | | For their respective design discipline |
| 1.3a | Master plan – Review, testing and development | | | | | L | | | | | | | | | | | | | | | | |
| 1.3b | Master plan - Ongoing coordination to ensure integration of changes and consistency | | | | | L | | | | | | | | | | | | | | | | |
| 1.3c | Master plan – Prepare, review and submit revised Master plans | | | | | L | | | | | | | | | | | | | | | | Assisted by other Consultants where required |
| 1.3d | Landscape Visual Impact Assessment as necessary | | | | | L | | | | | | | | | | | | | | | | Assisted by other Consultants where required especially from Planning Consultant |
| 1.3e | Update Environmental Impact Statements | | | | | | | | | | | | | | | | | L | | | | Input from other Consultants especially from the Landscape Architect |
| 1.4 | Design presentations | L | | | | | | | | | | | | | | | | | | | | Assisted by other Consultants where required |
| 1.5 | Overall design and documentation coordination | L | | | | | | | | | | | | | | | | | | | | |
| 1.6 | Site and Building grids and setting out | L | | | | | | | | | | | | | | | | | | | | Coordinate/consider grid requirements with the Structural Engineer and Landscape/Masterplanning Consultant |
| 1.7 | Architectural design and specifications | L | | | | | | | | | | | | | | | | | | | | |
| 1.8 | Healthcare planning (including user | | | L | | | | | | | | | | | | | | | | | | Healthcare Planner to lead in SoA, RDS and |

| 3.18 | Sub/superstructure (interface) design coordination | L | | | L | | | | | | | | | | | | | | | | | |
| 3.19 | Spatial coordination of Building Services | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor(s) to take this detailed design from the Services Engineer in preparing the final installation drawings |
| 3.20 | Detailed coordination of Building Services | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor/Services Engineer |
| 3.21 | Coordination of external services (ie. outside building footprints) beneath ground | | L | | | | | | | | | | | | | | | | | | | Input from Civil Engineer |
| 3.22 | Underground drainage design (incl through and to top of the first slab above ground or internal face of (retaining) walls) | | | | L | | | | | | | | | | | | | | | | | Setout dimensions for the pop-ups on slabs and walls to be coordinated with Services Engineer and/or Architect and show them on structure (eg. slab) drawings |
| 3.23 | Above ground slab drainage design including rainwater | L | L | | | | | | | | | | | | | | | | | | | For rainwater, the Services Engineer is to design including showing the setout dimensions on the services drawings. Visual requirements for feature rainwater goods to be provided by the Architect |
| 3.24 | Building plant replacement strategy and design | | L | | | | | | | | | | | | | | | | | | | |
| 3.25 | Electrical systems security strategy and design intent (eg. CCTV and access control) | | L | | | | | | | | | | | | | | | | | | | Assisted by the Architect/Supply Chain |
| 3.26 | Review and incorporation of Architectural Specialist Subcontractor design information | L | | | | | | | | | | | | | | | | | | | | |
| 3.27 | Review of Building Services Specialist Subcontractor design information | | L | | | | | | | | | | | | | | | | | | | |

**NHS GREATER GLASGOW AND CLYDE**
**NEW SOUTH GLASGOW HOSPITALS (NSGH)**

**BROOKFIELD CONSTRUCTION (UK)**

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.28 | Review of Structural Specialist Subcontractor design information | | | | L | | | | | | | | | | | | | | | | | |
| 3.29 | Special waste drainage – top of ground slab and below and intenal face of walls (eg. grease traps, petrol interceptors) | | | | L | | | | | | | | | | | | | | | | | Setout dimensions for the pop-ups on slabs and walls (referenced off the grids) to be coordinated with Services Engineer and/or Architect and show them on structure (eg. slab) drawings |
| 3.30 | Special waste drainage – above ground slab (eg. grease traps) | | L | | | | | | | | | | | | | | | | | | | |
| 3.31 | Integrated data/comms services design intent | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor to undertake the sizing/location of hub rooms and coordinate to prepare the installation drawings |
| 3.32 | Design intent and integration of satellite and cable services | | L | | | | | | | | | | | | | | | | | | | Detailed design from Supply Chain |
| 3.33 | Building services management system design | | L | | | | | | | | | | | | | | | | | | | Detailed design from Supply Chain |
| 3.34 | Thermal insulation specifications | L | | | | | | | | | | | | | | | | | | | | Input from Services Engineer |
| 3.35 | U-value simulations and calculations | | L | | | | | | | | | | | | | | | | | | | |
| 3.36 | Part L equivalent Building Regulation performance simulations and calculations | | L | | | | | | | | | | | | | | | | | | | |
| 3.37 | BREEAM assessment and certification | | | | | | | L | | | | | | | | | | | | | | Input from Other Consultants |
| 3.38 | Building air leak/pressurization testing strategy | | | | | | | | | | | | | | | | | | | | L | Supported by the Architect and Services Engineer |
| 3.39 | Energy performance certification and certificate | | L | | | | | | | | | | | | | | | | | | | |
| 3.40 | Waterproofing design below ground up to the underside of the ground slab/DPC | | | | L | | | | | | | | | | | | | | | | | |
| 3.41 | Waterproofing design above ground including the DPC | L | | | | | | | | | | | | | | | | | | | | |

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.42 | Lightning protection design intent | | L | | | | | | | | | | | | | | | | | | | Detailed design by Supply Chain |
| 3.43 | Structure corrosion protection design | | | | L | | | | | | | | | | | | | | | | | Helicopter Consultant to provide input for the helipad |
| 3.44 | Structural fire protection design | | | | L | | | | | | | | | | | | | | | | | Input from other Consultants as necessary |
| 3.45 | Plant support design and co-ordination with primary structure | | | | L | | | | | | | | | | | | | | | | | |
| 3.46 | Integration of temporary works design into permanent works where required | | | | L | | | | | | | | | | | | | | | | | |
| 3.47 | Secondary steelwork design | | | | | | | | | | | | | | | | | | | | L | Subcontractor's design. Structural Engineer to check and confirm acceptable to the primary structure |
| 3.48 | Masonry wall stability design including wind posts | | | | L | | | | | | | | | | | | | | | | | |
| 3.49 | Lintel specification | | | | L | | | | | | | | | | | | | | | | | Supply Chain to detail the Lintel schedule if necessary |
| 3.50 | Movement joint design (in structure) | | | | L | | | | | | | | | | | | | | | | | |
| 3.51 | Movement joint design (in finishes) | L | | | | | | | | | | | | | | | | | | | | Structural Engineer input required |
| 3.52 | Fire engineered solutions including reports, design notes and deviation requests | | | | | | | | | L | | | | | | | | | | | | |
| 3.53 | Incorporation of the fire engineering related design onto the documentation eg. compartmentation and fire zones etc | L | L | | L | | | | | | | | | | | | | | | | | For their respective design discipline with input from the Fire Engineer |
| 3.54 | Incorporation of acoustic, noise and vibration design into the design documentation | L | L | | L | | | | | | | | | | | | | | | | | For their respective design discipline with input from the Acoustic Engineer |
| 3.55 | Fire extinguisher and exit sign location and quantity | | | | | | | | | L | | | | | | | | | | | | Fire Engineer to draft brief. Architect to provide drawings |

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.56 | Wind load study and design | | | | L | | | | | | | | | | | | | | | | | CFD and wind tunnel testing if required is an additional scope |
| 3.57 | Façade (external cladding, roofing etc) and envelope design coordination | L | | | | | | | | | | | | | | | | | | | | Input from Supply Chain and Other Consultants |
| 3.58 | Roofing purlins and wall cladding girts design (eg. for plantrooms) | | | | | | | | | | | | | | | | | | | | L | Detailed design from Supply Chain |
| 3.59 | Enabling works and project staging documentation | | | | | | | | | | | | | | | | | | | | L | Architect and Landscape Architect to assist with documentation |
| 3.60 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 3.61 | Incorporation of major services builders work in connection in structure | | | | L | | | | | | | | | | | | | | | | | Major builders work penetrations are those equivalent to and larger than 100mm diameter area. Input from Supply Chain and Other Consultants |
| 3.62 | Incorporation of services in connection with finishes | L | | | | | | | | | | | | | | | | | | | | Input from the Services Engineer and the Supply Chain |
| 3.63 | Production of co-ordinated BWIC services information | | | | | | | | | | | | | | | | | | | | L | Subcontractor's design |
| 3.64 | Integration of special fixings into design | L | | | L | | | | | | | | | | | | | | | | | Depending on the stage of the project. Based on Subcontractor information. |
| 3.65 | Lift performance/ type/spec design | | | | | | | | | | | | | | L | | | | | | | |
| 3.66 | Lift car interior and other finishes accessories | L | | | | | | | | | | | | | | | | | | | | |
| 3.67 | Building Services drawings for ceiling mounted services | | L | | | | | | | | | | | | | | | | | | | Input from Supply Chain. Services Engineer will show grilles, chilled beams and radiant panels |
| 3.68 | Reflected ceiling plans | L | | | | | | | | | | | | | | | | | | | | Architect to specify grid setout, type, height. MEP Subcontractor to coordinate and provide details and positions of all ceiling mounted services for Architect's coordination review. |

| **Lead Consultant : L** | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | | | | | | | | | | | | | | MEP Subcontractor to provide the final coordinated CAD layer for the Architect to import and issue the final RCP |
| 3.69 | Slab recess drawings showing setouts for the slab edges, setdowns, upstands, parapets. | | | | L | | | | | | | | | | | | | | | | | Input from Supply Chain and Other Consultants |
| 3.70 | Building loading drawings (including for the equipment loading) | | | | L | | | | | | | | | | | | | | | | | |
| 3.71 | Screed requirements | L | | | L | | | | | | | | | | | | | | | | | Screed/topping requiring reinforcement by the Structural Engineer |
| 3.72 | Tenancy Fit Out Design Guidelines | | | | | | | | | | | | | | | | | | | | L | Client/Contractor to provide Brief. Architect to produce drawings with input from Other Consultants. |
| 3.73 | Not used | | | | | | | | | | | | | | | | | | | | | |
| 3.74 | Mock up/prototype design and documentation | L | | | | | | | | | | | | | | | | | | | | |
| 3.75 | Specialist construction input management | | | | | | | | | | | | | | | | | | | | L | |
| 3.76 | Preparation, submission, receipt and analysis of subcontract tenders | | | | | | | | | | | | | | | | | | | | L | Input from relevant Consultants |
| 3.77 | Inspection of works on site | L | L | | L | L | L | L | L | L | L | L | L | L | L | | L | | | | | For their respective design discipline |
| 3.78 | Off site inspections as requested | L | L | | L | L | L | L | L | L | L | L | L | L | L | | L | | | | | For their respective design discipline |
| 3.79 | Medical waste discharge | | L | | | | | | | | | | | | | | | | | | | With the Board (Specialist) input |
| 3.80 | Green roof | | | | | L | | | | | | | | | | | | | | | | Design intent by the Landscape Architect. Performance specifications from other Consultants for their respective design discipline. Drainage design by the Services Engineer with Specialist input |
| 3.81 | Food waste system | | L | | | | | | | | | | | | | | | | | | | With input from the relevant Consultants |

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **4.0 Specific Design Schedules (to be progressively updated) which may be provided in a drawing format** | | | | | | | | | | | | | | | | | | | | | | |
| 4.1 | Below ground drainage showing setout coordinates, manholes, diversions etc | | | | L | | | | | | | | | | | | | | | | | |
| 4.2 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.3 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.4 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.5 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.6 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.7 | Room Data Sheets | | | L | | | | | | | | | | | | | | | | | | |
| 4.8 | Schedule of Accommodation | | | L | | | | | | | | | | | | | | | | | | |
| 4.9 | Louvre schedules | L | | | | | | | | | | | | | | | | | | | | Input from Other Consultants (especially the Services Engineer and the Supply Chain) |
| 4.10 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.11 | Door and Ironmongery schedules including Masterkeying | L | | | | | | | | | | | | | | | | | | | | Input from Supply Chain |
| 4.12 | Windows / internal screen schedules | L | | | | | | | | | | | | | | | | | | | | |
| 4.13 | Hatches schedule | L | | | | | | | | | | | | | | | | | | | | Input from Other Consultants |
| 4.14 | Finishes schedules | L | | | | | | | | | | | | | | | | | | | | |
| 4.15 | Equipment, Fixtures and Fittings schedules | L | | | | | | | | | | | | | | | | | | | | Architect to provide wall elevations for each exemplar room type in addition to standard wall elevations for the remaining rooms. Architect to highlight substantial fixing requirements (eg. drug cupboards). |
| 4.16 | Signage and wayfinding schedules | L | | | L | L | | | | | | | | | | | | | | | | Split as 1.40a, 1.40b and 1.40c above |
| 4.17 | Sanitary ware schedules | L | | | | | | | | | | | | | | | | | | | | Input from Supply Chain |

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 4.18 | Building services plant and equipment schedules | | L | | | | | | | | | | | | | | | | | | | Input from Supply Chain |
| 4.19 | Luminaries schedules | | L | | | | | | | | | | | | | | | | | | | Services Engineer to provide the performance specifications. MEP Subcontractor(s) to produce the final schedule for installation to comply with the Services Engineer's requirements |
| 4.20 | Grilles schedules | | L | | | | | | | | | | | | | | | | | | | Services Engineer to provide the selection parameters. MEP Subcontractor(s) to produce the final schedule for installation to comply with the Services Engineer's requirements |
| 4.21 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.22 | NOT USED | | | | | | | | | | | | | | | | | | | | | |
| 4.23 | Reinforcement detailing instructions and scheduling | | | | L | | | | | | | | | | | | | | | | | |

## SCHEDULE 2, PART 3

## PROGRAMME

NHS Greater Glasgow and Clyde

This programme is strictly for information only, and will not form any part of any resulting Sub-Contract

# New South Glasgow Hospitals Project

## Stage 3 Adults & Childrens Hospital Procurement Programme

"This programme is copyright and the property of Brookfield Construction (UK) Ltd and must not be used with out written approval".

Brookfield

**Attachment A**

**CONSULTANT'S COLLATERAL WARRANTY**

This Agreement is among

(4) **GREATER GLASGOW HEALTH BOARD** of Dalian House, 350 St Vincent Street Glasgow, G3 8YZ ("the Beneficiary" which expression shall include its successors In title or permitted assignees under this Agreement)

(5) **BROOKFIELD CONSTRUCTION (UK) LIMITED** (Registered number 3808946 of 23 Hanover Square, London, United Kingdom, W1S 1JB ("Main Contractor" which term shall include any successor including any parties taking over the obligations of Main Contractor. under the Project Agreement)

(8) **ZISMAN BOWYER & PARNERS LLP**, (registered number OC310053) whose registered office is at 1 Eton Street, Richmond, Surrey, TW19 1EF ("the Consultant")

WHEREAS:

A The Beneficiary has entered or is about to enter into an agreement with the Main Contractor (°the Building Contract") In connection with the design and construction of the New South Glasgow Hospital, Govan, Glasgow ("the Project").

B The Main Contractor has engaged or is about to engage the Consultant under an appointment ("the Appointment), which expression shall Include all documents incorporated therein and any agreed amendment thereto, to carry out mechanical and electrical design services as more particularly described in the Appointment ("the Services"), which expression shall Include any additional services performed by the Consultant under the Appointment including In connection with any modifications or variations made thereunder.

C It is a condition precedent of the Building Contract that the Consultant, the Main Contractor and the Beneficiary enter into this agreement ("this Agreement").

NOW IT IS AGREED:

1. The Consultant warrants and undertakes to the Beneficiary that it has compiled and will continue to comply with all the terms and obligations under the Appointment on the Consultant's part to be performed and observed and shall complete the Services in accordance with the Appointment.

2. Without prejudice to Clause 1 of this Agreement, the Consultant further warrants and

undertakes to the Beneficiary that:

2.1 it has exercised and will continue to exercise all the reasonable skill, care and diligence to be expected from a competent and qualified professional designer experienced in carrying out services similar in nature, size and complexity to the Services including in the selection of goods and materials for the Project; and

2.2 it has not and will not specify for use in relation to the Project any products or materials not in conformity with relevant British or European standards or Codes of Practice or which are at the time of specification generally known within the United Kingdom to an experienced professional designer of works such as the Project to be deleterious to health and safety or to the durability of buildings and/or other structures and/or finishes and/or plant and machinery in the particular circumstances in which they are used;

Provided that:

2.3.1 the obligations of the Consultant under this Agreement shall be no greater in extent or quantity than if the Beneficiary had been named as joint employer with Main Contractor under the Appointment; and

2.3.2 the Consultant shall be entitled in any action or proceedings brought by the Beneficiary to rely on any limitation in the Appointment and to raise the equivalent rights in defence of liability (excluding counterclaim and set-off in respect of amounts due to the Consultant under the Appointment) as it would have if the Beneficiary had been named as joint employer with the Main Contractor under the Appointment.

3. The Beneficiary has no authority to issue any direction or Instruction to the Consultant in relation to the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5 below. The Beneficiary or its appointee has no liability to the Consultant in relation to amounts due under the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5.

4. The Consultant agrees that it will, if so required by notice in writing given by the Beneficiary, subject to Clause 6, below, accept the Instructions of the Beneficiary or its appointee, as the case may be, (which for the avoidance of doubt and without limitation may include a third party appointed by the Beneficiary to act as "the Employer" under this

Appointment) to the exclusion of the Main Con tractor in respect of the Project upon the terms and conditions of the Appointment. The Main Contractor acknowledges that the Consultant shall be entitled to rely on a notice given to the Consultant by the Beneficiary under this Clause 4 and further acknowledges that such acceptance of the Instructions of the Beneficiary or its appointee, as the case may be, to the exclusion of the Main Contractor shall not constitute any breach of the Consultant's obligations to the Main Contractor under the Appointment.

5. The Consultant further agrees that It MI not without first giving the Beneficiary not less than 35 days notice in writing exercise any right or purported right it may have to determine its employment tinder the Appointment, treat the same as having been repudiated by the Main Contractor, or discontinue the performance of any duties or obligations thereunder. Further, the Consultant shall within 14 days of giving the said notice, provide statements to the Beneficiary containing the following:

5.1 all amounts properly due and payable to the Consultant under the Appointment on or before the date of Issue of the said notice which remain unpaid;

5.2 in the reasonable estimation of the Consultant, the amount of any monetary claim (it any) asserted by the Consultant against the Main Contractor under the Appointment arising out of or in connection with the breach for which the said notice was served; and

5.3 where the Consultant intends to terminate the Appointment due to some default or breach of contract of a non-financial nature:

5.3.1 the provision of the Appointment alleged to have been breached or not fulfilled;

5.3.2 supporting information In reasonable detail to enable the Beneficiary to Identify the material facts;

5.3.3 the steps reasonably required to remedy the specified breaches or conditions not fulfilled;

5.3.4 the time within which the specified steps can reasonably be expected to be taken;

5.3.5 (if applicable) the amount of damages claimed and the basis of their calculation; and

5.3.6 (if applicable) the relief to be sought.

The Consultant warrants to the Beneficiary that to the best of the Consultant's knowledge and belief, having made all proper and appropriate enquiries, the statements submitted under this Clause 5 shall be true, complete and accurate statements of the amounts to which the Consultant considers Itself entitled. In the event that the Consultant shall delay in giving such notice and Information within the said 14 days, the period of 35 days shall be extended to correspond with the period of any such delay. The Consultant's right to determine its employment under the Appointment or to treat the same as having been repudiated or to discontinue performance shall cease if, within the said 35 day period (extended as appropriate) and subject to Clause 8 the Beneficiary shall give notice in writing to the Consultant requiring the Consultant to accept the instructions of the Beneficiary or its appointee to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of the Appointment.

6. It shall be a condition of any notice given by the beneficiary under clauses 4 or 5 above, that the beneficiary or its appointee, as the case may be, accepts liability for payment of the sums due under the appointment and detailed in the statement provided under clause 5 (and makes payment within a period of 28 days of such notice from the beneficiary), and for subsequent performance of the main contractor's obligations. Upon the Issue of any notice by the beneficiary under clauses 4 or 5, the appointment shall remain in full force and effect as if no right of determination of its employment under the appointment, or any right of the consultant to treat the appointment as having been repudiated by the main contractor. Had arisen and the consultant shall be liable to the beneficiary and/or its appointee, as the case may be, under the appointment in lieu of its liability to the main contractor.

7. The beneficiary may at any time following the issue of any notice by the beneficiary under clauses 4 or 5, serve a further notice that following the expiry. of 28 days from the giving of such notice the beneficiary will have no liability (save in respect of the beneficiary's antecedent breach) for any SUMB due or to become due to the consultant in respect of the period following expiry of the last mentioned 28 day period. The beneficiary may exercise any of its rights pursuant to clauses 4 or 5 on more than one occasion.

8. The consultant shall maintain for the period expiring 12 years after completion of the

services or until termination of the consultant's employment under the appointment, professional Indemnity insurance in an amount of not less than £.(101m [(ten million pounds)] sterling for any one claim or series of claims arising out of one single incident during any period of insurance which shall not be more than 12 months with insurers of good repute canting on business in the European union provided always that such insurance is available at rates and terms which are commercially reasonable to consultants of a similar size and standing in the UK. In determining whether or not insurance is available as aforesaid, the financial characteristics and claims' record of the consultant shall be ignored. The consultant shall immediately Inform the beneficiary if such insurance ceases to be available at rates and terms which are commercially reasonable in order that the consultant and the beneficiary can consider alternative means of best protecting their respective positions in respect of the project In the absence of such insurance provided that the beneficiary shall be entitled to require the consultant to maintain such lesser amount of professional Indemnity insurance as is available to the consultant at rates and terms which are commercially reasonable. As and when it Is reasonably requested to do so by the beneficiary (but not more than once in any period of Insurance) the consultant shall produce; for inspection documentary evidence satisfactory to the beneficiary (acting reasonably) that its professional indemnity insurance Is being maintained.

9. The consultant hereby grants to the beneficiary or Its appointee and all those authorised by the beneficiary an irrevocable, non-exclusive and royalty-free licence (which shall be capable of assignation) to use and reproduce all technical Information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things whatsoever provided or to be provided by the sub-contractor in connection with the project (the 'documents") for any purpose relating to the project including (but without limitation) the construction, completion, maintenance, promotion, advertisement, reinstatement, repair and any extension of the project and for dissemination within the NHS as part of the feedback of Information to better or enable the NHS to realise improvements in its methods and practice of construction and In the design and procurement of its construction. Such licence shall carry the right to grant sub-licenses and shall subsist notwithstanding that the appointment is terminated or the obligations and duties thereunder have been completed. For the avoidance of doubt, the grant of such licence or sub-licences shall not impose any

additional liability on the consultant. The consultant not assign or agree to assign the copyright in any of the documents without the prior written consent of the beneficiary. The consultant shall on reasonable demand provide to the beneficiary or its appointee and those authorised by the beneficiary additional copies of any documents on receipt of reasonable copying costs. The consultant shall not be liable for any use by the beneficiary of any of the documents for any purpose other than those authorised by this clause.

10. This agreement may be assigned on a maximum of two occasions in whole or in part by the beneficiary to any party to whom the beneficiary's interest In the main contract or any part thereof is assigned or disponed to without the consent of the main contractor or the consultant being required and any such assignation shall be effective upon written notice thereof being given to the main contractor and to the consultant. No other or further assignation of this agreement, other than permitted by this clause, by the beneficiary or any other party shall be permitted. The consultant shall not be entitled to assignor transfer any rights or obligations hereunder without the consent of the beneficiary.

11. The consultant undertakes that it will not raise as a defence to any action by the beneficiary far alleged breach of this agreement the fact that the obligations of the main contractor to the beneficiary in respect of the services have been released as a result of the termination of the building contract.

12. No failure, approval, act or forbearance on the part of the beneficiary in respect of any right of the beneficiary pursuant to this agreement shall constitute any waiver of any right of the beneficiary under raising out of this agreement nor relieve the consultant of any of its duties or obligations under or arising out of this agreement.

13. Any notice, consent or demand to be given or made by any party under this agreement (hereinafter called a "notice") shall only be validly served if In writing and delivered personally or sent by pre-paid first class recorded delivery post to the following address and marked for the attention of the following person in the case of each party:

| Party: | Address: | Person: |
|---|---|---|
| Beneficiary | Dalian House, 350 St Vincent | Head of Board Administration |

| | | |
|---|---|---|
| | Street Glasgow, G3 8YZ | |
| Main Contractor | 23 Hanover Square, London W1S!JB | Paul Serkis |
| Consultant | 1 Eton Street, Richmond, Surrey, TW19 1EF | Steven Pardy |

Any party may by Notice to the other party/parties change its address or the title of the person for whose attention Notices are to be given or made pursuant to this Clause. Any such Notice shall be deemed to have been received:

13.1 if delivered personally, at the time of delivery;

13.2 in the case of pre-paid first class recorded delivery post, on the first Business Day after the date of posting.

If any Notice Is delivered after 5 p.m. on a Business Day, or at any time during a day which is not a Business Day, that Notice shall be deemed to have been received at 9 am, on the next Business Day. For the purposes of this Clause, "Business Day" means any day which is not a Saturday, a Sunday or a public holiday in Scotland. In proving service it shall be sufficient to prove that the envelope containing such Notice was properly addressed to the relevant party·and either delivered personally to that address or delivered into the custody of the postal authorities as a pre-paid first class recorded delivery letter. For the avoidance of doubt, Notices shall not be validly served if sent by email or fax.

14. No action or proceedings for any breach of this Agreement shall be commenced against the Consultant after the expiry of twelve years from Completion or earlier termination of the Consultant's employment under the Appointment.

15. The definitions of words and phrases used in this Agreement shall be those set out in the Appointment except where expressly defined in this Agreement.

16. This Agreement shall be governed by and construed in accordance with Scots Law and the parties hereto submit to the exclusive jurisdiction of the Scottish Courts.

Building Services Design • Renewable Technologies • Sustainability • Thermal Simulation • Building Information Modelling • Acoustics

Zisman Bowyer & Partners LLP is a Limited Liability Partnership • Registered Office: Ambassador House, Paradise Road, Richmond, Surrey, TW9 1SQ. UK

**This is Appendix 2 to the foregoing Agreement between Brookfield Construction (UK) Limited**

**and**

**Zisman Bowyer & Partners**

**BROOKFIELD CONSTRUCTION (UK) LIMITED** of 23 Hanover Square, London, United Kingdom W1S1JL ("the *Employer*"); and

**ZISMAN BOWYER AND PARTNERS** having its Registered Office at Ambassador House, Paradise Road, Richmond, Surrey TW9 1SQ (the "*Consultant*").

WHEREAS

1. The *Employer* and the *Consultant* entered into the Agreement dated 2010 whereby the *Consultant* is to Provide the Services in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Consultant* to continue to Provide the Services by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3 | Final design and construction of the New Hospitals Building | Final design and construction of the New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of soft landscaping. |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Consultant* to commence and carry out Stage 3 and Stage 3A of the *services* ie the Final design and construction of the New Adult Acute and New Children's Hospitals and *services* in connection with the demolition of the surgical block and associated buildings.

2. The *Consultant* will continue to Provide the Services in accordance with the Agreement.

3. The Parties agree and acknowledge that there shall be no adjustment to the Prices as a result of the issue of this Notice to Proceed.

4. The Agreement is amended and modified to reflect and/or incorporate the following:-

   - Notice to Proceed dated 16th December 2010 between the Employer and Greater Glasgow and Clyde Health Board. (attached as Appendix One)
   - The *activity schedule* contained within Attachment A in Contract Data Part Two shall be replaced by the attached revised payment profile (attached as Appendix Two).
   - The Programme contained within Schedule 2 Part Three of Contract Data Part One shall be replaced by the attached programme (attached as Appendix Three)

EXECUTED for and on behalf of the *Employer* at 24 January 2011 as follows:-

**This is Appendix 2 & 3 to the foregoing Agreement between Greater Glasgow and Clyde Health Board**

**and**

**Brookfield Construction (UK) Limited**

**GREATER GLASGOW AND CLYDE HEALTH BOARD** of J B Russell House, Gartnavel Royal Hospital, 1055 Great Western Road, Glasgow G12 0XH ("the *Employer*"); and

**BROOKFIELD CONSTRUCTION (UK) LIMITED** having its principal place of business at 23 Hanover Square, London, W1S 1JB (the "*Contractor*").

WHEREAS

1. The *Employer* and the *Contractor* entered into the Agreement dated 18th December 2009 whereby the *Contractor* is to Provide the Works in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Contractor* to continue to Provide the Works by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3 | Design and Construct New Hospitals Building | Design and Construction of the New Adult Acute and Children Hospitals Building and Energy Centre. |
| Stage 3A | Demolition of Surgery Block | Demolition of surgical block and associated buildings and completion of soft landscaping |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Contractor* to commence and carry out Stage 3 and Stage 3 A of the *works* i.e. the Design and Construction of the New Hospitals Building, and demolition of the surgical block and associated buildings and completion of soft landscaping.
2. The *Contractor* will continue to Provide the Works in accordance with the Agreement.

3. The Agreement is amended and modifled to the following extent:-

i. The Base Date for monitoring the *Employer* Accepted Risk on Inflation for all Stages will be 1st January 2011.

ii. The Start on Site date for Stage 3 is amended from 28th February 2011 to 28th March 2011 at which point the *Employer* will ensure the provision of a totally clear site for access by the *Contractor*. It is accepted by the *Employer* that the *Contractor* shall be entitled to undertake enabling works prior to this date.

iii. The Start on Site Date for Stage 3A is amended from 20th July 2015 to 17th August 2015

iv. Option X5 Clause, the Completion Date for Section 2 (Stage 3 New Hospital) is amended from 31st January 2015 to 28th February 2015 and the Completion Date for Section 3 (Stage 3A Demolition) is amended from 19th July 2016 to 16th August 2016

v. Contract Data Part One and Contract Data Part Two forming part of executed Contract dated 18th December 2009, is amended and supplemented as follows:-

Employers Requirements Supplemental Information –

- BIW Log (as included within Folder B1 of the Instruction to Proceed Bible titled The BIW Log (2010 ItP) – (FINAL) )
- RFI Log (as included within Folder B1 of the Instruction to Proceed Bible titled The RFI Log (2010 ItP) – (FINAL) )
- Clarification Log (as included within Folder B1 of the Instruction to Proceed Bible titled The Clarification Log (2010 ItP) – (FINAL))
- M+E Clarification Log (as included within Folder B1 of the Instruction to Proceed Bible titled The M&E Clarification Log (2010 ItP) – (FINAL))
- Laboratory Log (as included within Folder B1 of the Instruction to Proceed Bible) (as executed Agreement 18th December 2009)
- Sustainability Log (as included within Folder B1 of the Instruction to Proceed Bible titled The Sustainability Log (2010 ItP) – (FINAL))

- Stage 3 Instruction to Proceed Log December 2010 (new) (as included within Folder S of the Instruction to Proceed Bible)

Contractors Proposals –

- Volume 1 (as included with Folder C1 of the Instruction to Proceed Bible) – Schedule of Accommodation titled SOA 1:200 Drawings. By reference to the 1:200 drawings included within Volume 13 of this agreement the areas denoted on the drawings represent the agreed position between the Parties to the Contract. The Parties agree to use reasonable endeavours to prove functionality and to maintain the overall areas as currently indicated and the *Employer* agrees that any adjustments to areas during the remaining 1:50 review process (excluding Plantrooms and Service Risers with the exception of those adjustments due to a change within the Employer's Requirements) that cannot be accommodated within the Departmental areas or within the overall building envelope that give rise to an increase in area will be an additional Employer Risk. The Parties accept that the 0.5% risk accepted by the Contractor within the Agreement of 18th December 2009 has already been absorbed by the Contractor.
- Volume 2 (as included within Folder D1 of the Instruction to Proceed Folder) – Drawings.
- Volume 3 (as included within Folder F1 of the Instruction to Proceed Bible) – Design Narratives
- Volume 4 (as included within Folder G1 of the Instruction to Proceed Bible) – Specifications
- Volume 5 (as included within Folder H1 of the Instruction to Proceed Bible) – Components titled 2010 ItP Project Bible - Folder H1 – Components (FINAL)
- Volume 6 (as included within Folder T of the Instruction to Proceed Bible) – Equipment (as amended 16th December 2010). These revised Equipment Schedules define the current position agreed between the Parties to the Contract and thus the quantities and coding identified therein take precedence over the Drawings included

within Volumes 2, 13, 14, and 15 of this Appendix 2 and 3 agreement. For purpose of clarity any change in quantity or coding will be an Employer Risk pursuant to Risk Items 25, 39 and 40 on the Stage 3 NSGH Board Risk Schedule included within the Contract.

- Volume 7 (as included within Folder I1 of the Instruction to Proceed Bible) – SHTM (as executed Agreement 18th December 2009)
- Volume 8 (as included within Folder J1 of the Instruction to Proceed Bible) – ADB titled EDS ItP Batch 1 - ZBP updates_141210" & "EDS ItP Batch 2 - ZBP updates_141210" & "2900-NSGH-Environmental matrix_comments-011210 (Final)
- Volume 9 (as included within Folder K1 of the Instruction to Proceed Bible) – Programme titled Stage 3 Summary Master Programme, BCL-GSM-CN02-0001 (FINAL)
- Volume 10 (as included within Folder L1 of the Instruction to Proceed Bible) – Logistics (as amended 16th December 2010)
- Volume 11 – Not Used
- Volume 12 – Commercial (as executed Agreement 18th December 2009 unless amended by this Appendix 2 & 3, or Compensation Event already issued, or Project Managers Instruction already issued)
- Volume 13 (as Included within Folder U of the Instruction to Proceed Bible) (new) – Masterplan & Architecture Proposals (Agreed Appendix k drawing schedule)
- Volume 14 (as included within Folder V of the Instruction to Proceed Bible) (new) – M&E Engineering Proposals (Agreed Appendix k drawing schedule)
- Volume 15 (as included within Folder W of the Instruction to Proceed Bible) (new) – Civil / Structural Engineering Proposals (Agreed Appendix k drawing schedule)
- Volume 16 Critical Failures (as included within Folder X of the Instruction to Proceed Bible titled Appendix X1 (FINAL)

- Volume 17Planning Consents Pack (as included within Folder Y of the Instruction to Proceed Bible)

vi. Compensation Events and Project Managers Instructions as issued prior to execution date of this Appendix 2 & 3

**AGREEMENT**

between

**BROOKFIELD MULTIPLEX CONSTRUCTION EUROPE LIMITED** (Company No. 03808946) whose registered office is at 23 Hanover Square, London, United Kingdom W1S 1JB ("the *Employer*"); and

**TUV SUD LIMITED (trading as "Wallace Whittle")** (Company No. **SC215164**) whose registered office is at Napier Building, Scottish Enterprise Technology Park, East Kilbride, Glasgow G75 0QF (the "*Consultant*").

WHEREAS: -

The *Employer* has been appointed to carry out the design and construction of the New South Glasgow Hospital ("the Project") and wishes to have the *Consultant* Provide the *services* in connection with the same as follows: -

| Stage | Heading | Outline Activities |
|---|---|---|
| Stage 3 | Final Design of the New Hospitals Building | Completion of detailed design of New Adult Acute and New Children's Hospitals and Energy Centre. Consecutive to Stage 2. |
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of soft landscaping. |

**NOW IT IS AGREED THAT**

1. The *Consultant* will Provide the Services in accordance with the NEC Professional Services Contract, Option A: Priced Contract with activity schedule June 2005 (as the same are amended in by the Contract Data) ("*the conditions of contract*") and the principles stated in Appendix 1 of this Agreement. The *Services* include all services performed or to have been performed by Zisman Bowyer & Partners LLP ("ZBP") pursuant to the Professional Services Contract entered into between the *Employer* and Zisman Bowyer & Partners LLP dated 28 September 2010 in respect of the Project ("*ZBP Appointment*").

2. The *Employer* will pay the *Consultant* in accordance with Section 5 of the *conditions of contract.* The *Employer* is not obliged to pay the *Consultant* in respect of *Services* already performed by ZBP pursuant to the *ZBP Appointment.*

3. The *Consultant* acknowledges and agrees that as at the Contract Date the Consultant shall be authorised to proceed with the *services* in connection with Stage 3 only. The *Consultant* is authorised to commence and proceed with Stage 3A upon written authorisation given by the *Employer* in the form attached as Appendix 2 hereto. In the event that the *Consultant* undertakes any work in connection with Stage 3A without such written authority from the *Employer*, the *Consultant* does so at his own cost and risk.

4. The *Consultant* agrees to be responsible for and liable to the *Employer* pursuant to this contract for all of the duties, obligations and services provided or to have been provided by ZBP pursuant to the *ZBP Appointment.* The Consultant warrants to the Employer that all services performed by ZBP pursuant to the *ZBP Appointment* have been carried out in accordance with the requirements and standards required by the *ZBP Appointment.* However, and notwithstanding any other provision of this contract, the *Consultant* shall bear no responsibility or liability for or in respect of delays arising to the Project as a consequence of ZBP's insolvency or the resulting termination of the *ZBP Appointment.*

5. The *Consultant* undertakes not to contend in defence of any claim brought by the *Employer* against the *Consultant* under this contract in respect of duties, obligations and services provided or to have been provided by ZBP pursuant to the *ZBP Appointment* that the liability of the *Consultant* is affected or diminished by reason of the fact that the claim relates to duties, obligations and/or services performed or to have been performed by ZBP under the *ZBP Appointment*, rather than the *Consultant*, under this contract.

6. The documents forming part of this contract are:

   6.1 this Agreement

6.2 the *conditions of contract*,

6.3 Contract Data part one — data provided by the *Employer*

6.4 Contract Data part two - Data provided by the *Consultant*

7. In the event of conflict between the documents forming part of this contract the following order of priority will apply:-

7.1 This Agreement (excluding Appendix 1)

7.2 The *conditions of contract*,

7.3 Contract Data Part One (including the Scope).

7.4 Contract Data Part Two

7.5 Appendix 1 of this Agreement

IN WITNESS WHEREOF these presents consisting of this and the 2 preceding pages together with Appendices 1 and 2 and the Contract Data part one (including its Appendices) and Contract Data part two are executed as follows: -

**This is Appendix 1 to the foregoing Agreement between Brookfield Multiplex Construction Europe Limited**

**and**

**TUV SUD LIMITED**

**Principles governing the Agreement**

**Definitions**

| **Defined Term** | **Definition** |
|---|---|
| "Building Contract" | means the contract between the Employer and Greater Glasgow and Clyde Health Board in relation to the design and construction of the New South Glasgow Hospital. |
| "Overriding Objective" | means the objective set out in Paragraph 4. |
| "Overriding Principle" | means principle set out in Paragraph 1. |
| "Professional Advisor" | means any party providing specialist advice to the *Employer*. |

1. The Overriding Principle of this Agreement is to work together with the *Employer* and its Professional Advisers in a co-operative and collaborative manner to achieve the Overriding Objective acting in good faith and in the spirit of mutual trust and respect.
2. In order to work together in co-operative and collaborative manner the *Employe*r and the *Consultant* agree that they should each give to and welcome from each other, and any Professional Adviser, feedback on performance and shall share information openly and highlight any difficulties at the earliest practical time. The parties shall support collaborative behaviour and confront behaviour that does not comply with the Overriding Principle.
3. The terms of the Agreement shall be interpreted according to their natural meaning but in the event of any ambiguity in their natural meaning they shall be interpreted so as to give best effect to the Overriding Principle.
4. In entering into the Agreement the parties' Overriding Objective is by working together in accordance with the terms of the Agreement to achieve the successful delivery by the *Consultant* of the *services*: -

4.1 carry out the *services* exercising reasonable skill and care having due regard to the standard and functionality defined within the Employer's Requirements as set out in the Building Contract;

4.2 at a cost that offers best value for money taking into account whole life (as well as capital) costs over the proposed design life of the *works* through the application of the principles of value engineering; and

4.3 to use reasonable endeavours to achieve the timescale acceptable to the *Employer* and agreed between the parties without compromising health and safety or the *Employer*'s required standards and the quality of the completed *works* and in any event before the Completion Dates set out in the Building Contract.

5. The *Consultant* shall carry out the management and be responsible for the delivery of the *services* in accordance with the Agreement and shall work and liaise with the *Employer* and any of its Professional Advisers as necessary or appropriate or as requested by the *Employer* in order to achieve the Overriding Objective.

6. The *Consultant* shall engage persons from the key people set out in the Contract Data — Part two in the performance of the *services* to be provided by the *Consultant* under the Agreement and shall not replace any of the key people without the approval of the *Employer* (such approval not to be unreasonably withheld). **T**he *Consultant* will ensure that where a member of its key personnel is replaced that they have the skills, qualifications, experience and ability to provide the best service to the *Employer*.

7. Throughout the period of the Agreement the performance of the *Consultant* shall in relation to the *services* be monitored against the Key Performance Indicators defined in the Scope and/or the Contract Data and/or the Contract Data to the Building Contract.

8. During the period of the Agreement amendments may be made to the Key Performance Indicators by agreement between the *Employer* and the *Consultant* except where the Client is required by the Scottish Government or regulatory bodies to provide Key Performance Indicators. In such cases the *Employer* will provide information on any requirements to the *Consultant* as soon as reasonably practicable.

9. At 2 monthly intervals or at such other intervals as the parties may agree during the performance of the Agreement, the *Employer* and the *Consultant* shall undertake formal reviews of the performance of the *Consultant* against its Key Performance Indicators. **T**he *Employer* and the *Consultant* will discuss any way in which the performance of the *Consultant* may be improved.

10. The *Consultant* shall keep a comprehensive record as specified by the *Employer* of all performance monitoring carried out under the Agreement in such form as the *Employer* may reasonably request for a period of 6 years after the expiry or earlier termination of this

Agreement and shall provide copies of such records to the *Employer* for the *services* to enable him to record, disseminate and compare the performance of the *Consultant*. Each record shall be retained in a format that can be read and copied and kept with the IT requirements on an electronic based database.

11. The *Consultant* shall throughout the period of the Agreement look for and seek to achieve continuous improvement in the quality of the *services* while reducing whole life costs, wastage (in accordance with WRAP guidance), and the time taken to deliver the *services*. Innovation and best practice will be shared with the *Employer*.

12. To achieve the aim set out in Clause 11 the *Consultant* shall actively participate in the continuous improvement "learning sets" with the Employer in relation to the Agreement. This commitment is likely to involve meetings at least once every 3 months in relation to the *services* and meetings at least once every 6 months in relation to the lessons to be learned. The *Consultant* shall also use reasonable endeavours to procure the involvement of any of its subconsultants in such learning sets where considered appropriate.

**This is Appendix 2 to the foregoing Agreement between Brookfield Multiplex Construction Europe Limited**

**and**

**TUV SUD LIMITED**

**BROOKFIELD MULTIPLEX CONSTRUCTION EUROPE LIMITED** of 23 Hanover Square, London, United Kingdom W1S 1JB ("the *Employer*"); and

**TUV SUD LIMITED** having its Registered Office at Napier Building, Scottish Enterprise Technology Park, East Kilbride, Glasgow G75 0QF (the "*Consultant*").

WHEREAS

1. The *Employer* and the *Consultant* entered into the Agreement dated [ ] whereby the *Consultant* is to Provide the Services in connection with the New South Glasgow Hospital Project.
2. The *Employer* wishes the *Consultant* to continue to Provide the Services by commencing and carrying out:

| | | |
|---|---|---|
| Stage 3A | Demolition and Final Landscaping | Demolition of surgical block and associated buildings and completion of soft landscaping. |

NOW IT IS AGREED THAT

1. The *Employer* hereby authorises the *Consultant* to commence and carry out Stage 3A of the *services* ie *services* in connection with the demolition of the surgical block and associated buildings.
2. The *Consultant* will continue to Provide the Services in accordance with the Agreement.
3. The Agreement is amended and modified to the following extent:-

   [*Any amendments to the Scope and/or Contract Data which will have come about during Stage 2*]

- The quality policy statement and quality plan are provided within 3 weeks of the Contract Date.
- The *defects date* is 104 Weeks after Completion of the *services*.

**5. Payment**

- The *assessment interval* is four (4) weeks alternatively calendar monthly in accordance with the cashflow set out in Contract Data Part Two.
- The *currency of this contract* is the pound sterling (£)
- The interest rate is 5% per annum

**8. Indemnity, insurance and liability**

The minimum limit of indemnity for insurance in respect of loss of or damage to property (except the works, Plant and Materials and Equipment) and liability for bodily injury to or death of a person (not an employee of the Consultant) caused by activity in connection with this contract for any one event is

**£10,000,000.00 (ten million pounds sterling)**

The minimum limit of indemnity for insurance in respect of death or bodily injury to employees of the *Consultant* arising out of and in the course of their employment in connection with this contract for any one event is

**£10,000,000.00 (ten million pounds sterling)**

The amount of the minimum limit of indemnity for Professional Indemnity Insurance for design liability in connection with this contract, including without limitation, liability for any part of the services or Services provided by Zisman Bowyer & Partners LLP pursuant to the ZBP Appointment for any one event is

**in any one event of £10,000,000 (ten million pounds sterling)**

for a period of twelve years from Completion of the whole of the *services*.

Consultant to provide documentary evidence to which insurance option is being provided

The *Consultant* provides all other insurances required by the *law of the contract*

**Optional Statements**

**If the Employer has decided the completion date for the whole of the *works***

The *completion date* for the whole of the *services* is 19th July 2016

**If no programme is identified in part two of the Contract Data**

The Consultant is to comply with the programme contained in Schedule 2 Part 3.

**If the Employer has identified work which is to meet a stated *condition* by a *key date***

Not applicable.

**If Option X5 is used**

- The *completion date* for each *section* of the *services* is

| Section | Description | *completion date* |
|---|---|---|
| 1 - Stage 3 | New Hospital | 31st January 2015 |
| 2 – Stage 3A | Demolition of surgical block | 19 July 2016 |

**If Option X8 is used**

- The *collateral warranty agreements* are:

| Agreement reference | Third Party |
|---|---|
| Form as set out in Schedule 1 | Greater Glasgow Health Board<br>Others as required by the Client and requested by the *Employer* |

**If Option X18 is used**

The *end of liability date* is twelve (12) years after the Completion of the whole of the *services*.

**If Option Z is used**

*The additional conditions of contract are*

**Amendments and additions to existing Clauses:**

**Z 1 Additions to Clause 11.2 - Identified and Defined Terms**

11.2(14) "Agreement" is the form of agreement entered into between the *Employer* and the *Consultant* in respect of the services forming part of this contract

11.2(15) "the Client" is the Greater Glasgow Health Board.

11.2(16) "Full Business Case" is the Client's submission to the Scottish Government for approval to proceed with Stage 3.

11.2(17) "Laboratories" is the new laboratory block as the same is more particularly described in the Scope.

11.2(18) "Stage" has the meaning ascribed to it in the recital to the Agreement.

11.2(19) "*conditions of contract*" is the NEC Professional Services Contract, Option A: Priced contract with activity schedules, June 2005 (as the same are amended in by the Contract Data.

11.2(20) "Design Deliverables" are those elements of design to be delivered by the *Consultant* to the *Employer* as identified as part of the *services*.

11.2(21) "Documents" includes, without limitation, all technical information (whether or not stored in computer systems), drawings, models, calculations, specifications, schedules, details, plans, programs, budgets, reports or other documents, work or other things provided or to be provided by or on behalf of the *Consultant* in connection with the *services*.

**Z2 Amendment to clause 11.2 (4) - Identified and Defined Terms**

Delete and replace with "the Contract Date is the date of execution of this contract"

**Z3 Amendment to Clause 16.1 – Ambiguities and inconsistencies**

Add the following sentence to the end of Clause 16.1

"Instructions issued under this clause do not necessarily give rise to a compensation event"

**Z4 Addition to Clause 16 – Ambiguities and inconsistencies**

"16.2 Inconsistencies and ambiguities between (a) the NHS Mandatory Documentation and NHS Guidance Documentation and building control or (b) between the NHS Mandatory Documentation and NHS Guidance Documentation and the Schedules of Accommodation or (c) between the NHS Mandatory Documentation and NHS Guidance Documentation and any information issued to the Consultant by the Employer, are to be dealt with in accordance with the procedures set out in the Scope."

**Z5 Amendment to Clause 18 – Prevention**

Add new Clause 18.2

"Notwithstanding the provisions of Clause 60 and subject to Clause 18.4, the *Consultant*'s sole right to payment in respect of the occurrence of an event under Clause 18.1 is as provided in Clause 92."

Add new Clause 18.3

"The *Consultant* and the *Employer* take all reasonable steps to mitigate the effect of the occurrence of an event under Clause 18.1."

Add new Clause 18.4

"If the *Employer* instructs the *Consultant* to take steps to Provide the Services in a manner not prevented by the occurrence of an event under Clause 18.1, and such instruction changes the Scope, the *Consultant* is entitled to notify a compensation event under clause 60."

**Z6 Amendment to Clause 21.2 - The *Consultant's* design**

Delete and replace with: "The *Consultant's* obligation is to perform the *services* using the degree of skill and care that would reasonably be expected of a competent professional designer experienced in carrying out design activities of a similar nature, scope and complexity to those comprised in the *services*.

**Z7 Addition to Clause 31 – The programme**

"31.4 The *Consultant* complies with section 6.8 of Volume 2/1 of the Employers Requirements Section of the Works Information in the Building Contract in connection with commissioning and handover for the whole of the *works.* "

**Z 8 Addition to Clause 51 - Payment**

51.6 If the amount to be paid at an assessment date exceeds the amount for the assessment interval as shown in the *Consultant*'s cash flow forecast (as contained in Contract Data Part Two), then the *Employer* certifies payment up to the amount forecast. Any amount exceeding the forecast is not certified but held over to the next assessment interval, where if amount to be paid at the next assessment date again exceeds the *Consultant*'s cash flow forecast for the assessment interval the process is repeated. This clause does not apply where the *Consultant* provides a valid and acceptable reason for an exception to the limitation of the *Employer's* assessment certification.

**Z9 Amendment to Clause 60.1(11)**

Add new bullet point 6, "does not arise from a sub-consultant ceasing to trade or becoming insolvent (or other equivalent event)"

Add at the end, "provided that the occurrence of such event only entitles the Consultant to a change to the Completion Date or a change to a Key Date and not to a change in the Prices and Clauses 61 – 65 are interpreted accordingly."

**Z10 Amendment to Clause 61.4 - Notifying of Compensation events**

In line 15 delete "two" and substitute "four"

**Z11 Amendment to Clause 70 – the Parties' use of material**

Delete and replace with: -

"70.1 The copyright and all intellectual property rights in the Documents remain vested in the *Consultant* or the person responsible for the production (as the case may be).

70.2 Where documentation and/or information (including but not limited to technical information (whether or not stored in computer systems and whether or not in electronic or hard copy format) drawings, designs, models, calculations, specifications, schedules, details, plans, programs, budgets, reports and other documents and information)is (or are) provided by the *Employer* to the *Consultant* for the purposes of performing the Services

copyright and such documentation and drawings remain vested in the *Employer* but the *Employer* grants the Consultant a revocable limited royalty free licence to copy and use such documentation and information solely for the purpose of performing the *Services*. The *Consultant* shall be responsible for obtaining any software licences and/or approvals necessary to use such documentation and/or information to perform the *Services*. The *Employer* shall not be liable for any use by the *Consultant* of the documentation and information for any purpose other than that for which the same is prepared and provided.

70.3 The *Employer* has an irrevocable, non-exclusive royalty free licence to copy and use the Documents and to reproduce the designs contained in them for any purpose relating to the *works* including (but without limitation) the construction, completion, maintenance, promotion, advertisement, reinstatement, repair, any extension of the *works* and for dissemination within the NHS as part of the feedback of information to better or enable the NHS to realise improvements in its methods and practice of construction and in the design and procurement of its construction.

70.4 The *Consultant* shall not be liable for any use of the *Employer* of the Documents for any purpose other than that for which the same is prepared and provided."

**Z12 Addition to Clause 81.1 – Insurance cover**

Add to the Insurance Table:

| | |
|---|---|
| Liability for negligent management or design – professional indemnity insurance | The amount specified in the Contract Data for any one claim or series of claims arising out of one single incident (save in relation to claims relating to pollution and contamination, date recognition, and asbestos for which the indemnity limit is £5 million in the aggregate) during any period of insurance and which shall |

| | |
|---|---|
| | include liability for any services performed by Zisman Bowyer & Partners LLP under the ZBP Appointment which shall not be more than 12 months from the date the *Consultant* starts to Provide the Services for a period of twelve years from Completion of the whole of the *services*, with insurers of good repute carrying on business in the European Union provided always that such insurance is available at rates and terms which are commercially reasonable to Consultants of a similar size and standing in the UK In determining whether or not insurance is available as aforesaid, the financial characteristics and claims' record of the Consultant shall be ignored. |

**Z13 Amendment to Clause 82.1**

Delete.

**Z14 Amendment to Clause 90.4 – Reasons for Termination**

Add at the end "notwithstanding that a delay to the Completion Date has previously been notified to the *Consultant* in respect of such event"

**Z15 Addition to Clause 90**

90.5 The *Employer* may terminate the *Consultant's* obligations to Provide the Services for Stages 3 and/or 3A either (i) on completion of Stage 2 or (ii) if the Full Business Case is not approved by the Scottish Government.

**Z16 Addition to 91 - Procedures on termination**

"91.2 The *Consultant* hands over to the *Employer* all hard copy and electronic data for the *Consultant's* design including material prepared by a sub-consultant, so far as prepared at termination. At such termination the *Employer* has the right to use such material for completion of the *services*.

**Z17 Amendment to Clause 92 - Payment on Termination**

92.3 : - "On termination the *Employer* shall not be liable to the *Consultant* for loss of profit, loss of expectation of profit, loss of use, loss of production or indirect and consequential damages."

**Z18 Addition to Clause W2.1(1) – Dispute Resolution**

Add at the end: - "The word "dispute" in this Clause W2 includes any difference under or in connection with this contract".

**Z19 Addition to Clause W2.3(8) – the adjudication**

After "reasons" add the words, "(which will be in writing)"

**Z20 Addition to Clause W2.3(11) – The adjudication**

Delete the first sentence and replace with, "The decision of the *Adjudicator* is binding until the dispute is finally determined by the *tribunal* or by agreement."

**Z21 Amendment to Clause X8 – Collateral Warranty Agreements**

Add at the end: "and provides them to the *Employer* within 5 days of the *Employer*'s written request".

**Z22 New Clause - Confidentiality**

Z22.1 The *Consultant* shall not append their name or give authority to the appending of their name to any publicity concerning this agreement or the services or indulge in any publicity concerning the services without the prior written consent of the *Employer.*

Z22.2 The *Consultant* warrants the accuracy of all information of a legal, commercial or financial nature provided by them to the *Employer.* Details must be provided by the *Consultant* to the *Employer* regarding any matter as and when they take place, which affects the legal, commercial or financial standing of the *Consultant.*

Z22.3 The *Consultant* undertakes to treat any information derived from or obtained in the course of the Agreement as confidential and to take all the necessary precautions to reasonably ensure that its employees and sub-consultants and their employees treat any information as confidential and in doing so the *Consultant* shall ensure that its employees and sub-consultants and their employees keep secret and do not disclose information of a confidential nature by him or them by reason of the Agreement.

**Z23 New Clause – Data Protection**

Z23.1 The *Consultant* warrants and will at all times comply with the provisions of the Data Protection Act 1998 ("the 1998 Act") and any other subordinate legislation enacted pursuant thereto.

Z23.2 The *Consultant* shall only undertake such processing of personal data as is reasonably required in connection with the performance of its obligations under pursuant to the Agreement. To the extent required by the 1998 Act the *Consultant* shall notify the Information Commissioner of any processing which is being carried out and maintain any such notification in full force and effect.

Z23.3 The *Consultant* in its role as Data Processor undertakes to comply with the obligations imposed on a Data Controller under the 7th Data Protection Principle as set out in Part 1 of Schedule 1 of the 1998 Act in respect of all personal data processed pursuant to this Contract.

Z23.4 The *Consultant* shall not, other than in accordance with the 1998 Act, transfer any personal data to any country or territory outside the European Economic Area.

Z23.5 Terms defined within the 1998 Act shall have the same meaning when used in this clause.

**Z24 New Clause – Failure to deliver Collateral Warranty Agreements**

When any Collateral Warranty Agreement is not delivered as required pursuant to Clause X8, one quarter of any amount due to the *Consultant* is retained in assessments of the amount due until the *Consultant* has delivered such Collateral Warranty Agreement to the *Employer*.

**Z25 New Clause – Third Parties**

The *Consultant* performs its obligations under this contract in such a manner and at such times that no act, omission or default of the *Consultant* in relation thereto constitutes, causes or contributes to any breach by the *Employer* of any third party agreement or any other obligation it may owe to a third party relating to the works or the Project, details of which the *Consultant* was made aware of prior to the Contract Date.

**Z26 New Clause - Inconsistencies**

In the case of any inconsistency between these *additional conditions of contract* and the other terms of the contract, the *additional conditions of contract* prevail. In the

event of any inconsistency between the Core Clauses and any other term of this contract (except these *additional conditions of contract*) the Core Clauses prevail.

**Z27 New Clause – Approval**

No inspection, testing, approval or review nor any omission to inspect, test, approve or review on the part of the *Employer* diminishes any duty or liability under this contract of the *Consultant*.

**Z28 New Clause – Set off**

Without derogating from its rights under this contract or under the *law of the contract*, whenever any sum of money is recoverable by the *Employer* against the *Consultant*, such sum is deducted from any sum due or which may become due to the *Consultant*.

**Z29 New Clause – Security**

Z29.1 The *Consultant* acknowledges that the Site forms part of the larger Southern General Hospital site and that the Southern General Hospital is a live and functioning acute hospital. The Consultant takes measures to prevent its employees, sub-consultants and suppliers of the Consultant from entering into or otherwise interfering with the operation of the existing Southern General hospital, except for access to or egress from the Site.

Z29.2 The *Employer* may instruct the *Consultant* to take reasonable measures to prevent unauthorised persons being admitted on the Site.

Z29.3 The *Consultant* does not take photographs of the Site or the works or any part of them unless he has obtained the approval of the *Employer.*

Z29.4 The *Consultant* takes the reasonable measures needed to prevent his and his sub-consultants' people taking, publishing or otherwise circulating such photographs.

**SCHEDULE 1**

**CONSULTANT'S COLLATERAL WARRANTY**

This Agreement is among

(1) **GREATER GLASGOW HEALTH BOARD** of Dalian House, 350 St Vincent Street Glasgow, G3 8YZ ("the Beneficiary" which expression shall include its successors in title or permitted assignees under this Agreement)

(2) **BROOKFIELD MULTIPLEX CONSTRUCTION EUROPE LIMITED** (Registered number 03808946) of 23 Hanover Square, London, W1S 1JB ("Main Contractor" which term shall include any successor including any parties taking over the obligations of Main Contractor. under the Project Agreement)

(3) **TUV SUD LIMITED (trading as "Wallace Whittle")** (Company No. **SC215164**) whose registered office is at Napier Building, Scottish Enterprise Technology Park, East Kilbride, Glasgow G75 0QF ("the Consultant")

WHEREAS:

A The Beneficiary has entered into an agreement with the Main Contractor ("the Building Contract") in connection with the design and construction of the New South Glasgow Hospital, Govan, Glasgow ("the Project").

B The Main Contractor has engaged or is about to engage the Consultant under an appointment ("the Appointment), which expression shall include all documents incorporated therein and any agreed amendment thereto, to carry out mechanical and electrical design services as more particularly described in the Appointment ("the Services"), which expression shall include all services performed or to have been performed by Zisman Bowyer & Partners LLP pursuant to the Professional Services Contract entered into between the Main Contractor and Zisman Bowyer & Partners LLP dated 28 September 2010 in respect of the Project (the "ZBP Appointment") and any additional services performed by the Consultant under the Appointment including in connection with any modifications or variations made thereunder.

C It is a condition precedent of the Building Contract that the Consultant, the Main Contractor and the Beneficiary enter into this agreement ("this Agreement").

NOW IT IS AGREED:

1. The Consultant warrants and undertakes to the Beneficiary that it has complied and will continue to comply with all the terms and obligations under the Appointment on the Consultant's part to be performed and observed and shall complete the Services in accordance with the Appointment.

2. Without prejudice to Clause 1 of this Agreement, the Consultant further warrants and undertakes to the Beneficiary that:

2.1 it has exercised and will continue to exercise all the reasonable skill, care and diligence to be expected from a competent and qualified professional designer experienced in carrying out services similar in nature, size and complexity to the Services including in the selection of goods and materials for the Project; and

2.2 it has not and will not specify for use in relation to the Project any products or materials not in conformity with relevant British or European standards or Codes of Practice or which are at the time of specification generally known within the United Kingdom to an experienced professional designer of works such as the Project to be deleterious to health and safety or to the durability of buildings and/or other structures and/or finishes and/or plant and machinery in the particular circumstances in which they are used;

2.3 it shall be responsible for and liable to the Beneficiary pursuant to this Agreement for all of the duties, obligations and services provided or to have been provided by Zisman Bowyer & Partners LLP pursuant to the ZBP Appointment. The Consultant warrants to the Beneficiary that all services performed by Zisman Bowyer & Partners LLP pursuant to the ZBP Appointment have been carried out in accordance with the

requirements and standards required by the ZBP Appointment; and

2.4 it shall not contend in defence of any claim brought by the Beneficiary against the Consultant under this Agreement in respect of duties, obligations and services provided or to have been provided by Zisman Bowyer & Partners LLP pursuant to the ZBP Appointment that the liability of the Consultant is affected or diminished by reason of the fact that the claim relates to duties, obligations and/or services performed or to have been performed by Zisman Bowyer & Partners LLP under the ZBP Appointment, rather than the Consultant, under this Agreement.

Provided that:

2.3.1 the obligations of the Consultant under this Agreement shall be no greater in extent or quantity than if the Beneficiary had been named as joint employer with Main Contractor under the Appointment; and

2.3.2 the Consultant shall be entitled in any action or proceedings brought by the Beneficiary to rely on any limitation in the Appointment and to raise the equivalent rights in defence of liability (excluding counterclaim and set-off in respect of amounts due to the Consultant under the Appointment) as it would have if the Beneficiary had been named as joint employer with the Main Contractor under the Appointment.

3 The Beneficiary has no authority to issue any direction or instruction to the Consultant in relation to the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5 below. The Beneficiary or its appointee has no liability to the Consultant in relation to amounts due under the Appointment unless and until the Beneficiary has given notice under Clauses 4 or 5.

4 The Consultant agrees that it will, if so required by notice in writing given by the Beneficiary, subject to Clause 6, below, accept the instructions of the Beneficiary or its appointee, as the case may be, (which for the avoidance of doubt and without limitation may include a third party appointed by the Beneficiary to act as "the Employer" under this Appointment) to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of

the Appointment. The Main Contractor acknowledges that the Consultant shall be entitled to rely on a notice given to the Consultant by the Beneficiary under this Clause 4 and further acknowledges that such acceptance of the instructions of the Beneficiary or its appointee, as the case may be, to the exclusion of the Main Contractor shall not constitute any breach of the Consultant's obligations to the Main Contractor under the Appointment.

5 The Consultant further agrees that it will not without first giving the Beneficiary not less than 35 days notice in writing exercise any right or purported right it may have to determine its employment tinder the Appointment, treat the same as having been repudiated by the Main Contractor, or discontinue the performance of any duties or obligations thereunder. Further, the Consultant shall within 14 days of giving the said notice, provide statements to the Beneficiary containing the following:

5.1 all amounts properly due and payable to the Consultant under the Appointment on or before the date of issue of the said notice which remain unpaid;

5.2 in the reasonable estimation of the Consultant, the amount of any monetary claim (it any) asserted by the Consultant against the Main Contractor under the Appointment arising out of or in connection with the breach for which the said notice was served; and

5.3 where the Consultant intends to terminate the Appointment due to some default or breach of contract of a non-financial nature:

5.3.1 the provision of the Appointment alleged to have been breached or not fulfilled;

5.3.2 supporting information in reasonable detail to enable the Beneficiary to identify the material facts;

5.3.3 the steps reasonably required to remedy the specified breaches or conditions not fulfilled;

5.3.4 the time within which the specified steps can reasonably be expected to be taken;

5.3.5 (if applicable) the amount of damages claimed and the basis of their calculation; and

5.3.6 (if applicable) the relief to be sought.

The Consultant warrants to the Beneficiary that to the best of the Consultant's knowledge and belief, having made all proper and appropriate enquiries, the statements submitted under this Clause 5 shall be true, complete and accurate statements of the amounts to which the Consultant considers itself entitled. In the event that the Consultant shall delay in giving such notice and information within the said 14 days, the period of 35 days shall be extended to correspond with the period of any such delay. The Consultant's right to determine its employment under the Appointment or to treat the same as having been repudiated or to discontinue performance shall cease if, within the said 35 day period (extended as appropriate) and subject to Clause 8 the Beneficiary shall give notice in writing to the Consultant requiring the Consultant to accept the instructions of the Beneficiary or its appointee to the exclusion of the Main Contractor in respect of the Project upon the terms and conditions of the Appointment.

6 It shall be a condition of any notice given by the Beneficiary under Clauses 4 or 5 above, that the Beneficiary or its appointee, as the case may be, accepts liability for payment of the sums due under the Appointment and detailed in the statement provided under Clause 5 (and makes payment within a period of 28 days of such notice from the Beneficiary), and for subsequent performance of the Main Contractor's obligations. Upon the issue of any notice by the Beneficiary under Clauses 4 or 5, the Appointment shall remain in full force and effect as if no right of determination of its employment under the Appointment, or any right of the Consultant to treat the Appointment as having been repudiated by the Main Contractor had arisen and the Consultant shall be liable to the Beneficiary and/or its appointee, as the case may be, under the Appointment in lieu of its liability to the Main Contractor.

7 The Beneficiary may at any time following the issue of any notice by the Beneficiary under Clauses 4 or 5, serve a further notice that following the expiry of 28 days from the giving of such notice the Beneficiary will have no liability (save in respect of the Beneficiary's antecedent breach) for any sums due or to become due to the Consultant in respect of the period following expiry of the last mentioned 28 day period. The Beneficiary may exercise any

licenses and shall subsist notwithstanding that the Appointment is terminated or the obligations and duties thereunder have been completed. For the avoidance of doubt, the grant of such licence or sub-licences shall not impose any additional liability on the Consultant. The Consultant will not assign or agree to assign the copyright in any of the documents without the prior written consent of the Beneficiary. The Consultant shall on reasonable demand provide to the Beneficiary or its appointee and those authorised by the Beneficiary additional copies of any documents on receipt of reasonable copying costs. The Consultant shall not be liable for any use by the Beneficiary of any of the documents for any purpose other than those authorised by this clause.

10 This Agreement may be assigned on a maximum of two occasions in whole or in part by the Beneficiary to any party to whom the Beneficiary's interest in the Main Contract or any part thereof is assigned or transferred to without the consent of the Main Contractor or the Consultant being required and any such assignation shall be effective upon written notice thereof being given to the Main Contractor and to the Consultant. No other or further assignation of this Agreement, other than permitted by this Clause, by the Beneficiary or any other party shall be permitted. The Consultant shall not be entitled to assign or transfer any rights or obligations hereunder without the consent of the Beneficiary.

11 The Consultant undertakes that it will not raise as a defence to any action by the Beneficiary for alleged breach of this Agreement the fact that the obligations of the Main Contractor to the Beneficiary in respect of the services have been released as a result of the termination of the Building Contract.

12 No failure, approval, act or forbearance on the part of the Beneficiary in respect of any right of the Beneficiary pursuant to this Agreement shall constitute any waiver of any right of the Beneficiary under raising out of this Agreement nor relieve the Consultant of any of its duties or obligations under or arising out of this Agreement.

13 Any notice, consent or demand to be given or made by any party under this Agreement (hereinafter called a "Notice") shall only be validly served if In writing and delivered personally or sent by pre-paid first class recorded delivery post to the following address and marked for the attention of the following person in the case of each party:

| Party: | Address: | Person: |
|---|---|---|
| Beneficiary | Dalian House, 350 St Vincent Street Glasgow, G3 8YZ | Head of Board Administration |
| Main Contractor | 23 Hanover Square, London, W1S 1JB | Ben Keenan - Director |
| Consultant | Napier Building, Scottish Enterprise Technology Park, East Kilbride, Glasgow G75 0QF | Brian Mayberry – Divisional Director |

Any party may by Notice to the other party/parties change its address or the title of the person for whose attention Notices are to be given or made pursuant to this Clause. Any such Notice shall be deemed to have been received:

13.1 if delivered personally, at the time of delivery;

13.2 in the case of pre-paid first class recorded delivery post, on the first Business Day after the date of posting.

If any Notice Is delivered after 5 p.m. on a Business Day, or at any time during a day which is not a Business Day, that Notice shall be deemed to have been received at 9 a.m., on the next Business Day. For the purposes of this Clause, "Business Day" means any day which is not a Saturday, a Sunday or a public holiday in Scotland. In proving service it shall be sufficient to prove that the envelope containing such Notice was properly addressed to the relevant party and either delivered personally to that address or delivered into the custody of the postal authorities as a pre-paid first class recorded delivery letter. For the avoidance of doubt, Notices shall not be validly served if sent by email or fax.

14 No action or proceedings for any breach of this Agreement shall be commenced against the Consultant after the expiry of twelve years from Completion or earlier termination of the

Consultant's employment under the Appointment.

15 The definitions of words and phrases used in this Agreement shall be those set out in the Appointment except where expressly defined in this Agreement.

16 This Agreement shall be governed by and construed in accordance with Scots Law and the parties hereto submit to the exclusive jurisdiction of the Scottish Courts.

# 1. OUTLINE

## Introduction

1.1 The New South Glasgow Hospitals (NSGH) Project consists of new adult acute and children's hospitals, new laboratories, energy centre and associated support facilities and infrastructure for the NHS Greater Glasgow and Clyde (the Client/Board).

The Project is located on the existing hospital site at the Southern General in Govan, Glasgow which is required to remain operational during the execution of the Works. The Project is to provide in the order of 175,000m2 of internal area comprising approximately 1,400 beds in addition to the development of the external spaces.

This Scope of Services excludes the new laboratory block (which comprises of the laboratories building and the FM facility to its rear), unless highlighted as otherwise.

1.2 The Services shall be the provision of professional labour, supplies, systems and other resources as necessary to design, specify, document, inspect, report and certify the building services elements of the Works for the Project. The Services outlined herein are the basic scope of works specifically applicable for this Project and are completely allowed for in the initial total fee.

1.3 Key Performance Indicators (KPIs) – The quantitive KPIs for Stage 2 Works (leading to the Full Business Case) are defined in the Contract Data Part 1 Appendix 3 in addition to the Design Programme contained in Contract data Part 1 Appendix 4 and the Cost Plan referenced in the Building Contract. This Scope of Services represents the qualititive KPIs to be achieved by the Consultant.

1.4 The Consultant shall adequately and timely coordination, cooperation and liaison with other consultants, subcontractors, suppliers, Authorities and other relevant parties/stakeholders to clearly define the relevant Project works, which minimises the Project costs, time and risk.

1.5 The Consultant's coordinated design and documentation shall be fully integrated with all relevant designs and advice from other consultants, the subcontractors (where arranged by the Employer) and Statutory Authorities.

1.6 The Services are to be provided in the following Work Stages:

- Concept Design and Design Development
- Construction Documentation and Construction Phase
- Commissioning, Completion and Post Completion

Note: Notwithstanding the entry point to an individual scheme or design task, the Consultant is required to review all the previous information for the scheme made available by the Employer in addition to those sourced by the Consultant and undertake the Services irrespective of where the Services is listed in order to enable the Employer to complete the Works.

## Performance Standards

1.7 The Consultant shall submit its Quality Plan for review by the Employer. The Consultant shall amend its Quality Plan as reasonably required by the Employer. The Quality Plan shall explain

how the design and documentation work are to be planned to the standard specified in ISO 9001:2008 particularly the Section 7.3 and shall include:

- The design and documentation stages
- The review, verification and validation that are appropriate to each design and documentation stages
- The responsibilities and authority for design and documentation

The Consultant shall review and comment on the Quality Plans (especially the Quality Inspection and Test Plans) from the subcontractors and suppliers as reasonably required by the Employer.

1.8 The Documentation (or Documents) to be provided by the Consultant shall be all that is required in order that the Project can be completed in the most time and cost efficient manner and shall include but not be limited to:

- Drawings (including 3D as required)
- Schedules
- Specifications
- Working models, illustrations and other presentation materials
- Calculations and sketches
- Reports (including Progress Status)
- Certifications (including Compliance)
- Meeting minutes, file notes etc.

Such documentation to be provided in a form and at such frequency as is required by the Employer

1.9 Conform with the Project specific documentation protocols as updated from time to time by the Employer (or its designate) including the CAD parameters and electronic documentation transfer facilities such as the FTP websites or as requested by the Employer.

1.10 In respect of all Work Stages, the Consultant shall:

a) Perform the Services in a diligent manner with the standard of skill and care and undertake any work falling within the level of Services to be reasonably expected of a Consultant appointed for a Project of a similar size, scope and complexity.

b) Ensure that it has the necessary skill and resources to provide the Services and acknowledges that in reliance on this obligation, the Employer has agreed to engage the Consultant to perform the Services.

c) Take all necessary steps on an ongoing basis so that all persons engaged for the Services are properly qualified, competent and experienced for the size, scope and complexity of the Project.

d) Inform itself of the Project requirements by regularly consulting with other relevant parties and the Employer. Review all relevant documents and immediately inform the Employer of any apparent errors or ambiguities contained in such documents and make recommendations for the correction of such ambiguities.

e) Keep secure the Employer materials and documents and return them at the end of this Appointment.

f) Strictly remain within the scope of the authority granted by the Employer and not act beyond its authority or hold out that it has authority beyond this Appointment.

g) Seek the Employer's prior consent to any proposed sub-letting or employing outside agency and/or self employed staff.

h) Comply with all policies relating to the use of the Employer office premises and facilities when using them.

i) Permit the Employer to carry out agreed and scheduled visits to the Consultant's business premises in connection with the Services.

j) Keep proper commercial records and accounts for any claims it makes on the Employer including if applicable, for reimbursement of expenses and remuneration of fees based on time charged billing and permit the Employer auditors to inspect such records and accounts.

k) Nominate a person or persons who have authority to receive notices and take instruction under this Appointment and not change such nominees without the consent of the Employer.

l) Liaise and cooperate with the other consultants employed (and likely to be employed) by the Employer for the purpose fulfilling its obligation that the Project shall be designed in compliance with the Project requirements. Including attendance at such meetings necessary or requested by the Employer or other Consultants.

m) Coordinate and manage the sequence of design and documentation production.

n) Provide Technical Advisory role to the Employer for design works provided by others associated with the Project.

**Performance Obligations**

1.11 The Consultant shall:

a) Carry out the Services using proven best up-to-date practice and to appropriate standards (having regard to the nature of the Project) and consistent with the intended use of the Project.

b) Comply with the requirements of Planning consent for the Project and with all Statutory Authorities requirements and regulations and with all other legislation applicable to the Services and/or to the Works.

c) Comply with all specific standards contained in this Appointment. If no such standards are stated in this Appointment and if they cannot be reasonably inferred from the Project Documents, the standards shall be those required by relevant British Standards and/or UK Building Regulations and/or any relevant applicable legislation and/or relevant local Statutory Authority requirements.

d) Comply with the Employer's Requirements and the Contractor's Proposals.

e) In the event of any discrepancies, ambiguities and inconsistencies within and/or between the Project documents, such discrepancies shall be decided on by the Employer and the Consultant shall at no cost to the Employer and that the Services and any Documentation prepared by the Consultant in relation thereto shall comply with and meet the requirements as decided by the Employer.

f) Progressively submit the Consultant's Documentation and any other documentation included within the ambit of the Services to the Employer by the dates specified in the Programme or if no dates are specified, in accordance with the progress of the Works and the Employer's reasonable requirements.

g) In respect to all drawings produced as part of the Documentation are computer generated and capable of being transferred into 'tiff', 'pdf, and 'dwg' formats or other format approved by the Employer. The Consultant shall send and receive written correspondence, drawings, schedules and specifications and any other relevant documentation by a controlled web based document management system (Aconex) in accordance with the rules and procedures (updated from time to time) as provided by the Employer.

h) In reference to the specifications as referred to in the definition of Documentation are in A4, double sided and comprising of two bound copies and one copy on a portable memory storage device. The Consultant shall also upload one copy onto a web based document control system (Aconex). The specifications shall be in full compliance with the Project requirements and shall be complete and coordinated with all other consultants in a format agreed by the Employer. The specifications shall be in trade sections and capable and suitable for the Employer to invite tenders for the various packages of work and for the subsequent construction and completion of the Project. The specifications shall also incorporate, but not be limited to, materials, finishes workmanship and quality standards and other items as may be reasonably required by the Employer.

i) Include all those duties that are set out in this Schedule together with those duties that can be reasonably expected from the Consultant, preparing design and documentation for works of a similar size, scope, nature, value and complexity of the Project.

j) Specify the materials and its method of use, fixing or working that do not infringe any patent, registered design, copyright or other protection rights.

k) Review and comment on all relevant temporary works as reasonably requested by the Employer in completing the Project.

l) Send, receive, review and comment all information in relation to O&M manuals which may be by a controlled web based management system.

m) Provide advice and documents as required to assist the Employer in the maintenance of the building to ensure whole-life costs are minimised.

n) Provide information as requested by the Building Owner, Funders, Facilities Manager, Operators and the like.

o) Coordinate, incorporate and document where relevant to the building services, all fire protection and acoustic treatment measures in consultation with the Fire Engineer and Acoustic Engineer respectively.

p) Proactively endeavours to maximise the BREEAM rating of the Project and develop energy efficient strategies.

q) Evaluate, design, specify and document Secure by Design, acoustical and fire protection measures related to their Services and where applicable to satisfy building insurance requirements. Should there be exceptional insurance requirements, such information to be made available to the Consultant in a timely manner during the design period.

r) In reference to CDM 2007 Regulations and in particular Regulation 11 that requires the Designers to eliminate hazards which may give rise to risks to those undertaking construction work or subsequently using the building, and to reduce any hazards which cannot be eliminated. The Consultant shall produce information to the Employer, other Designers and Contractors in this regard and where possible this information shall be included in all Documentation especially the drawings issued by the Consultant.

s) Submit evidence of competence to comply with the CDM 2007 Regulations as per Regulation 4 and as set out in Appendix 4 of the Regulations.

t) In providing the Services, the Consultant shall aim to minimise any adverse impacts that construction has on the environment. This shall be through the design process, materials selection, construction techniques and operational methods. Specific information on the

Employer's policy which the Consultant is required to comply is set out in the Environmental Policy Statement (as set out below).

The Consultant shall work towards to reduce waste and use materials efficiently and proactively assist in reaching the Employer's objective as outlined in the Waste Policy Statement (as set out below). The Consultant shall support this Policy by:

- Assist in developing the Site Waste Management Plan from an early design stage, including waste forecasts and data on reduction targets and actions.
- Assist in implementing the Site Waste Management Plans throughout the design and construction period that comply with the applicable Regulatory requirements and include in such Plans project-specific targets for waste recovery and reused and recycled content and for waste reduction;
- Identifying methods to reduce waste and waste to landfill and increase reused and recycled content, throughout the duration of providing the Services and report to the Employer. In this regard, the Consultant shall use site waste management software nominated by the Employer which shall be WRAP's Designing out Waste Tools or Net Waste Tool (accessible at www.wrap.org.uk/nwtool) unless notified otherwise;
- Work with the Project team to ensure that design actions to reduce construction waste and increase reused / recycled content are implemented;
- Agree with the Employer which level of waste reduction and reuse to pursue.

Note: The Consultant should refer to the WRAP Designing out Waste guidance to identify, prioritise and implement ways of meeting Project targets for waste.

# BROOKFIELD CONSTRUCTION (UK) LTD

## ENVIRONMENTAL POLICY STATEMENT

This policy statement is valid from May 2010 to 31st December 2010.

### Introduction

Brookfield Construction (UK) Ltd is focused on the construction of significant landmark projects. Our overall mission is to build high quality construction projects using materials and processes that respect the environment.

We firmly believe that the delivery of high quality construction projects requires active consideration of the environmental and social impacts associated with construction. High standards of environmental performance in these areas can also deliver benefits to the environment, society and economy.

### Environmental Policy

At Brookfield Construction (UK) Ltd, our aim is to:

- Work to prevent pollution and minimise the overall impact of our activities on the environment, from the sourcing of our materials to the recycling and disposal of wastes.
- Make more efficient use of energy and natural resources and minimise emissions and waste, focusing on those activities which have the most significant impacts.
- Comply with applicable legal requirements and other requirements to which Brookfield subscribes which relate to its environmental aspects. Such requirements include WRAP's (Waste & Resources Action Programme) initiative for "Halving construction waste to landfill", BREEAM, Considerate Constructors and Considerate Contractors in London.
- Apply environmental management practices across the business which protect and enhance our reputation and meet the expectations of our stakeholders.
- Pursue continual improvement in our environmental performance.

In order to deliver this aim we will:

- Implement a formal Environment Management System.
- Provide information and training to enable environmental impacts and opportunities to be identified, prioritised and managed effectively.
- Promote joint consultation with employees, contractors, the Environment Agency, Environmental Health Officers and other relevant organisations.
- Work proactively with the local communities in which we operate.
- Set environmental objectives and targets relevant to our significant environmental aspects and monitor our progress against these; year on year.

### Organisation and General Responsibilities

The UK Health and Safety Manager and UK Environmental Advisor are responsible for environmental issues and report to the Brookfield Europe Safety Director. Environment, Health and Safety Managers are allocated to projects and report to the Project Director whilst retaining a functional reporting link to the UK Health and Safety Manager.

Detailed descriptions of our organisation and responsibilities are available in the Environmental Management System which is integrated with the Health and Safety Management System. This integrated system forms a part of a larger suite of documents which also includes the Quality Management System. This larger system is referred to as "CoSHEQ". This document is available on the Brookfield Europe Intranet, which is accessible to all employees.

**Brookfield** Environmental Policy Statement UK/EHS/F/001a rev 07

**Arrangements**

***Management Systems***
**The Environmental Management System sets out through Procedures, Forms, Risk Registers, Management Plan Templates and Best Practice Standards (the "Supervisors Manual") the way in which environmental issues are managed on our projects.**

***Sustainability Strategy***
**Our appointed designers are required to meet the guidance given in the Brookfield Europe Sustainability Strategy.**

***Third Party Certification***
**The company is third party certified to ISO 14001:2004 Environmental Management Systems.**

***Code of Conduct***
**The behaviour expected from Brookfield employees and our subcontractors is set out in our Code of Conduct. Copies of this are displayed on notice boards at Head Office and at each project.**

**This document is available to the public on the Brookfield Europe website and is communicated to all employees.**

**12 month objectives January 2010 to December 2010 for Environment and Sustainability**

- **As signatories to WRAP's initiative for halving construction waste to landfill by 2012, taking 2009 as the baseline year, we will take measures to divert construction waste from landfill sites.**
  **Target – For construction, demolition and excavation waste corporate targets see our Waste Policy Statement**

- **Promoting the ethical and environmentally sustainable management of the world's forests we will endeavour as far as practicable to only use FSC-certified timber products on all our projects.**
  **Target – Publish percentage of FSC-certified timber employed on our projects**

- **In order to reduce our environmental impact we will reduce the amount of our office waste going to landfill. A new office waste management strategy will be introduced and implemented in 2010 that will involve segregating recyclable waste at source and phasing out individual desk b s.**
  **Targ – 90% of all office waste to be diverted from landfill and relevant data to be published**

# BROOKFIELD CONSTRUCTION (UK) LTD

## WASTE POLICY STATEMENT

**Scope**
This Policy Statement applies to Brookfield Construction (UK) Ltd for 2010 and must be read in conjunction with the Brookfield Construction Environmental Policy Statement.

**Introduction**
Brookfield Construction (UK) Ltd is focused on the development, construction, management and ownership of significant landmark projects. In all of its development work, Brookfield aims to minimise any adverse impacts that construction has on the environment. We seek this through the design process, materials selection, construction techniques, and operational methods.

From 2010 all organisations appointed to work on our behalf are required to work in accordance with these principles.

**Achievements**
We have set waste targets since 2007. Each year the target for recycling has been increased as follows:

2007 to recycle 70% waste concrete, bricks and ceramics over the course of a project and 50% of general waste over the course of a project.

2008 and 2009 to recycle 80% of construction waste (combined Construction, Refurbishment, Demolition and Excavation).

The company has succeeded in meeting these targets.

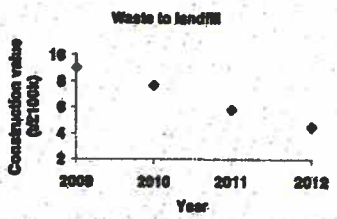
**The WRAP Initiative**
Committed to continual improvement in 2009 Brookfield Construction (UK) Ltd became a signatory to the "Halve waste to landfill by 2012" initiative for the construction industry of the Waste and Resources Action Programme, (WRAP) a government-backed body set up to facilitate waste minimisation in the UK. There are two strands to this commitment:

1 To generally reduce the amount of waste generated from a construction project by exploring possibilities in design and procurement.

2 Following on from this, to increase the percentage of residual waste that is recycled.

WRAP proposes that waste data is measured against each £100k construction value[1]. This will then capture both reductions that are obtained from design and procurements in addition to the residual waste figures.

**The Baseline Year: 2009**
To meet the WRAP Commitment, Brookfield Construction has selected 2009 as its baseline year. The WRAP typical figure for waste sent to landfill was 10 tonnes per £100k and the Brookfield Construction target waste figure to be sent to landfill was 9 tonnes per £100k.



**Our target for 2012**
Brookfield Construction will set a 2012 target of 50% of the 2009 target. This is 4.5 tonnes per £100k.

The targets for 2010 and 2011 will be based on a linear progression from 2009 through to 2012.

[1] Construction value is the price in the accepted tender or, if there is no tender, the cost of labour, plant and materials, overheads and profit.

**Brookfield** **Waste Policy Statement** **UK/EHS/F/001c rev 01**

We will work to adopt and implement standards for good practice in reducing waste, recycling and reusing more. This will support national policy goals e.g. halving waste to landfill by 2012, adopted in England by the Government's Strategy for Sustainable Construction and Zero Waste in Scotland, and will be achieved by reducing waste, recovering more materials and using more recovered material in new construction.

**Policy**
Any contractual and client requirements will be taken into account to form the project-specific requirements, but as a minimum on projects commencing in 2010 our design and construction project teams will be required to:

- forecast waste quantities and waste recovery and set targets for waste reduction from an early design stage (for instance by using WRAP's Designing out Waste Tools and Net Waste Tool[2] or the Building Research Establishment's SMARTWaste benchmark calculator[3]).
- before starting on site, the project team shall submit a copy of the Site Waste Management Plan identifying the actions to be taken to reduce waste and increase recovery, as well as the corresponding roles and responsibilities, and quantifying the resulting changes.
- implement Site Waste Management Plans throughout the design and construction period that comply with regulatory requirements and include in such Plans project-specific targets for waste recovery and for waste reduction.
- where there is sufficient space the project teams should plan for and implement waste segregation on site. Otherwise the volume of waste that is recovered will be maximised by using third party contractors.
- measure and report progress against the corporate targets for the quantity of waste produced and the quantity of waste sent to landfill (in tonnes per £100k construction value). The information will be annually reported on the WRAP Waste to Landfill Reporting Portal[4] and guidance.
- on completion of the Works, the project team shall submit a copy of the completed Site Waste Management Plan, reporting the forecast and actual performance for waste quantities, disposal routes, and reused and recycled content used in construction.

**Target for 2010**
- recover at least 83% of construction materials demolition, strip-out and excavation materials.

**Meetings**

1.12 The Consultant shall:

a) Attend and issue records of the meetings and workshops for those in relation to the design, construction, value engineering, risk management and co-ordination of the building services as required by the Employer.

b) Attendance may be required for factory visits and design and or construction meetings at off site locations.

c) Attend and issue records of the design meetings with other consultants as necessary to integrate, coordinate and clarify the Works during the Project as reasonably required by the Employer.

d) Attend and issue records of the meetings with Statutory Authorities as reasonably required by the Employer.

e) Attend and issue records of the meetings with the Employer as reasonably required on all relevant Project issues.

f) Provide draft minutes for all of the above meetings, workshops and the like as required for review by the Employer or distribute as requested by the Employer.

**Reports**

1.13 The Consultant shall:

a) Provide periodic status reports (fortnightly and/or monthly to be agreed with the Employer) in a form reasonably required by the Employer which shall include as a minimum, a summary documenting the progress of the Services against the Design Programme and Documentation Schedules. Highlight areas of difficulty being experienced with progress of the Services, design co-ordination issues, Statutory Authority approvals status and the like including the proposed mitigating measures.

b) Undertake site inspection as reasonably required or as requested by the Employer and provide inspection reports including tracker schedules to monitor close-out of issues identified which will require revisiting the site.

c) Prepare report or documentation required (on a reasonable and realistic basis) for the assessment of design alternatives and in contemplation of envisaged change to the Project requirements.

d) Not used.

e) Progressively compile and provide design risk registers.

f) Provide compliance reports confirming compliance with the Project documents such as the Employer's Requirements and other compliance reports as requested by the Employer.

g) Provide non compliance reports in relation to the construction works when requested by the Employer in a workable electronic format including photographs.

h) Provide draft reports for all of the above for review by the Employer prior to the formal issue.

i) Not used.

j) Provide reports on energy performance during the 24 months Defect Liability Period based on the information provided by the Employer.

A49342285

**Certification**

1.14 On a periodic basis (once a month as a minimum) or when requested by the Employer, provide a progress certification that the design and documentation work done to that period is in accordance with and complies with the Project requirements such as the Employer's Requirements, the Cost Plan, the Programme, Contractor's Proposals and with all relevant Statutory Authority requirements.

**Authorities**

1.15 The Consultant shall:

a) Liaise with the Employer, other consultants and all relevant Statutory Authorities for the purpose of confirming that the design complies with all Planning consent conditions.

b) Liaise with the Employer, other consultants, and others involved in the Works, including without limitation the CDM Coordinator, subcontractors and all relevant Statutory Authorities for the purpose of confirming that the design complies with all relevant Statutory Authority requirements and for obtaining all necessary permits and approvals. Incorporate all relevant Statutory Authority requirements into the design and documentation.

c) Advise on the need to obtain further Planning permissions, Building Regulation approvals and any other Statutory approvals and prepare all necessary associated applications for consideration by the Employer.

d) Liaise closely with all relevant utility companies, service providers and others involved in the identification, relocation and modification of utility services affected by the Project.

e) Prepare coordinated Documentation in conjunction with other consultants for submission to the relevant Authorities. All such Documentation is to be discussed with the Employer prior to submission to the Statutory Authority.

f) Revise and re-submit submissions to the Planning Authority as required where the development of the design has varied from the original Planning consented scheme. Amend Documentation in conjunction with other consultants for resubmission to other relevant Statutory Authorities arising from any directives, requirements or comments from the Employer or Statutory Authorities including those on the previous submissions.

g) Review all relevant Statutory Authority approvals and conditions. Contribute to a schedule/checklist for review by the Employer to monitor timely discharge of all conditions and actions to be carried out by the Consultant in conjunction with other consultants and to be incorporated into the Project.

h) Liaise with all relevant Authorities for expeditious approval and attend all meetings as required by the Employer. Update and amend documentation in conjunction with others as required, to obtain all regulation modifications, approvals and permits.

i) Highlight opportunities to the Employer in respect to alternative means of achieving the Statutory compliance for the benefit of the Project including waivers, relaxations and dispensations. Where requested by the Employer, negotiate the same with the Authorities.

j) Revise documentation as necessary to reflect the outcome of the negotiations with the Statutory Authorities.

k) Assist the Employer with any relevant tests and inspections required by the Statutory Authorities and in obtaining all permits, approvals and certificates required for the lawful use of the Project.

l) Complete all relevant certificates associated with the Services as and when required by the Employer and liaise with Statutory Authorities for the purpose of assisting in obtaining staged building permits and other approvals.

m) Prepare design certification necessary for the completion of the Project and/or the granting of relevant Statutory Authority for Completion, occupancy and title.

**Specific Designs**

1.16 The Services to be provided by the Consultant shall include the design and documentation for the following elements of the Works but not necessarily be limited to:

**Mechanical and Public Health Systems**

The Consultant's design shall cover all works associated with the mechanical and public health systems to comply with the fire strategy, acoustic requirements and all systems necessary as set out below for a fully operational building.

- Chilled water system including high efficient chillers, pumps, heat exchangers etc.
- MTHW & LTHW systems including plant and equipment, valves and pipe systems and interfaces with the Stage 1 Laboratory / FM buildings.
- CHP system with all plant and equipment including interface connections with the Stage 1 Laboratory & FM building.
- Condensate drainage systems including all condensate pumps, pipework and traps.
- Air conditioning systems including all air handling units, chilled beams, fan coil units, distributed ducted system, diffusers, return air plenums, fresh air intake and exhaust etc.
- Under floor heating systems including all pipework and valves.
- Thermal insulation applied to the engineering services systems.
- Heat recovery systems.
- Consideration of borehole water, ground source energy.
- Renewable energy systems integrated with electrical systems including wind turbines, photovoltaic systems and the like.
- Generator cooling.
- Lift pressure relief and pressurisation systems as required.
- Staircase pressurisation systems as required.
- Lift motor room cooling systems.
- Electrical and UPS ventilation and cooling systems.
- Packaged split air conditioning systems including all pipework, electrical systems between fan coil and condenser units.
- Communications rooms and ICT Node rooms cooling systems and ventilation.
- The main communications and secondary communication rooms containing network core switches and main servers to be provided with positive pressurised filtered fresh air systems.
- High specification air conditioning systems.

- Smoke extract system including all fire rated ductwork, smoke dampers, and smoke damper control and power interface with the fire alarm system.
- Misc ventilation systems such as toilets, storage areas, plant rooms, generator ventilation, gas meter room etc.
- Local exhaust ventilation systems.
- Basement mechanical ventilation systems including all plant, equipment, ductwork, dampers.
- Natural ventilation systems where practical.
- Water filtration systems.
- Not used.
- Hot water calorifiers, pumps, valves, piped distribution systems and dead leg (legionnaires) protection.
- Cold water storage tanks, pumps, valves and piped distribution systems including dead leg (legionnaires) protection.
- Mechanical water systems, including all pipework and valves.
- Softened water treatment systems where required.
- Rainwater and roof drainage systems including all pipework, roof outlets.
- Power, water and drainage to Green roof water feed and any fertiliser systems as required by the Green roof specialist.
- Landscape water supply and drain systems (if necessary) including automatic irrigation system.
- Internal soil vent, waste drainage systems including acid resistant systems connected to below ground drainage connections points provided.
- Basement level drainage systems including all sump pumps, pipework and control system.
- Assist in designing the integrated plumbing solutions systems, if any.
- Above ground specialist drainage systems.
- Floor wastes in suspended floors for all wet areas, design coordinated with plant locations etc.
- Automatic flushing systems, pipework, valves and sensors.
- Gas suppression system serving communication and ICT nodal rooms as required.
- Helipad intrinsically safe electrical and fire protection systems.
- Any special medical fixtures and fittings (eg. Pendants).
- Bulk fuel oil storage system including all pipework, valves, filling points and control system.
- Gas distribution systems.
- Compressed air systems.
- Distributed medical gas systems.
- Steam and condensate systems as required.
- Cleaning, flushing and treatment systems.
- Acoustic and vibration treatments and systems.
- Utilities gas, water including interface with Stage 1 Laboratory requirements.

A49342285

### Electrical Systems

The Consultant's design shall cover all works associated with the electricity supply and reticulation including incoming supply, all ducting and supply from the Supply Authority's network. The incoming supplies from the Supply Authority's network are to be reviewed for the substation requirements and mains, power factor correction and power quality. The electrical reticulation system will be provided with an electrical management control system.

- HV electrical systems from primary substation HV switchboard including protection requirements and coordination with utility provider and local authority requirements.
- HV consumer network electrical systems including all protection, electrical distribution system, cables/busbar, switchgear, distribution boards etc.
- LV electrical systems including all busbar/cables, distribution boards etc.
- Electrical HV / LV management control systems.
- Earthing & bonding systems.
- Lightning protection system.
- Power factor and power quality requirements.
- HV Generators and LV to HV step up transformers for temporary LV generator interface with electrical system.
- Lighting control system using presence and absence lighting control.
- Emergency lighting.
- Aircraft warning lights system.
- External lighting and secondary external lighting system.
- Electrical and control systems containment.
- BMU (Cradle) power and water supplies and communications systems (terminated at BMU landing points).
- Services to the automatic barriers where relevant.
- Utilities including electrical power including interface with Stage 1 Laboratory / FM building requirements and communications conduit systems.

### Other

The Consultant shall contribute to the design coordination and documentation including all interface requirements and Technical Advice for the following, but not necessarily be limited to:

- Group 1, 2 and interface where applicable with Group 3 Equipments.
- Lighting layout design and performance including review of any design provided by specialists or other parties as required by the Employer.
- Development of reflective ceiling plans.
- Pneumatic tube system.
- Medical gas.
- Renal water systems including de-ionised water systems.
- Coordination with Radiation protection specialist requirements.

A49342285

- X-ray systems interface including all associated systems such as warning lights.
- Catering equipment and layout.
- Robotics.
- Food waste processing system.
- Vertical transportation systems.
- Sprinkler protection system, including all plant and equipment, pipework and valves.
- Gas suppression systems electrical rooms including; all plant and equipment, gas bottles, and control systems.
- Wet / Dry riser systems including all plant and equipment, pipework and valves.
- Sprinkler and wet riser water storage tanks including water level control.
- Fire protection electrical installation from control panels to all plant and equipment.
- Main and secondary fire control panels.
- Fireman's general smoke ventilation override system and panel.
- Cause and effect matrix developed by relevant subcontractor(s) which is to outline the interfaces with the relevant systems such as the mechanical control panels, control of smoke dampers, generator control panel, security Access Control remote panels, sprinkler system, building management control system, electrical management control system, disabled alarm system, lift and escalator control systems etc.
- Fire Hydrants.
- Fire alarms and detection system
- Integrated extra low voltage systems.
- Information communication technology and distribution systems.
- Access control and Intruder detection system.
- External and Internal CCTV.
- Building Management Control system Interfaces with the building management control system, fire alarm system and the like
- Mechanical electrical systems including motor control panels etc.
- Public Address
- Telecommunication systems.
- Optic fibre backbone network system.
- IT / Data systems network and systems.
- Telephone distribution system including the fire telephone system.
- Not used.
- Equipment alarms systems.
- Nurse call system.
- Disabled alarm system interfaced with the fire alarm network.
- Induction loops and hand held portable system.
- Television system.

- Central dictation systems.
- Paging and personal attack system.
- Tagging system.
- Telemedicine system.
- Leak detection system.
- Energy metering management system.
- Cold rooms including all plant and equipment

**Compliance and Compatibility**

The Consultant's design and documentation shall ensure compliance with and/or encompass the following, but not necessarily be limited to:

- Employer's Requirements.
- Compliance with Health Service Notes and Memorandums such as the SHTM's, HTM's, HBN's, SHBN's, SHGN's SHPN's and HGN's.
- Codes and Standards.
- Local authority requirements.
- CIBSE guides.
- IEE regulations.
- Utility provider requirements.
- Compliance with Planning and Building Regulations.
- HVCA TR17.
- Health & Safety.
- Aircraft authority and specialist.
- Specialist medical.
- NHS/ Board objectives.
- Quality Assurance and Quality Control.
- Environmental management plan including WRAP waste management organisation system.
- Fire strategy.
- Cold water system to comply with Hai-Scribe infection control requirements.
- Acoustic and vibration requirements.
- Radio Frequency and Electro Magnetic Frequency requirements.
- Not used.
- Carbon foot print compliance.
- BREEAM Excellence rating compliance.
- Input to life cycle analysis and selection.
- Interface with Laboratory / FM buildings.

- Plant, equipment, materials and ICT, including IELVS systems to be compatible with Stage 1 Laboratory systems.
- MEP building services systems configured to promote flexibility to enable future maintenance, re-modelling, re-planning and replacement without disruption to adjacent areas.

# 2. Concept Design and Design Development

## Overview

2.1 It is a fundamental requirement that all Documentation produced during the Concept Design and Design Development stages are in full compliance with the parameters of the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the Programmes as these may be amended from time to time.

2.2 The Design Development stage involves the development of the Concept Design and enables the tendering and construction of the Project to be executed, particularly for the enabling works and the early release packages. Consequently the particulars highlighted below require the Consultant to undertake iterative Services and revisit the work carried out under Concept Design which must be amended or otherwise.

## Tasks

The Consultant shall:

2.3 Supplement Project details provided by the Employer by sourcing relevant information about the Site. Based on these documents make appraisals and establish constraints for the Works.

2.4 Seek clarification or direction on Project requirements as necessary.

2.5 Visit site in addition to as requested by the Employer.

2.6 Contribute to site appraisals and surveys and (re)evaluate Project requirements including the preparation of options/recommendations for consideration by the Employer highlighting advantages and disadvantages (financial and technical) and where relevant any long lead-in procurement building elements.

2.7 Evaluate any amendments to the Project requirements and advise the Employer on options for development of the design having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

2.8 As when requested by the Employer, provide a Documentation Schedule for review by the Employer. This Documentation Schedule shall support the Full Business Case timeline, the Employer's tender letting schedule and construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for the production of same.

2.9 Update or amend the Documentation Schedule as required by the Employer. Complete/populate the master documentation matrix if utilised by the Employer. This matrix indicates to which tender package each of the Consultant's documents relates to.

2.10 Provide assistance and support the Architect, Structural Engineer and other consultants in the preparation, design, specification and installation details of their respective discipline to ensure a fully coordinated design is produced for the Project.

2.11 Prepare the Documentation incorporating the architectural, structural and other consultants' requirements and/or information into the building services design having regards at all times to the Planning constraints, the Employer's Requirements, the Cost Plan and the construction

A49342285

programme. In conjunction with the other consultants, establish all relevant Statutory Authority requirements and incorporate into the design.

2.12 Prepare design studies and make presentations to the Employer. The Consultant shall take account of any comments from the Employer and amend the Documentation as necessary. The Consultant shall also consult with local or other Statutory Authorities and with other interest groups as reasonably required by the Employer.

2.13 In accordance with the agreed Documentation Schedule, prepare and submit to the Employer in a timely manner, the adequately coordinated and progressed design and as the Lead Consultant for the specific design responsibilities, coordinate tasks and submissions from other consultants. Note: all CAD drawings are to be at an appropriate scale as reasonably required by the Employer.

2.14 In conjunction with the other consultants, develop the design incorporating the design solutions and where required, provide documentation for submissions to the relevant Statutory Authorities including for the discharge of Planning consent conditions and/or to seek conditions of approval for Building Regulations compliance.

2.15 Liaise with other consultants and coordinate the provision of information and data as reasonably required by the Cost consultant and the Employer for use in connection with the Cost Plan.

2.16 Prepare and provide Documentation (on a reasonable and realistic basis) in respect of alternative designs and/or construction solutions for the purpose of value engineering and reviewing costs. Repeat the process as reasonably required by the Employer in terms of the construction costs remaining within the Cost Plan.

2.17 Assess and provide comment on alternatives offered by the Employer, its subcontractors and suppliers. Provide design details and information as required by the Cost consultant in pricing options / alternatives. This may be subject to additional fee to be discussed and agreed between the Consultant and the Employer on a case by case basis.

2.18 Provide studies and information on maintenance, lifecycle and other costs for the Project as required by the Employer.

2.19 Assist the Employer in the preparation of Scope of Work packages on a trade by trade basis for inclusion in subcontract and supply procurement.

2.20 Prepare and issue drawings, specifications, schedules and the like as required by the Employer for market testing, tender and costing purposes. The specification is to include the requirements for testing, commissioning, benchmarks and workmanship standards.

2.21 Prepare schedules, perspectives, computer generated images and other similar presentation materials as reasonably required by the Employer to illustrate the proposed design.

2.22 Review and comment on the temporary works in relation to such activities as the crane locations, materials handling areas, storage and compound areas and the like. It is noted that the Consultant have made allowances in the permanent state design to accommodate the normally envisaged temporary loads during the course of the construction works.

2.23 Continuously review the design against the Project requirements including the Employer's Requirements and all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

2.24 Prepare and issue a fully coordinated set of Documentation for these design stages in a report format to the Employer. The Documentation shall be at suitable including coordination information such as the overlay drawings as requested by the Employer.

# 3. Construction Documentation and Construction Phase

## Overview

3.1 This Work Stage shall be the Construction Documentation and Construction Phase of the Project. This Work Stage continues from the Concept Design and Design Development Work Stage and shall enable the remaining tendering and construction of the Project to be progressed. Where necessary, this Work Stage is undertaken in conjunction with the ongoing design development tasks. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development (and where necessary, Concept Design) Work Stage(s) and to the extent that any of the Services carried out under Design Development (and where necessary, Concept Design) must be amended or otherwise, such work shall be deemed to be part of/concurrent to this Work Stage.

3.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage is suitable for properly constructing the Project and shall fully reflect the developed design in full compliance with the parameters of the Project requirements such as the Planning consents, Employer's Requirements, the Cost Plan and the Programme as these may be amended from time to time, especially the construction programme.

## Tasks

The Consultant shall:

3.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant, make further appraisals of Project constraints.

3.4 Evaluate any amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements

3.5 Visit site in addition to as requested reasonably by the Employer.

3.6 As when requested by the Employer, update and issue the Documentation Schedule for review by the Employer. The Documentation Schedule shall be consistent with the Employer's construction programme and shall set out the Documentation to be produced by the Consultant including the sequence and the dates for production of same.

3.7 Liaise with other consultants to provide integrated and coordinated design information and data as required by the Employer to comply with the Employer's tender letting schedule and with the construction programme to ensure that there is no delay in providing information to subcontractors or in constructing the Works.

3.8 Update or amend the Documentation Schedule as required by the Employer. Update the master documentation matrix in a format requested by the Employer.

3.9 Produce a monthly update of the Documentation Schedule, or at other times as reasonably required by the Employer, showing the Consultant's actual and proposed delivery against the programmed issue dates for each Documentation including the details of the mitigation measures where the Consultant has fallen behind in providing the design information and/or the Documentation was inadequate.

3.10 Provide Documentation in accordance with the Documentation Schedule. All Documentation to be in compliance with the Project requirements. The Documentation shall be suitable of being used for preparing trade packages (including trade bills of quantities) and used for inviting tenders from trade subcontractors and updated to provide adequate details to allow each design element to be constructed which must for example, take due regard of good health and safety practices, buildability requirements such as construction sequencing and access and construction tolerances.

3.11 Review all relevant subcontractors and/or suppliers' submissions of samples and technical data as requested and report to the Employer in respect of compliance with the Project requirements.

3.12 Evaluate alternatives proposed by the trade subcontractors and in conjunction with other consultants, coordinate and integrate all such preferred alternatives into the Documentation as requested by the Employer. This may be subject to additional fee to be discussed and agreed between the Consultant and the Employer on a case by case basis.

3.13 In conjunction with the other consultants, review and comment on shop drawings, specifications, prototypes, samples and technical data submissions and other information prepared by potential and/or engaged subcontractors or suppliers for compliance with the Project requirements where relevant to the building services design. Provide such comments within 7 days of receipt. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.14 Review and comment on the documentation of other consultants and subcontractors within 7 days of receipt and where warranted, fully update all Consultant's Documentation where necessary. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.15 Notify the Employer in writing, once the Consultant becomes aware of any amendments or additions/deletions in the Documentation which may increase the cost of construction and/or whole life cost of the Project.

3.16 Not used.

3.17 Provide updated, coordinated and dimensioned drawings at suitable scales showing all major in a timely manner for services and other builder's works in connection details including coordination information such as the overlay drawings as requested by the Employer.

3.18 Produce supplementary documentation as may be required by the Employer to clarify the Documentation during construction, including issuing sketches, details, clarifications, further Documentation, investigating site based construction issues related to the Documentation and preparing and issuing design solutions in conjunction with other consultants where applicable.

3.19 Provide Construction Documentation ("For Contract") drawings incorporating all information issued as advices or sketches so that the latest information is shown on the Documentation to be used for construction. All Documentation must be completed and issued in compliance with the Programme and with the general progress of the Works to ensure that such progress is not delayed and/or disrupted.

3.20 Issue updated drawings, specifications, schedules, details and other design information as the Employer may require as a result of ongoing design development or updates in information provided or released by other consultants or the Employer.

3.21 Revise and resubmit Planning consent submissions to the Planning Authority as required where the progressed design has varied from the original permit approval.

3.22 Regularly check the Documentation against the Project requirements such as the Employer's Requirements all relevant Statutory Authority requirements and immediately notify the Employer of any non-compliance together with associated remedial recommendations.

3.23 Assist in the updating of design and construction programmes as required by the Employer.

3.24 Respond to all correspondence including (but not limited to) Requests for Information within 5 days. However, the Consultant shall endeavour to review, comment and return such submissions earlier should the specific need arise as to be discussed between the Consultant and the Employer.

3.25 Undertake any off-site inspections reasonably requested by the Employer.

3.26 Review mock-ups and samples for compliance with the Project requirements such as the Planning consent and the Employer's Requirements and recommend benchmarks for finish and workmanship with the Employer in respect of subcontractors, suppliers and manufacturers.

3.27 Undertake regular inspections of the Works and provide non conformance report on same to the Employer.

3.28 Assist in the preparation of full documentation and detailing for a marketing and display facilities as appropriate for the Project or as reasonably required by the Employer.

3.29 All design documentation created or produced by the Consultant as part of this appointment is to be issued to the Employer in the form and at the frequency required – this includes but is not limited to full copy of all electronic design files or calculations produced by the Consultant as part of his design obligations hereunder

A49342285

# 4. Documentation Deliverables

## Overview

4.1 The Employer intends to engage specialist subcontractors for the following trades to design (For Construction details only) and construct that form part of the Works. Some of these are early release packages. For these trades, the Consultant is to provide documentation that outline the design intent and the performance requirements from which the subcontractor(s) will prepare their construction design (ie. shop drawings):

- Piling
- Structural steel (connection design only)
- Architectural precast concrete
- Major building (M&E) services
- Medical gases (including Pneumatic tube system and Renal water systems)
- Lifts and escalators
- Unitised curtain wall system
- Special/feature glazing such as the entrance glass doors and canopy
- Courtyard cladding including ribbon windows
- Podium (rainscreen) cladding
- Plantroom cladding
- Louvres
- ETFE roof coverings
- Glass roof structures
- BMU/Cleaning cradle and gantry systems
- Robotics
- Radiation protection
- Catering

The Lead Consultant for a given package (refer to the Design Consultant Responsibility Matrix) is to coordinate with other consultants in reviewing the design by these specialist subcontractors and confirm that they are acceptable for coordination with the Services and that the design intent and performance specification has been satisfied.

4.2 Not used.

4.3 In some instances, it is intended that elements of the design are undertaken by specialist subcontractors whereby the subcontractor will assume responsibility for the installation documentation of the Consultant's design intent. However, the Consultant will retain responsibility to review and comment on such design proposals and documentation. For example:

- Spacial coordination – The Consultant shall provide in sufficient detail to establish and confirm the coordinated zoning requirement such as the ceiling voids, risers and the like. The detailed design information from the Consultant is to show the spatial inter-relationship of the

A49342285

engineering systems for the production of installation drawings by the relevant subcontractor(s).

- Selection plant and equipment – The Consultant shall provide a description of the main/critical performance requirements and essential design features of plant and equipment. For example: Input/output capacities of plant, the range of operating duties, details of the required quality of construction and finishes, any essential energy saving features, the acoustic performance and the availability of spares. Based on these parameters, the relevant subcontract(s) will propose their plant and equipment selection.
- Commissioning – The Consultant shall incorporate into various systems designs and provide specifications outlining the essential components and features necessary to enable proper preparation and commissioning of the building services. The Consultant shall also provide input to the strategy to be developed in conjunction with the Employer to ensure effective commissioning of the designed and installed systems
- Handover information – The Consultant shall provide specifications that define the scope, content and format of operating and maintenance manuals and record drawings appropriate to the Project. The Consultant shall also define the level of documentation, commissioning results and other information to be made available by the relevant subcontract(s) for a proper handover of the Works.

This design task demarcation between the (MEP) Services Engineer (ie. the Consultant) and the subcontractor(s) is further clarified below as a guide:

| No. | Specific Design Task Examples | (MEP) Services Engineer Shall Provide: | MEP Subcontractor Shall Undertake: | Notes |
|---|---|---|---|---|
| 1 | Acoustical design and treatment for engineering services | All plant and equipment selection criteria based on internal and external noise limitations. Acoustic attentuators and anti-vibration treatment specifications based on insertions losses and vibration limitation. Ducting and pipe systems to comply with limiting velocities. Specify acoustic sealant treatment and locations | Final equipment selection based on Engineer's criteria | Site and internal acoustic parameters by Acoustic Consultant |
| 2 | Air compressors and compressed air supplies | Performance specification, distribution strategy and detailed design coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 3 | Air-conditioning and mechanical ventilation systems | Schematic arrangements for each of the systems required for the facility. Block planning for plantrooms and risers to departmental boundaries. Floor GAs, plantroom and riser ductwork layouts. Sizing and routing indicated on detailed design drawings showing positions of grilles, dampers and other in-line components. Specify plant and equipment duty performance criteria | Selection of plant and scheduling of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | Fire strategy by Fire Consultant |

| | | | | |
|---|---|---|---|---|
| 4 | Automatic blinds and shutters | Coordinate power supplies, BMS and any fire alarm interface points. Provide solar control blinds operational performance requirements | Coordinate final location including controls and power wiring | |
| 5 | Bedpan washing or disposal equipment | Coordinate power supplies, drainage and water supplies to suit equipment requirements | Final coordination and preparation of installation drawings | |
| 6 | Boiler plant and auxiliaries | Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Specify pump duty performance criteria | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 7 | Building management system and automatic controls | Detailed functional description of operation for all system including typical AHUs and plant details. Detailed performance specification and a system schematics, block diagrams giving operational requirements. Design arterial containment route requirements | Installation design of systems, points schedule, location of sensors, sizing and routing of containment and power cabling to motor drives, etc. Coordination of protective devices. Final coordination and preparation of installation drawings | |
| 8 | Calorifiers and heat exchangers | Specification, design and resilience criteria and sizing of plant and coordination on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 9 | Clocks | Performance specification giving operational requirements. Applicable to operating theatre panels only. All other clocks battery operated | Installation design of systems and coordinate location of components | Groups 1 and 2 only |
| 10 | Cold water service | External - pipe sizes and routes, schematic arrangements and coordinated layout drawings. Internal - schematic arrangements for each plant area with indicative main pipe sizes. Location of key main risers. Specification, design criteria and resilience, sizing of plant and coordination of spatial constraints on plantrooms and layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing all terminal positions | Selection of plant and scheduling of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 11 | Combined heat and power plant/s | Analysis of sizes, integration into schematics and GA drawings. Specification, design criteria and sizing of plant and coordination on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

A49342285

| | | | | |
|---|---|---|---|---|
| 12 | Chilled water system/s | Primary Chilled Water - Major pipe sizes and routes, schematic arrangements. Equipment schedules for chillers, pumps and pressurisation equipment, heat exchangers. Secondary Chilled Water – schematic arrangements. Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing positions of terminal devices and valves | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 13 | Generator plant and systems including fuel oil | Sizes, schematics and GA drawings. Detailed description of operation. Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50 | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 14 | Electric lighting and power installation/s, including luminaries | Detailed design drawings showing luminaire layouts, circuitry and switching arrangements. Performance specification giving key design criteria.. | All calculations based on requirements of Room Data Sheets, selection and scheduling of luminaires to meet design criteria and photometric data confirmation. Layout drawings and switching/control appearance. Detailed lighting layouts complete with CFD lux level modelling and emergency lighting levels, locations and switching | |
| 15 | Electric small power installation/s | Circuitry details and medical equipment supplies. Design to be in line with ADB Code requirements | Final coordination and preparation of installation drawings | |
| 16 | Electrical distribution system | Detailed specification of HV and LV switchgear, cable/busbar sizing, distribution boards and all HV and LV schematics. Detailed design drawings for all plant rooms and layouts. Theoretical HV/LV discrimination study based on generic protection devices and design cable lengths. Provide HV protection grading philosophy. Provide final calculations and study report based on as installed information from the MEP Subcontractor | Final selection of switchgear, final HV/LV discrimination study and coordination of protective devices based on final selection of protective devices and installed cable lengths. Final coordination and preparation of installation drawings | |
| 17 | Electrical sub-station | Specification, design and resilience criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Transformer sizes, cable/busbar sizes and routes, switchgear details, schematics and GA drawings. HV/LV control systems and interface requirements with utility provider. | Selection of plant to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 18 | Escape lighting and fixed medical lighting | Detailed design drawings showing circuitry and switching arrangements. Performance specification giving key design criteria. Review and comment on proposals for compliance with design criteria | All calculations based on requirements of Room Data Sheets, selection and scheduling of luminaires to meet design criteria and photometric data confirmation. Layout drawings and switching/control appearance. Coordinated lighting layouts completed with CFD lux level modelling and emergency lighting levels, locations and switching. | |
| 19 | Exhaust gas handling systems/flues/chimneys | Clean Air Act submission. Specify sizes and routing for coordination on plantroom layout drawings at scale 1:50. Chimney height calculations and location on plans | Final chimney sizing, structural support information including any cladding. Final coordination and preparation of installation drawings | |
| 20 | Fire detection and alarm system/s | Performance specification giving operational requirements. Design arterial containment routes. | Design of systems, selection of components to meet Engineer's criteria, and the final location of components to be coordinated with the Architect. Provision of Fire Certificate. Develop fire alarm cause and effect. Design coordination drawings for all plant rooms and layouts. Coordinate all equipment required to be located on the reflective ceilings | Fire strategy by Fire Consultant |
| 21 | Fire fighting/protection system/s (including gas suppression system) | Performance specification and distribution strategy including coordination of pipe runs. Study into potential consequential damage associated with discharge of sprinklers (e.g floors below) and operational impact | Fire water tank sizing and location, pump sizing. Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings. | Fire strategy by Fire Consultant |
| 22 | Food preparation, cooking, conveying and serving equipment | Sizing of services to meet catering specialist's requirements. Routing of services to suit specialist's equipment layout | Final location of supplies to suit specialist's requirements. Final coordination and preparation of installation drawings | Catering specialist responsible for selection of equipment, layout. Termination, and sizing of final connections. Extract hood air volumes |
| 23 | Fuel gas supply and distribution | Specification and design criteria, sizing and routing for coordination of spatial constraints at scale 1:100 showing positions of valves meters, etc. Pipe sizes, routes and schematic arrangement. | Selection of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 24 | Fuel oil supply and distribution system/s | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings at scale 1:50. Specify pump duty performance criteria. Pipe sizing and routing for coordination at scale 1:100 showing positions of valves, pumps and fuel oil tank locations. Schematic arrangement for oil delivery system with pipe sizes. | Selection of plant and equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

A49342285

| | | | | |
|---|---|---|---|---|
| 25 | Fume extract/handling system/s | Air volumes to suit equipment supplier's requirements. Sizing and routing of ductwork considering the spatial constraints as for ventilation systems. Location and heights of discharges | Selection of equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 26 | Heating system/s | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing GAs for coordination showing positions of terminal devices and valves. LTHW Heating System schematic arrangements for each plant area and main system | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings. Coordination of reflected ceiling plans locating all services items for example, luminaries, grilles, smoke detectors etc | |
| 27 | Hot water service | Specification, design criteria, sizing of plant and coordination of spatial constraints on plantroom layout drawings. Specify pump duty performance criteria. Pipe sizing and routing for coordination showing positions of valves. Schematic arrangements for each plant area with pipe sizes and main system schematic. Location of key main risers. | Selection of plant and equipment to meet design criteria and spatial constraints, scheduling of equipment, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 28 | 11kV System / HV Distribution | Specification, design and resilience criteria, sizing of plant, switchgear, main distribution, cables/busbar and coordination of spatial constraints on plantroom and layout drawings. Functional description and detailed design of HV /LV control system. Coordinate routing outside plantrooms and the requirements of the utility provider. Theoretical HV/LV discrimination study based on generic protection devices and design cable lengths. Provide HV protection grading philosophy. Provide final calculations and study report based on as installed information from the MEP Subcontractor | Final selection of switchgear, HV/LV control system, final discrimination study and coordination of protective devices based on final selection of protective devices and installed cable lengths. Final coordination and preparation of installation drawings | |
| 29 | Incoming electrical supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | Provide the Employer with summary study paper on final discrimination and protection in written and electronic format | |

| | | | | |
|---|---|---|---|---|
| 30 | Incoming water supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | | |
| 31 | Incoming gas supply/s | Undertake load assessment. Initial enquires and technical liaison with the utility supplier leading to a final quotation. Seek and assist in arranging the programme requirements and liaise with Client. Provide design documentation | | |
| 32 | Information technology (IT) systems | Coordination of containment to specialist's requirements. Power and cooling provision to specialist's requirements. Liaison with the Client/Board IT representatives | Final siting/location of hub rooms and cooling and power requirements. Final coordination and preparation of installation drawings. Liaise with the Client/Board IT representatives | |
| 33 | Intruder detection/alarm systems | Performance specification. | Design of systems, location of components to be coordinated with the Architect in accordance with the performance specification. Schedule all required system components and hardware. Coordinate in developing the door schedule | |
| 34 | Laboratory gases | Performance specification. Coordination and routing of pipework, plant and equipment to specialist's requirements. | Final coordination and preparation of installation drawings | |
| 35 | Lifts, hoists, escalators & travelators | Power supplies, ventilation, pressure relief lift pressurisation and lift motor room cooling in accordance with Lift Subcontractor's requirements | Fire alarm, security and access control, BMS interfaces. Final coordination and location of supply point with Lift Subcontractor | All ventilation and cooling of lift cars within Lift subcontractor's package |
| 36 | Lightning protection | Performance specification giving operational requirements, lighting protection routes, conductor sizing, test points and connections to earth requirements | Final coordination and preparation of installation drawings | |
| 37 | Weather louvres | Coordination with cladding specialist on connection details. Provide performance criteria; free area, pressure drop and size based on assumed free area ratio | Final coordination with cladding specialist on connection details and preparation of installation drawings | Aesthetics selected by the Architect. Final selection by cladding specialist |
| 38 | Medical equipment - pre-installation works | Sizing of services to meet medical equipment specialist's requirements. Attendance at relevant 'Equipment Selection Group' meetings | Final location of supplies to suit specialist's requirements. Final coordination and preparation of installation drawings | |

A49342285

| | | | | |
|---|---|---|---|---|
| 39 | Medical gas services including medical vacuum, AGSS and dental services | Performance specification, distribution strategy and coordination of pipe runs and plant. Coordinate location and size of accommodation for VIE plant and manifold rooms. Develop a distribution strategy for the main medical gas systems | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 40 | Nurse call installation | Performance specification, coordination of containment to specialist's requirements. Provide details of the arterial containment routes | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 41 | Pneumatic-tube conveying installation | Distribution strategy and coordination of pipe runs and plant | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 42 | Power operated smoke louvres | Performance specification and accompanying system schematics giving operational requirements. Provide details of power supplies, BMS and fire alarm interfaces | Final location coordinated with the Architect. Integration with specialist providers requirements. Control and interface wiring installation drawings | Size and location by Fire Consultant |
| 43 | Public address, personnel-location and call system/s | Performance specification giving detailed operational requirements. Coordination of arterial containment routes to specialist's requirements. | Installation design of systems, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | |
| 44 | Public health above ground sanitary plumbing | Specification and design criteria, sizing and routing for coordination at scale 1:100. Design to show flow rates and drainage connection points. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | |
| 45 | Public health above ground chemical drainage | Specification and design criteria, sizing and routing for coordination at scale 1:100. Design to show flow rates and drainage connection points. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | |
| 46 | Public health above ground rain water installation | Coordinate roof discharge rates and outlet locations. Specification and design criteria, sizing and routing for coordination at scale 1:100. BWIC details | Installation coordination and preparation of installation drawings and final BWIC details | Roof finishes and falls by Architect. |
| 47 | Public health below ground foul drainage | Provide flow rate information and positions of connection points in relation to sanitaryware and partitions | Coordinate final position of connection points to suit setting out of sanitaryware and partitions | Based on the information from Services Engineer, the Civil Engineer to design drainage reticulation below ground |

| | | | | |
|---|---|---|---|---|
| 48 | Public health below ground storm water drainage | Provide flow rate information and positions of connection points | Coordinate final position of connection points to suit setting out and partitions | Based on the information from Services Engineer, the Civil Engineer to design drainage reticulation below ground |
| 49 | Radio and television installation/s | Performance specification, coordination of containment to specialist's requirements. Coordinate power supplies to specialist's requirements | Installation design of systems. Coordinate location of components and prepare installation drawings | |
| 50 | Refrigeration installation and cold stores | Coordination of pipework/containment to specialist's requirements. Power supplies, BMS interfaces etc to specialist's requirements. | Installation design of systems, sizing of refrigerant pipework, location of components to be coordinated with the Architect. Final coordination and preparation of installation drawings | For DX system and the like (eg. in server rooms) |
| 51 | Renewable energy sources | Develop strategy to successfully comply with the project objectives. Specification, design and resilience criteria, sizing of plant and coordination on plantroom layout drawings at scale 1:50. | Installation design of systems. Coordinate location of components and prepare installation drawings | |
| 52 | Sanitary fittings and fixtures | Provide connection arrangement details for each type or equipment. Detail all automatic flushing systems sensor requirements including power supplies locations | Final coordination and preparation of installation drawings | Architect to specify sanitary fittings and fixtures |
| 53 | Security Access and Control Systems | Performance specification, coordination of containment to specialist's requirements. Power supplies to specialist's requirements. Provide details of arterial containment routes indicating all access controlled doors and head ends. Specifications for all required systems components and hardware. Coordinate in developing the door schedule | Installation design of systems, final coordination of the location of component. Interfaces to external control centre if applicable. Final coordination and location of supply point in agreement with specialist. Final coordination and preparation of installation drawings. Schedule all required systems components and hardware. Coordinate in developing the door schedule | |
| 54 | Smoke extract/clearance systems | Specification and sizing duct system and fans to meet performance criteria and spatial constraints | Selection of plant and equipment to meet design criteria and spatial constraints, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | Design strategy and criteria by Fire Consultant |
| 55 | Sound attenuation of services equipment | Equipment selection criteria and location | Final selection and attenuator schedules against procured plant details. Final coordination and preparation of installation drawings | Overall performance criteria by Acoustic Consultant |
| 56 | Specialist water services (e.g Renal RO) | Performance specification, distribution strategy and coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |

A49342285

| | | | | |
|---|---|---|---|---|
| 57 | Steam and condensate system/s | Performance specification, distribution strategy and coordination of pipe runs and plant | Selection of plant to meet performance criteria, installation details to suit manufacturer's requirements. Final coordination and preparation of installation drawings | |
| 58 | Street/external lighting/floodlighting | Carry out lighting level calculations. Specification and design criteria. Locate power supplies in relation to the CCTV and lighting locations | Final coordination of power supplies and CCTV locations. Final coordination and preparation of installation drawings | Selection by Landscape Architect |
| 59 | Telephone equipment and wiring | Coordination of containment to specialist's requirements. Power and cooling provision to specialist's requirements. Liaison with Client representatives. | Final coordination of siting/location of hub rooms, cooling and power requirements. Final coordination and preparation of installation drawings. Liaise with Client/Board representatives | |
| 60 | Thermal insulation for services | Specifications | Final selection to meet specifications | |
| 61 | Vibration control | Specifications and equipment selection criteria | Final selection and schedules against procured plant and equipment details | Overall performance criteria by Acoustic Consultant |
| 62 | Water treatment and filtration | Specification, design criteria and sizing of plant including water storage tanks, filtration plant and coordination on plantroom and layout drawing | Selection of plant to meet design criteria, installation details to suit manufacturer's requirements | |
| 63 | Window cleaning trolleys etc. | Power, water and communication supplies to specialist's requirements | Final coordination and location of supply point. Preparation of installation drawings | Specialist to provide power supply requirements and characteristics and location of interface point(s) |
| 64 | Specifications | Final specifications as described under the individual service elements. All systems to be provided with specifications based on NBS to reflect extent of design | Final coordination | |
| 65 | Thermal modelling, Part L Compliance Report, EPC | Undertake thermal modelling using IES Virtual Environment software to obtain heat loss and gain requirements. Use model to assess the thermal performance of the building fabric and summertime temperature predictions. Prepare a SPP6 Compliance Report. IES CFD model to be updated during the project design phase and upon project completion. At the end of detailed design update the model to incorporate plant specifications and use the model to produce an Energy Performance Certificate (EPC) for use by the Client | Final selection to meet specifications | |

| | | | | |
|---|---|---|---|---|
| 66 | Energy Consumption Modelling | Energy model in line with design development and prepare specifications and design to achieve results as assumptions. Energy model to be updated upon completion of design and during commissioning prior to project completion | Final coordination and preparation of installation drawings. Update data entries in model as required through course of project and at completion of Project with final data | |
| 67 | Structural Builder's work | Define and coordinate builder's work critical for the structural integrity of the building(s). This normally applies to all openings, trenches, ducts in concrete. This typically applies to vertical stacks, downpipes. Assist in sanitaryware setout | Define and coordinate all builder's work not critical for the structural integrity of the building(s). This normally applies to all chases, plant bases and openings less than 100mm | Architect to specify grid setout, type, height. MEP Subcontractor to |
| 69 | Reflected Ceiling Plans | Agree and coordinate types of ceilings and heights with the Architect. | Coordinate criteria/rules and grid for setting out. Final coordination and setting out regarding lighting, heating, cooling and ventilation, nurse call, security, CCTV and other specialist designed systems. Provide final details and positions of all ceiling mounted services for Architect's coordination review. Provide final coordinated CAD layer for the Architect to import/issue the final RCP. . | |
| 70 | Detailed design drawings | Detailed design drawings will show the coordinated locations of plant items and service routes in such detail as to indicate the design intent. The main features of detailed design drawings will be as follows:<br><br>• Plan layouts will be to a scale of at least 1:100. Plant areas will be to a scale of at least 1:50, and will be accompanied by cross sections.<br><br>• The drawings will indicate the position of services that are feasible to install and spatially coordinated. It will be possible to produce the final installation drawings without major re-routing of the services.<br><br>• Pipework and cable containment will be represented by single line layouts. Ductwork will be represented by either double line or single line layouts as required to demonstrate that the routes indicated are feasible.<br><br>• The drawing will indicate the space available for major service routing in both horizontal and vertical planes. | Final coordination and preparation of installation drawings | |

| | | | | |
|---|---|---|---|---|
| 71 | Installation and shop drawings | Review and comment on all subcontractor produced coordinated installation drawings | Installation and shop drawings will show the inter-relationship of two or more engineering services and their relation to the structure and building fabric. The main features of coordinated working drawings will be as follows:<br><br>• Plan layouts will be to a scale of at least 1:50 and be accompanied by cross sections to a scale of at least 1:20 for all congested areas.<br><br>• The drawing will make allowance for installation working space and space to facilitate commissioning and maintenance.<br><br>• The drawings will be spatially coordinated and there should be no physical clashes between the system components when installed. Critical dimensions, datum levels and invert levels will be provided.<br><br>• The spaces between pipe and duct runs shown on the drawing will make allowance for the service at its widest points considering the insulation, standard fitting dimensions and joint widths.<br><br>• The drawing will indicate positions of all fixing points and supports necessary to install the works, and where they have significance to the structural design or spatial constraints. | |
| 72 | (As-Built) Record drawings | Review and comment on all subcontractor produced as-built drawings | Prepare record drawings based upon the installation drawings which are marked up on site to reflect any changes occurring during construction. Incorporate these changes to generate the As-Built drawings | |
| 73 | Drain and vent point locations and pipe work gradients | Specification stating venting, drain points and required pipe fall for all building services | Final coordination and preparation of installation drawings | |
| 74 | Locations of brackets and supports | To be defined within the specifications | Final coordination and preparation of installation drawings | |
| 75 | Expansion joints, anchors and guide locations | Specify and indicate locations of expansion joints and anchor points required for major services runs | Final coordination and preparation of installation drawings | |
| 76 | Valve, damper and access point locations | To be defined within the specifications | Final coordination and preparation of installation drawings | |
| 77 | Final fan and pump system resistances | Design resistances based on detailed design drawings and specifications | Verify resistances following completion of the installation drawings and selection of all materials and prior to final procurement of plant items | |

A49342285

| | | | | |
|---|---|---|---|---|
| 78 | Selection of plant and equipment | Specify main performance requirements and essential design features of plant items. Specify values for the nominal capacities of plant, the range of operating duties anticipated, details of the expected quality of construction and finishes, any essential energy saving features, and the acoustic performance. | Selection of plant and equipment in accordance with the essential design features specified, taking account of final system characteristics once coordinated installation drawings have been adequately developed. Provision of all detailed information in support of proposed selections including, where appropriate, associated system resistance calculations. | |
| 81 | Operational and departmental policies | Review and incorporate requirements into engineering services designs | For performance specified systems, review and incorporate requirements into engineering services designs. Final coordination and preparation of installation drawings | |
| 84 | Major plant and equipment selections | Review and comment on subcontractor's submissions for compliance with key performance requirements as set out in the Equipment Schedules | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |
| 85 | Specialist performance specified systems | Review and comment on specialist's technical submissions for compliance with key performance criteria as set out in the specifications | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |
| 86 | Monitoring the installation for compliance | Attend site to inspect ongoing construction works to confirm that the design intent is generally complied with and to report any observations | | |
| 87 | Commissioning | Agree a commissioning plan and review commissioning data for compliance with the specifications. Attend commissioning activities and meetings in order to witness and sign off key commissioning results | Submit proposals with supporting information. Consider review comments from the Consultant and undertake commissioning | |
| 88 | Energy metering monitoring system | Strategy and performance specification. Indicate all meter locations. | Final coordination and preparation of installation drawings | |
| 89 | BREEAM Excellence rating | Provide all management and input for all aspects of compliance with BREEAM Excellence rating. | Final coordination and preparation of installation drawings | |
| 90 | User Group meetings | Attend key User Group meetings to receive briefing information and input from the building services design aspect | Attend key User Group meetings to receive briefing information and input from the building services design aspect | |

| | | | | |
|---|---|---|---|---|
| 91 | Technical and sample submissions | Review and comment all subcontractor technical and sample submissions to confirm compliance with design intentions, BREEAM rating, energy model, quality etc. | Submit proposals with supporting information. Consider review comments from the Consultant and undertake final coordination and preparation of installation drawings | |

**Documentation**

4.4 The Documentation Deliverables shall be fully coordinated with other consultants and other relevant parties prior to issue. The Deliverables are to be provided in trade package format.

In addition to the above, please note the following general principal requirements:

a) Drawings are to be prepared in a digital form on standard A size sheet (ie. A0, A1, A2, A3). Drawings are not to be any larger than the A0 size.

b) Building Orientation: North to top of sheet, part floors details to be drawn with North to top of sheet. North arrow must be shown on the drawing title block.

c) Each Documents must contain/show:

- Unique document number
- Full title with no abbreviation
- Drawn (or prepared) by and checked by – sign offs
- All details to have scale identified for each
- Denote full (sheet) size
- Changes from the previous drawing revision are to be numbered individually and highlighted with a bold cloud. Once the drawing is revised again, these clouds will be removed and new/latest clouds added to highlight the new drawing amendments
- Detailed description of the change(s) under each number with a date in the title block (to match the cloud number) so that the change(s) can be easily understood from the previous issue
- All documents to be prepared in black and white and not colour unless advised otherwise by the Employer
- The orientation of all drawings when submitted electronically shall be checked that they are landscape and uploaded in the correct orientation (e.g. not scanned upside down)

d) The text on all Documents including the drawings shall be in UK English. All dimensions shall be given in metric format. Calendar dates shall follow the Day/Month/Year format.

e) When revising a document, such as specifications, the full version is to be issued (ie. do not issue just an addenda/extract of the pages that changed).

f) Revisions to text documents will have the revised text in bold and italics (***this is an example***). Text that has been deleted will be in italics and struck through (~~*another example*~~). The Table of Contents shall also highlight in bold italic sections modified. Revised text highlighted must be removed by the Originator prior to issuing the next revision or prior to issuing a document For Tender/Contract and For Construction purposes.

g) Text documents will be prepared on standard A4 size sheets. All text documents will have a title page displaying the relevant information. Each page of the document must show (as a minimum) - document number and its revision, the page number and the total number of pages (ie. page X of Y).

A49342285

4.5 The following sample list of documents for the building services design as provided by the Consultant indicates the level of design documentation proposed. However, the Consultant shall provide any additional documentation which is not listed below which would be required by the Employer to construct the Works in addition to the Design Development and Overall Design Document Deliverables required by the Board as listed under the agreed Appendix K of the Building Contract which includes those Deliverables required in advance of (Stage 2) Full Business Case:

| Documentation | Scale (indicative) |
|---|---|
| **Appendix K Deliverables** | |
| Mechanical Services Drawings | |
| Medical Gases Layouts | |
| Plantrooms Medical Gases | |
| Medical Gas Services Schematics | |
| Heating System Zoning Philosophy | |
| Chilled Water System Zoning Philosophy | |
| HTG and CHW Layouts | |
| Plantrooms HTB and CHW | |
| MTHW Heating Schematics | |
| Secondary Heating Schematics Plantrooms | |
| Primary Chilled Water Schematics | |
| Secondary Chilled Water Schematics Plantrooms | |
| Ventilation System Zoning Philosophy | |
| Ventilation Layouts | |
| Plantrooms Ventilation | |
| Ventilation Schematics | |
| Environmental Treatment Layouts | |
| Pneumatic Tube System Schematics | |
| Food Waste System Schematics | |
| Electrical Systems Zoning Philosophy | |
| Plantrooms LV Power | |
| Containment/Sub-main Layouts | |
| Low Voltage Schematics | |
| Lighting Layouts | |
| Security Layouts | |
| Earthing Schematics | |
| UPS Schematics | |

A49342285

| | |
|---|---|
| Fire Alarm Layouts | |
| Nurse Call Layouts | |
| Public Health Water Services Layouts | |
| Plantrooms Public Health Water Services | |
| Hot Water System Zoning Philosophy | |
| Sanitation and Rainwater Layouts | |

# 5. Commissioning, Completion and Post Completion

## Overview

5.1 This Work Stage shall be the Commissioning, Completion and Post Completion Phase of the Project and shall enable the Project to be commissioned and occupied. Consequently all items scheduled below are a continuation of and are in addition to the items scheduled in the Design Development, the Construction Documentation and the Construction Phases Work Stages.

5.2 It is a fundamental objective of the Employer that all Documentation produced during this Work Stage are suitable for properly constructing, commissioning and completing the Project in full compliance with the Project requirements such as the Planning consents, the Employer's Requirements, the Cost Plan and the construction and completion programmes.

## Tasks

The Consultant shall:

5.3 Receive further Project details and requirements from the Employer if any and together with other relevant information sourced by the Consultant, make further appraisals of Project constraints.

5.4 Visit site in addition to as requested reasonably by the Employer.

5.5 Evaluate any amendments to the Project requirements and advise on options for consideration by the Employer having regard to the effect on the Employer's Requirements, the Cost Plan, the Programme and any other relevant Statutory Authority requirements.

5.6 In conjunction with the other consultants, review as reasonably required by the Employer all subcontractor proposed commissioning procedures and report to the Employer.

5.7 Not used.

5.8 Review and comment on all relevant guarantees, warranties and O & M manuals prepared by subcontractors and suppliers.

5.9 In preparation for Completion, inspect the benchmark areas as required by the Employer and prepare non conformance reports to describe in the opinion of the Consultant the Works that may prevent them to be certified as completed together with recommendations for rectification of them. If required by the Employer and in conjunction with the Employer, the Consultant shall re-inspect the Works to verify that the non conformances have been rectified. These tasks are to be provided in a timely manner and where requested by the Employer, make appropriate representations on Employer's behalf to the Board in regards to the non conformances and their remedial works.

5.10 Review and comment within 7 days, all relevant "As-Built" documents as prepared by the other consultants and/or subcontractors including drawings, specifications, schedules, manuals and maintenance instructions or any other documents as required by the Employer.

5.11 Attend commissioning and witness testing to review the satisfactory function and completion of relevant systems for compliance with the Consultant's design intent and specifications in accordance with the Project requirements.

A49342285

5.12 Assist the Employer with the preparation and provision of the Project operation and maintenance manuals and as-built record information and the like as necessary for the Completion of the Project.

5.13 Assist in the preparing and updating of completion programmes as required by the Employer.

5.14 Liaise with other consultants and coordinate the provision of information and data as required by the Employer to comply with the construction and/or commissioning programme to ensure that there is no delay in providing information to the relevant parties.

5.15 Check the Documentation produced during this Work Stage against the Planning consents and other Project requirements such as the Employer's Requirements. Report on any non-compliance and provide mitigation recommendations on same.

5.16 Provide all necessary information to the CDM Coordinator to be included in the Health and Safety File for the purposes of the CDM Regulations.

5.17 Provide the updated specifications to reflect the as-built building services works..

5.18 Not used.

5.19 Provide the Employer with a written statement certifying that the Works are consistent with the Consultant's latest design Documentation and the Project requirements such as the Employer's Requirements as demonstrated on the testing and commissioning results.

5.20 Participate in inspections which shall be conducted at reasonable points during the first 52 weeks, if not at 52 weeks after the date of Completion.

5.21 Reasonably assist the Employer in the settlement of differences in relation to the building services works that may arise between the Board and the Employer or between the Employer and any subcontractor or supplier. Should such differences enter into adjudication or arbitration, the Consultant's assistance may be subject to additional fee which is to be discussed and agreed between the Consultant and the Employer on a case by case basis.

**NHS GREATER GLASGOW AND CLYDE**
**NEW SOUTH GLASGOW HOSPITALS (NSGH)**

**BROOKFIELD CONSTRUCTION (UK)**

The Consultant with the primary lead responsibilities including the overall coordination for the various design tasks are as follows, but not necessarily limited to:

Note:

1. All other Consultants are required to assist by providing definitive and complete design advice and information in a timely manner to the Lead Consultant responsible for that design task.
2. The responsibilities below exclude the design tasks associated with the Laboratory Building.

| | **Lead Consultant : L** | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | **Notes** |

|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.17 | Integration of Site staging (eg. parking controls) and appropriate liaison | | | | | | | | | | | | | | | | | | | | L | Contractor logistics and phasing plans. Input from Consultants as required. |
| 3.18 | Sub/superstructure (interface) design coordination | L | | | L | | | | | | | | | | | | | | | | | |
| 3.19 | Spatial coordination of Building Services | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor(s) to take this detailed design from the Services Engineer in preparing the final installation drawings |
| 3.20 | Detailed coordination of Building Services | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor/Services Engineer |
| 3.21 | Coordination of external services (ie. outside building footprints) beneath ground | | L | | | | | | | | | | | | | | | | | | | Input from Civil Engineer |
| 3.22 | Underground drainage design (incl through and to top of the first slab above ground or internal face of (retaining) walls) | | | | L | | | | | | | | | | | | | | | | | Setout dimensions for the pop-ups on slabs and walls to be coordinated with Services Engineer and/or Architect and show them on structure (eg. slab) drawings |
| 3.23 | Above ground slab drainage design including rainwater | L | L | | | | | | | | | | | | | | | | | | | For rainwater, the Services Engineer is to design including showing the setout dimensions on the services drawings. Visual requirements for feature rainwater goods to be provided by the Architect |
| 3.24 | Building plant replacement strategy and design | | L | | | | | | | | | | | | | | | | | | | |
| 3.25 | Electrical systems security strategy and design intent (eg. CCTV and access control) | | L | | | | | | | | | | | | | | | | | | | Assisted by the Architect/Supply Chain |
| 3.26 | Review and incorporation of Architectural Specialist Subcontractor design information | L | | | | | | | | | | | | | | | | | | | | |
| 3.27 | Review of Building Services Specialist Subcontractor design information | | L | | | | | | | | | | | | | | | | | | | |

| Lead Consultant : L | | Architect and Medical Planners - **Nightingale** | Services Engineer - **ZBP** | Healthcare Planner - **Tribal** | Structural /Civil Engineer - **WSP** | Landscape Architect and Masterplanners - **Gillespies** | Art Strategy - **Gingko** | Environmental Engineer incl BREEAM - **WSP** | Acoustic Consultant – **Acoustic Logic** | Fire Engineering - **WSP** | Radiation Protection - **TBA** | Kitchen Consultant - **TBA** | EMC Consultant - **TBA** | Helicopter Consultant – **Peter Rover** | Lift Engineers - **Schindler** | Cost Planner – **Doig & Smith** | Building Control – **Glasgow City Council** | Planning Consultant - **Ironside Farrar** | CDM Coordinator - **URS** | Client – **NSGH Board** | Contractor / Employer - **Brookfield** | Notes |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3.28 | Review of Structural Specialist Subcontractor design information | | | | L | | | | | | | | | | | | | | | | | |
| 3.29 | Special waste drainage – top of ground slab and below and intenal face of walls (eg. grease traps, petrol interceptors) | | | | L | | | | | | | | | | | | | | | | | Setout dimensions for the pop-ups on slabs and walls (referenced off the grids) to be coordinated with Services Engineer and/or Architect and show them on structure (eg. slab) drawings |
| 3.30 | Special waste drainage – above ground slab (eg. grease traps) | | L | | | | | | | | | | | | | | | | | | | |
| 3.31 | Integrated data/comms services design intent | | L | | | | | | | | | | | | | | | | | | | MEP Subcontractor to undertake the sizing/location of hub rooms and coordinate to prepare the installation drawings |
| 3.32 | Design intent and integration of satellite and cable services | | L | | | | | | | | | | | | | | | | | | | Detailed design from Supply Chain |
| 3.33 | Building services management system design | | L | | | | | | | | | | | | | | | | | | | Detailed design from Supply Chain |
| 3.34 | Thermal insulation specifications | L | | | | | | | | | | | | | | | | | | | | Input from Services Engineer |
| 3.35 | U-value simulations and calculations | | L | | | | | | | | | | | | | | | | | | | |
| 3.36 | Part L equivalent Building Regulation performance simulations and calculations | | L | | | | | | | | | | | | | | | | | | | |
| 3.37 | BREEAM assessment and certification | | | | | | | L | | | | | | | | | | | | | | Input from Other Consultants |
| 3.38 | Building air leak/pressurization testing strategy | | | | | | | | | | | | | | | | | | | | L | Supported by the Architect and Services Engineer |
| 3.39 | Energy performance certification and certificate | | L | | | | | | | | | | | | | | | | | | | |
| 3.40 | Waterproofing design below ground up to the underside of the ground slab/DPC | | | | L | | | | | | | | | | | | | | | | | |
| 3.41 | Waterproofing design above ground including the DPC | L | | | | | | | | | | | | | | | | | | | | |

**ACTION BY**

**63. APOLOGIES**

Apologies for absence were intimated on behalf of Mr R Cleland and Mr A O Robertson OBE.

**64. MINUTES**

On the motion of Mr D Sime and seconded by Mr K Winter, the Minutes of the Performance Review Group meeting held on 15 September 2009 [PRG(M)09/05] were approved as an accurate record.

**65. MATTERS ARISING**

a) Proposal to Re-provide Accommodation currently used at Dalian House and Tara House

In relation to Minute 56 – Mr Griffin reported that with the date of the Performance Review Group being brought forward to accommodate the timescale for the New South Glasgow Hospitals Project, the work to complete the Full Business Case was still ongoing and, once completed, would be submitted to Members shortly. **Director of Finance**

NOTED

b) Review of NHS General Services Contract – Progress on Monitoring Access to GPs

In relation to Minute 45(a) – Review of NHS General Services Contract – Progress on Monitoring Access to GPs – Ms Renfrew advised that with the date of the Performance Review Group meeting being brought forward to accommodate the timescale for the New South Glasgow Hospitals Project, the outcome from the work carried out would not be available until the next meeting. **Director of Corporate Planning & Policy/Lead Director, Glasgow CHCPs**

At the Chair's request, Ms Renfrew provided Members with an update on the two meetings held to date of the Joint Partnership Board with the Glasgow CHCPs. The work was progressing well with positive exchanges around some of the previously difficult areas and it was planned to submit a revised Scheme of Establishment to the NHS Board for approval in December 2009. There were some handling issues around the processes required for agreeing savings plans but these were being worked through with the Council. **Director of Corporate Planning & Policy/Lead Director, Glasgow CHCPs**

NOTED

**66. APPROVAL OF TENDER FOR NEW SOUTH SIDE GLASGOW HOSPITALS AND LABORATORY PROJECT**

Mr Peter Daniels declared an interest in this item in that he had a relative who was a partner in one of the Architects supporting one of the Bidders who had tendered.

There was submitted a paper [Paper No. 09/43] by the Director of Acute Services Strategy Implementation and Planning, which sought Members' approval to the appointment of a Preferred Bidder for identified stages of the project. Ms Byrne reminded Members that the Outline Business Case had been approved by the Scottish Government Health Directorates in May 2008 and, thereafter, Members had been kept up to date on a regular basis by receiving updates on the Procurement Strategy, Gateway Review, Tender Process and Next Steps.

Members were advised that 5 potential Bidders had participated in the Pre-qualifying Questionnaire process following the notification of the Project which had been placed in the European Journal in February 2009. From this, 3 were shortlisted on the basis of their demonstrative ability to construct a health care project in this scale and complexity. The 3 Bidders taken forward to Tender stage of the Project were:-

Balfour Beatty Group Limited
Brookfield Europe LP
Laing O'Rourke Construction Limited

This had led to the receipt of Tenders for the project on 11 September 2009 following the competitive dialogue process.

An Evaluation Team was established and a detailed evaluation programme undertaken covering design, logistics and commercial matters. The Tender prices submitted were assessed for errors, inconsistencies, exclusions and caveats and then equalised to adjust for bid allowances and any missing items. The out-turn adjusted bid prices reflecting the estimated targets were then calculated. The most economically advantageous Tender scores, calculated as a ratio of quality and price were then generated using the full quality score and adjusted bid prices with a higher score representing better value for money.

The conclusions of the Evaluation Group were presented to the new South Glasgow Hospitals and Laboratory Project Executive Board on 22 October 2009. This included the attendance and involvement of the NHS Board Chair, Vice Chair and a Non-Executive Member of the Board. Consequently, on 26 October 2009, the Project Executive Board considered the comments from the 22 October meeting and formally endorsed the outcome and recommended that the preferred bidder be submitted to the Performance Review Group for approval. The NHS Board Chair had been unable to be present at today's meeting: however, had submitted a paper which had been provided to Members on his assessment of the outcome and conclusions of the process.

Mr Seabourne introduced the Evaluation Team who were present and provided Members with a presentation of the key aspects of the evaluation of the 3 Bidder Tenders. The presentations focused on design, quality and quantitative evaluation, legal and contractual considerations and most economically advantageous Tender scores. The Director of Finance of the NHS Board presented on the affordability of the capital and revenue aspects of the Project.

The financial analysis of the submitted bids had found that:-

- All the bids received were within the affordability limits set by the NHS Board.
- Only one Bidder offered the opportunity of less than 50/50 sharing of cost over-runs reflecting their confidence in the pricing.
- The bids submitted by 2 Bidders offered a high degree of certainty around pricing when risks were statistically assessed. One Bidder, however, as a result of its consideration of the fewer larger risks offered a less certain price outcome.
- Based upon the statistical analysis there was realistically no prospect of price out-turns occurring that would change the order of preference for Bidder proposals.

The most economically advantageous scores had clearly identified a Preferred Bidder and this was the basis of the Project Executive Board's recommendation to the Performance Review Group. The Legal Adviser concluded by advising Members that the evaluation process had been robust and compliant with the Regulations and had produced a clear and credible preferred bidder to take the contract forward. The contractual aspects offered were acceptable.

Mr Winter congratulated the NHS Board team on an excellent presentation of the detailed work supporting the recommendation that Brookfield Europe LP be appointed the Preferred Bidder. He asked about the provision of main services, i.e. drainage for the Laboratory Project and the possible dependency on these services if they were being provided as part of the main contract. Mr Seabourne and Mr Hall/..

advised that the Laboratory facility would be connected to an independent system and thereafter would be linked at a later date to the main services being provided as part of the main contract and therefore there would be no impact on the Laboratory Project if there was any delay in commencing with the main building contract for the hospital.

Mr Lee appreciated the details contained within the paper and the presentation and requested further information about Brookfield Europe LP. Mr Seabourne advised that the company was formed following the acquisition of Multiplex, the Australian international construction company in 2006. The parent company employed 10,000 staff with over 600 in Scotland. As a major construction company it sought to attract world class construction projects and had a demonstrable track record in the delivery of major health care schemes, including the £350m Peterborough City Hospital.

In responding to Mr Lee's question about seeking assurance around the compensation events, Mr McVeigh advised that while none were anticipated, small changes to the outputs could see the price moving marginally up or down and they could only proceed if the NHS Board agreed to the change and impact on the pricing structure. If such events occurred, they would be considered on an ongoing basis and not stored up for discussion at the end of the contract.

Ms Dhir asked about the car parking contract and also public transport links to the new hospital development. Mr Calderwood advised that a separate car parking contract would sit outwith the main contract but had been included as part of the overall design. In relation to public transport links, FastLink formed part of the planning application and the Scottish Government Health Directorates had agreed to provide funding to assist with this project. Cllr. Derek Mackay was chairing a meeting of relevant stakeholders to discuss the steps that would be required to be taken to try and secure this project. In addition, currently 12 bus routes entered the Southern General Hospital site and it was hoped in discussions with Strathclyde Passenger Transport to increase this to 36 different bus routes with bus stops within the site at different key locations.

Mr Williamson enquired about the flexibility that had been built into the design recognising the evolving clinical practices and changes which would occur over the lifetime of the building. Mr Hall advised that 25% extra capacity had been built into the services within the building and the main hospital would be based on single room accommodation. In addition, the type of construction used would allow internal alterations as it had been recognised that the site was restricted with little option of expanding externally.

In relation to Brookfield Europe LP, Mr McVeigh explained that the normal financial checks had been undertaken and this was a major multi-national company with a net worth of £40 billion. It was recognised it was pursuing a growth strategy and had committed recently to seeking major projects such as the new Southside Hospital Development. The normal performance bonds would be acquired as part of the protection against possible insolvency.

Cllr. Mackay welcomed the description of the financial stability of Brookfield and asked if any commitment had been given to accessing local employment. Mr Seabourne advised that there were indeed local economic benefits and the company would be targeting and training new recruits with targets around new entrants. They had committed to working with social enterprise and regeneration agencies as well as providing a training centre for staff.

In response to a question from Mr Hamilton, it was explained by Mr Crombie that a new City Morgue had been discussed with the City Council, Fiscal and Police. This would replace the current Morgue.

On the invitation of the Chair, Mr Rundell advised that he had been pleased with the progress made, the detailed work undertaken and the role of the professional advisers and the different levels of scrutiny had been helpful in bringing the Project to NHS Board Members for a decision.

Members welcomed the detail provided, the presentation and the assurances that had been provided by the Evaluation Team during the course of questioning.

Mr Daniels left the meeting.

Mr Calderwood advised that once a decision was taken there would require to be a debriefing for the 3 companies involved. On that basis, Members were asked to treat the information in confidence until a public announcement on the appointment of a Preferred Bidder was made on Thursday, 5 November 2009.

The Chair, on behalf of all Members, thanked Ms Byrne and Mr Seabourne and the New South Glasgow Hospitals and Laboratory Project Team for all the work undertaken to bring this huge project to approval stage and she asked that all members of staff involved be made aware of the Members' appreciation of the effort put in to bring this particular stage to a conclusion.

DECIDED:

1. That Brookfield Europe LP be appointed Preferred Contractor for the following Project stages:-

   Stage 1 – The design and construction of the new laboratories (subject to Scottish Government Health Directorates Capital Investment Group approval of the Full Business Case)

   Stage 2 – Detailed design of the new Adult and Children's Hospitals.

   Stage 3 – Construction of the new Adult and Children's Hospitals.

   Stage 3a – Demolition of the Surgical Block and associated buildings and completion of the soft landscaping. **Director of Acute Services Strategy Implementation & Planning**

   Noting that the end of Stage 2 (when the Full Business Case for the new Hospitals would be considered for approval by the NHS Board) there would be a break point in the contract.

2. That the Full Business Case for the laboratories component of the Project (Stage 1), subject to Scottish Health Directorates Capital Investment Group approval, be approved. **Director of Acute Services Strategy Implementation & Planning**

Mr Daniels returned to the meeting.

## 67. APPROVAL OF FINAL BUSINESS CASE – POSSILPARK HEALTH CENTRE

There was submitted a paper [Paper No. 09/44] by the Director, North Glasgow Community Health Care Partnership, which sought agreement to the approval of the Initial Agreement for submission to the Scottish Health Directorates Capital Investment Group.

Mr MacKenzie advised Members that the current Possilpark Health Centre was built in the 1970s and served a population of 8,000. The current fabric of the existing Health Centre was very poor and space restricted. As a result, the building was barely fit for purpose and was not Disability Discrimination Act compliant.

The development of the replacement Possilpark Health Centre was seen within the wider regeneration programme for the Possilpark area. The North Generation Agency has led on the development of a joint master plan for the Saracen Street site with the aim of contributing to the socio-economic and physical urban regeneration of the area. The Glasgow North Regeneration Agency were also leading on a town centre regeneration bid for the area adjoining the Saracen Street development and, if successful, there was an opportunity for sustained development and investment in the area.

The replacement of Possilpark Health Centre had been conditionally funded subject to Scottish Government Health Directorates Capital Investment Group approval, from the Primary and Community Care Premises Modernisation Programme for 2009/10 and 2010/11. An application to delay the scheme by one year in line with the current programme in the Initial Agreement would be made. The financial gap associated with capital charges which would be incurred had partially been bridged thus far and work was continuing to close the gap with details to be finalised in the Outline Business Case.

Members welcomed this Project.

DECIDED:

That the Initial Agreement for submission to the Scottish Government Health Directorates Capital Investment Group be approved.

**68. RE-DEVELOPMENT OF BLAWARTHILL HOSPITAL, GLASGOW**

There was submitted a paper [Paper No. 09/45] by the Director of the Rehabilitation & Assessment Centre – Acute Services Division, and the Property Manager, Capital Planning & Procurement, setting out proposals relating to Blawarthill Hospital, Glasgow.

Ms Harkness reminded Members that following public consultation in 2000, the NHS Board had agreed to develop the Blawarthill Hospital site from a stand-alone frail elderly facility to one which provided a range of health and social care services – the relevant NHS Board paper had been attached as Appendix 1 to the paper. The detailed requirements were developed jointly with Glasgow City Council and in light of the ongoing need for health care use and the planning restrictions placed on the development by the Council in 2005, it was agreed to progress the development as a land transaction with restrictions linked to the required elements of development –

- 60 beds for NHS continuing care;
- 60 care home beds;
- 16 very sheltered housing units; and
- 8 disabled access housing units.

It was acknowledged that any attempt to separate the NHS service provision from the sale of the site would jeopardise the potential value of the site and the marketing strategy reflected this position.

The ongoing requirement for frail elderly continuing care beds was described in papers submitted to the NHS Board in 2008 and early 2009 and in February 2009 the NHS Board had reaffirmed its commitment to the redevelopment of the Blawarthill Hospital site. Through joint planning arrangements Glasgow City Council identified the need for 20 specialist dementia places and 40 places providing nursing and enhanced residential care and this had been confirmed at an Executive Committee meeting in 2008 and reconfirmed at the end of October 2009. The support for the housing element had also been reconfirmed by the City Council.

Members were advised that the Tender process was carried out in two stages from seeking expressions of interests followed by the selection of 5 companies who were requested to submit Tenders in February 2007. 3 of the companies submitted a Full Tender and James Walker (Leith) were selected as the Preferred Developer in the year 2007. Due to the complexity of the brief for the transaction there had been significant detailed discussions on the Heads of Terms and this had taken some time to resolve. The Heads of Terms have now been agreed subject to endorsement by the Performance Review Group and the main aspects of these terms were as follows:-

- The nominees for the 4 aspects of the transaction to be delivered as part of the Project, i.e. 60 beds for NHS Continuing Care; 60 Care Home beds; Sheltered Housing provision and Mainstream Housing agreed as follows:-

    - Southern Cross Health Care for the Care Home site and either Southern Cross Health Care or other member of James Walker (Leith) Group for the NHS provision;

    - Yoker Housing Association for the Sheltered Housing site

    - Dundas Estate and Development Company for the mainstream Residential site.

The Central Legal Office had confirmed that they would be in a position to provide the necessary assurance that the transaction met the requirements of the Scottish Government Health Directorates – Property Transactions Handbook and the price structure indicated an estimated capital receipt of £1.37 million. This price had been agreed and supported by the Board's property advisers and independent adviser and included provision to protect the Board should the property market recover.

Ms Dhir indicated that she was pleased to see the partnership approach come together and Mr Calderwood advised that Members would be aware that this was a key part of the proposals for the west sector which had an impact on St Margaret's Hospice. The proposed development for this area addressed a deficit within the west sector of Glasgow and it was an attempt to provide the right type of beds, within the right area. There was support from the City Council and local politicians and the West Glasgow CHCP were pleased to see the fruition of a valuable resource within this area of the west of the city.

In response to a question from Mr Winter, it was explained by Ms Anderson that the land transaction negotiations were attempting to try and cap the impact of any site abnormals should they be identified by the developer when they were able to carry out their full site tests. Mr Winter was pleased to have the assurance that there was a valuing mechanism in place for the extent of any abnormals identified within the site.

Mr McLaughlin was keen to understand the communications aspect of this proposal and Mr Calderwood advised that he was meeting with Ms Harkness shortly to ensure that St Margaret's Hospice were aware of the decision and of the consistency with the approach agreed by the Board in February 2009. He was keen to continue to try and engage St Margaret's in discussions about providing services for a different client group but that had proven difficult thus far. Members hoped that efforts would continue to be made to try and work with St Margaret's Hospice recognising the changes taking place.

DECIDED:

1. That the transaction as outlined on the understanding that Missives for the sale of Blawarthill Hospital be concluded by 31 January 2010 be approved. **Director of Rehabilitation and Assessment**

2. That the transaction was dependent on the NHS Board agreeing a 5-year bed contract with the developer and Glasgow City Council agreeing a 5-year care home contract with the developer and their nominees be noted. **Director of Rehabilitation and Assessment**

3. That the transaction also required that a specification was agreed with Yoker Housing Association for the sheltered housing aspect of the development be noted. **Director of Rehabilitation and Assessment**

4. That the proceeds from the sale would not be received until 2012/13 be noted. **Director of Rehabilitation and Assessment**

**69. TAXI CONTRACT**

There was submitted a paper [Paper No. 09/46] by the Director of Finance which set out the current position with regard to the taxi contract for NHS Greater Glasgow.

Immediately prior to the NHS Board meeting on 18 August 2009 further disclosures were made to officers of the NHS Board by Strathclyde Police. As a result, the NHS Board decided that the award of a contract for taxi services for Greater Glasgow to Network Private Hire Ltd (NPH) be granted conditional approval and asked the officers of the Board to establish whether the additional information was materially significant.

There was a full discussion of the additional information provided by Strathclyde Police, NPH, and Counsel Opinion. In the course of the meeting, deep reservations were expressed at the award of a contract to NPH in the light of the information which had been provided by Strathclyde Police. Board Members expressed their support for the aims of Strathclyde Police in seeking to tackle the issue of serious and organised crime. However, there was also concern that based on the legal framework within which the Board was required to operate in procuring of services; the very clear legal advice and the potential high risk of legal action and substantial damages, the Board had a clear responsibility to award the contract. The Performance Review Group decided that a further paper should be provided to the full NHS Board, setting out these issues.

DECIDED:

That the issue of the Taxi Contract be referred to a meeting of the full NHS Board which it was hoped could be arranged for 17 November 2009. **Chief Executive**

**70. COMMUNICATION ISSUES: 16 SEPTEMBER TO 27 CTOBER 2009**

There was submitted a paper [Paper No. 09/47 from the Director of Corporate Communications covering communication actions and issues from 16 September to 27 October 2009.

Mr McLaws highlighted the following:-

- The preparation of a draft plan covering both internal and external communications to ensure the local public were made aware of the existing and new services being provided at the Vale of Leven Hospital.

- He expressed concerns that local newspapers in the area were portraying a very negative view of the Vision for the Vale of Leven and that some local campaigners were diving the negative comments without due regard being given to the positive support for the future services from the Government, the NHS Board and the Local Authority. He said that meetings were planned with senior newspaper editors/managers to discuss how best to achieve more balanced coverage of the ongoing developments on the Vale of Leven campus and would involve senior representatives from the Council.

- The support provided to the staging of the Annual Review on 19 October 2009 where over 300 members of the public attended the afternoon session and participated in the question and answer session which ran from the planned 30 minutes to one hour and 15 minutes.

- The official opening of the Dental Suite at Greenock Health Centre by Shona Robison, Minister for Public Health.

- The setting up of a webcam at the Southern General Hospital site to provide images of the new multi-storey car park and beginnings of the work of the new Children's Hospital and new adult acute facility.

- The launch of the NHS Credit Union by the Cabinet Secretary for Health and Wellbeing. Mrs Smith wanted to take the opportunity of thanking Mr McLaws and his team in her position as Chair of the NHS Credit Union and was delighted at the arrangements around the management of the event and formal launch by the Cabinet Secretary.

- The launch of the Influenza H1N1 Vaccination Programme from the new Victoria Hospital by the Cabinet Secretary with every national title and broadcaster in attendance.

- The Winter Health and Annual Review/Report edition of the Health News was in the final stages of production and when printed, would be inserted into the Herald, Evening Times and Sunday Herald and also distributed through the Board's normal distribution network. This was an integrated Communication Strategy which would see the production of a local winter patient booklet to coincide with the national winter health campaigns.

NOTED

**71. DATE OF NEXT MEETING**

The next meeting of the Performance Review Group will be held at 9.30 am on Tuesday, 19 January 2010 in the Board Room, Dalian House, 350 St. Vincent Street, Glasgow, G3 8YZ.

The meeting ended at 12.45 p.m.

# Greater Glasgow & Clyde NHS Board

## Performance Review Group

**03 November 2009** **Paper No. 09/43**

**Report of the Director of Acute Services Strategy, Implementation and Planning**

# Approval of New South Glasgow Hospitals & Laboratory Project

**RECOMMENDATIONS**

The Performance Review Group is asked to approve:

a) the appointment of the preferred contractor Bidder 1 for the following project stages:

Stage 1 – The design and construction of the new Laboratories (subject to Scottish Government Health Directorates Capital Investment Group approval of the Full Business Case)

Stage 2 – Detailed design of the New Adult and Children's Hospitals

Stage 3 – Construction of the New Adult and Children's Hospitals and

Stage 3A - Demolition of the Surgical Block and associated buildings and completion of the soft landscaping.

Noting that at the end of stage 2 (when the Full Business Case for the New Hospitals will be considered for approval by the NHS Board) there is a break-point in the contract.

b) the Full Business Case for the Laboratories component of the Project (Stage 1), subject to Scottish Health Department Capital Investment Group approval.

## 1. Progress Update

### 1.1 New South Glasgow Hospitals

The sections below provide an update on progress with the Project since approval of the Outline Business Case (OBC) by Dr Kevin Woods, Director-General Health and Chief Executive NHSScotland in May 2008.

Board members will recall that the Director of Acute Services Strategy Implementation and Planning and the Project Director have updated them on the progress of the project since approval of the OBC in May 2009. These updates included:

| | |
|---|---|
| 16th September 2008 | Approval of Procurement Strategy |
| 20th January 2009 | Update on Gateway Review |
| 19th May 2009 | Update on the Tender process and next steps |
| 7th July 2009 | Tender Process – Status Update |

Members of the Board's Evaluation team will be in attendance at the meeting and will provide a presentation on key aspects of the evaluation of the three bidders tenders. The presentation will focus on design, quality and quantitative evaluation, legal and contractual considerations and affordability. Those attending will be:

| | | |
|---|---|---|
| Alan Seabourne | Project Director – New South Glasgow Hospitals & Labs | NHS GG&C |
| David Hall | Divisional Director | Currie & Brown |
| Douglas Ross | Director | Currie & Brown |
| Jim Crombie | Director of Surgery and Anaesthetics | NHS GG&C |
| Michael McVeigh | Assistant Director - Infrastructure Advisory | Ernst & Young |
| Peter Gallagher | Finance Director | NHS GG&C |
| Rhona Harper | Partner, Projects | Shepherd & Wedderburn |

**Outline Business Case and appointment of the Technical Adviser Team**

The OBC for the New South Glasgow Hospitals and Laboratory was approved by the Scottish Government in May 2008.

Following a tender process a new Technical Adviser Team, Currie & Brown, was appointed in September 2008. Their role has been to assist the Board in preparing the technical and other information required to take the Project to market and to assist in the evaluation of the bids. They will work with the Board and successful bidder in the development of the scheme through to completion of the build.

**Gateway 2 Review**

In January 2009, the Project underwent a Gateway 2 Review. The review investigated the assumptions in the OBC and the proposed approach for delivery of the project including details of the proposed procurement route, project methodology and plans for implementation.

The review found that the Project had taken a very robust approach to identifying a suitable procurement route with advice and input from legal, financial and technical advisers and the market. The Gateway Review report also highlighted that the prudent financial planning in the OBC meant that the Project was as well positioned as possible to manage the uncertainties of the prevailing economic climate.

**Taking the Project to Market**

Notification of the Project was placed in the European Journal in February 2009 and attracted a significant level of interest. Five potential bidders participated in a pre-qualifying questionnaire process from which three were short listed on the basis of their demonstrative ability to construct a healthcare project of this scale and complexity.

The five bidders were:-

- Balfour Beatty Group Limited
- Brookfield Europe LP
- FCC Elliot Healthcare Ltd
- Laing O'Rourke Construction Limited
- Miller Construction UK Ltd

The evaluation of the pre-qualification questionnaire identified the following three bidders to be taken forward to the tender stage of the project:

- Balfour Beatty Group Limited
- Brookfield Europe LP
- Laing O'Rourke Construction Limited

**Development of the tender documentation**

Between September 2008 and April 2009, the Project Team and Technical Advisers worked with users, legal and financial advisers and others, preparing the clinical, technical and other information required to take the Project to market. This information formed the tender documentation which informed bidders of the NHS Board's requirements.

The tender documentation constituted 3 volumes as follows:-

Volume 1 Project Scope and Commercial Document

This provided an overview and outlined the scope and commercial parameters of the Project. It set out the background to the Project, outlined the detailed procurement process and timetable, identified the competitive dialogue process and incorporated the draft construction contract.

Volume 2 Employer's Requirements

This set out the technical and clinical requirements of the Board. These included Clinical Output Specifications for all departments, master plan and exemplar design information, output specifications regarding the construction works, building and engineering services to be provided plus Activity database (ADB) Room Data Sheets and Equipment Lists (by Group).

Volume 3 Bid Return and Evaluation

This detailed the range of deliverables required from bidders and the evaluation strategy and scoring approach to be applied by the Board.

**Exemplar**

Key aspects of the Employer's Requirements (ER) were an Exemplar of the Hospitals to Royal Institute of British Architects (RIBA) Stage C, Schedule of Accommodation and Clinical Output Specifications. The Exemplar was developed with input from User representatives from significant elements of the 90 specialties/Departments which will be housed within the New Adult and Children's hospitals.

The Exemplar involved development of 1:500 block plans for the Adult and Children's Hospitals, a number of 1:200 detailed design plans and 1:50 room information. The following describes this in more detail.

The 1:500 block plans demonstrate:

i) the clinical adjacencies required for the key specialties;
ii) flows of visitors, patients, staff and Facilities Management through the building;
iii) the clinical links required between the new hospitals and the Neurosciences Institute and Maternity buildings.

User Groups worked with the Board's Project Team and Technical Advisers to develop detailed 1:200 departmental layouts for 8 major clinical Department/areas, these being: Emergency

Department, Theatres, Critical Care, Imaging, Wards, Acute Assessment Unit in the Adult Hospital and Imaging and Emergency Department for the Children's Hospital. The detailed design plans illustrate how the department might be laid out and the flows for patients, staff and Facilities Management (FM) within it.

1:50 room information was developed using the ADB activity database which is a standard database for all UK hospitals showing general arrangements of standard rooms and suggested positions and location of equipment.

**Outline Planning Permission**

The Outline Planning Application was submitted to Glasgow City Council on 13 April 2007. The application was considered at the Glasgow Planning Committee meeting held on 15 January 2008 and received conditional approval subject to the Section 75 legal agreement (which identifies additional external works that may be required to reduce any adverse impact on the surrounding area by the completion of the project such as road layouts/junctions or traffic controls, etc.) this agreement was concluded in July 2009. Full Outline Planning Consent has now been achieved as a result.

**Tender Process**

The tender documentation, as previously described, was issued electronically to the bidders on 01 May 2009 stipulating that bids were to be returned by noon on Friday 11 September 2009, following the competitive dialogue process.

**Competitive Dialogue**

Competitive Dialogue commenced on 11th May 2009. This involved a series of 16 scheduled meetings with each of the three bidders to discuss and clarify the Board's requirements in four main areas of the project:

i) Design;
ii) Site Logistics;
iii) Laboratories;
iv) Commercial.

Four corresponding Groups were formed to represent the key areas with members from a range of stakeholders and advisers including Board Representatives, Medical, Nursing, FM and infection control representatives and Technical, Legal & Financial Advisers.

The bidders were represented from their own internal teams and their associated partners.

As part of the dialogue process the bidders formulated the agenda items based on their need to clarify any aspects regarding the tender documentation/project. The agenda items were discussed and subsequently action/query lists were drawn up and responded to within agreed timescales. A Request for Information (RfI) process was also operated whereby bidders sent questions for clarification to the Board.

Through the process described above bidders were given clear and detailed direction on the Board's requirements. The Competitive Dialogue concluded on 14 August 2009 following a bidder presentation and final feedback and direction from the Board.

## 1.2 Laboratories

The proposals for the construction of a purpose built multi disciplinary laboratory building on the Southern General Hospital site was part of the recommendations contained in the Glasgow Laboratory Service Modernisation Strategy approved by the NHS Board at the meeting held on 24 October 2006.

The key objectives of the laboratory services review process were:

i) To define and develop an agreed configuration for provision of lab services across the city which reflects the Acute Services Strategy – consolidating from six to two major emergency and in-patient acute sites at Glasgow Royal Infirmary and Southern General Hospital; a third in-patient site including the West of Scotland regional cancer centre at Gartnavel General Hospital, the new Stobhill and Victoria Ambulatory Care Hospitals, and the co-location of paediatric with obstetrics on an adult site.

ii) To modernise the provision of laboratory services.

iii) To create a network of laboratory services working Pan-Glasgow, operating within a single integrated management structure**.**

Following approval of the Strategy, a Project Board was established, chaired the Director of Diagnostics. This group reported, initially, to the Acute Services Review (ASR) Programme Board and then to the New South Glasgow Hospitals and Laboratory Project Executive Board. Membership of the New South Glasgow Hospitals and Laboratory Project Board included the Clinical Director for Diagnostics.

The laboratory building includes the following specialties/departments:

i) Biochemistry;
ii) Haematology;
iii) Microbiology;
iv) Mortuary Services including the City Morgue;
v) Pathology;
vi) West of Scotland Medical Genetics.

The Laboratory building has been designed to RIBA Stage D which means that the design brief has been agreed and the initial requirements developed. This has enabled the structural and building services to be signed off, and a preliminary cost plan estimated. The departmental layouts have also been drawn and signed off by Users Groups. The User Groups have included strong clinical representation.

The Planning Application for the laboratory complex was submitted for approval to Glasgow City Council on 17 July 2009 and a meeting to discuss the detail is planned for November 2009.

The Laboratories Full Business Case is currently in extant draft form, but members will be able to obtain a copy of the final document on the 2nd of November 2009 at the meeting. Only presentational changes will be made to the document and no factual changes.

## 2. Quality Evaluation Process

The detailed process to evaluate the bids submitted was set out within the "Invitation to Participate in Commercial Dialogue Volume 3: Bid Deliverables and Evaluation" (Appendix 1). This was issued to the bidders on 01 May 2009 as part of the Employer's Requirements.

Three bids were received on 11 September 2009 and following formal receipt and recording were initially checked for completeness.

To ensure that the Evaluation Team complied fully with the process as outlined, training workshops for the evaluators were held in advance of the tender return date.

An Evaluation Centre was established at Gartnavel Royal Hospital, providing a secure base from which to manage and undertake the process. All members of the Design and Logistics groups (Appendix 2) co-located to this Centre for the full 5 week duration, thus ensuring interaction between individuals and Groups was possible at all times.

A detailed evaluation programme was produced for the Team in advance, setting out the key actions and dates for the Groups and a copy is attached (Appendix 3).

Areas covered by the evaluation, as set out, were:

i) Design;
ii) Logistic;
iii) Commercial.

The outputs of the Design and Logistics sub-groups were reviewed, for consistency of approach, scoring and reasoning, by Senior Managers in the first instance and then by the Commercial Group.

The tender prices submitted were first assessed for errors, inconsistencies, exclusions and caveats, then equalised to adjust for bid allowances and missing items. The out turn adjusted bid prices reflecting the estimated target were then calculated.

The Most Economically Advantageous Tender (MEAT) scores , calculated as a ratio of quality and price were then generated using the full quality score and the adjusted bid prices, with a higher score representing better Value for Money.

The conclusions of the Evaluation Group were presented to the New South Glasgow Hospitals & Laboratories Project Executive Board on Thursday 22 October 2009, which included the attendance and involvement of the Chair, Vice Chair and Non Executive Member of the NHS Board. Consequently on 26 October 2009 the Project Executive Board considered the comments from the meeting on 22nd October and formally endorsed the outcome and recommended that it be submitted to PRG for approval.

As the NHS Chair is unable to be present at the PRG meeting, please find attached a paper he had prepared following the Project Executive Board meeting on 22nd October 2009 for inclusion with the papers for this matter and sets out his conclusions on the process. (Appendix 4)

## 3. Financial Evaluation

The requirement to select the successful bidder on the basis of the Most Economically Advantageous Tender (MEAT), requires the board to consider the financial aspects of the bidders proposals. MEAT has been defined in this process, and discussed with bidders, as the offer that provides the greatest ratio of quality points for each pound of price.

The pricing structure which bidders were required to follow is set out in the NEC 3 suite of documentation. This is an industry standard form of contract familiar to all bidders.

Key elements of the financial evaluation are

- The target and maximum price offered by bidders, and in particular the affordability
- The bidders proposals for sharing both cost under and over spends (Pain/Gain)
- The risks identified by bidders that may impact upon the final price paid.

The evaluation methodology also required the consideration of risks retained by NHSGGC. These have been identified separately by NHSGGC and are considered as broadly equal across each of the bidders.

### 3.1 Target and maximum price

Bidders were required to submit a price for the work which they believed to be the most realistic outcome, and against which their final price could be referenced for pain/gain purposes. This is discussed further below.

In order to protect the affordability position of the board, and to provide a strong incentive for cost control throughout the contract period, bidders were also required to provide a maximum price, above which NHSGGC would not be required to make any further payment.

The degree of uplift between the bidders proposed target and maximum prices is a measure of their confidence in pricing and the degree to which they are prepared to absorb cost overruns, and therefore is an important qualitative aspect of their pricing proposals.

### 3.2 Pain/Gain Assessment

Bidders were required to submit their proposals for how they would share cost overruns (Pain) and cost savings (Gain) with NHSGGC. This reflects the estimated nature of the target price and the reality of variations in costs.

Ultimately the pain/gain proposals determine the final price payable by the board and as such are an important element of calculating the expected outturn price upon which the appointment decision is to be made. The pain/gain sharing percentages can be seen as measure of the bidders' confidence in pricing, in particular where in the case of one bidder they sought substantially reduced contributions from NHSGGC as cost over runs increased.

### 3.3 Risk Assessment

In order to understand and assess the factors that may lead to cost savings or overruns, bidders were asked to submit detailed risk registers setting out the likelihood, potential impact and mitigating factors of pricing risks.

This data was then subject to statistical analysis in order to establish the expected outturn price of the bidders' proposals. This analysis considered both risks and the action of the pain/gain and maximum price mechanisms.

### 3.4 Conclusions of the Financial Analysis

In summary the financial analysis found that

- All the bids received were within the affordability limits set by NHSGGC
- That only one bidder offered the opportunity of less than 50/50 sharing of costs overruns reflecting their confidence in their pricing
- That the bids submitted by bidders 1 and 3 offered a high degree of certainty around pricing when risks were statistically assessed. Bidder 2 however, as the result of its consideration of a fewer, larger risks, offered a less certain price outcome
- Based upon the statistical analysis there is realistically no prospect of price outturns occurring that would change the order of preference for bidders proposals.

### 3.5 MEAT Scores

The MEAT scores are as follows:

| | |
|---|---|
| Bidder 1: | 417.2 |
| Bidder 2: | 369.6 |
| Bidder 3: | 377.5 |

Due to commercial sensitivities the names of the Bidders have been kept confidential at this stage. There will be tabled at the beginning of the PRG meeting on 3rd November 2009 information for each Member identifying each Bidder by name.

## 4. Programme

The Project will be undertaken in the following stages:

| | | Start | Finish |
|---|---|---|---|
| Stage 1: | Design & Construction of New Laboratories | Q1 2010 | Q1 2012 |
| Stage 2: | Detailed Design of Adult's, Children's and Infrastructure to FBC | Q4 2009 | Q4 2010 |
| Stage 3: | Construction of Adult's, Children's and Infrastructure. | Q4 2010 | Q1 2015 |
| Stage 3A: | Demolition of Surgical Block & associated buildings and completion of soft landscaping | Q3 2015 | Q3 2016 |

## 5. Affordability

### 5.1. <u>Capital Affordability</u>

The total funding requirement associated with the provision of the new Adult and Children's Hospitals, as identified within the Outline Business Case, was £841.7m. It was planned that this would be sourced by combining the following sources of capital funding to create a funding pot capable of financing total capital expenditure of £841.7m.

1) Specific allocation of capital funds by SGHD (£551.7m)
2) Endowment funds (£20m)
3) Capital receipts (£135m)
4) Annual capital resource allocations (£135m)

The capital cost provision incorporated within the Outline Business Case allowed for a maximum price bid of £621m, excluding VAT, for the construction of the two new hospitals including laboratories, leaving a residual provision for optimism bias (ie general contingency) of £46m, in respect of further design development. This was regarded as reasonable in the light of the scale and stage of development of the capital scheme. A target price of £590m was also set. If achieved, this would increase the residual provision for optimism bias (ie general contingency) to £81m.

The maximum price and the target price offered by the proposed bidder both sit comfortably within the target set by the Board enabling the Board to embark on the implementation phase of the project with an increased level of contingency than had been set aside within the Outline Business Case.

In terms of funding sources, SGHD have reaffirmed their commitment to make available £551.7m as a specific allocation of capital funding. In addition, it continues to be reasonable to assume that £20m can be sourced from general Endowment Funds, with total Endowment Funds currently standing at approximately £75m. However, the previous forecast of £135m capital receipts from the disposal of sites to be declared surplus over a 10 year period to 2017/18 has been scaled back to £106m. This reflects current property market conditions and takes account of updated projections carried out by the Board's Property Advisers. This reduction is offset by an equal but opposite increase in the amount of general capital funds which the Board plans to release from its routine annual allocation of capital funds over the period to 2015/16. This now stands at £164m.

Looking forward, the scope for extending the release of general capital funds beyond the current planned level is likely to be constrained by the scale of the Board's capital plan, also by the likelihood of a general tightening in future capital funding availability. In this light, the aforementioned increase in the level of general contingency is welcome, as it will provide some potential additional flexibility to the Board in managing capital expenditure within the envelope of funding available to the project.

**5.2. Revenue Affordability**

The Outline Business Case identified a revenue cost commitment of £59.5m as the total step up in annual revenue costs associated with establishing the new Adult and Children's Hospitals (£53.8m), together with related enabling capital schemes (£5.7m) where the capital cost is funded by the Board's general capital funding allocation. The Outline Business Case also identified internally generated cost savings as the primary source of revenue funding which the Board would use to fund the additional recurring revenue costs of two new hospitals and enabling schemes within the context of its ten year financial plan.

At OBC stage the Board had identified £45m of future cost savings, specific to its existing Acute Services cost base, which were capable of release to fund the anticipated step up in annual revenue costs. These comprised savings in operational and accommodation costs, including property maintenance and capital charges costs. With the exception of £3m, representing those capital charges cost savings which have been released to date within the context of the Board's current financial plan, this cost savings pool remains intact and can be realistically expected to contribute £42m towards affording the future revenue cost step up of the two new hospitals.

In the light of the target price/maximum price being offered by the preferred bidder, it is not unreasonable to anticipate a reduction of between £2m - £4m on the original estimated capital charge costs of the two new hospitals. In addition, the annual costs of operating the laboratories element of the project have now reduced by some £2m. This is attributable to a changed approach to reprovision which no longer requires accommodation to be leased and also to a review of operating costs and income assumptions. The impact of the two changes above contributes a further £5m towards funding the two new hospitals, demonstrating the progress which the Board has made since the OBC was approved in identifying the requisite level of funding to cover the operating costs of the two new hospitals and the related capital schemes.

During the lead-in period to the establishment of the new Adult and Children's Hospitals, the Board will continue to work on the development of further cost savings schemes within the context of its annual financial planning process, aiming to generate a further £12m of cost savings over a 4 year period. This will be ring-fenced, along with cost savings from the Acute specific cost savings schemes as these are released to secure the funding sources required to meet the operating costs of the new hospitals.

**Note:**

There is a possibility that SGHD may change the existing capital charge costs regime with effect from 1 April 2010 by eliminating the current practice whereby Health Boards are required to account for a 3½% notional finance charge each year on net assets held. If SGHD were to implement this change, it would potentially have a significant positive impact on the revenue costs of the project as the step up in revenue costs of £59.5m is almost exclusively related to capital charges (ie depreciation plus 3½% notional finance charge). The impact of removing the 3½% notional finance charge would be to reduce the anticipated net step up in revenue costs by an estimated minimum amount of £20m.

## 6. Recommendation

The Performance Review Group is asked to approve:

c) the appointment of the preferred contractor Bidder 1 for the following project stages:

Stage 1 – The design and construction of the new Laboratories (subject to Scottish Government Health Directorates Capital Investment Group approval of the Full Business Case)

Stage 2 – Detailed design of the New Adult and Children's Hospitals

Stage 3 – Construction of the New Adult and Children's Hospitals and

Stage 3A - Demolition of the Surgical Block and associated buildings and completion of the soft landscaping.

Noting that at the end of stage 2 (when the Full Business Case for the New Hospitals will be considered for approval by the NHS Board) there is a break-point in the contract.

d) the Full Business Case for the Laboratories component of the Project (Stage 1), subject to Scottish Health Department Capital Investment Group approval.

## VOLUME THREE

## BID DELIVERABLES AND EVALUATION

**Contents**

**1.0 Introduction**

**2.0 Selection Procedure and Evaluation Criteria**

**3.0 Bid Deliverables**

**4.0 Submission of Bids**

**Appendices**

**Appendix A Bid Deliverables**

**Appendix B Qualitative Scoring Schedule**

**Appendix C Legal Evaluation**

**Appendix D Financial Evaluation**

**Appendix E Board Evaluation Process / Structure**

**Appendix F Certificates**

## 1.0 Introduction

1.1 This Volume of the ITPB sets out the Bid Deliverable Requirements and the Bid Evaluation Process.

## 2.0 Selection Procedure and Evaluation Criteria

### 2.1 Introduction

The Tender Return Date is for submissions relating to this Project is 11 September 2009. In terms of the Public Contracts (Scotland) Regulations 2006 (as amended), which implement EU directives into UK law, the Board will award the contract on the basis of the most economically advantageous Bid.

The Board must be satisfied that the proposed solution offers value for money and meets the Board's affordability criteria and minimum requirements for the Project. This will be determined by reference to the bid submission requirements in the Appendix A of Volume 3 of this ITPD and the evaluation criteria set out in Section 2.3. Having undertaken a detailed pricing analysis of the exemplar design, the Board has produced a "should cost" figure for the Project of £590M. The Board believes that this is a robust target for the pricing of the Project and expects bids to be received which meet or better this price. This figure has provided the basis for the Board's budget allocation for design, construction and risk.

Separately, the Board has an affordability ceiling of £621M and reserves the right to reject any bid submission that exceeds this figure

### 2.2 Evaluation Team

A team composed of individuals with relevant knowledge and expertise will carry out the evaluation of technical and commercial submissions. The Evaluation Team will comprise relevant individuals from the Board, Technical, Legal and Financial Advisors, and representatives from the Board. A Team Leader shall be appointed to co-ordinate the review of the bid submissions under the following sections:-

- Design Group
- Site Logistics Group
- Laboratories Group
- Commercial Group

### 2.3 Evaluation Methodology

The bid evaluation process is outlined as follows:-

- *Stage 1 - Compliance & Completeness Review*

Each bid submissions will be subject to an initial compliance and completeness review. This initial review will not involve a qualitative assessment of a Bidder’s proposals but will simply check whether or not the submission requirements of the ITPD have been satisfied. Any omissions will be notified to the Team Leader via a Compliance & Completeness Review Schedule and forwarded to the Project Director. All requests for missing information will be made to Bidders from the Project Director and requested information should be provided within 7 days of request.

The Financial Evaluation Team will undertake a high level review of the priced bids and any bid above the maximum affordability threshold may be discarded at this initial stage.

At this stage the Board reserves the right to either reject any non-compliant or substantially incomplete Bids or request further information from the Bidder to address any such non-compliance or shortcomings with the Bid.

- *Stage 2 – Bid Evaluation*

In order to determine the bid that represents the Most Economically Advantageous Tender, each bid will be subject to the following process:-

1. A detailed scoring evaluation will be undertaken in accordance with the Bid Evaluation Schedule included in Appendix B and the scoring matrix below to determine the Qualitative Score. Further detail on the Board's approach to the evaluation of the Bidders' responses on the draft Contract and ancillary matters is set out in Appendix [C].

| Scores | Value | Description |
|---|---|---|
| Excellent | 9 - 10 | Performs significantly well on all key factors and offers substantial additional benefits |
| Good | 7 - 8 | Performs well on all key factors and offers some additional benefits |
| Adequate | 5 - 6 | Passes thresholds on all key factors but offers few additional benefits |
| Poor | 3 - 4 | Fails to meet threshold on some key factors |
| Very Poor | 2 | Fails to meet threshold on majority of key factors |
| Unacceptable | 1 | Fails to meet threshold on all key factors |

2. Pricing evaluation will be carried out, based on price / risk scenario modelling to assess the most likely final outturn price to the Board. This process aims to evaluate the true cost of the bids to the Board and reflect a comparable risk position between bids. The expected outturn price will be determined based on cost modelling of bid submissions with the assessed impact of Board retained risk. Modelling will consider scenarios to establish the expected outturn price by reference to the bidders price submissions, priced risk registers for contractor accepted risk and board retained risk, and the pain / gain ratios.

3. A Value for Money / Most Economically Advantageous Tender assessment will follow, the outcome of which will be determined by dividing the Qualitative Score by the expected outturn price (MEAT Score).

   The outcome of the calculation performed in accordance with Paragraph 3, above, will identify a provisional combined ranking of the tenders assessed. The MEAT Score for each bidder should aim to achieve a minimum overall level [as determined with reference to the Board's indicative MEAT Score, which is calculated by dividing baseline requirements of Volume 3 Employer Requirements by the "should cost" figure in Section 2.1], i.e. 400.

   There will then be a final meeting of the evaluation team to agree that the provisional ranking is robust. The outcome of this meeting will form the basis of a recommendation to the Board as to which tender is the most economically advantageous. Subject to Board approval, the Contract will be awarded to the Bidder who submits this tender.

As part of the evaluation process the Board reserve the right to convene meetings with the Bidders in order to clarify any part of the bidders submission where the proposals are considered to be unclear.

The Board also reserve the right to request the bidders to attend an Interview / Presentation in order that the Bidder can fully explain his design proposals, management procedures, construction methodology, and any other matter considered relevant to the Board. The Interview / Presentation will not form part of the bid evaluation process.

Further details on the Evaluation Process / Structure is included in Appendix E.

## 1.0 Bid Deliverables

The bid deliverables to be submitted by bidders for are set out in Appendix A

## 2.0 Submission of Bids

The format of the bid submissions shall be as follows:-

- Separate volumes or sections for each of the Bid Deliverable categories identified in Appendix A
- Front Cover for each Volume noting
  - New South Glasgow Hospitals Project
  - Volume Nr & Bid Deliverables Sections
  - Bidder Name & Logo
- General text minimum font size 10pt
- A4 or A3 paper size (A0 drawing size will be acceptable if folded to A3 size)
- Each page to have Header with – New South Glasgow Hospitals Project & Bidders Name (no Company logo)
- Each page to have Footer with – Volume Nr and Page Nr
- 2 or 4 hole punch Lever Arch Folders
- A1 or A0 Drawings folded and contained in plastic folders within appropriate volume

# Appendix A Bid Deliverables

**NEC3 CONDITIONS OF CONTRACT - CONTRACT DATA PART 2 – DATA PROVIDED BY THE CONTRACTOR**

The Bidders tender submission require to be a full and comprehensive response to the Works Information (Employers requirements) clearly demonstrating compliance, and as a minimum requires the following information to be submitted.

| Section | Submission | Checklist |
|---|---|---|
| **1.0 Accommodation Schedule** | | |
| 1.1 | Net Area – room by room, including all ducts, pipe boxing and service zones | |
| 1.2 | Circulation area | |
| 1.3 | Communication & plant space area | |
| 1.4 | Total Gross Floor Area | |
| **2.0 Drawing Information** | | |
| 2.1 | 1:500 scale Masterplan proposals, indicating the following information:-<br>▪ Communication routes into and out of the site & buildings for<br>o Vehicles<br>• Public transport (Buses & fastlink)<br>• Private cars<br>• Taxis<br>• Ambulances<br>• Services Vehicles<br>• Cycles<br>o Pedestrians<br>• Patients<br>• Visitors<br>• Staff<br>▪ Planning restrictions affecting the development and modifications to highways, response to specific local authority planning requirements<br>▪ Orientation of buildings and relationship to other buildings and infrastructure on the site<br>▪ Hard & soft landscaping proposals<br>▪ Car Parking arrangements with distribution of spaces and use identified<br>▪ Areas of differing Carriageway Construction<br>▪ Road, footway and cycle way geometry<br>▪ Indicative Signalised layouts at external roads<br>▪ Main access points to buildings (existing & proposed)<br>▪ Major service routes<br>▪ Response to the surrounding and wider urban context<br>▪ Phasing plans / temporary works plans for the implementation of roads and drainage infrastructure | |
| 2.2 | 1:500 departmental relationship drawings for all levels indicating functional relationships, main circulation routes and FM flows. | |
| 2.3 | 1:200 departmental layouts (minimum 11nr) indicating the following information:-<br>▪ Room adjacencies<br>▪ Circulation layouts<br>▪ Corridor widths<br>▪ Door widths<br>▪ Communication routes / wayfinding<br>▪ Entrances<br>▪ Egresses | |

| | | |
|---|---|---|
| | ▪ FM flows (in and out) and distribution | |
| 2.4 | 1:200 departmental drawing for Accident & Emergency Department,<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection<br>▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations | |
| 2.5 | 1:200 departmental drawing for Adult Theatres Department, fully annotated to indicate :-<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection<br>▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations | |
| 2.6 | 1:200 departmental drawing for Adult Ward, fully annotated to indicate<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection<br>▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations | |
| 2.7 | 1:200 departmental drawing for Childrens Ward, fully annotated to indicate<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection<br>▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations | |
| 2.8 | 1:200 departmental drawing for Childrens A&E Department fully annotated to indicate<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection<br>▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations | |
| 2.8a | 1:200 drawing(s) for FM departments (other than FM areas in the laboratory building) fully annotated to indicate<br>▪ floor finishes<br>▪ ceiling finishes<br>▪ wall finishes<br>▪ door types & ironmongery<br>▪ wall protection | |

| | | |
|---|---|---|
| | ▪ Lighting proposals<br>▪ CCTV locations<br>▪ door entry locations<br>▪ storage provision and proposals<br><br>This to address (as a minimum) FM offices, staff changing, catering/kitchen, FM stores and holding, AGV holding and distribution areas. | |
| 2.9 | 1:50 room layout and wall elevations fully developed for the rooms included as part of the Employers Requirements indicating:-<br>▪ room size and useable floor space<br>▪ room shape and compliance with ergonomic data and minimum critical dimensions<br>▪ room elevations<br>▪ reflected ceiling plans<br>▪ access points / locations of doors and windows<br>▪ location of utilities, engineering and specialist services<br>▪ location of equipment | |
| 2.10 | 1:500 Fire Strategy drawings & Fire Strategy Report indicating the following information:-<br>▪ Strategic plans, highlighting evacuation strategies and staff implications in the event of fire<br>▪ Specialist Fire Engineer's Report providing a clear understanding or risk and protection measures<br>▪ Outline of principles adopted underlying approach to fire safety indicating compliance with Employers Requirements, NHS Firecode and Technical Standards | |
| 2.11 | 1:200 Elevations – incorporating external signage proposals | |
| 2.12 | 1:200 Roof plan indicating the following<br>▪ Form<br>▪ Materials<br>▪ Helipad proposals | |
| 2.13 | 1:200 Exemplar sections indicating the following:-<br>▪ Floor to floor heights<br>▪ Floor to ceiling heights<br>▪ Architectural vision – space, height, form, composition, scale, character and use of materials<br>▪ Consideration of patient environment – natural light, views etc | |
| 2.14 | 3D images / perspective (internal & external) indicating the following:-<br>▪ Architectural vision – space, height, form, composition, scale, character and use of materials | |
| 2.15 | Hospital Main Entrance / atrium / public space proposals / visuals | |
| 2.16 | 1:500 site hard & soft landscaping proposals indicating:-<br>▪ Soft landscaping strategy<br>▪ Hard landscaping strategy<br>▪ Car Parking arrangements with distribution of spaces and use identified<br>▪ Areas of differing Carriageway Construction<br>▪ Road, footway and cycle way geometry<br>▪ Indicative Signalised layouts at external roads<br>▪ Retention / protection of existing trees<br>▪ Incorporation of art<br>▪ Special features<br>▪ Courtyards | |

| | | |
|---|---|---|
| | ▪ External lighting and CCTV locations and coverage | |
| 2.17 | Typical Sections and details to appropriate scale showing:-<br>Carriageway Construction<br>Footway / Cycleway Construction | |
| 2.18 | 1:1250 (or greater) plans showing :-<br>▪ Drainage provision in support of SUDS and Drainage Strategy | |
| 2.19 | 1:500 scale plans showing:-<br>▪ Layout of roads and buildings<br>▪ Layout of sewers, outfalls, underground storage, and SUDS features | |
| 2.20 | Finishes Schedule for 10 Nr Departments (other than those identified above for detailed 1:200 drawing submissions) and key circulation & communication routes, and main entrances | |
| 2.21 | Door & ironmongery Schedule for 10 Nr Departments (other than those identified above for detailed 1:200 drawing submissions) and key circulation & communication routes, and main entrances | |
| 2.22 | Outline design drawings demonstrating structural philosophy and should include as a minimum:<br>▪ Foundations: Typical layout and detail of proposed solution<br>▪ Basement: Outline construction detail; plan of slabs, sections of retaining walls<br>▪ Ground level slab: Typical layout and details<br>▪ Podium level floor: Typical layout and details, transfer structures<br>▪ Ward level floors: Typical plan layout indicating slab and supporting structure, (columns, beams), core layout (stability elements)<br>▪ Roof level: Typical layout indicating structure, including helipad (Acute Adults & Childrens) | |
| 2.23 | 1:200 Energy Centre Services Layout and Plant Room locations | |
| 2.24 | Schematic for Main Services incoming routes and distribution from Energy Centre to Main Hospital Building – tunnel cross sections (1:50 scale) | |
| 2.25 | MTHW Schematic | |
| 2.26 | LTHW Schematic | |
| 2.27 | Hot & Cold Water Services Schematic | |
| 2.28 | Filtered Water Schematic | |
| 2.29 | Renal Water Schematic | |
| 2.30 | Medical gases Schematic | |
| 2.40 | Sprinklers Schematic | |
| 2.41 | Fire alarm & damper controls Schematic | |
| 2.42 | BMS Schematic | |
| 2.43 | MV Power Schematic | |
| 2.44 | LV Schematic | |
| 2.45 | Air supply Schematic, including additional sketches for Theatre supply | |
| 2.46 | Air extract Schematic, including additional sketches for Theatre supply | |
| 2.47 | Air Treatment Schematic (cooling), including additional sketches for Theatre supply | |
| **3.0 Design Strategy** | (Strategies to be up to 1,500 words per strategy, unless | |

| | | |
|---|---|---|
| | noted otherwise, and may be supplemented with sketches/illustrations/tables) | |
| 3.1 | Architectural design strategy (up to 4,000 words) | |
| 3.2 | Wayfinding strategy | |
| 3.3 | Arts Strategy | |
| 3.4 | Acoustic Report indicating the following information:-<br>▪ Specialist Acoustic Engineer's report providing a clear demonstration of compliance with HTM 08-01<br>▪ Outline principles adopted underlying bidder approach to acoustics with particular regard to issues around items such as rooftop helipad, atrium etc | |
| 3.5 | FM Strategy (up to 4,000 words)<br>This to identify and address (as a minimum):<br>▪ Goods In and Out proposals for deliveries and removal off site<br>▪ Distribution proposals (hospitals and to lab building) from delivery to site to end user stations and back to location of removal off site<br>▪ Separation of flows<br>▪ Systems and technologies<br>▪ Interface of systems<br>▪ Resilience of systems and proposals<br>▪ External façade access (cleaning and maintenance/replacement) solution | |
| 3.6 | Main incoming utilities design / connection strategy | |
| 3.7 | Water Services & Drainage design strategy | |
| 3.8 | Heating design strategy | |
| 3.9 | Ventilation & air treatment design strategy, including statements on odour control from adjacent sewage works | |
| 3.10 | Mains power distribution design strategy | |
| 3.11 | Sub-mains power distribution design strategy | |
| 3.12 | Lighting design strategy, including reference to energy and aesthetics to improve patient experience | |
| 3.13 | Lift Engineering design strategy (to include lift movement analysis) | |
| 3.14 | Communication design strategy | |
| 3.15 | Protective systems design strategy | |
| 3.16 | Medical gases design strategy | |
| 3.17 | Pneumatic tube system design strategy | |
| 3.18 | Fire engineering design strategy | |
| 3.19 | Plant room design strategy | |
| 3.20 | Energy strategy including approach to renewables, sustainability | |
| 3.21 | BREEAM scoring schedule | |
| 3.22 | Helipad M&E services design strategy | |
| 3.23 | Maintenance & major plant and equipment replacement strategy – including resilience provisions and strategy (up to 3,000 words) | |
| 3.24 | Building Services Commissioning, Handover, Training strategy (up to 4,000 words) | |
| 3.25 | Drainage strategy including:-<br>▪ Methodology for Addressing the requirements of the Hydraulic Assessment and Flood Risk Assessment as scoped out on the Drainage Impact Assessment and Strategy Report<br>▪ SUDS and Drainage Strategy statement which recognises the requirements as outlined in the Drainage Impact and Strategy Report | |
| 3.26 | Structural Design Strategy which should include:- | |

| | | |
|---|---|---|
| | ▪ Outline description demonstrating understanding of: topography, geology, soil conditions, contamination, ground water, history, services<br>▪ Demonstrate outline principles or design including, general description, stability, joints, floors, vertical structure, foundations, stairs and ramps, retaining walls, earthworks, slope stability, drainage, external works etc.<br>▪ Design Standards and Sources of Reference (Codes of Practice and Standards) | |
| 3.27 | Demolitions Strategy which should include/identify:<br>▪ Separation from new hospital, labs, energy centre and other buildings – safe pedestrian and traffic routes<br>▪ Access routes for construction traffic and site accommodation<br>▪ Protective measures – live services, noise, dust, removal of debris off site | |
| 3.28 | Diversions Strategy which should include/identify<br>▪ Culvert diversion<br>▪ Other diversions<br>▪ Medical gas line workplans | |
| **4.0 Specifications** | | |
| 4.1 | Substructure | |
| 4.2 | Frame | |
| 4.3 | Upper Floors | |
| 4.4 | Roof Structure | |
| 4.5 | Roof coverings | |
| 4.6 | Roof drainage | |
| 4.7 | Roof lights | |
| 4.8 | Stair structure | |
| 4.9 | Stair finishes | |
| 4.10 | Stair balustrades & handrails | |
| 4.11 | External walls | |
| 4.12 | Windows | |
| 4.13 | External doors | |
| 4.14 | Internal walls and partitions | |
| 4.15 | Internal doors | |
| 4.16 | Wall finishes | |
| 4.17 | Floor finishes | |
| 4.18 | Ceiling finishes | |
| 4.19 | Fittings, fixtures & furniture | |
| 4.20 | Soft furnishings | |
| 4.21 | Works of Art | |
| 4.22 | Equipment | |
| 4.23 | Sanitary appliances (in relation to Group 1 appliances identified in the Equipment List) | |
| 4.24 | Services equipment | |
| 4.25 | Disposal installations | |
| 4.26 | Mains Water installations | |
| 4.27 | Cold water services | |
| 4.28 | Hot water services | |
| 4.29 | Steam & condensate | |
| 4.30 | Heat source | |
| 4.31 | Space heating | |
| 4.32 | Space cooling | |
| 4.33 | Ventilating system | |
| 4.34 | Electric source & mains | |
| 4.35 | Electric power supplies | |
| 4.36 | Electric lighting & fittings | |

| | | |
|---|---|---|
| 4.37 | Gas installations | |
| 4.38 | Lift installations | |
| 4.39 | Sprinkler installations | |
| 4.40 | Fire-fighting installations and alarms | |
| 4.41 | Lightning protection | |
| 4.42 | Communication installations | |
| 4.43 | Special installations– Renal Water, Filtered Water | |
| 4.44 | Special installations – Building management System and Asset Management System | |
| 4.45 | Special installations– Pneumatic tube system | |
| 4.45a | Special installations – Security systems, access control, CCTV and intruder alarms | |
| 4.45b | Special installations – Other (e.g. AGVs) | |
| 4.46 | Roads, car parks, pavements, cycle paths | |
| 4.47 | Soft landscaping | |
| 4.48 | Site enclosure | |
| 4.49 | External fittings & furniture | |
| 4.50 | Drainage | |
| 4.51 | Water Mains | |
| 4.52 | Fire Mains | |
| 4.53 | Heating Mains | |
| 4.54 | Gas Mains | |
| 4.55 | Electric Mains | |
| 4.56 | Site Lighting | |
| 4.57 | Minor building works | |
| **5.0 Component / Product & Manufacturer Schedule** | | |
| 5.1 | Boilers | |
| 5.2 | Calorifiers | |
| 5.3 | Pumps | |
| 5.4 | Switchgear | |
| 5.5 | AHU's | |
| 5.6 | Fans | |
| 5.7 | Internal Doors | |
| 5.8 | Ironmongery | |
| 5.9 | External doors & screens | |
| 5.10 | Roof Coverings | |
| 5.11 | Cladding / Curtain Walling / Windows | |
| 5.12 | Vinyl Flooring | |
| 5.13 | Carpet | |
| 5.14 | Ceiling systems | |
| 5.15 | CHP systems | |
| 5.16 | Generators | |
| 5.17 | Chillers | |
| 5.18 | Light fittings | |
| **6.0 Equipment Schedule** | | |
| 6.1 | Proposed Equipment Schedule (this to be the schedule issued by the Board priced. No variant or alternative schedule to be utilised or considered). | |
| **7.0 SHTM Compliance Statement** | | |
| 7.1 | Confirm compliance with required SHTM's and other standards noted in the ERs (Section 5) and state how compliance is being achieved (this to take the form of both Table 2 and Table 3 (5.1.2 and 5.1.3 of Vol 2/1 respectively) being reproduced and column(s) added confirming compliance and stating how compliance is being achieved). | |

| | | |
|---|---|---|
| | Further, a compliance statement with regard each of the Additional Guidance listing entries at 5.1.4 of Volume 2/1 is also required. | |
| **8.0 ADB Compliance Statement** | | |
| 8.1 | Confirm compliance with requirements of ADB sheets issued | |
| 8.2 | Confirm compliance with environmental matrix issued, return completed carbon tracker and evaluation matrix | |
| **9.0 Programme** | | |
| 9.1 | Master programme | |
| 9.2 | Stage 1 Laboratory sub-programme | |
| 9.3 | Stage 2 FBC Stage sub-programme | |
| 9.4 | Stage 3 Construction stage sub-programme | |
| **10.0 Project / Site Management** | | |
| 10.1 | Project Execution Plan comprising:- | |
| | ▪ Management structure | |
| | ▪ Management Staff – key personnel & structure | |
| | ▪ Design Staff - key personnel & structure | |
| | ▪ Temporary Accommodation & Welfare | |
| | ▪ Logistics (through timeline on site) | |
| | ▪ Traffic Management | |
| | ▪ Car Parking | |
| | ▪ Staff Movement (construction operatives) | |
| | ▪ Site Security | |
| | ▪ Site Safety, including Construction Phase Health & Safety Plan | |
| | ▪ Site interfaces | |
| | ▪ Waste management | |
| | ▪ Community engagement and benefits | |
| | ▪ Initiation of NEC working practices and cascade of this through supply chain | |
| **11.0 Contract Conditions** | | |
| 11.1 | A detailed and full mark-up of the Draft Contract; An electronic version, capable of being read in Microsoft Word 2000, of the Draft Contract;<br>Details of any of the proposed conditions contained in the Draft Contract that the Bidder is not prepared to accept and the reasoning behind the Bidder's position; | |
| 11.2 | Details of any of the proposed conditions contained in the Draft Contract that the Bidder is not prepared to accept and the reasoning behind the Bidder's position; | |
| 11.3 | A letter of support from the Bidders' insurers or other form of evidence demonstrating that the Board's expectations relative to insurance cover will be met. | |
| 11.4 | Performance Bond | |
| 11.5 | Performance Damages | |
| 11.6 | Collateral Warranties | |
| **12.0 Financial** | | |
| 12.1 | Statement on Commercial proposals, operation of Target Pricing, Open Book audit | |
| 12.2 | Target & Maximum Price Proposals<br>▪ Overall Project<br>▪ Stage 1 New Labs<br>▪ Stage 2 FBC Design<br>▪ Stage 3 Design & Construction New Hospitals | |

| | | |
|---|---|---|
| 12.3 | Detailed Elemental Cost Plan, comprising elemental summary with supporting detail comprising work items, approximate quantities, rates etc<br>▪ Stage 1 New Labs<br>▪ Stage 2 FBC Design<br>▪ Stage 3 Design & Construction New Hospitals<br>▪ Stage 3A Hard & Soft Landscaping Completion | |
| 12.4 | Priced Activity Schedules & Supporting Monthly Cashflows<br>▪ Overall Project<br>▪ Stage 1 New Labs<br>▪ Stage 2 FBC Design<br>▪ Stage 3 Design & Construction New Hospitals<br>▪ Stage 3A Hard & Soft Landscaping Completion | |
| 12.5 | Payment proposals | |
| 12.6 | Priced Risk Register & Risk Allocation<br>▪ Stage 1 New Labs<br>▪ Stage 2 FBC Design<br>▪ Stage 3 Design & Construction New Hospitals<br>▪ Stage 3A Hard & Soft Landscaping Completion | |
| 12.7 | Incentivisation Proposals Pain / Gain<br>▪ Stage 1 New Labs<br>▪ Stage 2 FBC Design<br>▪ Stage 3 Design & Construction New Hospitals & Stage 3A Hard & Soft Landscaping Completion | |
| 12.8 | Whole Life Cycle Cost Estimate for 30 year period detailing, replacement costs & timescales, planned & preventative maintenance, energy usage including:-<br>▪ Overall Project Summary<br>▪ Stage 1 New Labs<br>▪ Stage 3 Construction New Hospitals<br>▪ Stage 3A Hard & Soft Landscaping Completion<br>Energy costs assumptions should be clearly stated | |

# Appendix B Qualitative Scoring Schedule

B

| ITPD Evaluation Criteria | Individual Weighting | Technical Weighting |
|---|---|---|
| **DESIGN** | **550** | **50** |
| | | |
| ***Space*** | **20** | |
| The design should achieve appropriate clinical space standards as required by the ITPD Schedule of | 10 | |
| | | |
| The circulation, communication & plant space should be adequate and optimised | 10 | |
| | | |
| ***Drawing information:-*** | **250** | |
| 1:500 scale Masterplan proposals | 30 | |
| 1:500 departmental relationship drawings for all levels indicating functional relationships & main circulation routes | 45 | |
| 1:200 departmental layouts reflect the required space standards and functionality | 40 | |
| 1:200 departmental drawing for Accident & Energency Department, fully Annotated | 10 | |
| 1:200 departmental drawing for Adult Theatres Department, fully Annotated | 10 | |
| 1:200 departmental drawing for Adult Ward, fully annotated | 10 | |
| 1:200 departmental drawing for Childrens Ward, fully annotated | 10 | |
| 1:200 departmental drawing for Childrens A&E, fully annotated | 10 | |
| 1:50 room layout and wall elevations fully developed | 10 | |
| 1:200 Elevations – incorporating external signage proposals | 5 | |
| 1:200 Exemplar sections | 5 | |
| 3D images / perspective (internal & external) indicating the following:- | | |
| ▪ Architectural vision – space, height, form, composition, scale, character and use of materials | | |
| ▪ Hospital Main Entrance / atrium / public space proposals / visuals | 20 | |
| 1:500 site hard & soft landscaping proposals indicating:- | | |
| ▪ Soft landscaping strategy | | |
| ▪ Hard landscaping strategy | | |
| ▪ Car Parking arrangements with distribution of spaces and use identified | | |
| ▪ Areas of differing Carriageway Construction | | |
| ▪ Road, footway and cycle way geometry | | |
| ▪ Indicative Signalised layouts at external roads | | |
| ▪ Retention / protection of existing trees | | |
| ▪ Incorporation of art | | |
| ▪ Special features | | |
| ▪ Courtyards | 10 | |
| Finishes Schedule for 11 Departments, and key circulation & communication routes, and main entrances | 10 | |
| Door & ironmongery Schedule for 11 Departments, key circulation & communication routes, and main entrances | 10 | |
| Roof level: Typical layout indicating structure, including helipad (Acute Adults & Childrens) | 5 | |
| Architectural design strategy statement in support of drawing information | 5 | |
| Wayfinding strategy | 5 | |
| | | |

| ITPD Evaluation Criteria | Individual Weighting | Technical Weighting |
|---|---|---|
| ***Design Strategy*** | **155** | |
| Acoustic Strategy & Report | 5 | |
| Arts Strategy | 5 | |
| Fire engineering design strategy including drawings | 5 | |
| Structural Engineering design strategy including outline design drawings demonstrating structural philosophy | 5 | |
| Drainage design strategy including 1:1250 (or greater) plans showing drainage provision in support of SUDS and Drainage Strategy1:500 scale plans showing:- | | |
| ▪ Layout of roads and buildings | | |
| Layout of sewers, outfalls, underground storage, and SUDS features | 5 | |
| Main incoming utilities design / connection strategy including Schematic for Main Services distribution | 5 | |
| Water Services Strategy including Hot & Cold Water Services Schematic, Filtered Water Schematic and Renal Water Schematic | 5 | |
| Heating design strategy including MTHW Schematic & LTHW Schematic | 10 | |
| Ventilation & air treatment design strategy including Schematic drawings | 10 | |
| Mains and Sub-mains power distribution design strategy including MV Power Schematic and LV Power Schematic | 10 | |
| Lighting design strategy | 10 | |
| Lift Engineering design strategy | 10 | |
| Communication design strategy | 5 | |
| Protective systems design strategy including Sprinklers schematic and Fire alarm & damper controls | 5 | |
| Medical gases design strategy including schematic drawings | 5 | |
| Pneumatic tube system design strategy including schematic drawings | 5 | |
| Plant room design strategy | 5 | |
| Control systems including BMS schematic | 5 | |
| Helipad M&E services design strategy | 5 | |
| Maintenance & major plant replacement strategy | 35 | |
| | | |
| ***Sustainability*** | **75** | |
| Sustainable design statement | 25 | |
| BREEAM scoring schedule | 25 | |
| Energy strategy including approach to renewables, sustainability | 25 | |
| | | |
| ***AEDET Review*** | **50** | |
| Overall AEDET review score | 50 | |
| **Design Score** | **550** | **50** |

| ITPD Evaluation Criteria | Individual Weighting | Technical Weighting |
|---|---|---|
| **DELIVERABILITY AND APPROACH** | **275** | **30** |
| **Project management:** | **90** | |
| Structure & approach | 20 | |
| Site Management Team; | 5 | |
| Design Team; | 5 | |
| Community Engagement | 60 | |
| **Construction Approach:** | **20** | |
| There should be minimal impact on service delivery; | 10 | |
| The construction exploits any innovation benefits from standardisation and prefabrication; | 10 | |
| **Site Management:** | **80** | |
| Temporary Accommodation proposals | 15 | |
| Logistics proposals | 10 | |
| Traffic management | 10 | |
| Car Parking | 10 | |
| Staff Movement | 5 | |

| Stage 1 Laboratory Design & Construction detailed elemental cost & resource plans | 5 | |
| Stage 1 Laboratory Design & Construction Priced Activity Schedules, Cashflow & Payment Proposals | 5 | |
| Stage 2 FBC Stage Priced Activity Schedules including supporting detailed costed resource plan, | 10 | |
| Stage 3 Adult / Childrens / Site Works Design & Construction detailed elemental cost & resource plans | 5 | |
| Stage 3 Adult / Childrens / Site Works Design & Construction Priced Activity Schedules, Cashflow & | 5 | |
| Project Whole Life Cycle Cost Plan | 40 | |
| | | |
| **Total Commercial Score** | **175** | **20** |

# Appendix C Legal Evaluation

C

**Purpose of Legal Evaluation**

The legal evaluation has two primary functions:

- to give comfort as to deliverability - demonstrated by the robustness of the legal submission and mark-up of the draft Contract and a constructive approach to resolving complex issues; and
- to better inform the financial or technical evaluations.

**Legal Evaluation Criteria**

(i) The legal evaluation will focus on the detailed mark-up of the draft Contract including the schedules, Appendices, Contract Data Part 1 and Contract Data part two (together, the "Contract Documents") submitted by the Bidders.

(ii) Bidder's responses to the Contract Documents will be evaluated in accordance with the following criteria (of equal importance):-

- the extent to which the Bidder has accepted the conditions set out in the Contract Documents and the extent to which the Bidder has provided detailed comments on the Contract Documents and a constructive approach to issues which it does not accept;
- the extent to which the Bidder demonstrates that it understands and accepts the risks inherent in the Project and the extent to which the Bidder's qualifications (if any) to risk allocation position set out in the Contract Documents are acceptable to the Board; and
- the sufficiency of Bidder's insurance proposals.

**How the Legal Evaluation will be conducted**

Firstly, the legal evaluation team will evaluate the individual responses against the legal evaluation criteria.

Thereafter, the legal evaluation team will produce a detailed commentary on the mark-up of the Contract Documents which will allow the legal evaluation team to:

- inform the technical and financial evaluation teams of any amendment to the Contract Documents which will have an impact on the price/risk profile or service being offered;
- identify any deficiencies in the legal submission which they consider should be brought to the attention of the Bidder prior to completion of the evaluation to give the Bidder an opportunity to clarify and ensure that tenders are compliant from a legal submission point of view(recognising the constraints on the degree of clarifications that might be requested under the Competitive Dialogue process);
- clearly identify any commercial issues which in the view of the legal evaluation team should be clarified with tenderers prior to appointment of Preferred Bidder. Clarification will be required when the Bidder 's position is not clear; and
- score the legal submissions taking all of the above into account, in accordance with the evaluation scoring matrix set out elsewhere in this ITPD.

**Legal Evaluation Report**

The legal evaluation team will complete a comprehensive legal report for each of the tenders evaluated.

Each legal report will contain the following:

- a summary of the legal submission including confirmation that the legal submissions were compliant;
- a summary of the quality of the responses in the legal submission against the legal evaluation criteria set out in this ITPD;
- a detailed commercial commentary on the mark-up of the Contract Documents which will identify:
    - the points considered relevant to the financial evaluation (which will have already been passed to the financial evaluation team);
    - the points relevant to the technical evaluation (which will have been passed to the technical evaluation team);
    - a list of key commercial issues which, in the legal evaluation team's view, should be addressed/developed prior Contract Award (as appropriate).

In addition, at an early stage in the process, the legal evaluation team will have identified any deficiencies in the legal submission which they consider should be brought to the attention of the tenderer prior to completion of the evaluation to give the Bidder an opportunity to clarify and ensure that tenders are compliant from a legal submission point of view.

The legal evaluation team will also rank the Bids according to the quality of their responses against the legal evaluation criteria.

**Bidder mark-up to the Contract Documents**

Legal submissions will be assessed on how thorough and constructive the Bidder's responses are. The key concern here is to satisfy ourselves that if a particular Bid is selected on the basis of the overall evaluation, that selection is made on a full understanding of their position on **all** commercial issues and on the basis of us being confident that they have thought through the implications of all commercial aspects of their Bid.

Where contract conditions are not acceptable to Bidders, weight will be given to responses which represent constructive alternatives rather than simple rejections.

**Conclusion**

The key issue in the tender evaluation to meet the “most economically advantageous” test remains identifying the compliant affordable Bid which offers the Board the best balance between price and quality. Much of the legal evaluation therefore focuses on assisting that process by identifying issues which are relevant to the overall evaluation but which are expressed by the Bidder through the legal submission documents.

# Appendix D Financial Evaluation

# 1. Background to the Financial Evaluation

## 1.1 Overview of the Approach

The use of competitive dialogue requires the appointment of the successful bidder to be made on the basis of the most economically advantageous tender.

In order to make this assessment NHS Greater Glasgow & Clyde has set out an evaluation method which considers the qualitative aspects of the tenderer's proposals in ratio to the expected cost of the project. The bidder demonstrating the best ratio of outputs to cost will be deemed successful.

The evaluation approach has been set out in the information provided to bidders.

## 1.2 Financial Evaluation

The evaluation of the pricing proposals is carried out as part of the commercial assessment of bids. In addition it is will consider the pricing proposals submitted with the aim of establishing the expected cost to the Board of the proposals.

### 1.2.1 Pricing and Cost Structure

#### 1.2.1.1 Price Structure

In order to understand the approach to evaluation it is necessary to consider the pricing mechanism set out in the contract. The key elements are

Target Price – Bidders are required to provide their best estimate of target price being made up of best estimate of cost plus, with what is in effect a lump sum profit amount

Pain/Gain percentages – the proportion by which cost variations from those used to establish the target price will be met by both the board and the bidder

Maximum Price – The price after which all additional costs will be the responsibility of the bidder

#### 1.2.1.2 Other Costs

It is possible that the pricing proposals will result in costs being borne directly by the board. For example should the bidder propose a cap on cost inflation which if exceeded would not form part of the normal pain/gain mechanism. Costs such as these will be included in the valuation as a direct cost consequence of the bidders proposals

# 2. Approach to financial evaluation

## 2.1 Aim of the Approach

The key aim of the approach is to establish the most likely costs to NHSGG&C of the bidders proposals and to use those estimated cost to establish the most economically advantageous tender.

## 2.2 Stages of Evaluation

### 2.2.1 Affordability

Bids that breach the stated affordability thresholds of NHSGG&C may be excluded from further analysis

### 2.2.2 Establishing expected outturn prices

The target price will be based upon the bidder's best estimate of the final costs of the project plus a lump sum profit. The pricing structure recognises that this is an estimate and therefore allows for a predetermined price variation process to be applied.

The causes for price variation will be set out in the risk registers prepared by each bidder. This will be used to establish the expected outturn price by applying statistical techniques such as but not limited to Monte Carlo Analysis.

It will be for each bidder to set out what they believe their post mitigation risks will be that will drive the price variation. If however it is apparent that this estimate is materially different from what me be expected in normal circumstances, this will be clarified with the bidder and additional sensitivity testing may be applied.

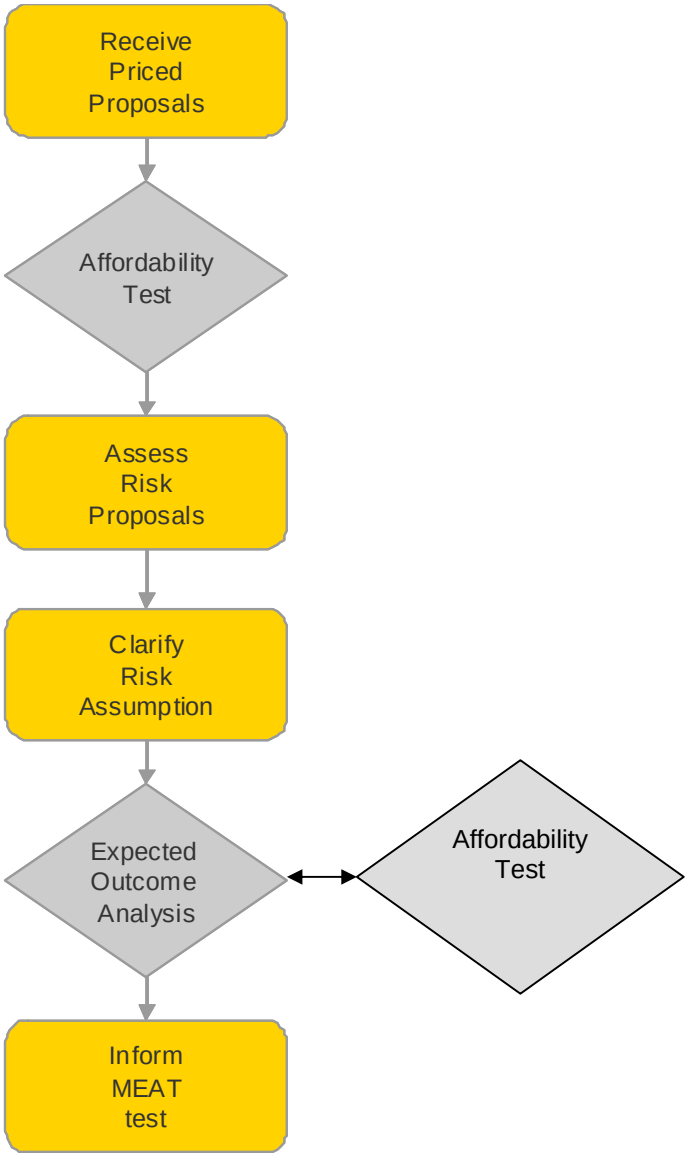
**Categories of Risk Impact**

In assessing the risk impact the following categories will be considered.

a. Those risks borne by the bidder which may impact the final outturn price and ultimately the pain/gain and max price mechanism

b. Those risks borne solely by the board

The following diagram sets out the processes that will be followed



**Specific Treatment of Inflation**

A risk common to all bidders on projects with extended periods of delivery is the impact of inflation. Bidders are required to set out their own approach to inflation, but for evaluation purposes NHSGGC has taken the view that inflation will be evaluated on the basis of 2.5% per annum, this being the government' target for RPI over the period of the project.

### 2.2.3 Other aspects of Financial Evaluation

In order to obtain a full picture of the financial elements of the bids, we will consider factors such as

- The quantum of difference between the bidders target and maximum price
- Any caveats or exclusions submitted by bidders, and there possible impact upon the risks borne by the board

► The clarity of the bidders pricing proposals and the degree to which they could be practicably implemented

# Appendix E Board Evaluation Process / Structure

New South Glasgow Hospitals and Laboratory Project

New South Glasgow Hospitals Project Evaluation Process and Structure

The purpose of this paper is to set out the evaluation programme, process and teams for the New South Glasgow Hospitals and Laboratory Project. (It should be noted that Volume 3 of the Invitation to Participate in Dialogue (ITPD) (appendix A) sets out the bid deliverables which require to be evaluated.)

Evaluation Process

The evaluation process contains all activities required to provide the Board with a robust evaluation mechanism to ensure confidence that the evaluation will be appropriate, accurate and auditable. The evaluation of the tenders will be carried out by those who have been involved in compiling the ITPD and/or involved with the bidders in the Competitive Dialogue Process. This will ensure that tenders will be considered by those who have the most knowledge and understanding of the Board's requirements and who have also been providing clarity to the bidders in Competitive Dialogue.

The bid deliverables split naturally into four evaluation groupings and therefore there will be four evaluation groups, these being Design, Logistics, Laboratory Block and Commercial. A training seminar for all those involved in the process based on the information contained in the ITPD is arranged for 21st August 2009.

Following receipt of the tenders for the works on September 11th 2009, the evaluation groups will commence the initial evaluation process. The whole evaluation process will take approximately 5 weeks and will conclude on the 16th October 2009. The main parts of the evaluation process are:

1. Check all information is complete (Request missing information if required);
2. Evaluation groups consider all tender information for their groupings;
3. Bidders attend evaluation meeting to present their proposals and answer any questions from evaluation groups;
4. The evaluation groups carry out their initial evaluation of their respective sections of the tenders and complete an initial scoring in line with Volume 3, appendix A of the ITPD;
5. During the evaluation period there may be a need for the evaluation group leads to meet with a sub-group of the New South Glasgow Hospitals and Labs Project Executive Board (NSGH&LPEB) to provide information about the progress of the evaluation of tenders and allow them to request more detail on any particular aspects of that process. The proposed dates for these meetings are 30th September and 13th October 2009.
6. The Commercial Group will carryout a review of all outputs from the evaluation groups (provided by the Group Leads). The Commercial Group will complete a moderation exercise to ensure consistency of approach, scoring and reasoning of the initial evaluation and scoring of each tender submission.
   The Commercial Group will complete the final scoring of the tenders and will rank the tenders and establish a preferred bidder.
   A comprehensive evaluation report will be completed by the 16th October 2009.
7. After the completion of the evaluation process the Commercial Group will present its conclusions to a seminar/workshop of the NSGH&LPEB on 22nd October 2009 to provide them with a comprehensive understanding of the tender submissions to enable them to make an informed judgement at their formal meeting to be held on the 26th October 2009. The NSGH&LPEB will consider all relevant information and, if they agree with the recommendation of the Commercial Group, take forward the formal recommendation to the NHS Greater Glasgow & Clyde Board Performance Review Group.

Remit and Groups

a) Evaluation Groups
   - Carry out analysis of all information for their groupings provided by the Bidders and seek any clarifications regarding any missing information.
   - Complete a detailed review and initial evaluation of each submitted bid (as in ITPD Volume 3) and compile summary of bid compliance with expected deliverables. This to be completed for the four work-streams which have been the subject of Competitive Dialogue (i.e. Design, Labs, Logistics and Commercial).
   - Write up a detailed evaluation report on all aspects of their work stream.

b) Commercial Group
   - Carry out final evaluation review of all bid submissions and conclude the evaluation scoring assessment (as in ITPD Volume 3).
   - Determine ranking of each bid.
   - Write up detailed summary evaluation report of all aspects of the evaluation of the bids
   - Present recommendations to the NSGH&LPEB.

c) New South Glasgow Hospitals & Labs Project Executive Board
   - Receive and consider the recommendation from the Commercial Group and make a decision on the successful bidder to go forward as the project's design and construction partner.
   - Make formal recommendation to NHS Greater Glasgow & Clyde Board Performance Review Group.

Membership of Groups

Table 1 shows the membership of each evaluation group.

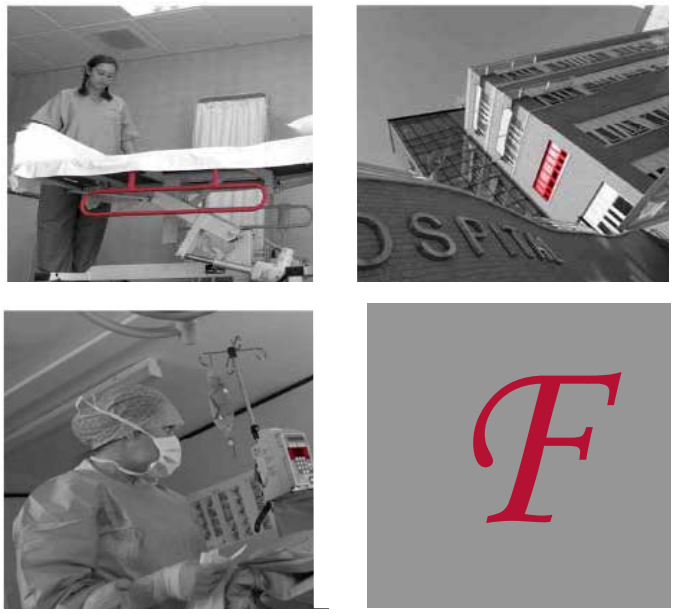
*(* - provisional date)*

# Appendix F Certificates



**Part 1 – Confidentiality Agreement**

Name of bidder:

We undertake that we shall keep confidential and will not use for our own purposes or reveal to any person, firm or company the information contained in or sent with the ITPD issued by the Board in relation to the Project or which is made available in connection with any further enquiries in relation to that Project (the "Information Provided") unless we obtain in each case the prior written consent of the Board. Such consent shall not be required where the Information Provided is:

(i) disclosed on a "need to know" basis to such of our directors, officers, employees or advisers who are directly involved with the preparation of bids on our behalf provided that we shall inform each person to whom the Information Provided is made aware of the confidential nature of the Information Provided and the obligations under this Confidentiality Agreement and has given an undertaking at the time of receipt of the Information Provided to keep such information confidential;

(ii) in the public domain or shall come into the public domain otherwise than by breach of this undertaking or any other undertaking;

(iii) made available to us by a third party who is entitled to divulge such information and who is not under any obligation of confidentiality in respect of such disclosure; or

(iv) required to be disclosed by any applicable law provided that the party disclosing the information shall notify the Board of the information to be disclosed (and of the circumstances in which the disclosure is alleged to be required) as early as reasonably possible before such disclosure must be made and shall take all reasonable action to avoid and limit such disclosure.

We undertake at the request of the Board that we shall immediately return to the Board all Information Provided and all and any copies or any part thereof including any information derived or produced partly or wholly from the Information Provided which is in a tangible form. If any such information is not in a tangible form, the bidder shall destroy or permanently erase that information and all and any copies or part thereof including any information derived or produced partly or wholly from the Information Provided.

Without prejudice to any other rights or remedies which the Board may have, the bidder acknowledges and agrees that (a) damages would not be an adequate remedy for any breach by the bidder of the provisions of this undertaking and (b) the Board shall be entitled to the remedies of interdict and other relief for any threatened or actual breach of this undertaking.

Signed for and on behalf of [**bidder**] by [**name of signatory and nature of authority to sign**] and [**name of signatory and nature of authority to sign**] on the day of 2009.

……...

……...

NOTE: (i) Where the bidder is a company, to be signed by two directors or by a director and the secretary of the company, such persons being duly authorised for that purpose.
(ii) Where the bidder is a consortium yet to be established as a company, to be signed by persons duly authorised by each of the prospective members of the consortium.

**Part 2 – Certificate of Non-Canvassing**

Name of bidder:

We hereby undertake that we have not (nor will we in the future):

1. Committed any offence under the Prevention of Corruption Acts 1889 to 1916; or

2. Contacted any other officer of the Board about any aspect of the Project, except as authorised by the ITPD, including (but without limitation) for the purposes of discussing the possible transfer to the employment of the Bidder of such officer for the purpose of the Project or for soliciting information in connection with the Project; or

3. Offered any inducement, fee or reward to any member or officer of the Board or any person acting as an advisor for the Board or in connection with the project; or

4. Canvassed any of the persons referred to in paragraph 3 above in connection with the Project.

In this Certificate the word "person" includes any persons and any body or association, corporate or unincorporate and "agreement" or "arrangement" include any such transactions, whether formal or informal, legally binding or not.

Signed for and on behalf of [bidder] by [name of signatory and nature of authority to sign] and [name of signatory and nature of authority to sign] on the day of 2009.

……...

……...

NOTE: (i) Where the bidder is a company, to be signed by two directors or by a director and the secretary of the company, such persons being duly authorised for that purpose.
(ii) Where the bidder is a consortium yet to be established as a company, to be signed by persons duly authorised by each of the prospective members of the consortium**.**

**Part 3 – Certificate of Non-Collusion**

Name of bidder:

We certify that we will submit a bona fide bid and that we have not adjusted and will not adjust our bid in agreement or by arrangement with any other person.

We also certify that we have not done and we undertake not to do at any time during the competition any of the following acts:

1. Entered into any agreement with any other person with the aim of preventing bids being made or as to the fixing or adjusting of the amount of any bid or the conditions on which any bid is made;

2. Caused or induced any person to enter into such an agreement as is mentioned in paragraph 1., above, or to inform us of the amount or the approximate amount of any rival bid for the Project; or

3. Informed any other person, other than the person calling for this bid, of the amount or the approximate amount of our bid, except where the disclosure, in confidence, of the amount of the bid was necessary to obtain quotations necessary for the preparation of the bid, for insurance, for performance bonds and/or contract guarantee bonds or for professional advice required or the preparation of the bid; or

4. Offered or agreed to pay or give any sum of money, inducement or valuable consideration directly or indirectly to any person for doing or having done or causing or having cause to be done in relation to any other bid or proposed bid for the works any act or omission; or

5. Canvassed any other persons referred to in paragraph 1., above, in connection with the project.

We also undertake not to procure the doing of any of the acts mentioned in paragraphs 1 to 5 above before the hour and date specified for the return of the bid nor (in the event of the bid being accepted) shall we do so while the resulting contract continues in force between us (or our successors in title) and the Board.

In this Certificate, the word “person” includes any persons and any body or association, corporate or unincorporate, and “agreement” or “arrangement” include any such transactions, whether formal or informal, legally binding or not.

Signed for and on behalf of [**bidder**] by [**name of signatory and nature of authority to sign**] and [**name of signatory and nature of authority to sign**] on the day of 2009.

…….

... ……..

NOTE: (i) Where the bidder is a company, to be signed by two directors or by a director and the secretary of the company, such persons being duly authorised for that purpose.
(ii) Where the bidder is a consortium yet to be established as a company, to be signed by persons duly authorised by each of the prospective members of the consortium.

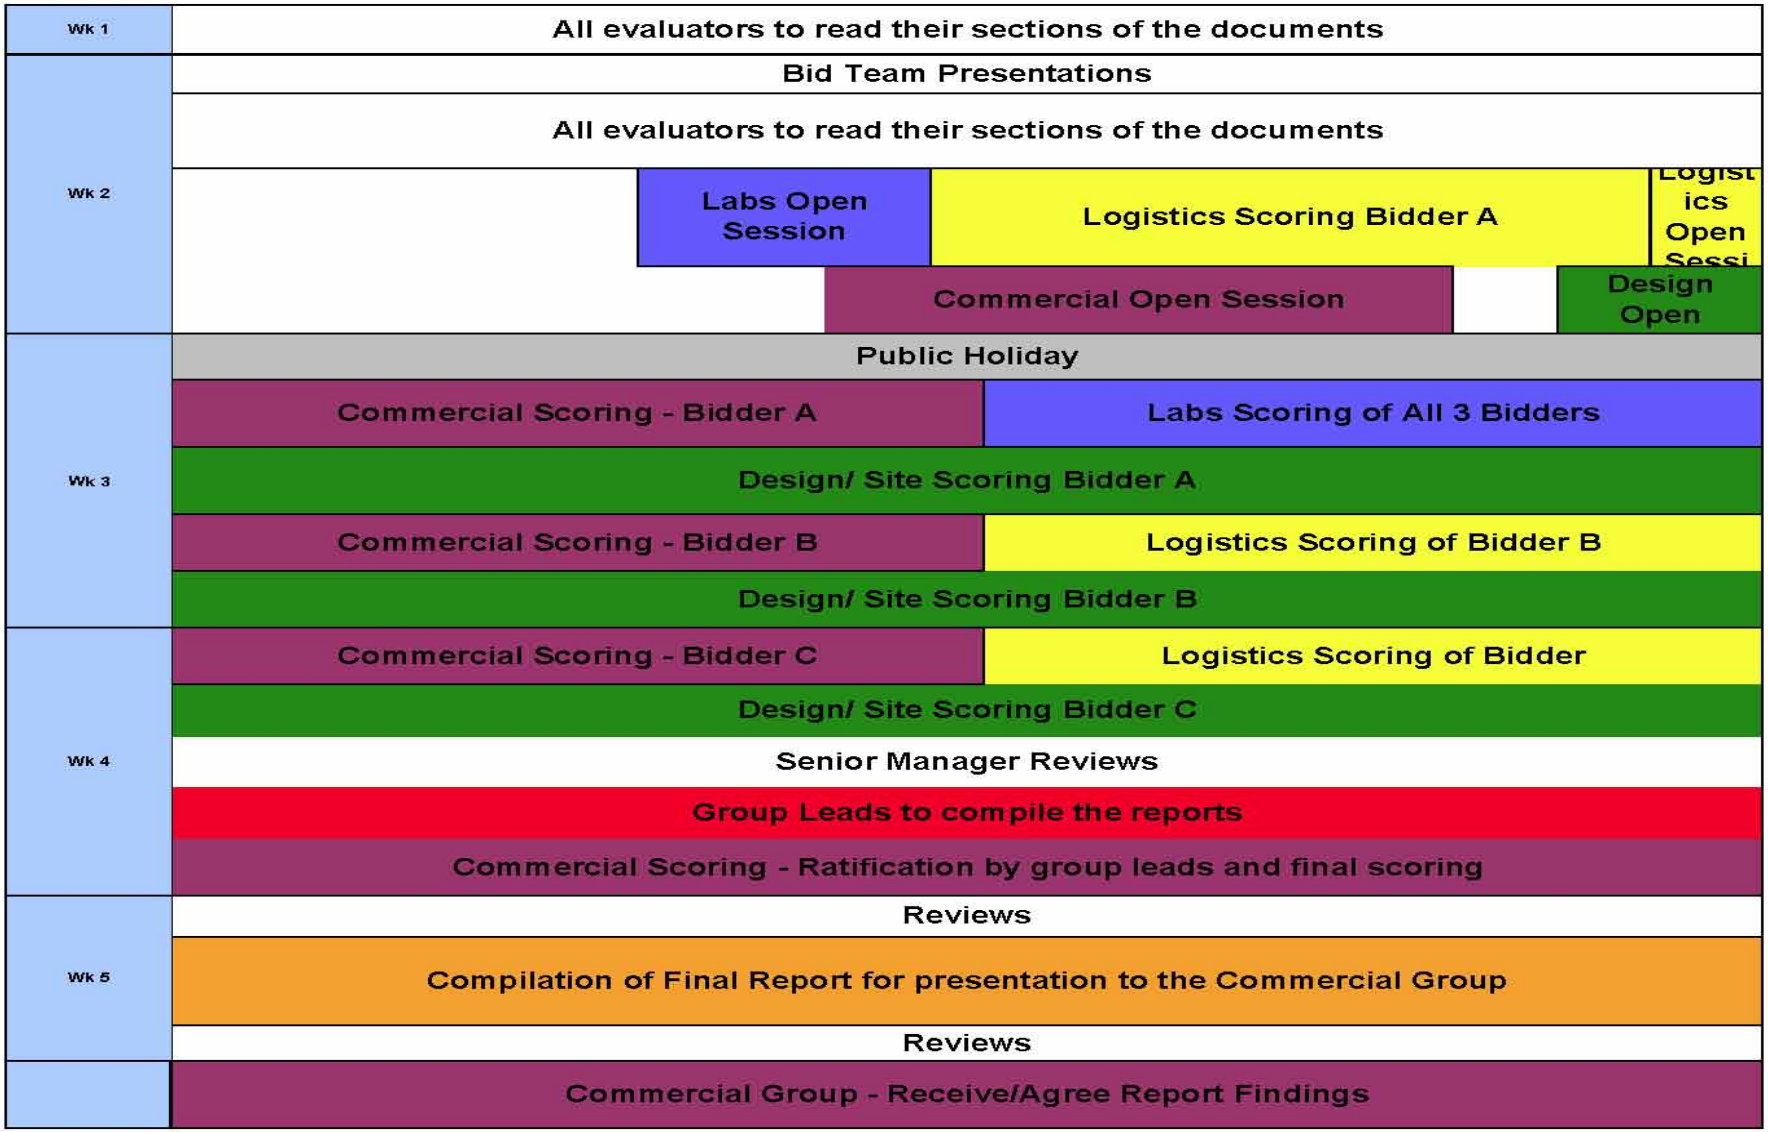
# Appendix 3 - Evaluation Programme



## Evaluation Tasks

| Week No | |
|---|---|
| 1 | Receive and check all tender documents and locate them in the designated bidder area of the evaluation unit. Deliver tender information to legal, financial and technical advisor offices. Set out tender information into the 4 categories of evaluation: Design, Logistics, Labs and Commercial. (All information coded for document control.) |
| 1 + 2 | All evaluation group members read the information in relation to their relevant category (Some members of the evaluation groups required to read full documents - AS, AMcI, PM and Technical Advisors). The Bidders presentations will take place on the 4th day of this task. |
| 2 | Individual open meetings held for discussion on tenders - mainly clarification and understanding of documents with the exception of the Logistics workstream which will commence scoring. |
| 3 | Formal group evaluation meetings commence and conclude scoring of tenders |
| 4 | Compile evaluation reports by each group |
| 4 | Commercial group commence final scoring of bids which includes:<br>- Review all group reports<br>- Discuss reports with group leads<br>- Hold a final scoring meeting<br>- Rank tender and identify preferred tender |
| 5 | Commercial group compile final tender evaluation report with clear recommendations on way forward |
| 6 | Commercial Group review final report for submission to New South Glasgow Hospitals & Labs Project Executive Board |

APPENDIX 4

# NEW SOUTH GLASGOW HOSPITALS AND LABORATORIES PROJECT

## THE PROCUREMENT PROCESS

## A PERSONAL VIEW AT 22nd OCTOBER, 2009

During the past two years, the NHS Board has been kept fully informed as the new South-side hospital project develops. Briefings have been held at informal seminars covering areas such as the development, design and financial implications. More formal Board settings, such as the Performance Review Group and the Board itself, have been used for briefing and then approval of the formal governance arrangements.

The procurement process has now reached an important stage in that approval is required for the appointment of contractors, in respect of the laboratory project, and the approval of a contractor as the preferred bidder for the main project.

On 22nd October, a full meeting was held of the New South Glasgow Hospitals and Laboratory Executive. This took the form of a seminar with presentations by the NHS Board's key advisory teams. In addition to Executive Members, three Non-Executive Members also attended. This was a full day's seminar where high-level presentations were made with the opportunity for in-depth questioning and close scrutiny.

Without going through the detail of the seminar presentations, it is worth recording the following particular points:-

1. All three contractors who engaged in the competitive dialogue stage of the process submitted tenders that are within the cost parameters.

2. Detailed consideration had been given to the manner in which the individual contractors had developed their own design from the exemplar and those attending the seminar were able to gain insight as to the basis on which scores were recorded……with the exemplar representing the mean so that it was possible for a tender design to exceed the mean score of the exemplar. Evaluation had been developed across a number of critical areas such as layout, individual floor design, etc., and all of these different areas were explored individually within the presentations.

3. A composite presentation was made identifying the final qualitative scoring across all three submissions, in terms of both design and logistics.

4. Attention then turned to the most economically advantageous tender (MEAT) which was a means of identifying the value received for each pound spent. All three submissions were compliant. There was then detailed analysis of the financial implications of each submission, to create a level playing field taking account of variations within each submission.

5. The results of the MEAT scoring across each of the three tenderers was consistent with that under the heading of qualitative scoring.

6. There was then a presentation by the NHS Board's own team on the affordability of the project. This was looked at from both capital and revenue perspectives and, while risks were clearly identified and articulated, the affordability criteria were adequately met.

7. Personal observations

   To a great extent, the presentations had been prepared in such a way that they took account of all likely anxieties and questions that might be raised. However, there were one or two particular aspects where I was happy to receive detailed reassurance and these particular areas included the following:-

   (a) The Section 75 Agreement which will be a condition of detailed planning consent raises a number of issues, none of which have a significant impact on costs.

   (b) The role of Architecture & Design Scotland has changed during the process and there is a degree of comfort that they are content with the way the design and delivery of the project has proceeded.

   (c) Inclusion of the City Morgue has not been at our behest but it is not creating any significant difficulties for the Board.

   (d) The exemplar design was dependent on accommodation in a basement area. The ground level is not significantly above the level of the River Clyde and reassurance was given that aspects relating to ground condition, the height of the ground above sea level, etc., has all been taken on board and well dealt with.

   (e) The impact of life-cycle maintenance, etc., had been taken on board within the scoring system.

   (f) It was recognised that all three tenderers had required to spend significant sums in making their submissions. Accordingly, it was critically important that there was absolute confidence in the clarity of the process. It was confirmed that all aspects of the process had been fully explained to the

tenderers, at each stage, and that they had all expressed contentment with the proposed way ahead.

(g) The development of the exemplar had been given great care and scrutiny, with major input from clinicians, and was a confident basis on which to prepare submissions.

(h) As to the stage beyond acceptance of the tender, there would be the opportunity for an element of tweaking of the design, but it was important that this was only in the margins, and it was believed that there was only one design which was sufficiently close to the exemplar to allow that tweaking without any possibility of there being a claim that the contract was being reconstructed.

(i) There was recognition that there were two possible areas of continuing risk:-

(1) Any events which might give rise to compensation to the successful contractor, eg any NHS initiated changes to the design.
(2) Any difficulty with the provision of the NHS Board's capital contribution through difficulty arising on account of land sales or failure in government brokerage.

These risks were clearly identified and reassurance was provided that they should be minimised.

(j) There was recognition that the Board will require to be fully satisfied as to the substance and credit worthiness of the recommended preferred bidder.

In conclusion, there will be a clear recommendation coming from the project Executive Team as to the identity of the preferred bidder for the main contract and for the Laboratories on which work can start at an earlier date.

Conclusion

Although I will not be able to attend the meeting on 3rd November, I would like to record my full support for the recommendation which will come to the Board on 3rd November, and which I have fully discussed with the Chief Executive.

Andrew O. Robertson, OBE, LLB
Chairman
NHS Greater Glasgow and Clyde

# New South Glasgow Hospitals

## Presentation to Performance Review Group

## 03 November 2009

A49342285

# Agenda

NHS Greater Glasgow and Clyde

**Performance Review Group - 03 November 2009**

- Technical Overview & Evaluation
- Cost Analysis
- Legal Considerations
- MEAT Score
- Affordability
- Recommendation

# Brookfield Europe LP

A49342285

A49342285

A49342285

A49342285

A49342285

# Brookfield Europe: Masterplan

- Fully met the Board's Exemplar requirements
- Innovative proposal for Car Park 2
- Creation of additional, quality external space for the Children's hospital
- Good sense of arrival
- Well appointed entrances and access to the facilities, with airport style frontage at both A&E Departments and enhanced integration of internal and external space to central park and play areas
- Additional benefit through design of roof space as external gardens
- Strong building identity with high quality finishes

# Brookfield Europe: 1/500's (Departmental Adjacencies)

- Compliant with Employer's Requirements
- Likely to achieve early sign off due to high level of functionality in current proposals
- Efficient patient, staff and Facilities Management service flows
- Fully acceptable travel distances between departments
- Good standard of resilience via alternative routes throughout

# Brookfield Europe: 1/200's
## (Departmental Layouts)

- **Major benefits to the Board and process due to all departments drawn during bid period**
- **Generally high standard across required departments**
- **Flexibility across full Adult Ward floorplate (4 Wards)**
- **Exemplary design for Children's A&E + both Children's and Adult Wards**
- **Further design development of departments to be undertaken in Stage 2**

# Brookfield Europe: General

- Strong architectural concept of vessel, dock and beacon
- Identities of hospital elements very clearly expressed
- Very good intuitive way-finding across scheme
- Sustainable design solutions to achieve very challenging targets
- Fully meets expectations and requirements of Programme
- Exemplary engagement and joint working practices with the Board team through the process

# Laing O’Rourke

A49342285

A49342285

A49342285

A49342285

03
02
01
00
South Glasgow Hospital

# Laing O'Rourke: Masterplan

- Changed Facilities Management solution to detriment of flows and operation of hospital
- Reduction of basement resulting in less resilience
- All traffic on existing internal roads, reducing exemplar position
- Reduction in open space and soft landscaping north and west of facility
- Rationale of additional overhead links not fully thought through

# Laing O'Rourke: 1/500's
## (Departmental Adjacencies)

NHS Greater Glasgow and Clyde

- Deficient in 5 key areas of patient/staff flow
- Accident & Emergency to Radiology
- Out-patient to Radiology
- Children's Theatres to PICU
- PICU to Radiology
- Schiehallion (Children's) Ward to Day Ward
- Inappropriate Clean & Dirty routes for FM
- Excessive travel distances on several key flows with associated revenue implications
- Unsatisfactory bereavement pathways

# Laing O'Rourke: 1/200's (Departmental Layouts)

NHS Greater Glasgow and Clyde

- **Significant issues with staff and patient flows in several departments**
- **Lack of flexibility and patient observation in Acute Assessment and Critical Care Departments**
- **Inappropriate FM routes in several departments including Adult Theatres**
- **Excessive staff travel distances in Adult Wards**

# Laing O'Rourke: General

- Monolithic design character
- Lack of identity of individual elements
- Negative impact of FM relocation upon Children's Hospital
- Omission of significant accommodation requirements (e.g. areas of Facilities Management support space)
- Failure to meet medical gas requirements
- Weaknesses in Sustainable Design Strategy
- Uninspired integration of Arts

# Balfour Beatty

A49342285

A49342285

SOUTH GLASGOW HOSPITAL

RECEPTION

A49342285

# Balfour Beatty: Masterplan

- Compliant with Employer's Requirements
- Strong concept of three individual building elements
- Positive impact of Winter Garden arrival area
- Benefit of "green space" in front of mortuary + labs
- Large internal courtyards providing good daylight to podium areas
- Reduced external spaces outside Children's Hospital
- Traffic management issues at car park 2
- Concern over ward towers dominating existing buildings

# Balfour Beatty: 1/500's
## (Departmental Adjacencies)

NHS Greater Glasgow and Clyde

- Major Issues around key adjacencies created by decision to spread podium over 4 levels
- Ward shape results in significant inefficiencies in staff and patient movement
- Significant increases in travel distances between key departments
- Significant increases from majority of departments to ward block with uneven distribution of support accommodation in ward towers
- Critical Care link to Neuro via lift is a major departure from Employer's Requirements
- Lack of resilience in Facilities Management flows
- No outside space for Department of Children and Family Psychiatry (DCFP)

# Balfour Beatty: 1/200's
## (Departmental Layouts)

NHS Greater Glasgow and Clyde

- Significant advantages in Adult A&E layout
- Good daylight levels in podium departments (Critical Care, Theatres etc)
- A number of issues with patient flows and efficiency of staffing.
- Adult's Radiology over three floors, compounded by lack of vertical connectivity, is significant departure from requirements with negative impacts on staffing and functionality
- Major concerns over lack of flexibility and inefficiencies in Adult Ward layout with no apparent public stair access

# Balfour Beatty: General

- Strong architectural concept with separate identities for individual building elements
- Good intuitive way-finding at front entrance areas, but weak in out-patient and ward areas
- Generally compliant services strategy but with limited Sustainability enhancements
- Excessive travel distances due to separation of ward tower from podium
- Lack of functionality/flows due to additional podium floor level

# Final Qualitative Scoring

NHS Greater Glasgow and Clyde

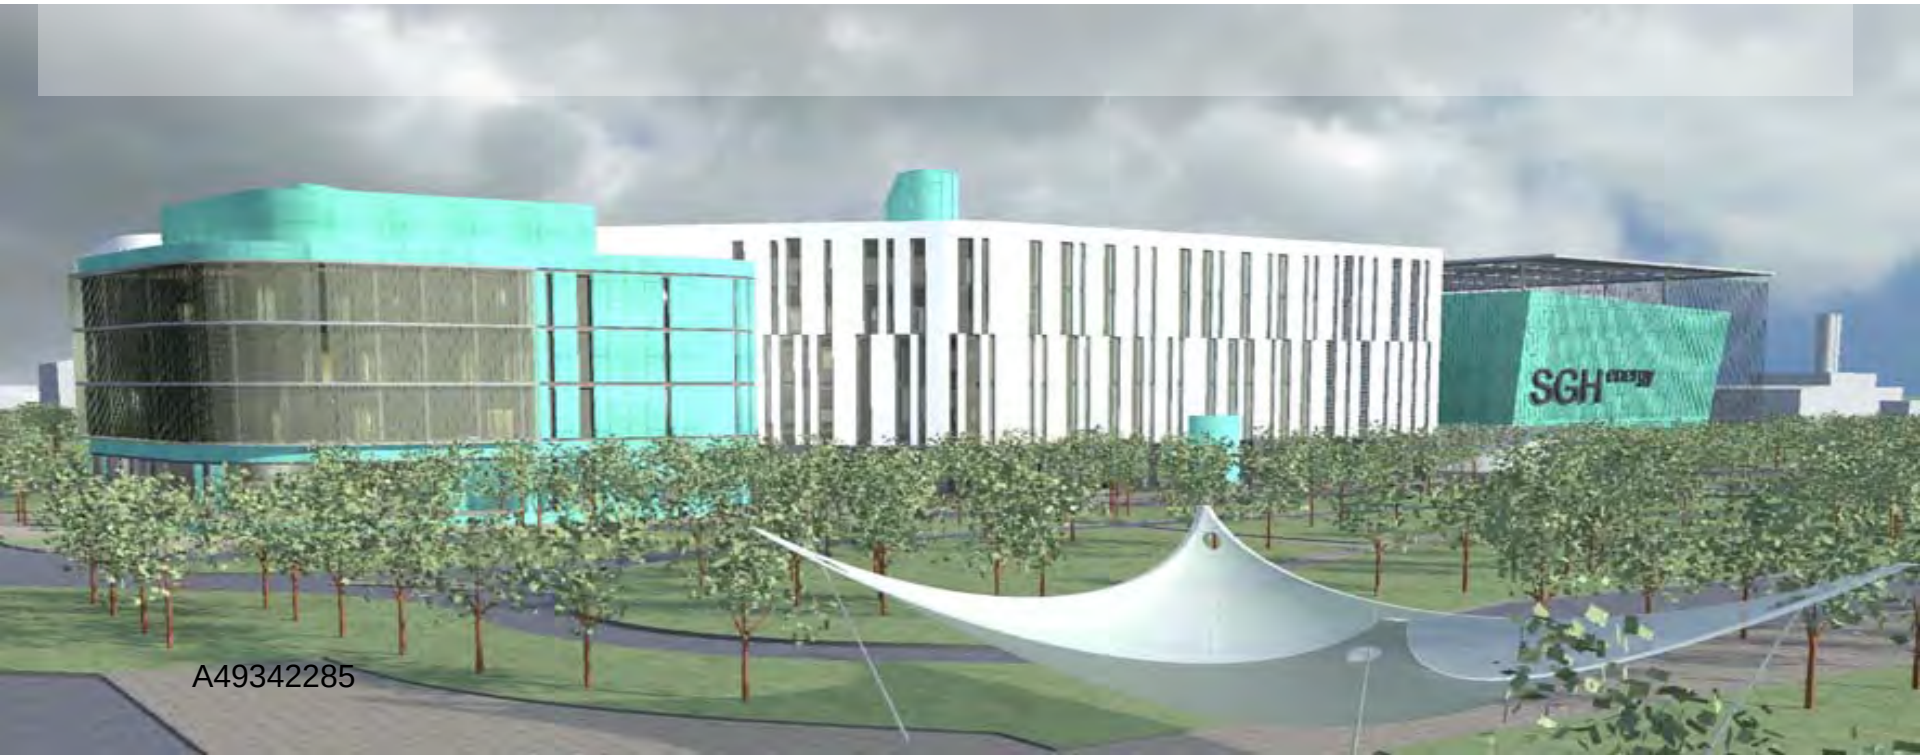
| Workgroup | Benchmark Score | Brookfield | Laing O'Rourke | Balfour Beatty |
|---|---|---|---|---|
| **Design (weighting x 50)** | 165,000 pts | 169,000 pts | 122,250 pts | 149,000 pts |
| **Logistics (weighting x 30)** | 49,500 pts | 49,200 pts | 51,900 pts | 51,750 pts |
| **Sub-Totals** | **214,500 pts** | **218,200 pts** | **174,150 pts** | **200,750 pts** |
| Commercial (weighting x 20) | 21,000 pts | 20,200 pts | 19,400 pts | 21,700 pts |
| **Totals** | **235,500 pts** | **238,400 pts** | **193,550 pts** | **222,450 pts** |

# Laboratories Full Business Case (FBC)

- Board requested to approve Laboratories FBC
- Laboratories is Stage 1 of the Contract
- FBC to be submitted to Scottish Government Capital Investment Group for final approval
- FBC now includes an addendum which refers to facilities which require to be incorporated into the Stage 1 (Laboratory accommodation) rather than the Stage 3 (Hospitals Construction) in order to realise cost, programme and design efficiencies

# Laboratories Full Business Case (FBC)

- **Affordability is demonstrated in FBC**
- **The Laboratories building will be designed to RIBA Stage E, at which point the Board's design team will be novated to the successful Contractor**



# Equalised Cost Summary

NHS Greater Glasgow and Clyde

| | Brookfield | Laing | Balfour |
|---|---|---|---|
| • Works | £531.1M | £491.8M | £548.8M |
| • Fees | £ 40.3M | £ 31.9M | £ 40.5M |
| • Target Price | £571.4M | £523.7M | £589.3M |
| • Maximum Price | £578.8M | £542.3M | £615.6M |
| • Hospitals | £513.9M | £465.0M | £534.1M |
| • Labs | £ 57.5M | £ 58.7M | £ 55.2M |
| • Target Price | £571.4M | £523.7M | £589.3M |

# Legal Considerations

NHS Greater Glasgow and Clyde

## Procurement process

- Competitive Dialogue Procedure
- Evaluation Process included in the tender documents
- Process has been followed
- Process overseen by Board's procurement team

# Legal Considerations

NHS Greater Glasgow and Clyde

## Legal Submission

- Basis of Board's requirement (NEC3)
  - Contract Terms
  - Insurance arrangements
  - Performance Bonds
  - Collateral Warranties
- Dialogue engagement – produced the final tender documents
- Clarifications from bidders to ensure that there is no misunderstanding
- Outcome of evaluation

# Most Economically Advantageous Tender (MEAT)

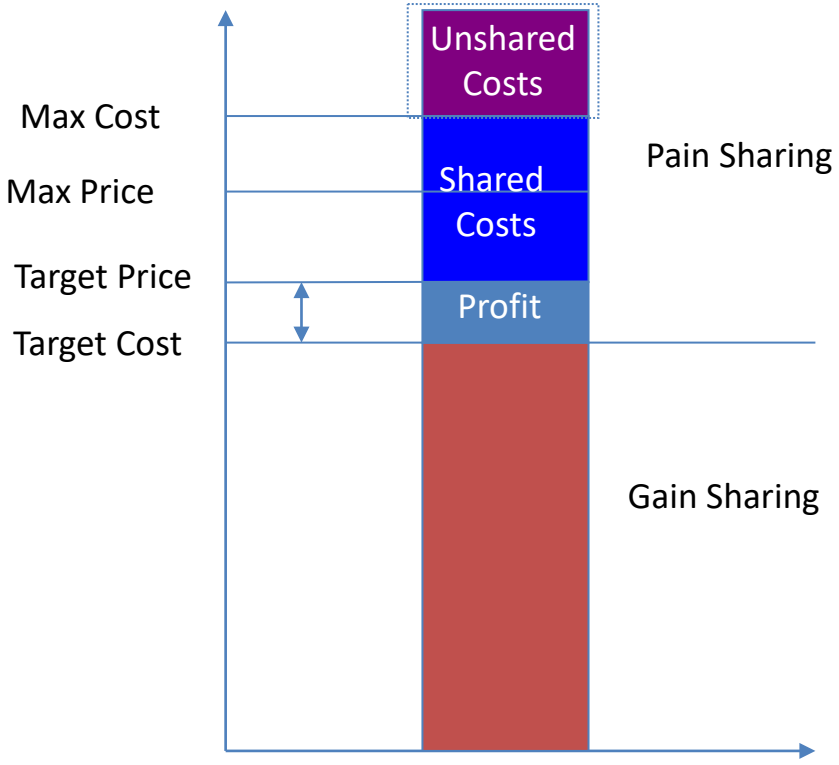
- Competitive Dialogue requires the appointment of the successful candidate to be made on the basis of MEAT
- In this process it has been determined that the MEAT is the offer that provides the highest number of quality points per pound.
- The evaluation process issued to bidders requires the board to base MEAT upon the expected outturn cost for the board

# Pricing Structure

NHS Greater Glasgow and Clyde

- The pricing structure developed as part of the process was based upon NEC 3. The objectives of the pricing structure are
  - To provide incentives for the contractor to achieve their bid price
  - To recognise the spirit of partnership and co developed solution through the sharing of pain and gain
  - To protect the ultimate financial position of the board by setting a maximum price payable in the event of increased costs – maintains affordability

# Graphical Representation of Pricing Structure

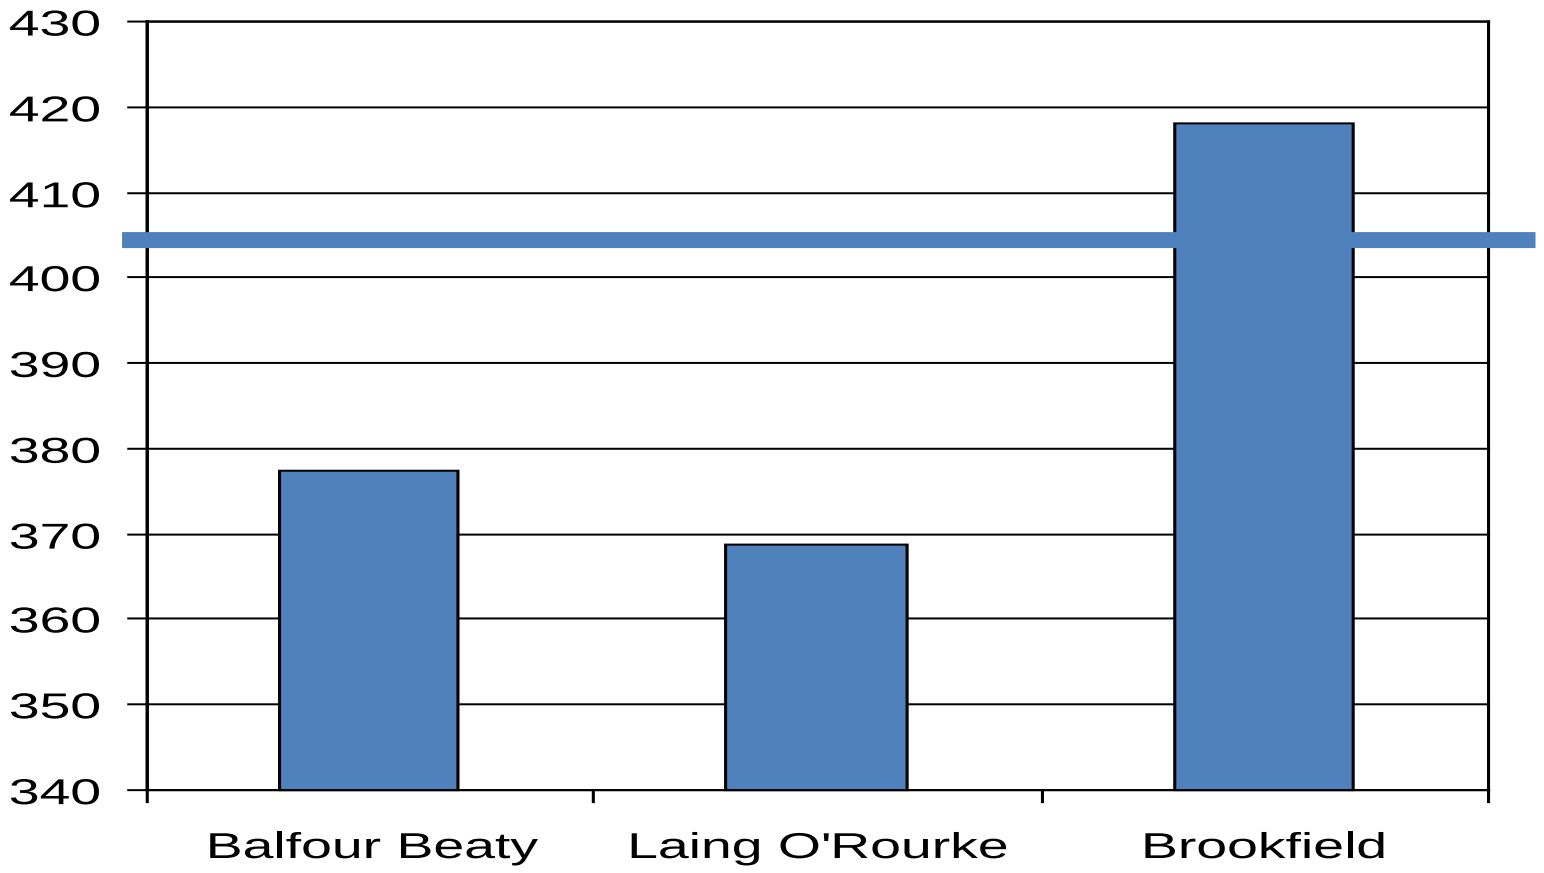


# Price Quality Ratio – Bid Target Price

NHS Greater Glasgow and Clyde

| | |
|---|---|
| **Brookfield** | |
| Target Price (£m) | 571.400 |
| Evaluation Score | 238,400 |
| Price Quality Ratio | 417.2 |
| **Laing O'Rourke** | |
| Target Price (£m) | 523.700 |
| Evaluation Score | 193,550 |
| Price Quality Ratio | 369.6 |
| **Balfour Beatty** | |
| Target Price (£m) | 589.300 |
| Evaluation Score | 222,450 |
| Price Quality Ratio | 377.5 |

# Price Quality Ratio – Target Price (Bid)



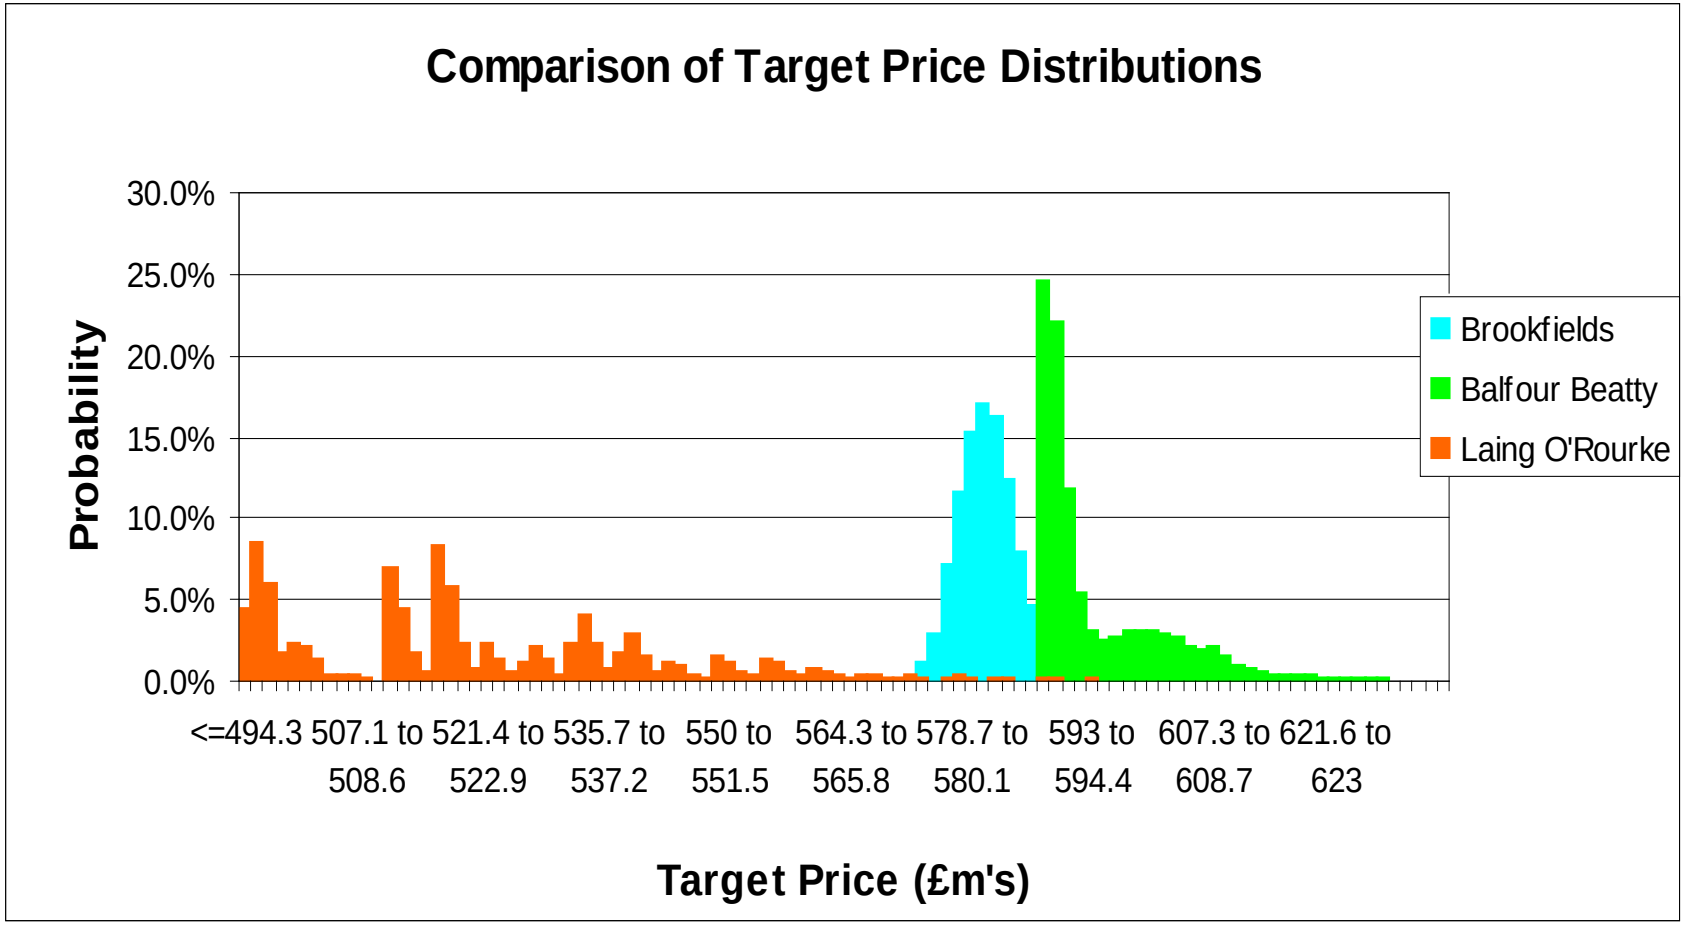
A49342285

# Most Economically Advantageous Tender

NHS Greater Glasgow and Clyde

– The proposal submitted by Brookfield Europe LP represents the Most Economically Advantageous Tender.
  - It has been assessed as providing significant qualitative advantages relative to other bidders
  - Other Bids received contained serious design and qualitative shortcomings
  - The price offered is affordable and is resilient to risk
  - The lowest proportion of cost overruns to be funded by the Board is contained in the Brookfield proposal

# Simulated target price comparison



Probability of overlap for Brookfields and Balfour Beatty: 2.4%

A49342285

# Affordability of Adult & Children's Hospitals

| | Outline Business Case Approval (May 08) £'M | Selection of Preferred Bidder (Nov 09) £'M |
|---|---|---|
| **Sources of Funding** | | |
| Specific SGHD | 551.7 | 551.7 |
| Endowment Funds | 20 | 20 |
| Capital Receipts | 135 | 106 |
| General NHSGG&C | 135 | 164 |
| | 841.7 | 841.7 |
| | ==== | ==== |
| **Planned Expenditure** | | |
| Target build cost including professional fees and inflation allowance | 603.8 (Max:621) | 571.0 (Max:579) |
| Equipment | 52.8 | 52.8 |
| VAT | 116.0 | 110.0 |
| Other | 8.3 | 8.3 |
| Optimism Bias (contingency) | 60.8 | 99.6 |
| | 841.7 | 841.7 |
| | ==== | ===== |

## Key Points

1. Brookfield target price – comfortably within OBC provision – increased contingency.
2. Commitment of SGHD to specific funding allocation AND funding for enabling schemes of £124m.
3. Construction cost inflation provided for at 2.5% p.a.
4. Increased contingency provides cover for key risks – shortfall in capital receipts, inflation of construction costs beyond assumed rate.

# Affordability of Adult & Children's Hospi

NHS Greater Glasgow and Clyde

## (2) Revenue Affordability

| | Outline Business Case Approval (May 08) £'M | Selection of Preferred Bidder (Nov 09) £'M |
|---|---|---|
| **Forecast step up in revenue expenditure** | | |
| New adult/children's hospitals | 53.8 | 48.8 |
| Enabling schemes | 5.7 | 5.7 |
| | 59.5 | 54.5 |
| **Planned Cost Savings** | | |
| Operational cost savings | 22.1 | 22.1 |
| Capital Charge and Maintenance cost savings | 22.8 | 19.9 |
| Cost Savings to be identified | 14.6 | 12.5 |
| | 59.5 | 54.5 |

**Key Points**

1. Reduced capital charge costs related to Brookfield target price.
2. Residual cost savings challenge reduced to £12.5m…if spread over 4 year period, required supplementary cost savings target of only £3m p.a..
3. Change to capital charges regime, starting in 2010/11, potentially reduces revenue step up by a minimum of £20m per annum.
4. Affordability dependent upon internally generated cost savings - £42m still secure and can be ring-fenced.

# Affordability of Adult & Children's Hospitals

NHS Greater Glasgow and Clyde

## 3) Financial Outlook 2017/18

→

### 1. OUTLINE BUSINESS CASE (MAY 2008)

| Key Risks | Financial Strategy |
|---|---|
| 1. Reducing funding uplifts (to 3.1%).<br>2. Implementation of NRAC recommendations.<br>3. Pay uplift(s) exceed 2% per annum.<br>4. Unachievable cost savings targets (in 2009/10 and 2010/11). | 1. Cost savings programme a dominant feature.<br>2. Amass cost savings pot over number of years to pay for new hospitals.<br>3. Use all available non-recurring cost savings measures/slippage.<br>4. Reduce provision for other new programme commitments. |

### 2. SELECTION OF PREFERRED BIDDER (NOV 2009)

| Potential sources of pressure | Potential sources of relief |
|---|---|
| 1. Funding uplifts reduce below 2.15%.<br>2. Implementation of NRAC recommendations.<br>3. General cost savings target of 2% per annum proves to be unsustainable source of funding for<br>(a) national policy commitments<br>(b) managing local cost pressures<br>4. Tighter availability of general capital funding (impact on capex). | 1. Reduced level of pay uplift(s) including pay freeze.<br>2. SGHD continue to maintain measured approach to NRAC implementation.<br>3. Change(s) to capital charges regime.<br>4. Tighter availability of general capital funding (impact on revenue). |

NHS Greater Glasgow and Clyde

## 4) Financial Strategy

1. **Capital Funding**

- SGHD funding commitment to the scheme is explicit and remains key
- secure forecast level of capital receipts
- secure £20m contribution from endowment funds
- hold general contingency and use if necessary to manage risk of
  (a) increased capital expenditure
  (b) shortfall in level of capital receipts

**Conclusion** : Project remains affordable in capital terms.

2. **Revenue Funding**

- dependency of any new service commitment on funding from cost savings
- ring fence Acute £42m cost savings pool as this is released – specific to programme implementation
- secure further Acute cost savings of £12.5m per annum to bridge remaining funding gap
- plan to secure £12.5m over 4 year period….minimising impact in any one year….and ring fence
- change to capital charges regime may reduce scale of revenue funding challenge - potential for contingency or release of cost savings for alternative use

**Conclusion** : Project remains affordable in revenue terms.

# Recommendation

- **To appoint Brookfield Europe LP as the preferred contractor to carryout the 4 stages of the project.**

# Brookfield Europe LP

- **Brookfield Europe was formed following the acquisition of Multiplex, the Australian international construction company, in 2006**
- **Parent company employs over 10,000 people, with over 600 presently employed in Scotland**
- **Have strong supply chain to support mobilisation to commence Stage 1 construction – including Bathgate based Dunne Group – a leading civil engineering contractor specialising in reinforced concrete substructure and superstructure construction**

# Brookfield Europe LP

NHS Greater Glasgow and Clyde

- Major construction entity only attracted to world class construction projects (i.e. not a volume constructor)
- Selected Southern General scheme as UK bid focus and priority
- Construction and support team with significant demonstrable track record in the delivery of major healthcare schemes
- Project Director is from Glasgow and has managed the team through the £335m Peterborough City Hospital (on programme and on budget) and has previously successfully managed, amongst other schemes, the £220m Norfolk & Norwich Hospital

# Healthcare Experience

NHS Greater Glasgow and Clyde

## Peterborough City Hospital

- Main Contractor in the £335m PFI Project for a 612 bed Acute Hospital & 102 bed Mental Health unit (on programme and on budget).

- Reference from NHS Project Director, Miss A. Broekhuzian –

"members of team worked in partnership which maximised quality of design and resulted in exceptional building finishes"

- Reference from OGC Gateway Review team:

"in their experience they had never reviewed a project which had the strength of relationships seen in this project"

# Southern General Project Team

NHS Greater Glasgow and Clyde

*Brookfield Project Team have extensive experience of delivering Hospital projects spanning 25 years*

**Project Director** **Ross Ballingall**

**Project Experience:**

| | | |
|---|---|---|
| **Peterborough Hospital PFI** | | **£350m** |
| **Oxford Churchill** | | **£130m** |
| **Stoke Mandeville hospital** | | **£56m** |
| **Addenbrookes Hospital** | | **£80m** |
| **Middlesex Hospital BeCAD** | **£70m** | |
| **Newham Hospital** | **£27m** | |
| **Newcastle Hospitals** | | **£300m** |
| **Norfolk & Norwich Hospital** | | **£220m** |

*The Staff included in the Bidding Team will be retained for the duration of the Project*

**Commercial Director** **Paul Serkis**

**Project Experience:**

| | |
|---|---|
| **Peterborough Hospital PFI** | **£350m** |
| **Chelsea & Westminster Hospital** | **£200** |
| **National Physical Laboratories** | **£87m** |

**Construction Director** **Alan Keeley**

**Project Experience:**

| | |
|---|---|
| **Peterborough Hospital PFI** | **£350m** |
| **Norfolk & Norwich Hospital** | **£220m** |
| **Medical training school** | **£100m** |

# Next Steps

NHS Greater Glasgow and Clyde

- Meet with all bidders (separately) 04 November 2009
- Commencement of 'Alcatel' standstill period
- Press/communication programme commences
- Meet with unsuccessful bidders 09 + 10 November 2009 for feedback/debrief sessions
- From 16 November 2009 engage with Brookfield regarding pre-contract requirements
- Contract Signature

**From:** David Hall [redacted]
**Sent:** 04 December 2009 09:25
**To:** Ross.Ballingal[redacted]
**Cc:** Douglas Ross; Mark Baird; Seabourne, Alan; Moir, Peter; Frew, Shiona
**Subject:** NSGFH:RFI Log and M&E Design Summary 041209
**Attachments:** 20091204Design Summary - Mechanical and Electrical.doc; RFI Log for Contract (Brookfield to Board) Board comments - 041209.doc

Ross,

Please find attached an updated RFI Log with "Board Comments 2" added. This should be self explanatory and assist in reducing the volume of items on this log to be discussed next week.

Also attached is a M&E Design Summary log which is not adding anything to the ER's, but rather identifying areas where clarity is required on the bid in relation to it's compliance with the ER's.

Please note that there are some areas, eg water storage, where the Board are not willing to accept the derogation proposed.

As before, please highlight "agreed" in green where you concur, or change to "not agreed" and highlight yellow, where further deliberation is required.

Please feel free to give me a call to discuss

Regards

**David Hall**
FCIOB MAPM

| **NSGH – Contract Preparation Design Summary – [area]** | | | | | |
|---|---|---|---|---|---|
| **Item** | **Add** | **Omit** | **Board Comment** | **Status** | **Brookfield Comment** |
| **ER 2/1** | | | | | |
| Text | - | - | Volume 2/1 of the ERs remains as the output requirements of the Board to be achieved as a minimum standard by the Contractor. Including M&E appendices 1, 2, 3, 4, 5, 6 & 7. | Agreed | |
| Drawings | - | - | The ER drawings remain as the output requirements of the Board. The submitted bid drawings of BC supplement the ER drawings and the following system comments are provided to assist in resolving certain anomalies within BC proposals. | Agreed | |
| **Bid Submission – Vol 2 Drawings** | | | | | |
| Chilled Water | - | - | The chillers to incorporate free cooling coil sections or equivalent provision. | Agreed | |
| | - | - | Plate heat exchangers to be fully independent duty/standby including wiring and control panels etc. | Agreed | |
| | - | - | Chillers to have screw compressors, “Rated as residentially quiet”. | Agreed | |
| | - | - | Chillers to have variable speed head pressure control with load and efficiency optimized head pressure and chilled water flow temperature control to improve seasonal efficiency will be incorporated. | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | - | - | Full system details and drawings to be provided for specialist areas (Plant required to ensure max feed water temp of 5 to 12 deg C to specialist areas noted in correspondence during CD) | Agreed | |
| | - | - | Reduction in Chiller Plant resilience where (N+1) N=8 is not agreed, provision of additional unit together with associated distribution pipework and controls required to comply with ER's. | Agreed | |
| Ventilation | - | - | Typical Isolation Room Supply. All air system heater battery +5°C to 21°C – supply temperature will require to be higher for provision of room heating. | Agreed | |
| | - | - | Pressure stabiliser to be located in the wall above the bedroom door to the lobby. Currently indicated within ductwork in the ceiling void, no access in this location due to ceiling construction. | Agreed | |
| | - | - | Conventional Theatre Supply System Schematic. Air on temp to cooling coil to be +30°C ER's, not 28°C as shown on BE drawing (Also main heater battery within AHU to be rated at +6°C to 35°C). | Agreed | |
| | - | - | Typical Ultra Clean Theatre Supply air on temp to cooling coil to be +30°C ER's, not 28°C as shown on BE Drawing (Also main heater battery to be rated at +6°C to 35°C). | Agreed | |
| | - | - | Typical Isolation Room Extract Schematic. All air system heater battery +5°C to 21°C – Supply temperature will require to be higher for provision of room heating. | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | - | - | Typical Conventional Theatre Extract System Schematic Air on temp to cooling coil to be +30°C ER's, not 28°C as shown on BE drawing (Also main heater battery within AHU to be rated at +6°C to 35°C). | Agreed | |
| | - | - | Typical Ultra Clean Theatre Extract System Schematic Air on temp to cooling coil to be +30°C ER's, not 28°C as shown on BE drawing (Also main heater battery within AHU to be rated at +6°C to 35°C). | Agreed | |
| | - | - | Ward Air change to be 6AC/HR, currently shown as 2.5AC/HR which is not in compliance with SHTM 03-01. | Agreed | |
| Hot & Cold Water Services | - | - | Renal Water Schematic to be reviewed by SGH Renal Water Advisory Group and comments incorporated within the scheme. | Agreed | |
| | - | - | Renal Acid Circulation Schematic to be reviewed by SGH Renal Water Advisory Group | Agreed | |
| | - | - | Renal Water System response to Volume 2/1 , Appendix M&E 6<br>Renal Water is to be completed and approved by NSGH Renal Water Advisory Group | Agreed | |
| | - | - | Concentrate Bulk Delivery to site Strategy is to be completed and approved by NSGH Renal Water Advisory Group | Agreed | |
| | - | - | Stainless Steel pipework to be provided as per ER's in lieu of ABS plastic for the larger sizes. | Agreed | |
| | - | - | 24 Hour water storage to be provided in lieu of 12 hours as proposed and | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | modularity of tanks to be as per the ER's. (if we change to 12 hours, change to 4 tanks) | | |
| Heating Systems | - | - | 3 no. off flow pipes to be provided between the Energy Centre and the Hospitals capable of passing 50% flow through each, where one fails and the other two can carry the total load. Current proposal is to reduce to 2 no. off pipes each capable of carrying 66% should one fail. | Agreed | |
| | - | - | Plate heat exchangers to be fully independent duty/standby including wiring and control panels etc. | Agreed | |
| Medical Gases | - | - | Medical gas schematic to be amended to reflect ER requirements together with the BC plantroom services layout drawing and design dialogue. | Agreed | |
| | - | - | All references to BOC should be Air Products Ltd. | Agreed | |
| | - | - | Details of the plant resilience for Medical Air, Oxygen, Vacuum, Surgical Air, Nitrous Oxide and Nitrous Oxide to be in accordance with the ER's. | Agreed | |
| Wet Riser Schematic | - | - | Water storage tank capacity to be with local authority. | Agreed | |
| | - | - | BC drawings to be developed. | Agreed | |
| Sprinkler Schematic | - | - | Note on BC drawing states ' Tank by Others ' to be clarified as included. | Agreed | |
| | - | - | Note on BC drawing states ' Others to include tank immersion heater, trace heating, lighting etc. to be clarified as | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | included. | | |
| | - | - | Note on BC drawing states Pump House by others to be clarified as included. | Agreed | |
| Energy Centre | - | - | Man access to be provided to the chimney stack to allow full access to flues over its total height as ER's. | Agreed | |
| | - | - | Chimney stack enclosure to be provided. | Agreed | |
| | | | Boiler layout to be configured to simplify flue routes. | Agreed | |
| | - | - | External oil transfer point to be provided on the wall of the Energy Centre to serve the retained estate. | Agreed | |
| | - | - | Minimum requirement is accessible diverse twin trench solution to be provided in accordance with the ER's to provide required resilience. Pipe material selection will be critical | Agreed | |
| Plant Replacement Strategy | - | - | Scaffold platform to be capable of supporting the plant weights of the larger items of equipment or other strategy adopted to minimise plant replacement time. | Agreed | |
| | - | - | Ground finishes to be capable of taking the scaffolding weight with plant added adjacent to plantrooms. | Agreed | |
| UPS | - | - | UPS autonomy to be amended inline with the ER's. | Agreed | |
| Lighting | - | - | Lighting control to be amended inline with ER's. | Agreed | |
| | - | - | Full luminaire details to be provided | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | including LED's and feature lighting. | | |
| | - | - | Bedside lights to be low energy type. | Agreed | |
| | - | - | Feature lighting LED's to be provided inline with the ER's. | Agreed | |
| | - | - | BE lighting design strategy to be applied to the Internal Lighting scheme which shall be developed in line ER's to provide full CIBSE compliance. | Agreed | |
| | - | - | Lamp colour strategy to be developed in line with HSE & CIBSE guidance | Agreed | |
| | - | - | External Lighting scheme to be developed in line ER's with full CIBSE compliance. | Agreed | |
| Comms Room Racks | - | - | Reduction in racks is not agreed, ie. 10 indicated by BE in each main Comms Room to be amended inline with the ER's drawing. | Agreed | |
| | - | - | Comms room cooling strategy to be detailed to minimise energy use. | Agreed | |
| Fire Alarm | - | - | Graphic user interface system details to be provided during detailed design | Agreed | |
| | - | - | BE to provide full details of the proposed voice alarm system and indicate areas to be covered by conventional sounders | Agreed | |
| | - | - | Atrium protection system details to be provided | Agreed | |
| | - | - | Comms room VESDA system details to be provided | Agreed | |
| Structured Data Wiring | - | - | Comms room and rack layouts to be provided for early discussion with GG&C | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | Technology to verify equipment space allocation. | | |
| Metering | - | - | All metering to be provided in accordance with ER's to allow active energy management together with associated BREEAM credits. | Agreed | |
| Energy Management | - | - | Energy Management software to be fully compliant with ER's complete with BMS management and interactive link to GG&C system | Agreed | |
| Standby Power | - | - | BE to provide early proposals for system management, CHP and Utility Company interface details to progress agreement of all parties | Agreed | |
| Bio fuels | - | - | BE to advise outcome of their proposed feasibility study and provide detailed proposals | Agreed | |
| Utiliities | - | - | BE to provide design estimates for water, gas and electricity to verify and update Utility company info<br>. | Agreed | |
| Service reserve capacity | - | - | BE to ensure that service reserve capacity is maintained during detailed design | Agreed | |
| As fitted drawings, asset register and O&M's | - | - | BE to ensure that all systems shall be linked to the As Fitted drawings via MiCAD drawing mapping, the MiCAD should also integrate with the LMS to provide a fully integrated system complete with interfaces to the PPM and Board's labour resource software systems (Apollo or Eclipse). | Agreed | |
| PPM | - | - | BE to provide, as part of the contract, a full PPM manual and system (computer | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | based software package) for all the buildings and for all building and building services elements of the project. This system will incorporate the As Fitted drawings (MiCAD format) and specifications. This schedule shall have a full planned maintenance programme of works that the FM & Estates managers can review to plan and establish their annual maintenance schedules and annual budgets. BE will be responsible for the purchase and installation of the full PPM system, including pc work stations, barcode readers and tablets. | | |
| General Items | - | - | BE drawings will require further development to meet ER requirements. | Agreed | |
| | - | - | Vibration and noise solutions to be included on drawings. | Agreed | |
| | - | - | Weather proofing to be in accordance with ER's. | Agreed | |
| | - | - | All plant sound attenuation measures to be shown. | Agreed | |
| | - | - | All plant tagging to be in compliance with ER's. | Agreed | |
| | - | - | Compliance with ER's to be demonstrated for all plant and systems maintainability and area isolation. | Agreed | |
| | - | - | Leak detection to be incompliance with ER's. | Agreed | |
| | - | - | All clinical areas with special emphasis on Operating Theatres, Radiology, MRI and Critical Care to be configured to miminise risk of water damage from plant and | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | equipment. All plantrooms to be treated for mitigation of water leaks in accordance with the ER's. | | |
| | - | - | Environmental proving of all rooms to be provided in accordance with the ER's. Samples and reliance on BMS only for test results is not acceptable. | Agreed | |
| | - | - | All services elements to be included to meet the buildings Fire Engineering solution, eg. Stair Pressurisation, Smoke Control etc. all in accordance with the ER's and to the requirements of building Control. | Agreed | |
| | - | - | Dual path distribution resilience to be provided for all services in accordance with the ER's. | Agreed | |
| | - | - | BMS IP network to be fully stand alone with all active equipment will be included. BMS to be fully compliant with ER appendix M&E5. | Agreed | |
| | - | - | All Mechanical, Electrical, Public Health and Specialist System plant to be designed and installed in modular arrangements incorporating plant N+1 redundancy to minimize disruption during planned maintenance in accordance with the ER's. | Agreed | |
| | - | - | BE to provide detailed backup to justify plant selection e.g.<br>Capital Costs<br>Lifecycle & Maintenance Costs<br>Additional Electrical etc loadings<br>Projected Energy costs etc | Agreed | |
| | - | - | BE shall develop the sustainability brief in | Agreed | |

| | | | | | |
|---|---|---|---|---|---|
| | | | conjunction with the Local Authority to ensure compliance with:<br><br>Building Regulations,<br>BREEAM Healthcare Excellent requirements,<br>Building Control, Glasgow City Council requirements<br>Scottish Government Planning Policies including SPP6<br>Advice Notes including PAN84<br>NHS/Board objectives. | | |
| **Bid Submission – Vol 3 Strategy** | | | | | |
| Text [ref] | | | Comments Incorporated within drawing and ER items above. | | |
| **Bid Submission – Vol 4 Specifications** | | | | | |
| Spec [ref] | | | Detailed construction specification to be provided in advance of the | | |
| **Bid Submission – Vol 5 Components** | | | | | |
| Component [ref] | | | Capacities, rating, spare capacity all to be confirmed to reflect accurate building geometry and dimensions during detailed design.<br>List to be expanded to include all ancillary plant e.g. pressurisation units, water filtration plant, fuel systems, wet risers, sprinklers, controls, data wiring, data wiring accessories, racks, power distribution, lighting controls, Structured cabling, nurse call, fire alarms, transformers, luminaire details and BMS etc.<br><br>Three manufacturers for each plant type to be agreed for all Mechanical, Electrical and Public Health equipment prior to contract execution. | | |

| | | | | | |
|---|---|---|---|---|---|
| **Bid Submission – Vol 6 Equipment** | | | | | |
| Generally | | | | | |
| **Bid Submission – Vol 7 SHTM** | | | | | |
| Generally | | | Compliance to be demonstrated during the detailed design | | |
| | | | | | |
| **Bid Submission – Vol 8 ADB** | | | | | |
| Generally | | | Refer to exchange of correspondence during CD | | |
| | | | | | |

**NSGH – RFI Log – Contract Version (~~for issue 18Nov09~~)**
**~~Issued by the Board to Brookfield 18 November 2009 – due for return from Brookfield to the Board by 5pm on Wednesday 25 November 2009~~**
**Board Comments '2' added in response to Brookfield submission to Board of 30 November 2009**

**Key:**

**Y** – (inserted in the 'Add' box) =This is where the RFI information or an aspect of the response/information is to be included in the ERs for clarity and to reflect the information in the RFI issued to the bidder.
**Info =** This is where a separate reference point is noted (e.g. in relation to uploaded BIW information the separate BIW log to be issued is the reference point), where there is no action as the RFI was merely providing some information or where it is noted that the item falls under a different area (e.g. an aspect of the Laboratories Stage E information to be issued).
**NC =** No action required as the information is already addressed by the ERs (may include Watchlist items where compliance requires to be demonstrated by the Contractor during the design development stage).

**Brookfield Action:**

The Status box has been marked with 'Agreed' responses to every item. Brookfield to review the listing and shade the 'Agreed' status box **GREEN** for each item where they agree with the Board. Otherwise the status box should be shaded **YELLOW** with 'Not Agreed' noted and relevant comments as to nature/aspect of disagreement noted in the 'Brookfield Comment' box.

| Ref | Information Requested | Add | No Change / Info | Board Comment 1 | Status | Brookfield Comment | Board Comment 2 |
|---|---|---|---|---|---|---|---|
| 001 | Drawings to be uploaded in dwg format | - | Info | Drawings addressed under the Drawing Log to be issued to Brookfield under separate cover. | Not Agreed | Brookfield Drawings to be included as Works Information 2 should take precedence over Works Information 1 (Employer Requirements) in the event of conflict. | Exceptions to be highlighted by the Board (i.e. out put CD1 drawings that require to remain, to be met by the developed BE CD2 drawing). |
| 002 | **Bedrooms – Clinical Risk Category.** Page 184 of the ERs states that wards are to be classed as Clinical Risk Category 3. Page 27 of Appendix M&E3 lists bedrooms as IEE GN7 Group 1, which would normally be viewed as Clinical Risk Category 4. We believe that the latter statement is correct. | - | NC | Information is included in ERs and therefore need not be added. | Not Agreed | BCL offer based on Wards being Clinical Risk Category 4 which we do not believe is reflected within ER`s. | It is agreed that wards are clinical risk 4 as SHTM |
| 003 | **Crash Call** The ERs refer to "crash" call. Is this "staff to staff" call or an additional layer of call?<br><br>i.e.:<br><br>Patient to Staff /<br>staff to staff /<br>and Crash call<br><br>or<br><br>Patient to Staff /<br>and Staff to Staff (aka Crash). | Y | - | Statement that Crash Call is staff to staff with automatic paging to time scheduled list to be included ERs for clarity. | Agreed * | * Subject to confirmation that as per Board intention the ER`s are updated such that this is clearly defined in the Works Information 1 (Employer Requirements). | This document to be included as an addendum to Works Information Part 1. The ER's will not be updated (track changed) rather the RFI log, BIW log etc sit as addendum to ERs. |
| 004 | HTM06-01 states that electrical loads in hospitals are growing by 3% to 6% per year. At 6% growth the spare capacity would be used within 5 years, at 3% within 9 years.<br><br>Based on current experience at SGH, does the Board have a view on whether the allowance of 25% for future growth is adequate? | Y | - | Statement that 25% is over the complete footprint to be included in ERs for clarity. | Agreed* | * Subject to confirmation that as per Board intention the ER`s are updated such that this is clearly defined in the Works Information 1 (Employer Requirements). | See response to Item 003, above. |
| 005 | HTM 06-01 states that it is preferable for large healthcare premises that dual public electrical supplies should be provided from diverse sources originating from separate distribution network operator substations and fed from different parts of the National Grid with independent cable routes to and across the site to the main substation.<br><br>Can you advise if the negotiations carried out to date with the Utilities have indicated the extent to which this would be possible? | - | NC | Compliance with the HTM (now SHTM) requirement is included in the ERs and is to be met by the Contractor – the specific issue requires to be addressed by the Contractor (with support by the Board) as an aspect of the 33kV discussions and agreement with the utility provider. | Agreed* | *Contractor, in discussion with Scottish Power, will endeavour to satisfy this requirement subject to availability of diverse sources from the grid. | No further action |

<table>
<tr><th>Ref</th><th>Information Requested</th><th>Add</th><th>No Change / Info</th><th>Board Comment 1</th><th>Status</th><th>Brookfield Comment</th><th>Board Comment 2</th></tr>
<tr><td></td><td></td><td></td><td></td><td></td><td></td><td></td><td></td></tr>
<tr><td>006</td><td><u>High Voltage Generators.</u><br>We note from drawing G1274E/(60)01 that Low Voltage generators are proposed each with a step up transformer for site ring connection. Would there be any objection, in principle, to High Voltage generators? We note that the CHP is shown as an HV unit.</td><td>Y</td><td>-</td><td>The statement that any design solution must include the provision for use of easy to obtain 400V hire sets to cover machine outages to be included in ERs for clarity.</td><td>Agreed*</td><td>* Subject to confirmation that as per Board intention the ER`s are updated such that this is clearly defined in the Works Information 1 (Employer Requirements).</td><td>See response to Item 003, above.</td></tr>
<tr><td>007</td><td>The ERs, page 143, require the services to be configured to ensure that isolation can be achieved in each room without taking other rooms out of use. As written this requirement could be taken to mean that, for example, each electrical circuit must serve no more than one room, which we are sure is not intended. We seek further guidance on the intention of this clause.</td><td>Y</td><td>-</td><td>The statement that a room may be “in use” as long as a proportion (50%) of the outlets are retained available during maintenance of a final circuit or local DB to be included in the ERs for clarity.</td><td>Agreed*</td><td>* Subject to confirmation that as per Board intention the ER`s are updated such that this is clearly defined in the Works Information 1 (Employer Requirements).</td><td>See response to Item 003, above.</td></tr>
<tr><td>008</td><td><u>Standby Lighting</u><br>We seek clarification of Appendix M&E3, page 27, clause 3.5, Standby Lighting.<br><br>The ERs appear to require Grade A standby lighting to be UPS supported. We believe that this is not always necessary and that compliance with applicable standards can be achieved in a more cost effective manner.<br><br>Standby lighting grades signify the percentage of normal lighting to be maintained on mains failure. The grade of standby lighting required is not related to the permitted duration of interruption to the power supply.<br><br>For example, CIBSE LG2 requires bedrooms to be provided with Grade A standby lighting. Bedrooms are classed as group 1 by IEE GN7 and MEIGaN which implies that they would fall into Clinical Risk Category 4. The table below which is based on Appendix 1 of HTM 06-01 (we do not believe that SHTM 06-01 has been published yet) would indicate that this type of room would normally require the interruption to general lighting to be not more than 15 seconds. Thus it would not be usual to support all lighting to all bedrooms by UPS.<br><br><table><tr><th>Clinical risk category</th><th>IEE GN7 /MEIGaN group</th><th>Standby Grade / % provision</th><th>Interruption to general lighting</th></tr><tr><td>3</td><td>0</td><td>B / 30-50%</td><td><15s to 3hours></td></tr><tr><td>4</td><td>1</td><td>A / 95%+</td><td><15s</td></tr><tr><td>5</td><td>2</td><td>A / 95%+</td><td><15s</td></tr></table><br>The above implies that only ‘fixed medical lighting and escape lighting’ is required to be supported by battery or UPS. This is often interpreted to include the lighting around an operating table.<br><br>We appreciate that there may be special circumstances and therefore would welcome to opportunity to discuss this further at a workshop with the Board to arrive at a solution acceptable to the Board.</td><td>-</td><td>NC</td><td>Overall treatment of lighting on Board ‘Watchlist’ for development and compliance to be demonstrated by the Contractor.</td><td>Not Agreed</td><td>Brookfield design will be compliant with SHTM06-01, CIBSE LG2, IEE GN7 and MEIGaN. Brookfield design proposal does not include for UPS support to all Grade A lighting as a blanket provision, as the grade of standby lighting is unrelated to the permitted duration of interruption to the power supply.</td><td>This can only be accepted if BE guarantee that the lights will be reinstated (by the generators) within 15 seconds. This will be challenging and will require full load management<br><br>OR<br><br>Provide inverter cover to grade A lighting with for example 5 minute battery autonomy.</td></tr>
<tr><td>009</td><td><u>Treatment Room Lighting</u><br><br>P186 of the ERs implies that luminaires in Treatment Rooms are to be fed from 2 circuits – does this mean 2 circuits to each luminaire? We request guidance on the reason for this.</td><td>-</td><td>NC</td><td>ERs address this item.</td><td>Not Agreed</td><td>BCL bid submission Volume 4 section 4.35 provides for LV distribution split between two distribution boards.</td><td>Light fittings shall be on one circuit generally. Patient treatment areas, where procedures will take place, to have minimum of two lighting circuits.</td></tr>
</table>

|---|---|---|---|---|---|---|---|
| | | | | | | | |
| 010 | Could you please provide the final version of the Geo-Environmental Report as the current version is in draft form only. | - | Info | This information was issued to bidders for background/information purposes. | Agreed | Please note that we have not received the final SI report. Brookfield submission allows for risk. Further SI to be undertaken. | BE to check records as disc was uplifted from the offices of Currie & Brown |
| 011 | The Drainage Strategy Report makes reference to a Drainage Impact Assessment being undertaken by Scottish Water in 2007. Could a copy of this report be provided? | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | | n/c |
| 012 | The Drainage Strategy Report is in Outline Form only – can you confirm:<br><br>Whether a Hydraulic model of the Linthouse Burn has been undertaken and provide the information?<br><br>What discussions have taken place to date with Scottish Water regards drainage capacity at the nearby treatment works?<br><br>What discussions have taken place to date with SEPA regards surface water drainage to the existing culverted watercourses that run through the site? | - | Info | Development Impact Assessment is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | See comment on Labs below. | n/c |
| 013 | Although the Car Parks and future works are not included in the current scope, can you clarify whether the Drainage Impact Assessment and design of the future works needs to account of any changes to the surface runoff and/or foul drainage i.e. is it a site-wide scheme with input from others? | - | Info | No action required with regard to this RFI. | Agreed | Brookfield bid submission includes for the new drainage system required for the Works, and the currently identified Car Parks and requires timely input from Board and Third Parties in regard to information re Car Parks. | n/c |
| 014 | Notwithstanding Volume 2/1 section 2.3 can you please clarify the extent of the demolition and site clearance that will be undertaken by others and the status of the ground at the time of handover to the successful contractor? | - | NC | ERs address this item. | Not Agreed | Site levels still to be confirmed by the Board. BCL proposals based on working from existing levels. | Assume existing levels are retained at completion of demolition |
| 015 | Could you please provide a list of available archive information in relation to the site, and clarify when this will be available:<br><br>Buried Services, drainage, LV, HV,<br>Existing Structures incl foundations and buried structures<br>Topographic Survey | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | Brookfield submission allows for any impact in risk register. | BE Risk item. |
| 016 | We note that there is Japanese Knotweed present on the site, can you clarify whether this affects the construction areas and if this will be dealt with in the site clearance contract or main contract? | - | NC | ERs address this item (topic is on Board Watchlist). | Agreed | Brookfield would note that this is a Board Risk item. | n/c |
| 017 | Could you please provide copies of the existing fire strategy documentation relating to adjacent buildings, or alternatively confirm that it is acceptable to contact the Fire Officer direct? | - | Info | No action required in respect of this RFI. | Not Agreed | BCL have an obligation to liaise with the Fire Officer and not to detrimentally affect fire strategies of other adjacent facilities. The design has been developed to meet the requirements of SHTM 86 insofar as supporting a reasonable and ordinary fire risk assessment by the Board and no adverse fire safety issues will be created to the existing hospital by the proposed design.<br>However in order to develop the fire strategy we will need to review the | Board to provide copies of existing Fire Risk Assessments/Fire Action Plans. These will be uploaded to BIW Volume 6. |

|---|---|---|---|---|---|---|---|
| | | | | | | | |
| 026 | Can the board confirm that the currently vacant area of “green zone” land can be made available for use by BCL during the construction of the laboratories. | - | Info | RFI closed as more specific information relation to this query was subsequently issued by the bidder. | Agreed | | n/c |
| 027 | Can the Board provide a rough quantity of crushed material that could be left on site following the demolition of the existing buildings. It is likely that this material can be reused for a piling mat and subbase offering some commercial benefit. | - | Info | No action required in respect of this RFI. | Not Agreed | The board did not advise a quantity of crushed demolition material they stated “quantities not available at this time”. Brookfield assumed crushed materials would not be removed from site. | Material can be used by BE if required. Piling is BE issue and risk of need to import pile mats if demolitions arising are not usable rests with BE. |
| 028 | The nature of pathology and microbiology in particular, requires that departments take into consideration statutory requirements and recommendations made under the following:<br><br>Home Office, Anti Terrorism Crime and Security Act 2001, part 7<br>Home Office, Personnel Security Measures for Laboratories, 2005<br>London First and National Counter Terrorism Security Office, Secure in the Knowledge, 2005<br><br>With this in mind, please can you provide us with the measures proposed, to ensure the safety and security of all staff, equipment and controlled substances including micro-organisms that have a bearing on the design and specification of the architectural elements of the project. e.g. provision of a robust controlled access system, cladding design, internal partition design, door specification, CCTV. | - | Info | Any specific requirements have been included in the Laboratories design. | Agreed | | n/c |
| 029 | **CLINICAL SPACE DEFINITION**<br><br>At the M&E break out session at Design Dialogue Meeting 2 we were advised that a list of spaces defined as “Clinical” as referred to in to ERs was available.<br><br>Please could the Board forward a copy of this.<br><br>Response required by 9th June 2009 | - | Info | No action required in respect of this RFI. | Not Agreed | Board to forward the information as requested? | From a services perspective, it is understood that query relates to sealed luminaires and not using clinical spaces to access services. Sealed fittings will not be required unless procedures take place in the area.<br>Access to services should not be via high utilisation areas |
| 030 | **Existing Infrastructure**<br><br>Please provide records of existing site wide services infrastructure.<br><br>We request a response by 9th June 2009. | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | Brookfield submission allows for any impact in risk register. | n/c |
| 031 | **Dual electrical distribution**<br><br>We query the required extent of dual unified distribution paths for **all** electrical systems, i.e.: departments fed from two boards, side A and side B, and interleaving of final circuits.<br>We assume that this requirement applies to Risk Category 3 and 4 departments only.<br>We propose that lower risk category departments will be provided with unified supplies, i.e.: departments provided with a single distribution board fed from either side A or side B, but not both. | Y | - | Statement that dual unified distribution paths to be provided for all departments to be included ERs for clarity. | Agreed* | * Subject to confirmation that this is clearly defined in line with Brookfield submission within the Works Information 1 (Employer Requirements). Brookfield bid submission includes for dual unified supplies | This appears compliant (see item 68 below for further comment) |

| Ref | Information Requested | Add | No Change / Info | Board Comment 1 | Status | Brookfield Comment | Board Comment 2 |
|---|---|---|---|---|---|---|---|
| | We request a response by 9th June 2009. | | | | | | |
| 032 | **Lighting Controls**<br><br>The ERs refer to automatic lighting controls in a number of places.<br><br>We propose the following simplified lighting control strategy for your consideration and comment:<br><br>A mixture of automatic 'absence' and 'presence' detection will be provided.<br><br>Presence detection : detector switches lighting on and off.<br>Provided to intermittently occupied areas such as WCs, en suites, corridors, ward kitchens, stores, plant rooms, services risers, hospital streets, bathrooms etc.<br><br>Absence detection : lights manually switched on, detector extinguishes lighting in unoccupied room.<br>Extent of provision to be agreed but likely to cover offices, consulting rooms etc.<br><br>In addition, in rooms benefiting from daylight, luminaires near windows will be dimmable, regulated by the amount of daylight available.<br><br>The ERs require lighting in corridors to be dimmed when unoccupied and scheduled by BMS. We do not believe that this will be necessary as the detectors will extinguish lights in unoccupied areas regardless of the time of day.<br><br>The ERs require dimmable lighting 'throughout'. Please clarify if this means each room regardless of available daylight and function.<br><br>We request a response by 9th June 2009. | - | NC | Lighting controls on Board Watchlist. | Not Agreed | BCL included for the simplified proposal as outlined in the RFI and this is contained in our bid submission. | Generally accepted. The reason for the "watch list" is to focus the Board on monitoring compliance going forward<br><br>Brookfield to substantiate that the proposed system will function as described in relation to the automatic dimming regulated by the amount of daylight available. |
| 033 | **Service Capacity Reserve**<br><br>With reference to ITPD Vol 2/1 Clause 8.1.25.1 please could you clarify the extent of reserve to major items of equipment.<br><br>Whilst an expansion of 25% is common on electrical systems, when applied to mechanical plant this leads to significant oversizing and potential inefficient running in terms of energy use which could affect the proposed energy target, and also result in poor control.<br><br>Response required by 9th June 2009 | Y | - | Statement that energy matching by modular selection of plant and provision of integrated controls to be included in ERs for clarity. | Agreed* | * Subject to confirmation that this is clearly defined in line with Brookfield submission within the Works Information 1 (Employer Requirements). | See response to Item 003, above. |
| 034 | **Site Heating Loads**<br><br>The calculation of heating loads for the new hospitals are given in Appendix M&E.2 / 2.0 and broken into heating, ventilation and HWS. Please could you provide the basis of calculation for the heating and ventilation loads.<br><br>Response required by 9th June 2009 | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 035 | **Variable Volume Pump Systems**<br><br>The Board's exemplar schematics for heating and cooling systems | - | NC | This item is on the Board Watchlist. | Not Agreed | Brookfield submission includes for VVP systems | 2 port valves introduced by bidder for energy saving.<br>Valve selection is critical-to be |

| Ref | Information Requested | Add | No Change / Info | Board Comment 1 | Status | Brookfield Comment | Board Comment 2 |
|---|---|---|---|---|---|---|---|
| | indicate constant volume flow systems with 3 port valve bypass control of equipment.<br>We would wish to provide variable volume pumping (VVP) systems utilizing 2 port control valves and differential pressure control.<br>VVP systems can reduce electrical consumption for pumping significantly, and we feel that this is an essential requirement to meeting the carbon target required.<br><br>Response required by 9th June 2008. | | | | | | selected to reflect actual duty.<br><br>This item to be retained on board watch list through design and installation. |
| 036 | **Re: Community Engagement**<br>Further to the Logistics meeting no 2 and as directed we would be pleased if Mark could arrange an introductory meeting with the following:<br><br>Ross Campbell: Glasgow Regeneration Agencies<br>Sharon McGrath: City Building<br>Maggie Lennon: Bridges Programme<br>Morag Keith: West of Scotland Colleges Partnership<br>Hugh McCafferty: Construction Skills<br>Jim Brown: EU Skills<br>Ian Stirrat: Summit Skills<br>Robert Andrew: Supplier Development Programme<br>Lauren McNichol: Glasgow Chamber of Commerce<br>Stewart Farmer: Federation of Small Businesses<br>Jillian Moffat: Scottish Enterprise<br>Gerry Higgins: Community Enterprises in Strathclyde (CEiS) | - | Info | Addressed during Competitive Dialogue sessions/meetings. | Agreed | | n/c |
| 037 | Within the laboratory building mention is made of animal holding facilities but no further reference found, nor area identified on drawings. Please confirm is this statement is a correct requirement or purely an oversight in document preparation. | - | Info | No action required in respect of this RFI. | Agreed* | Board confirmation during dialogue session that facility will not be used for any animal holding. | n/c |
| 038 | Please confirm the number of floors currently proposed on the laboratory building is as follows:<br><br>Level 0<br>Level 1<br>Level 2<br>Level 3<br>Level 4<br>Roof,<br><br>along with the number/size of floors to be considered as potential future accommodation. | - | Info | No action required in respect of this RFI. | Agreed | On the basis that Works Information 2 takes precedence over Works Information 1 in the event of conflict | But there is no WI2 for labs? – only one set of drawings + Vol2/2 written narrative? Or do BE think their LABS option is being taken? |
| 039 | Within the laboratory building, please advise expected pattern of usage for the office pod central conference facilities e.g. intermittent/constant etc, as this will influence potential services solutions.<br><br>Also, will main conference facility have a raked floor? | - | Info | Any specific requirements have been included in the Laboratories design. | Agreed | On the basis that Works Information 2 takes precedence over Works Information 1 in the event of conflict | But there is no WI2 for labs? – only one set of drawings + Vol2/2 written narrative? Or do BE think their LABS option is being taken? |
| 040 | Within the laboratory building, suggestion is made that the office pod will have some public access.<br><br>Please advise whether the level of public access to the office areas will dictate that openable windows will have openings limited to 100mm (This will impact on effective natural ventilation). | - | Info | Any specific requirements have been included in the Laboratories design. | Agreed | On the basis that Works Information 2 takes precedence over Works Information 1 in the event of conflict | 100mm opening limitation is a laboratories ER requirement<br><br>But there is no WI2 for labs? – only one set of drawings + Vol2/2 written narrative? Or do BE think their LABS option is being taken? |

|---|---|---|---|---|---|---|---|
| 051 | **Linthouse Burn**<br>Please confirm who owns and maintains the Linthouse Burn culvert out with the site boundary. If upgrading of the culvert and open channel is required have any discussions taken place with the respective owners with regards to this issue? If so please confirm these discussions and the implications of any agreements reached. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 052 | **URS DIA Report**<br>Executive Summary – foul and surface water drainage strategy. 1st bullet point states that "the future development is to be served by a separate foul and surface water drainage infrastructure where practicable".<br><br>We would be pleased to receive your thoughts on the definition of "practicable" as this is open to interpretation and could have significant cost implications if, for example, it's the Board's requirement that the entire existing network has to be split into foul and surface water systems. Or alternatively is it deemed acceptable to undertake the minimal from an engineering and Scottish Water approval perspective. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 053 | Please provide copies of correspondence confirming agreement of drainage strategy from stakeholders i.e. Scottish Water, SEPA and Glasgow City Council Flooding Dept. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 054 | Please provide copies of correspondence with SEPA regarding consultation on CAR requirements. Please also confirm discussions with SEPA regarding CAR requirements for the front end buildings e.g. Labs and multi-story car park. | - | Info | No action required in respect of this RFI, the Contractor remains responsible for the relevant CAR requirements. | Agreed | | n/c |
| 055 | SEPA published flooding maps indicate that during a 1 in 200 year storm event (0.5% probability) there is potential flooding to the north west corner of the site at building ref 'AG'. In the absence of more detailed information please confirm flooding protection to the existing buildings are excluded from this contract and that we should only consider 1:1000 year return periods for new buildings. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |

|---|---|---|---|---|---|---|---|
| 056 | It would appear from the Travel Plan that considerable detailed work or a Transport Assessment has been undertaken on the site. We would be pleased if you could provide us with a copy of this document to understand in more detail the discussions that have taken place.<br><br>In the absence of a Travel Assessment please confirm the following:<br><br><u>FM Building</u><br>The service access to this building is by Hardgate Road, is there a restriction on how many access ways are need to be provided?<br><br>As discussed in dialogue meetings we would welcome your thoughts on whether the position of the building could be moved east?<br><br><u>Transport/Parking Provision</u><br>• Please confirm requirement for the number of taxi parking bays for children's and adult entrance and along the site?<br>• Please confirm requirement for the number of visitor drop off spaces for children's and adult entrance and along the site?<br>• Please confirm the maximum bus size to access the site.<br>• Please confirm requirement for the number of visitor drop off spaces near entrances?<br>• Please confirm number of disabled parking spaces required in addition to the capacity of the multi-storey car park?<br>• The "fastlink" service is to be provided by "bendy" bus or normal bus, is this access exclusive for bus service or can be used for taxis and visitor drop off? Does this service need to be able to turn around within site to enter and exit via Govan Road.<br><br>From the exemplar drawings appear to include the following provisions - please confirm<br><br>*7 bays - Taxi*<br>*44m drop off - along the Blue Light Road*<br>*25m drop off- along the Blue Light Road by the Urology/dermatology building*<br>*2 passing bay- along the Blue Light Road by the Pharmacy building and Neurosurgical building*<br>*7 drop off bays- to the adults entry*<br>*43m drop off - to the children's entry*<br>*24m drop off- to the FM building*<br>*32m passing bay- to the FM truck entry road*<br>*32m bus bay- assumes a bendi-bus*<br>*32m waiting bay assumes a bendi-bus*<br>*30m drop off bay- to Hardgate Road next to the Sub-station in the car park* | Y | - | Relevant responses to be included in ERs for clarity as minimum requirements (e.g. drop offs, transport interchange) – as noted in the RFI, however, Planning will dictate specific requirements on the site. | Agreed* | * Subject to confirmation that this is clearly defined in line with Brookfield submission within the Works Information 1 (Employer Requirements). | As stated in Board Comment 1 – the drop off etc in the RFI to be met, with planning dictating actual outturn requirements. That is, BE submission not being overwritten into ERs. The ERs state what is required (incl the RFI responses) wit BE to achieve this (as amended by planning). |
| 057 | Please find enclosed preliminary main office proposals and location mark-up on the Ogilvy Site off Hardgate Road.<br><br>These drawings will be developed to show door and workstation positions etc. and specifications will be produced, however, we request your initial comments | - | NC | Response is included in bid return, this on Watchlist to be developed and agreed with Brookfield prior to mobilisation. | Agreed | | n/c |

| Ref | Information Requested | Add | No Change / Info | Board Comment 1 | Status | Brookfield Comment | Board Comment 2 |
|---|---|---|---|---|---|---|---|
| 058 | Following logistics dialogue meeting No 2, can you please confirm when buildings AV and AW are to be demolished (existing Boiler House and Works Dept)<br><br>Information requested for our hoarding line proposals | - | NC | On Board Watchlist for discussion with Brookfield to agree exact delineation of site hoardings prior to mobilisation. | Agreed | | n/c |
| 059 | Following Logistics Dialogue meeting No 2, can you confirm the Boards intent to demolish existing buildings within the October 2010 phase during the summer of 2010.<br><br>(Drawing PD-HLM-S(00)X-XX-005 Buildings BD, BE,BF, BG, BH, BI and BJ | - | Info | No action required in respect of this RFI, however as discussed at the meeting with the Board of 18 November 2009 Currie & Brown shall issue a package for pricing the demolition works in relation to these buildings. | Agreed | | n/c |
| 060 | Our RFI's 058 and 059 request dates for some existing building demolition by the Board.<br><br>Could you please advise indicative dates for demolition of other areas not by the Bidder.<br><br>This information is requested to assist us in preparation of Vol. 3 Site Interface Appendix A – Bid Deliverable item 10.1 | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | | n/c |
| 061 | Reference is made in the briefing documents to exposed structural soffits in the laboratory areas. Given the extent of engineering services at high level, especially close to the plant pods, is the client team satisfied that the level of exposed services will be complimentary to the "quality" environment required for the lab areas? | - | Info | Any specific requirements have been included in the Laboratories design. | Agreed | On the basis that Works Information 2 takes precedence over Works Information 1 in the event of conflict | But there is no WI2 for labs? – only one set of drawings + Vol2/2 written narrative? Or do BE think their LABS option is being taken? |
| 062 | Fast link<br>Please confirm if provision for fast link turning is required within the site or is the statutory minimum requirement such that only a through route for the fast link is required as a minimum.<br><br>We would note that at the architecture sub-group (bidder day #3) it was advised that provision for turning was required however, at the C&S sub-group URS confirmed that the minimum required was for a through route only.<br><br>Please clarify accordingly. | - | Info | The requirement and solution will be developed and provided by Brookfield in response to Planning/Transportation requirements which they are responsible for achieving. | Agreed | | n/c |
| 063 | We note the information currently set out in Volume 2/1 Section 7 (7.2.26 to 7.2.29 inclusive) with regards the helipad at roof level. In order to assess more fully we would be pleased if the Board can confirm loading information of the helicopter proposed for the new hospital. In particular, please indicate maximum loads that are exerted on the roof structure. | Y | - | Reference to loads to be included in ERs for clarity. | Agreed* | *Subject to ER's being updated to reflect Brookfield bid submission. | Compliance with HBN 15-03 Hospital Helipads required. |

|---|---|---|---|---|---|---|---|
| 068 | **Dual Electrical Supplies – Supplementary Query**<br><br>Further to our previous RFI in which we queried the required extent of dual unified distribution paths for all electrical systems we confirm our interpretation of your requirements:<br><br>As required by the ERs and as confirmed by the Board in DDM#3, all departments will have dual unified supplies i.e.: departments will be provided with two distribution boards, one fed from side A and one from side B of the network.<br><br>In general, in rooms within departments, the final circuits will be interleaved such that each room is fed partially from side A and partially side B of the distribution network.<br><br>However, Clinical Risk Category 1 and 2 rooms within departments will **not** be provided with interleaved final circuits. Determination of Risk Categories will be as defined by SHTM 06-01, 4.19 and 4.20. | Y | - | The requirement for all rooms to be provided with interleaved final circuits to be included in ERs for clarity. | Not Agreed | Clinical Risk Category 1 and 2 rooms within departments will **not** be provided with interleaved final circuits. Determination of Risk Categories will be as defined by SHTM 06-01, 4.19 and 4.20. | Concern is corridors and consultation rooms.<br><br>Only exception should be stores and any accommodation with a single light fitting or single socket outlet |
| 069 | **33kV substation**<br><br>Please advise the dimensions of the 33kV substation, LxWxH. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 070 | As per item 2-43 of logistics competitive dialogue 2 we would attach our draft Site Waste Management Plan (SWMP) for your comment.<br><br>Please pass this document to WRAP for comment against their procedures and benchmarking protocols. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 071 | Further to RFI 026 please advise if the 3 areas of unoccupied land (or any part of) as highlighted on the attached sketch BE-LOG-SK/DJ/1008 could be made available as part of the Nov 2009 phased handover to facilitate New Laboratory development site offices, car parking, and haul routes.<br><br>We would confirm that occasional access to the VIE compound and turning for oil vehicles would be afforded through site haul roads and gates | - | Info | No action required in respect of this RFI. | Agreed | Land confirmed as available for BCL use | Logistics agreement for contract signature to confirm areas of land, shared car park etc. |
| 072 | Find attached our Hoarding proposals to the South and East site boundaries for your review and comment.<br><br>We would note that we have identified 2 possible relocation options for the Bus stop which we can include in the discussions for Logistics dialogue 3 prior to your response.<br><br>We would also request demolition date associated with the works department building to allow co-ordination of hoarding road and service diversion works | - | NC | Response is included in bid return, this on Watchlist to be developed and agreed with Brookfield prior to mobilisation. | Agreed | | n/c |
| 073 | Further to Logistics Dialogue meeting Minute 2-26, please find attached our updated site access hoarding and storage routes layout to Laboratory Development (Dwg BE-LOG-SK/DJ/1004A that includes access to VIE and for demolition works.<br><br>We would request your review and comment. | - | NC | Response is included in bid return, this on Watchlist to be developed and agreed with Brookfield prior to mobilisation. | Agreed | | n/c |

| Ref | Information Requested | Add | No Change / Info | Board Comment 1 | Status | Brookfield Comment | Board Comment 2 |
|---|---|---|---|---|---|---|---|
| 074 | **Ref Laboratories Building site area**<br><br>We are aware that the relocation of the compactor will be carried out by the Board. Please confirm that the remaining concrete base and hard-standing are included in that removal package of works by the Board's demolition contractor. | Y | - | Per discussions at the meeting with the Board on 18 November 2009 this is to be moved to the location adjacent to the CMB. | Agreed | Subject to confirmation as well that the concrete base and hardstanding will also be removed. | Technical Clarification 20nr (on BIW) and RFI confirm that base and hardstanding (as well as fencing etc) to be removed by Works Contractor (i.e. BE). |
| 075 | **Re: Board Spend profile**<br>Further to the Commercial Dialogue meeting no 2 we tabled a standard cash flow model and would welcome any comments the Board has in this regard.<br><br>In addition, it was stated by the Board that your own spend profiles are year end (March). We would be pleased to receive details and parameters of the Board's cash flow for each year so that we may review accordingly against those parameters. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 076 | Existing Drainage<br>There is reference in the URS Drainage Impact Assessment; " NSGACL NHS Greater Glasgow & Clyde - NSGH Drainage Strategy Report_iss2_revA.pdf " (section 3.3.3) to an NHS assets survey which also included a CCTV survey carried out in 2003. We would be pleased if the Board could provide a copy of this survey. | - | Info | No action required in respect of this RFI. | Agreed | | n/c |
| 077 | At the last Labs/FM Dialogue, we were advised that the architectural plans and elevation drawings reviewed by BMJ Architects would be issued via BIW, in pdf. and DWG formats, however we do not yet appear to have been issued these in the addendum uploaded to date. | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | | n/c |
| 078 | **UPS Provision**<br><br>The ERs require all Isolated Power Supply Units in Risk Category 5 areas (group 2 locations) to be supported by UPS with 3 hour autonomy.<br><br>SHTM 06-01 recommends a typical autonomy of 60 minutes for theatres and 15-30m for non theatres.<br><br>We are concerned about size, weight and cost. To illustrate what a 3 hour autonomy means in practice we estimate that for the adult Theatres there would be 2 no. UPS rooms each approximately 12mx4m with batteries weighing approx 30 Tonnes.<br><br>Similarly, the ERs require a UPS of 2 hour autonomy for the 2 server rooms. Typically the autonomy of a server room UPS is significantly less than 2 hours, the principle being that the UPS is provided to enable seamless operating during the brief period between mains failure and generator start up. In the unlikely event of generator failure the autonomy of the UPS should be sufficient to enable a controlled shut down of the servers, say 15 minutes.<br><br>Your comments would be appreciated.<br><br>Response required by 26th June 2009 | - | NC | This item is on the Board Watchlist for compliance by the Contractor to be fully demonstrated. | Not Agreed | Brookfield proposal includes for design in compliance with SHTM 06-01. | 15 min for non Theatre UPS is not acceptable, 30min minimum to allow intervention if required<br><br>15 min for servers is not acceptable, 30min minimum to allow intervention if required |

|---|---|---|---|---|---|---|---|
| 079 | Drainage & Sewers Impact Assessment compiled by Black & Veatch dated Jun 07 states the following on page 3.6<br><br>The following options have been considered for diversion of Jenny's Burn Culvert:<br>(a) Option 1<br>The new development will include landscaped areas and roads as well as the new hospital<br>buildings. It may be possible to find a gravity route through the development site which<br>follows a road or footpath and therefore minimises impact on construction of the<br>buildings. As it may follow the most direct route between upstream and downstream<br>connection points, this may be the lowest cost option for diversion of Jenny's Burn<br>Culvert.<br>However, this option would require agreement from the developer to incorporate the<br>culvert into the layout of the new hospital grounds. Following discussion with the NHS, it<br>was confirmed that routing the diverted culvert through the new site is not permitted.<br><br>Please confirm if this constrain still exists in terms of re-routing Jenny's Burn? | Y | - | Diversion through the site permissible to be included in the ERs for clarity. | Agreed | | n/c |
| 080 | Further to RFI 071 please advise if the 3 areas of unoccupied land (or any part of) as highlighted on the attached sketch BE-LOG-SK/DJ/1009 could be made available prior to the dates identified on the phased handover drawings.<br><br>Area 4 is requested as part of the Nov 2009 phased handover to facilitate New Laboratory development site offices, car parking, and haul routes.<br><br>Areas 5 and 6 are requested for June 2010 to provide early access to carry out road works to establish hoarding lines and commence any necessary Culvert and Foul drainage diversion activities. | - | NC | Response is included in bid return, this on Watchlist to be developed and agreed with Brookfield prior to mobilisation. | Agreed | | n/c |
| 081 | It is noted that the footprint currently identified as the Maternity Unit on the topographical and existing layouts for that building does not reflect the construction as existing. Further to the logistics dialogue meeting #2 minute 2-39 and logistics dialogue meeting #3 minute 2-33 we would be pleased if the Board can confirm by illustration the pinch points/logistics for the maternity access to be included as part of their review and response to this. | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | | n/c |
| 082 | **FM Building layout and location**<br><br>We are in receipt of the latest FM DWG files. However upon review they do not appear to reference into our drawings in the correct location. We would be pleased if the Board could provide us with the latest FM floor plans in DWG format with a reference point that we can align with either the existing survey or exemplar scheme so that the building can be placed accurately. | - | Info | This information is addressed under the BIW Log to be issued to Brookfield under separate cover. | Agreed | | n/c |

|---|---|---|---|---|---|---|---|
| 145 | Re: Cladding Materials to Labs & FM Buildings<br><br>There seems to be some discrepancy on cladding material information shown on the Planning drawings compared to information in Pricing Schedules and the Outline Architectural Specifications. We would be pleased if the Board would clarify and confirm which document takes precedent. | - | Info | This will comprise an aspect of the Stage E Laboratories Design Information | Agreed | | Planning drawings and outline specification take precedence per original RFI response. |
| 146 | Further to TAD 00025 with the Laboratories Ecological Report attached, we would be pleased if the Board would confirm if it is the intention of the Board to procure a Bat Survey on the Laboratories the Energy Centre Site and the Main Hospital Site as indicated in the URS Report dated July 2009 section 6.1.2 , Page 7. | Y | - | The bat survey is available from the Board w/c 23 November 2009. | Agreed* | *Bat survey is still awaited. | Bat survey will be uploaded to BIW Volume 6 (new volume) |
| 147 | Re Energy Centre<br><br>We would be pleased if the Board would urgently confirm the start date of the Energy Centre as there appears to confusion as to the verbal advice given at the last dialogue meeting. | - | Info | No action required in respect of this RFI. | Agreed | Brookfield would note that all Works in this regard is currently included in Stage 3 Works. | Energy Centre will be part of Stage 3 and expectation is that the shell, as a minimum, will be completed in year 1 to coincide with completion of laboratories. |

**New South Glasgow Hospitals Project**
**Bid Submission Clarifications**
**Bidder: 1 (Brookfield)**

| Item | Topic/Bid Reference | Board Clarification | Bidder Response | ADD | NO CHANGE / INFO | BOARD COMMENT |
|---|---|---|---|---|---|---|
| Technical Clarification 1 | | | | | | |
| **General** | | | | | | |
| 0.0 | | | | | | |
| **Logistics** | | | | | | |
| 1.0 | Site Parking | You have options but no firm plans for site parking, please confirm that the provision for site parking (incl any delivery area/holding area/lay-down areas off site) for all phases are included in your priced bid. | Brookfield have considered a number of options with regards to temporary parking/holding areas etc during the construction period and should we be selected would wish to discuss with the Board and other interested parties these arrangements to develop a strategy for the benefit of the Project. In the meantime, we confirm our prelims identify pricing allowances for the relevant Stages and refer you to the logistics section. In addition, our procurement strategy with regards the supply chain will include for the provision of temp parking spaces and this will be identified in the cost when packages are let accordingly. I.e. the amounts in the Prelims will be supplemented by amounts in the trade cost plan. We also recognise that using local labour will enable us to encourage the use of public transport to mitigate the requirement for extensive on site/off site temporary parking. Finally whilst we identified on the risk register temporary parking as being an issue to resolve, we felt a combination of the above will be sufficient to deal temporary parking and this reduced the risk element to acceptable. | | NC | Costs contained within prelimns, trade cost plans and risk<br>Brookfield will provide a summary paper of draft proposals for off site parking |
| 2.0 | Delivery Team | Several of your proposed delivery team appear to have commitments to another healthcare scheme (i.e. Peterborough). Please confirm how your delivery team will be deployed in line with the NSGH timescales and your programme requirements. | We reaffirm our commitment that the proposed delivery team will be deployed in accordance with the NSGH timescales and our programme requirements. Taking each stage:<br><br>- Labs Construction Team:<br>The individuals noted are available now, and no longer have commitments on Peterborough.<br><br>- FBC/Core team:<br>The individuals are available now, and have already been working on the NSGH project.<br><br>- Adult/Children's Team:<br>The individuals identified will be available before November 2010.<br>At Peterborough, the Mental Health Unit and City Care Centre have already been completed on programme and handed over to the Trust earlier this year. This has released some of the individuals who have since being involved in the bid submission. The main Acute facility is 3 months ahead of programme and notice will be given shortly to confirm the end of September 2010 date for handover. Many departments are being closed off progressively (as some of the Board's team will have witnessed during the recent site visit). By the end of 2009, the Acute facility will be into testing and commissioning phase and we are confident that a September 2010 completion is likely and the individuals will be available as scheduled. | | NC | |
| **Design/HP** | | | | | | |
| 3.0 | Entrances | Confirm your proposals for significant entrances to the site per ER requirement in this regard. | The NSGH campus masterplan has been configured to provide clear entrances which lead directly to the primary arrival space at the heart of the campus. Entrances have been designed in plan form to provide the | | NC | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | necessary function and capacity to respond to highway requirements associated with the various modes of transport. Significant entrances are to be delivered as features within the context of both the wayfinding and public art strategies. The entrances are important as part of the legibility and identity of the rejuvenated hospital campus. To achieve this it will be necessary for the design team to work with the Board to determine the correct balance between an innovative and unique site-specific response (informed by public art) and the guidance for standardised signage contained within the NHS Scotland guidance for signage and branding for use within NHS sites (which we have reviewed). For this reason our designs have not been developed beyond the concept stage in advance of Stage 2 engagement. The attached concept images illustrate the general potential for an entrance feature sign at the primary Govan Road entrance to<br>the site, but should not be considered a firm design proposal at this point. We can confirm that the commercial proposal includes provision for this approach.<br><br>Our drawing GIL-WS-00-PL-502 illustrates the signage hierarchy and proposed locations for the various sign types. This includes the proposed location of campus gateway signage features at the key entrances to the campus. It is intended that the main entrances should include feature lighting as part of the significant entrance features. It should be noted that the entrances need to be considered in parallel with the design and quality of the main arrival square, as this forms an important part of the entrance and arrival sequence and experience. The point of entrance and the route to the arrival square should therefore be considered as part of the entrance arrangement. | | | |
| 4.0 | Specification | Confirm your proposals for electronic information points per ER requirement (7.15.4) in this regard. | In response to the ER requirement (7.15.4) we have made provision for 1x 'Real Time Public Transport System' electronic Information Point externally at the Bus Drop-Off Area.<br><br>Additionally, in response to ER requirement (7.2.19), as part of our Wayfinding Strategy we have proposed electronic/interactive 'You Are Here' maps in the Main Entrance Foyers to both the Adult and Children's Hospitals.<br><br>Please refer to our Wayfinding Strategy contained within **Volume 3.0; Section 3.2** for further details of our proposals and imagery. | | info | |
| 5.0 | Interstitial Blinds | Confirm your strategy for interstitial blinds to external windows/façade and internal observation screens (this to include a cross-section detail of your proposal(s)). | Interstitial Blinds have been included in our priced bid to **internal** glazed screens generally to all Bedrooms, including those within Critical Care (Adult Hospital and Children's PICU), AAU and all Inpatient Wards (Adult and Children's Hospitals).<br>In addition, interstitial blinds have been included to internal door vision panels as part of our Internal Door detailed proposals. Our Internal Door Strategy is contained within the Introduction to<br>Volume 2.0; Section 2.21<br>- Door & Ironmongery Schedules. Where a door is noted in the Schedule as being<br>'obscurable'<br>, this equates to a vistamatic type vision panel with interstitial blinds.<br><br>Please note that our priced bid does not currently have a provision for internal blinds or curtains which are not integral to the internal fabric of | Y | | Interstitial blinds are to be included for all external windows.<br><br>This was allowed for as an adjustment to our original bid |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | the building. In our past experience these items would be included in the Equipment List. We have priced this List accordingly as requested by the Board, and would be pleased to debate with the Board further whether these items should be included within the Equipment List.<br><br>With respect to **external** windows, we have included for interstitial blinds to all external windows in patient areas within Critical Care (Adult Hospital and Children's PICU).<br><br>Again, please note that our priced bid does not currently have a provision for internal blinds or curtains which are not integral to the internal fabric of the building.<br><br>Please refer our separate attachments for the requested detailed section drawings, our Internal Glazed Screen Strategy Document and External Windows Privacy Strategy Document. | | | |
| **M&E Services** | | | | | | |
| 6.0 | | | | | | |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| 7.0 | Carbon | You noted at the presentation of 21 September you're your variant 2 for Laboratories will achieve the 80Kg CO2m2 – can you confirm that your compliant bid achieves this target also. | Achieving the 80kg CO2 m2 for both the compliant and Variant Option 1 Laboratory bid will be dependant on the construction of the Energy Centre, with which the overall solution is integrated. **RFI 144** refers and is attached for ease of reference.<br><br>As noted in **RFI 147** (attached) the Energy Centre is dependant on FBC and commencement of Stage 3.<br><br>Variant Option 2 offers an integrated M&E plant solution and the early construction of the Energy Centre shell and core to house it. This may be achieved through an advanced design and planning process and cash flow solution indicated in Volume 16 of our bid submission. | | info | Note that stand alone Labs does not achieve 80kg $CO_2/m^2$ |
| 8.0 | BREEAM | Clarify BREEAM Ene 1 score – 8 and 11 referred to in different sections. | Please note the correct score is 8 and we apologise for the confusion. | | info | |
| 9.0 | Renewables | Confirm which LZC and renewables are included in the bid. | LZC –<br>3MW Combined Heat and Power units.<br>High efficient friction less bearing chillers providing COP 9.<br>1000kW Absorption chiller unit.<br>Active chilled beams.<br>Variable speed pumps.<br>Natural daylighting.<br>Natural ventilation.<br><br>Renewables.<br>12no Vertical axis wind turbines. | Y | | |
| 10.0 | Energy Model | Confirm that the energy model is fully compatible with the servicing strategies set out in volume 3 in particular the use of a sealed building with chilled beams. | Brookfield confirm the energy model is fully compatible with the requirements as set out in Volume 3 in particular the use of sealed building with chilled beams. | Y | Info | Refer to Sustainability and Energy Issues<br>This situation may change dependent upon the conclusion of the ward ventilation issue |
| 11.0 | Energy Monitoring | Confirm that the energy monitoring system illustrated is included in the bid. | Brookfield confirm the energy monitoring system is included in the bid. | | Info | Refer to M&E Schedule for confirmation of position on building metering |
| 12.0 | Energy Management | Has active energy management been included for by BE post construction as per clarification? | Brookfield confirm we will provide active monitoring, reporting and fine tuning during the 24 months DLP period. Please refer to our Volume 3 Sec 3.24 Item 1 Building Services Commissioning Strategy, Post Occupancy DLP Period for further information. | Y | | |

| Item | Topic/Bid Reference | Board Clarification | Bidder Response | | | |
|---|---|---|---|---|---|---|
| Technical Clarification 2 | | | | | | |
| **General** | | | | | | |
| 1.0 | Bid Return Section 5 – Component / Product & Manufacturer Schedule | Noted that M&E related items do not appear in Section 5.<br><br>Clarification required of M&E component/product and manufacturers as well as (for all elements) that listed names will be utilised or "equal and approved" component/product manufacturers. | Full component schedule is as detailed in ***Appendix Q1*** attached<br><br>This indicates the quality of manufacturers proposed for components / products | | | Component manufacturer Schedule to be completed<br>Schedule issued to Board for comment |
| 2.0 | Bid Return Section 7 – SHTM Compliance | **Mandatory Section** – clarification is required with regard to the following items:<br><br>**SHTM85 and SHTM86** – these are relevant as the design joins the existing hospitals, what are the proposals to comply in this regard.<br><br>**Health and Safety Action Notices (HSANs)** – require to confirm will comply with rather than "with reference to".<br><br>**NHSE10 and SN(01)01** – confirmation that anti-ligature is included in A&E as well as DFCP.<br><br>**NHSE HN04** – confirmation that anti-ligature is included in A&E as well as DFCP.<br><br>**SFPN3** – clarification required of how compliance with updated document will be achieved/documented.<br><br>**SHTM2010** – confirmation required that design will comply with rather than "with reference to".<br><br>**SHTM2003** – notes that the services follow the principles set down in the HTM – clarification of compliance with the SHTM required (and specifically compliance with the services dimensions to be provided).<br><br>**SHTM2024 Part 4** – confirmation required that original maintenance provisions are included and priced in the bid. | Full clarifications have been provided in the attached<br>***Q2 Appendix*** | | | Compliance appears generally in order but reference to missing document and reference to other bodies to be clarified, general note accepting compliance narrative in good faith but that compliance would require to be demonstrated during the detailed design.<br><br>Need to check this further, don't have Q2 appendix |
| 3.0 | Bid Return Section 7 – SHTM Compliance | Where no specific options have been listed in your bid return (ref ERs 5.2.3) clarify that all options remain available to the Board with no additional costs to the Board. | We have endeavoured in our bid submission to confirm in detail the basis of our design, specifications and cost plan. To avoid uncertainty these proposals need to take priority over the various options given in the various documents scheduled in tables 2 and 3 of the ER's.<br><br>We are however conscious that within the various documents there are options that the Board may feel would enhance the scheme and assist in producing an exemplar facility. We are more than happy to review any options with the Board, within the confines of the cost plan, to ensure that the optimum solution is adopted across the project" | | | |
| **Logistics** | | | | | | |
| - | - | No items in this TC. | | | | |
| **Design/HP** | | | | | | |
| 4.0 | H+S Landscape | Courtyards – clarify what is intended by white gravel? | The white gravel is a aesthetic material used in geographical arrangements | Y | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | producing dramatic patterned landscapes when viewed from above. This material can be laid loose or bound to correspond to the courtyards function. Please refer to drawings GIL-WS-00-EF-S04 Courtyard Design Intent. ***See Appendix Q4-7 attached*** | | | |
| 5.0 | H+S Landscape | Aside from the separately identified therapy courtyards is there any access or intended function for the remaining courtyards indicated? | The other courtyards have the potential to be accessed depending on the adjacent hospital departments, to be developed further with the board. Please refer to drawings GIL-WS-00-EF-S04 Courtyard Design Intent<br>***See Appendix Q4-7 attached*** | Y | | |
| 6.0 | H+S Landscape | External Works Layout Dwg No. CD-WS-00-PL-711-01 indicates concrete blocks to the front of the hospital. The masterplan Dwg No. GIL-WS-00-PL-100 indicates exposed aggregate concrete paving. The Outline Specification for roads, car parks, pavements and cycle paths suggests paving in these areas will be natural stone granite. Can we clarify actual proposals for these areas? | The palette of materials has been selected to provide a cost effective high quality environment. Natural granite is proposed to the entrance thresholds with concrete pavers with exposed granite aggregate proposed to the arrival square. Please refer to drawings GIL-WS-00-EF-S05 Arrival Square Pavement Design intent<br>***See Appendix Q4-7 attached*** | Y | | |
| 7.0 | H+S Landscape | The drawings indicate a limited number of bike shelter locations (2No.)? Is this correct or are other bike shelter locations intended? | The two cycle shelters shown on the master plan are key structural features place near the main entrances, other cycle stands are located throughout the site in key location. Please refer to drawings GIL-WS-00-EF-S06 Cycle Parking Strategy and GIL-WS-00-PL-115 Vehicle Movements- Cycles<br>***See Appendix Q4-7 attached*** | Y | | |
| **M&E Services** | | | | | | |
| 8.0 | M&E Services | Please indicate any deviations from M&E elements of the ER's. | The following deviations are proposed:<br>• UPS autonomies proposed are compliant with SHTM 06-01 and differ in some respects from the ERs. | | | Refer to RFI Log<br>Agreed |
| | | | • The proposals for automatic lighting controls as described in Volume 3 Section 3.12 and Volume 4 Section 4.3.6 differs in some respect from the ERs. | | | Refer to RFI Log<br>Agreed |
| | | | • A single energy centre is proposed split into two plant spaces with 4 hour fire separation to provide the resilience of two separate energy centres. | Y | | This needs to be accepted as a derogation against the ER's which call for 2 Energy Centres |
| | | | • N+1 has not been provided to all plant as noted in Volume 2/1 Clause 8.1.1.17. N+1 has been included to all energy source plant, pumps, heat exchangers and duplicate motors provided on air handling plant. | | | Addressed on M&E Design Summary<br>Agreed |
| | | | • Dual path distribution has not been provided on all systems as this would be impractical for piped systems and specialist electrical systems, e.g fire alarms. Supplies from the energy centre have an element of duplication for resilience and electrical power distribution has A & B separation throughout using diverse routes wherever possible. | | | Addressed on M&E Design Summary<br>Agreed |
| | | | • Bulk water storage has been based on the busiest 12 hour period rather than 24 hour as suggested in volume 2/1 clause 8.2.8.2. It is considered that with duplicate incoming water mains to the site a reduced water storage capacity will reduce the risk of legionella. | | | Deviation not accepted<br>Awaiting response from Board on ZBP water storage calcs. Brookfield proposal now moves water tanks into Energy Centre. |
| 9.0 | M&E Services | Please confirm that racks will be provided for Client's active equipment. | The following allowances have been made:-10 racks in each of the adult's and the children's hospital main comms rooms, and<br>2 racks in each hub room | | | Deviation from ER's not accepted<br><br>The ER's call for<br><br>C1-C6 External comms<br>S1-S10 Board servers<br>E1-E8 General board equipment.<br>B1-B6 contractors equipment including patching BMS CCTV raid etc.<br>3 racks in each hub room<br>Agreed |

| | | | | | | |
|---|---|---|---|---|---|---|
| 10.0 | M&E Services | Please confirm that BMS IP network will be fully stand alone and that all active equipment has been included. | Yes | | NC | |
| 11.0 | M&E Services | Please confirm that asset tagging system has been included and that all services equipment shall be tagged. | Included | | NC | Plant replacement strategy for large items requires to be further developed in Stage 2 Agreed but should be on comment below |
| 12.0 | M&E Services | What function does scaffolding platform have in plant replacement strategy for transformers and generators. | The scaffolding platform allows a level surface for the equipment to be withdrawn from the plant space and craned off to ground level | | info | |
| 13.0 | M&E Services | Confirm that reference to BOC should be “Air Products”. | Yes | | info | |
| 14.0 | M&E Services | Please provide luminaire details to supplement pictorial views | Refer to separate document outlining details ***See Appendix Q14 attached*** | Y | | |
| 15.0 | M&E Services | Please confirm light switches will be selected to suit lighting control system. | Yes | | NC | |
| 16.0 | M&E Services | Please confirm that bedside adjustable luminaires will be a modern low energy high output units. | Yes | | NC | |
| 17.0 | M&E Services | Please confirm fire alarm PC includes incident location graphics. | Included | | NC | |
| 18.0 | M&E Services | Please confirm that 4 CHP units have been proposed as the narrative (schedule indicates 3). | Three CHP units are proposed | | info | |
| 19.0 | M&E Services | Television outlets on equipment schedule (are these back up for the CAT6A for digital distribution via the patient entertainment system? | YES, This allows flexibility and future proofing | | info | |
| 20.0 | M&E Services | Please provide details on the proposed patient entertainment systems. | Refer to supplementary schematic MER-XX-XX-SM-1400-001 outlining details ***See Appendix Q20 attached*** | Y | | |
| 21.0 | M&E Services | Please advise how Renal & Specialist Departments water temperature requirements will be achieved. | This system will interact with the BMS which monitors the temperature and, if required, dumps RO water from the circulating loop to maintain optimum temperature conditions. A heat sanitise cycle is also allowed for. | Y | | |
| 22.0 | M&E Services | Confirm reference to 5A Switches equipment schedule should be 20A. | Confirmed | | NC | |
| 23.0 | M&E Services | Please confirm that metering will be provided to meet BREEAM requirements. | Yes | | NC | |
| 24.0 | M&E Services | Please advise proposals for water spillage protection from fan coils in secondary comms room. | Drip drays and leak detection | Y | | Positioning of leak detection to be included in ER’s for clarity Amended ER’s to be issue dfor Brookfield to check<br><br>See Item 34 Appendix B |
| 25.0 | M&E Services | Please confirm compliance with maintainability and area isolation requirements. | Maintainability and area isolation will be incorporated in the design to give compliance. Individual rooms will have isolation of components such as sanitary ware and terminal heating/cooling devices. It will not be possible to isolate each individual room for lighting and power. It will be possible to isolate each individual circuit, and with each room having at least two circuits the room will continue to function | | | Electrical compliance noted however operational resilience for water, PMGS, heating, cooling etc to be reconciled in Stage 2. Board indicated that Resilience only referred to Energy Centre and they were to confirm (See item 35 below) |
| 26.0 | M&E Services | Please confirm that the renal Central Concentrate Delivery system is included (adult hospital). | Yes | | Info | |
| 27.0 | M&E Services | Please confirm that all services comply with HAI – SCRIBE. | The Services Engineer will be part of the overall SCRIBE team along with the Board’s Infection Control Manager, Clinical Advisers, Facilities Manager, and Departmental Representatives, plus the other members of the design team and other relevant specialists. The Services Engineer will discharge the duties as set | | info | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | out in HAI-SCRIBE Implementation Strategy | | | |
| 28.0 | M&E Services | Please confirm that all plant and equipment will be suitably isolated to prevent transmission of noise and vibration. | Yes | | info | |
| 29.0 | M&E Services | Please confirm that full environmental proving off all rooms will be provided. | Yes | | Info | |
| 30.0 | M&E Services | Please confirm that all metering requirements will be provided in accordance with the ER's and BREEAM requirements. | Yes | | NC | |
| 31.0 | M&E Services | Please confirm that all services elements are included to meet the fire engineering solution, e.g. stair pressurisation, smoke control etc. | Yes | | Info | |
| 32.0 | M&E Services | Please confirm that ICT cooling has been included and provide details. | Yes, this is achieved with a chilled water solution, via crac units and fan coil units, as appropriate. | | Info | |
| 33.0 | M&E Services | Please confirm that specialist drainage has been included. | Included | | Info | |
| 34.0 | M&E Services | Please confirm that leak detection has been included. | Included | | Info | |
| 35.0 | M&E Services | Please indicate percentage capacity of all water service pipework mains from the energy centre to the main buildings for resilience. | The A and B circuits are sized for 66% of the maximum operational load. The A & B circuits from the energy centre are primary circuits and totally isolated from the secondary plantroom circuits via the plate heat exchanger units. It is envisaged that any routine maintenance | Y | | Addressed on M&E Design Summary<br>Agreed though still to be finalised |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| - | - | No items in this TC. | | | | |
| **Laboratories** | | | | | | |
| 36.0 | Laboratories | The Values on Labs Summary Page for Overhead and Profit do not correspond with % values provided on Stage 1 or Incoming Utility Costs Associated with Stage 1. | This is Correct. The figures are calculated by adding 6.2% plus an apportioned value for overhead recovery. | | | |
| 37.0 | Laboratories | On Labs Final Summary Page (Page 4 of Submission) £281,552.00 in included for Additional Fee and Profit on Max Cost. If you apply the %'s from elsewhere on the page this value would be approx £43K less? | Unlike the way the Board have asked us to submit the MPTC Calculator Brookfield methodology for calculating Overhead and Profit is by taking this amount against Prime Cost excluding Fees which actually means that in the case of the Laboratory Building the gross margin on Prime Cost is circa 7.5% and thus provides the number given. | | | Final Contract MPTC now refers as figures were amended in Commercial Clarification No.3 |
| 38.0 | Laboratories | Can you confirm extent of tunnels included within Stage 1 Section | The bid is based upon the URS and BMJ drawings issued under addendum 34. The basement and tunnels are reduced for the variant option and are as detailed within our Volume 13 of the bid.<br>The extent of tunnels are as per the BMJ demarcation lines identified on the above BMJ drawings | | | Brookfield require the route of the tunnels to be reviewed to ensure that the Labs building and the Adult and Childrens Hospital align. There is currently a mismatch in propose routes that needs to be resolved |
| 39.0 | Laboratories | No evidence of anything noted as "Provisional". Please confirm or provide detail of items to be considered as Provisional. The Bills make reference to "general assumptions". Please confirm that they are not to be considered provisional. | There are no provisional items within the cost plan | | | |
| 40.0 | Laboratories | Substructure: Please confirm what exactly the £100k allowance is for fire escape and stairs includes for. | Fire strategy requirements dictate that an escape tunnel and stair will be required from the basement tunnel that is not currently indicated by BMJ or URS drawings.<br>Cost allowance included is based on similar staircase and concrete enclosure to adult basement tunnel. | | | |

<table>
<tr><td>41.0</td><td>Laboratories</td><td>Substructure: Allowance has been included for 14 Nr lift pits. Please confirm Nrs. Current drawing shows 12 Nr FF, goods & staff Lifts and 4 Nr lifts in connection with Robotics.</td><td>Confirmed, all lift pits are as detailed on the drawings are covered either in this specific item or in general substructure measurement.</td><td></td><td></td><td></td></tr>
<tr><td>42.0</td><td>Laboratories</td><td>Upper Floors: Please confirm all allowances for recesses or thickening of slabs is included.</td><td>Confirmed, included in rates</td><td></td><td></td><td></td></tr>
<tr><td>43.0</td><td>Laboratories</td><td>Stairs:  Number of assumptions/clarifications: Design team to appraise/comment to facilitate in the removal from pricing docs.</td><td>No assumptions made in Cost Plan</td><td></td><td></td><td></td></tr>

| | | | | | | |
|---|---|---|---|---|---|---|
| | | Lifts, 3 Nr Passenger Lifts and 1 Nr Mortuary Lifts. This does not correspond with your bid. Please advise. | | | | |
| 50.0 | Laboratories | Siteworks: Imported fill for backfilling. Is there no potential to re-use excavated materials ? | Option to re-use excavated material is limited and will require extensive double handling and logistical issues retaining a clean site. | | | |
| 51.0 | Laboratories | Siteworks: No inclusion of barrier system to service yard. Please advise. | Included in bid | | | |
| 52.0 | Laboratories | Ext Services: £5k allowed for main water distribution. Seems low | The allowance is for the final connection between a valved connection on the site water mains and the laboratory building boundary.<br>Site water mains and pipe work within the building are covered within the energy centre section. | | | |
| 53.0 | Laboratories | Please provide statement on Inflation allowances included. | Given that this work will be primarily secured in Year 2010 no allowance has been made for any inflation of the Net Package Costs. It is assumed that all packages can be procured at 2009 prices. There is an allowance within the preliminaries for a 3% staff increase in Jan 2010 and a similar increase in 2011. | | | |
| 54.0 | Laboratories | Has audio/visual system to Mortuary been included? If so, where and how much. | An allowance of £10k has been made with the M&E section of the Tender Bid | | | |
| 55.0 | Laboratories | Please confirm that the Cat 3 Containment Facilities Spec referred to in Clause 1.0, Appendix C1.2 of Outline Architect Spec is included. Is so, please advise where and provide breakdown of value. | The wall, floor and ceiling finish items are based on Polyflor.<br>Single Leaf Doors £ 17,500.00<br>1 /12 Leaf Doors £ 5,000.00<br>Wall Finishes £ 47,900.00<br>Floor Finishes £ 17,300.00<br>Ceiling Finishes £ 8,650.00<br>Safe Change Filters £ 12,000.00<br>Cat 3 Light Fittings £ 8,500.00<br>£ 116,850.00<br>All costs above are net of Sub-Contract Prelims (The percentage additions for S/C Prelims are 10% on internal doors, floors and ceilings and 19% on walls) , B.E. Prelims and B.E. OH&P | | | |
| 56.0 | Laboratories | Has allowance been included in bid for various treatments to soffits under 1F slab in open yard or entrance areas? | Included in bid. | | | |
| 57.0 | Laboratories | Design fees included are different to the fees provided to Bidders. Please provide details of difference. | The difference in design fee for the laboratories is due to additional consultants identified as being required to advise on building control and CDM. We have also made an allowance within the risk register to cover additional fees to the design team resulting from an increase in their scope of works | | | These additional fees were subsequently removed and allowance only made for fees provided. Final fee for BMJ was as per advised by the Board in ITSFB in the sum of £1,156,800. |
| 58.0 | Laboratories | Please confirm that all temporary services connections prior to Energy Centre being completed are included | Main incoming services are included within the energy centre section.<br>Allowance has been made for local temporary service connections until Energy Centre is sufficiently progressed. | | | |
| 59.0 | Laboratories | Please confirm that all robotics costs included in Hospital element of bid. | Confirmed | | | Assumed that current Labs building design caters for robotics |
| 60.0 | Laboratories | Please identify any costs associated with pneumatics included in the Labs element of your bid. | An allowance £62,200 has been included within section 5L Communications of the bid. This includes for the distribution Pipe work and Receivers within the Labs, but does not include any of the main plant elements which are included within the main hospital buildings. See Appendix Q60 for further information | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| Technical Clarification 3 | | | | | | |
| **General** | | | | | | |
| 1.0 | LCC | n relation to any perceived LCC benefits/savings over the period, can you provide supporting details/justification of same. | Our Life Cycle Cost Analysis, contained within Volume 12.8 of our submission, provides full details of the breakdown of Life Cycle Costs for each element of the project. We believe that this provides the supporting details/justification, however, should there be any specific areas where you feel further information is required we will be happy to provide it. | | info | |
| **Logistics** | | | | | | |
| - | - | No items in this TC. | - | | | |
| **Design/HP** | | | | | | |
| 2.0 | Energy Centre | Please confirm the location in your compliant bid the Energy Centre Layout plan reflecting the retention of the Stage D Laboratories design. | We would enclose drawing NA-EC-00-PL-251-020 that shows the energy centre from our masterplan located against the stage D laboratory design.<br><br>There is some flexibility with regard to the plan location that would require BMJ input should our bid prove to be successful.<br><br>The laboratory stage D design shows all main plant within the laboratory building plant rooms, which enables the laboratory building to operate stand alone.<br><br>The compliant bid for the Energy Centre does allow for some plant in the current designs; namely Standby Generators and Boiler capacity as detailed in Volume 3 Sections 3.8 & 3.10 and Volume 4 Section 4.55. | | | Subject to Development in Stage 2 |
| **M&E Services** | | | | | | |
| - | - | | - | - | | |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| 3.0 | - | Please confirm that your compliant laboratory scheme will achieve BREEAM Excellent. | Our assessment of the compliant stage D design BREEAM rating is 65 which achieves very good but falls 5 points short of an excellent rating. The main reason for this shortfall is the difficulty in achieving the energy target of 80kgCO2/m2 without linking the laboratory building to the energy centre as confirmed in the Board response to RFI144.<br>There are a number of other options that could be looked at to improve the BREEAM rating such as reduction in CO2 emissions, limiting water consumption etc. These are not currently part of the compliant scheme. | | | Statement required identifying that “excellent” will be achieved via connection to Energy Centre once completed – existing Lab plant to become resilience<br>Agreed based upon stage D design available at tender stage |

| 1.0 | Schedule of Accommodation | Clarity is required with regard to your Schedule of Accommodation. The attached Appendix A identifies the area assessment presently (in column C). Please identify each actual figure in the column D ‘Confirmation’ listing to reflect the following (with item 3 provided separately):<br><br>1. **Gross departmental area** (including planning and engineering and departmental circulation) for each | Please find attached the completed Appendix A which has identified the actual area figures requested to be clarified in column D ‘Confirmation’.<br><br>We have assumed the ‘Y’ noted against Section Number 1 is the Board’s acceptance that this information has already been provided by Brookfield in Volume 1; Sections 1.1, 1.2, 1.3, 1.4 of our Bid Submission.<br><br>In addition, please note that the Total Gross Floor Area noted in our submission | | | Board SoA to be in contract<br>Check on Board comments on Brookfield SofA being undertaken by Brookfield. To be further agreed |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | department and the total for each hospital<br>2. **Net departmental area** (sum of net as drawn/designed rooms only) for each department and the total for each hospital<br>3. **Net room areas** (excluding all ducts, pipe boxing and service zones) listed room by room and by department<br>4. **Circulation area** (departmental) for each department and the total for each hospital<br>5. **Communications and plant areas** (interdepartmental circulation horizontal and vertical and main plant rooms and risers) for each hospital<br>**Total gross floor area** for each hospital. | did not include the % Planning allowance. This SOA was generated by Codebook, and was an accurate 'As Drawn Area' which excluded the thickness of the internal partitions. This has now been included in the completed Appendix A. These figures represent the GIFA which has been priced and included within the Cost Plan. | | | |
| 2.0 | MRI replacement | Please confirm your proposals (methodology, routes and structural provision to support) the replacement/retro fit of MRI equipment. | In the absence of specific MRI product information, the building footprint areas identified on the plans as housing MRI installations have been checked against a 7.5 tonne magnet installation (example from a recent comparable project).<br>In each case it was noted that the floor and foundation structures as currently presented could be appropriately detailed to facilitate the incorporation of this equipment.<br>The proposed transit route for the MRI installation is not known but is expected to be either through double access doors at ground level, along corridors and possibly via a wall knock-out access panel into the proposed room. Alternatively, the MRI unit could be delivered to the FM area and transported via the service tunnel to a lift and then to the corridor etc as above. The floor and foundation structures for the possible routes noted above have been checked against the 7.5t load and noted to be able to be appropriately detailed to facilitate the incorporation of this equipment.<br>The final location of any such equipment will require to be specifically checked against the details of the actual equipment proposed. | | | This will be subject to Design Development Review<br>Allowance based upon 7.5t MRI load |
| **M&E Service** | | | | | | |
| 3.0 | M&E Services | Please confirm pipework types for DH&CW, CHW and heating. | For DH&CW pipework, Stainless Steel Mapress by Gilbert (or equivalent) is proposed up to 67mm dia. And an ABS type material will be used on sizes above this. Copper will not be used on these systems.<br>For CHW & LTHW, carbon steel galvanised Mapress by Gilbert (or equivalent), Large bore, mild steel medium grade tube, Victaulic mechanical couplings (or equivalent).<br>For MTHW mild steel heavy grade tube fully welded/flanged. | | | |
| 4.0 | M&E Services | Please provide more clarity (detail) with regard to your proposed lighting controls. | A mixture of automatic 'absence' and 'presence' detection will be provided.<br><br>Presence detection: detector switches lighting on and off.<br>Extent of provision: intermittently occupied areas such as WCs, en suites, corridors, ward kitchens, stores, plant rooms, services risers, hospital streets, bathrooms etc.<br><br>Absence detection: lights manually switched on, detector extinguishes lighting in unoccupied room.<br>Extent of provision: offices, consulting rooms etc.<br><br>In addition, in rooms benefiting from daylight, luminaires near windows will be dimmable, regulated by the amount of daylight available.<br><br>Dimmable lighting has been included where specifically required by the ADB sheets.<br><br>Automatic control of lighting in rooms which have plenty of natural light will be regulated by means of a photocell within the space to ensure the required LUX is achieved by the combination of ambient and artificial light. | | | Refer RFI Log<br>Agreed |
| 5.0 | M&E Services | Please confirm that duty / stand-by plate heat exchangers | Packaged plate heat exchangers/buffer vessels will be arranged to provide | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | will be provided for Domestic hot water. | run/standby as described in Volume 4 Specification 4.28 and Volume 5 Schedule 5.2. | | | |
| 6.0 | M&E Services | Please provide details of proposed thermostatic mixing valves for DHW. | Taps with integral TMV3 will be used wherever suitable (refer to attached data sheet). In situations where these are not appropriate separate TMV3 thermostatic mixing valves will be used such as Oventrop Brawa-Mix 97 (or equivalent). | | | |
| 7.0 | M&E Services | Please provide details of trench make up for main services. | Trench depths, spacings and backfill will be as NHS Model Engineering Specifications C01 for pipe services and C41 for electrical services. Buried pre-insulated heating and chilled water mains will be in accordance with the system manufacturer's recommendations but will be similar to above. | | | Refer to M&E Design Summary<br>M&E Design Summary does not address general trenching for incoming services |
| 8.0 | M&E Services | Please confirm that twin regulating valves have been included for gas supplies. | Yes confirmed | | | |
| 9.0 | M&E Services | Please confirm that NRV will be fitted at each fire isolation valve as ER's. | Yes confirmed | | | |
| 10.0 | M&E Services | Please confirm mechanical air change rate for the ward tower. | A typical ward in the tower has the following air change rates to either meet the ADB requirements or achieve the environment conditions:<br>• Bedrooms 2.5 ACH (related to ensuite extract rate and air volume for chilled beam unit loadings)<br>• Ensuites 10 ACH<br>• Clean Utility 6ACH<br>• Disposal Hold 10 ACH<br>• Pantry 6 ACH<br>• Dirty Utility 10 ACH<br>• Equipment store<br>• Cleaner 5 ACH<br>• Nurse base Up to 12 ACH to balance extract from utility spaces, etc<br>• Office/meeting 4 ACH | | | Refer to M&E Design Summary<br>Agreed although still to be finalised |
| 11.0 | M&E Services | Please confirm type of fire Extinguishants gas proposed for the main Comms rooms. | The main comms rooms will be protected by a gaseous fire suppression system, the two gases for consideration at detailed design stage are NOVEC1230 and FM200. Both gases have attributes and issues; NOVEC1230 has a Global Warming Potential(GWP) of 1, while FM200 has a GWP of 2900. Certainly NOVEC1230 is kinder to the environment, but it is less kind to the IT assets it is protecting due to the much greater temperature drop when released, over FM200. The rapid rate of change of temperature has been shown to result in failure of the electronic components. The hope is that the suppression gas is never released and that the systems operate on a double knock strategy of operation | | | Subject to detailed review Stage 2 |
| 12.0 | M&E Services | Please indicate the plant resilience for hot and cold water services, e.g. full duplicate or is one extra unit proposed per plant area? | HWS calorifiers are provided in groups to serve zones of the building. Each group includes a standby calorifier. Refer to Volume 5 Schedule 5.2 Calorifier. | | | |
| 13.0 | M&E Services | Further to your responses to TC#2, the items listed in the attached Appendix B require further clarification/responses. | As noted on Appendix B | | | |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| - | - | No items in this TC. | - | | | |

| - | - | No items in this TC. | - | | | |
| Technical Clarification 5 | | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| **General** | | | | | | |
| 1.0 | LCC | Please check and confirm/clarify 60 year LCC values. | We can confirm the 60 year LCC values, which are based on the same assumptions as the 30 year values. The assumptions and detail are outlined within the LC Models provided. | | | |
| 2.0 | LCC | Please resubmit LCC rates as per Volume 4 Clarification Technical 19n0 – Item 8 Table 1 Item 4.0. | The LCC rates have been derived from detailed LC models based on the Specification and Capital Cost information in the Brookfield (Doig & Smith) Capital Cost Plans ("*Stage 3 Bid Cost Plan"* and *"Stage 1 Non-Compliant Bid Cost Plan"*). These cost plans have been submitted based on the NSGH bid deliverable cost plan breakdown requirements.<br><br>In line with these the LC Models have therefore only been able to been built for:<br><br>1) The Acute Adult and Children's Hospital;<br><br>2) The Laboratory Building<br><br>3) The External Works<br><br>Refer to Appendix 1 for Hospital Benchmarks used. | | | |
| 3.0 | FM | Please provide information in connection with derivation of FM services £/m2/yr rate – e.g. Sample Range, Hospital Type, Level of Service. Ditto as against differing Facilities e.g. Hospital/Lab etc. | The £/$m^2$/yr rate for FM Services is based on an average cost derived from the Davis Langdon FM database which includes detailed FM service costs and specifications across a suitable range of appropriate projects. The database has been adjusted to reflect the current size and location of this Project. | | | |
| 4.0 | FM | Please provide breakdown of FM rate as per requirements of Table 1 Item 6.3 (Management/Staff/Contracted/Materials/Equipment costs) | An indication of the expected split of FM costs is as follows:<br>Management / Admin: 12.5%<br>Staff: 37.5%<br>External Contracts: 25%<br>Materials: 20%<br>Equipment: 5% | | | |
| 5.0 | Software | Please confirm that your Zutec software has been included in your priced proposals (this to include access, licensing and any necessary product maintenance requirements). Further please advise of system compatibility (i.e. does this interface with 'standard' software packaging and provision such as Microsoft products). | We confirm Zutec software/service is included in our priced proposals. This includes the access, licensing and associated product maintenance requirements during the 2 year DLP. We would also highlight that Zutec have included an additional 12 months beyond the 2 year DLP as a benefit to the project.<br><br>Zutec system is compatible with Microsoft products. Besides overcoming the logistics of handling volumes of hard copies, it provides an efficient and quick means to search/locate project information/data. This facility is also available remotely (from anywhere with internet connection).<br><br>At the end of DLP, a hard drive of the project information uploaded at that time will be handed over to the Board. The information in that hard drive is readable using internet browser (ie. Only software required to read/run the data is an Internet Explorer). This information can be exported/copied into Microsoft Word or Excel.<br><br>Should the Board wish to use the Zutec website to make ongoing updates to the project database beyond DLP, Zutec is able to offer a hosting solution on a monthly or annual fee basis. | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| 6.0 | Fire Strategy | Can you confirm the qualified chartered fire engineer who will develop your design/strategy moving forwards. | The qualified chartered fire engineer overseeing our design development from WSP is:<br><br>Ryan McCreadie – Associate Director<br>BEng (Hons), PhD, MIFireE, Ceng<br>Chartered Engineer with the Engineering Council Division of the IFE.<br>Membership number – 00035119.<br><br>Mr McCreadie is assisted by the following WSP fire engineers:<br><br>Tom Grace – Associate Director<br>BE (Civil), ME (Fire), CPEng, MIFE, MSFPE, MIEAust<br><br>and<br><br>Kenny Hamill – Senior Fire Engineer<br>BSc (Hons) MRICS MIFireE | | | |
| 7.0 | Fire Strategy | It is noted that the smoke control proposal for the atrium relies on the decomposition of the ETFE roof based on a smoke/gas hot gas temperatures. What contingency planning would you recommend with regard to business continuity in this regard? | The ETFE roof system will be designed to ensure that the ‘hot wire’ activation only occurs in the highly unlikely event where a major fire occurs from adjoining areas into the atrium.<br><br>This activation sequence will be developed/14inalized in conjunction with the Fire Authority and the Board. However, we have considered the following features to limit the need for ‘hot wire’ activation:<br><br>• The environmental ventilation strategy for the atrium space includes for high level (side) vents to the ETFE roof and this will be used to support the smoke strategy in the early stages of fire development within the atrium (prior to any ‘hot wire’ activation).<br><br>• Lower volumes of buoyant smoke (at a temperature below ETFE failure) can be exhausted via the natural vent system.<br><br>• The vent sizes will be based on fire engineering calculations using BRE 368 for smoke management systems.<br><br>• Controlled fire load to atrium base by using fire load island philosophy. Fire loads will be concentrated into specific areas and separated by minimum distance to mitigate against fire spreading throughout the atrium base.<br>• The design fire size will be within the capacity for the natural vent system.<br><br>Furthermore and to reduce the threat of a major conflagration from adjoining areas into the atrium the following design features will be in place:<br><br>• Fire separation of areas opening onto atrium<br><br>• Sprinklers to areas adjoining atrium and appropriate areas in the atrium itself<br><br>• Glazing at ward levels to prevent smoke ingress from atrium to adjoining circulation areas<br><br>• Fire separation between clinical areas and circulation areas adjoining atrium<br>In developing the ‘hot wire’ activation sequence with the Enforcing Authorities and the Board, the aim is to filter out and avoid unnecessary occurrence by subjecting the activation to a number of “knocks/triggers”. It is envisaged that this multiple layer control will firstly involve detection of a fire within the compartment adjacent to and off the atrium that may spread into the atrium. This detection is then subject to another knock whereby a manual override is provided to allow a suitable investigation period to establish cause of alert and validation of the size of the fire threat for ‘hot wire’ system to be finally activated. | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | In the next stage of our design development, we will assess the possibility of limiting the loss of the ETFE roof to partial sections only (ie. Sufficient to vent the fire size to be agreed with the Enforcing Authorities). We will also assess to further minimize the impact of damaged roof on the operation for the clinical side of the Hospital by for example having glazed (smoke) separation to the atrium as mentioned above.<br><br>In reference to the contingency planning with regard to the business continuity, we believe that the ETFE roof 'hot wire' system would only occur in a very significant fire incident. In this scenario, the Hospital building itself is likely to have extensive damages and will be subject to major business continuity contingency planning. | | | |
| 7.0 | **M&E Service** | | | | | |
| 8.0 | Lift Study | Please confirm that your reference to the Exemplar in the lift study is erroneous and provide bed movement time from the ground floor to the top storey ward. | The data provided was based on the population figures issued by the client in the exemplar report. The approx time taken to move a bed from Ground to top storey ward will be 42 seconds assuming no intermediate stops (door opening at ground to door opening at top floor). On average each journey will take - 60 seconds including intermediate stops. | | | Subject to detailed review Stage 2<br>Brookfield proposed lift speeds to be retained |
| 9.0 | Maintenance | Please confirm that a maintenance gantry in the atrium (ventilation actuator maintenance) is included in your priced proposals. | Actuators will be located externally (IP65 rated) for ease of maintenance.<br><br>Localised access facilities will be provided as necessary. | | | Refer to M&E Design Summary<br>Not covered on M&E Design Summary |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| 10.0 | U-Value | Please confirm your primary U-values for (i) Glazing, (ii) Fabric and (iii) Roof. | Glazing 1.4 W/m$^2$K inc frame<br>External wall 0.3 W/m$^2$K<br>Roof 0.25 W/m$^2$K | | | |
| 11.0 | Permeability | Please confirm your building permeability. | The air permeability (infiltration) will be in accordance with the ERs Volume 2/1 App M&E.4/3.3.5(1) i.e 5m$^3$/hr/m$^2$ @ 50Pa | | | |
| **Laboratories** | | | | | | |
| - | - | No items in this TC. | - | | | |

**APPENDIX B**
**NSGH – Bid Evaluation – TC#4 Items from TC # 2 which require further clarification**

| Prev TC ref | Original Item | Action update required | Bidder Response | | | |
|---|---|---|---|---|---|---|
| 1 | List received of suggested suppliers | Client not aware of several e.g. Switchgear, fire alarm, Nurse call and wholesalers used for several systems please provide details and confirm that any changes will require agreement with the Board (up to three manufacturers for each M E & PH item) | The list of suggested suppliers gives an indication of the manufacture/suppliers of the components proposed. The final selection of components will be by agreement with the Board from a selection of no fewer that 3 manufacturers unless specialist equipment dictates otherwise | | | Updated list provided and qualified on the basis of final selection being "equal" or "best value" Suggest wording should be "of equal standard or quality" |
| 10 | Please confirm that BMS IP network will be fully stand alone and that all active equipment has been included. | Yes. Please provide supporting narrative for the included BMS IP network. E.g. raid storage, servers racks switches etc | The BMS kernel is built on two fault tolerant servers configured in a primary and hot standby fashion. The operating system will be Linux based with a SQL database for data management. The storage of BMS data will be on a RAID configured system and this will hold the immediate data live for 1 month. The SQL will be used for back up functionality and subsequent long terms analysis of the BMS system.<br>The system will have a primary fibre backbone with the appropriate Cisco managed switches breaking out into the copper IP networks at local system level. | | | |
| 11 | Tagging | Included. Please provide supporting narrative. e.g. tags are electronic integrated in the WIFI systems etc | The Tagging system works on RFID technology and there are two methods of operation.<br>1. For items such as wheelchairs, the system will display graphically the | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | location of the asset and can be polled to find the nearest required equipment, such as staff requiring a wheelchair.<br>2. Other items can be set up so that they are governed by a boundary and if the asset is brought beyond this defined boundary, an alarm is triggered. | | | |
| 12 | Scaffolding will be used to land generators and transformers | Is this practical, will the scaffolding have permanent foundations etc. | The majority of replacement and maintenance items detailed in the plant replacement strategy in Volume 3.23 of our submission are dealt with via the FM lifts.<br><br>It is anticipated that the expected frequency for the replacement of the major plant items is once every 20-25 years or so in normal circumstances, if at all, and, if required, likely to take place during a period of planned major plant renewal.<br><br>It is considered that it is a reasonable strategy to allow for the erection of a temporary scaffolding working platform to facilitate the removal and replacement of equipment. A structure of this type with sufficient height and capacity can be easily erected at reasonable cost using readily available materials and labour.<br><br>It will be possible to erect such a temporary structure using standard scaffolding details with the footings bearing onto the ground externally, but with protection applied to the surface finishes.<br>It is possible to incorporate permanent concrete foundations to facilitate this work but it is unlikely that the specific scaffolding arrangement will be available during the initial construction work to enable a specific design to be constructed, or that the scaffolding proposals will not change over time and render the installed foundations redundant.<br><br>Where the equipment is required to be transported over the flat roof to reach a loading platform, the structure has sufficient design load capacity to facilitate this but with the actual roof finishes requiring protection as noted in the bid documentation. | | | Refer to M&E Design Summary<br>Agreed |
| 13 | Medical gases and VIE | Please provide details of the plant resilience for medical air, 02, vacuum surgical air gas scavenging and nitrous oxide | All medical gas systems and plant are designed as per the current SHTM02-01, resilience within the selected plant items being provided in the following way:<br>Medical Air; a quadruplex plant will be provided, one compressor will act as a permanent standby, the remaining three compressors will be rotated through the demand requirements, this will insure boiling off of any excess condensate.<br>O2; two VIE stores will be provided, each store will be selected to provide 100% of the calculated demand, the stores will be configured as a run and standby mode.<br>AGSS; all AGSS pumps will be selected as duplex units, each pump will be rated to 100% of the calculated load. Each duplex plant will serve only four operating theatres.<br>Nitrous Oxide; a 2 x 10 manifold system with full automatic changeover facilities will be provided complete with a 2 x 1 ESM (emergency) manifold back up, all manifolds will be fully alarmed.<br>All other Air4 and Air 7 systems will have similar manifold systems complete with alarms and automatic changeover facilities | | | |
| 14 | luminaire details | Please provide info on LED and feature lighting luminaires | Refer to attached supplementary information | | | |
| 17 | Fire alarm PC includes incident location graphics | Please confirm fire alarm PC includes incident location graphics | Confirmed as included | | | |
| 20 | Patient entertainment systems. | Schematic representation noted. Please provide equipment details e.g. infrastructure, equipment, patient interface etc. | The primary patient and staff interface within the ward spaces, is based on a unit, such as the Lincor system. These units are connected back over CAT6A cables to the local hub rooms to an appropriate Cisco managed switch. At this point the system is connected back to the head end, via fibre network. The head end, is a fault tolerant server solution with various interfaces to broadcast | | | Refer to M&E Design Summary<br>Not covered on M&E Design Summary |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | receiver equipment.<br>It is possible for this system to be integrated with medical records IT to have the local interface become part of the clinical information management at the bedside. This is not included in this proposal at this time. There is only one screen in the patient space that covers all functionality. | | | |
| 23 | Please confirm that metering | BREEAM compliance noted, please provide a narrative e.g. central monitoring and storage | Metering of engineering services will be provided in accordance with the requirements of the ERs, BREEAM and GIL 65. All metering points will be monitored, recorded and stored on the BMS. | | | |
| 24 | Water spillage protection in secondary comms room. | It is noted that fan coils will have drip trays. On the assumption that the drip tray is full please advise how fan coils can be used in secondary comms rooms while ensuring that the equipment will be protected | Subject to the final layout of the comms rooms options for the fan coil units include positioning high level detection in the drip trays linked to the FCU operation, or more preferably locating the FCU outside of the comms room and ducting the conditioned air into the room. | | | |
| 25 | Please confirm compliance with maintainability and area isolation requirements. | Compliance on Electrical services noted, please confirm compliance with maintainability and area isolation requirements. | Isolation of electrical services will be possible as follows:<br><br>It will be possible to isolate an entire HV ring by opening protective devices at each end in the energy centre.<br><br>Sections of HV ring may be isolated by selective switching of devices at substations along the length of the ring.<br><br>Transformers may be isolated at the associated ring main units.<br><br>Main LV Switchboards may be isolated by opening their main incomer.<br><br>Submains cables to sub switchboards may be isolated by opening their protective device.<br><br>Sub switchboards may be isolated by opening their main incomer.<br><br>A minimum of 2 distribution boards will be provided per department and final circuits will be interleaved so far as is practicable (see below). Thus isolation of one distribution board will affect half of the circuits in the area served by that board.<br><br>The majority of rooms will be provided with at least 2 lighting and 2 small power circuits. Exceptions will be rooms with one luminaire or one socket outlet such as toilets, cupboards, risers and so on where it would be impractical to provide duplication.<br><br>The ERs appear to require each individual room to be capable of isolation without impact upon adjoining areas. We have not interpreted this to mean that each room should be provided with dedicated electrical circuits. Strict adherence to this requirement would result in a minimum of 4 circuits dedicated to each room ie: Side A lighting, Side A power, Side B lighting, Side B power. A department with 100 rooms would require 400 circuits which equates to say 10 no. 18 way 3 phase distribution boards. There would be a considerable impact on the size of the local sub switchboards and the quantity of submains cabling as well as on the quantity of final circuit cable containment systems and space requirements to accommodate the distribution boards and large sub switchboards. | | | Refer to M&E Design Summary<br>M&E Design Summary has less detail than this response. Brookfield to confirm that Design Summary adequately records agreements. Unless the Board can identify items within the Brookfield response to this clarification then this response should stand as it is the basis upon which the price has been calculated. |
| 28 | Plant and equipment will be suitably isolated to prevent transmission of noise and vibration. | Compliance noted, please provide narrative on proposals | Sound and vibration control for ventilation systems are described in Volume 4 Specification 4.33 giving proposals for plant attenuation, cross-talk attenuation and vibration control under fans etc.<br><br>Major plant such as chillers, generators, compressor etc. will be provided with spring isolation mounts as required to reduce vibration.<br><br>Vibration isolation of pumps will be assessed with the pump manufacturer to determine the most appropriate method of isolation, with spring pipe hangers | | | Refer to M&E Design Summary<br>Where ?? This response should be the agreed position. |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | provided adjacent to pump assemblies.<br><br>Plant noise breakout to site boundaries and intrusive noise into adjacent buildings will be controlled by sound attenuators in the fresh air intakes to all plant to meet the limiting noise criteria for the hospital site. | | | |
| 29 | Please confirm that full environmental proving off all rooms will be provided. | Compliance noted, please provide narrative on proposals | A full environmental check on all rooms will be provided. This will be undertaken at the commissioning stage of the project, all rooms will be put through a range of internal conditions to prove the capacity within the systems to increase and or decrease the space temperatures within a set time line. These tests will be trend logged within the BMS over a given period of time and any faults found will be addressed before final handover. | | | |
| 31 | Please confirm that all services elements are included to meet the fire engineering solution, e.g. stair pressurisation, smoke control etc | Compliance noted, please provide narrative on proposals | All service elements have been included to meet the Section 2.10 Fire Strategy report.<br>Fire engineering has been used wherever beneficial to meet, or surpass, the minimum fire safety performance standards contained within the various guidance documents. To achieve this the services strategy includes for areas such as detection / alarm systems; escape bed lift provision; smoke dispersal from stair protected zones / fire fighting shafts / lift lobbies, atrium smoke and ventilation strategy; basement smoke control / clearance strategy; fire damper actuation etc. | | | To be developed Stage 2<br>Brookfield Fire Strategy and Fire Engineered solution to take precedence over Board ER Fire Strategy |
| 34 | Please confirm that leak detection has been included. | Compliance noted, please provide narrative on proposals | The leak detection systems will be developed during the detailed design phase and will utilise linear detection elements, broken into appropriate lengths. The system will form part of the BMS, with a graphic interface of the overall system. Leak detection will be logged under the BMS alarm handling and it will also be possible to configure plant shut down or other intervention, on the presence of a leak being detected. | | | |
| 35 | Please indicate percentage capacity of all water service pipework mains from the energy centre to the main buildings for resilience. | Heating response noted, please provide narrative for CWS and CHWS | The site water mains feed directly into the hospital with bulk storage in the basement. No CWS is fed from the Energy Centre.<br><br>HWS is generated locally within the plant areas to feed the various zones of the building. No HWS is fed from the Energy Centre. | | | Refer to M&E Design Summary<br>Likely to be amended if water storage tanks are moved into the energy centre |

**New South Glasgow Hospitals Project**
**Bid Submission Clarifications**
**Bidder: 1 (Brookfield)**

| Item | Topic/Bid Reference | Board Clarification | Bidder Response | ADD | NO CHANGE / INFO | BOARD COMMENT |
|---|---|---|---|---|---|---|
| Technical Clarification 1 | | | | | | |
| **General** | | | | | | |
| 0.0 | | | | | | |
| **Logistics** | | | | | | |
| 1.0 | Site Parking | You have options but no firm plans for site parking, please confirm that the provision for site parking (incl any delivery area/holding area/lay-down areas off site) for all phases are included in your priced bid. | Brookfield have considered a number of options with regards to temporary parking/holding areas etc during the construction period and should we be selected would wish to discuss with the Board and other interested parties these arrangements to develop a strategy for the benefit of the Project. In the meantime, we confirm our prelims identify pricing allowances for the relevant Stages and refer you to the logistics section. In addition, our procurement strategy with regards the supply chain will include for the provision of temp parking spaces and this will be identified in the cost when packages are let accordingly. I.e. the amounts in the Prelims will be supplemented by amounts in the trade cost plan. We also recognise that using local labour will enable us to encourage the use of public transport to mitigate the requirement for extensive on site/off site temporary parking. Finally whilst we identified on the risk register temporary parking as being an issue to resolve, we felt a combination of the above will be sufficient to deal temporary parking and this reduced the risk element to acceptable. | | NC | ~~Costs contained within prelimnsprelims, trade cost plans and risk~~<br>~~Brookfield will provide a summary paper of draft proposals for off site parking~~<br><br>Brookfield have identified options for car parking as well as the associated cost allowances. A decision on which option will be taken up to be made post-contract. |
| 2.0 | Delivery Team | Several of your proposed delivery team appear to have commitments to another healthcare scheme (i.e. Peterborough). Please confirm how your delivery team will be deployed in line with the NSGH timescales and your programme requirements. | We reaffirm our commitment that the proposed delivery team will be deployed in accordance with the NSGH timescales and our programme requirements. Taking each stage:<br><br>- Labs Construction Team:<br>The individuals noted are available now, and no longer have commitments on Peterborough.<br><br>- FBC/Core team:<br>The individuals are available now, and have already been working on the NSGH project.<br><br>- Adult/Children's Team:<br>The individuals identified will be available before November 2010.<br>At Peterborough, the Mental Health Unit and City Care Centre have already been completed on programme and handed over to the Trust earlier this year. This has released some of the individuals who have since being involved in the bid submission. The main Acute facility is 3 months ahead of programme and notice will be given shortly to confirm the end of September 2010 date for handover. Many departments are being closed off progressively (as some of the Board's team will have witnessed during the recent site visit). By the end of 2009, the Acute facility will be into testing and commissioning phase and we are confident that a September 2010 completion is likely and the individuals will be available as scheduled. | | NC | |
| **Design/HP** | | | | | | |
| 3.0 | Entrances | Confirm your proposals for significant entrances to the site per ER requirement in this regard. | The NSGH campus masterplan has been configured to provide clear entrances which lead directly to the primary arrival space at the heart of the campus. Entrances have been designed in plan form to provide the | | NC | |

**Formatted:** Font: Arial (W1), Font colour: Black, Strikethrough

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | necessary function and capacity to respond to highway requirements associated with the various modes of transport. Significant entrances are to be delivered as features within the context of both the wayfinding and public art strategies. The entrances are important as part of the legibility and identity of the rejuvenated hospital campus. To achieve this it will be necessary for the design team to work with the Board to determine the correct balance between an innovative and unique site-specific response (informed by public art) and the guidance for standardised signage contained within the NHS Scotland guidance for signage and branding for use within NHS sites (which we have reviewed). For this reason our designs have not been developed beyond the concept stage in advance of Stage 2 engagement. The attached concept images illustrate the general potential for an entrance feature sign at the primary Govan Road entrance to<br>the site, but should not be considered a firm design proposal at this point. We can confirm that the commercial proposal includes provision for this approach.<br><br>Our drawing GIL-WS-00-PL-502 illustrates the signage hierarchy and proposed locations for the various sign types. This includes the proposed location of campus gateway signage features at the key entrances to the campus. It is intended that the main entrances should include feature lighting as part of the significant entrance features. It should be noted that the entrances need to be considered in parallel with the design and quality of the main arrival square, as this forms an important part of the entrance and arrival sequence and experience. The point of entrance and the route to the arrival square should therefore be considered as part of the entrance arrangement. | | | |
| 4.0 | Specification | Confirm your proposals for electronic information points per ER requirement (7.15.4) in this regard. | In response to the ER requirement (7.15.4) we have made provision for 1x ‘Real Time Public Transport System’ electronic Information Point externally at the Bus Drop-Off Area.<br><br>Additionally, in response to ER requirement (7.2.19), as part of our Wayfinding Strategy we have proposed electronic/interactive ‘You Are Here’ maps in the Main Entrance Foyers to both the Adult and Children’s Hospitals.<br><br>Please refer to our Wayfinding Strategy contained within **Volume 3.0; Section 3.2** for further details of our proposals and imagery. | | info | |
| 5.0 | Interstitial Blinds | Confirm your strategy for interstitial blinds to external windows/façade and internal observation screens (this to include a cross-section detail of your proposal(s)). | Interstitial Blinds have been included in our priced bid to **internal** glazed screens generally to all Bedrooms, including those within Critical Care (Adult Hospital and Children’s PICU), AAU and all Inpatient Wards (Adult and Children’s Hospitals).<br>In addition, interstitial blinds have been included to internal door vision panels as part of our Internal Door detailed proposals. Our Internal Door Strategy is contained within the Introduction to<br>Volume 2.0; Section 2.21<br>- Door & Ironmongery Schedules. Where a door is noted in the Schedule as being<br>‘obscurable’<br>, this equates to a vistamatic type vision panel with interstitial blinds.<br><br>Please note that our priced bid does not currently have a provision for internal blinds or curtains which are not integral to the internal fabric of | Y | | Interstitial blinds are ~~to be~~ ~~to be~~ included ~~for~~ ~~for~~to all external windows.<br><br>~~This was allowed for as an adjustment to our original bid~~ |

| **Design/HP** | | | | | | |
| 4.0 | H+S Landscape | Courtyards – clarify what is intended by white gravel? | The white gravel is a aesthetic material used in geographical arrangements producing dramatic patterned landscapes when viewed from above. This material can be laid loose or bound to correspond to the courtyards function. Please refer to drawings GIL-WS-00-EF-S04 Courtyard Design Intent. ***See Appendix Q4-7 attached*** | Y | | |
| 5.0 | H+S Landscape | Aside from the separately identified therapy courtyards is there any access or intended function for the remaining courtyards indicated? | The other courtyards have the potential to be accessed depending on the adjacent hospital departments, to be developed further with the board. Please refer to drawings GIL-WS-00-EF-S04 Courtyard Design Intent<br>***See Appendix Q4-7 attached*** | Y | | |
| 6.0 | H+S Landscape | External Works Layout Dwg No. CD-WS-00-PL-711-01 indicates concrete blocks to the front of the hospital. The masterplan Dwg No. GIL-WS-00-PL-100 indicates exposed aggregate concrete paving. The Outline Specification for roads, car parks, pavements and cycle paths suggests paving in these areas will be natural stone granite. Can we clarify actual proposals for these areas? | The palette of materials has been selected to provide a cost effective high quality environment. Natural granite is proposed to the entrance thresholds with concrete pavers with exposed granite aggregate proposed to the arrival square. Please refer to drawings GIL-WS-00-EF-S05 Arrival Square Pavement Design intent<br>***See Appendix Q4-7 attached*** | Y | | |
| 7.0 | H+S Landscape | The drawings indicate a limited number of bike shelter locations (2No.)? Is this correct or are other bike shelter locations intended? | The two cycle shelters shown on the master plan are key structural features place near the main entrances, other cycle stands are located throughout the site in key location. Please refer to drawings GIL-WS-00-EF-S06 Cycle Parking Strategy and GIL-WS-00-PL-115 Vehicle Movements- Cycles<br>***See Appendix Q4-7 attached*** | Y | | |
| **M&E Services** | | | | | | |
| 8.0 | M&E Services | Please indicate any deviations from M&E elements of the ER's. | The following deviations are proposed:<br>• UPS autonomies proposed are compliant with SHTM 06-01 and differ in some respects from the ERs. | | | Refer to RFI Log<br>~~Agreed~~ |
| | | | • The proposals for automatic lighting controls as described in Volume 3 Section 3.12 and Volume 4 Section 4.3.6 differs in some respect from the ERs. | | | Refer to RFI Log<br>~~Agreed~~ |
| | | | • A single energy centre is proposed split into two plant spaces with 4 hour fire separation to provide the resilience of two separate energy centres. | Y | | This needs to be accepted as a derogation against the ER's which call for 2 Energy Centres |
| | | | • N+1 has not been provided to all plant as noted in Volume 2/1 Clause 8.1.1.17. N+1 has been included to all energy source plant, pumps, heat exchangers and duplicate motors provided on air handling plant. | | | ~~Addressed on M&E Design Summary.~~<br>~~Agreed~~<br><br>Refer to M&E Clarifications Log |
| | | | • Dual path distribution has not been provided on all systems as this would be impractical for piped systems and specialist electrical systems, e.g fire alarms. Supplies from the energy centre have an element of duplication for resilience and electrical power distribution has A & B separation throughout using diverse routes wherever possible. | | | ~~Addressed on M&E Design Summary.~~<br>~~Agreed~~<br><br>Refer to M&E Clarifications Log |
| | | | • Bulk water storage has been based on the busiest 12 hour period rather than 24 hour as suggested in volume 2/1 clause 8.2.8.2. It is considered that with duplicate incoming water mains to the site a reduced water storage capacity will reduce the risk of legionella. | | | ~~Deviation not accepted.~~<br>~~Awaiting response from Board on ZBP water storage calcs. Brookfield proposal now moves water tanks into Energy Centre.~~<br><br>Refer to M&E Clarifications Log |
| 9.0 | M&E Services | Please confirm that racks will be provided for Client's active equipment. | The following allowances have been made:-10 racks in each of the adult's and the children's hospital main comms rooms, and<br>2 racks in each hub room | | | Deviation from ER's not accepted<br><br>The ER's ~~call for~~ requirement noted below, is agreed as included and to be provided by the Contractor<br><br>C1-C6 External comms |

| 26.0 | M&E Services | Please confirm that the renal Central Concentrate Delivery system is included (adult hospital). | Yes | | Info | |
| 27.0 | M&E Services | Please confirm that all services comply with HAI – SCRIBE. | The Services Engineer will be part of the overall SCRIBE team along with the Board's Infection Control Manager, Clinical Advisers, Facilities Manager, and Departmental Representatives, plus the other members of the design team and other relevant specialists. The Services Engineer will discharge the duties as set out in HAI-SCRIBE Implementation Strategy | | info | |
| 28.0 | M&E Services | Please confirm that all plant and equipment will be suitably isolated to prevent transmission of noise and vibration. | Yes | | info | |
| 29.0 | M&E Services | Please confirm that full environmental proving off all rooms will be provided. | Yes | | Info | |
| 30.0 | M&E Services | Please confirm that all metering requirements will be provided in accordance with the ER's and BREEAM requirements. | Yes | | NC | |
| 31.0 | M&E Services | Please confirm that all services elements are included to meet the fire engineering solution, e.g. stair pressurisation, smoke control etc. | Yes | | Info | |
| 32.0 | M&E Services | Please confirm that ICT cooling has been included and provide details. | Yes, this is achieved with a chilled water solution, via crac units and fan coil units, as appropriate. | | Info | |
| 33.0 | M&E Services | Please confirm that specialist drainage has been included. | Included | | Info | |
| 34.0 | M&E Services | Please confirm that leak detection has been included. | Included | | Info | |
| 35.0 | M&E Services | Please indicate percentage capacity of all water service pipework mains from the energy centre to the main buildings for resilience. | The A and B circuits are sized for 66% of the maximum operational load. The A & B circuits from the energy centre are primary circuits and totally isolated from the secondary plantroom circuits via the plate heat exchanger units. It is envisaged that any routine maintenance | Y | | ~~Addressed on M&E Design Summary.~~ ~~Agreed though still to be finalised~~ Refer to M&E Clarification Log |
| **Renewables/Sustainability/BREEAM** | | | | | | |
| - | - | No items in this TC. | | | | |
| **Laboratories** | | | | | | |
| 36.0 | Laboratories | The Values on Labs Summary Page for Overhead and Profit do not correspond with % values provided on Stage 1 or Incoming Utility Costs Associated with Stage 1. | This is Correct. The figures are calculated by adding 6.2% plus an apportioned value for overhead recovery. | | | All responses will be addressed in Stage D to Stage E alignment |
| 37.0 | Laboratories | On Labs Final Summary Page (Page 4 of Submission) £281,552.00 in included for Additional Fee and Profit on Max Cost. If you apply the %'s from elsewhere on the page this value would be approx £43K less? | Unlike the way the Board have asked us to submit the MPTC Calculator Brookfield methodology for calculating Overhead and Profit is by taking this amount against Prime Cost excluding Fees which actually means that in the case of the Laboratory Building the gross margin on Prime Cost is circa 7.5% and thus provides the number given. | | | ~~Final Contract MPTC now refers as figures were amended in Commercial Clarification No.3~~ |
| 38.0 | Laboratories | Can you confirm extent of tunnels included within Stage 1 Section | The bid is based upon the URS and BMJ drawings issued under addendum 34. The basement and tunnels are reduced for the variant option and are as detailed within our Volume 13 of the bid. The extent of tunnels are as per the BMJ demarcation lines identified on the above BMJ drawings | | | ~~Brookfield require the route of the tunnels to be reviewed to ensure that the Labs building and the Adult and Childrens Hospital align. There is currently a mismatch in propose routes that needs to be resolved.~~ |
| 39.0 | Laboratories | No evidence of anything noted as "Provisional". Please confirm or provide detail of items to be considered as Provisional. The Bills make reference to "general assumptions". Please confirm that they are not to be | There are no provisional items within the cost plan | | | |

| | | considered provisional. | |
| 40.0 | Laboratories | Substructure: Please confirm what exactly the £100k allowance is for fire escape and stairs includes for. | Fire strategy requirements dictate that an escape tunnel and stair will be required from the basement tunnel that is not currently indicated by BMJ or URS drawings.<br>Cost allowance included is based on similar staircase and concrete enclosure to adult basement tunnel. |
| 41.0 | Laboratories | Substructure: Allowance has been included for 14 Nr lift pits. Please confirm Nrs. Current drawing shows 12 Nr FF, goods & staff Lifts and 4 Nr lifts in connection with Robotics. | Confirmed, all lift pits are as detailed on the drawings are covered either in this specific item or in general substructure measurement. |
| 42.0 | Laboratories | Upper Floors: Please confirm all allowances for recesses or thickening of slabs is included. | Confirmed, included in rates |
| 43.0 | Laboratories | Stairs: Number of assumptions/clarifications: Design team to appraise/comment to facilitate in the removal from pricing docs. | No assumptions made in Cost Plan |
| 44.0 | Laboratories | Ext Walls: Please identify where Spec item 1.12 (louvers to office block) appear in your bid. | Allowance taken in copper cladding section. |
| 45.0 | Laboratories | Ext Walls: Ext brise soleil system included. Not stated as being required on previous dwgs. | Builders work drawings received 24th August show indication of Brise Soleil and we have based our provision on this. |
| 46.0 | Laboratories | Windows: Window sizes do not tally with C&B's original measure | Window are measured from the latest issue drawings as opposed to original C&B measure |
| 47.0 | Laboratories | Ext Doors: Please advise where Revolving entrance doors are included. | Taken in External Walls section of Cost Plan |
| 48.0 | Laboratories | M&E: Please provide details of how M&E values arrived at and if possible provide detailed back up. | Listed below are the M&E values submitted in our Bid based on a quantity of 25,322 m2 |

| Item | Unit Rate (£) | Estimated Cost (£) |
|---|---|---|
| **5A** Sanitary Appliances | 17.09 | 432,833.63 |
| **5C** Disposal Installations | 22.67 | 574,000.24 |
| **5D** Water Installations | 47.58 | 1,097,899.44 |
| **5E-G** Mechanical Installations | 332.69 | 8,424,257.16 |
| **5H** Electrical Installations | 149.68 | 3,790,277.99 |
| **5I** Gas & other fuel installations | 3.73 | 94,353.60 |
| **5K** Protective Installations | 3.13 | 79,580.60 |
| **5L** Communication Installations | 157.22 | 3,981,165.48 |
| **5N** BWICS | 39.42 | 998,193.24 |

~~Note that as a result of Commercial Clarification No. 3 some of these figures may have been amended. For example a reduction was made to Communication Installations. Final Cost Plan to be updated to reflect the final amendments that result in MPTC Figures included within the Final Contract Conditions.~~

|---|---|---|---|
| **5M** Special Installations | 11.96 | 557,040.00 |

See ***Appendix Q48*** for the Summary and details. This information is also included with our response to RFI 007

| | | | |
|---|---|---|---|
| 49.0 | Laboratories | M&E Lifts: Current drawings show 4 Nr FF Lifts, 4 Nr Goods Lifts, 3 Nr Passenger Lifts and 1 Nr Mortuary Lifts. This does not correspond with your bid. Please advise. | Drawings show 16nr lifts which we have priced. |
| 50.0 | Laboratories | Siteworks: Imported fill for backfilling. Is there no potential to re-use excavated materials ? | Option to re-use excavated material is limited and will require extensive double handling and logistical issues retaining a clean site. |
| 51.0 | Laboratories | Siteworks: No inclusion of barrier system to service yard. Please advise. | Included in bid |
| 52.0 | Laboratories | Ext Services: £5k allowed for main water distribution. Seems low | The allowance is for the final connection between a valved connection on the site water mains and the laboratory building boundary.<br>Site water mains and pipe work within the building are covered within the energy centre section. |
| 53.0 | Laboratories | Please provide statement on Inflation allowances included. | Given that this work will be primarily secured in Year 2010 no allowance has been made for any inflation of the Net Package Costs. It is assumed that all packages can be procured at 2009 prices. There is an allowance within the preliminaries for a 3% staff increase in Jan 2010 and a similar increase in 2011. |
| 54.0 | Laboratories | Has audio/visual system to Mortuary been included? If so, where and how much. | An allowance of £10k has been made with the M&E section of the Tender Bid |
| 55.0 | Laboratories | Please confirm that the Cat 3 Containment Facilities Spec referred to in Clause 1.0, Appendix C1.2 of Outline Architect Spec is included. Is so, please advise where and provide breakdown of value. | The wall, floor and ceiling finish items are based on Polyflor.<br>Single Leaf Doors £ 17,500.00<br>1 /12 Leaf Doors £ 5,000.00<br>Wall Finishes £ 47,900.00<br>Floor Finishes £ 17,300.00<br>Ceiling Finishes £ 8,650.00<br><br>Safe Change Filters £ 12,000.00<br>Cat 3 Light Fittings £ 8,500.00<br>£ 116,850.00<br><br>All costs above are net of Sub-Contract Prelims (The percentage additions for S/C Prelims are 10% on internal doors, floors and ceilings and 19% on walls) , B.E. Prelims and B.E. OH&P |
| 56.0 | Laboratories | Has allowance been included in bid for various treatments to soffits under 1F slab in open yard or entrance areas? | Included in bid. |
| 57.0 | Laboratories | Design fees included are different to the fees provided to Bidders. Please provide details of difference. | The difference in design fee for the laboratories is due to additional consultants identified as being required to advise on building control and CDM. We have also made an allowance within the risk register to cover additional fees to the design team resulting from an increase in their scope of works |
| 58.0 | Laboratories | Please confirm that all temporary services connections prior to Energy Centre being completed are included | Main incoming services are included within the energy centre section.<br>Allowance has been made for local temporary service connections until Energy Centre is sufficiently progressed. |
| 59.0 | Laboratories | Please confirm that all robotics costs included in Hospital | Confirmed |

~~These additional fees were subsequently removed and allowance only made for fees provided. Final fee for BMJ was as per advised by the Board in ITSFB in the sum of £1,156,800.~~

| 2.0 | MRI replacement | Please confirm your proposals (methodology, routes and structural provision to support) the replacement/retro fit of MRI equipment. | In the absence of specific MRI product information, the building footprint areas identified on the plans as housing MRI installations have been checked against a 7.5 tonne magnet installation (example from a recent comparable project).<br>In each case it was noted that the floor and foundation structures as currently presented could be appropriately detailed to facilitate the incorporation of this equipment.<br>The proposed transit route for the MRI installation is not known but is expected to be either through double access doors at ground level, along corridors and possibly via a wall knock-out access panel into the proposed room. Alternatively, the MRI unit could be delivered to the FM area and transported via the service tunnel to a lift and then to the corridor etc as above. The floor and foundation structures for the possible routes noted above have been checked against the 7.5t load and noted to be able to be appropriately detailed to facilitate the incorporation of this equipment.<br>The final location of any such equipment will require to be specifically checked against the details of the actual equipment proposed. | | | This will be subject to Design Development Review<br>Allowance based upon 7.5t MRI load | |
| **M&E Service** | | | | | | |
| 3.0 | M&E Services | Please confirm pipework types for DH&CW, CHW and heating. | For DH&CW pipework, Stainless Steel Mapress by Gilbert (or equivalent) is proposed up to 67mm dia. And an ABS type material will be used on sizes above this. Copper will not be used on these systems.<br>For CHW & LTHW, carbon steel galvanised Mapress by Gilbert (or equivalent), Large bore, mild steel medium grade tube, Victaulic mechanical couplings (or equivalent).<br>For MTHW mild steel heavy grade tube fully welded/flanged. | | | All pipework agreed as stainless steel throughout | |
| 4.0 | M&E Services | Please provide more clarity (detail) with regard to your proposed lighting controls. | A mixture of automatic 'absence' and 'presence' detection will be provided.<br><br>Presence detection: detector switches lighting on and off.<br>Extent of provision: intermittently occupied areas such as WCs, en suites, corridors, ward kitchens, stores, plant rooms, services risers, hospital streets, bathrooms etc.<br><br>Absence detection: lights manually switched on, detector extinguishes lighting in unoccupied room.<br>Extent of provision: offices, consulting rooms etc.<br><br>In addition, in rooms benefiting from daylight, luminaires near windows will be dimmable, regulated by the amount of daylight available. | | | Refer RFI Log<br>~~Agreed~~ | **Formatted:** Strikethrough<br>**Formatted:** Strikethrough |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | Dimmable lighting has been included where specifically required by the ADB sheets.<br><br>Automatic control of lighting in rooms which have plenty of natural light will be regulated by means of a photocell within the space to ensure the required LUX is achieved by the combination of ambient and artificial light. | | | |
| 5.0 | M&E Services | Please confirm that duty / stand-by plate heat exchangers will be provided for Domestic hot water. | Packaged plate heat exchangers/buffer vessels will be arranged to provide run/standby as described in Volume 4 Specification 4.28 and Volume 5 Schedule 5.2. | | | |
| 6.0 | M&E Services | Please provide details of proposed thermostatic mixing valves for DHW. | Taps with integral TMV3 will be used wherever suitable (refer to attached data sheet). In situations where these are not appropriate separate TMV3 thermostatic mixing valves will be used such as Oventrop Brawa-Mix 97 (or equivalent). | | | |
| 7.0 | M&E Services | Please provide details of trench make up for main services. | Trench depths, spacings and backfill will be as NHS Model Engineering Specifications C01 for pipe services and C41 for electrical services. Buried pre-insulated heating and chilled water mains will be in accordance with the system manufacturer's recommendations but will be similar to above. | | | Refer to M&E ~~Design Summary~~ Clarification Log<br>~~M&E Design Summary does not address general trenching for incoming services~~ |
| 8.0 | M&E Services | Please confirm that twin regulating valves have been included for gas supplies. | Yes confirmed | | | |
| 9.0 | M&E Services | Please confirm that NRV will be fitted at each fire isolation valve as ER's. | Yes confirmed | | | |
| 10.0 | M&E Services | Please confirm mechanical air change rate for the ward tower. | A typical ward in the tower has the following air change rates to either meet the ADB requirements or achieve the environment conditions:<br>• Bedrooms 2.5 ACH (related to ensuite extract rate and air volume for chilled beam unit loadings)<br>• Ensuites 10 ACH<br>• Clean Utility 6ACH<br>• Disposal Hold 10 ACH<br>• Pantry 6 ACH<br>• Dirty Utility 10 ACH<br>• Equipment store<br>• Cleaner 5 ACH<br>• Nurse base Up to 12 ACH to balance extract from utility spaces, etc<br>• Office/meeting 4 ACH | | | Refer to M&E ~~Design Summary~~ Clarification Log<br>~~Agreed although still to be finalised~~ |
| 11.0 | M&E Services | Please confirm type of fire Extinguishants gas proposed for the main Comms rooms. | The main comms rooms will be protected by a gaseous fire suppression system, the two gases for consideration at detailed design stage are NOVEC1230 and FM200. Both gases have attributes and issues; NOVEC1230 has a Global Warming Potential(GWP) of 1, while FM200 has a GWP of 2900. Certainly NOVEC1230 is kinder to the environment, but it is less kind to the IT assets it is protecting due to the much greater temperature drop when released, over FM200. The rapid rate of change of temperature has been shown to result in failure of the electronic components. The hope is that the suppression gas is never released and that the systems operate on a double knock strategy of operation | | | Subject to detailed review Stage 2 |
| 12.0 | M&E Services | Please indicate the plant resilience for hot and cold water services, e.g. full duplicate or is one extra unit proposed per plant area? | HWS calorifiers are provided in groups to serve zones of the building. Each group includes a standby calorifier. Refer to Volume 5 Schedule 5.2 Calorifier. | | | |
| 13.0 | M&E Services | Further to your responses to TC#2, the items listed in the attached Appendix B require further clarification/responses. | As noted on Appendix B | | | |

| **General** | | | | | | |
| 1.0 | LCC | Please check and confirm/clarify 60 year LCC values. | We can confirm the 60 year LCC values, which are based on the same assumptions as the 30 year values. The assumptions and detail are outlined within the LC Models provided. | | | |
| 2.0 | LCC | Please resubmit LCC rates as per Volume 4 Clarification Technical 19n0 – Item 8 Table 1 Item 4.0. | The LCC rates have been derived from detailed LC models based on the Specification and Capital Cost information in the Brookfield (Doig & Smith) Capital Cost Plans ("*Stage 3 Bid Cost Plan"* and *"Stage 1 Non-Compliant Bid Cost Plan"*). These cost plans have been submitted based on the NSGH bid deliverable cost plan breakdown requirements.<br><br>In line with these the LC Models have therefore only been able to been built for:<br><br>1) The Acute Adult and Children's Hospital;<br><br>2) The Laboratory Building<br><br>3) The External Works<br><br>Refer to Appendix 1 for Hospital Benchmarks used. | | | |
| 3.0 | FM | Please provide information in connection with derivation of FM services £/m2/yr rate – e.g. Sample Range, Hospital Type, Level of Service. Ditto as against differing Facilities e.g. Hospital/Lab etc. | The £/m$^2$/yr rate for FM Services is based on an average cost derived from the Davis Langdon FM database which includes detailed FM service costs and specifications across a suitable range of appropriate projects. The database has been adjusted to reflect the current size and location of this Project. | | | |
| 4.0 | FM | Please provide breakdown of FM rate as per requirements of Table 1 Item 6.3 (Management/Staff/Contracted/Materials/Equipment costs) | An indication of the expected split of FM costs is as follows:<br>Management / Admin: 12.5%<br>Staff: 37.5%<br>External Contracts: 25%<br>Materials: 20%<br>Equipment: 5% | | | |
| 5.0 | Software | Please confirm that your Zutec software has been included in your priced proposals (this to include access, licensing and any necessary product maintenance requirements). Further please advise of system compatibility (i.e. does this interface with 'standard' software packaging and provision such as Microsoft products). | We confirm Zutec software/service is included in our priced proposals. This includes the access, licensing and associated product maintenance requirements during the 2 year DLP. We would also highlight that Zutec have included an additional 12 months beyond the 2 year DLP as a benefit to the project.<br><br>Zutec system is compatible with Microsoft products. Besides overcoming the logistics of handling volumes of hard copies, it provides an efficient and quick means to search/locate project information/data. This facility is also available remotely (from anywhere with internet connection).<br><br>At the end of DLP, a hard drive of the project information uploaded at that time will be handed over to the Board. The information in that hard drive is readable using internet browser (ie. Only software required to read/run the data is an Internet Explorer). This information can be exported/copied into Microsoft Word | Y | | |

**Formatted:** Centred

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | or Excel.<br><br>Should the Board wish to use the Zutec website to make ongoing updates to the project database beyond DLP, Zutec is able to offer a hosting solution on a monthly or annual fee basis. | | | |

| **Design/HP** | | | | | | |
| 6.0 | Fire Strategy | Can you confirm the qualified chartered fire engineer who will develop your design/strategy moving forwards. | The qualified chartered fire engineer overseeing our design development from WSP is:<br><br>Ryan McCreadie – Associate Director<br>BEng (Hons), PhD, MIFireE, Ceng<br>Chartered Engineer with the Engineering Council Division of the IFE.<br>Membership number – 00035119.<br><br>Mr McCreadie is assisted by the following WSP fire engineers:<br><br>Tom Grace – Associate Director<br>BE (Civil), ME (Fire), CPEng, MIFE, MSFPE, MIEAust<br><br>and<br><br>Kenny Hamill – Senior Fire Engineer<br>BSc (Hons) MRICS MIFireE | | | |
| 7.0 | Fire Strategy | It is noted that the smoke control proposal for the atrium relies on the decomposition of the ETFE roof based on a smoke/gas hot gas temperatures. What contingency planning would you recommend with regard to business continuity in this regard? | The ETFE roof system will be designed to ensure that the 'hot wire' activation only occurs in the highly unlikely event where a major fire occurs from adjoining areas into the atrium.<br><br>This activation sequence will be developed/14inalized in conjunction with the Fire Authority and the Board. However, we have considered the following features to limit the need for 'hot wire' activation:<br><br>• The environmental ventilation strategy for the atrium space includes for high level (side) vents to the ETFE roof and this will be used to support the smoke strategy in the early stages of fire development within the atrium (prior to any 'hot wire' activation).<br><br>• Lower volumes of buoyant smoke (at a temperature below ETFE failure) can be exhausted via the natural vent system.<br><br>• The vent sizes will be based on fire engineering calculations using BRE 368 for smoke management systems.<br><br>• Controlled fire load to atrium base by using fire load island philosophy. Fire loads will be concentrated into specific areas and separated by minimum distance to mitigate against fire spreading throughout the atrium base.<br>• The design fire size will be within the capacity for the natural vent system.<br><br>Furthermore and to reduce the threat of a major conflagration from adjoining areas into the atrium the following design features will be in place:<br><br>• Fire separation of areas opening onto atrium<br><br>• Sprinklers to areas adjoining atrium and appropriate areas in the atrium itself<br><br>• Glazing at ward levels to prevent smoke ingress from atrium to adjoining | Y | | |

|---|---|---|---|---|---|---|
| | | | circulation areas<br><br>• Fire separation between clinical areas and circulation areas adjoining atrium<br>In developing the 'hot wire' activation sequence with the Enforcing Authorities and the Board, the aim is to filter out and avoid unnecessary occurrence by subjecting the activation to a number of "knocks/triggers". It is envisaged that this multiple layer control will firstly involve detection of a fire within the compartment adjacent to and off the atrium that may spread into the atrium. This detection is then subject to another knock whereby a manual override is provided to allow a suitable investigation period to establish cause of alert and validation of the size of the fire threat for 'hot wire' system to be finally activated.<br><br>In the next stage of our design development, we will assess the possibility of limiting the loss of the ETFE roof to partial sections only (ie. Sufficient to vent the fire size to be agreed with the Enforcing Authorities). We will also assess to further minimize the impact of damaged roof on the operation for the clinical side of the Hospital by for example having glazed (smoke) separation to the atrium as mentioned above.<br><br>In reference to the contingency planning with regard to the business continuity, we believe that the ETFE roof 'hot wire' system would only occur in a very significant fire incident. In this scenario, the Hospital building itself is likely to have extensive damages and will be subject to major business continuity contingency planning. | | | |

| | details | | | | | |
| 17 | Fire alarm PC includes incident location graphics | Please confirm fire alarm PC includes incident location graphics | Confirmed as included | Y | | |
| 20 | Patient entertainment systems. | Schematic representation noted. Please provide equipment details e.g. infrastructure, equipment, patient interface etc. | The primary patient and staff interface within the ward spaces, is based on a unit, such as the Lincor system. These units are connected back over CAT6A cables to the local hub rooms to an appropriate Cisco managed switch. At this point the system is connected back to the head end, via fibre network. The head end, is a fault tolerant server solution with various interfaces to broadcast receiver equipment.<br>It is possible for this system to be integrated with medical records IT to have the local interface become part of the clinical information management at the bedside. This is not included in this proposal at this time. There is only one screen in the patient space that covers all functionality. | | | Refer to M&E Design Summary<br>Not covered on M&E Design Summary |
| 23 | Please confirm that metering | BREEAM compliance noted, please provide a narrative e.g. central monitoring and storage | Metering of engineering services will be provided in accordance with the requirements of the ERs, BREEAM and GIL 65. All metering points will be monitored, recorded and stored on the BMS. | | | |
| 24 | Water spillage protection in secondary comms room. | It is noted that fan coils will have drip trays. On the assumption that the drip tray is full please advise how fan coils can be used in secondary comms rooms while ensuring that the equipment will be protected | Subject to the final layout of the comms rooms options for the fan coil units include positioning high level detection in the drip trays linked to the FCU operation, or more preferably locating the FCU outside of the comms room and ducting the conditioned air into the room. | | | |
| 25 | Please confirm compliance with maintainability and area isolation requirements. | Compliance on Electrical services noted, please confirm compliance with maintainability and area isolation requirements. | Isolation of electrical services will be possible as follows:<br><br>It will be possible to isolate an entire HV ring by opening protective devices at each end in the energy centre.<br><br>Sections of HV ring may be isolated by selective switching of devices at substations along the length of the ring.<br><br>Transformers may be isolated at the associated ring main units.<br><br>Main LV Switchboards may be isolated by opening their main incomer.<br><br>Submains cables to sub switchboards may be isolated by opening their protective device.<br><br>Sub switchboards may be isolated by opening their main incomer.<br><br>A minimum of 2 distribution boards will be provided per department and final circuits will be interleaved so far as is practicable (see below). Thus isolation of one distribution board will affect half of the circuits in the area served by that board.<br><br>The majority of rooms will be provided with at least 2 lighting and 2 small power circuits. Exceptions will be rooms with one luminaire or one socket outlet such as toilets, cupboards, risers and so on where it would be impractical to provide duplication.<br><br>The ERs appear to require each individual room to be capable of isolation without impact upon adjoining areas. We have not interpreted this to mean that each room should be provided with dedicated electrical circuits. Strict adherence to this requirement would result in a minimum of 4 circuits dedicated to each room ie: Side A lighting, Side A power, Side B lighting, Side B power. A department with 100 rooms would require 400 circuits which equates to say 10 no. 18 way 3 phase distribution boards. There would be a considerable impact on the size of the local sub switchboards and the quantity of submains cabling as well as on the quantity of final circuit cable containment systems and space requirements to accommodate the distribution boards and large sub | Y | | ~~Refer to M&E Design Summary~~<br>~~M&E Design Summary has less detail than this response. Brookfield to confirm that Design Summary adequately records agreements. Unless the Board can identify items within the Brookfield response to this clarification then this response should stand as it is the basis upon which the price has been calculated.~~<br><br>The specific ER requirement at 8.1.5.4 is to be achieved by the Contractor |

**NSGH**
**WARD VENTILATION DESIGN STRATEGY**

**Board Requirement**

The design requirements for the NSGH states that the summertime temperature limit is 'not to exceed 26°C'.

This exceeds the guidance provided within the draft SHTM 03-01 on the design of ventilation in healthcare premises, limiting the summertime temperature to 'not exceed 28°C for more than 50 hours per year'.

**Natural Ventilation**

The SHTM allows for the natural ventilation of areas including general wards. In clause 2.3 it states that 'as the motivating influences of natural ventilation are variable, it is almost impossible to maintain consistent flow rates and ensure that minimum ventilation rates will be achieved at all times. This variability is normally acceptable for general wards'.

Through the use of thermal modeling during the bid stage the use of natural ventilation using openable windows was investigated and results showed that the Board's requirement for temperature control could not be achieved. Furthermore, adding additional background cooled mechanical ventilation, at a quantity to balance the ensuite extract rate, still did not achieve the requirement. Other concerns with natural ventilation included patient comfort due to uncontrolled wind driven ventilation and air quality, particularly in winter when windows would be closed.

Therefore, the sole use of mechanical ventilation was explored, again using thermal modeling.

**Mechanical Ventilation**

The recommended air change rate for single rooms in SHTM 03-01 Appendix 1 Table A1 for single rooms is 6 air changes per hour (ac/h).

Modelling was carried out based on this recommendation, but it was found that the requirement of 26°C could not be met. To try to achieve this, the ventilation rate was further increased, but became excessive and likely to cause draughts to the occupants, poor temperature control and increased energy consumption.

Consideration was then given to a terminal cooling solution, using active chilled beams which provide cooling, heating and fresh air via the primary air supply system. The performance of chilled beams is related to their physical size and thus the amount of primary air supplied from the central air handling plant. The primary air volume will also

provide make up for the extract from the ensuite toilets to achieve a negative inflow of air into the bedroom from the corridor as required by SHTM 03-01 Appendix 1 Table A1 .

Using active chilled beams delivers the temperature control requirement, provides individual room control and fresh air, albeit less that the recommendation of SHTM 03-01.

Chilled beams are also an energy efficient solution and save some 9kg/$m^2$ of $CO_2$ over that of an all air system delivering 6ac/h, equivalent to about 10% of the hospitals' total emissions.

**Conclusion**

If natural ventilation could be employed then the air change rates within the bedrooms would be variable dependant on window opening and external conditions, and is rarely likely to achieve 6ac/h.

The recommended air change rate of 6ac/h in the SHTM is considered to relate to the ability to achieve an acceptable internal environment, i.e 50 hours exceedence above 28°C. This could be achieved with 6ac/h of cooled air.

However, the Board's requirement for a reduced temperature makes this solution impractical and the use of chilled beams is the only viable solution, using a reduced quantity of primary air.

Whilst the air change rate is less than the SHTM, at a supply air volume of 30 litres per second it is in compliance with Scottish Building Regulations and also CIBSE codes, giving sufficient fresh air for a continuous occupation of three people at 10-12 litres per second each.

**NSGH**
**WARD VENTILATION DESIGN STRATEGY**

**Board Requirement**

The design requirements for the NSGH states that the summertime temperature limit is ‘not to exceed 26°C’.

This exceeds the guidance provided within the draft SHTM 03-01 on the design of ventilation in healthcare premises, limiting the summertime temperature to ‘not exceed 28°C for more than 50 hours per year’.

**Natural Ventilation**

The SHTM allows for the natural ventilation of areas including general wards. In clause 2.3 it states that ‘as the motivating influences of natural ventilation are variable, it is almost impossible to maintain consistent flow rates and ensure that minimum ventilation rates will be achieved at all times. This variability is normally acceptable for general wards’.

Through the use of thermal modeling during the bid stage the use of natural ventilation using openable windows was investigated and results showed that the Board’s requirement for temperature control could not be achieved. Furthermore, adding additional background cooled mechanical ventilation, at a quantity to balance the ensuite extract rate, still did not achieve the requirement. Other concerns with natural ventilation included patient comfort due to uncontrolled wind driven ventilation and air quality, particularly in winter when windows would be closed.

Therefore, the sole use of mechanical ventilation was explored, again using thermal modeling.

**Mechanical Ventilation**

The recommended air change rate for single rooms in SHTM 03-01 Appendix 1 Table A1 for single rooms is 6 air changes per hour (ac/h).

Modelling was carried out based on this recommendation, but it was found that the requirement of 26°C could not be met. To try to achieve this, the ventilation rate was further increased, but became excessive and likely to cause draughts to the occupants, poor temperature control and increased energy consumption.

Consideration was then given to a terminal cooling solution, using active chilled beams which provide cooling, heating and fresh air via the primary air supply system. The performance of chilled beams is related to their physical size and thus the amount of primary air supplied from the central air handling plant. The primary air volume will also

provide make up for the extract from the ensuite toilets to achieve a negative inflow of air into the bedroom from the corridor as required by SHTM 03-01 Appendix 1 Table A1 .

Using active chilled beams delivers the temperature control requirement, provides individual room control and fresh air, albeit less that the recommendation of SHTM 03-01.

Chilled beams are also an energy efficient solution and save some 9kg/$m^2$ of $CO_2$ over that of an all air system delivering 6ac/h, equivalent to about 10% of the hospitals' total emissions.

**Conclusion**

If natural ventilation could be employed then the air change rates within the bedrooms would be variable dependant on window opening and external conditions, and is rarely likely to achieve 6ac/h.

The recommended air change rate of 6ac/h in the SHTM is considered to relate to the ability to achieve an acceptable internal environment, i.e 50 hours exceedence above 28$^{o}$C. This could be achieved with 6ac/h of cooled air.

However, the Board's requirement for a reduced temperature makes this solution impractical and the use of chilled beams is the only viable solution, using a reduced quantity of primary air.

Whilst the air change rate is less than the SHTM, at a supply air volume of 30 litres per second it is in compliance with Scottish Building Regulations and also CIBSE codes, giving sufficient fresh air for a continuous occupation of three people at 10-12 litres per second each.

Subject: NSGH - today

Stewart,
Things for today:
1) Review of BE M+E statements on the log to date.
2) Air Changes - WW to take Board through this + specific query = do we think SHTM 03-01 is driven by temperature or HAI for stated nr oa air changes;
3) Water Storage - take Board through this + maybe a table of volumes etc all in the same 'currency' - I.e. Notes going around discuss in m3 and litres per person and per bed - some comfort/clarirty on this needed;
4) Distribution Pipework - looks like 3 x 50per cent will be requested;
Thanks,
Mark.

Mark,
On ventilation we see this as a sensible , practical solution and Energy efficient although it doesn't strictly comply with the SHTM,only further proviso is that room should be kept at a neutral or slightly negative pressure as per the SHTM which needs to be incorporated in extract system sizing
On the water pipe resilience ,which applies to all services from the Energy Centre, either solution technically satisfies the ER's the 100 % solution probably easier to physically separate, proposals for which need to be signed off although maybe this falls into Design Development

Mark

Attached latest update of M&E Log. There are a couple of bits that I still need to get an answer on but thought I would issue anyway. I have also attached a paper by ZBP on the Wards Ventilation Strategy. They have discussed this with Stuart at WW who seems to support it.

cheers

Ross

**NSGH**
**WARD VENTILATION DESIGN STRATEGY**

**Board Requirement**

The design requirements for the NSGH states that the summertime temperature limit is 'not to exceed 26°C'.

This exceeds the guidance provided within the draft SHTM 03-01 on the design of ventilation in healthcare premises, limiting the summertime temperature to 'not exceed 28°C for more than 50 hours per year'.

**Natural Ventilation**

The SHTM allows for the natural ventilation of areas including general wards. In clause 2.3 it states that 'as the motivating influences of natural ventilation are variable, it is almost impossible to maintain consistent flow rates and ensure that minimum ventilation rates will be achieved at all times. This variability is normally acceptable for general wards'.

Through the use of thermal modeling during the bid stage the use of natural ventilation using openable windows was investigated and results showed that the Board's requirement for temperature control could not be achieved. Furthermore, adding additional background cooled mechanical ventilation, at a quantity to balance the ensuite extract rate, still did not achieve the requirement. Other concerns with natural ventilation included patient comfort due to uncontrolled wind driven ventilation and air quality, particularly in winter when windows would be closed.

Therefore, the sole use of mechanical ventilation was explored, again using thermal modeling.

**Mechanical Ventilation**

The recommended air change rate for single rooms in SHTM 03-01 Appendix 1 Table A1 for single rooms is 6 air changes per hour (ac/h).

Modelling was carried out based on this recommendation, but it was found that the requirement of 26ºC could not be met. To try to achieve this, the ventilation rate was further increased, but became excessive and likely to cause draughts to the occupants, poor temperature control and increased energy consumption.

Consideration was then given to a terminal cooling solution, using active chilled beams which provide cooling, heating and fresh air via the primary air supply system. The performance of chilled beams is related to their physical size and thus the amount of primary air supplied from the central air handling plant. The primary air volume will also

provide make up for the extract from the ensuite toilets to achieve a negative inflow of air into the bedroom from the corridor as required by SHTM 03-01 Appendix 1 Table A1 .

Using active chilled beams delivers the temperature control requirement, provides individual room control and fresh air, albeit less that the recommendation of SHTM 03-01.

Chilled beams are also an energy efficient solution and save some 9kg/$m^2$ of $CO_2$ over that of an all air system delivering 6ac/h, equivalent to about 10% of the hospitals' total emissions.

**Conclusion**

If natural ventilation could be employed then the air change rates within the bedrooms would be variable dependant on window opening and external conditions, and is rarely likely to achieve 6ac/h.

The recommended air change rate of 6ac/h in the SHTM is considered to relate to the ability to achieve an acceptable internal environment, i.e 50 hours exceedence above 28°C. This could be achieved with 6ac/h of cooled air.

However, the Board's requirement for a reduced temperature makes this solution impractical and the use of chilled beams is the only viable solution, using a reduced quantity of primary air.

Whilst the air change rate is less than the SHTM, at a supply air volume of 30 litres per second it is in compliance with Scottish Building Regulations and also CIBSE codes, giving sufficient fresh air for a continuous occupation of three people at 10-12 litres per second each.

**Subject:** NSGH - air changes

Stewart,
Think we have a way forward on this one, need a calculation carried out however tomorrow morning to prove our resolution.
This involves litrespersecond, air changes etc and therefore requires your technical input and illustration.
Can we have support for halfhour/hour in the morning please (say 0930hrs or earlier if it suits).
Regards,
Mark.

Email:

Dear Mr. Ross

**NEW SOUTH GLASGOW HOSPITALS – LEAD CONSULTANT AND TECHNICAL TEAM FEES FOR STAGE 1 LABORATORY PROJECT AND STAGE 2 DESIGN DEVELOPMENT MAIN BUILD**

I refer to recent dialogue regarding fees for the next stages of the project and write to confirm the agreed fee envelope for the key stages as follows.

**New Laboratory Project**

The fee allocation for a period of 116 weeks commencing Tuesday 5th January 2010 are as follows;

| Activity | Fee Allowance | Remarks |
|---|---|---|
| Project Management support | £196,620 | Based on input of 2 days (15hrs) per week by Mark Baird. |
| Cost Management | £287,100 | Based on input of 2 cost managers each for 2days (15hrs) per week. |
| **Agreed Budget Total** | £483,720 | |

**New Adult & Children's Hospitals**

The fee allocation for a period of 57 weeks commencing Tuesday 5th January 2010 are as follows;

| Activity | Fee Allowance | Remarks |
|---|---|---|
| Conclusion of Contract | £76,389 | This work is complete. |
| Project Management support | £141,702 | Based on input of 3 days (22hrs) per week by David Hall. |
| Cost Management | £254,790 | Based on input of 2 cost managers each for 2days (15hrs) per week. In addition input from Director at 2 days per week (15hrs). |
| PM Support - Commissioning | £59,000 | This a sum of money is allocated for provision of advice and support as provided by Paul Fairie (£93.31/hr) on a call off basis and only by instruction by either the Project Director or Project Manager. This sum may not be fully expended over the 57 week period. |
| CDMC service | £30,000 | Support provided by URS Corporation as part of your team for the period. Fee split £25k / £5k - Hospitals / Laboratories. |
| Healthcare Planning support | £20,000 | Input as required at key stages during design development, input subject to agreement with Project Director/Manager. |
| Building Services support | £40,000 | Input as required during design and package development in line with Appendix K of ITPD requirements, input subject to agreement with Project Director/Manager. |
| **Agreed Budget Total** | £621,881 | |

**Project Management Support**
The inputs by David Hall and Mark Baird will be developed over the next 2-3 weeks based on the attached schedules for both Design Development (Schedule A) and construction works on the Laboratory Project (Schedule B).

**Cost Management**
Inputs by the Cost Managers will generally follow the requirements listed in the attached Schedule C.

**Monthly Look Ahead**
As previously discussed the Board want to ensure that the input by Currie & Brown is managed within an agreed cost envelope, and that any pressures are highlighted and additional work agreed in advance of this being undertaken. I propose that we meet on a monthly basis to review progress and deal with any specific areas of concern. We can jointly agree the most appropriate time to do this, and I suggest this is tagged onto the monthly Commercial Group meetings.

**Work Outwith the Agreed Budgets**
The agreed budgets are considered as a ceiling subject to additional activities being agreed with the Project Director / Manager. On this basis, it is the responsibility of Currie & Brown staff to manage their time and input within these allowances, work undertaken without approval will be at your risk. It is understood that workload may fluctuate by week and the agreed allowances are an average input over the period.

**Delegation of Duties**
As the Board are undertaking the role of Project Manager we require to delegate a range of duties which will most likely mirror the attached schedules A-C. I propose that David and Mark meet with myself and Alan Seabourne to agree duties for both Project Manager and Cost Advisor, please let me know if you wish to undertake this task.

To conclude, I would like to be clear that the Board value the work and support the Currie & Brown team have brought to the project up to this stage, and look forward to jointly taking the project into the construction stage.

Yours sincerely

[redacted]

**Peter J. Moir**

**Head of Major Projects**

Cc Alan Seabourne Project Director

**New South Glasgow Hospitals and Laboratory Project**

**Project Management Support – Schedule A** (This reference not NEC related)

**Design Development Stage for Main Hospitals**

Key activities and tasks to be undertaken during the 57 week programme commencing 5th January 2010.

- Support the Project Director/ Manager to ensure that the Design Programme is progressing on schedule and to flag and action necessary requirements to ensure the milestones of project programme(s) are achieved.
- Participate in the design development user group sessions as required to support the Hospital Project Managers to deliver their objectives within time and cost.
- In conjunction with the Project Manager, control all early warning issues arising from design development and manage, control, report these warnings to relevant staff/groups. Provide mitigation advice to Project Director/Manager to mitigate all potential cost increases and prolongations to the works programme.
- Liaise with cost advisers to keep them aware of all potential cost issues.
- Liaise with the project Manager to keep him aware of all potential cost and programme issues.
- Oversee, manage and control other Technical Adviser input to Stage 2, ensuring that the Project Director/Manager is aware of all activities and resource requirements.
- Set out programme of work for Technical Adviser input to ensure Design is developed and compliant with contract (Employer's Requirements and Works Information).
- Attend meetings, groups as required to complete stage 2, ensure adequate liaison and co-ordination is made regarding programme of works, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Attend risk management and reduction meetings as directed by the Project Director/Manager and assist with the review and update of the project risk register.
- Input to Full Business Case development and completion for submission to NHS Board.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies
    - Accept particulars of the Contractor's design or to give reason for non-acceptance.
    - Accept particulars of the design of equipment or to give reasons for non-acceptance.

- Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
- Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties
- Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.
- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.
- Assist the PM to review potential effects to programme and assist with development of strategies to mitigate any prolongation as required.

This schedule generally summarises the key Project Manager supporrt services required by the Board commencing 5th January 2010, for periods;

Stage 2 – Design Development of Main Hospitals Duration 57 weeks.

.

**New South Glasgow Hospitals and Laboratory Project**

**Project Management Support – Schedule B** (This reference not NEC related)

**Laboratory Project – Site Works**

**Type of Support**

- Management of Construction programme and to accept any revisions in association with the Project Manager.
- Co-ordination of all Technical Adviser requirements (Advise on their input level and resource)
- Attend meetings as agreed with Project Director/Manager.
- Active management of all technical actions required to complete project.
- Close liaison with contractor to provide Project Manager with information on raising Early Warnings and managing these through the construction programme, providing Project Manager with mitigation strategies
- Liaising with the client to develop and deliver all interface issues such as: equipment/IT plans and commissioning plans, etc.
- Working in conjunction with Project Manager and Cost Advisor(s) to ensure adequate liaison and co-ordination is provided to assure progress is made regarding works, costs, payments, etc.
- Keep Project Manager fully informed about project management support in terms of need and resources.
- Support Project Manager to manage project risks and monitor and report on risk register items.
- To support the Project Manager in monitoring and controlling testing and inspection process.
- Complete NEC3 duties as required by Project Manager. For example, assisting the Project Manager to:
    - give notice of ambiguities or inconsistencies in the documents. To give instructions resolving ambiguities or inconsistencies
    - Accept particulars of the Contractor's design or to give reason for non-acceptance.
    - Accept particulars of the design of equipment or to give reasons for non-acceptance.
    - Accept replacements persons proposed by the Contractor or to give reasons for non-acceptance.
    - Assess the amount due for payment at each assessment date. To decide the first assessment date to suit the procedures of the parties
    - Consider any application from the Contractor when assessing amounts due for payment. To give the contractor details of how amounts due have been assessed.

- Notify the Contractor of the compensation events which arise from the giving of instructions or changing of earlier decisions. To instruct the Contractor to submit quotations unless the event arises from a fault of the Contractor.
- Extend the time allowed for the submission of quotations and replies if the contractor agrees. To notify the Contractor of any agreed extensions for the submission of quotations or replies.
- Correct the description where a change to Works Information makes the description of the Condition for a Key Date incorrect.
- decide whether the Contractor did not give any early warning of compensation event which should have been given and to notify the contractor of his decision.

Work in a collaborative manner with the Project Director/Manager, Cost Advisor, Supervisor, NHS Client Team and the Contractor.

This schedule generally summarises the key Project Manager support services required by the Board commencing 5th January 2010, for periods;

Stage 1 – Laboratory Project Site Works Duration 116 weeks.

**New South Glasgow Hospitals and Laboratory Project**

**Cost Management – Schedule C** (This reference not NEC related)

**Design Development Stage for Main Hospitals – Works Stage for Laboratory Project**

**NEC3 Engineering and Construction Contract - Option 'C' target contract with activity schedule; scheme contract)**

The Cost Advisor will report to the named Project Manager for the NEC Contract.
Note the full services are listed below, those not required have been struck through.

~~1. Assist with investigation into and evaluation of procurement strategy~~

2. Advise on VAT liability. Utilising the free VAT advisory service provided by Department of Health

3. Monitor VAT advice and the application of that advice and provide ad-hoc reports to Department of Health liaising with the free Department of Health VAT assessment & advisory section. Also liase with the Board's VAT advisor and Board Finance Manager.

4. Provide the NHS Client with general advice on the NEC3 ECC Contract.

5. Assist in establishing key dates for the proposed scheme and advise the NHS Client on programme and completion strategy for inclusion in the Scheme Contract.

~~6. Advise on the capital costs associated with any proposed contract phasing~~

~~7. Assist in preparation or validation of a conceptual scheme total construction cost, if possible, to establish financial scope of work for inclusion in the scheme pack and contract.~~

~~8. Assist in establishing appropriate level of Delay damages for the *works* and Sections~~

~~9. Provide the NHS Client with advice on NEC3 insurance provisions and Scheme specific options.~~

~~10. Assist in preparation of a Scheme Pack to be issued for return of expression of interest by the Principal Supply Chain Partner (PSCP)~~

- ~~Scope of work generally~~
- ~~Prepare Draft Scheme Contract and Agreement The National Integrated Construction Framework for NHS Scotland Template for the Scheme Contract~~
- ~~Include Works Information and Site Information in draft scheme contract document~~
- ~~Advise NHS Client on use of standard options in Scheme Contract~~

~~11. Participate in open day and selection of PSCP and PSCM's.~~

~~12. Finalise draft Scheme Contract for acceptance and issue by NHS Client to selected PSCP~~

~~13. Prepare letter of appointment for NHS Client to engage PSCP.~~

14. Attend regular (usually monthly) NHS Client meetings.

15. Provide cost review advice service during design development stage for main hospitals specifically assisting the Project Manager to review both early warnings and compensation events and any cost related processes.

**Post Contract**

1. Provide and maintain appropriate support for the Client's *Project Manager*, including assist the *Project Manager* to carry out the following during the life the scheme

    - Compile reports and recommendations for submission to the Project Steering Group and Project Board.
    - Prepare Management Control forms (MCP) as required by Capital Investment Manual for submission to NHS Client on monthly/quarterly programme as appropriate.
    - Maintain appropriate communications with the contractor (Brookfield).
    - Maintain appropriate communications with the Board's Director of Finance and the Board's Finance Team, provide guidance and information relative to cashflow, valuation as required.
    - Validation of the proposals for risk management & transfer, and corresponding contingency adjustments.
    - Participate in DART workshop to establish scheme specific analysis of risks leading to a cost effective and jointly owned Risk Register
    - Provide advice on all aspects of insurance for the project.
    - Assist with the validation of cost components other than construction.
    - Participation in Value Management & Value Engineering process lead by the contractor – ~~based on a one half-day workshop and validation of cost impacts arising as submitted by the *Contractor.*~~
    - ~~Prepare priced submission for indexation, send to DTI who will carry out indexation and analyse and report on same.~~
    - Validation of Life Cycle Cost advice prepared by the contractor.
    - ~~Participate in development of the target Price up to setting of Target Total of the Prices by checking and substantiating the PSCP's proposal in context of 'open book accounting'~~
    - Monitor and review performance of contract administration by the contractor.

- Assist with the implementation of an Early Warning and other contractual procedures using the pro forma documentation pack, work with project Manager and Project Management support to maintain up to date and accurate system.
- Monitor VAT advice and the application of that advice and provide ad-hoc reports to NHS Client.
- Assist the Project Manager to establish and manage an internal Change Control Reporting Procedure, which is compatible with contractual procedures, for all potential Compensation Events (change) whether initiated by the Client through the *Project Manager*, the *Project Manager* or by the contractor. The purpose of this procedure being to :
    - Alert all parties to <u>all</u> change whether considered having any implications or not.
    - Circulate the relevant information to all parties.
    - Facilitate the assessment (with contractor, NHS Client and Client Advisors input where appropriate) of the implications of all change – scheme cost, programme and quality - in advance of instruction to the contractor.
    - Enable decisions to be taken by the NHS Client whether to approve (i.e. proceed with) or not approve (i.e. abandon) the proposed changes and to identify actions needed to accommodate the implications of both actual and approved potential changes.
    - Facilitate the central registering of <u>all</u> change.
- Attend monthly progress meetings chaired by the *Project Manager*
- Attend regular (usually monthly) Client meetings

2. Assist the *Project Manager* during Stage 3 FBC to

    a. Administer the ECC contract

    - Monitor the Accepted Programme
    - Monitor expenditure against the contractors FBC expenditure profile
    - Review *Contractor* forecast of Defined Cost
    - Perform acceptance of proposed subcontractors
    - Perform early warning duties
    - ~~Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.~~
    - Validation of Price Model.
    - Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme

- Perform assessment duties,
- Review contractors assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Prepare compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the contractor
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability

~~b. Work with the PSCP to develop a realistic target (for the design completion, construction commissioning and handover Stage of the scheme) that can be used as the foundation for agreeing the Prices (target for stage 4).~~

~~c. To arrive at a mutually acceptable stage 4 total of the Prices (target) for proposal to the NHS Client; including participating in DART workshop to establish levels and apportion responsibilities for identified risk~~

~~d. Work with the PSCP to establish proposals in respect of documentation and procedures in anticipation of completing the scheme:~~

e. Completion of FBC

Assist the Project Manager to agree total of Defined Cost of the Stage for updating of the FBC *Activity Schedule* and adjustment to the Summary Total of the Prices.

If the scheme is terminated assist the *Project Manager* and advise the NHS Client on the Termination Procedure.

3. Assist the *Project Manager* during the construction and handover to

   a. Administer the NEC3 ECC contract

      - Monitor the Accepted Programme
      - Monitor expenditure against the contractors FBC expenditure profile
      - Review contractors forecast of Defined Cost
      - Perform acceptance of proposed subcontractors
      - Perform early warning duties
        - Input to the development of the target Price – and make recommendations to *Project Manager* in respect of value for money.
        - Validation of Price Model.
      - Propose updated key dates for the contract, and provide the *Project Manager* with advice on the cost aspects of the programme
      - Perform assessment duties including, assess the price of work done (PWDD) through the

validation of records of Defined Cost submitted by the contractor and compliance with the Schedule of Cost Components. Take site particulars as necessary; assess progress against programme and liaise with the *Project* Manager to determine any disallowed costs that may apply. Agree with contractor the amount due and report same to the *Project Manager*

- Review contractors assessment application
- Prepare assessment documents and certification for issue by the *Project Manager*
- Assist with preparation of compensation event notifications for the *Project Manager*
- Advice to the *Project Manager* on compensation events notified by the contractor.
- Evaluate compensation quotations and advise on Defined Cost implications and contractual acceptability
- Monitoring work related to Provisional Amounts in the contract and adjusting same.
- Validate construction cost profiles – as prepared by the contractor – following monthly or other event driven programme reviews
- Monthly reporting of the financial status of the project bringing together and summarising the construction cost all Compensation Events (change), advised to date, together with anticipated change and incorporating the construction expenditure profile.
- Validate, negotiate and agree the final account including *share* calculations.
- Assist the *Project Manager* in the administration of the contract during the Defects period and calculations for the Final Amount Due at the end of the *Defects Date.*

Work with Supervisor to review implications of rectifying defects in terms of cost and programme.

Work in a collaborative manner with the Project Director/Manager, Project Manager support team, Supervisor, NHS Client Team and the Contractor.

This schedule generally summarises the key Cost Advisor services required by the Board commencing 5th January 2010, for periods;

| | |
|---|---|
| Stage 2 – Design Development of Main Hospitals | Duration 57 weeks. |
| Stage 1 – Laboratory Project Site Works | Duration 116 weeks. |

# NHS Greater Glasgow & Clyde

# New South Glasgow Hospitals and Laboratory Project

# High Level Information Pack – Supervisor Role

**February 2010**

**Contents** **Page**

1.0 Current Position and Purpose of this HLIP

2.0 Background and Strategic Context

3.0 The Project

4.0 Project Management

5.0 Programme

6.0 Procurement Strategy

7.0 Project Budget

8.0 Supervisor Role and draft Scope of Service

9.0 Selection Process and Management Arrangements

Appendix 1 – Selection of Contractors Design Drawings (As tender)
Appendix 2 – Management structure – group meetings
Appendix 3 – List of Design Requirements for FBC – Adult & Children's Hospitals
Appendix 4 – Design Acceptance Procedure

## 1.0 PURPOSE OF HIGH LEVEL INFORMATION PACK (HLIP)

NHS Greater Glasgow and Clyde (the Board) require the services of a Supervisor to support their Project Team with the delivery of the new £842m hospital redevelopment at the Southern General Hospital in Govan.

The Board's Project Team have spent the last eighteen months developing the brief, project requirements and works information and issued their Invitation to Participate in Competitive Dialogue (ITPD) to three design and build teams at the beginning of May 2009. The ITPD process lasted approximately 4.5 months with the three teams all returning their submissions on 11th September. There followed an intense period of evaluation by the Board's team and their advisers that numbered nearly 40 persons. The evaluation concluded in early November 2009 with the announcement of the selection of a preferred bidder on 6th November 2009. A contract was signed on the 18th December 2009 with Brookfield Construction UK Ltd (Brookfield).

The procurement of the New South Glasgow Hospitals Project (the "Project") comprises a new adult acute hospital, a new children's hospital, laboratory facilities, associated FM support areas and other site facilities and infrastructure on the existing hospital site at the Southern General in Govan, Glasgow.

The Project involves a capital investment in the region of £670m inc. VAT to provide in the order of 167,000 m2 of new hospital facilities comprising;

- a 1,109 bed adult acute hospital – 107,000 sq.m.
- a 240 bed Children's Hospital – 36,000 sq.m.
- new laboratory facilities – 25,000 sq.m.
- support accommodation including a new energy centre, facilities management base and general roads and site infrastructure.

The Board have decided to procure the services of the Supervisor through the Frameworks Scotland arrangement, that has been established by Health Facilities Scotland. This HLIP has been developed to incorporate the relevant guidance, information and documentation to provide prospective PSC companies with adequate background information on the projects to allow them to prepare a comprehensive response to the Board's enquiry.

This document provides a high level overview of the Board's plans to redevelop the Southern General Hospital complex, rather than generate another comprehensive document for the project the Board would also direct the reader to the electronic copy of the Board's 2009 Campus Masterplan. This document provides a great deal of background information about the project, although it is based on the Board's exemplar design and not the design that will be taken forward with Brookfield. The Board have included a selection of drawings representing the Brookfield scheme design as submitted within their tender in Appendix 1, and these should be used to inform the preparation of your submission.

The contract being used by the Board to deliver the three projects with Brookfield is the NEC 3 Option C, the Board wish to make the Supervisor appointment under NEC 3 Option A – priced contract with activity schedule based on the current contract programmes.

Any questions arising from this document should be addressed to;

Peter Moir
Head of Major Projects
NHS Greater Glasgow & Clyde
[redacted]

## 2.0 BACKGROUND AND STRATEGIC CONTEXT

### NHS Greater Glasgow and Clyde

The Board is Scotland's largest health board. Formed in April 2006, it joined the Clyde region of the former Argyll & Clyde Health Board with the former Greater Glasgow Health Board to create NHS Greater Glasgow and Clyde. The Board has 44,000 staff serving a total population of 1.2million people, with a budget of c£2.6billion.

Acute services are delivered from 10 hospitals, 3 of which lie within Clyde and the remaining 7 are located within the Greater Glasgow area. The geographical area covered includes West Dunbartonshire, Inverclyde, Renfrewshire, East Renfrewshire, East Dunbartonshire, Glasgow City, South Lanarkshire (Rutherglen & Cambuslang) and North Lanarkshire.

Within Glasgow, the Western Infirmary and Gartnavel General Hospitals operate in tandem delivering acute care in the west-end of the city. In the north-east of the city acute care is delivered from Stobhill Hospital and Glasgow Royal Infirmary. The Victoria Infirmary serves the south-east and the Southern General Hospital the south-west of the city. Services for children are provided centrally from the Royal Hospital for Sick Children, Yorkhill. Full adult Accident and Emergency services are provided at the Western Infirmary, Glasgow Royal Infirmary, the Victoria Infirmary and the Southern General Hospital. Stobhill Hospital has a casualty department which is covered by Consultant staff from Glasgow Royal Infirmary and the Western Infirmary.

### Acute Services Review

Over the last ten years the Board has been developing its Acute Services Review ("ASR") to modernise the acute adult health service in Glasgow. The ASR proposals were approved in 2002 and subsequently updated in 2006 to reflect the decision that the New Children's Hospital would be located on the Southern General site. The strategy is to reduce the number of adult inpatient sites from the current five hospital sites to three, all of these providing acute receiving facilities, with two sites providing A&E and trauma services. The A&E and trauma services will be located at the Glasgow Royal Infirmary and the Southern General sites, with the acute receiving facility only at Gartnavel General. This will involve building a new inpatient hospital on the Southern General site and refurbishment/smaller builds at the Glasgow Royal Infirmary and Gartnavel General sites.

The ASR proposals will be delivered in four distinct phases as follows;

| **Phase 1 - Complete** | **Phase 2** |
|---|---|
| West of Scotland Cancer Centre at Gartnavel;<br>Replacement of major elements of Victoria Infirmary and Stobhill Hospital with the development of new Stobhill and Victoria Hospitals;<br>The transfer of Cardiothoracic Services to Golden Jubilee Hospital; and<br>Laboratory development on Gartnavel site. | New maternity build at Southern General Hospital allowing full closure of Queen Mother's Hospital (completed Nov 09 transfer Jan 10);<br>New Children's Hospital allowing full closure of Royal Hospital for Sick Children;<br>New build major acute hospital for South Glasgow (enabling closure of Western Infirmary, Victoria Infirmary and Mansionhouse Unit); and<br>New Build Laboratory Facility. |
| **Phase 3** | **Phase 4** |
| Glasgow Royal | Gartnavel General Hospital - redevelopment |

**ASR Final Configuration**

The conclusion of the ASR programme will create the following final configuration:

- New cancer hospital at Gartnavel General Hospital;
- Cardiothoracic service and interventional cardiology at Golden Jubilee Hospital;
- 2 maternity units (Princess Royal Maternity Hospital and Southern General Hospital);
- 2 new Ambulatory Care Hospitals (Stobhill/Victoria);
- 2 major acute sites (Southern General Hospital and Glasgow Royal Infirmary);
- 3rd acute inpatient site (Gartnavel General Hospital);
- New children's hospital; and
- Transfer of services and closure of Western Infirmary, old Stobhill Hospital, Victoria Infirmary, Mansionhouse Unit, Queen Mother's Hospital and Royal Hospital for Sick Children.

**Key Benefits**

It is anticipated that the Project will deliver the following range of benefits for patients and staff:

- Provision of high quality services which are timely, accessible and consistently available by providing local access to core medical and surgical services and consolidating specialist and tertiary services on fewer sites within the city;
- Investment in high tech equipment and Information Technology;
- Attention to design and landscaping to improve the patients overall care;
- Facilities that are fully accessible to all and DDA (Disability Discrimination Act) compliant;
- Reduced waiting times for treatment through the provision of more efficient services increasing clinical capacity by investment in Information Technology (IT), the concentration of clinical teams onto fewer sites, optimising departmental and functional relationships and improving access to diagnostic services such as laboratory services;
- Access to highly specialised care provided by skilled staff facilitated through the centralisation of adult acute services;
- Rapid, one stop services through high volume processing of diagnostic tests and an extended working day to fit in with new models of care;
- The support of a progressive and consistent elective workload due to the segregation of emergency and elective treatments;
- Enhanced staff skills and knowledge through improved retention and recruitment due to a radically better working environment;
- Modern, fit for purpose facilities which meet the needs of patients, visitors and staff; and
- Enhanced University links through co-location of an academic centre with the New South Glasgow Hospitals. This will enhance teaching, and research and play a significant role in attracting and retaining high quality staff in all disciplines.

**Critical Milestones Reached to Date**

The following key milestones have been achieved in the procurement of the Project to date:

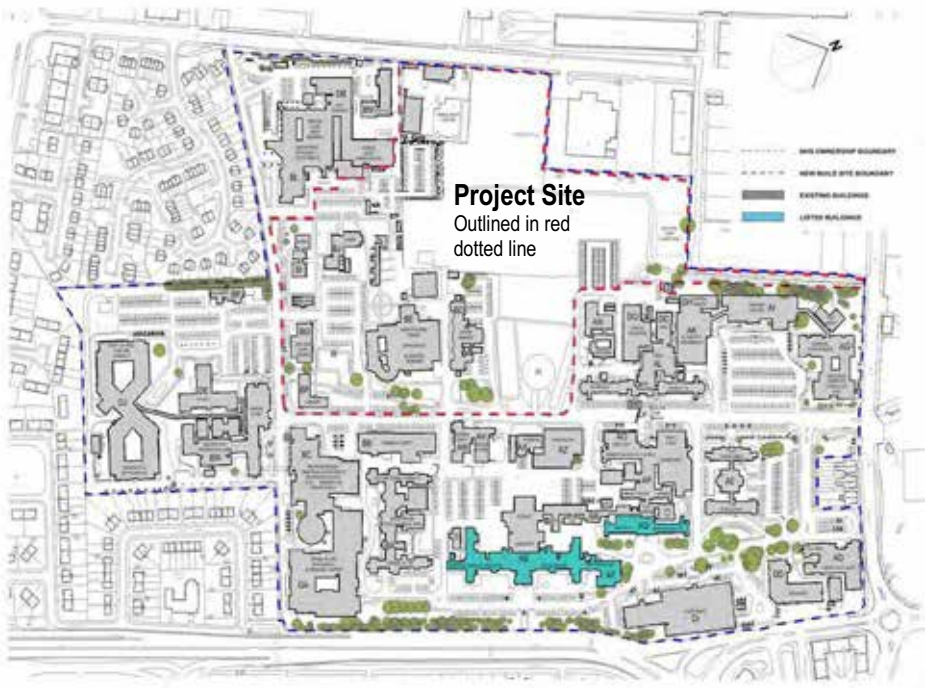
- Outline planning permission secured in April 2007;
- Outline Business Case approval by the Scottish Government in May 2008;
- Approval to proceed to market from Gateway 2 Review in January 2009;
- Publication of OJEU notice and Industry Day in February 2009;
- Section 75 agreement in July 2009;
- Return of Tenders 11th September 2009;
- Board approval of preferred bidder and announcement November 2009.
- Detailed planning consent for Laboratory Project in December 2009;
- Contract sign with Brookfield - 18th December 2009;
- Laboratory Project – FBC approval December 2009.

## 3.0 THE PROJECT

### 3.1 Introduction

The Southern General Hospital site extends to some 28.6 hectares and is located within the Govan area, lying to the south-west of Glasgow City Centre adjacent to the residential neighbourhood of Drumoyne and the industrial areas of Shieldhall and King George V Dock. The site is located 500 metres south of the River Clyde. The site's northern boundary is defined by Renfrew Road/Govan Road with the eastern boundary defined by Moss Road/A739 (Clyde Tunnel approach road). Langlands Drive and residential developments delineate the southern boundary and Hardgate Road runs north-westwards to identify the western boundary of the site.

The development site for the Project extends to some 8.6 hectares and is located in the west-central area of the hospital site as identified on the drawing below. The development site is bounded by operational healthcare buildings to three sides, with boundaries to neighbouring industrial areas to the north/north-west. The existing buildings within the development are to be demolished in advance of the Project.



### 3.2 Project Scope

The project includes the provision of 1,109 adult and 240 children's beds, with target works completion dates of March 2012 (Laboratories) and January 2015 (Hospitals). The bed numbers are illustrated below, the bulk of the beds will be provided in single rooms with en-suite facilities with the exception of critical care areas and a small percentage of 4 bed bays in the Children's wards.

| **Adult Hospital** | | **Children's Hospital** | |
|---|---|---|---|
| **Specialty** | **Beds** | **Specialty** | **Beds** |
| General Medicine (incl MHDU + AAU) | 405 | Inpatient (incl critical care areas) (*12 beds in maternity facility) | 193* |
| CCU | 20 | Short-stay (observation ward) | 20 |
| Stroke | 26 | Day Care/Day Surgery | 27 |
| Haematology | 14 | **Total Inpatient Beds** | **240** |
| Dermatology | 18 | | |
| Nephrology | 80 | | |
| Geriatric Medicine | 93 | | |
| Surgery & Vascular (incl AAU) | 164 | | |
| Urology | 39 | | |
| Orthopaedics/rehab | 139 | | |
| ENT | 31 | | |
| ITU | 20 | | |
| SHDU | 23 | | |
| Clyde / Contingency | 37 | | |
| **Total Inpatient Beds** | **1,109** | | |

### 3.3 New Adult Hospital

This will provide A&E services and acute specialist in-patient care as well as medical day services and out-patient clinics serving the local population. Key components of the facility will include:

**In Patient Accommodation** - Surgical beds (general surgery, orthopaedics, urology, vascular, ENT and renal); Medical beds; Acute Assessment Unit – 118 beds, ICU/HDU/CCU – 79 beds, Acute Stroke – 26 Beds and Care of the Elderly 93 beds.

**Out Patient Accommodation** Full range of general outpatient clinics including, among others, diabetic unit, respiratory, orthopaedics and urology.

**Day Services** 22 medical day bed area; 30 station dialysis unit.

**Treatment & Diagnostic Services** Emergency Department, 20 operating theatres, imaging, and endoscopy.

**Clinical Support Services** Pharmacy dispensary, medical physics, medical illustration. Laboratory services linked to the hospital by underground route and pneumatic tube system, aseptic unit within the children's hospital. The pneumatic system to extend across the abutment with maternity and the link to neurosciences to provide for expansion of the system to these areas.

**Non Clinical Support Services Main** entrance, medical records, administration, chaplaincy, social work, staff changing, switchboard, estates, facilities, security, catering, portering, domestic, management and energy centre.

### 3.4 New Children's Hospital

This will provide A&E services and a comprehensive range of inpatient and day case specialist medical and surgical paediatric services on a local, regional and national basis. The new development will also have outpatient facilities. The care strategy is that all of Glasgow's Children's Services (up to the age of 16 and up to 18 years where appropriate) will be provided at the New Children's Hospital. Of the 240 beds planned, around 20% of the beds will be for day patients and the balance for inpatient requirements. Key components of the facility will include:

**Outpatient Accommodation** - full range of Children's outpatient clinics including audiology, general paediatrics, orthopaedics, ENT etc;
**Day Services -** circa 10 medical day beds; 4 dialysis stations and circa 25 day surgery beds;
**Treatment & Diagnostic** - accident and Emergency, minor injuries, Imaging, 9 theatres, rehabilitation;
**Clinical Support Services** Aseptic unit, pharmacy, medical physics, medical illustration;
**Non Clinical Support Services** Facilities, ancillary services, administration, spiritual services, medical records, staff change, staff dining.

### 3.5 Laboratory Facilities

The new facilities will be one of two major laboratory sites in Glasgow (the other at Glasgow Royal Infirmary). The services to be delivered from the new laboratory build include biochemistry, haematology, medical genetics, microbiology, mortuary and post mortem. The mortuary and post mortem facilities include the re-provision of the Glasgow City mortuary which also provides forensic services for the city of Glasgow. The new building will be circa 25,000 sq.m., and will include a proportion of the Facilities Management accommodation noted below. Road infrastructure to support the operation of the laboratory function will require to be completed within the laboratory build phase to facilitate operation of the laboratory while the main hospitals are still being constructed.

### 3.6 Facilities Management Building and Energy Centre

The Board require the separation of facilities management (FM) traffic from patient and public traffic, and the facilities management services within the Laboratory Building will be linked to the main hospitals building via an underground tunnel system, this will provide for goods in and goods out as well as transfers to the laboratory and mortuary areas. A robotics (automatic material handling systems) solution for the movement of certain goods has been included within the project and will be developed in more detail over the next 12 months. Other elements of the FM facilities will be part of the main hospitals basement area. The approach to energy provision is that the new facility will provide energy on a site wide basis. The Energy Centre will be located adjacent to the Laboratory Building, but will be part of the hospitals build phase (Stage 3).

### 3.7 Retained Facilities

The remainder of the site will retain approximately 630 beds within the Institute of Neurological Sciences, Maternity, Spinal Injuries, Mental Health facilities and Langlands buildings. The Langlands facility provides older people's services, dermatology and services for the young physically disabled.

The new hospital will abut the neo-natal/maternity building to provide a physical link as well as link to the neurosciences building at Level 1. On completion of the new facilities and once staff and services have moved out, the Board will convert some of the older buildings to office and educational use. This work is currently not part of this commission for Supervisor.

### 3.8 Planning

As is noted above, Outline Planning was obtained in April 2007, subject to forty-three conditions and conditional on a Section 75 Agreement being concluded in respect of transportation issues, and this was concluded with Glasgow City Council in July 2009.

The contractor will be responsible for securing detailed planning consent and sign off of the campus masterplan during 2010, this process has already commenced with early meetings between the Council, the Board and Brookfield in December 2009 and January 2010. The submission date for planning is May 2010.

### 3.9 Masterplanning – 2009 Campus Masterplan

The Board were required to update their Campus Plan (2006) as part of the submission for detailed planning consent for the new Laboratory Project in July 2009. The 2009 Masterplan has been prepared for information and the Contractor and his Design team will be required to develop a final plan to reflect their design proposals for the site. The contractor has appointed Ironside Farrar as Planning Adviser for this process.

### 3.10 Site Investigations and Existing Site

The Board commissioned a site investigation (SI) of areas of the existing campus and the main build site. The resulting SI information is available if required by contacting the writer.

The Board will carry out certain enabling works in relation to the existing site to support and prepare for the construction period of the scheme. These include:

- demolition of the existing structures on the site (including the former residences, the catering/dining facilities and the conference facility);
- removal of foundations and roads within the site; and
- the diversion of the majority of the existing utilities from the site.

The Southern General is a live hospital site, and as such the Contractor and his team will face certain constraints in the delivery of the Project. Essential 'blue light' and other access routes will require to be kept clear and unobstructed by the Contractor at all times for the duration of the construction period, with interface protocols, communications plans and emergency/contingent planning to be discussed and agreed with the Board prior to start on site. The helipad will remain in operation until January 2011, when the tower cranes for the main build project will start to be erected. Prior to this a management protocol has been developed to take account of tower cranes located on the laboratory site and Car Park 1 site.

### 3.11 Equipment and ICT

The Contractor will supply and fit Group 1 equipment, Group 2 will be free issue by the Board and fitted by the Contractor, and the Board will supply (and fix where relevant) Group 3 and Group 4 equipment. The Contractor is required to provide all necessary fixings, supports and services connections and requirements to support all of the groups of equipment listed.

It should be noted that Information Management and Technology (IM&T) is out with the scope of this Project. The Board is procuring software and end-use hardware as part of a separate IM&T project. The contractor will install all computer infrastructure within the building such as node rooms, containment, boxes and cabling.

### 3.12 Energy and Sustainability

The Board have developed energy and sustainability strategies and targets in relation to the Project. These have been developed through consultation with the Carbon Trust, Waste Resources Action Programme (WRAP).

Energy and sustainability issues are very important to the Board at a project, The Board wish to achieve BREEAM Excellent ratings for all their new buildings.

### 3.13 Community Engagement

The Project Team and the Board's Community Engagement Managers have established the required community benefit considerations for incorporation in the procurement of the Project. These have been developed in line with the Scottish Government's Guidance on Community Benefits in Public Procurement. In particular the Board will seek to work in partnership to develop initiatives around the following:

- Targeted recruitment & training;
- Developing Small and Medium Enterprises (SMEs); and

Developing Social Enterprises

## 4.0 Project Management

### 4.1 Introduction

The Board has established a project organisation structure to oversee the implementation of the Acute Services Review (ASR), including this Project. The ASR Programme Board is responsible for the implementation of the ASR strategy. The ASR Programme Board consists of the Chief Executive; the Acute Services Chief Operating Officer; the Director of Acute Services Strategy, Implementation and Planning; the Project Director; Divisional Directors; Finance Director; Executive Medical and Nursing Directors; Partnership Representation; and a Senior Civil Servant.

A Project Director, who has executive responsibility for the implementation of the Project, and a Project Team have been appointed by the Board. The New South Glasgow Hospitals Executive Board has been established to ensure that all the governance and project milestones are achieved.

The Project Team includes a range of staff from clinical, operational, planning, facilities, finance and estates backgrounds and is responsible for the co-ordination of all workstreams, reporting to the Board through its governance structures. The Project Team is led by the Project Director and is supported by legal, financial and technical advisors, as identified below.

| Role | Individual/Organisation |
|---|---|
| Senior Responsible Owner | Ms Helen Byrne Director of Acute Services Strategy, Implementation and Planning |
| Project Sponsor | Mr Robert Calderwood - Board Chief Executive |
| Project Director | Mr Alan Seabourne Project Director – New South Glasgow Hospitals Project |
| Project Technical Lead | Mr Peter Moir - Head of Major Projects<br><br>Also named Project Manager in contract. |
| Board Lead Consultant & Cost Advisor | Currie & Brown UK Limited |
| Board Legal Advisor | Shepherd + Wedderburn LLP |
| Board Financial Advisor | Ernst & Young LLP |

A number of groups have been set up to support the Project as follows:

### 4.2 New South Glasgow Hospitals Executive Board

The New South Glasgow Hospitals Executive Board ("Executive Board") will have delegated authority to make executive decisions on critical points in the Project's process. The role of the Executive Board will be to oversee the overall process of the Project and to co-ordinate work streams. The Board will meet bi-monthly or more frequently depending upon the stage of the project and will report into the ASR Programme Board.

### 4.3 ASR Systems Redesign Group

The development of the New South Glasgow Hospitals will result in a number of radical changes not just in reconfiguring clinical services across Glasgow but also in working practices and the way in which patients receive their treatment. A comprehensive and co-ordinated process will be developed to take forward the re-design aspects and in an integrated fashion with staff, human resources and workforce planning to ensure both staff involvement and that the right number of staff and skills are available to support the new ways of working.

### 4.4 Procurement and Finance Group

This has been established to meet the requirement for specialist skills in relation to taking the procurement process forward, as well as with regard to the funding, affordability and value for money aspects.

### 4.5 Joint Project Team

The Joint Project Team is responsible for managing the day to day complexities of the Project. The Joint Project Team reports to the Executive Board and, where necessary, to the ASR Programme Board, the ASR Systems Redesign Group and the Procurement and Finance Group.

### 4.6 Site Programme Co-ordinating Group

There is a very substantial construction programme planned over the next six years at the Southern General Hospital. The site will continue to operate during the full construction programme and therefore there is an established group to monitor, co-ordinate and control all on-site works.

### 4.7 Other Groups

The Board are currently developing a meetings schedule with the Contractor, and the Supervisor will be required to attend a number of these as follows;

- Construction Interface Group
- Technical Design Group

An list of the various project focused groups and meetings is included in Appendix B, and meetings that require the attendance of the Supervisor are noted. A construction progress meeting remains to be added, and may substitute the Construction Interface Group.

The Board are currently reviewing the internal meeting arrangements as listed above to rationalise the number and frequency of meetings generally now that the procurement phase of the project has commenced..

### 4.8 The Brookfield Team

The core Brookfield team is listed in the following table, the team is being supplemented as they mobilise for construction of the Laboratory Project.

| New Adult and Children's Hospitals, Energy Centre and External Works | |
|---|---|
| **Role** | **Company** |
| D&B Contractor | Brookfield Construction UK Ltd |
| Architects | Nightingale Associates |
| Landscape Architects | Gillespies LLP |
| Cost Manager | Doig and Smith |
| Healthcare Planner | Tribal |
| Civil & Structural | WSP Group Ltd |
| M&E Design | Zisman Bowyer & Partners LLP |
| Planning Advisor | Ironside Farrar |
| Acoustics | Acoustic Logic Consultancy Ltd |
| Supply Chain Partners | Dunne Group |
| (At February 2010) | Mercury (M&E) |
| | Astins (Partitions) |
| | Structal (UK) Ltd (Envelope/cladding) |

| New Laboratory Block with novated Design Team | |
|---|---|
| **Role** | **Company** |
| D&B Contractor | Brookfield Construction UK Ltd |
| Architects | BMJ Architects |
| Cost Manager | Part of Currie & Brown commission as Lead Consultant. |
| Civil & Structural | UrRS Corporation |
| M&E Design | Wallace Whittle / Harley Haddow |
| Planning Advisor | Ironside Farrar |
| Supply Chain Partners | Dunne Group |
| (At January 2010) | Mercury (M&E) |
| | Astins (Partitions) |
| | Structal (UK) Ltd (Envelope/cladding) |

### 4.9 The Currie & Brown Team

| Lead Consultant Role | |
|---|---|
| **Role** | **Company** |
| Project Management Support | Currie & Brown |
| Cost Advisor | Currie & Brown |
| CDM Co-ordinator | URS Corporation |
| Civil & Structural | URS Corporation |
| M&E Design | Wallace Whittle |
| Healthcare Planner | Buchan Associates |
| Architect Advisor | HLM Architects |

## 5.0 PROGRAMME

5.1 The outline timetable for the procurement is as follows;

| Event | Milestone |
|---|---|
| Publication of OJEU (incl MoI and PQQ) | 10 February 2009 |
| Closing date for responses to PQQ | 20 March 2009 |
| Evaluation of PQQ responses and shortlisting of bidders | 08 April 2009 |
| Issue of Invitation to Participate in Competitive Dialogue (ITPD) to bidders | 01 May 2009 |
| Tender Return | 11 September 2009 |
| Evaluation of Bids and Contract Award to Brookfield Construction. | November 2009 |
| Stage 1 (Design + Construction of New Laboratories) commences | February 2010 |
| Stage 2 (Detailed Design of Adult, Children's and Infrastructure to FBC Submission) commences | January 2010 |
| Stage 2 completion, FBC and approval to proceed with Stage 3 | November 2010 |
| Stage 3 (Engagement to carry out the construction of the Adult, Children's and Infrastructure) commences | November 2010 |
| Stage 1 Completion (Construction) - Laboratory Facilities | March 2012 |
| Operational Date – Laboratory Facilities | June 2012 |
| Stage 3 Completion (Construction) – Hospitals | January 2015 |
| Operational Date – Hospitals | Summer 2015 |
| Stage 3A (Demolition of Surgical Block and associated buildings, and completion of soft landscaping) commences | Summer 2015 |
| Stage 3A completion | Summer 2016 |

## 6.0 PROCUREMENT STRATEGY

### 6.1 Introduction

The Board's procurement strategy has used the competitive dialogue procedure to facilitate discussion with bid teams around pre-determined technical and commercial matters. The outcome of the competitive dialogue process has selected Brookfield as the Board's preferred partner and the contract was concluded in December 2009. The Board have contracted with Brookfield under an NEC3 agreement to a) design and construct the new Laboratory Facility and b) design and construct the new Adult and Children's Hospital under a target price arrangement.

This strategy allowed the contract to be awarded following evaluation of the bids which were submitted in September 2009. Post contract award, the concurrent activities of the Contractor have commenced with completion of detailed design and building the Laboratories element of the Project whilst under taking design development of the main Hospitals element of the Project. The design development culminates in the FBC compilation and approvals: the FBC is an essential gateway which must be achieved to allow the commencement of the construction of the main Hospitals element of the Project.

The terms of the contract awarded (including the overall target price for the works and programme dates and activity schedule milestones) is based on the contractor's final tender response at the end of the competitive dialogue process. As is noted above, specific gateway criteria (including necessary business case approvals) have been incorporated into the design development, programme and activity schedule in the contract through to the commencement of construction of the Adult and Children's Hospital.

The design of the Laboratory Facility was more developed at tender stage than the main hospitals, and is summarised as follows, the Laboratory design team have been novated to Brookfield for this project.

| | **Design Stage at Tender** | **Design Stage at Contract Award** |
|---|---|---|
| Laboratory Block | RIBA Stage D | RIBA Stage E/F |
| Main Hospitals | RIBA Stage C | RIBA Stage C |

In summary the stages of the project can be summarised as follows;

| **Stage** | **Heading** | **Outline Activities/Milestones** |
|---|---|---|
| Stage 0 | Competitive Dialogue | Bid and design development leading to submission of technical and cost information in final tenders. Identify maximum target price and agree pain/gain share. Select contractor – contract award. |
| Stage 1 | Construct Laboratories | Consecutive to Stage 0 and concurrent with Stage 2. |
| Stage 2 | Detailed Design of Adult, Children's and Infrastructure to FBC Submission | Design development of adult and children's hospitals. |
| Stage 3 | Construct Adult and Children's Hospital | Consecutive to Stage 2. |
| Stage 3A | Demolition of Surgical Block and associated buildings and completion of soft landscaping | Consecutive to Stage 3. |

### 6.2 Construction Agreement

This contract is based on the standard template NEC3 – Engineering and Construction Contract Option C Target Contract with Secondary Option Clauses as stated in Contract Data. Unlike the Frameworks Scotland arrangement the contract has pain/gain incentivisation both above and below the target price.

The contract covers the design development and construction of:

- Associated Infrastructure.
- Laboratory Buildings;
- Adult Hospital;
- Children's Hospital; and

The Target Price for the Project has been agreed at contract award and will comprise three distinct areas with separate Programme and Activity Schedule details, namely:

- Conclusion of design and construction of the Laboratory Buildings;
- Design Development to FBC Stage for the Adult and Children's Hospitals; and
- Conclusion of design and construction of the Adult and Children's Hospitals.

Both target and maximum prices have been agreed with Brookfield.

## 7.0 ROLE OF SUPERVISOR

### 7.1 Introduction

The Board will make the appointment for the role of Supervisor based on the delivery of a complete service for the three projects. However, the Board confirm that they reserve the right to conclude the commission at each stage noted below. The Supervisor will also require to have written authorisation from the Project Director or his nominee before commencing work on any stage from inception of the commission. Note the stages referred to below are project related and do not refer to Frameworks Scotland standard paperwork.

**Stage 1** - the Supervisor's commission will commence with the construction of the new Laboratory Facility and associated facilities management and waste management areas, roads and external works. AS an initial duty the Supervisor will be required to familiarise themselves with the works information for this project which will be time consuming.

During **Stage 2**, assist the Board and the Lead Consultant to review information developed by the contractor and as set out in Appendix 3. The Supervisors focus will be on a general overview of proposals for construction. The Supervisor will not be involved in any of the 1:200, 1:50 or ADB design development and sign off process.

**Stage 3/3A** - Once the Board have secured FBC approval for the new Adult and Children's Hospitals, Energy Centre and balance of site roads and externals works, the Board, subject to agreement with the consultant/Supervisor, will confirm approval for the Supervisor to extend their role to include these stages.

| Project | Approx. Floor Area | Guide Construction Cost inc VAT | Duration | Remarks |
|---|---|---|---|---|
| **Stage 1** – New laboratory Project | 25,000 sq.m | £87.8m | March 2010 to May 2012 | Site works only. |
| **Stage 2 –** Design Development of Adult & Children's Hospitals | | | From appointment to October 2010. | Refer Appendix 3 for input at this stage. |
| **Stage 3** – New Adult and Children's Hospitals | Adult – 107,000 sq.m Kids – 36,000sq.m | £560.7m | November 2010 to March 2015 | Site works only. |
| **Stage 3A** – Demolitions and completion of Ext. Works | | £5.05m | July 2015 to August 2016 | Site works only. |

7.2 Indicative fee schedules for Supervisor services should be broken down into the stages noted in the table above. Repondees should set out their plans to deliver the service by stage based on the standard Framework services for NEC3 contracts.

**THE SCOPE OF SERVICES**

Note: to the *Employer* and the *Consultant*

This Scope of Services may contain provisions that affect the conditions of contract.

Such provisions apply and take precedence unless agreed otherwise between the Parties.

## 1.0 INTRODUCTION

1.1 The *Employer's* objectives

The *Employer's* objectives for the *services* are:

- To appoint a Professional Advisor (the *Consultant)* to the position of *Supervisor* providing advice and assistance to the Project Director and *Project Manager* in management of the Board's projects at Southern General Hospital.
- For the appointed *Consultant* to support the Project Director and *Project Manager* by carrying out the 'Duty of the *Supervisor*' appended to this Scope of Services and any other duty required by the Scope of Services.
- For the appointed *Consultant* to actively engage in a policy of mutual trust and co-operation in his dealings with the Principal Supply Chain Partner (Brookfield) and all other members of the supply chain and other Consultants thus contributing to development of an environment that will promote harmonious and cooperative conduct encompassing the whole of the human resources necessary to complete the scheme.
- To avoid contractual disputes and manage procedures by providing, to support the Project Director and *Project Manager,* a *Consultant* knowledgeable and experienced in the application of the Engineering and Construction Contract – Option C target contract with activity schedule as applied to Frameworks Scotland schemes.

1.2 Contract philosophy and general principles of application

1.2.1 Contract philosophy:

- The basis of this contract is the NEC3 Professional Services Contract (PSC) Option A – Priced contract with activity schedule. Amendments to the PSC are as detailed in the template provided as a basis for the scheme specific contract.
- If an inconsistency occurs between the published NEC3 Professional Services Contract and the several documents forming this contract then the documents forming this contract takes precedence unless the *Employer* and *Consultant* agree to the contrary.

1.2.2 General principles of application

The appointment may be awarded to the *Consultant* at any stage of development of the main works scheme contract for Stage 1, Stage 2 Design Development to Stages 3 and 3A construction delivery and handover stage. The award will be staged and approval must be received in writing from the Project Director or his nominee before proceeding. The Stages are set out in Section 7.1.

- In this contract the contract documents are prepared such that the *Employer* may engage the *Consultant* at any Stage. Once the *Consultant* is appointed the only change to the contract is by compensation event procedures.
- The principles of the PSC Option A Priced contract with activity schedule are applied to each stage of the *service* through the identified gateways (Stage 1, Stage 2 Design Development to Stages 3 and 3A construction delivery and handover stage).
- The Scheme Proposal includes lump sum Prices and activity schedule together with a detailed forecast of the *expenses* for each stage of the *services* together with other information stated in the scheme documents.
- Progress through the scheme gateways thereafter is achieved by the *Employer's* gateway pro forma 'Agreement to continue the *services*'.

**1.3 Deliverables**

In Providing the Services the appointed *Supervisor* delivers competent management actions and procedures;

- Assisting in development of the *works* scheme contract in conjunction with the *Project Manager* and the *Contractor,* following appointment of the *Contractor* to the scheme contract.

**1.4 Brief description of the scheme**

The *works* scheme contract is for;

The construction of circa 167,000 square metres of new build mixed acute healthcare estate, commencing with a new Laboratory Block, and subject to FBC approval in November 2010, the construction of a new Adult and Children's Hospital facility. All projects will have a commissioning period.

**1.5 Project programme**

Key milestones are included within the project timetable in Section 5.0.

## 2.0 SCOPE OF SERVICES

### 2.1 Introduction

2.1.1 The general scope of the *service* is provided for in the 'Schedule of Duties for *Supervisor*. See Appendix 'A'.

2.1.2 The duties for this scheme commence at:

- Stage 1 - Laboratory Block secured FBC approval December 2009, and construction commences in February 2010 through to completion on site March 2012. Duties of the Supervisor will commence from appointment through March 2012. NEC 3 does not recognise defects post practical completion (PC), it is therefore assumed commission will cease at PC.
- The new Adult and Children's Hospitals secured OBC approval in May 2008, the Board are developing the FBC during the Stage 2 - Design Development process Jan-Sept 2010 and intend submitting the full business case (FBC) in October 2010 ending with approval by CIG in November 2010, Stage 3 - construction works will commence soon after in November 2010. The duties of the Supervisor will commence in March 2010 and complete in summer 2016 with the completion of Stage 3A.

### 2.2 Additional requirements

2.2.1 The Health Board identifies additional *services* required but not provided for in the Schedule of Duties for *Supervisor* generally or for a specific phase:

Not applicable, or subject to detailed discussion and negotiation.

### 2.3 Places of work

- The workplace is generally in the *Employer's* offices at the site based office complex. The Project Director and his team will be based on site with the Contractors team. The Employer will be located on site from May 2010 through to Summer 2016. This arrangement will be for all stages of commission.

  Address: Hardgate Road, Govan, Glasgow.

  - The *Consultant* may perform agreed duties at his own offices with prior permission from the Project Director.

    The *Consultant* will be provided with 'hot desk' office accommodation at the *Employer's* site offices and will be expected to conduct the bulk of their work from this location.

## 2.4 Other constraints placed on the *Consultant*

### 2.4.1 Hours of work

The *Consultant* is required to provide attendance on the NHS Health Board during the *services* as follows;

Overtime in addition to the stated hours may only be reimbursed to the *Consultant* where prior permission has been obtained from the *Employer* and a compensation event notified and accepted.

The *Consultant* identifies and allows for Incidental overtime not resulting from instruction of the *Employer* or actions of the PSCP the Prices in the Form of Scheme Proposal.

- Stages 1, 2, 3 and 3A

  This relates to construction and handover of the new adult and children's hospitals, the new laboratory block and the site infrastructure works. Attendance of normal working day within the operating hours as below;

  | | | |
  |---|---|---|
  | Monday to Friday | start 08.00am | finish 05.30pm |
  | Saturday | start 08.00am | finish 01.00pm (as required but infrequent) |

- *Main works *Defects Period* – ad hoc hours for the *services*

### 2.4.2 Provision of equipment

In addition to facilities at the *Consultant's* offices, staff are to be provided with personal notebook computers for use at offices of the *Employer* and *Contractor*. These computers are to be included within the consultants overhead costs and will not be provided by the Employer or the Contractor.

Computer software minimum requirement is:

- Microsoft Office
- Microsoft Project
- Adobe Acrobat
- Autocad or minimum Autocad reading software for project drawings.

The project will utilise a web based email, document, drawing and NEC3 management software and the consultant will have access to this system, this will include standard NEC forms similar to the Health Facilities Scotland CAT system. The main communication tool on the project will be the web based system.

**2.4.3 Procedures and reporting**

The *Consultant* complies with the requirements of the Project Director/*Project Manager* and as further detailed in this scope part 7.1

2.4.4 Relationships with the PSCP (*Brookfield*)

The *Consultant* co-operates with the PSCP in the manner stated in the *works* scheme contract as well as in this contract to:

- Deliver the scheme completed on time, within the PSCP contract agreed total of the Prices and accepted compensation events to the required standard of build.
- Achieve the most cost effective construction and commercial solutions to scheme contract compensation events on behalf of the NHS Greater Glasgow & Clyde.
- Manage the programme effects of change thus avoiding unnecessary delay in completion of the scheme contract.
- Ensure readily available means of communication by regular personal meetings and interaction with the PSCP's staff and consultants on a day by day basis.
- Ensure that all handover procedures are complied with and that that the *works* scheme is operational and secure in all its aspects at Completion.

2.4.5 Limit of *Consultant's* authority

The *Consultant* has no authority, except as may be delegated by the *Project Manager,* to enter into any agreement with the PSCP in respect of commercial discussions that may occur whilst undertaking the Duties of the *Supervisor*.

**3.0 The Prices**

**3.1 Introduction**

3.1.1 The *Consultant* provides the Prices and activity schedule (s) together with *forecast expenses* using the Excel workbook (Priced contract with activity schedule and *forecast expenses*) adopted by Frameworks Scotland.

3.1.2 The Prices for the activity schedule derived from the framework tender percentage fee structure embodied in Frameworks Scotland. Note: due to the duration of the commission, PSC's are asked to consider and review the rates to be included in their schedules, and are further asked to consult with the HFS Framework Manager prior to submitting their proposal. The priced activity schedule should identify the applicable stages of the contract, e.g. Stages 1, 2, 3 and 3A and Defects Date period and close out based on the Boards Stage budgets in table in section 7.0. Option C management, design and construction contract; the framework registered fee structure percentage is applied for each applicable stage in the scheme. The *Consultant* identifies the monthly charge for the period of the stage as a derivative of the stage Price for payment. *Forecast expenses* are identified in the Scheme Excel workbook provided by Frameworks Scotland framework.

**3.2 *Staff Rates***

3.2.1 *Staff rates* maybe those rates embodied in Frameworks Scotland. Note: due to the duration of the commission, PSC's are asked to consider and review the rates to be included in their schedules, and are further asked to consult with the HFS Framework Manager prior to submitting their proposal.

3.2.2 *Staff Rates* include general risk. However operational risk should be reflected in the forecast of resources to be allocated and the hours to be worked in each stage.

3.2.3 Inflation will be based on current Framework arrangement of RPI.

**3.3 *Expenses***

3.3.1 All normal out of pocket travel and office overhead expenses are to be included within individual hourly staff rates. This should include photocopy and binding costs for 10 monthly Supervisor progress reports throughout the life of the commission.

3.3.2 Specialist surveys, tests or visits to sites out with the Glasgow conurbation as required by the Employer, will be reimbursed at cost with management handling charge. These costs will only be chargeable after written agreement has been provided by the Project Director

**3.4 The Prices**

3.4.1 The Prices proposed by the *Consultant* are to be calculated using *staff rates (see notes in 3.1 above)* and other applicable items from the Frameworks Scotland agreement.

3.4.2 The Prices are only amended where a compensation event is accepted.

**4.0 Programme**
**4.1 Introduction**

4.1.1 In complying with the contract (PSC 31.2) the *Consultant,* incorporates details of any programme provided by the *Employer*:

- An outline programme, a Gantt chart reflecting the anticipated periods for Stages 1, 2, 3 and 3A handover/Defects period plus 4 weeks.

4.2 First programme for acceptance

4.2.1 The programme is submitted to the *Employer* for acceptance based on

- The *Employer's* programme as may be amended for the agreed *starting date*.

4.3 Revisions of the programme

4.3.1 The *Consultant* provides revisions to the Accepted Programme at the intervals stated in Contract Data Part one and prior to gateway entry at each stage, taking account of any programme applying for the PSCP *works* contract.

**5.0 *Consultant* resources – People**

5.1 Effect of the PSCP's programme

5.1.1 If the *Consultant* identifies that the PSCP's programme impacts on the *Consultant's* programme in respect of time and or resource this should be brought to the attention of the *Employer* by an early warning notification in order that the effect can be minimised.

**6.0 Commercial requirements**

6.1 The following requirements apply individually to each stage

6.2 Cash flow and expenditure projections for the Prices and forecast *expenses,*

6.2.1 Cash flow and expenditure projections are prepared by the *Consultant* in graphic format to coincide with the Accepted Programme for each of the stages and submitted to the *Employer* for acceptance.

6.2.2 The cash flow and expenditure projections demonstrate the indicative and current amounts for each stage at each assessment interval.

6.3 Records of Time and *expenses*

6.3.1 The *Consultant* maintains:

- Copies of all records relating
  - to total Time (Daily allocation records for his staff)
  - and *expenses*
- Records of all correspondence and meetings relevant to total Time Charge and *expenses* due to or paid to Sub-consultants.

6.4 Assessment procedures

6.4.1 Particular requirements of the *Employer* for *Consultant's* assessments and subsequent invoicing are as follows:

Monthly.

**6.5 Early warning**

6.5.1 The Project team and Contractor are developing a standard early warning process and forms similar to the NHS CAT system, this is still in development. Notifications are not to be transmitted verbally or by other communication.

6.5.2 The *Employer* requires the *Consultant* limits early warning to the procedures stated in PSC (16) and to close out each early warning without delay.

6.5.3 Early warning is not notified during progress or other meetings not specifically convened for the purpose of early warning.

6.5.4 Early warning/risk reduction meeting discussion is to be limited to the matter notified and not expanded into more general discussion. Where more than one matter is to be discussed each has its own agenda and individual record of the proposals considered and the decisions taken.

6.5.5 Early warning notifications /risk reduction meetings are not normally given / held for compensation events that have been notified in accordance with the contract.

**6.6 Compensation events**

6.6.1 Compensation events are instructed / notified using the standard notification and this will be part of the system currently in development as noted in 6.5.1.

6.6.2 A compensation event is not considered to be instructed / notified if any communication other than the standard notification is used.

6.6.3 The original of the compensation event notification is a 'live' document and is transmitted between the Parties as a record of submission, requirements and acceptance.

6.6.4 Compensation event quotations are to be detailed and supported by contemporary records / allocation sheets where the effect of the event is on 'the total Time Charge and *expenses* of the Time Charge for work already done'.

6.6.5 Compensation event quotations that do not have an impact on Sectional Dates for Completion or the Completion Date do not require revision of the programme to be submitted with the quotation unless instructed by the *Employer.*

6.6.6 For the avoidance of doubt, the principles of the contract apply to compensation events for all stages of the scheme.

The *Consultant* includes additional management resources in compensation event quotations only if the existing management structure and resources cannot contain the effect.

**7.1 Reporting**

- Monthly report CAT Master Register for the *service* to be submitted to the Project Director - Alan Seabourne. The report will include as a minimum aspects on performance, procedures, early warnings/ C Events, construction review, compliance, defects and information requirements.
- Other reports subsequently notified by NHS Greater Glasgow & Clyde.

7.2 Compliance with the CDM co-ordinator's pre-construction information – URS Corporation.

7.2.1 The *Consultant* includes relevant documentation within the scheme specific documents, including those prepared in conjunction with the PSCP.

7.3 Liaison with User Groups

Note – the Supervisor will not be involved with any user group discussion and will solely be involved with the construction and M&E aspects of the design development stage (Stage 2) and on site construction works for the Labs (Stage1) and Adult and Children's hospitals (Stages 3 and 3A).

7.4 Facilities for the *Employer/Project* Manager

[Include any requirements]

7.5 *Consultant* Quality Plan

7.5.1 The quality management system to be operated is to be compatible with the *Consultant* system identified during Frameworks Scotland selection process and developed to be *services* specific.

7.6 Handover at completion

7.6.1 The *Consultant* complies with the requirements of the *Employer* as developed during the Period of the Services.

7.6.2 Handover requirements and procedures are;

[List details]

7.7 Liaison with other Consultants

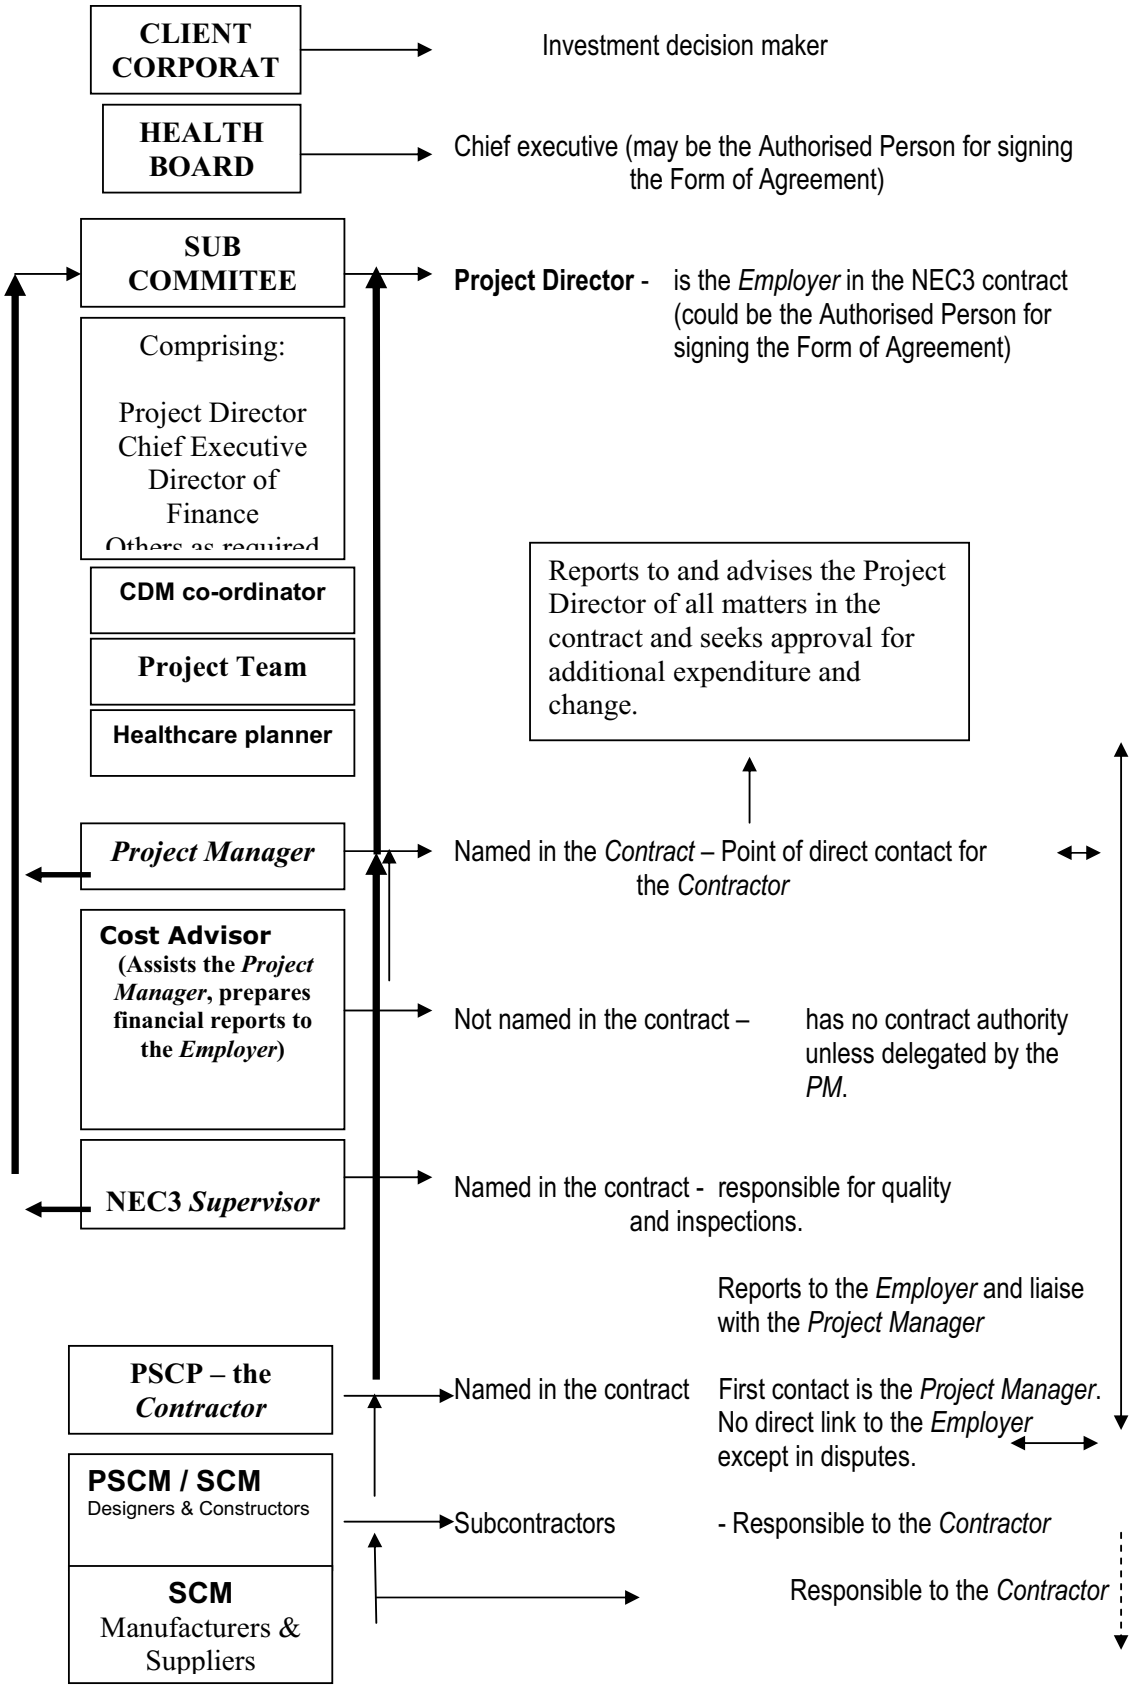
7.7.1 The Consultant liaises with other Consultants as directed by the Employer.

**APPENDIX A (to this section of the document)**

**Frameworks Scotland**

**Schedule of Duties for *Supervisor***

**(**For incorporation in the Scope of Service for appointment of the *Supervisor* under the NEC3 Professional Services Contract)



CLIENT CORPORAT
Investment decision maker
HEALTH BOARD
Chief executive (may be the Authorised Person for signing the Form of Agreement)
SUB COMMITEE
Project Director - is the Employer in the NEC3 contract (could be the Authorised Person for signing the Form of Agreement)
Comprising:
Project Director
Chief Executive
Director of Finance
Others as required
CDM co-ordinator
Project Team
Healthcare planner
Reports to and advises the Project Director of all matters in the contract and seeks approval for additional expenditure and change.
Project Manager
Named in the Contract – Point of direct contact for the Contractor
Cost Advisor (Assists the Project Manager, prepares financial reports to the Employer)
Not named in the contract – has no contract authority unless delegated by the PM.
NEC3 Supervisor
Named in the contract - responsible for quality and inspections.
Reports to the Employer and liaise with the Project Manager
PSCP – the Contractor
Named in the contract
First contact is the Project Manager. No direct link to the Employer except in disputes.
PSCM / SCM
Designers & Constructors
Subcontractors
- Responsible to the Contractor
SCM
Manufacturers & Suppliers
Responsible to the Contractor

**Duties Generally**

The *Supervisor* reports to the Project Director; liaises with the *Project Manager* and the Cost Advisor.

**Post-contract pre-construction, i.e. prior to main works construction delivery and handover**

The *Supervisor* may be called upon to carryout any of the following during Stage 2 – Design Development of the Adult and Children's Hospitals:

1. Offer practical construction advice and process guidance to the project team and take part in the scheme Dart process.

2. Liaise with the *Contractor* and Designers to establish tests and inspections to be carried out in accordance with Works Information and the *Contractor's* Works Information for his design; as part of the scheme Quality Assurance and acceptance Procedures.

3. Monitor site investigation operations.

4. Monitor and liaise with Utilities carrying out pre-construction diversions and installation of new services.

5. Monitor and inspect and accept PSCP (*Contractor*) enabling and other pre-construction work.

6. Issue Defect notices to the *Contractor* as necessary.

7. Inform the *Project Manager* of all Defects and unacceptable construction practices by the PSCP and other members of the supply chain.

8. Notify the *Project Manager;*

    - When Defects have been corrected
    - Those Defects the *Contractor* has not rectified within the *defects correction period.*
    - Those Defects the *Contractor* is unable or unwilling to correct.
    - Tests and inspections performed and accepted
    - Those tests and inspections performed but results found to be unacceptable.

9. Keep records of tests, inspections and acceptances for inclusion in the Health and Safety File as may be required by the CDM co-ordinator.

10. The Supervisor team will fully review and aquaint themselves with all the contract documentation including all design drawings, schedules, specifications, layouts at 1:500, 1:200 & 1:50, specialist suppliers detail drawings and all information listed in Appendix 3 (information to be provided by the contractor) to allow the Supervisor team to deliver to the Employer a robust efficient and effective service. Note as part of the review of the Stage 2 – Design Development for Adult and Children's Hospitals, the Supervisor team will be expected to review and comment on the contractors design proposals (drawings and specification) for construction as packages are developed in response to the works information requirements. Comments and observations will be relayed to the Project Manager. The Supervisor team will NOT be involved in the 1:200 and 1:50 design sign off process with the user groups and contractors design team.

**Post-contract construction, i.e. main works construction delivery and handover**

**Tests and inspections**

1. The *Supervisor* notifies the *Contractor* of his tests and inspections before it starts and afterwards notifies of its results. The *Supervisor* may watch any test done by the *Contractor.*( Clause 40.3)

2. The *Supervisor* does his tests and inspections without causing unnecessary delay to the work or a payment which is conditional on a test or inspection being successful. (Clause 40.5)

   Procedure Note: A payment which is conditional on a *Supervisor's* test or inspection becomes due at the later of the *defects date* and the end of the last *defect correction period* if;

   - The *Supervisor* has not done the test or inspection and
   - The delay to the test or inspection is not the *Contractor's* fault

1. The *Contractor* does not bring to Working Areas Plant and Materials which Works Information states are to tested or inspected prior to delivery until the *Supervisor* has notified the *Contractor* that they have passed the test or inspection. (Clause 41.1)

2. Until the *defects* date, the *Supervisor* may instruct the *Contractor* to search for a Defect. He gives his reason for the search with his instruction. Searching may include (Clause 42.1);

   - Uncovering, dismantling, re-covering and re-erecting work,
   - Providing facilities, materials and samples for tests and inspections done by the *Supervisor* and
   - Doing test and inspections which the Works Information does not require.

5. Until the *defects date*, the *Supervisor* notifies the *Contractor* of each Defect which he finds and the *Contractor* notifies the *Supervisor* of each Defect as soon as he finds it. Clause 42.2)

   Procedure Note: The *Contractor* corrects a Defect whether or not the *Supervisor* notifies him of it. (Clause 43.1)

6. The *Supervisor* issues the Defects Certificate at the later of the *defects date* and the end of the last *defect correction period.* (Clause 43.3)

   Procedure Note: Clause 11.2(6) The *Supervisor* issues the Defects Certificate – is either a list of Defects that the *Supervisor* has notified before the *defects date* which the *Contractor* has not corrected or, if there are no such Defects, a statement that there are none

7. Uncorrected Defects (Clause 45)

   Note; in order for the principles of this clause to be applied the *Supervisor* informs the *Project Manager* of the *Contractor's* failure to correct a notified Defect within its *defect correction period.*

8. Title (Clause 71.1)

The *Supervisor* marks Equipment, Plant and Materials which are outside the Working Areas if

This contract identifies them for payment and
The *Contractor* has prepared them for marking, as the Works Information requires

***Supervisor's* General obligations in the contract**

Clause 13.3 The *Supervisor r*eplies to communications within the *period for reply*

Clause 13.6 The *Supervisor* Issues certificates to the *Project Manager* and the *Contractor*

Clause 14.1 Acceptance by the *Supervisor* of a communication from the *Contractor* does not change the *Contractor's* responsibility for design

Clause 14.2 The *Supervisor* may carry out delegation of actions after notifying the *Contractor*

Clause 14.4 The *Employer* may replace the *Supervisor* after he has notified the *Contractor* of the name of the replacement

**Compensation events**

Procedure Note: The following actions/inactions of the *Supervisor* are compensation events
(The Supervisor does not issue a notification to the *Contractor* when one of the foregoing occurs. He notifies the *Project Manager* .)

60.1(6) The *Supervisor* does not reply to a communication from the *Contractor* within the period required by this contract

(8) The *Supervisor* changes a decision which he has previously communicated to the *Contractor*

(10) The *Supervisor* instructs the *Contractor* to search and no Defect is found unless the search is needed only because the *Contractor* gave insufficient notice of doing work obstructing a required test or inspection

(11) A test or inspection by the *Supervisor* causes unnecessary delay

***Contractor's* obligations to the *Supervisor* in this contract**

27.2 The *Contractor* provides access to work being done and to Plant and materials being stored for this contract.

27.3 The *Contractor* obeys an instruction which is in accordance with this contract and given by the *Supervisor'.*

## 9.0 SELECTION PROCEDURES AND MANAGEMENT ARRANGEMENTS

### 9.1 Selection Procedures

There will be no short listing process for this commission all selected companies who are invited to respond will be asked to prepare a submission and tender proposal (fee based on activity schedule), and will be asked to attend for interview. Written submissions and presentations at interview should focus on the team who will deliver the service, their experience, projects of similar type and value and clearly set out the services you propose to deliver to the Board. Listed below is minimum information required.

- General team experience – Supervisor role / laboratory / healthcare projects.
- Specific experience for this type of project – high value / NEC3.
- Names and CV's of proposed staff – full information, skills & experience.
- Clear statement of the availability of the above staff.
- PSC's should demonstrate a good knowledge of the project and how they would work with the NHS Board to deliver the project and work with the contract framework and project network.
- Responses should include fully worked up activity schedules with resources, rates and costs calculated and broken down as follows;
    - Stage 1 - Laboratory Project construction works.
    - Stage 2 – Adult and Children's Project package development review of construction information.
    - Stage 3 – Adult and Children's Hospitals construction works.
    - Stage 3A – Demolitions and Site Works construction works.

Responses should be limited to 20 sides of A4 maximum to be provided in hard copy (2 copies) and electronic format on CD in word or PDF format.

The Board propose a preparation period for responses of around 4 weeks. During this period the Board would like to meet individually with the teams to discuss the project and commission and also clarify any aspects with regard to this document and scope of service. Following this and subject to any further clarifications from the Board, the teams will be given a further two weeks to complete their submissions.

### 9.2 Timetable

| Step | Indicative Timetable |
|---|---|
| High Level Information Pack issued | 09.02.2010 |
| Information Meeting - informal 1 hr meeting with Board project team. | 19.02.2010<br>(time slot tbc 1.30 - 5.30pm) |
| Return of Supervisor Proposal | 05.03.2010 |
| Interviews | 11.03.2010 |
| Selection | 12.03.2010 |
| Appointment approved by NHS Greater Glasgow & Clyde. | tbc |

**9.3 Selection Criteria at Interview**

The Board will use the criteria set out below at interview and also for scoring :-

| Ref | Selection Criteria | Weighting |
|---|---|---|
| 1. | **Proposed personnel for the Project**<br>a) Who are the members of the proposed team?<br>b) What resources has the PSC available to assist the NHS Board?<br>c) Performance at interview | **25** |
| 2. | **Experience relevant to the Project**<br>a) What experience does the PSC have of similar work that can be brought to bear on the project?<br>b) How will the team bring added value to the project? | **25** |
| 3. | **Approach to the Project**<br>a) Fully worked up description of the resources and services delivered as part of the project, clearly setting out the teams input at each stage of the project. | **20** |
| 4. | **Overall Price** | **25** |
| | Overall price as submitted based on resource plans for each stage of the project | |
| 5. | **Applicable fees and rates of PSC as set out in the Agreement (as provided by HFS)** for additional work out with agreed scope. | **5** |
| | | |
| | **TOTAL** | **100** |

**9.3 Interviews**

The interview shall take the form of a presentation by the Consultants as to their proposed approach to the project in response to the selection criteria detailed above followed by questions from the interview panel. The interview will last for no longer than one hour with the presentation taking no longer than 25 minutes. A letter shall be issued to all Consultants following the shortlisting process. Further details regarding the interview shall be issued to shortlisted Consultants.

**9.4 Interview Panel**

The panel will comprise:

| | |
|---|---|
| Alan Seabourne | Project Director |
| Peter Moir | Head of Major Projects |
| Tbc | Finance Department |
| Tbc | Facilities Department |
| Sharon de Sykes | Capital Projects Advisor (HFS) |

Interviews will be held on either 11 or 12th March 2010, venue and times will be confirmed.

**9.5 Management Arrangements**

Queries raised during the preparation of your submission should be addressed to :

Peter Moir
Head of Major Projects
NHS Greater Glasgow & Clyde
St Andrews House
80 Queen Elizabeth Avenue
Hillington
Glasgow G52 4NQ
[redacted]

You are asked to provide confirmation by return that you will be submitting a proposal for this opportunity.

| **Reports to:** | New South Glasgow Hospitals and Labs Project Executive Board through Alan Seabourne | Project Steering Group | Project Management Group | Project Management Group | Project Management Group | Technical Design Group | Project Management Group | Project Management Group | Technical Design Group | Project Management Group |

The agenda of the Project Management Group may expand to create a separate Construction Group

These groups will merge at some point

## APPENDIX – 3

Stage 2 – Design Development Adult & Children's Hospitals
List of Design Requirements for FBC to be provided by the Contractor

The following Appendix lists the design information to be provided by the Contractor during the design development stages of the projects.

The Supervisor team will be expected to familiarise themselves with this information to enable the team to deliver a service to the requisite standards and ensure the construction works meets the Board's quality and functional requirements in the works information. The Supervisor team will also be asked to review and comment of the package / construction related elements in respect of compliance with the works information as they are developed.

The appendix lists the information to be completed by the Contractor and agreed (where relevant) with the Board in advance of FBC in October/November 2010.

**Generally**
**Contractors Proposals Report:** A full and comprehensive response to the Employer's Requirements clearly demonstrating compliance.

**Full Production Information:** Drawings as required by SGHD to achieve Full Business Case, including FPI of the drawings listed in this Appendix K.

**Specifications:** Full NBS specifications.

**Architectural (including landscaping, fire and acoustics)**
**Location Plan 1:1250**
**Existing Site Plan(s) 1:500**
Indicating the following information;
• Reference Datum Point for levels
• Building Lines
• Existing buildings, trees, hedges surface materials
• Existing levels
• Existing services and drainage
• Dotted outline of new buildings
• Principal Setting out lines
• Extent of Contractor's compound, fencing etc
• Contractor's site access
• Areas identified for stockpiling topsoil, turf, spoil etc
• Positions and references of trial holes, borings etc
• Site Boundary

**Site Plan as proposed 1:500;**
Indicating the following information;
• Site Boundary
• Existing buildings, trees, hedges to be retained
• Existing level or features to be retained
• New Buildings indicated referencing entrances and exits
• New roads, pavings, fire paths, hard landscaping etc
• New levels
• Outline of/or reference to soft landscaping proposals
• Reference grid including principal setting out lines
• Manhole covers, gulley gratings, service covers, underground ducts etc
• Lamp standards and lighting bollards

**Setting Out Plans 1:500/1:200;**
Indicating the following information;
• Setting out dimensions/coordinates for the new building perimeter, roads, pavings, fire paths, hard landscaping etc related back to reference grid.

**General Arrangement Floor and Roof Plans 1:100/1:50;**
Indicating the following information;
• Reference grid
• Structural columns and walls

• Lifts, ducts, staircases
• Windows, internal partitions, doors
• Room names and numbers
• Key section references
• Roof falls
• Plant equipment in outline
• Ridges, hips, eaves, parapets, gutters etc

**General Arrangement Elevations 1:100 / 1:50;**
Indicating the following information;
• Existing Ground Level/Finished ground level
• Floor levels
• Reference grid
• Walls ,doors , windows
• Roof structures
• Cladding/panel materials
• Movement joints
• Rainwater pipes , soil and vent pipes
• Outline of adjoining buildings

**General Arrangement Sections 1:100 / 1:50;**
Indicating the following information;
• Floor and roof construction
• Walls and windows
• Internal walls/partitions
• Floor to Floor heights
• Basements
• Service voids

**Key Elevations for Special Areas 1:50 e.g. Main Entrances, Ward Tower, Junctions of Key Building Materials;**
Indicating the following information;
• Components – cross referencing detail drawings
• Glazing and panel materials, blinds , louvers, opening windows etc
• Positioning or setting out of critical joints in materials

**Fire Drawings 1:100 & 1:50;**
Indicating the following information;
• Location of all fire compartment and sub compartment walls
• Location of fire stops in ceiling voids
• Areas with fire resisting sealed ceiling
• Fire doors including their fire rating and whether self closing
• Fire fighting equipment i.e. extinguishers , hosereels, fire blankets, dry riser inlets and outlets
• Fire lifts
• Reference to details

**Internal Plan Drawings 1:50;**
Indicating the following information;
• Reference to structural grid
• Columns and structural walls, lift shafts, movement joints
• Changes in floor level
• External wall and window construction, window cills. Walls and openings – setting out dimensions.
• Internal glazed screen types and setting out
• Staircase plans – setting out
• Staircase and lift numbers
• Partitions and duct enclosures – positions and openings
• Doors – positions and swings, fire resistance and self closure
• Sanitary fittings, sizes and positions
• IPS sizes and positions
• Fixed mechanical and electrical equipment – types in outline
• Fixed fire fighting equipment – size and position
• Fire protection and means of escape requirements
• Access to crawlways, ducts, subways and trenches, plant etc
• Layout of lift pit, access ladders, stair/lift shaft smoke vents and lift motor room
• Fixed joinery and hardware
• Ceiling layouts incorporating all ceiling services and access requirements
• Wayfinding/Signage drawings indicating size and position
• Rainwater pipes, soil and vent pipes – dimensional position
• Reference to details through external walls, load bearing walls, window/door jambs, heads etc
• Cavity Barriers
• Internal finishes – floor, ceiling, walls

**Detailed Roof Plan(s) 1:50;**
Indicating the following information;
• Reference Grid
• Levels and finishes types
• Movement Joints
• Roof pavings
• Falls
• Parapets, copings
• Flashings, gutters and outlets
• Handrails, changes in level, ladders and steps
• Fire separation walls above or within the roof
• Fire protections and means of escape requirements across or through roof
• Roof lights
• Enclosures for fire equipment or plant
• Vent terminals, drainage vent pipes, flues, lightening protection, aerials
• Fixed equipment above roof (i.e. window cleaning apparatus)
• Fixed mechanical and electrical equipment and plant above roof
• Reference to details through eaves, ridges, balconies etc

**Detailed Sections 1:20 / 1:10;**
Indicating the following information;
• Window cill and head heights
• Balconies
• Roof construction and finish, drainage falls
• Eaves, parapets, gutters etc
• Rooflights, louvers, shading devices
• Lift pits
• Basement construction and tanking
• Damp proof coursing and membranes
• Partitions and doors – heights and junctions
• Datum for levels
• Existing ground/finishes ground level
• Reference to structural grid
• Floor to floor heights
• Suspended ceiling heights and profiles
• Movement joints
• Slab/beam construction
• Cavity Barriers

**Staircase and Lift Details 1:50 / 1:20;**
Indicating the following information;
• Reference to structural grid
• Setting out of treads risers , landings and relationship to structure, external wall, ceilings
• Lines of nosings with setting out dimensions to individual stair flights, landings and stairwell
• Non-slip inserts or safety nosings etc
• Handrails
• Balustrades and fixings – setting out
• Reference to details
• Pit Details

**Detail Drawings 1:5;**
As required to sufficiently indicate key construction details.

**All 1:50 Room Layouts and RDS agreed with the Board**

**Services Systems**
All of the items included for stage one with any proposed variations highlighted.
Detailed program of Information release
All work to complete outline, detailed, final proposal stages.
All input required for Detailed Planning and Building Regulation Compliance.
CLG Approved National Calculation Methodology Tool Compliance report on SPP6 and PAN84.
Full Dynamic modelling of the Building Environment
Provision of condensation analysis for each element of the building

Provision of comprehensive engineering solutions for the Mechanical, Public Health, Medical Gases, Electrical and Lift services solutions including:

Design Calculations
• Detailed Design Drawings for all elements of the works (1:100 and 1:50);
• Detailed Specifications for all elements of the works;
• Detailed Plant schedules for all elements of the works;
• Construction drawings for all elements of the works (1:100 and 1:50);
• Manufacturer's drawings for all elements of the works (1:20 and 1:50);
• Working drawings including:
• General layout drawings of the complete works (1:50);
• Builders work drawings (1:50):
• Detailed layouts showing the location of all equipment including cable, cable tray, conduit, trunking in switchrooms and plant rooms (1:20);
• Assembly drawings of all factory built equipment and site built assemblies (1:20 and 1:50);
• System diagrams and circuit wiring diagrams for all installations and equipment (A1 to ensure legibility);
• Multi-trade co-ordination drawings (1:20);
• Plantroom layout drawings (1:20); and
• Co-ordination sections at key "pinch" points (1:20).

Commissioning settings for all elements of the works, including microbiological testing proposals for operating theatres and specialist ventilation.
Risk assessments and detailed design statement in accordance with CDM.
Lift Installation proposals
Issue of Co-ordination drawings to demonstrate compliance with health documents and integration of services within the building fabric and structural solution.
Acoustic report indicating solutions proposed for all elements of the works
Issue of fully integrated Asset management system for all elements of the works

Fully integrated as fitted drawings for all elements of the works.
Fully integrated as operation and maintenance manuals for all elements of the works
Fully integrated Planned Preventative Maintenance System.
Completion of all testing and system warranty documentation
Building leakage testing
Server room air integrity test certificates
Building Log Book
Building user guides
Confirmation that the design fully complies with the requirements of the Employers Requirements, M&E appendices 1 to 6, all HTM's, HBN's, SHTM's and current legislation.
Proposals for environmental proving of all systems
.

**Civils and Structural**

**General External Infrastructure Works**
***Documents***
Schedule of Information that will be passed to NHS GG&C on completion of the works in respect of roads and drainage works

***Drawings***
Detailed 1:500 scale Phasing plans / temporary works plans for the implementation of roads and drainage infrastructure linked to programme

**Roads**
**Documents**
Stage 1 and Stage 2 Road Safety Audit
Specification for Roads and Hardstandngs

**Drawings**
*1:500 scale plans showing:-*
Curve Radii
Corner Radii
Swept Path analysis on bus routes and service accesses
Pedestrian Crossings
Footways, Cycleways, Cycletracks
Carriageway, footway and cycleway widths
Car Parking arrangements with distribution of spaces and use identified
Areas of differing Carriageway Construction
Traffic Signs and Road Markings
Kerbing Layouts
Roads Drainage system
All crossfalls, supereleveation and cambers
Indicative Signalised layouts at external roads
*Typical Sections and details to appropriate scale showing:-*
Carriageway Construction
Capping provision
Footway / Cycleway Construction
Pedestrian Crossing point arrangements
Kerb Types

***Drainage***
***Documents***
Flood Risk Assessment, undertaken by the Contractor but in the ownership of NHS GG&C.
Flood Risk Strategy
Drainage Management Strategy.
Deliverables for these reports as per Employers Requirements
Drainage maintenance schedule
Correspondence from SEPA confirming the Agency's approval/support of :-
SUDS Strategy
Flood Risk Assessment
Proposals for discharge to the watercourse
Proposals for re-alignment of the watercourses
Correspondence from Scottish Water confirming the Authority's approval/support of :-
Proposed discharge to the public drainage system

Correspondence from Glasgow City Council confirming the Council's approval/support of :-
Flood Risk Assessment and Flood Risk Management Strategy
Calculations for the whole sewerage system.
Calculations in support of the upgrading of culverts in the site
Specification for Drainage works, including proposals for the treatment of existing redundant drainage.

**Drawings**
*1:1250 (or greater) plans showing :-*
Drainage provision in support of SUDS and Drainage Strategy
*1:500 scale plans showing:-*
Culvert upgrading drawings
Amendments to the public sewerage system
Layout of roads and buildings
Layout of sewers, outfalls, underground storage, and SUDS features
Long sections showing proposed levels, existing ground levels, together with chambers, chainages, gradients, pipe sizes, pipe materials, and SUDS features
Structures or trees which are, or shall be, greater than 10m high within 10m of proposed drainage.
Long sections should be to an exaggerated scale, with the horizontal scales the same as the plan

***Details***
Chamber Details and Pipe Bedding Details

**Traffic Management Strategy**
Written statement on maintaining access, Public Transport, Pedestrian flow, Ambulance access/routes, Public Safety including any proposals for the promotion of Traffic Regulation Orders.

**Acute Adults & Children's Hospital, Car Parks, Laboratory Building and Energy Centre Documents**
Design Philosophy Statement taken from initial bid and expanded through to and agreed at FBC.
Specific design detail should include information on:
• Loadings
• Imposed Movements
• Performance Requirements
• Construction Implications
• Design Interfaces
• Materials

In addition to initial bid document, the Design Philosophy Statement should include:
6. Modelling and Analysis
6.1 Description of overall structural behaviour
6.2 Description of modeling, analysis and design
6.3 Methods of design covering e.g. foundations, retaining walls, slabs, columns, staircases.
7. Calculations
7.1 Sample calculations undertaken
7.2 Software used
7.3 Standard details
8. Checking

**Drawings**
For FBC drawings should be developed that reflect the equivalent of RIBA Stage F, Tender Status as a minimum. Drawings status enable a robust cost to be agreed with Client.

**Specifications**
Full Tender Status specifications are required.

**Further Site Investigations.**
Detail any further site investigations proposed.

**Unknowns**
Method/strategy for advising of site unknowns encountered to Client, e.g. hospital waste (buried).

**Sub-Contracts**
List of major works to be sub-contracted.

## APPENDIX - 4

Design Acceptance Procedure

Supervisor will be involved in this procedure

**Reviewable Design Data**

Within the Design Development process all information will be subject to review in three categories:

- For approval
- For acceptance
- For comment

The procedure to be adopted will be used to review and approve/accept/comment, as appropriate, a range of deliverables such as clinical functionality at department and room level, specifications including finishes, colour schemes, and materials and components.

Pro-formas, based upon the attached example will be provided for each category and these will be utilised to record the design development process.

Clinical functionality* both at department level and for individual room layouts will typically follow a staged process of review and sign-off, in line with the Stage 2 Design Development Programme.

Items such as finishes, colour scheme and materials will similarly follow a staged process, however, it is envisaged, that they could be concluded in less iterations.

Components and specifications for acceptance will typically follow a two stage process of submission/comment/re-submission/acceptance.

The pro-formas will be set-out to record the history of the Design Review Process and it is envisaged that each drawing, specification or schedule will have its own sheet to record and sign-off where appropriate the contractor's design.

At each review the Board will consider the design information provided by the contractor, against the Works Information, and will respond within the Stage 2 programme timescales, confirming the level of approval/acceptance/comment and providing supporting narrative or marked up drawings with status coded as follows:

A - no comment proceed to construction
B - comments but proceed to construction taking comments on board and
C - comments resubmit with amendments.
D - rejected

The Board will ensure that all responses are signed off by the appropriate staff, to record user and managerial acceptance of the design element under review.

The data set out in the attached table 1 indicates the proposed extent for Approval and Acceptance with all other data being for comment. The list is not however exhaustive and a final agreed list will be prepared jointly within 2 calendar months of contract execution, on the understanding that table 1 is a minimum requirement.

* Clinical Functionality

a) the following matters as shown on the 1:500 scale adjacency layouts
   I. the points of access to and within the Sites and the buildings:
   II. the relationship between one or more buildings that comprise the development:
   III. the adjacencies between different Hospital departments:

b) The following matters as shown on 1:200 scale departmental layouts
   I. The points of access to and within the Site and the buildings
   II. The relationship between one or more buildings
   III. The adjacencies between different Hospital departments
   IV. The adjacencies between rooms within the Hospital departments

c) The quantity, description and areas (in square metres) of those rooms and spaces shown on the agreed schedules of accommodation.

d) The location and relationship of equipment, furniture, fittings and user terminals as shown on the 1:50 loaded room plans in respect of:
   I. All bed and trolley positions
   II. Internal room elevations
   III. Actual ceiling layouts

e) The location of and the inter-relationships between rooms within a department as shown on the 1:200 departmental layouts

f) The fire strategy

g) Infection control

But only insofar as each of the matters listed in (a) to (g) above relate to or affect clinical use.

**NEW SOUTH GLASGOW HOSPITALS**

**List of Data for Review**

TABLE 1

| **Drawn Information** | | |
|---|---|---|
| Scale | Content | Aspect of review |
| 1:500 | Block plans noting | Site and whole hospital operation relationship to existing site operations. |
| | 1. The point of access to and within the Site and the buildings; | |
| | 2. The relationship between one or more buildings that comprise the development; | |
| | 3. The location of and adjancencies between different hospital departments and corridors | |
| 1:200 | Departmental layouts and floor plans noting | Clinical functionality, room relationships within departments |
| | 1. The adjacencies between different hospital departments and corridors; | |
| | 2. The quantity, description and areas (in square metres) of these rooms and spaces shown on the Accommodation Schedule; | |
| | 3. The location of the inter-relationships between rooms within a department | |
| 1:50 | Room layout drawings including | Clinical functionality, location of equipment |
| | 1. The location and relationship of equipment, | |
| | (i) Group 1 and group 2 equipment | |
| | (ii) Internal room elevations | |
| | (iii) actual ceiling layouts | |
| | (iv) all bed and trolley positive | |
| | Departmental plans to show building systems | |
| | Equipment | |
| | 1. Items of equipment as shown on the Equipment Schedule incorporated into the Room data Sheets and the operational temperature tolerances. | |

| **Design Information** | |
|---|---|
| **Item** | **Aspects (specification including)** |
| External Finishes | Lifecycle, maintenance, H&S |
| Hard Landscaping | Colour, layout, maintenance, lifecycle, H&S. |
| Soft Landscaping | Colour, layout, maintenance, lifecycle, H&S. |
| External furniture | Colour, maintenance, lifecycle, H&S. |
| Interior design public space | Colour schemes, layout, wayfinding, maintenance, lifecycle. |
| Interior design public corridors | Colour schemes, layout, wayfinding, maintenance, lifecycle. |
| Wall finishes | Colour, maintenance, lifecycle, H&S. |
| Wall protection, handrails balustrades | Colour, maintenance, lifecycle, H&S. |
| Floor finishes | Colour, maintenance, lifecycle, H&S. |
| Plumbing fittings/tapware | Colour, maintenance, lifecycle, H&S. |
| Sanitaryware/IPS panels | Colour, maintenance, lifecycle, H&S. |
| WC cubicles and prefab partitions | Colour, maintenance, lifecycle, H&S. |
| External and Internal doors, door furniture and ironmongery including schedules | Colour, maintenance, lifecycle, H&S. Glazing, door protection, door configuration. |
| Light fittings all areas | Colour, maintenance, lifecycle, H&S. |
| Ceiling layouts | Colour, maintenance, lifecycle, H&S. |
| Nurses stations | Colour, layout, maintenance, lifecycle, H&S. |
| Reception desks | Colour, layout, maintenance, lifecycle, H&S. |
| Blinds and curtains | Colour, maintenance, lifecycle, H&S. |
| Lifts | Colour, maintenance, lifecycle, H&S. |
| Group 1 fitted furniture | design, materials for construction, colour, maintenance |
| Schedules of components for M&E systems | Colour, maintenance, lifecycle, H&S. |
| Bedhead layouts | Colour, service layout,maintenance, lifecycle, H&S. |
| Public lighting design | Colour, layout, maintenance, lifecycle, H&S. |
| Public art | Art strategy |
| External and internal signage | Colour, maintenance, lifecycle, H&S. |
| Electrical fittings | Colour, maintenance, lifecycle, H&S. |
| Mechanical & Electrical drawings To reflect architects 1:50's for rooms and departments | Review against Room Data Sheets, project specification and architects 1:50 drawings |

The above are in addition to key design requirements as set out in SHTM's and advisory documentation as included in Volume 7.

Dear Mr. Davies

**NEW SOUTH GLASGOW HOSPITALS AND LABORATORY PROJECT**
**APPOINMENT OF PROJECT SUPERVISOR**

On behalf of NHS Greater Glasgow and Clyde I accept your submitted Scheme Proposal dated 5th March 2010 and please accept this letter as notification of your appointment as *Supervisor* for Stages 1 and 2 of the above named scheme. The fees for Stages 1 and 2 amount to £160,000.00 ex VAT.,and this amount is capped subject to written confirmation by the Board of any additional works. The amounts within your offer that were considered to be expended in advance of the current appointment date will be held in reserve and utilised at the discretion of the Project Director. As you will be aware, Stages 3 and 3A are subject to full business case (FBC) approval by Scottish Government in November 2010, and your commission will only be extended to include Stages 3 and 3A once the FBC has been confirmed, this confirmation will be in writing.

The appointment is in accordance with the Frameworks Scotland Agreement and incorporates the Template for the Scheme Contract (NEC3; Professional Services Contract (PSC) Option A –Priced Contract with activity schedule) that details the contract obligations, payment and other processes. The PSC processes including programme and are to be entered into from commencement of work associated with this appointment.

The commencement date for the commission be Monday 31st May 2010 and I would ask you to provide me with written acceptance of this appointment in advance of this date. As *Consultant* you are not authorised to commence work until the 'Confirmation of acceptance of appointment as *Supervisor*' has been received and acknowledged by the Board at this address.

It is confirmed that the scope of work is as detailed in the HLIP scheme pack issued by the Board to you on 9th February 2010. The Board would like you to provide for the initial meeting the standard schedule for this appointment so that we can jointly work through and complete by mid June 2010.

In the meantime the Board personnel with whom you may communicate on any matter concerning the contract are.

Mr. Alan Seabourne
Project Director
[redacted]

Mr Peter Moir
Head of Major Projects (NEC3 Project Manager)
[redacted]

Please note the personnel named above are the only persons authorised to give instructions in accordance with the contract on behalf of the Board.

I look forward to a successful working relationship and if you have any queries please do not hesitate to contact either myself or the Project Director. The Project Team are due to move onto the construction site on 27th May 2010. We do not at present have full details of the new postal address, nor the telephone number, and on this basis I suggest we communicate by email from 27th May until I am able to confirm the above.

Yours sincerely,

[redacted]

**Peter J. Moir**

By surface mail and email

Dear Mr. Davies

**NEW SOUTH GLASGOW HOSPITALS AND LABORATORY PROJECT**
**APPOINMENT OF PROJECT SUPERVISOR – STAGE 3**

Further to my letter dated 21st May 2010 confirming your appointment to provide Project Supervisor services for Stages 1 & 2 for the above project, I now write to confirm the extension of your commission to include Stage 3, the construction phase of the New Adult and Children's Hospitals.

The appointment is in accordance with the Frameworks Scotland Agreement and incorporates the Template for the Scheme Contract (NEC3; Professional Services Contract (PSC) Option A –Priced Contract with activity schedule) that details the contract obligations, payment and other processes. The PSC processes including programme and are to be entered into from commencement of work associated with this appointment. It is confirmed that the scope of work is as detailed in the HLIP scheme pack issued by the Board to you on 9th February 2010.

The lump sum fee for Stage 3 is confirmed as £765,000.00 ex VAT and this sum should not be varied without the issue of a compensation event or confirmation in writing from the Project Director.

The commencement date for the commission for this stage is 28th March 2011, and I would ask you to provide me with written acceptance of this appointment.

Yours sincerely,

[redacted]

**The Agreement, Contract and Scope of Services for the appointment of a *Supervisor*;**

**The Health Board – NHS Greater Glasgow & Clyde**

**New South Glasgow Hospitals & Laboratory Project**

The whole Agreement comprises documents as follows;

**Section 1** **Form of Scheme Agreement and contract**

**Part one -** Form of Agreement – Scheme Contract Stages FBC, construction and handover

**Part two -** Appendices to the Form of Agreement – Agreements to proceed
'B' - FBC Stage 3 – Agreement to proceed
'C –Stage 4 - Construction and handover

**Part three -** Contract Data Part one – Data provided by the *Employer*

**Section 2** **Model forms of proposal**

**Part one –** Draft letter of appointment of *Consultant*

**Part two –** *Consultant* pro forma Entry Form of Scheme Proposal and gateway proposals

**Section 3** **The Scope of Services**

1 Introduction
2 Scope of *services*
3 The Prices
4 Programme
5 *Consultant* resources – People
6 Commercial requirements
7 Scheme specific requirements
8 Appendices

**Part one - Form of Agreement – Scheme Contract Stages FBC, construction and handover**

The Scheme Contract dated 24th May 2010

Between

The Health Board – NHS Greater Glasgow & Clyde

and

Capita Symonds

This Agreement incorporates the undertakings of Frameworks Scotland and the NEC3 Professional Services Contract Option A Priced contract with activity schedule with Secondary Option Clauses as stated in Contract Data, Part one – Data provided by the *Employer.*

Note on procedures adopted for completion of the documents;

- The scheme delivery is controlled by a 'Gateway Process' leading through the stages in the contract
- FBC and construction and handover are stages in the contract
- On initiating this Agreement identify the scheme entry level in the following by striking through the stages preceding the Consultant's appointment.
- Do not delete subsequent stages of the Form of Agreement (Appendices); leave open to be completed on *Employer's* agreement/instruction to continue the services for the next stage of the scheme.

**Note to be deleted on completion of the documents prior to entry into the Agreement;**

This template requires insertion of scheme specific information, process and detail to form the scheme contract.

In order that ensure that the integrity of the Frameworks Scotland is not compromised any amendment of this standard form to change the principles and processes identified in the framework is not to be undertaken without prior discussion and agreement of 'Health Facilities Scotland.

**NHS GREATER GLASGOW & CLYDE**

**New South Glasgow Hospitals & Laboratory Project**

**NEC3 Professional Services Contract – *Supervisor* (the *Consultant*)**

**Form of Agreement for the scheme contract;
Stages are FBC; Construction and handover**

Agreement between

NHS Greater Glasgow & Clyde of J B Russell House, Gartnavel Royal Hospital, 1055 Great Western Road Glasgow G12 0XH

(the *Employer)*

and

Capita Symonds, 8th Floor, The Beacon, 176 St Vincent Street, Glasgow G2 5SG

(the *Consultant)*

Whereas the *Employer* wishes to have provided the *services* of *Supervisor* for the **New South Glasgow Hospitals & Laboratory Project** scheme undertaking the duties briefly described as;

Providing assistance to the Health Board's Project Director and liaising with the *Project Manager* by carrying out *Supervisor* duties as stated in the Scope of services document identified in Contract Data Part one attached to this Agreement. The services being;

~~Stage 1 Providing assistance to the NHS team in developing the clinical need and preparing the Initial Agreement (IA) for submission to the NHS Health Board (The *Employer*) or by the NHS Board to Scottish Government Health Directorate Capital Investment Group.~~

~~Stage 2 Providing assistance to the Project Director and liaising with the *Project Manager* by carrying out *Supervisor* duties in connection with the scheme for the Outline Business Case (OBC) for submission to the NHS Health Board (The *Employer*) or by the NHS Board to Scottish Government Health Directorate Capital Investment Group.~~

Stage 3 Providing assistance to the Project Director and liaising with the *Project Manager* by carrying out *Supervisor* duties in connection with the scheme for the Full Business Case (FBC) including setting the target total for the Prices for the construction and handover stage of the scheme for submission to the NHS Health Board (The *Employer*) or by the NHS Board to Scottish Government Health Directorate Capital Investment Group.

Stage 4 Providing assistance to the Project Director and liaising with the *Project Manager* by carrying out *Supervisor* duties in connection with the scheme; for the period of construction and handover and the Principal Supply Chain Partner's Defect Date period plus 4 weeks.

Note for the purposes of this agreement the stage references are as follows;

| | |
|---|---|
| Stage 1 | Providing a service as Stage 4 on proceeding page for the period of construction and handover and the Principal Supply Chain Partner's Defect Date period plus 4 weeks.<br><br>**The new Laboratory Project at Southern General Hospital.** |
| Stage 2 | Providing a service as Stage 3 on proceeding page by carrying out *Supervisor* duties in connection with the scheme for the Full Business Case (FBC) including setting the target total for the Prices for the construction and handover stage of the scheme for submission to the NHS Health Board (The *Employer*) or by the NHS Board to Scottish Government Health Directorate Capital Investment Group.<br><br>**The design development stage for the New Adult & Children's Hospitals.** |
| Stage 3 | Providing a service as Stage 4 on proceeding page for the period of construction and handover and the Principal Supply Chain Partner's Defect Date period plus 4 weeks.<br><br>**The New Adult & Children's Hospitals.** |
| Stage 3A | Providing a service as Stage 4 on proceeding page for the period of construction and handover and the Principal Supply Chain Partner's Defect Date period plus 4 weeks.<br><br>**External works & landscaping.** |

Now it is agreed that;

1. The *Consultant* Provides the Services in accordance with the principles stated in Frameworks Scotland and the NEC3 Professional Services Contract together with the particular requirements of the scope of services applicable to this Agreement.

2. The *Employer* pays the *Consultant* the amount due in accordance with the conditions of contract applicable to each Stage of the Scheme, and as may be further described or limited by the Scope of Services.

3. The documents forming this Agreement are:

   - The *Employer's* letter of appointment dated 21st May 2010.
   - Contract Data Part one – Data provided by the *Employer.*
   - The *Consultant's* submitted and accepted Form of Scheme Proposal, reference New South Glasgow Hospitals and Laboratory Project Proposal for NEC3 Supervisor dated February 2010 , including Contract Data Part two - Data provided by the *Consultant*
   - Attachments to the *Consultant's* Form of Scheme Proposal

- The Scope is in:

  Part 4 – the Scope of Services

- The *language of the contract* is English
- The *law of the contract* is the law of Scotland subject to the jurisdiction of the Courts of Scotland
- The *period for reply* is;

  Two (2) weeks

- The *period for retention* is zero. (No retention applicable or requested for this service).
- The *Adjudicator* nominating body is:

  The Royal Institute of Chartered Surveyors

- The *tribunal* is the Scottish Courts
- The following matters will be included in the Risk Register:

1. Delay caused by the *Contractor* or Others
2. Availability of *Consultant* resources
3. Adjudication on an action or lack of action by the *Consultant*
4. Failure of the *Consultant* to deliver the *services*
5. Change in the Scope

2. The Parties

Main Responsibilities

- The *Employer* provides access to the following persons, places and things

| access to | access date |
|---|---|
| The *Employer's* Project Director | On appointment of the *consultant* |
| The *Employer's* offices for the scheme | On appointment of the *consultant* |
| Any existing contract documents and records required for administration of the scheme | On appointment of the *consultant* |

3. Time

- The *starting date* is 24 May 2010

Optional Statement for Clause 3

- The *completion date* for the whole of the *services* is 22nd December 2016

- The *key dates* and conditions to be met are

| Condition to be met | *Key date* |
|---|---|
| Stage 4 | 28th March 2011 |

4. Quality

- The quality policy statement and quality plan is provided within 2 weeks of the Contract Date

- The *defects date* is 104 weeks after Completion of the whole of the *services.*

5. Payment

- The *assessment interval* is four (4) weeks or alternatively calendar monthly.

- The *currency of this contract* is the pound sterling (£)

- The *interest rate* is 8% above the rate of the base rate.

- Base rate is calculated by reference to the Bank of England base rate on 31 December or 30 June depending on when the date of the debt falls due. If the debt falls due in the first half of the year the base rate published on 31 December is used; for debts falling due in the second half of the year the base rate applicable on 30 June is used

Optional statements for Clause 5

Y(UK)2 is used and the final date for payment is not 14 days after the date when payment is due

- The period within which payment is made is three weeks

- The *expenses* stated by the *Employer* are

| Item | amount |
|---|---|

8. Risks and insurance

- The amounts of insurance and the periods for which the *Consultant* maintains insurance are

| **Event** | **Cover** | **Period following Completion of the whole of the *services* or earlier termination** |
|---|---|---|
| Failure of the *Consultant* to use normal skill and care normally used by professionals providing services similar to the *services* | £5,000,000.00 (Five million pounds Sterling)<br>In respect of each claim, without limit to the number of claims | 12 years |
| Death of or bodily injury to a person ( not an employee of the *Consultant*) or loss of or damage to property resulting from an action or failure to take an action by the *Consultant* | £10,000,000.00 (Ten million pounds Sterling)<br>In respect of each claim, without limit to the number of claims | 6 months. |
| Death of or bodily injury to employees of the *Consultant*) arising out of and in course of their employment in connection with this contract | £10,000,000.00 (Ten million pounds Sterling)<br>In respect of each claim, without limit to the number of claims | 6 months. |

2.

**Option X1 is used (see Z9 Amendment to Option X1: Price adjustment for inflation)**

- Price adjustment for inflation in respect of Stages (1, 2, and 3) for IA, OBC, FBC and Stage 4- *staff rates* occurs every two years from the date of the Frameworks submission.

- The index is the Average Index of Earnings without bonus

  published on the website of the Office of National Statistics (http://www.statistics.gov.uk)

**If Option X8 is used**

- The collateral warranty agreements are to be in the form to be provided by CSA

**If Option X18 is used**

- The Contractor's liability to the employer for indirect or consequential loss is limited to 10% of the total of the Prices

- The *Consultant's* liability to the *Employer* for Defects that are not found until after the *defects date* is limited to 10% of the total of the Prices

- The end of the *liability date* is 12 years after Completion of the whole of the *services*

**If Option Z is used**

The additional conditions of contract are

**Z 1 New Clause – Assignation**

- The *Employer* has the right to assign this contract to another NHS body without having to seek the *Consultant's* consent.
- The *Employer* notifies the *Consultant* of the intention to assign the contract to another NHS body.
- The *Employer* notifies the *Consultant* of the assignation of the contract to another NHS body

**Z 2 Interpretation and the law – Amendment to Clause 12**

Delete Clause 12.4

**Z 3 General –- Prevention Clause 18**

Delete Clause 18

**Z 4 Payment - Amendment to Clause 50.2**

Third sentence, after "change in the amount due since the previous invoice" add "The change in amount due is limited to the *Consultant's* total expenditure cash flow forecast amount (including the *forecast expenses*) for the *assessment interval* as shown in the *Consultant's* current cash flow forecast"

**Z 5 Payment - Addition to Clause 50**

50.5 Where the *Consultant's* assessment exceeds the amount for the assessment interval as shown in the *Consultant's* current cash flow forecast accepted by the *Employer* then the invoice is limited to the amount forecast. Any amount exceeding the forecast is not invoiced but held over to the next assessment interval, where if the assessment again exceeds the *Consultant's* cash flow forecast for the assessment interval the process is repeated. This clause does not apply where the *Consultant* provides a valid and acceptable reason for an exception to the limitation prior to submission of the invoice.

**Z 6 Compensation events – Amendment to Clause 60.1**

Delete Clause 60.1 (11)

**Z 7 Reasons for termination – Additions to Clause 90.3**

- The *Employer* may terminate prior to or if the submitted Initial Agreement (IA) proposal is not acceptable

- The *Employer* may terminate prior to or if the submitted Outline Business Case (OBC) proposal is not acceptable
- The *Employer* may terminate prior to or if the submitted Full Business Case (FBC) proposal is not acceptable
- The *Employer* may terminate if the *Project Manager* notifies that he has been unable to agree a target being the total of the Prices for Constructions delivery and handover with the *Contractor* prior to submitting the Full Business Case (FBC)

**Z 8 Procedures on termination – Addition to clause 91.1**

The *Consultant* hands over to the *Employer* all hard copy and electronic data prepared for the *services*, including material prepared by a subconsultant. At such termination the *Employer* has the right to use such material for completion of the *works*.

**Z 9 Amendment to Option X1: Price adjustment for inflation**

Z9.1 Delete X1.1, X1.2 X1.3, 1.4, 1.5 and 1.6 and substitute the following:

The *staff rates* to be incorporated in the contract are fixed for two years (24 months) from the date of the Frameworks Scotland tender submission; thereafter they are subject to adjustment for Price Fluctuations applied as follows:

After a period of 24 months the *staff rates* [R] will be twice subject to adjustment for price fluctuation. Firstly by application of the difference between the latest published index for the Average Index of Earnings without bonus [AIE] available at the Contract Date [i(2)] and the AIE 12 months earlier [i(1)]. Secondly this revised rate is then subject to the same change in index to derive the midpoint of the subsequent 24 month period. The *staff rates* (including those for subconsultants) produced by the application of this adjustment for price fluctuation apply for the second 24 months period of the contract. Hence the new *staff rate* for the second 24 month period is defined as:-

$$R(new) = \{ R \times i(2)/i(1) \} \times [i(2)/i(1)]$$

Each 24 month period thereafter the procedure in paragraph 2 is repeated, applying the difference in the AIE indices prevailing at date of the review and the same index that applied 12 months earlier.

The price fluctuations percentage calculations will be undertaken by the *Consultant* and submitted to the Employer for review prior to acceptance. The percentage change to the *staff rates* will be incorporated into the contract by amendment of the *staff rates* identified in Contract Data Part 2 – Data provided by the *Consultant*.

Z9.5 The Time Charge for compensation events is assessed using the staff rates current at the time of the compensation event

Z9.6 line 2, delete 'first' and insert 'second'.

Line 3 after 'anniversary' insert 'and at two year intervals thereafter'.

**Z 10 Rights of third parties – new clause**

Nothing in this contract confers or purports to confer any right to enforce any of its terms on any person who is not a party to it."

**Z 11 Amendment to The *Consultant's* obligations 21;** 21.4

Line 2 after '*Employer*' – insert 'for acceptance'

**Z 12 Communications – add new bullet point to 1. General; clause 13.1**

- The Board confirm the use of Sypro Contract Administration Toolkit for the duration of the project, the Consultant will be provided with training and full access to the web based toolkit to deliver this service.

**Z 13 Reasons for termination clause 90 – amendment**

Delete clause 90.4

**Z 14 Limitation to payment to the *Consultant* in respect of expenses stated by the Employer**

- Payment of expenses in addition to those already included within the lump sum fee bid are to be in accordance with clause 3.3.2 of the Board's tender document.

**Section 2** **Model forms of proposal**

**Part one –** Letter of Appointment of the *Consultant*

**Part two –** *Consultant* pro forma Entry Form of Scheme Proposal and gateway proposals

Dear Mr. Davies

**NEW SOUTH GLASGOW HOSPITALS AND LABORATORY PROJECT**
**APPOINMENT OF PROJECT SUPERVISOR**

On behalf of NHS Greater Glasgow and Clyde I accept your submitted Scheme Proposal dated 5th March 2010 and please accept this letter as notification of your appointment as *Supervisor* for Stages 1 and 2 of the above named scheme. The fees for Stages 1 and 2 amount to £160,000.00 ex VAT., and this amount is capped subject to written confirmation by the Board of any additional works. The amounts within your offer that were considered to be expended in advance of the current appointment date will be held in reserve and utilised at the discretion of the Project Director. As you will be aware, Stages 3 and 3A are subject to full business case (FBC) approval by Scottish Government in November 2010, and your commission will only be extended to include Stages 3 and 3A once the FBC has been confirmed, this confirmation will be in writing.

The appointment is in accordance with the Frameworks Scotland Agreement and incorporates the Template for the Scheme Contract (NEC3; Professional Services Contract (PSC) Option A –Priced Contract with activity schedule) that details the contract obligations, payment and other processes. The PSC processes including programme and are to be entered into from commencement of work associated with this appointment.

The commencement date for the commission be Monday 31st May 2010 and I would ask you to provide me with written acceptance of this appointment in advance of this date. As *Consultant* you are not authorised to commence work until the 'Confirmation of acceptance of appointment as *Supervisor*' has been received and acknowledged by the Board at this address.

It is confirmed that the scope of work is as detailed in the HLIP scheme pack issued by the Board to you on 9th February 2010. The Board would like you to provide for the initial meeting the standard schedule for this appointment so that we can jointly work through and complete by mid June 2010.

In the meantime the Board personnel with whom you may communicate on any matter concerning the contract are.

Mr. Alan Seabourne
Project Director
Manager)
[redacted]

Mr Peter Moir
Head of Major Projects (NEC3 Project
[redacted]

Please note the personnel named above are the only persons authorised to give instructions in accordance with the contract on behalf of the Board.

I look forward to a successful working relationship and if you have any queries please do not hesitate to contact either myself or the Project Director. The Project Team are due to move onto the construction site on 27th May 2010. We do not at present have full details of the new postal address, nor the telephone number, and on this basis I suggest we communicate by email from 27th May until I am able to confirm the above.

Yours sincerely,

**Peter J. Moir**

**Part two – *Consultant* pro forma Contract Data Part two; Entry Form of Scheme Proposal and gateway proposals**

**Introduction**

The process of Scheme Proposal submissions by the *Consultant* and subsequent acceptance by the *Employer* leading to the signing of the Form of Agreement for the PSC Option A – Priced contract is as follows.

**1 The Form of Scheme Proposal is provided by the *Consultant* as follows;**

1.1 The *Employer* selects *Consultants* to receive invitations to submit scheme proposals for PSC Option A Priced contracts.

1.2 The *Employer* prepares and issues a scheme pack invitation containing Contract Data Part one – Data provided by the *Employer*, Scope of Services and programme appropriate to the delivery of the scheme requirements for all stages of the scheme e.g. IA, OBC, FBC and construction and handover including main works Defects Date plus 4 weeks

1.3 The *Consultant* prepares, within the time stated in the letter of invitation, and submits for acceptance by the *Employer*;

- The scheme Entry Form of Scheme Proposal together with;
    - Contract Data Part two – data provided by the *Consultant*
    - The activity schedule
    - Pricing workbook
    - Overall and stage programmes for acceptance
    - Attachments as listed in the proposal

1.4 The submitted proposal being acceptable to the *Employer* the Parties seal the Scheme Contract by signing the Form of Agreement.

1.5 Thereafter the *Consultant*'s progress through each subsequent Stage of the contract is an offer to continue to Provide the Services at the accepted Prices.

1.6 Where there is a change in the Scope of Services following appointment to the scheme, this is dealt with as a compensation event. When such change affects a Stage to be entered the Prices for the Stage should be adjusted before the *Employer* gives his Agreement to proceed.

**2 Appendices to the Scheme Contract**

2.1 When the *Employer* is satisfied the Stage Form of Proposal submission acceptable he prepares, signs and issues to the *Consultant* the Appendix to the Scheme

Agreement as a confirmation that the Scheme may proceed to the next Stage under the Agreement.

2.3 The *Consultant* does not proceed from the current Stage until he has received the signed Appendix to the Scheme Contract.

2.4 Pro forma Agreement to Proceed documents are included in the template Agreement, Part two.

**3 Pro forma documents for submission of the Scheme Proposals**

3.1 Pro forma documents to be completed for the Scheme Proposals are included hereinafter at 3.4.

3.2 Attachments to be included with each Scheme Proposal as appropriate to the Stage are identified at 4.0 following.

**4 Example Scheme Proposals**

4.1 The Proposals following are structured on the *Consultant* being appointed at Stage 1 – IA

4.2 Where a *Consultant* is appointed at a later Stage than IA then it is necessary to;

- amend the opening statement by removing reference in the first line 'continue'
- Insert at (a)

  The scheme pack and invitation to submit a Proposal that includes;

  - Contract Data Part one – data provided by the *Employer*
  - Scope of Services

4.3 Attachments to the Scheme Proposals

4.3.1 The following Attachments are required;

A – Programme previously accepted by the *Employer* – Stage IA
B – Programme previously accepted by the *Employer* – Stage OBC
C – Programme previously accepted by the *Employer* – Stage FBC
D – Programme previously accepted by the *Employer* – Construction and handover Stage

Other information or submissions as may be required at each stage, e.g.

Parent Company Guarantee

Certificates of Insurance
Proposed subcontractors
Proposed material suppliers and manufacturers
Procurement Strategy

4.4 Contract Data Part two – data provided by the *Consultant*

4.4.1 Complete the following as necessary to provide the Contract Data for the particular stage proposal being submitted;

Entry level *IA/*OBC /* FBC / *Construction and handover at [Date]

**Contract Data Part two – Data provided by the *Consultant***

**Statements given in all contracts**

- The *Consultant* is

- The following matters will be included in the Risk Register.
  - It is understood that the Contractor will have their own operational testing, commissioning, validation and site quality procedures. The details of these are unknown at this stage. In order to mitigate this, we proposed to undertake a detailed review of the procedures to be put in place with findings to be published after review;
  - Resourcing was based on Brookfield construction programmes as referenced below. Any revisions to this programme are likely to result in a change to the resourcing requirements and associated fee;
    - 10-02 Stage 1 Updated programme week 8 – Feb 2010
    - 10-02 Stage 2 Updated programme week 8 – Feb 2010
    - 100106 Stage 3 Contract Construction Programme BCL-GS3-CN03-0001
    - 100106 Stage 3a Contract Construction Programme BCL-GS4-CN02-0001

- Compensation Events that impact upon resourcing may result in an amendment to the fee;
- In the event of delay to project completion, our fee will likely require amendment;
- We have not incorporated resourcing during the Board fit-out following project completion;
- Capita Symonds have limited involvement in RDD and no involvement in design sign-off or pre-approval.

**Optional Statements**

**If a programme is to be identified in the Contract Data**

- The programme identified in the Contract Data is

***ACTIVITY SCHEDULE* SUMMARY TOTAL OF THE PRICES**

The *Consultant*, hereinafter, enters copy of the *activity schedule* prepared for the amended Prices and *forecast expenses* as required;

## Section 3 – The Scope of Services

### 1.0 Introduction

1.1 The *Employer's* objectives
1.2 Contract philosophy and general principles of application
1.3 Deliverables
1.4 Brief description of the scheme
1.5 Project programme

### 2.0 Scope of services

2.1 Introduction
2.2 Additional requirements
2.3 Places of work
2.4 Other constraints placed on the *Consultant*

### 3.0 The Prices and limitation to payment to the *Consultant*

3.1 Introduction
3.2 *Staff rates*
3.3 Expenses
3.4 The forecast Time Charge at appointment to the contract
3.5 The Prices

### 4.0 Programme

4.1 Introduction
4.2 First programme for acceptance
4.3 Revisions of the programme

### 5.0 *Consultant* resources – Persons

5.1 Effect of the *Contractor's* programme

### 6.0 Commercial requirements

6.1 Cash flow and expenditure projections for Prices and *expenses*
6.2 Records of total Time and *expenses*
6.3 Assessment procedures
6.4 Early warning
6.5 Compensation events

### 7.0 Scheme specific requirements

7.1 Reporting
7.2 Compliance with the Construction phase Health and Safety Plan
7.3 Liaison with User Groups

7.4 Facilities for the *Employer/Project* Manager
7.5 *Consultant* Quality Plan
7.6 Handover at completion

## 8.0 Appendices

Appendix 'A' Schedule of Duties for Project Director and *Project Manager*
Appendix 'B' Project Programme
Appendix C Consultant and Contractor Endorsement for the Prevention of HAI for NHSScotland

## THE SCOPE OF SERVICES

Note: to the *Employer* and the *Consultant*

This Scope of Services may contain provisions that affect the conditions of contract.

Such provisions apply and take precedence unless agreed otherwise between the Parties.

### 1.0 INTRODUCTION

1.1 The *Employer's* objectives

The *Employer's* objectives for the *services* are:

- To appoint a Professional Advisor (the *Consultant)* to the position of *Supervisor* providing advice and assistance to the Project Director and Project *Manager* in management of the NHS Health Board scheme contract.
- For the appointed *Consultant* to support the Project Director and *Project Manager* by carrying out the 'Duty of the *Supervisor*' appended to this Scope of Services and any other duty required by the Scope of Services.
- For the appointed *Consultant* to actively engage in a policy of mutual trust and co-operation in his dealings with the Principal Supply Chain Partner (PSCP) and all other members of the supply chain and other Consultants thus contributing to development of an environment that will promote harmonious and cooperative conduct encompassing the whole of the human resources necessary to complete the scheme.
- To avoid contractual disputes and manage procedures by providing, to support the Project Director and *Project Manager,* a *Consultant* knowledgeable and experienced in the application of the Engineering and Construction Contract – Option C target contract with activity schedule as applied to Frameworks Scotland schemes.

1.2 Contract philosophy and general principles of application

1.2.1 Contract philosophy:

- The basis of this contract is the NEC3 Professional Services Contract (PSC) Option A – Priced contract with activity schedule. Amendments to the PSC are as detailed in the template provided as a basis for the scheme specific contract.
- If an inconsistency occurs between the published NEC3 Professional Services Contract and the several documents forming this contract then the documents forming this contract takes precedence unless the *Employer* and *Consultant* agree to the contrary.

1.2.2 General principles of application

The appointment may be awarded to the *Consultant* at any phase of development of the main works scheme contract from the conceptual IA stage through, OBC, FBC and the construction delivery and handover stage;

The appointment may be awarded to the *Consultant* at any stage of development of the main works scheme contract from conceptual IA stage through, OBC, FBC and the construction delivery and handover stage;

- In this contract the contract documents are prepared such that the *Employer* may engage the *Consultant* at any Stage. Once the *Consultant* is appointed the only change to the contract is by compensation event procedures.
- The principles of the PSC Option A Priced contract with activity schedule are applied to each stage of the *service* through the identified gateways (IA, OBC, FBC and the construction and handover stage.
- The Scheme Proposal includes lump sum Prices and activity schedule together with a detailed forecast of the *expenses* for each stage of the *services* together with other information stated in the scheme documents.
- Progress through the scheme gateways thereafter is achieved by the *Employer's* gateway pro forma 'Agreement to continue the *services*'.

## 1.3 Deliverables

In Providing the Services the appointed *Supervisor* delivers competent management actions and procedures;

- For the proposed scheme pre *Contractor* (PSCP) appointment in accordance with the requirements of the Appendix A to this scope: Schedule of Duties for *Supervisor.*
- Assisting the Project Director and liaising with the *Project Manager* in preparation of scheme packs; identifying tests and procedures within the remit of the *Supervisor* for inclusion in the scheme packs.
- Assisting in development of the *works* scheme contract in conjunction with the *Project Manager* and the *Contractor,* following appointment of the *Contractor* to the scheme contract.

## 1.4 Brief description of the scheme

The *works* scheme contract is for the following projection description as Section 3 of the Tender Documentation:-

### 3.0 THE PROJECT

### 3.1 Introduction

The Southern General Hospital site extends to some 28.6 hectares and is located within the Govan area, lying to the south-west of Glasgow City Centre adjacent to the residential neighbourhood of Drumoyne and the industrial areas of Shieldhall and King George V Dock. The site is located 500 metres

south of the River Clyde. The site's northern boundary is defined by Renfrew Road/Govan Road with the eastern boundary defined by Moss Road/A739 (Clyde Tunnel approach road). Langlands Drive and residential developments delineate the southern boundary and Hardgate Road runs north-westwards to identify the western boundary of the site.

The development site for the Project extends to some 8.6 hectares and is located in the west-central area of the hospital site as identified on the drawing below. The development site is bounded by operational healthcare buildings to three sides, with boundaries to neighbouring industrial areas to the north/north-west. The existing buildings within the development are to be demolished in advance of the Project.

### 3.2 Project Scope

The project includes the provision of 1,109 adult and 240 children's beds, with target works completion dates of March 2012 (Laboratories) and January 2015 (Hospitals). The bed numbers are illustrated below, the bulk of the beds will be provided in single rooms with en-suite facilities with the exception of critical care areas and a small percentage of 4 bed bays in the Children's wards.

**Adult Hospital**

**Specialty/ Beds**
General Medicine (incl MHDU + AAU) 405
Stroke 26
Haematology 14
Dermatology 18
Nephrology 80
Geriatric Medicine 93
Surgery & Vascular (incl AAU) 164
Urology 39
Orthopaedics/rehab 139
ENT 31
ITU 20
SHDU 23
Clyde / Contingency 37
**Total Inpatient Beds 1,109**

**Children's Hospital**

**Specialty/Beds**
Inpatient (incl critical care areas) (*12 beds in maternity facility) 193*
CCU 20 Short-stay (observation ward) 20
Day Care/Day Surgery 27
**Total Inpatient Beds 240**

### 3.3 New Adult Hospital

This will provide A&E services and acute specialist in-patient care as well as medical day services and outpatient clinics serving the local population. Key components of the facility will include:

**In Patient Accommodation** - Surgical beds (general surgery, orthopaedics, urology, vascular, ENT and renal); Medical beds; Acute Assessment Unit –

118 beds, ICU/HDU/CCU – 79 beds, Acute Stroke – 26 Beds and Care of the Elderly 93 beds.

**Out Patient Accommodation** Full range of general outpatient clinics including, among others, diabetic unit, respiratory, orthopaedics and urology.

**Day Services** 22 medical day bed area; 30 station dialysis unit.

**Treatment & Diagnostic Services** Emergency Department, 20 operating theatres, imaging, and endoscopy.

**Clinical Support Services** Pharmacy dispensary, medical physics, medical illustration. Laboratory services linked to the hospital by underground route and pneumatic tube system, aseptic unit within the children's hospital. The pneumatic system to extend across the abutment with maternity and the link to neurosciences to provide for expansion of the system to these areas.

**Non Clinical Support Services Main** entrance, medical records, administration, chaplaincy, social work, staff changing, switchboard, estates, facilities, security, catering, portering, domestic, management and energy centre.

### 3.4 New Children's Hospital

This will provide A&E services and a comprehensive range of inpatient and day case specialist medical and surgical paediatric services on a local, regional and national basis. The new development will also have outpatient facilities. The care strategy is that all of Glasgow's Children's Services (up to the age of 16 and up to 18 years where appropriate) will be provided at the New Children's Hospital. Of the 240 beds planned, around 20% of the beds will be for day patients and the balance for inpatient requirements. Key components of the facility will include:

**Outpatient Accommodation** - full range of Children's outpatient clinics including audiology, general paediatrics, orthopaedics, ENT etc;
**Day Services** - circa 10 medical day beds; 4 dialysis stations and circa 25 day surgery beds;
**Treatment & Diagnostic** - accident and Emergency, minor injuries, Imaging, 9 theatres, rehabilitation;
**Clinical Support Services** Aseptic unit, pharmacy, medical physics, medical illustration;
**Non Clinical Support Services** Facilities, ancillary services, administration, spiritual services, medical records, staff change, staff dining.

### 3.5 Laboratory Facilities

The new facilities will be one of two major laboratory sites in Glasgow (the other at Glasgow Royal Infirmary). The services to be delivered from the new laboratory build include biochemistry, haematology, medical genetics, microbiology, mortuary and post mortem. The mortuary and post mortem facilities include the re-provision of the Glasgow City mortuary which also provides forensic services for the city of Glasgow.
The new building will be circa 25,000 sq.m., and will include a proportion of the Facilities Management accommodation noted below. Road infrastructure to support the operation of the laboratory function will require to be completed within the laboratory build phase to facilitate operation of the laboratory while the main hospitals are still being constructed.

### 3.6 Facilities Management Building and Energy Centre

The Board require the separation of facilities management (FM) traffic from patient and public traffic, and the facilities management services within the Laboratory Building will be linked to the main hospitals building via an underground tunnel system, this will provide for goods in and goods out as well as transfers to the laboratory and mortuary areas. A robotics (automatic material handling systems) solution for the movement of certain goods has been included within the project and will be developed in more detail over the next 12 months. Other elements of the FM facilities will be part of the main hospitals basement area. The approach to energy provision is that the new facility will provide energy on a site wide basis. The Energy Centre will be located adjacent to the Laboratory Building, but will be part of the hospitals build phase (Stage 3).

### 3.7 Retained Facilities

The remainder of the site will retain approximately 630 beds within the Institute of Neurological Sciences, Maternity, Spinal Injuries, Mental Health facilities and Langlands buildings. The Langlands facility provides older people's services, dermatology and services for the young physically disabled. The new hospital will abut the neo-natal/maternity building to provide a physical link as well as link to the neurosciences building at Level 1. On completion of the new facilities and once staff and services have moved out, the Board will convert some of the older buildings to office and educational use. This work is currently not part of this commission for Supervisor.

### 3.8 Planning

As is noted above, Outline Planning was obtained in April 2007, subject to forty-three conditions and conditional on a Section 75 Agreement being concluded in respect of transportation issues, and this was concluded with Glasgow City Council in July 2009.

The contractor will be responsible for securing detailed planning consent and sign off of the campus masterplan during 2010, this process has already commenced with early meetings between the Council, the Board and Brookfield in December 2009 and January 2010. The submission date for planning is May 2010.

### 3.9 Masterplanning – 2009 Campus Masterplan

The Board were required to update their Campus Plan (2006) as part of the submission for detailed planning consent for the new Laboratory Project in July 2009. The 2009 Masterplan has been prepared for information and the Contractor and his Design team will be required to develop a final plan to reflect their design proposals for the site. The contractor has appointed Ironside Farrar as Planning Adviser for this process.

### 3.10 Site Investigations and Existing Site

The Board commissioned a site investigation (SI) of areas of the existing campus and the main build site.

The resulting SI information is available if required by contacting the writer.

The Board will carry out certain enabling works in relation to the existing site to support and prepare for the construction period of the scheme. These include:

• demolition of the existing structures on the site (including the former residences, the catering/dining facilities and the conference facility);

• removal of foundations and roads within the site; and

• the diversion of the majority of the existing utilities from the site.

The Southern General is a live hospital site, and as such the Contractor and his team will face certain constraints in the delivery of the Project. Essential 'blue light' and other access routes will require to be kept clear and unobstructed by the Contractor at all times for the duration of the construction period, with interface protocols, communications plans and emergency/contingent planning to be discussed and agreed with the Board prior to start on site. The helipad will remain in operation until January 2011, when the tower cranes for the main build project will start to be erected. Prior to this a management protocol has been developed to take account of tower cranes located on the laboratory site and Car Park 1 site.

**3.11 Equipment and ICT**

The Contractor will supply and fit Group 1 equipment, Group 2 will be free issue by the Board and fitted by the Contractor, and the Board will supply (and fix where relevant) Group 3 and Group 4 equipment. The Contractor is required to provide all necessary fixings, supports and services connections and requirements to support all of the groups of equipment listed.

It should be noted that Information Management and Technology (IM&T) is out with the scope of this Project. The Board is procuring software and end-use hardware as part of a separate IM&T project. The contractor will install all computer infrastructure within the building such as node rooms, containment, boxes and cabling.

**3.12 Energy and Sustainability**

The Board have developed energy and sustainability strategies and targets in relation to the Project. These have been developed through consultation with the Carbon Trust, Waste Resources Action Programme (WRAP).

Energy and sustainability issues are very important to the Board at a project, The Board wish to achieve BREEAM Excellent ratings for all their new buildings.

**3.13 Community Engagement**

The Project Team and the Board's Community Engagement Managers have established the required community benefit considerations for incorporation in the procurement of the Project. These have been developed in line with the Scottish Government's Guidance on Community Benefits in Public Procurement. In particular the Board will seek to work in partnership to develop initiatives around the following:

• Targeted recruitment & training;

• Developing Small and Medium Enterprises (SMEs); and Developing Social Enterprises [Add description}

### 1.5 Project programme

The *Employer* includes a copy of the current or outline scheme programme relating to the period of the *services* at Appendix B to this Scope of Service.

## 2.0 SCOPE OF SERVICES

### 2.1 Introduction

2.1.1 The general scope of the *service* is provided for in the 'Schedule of Duties for *Supervisor*. See Appendix 'A'.

2.1.2 The duties for this scheme commence at:
(*Delete phases not required by '~~strike through text~~')

- FBC
- Stage 4 – construction and handover

### 2.2 Additional requirements

2.2.1 The Health Board identifies additional *services* required but not provided for in the Schedule of Duties for *Supervisor* generally or for a specific phase:

- Generally

  [ ..... ]

- Full Business Case (FBC)

  [ ..... ]

- Stage 4 – construction and handover

  [ ..... ]

- Main works Defects Date Periods

  [ ..... ]

- Consultancy close out

  [ ..... ]

**2.3 Places of work**

- Full Business Case (FBC)
  - The workplace is generally in the *Employer's* offices at:

NHS Greater Glasgow & Clyde
Project Office - Top Floor Site Office
Southern General Hospital Construction Site
Hardgate Road
Glasgow G51 4SX

  - The *Consultant* may perform agreed duties at his own offices with prior permission from the Project Director.

    or The *Consultant* is provided office accommodation at the *Employers* offices

- Stage 4 – construction and handover
  - The workplace is generally in the *Employer's* offices at:

NHS Greater Glasgow & Clyde
Project Office - Top Floor Site Office
Southern General Hospital Construction Site
Hardgate Road
Glasgow G51 4SX

  - The *Consultant* may perform agreed duties at his own offices with prior permission from the Project Director.

    or The *Consultant* is provided office accommodation at the *Employers* offices on the Site

- Main works Defect Period
  - The workplace is generally in the *Employer's* offices at:

    NHS Greater Glasgow & Clyde
    Project Office - Top Floor Site Office
    Southern General Hospital Construction Site
    Hardgate Road
    Glasgow G51 4SX

  - The *Consultant* may perform agreed duties at his own offices with prior permission from the Project Director.

- Consultancy close out

- The workplace is generally in the *Employer's* offices at:

  NHS Greater Glasgow & Clyde
  Project Office - Top Floor Site Office
  Southern General Hospital Construction Site
  Hardgate Road
  Glasgow G51 4SX

- The *Consultant* may perform agreed duties at his own offices with prior permission from the Project Director.

**2.4 Other constraints placed on the *Consultant***

2.4.1 Hours of work

The *Consultant* is required to provide attendance on the NHS Health Board during the *services* as follows (*Strike through phases not required)

Overtime in addition to the stated hours may only be reimbursed to the *Consultant* where prior permission has been obtained from the *Employer* and a compensation event notified and accepted.

The *Consultant* identifies and allows for Incidental overtime not resulting from instruction of the *Employer* or actions of the PSCP the Prices in the Form of Scheme Proposal.

- *FBC

| | |
|---|---|
| Monday to Friday | start 09.00amfinish 05.00pm |
| Saturday | start 00.00am finish 00.00pm |
| Sunday | start 00.00am finish 00.00pm |

- * Stage 4 – construction and handover

| | |
|---|---|
| Monday to Friday | start 09.00am finish 05.00pm |
| Saturday | start 00.00am finish 00.00pm |
| Sunday | start 00.00am finish 00.00pm |

- *Main works *Defects Period* – ad hoc hours for the *services*

2.4.2 Provision of equipment

In addition to facilities at the *Consultant's* offices, staff are to be provided with personal notebook computers for use at offices of the *Employer* and *Contractor.*

Computer software minimum requirement is:

- Microsoft Office
- Microsoft Project

2.4.3 Procedures and reporting

The *Consultant* complies with the requirements of the Project Director/*Project Manager* and as further detailed in this scope part 7.1

2.4.4 Relationships with the PSCP (*Contractor*)

The *Consultant* co-operates with the PSCP in the manner stated in the *works* scheme contract as well as in this contract to:

- Deliver the scheme completed on time, within the PSCP contract agreed total of the Prices and accepted compensation events to the required standard of build.
- Achieve the most cost effective construction and commercial solutions to scheme contract compensation events on behalf of the NHS Health Board.
- Manage the programme effects of change thus avoiding unnecessary delay in completion of the scheme contract.
- Ensure readily available means of communication by regular personal meetings and interaction with the PSCP's staff and consultants on a day by day basis.
- Ensure that all handover procedures are complied with and that that the *works* scheme is operational and secure in all its aspects at Completion.

2.4.5 Limit of *Consultant's* authority

The *Consultant* has no authority, except as may be delegated by the *Project Manager,* to enter into any agreement with the PSCP in respect of commercial discussions that may occur whilst undertaking the Duties of the *Supervisor.*

## 3.0 The Prices

3.1 Introduction

3.1.1 The *Consultant* provides the Prices and activity schedule (s) together with *forecast expenses* using the Excel workbook (Priced contract with activity schedule and *forecast expenses*) adopted by Frameworks Scotland.

3.1.2 The Prices for the activity schedule are derived from the framework tender percentage fee structure embodied in Frameworks Scotland. The activity schedule identifies the applicable stages of the contract, e.g. FBC and Stage 4 construction and handover Defects Date period and close out based on the Health Board stated affordability for the overall PSCP Option C management, design and construction contract; the framework registered fee structure percentage is applied for each applicable stage in the scheme. The *Consultant* identifies the monthly charge for the period of the stage as a derivative of the stage Price for payment. *Forecast expenses* are identified in the Scheme Excel workbook provided by Frameworks Scotland framework.

3.2 *Staff Rates*

3.2.1 *Staff rates* are included in the Supervisor's tender response document dated 4th March 2010 to the New South Glasgow Hospitals & Laboratory Project NEC3 Supervisor Proposal document dated February 2010.

3.2.2 *Staff Rates* include general risk. However operational risk should be reflected in the forecast of resources to be allocated and the hours to be worked in each stage.

3.3 *Expenses*

3.3.1 Expenses are included within the hourly rates.

3.4 The forecast Time Charge at appointment to the contract

3.4.1 The *Consultant's* Form of Proposal includes risk for administration of the *service* based on the requirements of this scope of services and the schedule of duties provided at Appendix 'A'.

3.4.2 Incidental overtime not authorised by the *Employer* is included in the accepted Prices

3.5 The Prices

3.5.1 The Prices proposed by the *Consultant* are to be calculated using *staff rates* and other applicable items from the Frameworks Scotland agreement...

3.5.2 The Prices are only amended where a compensation event is accepted

**4.0 Programme**

4.1 Introduction

4.1.1 In complying with the contract (PSC 31.2) the *Consultant,* incorporates details of any programme provided by the *Employer*: (See Appendix B as appropriate)

- An outline programme, a Gantt chart reflecting the anticipated periods for pre-construction planning and design work, e.g. IA, OBC, FBC and the Stage 4 construction and handover/Defects period plus 4 weeks.

4.2 First programme for acceptance

4.2.1 The programme is submitted to the *Employer* for acceptance based on

- The *Employer's* programme as may be amended for the agreed *starting date*.

4.3 Revisions of the programme

4.3.1 The *Consultant* provides revisions to the Accepted Programme at the intervals stated in Contract Data Part one and prior to gateway entry at each stage, taking account of any programme applying for the PSCP *works* contract.

## 5.0 *Consultant* resources – People

5.1 Effect of the PSCP's programme

5.1.1 If the *Consultant* identifies that the PSCP's programme impacts on the *Consultant's* programme in respect of time and or resource this should be brought to the attention of the *Employer* by an early warning notification in order that the effect can be minimised.

## 6.0 Commercial requirements

6.1 The following requirements apply individually to each stage

6.2 Cash flow and expenditure projections for the Prices and forecast *expenses,*

6.2.1 Cash flow and expenditure projections are prepared by the *Consultant* in graphic format to coincide with the Accepted Programme for each of the stages and submitted to the *Employer* for acceptance.

6.2.2 The cash flow and expenditure projections demonstrate the indicative and current amounts for each stage at each assessment interval.

6.3 Records of Time

6.3.1 The *Consultant* maintains:

- Copies of all records relating
  - to total Time (Daily allocation records for his staff)
- Records of all correspondence and meetings relevant to total Time Charge due to or paid to Subconsultants.

6.4 Assessment procedures

6.4.1 Particular requirements of the *Employer* for *Consultant's* assessments and subsequent invoicing are as follows:

(Enter the NHS Health Board's requirements if any, otherwise rely on the contract clause 50)

6.5 Early warning

6.5.1 The standard notification included in the Frameworks Scotland PSC Contract Administration Toolkit (CAT) pro forma pack is used for early warning notifications. Notifications are not to be transmitted verbally or by other communication.

6.5.2 The *Employer* requires the *Consultant* limits early warning to the procedures stated in PSC (16) and to close out each early warning without delay.

6.5.3 Early warning is not notified during progress or other meetings not specifically convened for the purpose of early warning.

6.5.4 Early warning/risk reduction meeting discussion is to be limited to the matter notified and not expanded into more general discussion. Where more than one matter is to be discussed each has its own agenda and individual record of the proposals considered and the decisions taken.

6.5.5 Early warning notifications /risk reduction meetings are not normally given / held for compensation events that have been notified in accordance with the contract.

6.6 Compensation events

6.6.1 Compensation events are instructed / notified using the standard notification included in the CAT pro forma pack.

6.6.2 A compensation event is not considered to be instructed / notified if any communication other than the standard notification is used.

6.6.3 The original of the compensation event notification is a 'live' document and is transmitted between the Parties as a record of submission, requirements and acceptance.

6.6.4 Compensation event quotations are to be detailed and supported by contemporary records / allocation sheets where the effect of the event is on 'the total Time Charge and *expenses* of the Time Charge for work already done'.

6.6.5 Compensation event quotations that do not have an impact on Sectional Dates for Completion or the Completion Date do not require revision of the programme to be submitted with the quotation unless instructed by the *Employer.*

6.6.6 For the avoidance of doubt, the principles of the contract apply to compensation events for all stages of the scheme.

The *Consultant* includes additional management resources in compensation event quotations only if the existing management structure and resources cannot contain the effect.

## 7.0 Scheme specific requirements

Note: Use this section to clarify any scheme specific requirement of the *services* that may not have been identified sections 1 to 6, for example:

7.1 Reporting

- Capita Standard report for the NEC3 Supervisor *service* to be submitted to the Project Director - Alan Seabourne.
- Other reports subsequently notified by NHS Greater Glasgow & Clyde

7.2 Compliance with the CDM co-ordinator's pre-construction information

7.2.1 The *Consultant* includes relevant documentation within the scheme specific documents, including those prepared in conjunction with the PSCP.

7.3 Liaison with User Groups

7.3.1 The *Consultant* liaises with User Groups as directed by the *Employer.*

7.3.2 The following User Groups and individuals will have an interest in the development of the main works contract:

- not applicable.

7.4 Facilities for the *Employer/Project* Manager

not applicable.

7.5 *Consultant* Quality Plan

7.5.1 The quality management system to be operated is to be compatible with the *Consultant* system identified during Frameworks Scotland selection process and developed to be *services* specific.

7.6 Handover at completion

7.6.1 The *Consultant* complies with the requirements of the *Employer* as developed during the Period of the Services.

7.6.2 Handover requirements and procedures are;

as per the main NEC3 contract agreement between NHS Greater Glasgow & Clyde and the main contractor Brookfield Multiplex Construction Ltd.

7.7 Liaison with other Consultants

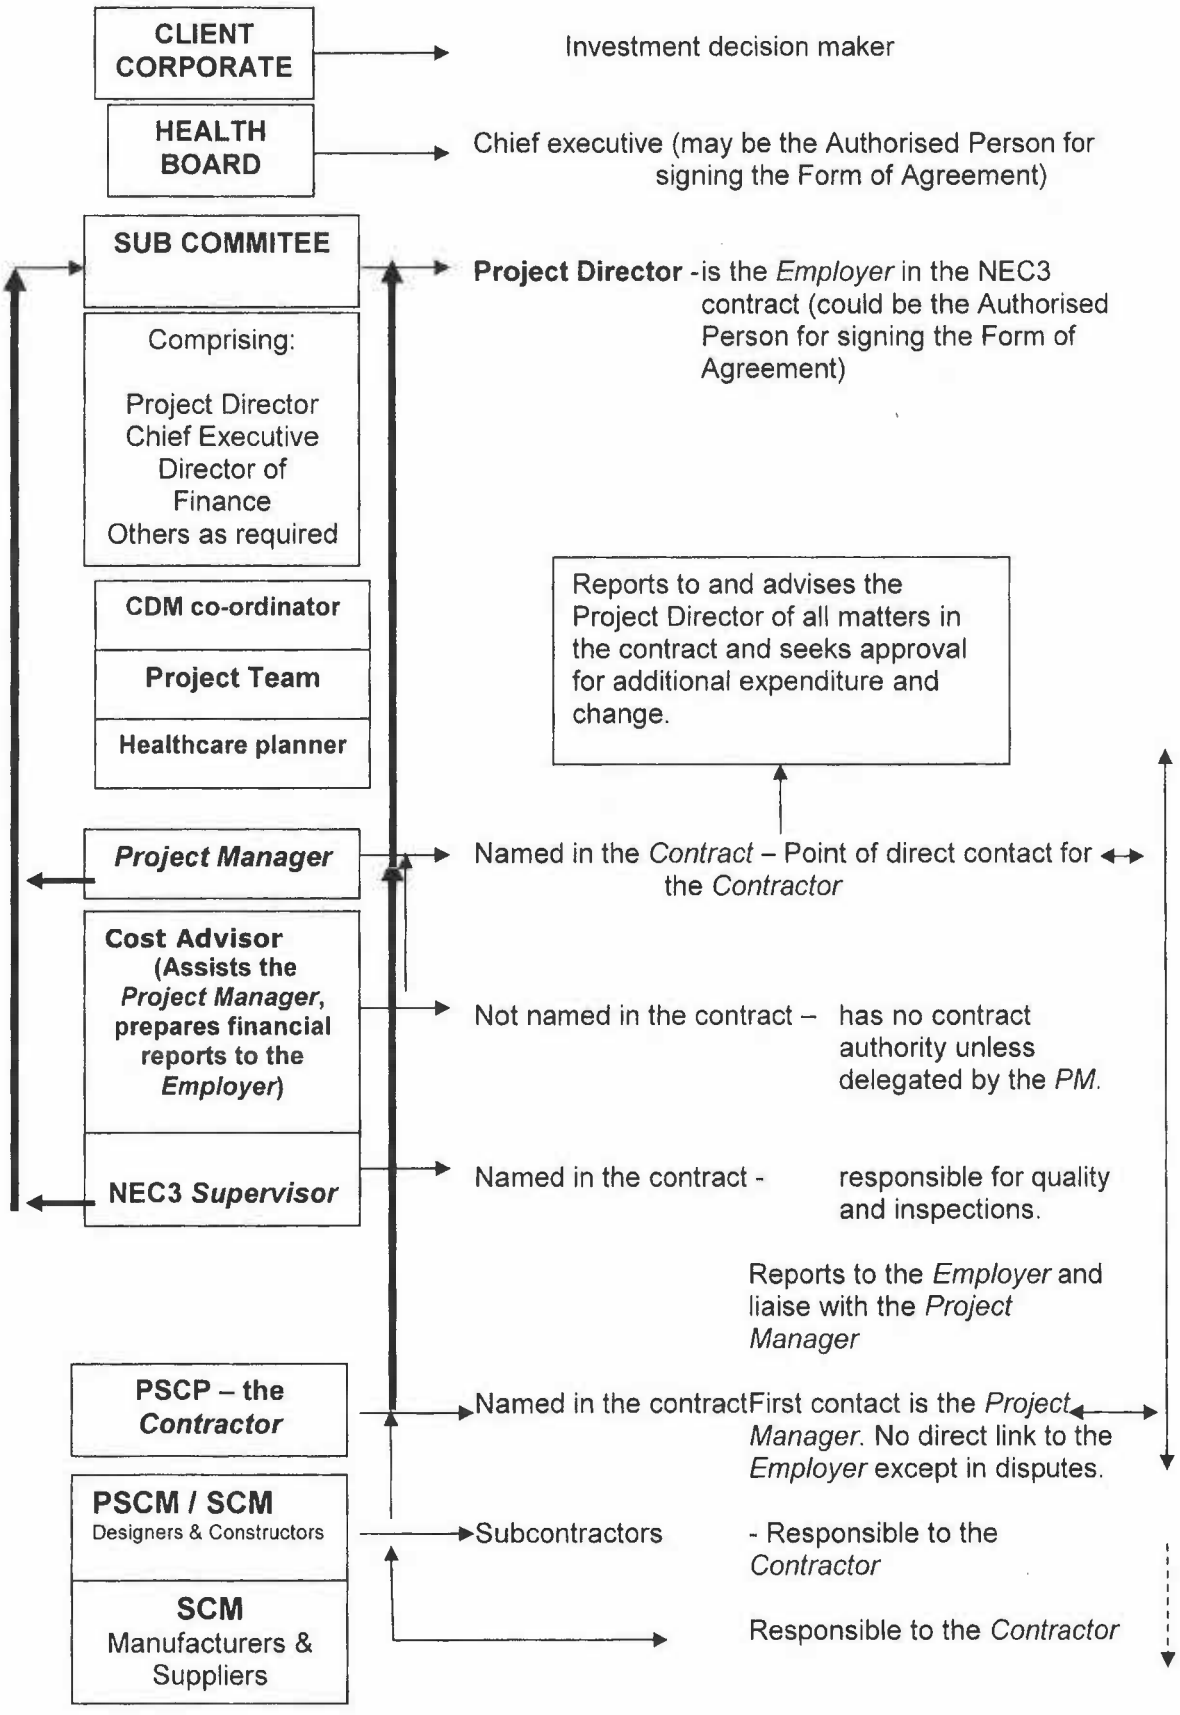
7.7.1 The Consultant liaises with other Consultants as directed by the Employer.

**APPENDIX A**

**Frameworks Scotland**

**Schedule of Duties for *Supervisor***

(For incorporation in the Scope of Service for appointment of the *Supervisor* under the NEC3 Professional Services Contract)



CLIENT CORPORATE
Investment decision maker
HEALTH BOARD
Chief executive (may be the Authorised Person for signing the Form of Agreement)
SUB COMMITEE
Project Director -is the Employer in the NEC3 contract (could be the Authorised Person for signing the Form of Agreement)
Comprising:
Project Director
Chief Executive
Director of Finance
Others as required
CDM co-ordinator
Project Team
Healthcare planner
Reports to and advises the Project Director of all matters in the contract and seeks approval for additional expenditure and change.
Project Manager
Named in the Contract – Point of direct contact for the Contractor
Cost Advisor (Assists the Project Manager, prepares financial reports to the Employer)
Not named in the contract – has no contract authority unless delegated by the PM.
NEC3 Supervisor
Named in the contract - responsible for quality and inspections.
Reports to the Employer and liaise with the Project Manager
PSCP – the Contractor
Named in the contract
First contact is the Project Manager. No direct link to the Employer except in disputes.
PSCM / SCM
Designers & Constructors
Subcontractors
- Responsible to the Contractor
SCM
Manufacturers & Suppliers
Responsible to the Contractor

A49342285

**Duties Generally**

The *Supervisor* reports to the Project Director; liaises with the *Project Manager* and the Cost Advisor.

**Post-contract pre-construction, i.e. prior to main works construction delivery and handover**

The *Supervisor* may be called upon to carryout any of the following:

1. Offer practical construction advice and process guidance to the project team and take part in the scheme Dart process.

2. Liaise with the *Contractor* and Designers to establish tests and inspections to be carried out in accordance with Works Information and the *Contractor's* Works Information for his design; as part of the scheme Quality Assurance and acceptance Procedures.

3. Monitor site investigation operations.

4. Monitor and liaise with Utilities carrying out pre-construction diversions and installation of new services.

5. Monitor and inspect and accept PSCP (*Contractor*) enabling and other pre-construction work.

6. Issue Defect notices to the *Contractor* as necessary.

7. Inform the *Project Manager* of all Defects and unacceptable construction practices by the PSCP and other members of the supply chain.

8. Notify the *Project Manager;*

   - When Defects have been corrected
   - Those Defects the *Contractor* has not rectified within the *defects correction period.*
   - Those Defects the *Contractor* is unable or unwilling to correct.
   - Tests and inspections performed and accepted
   - Those tests and inspections performed but results found to be unacceptable.

9. Keep records of tests, inspections and acceptances for inclusion in the Health and Safety File as may be required by the CDM co-ordinator.

**Post-contract construction, i.e. main works construction delivery and handover**

Tests and inspections

1. The *Supervisor* notifies the *Contractor* of his tests and inspections before it starts and afterwards notifies of its results. The *Supervisor* may watch any test done by the *Contractor*. (*Clause* 40.3)

2. The *Supervisor* does his tests and inspections without causing unnecessary delay to the work or a payment which is conditional on a test or inspection being successful. (Clause 40.5)

   Procedure Note:

   A payment which is conditional on a *Supervisor's* test or inspection becomes due at the later of the *defects date* and the end of the last *defect correction period* if;

   - The *Supervisor* has not done the test or inspection and
   - The delay to the test or inspection is not the *Contractor's* fault

1. The *Contractor* does not bring to Working Areas Plant and Materials which Works Information states are to tested or inspected prior to delivery until the *Supervisor* has notified the *Contractor* that they have passed the test or inspection. (Clause 41.1)

2. Until the *defects* date, the *Supervisor* may instruct the *Contractor* to search for a Defect. He gives his reason for the search with his instruction. Searching may include (Clause 42.1);

   - Uncovering, dismantling, re-covering and re-erecting work,
   - Providing facilities, materials and samples for tests and inspections done by the *Supervisor* and
   - Doing test and inspections which the Works Information does not require.

5. Until the *defects date*, the *Supervisor* notifies the *Contractor* of each Defect which he finds and the *Contractor* notifies the *Supervisor* of each Defect as soon as he finds it. Clause 42.2)

   Procedure Note:

   The *Contractor* corrects a Defect whether or not the *Supervisor* notifies him of it. (Clause 43.1)

6. The *Supervisor* issues the Defects Certificate at the later of the *defects date* and the end of the last *defect correction period.* (Clause 43.3)

   Procedure Note:

   Clause 11.2(6)
   The *Supervisor* issues the Defects Certificate – is either a list of Defects that the *Supervisor* has notified before the *defects date* which the

*Contractor* has not corrected or, if there are no such Defects, a statement that there are none

7. Uncorrected Defects (Clause 45)

Note; in order for the principles of this clause to be applied the *Supervisor* informs the *Project Manager* of the *Contractor's* failure to correct a notified Defect within its *defect correction period.*

8. Title (Clause 71.1)

The *Supervisor* marks Equipment, Plant and Materials which are outside the Working Areas if

This contract identifies them for payment and
The *Contractor* has prepared them for marking, as the Works Information requires

*Supervisor's* General obligations in the contract

Clause 13.3 The *Supervisor* replies to communications within the *period for reply*

Clause 13.6 The *Supervisor* Issues certificates to the *Project Manager* and the *Contractor*

Clause 14.1 Acceptance by the *Supervisor* of a communication from the *Contractor* does not change the *Contractor's* responsibility for design

Clause 14.2 The *Supervisor* may carry out delegation of actions after notifying the *Contractor*

Clause 14.4 The *Employer* may replace the *Supervisor* after he has notified the *Contractor* of the name of the replacement

Compensation events

Procedure Note:

The following actions/inactions of the *Supervisor* are compensation events
(The Supervisor does not issue a notification to the *Contractor* when one of the foregoing occurs. He notifies the *Project Manager*.)

60.1(6) The *Supervisor* does not reply to a communication from the *Contractor* within the period required by this contract

(8) The *Supervisor* changes a decision which he has previously communicated to the *Contractor*

(10) The *Supervisor* instructs the *Contractor* to search and no Defect is found unless the search is needed only because the *Contractor* gave insufficient notice of doing work obstructing a required test or inspection

(11) A test or inspection by the *Supervisor* causes unnecessary delay

*Contractor's* obligations to the *Supervisor* in this contract

27.2 The *Contractor* provides access to work being done and to Plant and materials being stored for this contract

27.3 The *Contractor* obeys an instruction which is in accordance with this contract and given by the *Supervisor'*

**Schedule of key duties of *Supervisor* acting as client adviser for Frameworks Scotland scheme contracts**

*©Health Facilities Scotland, a Division of National Services Scotland*

# 1. Introduction

1.1 Healthcare Associated Infection (HAI) stands out as a priority issue for NHSScotland. The need to ensure Contractors are aware of and, where appropriate, implement measures to prevent and control the spread of infection during all construction phases is of paramount importance.

1.2 Through the use of Scottish Health Facilities Note (SHFN) 30, version 3:'Infection Control in the Built Environment: Design and Planning', in conjunction with the Healthcare Associated Infection System for Controlling Risk In the Built Environment, version 2 (HAI-SCRIBE) and the HAI-SCRIBE Implementation Strategy, Health Facilities Scotland (HFS) has provided a process to assist in the prevention and control of infection, within the built healthcare environment.

1.3 The overall aim of this guidance is to ensure Consultants and Contractors utilise the proposed process.

*©Health Facilities Scotland, a Division of National Services Scotland*

# 2. SHFN 30, HAI-SCRIBE and their implementation

2.1 Prevalence of Healthcare Associated Infection (HAI) is seen as having a negative impact both economically and medically within the Scottish Healthcare sector. It has been established that approximately 1 in 10 people contract infection as a result of care and treatment within healthcare facilities.

2.2 A report by Walker (2001), estimated that the cost of HAI in Scotland alone was £186 million per annum, with an estimated loss of 380,000 bed days. It has been stated that 20% of said infections are deemed to be preventable.

2.3 In an attempt to prevent and control HAI in the built healthcare environment, Health Facilities Scotland developed three pieces of guidance namely, SHFN 30, HAI SCRIBE and the HAI-SCRIBE Implementation Strategy.

2.4 SHFN 30 aims to provide information on the prevention and control of infection and on the prevention of cross-infection and cross contamination in healthcare facilities to those responsible for the planning, design and maintenance of such facilities. It is intended as a first point of reference for those involved in the planning design and maintenance of healthcare facilities and should be used in conjunction with HAI-SCRIBE.

2.5 HAI-SCRIBE was developed to fully ascertain and manage the risks associated with infection. It is necessary to have a procedure that allows for the assessment and review of potential infection control risks throughout all operations within the built environment. HAI-SCRIBE aims to reduce infection hazards through the use of a prevention and control of infection questionnaire using a number of scenarios within the built healthcare environment.

These scenarios are:

- the proposed site for development of a healthcare facility;
- the design and planning stage of the proposed healthcare facility;
- the construction and refurbishment stage of the healthcare facility;
- the ongoing maintenance of the healthcare facility.

2.6 The HAI-SCRIBE Implementation Strategy ensures that the implementation of HAI-SCRIBE should be the responsibility of a multi-disciplinary team who has the necessary skills in relation to the facility being designed, planned, constructed, refurbished or manufactured.

2.7 In order to fully incorporate SHFN 30, HAI-SCRIBE and the HAI-SCRIBE Implementation Strategy throughout NHSScotland, endorsement by all construction professionals is fundamental in allowing the procedure to work to its maximum potential.

*©Health Facilities Scotland, a Division of National Services Scotland*

# 3. Information and responsibility

3.1 Development and maintenance of an environment which is conducive to the prevention and control of infection is important. Key to this is the communication of appropriate information and awareness raising, among those involved in the provision of building and facilities services to NHSScotland.

3.2 Those who provide building and facilities services to NHSScotland should be aware of the need to prevent and control the spread of infection within the built healthcare environment and that use of SHFN 30, HAI-SCRIBE and the HAI-SCRIBE Implementation Strategy can help achieve this.

3.3 To ensure full application of HAI-SCRIBE, SHFN 30 and the HAI-SCRIBE Implementation Strategy, these documents must be made readily available to those involved in NHSScotland design, planning, and construction, refurbishment and maintenance projects. However, in some instances it was found that the contractor/consultant awareness of these documents was not sufficient and in some cases a few were not aware that the actual documentation existed.

3.4 To help facilitate this, HFS has developed an Endorsement Certification proforma to ensure that Contractors/Consultants were aware of the issues surrounding the prevention and control of infections and were in receipt of guidance which would help them do so.

3.5 With this certification all those involved in the provision of building and facilities services can be made aware of HAI and the role that HAI-SCRIBE, HAI-SCRIBE Implementation Strategy and SHFN 30 have in preventing and controlling the spread of infection within the built healthcare environment.

3.6 NHS Boards are asked to ensure that the text within the Endorsement Certification, contained within Section 4, is included within the contract documentation issued to contractors and consultants to ensure 'buy-in' and cooperation from contractors and consultants in complying with the requirements of HAI SCRIBE and SHFN 30.

©Health Facilities Scotland, a Division of National Services Scotland

# 4. Endorsement Certification

## Endorsement Certification

(I) Statement of Intent:

*Healthcare Associated Infection (HAI) is a complex issue involving the many different elements of patient care and provision. Due to its multi-factorial nature, there is a need to develop a holistic approach in combating the spread of infection within the built environment.*

*NHS National Services Scotland Health Facilities Scotland (NSS HFS), in conjunction with other organisations, has endeavoured to comprehensively tackle this situation through the creation of documents such as the 'Healthcare Associated Infection System for Controlling Risk of Infection In the Built Environment': version 2 (HAI-SCRIBE) and the 'Scottish Health Facilities Note 30: version 3' (SHFN 30) and the HAI-SCRIBE Implementation Strategy.*

*Non-application of these documents is extremely detrimental in preventing the spread of infection and to the healthcare sector in general. In certifying this endorsement you verify that you will endeavour to do all within your power to aid in this process and reduce the risk of infection within the built environment.*

©Health Facilities Scotland, a Division of National Services Scotland

**Endorsement Certificate**

(II) Certification of the following documents;

***'Healthcare Associated Infection System for Controlling Risk In the Built Environment' (HAI-SCRIBE, version 2, 'HAI-SCRIBE Implementation Strategy' and 'Scottish Health Facilities Note 30': version 3.***

(III) Declaration;

We hereby certify that we agree to co-operate in the application of, on whole or where applicable to the aforementioned documentation and any amendment / revision forthwith enclosed or existing at the time of this declaration.

**Parent Company Guarantee**

**This Guarantee** is made the 28th day of May 2013

**Between**

(1) Capita Symonds Holdings Limited whose registered office is situate at The Registry, 34 Beckenham Road, Beckenham, Kent, BR3 4TU (hereinafter called the "Guarantor") of the one part; and

(2) NHS Greater Glasgow & Clyde of J B Russell House, whose registered office is situate at Gartnavel Royal Hospital, 1055 Great Western Road Glasgow G12 0XH (hereinafter called the "Client") of the other;

**Whereas**

A. This Guarantee is supplemental to a contract dated on or about 28 May 2013 (hereinafter referred to as the "Contract") between the Client of the one part and Capita Symonds Limited (hereinafter called "the Consultant") of the other.

B. The Guarantor has agreed to guarantee the due performance of the Contract by the Consultant in the manner hereinafter appearing.

**Now It Is Hereby Agreed** as follows:

1. Terms defined in the Contract shall have the same meaning when used in this Guarantee.

2. In consideration of the Client entering into the Contract with the Consultant the Guarantor guarantees to the Client the due and punctual performance by the Consultant of its obligations pursuant to the Contract.

3. The Guarantor shall not be exonerated by time being given to the Consultant by the Client or by any concession or arrangement granted or made by the Client to or with the Consultant or by anything that the Client or the Consultant may do or omit to do.

4. The Guarantor hereby authorises the Consultant and the Client to make any addendum or variation to the Contract and subject to the Client giving notice to Guarantor of such addendum or variation within a reasonable period of time.

5. This Guarantee is a continuing guarantee and accordingly shall remain in operation until the obligations pursuant to the Contract are satisfied or the Guarantor shall give notice to the Client not less than 28 days written notice that it is terminating this Guarantee.

6. The Client shall not be entitled to enforce this Guarantee without first taking all and any available steps or proceedings against the Consultant.

7. The duty and or liability (whether in duration extent or nature) of the Guarantor is to be treated as being no greater than it would have been if the Guarantor had jointly been a party to the Appointment with the Consultant instead of this Guarantee and the Guarantor shall be entitled in defence of any action or proceedings by the Client under this Guarantee to rely on any limitation or exclusion in the Appointment and to raise the equivalent rights in defence of liability as the Consultant would have against the Client under the Appointment.

8. This Guarantee shall be governed by and construed in accordance with the laws of England. If any dispute or difference arises between the Guarantor and the Employer in connection with this Guarantee which cannot be resolved by mutual agreement, it shall be referred to the jurisdiction of the English Courts.

9. This Guarantee is not intended to confer on any person any right which such person would not have had but for the Contracts (Rights of Third Parties) Act 1999.

**In Witness** whereof the Guarantor has executed this Guarantee the day and year before written.

**Subject:** RE: Ventilation
**Importance:** High

Dear All,
Just had a useful conversation with Peter Hoffmann at the HPA. He is happy with the proposal that chilled beams are employed in this renal dialysis area. He explained that the suggested 6 ACH per hour is really for temperature control and not for any infection control issues (i.e. not dilution and removal as I mentioned below). He agrees that any more invasive procedures should take place in an appropriately ventilated treatment room.
He also suggested that the problem that you have in the existing areas in the ACADS might be helped by employing 'terminal diffusers that have less directional flow' .
Sorry for the delay and I hope this information is helpful.
Kindest regards
John Hood

**Subject:** RE: Ventilation
**Importance:** High

Sorry not really happy with reduction of ventilation in a dialysis area to 2.5 air changes per hour. Air changes are about dilution and removal. The issue in other ACH units seems to be about **temperature control** - not airchanges per say. A normal ward area would be expected to have at least 6 airchanges per hour. I would

like to discuss the issues with my colleague and expert Peter Hoffmann from the HPA. Unfortunately he is leave at the moment and will not return until Monday 25 October, when I will try to contact him.
Kind regards
John Hood

**Subject:** RE: Ventilation

Hi

Are you able to confirm the decision regarding the ventilation for the Renal Dialysis Outpatient area? This information is needed now as a matter of urgency for the Full Business Case.

Kind Regards

Fiona

**Subject:** Ventilation

Hi,

I will be on A/L next week. Therefore could I please ask that you contact Fiona McCluskey with the decision regarding the ventilation for the area that renal out patients will be dialysed? This will prevent any delay as the information is needed as soon as possible.

Thanks,

Jackie.

**IN THE COURT OF SESSION**

**SUMMONS**

in the cause

**GREATER GLASGOW HEALTH BOARD,** an area health board constituted under the National Health Service (Scotland) Act 1978, having its principal office at J B Russell House, Gartnavel Royal Hospital Campus, 1055 Great Western Road, Glasgow G12 0XH

**Pursuer**

against

**(FIRST) MULTIPLEX CONSTRUCTION EUROPE LIMITED**, a company incorporated under the Companies Acts (Company Number 03808946), having its registered office at 99 Bishopsgate, Second Floor, London EC2M 3XD;

**(SECOND) BPY HOLDINGS LP (a firm) (formerly known as BROOKFIELD EUROPE LP (a firm)**, a limited partnership formed under the Limited Partnerships Act 1907 (Company Number LP013183), having its registered office at Level 25, 1 Canada Square, Canary Wharf, London E14 5AA, and **BPY HOLDINGS GP LIMITED**, the general partner thereof as such general partner and as an individual, a company registered in Ontario, Canada (Registered Number 1775491), having its registered office at Brookfield Place, 181 Bay Street, Suite 300, Toronto, Ontario M5J 2T3;

**(THIRD) CURRIE & BROWN UK LIMITED**, a company incorporated under the Companies Acts (Company Number 01300409), having its registered office at 40 Holborn Viaduct, London EC1N 2PB; and

**(FOURTH) CAPITA PROPERTY AND INFRASTRUCTURE LIMITED**, a company incorporated under the Companies Acts (Company Number 02018542), having its registered office at 30 Berners Street, London W1T 3LR

**Defenders**

Elizabeth II, etc

**CONCLUSIONS**

1. For payment by the first, third and fourth defenders, jointly and severally, or severally, to the pursuer of the sum of SEVENTY TWO MILLION EIGHT HUNDRED THOUSAND POUNDS STERLING (£72,800,000) with interest thereon at the rate of 8 per cent per annum from the date of citation until payment.

2. For payment by the second defenders, jointly and severally, or severally, to the pursuer of the sum of SEVENTY TWO MILLION EIGHT HUNDRED THOUSAND POUNDS STERLING (£72,800,000) with interest thereon at the rate of 8 per cent per annum from the date of citation until payment.

3. For the expenses of the action.

**CONDESCENDENCE**

1. The pursuer is Greater Glasgow Health Board**,** an area health board constituted under the National Health Service (Scotland) Act 1978, having its principal office at J B Russell House, Gartnavel Royal Hospital Campus, 1055 Great Western Road, Glasgow G12 0XH. The pursuer's address was formerly at Dalian House, 350 St Vincent Street, Glasgow G3 8YZ. The first defender is Multiplex Construction Europe Limited, a company incorporated under the Companies Acts (Company Number 03808946), having its registered office at 99 Bishopsgate, Second Floor, London EC2M 3XD. The first defender was formerly known as Brookfield Construction (UK) Limited until 21 February 2011. Thereafter it was known as Brookfield Multiplex Construction Europe Limited until 31 August 2016. The first defender has had a principal place of business at 23 Hanover Square, London W1S 1JB. The second defender is BPY Holdings LP, a limited partnership formed under the Limited Partnerships Act 1907 (Company Number LP013183), having its registered office at Level 25, 1 Canada Square, Canary Wharf, London E14 5AA (the "**Limited Partnership**"), and BPY Holdings GP Limited, the general partner thereof as such general partner and as an individual, a company registered in Ontario, Canada (Registered Number 1775491), having its registered office at Brookfield Place, 181 Bay Street, Suite 300, Toronto, Ontario M5J 2T3 (the "**General Partner**"). The Limited Partnership was formerly known as Brookfield Europe LP until 2 May 2013. The Limited Partnership has had a place of business at 23 Hanover Square, London W1S 1JB. The General Partner was formerly known as Brookfield Europe GP Limited. The third defender is Currie & Brown UK Limited, a company incorporated under the Companies Acts (Company Number 01300409), having its registered office at 40 Holborn Viaduct, London EC1N 2PB. The third defender formerly had its registered office at Dashwood House, 69 Old Broad Street, London EC2M 1QS. The third defender has a place of business at Fourth Floor, 140 St Vincent Street, Glasgow G2 5NE. The fourth defender is Capita Property and Infrastructure Limited, a company incorporated under the Companies Acts (Company Number 02018542), having its registered office at 30 Berners Street, London W1T 3LR. The fourth defender was formerly known as Capita Symonds Limited from 4 May 2004 until 1 October 2013. The fourth defender formerly had addresses at 8th Floor, The Beacon, 176 St Vincent Street, Glasgow G2 5SG and at Skypark SP1, 8 Elliot Place, Glasgow G2 8EP. The fourth defender now has a place of business at 4th Floor, 7 West Nile Street, Glasgow G1 2PR. In terms of the contracts and the guarantee condescended upon below (with the exception of the contract between the pursuer and the third defender) the parties have prorogated the jurisdiction of the Scottish courts. The third defender has a place of domicile in Glasgow, Scotland. In any event, the

harmful events which are the subject matter of these proceedings occurred in Glasgow, Scotland. This court has jurisdiction. There are no proceedings pending before any other court involving the present cause of action and between the parties hereto. There is no agreement prorogating jurisdiction over the subject matter of the present cause of action to another court.

**Building Contract**

2. The pursuer and the first defender entered into an Agreement on 18 December 2009 (the "**Building Contract**"). In terms of the recital to, and Clause 1 of, the Building Contract the first defender was to "*Provide the Works*" for "*the New South Glasgow Hospital*" (the "**Hospital**"). The Hospital is now generally referred to as the Queen Elizabeth University Hospital. The Hospital is of a significant size and contains a number of important facilities. In particular the Hospital includes both an adult hospital (the "**Adult Hospital**") and a children's hospital. The children's hospital is specifically known as the Royal Hospital for Children, ("**RHC**"). Design and construction of the Hospital involved works totalling many hundreds of millions of pounds in value. The works were of significant scope and complexity. The Building Contract was a design and build contract in terms of which the first defender bore both design and build responsibilities (including commissioning responsibilities). The works under the Building Contract were to be carried out in various stages. Without prejudice to that generality, amongst those stages were Stages 2 and 3. Stage 2 related to design of the Hospital. Stage 3 related to design and construction of the Hospital. On 29 January 2015, subject to a schedule of incomplete works Stage 3 of the Hospital was certified as having been completed, under and in terms of the Building Contract, on 26 January 2015. The Building Contract is produced, referred to for its whole terms and held to be incorporated herein for the sake of brevity.

3. In terms of Clause 1 of the Building Contract, the works thereunder were to be performed in accordance with, among other things, "*the NEC Engineering and Construction Contract, Option C: Target contract with activity schedules June 2005 (as the same are amended in [sic] by the Contract Data)*" (each individual clause thereof is hereafter an "**NEC Clause**"). In terms of the Contract Data, Part One, the applicable Secondary Options of the NEC Engineering and Construction Contract (June 2005) were X2, X4, X5, X7, X13, X16, X18.5, Y(UK)2 and Z clauses.

4. In terms of NEC Clause 20, the first defender was obliged, among other things, as follows: "*The* Contractor *[the first defender] Provides the Works in accordance with the Works Information*". In the Contract Data Part One (forming part of the Building Contract in terms of Clause 6 of the Building Contract) the composition of the Works Information was defined as follows:

"*The Works Information comprises*

- *The Contract Documents: Part Five (Works Information);*
- *The Employers [sic] Requirements; and*
- *The Contractor's Proposals including the M&E Clarification Log*"

5. In terms of NEC Clause 21 (as amended by the Contract Data Part One) the first defender was obliged, among other things, as follows:

"*The Contractor [the first defender] designs the parts of the works which the Works Information states he is to design. The Contractor designs the parts of the works which the Works Information states he is to design using the degree of skill and care that would reasonably be expected of a competent professional design and build contractor experienced in carrying out projects of a similar nature, scope and complexity to those comprised in the works*".

**Delictual obligation of the first defender**

6. *Separatim*, the first defender owed the pursuer a duty at common law to exercise reasonable skill and care in performing its services as design and build contractor in relation to the Hospital.

**Parent company guarantee**

7. The second defenders and the pursuer entered into a parent company guarantee on 18 and 22 December 2009 (the "**Guarantee**"). In terms of Clause 2 of the Guarantee the parties agreed, among other things, that: (1) The first named second defender "*irrevocably and unconditionally*" guaranteed to the pursuer "*the due and punctual performance*" by the first defender of "*all the obligations, liabilities, warranties, duties and undertakings*" of the first defender to the pursuer "*arising pursuant to the Building Contract*"; and (2) The first named second defender would "*perform or cause to be performed*" "*all the obligations, liabilities, warranties, duties and undertakings*" of the first

defender to the pursuer "*arising pursuant to the Building Contract*". Clause 2 of the Guarantee also makes provision in respect of, among other things, payment by the first named second defender to the pursuer in respect of claims made by the pursuer. The Guarantee is produced, referred to for its whole terms and held to be incorporated herein for the sake of brevity.

**Lead consultant appointment**

8. The pursuer and the third defender entered into a Memorandum of Agreement on 6 April 2011 (the "**Lead Consultant Appointment**"). In terms of the recitals to, and Clause 1 of, the Lead Consultant Appointment the third defender was the pursuer's lead consultant in relation to the Hospital project and was obliged to lead the technical advisory team by performing the duties contained in the Memorandum of Agreement. The third defender acted as the pursuer's lead consultant, and led the technical advisory team, in relation to the Hospital project. The third defender had been performing the role of lead consultant, and had led the technical advisory team, for a considerable period of time prior to the formal entering into of the Lead Consultant Appointment. The Lead Consultant Appointment is produced, referred to for its whole terms and held to be incorporated herein for the sake of brevity.

9. In terms of Clause 1.1 of the Lead Consultant Appointment, the pursuer engaged the third defender to perform duties subject to the terms of the Lead Consultant Appointment. In terms of Clause 1.2 of the Lead Consultant Appointment, Parts A-G of the Appendix thereto constituted part of the Lead Consultant Appointment. Without prejudice to that generality: (1) Appendix Part A contained "*Conditions of Appointment*"; (2) Appendix Part B contained "*Scheme Particulars*"; and (3) Appendix Part C contained "*Consultant's Duties*".

10. Appendix Part A of the Lead Consultant Appointment imposed a number of obligations on the third defender. Without prejudice to that generality those obligations included the following:

> "*1.1* ***Duration of commission***
>
> *The appointment of the Consultant [the third defender] will commence from the date that the Consultant commenced carrying out the Duties and the commission, … as set out in Part C of the Appendix. …*

*1.6* ***Duty of care***

*The Consultant is to exercise reasonable skill, care and diligence in the discharge of the Duties. Submission of drawings, calculations, specification and other documentation produced by the Consultant for comment by the Board shall not relieve the Consultant of this responsibility. If in the performance of the Duties the Consultant has discretion exercisable as between the Board and any other body the Consultant shall exercise its discretion fairly.*".

**Delictual obligation of the third defender**

11. *Separatim*, the third defender owed the pursuer a duty at common law to exercise reasonable skill, care and diligence in performing its services as lead consultant in relation to the Hospital project and leading the technical advisory team.

**Project supervisor appointment**

12. In terms of: (i) Two letters from the pursuer to the fourth defender dated 21 May 2010 and 28 March 2011 respectively, which were agreed to by the fourth defender by its conduct or otherwise; and (ii) An Agreement between the pursuer and the fourth defender on 28 May 2013 (together the "**Project Supervisor Appointment**"), the pursuer and the fourth defender agreed the terms of the fourth defender's appointment as project supervisor for the Hospital project. The pursuer acted as project supervisor in relation to the Hospital project. In terms of the Project Supervisor Appointment, the scope of the fourth defender's work as project supervisor involved various duties and services, including (without prejudice to that generality) those as detailed in the pursuer's "High Level Information Pack – Supervisor Role" dated February 2010 (the "**HLIP**"). The Project Supervisor Appointment (including the HLIP) is produced, referred to for its whole terms and held to be incorporated herein for the sake of brevity.

13. In terms of the Project Supervisor Appointment, the fourth defender's services as project supervisor were to be performed in accordance with, among other things, the NEC3 Professional Services Contract, Option A ("**NEC3 PSC**"). In terms of NEC3 PSC Clause 20, the fourth defender was obliged, among other things, as follows:

"*The* Consultant's *[the fourth defender's] obligation is to use the skill and care normally used by professionals providing services similar to the services*".

**Delictual obligation of the fourth defender**

14. *Separatim*, the fourth defender owed the pursuer a duty at common law to exercise reasonable skill and care in performing its services as project supervisor.

**Issues and breaches**

15. There are a number of issues arising from defects in the Hospital. Such issues and defects include, but are not limited to, those condescended upon below. The first defender has breached the terms of the Building Contract in respect of the issues and defects. The third defender has breached the terms of the Lead Consultant Appointment in respect of the issues and defects. The fourth defender has breached the terms of the Project Supervisor Appointment in respect of the issues and defects. In particular, without prejudice to the foregoing generality, the first, third and fourth defenders have respectively breached the terms condescended upon in Arts. 2 to 5, 8 to 10 and 12 and 13 of Condescendence above. The first, third and fourth defenders have also breached their common law duties. The first, third and fourth defender's breaches have each caused the pursuer to suffer, or at least materially contributed to the pursuer suffering, the loss and damage condescended upon below. Without prejudice to the generality of the foregoing, the first, third and fourth defenders were in breach of contract, and in breach of their common law duties, by reason of the circumstances condescended upon below in relation to Issues 1 to 11 there condescended upon.

**Issue 1: Water system**

16. After handover of the Hospital by the first defender to the pursuer, systemic contamination of the domestic water system was identified. The pursuer has had to install an extensive chlorine dioxide dosing system to control the domestic water bacteria. Defects which have been identified in relation to the water system (the "**Water System Defects**") in the Hospital include (without being limited to) the following: (1) The use of mild steel pipework; (2) The use of copper pipework; (3) The use of flexi-pipes; (4) The use of pipework from manufacturers not included in the O&M Manuals and not relevantly approved; (5) Leaving pipework open during installation work (making it vulnerable to contamination); (6) Pipework and fittings corrosion; (7) Corrosion of domestic water meters; (8) Use of a disinfectant (Sanosil Super 25) which includes silver and hydrogen peroxide, without evidence of relevant advice to do so; (9) Small debris in a cold water storage tank, indicating a failure to clean and flush the cold water storage tanks; (10)

Pressure testing being carried out after a leachate flushing regime, rather than before; (11) Lack of commissioning information in O&M manuals; (12) Lack of a water risk assessment in the O&M manuals; (13) Storage volumes of the water system larger than required; (14) Inadequate provision for filling and top up of the water system; and (15) Incoming water main not being to Scottish Water requirements.

17. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Water System Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.2, required the Contractor (the first defender) to "*comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in Section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Mandatory Documentation in Table 2 included, amongst other things, various Scottish Health Technical Memoranda (each individually an "**SHTM**"), various Health Technical Memoranda (each individually an "**HTM**") and various Health Building Notes (each individually an "**HBN**").

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.3, required the Contractor to "*have regard to and take into consideration the requirements of the documents listed [in] Table 3 – NHS Guidance Documentation in section 5.1.3*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Guidance Documentation in Table 3 included, amongst other things, various Scottish Health Technical Notes (each individually an "**SHTN**") and various Scottish Health Planning Notes (each individually an "**SHPN**").

(3) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.4.1, in Section 5.1.4 (Additional Guidance), required the Contractor to comply with various "*standards and documents*", including (without prejudice to that generality): (i) "*b) The Technical Standards complying with the Building Standards (Scotland) Regulations 1990 as amended*"; (ii) "*d) Current British Standards, European Standards, and Codes of*

*Practice, as appropriate*" (each British Standard is individually a "**BS**").; (iii) "*m) Requirements of the utilities companies*"; and (iv) "*o) Local Bye-Law and Regulations*".

(4) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.10, required the Contractor to *"provide Works that comply at all times with the requirements of Table 2, Table 3 and the Additional Guidance identified at Section 5.1.4*".

(5) Employer's Requirements, Section 6.0 (Construction Phase Requirements), Section 6.8 (Commissioning and Handover), Section 6.8.5 (Works inspection, testing and acceptance activities), Paragraph 6.8.5.26, required the Contractor to provide in draft various documents, including (without prejudice to the generality), O&M Manuals and Health & Safety Files "*containing, as a minimum, all testing and commissioning information so far as it is reasonably practicable*".

(6) Employer's Requirements, Section 7.0 (Architectural Requirements), Paragraph 7.9.6, in Section 7.9 (Finishes), required that:

*"Additional specific finishes requirements that must be met by the Contractor's Proposals are identified below; …*

*h) IPS solutions shall be required in all toilet areas and areas where wet/sink provision is required (e.g. utility rooms). The use of flexible hose connections is prohibited*".

(7) Employer's Requirements, Section 8.0 (Building Services Requirements), Paragraph 8.2.8.3, in Section 8.2.8 (Water Systems and Filtration), required that:

"*The Contractor shall design and install the domestic cold and hot water supply installations to fully comply with the requirements of:*

*a) (S)HTM04-01 [sic]*
*b) SHTM 2027*
*c) SHTM 02*
*d) SHTM 2040 "The control of legionella in healthcare premises - a code of practice"; and*
*d) Health Guidance Note "Safe Hot Water and Surface Temperatures*".

(8) Employer's Requirements, Section 8.0 (Building Services Requirements), Paragraph 8.2.8.4, in Section 8.2.8 (Water Systems and Filtration), required that:

"*Pipework shall be stainless steel with compatible accessories*".

(9) Employer's Requirements, Section 8.0 (Building Services Requirements), Paragraph 8.2.8.16, in Section 8.2.8 (Water Systems and Filtration), required the Contractor to

"*carry out a full risk assessment of the complete water systems of the legionella risks and ensure that the system design and equipment selection and installation is carried out to minimise risks*".

(10) Employer's Requirements, Section 8.0 (Building Services Requirements), Paragraph 8.2.28.5, in Section 8.2.28 (Testing and Commissioning of Mechanical Services), required the Contractor to provide "*comprehensive*" copy sets of O&M Manuals and other documents "*for all installed and commissioned equipment*".

(11) SHTM 04-01, Part A, (listed in Table 2 "*NHS Mandatory Documentation*" in the Employer's Requirements, Section 5.1.2), Paragraph 1.10, required that:

"*the design and installation of the hot and cold water services, new or extended, in any NHS premises should also comply with [among other things]:*

- *the Water Byelaws 2000 (Scotland), recommendations of the water suppliers in the Water Regulations Advisory Scheme's (WRAS) 'Water Regulations Guide', and any other requirements of the local water supply authority*".

(12) SHTM 04-01 Part A, Paragraph 7.3 required (among other things) that:

"*[Water] Storage should be designed to minimise residence time in the cistern and maximise turnover of water to avoid stagnation and deterioration of water quality*".

(13) SHTM 04-01, Part A, Paragraph 9.23 required that:

"*Where storage calorifiers are used [as is the case at the Hospital], the hot water storage capacity should be sufficient to meet the consumption for up to two hours; this must include the period of maximum draw-off. The installed hot water capacity should be sized for current needs and should not be designed with built-in capacity for future extensions*".

(14) SHTM 04-01, Part A, Paragraph 16.2 required, among other things, that:

"*The system should be regularly checked during installation to ensure that open pipes, valve ends, cylinder connections etc are sealed to prevent the ingress of dust/debris that could cause problems during commissioning and subsequent operation. …*".

**Issue 2: Standard isolation rooms ventilation**

18. Defects which have been identified in relation to standard isolation rooms ventilation (the "**Standard Isolation Rooms Ventilation Defects**") in the Hospital include (without being limited to) the following: (1) Isolation suite extract vents terminate behind louvres on façade and formed turrets above plant room; (2) Safe change filter housings installed internally to the building; (3) Non-standard extract ventilation between bedrooms and en suites; (4) No low level air transfer grilles within the en suite doors; (5) Excessive access hatches in ductwork; (6) No gas tight shut off damper or spectacle plate on extract systems prior to extract fans; (7) No audio and visual alarms outside entrances to gowning lobbies; (8) No common alarm panel at nurse station; (9) Supply and extract plant and duct access hatches not identified as a biohazard; (10) Supply and extract plant and duct access hatches not identified with the rooms they serve; and (11) Lobby dial pressure gauges inappropriate for monitoring the requisite pressure differential.

19. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Standard Isolation Rooms Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.3, required the Contractor to "*have regard to and*

*take into consideration the requirements of the documents listed in Table 3 – NHS Guidance Documentation in Section 5.1.3*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Guidance Documentation in Table 3 included, amongst other things, various HBNs.

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.10, required the Contractor to *"provide Works that comply at all times with the requirements of Table 2, Table 3 and the Additional Guidance identified at Section 5.1.4*".

(3) Employer's Requirements, Section 8.2.14 (Ventilation of Isolation Rooms), required (among other things) that:

"*8.2.14.4 The Contractor shall provide air conditioning to Isolation Rooms to support:*

*a) Employer's Requirements;*

*b) Clinical Output Specification; and*

*c) NHS Infection Control standards*

*With strict positive / negative pressure differentials*".

(4) HBN 04-01, Supplement 1 (Isolation facilities for infectious patients in acute settings), (listed in Table 3 "*NHS Guidance Documentation*" in the Employer's Requirements, Section 5.1.3) set out, among other things, the ventilation philosophy required for an isolation suite and required (without prejudice to the generality) that:

"***Ventilation – general*** *…*

*4.6 … A flow sensor should be fitted to each system that will alarm on fan failure at a designated nurse station and the estates department. …*

***Extract ventilation***

*4.12 An extract terminal should be fitted at a high level in the en-suite room. An additional terminal may be fitted at low level adjacent to the bedhead in the bedroom.*

*4.13 A transfer grille should be fitted at low level in the door between the bedroom and en-suite room.*

*4.14 The extract duct should be fitted with a spectacle plate or gas-tight damper so that the system can be sealed to allow the isolation suite to be disinfected. …*

*4.15 … Access and cleaning hatches should only be fitted [in ductwork] where absolutely necessary. If fitted they should be of the sealed type and marked with a bio-hazard symbol. …*

*4.16 … If extract filters are fitted they should be in a 'safe change housing' outside the building on the suction side of the fan. …*

*4.19 The supply AHU and distribution ductwork must be clearly marked to identify the isolation suite that they serve. …*

*4.21 A pressure stabiliser of the balanced blade type, set to operate at 10 pascals, should be fitted above the door between the lobby and the bedroom. …*

*4.22 A direct reading gauge showing the pressure in the lobby with respect to the corridor should be mounted at eye level on the corridor wall adjacent to the lobby entry door. The gauge and lobby entry door must be clearly marked to identify the isolation suite to which they refer.*"

(5) Employer's Requirements, Appendix B: Clinical Output Specification: Generic Adult Wards (NSGACL Generic Wards NSG_iss1_rev), Paragraph 2.1 required one room per ward for isolation purposes and having an associated gowning lobby. The associated drawings for isolation suites (NSGACL-G1274_M (57)01-A3_iss1_rev (Isolation Suites, Plantroom Adjacent Ventilation Systems 2009) and NSGACL-G1724_M (57)02-A4_iss1_rev (Isolation Suite Ventilation System Plantroom Above 2009)) included a layout for a positively pressurised ventilation lobby (to prevent egress or ingress of contaminated air).

**Issue 3: Adult Hospital Ward 4B ventilation**

20. Defects which have been identified in relation to Adult Hospital Ward 4B ventilation (the "**Ward 4B Ventilation Defects**") in the Hospital include (without being limited to) a failure to achieve the following: (1) The requisite positive air pressure differential in patient rooms, relative to adjacent space; (2) The requisite air change rate in patient rooms; (3) The requisite positive air pressure differential between the general ward and the remainder of the hospital; and (4) The requisite classification of HEPA filtration of air.

21. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Ward 4B Ventilation Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.2, required the Contractor "*to comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Mandatory Documentation in Table 2 included, amongst other things, various HTMs.

(2) HTM 03-01 (listed in Table 2 "*NHS Mandatory Documentation*" in the Employer's Requirements, Section 5.1.2), Appendix 2, required (among other things): (a) a positive air pressure differential in patient rooms, relative to adjacent space, of 10 Pa or above; (b) an air change rate in patient rooms of 10 per hour; and (c) a supply filter H12 in a neutropeanic patient ward.

(3) Clinical Output Specification (Appendix B in the Employer's Requirements), Adult Hospital, Haemato-Oncology, Section 1, required (among other things):

"*A high proportion of the patients receive chemotherapy and are immuno-compromised, making them vulnerable to infection…*

*Ventilation*

*Please note the haemato-oncology ward area has a very special function and a considerably higher than average requirement for additional engineering support / infrastructure. There should be no opening windows, no chilled beams. Space sealed and ventilated. Positive pressure to the rest of the hospital and all highly filtered air >90%, probably best HEPA with adequate number of positive pressure sealed HEPA filtered side rooms for neutropaenic patients as in the Beatson West of Scotland Cancer Centre"*.

(4) Project Manager's Instruction 424, required (among other things): (a) a positive air pressure differential in patient rooms, relative to adjacent space, of 5 to 10 Pa; (b) an air change rate in patient rooms of 10 to 12 per hour; and (b) a positive air pressure differential between the general ward and the remainder of the hospital of 2 to 3 Pa.

**Issue 4: RHC Ward 2A Ventilation**

22. Defects which have been identified in relation to RHC Hospital Ward 2A ventilation (the "**Ward 2A Ventilation Defects**") in the Hospital include (without being limited to) a failure to achieve the following: (1) The requisite positive air pressure differential in patient rooms, relative to adjacent space; (2) The requisite air change rate in patient rooms; (3) The requisite positive air pressure differential between the general ward and the remainder of the hospital; and (4) The requisite classification of HEPA filtration of air.

23. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Ward 2A Ventilation Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.1.2, required the Contractor "*to comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Mandatory Documentation in Table 2 included, amongst other things, various HTMs.

(2) HTM 03-01 (listed in Table 2 "*NHS Mandatory Documentation*" in the Employer's Requirements, Section 5.1.2), Appendix 2, required (among other things): (a) a positive air pressure differential in patient rooms, relative to adjacent space, of 10 Pa or above; (b) an air change rate in patient rooms of 10 per hour and (c) a supply filter H12 in a neutropeanic patient ward.

(3) Clinical Output Specification (Appendix B in the Employer's Requirements), RHC, Haematology & Oncology, Sections 1 and 7 (in particular) specify that the ward would be "*high dependency*", should be at "*low positive pressure*", a "*risk of infection to patients*" and that the ward would serve, amongst others, bone marrow transplant patients.

**Issue 5: Plant and building services capacity**

24. Defects which have been identified in relation to plant and building services capacity in the Hospital (the "**Capacity Defects**") include (without being limited to) plant and building services (including, without prejudice to that generality, the air handling units (known as "**AHUs**")) having insufficient capacity, and in particular (without prejudice to that generality) having no spare capacity, reducing and inhibiting the pursuer's ability to facilitate future expansion or adaptation to the Hospital and its plant and building services..

25. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Capacity Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

Employer's Requirements, Section 8.0 (Building Services Requirements), Paragraph 8.1.25.1, in Section 8.1.25 (Service Capacity Reserve), required that:

"*In accordance with Good Industry Practice, all plant, plant spaces and building services systems shall be specifically designed and provided with defined reserve capacity allowances and future expansion capabilities for The Works …*".

**Issues 6: Toughened glazing**

26. Defects which have been identified in relation to toughened glazing in the Hospital (the "**Toughened Glazing Defects**") include (without being limited to) instances of fractured glazing. Those include eleven recorded instances up to June 2019. Of those, two have been verified to have been as a result of nickel sulphide inclusions (known as "**NSI**"). The Hospital did not include any means to mitigate the risk of fractured glass falling into trafficked areas. The pursuer has had to carry out extensive mitigation measures to mitigate that risk.

27. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Toughened Glass Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.3 (Life Expectancies & Lifecycle Requirements), Paragraph 5.3.2, required external windows to achieve a design life of at least 25 years.

(3) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.9 (Materials), Paragraph 5.9.4, required that:

"*The Contractor shall ensure that the whole quantity of each product and material required to complete the Works is of a consistent type, quality and overall appearance and is fit for its intended purpose. The Contractor shall ensure all products and materials are handled, stored, prepared and used or fixed strictly in accordance with the manufacturers' written instructions or recommendations and not to be damaged when incorporated into the Works*".

(4) Employer's Requirements, Section 7.0 (Architectural Requirements), Paragraph 7.6.5, in Section 7.6 (Windows) requiring that:

"*s) … The robustness of all glazing must be appropriate to the functionality, relative to safety and resistance to damage …*

*u) the Contractor will be expected to use toughened glass in all locations (windows, doors, balconies, balustrades etc) except areas which are vulnerable to vandals or intruders at ground floor locations. …*".

(5) The first defender's glazing specification (NA-SP-L40), specified the process for heat soaking thermally toughened glass to British Standard EN 14179.

(6) CIRIA Report C632 – Guidance on Glazing at Height, published in 2005, section 10.3 advises the use of risk assessments for glazing, requiring that the risk be as low as reasonably practicable.

**Issue 7: Doors**

28. Defects which have been identified in relation to doors, there being in excess of 7,000 doors, in the Hospital (the "**Door Defects**") include (without being limited to) the following: (1) Use of MDF, rather than solid wood or metal, in door frames; (2) Hinges detaching from door frames; (3) Length of screws used to fix hinges to doorsets too short; (4) Extensive impact damage; (5) Failure of door closers; (6) Delamination of door veneers; and (7) Issues with seals.

29. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Door Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.9 (Materials), Paragraph 5.9.4, required that:

"*The Contractor shall ensure that the whole quantity of each product and material required to complete the Works is of a consistent type, quality and overall appearance and is fit for its intended purpose. The Contractor shall ensure all products and materials are handled, stored, prepared and used or fixed strictly in accordance with the manufacturers' written instructions or recommendations and not to be damaged when incorporated into the Works*".

(3) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.2, required the Contractor "*to comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Mandatory Documentation in Table 2 included, amongst other things, various SHTMs.

(4) SHTM 58 (Internal doorsets) required that:

"*2.13 The grade of doorset should relate to functional requirements …*".

(5) SHTM 59 (Ironmongery) required that:

"2.30 *Hinges must be capable of supporting the door at temperatures of 800°C and higher. … screws should not be less than 38mm*".

(6) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.3 (Life Expectancies & Lifecycle Requirements), Paragraph 5.3.2, required internal doors to achieve a design life of at least 15 years.

(7) Employer's Requirements, Section 7.0 (Architectural Requirements), Section 7.5 (Doors), Paragraph 7.5.5, required that:

"*The following criteria require to be incorporated into the Contractor's proposals:*

*f) all door frames must be of solid or metal construction, and must be securely fixed in to the adjoining construction*".

**Issue 8: Heating system**

30. The Hospital includes a heating system which contains MTHW (i.e. Medium Temperature Hot Water) heating installations with associated Combined Heat and Power ("**CHP**") plant (the "**Heating System**"). Defects which have been identified in relation to the Heating System (the "**Heating System Defects**") include (without being limited to) the following: (1) The CHP system is operating inefficiently with significant rejection of heat and with projected energy savings not having been realised; (2) The absorption chiller (an integral part of the CHP) is not operational; and (3) A water temperature to facilitate proper operation of the CHP is not being achieved. The first defender has been undertaking continuing works on its own account, without success, in an attempt to address these defects.

31. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Heating System Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.2, required the Contractor "*to comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance.

Such NHS Mandatory Documentation in Table 2 included, amongst other things, various SHTMs.

(3) SHTM EnCOde – making energy work in healthcare (listed in Table 2 "*NHS Mandatory Documentation*" in the Employer's Requirements, Section 5.1.2).

(4) Employer's Requirements, Appendix M, M&E.4, Section 3.9, (which included requirements for BREEAM Excellent rating).

(5) Employer's Requirements, Appendix M, M&E.4, Section 2.3, (which included design energy targets).

(6) Employer's Requirements, Appendix M, M&E.4, Section 2.4, (which included operational energy target).

**Issue 9: Atrium roof**

32. The Hospital includes a roof above the atrium in the Adult Hospital. That roof is constructed of a series of inflated cushions using an ETFE (i.e. ethylene tetrafluoroethylene) system (the "**ETFE Roof**"). Defects which have been identified in relation to the ETFE Roof (the "**ETFE Roof Defects**") include (without being limited to) the following: As part of the overall fire strategy, the ETFE Roof was fitted by the first defender with a hot wire system. The purpose in doing so was that in the event of fire the hot wire system would operate to burn off parts of the ETFE to allow ventilation of the atrium. When tested in October 2017, 18 sections of the ETFE roof unintentionally burned off. The hot wire system is accordingly not operational due to it unintentionally burning off ETFE roof sections during testing. A revised fire strategy has had to be implemented by the pursuer as a result. Moreover there is no evidence of CE markings in the ETFE roof and hot wire system.

33. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the ETFE Roof Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.9 (Materials), Paragraph 5.9.4, required that:

"*The Contractor shall ensure that the whole quantity of each product and material required to complete the Works is of a consistent type, quality and overall appearance and is fit for its intended purpose. The Contractor shall ensure all products and materials are handled, stored, prepared and used or fixed strictly in accordance with the manufacturers' written instructions or recommendations and not to be damaged when incorporated into the Works*".

(3) Employer's Requirements, Section 6.0 (Construction Phase Requirements), Section 6.8 (Commissioning and Handover), Section 6.8.5 (Works inspection, testing and acceptance activities).

(4) Employer's Requirements, Section 8.0 (Building Services Requirements), Section 8.2 (Mechanical Systems), Section 8.2.19 (Fire Fighting Systems), Paragraph 8.2.19, required that:

"*8.2.19.1 The Contractor shall provide all fire fighting systems in line with a robust fire strategy for the project as outlined in Volume 2/1 Section 5.11. …*

*8.2.19.2 All elements of the fire fighting systems, such as but not limited to …*

*8.2.19.3 The above shall be fully incorporated into the building design at an early date to ensure that all service routes and plant requirements are integrated in the building envelope while maintaining safe, secure access for maintenance and regular system testing of all systems without disturbance to the Clinical operations*".

(5) Employer's Requirements, Section 9.0 (Civil & Structural Engineering Requirements), Section 9.1 (General Requirements), Paragraph 9.1.1, required that:

"*The Contractor shall ensure the design and construction of the civil and structural engineering elements of the buildings and external works meets the following criteria:*

*b) Be fully co-ordinated with the design of the building fabric, finishes, services, facades, internal walls, medical equipment and existing Site features, including buildings/structures*".

(6) NBS Specification H80-ETFE AFP System Rev 01 October 2010, specified that the hot wire system can be non-destructively tested and that all interfaces should be fully co-ordinated.

(7) EN 12101-10:2005 Smoke and Heat Control Systems, requiring CE markings compliance

**Issue 10: Internal fabric moisture ingress**

34. Defects which have been identified in relation to internal fabric moisture ingress (the "**Internal Fabric Moisture Ingress Defects**") in the Hospital include (without being limited to) the following in relation to en suite facilities: (1) Inappropriately high water absorption moisture readings in internal partition panels; (2) Sections of IPS laminate panels de-bonding; (3) Inappropriate detailing between walls and vinyl floor coverings; (4) Insufficient floor drainage falls; (5) Welds to vinyl floors deteriorating; (6) Vinyl floor coverings deteriorating; (7) Inappropriate welds and seals repairs; and (7) Use of partitioning material (such as, but not limited to, plasterboard) which is insufficiently resistant to water absorption and the growth of mould.

35. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the Internal Fabric Moisture Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Paragraph 5.1.2, required the Contractor "*to comply with the requirements of the documents listed in Table 2 – NHS Mandatory Documentation in section 5.1.2*". Specific statements of compliance were stated as being necessary, with the bidder required to clarify its approach to compliance. Such NHS Mandatory Documentation in Table 2 included, amongst other things, various SHTMs.

(3) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.9 (Materials), Paragraph 5.9.4, required that:

"*The Contractor shall ensure that the whole quantity of each product and material required to complete the Works is of a consistent type, quality and overall appearance and is fit for its intended purpose. The Contractor shall ensure all products and materials are handled, stored, prepared and used or fixed strictly in accordance with the manufacturers' written instructions or recommendations and not to be damaged when incorporated into the Works*".

(4) Employer's Requirements, Section 7.0 (Architectural Requirements), Section 7.9 (Finishes), Paragraph 7.9.5, required that:

"*The following criteria require to be incorporated in the Contractor's proposals for all areas:*

*d) internal partitions shall also be as required by the nature and use of the accommodation and shall incorporate radiation protection requirements, sound reduction, fire resistance, humidity, biological attack and duty as identified by relevant HBN, SHTMs and appropriate British and European Harmonised Standard Specifications, Codes of Practice and ADB Room Data Sheets and as identified elsewhere in this document*".

(5) Employer's Requirements, Section 7.0 (Architectural Requirements), Section 7.9 (Finishes), Paragraph 7.9.10, required various criteria in relation to floors, flooring and floor finishes, coverings, materials, surfaces, profiles, joints, coves, gulleys, gratings, adhesives and the like to be incorporated in the Contractor's proposals (and thereby complied with).

(6) SHTM 56 (Partitions), Paragraph 3.16, required that:

"*Partitions should not comprise materials which promote or sustain the growth of fungi, micro-organisms or insects*".

**Issue 11: Pneumatic transport system ("PTS")**

36. The PTS is a network for transporting specimens within the Hospital. Defects which have been identified in relation to the PTS (the "**PTS Defects**") in the Hospital include (without being limited to) the following: (1) The PTS has been unable to cope with the requisite volume of specimens; and (2) The PTS has suffered an excessive number of failures in operation, including at least 65 failures in the period from November 2018 to February 2019 alone.

37. Without prejudice to the generality of the terms of Art. 15 of Condescendence, the PTS Defects have been caused, or at least materially contributed to, by: (i) the first defender's design, construction and commissioning works being inadequate and deficient; and (ii) without prejudice to that, the failure of the design, construction and commissioning to comply with at least the following:

(1) Employer's Requirements, Section 2.0 (Responsibilities of the Parties), Section 2.2 (Responsibilities of the Contractor), required that:

"*The Contractor shall be responsible for the following:*

*2.2.1 Providing Works that are fit for purpose; …*".

(2) Employer's Requirements, Section 5.0 (General Design & Construction Requirements), Section 5.9 (Materials), Paragraph 5.9.4, required that:

"*The Contractor shall ensure that the whole quantity of each product and material required to complete the Works is of a consistent type, quality and overall appearance and is fit for its intended purpose. The Contractor shall ensure all products and materials are handled, stored, prepared and used or fixed strictly in accordance with the manufacturers' written instructions or recommendations and not to be damaged when incorporated into the Works*".

(3) Employer's Requirements, Section 8.0 (Building Services Requirements), Section 8.2 (Mechanical Systems), Section 8.2.26 (Pneumatic Air Tube Delivery System), Paragraph 8.2.26.1, required that:

"*The Contractor shall provide a pneumatic air tube delivery system as required to the new Facilities to support the Clinical Requirements, as detailed in Appendix M&E7 of the Employers Requirements. The Contractor shall ensure that the pneumatic air transport system shall be designed and installed in accordance with SHTM 2009*".

(4) Employer's Requirements, Appendix M, M&E.7, paragraph 2.3 required that:

*"All components shall be durable, robust and designed for heavy system around the clock use to ensure a smooth, rapid and reliable transmission of every hospital material dispatched".*

**Loss and damage**

38. As a result of the breaches of contract, *et separatim* fault and negligence, of the first, third and fourth defenders, the pursuer has suffered loss and damage. Such loss and damage is reasonably estimated to include, but is not limited to, the following:

| Issue No. | Issue Name | Loss & Damage (£) |
|---|---|---|
| **1** | Water system | 26,500,000 |
| **2** | Standard isolation rooms ventilation | 5,400,000 |
| **3** | Adult Hospital Ward 4B ventilation | 2,100,000 |
| **4** | RHC Ward 2A ventilation | 4,800,000 |
| **5** | Plant and building services capacity | 2,000,000 |
| **6** | Toughened glazing | 5,700,000 |
| **7** | Doors | 10,900,000 |

| | | |
|---|---|---|
| **8** | Heating system | 7,000,000 |
| **9** | Atrium roof | 1,300,000 |
| **10** | Internal fabric moisture ingress | 6,700,000 |
| **11** | Pneumatic transport system ("PTS") | 400,000 |
| **Total** | | **72,800,000** |

39. The total of the foregoing amounts of loss and damage is: £72,800,000. That is the sum first concluded for.

40. As condescended upon above, the first defender has failed to perform the obligations incumbent on it under the Building Contract and, *separatim*, its common law duty, causing the pursuer loss and damage. The second defenders have co-extensively failed to perform or cause to be performed the same obligations, causing the pursuer the same amount of loss and damage as that condescended upon above. Such failures by the second defenders are breaches of the Guarantee. Without prejudice to that generality, they are breaches of the clauses of the Guarantee condescended upon above. Such breaches have caused the pursuer the loss and damage condescended upon above. The total loss and damage, as condescended upon above is: £72,800,000. That is the sum second concluded for. *Separatim*, properly construed, Clause 2 of the Guarantee obliges the second defenders to make payment of that sum as a debt due to the pursuer under and in terms of the Guarantee.

41. This action is necessary in the circumstances

**PLEAS IN LAW**

1. The pursuer having suffered loss and damage through the first, third and fourth defender's breach of contract *et separatim* fault and negligence, as condescended upon, the pursuer is entitled to damages therefor.

2. The sum first concluded for being a reasonable estimate of the loss and damage sustained by the pursuer, decree for payment thereof should be pronounced as first concluded for.

3. The pursuer having suffered loss and damage through the second defenders' breach of contract *et separatim* promise, as condescended upon, the pursuer is entitled to damages therefor.

4. The sum second concluded for being a reasonable estimate of the loss and damage sustained by the pursuer, decree for payment thereof should be pronounced as second concluded for.

5. *Separatim*, the sum second concluded for being a debt due by the second defenders to the pursuer under and in terms of the Guarantee as condescended upon, decree for payment thereof should be pronounced as second concluded for.
